PURPOSE AND EFFECT: Includes changes to all rules listed above to show that Minimum Technical Standards have been changed under the statute to Standards of Practice; clarifies in Rule 5J-17.001, F.A.C., that violations of Chapter 177, F.S., which may be prosecuted by the Board are not limited to violations only of Part I of that chapter; conforms the language used to identify the profession throughout by adding the words “and Mapping” after the word “Surveying” in Rule 5J-17.032,

F.A.C., and adding the words “and mapping” in Rule 5J-17.051, F.A.C., after the word “surveying”; adds definitions to Rule 5J-17.050, F.A.C., to clarify the meaning of words used in Section 472.027, F.S., and to facilitate the removal from Rule 5J-17.010, F.A.C., of cumbersome and unnecessarily repetitive language; adds one new Rule 5J-17.053, F.A.C., to contain standards for professional conduct; moves existing standards for professional conduct which are currently contained in Rule 5J-17.010, F.A.C., into the new Rule 5J-17.053, F.A.C.

SUMMARY: If adopted, the proposed language changes all rules listed above to show that Minimum Technical Standards have been changed under the statute to Standards of Practice; clarifies in Rule 5J-17.001, F.A.C., that violations of Chapter 177, F.S., which may be prosecuted by the Board are not limited to violations only of Part I of that chapter; adds the words “and Mapping” in Rule 5J-17.032, F.A.C., after the word “Surveying” and the words “and mapping” in Rule 5J-17.051, F.A.C., after the word “surveying” so as to correctly refer to the practice and profession being regulated as surveying and mapping; adds definitions to Rule 5J-17.050, F.A.C., to clarify the meaning of words used in Section 472.027, F.S., and to facilitate the removal from Rule 5J-17.010, F.A.C., of cumbersome and unnecessarily repetitive language; adds one new Rule 5J-17.053, F.A.C., to contain standards for professional conduct; moves existing standards for professional conduct which are currently contained in Rule 5J-17.010, F.A.C., into the new Rule 5J-17.053, F.A.C.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION: The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The rule amendments either clarify statutory language and terms used in the rules, or impose new requirements for practices already routinely followed by most practitioners, including the requirement for 6-year records retention. An informal survey of licensees showed that minimal if any costs would be associated with these revisions, which would fall well below the \$200,000 threshold.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULEMAKING AUTHORITY: 472.027 FS.

LAW IMPLEMENTED: 472.027 FS.

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE SCHEDULED AND ANNOUNCED IN THE FAR.

THE PERSON TO BE CONTACTED REGARDING THE PROPOSED RULE IS: Karin Byrne, Senior Attorney, Department of Agriculture and Consumer Services, 407 South Calhoun Street, Tallahassee, Florida 32399-0800, (850)245-1000

THE FULL TEXT OF THE PROPOSED RULE IS:

5J-17.001 Probable Cause Panel.

(1) The probable cause panel is the committee designated by law to determine whether the Department of Agriculture and Consumer Services has sufficient evidence to proceed in the prosecution of a violation of Chapter 472, ~~Part I of~~ Chapter 177, F.S., or any rules of the Board or the Department promulgated ~~promulgated~~ pursuant to those chapters of Florida Law. The panel makes its decision in a confidential meeting based on evidence provided by the Department as a result of the Department's investigation of a complaint which the Department has already determined to be legally sufficient.

(2) No change.

(3) A majority vote of the probable cause panel shall determine whether probable cause exists to believe that a violation has occurred of Chapter 472, F.S., ~~the applicable provisions of~~ Chapter 177, F.S., or 5J-17, F.A.C. 5J-17.010 Grounds for Discipline.

Discipline follows an adjudication of guilt by the Board. In addition to violations of provisions set forth elsewhere in these rules, the following are grounds for discipline of any licensee as that term is defined in Rule 5J-17.050, F.A.C.

(1) Licensees, ~~whether individual people or business entities holding certificates of authorization~~, shall be disciplined for false, fraudulent, deceptive or misleading advertising.

(a) through (b) No change.

(2) Licensees, ~~whether individual people or business entities holding certificates of authorization~~, shall be disciplined for surveying and mapping which is negligently or incompetently performed. Surveying and mapping is negligently performed if the licensee's violation of professional

Standards of Practice or minimum technical standards causes harm to the licensee's client or to the public. A final civil judgment against a licensee for negligence in the practice of surveying and mapping constitutes probable cause for the issuance of an administrative complaint against the licensee for a violation of this rule, except that nothing in this rule shall be construed to require such a final civil judgment for the purpose of finding probable cause.

(3) Licensees, whether individual people or business entities holding certificates of authorization, shall be disciplined for failing to abide by the Standards of Practice minimum technical standards set out in Rule 5J-17.051 5J-17.050 through 5J-17.053 5J-17.052, F.A.C.

