

# SHELLFISH HARVESTING AREA CLASSIFICATION BOUNDARIES AND MANAGEMENT PLANS

Rule 5L-1.003, F.A.C.

Revised March 2026 ~~August 2022~~

Florida Department of Agriculture and Consumer Services  
Division of Aquaculture  
Holland Building, Suite 217  
600 ~~South~~ S Calhoun Street, ~~Suite 217~~  
Tallahassee, ~~Florida~~ FL, 32399

## **PREFACE**

SHELLFISH HARVESTING AREA CLASSIFICATION BOUNDARIES AND MANAGEMENT PLANS, defines classification boundaries and management of shellfish harvesting areas in Florida. Each shellfish harvesting area has a unique name and area number. Shellfish areas are classified by the Florida Department of Agriculture and Consumer Services (FDACS) to protect shellfish consumers from shellfish borne illnesses and to maximize the harvest of shellfish resources. Shellfish are defined in this context as oysters, clams and mussels. The Department is authorized by Chapter 597.020, Florida Statutes to establish regulations, specifications, and codes relating to sanitary practices for catching, cultivating, packaging, handling, processing, preserving, canning, smoking, and storing of shellfish. Criteria for classification are contained in Chapter 5L-1, Florida Administrative Code (F.A.C.), which incorporates by reference the National Shellfish Sanitation Program (NSSP) Model Ordinance.

**01 BIGLAGOON SHELLFISH HARVESTING AREA CLASSIFICATION**  
**BOUNDARIES AND MANAGEMENT**

<u>4-DIGIT AREA NUMBER AND NAME</u>	<u>COUNTY(S)</u>
<u>0111 Big Lagoon approved</u> <u>----- Big Lagoon prohibited</u>	<u>Escambia</u>

**0111 Big Lagoon Approved Area**

Classification boundaries: The area includes all waters within a polygon beginning at Spanish Point at 30.320541, -87.328016, then northeastward to a spoil site west of Fort McRee at 30.324599, -87.326790, then northwestward to an unnamed drainage canal at 30.332607, -87.336890, then westward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the westernmost tip of Trout Point at 30.326716, -87.350404, then south westward to red channel marker 10, then southwestward to a point centrally located in the Intracoastal Waterway, at 30.322369, -87.354061, then westward along the Intracoastal Waterway to a centrally located point in the Intracoastal Waterway at 30.320040, -87.37834, then northwestward to the eastern base of a dock at Seaglades Association Residents Park at 30.323944, -87.384132, then westward to a point on the eastern shoreline of the mouth of an unnamed bayou at 30.320479, -87.392065, then westward across the mouth of the bayou to a point on the western shoreline at 30.320255, -87.392267, then westward to a point west of the Big Lagoon Observation Tower at 30.308855, -87.402636, then westward across the mouth of the bayou to a point at 30.308734, -87.404093, then westward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to a point located south of Big Lagoon State Park recreation area at 30.310158, -87.417166, then southward to a point west of Johnson Beach Boat Ramp at 30.305080, -87.419126, then eastward along the mainland shoreline, across the mouths of all creeks, ditches, man-made canals, and bayous along the Johnson Beach National Seashore to the point of origin at Spanish Point at 30.320541, -87.328016.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any two-day period measured by NOAA exceeds 9.22 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to public health.

**Big Lagoon Prohibited Area**

The area includes all waters within the following polygons:

Polygon 1: Beginning at Spanish Point at 30.320541, -87.328016, then counterclockwise along the shorelines of all creeks, ditches, man-made canals, and bayous to a spoil site west of Fort McRee at 30.324599, -87.326790 continuing to the point of origin at Spanish Point at 30.320541, -87.328016.

Polygon 2: Beginning at a spoil site west of Fort McRee at 30.324599, -87.326790, then eastward along the shorelines of all creeks, ditches, man-made canals, and bayous to a point east of Fort McRee at 30.328210, -87.314076 then northward to a point east of the intersection of Old West Access Road and Sherman Cove Marina Road at 30.334420, -87.319436, then westward along the shorelines of all creeks, ditches, man-made canals, and bayous to an unnamed drainage canal on the northern shore of Big Lagoon at 30.332607, -87.336890, then southeastward to the point of origin at a spoil site west of Fort McRee at 30.324599, -87.326790.

Polygon 3: Beginning at the westernmost tip of Trout Point at 30.326716, -87.350404, then westward along the shorelines of all creeks, ditches, man-made canals, and bayous to the western base of a dock at Seaglades Association Residents Park at 30.323944, -87.384132, then southeastward to a centrally located point of the Intracoastal Waterway at 30.320040, -87.37834, then eastward along the Intracoastal Waterway to a point centrally located in the Intracoastal Waterway at 30.322369, -87.354061, then east to red channel marker 10 then northward to the point of origin at the westernmost tip of trout point at 30.326716, -87.350404.

Polygon 4: Beginning at a point located near Big Lagoon State Park recreation area at 30.310158,

-87.417166 then westward along the shorelines of all creeks, ditches, man-made canals, and bayous to a point northeast of the 292 bridge at 30.313341, -87.426143, then southward to a point southeast of the 292 bridge at 30.312038, -87.42654, then southeastward along the shorelines of all creeks, ditches, man-made canals, and bayous to a point west of Johnson Beach Boat Ramp at 30.305080, -87.419126, then northward to the point of origin at a point near Big Lagoon State Park recreation area at 30.310158, -87.417166.

**02 PENSACOLA BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
0222 Pensacola Bay conditionally approved Escambia Bay	Escambia, Santa
0232 Pensacola Bay conditionally approved East Bay	Rosa
----- Pensacola Bay prohibited	

**0222 Pensacola Bay conditionally approved Escambia Bay**

Classification Boundaries: Beginning at the southern shore of the mouth of Trout Bayou at 30.505614, -87.095778, then southwestward to Escambia Bay channel marker 2, then southwestward to a point at 30.45333, -87.13803, then due west to a point on the western shoreline at 30.452646, -87.168956, then southward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of the Magnolia Bluff shoreline and a line drawn from Butcherpen point northwestward to the 10 story high-rise at 1700 US 90 on Magnolia Bluff at 30.433785, -87.173187, then southeastward across Escambia Bay to Butcherpen Point at 30.378833, -87.135944, then eastward along the southern shoreline of Escambia Bay across the mouths of all creeks, ditches and man-made canals, to the intersection of the southern shoreline of Escambia Bay and the western side of the State Road 281 Bridge (Garcon Point Bridge) at 30.399308, -87.077083, then northward following the western side of the Garcon Point Bridge to the intersection of the western side of the Garcon Point Bridge and the Garcon Peninsula shoreline at 30.444044, -87.100608, then northward along the western shoreline of the Garcon Peninsula, across the mouths of all creeks, ditches and man-made canals to the point of origin at the southern shore of the mouth of Trout Bayou at 30.505614, -87.095778.

Management: The area will be temporarily closed to harvesting when: 1) Escambia River discharge measured at Century, Florida, exceeds 15,456 cubic feet per second; 2) Cumulative rainfall for any five-day period measured by NOAA exceeds 3.35 inches; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002 F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**0232 Pensacola Bay conditionally approved East Bay**

Classification Boundaries: Beginning at a point on the northeast shoreline at 30.487404, -86.988147, then southwestward to East Bay channel marker 10, then southward following the channel markers to East Bay channel marker 3, then northwestward to a point on the southeastern shoreline of Garcon Peninsula at 30.447431, -87.079407, then along the southern shoreline of the Garcon Peninsula across the mouths of all creeks, ditches and man-made canals to the intersection of the southern shoreline of the Garcon Peninsula and the western side of the State Road 281 Bridge (Garcon Point Bridge) at 30.444044, -87.100608, then southeastward following the western side of the Garcon Point Bridge to the intersection of the western side of the Garcon Point Bridge and the southern shoreline of East Bay at 30.399308, -87.077083, then eastward along the southern shoreline of East Bay across the mouths of all creeks, ditches and man-made canals to a point on the southeastern shoreline at 30.433344, -86.962622, then due north to the northern shoreline of East Bay at 30.470868, -86.962309, then northwestward along the shoreline across the mouths of all creeks, ditches and man-made canals to the point of origin at 30.487404, -86.988147.

Management: The area will be temporarily closed to harvesting when: 1) Yellow River stage measured at Milton, Florida, exceeds 40.54 feet; 2) Cumulative rainfall for any five-day period measured by NOAA exceeds 3.80 inches; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002 F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Pensacola Bay prohibited Escambia Bay**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the southern shore of the mouth of Trout Bayou at 30.505614, -87.095778, then southwestward to Escambia Bay channel marker 2, then southwestward to a point at 30.45333, -87.13803, then due west to a point on the western shoreline at 30.452646, -87.168956, then northward along the mainland shoreline, across the mouths of all creeks and canals to a West/East line that crosses the Escambia River at channel marker 38, then southward along the shoreline to point of origin at the southern shore of the mouth of Trout Bayou at 30.505614, -87.095778.

Polygon 2: Beginning at Butcherpen Point at 30.378833, -87.135944, then westward along the shoreline of the Gulf Breeze Peninsula to Fair Point at 30.360872, -87.204508, then southeastward along the shoreline to Deer Point at 30.343272, -87.183628, then eastward to the County Road 399 toll bridge at 30.353750, -87.156669, then southeastward across Santa Rosa Sound to Sharp Point on the northern shoreline of Santa Rosa Island at 30.341658, -87.117181, then westward along the shoreline to the intersection of a line drawn from Pensacola Bay channel marker 22 southeastward through ICWW channel marker 145 to the northern shoreline of Santa Rosa Island, then northwestward through ICWW channel marker 145 to Pensacola Bay channel marker 22, then northwestward to Magazine Point at 30.373400, -87.265006, then clockwise along the mainland shoreline to the intersection of the Magnolia Bluff shoreline and the 10 story high-rise at 1700 US 90 on Magnolia Bluff at 30.433785, -87.173187, then southeastward to the point of origin at Butcherpen Point at 30.378833, -87.135944.

The area also includes all waters of Indian Bayou, Trout Bayou, Bayou Grande, Bayou Chico, Mulatto Bayou, and Bayou Texar, all creeks, man-made canals and ditches, and marinas.

### **Pensacola Bay prohibited East Bay**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at a point on the northeast shoreline at 30.487404, -86.988147, counterclockwise along the shoreline of Blackwater Bay and the southern side of the Interstate 10 bridge to a point on the southeastern shoreline of Garcon Peninsula at 30.447431, -87.079407, then southeastward to East Bay channel marker 3, then northward following the channel markers to East Bay channel marker 10, then northeastward to the point of origin on the northeast shoreline at 30.487404, -86.988147.

Polygon 2: Beginning at a point on the southeastern shoreline at 30.433344, -86.962622 then northward to a point on the northern shoreline of East Bay at 30.470868, -86.962309, then eastward along the shoreline of the East Bay River to the County Road 87 bridge, then westward along the southern shoreline of the East Bay River to the point of origin on the southeastern shoreline of East Bay at 30.433344, -86.962622.

The area also includes all waters of Tom King Bayou, East Bay River, Yellow River, Catfish Basin, all creeks, all man-made canals and ditches, and marinas.

**06 CHOCTAWHATCHEE BAY SHELLFISH HARVESTING AREA CLASSIFICATION BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
0622 Choctawhatchee Bay conditionally approved Central Section	Walton & Okaloosa
0632 Choctawhatchee Bay conditionally approved Eastern Section	
---- Choctawhatchee Bay Prohibited	

**0622 Choctawhatchee Bay conditionally approved Central Section**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: The area includes all waters within a polygon beginning at White Point, then eastward along the northern shoreline and crossing the mouths of all creeks to the easternmost point of land on the western shoreline in the mouth of Basin Bayou, then southward across Choctawhatchee Bay to the easternmost point of land on the western shoreline in the mouth of Live Oak Point Creek, then clockwise along the southern shoreline of Choctawhatchee Bay and Hogtown Bayou to a point due north of the southwestern most point of land in the mouth of Mill Bayou (30.402615, -86.240508), then southward across the mouth of Mill Bayou to the southwestern most point of land in the mouth of Mill Bayou (30.396565, -86.240508), then southwest to the easternmost point of land on the western shoreline in the mouth of Mussett Bayou (30.393028, -86.256933), then westward along the shoreline and crossing the mouths of Hewett, Mack, and Buck Bayous to Fourmile Point, then southwestward to Legion Park, then westward along the shoreline to a one story white house with rip rap on the shoreline (30.402667, -86.41511), then northwestward to the 20<sup>th</sup> support from the southern end of the Choctawhatchee Mid Bay Bridge (SR 293) (30.41, -86.42325), , then southwestward to a large cream colored house with a red roof (30.405772, - 86.43375), then clockwise around the shoreline to a point on the east end of the mouth of Jones Bayou, then northwestward to Cobbs Point then northward to Channel Marker 59, then northeastern to the point of origin at White Point.

Management: The area will be temporarily closed to harvesting when: 1) Choctawhatchee River stage measured at Caryville, Florida, exceeds 15,829 cubic feet per second; 2) Cumulative rainfall measured by NOAA exceeds 4.56 inches during any four-day period; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002(15), F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**0632 Choctawhatchee Bay conditionally approved Eastern Section**

Classification Boundaries: The area includes all waters within a polygon beginning at the easternmost point of land on the western shoreline in the mouth of Basin Bayou, then southward across Choctawhatchee Bay to the easternmost point of land on the western shoreline in the mouth of Live Oak Point Creek, then southeastward along the shoreline of Choctawhatchee Bay to the marsh with a 2 story white house to the west (30.393167, -86.189528), then northeastward to the center span of the northern segment of the U.S. Highway 331 bridge (30.424815, -86.157057), then northwestward to Motes Point, then northwestward along the shoreline to Piney Point (30.476503, -86.204833), , then due west across the mouth of Alaqua Bayou to the mainland shoreline (30.476503, -86.219453), then westward along the shoreline, across the mouth of Basin Bayou, to the point of origin at the easternmost point of land on the western shoreline in the mouth of Basin Bayou.

Management: The area will be temporarily closed to harvesting when: 1) Choctawhatchee River discharge measured at Caryville, Florida, exceeds 8,510 cubic feet per second; 2) Cumulative rainfall measured by NOAA exceeds 2.47 inches during any three-day period; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002(15), F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish

return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Choctawhatchee Bay prohibited area**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: The area includes all water within a polygon beginning at Channel Marker 59, then southward to Cobbs Point, then clockwise around main shoreline, including Destin Harbor to easternmost side of East Pass, then across East pass to western side of East Pass, then northward to northwestern side of Destin US Highway 98, then west along northern shoreline of Okaloosa Island to a point due south of ICWW Channel Marker 24, then due north through ICWW Channel Marker 24 to the mainland shoreline, then clockwise along the mainland shoreline to Black Point, then southward to ICWW Channel Marker 1, then northeast thru Channel Marker 61 to point of origin Channel Marker 59.

Polygon 2: Beginning at Black Point, then northeastward to Buccaroo Point, then southwestward along the mainland shoreline to the point of origin at Black Point.

Polygon 3: Beginning at Boggy Point, then clockwise along the mainland shoreline to Shirk Point, then westward across the mouth of Boggy Bayou to the point of origin at Boggy Point.

Polygon 4: Beginning at the easternmost point of land on the western shoreline in the mouth of John Bayou, then southeastward to Channel Marker 1, then due east across the mouth of Rocky Bayou to the mainland shoreline, then counterclockwise along the mainland shoreline to the point of origin at the easternmost point of land on the western shoreline in the mouth of John Bayou.

Polygon 5: Beginning at Piney Point (30.476503, -86.204833) then due west across the mouth of Alaqua Bayou to the mainland shoreline (30.476503, -86.219453), then clockwise along the mainland shoreline to the point of origin at Piney Point.

Polygon 6: Beginning at Motes Point, then clockwise along the mainland shoreline to the western side of the U.S. Highway 331 northern causeway, then southwestward along the western side of the causeway and bridge to the center span (30.4204815, -86.157057) of the northern segment of the U.S. Highway 331 bridge, then northwestward to the point of origin at Motes Point.

Polygon 7: Beginning at the intersection of the western side of the U.S. Highway 331 causeway and the northern shoreline of Choctawhatchee Bay, then clockwise along the mainland shoreline to a point due north of the confluence of the Choctawhatchee River with the Sister River, then southward across the mouth of the Choctawhatchee River to the closest point of land on the opposite shoreline, then clockwise along the mainland shoreline to the power line over the Intracoastal Waterway east of the confluence of the Intracoastal Waterway with Peach Creek, then southward along the powerline to the opposite shoreline, then clockwise along the mainland shoreline to the western side of the U.S. Highway 331 causeway, then northeastward along the western side of the causeway and bridge to the point of origin at the intersection of the western side of the U.S. Highway 331 causeway and the northern shoreline of Choctawhatchee Bay.

Polygon 8: Beginning at the marsh with a 2 story house to the west (30.393167, -86.189528), then eastward along the southern shoreline of Choctawhatchee Bay to the west side of US 331 highway bridge then northeastward along the western side of the US 331 bridge to the center span of the northern segment of the US Highway 331 bridge (30.424815, -86.157057), then southwestward thru Channel marker 28 to the point of origin of the marsh with 2 story house to the west (30.393167, -86.189528).

Polygon 9: Beginning at the southwesternmost point of land in the mouth of Mill Bayou (30.396565, -86.240508), then due north across the mouth of Mill Bayou to a point on the mainland shoreline (30.402615, -86.240508), then clockwise along the mainland shoreline to the point of origin at the southwesternmost point of land in the mouth of Mill Bayou.

Polygon 10: Beginning at the easternmost point of land on the western shoreline in the mouth of Mussett Bayou (30.393028, -86.256933), then counterclockwise along the mainland shoreline to the southwesternmost point of land in the mouth of Mill Bayou (30.396565, -86.240508), then southwestward to the point of origin at the easternmost point of land on the western shoreline in the mouth of Mussett Bayou.

Polygon 11: Beginning at Fourmile Point, then southwestward to Legion Park, then counterclockwise along the shoreline to the point of origin at Fourmile Point.

Polygon 12: Beginning at a one-story white house with rip rap on the shoreline (30.402667, -86.41511), then northwestward to the 20<sup>th</sup> support from the southern end of the Choctawhatchee Mid Bay Bridge (SR 293) (30.41, -86.42325), then southwestward to a large cream-colored house with a red roof (30.405772, -86.43375), then returning to the point of origin at a one-story white house with rip rap on the shoreline (30.402667, -86.41511).

Polygon 13: Beginning at the point on the east end of the mouth of Jones Bayou, then northwestward to

Cobbs Point, then southeastward then northeastward along the southern shoreline to the point of origin at the point on the east end of the mouth of Jones Bayou.

The area also includes Lake Lorraine, Pippin Lake, Indian Bayou, Jones Bayou, Buck Bayou, Mack Bayou, Hewett Bayou, Basin Bayou, Live Oak Point Creek, McQuage Bayou, Littles Bayou, Bowman Bayou, Tucker Bayou, ditches, man-made canals, and marinas.

