Section II

Proposed Rules

FISH AND WILDLIFE CONSERVATION COMMISSION

Marine Fisheries

RULE NO.: RULE TITLE:

68B-2.012 Tagging of Marine Organisms

PURPOSE AND EFFECT: The purpose of this proposed rulemaking is to amend regulations related to the tagging of marine organisms to expand instances where a Marine Special Activity License (SAL) is not required to tag marine organisms, and to make these regulations more transparent and easier for the public to find. The Commission is proposing rule amendments that would allow state and federal natural resource management agencies to tag marine organisms without a Marine SAL. The proposed rule amendments would also increase the number of fish the director of a fishing tournament may tag without a Marine SAL. This proposed rulemaking would also move regulations related to the tagging of marine organisms from Marine SAL program rules in rule 68B-8.003, F.A.C., into the general marine fisheries rule chapter, 68B-2, F.A.C., so they are easier for the public to find and understand.

SUMMARY: This proposed rule would allow state and federal natural resource management agencies to tag marine organisms without a Marine Special Activity License (SAL), increase the number of fish the director of a fishing tournament may tag without a Marine SAL, and would move regulations related to the tagging of marine organisms Florida's Marine SAL rules in subsection 68B-8.003(8), F.A.C., to the general marine fisheries rule chapter, 68B-2, F.A.C., so that specific regulations establishing when a Marine SAL is and is not required to tag marine organisms are easier for the public to find and understand. This rule accompanies proposed rulemaking for Chapter 68B-8, F.A.C.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: the nature of the rule and the preliminary analysis conducted to determine whether a SERC was required.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

68B-8.014	Marine Chemical Special Activity License

PURPOSE AND EFFECT: The purpose of this proposed rulemaking is to improve the operation of the Marine Special Activity License (SAL) program, update and modernize rule language, meet evolving program needs, improve and streamline the licensing process, and provide greater transparency to applicants. The effect of these changes would be to reduce administrative burdens on applicants and license holders, provide additional information to increase transparency, implement changes to meet evolving program needs, and expand the types of activities that may be authorized through the SAL program.

SUMMARY: This proposed rulemaking would improve the operation of the Marine Special Activity License (SAL) program and would provide general updates and clarifications to improve and streamline the licensing process, update eligibility requirements, establish general license conditions and restrictions, clarify the definition of prohibited species, tailor conditions related to the transfer of marine organisms to each license type, make tagging regulations easier for the public to find by moving them from the SAL rule chapter (68B-8, F.A.C.) to the general marine fisheries rule chapter (68B-2, F.A.C.), revise the framework for the Florida Marine Science Educators Association Certification, and update provisions for several different SAL types. This proposed rulemaking would also provide additional transparency to applicants by providing additional details in the flow chart outlining the decision process for the genetic risk assessment of proposed release activities.

The Marine SAL program issues licenses to accommodate activities requiring exemptions to state marine fisheries

regulations, such as scientific research, education, exhibition, the release of marine organisms, and the collection of broodstock for aquaculture. The Commission is updating SAL program rules to address evolving program needs, improve program operation, better accommodate current and new practices, and provide greater transparency to applicants. This proposed rulemaking represents Phase II of a multi-phase project to update the rules for the Marine SAL program.

**SUMMARY OF STATEMENT OF ESTIMATED
REGULATORY COSTS AND LEGISLATIVE
RATIFICATION:**

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: the nature of the rule and the preliminary analysis conducted to determine whether a SERC was required.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.