(4) Licensees, whether individual people or business entities holding certificates of authorization, shall be disciplined for violating Chapters 177, 472, F.S., or rules promulgated pursuant to any of those chapters by either the Department of Agriculture and Consumer Services or the Board.

(5) Licensees, whether individual people or business entities holding certificates of authorization, shall be disciplined for failing to pay any final judgment entered against the licensee in any civil proceeding against the licensee involving the licensee's practice of surveying and mapping;

(6) Licensees, whether individual people or business entities holding certificates of authorization, shall be disciplined for misconduct in the practice of surveying and mapping, including violations of paragraphs (a) through (c) hereof. Violations of paragraphs (a) through (c)(1) of this subsection constitute misconduct. Violations of Rule 5J-17.053, F.A.C., also constitute misconduct.

(a) Licensees, whether individual people or business entities holding certificates of authorization shall act as faithful agents or trustees of their clients and employers in all professional matters, and their failure to do so shall constitute cause for discipline.

(b) Licensees, whether individual people or business entities holding certificates of authorization, may not be untruthful, deceptive, or misleading in any professional report, statement, or testimony whether or not under oath.

1. A professional report, statement or testimony is false, fraudulent, deceptive or misleading if it: contains a material misrepresentation of fact; omits the statement of any material fact that is necessary to form a complete and accurate understanding of the communication; or is intended or is likely to create an unjustified expectation.

2. Examples of false, fraudulent, deceptive or misleading statements include: a statement that a licensee is a certified specialist in any area outside the licensee's field of expertise; a statement that the licensee's education or experience in surveying and mapping is greater than it actually is; a statement

that the licensee's involvement with a surveying and mapping project will be greater than it actually will be.

(a)(e) Licensees, whether individual people or business entities holding certificates of authorization, may not perform a surveying and mapping assignment unless they are qualified by education or experience to perform the type of surveying and mapping which is the subject of the assignment.

(d) Licensees, whether individual people or business entities holding certificates of authorization, may not affix a signature and seal to any document depicting an area over which the licensee has insufficient knowledge, education, experience, or familiarity.

(e) Licensees, whether individual people or business entities holding certificates of authorization, may not offer any bribe, commission or gift, either directly or indirectly, to obtain selection or preferment for surveying and mapping employment.

1. An example of prohibited activity under this part is a practice known as the "washout" survey, wherein a licensee agrees to accept payment for a surveying and mapping service only upon the contingency of a future event other than the completion of the survey and map.

2. The activity prohibited by this part does not pertain to the payment of a fee to a licensed employment agency for securing salaried employment as a surveyor and mapper.

(f) Licensees, whether individual people or business entities holding certificates of authorization, may not solicit or accept gifts or gratuities directly or indirectly from contractors, their agents or other parties dealing with the licensee's client or employer in connection with work for which the licensee is responsible.

(g) Licensees whether individual people or business entities holding certificates of authorization, may not engage in any professional conflict of interest. An example of a professional conflict of interest would be a situation in which a county employee engages in the private practice of surveying and mapping on a project over which that person, as a county employee, has approval authority.

(h) Licensees, whether individual people or business entities holding certificates of authorization, may not use their surveying and mapping expertise or their professional surveying and mapping status to commit a crime.

(i) Licensees, whether individual people or business entities holding certificates of authorization, may not affix their seals or signatures to survey and mapping documents or other documents required to be signed and sealed by a licensed surveyor and mapper unless the document has been personally prepared by the licensee or prepared under the licensee's supervision, direction and control.

(j) Licensees, whether individual people or business entities holding certificates of authorization, may not

~~knowingly associate with or permit the use of their names in a business venture with any person or business entity which the licensee knows or should know is engaging in unlawful, fraudulent or dishonest business or professional practices.~~

~~(b)(k) Licensees, whether individual people or business entities holding certificates of authorization, shall report to the Department of Agriculture and Consumer Services any person or business entity which the licensee knows is violating Chapters 177, 472, F.S., or any of the rules promulgated pursuant to those chapters by the Department of Agriculture and Consumer Services or the Board.~~

~~(c)(4) Licensees, whether individual people or business entities holding certificates of authorization, may not practice surveying and mapping unless they maintain financial responsibility for the surveying and mapping projects they perform.~~

(d) A licensee shall not, in the practice of surveying and mapping or in any professional dealings, make, publish, or cause to be made or published, any representation or statement about any competitor or any other licensee which the licensee knows or should know is false and which has or is intended to have the effect of injuring the reputation or business of such other licensee.

(e) A licensee shall not express a professional opinion that is factually insupportable or that is not based on accepted surveying and mapping principles, or that misrepresents data and/or its relative significance in any professional report, oral or written statement, or testimony.

