RULE NO.: 6A-1.09422
 RULE TITLE: Coordinated Screening and Progress Monitoring System and Statewide, Standardized Assessment Program Requirements

PURPOSE AND EFFECT: This amendment is to clarify when concordant scores may be used to satisfy the grade ten English Language Arts (ELA) assessment graduation requirement, to clarify end-of-course (EOC) assessment requirements for U.S. History, and to remove the scale scores for the Benchmark for Excellent Student Thinking (B.E.S.T.) ELA Writing statewide assessment. The effect of this change will be to 1) specify that first-time grade ten students may only use a concordant score to satisfy the grade ten ELA assessment graduation requirement earned after the spring administration (PM3) of the grade ten statewide, standardized ELA assessment of their grade ten school year; 2) specify that the Florida Advanced Courses and Tests (FACT) assessment in United States History may satisfy EOC assessment requirements pertaining to U.S. History; and 3) remove the scale scores and cut score for each of the B.E.S.T. ELA Writing statewide assessments as those scores are not reported and are not in use.

SUMMARY: This proposed amendment clarifies the timeline for the use of concordant scores for the grade ten ELA assessment, specifies that the FACT United States History assessment satisfies the U.S. History EOC assessment requirement, and removes the scale scores and cut score for each of the B.E.S.T. ELA Writing assessments.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is

required, the information expressly relied upon and described herein: The proposed rule relates to the FACT United States History assessment satisfying U.S. History EOC assessment participation requirements, removal of scale scores for the ELA Writing assessment, and the timeline for using concordant scores for the grade ten ELA assessments; there is no anticipated negative impact on economic growth, private sector job creation, employment, private sector investment, or business competitiveness.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULE NO.: 19-8.028
RULE TITLE: Reimbursement Premium Formula
PURPOSE AND EFFECT: This rule is promulgated to implement Section 215.555, Florida Statutes, regarding the Florida Hurricane Catastrophe Fund for the 2026-2027 contract year.
SUMMARY: In accordance with Section 215.555(5), Florida Statutes, proposed amended Rule 19-8.028, F.A.C., Reimbursement Premium Formula, adopts the 2026-2027 reimbursement premium formula for the Florida Hurricane Catastrophe Fund (“Florida Hurricane Catastrophe Fund 2026 Ratemaking Formula Report Presented to the State Board of Administration of Florida April 2, 2026”).
SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: Upon review of the proposed changes to this rule and the incorporated forms, the State Board of Administration of Florida has determined that the rule does not meet the requirements for ratification by the legislature. The changes to the rule do not have an adverse impact on small business and do not directly or indirectly increase regulatory costs in excess of \$200,000 in the aggregate within 1 year of implementation. The changes to the rule also do not directly or indirectly have an adverse impact on economic growth, private sector job creation or employment, or private sector investment, business competitiveness or innovation or increase regulatory costs, including any transactional costs, in excess of \$1 million in the aggregate within 5 years after the implementation of the rule. Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

THE FULL TEXT OF THE PROPOSED RULE IS:

19-8.028 Reimbursement Premium Formula.

- (1) through (2)(c) No change.
- (3) The Premium Formula.

(a) No change.

(b) For the ~~2026/2027~~ 2025/2026 Contract Year, the Formula developed by the SBA’s Independent Consultant, “Florida Hurricane Catastrophe Fund 2026 ~~2025~~ Ratemaking Formula Report Presented to the State Board of Administration of Florida April ~~2~~, 2026, <http://flrules.org/Gateway/reference.asp?No=Ref-19599> ~~March~~ ~~26~~, ~~2025~~, <http://www.flrules.org/Gateway/reference.asp?No=Ref-18209>,” as approved by the SBA, is hereby adopted and incorporated by reference into this rule. The premium rates are developed in accordance with the Premium Formula methodology approved by the SBA.

(4) Special Circumstances.

(a) Allocation of Premium. Premiums paid to the FHCF with reference to property covered by Quota Share Primary Insurance Arrangements, as that phrase is defined in Section 627.351(6)(c)2.f.a.(4), F.S., will be allocated by the FHCF between the Company and Citizens in accordance with the percentages specified in the Quota Share Primary Insurance Arrangement for the purposes of premium billing, calculating retentions and determining reimbursement payments.

