PURPOSE AND EFFECT: The purpose and effect of these proposed rule amendments is to develop rules to implement the Everglades Forever Act (“EFA”), Section 373.4592(4)(f)5., Florida Statutes, and timely compliance with the EFA.

Components of the EFA Everglades Program related to this initiative are: Reduction of phosphorus loads in the EAA by 25% through implementation of Best Management Practices; Everglades water supply and hydroperiod improvement and restoration; and diverging certain 298 District discharges within the Everglades Construction Project from Lake Okeechobee so that the primary discharge plan will divert flow south through the Everglades Agricultural Area.

SUMMARY: The EFA mandates a 25 percent reduction in the total phosphorus load discharged from the Everglades Agricultural Area (EAA). The District is required to calculate the EAA Basin compliance annually. Chapter 40E-63, F.A.C., established a formal procedure to calculate phosphorus loads. Amendments to the rule are necessary to modify the basin load calculation procedures to account for the changing flow patterns that result from construction of Stormwater Treatment Areas (STAs) and the 298 District Diversion Project. The proposed amendments reflect adjusted land areas and new monitoring locations associated with the projects. The proposed rule amendment modifies EAA Basin load calculations to reflect adjusted land areas and new monitoring locations associated with the construction of STAs and the Chapter 298 District Diversion project.

The Best management Practice (BMP) replacement water model has been publicly reviewed through the rule development process and has been modified accordingly.

Other amendments clarify the review process for minor modifications to permits and correct typographical errors in the current rule.

A new section has been added to identify what appendices are incorporated by reference and to update the date of these documents. Appendices A1 through A5 are being changed to reflect the changes being made in the rule, and are available on the District’s website (sfwmd.gov/rules) or you may contact Pam Smith at the District, 3301 Gun Club Road, West Palm Beach, FL 33406, (561)682-6901 for a copy. Appendix A6 is a new document, and it is therefore being published here in its entirety.

STATEMENT OF ESTIMATED REGULATORY COSTS: No statement of estimated regulatory costs has been prepared.

SPECIFIC AUTHORITY: 373.044, 373.113 FS.

LAW IMPLEMENTED: 373.4592 FS.

40E-63.101 Scope.

(1) The goal of the regulatory program contained in Part I of this Chapter is to reduce by 25% the total phosphorus loads discharged from the EAA.

(a) The EAA is generally depicted in Appendix A1 ~~on~~ Figure 2 ~~40E-63-2~~ and includes the drainage Basins of S-2, S-3, S-5A, S-6, S-7, S-8 and S-150.

(b) The Everglades Protection Area is generally depicted ~~on~~ in Appendix A1 Figure ~~40E-63-1~~ and includes Water Conservation Areas 1, 2A, 2B, 3A, and 3B, the Arthur R. Marshall Loxahatchee National Wildlife Refuge and the Everglades National Park.

(c) No change.

(2) In Part I of this Chapter, the "Works of the District within the Everglades" are specifically named. These include water control structures, rights-of-way, canals, and other water resources which the South Florida Water Management District owns, has accepted responsibility for, or has specifically named. All lands within the EAA are deemed to be users of the Works of the District within the Everglades, and as such, must comply with the applicable provisions of this Chapter. Any owner of a parcel of land in the EAA must obtain the applicable general, individual, or master permit, and comply with applicable rule criteria.

(3) This rule is based on the assumption that implementation of the regulatory program for the EAA will not reduce the quantity of water discharged from the S-2, S-3, S-5A, S-6, S-7, S-8, and S-150 Basins by more than 20% of the quantity discharged historically. The District will evaluate water quantity data collected from the structures, beginning on the effective date of this rule, to determine whether the quantity discharged from the structures after implementation of this regulatory program is less than 80% of the historical amount. If the quantity of water discharged is less than assumed or the water supply for the Everglades is inadequate, the District intends to take appropriate actions in the future to insure water supply for the Everglades. Appropriate actions may include, but are not limited to operational changes, or the initiation of proceedings pursuant to Chapter 120, Florida Statutes, to modify or revoke District permits or rules relating to water quantity used or discharged (surface water management, consumptive water use and works of the district). This section is not intended to modify or limit in any way the District's authority and responsibilities to plan for and regulate consumptive water use, water shortages and water supply.

