Project No.: FS – 299A

Tibbals Learning Center, Phase II

Ringling Museum, Florida State University, Sarasota, Florida

The Tibbals Learning Center Phase II (TLC Phase II) project consists of approximately 20,000 gsf of new construction containing primarily gallery expansion space on the first floor and storage exhibit expansion space on the second floor. The

design of TLC Phase II needs to be completely integrated and connected with the existing Phase I facility. The site is west of and adjacent to Phase I and in between the historic road to the south, and the north boundary of the Ringling property.

The estimated construction budget is approximately \$6,165,000. The draft Facility Program can be found on the Facilities Design and Construction website: www.fpc.fsu.edu.

The contract for construction management services will consist of two phases. Phase one is pre-construction services, for which the construction manager will be paid a fixed fee. Phase one services include value engineering, constructability analyses, development of a cost model, estimating, and the development of a Guaranteed Maximum Price (GMP) at either the 50% or 100% Construction Document phase. The final determination of the exact timing of the GMP will be confirmed prior to entering into contract with the prospective Construction Manager. If the GMP is accepted, phase two, the construction phase, will be implemented. In phase two of the contract, the construction manager becomes the single point of responsibility for performance of the construction of the project and shall publicly bid trade contracts, encouraging the inclusion of Small and/or Minority Owned Business Enterprises. Failure to negotiate an acceptable fixed fee for phase one of the contract, or to arrive at an acceptable GMP within the time provided in the agreement may result in the termination of the construction manager's contract.

Selection of finalists for interviews will be made on the basis of construction manager qualifications, including experience and ability; past experience; bonding capacity; record-keeping/administrative ability, critical path scheduling expertise; cost estimating; cost control ability; quality control capability; and qualifications of the firm's personnel, staff and consultants. Finalists will be provided with a copy of the building program and the latest documentation prepared by the project architect/engineer, a description of the final interview requirements and a copy of the standard Florida State University's construction management agreement. The Selection Committee may reject all proposals and stop the selection process at any time. The construction manager shall have no ownership, entrepreneurial or financial affiliation with the selected architect/engineer involved with this project.
