RULE NO.: 6A-6.0571
RULE TITLE: Career and Technical Education and Adult General Education Standards and Industry-Driven Benchmarks

PURPOSE AND EFFECT: To adopt new postsecondary lower division career and technical education programs that institutions may offer effective Spring 2024. This will include the adoption of a 60-credit hour Semiconductor Engineering Technology Associate in Science (AS degree) and a stackable 18-credit hour Semiconductor Cleanroom Operator college credit certificate (CCC).

SUMMARY: Pursuant to s. 1004.92, the Department is responsible for developing program standards and industry-driven benchmarks for career and technical education and adult general education programs. The criteria for qualification of individual courses for inclusion in secondary and postsecondary career education programs and adult general education programs prescribed in Workforce Education programs are annually adopted by the State Board and are published by the Commissioner on the Department’s website. Upon approval of the 2 curriculum frameworks, they will be added to the 2023-2024 academic year statewide inventory of curriculum frameworks.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The Career and Technical Education Standards and Industry-Driven Benchmarks and Adult General Education Standards provide secondary and postsecondary district

institutions and the Florida College System institutions a framework for providing these educational programs. These frameworks contain rigorous standards and benchmarks determined to be necessary for student success in college and careers in the selected programs. The adverse impact or regulatory cost, if any, does not exceed nor would be expected to exceed any one of the economic analysis criteria set forth in Section 120.541(2)(a), F.S., and will not require legislative ratification.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.