(4) No change.

(5) The District intends to continue research and evaluation of the data collection procedures and methodology specified in Parts I, II and III of this Chapter, the effectiveness of the regulatory program in accomplishing the goal, and the water quality of the Everglades. The regulatory program and requirements set forth in this Chapter, including all compliance and enforcement procedures for permittees, are subject to revision if future evaluations indicate that the goal of reducing total phosphorus loads discharged from the EAA by 25% is not met. The District will initiate Chapter 120, Florida Statutes, rulemaking procedures to incorporate any significant changes to the data collection procedures, methodology, program requirements, or program compliance and enforcement procedures specified in this Chapter. In addition, other water

quality parameters, water quantity withdrawal conditions, or requirements may be added, and funding requirements for fulfilling other District objectives could be affected.

(6) through (7) No change.

The District shall determine, according to Appendix ~~40E-63-A4~~ (EAA Basin Farm Scale Allocation), which structures shall be required to meet a Maximum Unit Area Load (MUAL) in order to bring the EAA Basin in compliance with the phosphorus load reduction requirement calculated in accordance with Appendix ~~40E-63-A3~~ (EAA Basin Compliance).

2. The District shall provide written notice to permittees of structures required to meet a Maximum Unit Area Load. The notice shall specify the Maximum Unit Area Load assigned to the permittee. The District shall attempt to transmit the written notices by July 1, 1996, and by July 1 of any subsequent year the EAA Basin is determined to be not in compliance with the phosphorus load reduction requirement calculated in accordance with Appendix ~~40E-63-A3~~ (EAA Basin Compliance).

3. Permittees shall submit to the District within 45 days of transmittal of the written notice, a revised BMP Plan which proposes changes in BMPs needed to ensure that the Maximum Unit Area Load will be met. The revised plan shall include all the elements specified in Rule 40E-63.132(6), F.A.C. (Content of Application for Individual Permits in the EAA Basin), or explain why an omitted element is not relevant to evaluation of the revised Plan. The implementation schedule shall require complete installation within 6 months of District approval of the revised BMP Plan. Permittees shall make good faith efforts to provide complete revised BMP Plans. Failure to provide a complete revised BMP Plan within 45 days shall not justify a corresponding delay of the date on which a permittee is required to meet a Maximum Unit Area Load pursuant to Subsection 40E-63.145(3)(e)6., F.A.C.

4. No change.

5. Permittees who fail to complete the revised BMPs according to the approved implementation schedule shall be subject to enforcement action pursuant to Subsection ~~(6)~~(5) below.

6. Permittees shall be required to meet the Maximum Unit Area Load on the first April 30 occurring 24 months after the April 30 on which the EAA Basin was determined to be not in compliance with the load allocation calculated in accordance with Appendix ~~40E-63-A3~~ (EAA Basin Compliance).

7. If the EAA Basin does not achieve the phosphorus load reduction sufficient to bring the Basin in compliance with the phosphorus load reduction requirement calculated in accordance with Appendix ~~40E-63-A3~~ on the April 30 occurring 24 months after the April 30 on which the EAA Basin was determined to be not in compliance, the District shall repeat the procedures specified in Subsections 1.-6. above, and seek whatever enforcement or corrective action is

appropriate, including those set forth in subsection ~~(6)(5)~~ below against permittees who failed to achieve their Maximum Unit Area Load.

(4) No change.

