Proposed Rules

DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

Division of Florida Condominiums, Timeshares and Mobile Homes

RULE NO.: RULE TITLE:

61B-76.005 Reserves

PURPOSE AND EFFECT: The proposed rulemaking amends Rule 61B-76.005, Florida Administration Code. The purpose of the amendment to 61B-76.005, Florida Administrative Code, is to implement statutory changes based on the passage of Section 719.106(1)(j), Florida Statutes. These amendments specifically address the requirement for a Structural Integrity Reserve Study ("SIRS"), which is intended to evaluate and ensure adequate reserve funding for future major repairs and replacement of the cooperative property components, as required under Section 719.106(1)(k), F.S.

SUMMARY: Rule 61B-76.005, F.A.C., addresses reserves requirements for cooperatives.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: the economic review conducted by the Agency.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal

for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULEMAKING AUTHORITY: 719.501(1)(f), (j) FS

LAW IMPLEMENTED: 719.106(1)(j), 719.501(1)(j), 719.618(1) FS.

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE SCHEDULED AND ANNOUNCED IN THE FAR.

THE FULL TEXT OF THE PROPOSED RULE IS:

61B-76.005 Reserves.

(1) Reserves required by statute. Reserves, required by ~~Sections~~ Section 719.106(1)(j) and (k), F.S., for capital expenditures and deferred maintenance ~~must including roofing, painting, paving, and any other item for which the deferred maintenance expense or replacement cost exceeds \$10,000,~~ shall be included in the association's budget. ~~For the purpose of determining whether the deferred maintenance expense or replacement cost of an item exceeds \$10,000, the association may consider each asset of the association separately. Alternatively, the association may group similar or related assets together. For example, an association responsible for the maintenance of two swimming pools, each of which will separately require \$6,000 of total deferred maintenance, may establish a pool reserve, but is not required to do so.~~

(a) For a residential cooperative that is not required to complete a structural integrity reserve study ("SIRS") pursuant to Section 719.106(1)(k), F.S., the association shall determine whether the deferred maintenance expense or replacement cost of an item exceeds the minimum reserve threshold published by the Division on its website for each respective calendar year. In accordance with Section 719.106(1)(j), F.S., the Department shall adjust the threshold yearly based on inflation. The association shall consider each asset of the association separately.

(b) For a residential cooperative required to perform a SIRS, the SIRS must identify the items that must be reserved for in accordance with Section 719.106(1)(k), F.S.

(2) Commingling operating and reserve funds. Associations that collect operating and reserve assessments as a single payment shall not be ~~deemed~~ considered to have commingled such the funds provided the reserve portion of the payment is transferred to a separate reserve account, or accounts, within 30 calendar days from the date such funds were deposited.

(3) Calculating reserves required by statute. ~~Reserves for deferred maintenance and capital expenditures required by Section 719.106(1)(j), F.S., shall be calculated using a formula that will provide funds equal to the total estimated deferred maintenance expense or total estimated replacement cost for an asset or group of assets over the remaining useful life of the asset or group of assets. Funding formulas for reserves required by Section 719.106(1)(j), F.S., shall be based on either a straight-line accounting method or a pooled reserve accounting method, containing an separate analysis of each of the required line item assets or a pooled analysis of two or more of the required assets.~~

(a) For a residential cooperative that is not required to complete a SIRS, reserves for deferred maintenance and capital expenditures required under Section 719.106(1)(j), F.S., must be calculated using a formula that allocates the total estimated deferred maintenance expense or replacement cost of a line item asset or group of assets evenly over the asset or group of assets remaining useful life on an annual basis. The association shall annually evaluate whether the total deferred maintenance expense or replacement cost of each line item requires adjustment for maintenance or replacement purposes. The association must maintain at least a baseline funding that keeps the reserve balance above zero, unless properly waived or reduced in accordance with Section 719.106(1), F.S. and this rule.

(b) For a residential cooperative required to complete a SIRS pursuant to Section 719.106(1)(k), F.S., the funding amount for each item or group of items identified in the SIRS must align with the funding amount listed in the most recently completed SIRS as prescribed in this rule.

(c)(a) Straight-line Method: If the association maintains separate reserve accounts for each of the required assets, the amount of the current year contribution to each reserve component shall be the sum of the following calculation:

1. No change.
2. The total estimated deferred maintenance expense or total estimated replacement cost of the reserve asset less the estimated balance of the reserve account as of the beginning of the period for which the budget will be in effect. The remainder, if greater than zero, shall be divided by the estimated remaining useful life of the asset. The required annual funding amount formula is the estimated total replacement cost or deferred maintenance expense of the asset, minus the current reserve balance, divided by the remaining useful life of the asset. The formula may be adjusted each year for changes in estimates and deferred maintenance performed during the year and may consider factors such as inflation and earnings on invested funds.