(b) Special Rating Circumstances. The Premium Formula for policies that, based upon sound actuarial principles, require individual ratemaking and which are not excluded by rule will be based on the use of computer modeling for each individual Company for which it is applicable, i.e., portfolio modeling. The Independent Consultant will recommend guidelines for individual Company portfolio reporting and modeling to estimate individual Company FHCF expected losses. Individual Company FHCF expected losses for portfolio modeling exposures will be loaded for ~~investments and~~ expenses on the same basis as the FHCF premium rates used for non-portfolio modeling exposures, but will also include a loading for the additional cost of individual Company modeling. The minimum exposure threshold for FHCF portfolio modeling rating will be sufficient to generate estimated FHCF premium greater than the cost of modeling and other considerations and will be calculated by the Independent Consultant for the separate coverage levels of 45%, 75%, and 90% using the premium rates established pursuant to subsection (3). The methodology used by the Independent Consultant will be based on sound actuarial principles to establish greater actuarial equity in the premium structure.

~~Special recognition is not given to Companies that do not have exposure for Covered Policies for an entire Contract Year, except for New Participants as required by Article X(1) and X(2) of the Reimbursement Contract.~~

(5) No change.

That justification should be in the form of historic data, technical information or utility planning for the affected accounts or sub-accounts. Common causes of need for different depreciation rates include composition of account, adverse environmental conditions, high growth or regulatory changes.

(b) A utility filing for such a revision of depreciation rates ~~must shall~~ submit six copies of the filing to the office of the Office of Commission Clerk.

allocation based upon historical balances. Each CIAC sub-account ~~must shall~~ be amortized in the same manner that the related contributed plant is depreciated. Separate sub-accounts for accumulated amortization of CIAC ~~must shall~~ be maintained to correspond to each sub-account for CIAC.

(b) Beginning with the year ending December 31, 2003, for Class C utilities, where adequate CIAC records are maintained in sub-accounts, by type of charge or contributed plant, CIAC amortization rates ~~must shall~~ be applied separately to each sub-account. Any resulting net credit deferred taxes ~~must shall~~ be included in the capital structure calculation. No other deferred debits ~~must shall~~ be considered in rate base when the formula method of working capital is used.

This formula ~~will shall~~ be used unless the specific circumstances surrounding the abandonment or retirement demonstrate a more appropriate amortization period.

(11) A utility is required to have the right of access and continued use of the land upon which the utility treatment facilities are located. leverage order in effect at the time the Commission decides the case.

(13) No change.

(14) Interest expense to be included in the calculation of income tax expense ~~must shall~~ be the amount derived by multiplying the amount of the debt components of the reconciled capital structure times the average weighted cost of the respective debt components. 25-30.444 Utility Reserve Fund.

(1) PROJECT ELIGIBILITY. The following considerations ~~must shall~~ be applied in determining whether a future infrastructure repair or replacement project of existing distribution and collection infrastructure that is nearing the end of its useful life or is detrimental to water quality or reliability of service is eligible for advance funding through a utility reserve fund and whether a utility reserve fund is the most appropriate methodology to address the requested project.

(a) The following projects ~~are shall be~~ eligible for a utility reserve fund:

1. Projects to repair or replace existing utility infrastructure that is nearing the end of its useful life or is detrimental to water quality or reliability of service that is recorded in the ~~National Association of Regulatory Utility Commissioners (NARUC) Uniform System of Accounts (NARUC USOA)~~; water utility plant account numbers 304, 305, 306, 307, 308, 309, 310, 311, 320, 330, 331, 333, 334, 335, 336, 337, and 339, and wastewater utility plant account numbers 354, 355, 360, 361, 362, 363, 364, 365, 366, 367, 368, 370, 371, 374, 375, 380, 381, 382, and 389, incorporated by reference in Rule 25-30.115, F.A.C.;

2. Future expenditures related to land or land rights recorded in NARUC USOA water utility plant account number 303 or wastewater utility plant account number 353, incorporated by reference in Rule 25-30.115, F.A.C., if the expenditure is necessary to the successful completion of an eligible repair or replacement project;

3. Upgrades or enhancements of existing facilities if it can be demonstrated that the upgrade or enhancement is necessary to comply with federal, state, or local regulatory requirements,

or provides a more cost-effective or more reliable alternative than an identical replacement, and that the upgrade or enhancement is not designed solely to address future customer growth;

4. through 5. No change.