(a) Applicants who elect to participate in the Early Baseline Option must declare their intention to do so in the initial permit application due in 1992. In addition to the information required by Rule 40E-63.132, F.A.C. (Content of Application for Individual Permits in the EAA Basin), the application must identify soil type, include soil phosphorus test results and methods, describe crops for the last five years, indicate expected future crops, describe the automatic recording rainfall collectors to be installed at each structure discharging to a District primary canal, and identify the acreage served by each collector.

(b) through (f) No change.

1. through 2. No change.

3. The District shall consider requests presented by permittees under Rule 40E-63.101(4), F.A.C., to calculate the baseline to reflect implementation of BMPs prior to implementation of the plan for monitoring water quantity and quality. Such requests should be accompanied by adequate supporting evidence, for example data from the area subject to the request and from a similar area on which BMPs have not been implemented regarding soil type, depth of ~~muck~~ much, crop type, historical usage, drainage system, water quality and water quantity.

(g) If the EAA Basin is determined to be in compliance with the phosphorus load reduction requirement calculated in accordance with Appendix ~~40E-63-A3~~, as of April 30, 1996, or annually thereafter, permittees who elected to participate in the Early Baseline Option shall not be subject to compliance and enforcement action by the District in regard to achievement of the phosphorus load limitation, so long as the EAA Basin remains in compliance. However, permittees are still subject to monitoring and enforcement action for failure to comply with the requirements of an approved monitoring plan or BMP Plan, pursuant to Subsection (2) above.

(h) If the EAA Basin is determined to be not in compliance as of April 30, 1996, or any subsequent year, with the allocation calculated in accordance with Appendix ~~40E-63-A3~~, permittees who elected to participate in the Early Baseline Option shall be subject to the following compliance and enforcement actions:

1. The District shall determine whether the permittee has reduced the Early Baseline load from permitted structures by 25%, adjusted for hydrological variability. The District shall provide written notice of the determination to permittees. The District shall attempt to transmit the written notices by July 1, 1996, and by July 1 of any subsequent year the EAA Basin is found to be not in compliance with the phosphorus load reduction requirement calculated in accordance with Appendix ~~40E-63-A3~~ (EAA Basin Compliance).

2. No change.

3. Permittees who have not reduced the Early Baseline load by 25% shall submit to the District, within 45 days of transmittal of the written notice, a revised BMP Plan which proposes changes in BMPs needed to ensure that the 25% reduction will be achieved. The revised Plan shall include all the elements specified in Rule 40E-63.132(6), F.A.C. (Content of Application for Individual Permits in the EAA Basin), except for elements not relevant to evaluation of the revised Plan. The revised Plan shall contain an explanation of why any omitted elements are not relevant. The implementation schedule shall require complete installation of revised BMPs within 6 months of District approval of the revised BMP Plan. Permittees shall make good faith efforts to provide complete revised BMP Plans. Permittees shall be required to meet the 25% reduction the next time the EAA Basin is determined to be not in compliance with the load allocation calculated in accordance with Appendix ~~40E-63-A3~~ (EAA Basin Compliance). Failure to provide a complete revised BMP Plan within 45 days shall not justify a corresponding delay of the date on which a permittee is required to meet the 25% reduction.

(h) No change.

(5) In applying the requirements of this Chapter after the EAA has been determined to be not in compliance with the allocation calculated in accordance with Appendix ~~40E-63-A3~~, the District shall determine whether to accept an alternative method or level of phosphorus reduction for a particular permittee based on the demonstrated site-specific impracticability of achieving the required reduction of phosphorus in accordance with an approved Best Management Plan, if requested by a permittee.

(a) through (d) No change.

(6) No change.

40E-63.223 Model to Quantify Annual Allocation of Replacement Water.

(1) This section outlines the model to be used to calculate the volume of water needed to compensate for reductions in runoff from the EAA resulting from implementation of BMPs pursuant to ~~Chapter~~ 40E-63, F.A.C. Replacement water volumes refer to flows reaching the Water Conservation Areas or Stormwater Treatment Areas. Replacement water volumes do not include any flows released for urban water supply or agricultural water supply.

