Section II
Proposed Rules

DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Division of Food Safety

RULE NO.: **RULE TITLE:**
 5K-10.001 Documents Incorporated by Reference and Definitions

PURPOSE AND EFFECT: The proposed rule will adopt the most recent versions of regulatory documents governing dairies, including the 2023 Pasteurized Milk Ordinance (PMO), and the associated guidance documents, Procedures Governing the Cooperative State-Public Health Service/Food and Drug Administration Program of the National Conference on Interstate Milk Shipments, Methods of Making Sanitation Ratings of Milk Shippers and the Certifications/Listings of Single-Service Containers and/or Closures for Milk and/or Milk Products Manufacturers, and Evaluation of Milk Laboratories. Currently, the 2017 versions of these four documents are adopted by rule. Adoption of the current regulatory documents is needed to ensure compliance with Federal standards as required by the National Conference on Interstate Milk Shipments and to ensure Florida is included on the Interstate Milk Shippers List which is maintained by the Food and Drug Administration. Section 502.014, Florida Statutes, also requires the Department adopt rules implementing chapter 502, Florida Statutes, that are “guided by and may conform to the definitions and standards of the administrative procedures and provisions of the Grade “A” pasteurized milk ordinance and other applicable federal requirements.”

SUMMARY: The proposed change adopts the current Grade A Pasteurized Milk Ordinance (“PMO”) and associated guidance documents needed for compliance with section 502.14, Florida Statutes.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: Adoption of the 2023 PMO and the associated guidance documents ensures that dairies in Florida may ship milk interstate as provided by the Interstate Milk Shippers List

maintained by the FDA. Dairies shipping milk interstate must therefore comply with the PMO regardless of its adoption in rule. Furthermore, Sections 502.053 and 502.091, Florida Statutes, already require dairies and dairy products in Florida comply with the PMO, so there is no additional cost to the producer by adopting the provisions of the PMO and its guidance documents in rule.

The Department’s economic analysis of the adverse impact or potential regulatory costs of the proposed rule did not exceed any of the criteria established in Section 120.541(2)(a), Florida Statutes.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

LAW IMPLEMENTED: 502.012, 502.014, 502.053, 502.091, FS

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE SCHEDULED AND ANNOUNCED IN THE FAR.

PURPOSE AND EFFECT: The purpose of the proposed rules is to adopt by reference a revised version of the manual titled

Water Quality/Quantity Best Management Practices for Florida Nurseries (April 2014 Edition, DACS-P-01267). The new edition updates language to reflect statutory changes impacting the Best Management Practices program, provides more specific direction and expectation regarding the best management practices, and removes language not related to water quality or water conservation.

SUMMARY: The subject areas of the proposed rules are water quality and water conservation best management practices for Florida nurseries, enrollment in the program, and implementation verification site visit requirements. Proposed rule revisions require compliance with Rule Chapter 5M-1, F.A.C., and therefore language that is duplicative with Chapter 5M-1, F.A.C., is removed. Rule revisions also clarify the intent of BMP Program enrollment and checklist requirements.

SUMMARY: The Board will be updating the Dental Licensure Application to accommodate changes in the verification of out-of-state practice.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: During discussion of the economic impact of this rule at its Board meeting, the Board concluded that this rule change will not have any impact on licensees and their businesses or the businesses that employ them. Section IV
Emergency Rules

DEPARTMENT OF CITRUS

RULE NO.: 20ER24-5
 RULE TITLE: Grapefruit Maturity Standards - Processed
 SPECIFIC REASONS FOR FINDING AN IMMEDIATE
 DANGER TO THE PUBLIC HEALTH, SAFETY OR
 WELFARE: Section 120.54(4)(b), Florida Statutes, states that those rules pertaining to perishable agricultural commodities shall be included in the definition of rules relating to the public health, safety, or welfare.

Due to the effect of Hurricane Milton, a significant amount of the Florida grapefruit crop in the 2024-2025 season will have a minimum brix and minimum ratio of solids to citric acid below the minimum established in rule during the 2022-2023 season. The current rule will harm growers financially due to the inability to sell the fruit that does not meet the current minimum ratio of solids to citric acid or brix value.

After discussing the matter at the emergency TEAMS meeting and hearing in Bartow, Florida on December 2, 2024, the Florida Citrus Commission found that there exist unusual weather conditions which caused a substantial portion of the grapefruit crop to fail maturity requirements. The FCC voted unanimously to adopt Emergency Rule 20ER24-5, suspending the maturity standards in regard to ratio for all grapefruit including field run and elimination for processing for the 2024-25 season.

REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES: Adequate notice procedures were used by the Department of Citrus to inform the public and the Florida citrus industry of the pending adoption of Emergency Rule 20ER24-5 suspending the maturity standards in regard to ratio for all grapefruit including field run and elimination for processing, in that notice was made via email of the emergency rulemaking to take place at the December 2, 2024 emergency meeting to members of the Florida Citrus Commission, all industry organizations, the Florida Press Corps and other interested persons.

SUMMARY: Emergency rule 20ER24-5 suspending the maturity standards in regard to ratio for all grapefruit including field run and elimination for processing for the period beginning December 2, 2024, and ending May 23, 2025. This emergency rule replaces emergency rule 20ER24-4.