(d)(b) Pooled Method: If the association maintains a pooled account of two or more of the required reserve assets, the

amount of the contribution to the pooled reserve account as disclosed on the proposed budget shall be not less than that required to ensure that the balance on hand at the beginning of the period for which the budget will go into effect plus the projected annual cash inflows over the remaining estimated useful lives of all of the assets that make up the reserve pool are equal to or greater than the projected annual cash outflows over the remaining estimated useful lives of all of the assets that make up the reserve pool, based on the current reserve analysis. The projected annual cash inflows may include estimated earnings from investment of principal. The reserve funding formula shall not include any type of balloon payments or other financing arrangements that results in a one-time payment that exceeds the standard payment amounts found on the reserve schedule, at any point of the assessment replacement term or period. In addition, pooled reserve funding schedules may not be structured in a manner that defers reserve contributions for the purpose of reducing current assessments or in a way to increase current contributions to offset or reduce future assessments. Rates of change in funding over the course of the reserve schedule may be increased or decreased to account for inflation or deflation but shall not exceed the annual inflation or deflation amount according to the Consumer Price Index for Urban Consumers or final demand for individual commodities according to the Consumer Price Index. The association may deviate from these limits when changes in the market price of materials substantially impact projected costs, provided such changes are supported by objective data from the State of Florida, a federal government entity, or the Federal Reserve System.

(e) An association may change the method of accounting for statutory reserves between straight-line and pooled accounting without a vote of the unit owners, provided that such change does not alter the original authorized purpose, the required level of funding, or the restricted use of reserve funds.

1. An association may change the reserve accounting method in a manner that requires the reclassification or redistribution of reserve balances between reserve components without a vote of the unit owners only if:

a. All transferred funds remain restricted for reserve purposes authorized under Sections 719.106(1)(j) and (k), F.S.;

b. The total balance of reserves funding is not reduced and the resulting line item asset or group of assets reserve balances are clearly disclosed in the association's financial reports and adopted budget; and

c. No reserve funds are applied to a purpose other than the repair or replacement of reserve components;

d. Immediately preceding the conversion from pooled reserve accounting to straight-line reserve accounting, any interest earned on reserve funds held in the pooled reserve account shall be allocated among the reserve components in

proportion to each component's share of the current pooled reserve principal balance, as reflected in the association's accounting records.

2. A vote of the unit owners is required if a change in the reserve accounting method results in any of the following:

a. The reduction or elimination of reserve funding for any reserve component;

b. The use of reserve funds for any purpose not originally approved by the unit owners; or

c. The transfer or reallocation of reserve funds in a manner that constitutes a waiver, reduction, or repurposing of reserves under Section 719.106(1)(j), F.S.

3. This rule is intended solely to clarify when a change between pooled and straight-line reserve accounting constitutes a change in accounting method, as opposed to a substantive change to reserve funding levels, purposes, or permitted uses. Nothing in this rule shall be construed to expand, restrict, or otherwise alter the statutory authority of the board of administration or the unit owners under Chapter 719, F.S.

(4) Estimating reserves that are not required by statute. Reserves that are not required by Sections Section 719.106(1)(j) or (k), F.S., or where a formula is not required by this rule, are not required to be based on any specific formula.

(5) Estimating non-converter reserves when the developer is funding converter reserves. For the purpose of estimating non-converter reserves, the estimated fund balance of the non-converter reserve account related to any asset for which the developer has established converter reserves pursuant to Section 719.618, F.S., shall be the sum of:

(a) and (b) No change.

(c) For a residential cooperative required to perform a SIRS and where the age of the building is at least ten years based on the original certificate of occupancy, the developer must reserve for items listed in Section 719.106(1)(k), F.S.

(6) Timely funding. ~~Reserves included in the adopted budget are common expenses and must be fully funded unless properly waived or reduced.~~ Reserves shall be funded in at least the same frequency that assessments are due from the unit owners (e.g., monthly or quarterly).

