The projected year-end fund balance available for reimbursement of participating insurers on December 31, 2026, is estimated to be \$12.08 billion, which represents the amount of assets available to pay claims resulting from Covered

Events which may occur during the June 1, 2026 through May 31, 2027 Contract Year, not including any bond proceeds. The projected year-end fund balance of \$12.08 billion is net of losses and loss reserves from Hurricanes Ian (2022), Idalia (2023), Milton (2024) and Helene (2024), which the FHCF's consulting actuary has estimated to be \$8.01 billion. The 2026-2027 Contract Year claims paying estimate includes the use of \$12.08 billion of projected year-end fund balance, \$2.25 billion of 2020A and 2024A pre-event bond proceeds and \$7.10 billion of 0-12 month borrowing capacity for a total of \$21.43 billion, which exceeds the \$17 billion limit on the Fund's single-season obligation as specified in Section 215.555, Florida Statutes. The borrowing capacity estimate is dependent on constraints of the financial markets to absorb potential debt issuances, the time necessary to access such markets, and the existing level of interest rates at the time of issuance. Greater detail may be obtained in the May 21, 2026 Claims-Paying Capacity Estimates Report, which can be found on the Fund's website at <https://fhcf.sbafla.com> under "Bonding Program." The Board recognizes that this good faith estimate is being made while volatile global financial market conditions exist, and therefore, changing market conditions can impact the Fund's actual claims-paying capacity either positively or negatively. Current conditions may or may not be the same if the Board issues revenue bonds. Participating insurers that rely on these estimates should recognize the potential impact the financial markets can have on the Board's claims-paying ability and plan accordingly.