(d) Licensees may not offer any bribe, commission or gift, either directly or indirectly, to obtain selection or preferment for surveying and mapping employment.

1. An example of prohibited activity under this subsection is a practice known as the “washout” survey, wherein a licensee agrees to accept payment for a surveying and mapping service only upon the contingency of a future event other than the completion of the survey and map.

2. The activity prohibited by this subsection does not pertain to the payment of a fee to a licensed employment agency for securing salaried employment as a surveyor and mapper.

(e) Licensees may not solicit or accept gifts or gratuities directly or indirectly from contractors, their agents or other parties dealing with the licensee’s client or employer in connection with work for which the licensee is responsible.

(3) Confidentiality: Whether or not a licensee and a client establish requirements of confidentiality contractually, the licensee shall safeguard and preserve the confidences and private information of the client and shall exercise reasonable care to prevent unauthorized disclosure or use thereof by the licensee’s employees and associates, except:

(a) When disclosure is made as a necessary part of performing the services for which the client is employing or engaging the licensee.

61-31.702 Minimum Standards and Practices for Mold Remediators.

(1) Mold Remediation Work Plan (MRWP). The mold remediator shall prepare, for the client, a written MRWP, which is a document that shall specify the following information:

(a) The name and license number of the mold remediator who will perform the mold remediation;

(b) Specific procedures for how the mold remediation will be performed;

(c) The mold remediator's proposed method to stop the source of moisture intrusion and/or humidity within the building (which may require an appropriate building moisture expert, plumber, roofer, air conditioning or mechanical contractor and/or drying contractor or tradesperson to identify and repair the moisture intrusion problem); and

(d) The steps the mold remediator will take to physically remove the mold while protecting the health and safety of the building occupants and mold remediation workers.

(2) When preparing the MRWP, the mold remediator shall:

(a) Inform the client and building occupants of activities that will disturb or will have the potential to disturb areas of mold contamination before the mold remediation begins;

(b) Determine requirements for building containment area(s) and/or isolation requirements;

(c) Identify the methods, equipment, and techniques to be used during the mold remediation; and

(d) Determine the mold remediation worker personal protective equipment (PPE) requirements for the mold remediation.

(3) HVAC System(s). Prior to performing the mold remediation, the mold remediator shall determine whether the building HVAC system(s) should be shut down and/or isolated from the mold remediation work area(s).

(4) When performing a mold remediation, the mold remediator shall:

(a) Ensure that the mold remediation work area is unoccupied;

(b) Cover surfaces within the mold remediation work area that could become contaminated during the mold remediation with 6-mil, fire retardant polyethylene sheeting before the mold remediation;

(c) Cover ventilation and HVAC ducts and grills within the containment area with 6-mil, fire retardant polyethylene sheeting before the mold remediation to contain dust and debris and prevent further contamination;

(d) Determine whether humidity control is required for the mold remediation;

(e) Use wet methods, High-Efficiency Particulate Air (HEPA) vacuum-shrouded tools, and/or HEPA vacuum equipment at the point of dust generation when using mold remediation practices that create excessive dust such as cutting, grinding, and/or resurfacing materials;

(f) Remove mold contaminated materials that cannot be cleaned in place from the building in sealed impermeable plastic bags and/or wrapped in 6-mil, fire retardant polyethylene sheeting for either disposal or off-site cleaning and HEPA vacuum the area from which the materials were removed after the area has dried; and

(g) Display signs advising that a mold remediation project is in progress at all accessible entrances to areas undergoing mold remediation. The signs shall bear the words "NOTICE: Mold remediation in progress" in at least a 72-point font in black on a yellow background.

(5) When performing a mold remediation for an area of 10 to 100 ft² of surface area of mold contamination, the mold remediator shall:

(a) Ensure that all mold remediation workers wear gloves, eye protection, and respiratory protection (e.g., N-95 disposable respirator); and

(b) Construct a Limited Containment area as follows:

1. Prepare the containment area by protecting environmental surfaces and contents with a single layer of 6-mil, fire retardant polyethylene sheeting and/or enclosing the mold remediation area with a layer of 6-mil, fire retardant polyethylene sheeting on the walls and floors;

2. If the mold remediation involves and/or exposes a space above the ceiling used as a return air plenum (i.e., mold impacted ceiling tile removal), the containment area shall be installed from the floor to the roof deck accordingly;

3. When enclosing the mold remediation work area, install an entry or egress slit opening with a cover flap on the outside of the containment area;

4. Shutdown and/or isolate HVAC system(s) operation within the containment area;

5. When enclosing the mold remediation work area, seal all HVAC supply and return air vents, exhaust systems, doorways, chases, and risers within the containment area with a single layer of 6-mil, fire retardant polyethylene sheeting; and

6. Maintain the containment area under negative pressure (i.e., recommended 0.02" H₂O) relative to the surrounding area outside containment. *Note:* utilizing negative-pressure differentials within building structures can create unintended airflow hazards in both hot and humid and cold climate conditions; therefore, the mold remediator shall exercise caution in an effort to prevent or minimize these unintended airflow hazards.