0822 West Bay conditionally approved ---- West Bay prohibited	Bay

**0822 West Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at West Bay Point at 30.234100, -85.720133 then northward along the eastern shoreline of West Bay, across the mouths of all creeks, canals and Johnson Bayou at 30.259511, -85.724623 to the southern shoreline of Cedar Hammock at 30.260144, -85.734909, then northward along the western shoreline of Cedar Hammock to a point on the southern shoreline of Warren Bayou at 30.275803, -85.737364, then northwestward across the mouth of Warren Bayou, to a point on the northern shoreline of Warren Bayou at 30.280443, -85.740804, then westward and northward along the shoreline to Cedar Point at 30.295024, -85.757336, then northwestward to Graze Point at 30.300502, -85.763054, then southwestward along the northern shoreline of West Bay, across the mouths of all creeks and canals, to Walsonham Point at 30.286682, -85.777806, then westward across the mouth of Doyle Bayou to Doyle Point at 30.286128, -85.792637, then westward to Crooked Creek Point at 30.285470, -85.815647, then southwestward to Intracoastal Waterway marker 26, then southwestward to Goose Point at 30.274467, -85.846031, then along the southwestern shoreline to the southern shore of the mouth of Botheration Bayou at 30.226241, -85.833891, then northeastward to the northern shore of the mouth of Botheration Bayou at 30.236378, -85.823568, then northeastward along the southeastern shoreline of West Bay, across the mouths of all creeks and canals, to Breakfast Point at 30.252830, -85.798607, then southeastward along the southern shoreline of West Bay, across the mouths of all creeks, canals to Basin Bayou at 30.247960, -85.784527, then eastward to Long Point at 30.237946, -85.758723, then southeastward to Shell Point at 30.216287, -85.742156, then southeastward to the northernmost point of the western shoreline at the mouth of Posten Bayou at 30.193028, -85.717722, then eastward to the westernmost point of the eastern shoreline at the mouth of Posten Bayou at 30.192797, -85.716243, then northeastward along the southern shoreline of West Bay, across the mouths of all creeks and canals to the westernmost point on the southern shoreline at the mouth of Pretty Bayou at 30.201502, -85.706517, then northward across the mouth of Pretty Bayou to the westernmost point of the northern shoreline at the mouth of Pretty Bayou at 30.202191, -85.706335, then northward across the mouth of Robinson Bayou to the northernmost tip of land on the western shoreline in the mouth of Robinson Bayou at 30.210798, -85.699983, then northwestward to the point of origin at West Bay Point at 30.234100, -85.720133.

Management: The area will be temporarily closed to harvesting when: 1-) Cumulative rainfall for any five-day period measured by NOAA exceeds 2.63 inches. 2-) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened to shellfish harvesting when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**West Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon one: Beginning at a point on the shoreline nearest the remains of the mariculture lift station located on the southern shoreline at the mouth of Warren Bayou at 30.275803, -85.737364, then northwestward across the mouth of Warren Bayou, to a point on the northern shoreline of Warren Bayou nearest the remains of the mariculture lift station at 30.280443, -85.740804, then clockwise along the shoreline of Warren Bayou to the point of origin at a point on the shoreline nearest the remains of the mariculture lift station located on the southern shoreline at the mouth of Warren Bayou at 30.275803, -85.737364.

Polygon two: Beginning at Cedar Point at 30.295024, -85.757336, then counterclockwise along the

shoreline of Burnt Mill Creek to Graze Point at 30.300502, -85.763054, then southeastward to the point of origin at Cedar Point at 30.295024, -85.757336.

Polygon three: Beginning at Walsonham Point at 30.286682, -85.777806, then counterclockwise along the northern shoreline of Doyle Bayou to Doyle Point at 30.286128, -85.792637, then eastward to the point of origin at Walsonham Point at 30.286682, -85.777806.

Polygon four: Beginning at Doyle Point at 30.286128, -85.792637, then counterclockwise along the shoreline of Crooked Creek to Crooked Creek Point at 30.285470, -85.815647, then eastward to the point of origin at Doyle Point at 30.286128, -85.792637.

Polygon five: Beginning at Crooked Creek Point at 30.285470, -85.815647, then westward along the northern shoreline of West Bay and West Bay Creek to intersection with the eastern side of the State Road 79 bridge at 30.295110, -85.857015, then southwestward along the eastern edge of the State Road 79 bridge to the intersection with the southern shoreline of West Bay Creek at 30.293895, -85.858321, then southeastward along the shoreline of West Bay Creek to Goose Point at 30.274467, -85.846031, then northeastward to Intracoastal Marker 26, then northeastward to the point of origin at Crooked Creek Point at 30.285470, -85.815647.

Polygon six: Beginning at the southern shore of the mouth of Botheration Bayou at 30.226241, -85.833891, then counterclockwise along the shoreline of Botheration Bayou to a point on the northern shore of the mouth of Botheration Bayou at 30.236378, -85.823568, then southwestward across the mouth of Botheration Bayou to the point of origin on the southern shore of the mouth of Botheration Bayou at 30.226241, -85.833891.

Polygon seven: Beginning at Long Point at 30.237946, -85.758723, then counterclockwise along the shoreline of Harrison Bayou to Shell Point at 30.216287, -85.742156, then northwestward to the point of origin at Long Point at 30.237946, -85.758723.

Polygon eight: Beginning at Shell Point at 30.216287, -85.742156, then southward along the western shoreline of West Bay to the northwest side of U.S. Highway 98 Hathaway Bridge at 30.188328, -85.750160, then eastward along the northern edge of the Hathaway Bridge to Sulphur Point at 30.187711, -85.735864, then northeastward along the shoreline to the northernmost point of the western shoreline at the mouth of Posten Bayou at 30.193028, -85.717722, then northwestward to the point of origin at Shell Point at 30.216287, -85.742156.

Polygon nine: Beginning at the northernmost point of the western shoreline at the mouth of Posten Bayou at 30.193028, -85.717722, then counterclockwise along the shoreline of Posten Bayou to the westernmost point of the eastern shoreline at the mouth of Posten Bayou at 30.192797, -85.716243, then westward to the point of origin at the northernmost point of the western shoreline at the mouth of Posten Bayou at 30.193028, -85.717722.

Polygon ten: Beginning at the northernmost point of the southern shoreline at the mouth of Pretty Bayou at 30.201502, -85.706517, then counterclockwise along the shoreline of Pretty Bayou to the westernmost point of the northern shoreline at the mouth of Pretty Bayou at 30.202191, -85.706335, then southward to the point of origin at the northernmost point of the western shoreline at the mouth of Pretty Bayou at 30.201502, -85.706517.

The area also includes Johnson Bayou, Doyle Bayou, Basin Bayou, and all other unnamed bayous, tidal creeks, ditches, and man-made canals.

BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
1012 North Bay conditionally approved Western Section 1022 North Bay conditionally approved Eastern Section ---- North Bay prohibited	Bay

**1012 North Bay conditionally approved Western Section**

Classification Boundaries: The area includes all waters within a polygon beginning at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°) ~~southwestward intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°)~~, then westward across the mouths of all creeks, ditches, man-made canals to a point on the western shoreline of the mouth of Maxwell Bayou (30.255948°, -85.655361°) then ~~northwestward~~ to Haven Point (30.257017°, -85.658141°), then southwestward to Little Oyster Bar Point (30.248952°, -85.680038°), then southwestward along the southern shoreline of North Bay to a point on the northern shoreline of Upper Goose Bayou (30.240850°, -85.678609°), then southwestward to a point on the southern shoreline of the mouth of Upper Goose Bayou (30.237500°, -85.685517°), then southward across the mouths of all creeks, ditches, and man-made canals to the westernmost point on the northern shoreline of the mouth of Goose Bayou (30.224431°, -85.687089°), then southwestward to the westernmost point on the southern shoreline of Goose Bayou (30.219115°, -85.693519°), then southwestward to a point on the northern shoreline of the mouth of Robinson Bayou (30.211366°, -85.698892°), then southwestward to the northernmost tip of land on the western shoreline in the mouth of Robinson Bayou (30.210798°, -85.699983°), then northwestward across North Bay to West Bay Point (30.234100°, -85.720133°), then northeastward along the northern shoreline of North Bay across the mouths of all creeks, ditches, man-made canals to a point on the northern shoreline of the mouth of Mud Bayou (30.240387°, -85.708348°), then northeastward across the mouths of all creeks, ditches, and man-made canals to the southernmost point on the eastern shoreline of the mouth of Alligator Bayou (30.258621°, -85.697469°), then eastward along the northern shoreline of North Bay to the easternmost point on the western shoreline in the mouth of Newman Bayou (30.267170°, -85.673038°), then northeastward to a point on the eastern shoreline in the mouth of Newman Bayou (30.268260°, -85.670883°), then eastward to a point on the western shoreline of Sheephead Bayou due west of Fanning Bayou channel marker 2 (30.269070°, -85.660241°), then southeastward to the westernmost piling of the eighth set of pilings from the northern shoreline of the intersection of the northern shoreline of North Bay with the western side of the State Road 77 bridge (Bailey Bridge) (30.26178°, -85.64669°) ~~(30.262824°, -85.646627°)~~, then southward along the western side of the State Road 77 bridge (Bailey Bridge) to the point of origin at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°) ~~intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°)~~.

Management: The conditionally approved area west of the Bailey Bridge will be temporarily closed to harvesting when: 1) Cumulative rainfall for any four-day ~~five-day~~ period measured by NOAA exceeds 1.764-73 inches; 2) Econfina Creek stage measured at Bennett, Florida exceeds 8.147-12 feet; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002 F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C. and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**1022 North Bay conditionally approved Eastern Section**

Classification Boundaries: The area includes all waters within a polygon beginning at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°) ~~intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°)~~ then southeastward along the shoreline to a point on the southern

~~shoreline of North Bay (30.254606°, -85.641625°), eastern shoreline in the mouth of the City of Lynn Haven boat basin canal (Leslie Porter Park) (30.254425°, -85.645015°) then eastward to the easternmost point of land on the western shoreline of the mouth of Anderson Bayou (30.252892°, -85.637518°) then across the mouth of Anderson Bayou to a point on the southern shoreline of North Bay (30.255708°, -85.631646°), the westernmost point of land on the eastern shoreline of the mouth of Anderson Bayou (30.252864°, -85.636580°) then eastward along the shoreline to the easternmost tip of land on the western shoreline in the mouth of Beatty Bayou (30.254762°, -85.621026°), then northeastward to the northernmost tip of land on the southern shoreline in the mouth of Williams Bayou (30.260207°, -85.605876°), then northward to a point across the mouth of Williams Bayou (30.260709°, -85.605633°), then northward along the eastern shoreline of North Bay to the Deer Point Lake Dam (30.266970°, -85.604378°), then northwestward along the western edge of the dam to the northern shoreline of North Bay (30.269656°, -85.607710°), then westward along the northern shoreline of North Bay, to the westernmost point on the southeastern shoreline of the mouth of Hodges Bayou (30.271287°, -85.618695°), then northwestward to a point on the western shoreline of the mouth of Hodges Bayou (30.272625°, -85.620116°), then to a point east of Gainer Bayou (30.273763°, -85.623953°), then due west across the mouth of Gainer Bayou to a point west of Gainer Bayou (30.273841°, -85.625451°), then westward to a point on the western shoreline of the mouth of Daffin Lake (30.269308°, -85.630880°) to the westernmost piling of the eighth set of pilings from the northern shoreline the intersection of the western side of the State Road 77 bridge (Bailey Bridge) (30.26178°, -85.64669°) and the northern shoreline of North Bay (30.262824°, -85.646627°), then southward following the western side of the State Road 77 bridge (Bailey Bridge) to the point of origin at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°) intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°).~~

Management: The conditionally approved area east of the Bailey Bridge will be temporarily closed to harvesting when: 1) Cumulative rainfall for any ~~four-day~~ ~~five-day~~ period measured by NOAA exceeds ~~1.474-5.0~~ inches; 2) Econfina Creek stage measured at Bennett, Florida exceeds ~~7.986-8.4~~ feet; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002, Florida Administrative Code F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### North Bay prohibited

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°), then southeastward to a point on the southern shoreline of North Bay (30.254606°, -85.641625°), ~~westernmost point of land on the eastern shoreline in the mouth of Anderson Bayou (30.252864°, -85.636580°)~~, then due west to the western shoreline in the mouth of Anderson Bayou (30.252892°, -85.637518°), then counterclockwise along the shoreline of North Bay to the intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°), then northward along the western edge of the State Road 77 bridge (Bailey Bridge) to the point of origin at the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°). ~~Anderson Bayou to the point of origin at the westernmost point of land on the eastern shoreline in the mouth of Anderson Bayou (30.252864°, -85.636580°).~~

Polygon 2: Beginning at a point on the southern shore of North Bay west of Anderson Bayou (30.254606°, -85.641625°) ~~the easternmost tip of land on the western shoreline in the mouth of Beatty Bayou (30.254762°, -85.621026°)~~, then eastward across the mouth of Anderson Beatty Bayou to a point on the southern shore of North Bay east of Anderson Bayou (30.255708°, -85.631646°) ~~the northernmost tip of land on the eastern shoreline in the mouth of Beatty Bayou (30.255192°, -85.617305°)~~, then clockwise along the shoreline of Anderson Beatty Bayou back to the point of origin at a point on the southern shore of North Bay west of Anderson Bayou (30.254606°, -85.641625°). ~~the easternmost tip of land on the western shoreline in the mouth of Beatty Bayou (30.254762°, -85.621026°).~~

Polygon 3: Beginning at the easternmost tip of land on the western shoreline in the mouth of Beatty Mill Bayou (30.254762°, -85.621026°) ~~(30.254920°, -85.612236°)~~, then ~~northeastward~~ southeastward across the mouth of Beatty Bayou and Mill Bayou to the northernmost tip of land on the southern shoreline in the mouth of Williams Bayou (30.260207°, -85.605876°) ~~westernmost tip of land on the eastern shoreline in the mouth of Mill Bayou (30.254358°, -85.610495°)~~, then clockwise along the shoreline of Mill Bayou and Beatty Bayou back to the point of origin at the

easternmost tip of land on the western shoreline in the mouth of Beatty Mill Bayou (30.254762°, -85.621026°) (~~30.254920°, 85.612236°~~).

Polygon 4: Beginning at the westernmost piling of the eighth set of pilings from the northern shoreline of intersection of the western side of the State Road 77 bridge (Bailey Bridge) (30.26178°, -85.64669°) ~~and the northern shoreline of North Bay (30.262824°, -85.646627°)~~, then northwestward to a point on the western shoreline of Sheephead Bayou due west of Fanning Bayou channel marker 2 (30.269070°, -85.660241°), then clockwise along the shoreline of Sheephead Bayou and Fanning Bayou and the northern shoreline of North Bay to the point of origin at the westernmost piling of the eighth set of pilings from the northern shoreline intersection of the western side of the State Road 77 bridge (Bailey Bridge) (30.26178°, -85.64669°) ~~and the northern shoreline of North Bay (30.262824°, -85.646627°)~~.

Polygon 5: Beginning at Haven Point (30.257017°, -85.658141°) on the southern shoreline of North Bay, then southwestward to Little Oyster Bar Point (30.248952°, -85.680038°), then counterclockwise along the shoreline of Lynn Haven Bayou to the point of origin at Haven Point (30.257017°, -85.658141°).

Polygon 6: Beginning at Haven Point (30.257017°, -85.658141°) on the southern shoreline of North Bay ~~the easternmost tip of land on the western shoreline in the mouth of Beatty Bayou (30.254762°, -85.621026°)~~, then northeastward to the westernmost piling of the first set of pilings north of the main channel of the State Road 77 bridge (Bailey Bridge) (30.258900°, -85.646980°) ~~northernmost tip of land on the southern shoreline in the mouth of Williams Bayou (30.260207°, -85.605876°)~~, then southward to the intersection of the western side of the State Road 77 bridge (Bailey Bridge) and the southern shoreline of North Bay (30.254475°, -85.647397°), then clockwise along the southern shoreline of North Bay, across the mouths of all creeks, ditches, man-made canals to Haven Point (30.257017°, -85.658141°) ~~on the southern shoreline of North Bay. the westernmost tip of land on the eastern shoreline in the mouth of Mill Bayou (30.254358°, 85.610495°), then northwestward to the easternmost tip of land on the western shoreline in the mouth of Mill Bayou (30.254920°, -85.612236°), then westward to the northernmost tip of land on the eastern shoreline in the mouth of Beatty Bayou (30.255192°, -85.617305°), then westward to the point of origin at easternmost tip of land on the western shoreline in the mouth of Beatty Bayou (30.254762°, -85.621026°)~~.

The prohibited area also includes Maxwell Bayou, Upper Goose Bayou, Goose Bayou, Robinson Bayou, Mud Bayou, Alligator Bayou, Newman Bayou, unnamed bayous, lakes, creeks, City of Lynn Haven boat basin (Leslie Porter Park), Williams Bayou, Deer Point Lake Dam, Deer Point Lake Dam pilings, Deer Point Lake Dam supports, Deer Point Lake Reservoir, Hodges Bayou, Gainer Bayou (to a point east of Gainer Bayou at 30.273763, -85.623953 then due west across the mouth of Gainer Bayou to a point west of Gainer Bayou at 30.273841, -85.625451), Daffin Lake, ditches, man-made canals, creeks, and marinas.

**12 EAST BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
1212 East Bay conditionally approved ---- East Bay prohibited	Bay

**1212 East Bay conditionally approved Section 1**

Classification Boundaries: The area includes all waters within a polygon beginning at Cedar Point (30.093834, -85.561860), then southeastward along the southern shoreline of East Bay across the mouths of all creeks, ditches, man-made canals and bayous to Goose Point (30.076420, -85.526190), then southwestward along the shoreline across the mouths of all creeks, ditches, man-made canals and bayous to a point (30.065229, -85.529698) on the northern shoreline of Auburn Cove due north of the end of an unnamed dirt road on the shoreline of Auburn Cove, then due south to the intersection of the southern shoreline of Auburn Cove and the end of an unnamed dirt road (30.055354, -85.529721), then eastward along the southern shoreline of East Bay across the mouths of all creeks, ditches, man-made canals and bayous to Little Oyster Bar Point (30.051094, -85.510521), then southward to a point on the northern shoreline of Blind Alligator Bayou (30.040583, -85.506776), then southeastward to the most eastern point of Blind Alligator Bayou (30.03555, -85.4998440), then northeastward to a point on the eastern shore line of East Bay on the northward side of an unnamed creek that flows under Hwy 2297 (30.046378, -85.484564), then northwestward across the mouths of all creeks, ditches, man-made canals and bayous to the western point of Richard’s Bayou (30.062513, -85.493872), then northwestward along the northern shoreline of East Bay across the mouths of all creeks, ditches, man-made canals and bayous to a point outside the southern shore of California Bayou (30.081975, -85.492742), then northeast to a point on the northern shore outside of California Bayou (30.092383, -85.501508), continuing northwestward along the northern shoreline of East Bay, across the mouths of all creeks, ditches, man-made canals and bayous to a point south of Laird Bayou at the end of a dirt road (30.110583, -85.524542), then northwestward to a point on the northwestward corner of Laird Point (30.125469, -85.53895), then westward along the northern shoreline of East Bay across the mouths of all creeks, ditches, man-made canals, and bayous to Smith Point (30.120879, -85.559648), then southward to Callaway Bayou channel marker 2, then southward to the point of origin at Cedar Point (30.093834, -85.561860).