(b) The following projects ~~are~~ shall not be eligible for a utility reserve fund:

1. Projects to repair or replace general plant that is not directly associated with the physical operation of the utility's water or wastewater systems that are recorded in NARUC USOA water utility plant account numbers 340, 341, 342, 343, 344, 345, 346, 347, and 348, and wastewater utility plant account numbers 390, 391, 392, 393, 394, 395, 396, 397, and 398, incorporated by reference in Rule 25-30.115, F.A.C.;

2. Expenditures related to NARUC USOA water utility plant accounts 301 and 302, and wastewater utility plant accounts 351 and 352, incorporated by reference in Rule 25-30.115, F.A.C., which cover organization and franchise related expenditures;

3. Expenditures related to land or land rights recorded in NARUC USOA water utility plant account number 303 or wastewater utility plant account number 353, incorporated by reference in Rule 25-30.115, F.A.C., if the expenditure is necessary solely to meet future customer growth;

4. No change.

(c) When evaluating whether the utility's request to create a utility reserve fund is the most appropriate methodology to address the utility's eligible future infrastructure repair and replacement projects, the following additional factors will be considered:

1. Whether the anticipated completion date of the project allows sufficient time to accumulate the funds necessary to fund the project;

2. Whether the anticipated completion date is within 24 months of the end of the historic test year used in a jointly filed rate application, if applicable, thereby making the project eligible for consideration as a pro forma project in the rate proceeding pursuant to Section 367.081(2)(a)2., F.S.;

3. Whether the contributions-in-aid-of-construction that will result from the utility reserve fund will cause the utility to exceed the service availability policy guidelines provided in Rule 25-30.580, F.A.C.;

4. Whether any of the eligible projects included in the utility reserve fund will result in the complete elimination of either the water or wastewater treatment process;

5. Whether it has been more than seven years since the utility's last rate case, if the request is filed as a stand-alone application or in conjunction with a limited proceeding;

6. No change.

(2) UTILITY RESERVE FUND FILING REQUIREMENTS. Each applicant that requests approval to

create a utility reserve fund ~~must~~ shall provide the following information to the Commission. The request may be filed as a stand-alone application or in conjunction with an application for rate increase filed pursuant to Section 367.081(2)(a), 367.0814, or 367.0822, F.S. If the request is filed in conjunction with an application for rate increase that also requires the applicant's general information, paragraphs (2)(a), (b), and (c), may be omitted from the utility reserve fund portion of the joint application. A utility that qualifies for staff assistance as provided by subsection 25-30.455(1), F.A.C., may also request assistance with the utility reserve fund process.

(a) through (d) No change.

(e) A capital improvement plan that includes: a general description of the age and condition of the utility's facilities; a description of all infrastructure repair or replacement projects that the utility anticipates will be necessary within the next five years, at a minimum, even if some projects will not be included in the utility reserve fund; and the following information for each infrastructure repair or replacement project that the utility requests be included in the utility reserve fund:

1. A description of each plant asset that will be repaired or replaced, including the NARUC USOA account number for each asset, incorporated by reference in Rule 25-30.115, F.A.C.;

2. The date each asset was originally placed into service or an estimate of the age of the plant asset(s) as reflected in the utility's depreciation records if the original service date is unknown;

3. A detailed description of the reason(s) each repair or replacement project is necessary to maintain or improve the quality or reliability of the water or wastewater service, including whether any asset will be replaced prior to the end of its average service life as provided by Rule 25-30.140, F.A.C.;

4. If the repair or replacement project is required by a governmental or regulatory agency, include a copy of the rule, regulation, order, or other regulatory directive that requires the repair or replacement;