(7) Restrictions on use and waiver. ~~Expenditure of unallocated interest income earned on reserve funds is restricted to any of the capital expenditures, deferred maintenance or other items for which reserve accounts have been established.~~

(a) A residential cooperative that is not required to complete a SIRS pursuant to Section 719.106(1)(k), F.S., may waive or reduce reserves pursuant to Section 719.106(1)(j), F.S. Any vote to waive or reduce reserve components for any assets not included in Section 719.106(1)(k), F.S., shall not be effective for more than one annual budget. Pursuant to Section 719.106(1)(j), F.S., the members of a unit-owner controlled association may, by a majority vote of the total voting interests

at a duly noticed and properly held meeting of the association, determine to provide no reserves or less than fully funded reserves for reserve components that are not listed in Section 719.106(1)(k), F.S.

(b) Assessments for any period during which an association does not have an adopted budget in effect must include the full statutory reserve funding amounts, regardless of whether they were previously waived or reduced. The required reserve funding amount shall be the amount that was previously waived or reduced in the immediately preceding budget.

(c) Expenditure of unallocated interest income earned on reserve funds is restricted to any of the capital expenditures, deferred maintenance or other items for which reserve accounts have been established. Nothing in this subsection shall be construed to permit the waiver or reduction of reserves required under Section 719.106(1)(k), F.S.

(8) Structural Integrity Reserve Study. A Structural Integrity Reserve Study includes a Full Structural Integrity Reserve Study, Update with Site Visit, Financial Update Without Site Visit. All SIRS, including any updates or amendments, must be properly completed using the current DBPR Form CO 6000-10, Structural Integrity Reserve Study (SIRS) Form, incorporated by reference in Rule 61B-22.005, F.A.C., effective May 2026, available on the Division's website. Annual vote required to waive reserves. Any vote to waive or reduce reserves for capital expenditures and deferred maintenance required by Section 719.106(1)(j)2., F.S., shall be effective for only one annual budget.

(a) The ten (10) year statutory requirement for the completion of a SIRS by a residential cooperative association, as provided within Section 719.106(1)(k), F.S., shall only be satisfied by the completion of a Full Reserve Study encompassing all statutory items and requirements identified in that subsection. Residential cooperative associations subject to Section 719.106(1)(k), F.S., must complete a Full Structural Integrity Reserve Study at least once every ten (10) years.

(b) Updates to SIRS and visual inspection requirements.

1. A residential cooperative association may update the reserve schedule portion of a SIRS without conducting a new visual inspection if the SIRS with the most recent visual inspection was completed within the preceding 36 months and the update is limited to changes in reserve funding amounts, or the estimated replacement cost of reserve items. An update required under Section 719.106(1)(k)4.c., F.S., that solely relates to changes in the association's funding method, including special assessments, the securing of a line of credit, or loan, does not require a new visual inspection.

2. A visual inspection is required when updating a SIRS if, since the last visual inspection of any incident or disaster at the cooperative property that may reasonably be expected to affect

the structural integrity or life-safety systems of the building has occurred.

3. If the estimated remaining useful life of a reserve item changes due to a repair or replacement of the reserve item, the association's next SIRS shall include a visual inspection of the reserve item.

4. SIRS that are updated due to a change in the remaining useful life of a specific reserve item shall not alter the estimated remaining useful life of other items unless a visual inspection of the affected item is performed.

5. An association must obtain an updated SIRS if the projected year-end reserve balance for any fiscal year differs from the projected year-end reserve balance in the most recent SIRS by an amount equal to or exceeding one hundred percent of the association's most recent annual cash inflows to reserves.

6. An association must obtain an updated SIRS if the completion of a repair, replacement, or maintenance of an item included in the SIRS deviates from the schedule in the SIRS by more than two years, either earlier or after the anticipated date listed in the most recent SIRS.

(c.) Completed SIRS and distribution requirements.

1. For purposes of this rule, a completed SIRS is the version of the study that has been signed, dated, and delivered to the association by a licensed professional or qualified company that performed the SIRS.

2. The association must distribute or otherwise make available the completed SIRS to unit owners, and must file notice with the Division pursuant to subparagraphs 719.106(1)(k)11. and 12., F.S. Preliminary drafts or revisions prepared for internal board review do not constitute a completed SIRS for purposes of this rule. The association must file notice of completion of SIRS, including using DBPR Form CO 6000-11, Affidavit of Acknowledgment, incorporated by reference in 61B-22.005 and effective May 2026, to the Division through the association's online account, as required pursuant to Section 719.501(3), F.S.

3. If, following an update made pursuant to this rule, a completed SIRS is subsequently amended, replaced, or the reserve schedule is modified, the association must again comply with subparagraphs 719.106(1)(k)11. and 12., F.S., if such amendment, replacement, or modification materially affects the estimated remaining useful life, estimated replacement cost or deferred maintenance expense of any reserve item, or alters the overall reserve funding schedule or the reserve funding requirements of any item required to be included in the study, results in reserve items meeting or exceeding the statutory reserve threshold, or adds or removes items from the SIRS.