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any five-day period measured by NOAA exceeds 3.87 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health

**East Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at the most eastern point of Blind Alligator Bayou (30.03555, -85.4998440), then counterclockwise around East Bay along the shorelines of all creeks, ditches, man-made canals and bayous to a point on the eastern shoreline of East Bay on the northward side of an unnamed creek that flows under Hwy 2297 (30.046378, -85.484564), then southwestward to the point of origin at the most eastern point of Blind Alligator Bayou (30.03555, -85.4998440).

Polygon 2: Beginning from a point outside the southern shore of California Bayou (30.081975, -85.492742), then counterclockwise along the shoreline of California Bayou and of all creeks, ditches, man-made canals to a point on the northern shore outside of California Bayou (30.092383, -85.501508), then southeast to the point of origin outside the southern shore of California Bayou (30.081975, -85.492742).

Polygon 3: Beginning from a point south of Laird Bayou at the end of a dirt road (30.110583, -85.524542), then counterclockwise along the shoreline of Laird Bayou and of all creeks, ditches, man-made canals to a point on the northwestward corner of Laird Point (30.125469, -85.53895), then southeast to the point of origin south of Laird Bayou at

the end of a dirt road (30.110583, -85.524542).

Polygon 4: Beginning at Smith Point (30.120879, -85.559648), then southward to Callaway Bayou channel marker 2, then southward to Cedar Point (30.093834, -85.561860), then northwestward along the southern shoreline of East Bay to the intersection of the southeastern end of US HWY 98 bridge and the southern shoreline (30.101616, -85.610622), then due north to the intersection of the northern shoreline of East Bay and the northeastern end of US HWY 98 bridge (30.107425, -85.605630) then southeastward along the northern shoreline of East Bay to the point of origin at Smith Point (30.120879, -85.559648).

Polygon 5: Beginning at the intersection of the southern shoreline of Auburn Cove and the end of an unnamed dirt road (30.055354, -85.529721), then clockwise along the shoreline of Auburn Cove to a point on the northern shoreline of Auburn Cove due north of the unnamed dirt road (30.065229, -85.529698), then due south to the point of origin at the intersection of the southern shoreline of Auburn Cove and the end of an unnamed dirt road (30.055354, -85.529721).

The prohibited area also includes all creeks, ditches, man-made canals, bayous, and marinas.

**14 ST. JOSEPH BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
1401 St. Joseph Bay approved ---- St. Joseph Bay prohibited	Gulf

**1401 St. Joseph Bay approved**

Classification Boundaries: The area includes all waters within a polygon beginning at St. Joseph Point (29.87746, -85.3848) then due east across the mouth of St. Joseph Bay to the mainland to a point (29.87741, -85.351), then following the shoreline south to a point (29.86396, -85.3448) then the line follows the perimeter of a 2.9-statute mile radius from the center of the mouth of the Gulf County Canal (29.83196, -85.3134) to a point (29.79113, -85.3019) on the shoreline, then clockwise along the shoreline of St. Joseph Bay to the point of origin at St. Joseph Point.

Management: The area will be temporarily closed to harvesting when: 1) Environmental data is not available; 2) Emergencies occur as defined in Rule 5L-1.002, F.A.C., or 3) An emergency rainfall level for any one-day period measured by NOAA exceeds 7.5 inches. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

~~Management: The area will be closed to harvesting when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

**St. Joseph Bay prohibited**

Classification Boundaries: The area includes all waters within a polygon beginning at the mouth of the Gulf County Canal (29.83196, -85.3134), then southeastward along the eastern shoreline of St. Joseph Bay to a point (29.79113, -85.3019) 2.9 statute miles south of the mouth of the Gulf County Canal, then clockwise in an arc with a radius of 2.9 statute miles from the center of the mouth of the Gulf County Canal to a point (29.86396, -85.3448) on the eastern shoreline 2.9 statute miles north of the mouth of the Gulf County Canal, then southeastward along the shoreline to the point of origin at the mouth of the Gulf County Canal.

The prohibited area also includes the Gulf County Canal, ditches, man-made canals, unnamed bayous, tidal creeks, and marinas.

BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
1542 Indian Lagoon conditionally approved Zone A Winter Nov - Feb	Gulf
1552 Indian Lagoon conditionally approved Zone B Winter Nov - Feb	
1506 Indian Lagoon conditionally restricted Winter Nov - Feb	
----- Indian Lagoon prohibited Winter Nov - Feb	
1512 Indian Lagoon conditionally approved Spring/Fall Mar – June, Oct	Gulf

**INDIAN LAGOON WINTER (MONTHS OF NOVEMBER – FEBRUARY)**

**1542 Indian Lagoon System conditionally approved Zone A Winter (Months of November – February)**

Classification Boundaries: The area includes all waters within the following polygon described by a line beginning at the easternmost tip of land on the Indian Peninsula, then due north across the mouth of Indian Lagoon to the mainland shoreline, then southwestward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to an unnamed point of land due north of Seminole Street, then due south to the intersection of Seminole street and the southern shoreline, then eastward across the mouths of all creeks, ditches and man-made canals along the southern shoreline to the point of origin at the easternmost tip of land on the Indian Peninsula .

Management: The area will be temporarily closed when: 1) ~~two-day~~ Cumulative rainfall measured at the airport in Apalachicola, Florida, exceeds 1.65 inches for any two-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

**1552 Indian Lagoon System conditionally approved Zone B Winter (Months of November – February)**

Classification Boundaries: The area includes all waters within the following polygon described by a line beginning at an unnamed point due north of Seminole street, then southwestward across the mouths of all creeks, ditches and man-made canals to a marked pole on the northern shoreline, then due south to a marked pole on the southern shoreline, then eastward across the mouths of all creeks, ditches and man-made canals along the southern shoreline to the intersection of Seminole street and the southern shoreline, then due north to the point of origin at an unnamed point due north of Seminole street on the northern shoreline.

Management: The area will be temporarily closed when: 1) ~~two-day~~ Cumulative rainfall measured at the airport in Apalachicola, Florida, exceeds 0.38 inches for any two-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

### **1506 Indian Lagoon System conditionally restricted Winter (Months of November – February)**

Classification Boundaries: The area includes all waters within the following polygon described by a line beginning at a marked pole (N 29.68298, W 85.24409) on the northern shoreline, then southwestward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the northernmost point of land at the mouth of the creek to Money Bayou, then across the mouth of the creek to the southernmost point of land at the mouth of the creek to Money Bayou, then eastward across the mouths of all creeks, ditches and man-made canals along the southern shoreline to a marked pole (N 29.68577, W 85.24445) on the southern shoreline, then due north to the point (N 29.68298, W 85.24409) of origin at a marked pole on the northern shoreline.

Management: The area will be temporarily closed when: 1) ~~two-day~~ Cumulative rainfall measured at the airport in Apalachicola, Florida, exceeds 2.33 inches for any two-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

### **Indian Lagoon System prohibited Winter (Months of November – February)**

Classification Boundaries: The area includes all waters west of a line beginning at the northernmost point of land at the mouth of the creek to Money Bayou, then across the mouth of the creek to the southernmost point of land at the mouth of the creek to Money Bayou. All creeks, ditches, marinas and man-made canals along the entire shoreline of the Indian Lagoon system are prohibited

### **INDIAN LAGOON SPRING/FALL (MONTHS OF MARCH – JUNE, AND OCTOBER)**

#### **1512 Indian Lagoon System conditionally approved Spring / Fall (Months of March - June, October)**

Classification Boundaries: The area includes all waters within the following polygon described by a line beginning at the easternmost tip of land on the Indian Peninsula, then due north across the mouth of Indian Lagoon to the mainland shoreline, then southwestward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the northernmost point of land at the mouth of the creek to Money Bayou, then across the mouth of the creek, then eastward across the mouths of all creeks, ditches and man-made canals along the southern shoreline to the point of origin at the easternmost tip of land on the Indian Peninsula .

Management: The area will be temporarily closed to harvesting when: 1) ~~two-day~~ Cumulative rainfall measured at the airport in Apalachicola, Florida, exceeds 3.09 inches for any two-day period; 2) Apalachicola River same day discharge measured at Blountstown, Florida, exceeds 59,497 cubic feet per second; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

#### **Indian Lagoon System prohibited Spring / Fall (Months of March-June, October)**

Classification Boundaries: The area includes all waters east of a line beginning at the northernmost point of land at the mouth of the creek to Money Bayou, then across the mouth of the creek to the southernmost point of land at the mouth of the creek to Money Bayou. All creeks, ditches, marinas and man-made canals along the entire shoreline of the Indian Lagoon system are prohibited.

**APALACHICOLA BAY SYSTEM YEAR-ROUND WINTER (MONTHS OF JANUARY–MAY, SEPTEMBER–DECEMBER)**

**1601 Apalachicola Bay System approved (Months of January–May, September–December)**

Classification Boundaries: ~~The area includes all waters within the following polygons. Polygon 1: Beginning at a point on the mainland shoreline due south of the former Florida State Road 65 (29.757238, -84.833178) Highway Patrol one-story building at 731 highway 98, Eastpoint FL radio tower (29.748278, -84.853762, then southward to ICWW channel marker 32 (29.694377, -84.829296) 36 (29.691234, -84.847744), then southward to a PVC piling (29.674650, -84.840460) just north of the northern shoreline of St. George Island, then due south to a point on the northern shoreline of St. George Island ( 29.673873, -84.840459), then eastward along the northern shoreline of St. George Island, across the mouths of all creeks, ditches and man-made canals to a point on the southern shoreline (29.69929, -84.77067), then northward across the mouth of East Slough to the most southern point of Gap Point (29.700846, -84.77046), then westward along the southern shore of Gap Point, then northeastward along the shoreline of St. George Island to a natural point of land (29.726316, -84.745813), then northwestward across St. George Sound to the easternmost point of rip-rap on the mainland shoreline west of Yents Bayou (29.785541, -84.768108), then southwestward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the point of origin at a point on the shoreline due south of Florida State Road 65 (29.757238, -84.833178). (29.6775, -84.843833) just north of the northern shoreline of St. George Island to a point on the northern shoreline of St. George Island (29.674326, 84.842958), then eastward along the northern shoreline of St. George Island, across the mouth of all creeks, ditches and man made canals to the mouth of East Slough (29.69929, -84.77067) then northward across the mouth of East Slough (29.700846, -84.77046), then eastward along the northern shoreline of St. George Island, across the mouth of all creeks and canals, to its northernmost tip (29.767956, -84.696917), then northwestward across St. George Sound to the easternmost point of the seawall on the mainland shoreline west of Yents Bayou (29.785523, -84.767866), then southwestward along the mainland shoreline across the mouths of all creeks, ditches and man made canals to the point of origin at a point on the shoreline due south of the former~~

~~Florida Highway Patrol one-story building at 731 highway 98, Eastpoint FL radio tower (29.748278, 84.853762).~~

~~Management: The area will be temporarily closed to harvesting when emergencies occur, defined as: 1) Three-day cumulative rainfall measured by NOAA exceeds 8.42 inches; 2) The emergency condition for cumulative rainfall for any three-day period measured at the airport in Apalachicola, Florida exceeds 11.62 inches; 3) Apalachicola River discharge measured at Blountstown, Florida, exceeds 155,000 cubic feet per second; 4) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 5) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or 6) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or the area will be closed when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **1611 Apalachicola Bay System approved (Months of January—May, September—December)**

~~Classification Boundaries: The area includes all waters within the following polygon Beginning at the westernmost tip of St. Vincent Island (29.679233, -85.222539), then northward across Indian Pass to the easternmost tip of Indian Peninsula (29.684913, -85.221445) at the St Vincent Island boat launch, (29.68525, -85.22159), then due north to the mainland shoreline (29.694107, -85.221676), then due north to the mainland shoreline (29.693908, -85.221681) then eastward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the easternmost point of the rip-rap at the 9-mile washout of Florida State Road CR-30A (29.714960, -85.126226), southernmost point of the access road at Eight Mile (29.7167602619406, -85.1135601686355), then southeastward to a point on the western shoreline of an unnamed creek on St. Vincent Island (29.688332, -85.122312), the western shoreline of Red Fish Creek on St. Vincent Island (29.6866237636063, -85.1044280002558), then westward along the northern shoreline of St. Vincent Island to the westernmost tip of marsh on the eastern shoreline of Big Bayou (29.680057, -85.150269), (29.680317, -85.150401), then due west across the mouth of Big Bayou to the western shoreline of Big Bayou (29.680075, -85.158937), (29.678925, -85.154845), then westward along the northern shoreline of St. Vincent Island to the point of origin at the westernmost tip of St. Vincent Island (29.679233, -85.222539).~~

~~Management: The area will be temporarily closed to harvesting when emergencies occur, defined as: 1) Three-day cumulative rainfall measured by NOAA exceeds 8.42 inches; 2) Apalachicola River discharge measured at Blountstown, Florida, exceeds 155,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or 4) Emergencies occur as defined in Rule 5L-1.002, F.A.C. 1) The emergency condition for cumulative rainfall for any three-day period measured at the airport in Apalachicola, Florida exceeds 11.62 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or the area will be closed when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **1612 Apalachicola Bay System conditionally approved (Months of January—May, September—Dec)**

~~Classification Boundaries: The area includes all waters within a polygon Beginning at Green Point (29.708730, -85.035519) (29.708454, -85.035694), on the mainland shoreline, then westward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to a point on the easternmost point of the rip-rap at the 9-mile washout of Florida State Road CR-30A (29.714960, -85.126226), then southeastward to a point on the western shoreline of an unnamed creek on St. Vincent Island (29.688332, -85.122312), then southeastward across the unnamed creek to a point on the southern shoreline at the mouth of the unnamed creek on St. Vincent Island (29.688231, -85.122317) then eastward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to a point on the St Vincent Island shoreline at the western shoreline at the mouth of Redfish Creek~~

~~(29.686046, -85.104641) then eastward across the mouth of Redfish Creek to the eastern shoreline at the mouth of Redfish Creek (29.685997, -85.103975) then eastward to the southeast post of the Green Point Plant Site (29.683650, -85.039833), then northward to the point of origin at Green Point (29.708730, -85.035519). on the mainland shoreline at the southernmost point of the access road at five mile (29.717956139, -85.068923118), then southwestward to the southwest corner marker of lease number 551 (29.71425, -85.07721), then southwestward to a post northeast of Cabbage Top (29.6924, -85.088166), then southeastward to the southeasternmost post of the Green Point Plant Site (29.68365, -85.039833), then southeastward through a post (29.655592, -84.997747) west of ICWW channel marker 77, then southeastward to the intersection of Little St. George Island and the northern entrance to Sikes Cut (29.616319, -84.961783), then northwestward across Apalachicola Bay to channel marker 1 of the Two Mile Channel (29.692133, -85.01255), then northwestward to the point of origin at Green Point (29.708454, -85.035694).~~

Management: The area will be temporarily closed to harvesting when: ~~1) three day cumulative rainfall measured at the airport in Apalachicola, Florida exceeds 4.37 inches; 1) 2) Apalachicola River discharge measured two days prior at Blountstown, Florida, exceeds 25,132 cubic feet per second; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **1622 Apalachicola Bay System conditionally approved (~~Months of January – May, September – Dec~~)**

Classification Boundaries: Beginning on the St Vincent Island shoreline at a point on the western shore at the mouth of Redfish Creek (29.686046, -85.104641) then northeastward to the southeast post of the Green Point Plant Site (29.683650, -85.039833), then southeastward to a point at the western entrance of Bob Sikes Cut (29.615645, -84.961649) then westward along the northern shoreline of Little St. George Island across the mouths of all creeks, ditches and man-made canals to a point on the shoreline of Little St George Island at the southern mouth of West Pass (29.627340, -85.093888) then northwesterly across the mouth of West Pass to a point on the eastern shoreline of St Vincent Island (29.632408, -85.097537) then northward across the mouths of all creeks, ditches and man-made canals to a point on the shoreline of St Vincent Island at the eastern mouth of Redfish Creek (29.685997, -85.103975) then westerly across the mouth of Redfish Creek to the point of origin at a point on the western shore at the mouth of Redfish Creek (29.686046, -85.104641). The area includes all waters within a polygon beginning at the western shoreline of the mouth of Red Fish Creek on St. Vincent Island (29.686623, -85.104428), then eastward across the mouth of Red Fish Creek to the eastern shoreline of Red Fish Creek (29.686544, -85.103923), then southeastward along the northern shoreline of St. Vincent Island across the mouth of Sheepshead Bayou to St. Vincent Point (29.672761, -85.066995), then southward along the eastern shoreline of St. Vincent Island to the intersection of West Pass (29.633779, -85.096446), then southeastward across West Pass to the northernmost tip of Little St. George Island (29.627679, -85.094502), then eastward along the northern shoreline of Little St. George Island across the mouths of all creeks, ditches and man-made canals to the intersection with the northern entrance of Sikes Cut (29.616319, -84.961783), then northwestward to a post (29.655592, -84.997747) west of ICWW channel marker 77, then northwestward to the southeasternmost post of the Green Point Plant Site, then northwestward to a post northeast of Cabbage Top (29.6924, -85.088166), then northeast to the southwest corner marker of lease number 551 (29.71425, -85.07721), then northeast to the southernmost point of the access road at five mile (29.717956139, -85.068923118) on the mainland shoreline, then westward across the mouths of all creeks, ditches and man made canals to point due south of the access road at Eight Mile (29.71676, -85.11356), then southeastward to the point of origin at the western shoreline of the mouth of Red Fish Creek (29.686623, -85.104428).

Management: The area will be temporarily closed to harvesting when: 1) Apalachicola River discharge measured two days prior at Blountstown, Florida, exceeds ~~25,132~~ 37,379,39,706 cubic feet per second; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **1632 Apalachicola Bay System conditionally approved West (~~Months of Jan – May, Sept – Dec~~)**

Classification Boundaries: The area includes all waters within a polygon beginning at the westernmost tip of marsh on the eastern shoreline of Big Bayou on St. Vincent Island (29.680317, -85.150401), then due west across the mouth of Big Bayou to the western shoreline of Big Bayou (29.678925, -85.154845), then southeastward along the western shoreline of Big Bayou to a point due south of the northeast marker of lease number 525 (29.670365, -85.131977), then due north to the northeast marker of lease number 525 (29.674013, -85.132023) on the eastern shoreline of Big Bayou (29.674071, -85.132025), then northwestward along the eastern shoreline of Big Bayou to the point of origin at the westernmost tip of marsh on the eastern shoreline of Big Bayou on St. Vincent Island (29.680317, -85.150401).