(6) When performing a mold remediation for an area of greater than 100 ft² of surface area of mold contamination, the mold remediator shall:

(a) Ensure that all mold remediation workers wear PPE, which includes respirators, gloves, eye protection, and full body coveralls with head and foot coverings; and

(b) Construct a Full Containment area as follows:

1. Form the containment area by enclosing the mold remediation area with a double layer of 6-mil, fire retardant polyethylene sheeting on the walls and floors;

2. If the mold remediation involves and/or exposes a space above the ceiling used as a return air plenum (i.e., mold impacted ceiling tile removal), the containment area shall be installed from the floor to the roof deck accordingly;

3. Construct a decon chamber (i.e., with dirty and clean side airlock rooms) for entry and egress;

4. Decon chamber entryways (i.e., mold remediation area and clean room side) shall consist of a slit entry with covering flaps on the outside surface of each slit entry;

5. The decon chamber dirty room side shall be large enough to hold a waste container and allow for the removal of protective clothing (i.e., disposal coveralls, gloves, head and foot coverings). All PPE except respirators shall be removed and placed in the waste container while in this chamber;

6. The decon chamber clean room side shall be large enough to allow mold remediation workers to put on and remove PPE as they enter and exit the dirty room;

7. Shut down and/or isolate HVAC system(s) operation within the containment area;

8. Cover all HVAC supply and return air vents, exhaust systems, doorways, chases and risers within the containment area with a single layer of 6-mil. fire retardant polyethylene sheeting; and

9. Maintain the containment area under negative pressure (i.e., recommended 0.02” H₂O) relative to surrounding area outside containment. Note: utilizing negative-pressure differentials within building structures can create unintended airflow hazards in both hot and humid and cold climate conditions; therefore, the mold remediator shall exercise caution in an effort to prevent or minimize these unintended airflow hazards.

(7) If the mold remediator knows or suspects that the mold contaminated materials are contaminated with sewage, chemical pollutants, or biological pollutants, then the mold remediator and his or her workers shall use PPE, which includes respirators, gloves, eye protection, and full body coveralls with head and foot coverings.

(8) The following guidelines shall be followed for the mold remediation of materials with mold growth:

NOTICE OF CHANGE

Notice is hereby given that the following changes have been made to the proposed rule in accordance with subparagraph 120.54(3)(d)1., F.S., published in Vol. 39, No. 47, March 8, 2013 issue of the Florida Administrative Register.

Notices of Correction were also published in the Vol. 39, No. 48, March 11, 2013 and Vol. 39, No. 49, March 12, 2013 issues of the Florida Administrative Register. A previous Notice of Change was published in the Vol. 40, No. 121, June 23, 2014 issue of the Florida Administrative Register. This Notice of Change is necessary to correct typographical coding (striketrough/underline) errors that were published in the Notice of Proposed rule.

62-807.460 Conduct of Studies.

As needed to verify or supplement the studies made by the applicant in support of the application, an agency which is required to prepare an agency report pursuant to Section 403.941, F.S., may conduct additional studies to assist in the development of their agency report.

(1) Examples of issues which may be studied by other specific affected agencies, are as follows. The non-agency specific items listed in subsection (2), should be evaluated in conjunction with these.

(a) through (e) No change.

(f) The affected regional planning council(s): Potential impact upon the public based on the degree to which the project is consistent with the applicable provisions of the comprehensive regional policy plan.

(g) through (h) No change.

(2) No change.

62-807.530 Alternate Corridors, Criteria for Rejection.

(1) through (6) No change.

(7) The alternate corridor proponent’s information submittals pursuant to Section 403.9412(1)(d), F.S., must address the same issues as the original application which are applicable, although such submittals can cross-reference to the original application in regards to data which is basically identical. The level of detail of the alternate corridor proponent’s information submittals pursuant to Section 403.9412(1)(d), F.S., must be commensurate with the scale of change in comparison to the applicant’s original application. For example, if an alternate corridor would shift the corridor several hundred feet from ~~west~~ the original proposal, for a distance of a thousand feet, and overlaps slightly with the original corridor, much of the original application information may address the requisite information for the proposed alternate corridor in that area. Cross-referencing to the application in such scenarios will be adequate in most instances. On the other hand, an alternate that shifts the corridor several miles from where originally proposed that is not joined with the other parts of the corridor not in dispute, would require substantially new, detailed information.

(8) through (9) No change.