(d) An association is required to implement and fund reserves in accordance with the most recent SIRS, and shall not alter or otherwise manipulate the findings of the SIRS, including the estimated remaining useful life or cost of repair

or replacement of reserve items, or any other determinations contained in the SIRS.

~~(9) Each association required to complete a SIRS shall complete and submit the Structural Integrity Reserve Study (SIRS) Reporting form available on the association’s online account with the Division for each study completed for the association. This reporting requirement applies to both initial and amended SIRS. Developer Voting Restrictions. Prior to turnover the developer may cast votes to waive or reduce reserves during the association’s first two fiscal years only, beginning with the date of the incorporation of the cooperative association. During any period that the developer is precluded from casting its votes to waive or reduce the funding of reserves, the approval of a majority of the non-developer voting interest at a duly called meeting of the association shall be required in order to waive or reduce the funding of reserves.~~

(10) Statutory references in this rule are to the Florida Statutes, as amended, including any subsequent renumbering of statutory provisions.

Section IV Emergency Rules

DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Division of Animal Industry

RULE NO.:	RULE TITLE:
5CER26-5	Temporary Restrictions on the Importation of Animals Originating from High-Risk Counties

SUMMARY: On April 24, 2026, the presence of New World Screwworm (*Cochliomyia hominivorax*) had been confirmed in the Mexican state of Nuevo Leon, within 100 miles of the Texas-Mexico border. New World Screwworms (NWS) are fly larvae that feed on living flesh, often entering through wound sites found on livestock and other animals. If not discovered and effectively treated, an infestation of NWS can be fatal.

In response to the threat posed by NWS, the Department took measured, but immediate action by imposing certain restrictions on the importation of animals from the affected region. On June 4, 2026, the Department expanded the application of animal movement restrictions in order to more appropriately address the changing situation.

EXPLANATION OF WHY THE EMERGENCY RULE IS NO LONGER REQUIRED: The presence of NWS has been confirmed within the State of Texas, and the conditions necessitating the emergency rule have continued to evolve rapidly. As a result, the scope of this emergency rule is no longer appropriate to address the current threat posed by NWS. THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Dr. Michael A. Short, State Veterinarian, Director, Division of Animal Industry, Department of Agriculture and Consumer Services, 407 S.

Calhoun St., Rm. 330, Mayo Bldg., Tallahassee, FL 32399-0800; (850)410-0900.

THE FULL TEXT OF THE EMERGENCY RULE IS:

THE FOLLOWING RULE IS HEREBY REPEALED:

A document used for interstate movement in lieu of an Official Certificate of Veterinary Inspection (OCVI) for a specified exemption in Chapter 5C-3, F.A.C., including Extended Equine Movement Permits, as incorporated in subsection 5C-3.003(5), F.A.C., a valid Owner-Shipper Statement as described in subsection 5C-3.002(2), F.A.C., a Permit for Interstate Movement from a USDA Approved Livestock Facility, FDACS-09158 Rev. 04/18, as incorporated in paragraph 5C-3.004(3)(b), F.A.C., and a Commuter Herd Agreement as described in paragraph 5C-3.004(3)(c), F.A.C.

(b) Authorized Representative. An employee of the state or U.S. federal government, or a licensed veterinarian accredited by the United States Department of Agriculture (USDA), who is authorized to conduct animal disease control and eradication activities.

(c) Effective Treatment. A systemic product that is experimentally, conditionally, or fully licensed or approved by the United States Department of Agriculture, Center for Biologics or the United States Food and Drug Administration, for use in animals against internal or external parasites and shown to be effective against New World Screwworm (NWS) larvae in peer reviewed scientific literature.

(d) High-Risk County. All U.S. Counties within 125 miles of an infested Mexican state.

(e) Infested Mexican State. A Mexican state that has an established NWS breeding population. A Mexican state is considered infested with NWS until Mexico's Secretariat of Agriculture and Rural Development (SADER) declares the Mexican state to be free of NWS and that declaration is recognized by United States Department of Agriculture, Animal and Plant Health Inspection Service.

(f) New World Screwworm (NWS). The fly, eggs, pupae or larvae of the genus and species *Cochliomyia hominivorax*.

(g) Wound. Any break in or injury to the animal's integument, meaning the skin or mucous membrane. Surgical sites which have not fully healed, including those due to management practices such as dehorning and castrations sites, are considered wounds.

(2) Import Requirements. Except where more stringent requirements are adopted herein, all animals being imported into Florida from a high-risk county must meet the movement requirements in Chapter 5C-3, F.A.C.