(2) The model is based upon hydrologic data collected during the base period. Procedures for calculating EAA runoff and rainfall are as follows:

(a) Total EAA Runoff is calculated from daily flow measurements obtained from the District's data base. The data base identifiers are listed in the following table:

$$\text{Runoff} = - \text{Minimum} (0, S3 + \del{G88} + G136 + G344A + G344B + G344C + G344D + G402A + G402B + G402C + G402D - S8 - G200 - G349B - G350B - G357 - G404 - G410 - G600) - \text{Minimum} (0, S2 - S6 - S7 - S150 - G328 + \text{ESPS}) - \text{Minimum} (0, \text{HGS5} - S5A5AW - G250 + 0.813 \text{EBPS})$$

2. through 3. No change.

(b) No change.

(3) The methodology to calculate ~~model calculates~~ the annual replacement water volume is based upon:

(a) Volume of runoff from the EAA under base-period conditions, adjusted for variations in monthly annual rainfall;

(b) through (d) No change.

(4) The method equations for calculating the annual replacement water volume (1000 acre-ft) is based on a two step process are:

Step 1. A statistical test is used to determine if the monthly rainfall/runoff relationship observed during the Averaging Period is statistically similar to the monthly rainfall runoff relationship observed during the Base Period. If the statistical test demonstrates similarity in the runoff response to rainfall at a 90% confidence level between the Base Period and the Averaging Period, no Replacement Water deliveries will be made.

The test is conducted utilizing the 120 months of data from the Base Period and the 60 months of data from the Averaging period. An F-Test is then performed to determine whether the regression coefficients for the two time periods are significantly different.

Step 2. If the test in Step 1 fails to demonstrate similarity, then the Replacement Volume will be computed as the greater of zero (0.0) and the Replacement Volume as computed based on the following:

Replacement Volume	=	Predicted Runoff x Runoff Reduction x Area Factor x Fraction South
Predicted Runoff	=	Total Runoff for Current Water Year Predicted from Base Period Rainfall/Runoff Regression (1000 acre-ft)
	=	$1585.6 + 53.87 \times \text{Rainfall}$
Runoff reduction	≡	Sum of the twelve monthly values calculated by taking the difference between the runoff predicted for each month of the Current Water Year using the Base Period Equation, and the runoff predicted for the same months using the Averaging Period Equation. (1000 acre-ft)
Base Period Equation	≡	$1.2091 * \text{Rainfall}^2 + 13,764 * \text{Rainfall} + 2.6$

<u>Avg. Period Equation</u>	=	<u>This equation is calculated each year by computing the second order regression between the monthly rainfall and monthly runoff for the five years of data collected during the Averaging Period</u>
Rainfall	=	Total EAA Rainfall for <u>each month of the Current Water Year</u> (inches)
Area Factor	=	Factor to Account for Change in Watershed Contributing Area
	=	Average Area in Current Water Year/Average Area in Base Period
Average Area for Base Period	=	523,791 acres (Everglades Protection Project, Conceptual Design, February 15, 1994)
<u>Runoff Reduction</u>	=	<u>Measured Runoff Reduction for Averaging Period = 1 - (Observed EAA Runoff) / (Predicted Runoff x Area Factor)</u>
—	=	<u>Sum over Averaging Period</u>
Fraction South	=	Fraction of Total Runoff Discharged to South During Averaging Period
	=	(EAA Runoff to South) / (EAA Total Runoff)
	=	Sum over Averaging Period

DEPARTMENT OF CHILDREN AND FAMILY SERVICES

Economic Self-Sufficiency Program

RULE CHAPTER TITLE: Temporary Cash Assistance
RULE CHAPTER NO.: 65A-4

RULE TITLE: Up-Front Diversion
RULE NO.: 65A-4.212

PURPOSE AND EFFECT: This proposed rule amendment implements the requirements for s. 445.017, F.S. The 2000 Legislature enacted Chapter 2000-165, Laws of Florida, to create the Workforce Innovation Act 2000 and to transfer, renumber and revise provisions of the Work and Gain Economic Self-Sufficiency (WAGES) Act. Section 414.015, F.S., Diversion, was transferred and renumbered as s. 445.017, F.S., and amended. The amendments require regional workforce boards (RWB) to determine if an applicant family is likely to meet eligibility requirements for diversion services and to identify barriers, that if removed may allow the applicant to obtain/retain employment and prevent the family

from needing ongoing temporary cash assistance (TCA). The department is given rulemaking authority governing the administration of this section.

