SUMMARY: The proposed rule amendment updates the rule language for disciplinary guidelines.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this rule will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: During discussion of the economic impact of this rule at its Board meeting, the Board concluded that this rule change will not have any impact on licensees and their businesses or the businesses that employ them. This change will not increase any direct or indirect regulatory costs. Hence, the Board determined that a Statement of Estimated Regulatory Costs (SERC) was not necessary and that the rule will not require ratification by the Legislature. No person or interested party submitted additional information

(5) The agency will adjust the number of credits required for the credit purchaser's project using the applicable location valuation factor (LVF), as calculated below, or an equivalent valuation model as proposed by the WQEA Owner in the application as further specified in subsection (6), below.

(a) through (c) No change.

(6) A WQEA Owner may propose an equivalent valuation model as set forth in subsection (5) above. The equivalent valuation model for a WQEA must provide reasonable assurance that the use of enhancement credits will provide compensating stormwater treatment as stated in section 373.4134(3)(d), F.S., and as described in section 9.7 of the Applicant's Handbook Volume I, referenced in subsection 62-332.100(4), F.A.C.

(a) The equivalent valuation model shall rely on the same minimum information required for development of a LVF, including:

1. Numerical models or analytical tools capable of evaluating pollutant fate and transport within the WQEA service area.

2. Data inputs used to characterize variability within the WQEA service area, including representative inter-annual conditions, seasonal patterns, and hydrologic cycles influencing pollutant fate and transport throughout the WQEA service area. The period of record and supporting information must be sufficient for the Department to determine that natural variability within the WQEA service area has been adequately characterized. A WQEA Owner may choose to use the Variability Factor procedure in paragraph 62-332.500(5)(c), F.A.C., to satisfy this requirement.

3. Identification of hydrologic connectivity, location of discharge points, and attenuation factors used to develop transport relationships.

(b) The equivalent valuation model may not reduce the number of credits required below the quantity of pollutant removed annually necessary to offset adverse impacts associated with the credit purchaser's project.

(c) The equivalent valuation model shall include sufficient documentation for the Department to verify the methodology, including a description of all inputs, assumptions, and model outputs.

Section IV Emergency Rules

DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Division of Animal Industry

RULE NO.: RULE TITLE:

5CER26-14 Interstate Import Requirements for Warm-Blooded Animals Originating from Areas Impacted by New World Screwworm

SPECIFIC FACTS AND REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY, OR WELFARE: The presence of New World Screwworm (*Cochliomyia hominivorax*) has been confirmed in both Texas and New Mexico, and there are numerous active cases involving domestic animals. New World Screwworms (NWS) are fly larvae that feed on living flesh, often entering through wound sites found on livestock and other animals. If not discovered and effectively treated, an infestation of NWS can be fatal. Immediate action, including the implementation of stringent inspection protocols and specifically timed treatment requirements for animals being transported from the affected region, is necessary to limit the spread and impact of NWS.

REASONS FOR CONCLUDING THAT THE PROCEDURE USED IS FAIR UNDER THE CIRCUMSTANCES: Adopting this emergency rule pursuant to s. 120.54(4), Florida Statutes,

is fair and justified because it provides at least the procedural protection given by other statutes, the State Constitution, or the United States Constitution, and it takes only the actions necessary to protect the public interest.

NWS poses an immediate danger to public health, safety, and welfare, and emergency rulemaking is necessary to prevent the introduction and spread of this potentially deadly pest. The immediate, temporary imposition of more stringent inspection requirements for animals imported from the affected region is the only viable means of ensuring the protection of Florida animals susceptible to this threat.

SUMMARY: In order to limit the spread and impact of NWS, the emergency rule implements more stringent inspection and treatment protocols for animals being transported to Florida from affected areas.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Dr. Michael A. Short, State Veterinarian, Director, Division of Animal Industry, Department of Agriculture and Consumer Services, 407 S. Calhoun St., Rm. 330, Mayo Bldg., Tallahassee, FL 32399-0800; (850)410-0900; AnimalIndustry@fdacs.gov.

THE TEXT OF THE EMERGENCY RULE IS:

5CER26-14 Interstate Import Requirements for Warm-Blooded Animals Originating from Areas Impacted by New World Screwworm.

A document used for interstate movement in lieu of an Official Certificate of Veterinary Inspection (OCVI) for a specified exemption in Chapter 5C-3, F.A.C., including Extended Equine Movement Permits, as incorporated in subsection 5C-3.003(5), F.A.C., a valid Owner-Shipper Statement as described in subsection 5C-3.002(2), F.A.C., a Permit for Interstate Movement from a USDA Approved Livestock Facility, FDACS-09158 Rev. 04/18, as incorporated in paragraph 5C-3.004(3)(b), F.A.C., and a Commuter Herd Agreement as described in paragraph 5C-3.004(3)(c), F.A.C.

(b) Authorized Representative. An employee of a U.S. state or the U.S. federal government, a licensed veterinarian accredited by the United States Department of Agriculture (USDA) who is authorized to conduct animal disease control and eradication activities, or an individual who has undergone state government-approved or federal government-approved training and is certified by a U.S. state or the U.S. federal government as an NWS inspector.

(c) Effective Treatment. A systemic product that is experimentally, conditionally, or fully licensed or approved by

the United States Department of Agriculture, Center for Biologics or the United States Food and Drug Administration, for use in animals against internal or external parasites and shown to be effective in preventing or treating New World Screwworm (NWS) larval infestation in peer reviewed scientific literature.

(d) High-Risk County. All U.S. Counties within 125 miles of an infested Mexican state.

(e) Infested Mexican State. A Mexican state that has an established NWS breeding population. A Mexican state is considered infested with NWS until Mexico's Secretariat of Agriculture and Rural Development (SADER) declares the Mexican state to be free of NWS and that declaration is recognized by United States Department of Agriculture, Animal and Plant Health Inspection Service.

(f) Infested State. A U.S. state with one or more infested zones. A state is considered infested until U.S. state or federal officials declare the state free of NWS.

(g) Infested Zone. Any county where the USDA or the State Animal Health Official has confirmed a breeding population of NWS, as well as all adjoining counties. A zone is considered infested until U.S. state or federal officials declare all counties within the infested zone free of NWS.

(i) Originating from an Infested Zone. Initiating interstate movement to Florida from an infested zone or being present in a county that was considered an infested zone within the previous fourteen days. Warm-blooded domestic animals that were transported through an infested zone without stopping or offloading are not considered as originating from an infested zone.

(j) Shelter Animals. All warm-blooded animals within the custody or care of a public or private animal shelter, humane organization, or animal control agency.

(k) Small Mammals. All animals in the taxonomic order Rodentia or Lagomorpha.

(l) Wound. Any break in or injury to the animal's integument, meaning the skin or mucous membrane. Surgical sites which have not fully healed, including those due to management practices such as dehorning and castration sites, are considered wounds.

(2) Interstate Import Requirements. Except where more stringent requirements are adopted herein, all animals being imported into Florida from high-risk counties, infested zones, or infested states must meet the testing and movement requirements in Chapter 5C-3, F.A.C.

(a) No shelter animals originating from an infested state may be imported into Florida.

(b) No alternative movement documents are accepted in lieu of an OCVI for warm-blooded animals being imported into

Florida from a high-risk county, an infested state, or an infested zone.

(c) All warm-blooded domestic animals originating outside of an infested zone but from an infested state or high-risk county being imported into Florida must be accompanied by an OCVI documenting that all animals listed on the OCVI have been inspected and found free of contagious and infectious diseases and pests, including NWS.

1. The OCVI must include the statement, "All animals listed on the OCVI have been inspected and are free from screwworm larvae infestation."

2. The OCVI is valid for no more than 5 days from the date of inspection.

(d) All warm-blooded domestic animals originating from an infested zone, as defined in paragraph (1)(i) of this rule, must be accompanied by all animal treatment or movement documents required by the originating state and an OCVI documenting that all animals listed on the OCVI have been treated with an effective treatment for NWS.

1. The OCVI must include the statement, "All animals listed on the OCVI have been inspected and are free from screwworm larvae infestation." The OCVI must also document the treatment, listing the treatment date, route of administration, and medication administered.

2. The OCVI is valid for 5 days from the date of inspection.

3. The effective treatment for NWS must be administered in accordance with the following:

a. Oral or injected treatments must be administered no fewer than 12 hours and no more than 14 days prior to entry into Florida.

b. Systemic, topical treatments must be administered no fewer than 72 hours and no more than 14 days prior to entry into Florida.

4. The effective treatment must be administered by or directly overseen by an authorized representative.

5. In addition to receiving a systemic effective treatment, all animals with non-infested wounds must have the wounds topically treated with a product effective against NWS. The wound location and treatment must be documented on the OCVI.

(e) If any animal in a shipment is suspected to be infested with NWS, all animals in the shipment are prohibited from entering Florida until all animals in the shipment have been administered an effective treatment, all wounds have healed, and all other requirements of this rule have been met.

SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC, HEALTH, SAFETY, OR WELFARE:

As the White House explained earlier this year, the United States currently is under threat from narcoterrorists and transnational gangs; legacy Islamist terrorists; and violent left-wing extremists, including anarchists and anti-fascists. (United States Counterterrorism Strategy,

<https://www.whitehouse.gov/wp-content/uploads/2026/05/2026-USCT-Strategy-1.pdf>).

The timeline for committing terrorist acts has become increasingly short, providing less opportunity for law enforcement or public safety officials to intervene and dismantle terror threats. By its nature, terrorist activity presents an immediate danger to public health, safety, and welfare and therefore necessitates immediate protective measures. Accordingly, the Florida Department of Law Enforcement must adopt an emergency rule pursuant to which the Chief of Domestic Security can recommend designations of foreign and domestic terrorist organizations under section 943.03102, F.S. As the federal government has

found, terrorist organization designations play a critical role in the fight against terrorism and are an effective means of curtailing support for terrorist activities. (<https://www.state.gov/foreign-terrorist-organizations/>).

REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES:

The procedure used to adopt this emergency rule is fair under the circumstances because terrorist activity presents an immediate danger to public health, safety, and welfare, and therefore necessitates immediate protective measures. The prompt implementation of section 943.03102, F.S., through emergency rulemaking is essential to domestic security because it will enable the Chief of Domestic Security to carry out his statutory functions without undue delay. This procedure provides at least the procedural protections given by other statutes, the State Constitution, and the United States Constitution, and takes only the action necessary to protect the public interest under the emergency procedure.

NOTE: The Governor, Chief Financial Officer, Attorney General, and Commissioner of Agriculture will join via phone. The Cabinet Meeting Room will be open to the public, and the meeting will be streamed on the Florida Channel.