Management: The area will be temporarily closed to harvesting when: 1) ~~Two-day~~<sup>three-day</sup> cumulative rainfall measured by NOAA at the airport in Apalachicola, Florida exceeds ~~1.67149~~ inches; 2) ~~Apalachicola River discharge measured four days prior at Blountstown, Florida, exceeds 65,465 cubic feet per second;~~ 3) ~~2)~~ Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002 F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **1642 Apalachicola Bay System conditionally approved (~~Months of January—May, Sept—Dec~~)**

Classification Boundaries: Beginning at a point on the mainland shoreline due south of Florida State Road 65 (29.757238, -84.833178), then southwestward to ICWW channel marker 32 (29.694377, -84.829296), then southward to a PVC piling (29.674650, -84.840460) just north of the northern shoreline of St. George Island, then due south to a point on the northern shoreline of St. George Island (29.673873, -84.840459), then westward across the mouths of all creeks, ditches and man-made canals and around the St George Island causeway and boat launch and then southward to the intersection of the mainland shoreline at the causeway and the western edge of the St. George Island Bridge (29.671714, -84.868023), then northward along the St. George Island Bridge to the intersection of the bridge and the northern shore of the mainland (29.722642, -84.888136) then east along the mainland shoreline to a point at the rip-rap on the north end of the old Saint George Island Bridge fishing pier (29.722722, -84.887815) then across Saint George Sound to a point on the shore of the mainland south of the Franklin County Visitor's Center (29.748387, -84.853979), then eastward along the southern shoreline of the mainland across the mouths of all creeks, ditches and man-made canals to the point of origin at the point on the mainland shoreline due south of Florida State Road 65 (29.757238, -84.833178). ~~The area includes all waters within a polygon beginning at a point on the mainland shoreline due south of the former Florida Highway Patrol one story building at 731 highway 98, Eastpoint FL (29.748278, -84.853762), then southwestward through Channel Marker 2 of the Eastpoint Channel (29.73547, -84.871134) to the intersection of the mainland shoreline and the eastern edge of the St. George Island Bridge (29.722766121, -84.8877570), then westward along the mainland shoreline to the western edge of the St. George Island Bridge (29.72268213, -84.88812710), then southward along the western edge of the St. George Island Bridge to the northern shoreline of St. George Island, then eastward along the northern shoreline of St. George Island (29.672976, -84.869047) across the mouths of all creeks, ditches and man-made canals to a point on the northern shoreline of St. George Island (29.674326, -84.842958), then northward to a piling (29.6775, -84.843833) just north of the northern shoreline of St. George Island, then northward to ICWW channel marker 36 (29.69124, -84.847744), then northwestward to the point of origin at the point on the mainland shoreline due south of the former Florida Highway Patrol one story building at 731 highway 98, Eastpoint FL (29.748278, -84.853762).~~

Management: The area will be temporarily closed to harvesting when: 1) ~~three day cumulative rainfall measured at the airport in Apalachicola, Florida exceeds 5.23 inches;~~ 1) ~~2)~~ Apalachicola River discharge measured two days prior at Blountstown, Florida, exceeds ~~50,88951,210~~ cubic feet per second; 2) ~~3)~~ Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **1672 Apalachicola Bay System conditionally approved**

Classification Boundaries: Beginning at ICWW channel marker 77 (29.664941, -84.966146), then northward across the ICWW channel to ICWW marker 76 (29.666204, -84.965926), then northeastward to a point on the St.

George Island Bridge (Piling #107W, 29.703, -84.890667), then southward along the western edge of the St. George Island Bridge to the northern tip of the southern causeway of the St. George Island Bridge (29.672977, -84.869048) then southwestward to the western shoreline at the mouth of the second unnamed canal west of the Ferry Pass Yacht Basin on St. George Island (29.663682, -84.876105), then southwestward along the northern shoreline of St. George Island, across the mouths of all creeks, ditches and man-made canals to the intersection of St. George Island and the northern entrance of Sikes Cut (29.6169291, -84.9597029), then due west across the northern entrance of Sikes Cut to the intersection of the northern entrance of Sikes Cut and Little St. George Island (29.6163194, -84.9617833), then northward across the ICWW channel to the point of origin, ICWW channel marker 77 (29.664941, -84.966146).

Management: The area will be temporarily closed to harvesting when: 1) two-day cumulative rainfall measured by NOAA exceeds 4.87 inches; 2) Apalachicola River discharge measured at Blountstown, Florida, exceeds 46,385 cubic feet per second; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to public health.

### **1605 Apalachicola Bay System restricted Zone A (Months of January – May, Sept – Dec)**

~~Classification Boundaries: The area includes all waters within the polygon beginning at the southeasternmost point of Tank Island in East Bay (29.784735, 84.885047), then southwestward to the marked bridge piling on the northern side of the John Gorrie Memorial Bridge (29.729283, 84.94646), then southward to the marked bridge piling on the southern side of the John Gorrie Memorial Bridge (29.72923, 84.94646), then southwestward to ICWW channel marker 9 (29.69513, 84.974978), then southward along the eastern edge of the ICWW channel to ICWW channel marker number 76 (29.666204, 84.965926), then southward across the ICWW channel to ICWW channel marker 77 (29.664941, 84.966146), then southward to the easternmost tip of Little St. George Island (29.616319, 84.961783), then northwestward across Apalachicola Bay to Two Mile channel marker 1 (29.692133, 85.01255), then northwestward to Green Point (29.708454, 85.035694), then eastward along the mainland shoreline to a point due north of the westernmost tip of the West Two Mile Breakwater (29.71236, 85.022526), then due south to the westernmost tip of the West Two Mile Breakwater (29.710873, 85.022552), then eastward along the southern shoreline of the West Two Mile Breakwater to its southernmost point (29.708809, 85.013823), then eastward across the Two Mile Channel to the southernmost point of the East Two Mile Breakwater (29.708945 / 85.011434), then eastward along the southern shoreline of the East Two Mile Breakwater to its southeasternmost point (29.7114093, 85.006004), then eastward to the southernmost tip of Towhead Island (29.71238, 84.974232), then northward along the eastern shoreline of Towhead Island to its easternmost tip (29.7140677627209, 84.97360231496), then northeastward to the intersection of the southern edge of the John Gorrie Memorial Bridge and the easternmost tip of the western causeway (29.727734, 84.955587), then northward to the northern edge of the John Gorrie Memorial Bridge (29.728405, 84.955449), then northeastward to Long Point (29.7445681, 84.9463845), then northeastward along the western shoreline of East Bay across the mouths of all creeks, ditches rivers, man made canals and coves to Blounts Bay (29.792009, 84.937081), then clockwise along the shoreline of Blounts Bay and the northern shoreline of East Bay to the point of origin at the southeasternmost tip of Tank Island (29.784735, 84.885047).~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 14.0 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or Emergencies as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **1605 Apalachicola Bay System restricted Zone B (Months of January – May, Sept – Dec)**

~~Classification Boundaries: The area includes all waters within a polygon beginning at the intersection of the western edge of the St. George Island Bridge and the mainland shoreline (29.722682, -84.888127), then eastward to the eastern edge of the St. George Island Bridge (29.722766, -84.887757), then northeastward to channel marker 2 of the Eastpoint Channel (29.73547, -84.871134), then northeastward to a point on the shoreline due south of the former Florida Highway Patrol one story building at 731 highway 98, Eastpoint FL (29.748278, -84.853762), then southwestward along the mainland shoreline to a point due north of the easternmost tip of the East Eastpoint Breakwater (29.742836, -84.867456), then due south to the easternmost tip of the East Eastpoint Breakwater (29.741672, -84.86635), then southwestward along the southern shoreline of the East Eastpoint Breakwater to its westernmost point (29.7373, -84.872216), then southwestward across the Eastpoint Channel to the easternmost tip of the West Eastpoint Breakwater (29.736777, -84.873083), then southwestward along the southern shoreline of the West Eastpoint Breakwater to its westernmost tip (29.733176, -84.880377), then due north to the mainland shoreline (29.734216, -84.881584), then southwestward along the mainland shoreline to the point of origin at the intersection with the western edge of the St. George Island Bridge (29.722682, -84.888127).~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 14.0 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or Emergencies as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **1605 Apalachicola Bay System restricted Zone C (Months of January – May, Sept – Dec)**

~~Classification Boundaries: The area includes all waters within a polygon beginning at the most southern point of Gap Point (29.700846, -84.77046) then southward across the mouth of East slough to a point on the shoreline due south (29.69929, -84.77067) then eastward across the mouths of all creeks and canals to the point of origin at the southernmost point on Gap Point.~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 14.0 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or Emergencies as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **Apalachicola Bay System prohibited (Months of January – May, September – December)**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at the southeastern most point of Tank Island in East Bay (29.784667, -84.884992), then southwestward to the marked bridge piling on the northern side of the John Gorrie Memorial Bridge (29.729283, -84.94646), then southward to the marked bridge piling on the southern side of the John Gorrie Memorial Bridge (29.72923, -84.94646), then southwestward to ICWW channel marker 9 (29.69513, -84.974978), then southward along the eastern edge of the ICWW channel to ICWW channel marker number 76 (29.666204, -84.965926), then southward across the ICWW channel to ICWW channel marker 77 (29.664941, -84.966146), then southward to the easternmost tip of Little St. George Island (29.615645, -84.961649) then northwestward across Apalachicola Bay to the southeast post of the Green Point Plant site (29.683650, -85.039833), then northwestward to Green Point

(29.708730, -85.035519), then eastward along the mainland shoreline to a point due north of the westernmost tip of the West Two Mile Breakwater (29.713131, -85.022809), then eastward along the shoreline to the intersection of the shoreline with the western end of the John Gorrie Memorial Bridge (29.723341, -84.980624) then northeastward across the mouths of all creeks, ditches rivers, man-made canals and coves to Long Point (29.7445681, -84.9463845), then northeastward along the western shoreline of East Bay across the mouths of all creeks, ditches rivers, man-made canals and coves to a point on the southern shore of the mouth of Blounts Bay (29.775004, -84.915749), then clockwise along the shoreline of Blounts Bay and the northern shoreline of East Bay to the point of origin at the southeastern most tip of Tank Island (29.784667, -84.884992). ~~Beginning at Campbell Point (29.789927, 84.872164), then southwestward to the southeasternmost tip of Tank Island (29.784735, 84.885047), then northwestward along the western shoreline of West Bayou to the intersection with the southern edge of the State Road 65 bridge (29.823363, -84.903894), then eastward along the southern edge of the State Road 65 bridge to the eastern shoreline of West Bayou (29.823547, 84.903528), then eastward along the eastern shoreline of West Bayou to the western shoreline of East Bayou (29.829489, 84.886961), then northeastward along the western shoreline of East Bayou to the southern edge of the State Road 65 bridge (29.829481, -84.886711), then southeastward along the southern edge of the State Road 65 bridge to the eastern shoreline of East Bayou (29.819185, 84.849698), then southwestward along the eastern shoreline of East Bayou to the point of origin at Campbell Point (29.789927, 84.872164).~~

Polygon 2: Beginning at a point at the mainland shoreline to a point at the rip-rap on the north end of the old Saint George Island Bridge fishing pier (29.722722, -84.887815) then across Saint George Sound to a point on the shore of the mainland south of the Franklin County Visitor's Center (29.748387, -84.853979), then westward along the southern shoreline of the mainland across the mouths of all creeks, ditches and man-made canals to the point of origin at the point on the mainland shoreline to the point of beginning at the rip-rap on the north end of the old Saint George Island Bridge fishing pier (29.722722, -84.887815).

~~Beginning at the easternmost tip of the East Eastpoint Breakwater (29.741673, -84.866358), then southwestward along the southern shoreline of the East Eastpoint Breakwater to its westernmost point (29.7373, 84.872216), then southwestward across the Eastpoint Channel to the easternmost point of the West Eastpoint Breakwater (29.736778, 84.873084), then southwestward along the southern shoreline of the West Eastpoint Breakwater to its westernmost point (29.733177, 84.880377), then due north to the mainland shoreline (29.734216, 84.881585), then northeastward along the mainland shoreline to a point due north of the easternmost tip of the East Eastpoint Breakwater (29.742837, 84.867456), then due south to the point of origin at the easternmost tip of the East Eastpoint Breakwater (29.741673, 84.866358).~~

Polygon 3: Beginning at the most southern point of Gap Point (29.700846, -84.77046) then southward across the mouth of East slough to a point on the shoreline due south (29.69929, -84.77067) then eastward across the mouths of all creeks and canals to the point of origin at the southern-most point on Gap Point.~~Beginning at the third power pole in East Bay west of Eastpoint (29.735558, 84.909788), then northeastward to the northernmost point of the rip-rap revetment on the eastern shoreline of East Bay (29.744175, 84.896346), then southwestward along the eastern shoreline of East Bay to the intersection with the east causeway of the John Gorrie Memorial Bridge (29.7356805, 84.902356), then westward along the northern edge of the causeway to a point due south of the third power pole in East Bay west of Eastpoint (29.734748, 84.909762), then due north to the point of origin at the third power pole in East Bay west of Eastpoint (29.735558, -84.909788).~~

Polygon 4: Beginning at Campbell Point (29.789927, -84.872164), then southwestward to the southeastern most tip of Tank Island (29.784735, -84.885047), then northwestward along the western shoreline of West Bayou to the intersection with the southern edge of the State Road 65 bridge (29.8233639, -84.9038945), then eastward along the southern edge of the State Road 65 bridge to the eastern shoreline of West Bayou (29.8235478968539, -84.9035283211631), then eastward along the eastern shoreline of West Bayou to the western shoreline of East Bayou (29.829489, -84.886961), then northeastward along the western shoreline of East Bayou to the southern edge of the State Road 65 bridge (29.829481, -84.886711), then southeastward along the southern edge of the State Road 65 bridge to the eastern shoreline of East Bayou (29.819185, -84.849698), then southwestward along the eastern shoreline of East Bayou to the point of origin at Campbell Point (29.789927, -84.872164).

~~Beginning at the intersection of the northern shoreline of St. George Island and the western edge of the St. George Island Bridge (29.672794, 84.869301), then southwestward to the western shoreline of the mouth of the first unnamed canal west of the Ferry Pass Yacht Basin (29.663682, 84.876105), then northeastward to the western edge of the southern causeway of the St. George Island bridge, then southeastward along the western edge of the St. George Island bridge causeway to the point of origin at the intersection of the northern shoreline of St. George Island and the western edge of the St. George Island Bridge (29.672794, 84.869301).~~

Polygon 5: Beginning at the third power pole in East Bay west of Eastpoint (29.735558, -84.909788), then northeastward to the northernmost point of the rip-rap revetment on the eastern shoreline of East Bay (29.744175, -84.896346), then southwestward along the eastern shoreline of East Bay to the intersection with the east causeway of the John Gorrie Memorial Bridge (29.734481, -84.909752), then due north to the point of origin at the third power pole in East Bay west of Eastpoint (29.735558, -84.909788). Beginning at the westernmost tip of the West Two Mile Breakwater (29.710873, -85.022552), then eastward along the southern shoreline of the West Two Mile Breakwater to its southernmost point (29.708809, -85.013823), then eastward across the Two Mile Channel to the southernmost point of the East Two Mile Breakwater (29.708945, -85.011434), then eastward along the southern shoreline of the East Two Mile Breakwater its southeasternmost point (29.711409, -85.006004), then eastward to the southernmost tip of Towhead Island (29.71238, -84.974232), then northward along the eastern shoreline of Towhead Island to its easternmost tip (29.7140677, -84.973602), then northeastward to the intersection of the southern edge of the John Gorrie Memorial Bridge and the easternmost tip of the western causeway (29.727734, -84.955587), then northeastward to Long Point (29.744568, -84.946385), then northeastward along the western shoreline of East Bay across the mouths of all creeks, ditches, rivers, and coves to the southern shoreline of the mouth of Blounts Bay (29.792009, -84.937081), then southward along the shoreline following the perimeter of all creeks and coves, and following the perimeters of all rivers to the southern edge of the Apalachicola Northern Railroad Bridge to a point on the mainland shoreline due north of the westernmost tip of the West Two Mile Breakwater (29.712361, -85.022526), then due south to the point of origin at the westernmost tip of the West Two Mile Breakwater (29.710873, -85.022552).

Polygon 6: Beginning at the northeast marker of lease number 525 in Big Bayou (29.674013, -85.132023), then due north to the eastern shoreline of Big Bayou (29.674013, -85.132023), then clockwise following the perimeter of Big Bayou to a point due south of the northeast marker of lease number 525 (29.670365, -85.131977), then due north to the point of origin at the northeast marker of lease number 525 (29.674013, -85.132023).

Polygon 7: Beginning at the southern shoreline of the mouth of Sheepshead Bayou (29.674955, -85.081147), then clockwise following the perimeter of Sheepshead Bayou to the northern shoreline of the mouth of Sheepshead Bayou (29.675369, -85.081137), then southward across the mouth of Sheepshead Bayou to the point of origin at the southern shoreline of Sheepshead Bayou (29.674955, -85.081147).

Polygon 6 8: Beginning at the northeast marker of lease number 525 in Big Bayou (29.674013, -85.132023), then due north to the eastern shoreline of Big Bayou (29.674013, -85.132023), then clockwise following the perimeter of Big Bayou to a point due south of the northeast marker of lease number 525 (29.670365, -85.131977), then due north to the point of origin at the northeast marker of lease number 525 (29.674013, -85.132023). Beginning at the northernmost point of St. George Island (29.767956, -84.696917) then northwestward across St. George Sound to the easternmost point of the seawall on the mainland shoreline west of Yent Bayou (29.785523, -84.767866), then northeastward along the mainland shoreline, including all creeks, ditches and man-made canals to a point on the mainland shoreline due south of the Crooked River Light (29.825048, -84.699885), then southward to the easternmost point of St. George Island, then northwestward along the northern shoreline of St. George Island to the point of origin at the northernmost point of St. George Island (29.767956, -84.696917).

Polygon 7: Beginning at the southern shoreline of the mouth of Sheepshead Bayou (29.674298, -85.081039), then clockwise following the perimeter of Sheepshead Bayou to the northern shoreline of the mouth of Sheepshead Bayou (29.675560, -85.081951), then southward across the mouth of Sheepshead Bayou to the point of origin at the southern shoreline of Sheepshead Bayou (29.674298, -85.081039).

Polygon 8: Beginning at a natural point of shoreline on St. George Island (29.726316, -84.745813) then northwestward across St. George Sound to the easternmost point of rip-rap on the mainland shoreline west of Yents Bayou (29.785541, -84.768108), then northeastward along the mainland shoreline, including all creeks, ditches and man-made canals to a point on the mainland shoreline due south of the Crooked River Light (29.825172, -84.700412), then southward to the easternmost point of St. George Island (29.773316, -84.695063, then westward along the northern shoreline of St. George Island to the point of origin at a natural point of shoreline on St. George Island (29.726316, -84.745813).

The Prohibited Area includes all creeks, man-made canals, coves, ditches and marinas.

## **APALACHICOLA BAY SYSTEM SEASONAL (MAY-SEPTEMBER) SUMMER (MONTHS OF JUNE—AUGUST)**

### **1621 Apalachicola Bay System approved (Months of June—August)**

Classification Boundaries: The area includes all waters within the following polygon.

