SUMMARY: Pursuant to changes in section 395.1055, F.S., the Agency, in consultation with the Pediatric Cardiac Technical Advisory Panel (PCTAP), proposes to create a new rule to establish standards for pediatric cardiac catheterization and pediatric cardiovascular surgery programs.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: A SERC has not been prepared by the agency. For rules listed where no SERC was prepared, the Agency prepared a checklist for each rule to determine the necessity for a SERC. Based on this information at the time of the analysis and pursuant to section 120.541, Florida Statutes, the rule will not require legislative ratification.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

Notice of Applicable Stream Assessment for Waters in the Sarasota Bay-Peace-Myakka Basin

The Florida Department of Environmental Protection (department) gives notice that sufficient documentation has been provided to the department to demonstrate that an

unnamed ditch located in WBID 1738 within the Sarasota Bay-Peace-Myakka Basin that is a tributary to Little Payne Creek in WBID 1769 meets all the conditions identified in paragraph 62-302.200(36)(b), Florida Administrative Code, for an exclusion from the definition of a stream. For purposes of interpreting the narrative nutrient criterion in paragraph 62-302.530(48)(b), F.A.C., this waterbody segment will be assessed applying the stream nutrient impairment thresholds in subsections 62-303.351(3)-(5) and 62-303.450(1), (2) and (5), F.A.C., rather than the numeric nutrient standard for streams. This action only affects the implementation of nutrient criteria for the specified waterbody segment; all other applicable water quality standards remain in effect. These assessment thresholds will continue to apply unless the department receives sufficient countervailing information concerning the applicability of paragraph 62-302.200(36)(b), F.A.C., to this waterbody segment, including the purpose of the waterbody segment such as flood protection, stormwater management, irrigation, or water supply. A map showing the geographic extent and supporting documentation of the stream exclusion is available at <https://floridadep.gov/dear/water-quality-standards-program/documents/teco-stream-exclusion-map>. Additional information regarding this stream exclusion may be obtained by contacting: Kaitlyn Sutton, Department of Environmental Protection, 2600 Blair Stone Road, Water Quality Standards Program, MS #6511, Tallahassee, FL 32399-2400, at Kaitlyn.Sutton@FloridaDEP.gov or by calling: (850)245-8819.