SUMMARY: This rule amendment provides the screening process to determine potential up-front diversion eligibility; impact on food stamps/Medicaid eligibility and time limits; for a one-time payment of up to \$1,000 per family; final RWB designee approval and authorization for receipt of a diversion payment; and, timeframe for the department to process payment. It also restricts application for TCA for three months unless the RWB designee determines the family has an emergency and increases the prorated repayment period from two months to eight. Additionally, forms are incorporated by reference to address policy changes.

SUMMARY OF STATEMENT OF REGULATORY COSTS: None.

Any person who wishes to provide information regarding the statement of estimated regulatory costs, or to provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

SPECIFIC AUTHORITY: 445.017(6) FS.

LAW IMPLEMENTED: 445.017 FS.

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE HELD AT THE TIME, DATE, AND PLACE SHOWN BELOW (IF NOT REQUESTED, THIS HEARING WILL NOT BE HELD):

~~(3) Restrictions From Up-Front Diversion. Those applicants who have received an up-front diversion payment within the past five years will not be eligible for an up-front diversion payment.~~

~~(3)(4) Emergency Situations. Emergency situations that would be barriers to obtaining or continuing employment are determined on a case-by-case basis by the RWB designee. Some examples of situations that may be considered emergency situations in this regard are: automobile repairs; catching up on shelter payments to prevent eviction; catching up on utility bills, except for cable television and long distance telephone charges, to prevent interruption of service; medical services; replacement of income lost due to medical leave without pay; emergency child care while seeking permanent child care; and, clothing, shoes, tools or equipment necessary for employment.~~

~~(4)(5) Verification.~~

(a) No change.

~~(b) Social Security Numbers. Social Security numbers will not be verified at the time of application for an up-front diversion payment. The number or cooperation in making application for a number, however, must be provided at that time. Social Security numbers provided will be verified by computer matching to the Social Security Administration's Numident files.~~

~~(c) Emergency Situation. The family's emergency situation will be verified by methods such as securing written estimates of the cost of repairs, equipment or services. If the situation is questioned, face to face collateral contacts may be used as final verification. A subsequent emergency situation causing the family to apply for temporary cash assistance within the up-front diversion period must meet the definition of emergency in sub-section (4) of this rule.~~

~~(b)(4) The applicant's statement is acceptable for all other information unless questioned.~~

(5) Restriction on Application for TCA. The RWB designee will use the CF-ES 2075, Agreement for Up-Front Diversion Payment/Service, Oct 00, incorporated by reference, to notify applicants that receipt of up-front diversion will restrict application for TCA for three months unless an emergency is demonstrated to the RWB designee. Both the applicant and the RWB designee must sign the CF-ES 2075 noting the restriction.

(6) Approval for Payment. The RWB designee is responsible for the approval or denial of a family for receipt of up-front diversion services, the determination of the level of financial need for a one-time only payment of up to, and not to exceed \$1,000, or both. One-time services such as child care or transportation cannot exceed four months in accordance with 45 CFR Part 260, s. 260.31(b). The RWB designee must stipulate the amount of the authorized payment, sign the CF-ES 2075, and forward the completed form to the department.

(7) Denial or Opts Not to Receive. Applicants who are denied approval for or who opt not to receive up-front diversion or who want to apply for TCA are to be referred, if appropriate, to the department for TCA eligibility determination using the CF-ES 2066, RFA, and regular TCA eligibility application procedures.

