DEPARTMENT OF CORRECTIONS

RULE NO.: RULE TITLE:
 33-210.201 ADA Provisions for Inmates

PURPOSE AND EFFECT: The rule is being amended to reflect current Department procedure requiring copies of ADA requests to be placed in the confidential section of the inmate’s classification file rather than in their medical file; to add definitions for Regional ADA Coordinator and Central Office ADA Coordinator; to eliminate references to Institutional ADA Coordinators; to extend the time frame for responding to accommodation requests; to allow the Central Office ADA Coordinator to assign a designee to review whether an accommodation would constitute an unfair burden on the Department; and to make additional "clean-up" revisions as necessary.

SUMMARY: Rule amendment is necessary to reflect current Department procedure requiring copies of ADA requests to be placed in the confidential section of the inmate’s classification file rather than in their medical file; to add definitions for Regional ADA Coordinator and Central Office ADA Coordinator; to eliminate references to Institutional ADA Coordinators; to extend the time frame for responding to

accommodation requests; to allow the Central Office ADA Coordinator to assign a designee to review whether an accommodation would constitute an unfair burden on the Department; and to make additional "clean-up" revisions as necessary.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The Department used an itemized checklist to conduct an economic analysis and determine if there is an adverse impact or regulatory cost associated with this rule that exceeds the criteria. Upon review of the proposed changes to the rule, the Department has determined that the amendments will not exceed any one of the economic analysis criteria in a SERC as set forth in s. 120.541(2)(a), F.S.

Any person who wishes to provide information regarding a statement of estimated regulatory costs or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

Emergency Communications Board

RULE NO.: RULE TITLE:
 60FF1-5.010 Fee Allocation

PURPOSE AND EFFECT: The existing rule sets distribution percentages for certain funds. In Chapter 2023-55, Laws of Florida, the percentages were changed and incorporated into statute, so the rule can be repealed.

SUMMARY: The rule is being repealed.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: During discussion of the economic impact of this rule at its Board meeting, the Board concluded that this rule change will not have any impact on licensees and their businesses or the businesses that employ them. The rule will not increase any fees, business costs, personnel costs, will not decrease profit opportunities, and will not require any specialized knowledge to comply. This change will not increase any direct or indirect regulatory costs. Hence, the Board determined that a Statement of Estimated Regulatory Costs (SERC) was not necessary and that the rule will not require ratification by the Legislature. No person or interested party submitted additional information regarding the economic impact at that time.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal

for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

Switchgear and VAR Harmonic Compensation System Replacement, National High Magnetic Field Laboratory, Florida State University, Tallahassee, Florida

NOTICE TO CONSTRUCTION
MANAGER/DESIGN/BUILD TEAM

Florida State University (FSU) announces that Services for the Construction Manager Design-Build Team will be required for the project listed below:

PROJECT NUMBER: 2000062

RFQ NUMBER: 6589-M (FSU Procurement Portal)

PROJECT NAME AND LOCATION: Switchgear and VAR Harmonic Compensation System Replacement, National High

Magnetic Field Laboratory, Florida State University, Tallahassee, Florida

Project Description: This project includes replacement of the medium voltage switchgear and the power factor and harmonics correction system which will provide electrical distribution and power quality control at a 12.47kV level for the National High Magnetic Field Laboratory (NHMFL). This project will include removal of the existing 2,000A Main-Tie-Main switchgear unit and replacement with new switchgear in the same location. Much of the existing breaker layout and feeders will remain in the same location, but there are some modifications to the new switchgear layout. In order to meet power factor improvement targets and operational requirements of IEEE 519, the existing VAR harmonic compensation system shall be removed and replaced with new designed system. The new system is much larger and will require modifications to the site for equipment placement, including concrete, walls, fencing, utilities, asphalt, and other scopes of work. The project should be coordinated to restore power to the building loads as soon as possible.

The new medium voltage switchgear and VAR harmonic compensation system will require significant expertise to manage the details of working with the equipment manufacturer and commissioning the new equipment to resolve any performance issues and ensure the new equipment meets the project requirements. The new switchgear, VAR harmonic compensation system, site modifications, and electrical distribution for connecting these systems shall comply with NEC 2017, FBC 7th Edition, IEEE 519 Harmonic Standard, FSU Design Guidelines, and City of Tallahassee Utility standards.

The Construction Manager design-build team shall include all disciplines necessary to complete site modification design documents for permitting, as well as, all contractors necessary to complete project scope of work.

The switchgear and VAR harmonic compensation system replacement 100% construction documents have been completed by Schneider Electric (SE) Engineering Services.