~~Beginning at ICWW channel marker 77 (29.664941, -84.966146), then northward across the ICWW channel to ICWW marker 76 (29.666204, -84.965926), then northeastward to a point on the St. George Island Bridge (Piling #107W, 29.703, -84.890667), then southward along the western edge of the St. George Island Bridge to the northern tip of the southern causeway of the St. George Island Bridge (29.672977, -84.869048) then southwestward to the western shoreline at the mouth of the second unnamed canal west of the Ferry Pass Yacht Basin on St. George Island (29.663682, -84.876105), then southwestward along the northern shoreline of St. George Island, across the mouths of all creeks, ditches and man made canals to the intersection of St. George Island and the northern entrance of Sikes Cut (29.6169291, -84.9597029), then due west across the northern entrance of Sikes Cut to the intersection of the northern entrance of Sikes Cut and Little St. George Island (29.6163194, -84.9617833), then northward across the ICWW channel to the point of origin, ICWW channel marker 77(29.664941, -84.966146).~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 7.46 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or when emergencies occur as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

#### **1671 Apalachicola Bay System approved (Months of June—August)**

~~Classification Boundaries: Beginning at the intersection of the western edge of the St. George Island Bridge with the northern edge of the ICWW channel (29.6841270, -84.8806578), then southward along the western edge of the St. George Island Bridge to the intersection of the northern shoreline of St. George Island (29.672977, -84.869048), then northeastward along the northern shoreline of St. George Island across the mouths of all creeks, ditches and man made canals to the western shoreline of Sams Bayou (29.676015, -84.834835), then eastward across the mouth of Sams Bayou to the eastern shoreline of Sams Bayou (29.67651, -84.832579), then northward to ICWW channel marker 34 (29.69356, -84.83653), then southwestward along the northern edge of the ICWW channel to the point of origin at intersection of the western edge of the St. George Island Bridge with the northern edge of the ICWW channel (29.6841270, -84.8806578).~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 7.46 inches; 2) The emergency condition for Apalachicola River discharge measured the same day at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or when emergencies occur as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

#### **1652 Apalachicola Bay System conditionally approved (Months of June—August)**

~~Classification Boundaries: The area includes all waters within a polygon Bbeginning at Campbell Point in East Bay (29.789927, -84.872164), then southward along the eastern shoreline of East Bay across the mouths of all creeks, ditches and man-made canals to the northernmost point of the rip rap revetment on the eastern shoreline of East Bay (29.744175, -84.896346), then southwestward to the third power pole west of Eastpoint (29.735558, -84.909788), then due south to the northern shoreline of the eastern causeway of the John Gorrie Memorial Bridge (29.734748, -84.909762), then westward along the northern shoreline of the eastern causeway of the John Gorrie Memorial Bridge to the intersection with the northern edge of the John Gorrie Memorial Bridge (29.733462, -84.915826), then westward along the northern edge of the John Gorrie Memorial Bridge to the marked bridge piling~~

(29.729283, -84.94645), then northeastward to the southeasternmost tip of Tank Island (29.784735, -84.885047), then northeastward to the point of origin at Campbell Point (29.789927, -84.872164).

Management: The area will be temporarily closed to harvesting when: 1) ~~Four-day five-day~~ cumulative rainfall measured ~~by NOAA at the airport in Apalachicola, Florida~~ exceeds ~~2.91269~~ inches; 2) Apalachicola River same day discharge measured at Blountstown, Florida, exceeds 29,838 cubic feet per second; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **1662 Apalachicola Bay System conditionally approved (~~Months of June—August~~)**

Classification Boundaries: The area includes all waters within a polygon beginning at ICWW channel marker 76 (29.666187, -84.965912), then northwestward along the eastern edge of the ICWW channel to ICWW channel marker 9 (29.69513, -84.974978), then northeastward to the marked bridge piling on the southern side of the John Gorrie Memorial Bridge (29.72923, -84.94646), then northward to the marked bridge piling on the northern side of the John Gorrie Memorial Bridge (29.729283, -84.94645), then eastward along the northern edge of the John Gorrie Memorial Bridge to the intersection with the eastern causeway of the John Gorrie Memorial Bridge (29.733340, -84.916317) (~~29.733462, -84.915826~~), then eastward along the southern shoreline of the John Gorrie Memorial Bridge Causeway to the mainland shoreline (~~29.734991, -84.902780~~) (~~29.7349558, -84.9030874~~), then southeastward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection with the western edge of the St. George Bridge (29.722682, -84.888127), then southward along the western edge of the St. George Island Bridge to a point on the St. George Island Bridge (Piling #107W, 29.703, -84.890667), then southwestward to the point of origin at ICWW channel marker 76 (29.666187, -84.965912).

Management: The area will be temporarily closed to harvesting when: 1) ~~Two-day five-day~~ cumulative rainfall measured at the airport in Apalachicola, Florida, exceeds ~~2.36499~~ inches; 2) Apalachicola River same day discharge measured at Blountstown, Florida, exceeds ~~31,36929,838~~ cubic feet per second; 3) Environmental data is not available; or 4) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **~~Shellfish lease numbers 525, 551, 551B, 580, 582, 609, 672, 981, and all aquaculture leases and aquaculture use zones which are located west of a line drawn from Green Point to Sikes Cut and east of the westernmost point of St. Vincent Island Summer (Months of June—August)~~**

~~Management: The waters of these leases shall be managed in accordance with the criteria for the 1611 Apalachicola Bay System approved area during winter months of January through May and September through December.~~

#### **~~Aquaculture leases and aquaculture use zones located in 1612 Apalachicola Bay System conditionally approved~~**

~~Management: The waters of these leases shall be managed in accordance with the criteria for the 1612 Apalachicola Bay System conditionally approved area during winter months of January through May and September through December.~~

#### **1605 Apalachicola Bay System restricted (Months of June—August)**

Classification Boundaries: ~~The boundaries for the Apalachicola Bay System restricted area during summer months of June through August are the same as described for the Apalachicola Bay System restricted area during winter months of January through May and September through December.~~

~~Management: The area will be temporarily closed to harvesting when: 1) The emergency condition for~~

~~cumulative rainfall for any three day period measured at the airport in Apalachicola, Florida exceeds 14.0 inches; 2) The emergency condition for Apalachicola River discharge measured two days prior at Blountstown, Florida exceeds 153,000 cubic feet per second; 3) Environmental data is not available at the alternate rain gauge measured at the East Bay Forestry Tower or the alternate river gauge located at Blountstown, Florida; or when emergencies occur as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

#### **Apalachicola Bay System prohibited (~~Months of June – August~~)**

Classification Boundaries: The boundaries for the Apalachicola Bay System prohibited area during summer months of ~~May~~ June through ~~September~~ August are the same as described for the Apalachicola Bay System prohibited area during winter months of January through May and September through December.

**18 ALLIGATOR HARBOR SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
1801 Alligator Harbor Approved ----- Alligator Harbor prohibited	Franklin

**1801 Alligator Harbor Approved**

Classification Boundaries: The area includes all waters within a polygon beginning at the northernmost point of the Alligator Harbor Peninsula (29.924490, -84.449411), then due north across the mouth of Alligator Harbor to the mainland shoreline (29.928698, -84.449349), then east along the northern shoreline of Alligator Harbor, across the mouths of all creeks, ditches and man-made canals to a point due north of a post (29.909016, -84.362322) located in the northeast portion of Alligator Harbor, then due south through the post (29.906167, -84.362333) to the western tip of Hidden Harbor Drive (29.899886, -84.363489), then westward to a point on the northern tip of an unnamed island (29.900042, -84.372073), then west to the northernmost point of land north of the trifurcating canal (29.901600, -84.386883), then west-northwest to Channel Marker 36 (29.907152, -84.416606), then northwest through Channel Marker 26 (29.908737, -84.427850) ) to the northern shoreline of the Alligator Harbor Peninsula (29.909517, -84.433936), then northwest along the northern shoreline of the Alligator Harbor Peninsula to the point of origin at northernmost point of the Alligator Harbor Peninsula (29.924490, -84.449411).

Management: The area will be closed to harvesting when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Alligator Harbor prohibited**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at a point on the northern shoreline in the southeasternmost portion of Alligator Harbor (29.909016, -84.362322), due north of a post located at (29.906167, -84.362333), then eastward along the mainland shoreline, then along the northern shore of Hidden Harbor Drive to the western tip of Hidden Harbor Drive (29.899886, -84.363489), and then northward to the post located at (29.906167, -84.362333), and then northward to the point of origin (29.909016, -84.362322).

Polygon 2: Beginning at of the western tip of Hidden Harbor Drive (29.899886, -84.363489), then eastward along the southern shore of Hidden Harbor Drive, then along the northern shoreline of Alligator Harbor peninsula to a point located at (29.909517, -84.433936), then west-southwest to Channel Marker 26 (29.908737, -84.427850), then east-southeast to Channel Marker 36 (29.907152, -84.416606), then east-southeast to the northernmost point of land north of the trifurcating canal (29.901600, -84.386883), then east-southeast to a point on the northern tip of an unnamed island (29.900042, -84.372073), then eastward to a point at the western end of a peninsula at the end of Hidden Harbor Drive (: 29.899886, -84.363489), the point of origin.

The prohibited area also includes all ditches, man-made canals, unnamed bayous, tidal creeks, and marinas.

**20 OCHLOCKONEE BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
2002 Ochlockonee Bay Conditionally Approved 2006 Ochlockonee Bay Conditionally Restricted ---- Ochlockonee Bay prohibited	Franklin, Wakulla

**2002 Ochlockonee Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at channel marker 29 of the Ochlockonee Bay main channel, then due south to the southern shoreline of Ochlockonee Bay, then eastward along the southern shoreline across all creeks, ditches and man-made canals to the western shoreline of the mouth of Chaires Creek, then southward along the western shoreline of Chaires Creek, across the mouths of all tributary creeks, to the easternmost point of land at the first major disjunction of Chaires Creek, within 1200 feet of its mouth, then due east across the western arm of Chaires Creek to the western shoreline of the unnamed island, then northward along the western shoreline to its northernmost point, then due west across the eastern arm of Chaires Creek to the shoreline, then northwestward along the shoreline of Chaires Creek, across the mouths of all tributary creeks, to the eastern shoreline of the mouth of Chaires Creek, then eastward along the southern shoreline of Ochlockonee Bay, across the mouths of all creeks, ditches and man-made canals to Bald Point, then east-northeastward across the mouth of Ochlockonee Bay to channel marker 1 of the Ochlockonee Bay Channel, then northward to an unnamed point due south of the lighted marker at the southern terminus of the Spring Creek Channel, then due west to the northeasternmost point of land on Mashas Sand Island, east of Ulmore Cove, then southward along the eastern shoreline of Mashas Sands Island, across the mouth of all creeks, ditches and man-made canals to Ochlockonee Point, then southwestward along the northern shoreline of Ochlockonee Bay to the eastern shoreline of the mouth of the first unnamed canal west of Ochlockonee Point, then southwestward to channel marker 24 of the Ochlockonee Bay main channel, then southwestward to channel marker 25, then westward along the southern boundary of the main channel to the point of origin, Channel Marker 29 of the Ochlockonee Bay main channel.

Management: The area will be temporarily closed to harvesting when: 1) Ochlockonee River discharge measured same day at Bloxham, Florida, exceeds 2,854 cubic feet per second; 2) Three-day cumulative rainfall measured at the Hosford Forestry Tower, exceeds 2.24 inches; 3) Environmental data is not available; or 4) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**2006 Ochlockonee Bay conditionally restricted**

Classification Boundaries: The area includes all waters within a polygon beginning at Ochlockonee River channel marker 62, then eastward to Ochlockonee River channel marker 52, then due north to the northern shoreline of Ochlockonee Bay, then eastward along the northern shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of the eastern edge of the Highway 98 Bridge and the northern shoreline of Ochlockonee Bay, then southward along the eastern edge of the Highway 98 Bridge to the bridge center span, then northeastward to the southernmost tip of the second dock east of Tide Creek, then northward along the dock to the northern shoreline of Ochlockonee Bay, then eastward along the northern shoreline of Ochlockonee Bay, across the mouths of all creeks, ditches and man-made canals, to the second dock west of the first unnamed canal east of Tide Creek, then southeastward to channel marker 24 of the Ochlockonee Bay main channel, then southwestward to channel marker 25, then westward along the southern boundary of the main channel to channel marker 29 of the Ochlockonee Bay main channel, then due south to the southern shoreline of Ochlockonee Bay, then westward along the shoreline across the mouths of all creeks, ditches and man-made canals to the easternmost side of the access road north of Shell Hammock on the southern shoreline of Ochlockonee Bay, then northeastward to the

southernmost tip of Turtle Island, then northeastward along the eastern shoreline of Turtle Island to the easternmost point of Turtle Island, then northeastward to the point of origin, Ochlockonee River channel marker 62.

Management: The area will be temporarily closed to harvesting when: 1) Ochlockonee River discharge measured same day at Bloxham, Florida, exceeds 3,600 cubic feet per second; 2) ~~T~~hree-day cumulative rainfall measured at the Hosford Forestry Tower, exceeds 3.08 inches; 3) Environmental data is not available; or 4) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

### **Ochlockonee Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at Ochlockonee River channel marker 62, then eastward to Ochlockonee River channel marker 52, then due north to the northern shoreline of Ochlockonee Bay, then westward along the shoreline, including all creeks, ditches and man-made canals to a point due east of the easternmost point of Thoms Island, then due west to the easternmost point of Thoms Island, then southwestward along the eastern shoreline of Thoms Island to its southernmost tip, then due south to the northern shoreline of St. James Island, then eastward to the easternmost side of the access road north of Shell Hammock on the southern shoreline of Ochlockonee Bay, then northeastward to the southernmost tip of Turtle Island, then northeastward along the eastern shoreline of Turtle Island to its easternmost point, then northeastward to the point of origin, Ochlockonee River channel marker 62.

Polygon 2: Beginning at the intersection of the eastern edge of the Highway 98 Bridge and the northern shoreline of Ochlockonee Bay, then southward along the eastern edge of the Highway 98 Bridge to the bridge center span, then northeastward to the southernmost tip of the second dock east of Tide Creek, then northward along the dock to the northern shoreline of Ochlockonee Bay, then westward along the northern shoreline of Ochlockonee Bay, including all creeks, ditches and man-made canals to the point of origin, the eastern edge of the Highway 98 Bridge.

Polygon 3: Beginning at channel marker 24 of the Ochlockonee Bay main channel, then northeastward to the eastern shoreline of the mouth of the first unnamed canal west of Ochlockonee Point, then westward along the northern shoreline of Ochlockonee Bay, including all creeks, ditches and man-made canals to the second dock west of the western side of the mouth of the first unnamed canal east of Tide Creek, then southeastward to the point of origin, channel marker 24 of the Ochlockonee Bay main channel.

The ~~p~~rohibited ~~a~~Area includes all ditches, man-made canals and marinas.

**22 WAKULLA COUNTY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
2212 Wakulla County conditionally approved Zone 1	Wakulla
2222 Wakulla County conditionally approved Zone 2	
2206 Wakulla County conditionally restricted	
----- Wakulla County prohibited	

**2212 Wakulla System conditionally approved Zone 1**

Classification Boundaries: The area includes all waters within the following polygon.

Beginning at the northernmost tip of Piney Island, then eastward across open water to the southwest point of the Oyster Bay Aquaculture Use Zone (OBAUZ) W-138 (30.053246, -84.3402), then north to the northwest tip of the OBAUZ W-138 (30.054516, -84.340204), then east to the northwest tip of the OBAUZ W-137 (30.054517, -84.339678), then north to northwest tip of OBAUZ W-137 (N 30.057194, W 84.339687), then east to the northeast tip of OBAUZ W-101 point (30.057202, -84.336081), then southeast to the westernmost tip of Palmetto Island, then northwestward across Oyster Bay to the westernmost tip of Boggy Island, then due west across open water to a post (30.069154, -84.340215 ) on the mainland shoreline west of Boggy Island, then counterclockwise along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to a post (30.065117, -84.356183) on the eastern shoreline of Purify Creek, then southwestward across the mouth of Purify Creek to a point (30.061615, -84.359899) on the western shoreline of Purify Creek, then southward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the south tip of the mouth of Skipper Creek, then slightly northeast to the western shoreline of Piney Island (30.048204, -84.350185), then counterclockwise along the western shoreline of Piney Island, to the point of origin, the northernmost tip of Piney Island.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall recorded at the Ochlockonee River State Park exceeds 1.08 inches during any seven-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**2222 Wakulla System conditionally approved Zone 2**

Classification Boundaries: The area includes all waters within a polygon beginning at the northernmost tip of Piney Island, then eastward across open water to the west tip of the Oyster Bay Aquaculture Use Zone (OBAUZ) (30.053246, -84.3402), then north to the northwest tip of the OBAUZ (30.057194, -84.339687), then east to the northeast tip of the OBAUZ (30.057202, -84.336081), then southeast to the westernmost tip of Palmetto Island, then counterclockwise along the shoreline of Palmetto Island to its easternmost tip, then northeastward across Oyster Bay to Channel Marker 26, then northeast to private Channel Marker 4, then southward across open water to the westernmost tip of Shell Point, then southwestward to Spring Creek Channel Marker 9, then southeastward to the lighted channel marker, then due south to an unnamed point due east of the northernmost tip of Ochlockonee Point, then due west from the unnamed point to the northernmost tip of Ochlockonee Point, then due west across the mouth of Ulmore Cove to the eastern shoreline of Mashers Sand Island, then northward along the eastern shoreline of Mashers Sand Island to a point southwest of Channel Marker 18, then northeast through Channel Marker 18 to the southeastermost tip of Porters Island (Fiddlers Point), then northward along the eastern shoreline of Porters Island to its northernmost tip, then north across open water to the mainland shoreline, then northward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the south tip of the mouth of Skipper Creek, then slightly northeast to the western shoreline of Piney Island (30.048204, -84.350185), then clockwise across the mouths all creeks, ditches and man-made canals along the western shoreline of Piney Island to its southernmost tip, then counter-clockwise along the eastern shoreline of Piney Island to the Point of origin, the

northernmost tip of Piney Island.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall recorded at the Ochlockonee River State Park exceeds 3.58 inches in any seven-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

## **2206 Wakulla System conditionally restricted**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at Spring Creek Channel Marker 26, then southwestward to the northeasternmost tip of Palmetto Island, then counter-clockwise along the northern shoreline of Palmetto Island to its westernmost tip, then north-northwestward across Oyster Bay to the southwesternmost tip of Boggy Island, then eastward along the southern shoreline of boggy Island to its northeasternmost tip, then eastward across Spring Creek to the westernmost tip of Cutoff Island, then east along the northern shoreline of Cutoff Island to its easternmost tip, then northward to the closest point of land on the mainland shoreline, then clockwise along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the southwesternmost tip of Shell Point, then northwestward across open water to private Channel Marker 4, then southwestward to the point of origin at Spring Creek Channel Marker 26.

Polygon 2: Beginning at the southeasternmost tip of Porters Island, then south-southeast across open water, through Panacea Channel Marker 18 to the northern shoreline of Mashas Island, then northwesterly along the northern shoreline of Mashas Sand Island to a point due south of Panacea Channel Marker 21, then due north across open water, through Panacea Channel Marker 21, to a point on the southern shoreline of Porter Island, then easterly along the southern shoreline of Porter Island, to the point of origin, the southeasternmost tip of Porters Island.