(8)(6) Violation of Agreement. If the family that received an up-front diversion payment applies for TCA temporary cash assistance within three months, the family must be referred to the RWB designee for Work Registration and a determination that a demonstrated emergency exists. Upon receipt of the determination the family meets emergency criteria, the department will complete the TCA eligibility determination and calculate the repayment value of the up-front diversion payment. The up-front diversion repayment amount will be withheld from any TCA temporary cash assistance benefit for which the family is otherwise eligible in the three-month period. The amount to be withheld will be based on proration

of the up-front diversion payment over eight ~~two~~ months. The prorated up-front diversion payment will be deducted from the temporary cash assistance for which the family is eligible in the second and third months of the up-front diversion period.

(9)(7) Processing Time Frame. The up-front diversion payment must be expedited and processed by the department within five work days of receipt of the completed CF-ES 2075 from the RWB designee will be made available within seven days of the application date for individuals meeting up-front diversion screening criteria.

(10) Medicaid, Food Stamps, and Time Limits Impact. Up-front diversion assistance does not count toward the TCA time limits. The application for up-front diversion will not impact on the application for food stamps and/or Medicaid as long as the eligibility requirements of those programs are met.

(11)(8) Transitional Child Care and Transitional Services Medicaid. Individuals who receive up-front diversion may be ~~are not~~ eligible for transitional child care or transitional services Medicaid.

(12)(9) The following forms are incorporated by reference: ~~Up-Front Diversion Pre Screening Form, CF-ES 2073A, Oct 97, CF-ES 2073B, and Agreement for Up-Front Diversion Payment, CF-ES 2075, Oct 97~~ and may be obtained from the Department of Children and Family Services, Economic Self-Sufficiency, 1317 Winewood Boulevard, Building 3, Room 423, Tallahassee, Florida 32399-0700.

These plans involve issues of environmental safety; as the St. Johns River Water Management District had already issued its contract for this work (with a start date of December 20, 2000, and a limited time period for the construction to be done), the public welfare was also involved with respect to an expeditious review of these plans.

While publication in the Florida Administrative Weekly was not possible given these time constraints, notice of the meeting was published in a newspaper of general circulation in each of the eleven counties comprising the Florida Inland Navigation District. A copy of the Declaratory Statement may be obtained: Paula P. Ford, Agency Clerk, Department of Community Affairs, Sadowski Building, 2555 Shumard Oak Boulevard, Tallahassee, Florida 32399-2100.

DEPARTMENT OF CORRECTIONS

NOTICE IS HEREBY GIVEN that the Department of Corrections has issued a response to a Petition to Initiate Rulemaking from Mark Osterback. The Petitioner requested that the Department of Corrections amend Rules 33-601.301-.314, Florida Administrative Code, to adopt the procedural comments and emphases contained in the 1998 Inmate Discipline Procedures Manual. The Petitioner contends that the contents of the manual are unpromulgated rules not properly adopted via the rulemaking process and as such constitute an invalid exercise of delegated authority.

The Department denied Inmate Osterback's Petition to Initiate Rulemaking on the grounds that the Petitioner lacks standing to present such a challenge and has, in effect, utilized the incorrect procedural vehicle.

A copy of the Order may be obtained from: Giselle Lylen Rivera, Assistant General Counsel, Department of Corrections, 2601 Blair Stone Road, Tallahassee, Florida 32399-2500.

NOTICE IS HEREBY GIVEN that the Department of Corrections has issued a response to a Petition to Initiate Rulemaking from Jeffrey Walker. The Petitioner requested that the Department of Corrections amend Rule 33-601.210(4)(m), Florida Administrative Code, to delete the phrase "since the setting of the PPRD" from the rule on the grounds that the phrase improperly excludes from consideration those inmates incarcerated prior to 1983 who are serving twenty-five year minimum mandatory terms because a presumptive parole release date has not been set.