5. The projected cost to repair or replace each asset, and documentation that supports the utility's calculation of the projected cost. The utility ~~must~~ shall make all reasonable efforts to obtain at least three comparative cost estimates for each requested project. Acceptable forms of projected cost documentation are: an estimate by a professional engineer or other person knowledgeable in design and construction of water and wastewater plants; a bid from a vendor or service provider that includes a description of all work to be completed and an itemized list of all costs associated with the project; vendor information regarding the purchase price of plant components that will be purchased directly by the utility and labor estimates for work that will be performed on the project by a utility employee or contractual service provider, along with a

statement that confirms that the employee's or contractual service provider's work on the project is not included in their normal duties; or other information that shows a detailed and verifiable estimate of the projected cost. If the utility is unable to obtain three cost estimates for each project, the utility must shall provide a statement explaining what steps the utility took to obtain the estimates, why the utility was unable to obtain three estimates, and any responses received from any contractors solicited;

6. Detailed specifications for each asset that can be used to verify the projected repair or replacement cost, such as type, size, quantity, or quality of the materials used to complete the repair or replacement of the asset. If the type, size, quantity, or quality of the components used to make the repair or replacement will be materially different than the plant asset(s) being repaired or replaced, describe the specific differences and why the change is either necessary or provides a better resolution for the repair or replacement;

7. If the repair or replacement will change the design of the system, include a statement explaining how the design of the system will change and why the change is either necessary or will provide a better resolution for the repair or replacement;

8. A description of any alternatives to the proposed infrastructure repair or replacement project that the utility considered, such as new technologies or interconnection with another utility system, and why the proposed project was determined to be the most cost-effective option or will provide a better resolution for the repair or replacement;

9. If the infrastructure that is being replaced was subject to a non-used and useful adjustment in the utility's last rate proceeding, include a statement explaining whether the utility considered reducing the size of the replacement infrastructure to better match the utility's capacity needs and the results of that analysis;

10. A description of any expense increases or decreases that the utility anticipates will occur following completion of the infrastructure repair or replacement project; and;

11. No change.

(f) through (h) No change.

(i) Revised tariff sheets incorporating the utility reserve fund surcharge into the tariff. The utility must shall show the utility reserve fund surcharge as a separate charge in its tariff and on its customer bills.

(j) through (m) No change.

(3) REPORTING REQUIREMENTS. Any utility that receives approval from or is required by the Commission to create a utility reserve fund must keep an accurate and detailed account of all monies and report to the Commission all monies it receives from the utility reserve fund surcharge. The reporting requirement must shall begin when the utility's reserve fund

surcharge tariff becomes effective. The utility must file periodic reports as follows:

(a) The utility must shall file a report with the Commission Clerk's office no later than the 20th of every month indicating the monthly and total amount of money deposited into, and monthly and total amount of disbursements made from the utility reserve fund as of the end of the preceding month. If the utility bills its customers less frequently than once a month, this reporting requirement may be modified to match the utility's normal billing frequency. A copy of a bank statement that separately identifies the utility reserve fund deposits and disbursements may serve as the monthly report.

(b) At least once every six months, the utility must shall also report the status of all eligible projects included in the utility reserve fund for which work was performed during the last six months, including the actual start date, the estimated or actual completion date, the costs incurred during the last six months, and the total cost for any projects completed during the last six months.

(c) The reports must shall continue as long as the utility reserve fund is in effect and until all funds have been disbursed either to pay for completed eligible projects or as refunds to customers.

(d) No change.

(e) The utility must shall also separately identify the utility reserve fund in its annual report filed with the Commission each year pursuant to Rule 25-30.110, F.A.C.

(f) The utility must shall file an updated capital improvement plan with the Commission at least once every three years for as long as the utility reserve fund remains active.

(4) DISBURSEMENT OF FUNDS. A utility requesting disbursement of funds from an escrow account or authorization to use funds secured by an irrevocable letter of credit must shall file the following information and supporting documentation:

(a) through (d) No change.

(e) Other documentation that demonstrates the project was completed, such as photographs of the completed work, may be submitted, but is not required.

(f) A utility may request the disbursement of funds from a utility reserve fund to assist with making an emergency repair or replacement of existing distribution and collection infrastructure that is nearing the end of its useful life or is detrimental to water quality or reliability of service that is critical to the operation of the utility facilities and resulted from events that were out of the utility's control, such as weather related damage, accidents, or defective parts. The utility's request for an emergency disbursement must include the following information:

1. through 2. No change.