Polygon 3: Beginning at the northwesternmost tip of Mashas Sand Island, then southwestward across Levy Bay to the ramp at the southern terminus of County Road 372B, then counterclockwise along the mainland shoreline to the western shoreline of the mouth of Evans Creek, then due east across Levy Bay to the western shoreline of Mashas Island, then counter-clockwise along the mainland shoreline of Mashas Sand Island, across the mouths of all creeks, ditches and man-made canals, to the point of origin, the northwesternmost tip of Mashas Sand Island.

Polygon 4: Beginning at a point (30.069154, -84.340215) on the mainland shoreline west of Boggy Island, then northward along the mainland shoreline to the mouth of Old Creek, then northeastward across the mouth of Old Creek to the mainland shoreline, then eastward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the mouth of Cutoff creek, then southward across the mouth of Cutoff creek to the western shoreline of Boggy Island, then southwestward along the western shoreline of Boggy Island to the southwesternmost tip of Boggy Island, then due west across open water to the point of origin, a post on the mainland shoreline west of Boggy Island.

Polygon 5: Beginning at the northwesternmost tip of Mashas Sand Island, north of Ulmore Cove, then due west across Ulmore Cove, to the eastern shoreline of Mashas Sand Island, then counterclockwise along the shoreline of Ulmore Cove, across the mouths of all creeks, ditches and man-made canals, to the point of origin, the northwesternmost tip of Mashas Sand Island.

Management: The area will be temporarily closed to harvesting when: 1) Rainfall recorded at the Ochlockonee River State Park and then converted to RNALL exceeds 4.02 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

## **Wakulla County prohibited**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at Shell Point Channel Marker 9, then northeastward to the southwesternmost tip of Shell Point, then counterclockwise along the mainland shoreline of Shell Point, to the intersection of the mouths of Redfish and Walker creeks, then across the intersections of the mouths of Redfish and Walker Creeks to the western shoreline of Live Oak Island, then clockwise along the western shoreline of Live Oak Island to its southernmost tip,

then southwestward to Shell Point Channel Marker 2, then southwestward to the lighted marker at the southern terminus of the Spring Creek Channel, then northwestward to the point of origin at Shell Point Channel Marker 9.

Polygon 2: Beginning at the easternmost tip of Boggy Island, then eastward across Spring Creek to the westernmost tip of Cutoff Island, then eastward along the northern shoreline of Cutoff Island to its easternmost tip, then northward to the closest point of land on the mainland shoreline, then counterclockwise along the mainland shoreline across the mouths of all creeks, ditches and man-made canals, to the point of origin at the easternmost tip of Boggy Island.

Polygon 3: Beginning at the easternmost tip of Stokley Landing, then easterly across open water to the western shoreline of Purify Creek, then counterclockwise along the mainland shoreline to the eastern side of the mouth of Purify Creek, then west across the mouth of Purify Creek to its western shoreline, then counterclockwise along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the point of origin, the easternmost tip of Stokley Landing.

Polygon 4: Beginning at Panacea Channel Marker 21, then due south to the northern shoreline of Mashles Sand Island, then counterclockwise along the western shoreline of Mashles Island to the northeasternmost tip of Mashles Sand Island, then south-southwest to the boat ramp at the end of state road 372B, then clockwise along the shoreline of Dickerson Bay to the southernmost tip of Hopkins Island, then due south across Dickerson Bay, to the northern shoreline of Porters Island, then clockwise along the shoreline of Porters Island to a point on the shoreline of Porters Island due north of Panacea Channel Marker 18, then due south to the point of origin, Panacea Channel Marker 18.

Polygon 5: Beginning at a point on the western shoreline of the mouth of Evans Creek, then due east across Levy Bay to the western shoreline of Mashles Sand Island, then clockwise along the shoreline of Mashles Island, to the point of origin, a point on the western shoreline of the mouth of Evans Creek.

The prohibited area also includes all creeks, ditches, and man-made canals of Apalachee Bay, north of Ochlockonee Point and west of Live Oak Island. The prohibited area includes marinas.

**25 HORSESHOE BEACH SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
2502 Horseshoe Beach conditionally approved ---- Horseshoe Beach prohibited	Dixie

**2502 Horseshoe Beach Conditionally Approved**

Classification Boundaries: The area includes all waters within a polygon described by a line beginning at the southernmost tip of Big Grassy Key at 29.4956, -83.3753 then, east southeastward to the northernmost point of Little Grassy Key at 29.4952, -83.3725 then, southeastward to Stuart Point at 29.4893, -83.3501 then, continuing southeastward to Drum Point at 29.4755, -83.3317 then, continuing the southeastward line to the westernmost point of land due south of the landing strip at 29.4597, -83.3068 then, south southwestward to a pole 1 mile due west of Horseshoe Point at 29.4423, -83.3112 then, southward to channel marker #9 at 29.4100, -83.3073 then, northeastward to a pole approximately 1/4 mile south of Butler Island at 29.4292, -83.2663 then, continuing northeastward to a pole on the southernmost tip of land east of Lolly Creek at 29.4319, -83.2569, then north and eastward along the mainland shoreline to a point on the north bank of un-named creek #1 at 29.4342, -83.2550, then northeastward across the mouth of un-named creek #1 to the southern bank at 29.4350, -83.2536. Then, east southeastward along the mainland shoreline to the north bank at the mouth of the un-named creek #2 at 29.4338, -83.2491. Then, east southeastward across the mouth of un-named creek #2 to the southernmost tip of the un-named marsh island #1 in the mouth of un-named creek #2 at 29.4335, -83.2480. Then, continuing east southeastward across the mouth of un-named creek #2 to a point at 29.4333, -83.2471 on the southern shore of the un-named marsh island #2 in the mouth of un-named creek #2. Then, eastward continuing across the mouth of un-named creek #2 to the southern shore of the un-named marsh island #3 in the mouth of un-named creek #2 at 29.4334, -83.2463. Continuing eastward across the mouth of un-named creek #2 to the southern bank at 29.4336, -83.2455. Then continuing eastward along the mainland shoreline to the western shoreline at the mouth of Butler Creek at 29.4324, -83.2386. Continuing north and northwesterly along the western shoreline of Butler Creek to a pole approximately 1/4 mile from the mouth of Butler Creek at 29.4344, -83.2417. Then northeastward to the opposite shoreline on the east side of Butler Creek at 29.4348, -83.2404. Then eastward and southward along the Butler Creek eastern shoreline to a point of land at 29.4323, -83.2350 which is the east bank of the mouth of Butler Creek and/or the west bank at the mouth of Jim Lee Creek. Next, southeastward across Jim Lee Creek to a point at 29.4312, -83.2335 on the eastern shoreline. Then, southward to the south and east bank at the mouth of Jim Lee Creek at 29.4302, -83.2333. Then eastward and southward along the mainland shoreline to the mouth of Amason Creek on the west bank at 29.4228, -83.2270. Then along the west bank shoreline to a pole approximately 1/3 mile upstream in Amason Creek at 29.4264, -83.2252. Then due east across Amason Creek to the eastern shoreline at 29.4264, -83.2241. Then, south and eastward along the east shoreline of Amason Creek to a pole at the mouth of the north tributary on the east shore of Amason Creek at 29.4258, -83.2233, then southeastward across the mouth of the north tributary in Amason Creek to the opposite shoreline of the north tributary on the northwestern tip of an un-named marsh island at 29.4253, -83.2229, then southward and eastward along the eastern shoreline of the un-named marsh island to the southeastern tip at a pole at 29.4224, -83.2210 which marks the north shore of the southern tributary on the east shoreline of Amason Creek. Then, southeastward across the mouth of the southern tributary to the eastern shoreline of Amason Creek at 29.4221, -83.2206. Then, westward, eastward, and southward along the mainland shoreline to the southernmost tip of land on the northern shoreline of Fishbone Creek at a pole at the mouth of Fishbone Creek at 29.4166, -83.2168. Then, southward to a pole on the outside bar at the mouth of an un-named creek at 29.4099, -83.2167. Then, continuing south southeastward to the northernmost point of the un-named marsh island at the mouth of Shired Creek at 29.4015, -83.2122. Continuing southward along the western shoreline of the un-named marsh island at the mouth of Shired Creek to the southernmost tip of the un-named marsh island at 29.3986, -83.2118. Then, eastward to the east shoreline of the mouth of Shired Creek at 29.3980, -83.2102. Then southeast and southward along the mainland shoreline of Shired Island to the mouth of Johnson Creek at 29.3849, -83.2031. Then east, and northeastward along the northern shoreline of Johnson Creek to the west bank of the mouth of tributary #1 at 29.3849, -83.2022. Then across the mouth of tributary #1 in Johnson Creek to the East bank at 29.3850, -83.2015. Then continuing northeastward along the northern shoreline of Johnson Creek to the west bank of the mouth of tributary #2 at 29.3846, -83.1998. Then across the

mouth of tributary #2 in Johnson Creek to the East bank at 29.3848, -83.1994. Then continuing northeastward along the northern shoreline of Johnson Creek to the west bank of the mouth of tributary #3 at 29.3854, -83.1977. Then across the mouth of tributary #3 in Johnson Creek to the East bank at 29.3860, -83.1965. Then continuing northeastward along the northern shoreline of Johnson Creek to a boundary pole on the north shore approximately 1/2 mile upstream from the mouth of Johnson Creek at 29.3862, -83.1962. Then, southeast across Johnson Creek to the opposite shoreline at 29.3857, -83.1955. Then, southwestward along the southern shoreline of Johnson Creek to a point at 29.3839, -83.1970 which is the north bank of the mouth of a tributary on the south shoreline in Johnson Creek. Then southwestward across the mouth of the tributary to the south bank at 29.3830, -83.1979. Then continuing westerly along the south shoreline of Johnson Creek to the mouth of Johnson Creek. Then southerly along the shoreline of Big Pine Island to the southernmost point of land on Big Pine Island at the mouth of Sander's Creek at 29.3740, -83.2005. Then northeastward along the north shoreline of Sander's Creek to a pole at 29.3771, -83.1972 marking the mouth of a tributary on the north shoreline of Sander's Creek. Then northeastward across the tributary to the westernmost point of land on an un-named marsh island at 29.3780, -83.1955. Then southeastward along the shoreline of the un-named marsh island to the southernmost point at a boundary pole in Sander's Creek at 29.3771, -83.1938. Then southeastward to a pole on the southernmost point of an un-named marsh island of the north shore of the main flow of Sander's Creek at 29.3763, -83.1920. Then southward across Sander's Creek to a pole on the shoreline of an un-named marsh island at 29.3748, -83.1919. Then southwestward and southeastward along the shoreline of the un-named marsh island to the southernmost point at 29.3727, -83.1912 which marks the north bank of the mouth of the southern tributary on the east shore of Sander's Creek. Then due south across the mouth of the southern tributary to the south bank at 29.3713, -83.1913. Then south, west, and southeastward along the shoreline to the southernmost point at 29.3693, -83.1916 which marks the north shore of an un-named tributary south of Sander's Cut. Then southeastward across the mouth of the un-named tributary to the south shore at 29.3680, -83.1895. Then south and westward along the mainland shoreline to the Horseshoe Beach / Suwannee Sound shellfish harvesting area boundary pole at 29.3651, -83.1905. Then, due west to the southernmost point of land on Coon Island at 29.3651, -83.2021. Then, due west to the Submerged Lands Act Boundary Line, then northward along the Submerged Lands Act Boundary Line to a point due west of the southernmost tip of Big Grassy Key, then due east to the point of origin at the southernmost tip of Big Grassy Island at 29.4956, -83.3753.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any one-day period measured at Manatee Springs State Park exceeds 3.56 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.003, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closing a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Horseshoe Beach prohibited**

Classification Boundaries: The area includes the following waters:

Polygon 1: Includes all waters, side creeks and bayous north and southeastward of a southeastward line starting at Stuart Point at 29.4893, -83.3501. Then, continuing the southeastward line to Drum Point at 29.4755, -83.3317. Then, counterclockwise along the mainland shoreline including the perimeter of all creeks, canals, coves and embayments to the point of origin at Stuart Point at 29.4893, -83.3501.

Polygon 2: Includes all waters, side creeks and bayous north and eastward of the continuing southeastward line from Drum Point at 29.4755, -83.3317, to the westernmost point of land due south of the landing strip at 29.4597, -83.3068. Then, counterclockwise along the mainland shoreline including the perimeter of all creeks, coves, canals and embayments to the point of origin at Drum Point at 29.4755, -83.3317.

Polygon 3: All waters, side creeks and bayous within a polygon #3 described by a line beginning at the westernmost point of land due south of the landing strip at 29.4597, -83.3068. then, south southwestward to a pole approximately 1-mile due west of Horseshoe Point at 29.4423, -83.3112 then, southward to channel marker #9 at 29.4100, -83.3073 then, northeastward to a pole approximately 1/4 mile south of Butler Island at 29.4292, -83.2663 then, continuing northeastward to a pole on the southernmost tip of land east of Lolly Creek at 29.4319, -83.2569. then, counterclockwise following the mainland shoreline including the perimeter of all creeks, coves, canals and embayments to the point of origin at the westernmost point of land due south of the landing strip at 29.4350, -83.2536.

Polygon 4: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line of the un-named creek #1 at 29.4342, -83.2550, across the mouth of un-named creek #1 to the opposite bank at 29.4342, -83.2550.

Polygon 5: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line of the un-named creek #2 at 29.4338, -83.2491, across the mouth of un-named creek #2 to a point at 29.4333, -83.2471 on the southern shore of the un-named marsh island in the mouth of un-named creek #2. Then, eastward continuing across the mouth of un-named creek #2 to the southern shore of the next un-named marsh island in the mouth of un-named creek #2 at 29.4334, -83.2463. Continuing eastward across the mouth of un-named creek #2 to the bank at 29.4336, -83.2455.

Polygon 6: All waters, side creeks and bayous north, west, and east of the conditionally approved boundary line of Butler Creek from the west bank at a pole approximately ¼ mile from the mouth of Butler Creek at 29.4344, -83.2417. Then northeastward to the opposite shoreline on the east side of Butler Creek at 29.4348, -83.2404.

Polygon 7: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line of Jim Lee Creek at 29.4323, -83.2350 across the mouth of Jim Lee Creek to the opposite bank at 29.4302, -83.2333.

Polygon 8: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line of Amason Creek to a pole approximately 1/3 mile upstream in Amason Creek at 29.4264, -83.2252. Then due east across Amason Creek to the eastern shoreline at 29.4264, -83.2241.

Polygon 9: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line at the mouth of the north tributary on the east shore of Amason Creek at 29.4258, -83.2233, then southeastward across the mouth of the north tributary in Amason Creek to the opposite shoreline of the north tributary on the northwestern tip of an un-named marsh island at 29.4253, -83.2229.

Polygon 10: All waters, side creeks and bayous north, east, and west of the conditionally approved boundary line at the un-named marsh island to the southeastern tip at a pole at 29.4224, -83.2210 which marks the north shore of the southern tributary on the east shoreline of Amason Creek. Then, southeastward across the mouth of the southern tributary to the eastern shoreline of Amason Creek at 29.4221, -83.2206.

Polygon 11: All waters, side creeks and bayous north, south, and east of the conditionally approved boundary line at the southernmost tip of land on the northern shoreline of Fishbone Creek at a pole at the mouth of Fishbone Creek at 29.4166, -83.2168. Then, southward to a pole on the outside bar at the mouth of an un-named creek at 29.4099, -83.2167. Then, continuing south southeastward to the northernmost point of the un-named marsh island at the mouth of Shired Creek at 29.4015, -83.2122. Continuing southward along the western shoreline of the un-named marsh island at the mouth of Shired Creek to the southernmost tip of the un-named marsh island at 29.3986, -83.2118. Then, eastward to the east shoreline of the mouth of Shired Creek at 29.3980, -83.2102.

Polygon 12: All waters, side creeks and bayous north, west, and east of the conditionally approved boundary line in Johnson Creek beginning at tributary #1 along the northern shoreline of Johnson Creek at 29.3849, -83.2022. Across the mouth of tributary #1 to the opposite bank at 29.3850, -83.2015.

Polygon 13: All waters, side creeks and bayous north, west, and east of the conditionally approved boundary line in Johnson Creek beginning at tributary #2 at 29.3846, -83.1998. Then across the mouth of tributary #2 in Johnson Creek to the opposite bank at 29.3848, -83.1994.

Polygon 14: All waters, side creeks and bayous north, west, and east of the conditionally approved boundary line in Johnson Creek beginning at tributary #3 at 29.3854, -83.1977. Then across the mouth of tributary #3 in Johnson Creek to the East bank at 29.3860, -83.1965.

Polygon 15: All waters, side creeks and bayous north, south, and east of the conditionally approved boundary line in Johnson Creek beginning at a boundary pole on the north shore approximately 1/2 mile upstream from the mouth of Johnson Creek at 29.3862, -83.1962. Then, southeast across Johnson Creek to the opposite shoreline at 29.3857, -83.1955.

Polygon 16: All waters, side creeks and bayous west, south, and east of the conditionally approved boundary line in Johnson Creek beginning at 29.3839, -83.1970 which is the north bank of the mouth of a tributary on the south shoreline in Johnson Creek. Then southwestward across the mouth of the tributary to the south bank at 29.3830, -83.1979.

Polygon 17: All waters, side creeks and bayous north and east of the conditionally approved boundary line on the north shoreline of Sander's Creek to a pole at 29.3771, -83.1972 marking the mouth of a tributary on the north shoreline of Sander's Creek. Then northeastward across the tributary to the westernmost point of land on an un-named marsh island at 29.3780, -83.1955.

Polygon 18: All waters, side creeks and bayous north, south, and east of the conditionally approved boundary line at a boundary pole in Sander's Creek at 29.3771, -83.1938. Then southeastward to a pole on the southernmost point of an un-named marsh island of the north shore of the main flow of Sander's Creek at 29.3763, -83.1920.

Polygon 19: All waters, side creeks and bayous north, south, and east of the conditionally approved boundary

line at 29.3727, -83.1912 which marks the north bank of the mouth of the southern tributary on the east shore of Sander's Creek. Then due south across the mouth of the southern tributary to the south bank at 29.3713, -83.1913.

Polygon 20: All waters, side creeks and bayous north, and east of the conditionally approved boundary line at 29.3693, -83.1916 which marks the north shore of an un-named tributary south of Sander's Cut. Then southeastward across the mouth of the un-named tributary to the south shore at 29.3680, -83.1895.

The prohibited area also includes all marinas and canals.