(a) All warm-blooded animals originating from a high-risk county being imported into Florida must be accompanied by an OCVI documenting that all animals listed on the OCVI have been inspected and found free of contagious and infectious disease and pests, including NWS. No alternative movement documents will be accepted in lieu of an OCVI.

1. The OCVI must include the statement, “All animals listed on the OCVI have been inspected and are free from screwworm larvae infestation.”

2. The OCVI is valid for no more than 7 days from the date of veterinary inspection.

(b) All warm-blooded animals that have wounds that are not infested with NWS larvae can be imported into Florida provided that the following requirements are met:

1. Any animal with a wound must be treated using an effective treatment. The effective treatment must be administered by or directly overseen by an authorized representative. The effective treatment for NWS must be administered in accordance with the following:

a. Oral or injected treatments must be administered no less than 12 hours and no more than 14 days prior to entry into Florida.

b. Systemic, topical treatments must be administered no less than 72 hours and no more than 14 days prior to entry into Florida.

2. In addition to receiving a systemic effective treatment, all animals with non-infested wounds must have the wounds topically treated with a product effective against NWS. The wound location and treatment must be documented on the OCVI.

DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Division of Animal Industry

RULE NO.: RULE TITLE:
 5CER26-6 Temporary Restrictions on the Importation of Animals Originating from Areas Impacted by New World Screwworm

SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE: The presence of New World Screwworm (*Cochliomyia hominivorax*) has been confirmed in Texas, and the Texas State Animal Health Official has quarantined a specified zone. New World Screwworms (NWS) are fly larvae that feed on living flesh, often entering through wound sites found on livestock and other animals. If not discovered and effectively treated, an infestation of NWS can be fatal. Immediate action, including the implementation of stringent inspection protocols for animals being transported from the affected region, is necessary to limit the spread and impact of NWS.

REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES: This rule is fair and justified because it takes only the action necessary to protect public health, safety, and welfare by preventing the introduction and spread of this dangerous pest. Temporarily imposing more stringent inspection requirements for animals imported from the affected region is the only viable means of ensuring the protection of Florida animals susceptible to this potentially deadly pest.

SUMMARY: The rule imposes additional restrictions on the importation of animals originating from areas impacted by NWS.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Dr. Michael A. Short, State Veterinarian, Director, Division of Animal Industry, Department of Agriculture and Consumer Services, 407 S. Calhoun St., Rm. 330, Mayo Bldg., Tallahassee, FL 32399-0800; (850)410-0900.

b. Systemic, topical treatments must be administered no fewer than 72 hours and no more than 14 days prior to entry into Florida.

4. The effective treatment must be administered by or directly overseen by an authorized representative.

5. In addition to receiving a systemic effective treatment, all animals with non-infested wounds must have the wounds topically treated with a product effective against NWS. The wound location and treatment must be documented on the OCVI.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

The Department of Environmental Protection announces a public meeting to which all persons are invited.

DATE AND TIME: June 30, 2026, 4:00 p.m. - 7:00 p.m. EDT

PLACE: Russell Baptist Church, 2299 Sandridge Road, Green Cove Springs, Florida 32043

GENERAL SUBJECT MATTER TO BE CONSIDERED: The Florida Department of Environmental Protection (DEP) will hold a public meeting to provide an opportunity for the public to ask questions, offer input and obtain information about the proposed corrective and interim measures included in the Consent Order for the Stoneridge Farms, Inc. (Stoneridge) facility. Although mining operations have ceased at the former Solite facility, site assessment and investigation activities have identified contamination in specific areas within the property boundaries requiring cleanup and a single satellite site. Stoneridge is responsible for assessment and remediation of any contamination remaining on the site and any historical contamination originating from the portions of the original facility property purchased by others.

The proposed institutional and engineering controls outlined in the Corrective Measures Study and a Controls Management Plan at former processing areas and wastewater ponds will restrict land use and access to contaminated soil which will limit potential risks to human health and the environment. The proposed excavation and disposal of a targeted area of contaminated soil outlined in the Interim Measures Plan at a peninsula on the southwest side of the former mine pit will remove the source of contamination and prevent future leaching of contaminated soil to groundwater. The site is located at 3000 County Road 209A, Green Cove Springs, Florida, in Clay County. DEP has assigned file number FLD004059058 to this project. The public comment period will conclude 45 days after publication of DEP's Notice of Intent in a major local newspaper of general circulation. All comments received will be reviewed and considered before DEP takes final action on the proposed corrective and interim measures.