3. A statement explaining how the utility will reimburse the utility reserve fund for the emergency disbursement through

future funding sources, such as, government assistance, insurance benefits, manufacturer warranties, bank loans, or utility investment. If no funding sources will be available for reimbursement of the utility reserve fund, the utility must shall either provide a statement describing how the utility reserve fund project(s) or timeline may be modified to address the project funding needs without modifying the amount of the utility reserve fund surcharge, or provide the information required in subsection (5), below, to request a modification of the utility reserve fund surcharge.

(5) UTILITY RESERVE FUND MODIFICATIONS. A utility that must undertake a project that was not anticipated when the utility reserve fund was created or that must make significant modifications to a previously approved project may request a modification of the utility reserve fund at any time following creation of the fund or in the utility's next rate proceeding by filing the following information:

(a) No change.

(b) The information required in paragraph (2)(e) or (m), and paragraphs (f), (g), (h), and (i), if the utility is requesting a change in the utility reserve fund surcharge. Also, if the utility reserve fund is secured through an irrevocable letter of credit, the utility must shall provide an updated irrevocable letter of credit prior to implementation of the utility reserve fund surcharge increase.

(6) FINAL DISPOSITION OF UTILITY RESERVE FUND.

(a) The utility reserve fund surcharge must shall be discontinued after all approved eligible projects(s) have been completed, sufficient funds have been collected in the utility reserve fund to cover the cost of the approved eligible project(s), and the final disbursement has been made from the utility reserve fund. During the utility's next rate proceeding, the utility's rate base, capital structure, operating expenses, and rates must shall be adjusted as needed to reflect the completed projects. The amount of the new plant assets that are funded through a utility reserve fund must shall be offset with an equal addition to contributions-in-aid-of-construction.

(b) Any monies that remain in the utility reserve fund following the last disbursement for the completed eligible project(s) must shall be refunded to the customers with interest in accordance with Rule 25-30.360, F.A.C.

(c) All monies collected and held in the utility reserve fund should remain with the utility regardless of any changes in utility ownership. If a utility's ownership changes through a transfer or abandonment, the Commission will shall determine whether the utility reserve fund should be continued as follows:

1. In the event that the utility's ownership changes through a transfer as provided in Rule 25-30.037, F.A.C., the transfer agreement must shall include provisions that state: that the utility reserve fund will shall remain with the utility following

the close of the sale; that the seller must shall provide copies of all documents related to the utility reserve fund to the buyer, including the approved capital improvement plan, financial records, and status reports; whether the buyer requests to continue the utility reserve fund following the transfer; and whether the buyer will assume responsibility for the escrow account or obtain an irrevocable letter of credit to secure the utility reserve fund. If the buyer does not request to continue the utility reserve fund or does not provide sufficient documentation to guarantee the continued security of the utility reserve fund and compliance with the provisions set forth in this rule, all monies held in the utility reserve fund must shall be refunded to the customers with interest in accordance with Rule 25-30.360, F.A.C., and the utility reserve fund surcharge and utility reserve fund must shall be discontinued. However, if the transfer of ownership is requested pursuant to subsection 25-30.037(5), F.A.C., and will result in the transfer of ownership to an exempt entity other than a governmental utility, the buyer will shall not be required to obtain an escrow account or an irrevocable letter of credit.

2. In the event that the utility is abandoned as provided in Rule 25-30.090, F.A.C., all monies held in the utility reserve fund and all documents related to the utility reserve fund must shall remain with the utility and be turned over to the court-appointed receiver. If the utility remains under Commission jurisdiction following the abandonment, the court-appointed receiver must shall be responsible for managing the utility reserve fund in accordance with this rule and all applicable Commission Orders.

(d) If the utility fails to follow through with the eligible project(s) covered by the utility reserve fund or comply with the security, fund maintenance, or reporting requirements set forth in this rule, the Commission will shall initiate a review of the utility reserve fund and surcharge to determine whether the utility reserve fund and surcharge should be discontinued and whether all monies in the reserve fund should be refunded to the customers with interest in accordance with Rule 25-30.360, F.A.C.

64B13-18.002 Formulary of Topical Ocular Pharmaceutical Agents

PURPOSE AND EFFECT: To add new topical agents to the lists approved for use by licensees.