**28 SUWANNEE SOUND SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
2802 Suwannee Sound Spring/Summer conditionally approved	Dixie, Levy
2812 Suwannee Sound Winter conditionally approved	
---- Suwannee Sound Winter prohibited	

**2802 Suwannee Sound Conditionally Approved Spring/Summer Area (Months of February - May, and September)**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the southernmost point of land on Coon Island at 29.3651, -83.2021, then due east to the marsh shoreline 29.3651, -83.1905, then southeastward along the shoreline to the point at the northwest corner of the mouth of Bumblebee Creek at 29.3635, -83.1891, then eastward following the marsh shoreline and across the mouths of all small creeks to a marsh point at 29.3632, -83.1857, then continuing eastward to the next marsh point in Bumblebee Creek at 29.3632, -83.1829, then northward and eastward along the marsh shoreline and across the mouths of all small creeks to a pole on the northern shoreline of Bumblebee Creek at 29.3639, -83.1787, then southward across the creek to the southern shoreline at 29.3623, -83.1790, then southward and westward along the marsh shoreline that makes up the southern shoreline of Bumblebee Creek and across the mouths of all small creeks to the marsh point at the southwest corner of the creek at 29.3547, -83.1845, then southward and eastward along the outer marsh shoreline to a point in the northwest corner of the mouth of Double Barrel Creek at 29.3474, -83.1767, then northeastward to the next small marsh point at 29.3480 -83.1762, then continuing northeastward to the northernmost tip of a small marsh island at 29.3485 -83.1753, then eastward to the next small marsh point at 29.3483, -83.1741, then east southeastward across the main channel of the North Branch of Double Barrel Creek to a pole at 29.3477, -83.1730, then continuing southeastward to a small marsh island in the middle of the mouth of the South Branch of Double Barrel Creek at 29.3461, -83.1712, then continuing southeastward across the mouth of the South Branch of Double Barrel Creek to the marsh shoreline at 29.3452, -83.1704, then southwestward along the marsh shoreline to a marsh point at the southwest corner of the mouth of Double Barrel Creek at 29.3435, -83.1712, then continuing southwestward to a pole in the open water 0.55 miles northwest of Cat Island at 29.3351, -83.1842, then southward to 29.3200, -83.1842 at Boiler Gap, then due west to the Submerged Lands Act Boundary, then northward along the Boundary to a point due west of the southernmost point of land on Coon Island, then due east to the point of origin at the southernmost point of land on Coon Island at 29.3651, -83.2021.

Polygon 2: Beginning at 29.2949, -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River, then southeastward to the Suwannee River Alligator Pass day beacon #8 at 29.2665, -83.1681, then southeastward to 29.2448, -83.0997 just northwest of the oyster racks on Lone Cabbage Reef, then continuing eastward to a pole location at 29.2455, -83.0751 on the westernmost point of land that begins the north shore of Giger Creek, then continuing eastward approximately ¼ mile upstream along the marsh shoreline and across the mouth of all small creeks to a pole at 29.2449, -83.0689 along the north shore of Giger Creek, then southeastward to the southern shore of Giger Creek at 29.2442, -83.0680, then southward along the southern shoreline of Giger Creek to a marsh point at 29.2388, -83.0692, then southward to a pole at 29.2361, -83.0688 on the western tip of the small marsh island just south of Clark Islands, then southwestward to a pole at 29.2298, -83.0731 on the northwestern tip of Raleigh Islands, then continuing southwestward to a pole at 29.2252, -83.0773 on the westernmost point of the Raleigh Islands, then westward across the mouth of Buck Island Pass to the northeast corner of Long Cabbage Island at 29.2254, -83.0809, then westward along the northern shoreline of Long Cabbage Island to the northwest tip at 29.2248, -83.0854 then due west to the Submerged Lands Act Boundary, then northward along the Boundary to a point due west of the point of origin on the reef west of the Alligator Pass entrance, then due east to the point of origin at 29.2949, -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River.

Management: The conditionally approved summer areas will be temporarily closed to shellfish harvesting when: 1) Suwannee River stage recorded at Manatee Springs State Park two days previous exceeds 4.45 feet; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure,

sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Suwannee Sound Prohibited Area Spring / Summer Area (Months of February - May, and September)**

Classification Boundaries: The area includes the following waters: All side creeks and bayous of Bumblebee Creek and the main creek east of the conditionally approved boundary pole on the northern shoreline of Bumblebee Creek at 29.3639, -83.1787 and all waters north and east of the conditionally approved boundary line at the mouth of North Double Barrel Creek.

All waters south and east of the following line: from the marsh point at the southwest corner of the mouth of Double Barrel Creek at 29.3435, -83.1712, then southwestward to a pole in the open water 0.55 miles northwest of Cat Island at 29.3351, -83.1842, then southward to 29.3200, -83.1842 at Boiler Gap, then due west to the Submerged Lands Act Boundary, then southward along the Submerged Lands Act Boundary, then due east to the conditionally approved boundary at 29.2949, -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River, then southeastward to the Suwannee River Alligator Pass day beacon #8 at 29.2665, -83.1681, then southeastward to 29.2448, -83.0997 just northwest of the oyster racks on Lone Cabbage Reef, then continuing eastward to a pole location at 29.2455, -83.0751 on the westernmost point of land that begins the north shore of Giger Creek. This area includes the Suwannee River and the East Pass, Big Trout Creek, Little Trout Creek, Weeks Fisher Creek, Barnett Creek, Bird Island Creek, Dan May Creek, Mitchell Creek, Mocassin Creek, Hog Island Creek, Harris Creek, Salt Creek and all the creeks and canals surrounding the Town of Suwannee.

All waters of Giger and Ericson Creeks north and east of the conditionally approved boundary pole at 29.2449, -83.0689 along the north shore of Giger Creek.

All waters east and north of the conditionally approved boundary line east of Deer Island, including all of Preachers Hole, Clark Creek and the small creeks and bayous on the western side of Raleigh Islands. The prohibited area also includes all marinas.

### **2812 Suwannee Sound Conditionally Approved Winter Area (Months of October - January)**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the southernmost point of land on Coon Island at 29.3651 -83.2021, then due east to the marsh shoreline 29.3651, -83.1905, then southeastward to a point on the small marsh island at the mouth of Bumblebee Creek at 29.3611, -83.1891, then southeastward to a point on the large marsh island at the mouth of Bumblebee Creek at 29.3607, -83.1884, then southward along the outer marsh shoreline of the island to 29.3586, -83.1876 then continuing southeastward across the southern mouth of Bumblebee Creek to the marsh point at the southwest corner of the creek at 29.3546, -83.1845, then southward and eastward along the outer marsh shoreline to a marsh point between Bumblebee Creek and the North Branch of Double Barrel Creek at 29.3485, -83.1817, then continuing southwestward to a pole in the open water 0.55 miles northwest of Cat Island at 29.3351, -83.1842, then southward to 29.3200, -83.1842 at Boiler Gap, then due west to the Submerged Lands Act Boundary, then northward along the Boundary to a point due west of the southernmost point of land on Coon Island, then due east to the point of origin at the southernmost point of land on Coon Island at 29.3651, -83.2021.

Polygon 2: Beginning at 29.2949, -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River, then southeastward to the Suwannee River Alligator Pass day beacon #8 at 29.2665, -83.1681, then southeastward to 29.2448, -83.0997 just northwest of the oyster racks on Lone Cabbage Reef, then southeastward to 29.2416, -83.0787 on the northern tip of Deer Island, then southward along the western shoreline of Deer Island to a pole on the small marsh island off the southeastern corner of Deer Island at 29.2295, -83.0783, then southward to a pole at 29.2252, -83.0773 on the westernmost point of the Raleigh Islands, then westward across the mouth of Buck Island Pass to the northeast corner of Long Cabbage Island at 29.2254, -83.0809, then westward along the northern shoreline of Long Cabbage Island to the northwest tip at 29.2248, -83.0854 then due west to the Submerged Lands Act Boundary, then northward along the Boundary to a point due west of the point of origin on the reef west of the Alligator Pass entrance, then due east to the point of origin at 29.2949 -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River.

Management: The conditionally approved winter areas will be temporarily closed to shellfish harvesting when: 1) Cumulative one-day rainfall recorded at the Cedar Key Forestry Tower, Rosewood, Florida, exceeds 0.43 inches; 2) Suwannee River stage recorded at Manatee Springs State Park one day previous exceeds 3.80 feet; 3) Environmental

data is not available; or 4) Emergencies occur as defined in Rule 5L-1.002, ~~F.A.C. Florida Administrative Code~~. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **Suwannee Sound Prohibited Winter Area (Months of October - January)**

Classification Boundaries: The area includes the following waters:

All waters north and east of the conditionally approved boundary line across the mouth of Bumblebee Creek.

All waters within the following polygon: from a marsh point between Bumblebee Creek and the North branch of Double Barrel Creek at 29.3485, -83.1817, then continuing southwestward to a pole in the open water 0.55 miles northwest of Cat Island at 29.3351, -83.1842, then southward to 29.3200, -83.1842 at Boiler Gap, then due west to the Submerged Lands Act Boundary, then southward along the Submerged Lands Act Boundary, then due east to the conditionally approved boundary at 29.2949, -83.1819 on the reef 1.0 mile west of the Alligator Pass entrance of the Suwannee River, then southeastward to the Suwannee River Alligator Pass day beacon #8 at 29.2665, -83.1681, then southeastward to 29.2448, -83.0997 just northwest of the oyster racks on Lone Cabbage Reef, then southeastward to 29.2416, -83.0787 on the northern tip of Deer Island. This area includes the Suwannee River and the East Pass, Big Trout Creek, Little Trout Creek, Weeks Fisher Creek, Barnett Creek, Bird Island Creek, Dan May Creek, Mitchell Creek, Mocassin Creek, Hog Island Creek, Harris Creek, North and South Double Barrell Creek, Salt Creek and all the creeks and canals surrounding the Town of Suwannee.

All waters east of the conditionally approved boundary at Deer Island, including all waters of Giger and Ericson Creeks, Preachers Hole and the small creeks and bayous on the western side of Raleigh Islands.

The prohibited area includes all marinas.

**30 CEDAR KEY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
3001 Cedar Key approved	Levy
3012 Cedar Key conditionally approved Zone A	
3022 Cedar Key conditionally approved Zone B

**3001 Cedar Key Approved**

Classification Boundaries: The area includes all waters within the polygon beginning at the northernmost tip of Atsena Otie Key, then southward along the western shoreline of Atsena Otie Key to the southernmost tip, then due eastward to the intersection with the western boundary line of area #32 Waccasassa Bay at 29.1182, -82.9370, then due south to the southern boundary line of area #32 Waccasassa Bay at 29.0755, -82.9370, then due west to the state Submerged Lands Act line, then northward along the Submerged Lands Act line ~~line~~ to a point due west of the northwestern tip of Lone Cabbage Island, then due east to said point on Lone Cabbage Island at 29.2248, -83.0854, then south along the western shoreline of marsh islands to a marsh point at 29.2152, -83.0870 located west of Buck Island, then southeastward to the westernmost tip of McClamory Key at 29.1876, -83.0734, then southward to the westernmost point of Rattlesnake Key at 29.1554, -83.0677, then southward across the #4 Channel to a pole on the shell bar that makes up southern shoreline of the channel at 29.1489, -83.0654, then southward along the outside edge of shell and marsh islands to the southernmost tip of said islands at 29.1427, -83.0648, then southeastward to a pole on the marsh point west of Tyre Creek at 29.1388, -83.0583, then south southeastward to the westernmost point of the mangrove island west of the Cedar Key Airport, then southeastward to Piney Point, then eastward to the point of origin on the northernmost tip of Atsena Otie Key.

Management: The area will be temporarily closed to harvesting when: 1) Environmental data is not available; 2) Emergencies occur as defined in Rule 5L-1.002, F.A.C., or 3) An emergency rainfall level of a cumulative three-day rainfall measured at the Cedar Key Forestry Tower exceeds 10.5 inches. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

**3012 Cedar Key Conditionally Approved Zone A**

Classification Boundaries: The area includes all waters within the polygon beginning at the northernmost tip of Atsena Otie Key, then northeastward to Channel Marker #8, then continuing northeastward to the southern tip of Scale Key at 29.1426, -83.0186, then northward along the eastern shoreline of Scale Key to the easternmost tip at 29.1511, -83.0164, then due north across the mouth of Scale Key Gap to a small Mangrove Island at 29.1540, -83.0164, then eastward along the outside edge of marsh Islands to a pole on the shell bar at the mouth of the gap at Cedar Pt. at 29.1548, -83.0127, then due northward across the mouth of the gap to the southern shoreline of Cedar Pt., then eastward along said shoreline to the easternmost tip of Cedar Pt., then westward along the northern shoreline of the island to a pole at 29.1578, -83.0095, then north northwestward across the gap, then northward along the eastern shoreline of the marsh island north of Cedar Pt. to the easternmost tip at 29.1643, -83.0085, then northeastward to the westernmost tip of Live Oak Key at 29.1655, -83.0047, then along the southern and eastern shoreline of Live Oak Key to a pole at 29.1675, -82.9982, then east northeastward to a pole on an unnamed mangrove island at 29.1714, -82.9799, then due east to the next marsh point on an unnamed marsh island at 29.1710, -82.9751, then continuing east along the southern shoreline of the unnamed island to 29.1722, -82.9680, then across the mouth of a creek to the southern tip of the next marsh island at 29.1731, -82.9634, then eastward across the creek mouth to the next marsh point at 29.1733, -82.9611, then continuing eastward across the creek mouth to the next marsh point at 29.1732, -82.9590, then southeastward to the next marsh point at 29.1725, -82.9580, then southward along the marsh shoreline to 29.1716, -82.9582, then southward across the creek mouth to the next marsh island at 29.1705, -82.9581, then following the shoreline of the marsh island to the southeasternmost tip at 29.1704, -82.9546, then eastward across the mouth of the next creek to a marsh point at 29.1699, -82.9528, then

southeastward to the next marsh point at 29.1688, -82.9508, then continuing southeastward to the next marsh point at 29.1681, -82.9489, then southeastward to the next marsh point at 29.1674, -82.9462, then east-northeastward across the mouth of the creek to 29.1683, -82.9417, then eastward and southward along the marsh shoreline to a pole at 29.1671, -82.9370, then due south in open water to 29.1820, -82.9370, then due west to the southernmost tip of Atsena Otie Key, then northward along the western shoreline of Atsena Otie Key to the point of origin at the northernmost tip of Atsena Otie Key.

Management: The area will be temporarily closed to harvesting when: 1) Three-day rainfall measured at the Cedar Key Forestry Tower exceeds 6.67 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **3022 Cedar Key Conditionally Approved Zone B**

Classification Boundaries: The area includes all waters within a polygon beginning at the northwestern tip of Lone Cabbage Island, then eastward along the shoreline to the northeastern tip at 29.2254, -83.0809, then eastward across Buck Island Pass to the northwestern tip of Raleigh Islands at 29.2252, -83.0773, then south along the shoreline and across all creek mouths to the northwestern tip of Garden Island at 29.2170, -83.0730, then south along the western shoreline of Garden Island to the westernmost tip, then south to the northernmost tip of Hog Island at 29.2129, -83.0726, then continuing southward along the eastern shoreline of Hog Island to a pole on the shoreline at 29.2054, -83.0723, then south across the water to 29.2015, -83.0712, then southward and eastward along the marsh shoreline and across the mouths of Dennis and Seabreeze Creeks to a pole on the northern tip of Richard's Island at 29.1871, -83.0647, then southward along the western shoreline of the island to the southernmost tip, then across the mouth of Sand Creek and continuing south and eastward along the marsh shoreline to the mouth of Goose Creek, then continuing eastward along the marsh shoreline and across the mouths of all creeks to the #4 Bridge at 29.1665, -83.0271, then eastward to a small marsh island at 29.1665, -83.0258, then northeastward to the small marsh island at 29.1669, -83.0237, then eastward to the next marsh island at 29.1669 -83.0229, then southeastward to a marsh point at 29.1639, -83.0157, then southeastward to an unnamed marsh island at 29.1622, -83.0141, then eastward to a mangrove island at 29.1619, -83.0121, then southeastward along the marsh shoreline to 29.1593, -83.0102, then south-southeastward to the northern shoreline of Cedar Point at 29.1578, -83.0095, then eastward along the shoreline to the easternmost tip of Cedar Point at 29.1577, -83.0081, then westward along the southern shoreline of Cedar Point to 29.1557, -83.0129, then southward to a pole on a shell bar at the mouth of the gap at Cedar Point at 29.1548, -83.0127, then southward and westward along the outside marsh shoreline to a small mangrove island near the mouth of Scale Key Gap at 29.1540, -83.0164, then due south across the mouth of Scale Key Gap to the easternmost tip of Scale Key at 29.1511, -83.0164, then southward along the eastern shoreline of Scale Key to the southernmost tip, then westward across the mouth of Steamboat Gap to a pole on the unnamed marsh island at 29.1423, -83.0212, then north-northwestward following the watercourse on the southeast shoreline of Scale Key to a pole at 29.1478, -83.0237, then due north to the small mangrove island east of Haven's Island at 29.1583, -83.0241, then northward to a point on the next mangrove island at 29.1624, -83.0233, then northwestward to the eastern tip of the next mangrove island at 29.1650, -83.0251, then westward along the northern shoreline of the mangrove island and across the open water north of the #4 Bridge Fishing Pier to the #4 Bridge at 29.1653, -83.0275, then southwest to the small marsh island at 29.1642, -83.0293, then south-southwestward along the marsh shoreline and across the mouth of the unnamed bayou to 29.1604, -83.0308 on Hale Key, then southwestward to the unnamed marsh island at 29.1574, -83.0360, then southwestward to the next unnamed marsh island at 29.1559, -83.0405, then westward along the northern shoreline of the unnamed marsh islands to 29.1556, -83.0427, then west-northwestward to Rye Key at 29.1563, -83.0449, then westward and southward along the outside marsh islands that make up the southern shoreline of the #4 Channel to a pole at 29.1529, -83.0516, then southwestward to a marsh point at 29.1489, -83.0540, then southward along the marsh shoreline to 29.1467, -83.0540, then south-southwestward to a pole on the marsh point at 29.1436, -83.0552, then continuing south-southwestward to a pole on the marsh point west of Tyre Creek at 29.1388, -83.0583, then northwestward to the southern tip of the shell bars south of Rattlesnake Key at 29.1427, -83.0648, then northward along the western edge of the shell bars to a pole at 29.1489, -83.0654, then northward across the #4 Channel to the westernmost tip of Rattlesnake Key at 29.1554, -83.0677, then north-northwestward to the westernmost tip of McClamory Key at 29.1876, -83.0734, then north-northwestward to a marsh point west of Buck Island at 29.2172, -83.0874, then north and eastward along the outside marsh shoreline to the point of origin at the northwestern tip of Lone Cabbage Island.

Management: The area will be temporarily closed to harvesting when: 1) Two-day rainfall measured at the Cedar Key Forestry Tower exceeds 1.32 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted if relay activities are under way within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50

percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Cedar Key prohibited**

Classification Boundaries: The area includes all waters within the polygon beginning at the northernmost tip of Atsena Otie Key, then northeastward to Channel Marker #8, then continuing northeastward to the southern tip of Scale Key at 29.1426, -83.0186, the westward across the mouth of Steamboat Gap to a pole on the unnamed marsh island at 29.1423, -83.0212, then north northwestward following the watercourse on the southeast shoreline of Scale Key to a pole at 29.1478, -83.0237, then due north to the small mangrove island east of Haven's Island at 29.1583, -83.0241, then northward to a point on the next mangrove island at 29.1624, -83.0233, then northwestward to the eastern tip of the next mangrove island at 29.1650, -83.0251, then westward along the northern shoreline of the mangrove island and across the open water north of the #4 Bridge Fishing Pier to the #4 Bridge at 29.1653, -83.0275, then southwest to the small marsh island at 29.1642, -83.0293, then south southwestward along the marsh shoreline and across the mouth of the unnamed bayou to 29.1604, -83.0308 on Hale Key, then southwestward to the unnamed marsh island at 29.1574, -83.0360, then southwestward to the next unnamed marsh island at 29.1559, -83.0405, then westward along the northern shoreline of the unnamed marsh islands to 29.1556, -83.0427, then west northwestward to Rye Key at 29.1563, -83.0449, then westward and southward along the outside marsh islands that make up the southern shoreline of the #4 Channel to a pole at 29.1529, -83.0516, then southwestward to a marsh point at 29.1489, -83.0540, then southward along the marsh shoreline to 29.1467, -83.0540, then south southwestward to a pole on the marsh point at 29.1436, -83.0552, then continuing south southwestward to a pole on the marsh point west of Tyre Creek at 29.1388, -83.0583, then south southeastward to the westernmost point of the mangrove island west of the Cedar Key Airport, then southeastward to Piney Point, then eastward to the point of origin on the northernmost tip of Atsena Otie Key.

