

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The Department’s economic analysis of the adverse impact or potential regulatory costs of the proposed rule did not exceed any of the criteria established in Section 120.541(2)(a), Florida Statutes. As part of this analysis, the Department relied on the office’s experience and knowledge of the industry and the office’s experience in managing a similar program. A license applicant’s use of the services provided by appointed tax collectors on behalf of the department are an optional alternative to multiple existing methods to submit required application information and supporting documentation to the department. Any fees associated with utilizing services by appointed tax collector have been established in statute and are not part of this rule. Tax collector offices participating of this new intake program will benefit from the revenue generated by the program. The program does not require capital improvements or any other direct costs to tax collector offices, and the program is designed to utilize existing personnel resources and minimize required training by participating tax collectors. No interested party submitted additional information regarding the economic impact.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULEMAKING AUTHORITY: 493.6103, 493.6127 FS.