SUMMARY: The amendment adds one new approved antibiotic agent and one new non-steroidal anti-inflammatory agent.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: During discussion of the economic impact of this rule at its Board meeting, the Board concluded that this rule change will not have any impact on licensees and their businesses or the businesses that employ them. The rule will not increase any fees, business costs, personnel costs, will not decrease profit opportunities, and will not require any specialized knowledge to comply. This change will not increase any direct or indirect regulatory costs. Hence, the Board determined that a Statement of Estimated Regulatory Costs (SERC) was not necessary and that the rule will not require ratification by the Legislature. No person or interested party submitted additional information regarding the economic impact at that time.

GENERAL SUBJECT MATTER TO BE CONSIDERED:
 436964-2 & 439891-1

SW 10th Street Connector Project with limits on SW 10th Street from the S.R. 869/Sawgrass Expressway to S.R. 9/I-95, S.R. 9/I-95 from north of S.R. 834/Sample Road to north of S.R. 810/Hillsboro Boulevard, NW/NE 48th Street at S.R. 9/I-95, and S.R. 810/Hillsboro Boulevard & SW 10th Street interchanges at S.R. 9/I-95 in the City of Deerfield Beach.

The SW 10th Street Connector Project is a major investment and priority project as part of the Moving Florida Forward Infrastructure Initiative, advancing construction on critical transportation improvements statewide that address congestion, improve safety, strengthen the resiliency of the transportation network, and enhance Florida’s supply chain and economic growth.

The project improves SW 10th Street by creating two separate roadway systems designed to better serve both regional and local travel needs:

- SW 10th Street Connector lanes for regional travel between the S.R. 869/Sawgrass Expressway and S.R. 9/I-95
- A reconstructed local SW 10th Street corridor designed to better serve nearby communities, including a 12-foot shared-use path for pedestrians and cyclists

Additional improvements extend along S.R. 9/I-95 from north of S.R. 834/Sample Road to north of S.R. 810/Hillsboro Boulevard to enhance infrastructure, improve safety, and support long-term system operations.

Major project elements include:

- Constructing a dual-roadway system along SW 10th Street to separate local and regional traffic movements

- Reconstructing local SW 10th Street, including a shared-use path for cyclists and pedestrians
- Upgrading the S.R. 9/I-95 interchanges at SW 10th Street and S.R. 810/Hillsboro Boulevard
- Expanding the I-95 Express Lanes from one to two continuous lanes in each direction to improve regional connectivity
- Reconstructing the NW/NE 48th Street bridge over S.R. 9/I-95 to support long-term infrastructure resiliency
- Implementing corridor-wide roadway, drainage, and safety improvements along S.R. 9/I-95 and SW 10th Street

Early works construction will begin in late summer 2026. Early construction work is a deliberate, strategic first phase where operations are carefully sequenced to reduce the total construction footprint and lay the foundation for major construction work. Early construction work improvements include:

Sound Barrier Wall Construction: To minimize disruption to residents and the traveling public, sound barrier wall construction will be delivered in phases along the SW 10th Street corridor — beginning with properties on the south side between SW 30th Avenue and SW 24th Avenue, where construction space and right of way allow operations to start first. Once complete, the walls will reduce roadway noise for adjacent communities along the corridor.

Reconstruction of the NW/NE 48th Street Bridge: The NW/NE 48th Street Bridge over S.R. 9/I-95 will be closed, demolished and reconstructed during the preparation phase of the SW 10th Street Connector Project, requiring an approximate one-year full closure of the bridge. To minimize impacts during construction, detours will be in place throughout the closure to maintain access to surrounding neighborhoods, businesses, and travel routes. FDOT will continue to coordinate with the community as the work progresses.

Utility Relocation: Work will continue to take place along the corridor in coordination with local utility providers: City of Deerfield Beach, Broward County Water & Wastewater Services, Comcast, FP&L, TECO Peoples Gas & AT&T. This effort relocates existing infrastructure outside the footprint of upcoming roadway improvements and is a necessary step before major roadway construction can begin.

Major construction is estimated to begin in the summer of 2027. The estimated cost for the entire SW 10th Street Connector Project is \$1.3 billion.