The St. Johns River Water Management District hereby gives notice: that on November 26, 2024, it issued a Final Order granting the Petitioner Pigeon Creek Mitigation Bank, LLC a variance from the provisions of paragraph 62-342.700(11)(b), F.A.C., governing financial assurance for mitigation banks. The Petition was received on May 13, 2024 and assigned F.O.R. No. 2024-12. Notice of receipt of the Petition was published in the Florida Administrative Register on May 21, 2024, and one request for a copy of the Petition was received, but no other public comment was received. DEPARTMENT OF EDUCATION

Florida International University

FIU-BT-946 University Student Housing-CM

The Florida International University Board of Trustees announces that Construction Management (CM) services are required for the project identified below:

Project Name and Number: University Student Housing, BT-946

Project Location: Modesto A. Maidique Campus (MMC), Miami, Florida

The University Student Housing project is expected to open in fall 2027 and consist of approximately 1150 beds and ancillary spaces. This program envisions a building or buildings that will use the ground floor space to provide services needed in the residential area of MMC. These services include retail and academic support. The possibility of providing housing-related warehouse/storage space to replace the existing warehouse facility at University Apartments may also be explored.

The goal of the project is to build as many as students beds as possible to meet growing demand and create sense of community between the residents and their resident assistant. Each floor of the building will have gathering space for socializing and a dedicated group study room. The building will have a dedicated lounge.

The building will include space for support services to run the facility including lobby entrance, public restrooms, vending, offices, maintenance, and custodial space. It is important for this building to be secure with only one staffed main entrance where students and guests will enter and exit the building. The building program will include building-wide security cameras to be installed on all entrances, exits, stairways, and hallways. The building should be designed to take advantage of stairways to lessen the use of elevators.

This complex should have the character of a high-quality residential facility that blends with existing campus architecture and other students housing in the area. FIU prefers a minimum of 100 feet separation between housing facilities. There are no university-preferred height restrictions. The complex should include outdoor green spaces that complement the campus and connect this facility with the housing quad.

INSTRUCTIONS:

Firms desiring to provide construction management services for the project shall submit a letter of application and a completed Construction Manager Qualifications Supplement (CMQS) form. Proposals must not exceed 80 pages, including the CMQS and letter of application. Pages must be numbered consecutively.

Submit Seven (7) bound copies of the required proposal data and one electronic copy of the complete proposal in Adobe Acrobat PDF format of the above-requested data bound in the order listed. Applications that do not comply with the above instructions will not be considered. Application material will not be returned. The University reserves the right to suspend or discontinue the selection process at any time and to return or reject any or all submissions of qualifications without obligation to the respondent. The award of this contract is subject to availability of funds.

The Construction Manager Qualifications Supplement (CMQS) form and the Project Fact Sheet, which describes the selection process schedule for this Project and additional information regarding the Project scope, may be obtained from the website <https://facilities.fiu.edu/Projects/BT-946.htm>. Applications on any other form will not be considered. Requests for meetings by individual firms will not be granted. Once the firm acquires the required forms, questions may be directed to Facilities Planning at (305)348-4090 or via email to griffith@fiu.edu cc: angpaz@fiu.edu.

Stat., the selected consultant will have to certify that it is registered with and uses the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the consultant during the term of its contract with FIU. Stat., and the subcontractor shall provide to the consultant an affidavit stating that the subcontractor does not employ, contract with or subcontract with an unauthorized alien. FIU-BT-941 Residential Dining Facility-CM

The Florida International University Board of Trustees announces that Construction Management (CM) services are required for the project identified below:

Project Name and Number: Residential Dining Facility, BT-941

Project Location: Modesto A. Maidique Campus (MMC), Miami, Florida

Project Description:

At Florida International University (FIU), we understand that students do not become leaders by simply succeeding in the classroom, they grow into movers and shakers in the community through interactions all throughout our campus. Understanding this dynamic, FIU embraces a multi-dimensional experience for students— engaging the mind, body, and spirit – to provide the necessary foundation for our students to develop as well-rounded persons, professionals, citizens, and world changers. Food services on campus plays a vital role in not only nourishment but creating community and engagement among FIU’s students, faculty and staff.

Compass Group USA, Inc., by and through its Chartwells Division, signed a contract with FIU in 2018 to provide retail, residential and catering services for FIU’s MMC, BBC and EC campuses. Since 2018, contractual facility improvements and

new venues have opened at all three of FIU’s served campuses. Included in the 2018 contract was a vision for a new residential food service operation to serve the growing residential community with the opening of Tamiami Hall. Currently, in the residential/housing neighborhood, only a small market/convenience store exists to serve the over 3500 students in the immediate area.

The residential food service program at FIU includes pre-paid meal plans which are a requirement for first time in college students and may also be purchased by upperclassmen living on and off campus. Meal plans contain meals that can only be redeemed at 8th Street Campus Kitchen dining hall in the Graham Center which can be up to a 15-minute walk from some residential facilities. The new residential dining facility would be a second destination for meal plan students to use the meal portion of their plans. In Fall 2023, 2800 residential students purchased meal plans and 257,000 meals were used at 8th St Campus Kitchen over the course of the semester. Peak meal periods saw 800 meal swipes over one hour.

FIU is looking for an innovative new food service facility that can become a center for student engagement and community while providing nourishment and easing the demand on 8th St Campus Kitchen. FIU is looking for a flexible space that can accommodate multiple styles of service and cuisines while providing a different food service experience than the all-you-can-eat style of 8th St Campus Kitchen. The new facility should be able to accommodate for peak demand in evening and weekend hours while having the ability to scale back service in hours when students are not in the residential neighborhood.

Furniture should be comfortable with multiple styles of seating designed for multiple experiences and activities that a student participates in daily. Décor should be simple, comfortable and engaging to the 18–22-year-old demographic.

INSTRUCTIONS:
