THE TEXT OF THE PROPOSED RULE IS:

61B-22.005 Reserves.

(1) through (2) No change.

(3) Calculating reserves required by statute. Funding formulas for reserves required by Section 718.112(2)(f), Florida Statutes, shall be based on either a straight-line accounting method or a pooled reserve accounting method, containing an analysis of each of the required line item assets.

(a) For a residential condominium that is not required to complete a SIRS, reserves for deferred maintenance and capital expenditures required under Section 718.112(2)(f), Florida Statutes, must be calculated using a formula that allocates the total estimated deferred maintenance expense or replacement cost of a line item asset or group of assets evenly over the asset or group of assets' remaining useful life on an annual basis. The

annual reserve funding amount may be adjusted from year to year to reflect inflation, deflation, or other changes in the estimated deferred maintenance expense or replacement cost of the line item asset or group of assets. Any adjustment must continue to allocate the estimated cost over the remaining useful life of the line item asset or group of assets without disproportionately shifting reserve funding to earlier or later years. The association shall annually evaluate whether the total deferred maintenance expense or replacement cost of each line item requires adjustment for maintenance or replacement purposes. The association must maintain funding that keeps the reserve balance above zero, unless properly waived or reduced in accordance with Section 718.112(2) F.S and this rule.

(b) through (c) No change.

(d) Pooled Method: If the association maintains a pooled account of two or more of the required reserve assets, the amount of the contribution to the pooled reserve account as disclosed on the proposed budget shall be not less than that required to ensure that the balance on hand at the beginning of the period for which the budget will go into effect plus the projected annual cash inflows over the remaining estimated useful lives of all of the assets that make up the reserve pool are equal to or greater than the projected annual cash outflows over the remaining estimated useful lives of all of the assets that make up the reserve pool, based on the current reserve analysis. The projected annual cash inflows may include estimated earnings from investment of principal. The reserve funding formula shall not include any type of balloon payments or other financing arrangements that results in a one-time payment that exceeds the standard payment amounts found on the reserve schedule, at any point of the assessment replacement term or period. In addition, pooled reserve funding schedules may not be structured in a manner that defers reserve contributions for the purpose of reducing current assessments or in a way to increase current contributions to offset or reduce future assessments. Rates of change in funding over the course of the reserve schedule may be increased or decreased to account for inflation or deflation but shall not exceed the annual inflation or deflation amount according to the Consumer Price Index for Urban Consumers or final demand for individual commodities according to the Producer Price Index, whichever is greater and more appropriate for the situation. ~~The association may deviate from these limits when changes in the market price of materials substantially impact projected costs, provided such changes are supported by objective data from a State of Florida, federal government entity, or the Federal Reserve System.~~

(e) An association may change the method of accounting for statutory reserves between straight-line and pooled accounting without a vote of the unit owners, provided that such change does not alter the original authorized purpose, the total

reserve funding balances ~~the required level of funding~~, or the restricted use of reserve funds.

1. The intent of this paragraph is solely to clarify when a change between pooled and straight-line reserve accounting constitutes a change in accounting method not requiring a vote of the unit owners, as opposed to a change to reserve funding levels, balances, purposes, or permitted uses, which would require a vote of the unit owners. Without a vote of the unit owners, an association may transfer, reclassify, or reallocate reserve balances for required reserve items from one or more reserve accounts that are maintained under the straight-line method into a single reserve account to be maintained under the pooled method. ~~An association may change the reserve accounting method in a manner that requires the reclassification or redistribution of reserve balances between reserve components without a vote of the unit owners only if:~~

a. through d. No change.

2. A vote of the unit owners is required if a change in the reserve accounting method results in any of the following:

a. The reduction ~~or elimination~~ of total reserve funding balances for all any reserve components component;

b. though c. No change.

3. No change.

(4) through (11) No change.

Players will manually enter the 24-digit ticket number shown on Eligible HOLIDAY BONUS and \$15,000,000 PLATINUM PAYOUT tickets or the 19-digit ticket number on Eligible FLORIDA LOTTO tickets on the ticket entry page to collect entries as described in subsection (3).

If a player deletes his/her account, whether through the app or on the Florida Lottery's website, all account data, including ticket entries, associated with the email address used to register his/her account will also be deleted. Any entries earned will not be entered into a drawing. A

player's account cannot be reactivated using the email address associated with the deactivated account. Should a player establish a new account utilizing a different email address, account data, including ticket entries, cannot be transferred to the newly established account. Tickets entered under the prior account cannot be re-entered utilizing the newly created account.

4. Regardless of whether a player chooses to participate in the Bonus Play by using the web browser or the app, the following provisions shall apply:

a. the player must use the same account login information to enter tickets;

b. the player will only be required to register one time; and

c. the player's entry history will be cumulative among the entry platforms.

Fictitious names and business names will not be accepted and shall subject the player and any associated entries to disqualification.

(c) Tickets should not be mailed to the Lottery for entry into a drawing. Tickets received in the mail by the Florida Lottery for entry into the Bonus Play will not be entered into a drawing and will not be returned.

(d) The odds of winning depend on the number of entries in a drawing. All entries are subject to validation by the Florida Lottery and will be disqualified if eligibility requirements are not met.

(3) Earning Entries.

(a) To earn entries into a drawing, a player may enter ticket numbers by scanning the barcode on the bottom of an Eligible ticket using his/her mobile device or by manually entering the 24-digit ticket number (Eligible HOLIDAY BONUS and \$15,000,000 PLATINUM PAYOUT tickets) or the 19-digit number (Eligible FLORIDA LOTTO tickets) on the website or the app. A player may enter a maximum of 200 tickets per day. Eligible Scratch-Off tickets (HOLIDAY BONUS and \$15,000,000 PLATINUM PAYOUT) purchased during the

Bonus Play may be entered throughout the entire Bonus Play Period. Eligible FLORIDA LOTTO tickets must be entered during the Drawing Entry Period in which they were purchased or issued. Entries must be made by 11:59:59 p.m. (ET) on the last day of a Drawing Entry Period to be entered into that drawing.

(b) Number of Entries Earned.

1. For Eligible tickets, a player will receive the number of entries set forth below:

Game	Price Point	Number of Entries
#1648 – HOLIDAY BONUS 10X	\$1	1
#1649 – HOLIDAY BONUS 20X	\$2	2
#1650 – HOLIDAY BONUS 50X	\$5	5
#1651 – HOLIDAY BONUS 100X	\$10	10
#1652 – HOLIDAY BONUS 200X	\$20	20
1647 – \$15,000,000 PLATINUM PAYOUT	\$30	30
FLORIDA LOTTO	Starting at \$1	1 Entry for each \$1 Spent on a Ticket
HOLIDAY BONUS Family of Games (All of Game Numbers 1648, 1649, 1650, 1651, and 1652. Game 1647 is not part of the HOLIDAY BONUS Family of Games.)	\$38	50 Bonus Entries (See subparagraph (3)(b)2.)

2. Bonus Entries. As a player enters his/her Eligible HOLIDAY BONUS ticket/s, bonus play cards will also populate with holiday/winter themed symbols. There are four (4) bonus play cards. Each of the four cards will have one (1) space for each HOLIDAY BONUS ticket (1648, 1649, 1650, 1651, and 1652). Example: A player enters two (2) Game 1649 (HOLIDAY BONUS 20X) and one (1) Game 1651 (HOLIDAY BONUS 100X) tickets, he/she will receive two symbols to populate the 1649 space on two cards and one symbol in the Game 1651 space on one card; a player will still receive entries, as described in subparagraph (3)(b)1. If more than four tickets for the same game are entered, and none of the four cards are complete, entries in excess of the four tickets will be disregarded, will not be added once a card is completed and cleared, and cannot be entered again. Discarded ticket entries will still acquire entries as described in subparagraph (3)(b)1.

Example: A player enters six (6) Game 1648 (HOLIDAY BONUS 10X) tickets but has not entered all other Eligible HOLIDAY BONUS tickets to complete a card. Two of Game 1648 tickets will be discarded for the purpose of filling cards but will still acquire entries as described in subparagraph (3)(b)1. Once a card has been completed, the spaces will clear and be available for new entries. When the entire HOLIDAY BONUS Family of Games (1648, 1649, 1650, 1651, and 1652) is entered, thus completing a card, during the same Drawing Entry Period, fifty (50) bonus entries will be earned. The entire HOLIDAY BONUS Family does not need to be entered simultaneously but must be entered during the same Drawing Entry Period to earn the bonus entries. Multiple HOLIDAY BONUS families may be entered; each complete family entered during the same Drawing Entry Period will receive 50 additional entries. Bonus play cards will clear immediately after each drawing; tickets entered during one Drawing Entry Period will not be carried over into subsequent Drawing Entry Period/s.

(c) Promo Codes. Promo Codes provide additional entries into a drawing and must be entered at the same time an Eligible ticket is entered. Promo codes designated for a specific Drawing Entry Period cannot be used in another Drawing Entry Period and can only be used one time. Various promo codes will be available for each of the three (3) Drawing Entry Periods via Florida Lottery social media channels (Facebook, Instagram, X (formerly Twitter)); Gas Station TV (GSTV); In-Store Animation L-Bars; and digital units such as CTV overlays and mobile high impact ad placements.

(4) Entry Periods and Drawings. The Florida Lottery will conduct three (3) drawings during the Bonus Play. Winners for each drawing will be randomly selected from entries submitted and received before midnight (ET) of a Drawing Entry Period end date, as identified in the table below. Entries from one Drawing Entry Period are not carried over into subsequent Drawing Entry Period/s. Winners will be randomly selected using a certified random number generation process. The drawing shall be public, held in Tallahassee, Florida, and witnessed by an accountant employed by an independent certified public accounting firm. The Drawing Entry Periods, Drawing Dates, and Winner Announced dates:

Prizes will be awarded in the quantities set forth in the table in subsection (5) and awarded to players in the order in which they were drawn. Petitioner is seeking a declaratory statement regarding the roofing scope of authority for Certified Building Contractors. Petitioner requests that the Board provide clarification regarding the following: “(1) Does a standard residential under-sink reverse osmosis drinking water treatment system qualify as a “water conditioning unit” for purposes of §489.103(15), F.S. and if so, is an operator of a water conditioning service exempt from the Florida plumbing contractor licensing

requirements when installing and maintaining such a residential RO system? (2) Does the exemption apply when the RO system is connection to the existing potable water supply and drainage system in accordance with the manufacturer’s installation instructions and applicable plumbing code requirements? (3) If Section 489.103(15), F.S. does not apply to a residential under-sink RO system, what specific Florida statute, administrative rule, or CILB interpretation excludes such an RO system from the statutory exemption?” Petitioner is seeking the State-level interpretation of Section 489.103(15), F.S. as it applies to Petitioners proposed activities, rather than a determination of the City of Hollywood’s local permitting procedures. HERNANDO COUNTY ATTORNEY'S OFFICE**HERNANDO COUNTY BOARD OF COUNTY COMMISSIONERS REPORT OF PUBLIC INTEREST DETERMINATION REGARDING UNSOLICITED PUBLIC-PRIVATE PARTNERSHIP PROPOSAL**

Project: Northwest Waste Management Facility Landfill Gas-to-Renewable Natural Gas Project

Private Entity: Viridi Energy Asset Holdings IV, LLC

Notice is hereby given that Hernando County, Florida (the “County”), received an unsolicited proposal from Viridi Energy Asset Holdings IV, LLC (“Viridi”) pursuant to section 255.065, Florida Statutes, and Sections 44 and 45 of the Hernando County Procurement Manual. Viridi proposes to finance, design, construct, own, operate, and maintain an integrated landfill gas collection, control, and beneficial-use project at the County’s Northwest Waste Management Facility. The proposed project includes expansion and optimization of the landfill’s gas collection and control system and construction of a renewable natural gas processing facility that would convert collected landfill gas into pipeline-quality renewable natural gas. The Hernando County Board of County Commissioners considered the unsolicited proposal at a duly noticed public meeting held on August 25, 2026. At the meeting, the proposal was presented, and affected public entities and members of the public were afforded an opportunity to provide comments. The Board authorized County staff to proceed with negotiating an interim agreement with Viridi and to continue consideration of the proposal without initiating a public bidding phase, subject to the additional public meeting, public-interest determination, agreement negotiations, and approval requirements of section 255.065, Florida Statutes, and the Hernando County Procurement Manual. The Board considered the factors required by section 255.065(3)(c), Florida Statutes, and made the following preliminary findings:

Benefits to the Public

The proposed project would improve the collection and management of landfill gas at the Northwest Waste Management Facility, increase methane-capture efficiency, reduce emissions, support environmental and regulatory compliance, and convert an existing waste product into a

beneficial renewable-energy resource. The project would also expand and improve the facility's gas collection and control infrastructure, including extraction wells, collection piping, flare systems, and associated monitoring and control systems. These improvements would support existing landfill operations and future landfill-cell development. The project is proposed to be funded entirely through private investment, thereby avoiding upfront County capital expenditures. It would also create a new long-term revenue stream for the County from an existing County resource and may support local employment and economic activity. The Board also considered that the County's prior agreement for the beneficial use and monetization of landfill gas has been terminated. At present, the collected landfill gas is not being put to its highest and best environmental or financial use for the benefit of County residents. The proposed project would provide a means to convert that existing resource into renewable natural gas, improve its environmental use, and restore an opportunity for the County to receive revenue from the gas. Although Viridi proposes to own the renewable natural gas facility during the proposed term and ownership is not presently proposed to be conveyed to the County after commercial operations begin, the public benefits apart from ownership include privately funded infrastructure improvements, enhanced landfill-gas management, improved environmental performance, support for regulatory compliance, recurring revenue to the County, and preservation of County ownership and control of the underlying landfill property.

Financial Structure and Economic Efficiencies

Viridi proposes to fund 100 percent of the project's development and construction costs and to assume responsibility for financing, design, construction, operation, and maintenance of the landfill gas collection and renewable natural gas systems. No upfront capital cost to the County is proposed. Compensation to the County would be performance-based and derived from a royalty on gross revenues generated by the sale of renewable natural gas and associated environmental attributes. Payments would be calculated monthly and remitted quarterly, accompanied by production and revenue reports. Based upon the proposal, estimated County revenue during the proposed twenty-year term ranges from approximately \$19,885,540 to \$40,000,168, with an estimated net present value ranging from approximately \$11,313,862 to \$19,659,423. These figures remain projections subject to validation, negotiation, market conditions, project performance, and approval of an interim agreement and comprehensive agreement. The proposed structure may produce economic efficiencies by combining project financing, design, construction, operation, maintenance, and optimization under a single private entity; using private capital instead of County capital; and generating revenue from landfill gas that would otherwise have limited beneficial use. The Board also

considered the potential availability and financial significance of the federal investment tax credit ("ITC") to the proposed project. Based on the information presented at the meeting, the facility would need to be placed in service and producing renewable natural gas by the end of 2028 to obtain the maximum anticipated benefit associated with the ITC. The Board considered the proposed schedule important because the availability and value of the tax credit may affect the project's financial structure, economic feasibility, and potential financial return to the County. The availability, amount, and treatment of any tax credit remain subject to applicable federal law, project eligibility, timely completion, and further due diligence and negotiation.

Qualifications, Experience, and Ability of the Private Entity to Perform the Project

Viridi represented that it and its personnel have experience developing, financing, constructing, commissioning, owning, and operating landfill gas-to-renewable-natural-gas projects throughout the United States. The proposal identifies representative projects in Alabama, Wisconsin, New Hampshire, and Nebraska. Viridi also represented that its financing platform is supported by institutional capital and relationships with infrastructure lenders. Based on the information submitted, Viridi and its proposed team appear to possess relevant experience and qualifications sufficient to warrant further consideration and negotiation. Final determinations concerning financial capacity, technical capability, performance requirements, security, and risk allocation will be addressed through additional due diligence and negotiation of any interim and comprehensive agreements.

Compatibility With Regional Infrastructure Plans

The proposed project is compatible with existing and planned operations at the Northwest Waste Management Facility. The site has established landfill operations, continuing disposal capacity, consistent waste intake, and proximity to pipeline infrastructure. The proposed project would be located within the existing landfill footprint and is expected to require approximately one-half to one acre for the renewable natural gas processing facility. Potential infrastructure considerations include utility service, pipeline interconnection, site access, landfill traffic, construction staging, and coordination with existing and future landfill operations. These matters would be evaluated and addressed during due diligence, project design, permitting, and negotiation of the interim and comprehensive agreements.

Public Comments

No comments opposing or raising concerns regarding the proposed project were submitted by affected public or private business entities during the August 25, 2026, meeting. During the August 25, 2026, meeting, members of the public asked questions and offered comments concerning project safety,

regulatory oversight by the Florida Department of Environmental Protection (“FDEP”), the purpose of the proposed extraction wells, the need for appropriate protections during contract negotiations, opportunities to use qualified local contractors, the County’s current disposition of landfill gas and any resulting unrealized revenue, and the project’s anticipated financial and environmental benefits to the community. It was explained that the County’s prior agreement to monetize landfill gas had been terminated and that the gas is not currently being used in a manner that provides the best available environmental and financial benefits to County residents. In response to the remaining questions, representatives explained that the facility would be operated in accordance with applicable federal and state safety requirements governing gas facilities and that local firefighters would be provided an opportunity to tour the facility and receive site-specific orientation. Representatives further confirmed that the project would be subject to applicable FDEP permitting and regulatory requirements. Regarding the wells, it was clarified that they are gas-extraction wells, not injection wells, and that landfill-gas collection wells are required independently of the proposed project because landfill gases cannot be released uncontrolled into the atmosphere. Representatives also stated that reasonable efforts would be made to engage qualified local contractors. The County further advised that it would retain qualified external consultants with relevant industry expertise to assist with due diligence and contract negotiations and to protect the County’s interests. The Board considered these questions, responses, and favorable public comments regarding the project’s potential financial and environmental benefits and determined that the matters raised can be appropriately addressed through regulatory compliance, technical review, due diligence, and carefully negotiated agreement terms and therefore do not preclude further consideration of the proposal.

Public Interest Determination

Based upon the foregoing factors and findings, the Board determined that further consideration of the unsolicited proposal without initiating a public bidding phase is in the public interest. The proposed project has the potential to provide substantial environmental, operational, infrastructure, and financial benefits to the County while using private financing and avoiding upfront County capital costs. This determination authorizes continued evaluation and negotiation only. It does not constitute approval of an interim agreement, comprehensive agreement, lease, gas-rights agreement, construction activity, or final project. Any interim agreement and comprehensive agreement will be presented to the Board of County Commissioners for consideration and approval at duly noticed public meetings. The County reserves the right to discontinue negotiations or reject the proposal at any time before execution of a comprehensive agreement. A second duly

noticed public meeting will be held at a date and time to be determined in the John Law Ayers County Commission Chambers, Hernando County Government Center, 20 North Main Street, Room 160, Brooksville, Florida 34601. At that meeting, the Board will receive additional public comment and determine whether to proceed with an interim agreement for the unsolicited proposal without engaging in a public bidding process. This report is published in the Florida Administrative Register pursuant to section 255.065, Florida Statutes, and Section 45 of the Hernando County Procurement Manual.