The Department denied Inmate Walker's Petition to Initiate Rulemaking. The Rule currently provides for progress assessments for inmates serving life sentences without an established release date. When a release date is set, for some date after expiration of the twenty-five year minimum mandatory period, the department may recommend a release date earlier than that contemplated by the original PPRD. Thus, amendment of the rule is unnecessary.

A copy of the Order may be obtained from: Giselle Lylen Rivera, Assistant General Counsel, Department of Corrections, 2601 Blair Stone Road, Tallahassee, Florida 32399-2500.

DEPARTMENT OF COMMUNITY AFFAIRS

DCA Final Order No. DCA00-OR-411

In re: CITY OF MARATHON, FLORIDA

LAND DEVELOPMENT REGULATIONS

ADOPTED BY ORDINANCE NO. 00-10-13

FINAL ORDER

The Department of Community Affairs (the "Department") hereby issues its Final Order, pursuant to §§ 380.05(6) and (11), Fla. Stat., and § 380.0552(9), Fla. Stat. (2000), which require the Department to enter a final order approving or rejecting land development regulations adopted by the City of Marathon ("Marathon"). This Final Order approves Marathon Ordinance No. 00-10-13 as set forth below.

FINDINGS OF FACT

1. The Florida Keys Area is a statutorily designated area of critical state concern, and Marathon is a unit of government within the Florida Keys Area of Critical State Concern.

2. On November 6, 2000, the Department received for review Marathon Ordinance No. 00-10-13 which was adopted by the Marathon City Council on October 10, 2000 ("Ord. 00-10-13"). Ord. 00-10-13 amended Marathon's regulations concerning vacation rentals.

3. Ord. 00-10-13 includes new and amended regulations regarding which land use districts vacation rentals are allowed in, city permit and occupational license requirements, renewal of permit and license provisions, use and occupancy restrictions and building, safety and miscellaneous compliance provisions. Ord. 00-10-13 repeals several prior provisions of

its Code regarding vacation rentals as those provisions were initially promulgated by Monroe County and made part of Marathon's land development regulations at time of its incorporation.

4. Ord. 00-10-13 is consistent with the statutory Principles for Guiding Development as a whole.

CONCLUSIONS OF LAW

1. The Department is required to approve or reject any and all land development regulations that are enacted, amended or rescinded by any unit of government in the Florida Keys Area of Critical State Concern within 60 days of receipt by the Department. §§ 380.05(6) and (11), Fla. Stat., and § 380.0552(9), Fla. Stat. (2000).

2. Marathon is a unit of government within the Florida Keys Area of Critical State Concern. § 380.0552, Fla. Stat.; Rule 28-29.002 (superseding Chapter 27F-8, Fla. Admin.; and Ch. 99-427, Laws of Fla. (1999).

3. "Land development regulations" include local zoning, subdivision, building and other regulations controlling the development of land. § 380.031(8), Fla. Stat. The regulations adopted by Ord. 00-01-13 are land development regulations, as defined by statute.

4. All land development regulations enacted, amended or rescinded by Marathon must be consistent with the Principles for Guiding Development (the "Principles"). § 380.0552(7), Fla. Stat.; see Rathkamp v. Department of Community Affairs, 21 F.A.L.R. 1902 (Dec. 4, 1998), aff'd, 740 So. 2d 1209 (Fla. 3d DCA 1999). In reviewing the land development regulations for consistency, the Principles shall be construed as a whole and no specific provision shall be construed or applied in isolation from the other provisions. § 380.0552(7), Fla. Stat.

5. The Department has reviewed all provisions of Ord. 00-01-13 for consistency with the Principles and has determined that Ord. 00-07 is consistent with the Principles as a whole. § 380.0552(7), Fla. Stat.

WHEREFORE, IT IS ORDERED that Ord. 00-10-13 is found to be consistent with the Principles found at § 380.0552(7), Fla. Stat., as a whole, and is hereby APPROVED.