All waters east and north of the following line beginning at to the northwestern tip of Raleigh Islands at 29.2252, -83.0773, then south along the shoreline and across all creek mouths to the northwestern tip of Garden Island at 29.2170, -83.0730, then south along the western shoreline of Garden Island to the westernmost tip, then south to the northernmost tip of Hog Island at 29.2129, -83.0726, then continuing southward along the eastern shoreline of Hog Island to a pole on the shoreline at 29.2054, -83.0723, then south across the water to 29.2015, -83.0712, then southward and eastward along the marsh shoreline and across the mouths of Dennis and Seabreeze Creeks to a pole on the northern tip of Richard's Island at 29.1871, -83.0647, then southward along the western shoreline of the island to the southernmost tip, then across the mouth of Sand Creek and continuing south and eastward along the marsh shoreline to the mouth of Goose Creek, then continuing eastward along the marsh shoreline and across the mouths of all creeks to the #4 Bridge at 29.1665, -83.0271, then eastward to a small marsh island at 29.1665, -83.0258, then northeastward to the small marsh island at 29.1669, -83.0237, then eastward to the next marsh island at 29.1669, -83.0229, then southeastward to a marsh point at 29.1639, -83.0157, then southeastward to an unnamed marsh island at 29.1622, -83.0141 then eastward to a mangrove island at 29.1619, -83.0121, then southeastward along the marsh shoreline to 29.1593, -83.0102, then northward along the eastern shoreline of the marsh island north of Cedar Pt. to the easternmost tip at 29.1643, -83.0085, then northeastward to the westernmost tip of Live Oak Key at 29.1655, -83.0047, then along the southern and eastern shoreline of Live Oak Key to a pole at 29.1675, -82.9982, then east northeastward to a pole on an unnamed mangrove island at 29.1714 -82.9799, then due east to the next marsh point on an unnamed marsh island at 29.1710, -82.9751, then continuing east along the southern shoreline of the unnamed island to 29.1722, -82.9680, then across the mouth of a creek to the southern tip of the next marsh island at 29.1731, -82.9634, then eastward across the creek mouth to the next marsh point at 29.1733, -82.9611, then continuing eastward across the creek mouth to the next marsh point at 29.1732, -82.9590, then southeastward to the next marsh point at 29.1725 -82.9580, then southward along the marsh shoreline to 29.1716, -82.9582, then southward across the creek mouth to the next marsh island at 29.1705, -82.9581, then following the shoreline of the marsh island to the southeasternmost tip at 29.1704, -82.9546, then eastward across the mouth of the next creek to a marsh point at 29.1699, -82.9528, then southeastward to the next marsh point at 29.1688, -82.9508, then continuing southeastward to the next marsh point at 29.1681, -82.9489, then southeastward to the next marsh point at 29.1674, -82.9462, then east-northeastward across the mouth of the creek to 29.1683, -82.9417, then eastward and southward along the marsh shoreline to a pole at 29.1671, -82.9370.

The area also includes all ditches, creeks, man-made canals, and marinas located within this polygon, and all other waters not classified as approved or conditionally approved.

3202 Waccasassa Bay conditionally approved ---- Waccasassa Bay prohibited	Levy

**3202 Waccasassa Bay conditionally approved area**

Classification Boundaries: The area includes all waters within the polygon beginning at a pole on the marsh shoreline east of Porpoise Creek at 29.1671, -82.9370, then east-northeastward across the mouth of the unnamed creek to a small unnamed marsh island at 29.1679, -82.9342, then eastward along the outside marsh shoreline of the unnamed island to 29.1680, -82.9318, then northeastward across the mouth of an unnamed creek to the marsh shoreline at 29.1694, -82.9294, then eastward across the mouth of another small unnamed creek to the marsh shoreline at the mouth of Winzy Creek at 29.1694, -82.9285, then eastward along the southern shoreline of the unnamed island to its southeasternmost tip at 29.1687, -82.9266, then northeastward across the mouth of Winzy Creek to a point along the marsh shoreline at 29.1695, -82.9240, then continuing northeastward along the outside marsh shoreline to 29.169,7 -82.9220, then eastward across the mouth of King Creek to the outside marsh shoreline at 29.1699, -82.9192, then south and eastward along the outside marsh shoreline to 29.1688, -82.9183, then continuing eastward across the mouth of Jack's Creek to a marsh point located at 29.1684, -82.9141, then northeastward along the outside marsh shoreline to 29.1696, -82.9116, then east-southeastward across the mouth of Tripod Creek to the outside marsh shoreline at 29.1690, -82.9101, then southward and eastward along the outside marsh shoreline and across the mouths of all creeks to Tripod Point at 29.1644, -82.9045, then eastward and northward along the outside marsh shoreline to a small marsh island at 29.1663, -82.9021, then east-northeastward across the mouth of Griffin Creek to the marsh shoreline at 29.1678, -82.8974, then eastward and southward along the outside marsh shoreline to a point at the mouth of Tarpon Creek at 29.1661, -82.8953, then east-northeastward across the mouth of Tarpon Creek to the marsh shoreline at 29.1665, -82.8937, then southeastward to the outside marsh shoreline at 29.1654, -82.8919, then continuing southeastward along the outside marsh shoreline and across the mouths of all creeks to a point along the shoreline southwest of Kelly Creek at 29.1615, -82.8874, then northeastward along the outside marsh shoreline and across the mouths of all creeks and bayous to a marsh point in the mouth of Kelly Creek at 29.1632, -82.8850, then east-northeastward across the mouth of Kelly Creek to the marsh shoreline at 29.1633, -82.8827, then continuing eastward and southward along the outside marsh shoreline and across the mouths of all small creeks to Kelly Creek Point at 29.1596, -82.8757, then northeastward along the outside marsh shoreline to a point along the shoreline near the mouth of Deep Creek at 29.1617, -82.8733, then eastward across the mouth of Deep Creek to the outside marsh shoreline at 29.1611, -82.8678, then northeastward along the outside marsh shoreline and across the mouths of all small creeks to the mouth of Mud Creek at 29.1635, -82.8606, then east-southeastward across the mouths of Mud Creek and West Pass of Rocky Run to the southwest tip of the unnamed island at the mouth of Rocky Run at 29.1624, -82.8575, then east-northeastward along the southern shoreline of the unnamed island to the southeastern tip at 29.1640, -82.8505, then northeastward across the mouth of East Pass of Rocky Run to the outside marsh shoreline at 29.1646, -82.8480, then southeastward along the outside marsh shoreline and across the mouths of all creeks to a point along the shoreline east of Salt Island Creek at 29.1597, -82.8424, then eastward along the outside marsh shoreline and across the mouth of Salt Island Creek to the marsh shoreline at 29.1590, -82.8369, then southward and eastward along the outside marsh shoreline to Compass Point at 29.1551, -82.8336 then continuing southeastward in a straight line to channel marker #23 at 29.1422, -82.8272, then continuing southeastward to the unnamed mangrove shoreline at the northwest corner of Turtle Creek Bay at 29.1252, -82.8085, then southeastward along the marsh shoreline that makes up the northern shore of Turtle Creek Bay and across the mouths of the creeks to a point along the shoreline at 29.1160, -82.7989, then continuing southeastward to a small mangrove island in the middle of the bay at 29.1116, -82.7973, then southwestward to the northwestern tip of the large marsh island in the center of Turtle Creek Bay at 29.1100, -82.7988, then continuing southwestward to a point along the mangrove islands that make up the southern shoreline of Turtle Creek Bay at 29.1051, -82.8058, then westward along the northern shorelines of the chain of mangrove islands that make up the southern shore of Turtle Creek Bay and across the mouths of all creeks and bayous to a mangrove point on the southwestern tip of the bay at 29.1064, -82.8131, then southwestward to

the westernmost point of the next mangrove island at 29.1021, -82.8180, then continuing southwestward along the outside mangrove shoreline to Turtle Creek Point at 29.0988, -82.8230, then south- southeastward along the outside mangrove shoreline to the next mangrove point at 29.0945, -82.8208, then continuing south-southeastward across the mouth of Eleven Prong to South Mangrove Point at 29.0755, -82.8167, then due west to the intersection of the line with the eastern boundary line of area #30 Cedar Key at 29.0755, -82.9370, then due north along the boundary line to the point of origin at a pole along the shoreline east of Porpoise Creek at 29.1671 -82.9370.

Management: The area will be temporarily closed to shellfish harvesting when: 1) Waccasassa River stage measured at the US 19 bridge in Gulf Hammock exceeds 16.7 feet; 2) Seven-day rainfall measured at the Cedar Key Forestry Tower exceeds 9.1 inches; 3) Environmental data is not available; or 4) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Waccasassa Bay prohibited area**

Classification Boundaries: The area includes all waters north and east of the line beginning at a pole on the marsh shoreline east of Porpoise Creek at 29.1671, -82.9370, then east-northeastward across the mouth of the unnamed creek to a small unnamed marsh island at 29.1679, -82.9342, then eastward along the outside marsh shoreline of the unnamed island to 29.1680, -82.9318, then northeastward across the mouth of an unnamed creek to the marsh shoreline at 29.1694, -82.9294, then eastward across the mouth of another small unnamed creek to the marsh shoreline at the mouth of Winzy Creek at 29.1694, -82.9285, then eastward along the southern shoreline of the unnamed island to its southeasternmost tip at 29.1687, -82.9266, then northeastward across the mouth of Winzy Creek to a point along the marsh shoreline at 29.1695, -82.9240, then continuing northeastward along the outside marsh shoreline to 29.1697, -82.9220, then eastward across the mouth of King Creek to the outside marsh shoreline at 29.1699, -82.9192, then south and eastward along the outside marsh shoreline to 29.1688, -82.9183, then continuing eastward across the mouth of Jack's Creek to a marsh point located at 29.1684, -82.9141, then northeastward along the outside marsh shoreline to 29.1696, -82.9116, then east-southeastward across the mouth of Tripod Creek to the outside marsh shoreline at 29.1690, -82.9101, then southward and eastward along the outside marsh shoreline and across the mouths of all creeks to Tripod Point at 29.1644, -82.9045, then eastward and northward along the outside marsh shoreline to a small marsh island at 29.1663, -82.9021, then east-northeastward across the mouth of Griffin Creek to the marsh shoreline at 29.1678, -82.8974, then eastward and southward along the outside marsh shoreline to a point at the mouth of Tarpon Creek at 29.1661, -82.8953, then east-northeastward across the mouth of Tarpon Creek to the marsh shoreline at 29.1665, -82.8937, then southeastward to the outside marsh shoreline at 29.1654, -82.8919, then continuing southeastward along the outside marsh shoreline and across the mouths of all creeks to a point along the shoreline southwest of Kelly Creek at 29.1615, -82.8874, then northeastward along the outside marsh shoreline and across the mouths of all creeks and bayous to a marsh point in the mouth of Kelly Creek at 29.1632, -82.8850, then east-northeastward across the mouth of Kelly Creek to the marsh shoreline at 29.1633, -82.8827, then continuing eastward and southward along the outside marsh shoreline and across the mouths of all small creeks to Kelly Creek Point at 29.1596, -82.8757, then northeastward along the outside marsh shoreline to a point along the shoreline near the mouth of Deep Creek at 29.1617, -82.8733, then eastward across the mouth of Deep Creek to the outside marsh shoreline at 29.1611, -82.8678, then northeastward along the outside marsh shoreline and across the mouths of all small creeks to the mouth of Mud Creek at 29.1635, -82.8606, then east-southeastward across the mouths of Mud Creek and West Pass of Rocky Run to the southwest tip of the unnamed island at the mouth of Rocky Run at 29.1624, -82.8575, then east-northeastward along the southern shoreline of the unnamed island to the southeastern tip at 29.1640, -82.8505, then northeastward across the mouth of East Pass of Rocky Run to the outside marsh shoreline at 29.1646, -82.8480, then southeastward along the outside marsh shoreline and across the mouths of all creeks to a point along the shoreline east of Salt Island Creek at 29.1597, -82.8424, then eastward along the outside marsh shoreline and across the mouth of Salt Island Creek to the marsh shoreline at 29.1590, -82.8369, then southward and eastward along the outside marsh shoreline to Compass Point at 29.1551, -82.8336 then continuing southeastward in a straight line to channel marker #23 at 29.1422, -82.8272, then continuing southeastward to the unnamed mangrove shoreline at the northwest corner of Turtle Creek Bay at 29.1252, -82.8085, then southeastward along the marsh shoreline that makes up the northern shore of Turtle Creek Bay and across the mouths of the creeks to a point along the shoreline at 29.1160, -82.7989, then continuing southeastward to a small mangrove island in the middle of the bay at 29.1116, -82.7973, then southwestward to the northwestern tip of the large marsh island in the center of Turtle Creek Bay at 29.1100 -82.7988, then continuing southwestward to a point along the mangrove islands that make up the southern shoreline of Turtle Creek Bay at 29.1051, -82.8058, then westward along the northern shorelines of the chain of

mangrove islands that make up the southern shore of Turtle Creek Bay and across the mouths of all creeks and bayous to a mangrove point on the southwestern tip of the bay at 29.1064, -82.8131, then southwestward to the westernmost point of the next mangrove island at 29.1021, -82.8180, then continuing southwestward along the outside mangrove shoreline to Turtle Creek Point at 29.0988, -82.8230, then south-southeastward along the outside mangrove shoreline to the next mangrove point at 29.0945, -82.8208, then continuing south-southeastward across the mouth of Eleven Prong to South Mangrove Point at 29.0755, -82.8167.

The area includes the Waccasassa River and its tributaries north and east of Waccasassa River channel marker 23, all ditches, creeks, marinas and man-made canals, and all waters not previously described in the conditionally approved area.

**34 WITHLACOOCHEE BAY SHELLFISH HARVESTING AREA  
CLASSIFICATION BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
3402 Withlacoochee Bay conditionally approved ---- Withlacoochee Bay prohibited	Levy, Citrus

**3402 Withlacoochee Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at the westernmost tip of South Mangrove Point at 29.0754, -82.8171, then due eastward to a point on the marsh island at the northeastern most boundary of Lowe's bay at 29.0750, -82.7869, then continuing southward to the un-named island at 29.0714, -82.7869. Then continuing east southeastward to a point of land on the south shore of Lowe's Bay at 29.0686, -82.7804. Then continuing southward and southwestward along the shoreline to the point of land at 29.0635, -82.7828, that is the north bank of the mouth of Spring Run. Continuing southeastward across the mouth of Spring Run to the point of land at 29.0602, -82.7743, that is the south bank of Spring Run. Then continuing along the shoreline east and northeast to a point 29.0609, -82.7722, at the mouth of the west bank of Smith Creek, then southeast across the mouth of Smith Creek to a point at 29.0600, -82.7710, on the east bank of Smith Creek. Then continuing eastward along the shoreline to a point 29.0597, -82.7645, on the north bank of Thousand Mile Creek, then southeastward across the mouth of Thousand Mile Creek to a point at 29.0576, -82.7627, on the south bank. Then continuing along the shoreline to a point 29.0563, -82.7603, at the north bank of the mouth of Demory Creek, then southeastward across the mouth of Demory Creek to a point at 29.0545, -82.7586, on the south bank. Then continuing south along the shoreline to a point 29.0544, -82.7586, at the north bank of the mouth of Jones Creek, then southward across the mouth of Jones Creek to a point at 29.0524, -82.7579, on the south bank. Then continuing east and south along the shoreline to a point at 29.0488, -82.7539, on the north bank of the mouth of the un-named tidal creek (1), continuing south southeastward to a point at 29.0462, -82.7525, on the south bank of the mouth of the un-named tidal creek (1). Continuing southwestward across the mouth of the un-named tidal creek (2) to a point on the south shore at 29.0450, -82.7533. Then continuing southward along the shoreline to the southwestern most point of land at 29.0437, -82.7534, at the northern cut of Covas Creek, then continuing southwestward to the westernmost point on the island that makes up the north shore of the main flow of Covas Creek at 29.0422, -82.7552, continuing southward to the easternmost point of land on Covas Island at 29.0392, -82.7551, continuing southward to a pole on the small un-named marsh island on the southern shore of Covas Creek at 29.0370, -82.7553. Next, south southeastward across Hodges Island Road to a pole at 29.0343, -82.7554, on the north shoreline of Vassey Creek, continuing due south across the mouth of Vassey Creek to the easternmost point of Vassey Creek island at the southern mouth of Vassey Creek at 29.0311, -82.7539. Then south to the northern most tip of Jubb Island at 29.0296, -82.7539, continuing southward along the western shoreline of Jubb Island to the southernmost tip of Jubb Island and the northern shore of the mouth of Fuller Creek at 29.0269, -82.7539, then south southeastward to the westernmost tip of the un-named marsh island on the south shore at the mouth of Fuller Creek at 29.0252, -82.7533. Then south southwestward to the northernmost tip of the un-named marsh island at the north cut of Helverson Creek at 29.0234, -82.7539, then westward and southward along the shoreline of the un-named island to the westernmost tip of the adjoining un-named wooded island between Helverson and Kelly creeks at 29.0205, -82.7578, then southeast and eastward along the western and south shoreline of the un-named wooded island to a point on the eastern shore at 29.0202, -82.7565, then southeastward to a point of land on an un-named marsh island of the south shore of Kelly Creek at 29.0177, -82.7551. Then continuing west southwestward along the southern shoreline of the island that defines the south bank of Kelly Creek to the southernmost tip at 29.0170, -82.7576, then southwest to a pole on the western and northernmost point of an un-named island due west of the mouth of Bird Creek at 29.0125, -82.7627. Then continuing southwestward to a pole on the small un-named island at 29.0084, -82.7654, continuing southwestward to a pole on another small un-named island at 29.0056, -82.7671, continuing southwestward to another pole on another small un-named oyster bar island outside the Withlacoochee River channel near channel marker #38 at 29.0016, -82.7701. Then southwestward along the northern edge of the Withlacoochee River Channel to channel marker #24 at 28.9882, -82.7853, then

southeastward to Cross Florida Barge Canal channel marker #37 at 28.9821, -82.7767, then southwestward to Cross Florida Barge Canal channel marker number 20, then southward to the Duke Energy Corporation channel marker 20, then southwestward along the southern edge of the Duke Energy Corporation channel to the Duke Energy Corporation channel marker number 8, then due north to a point due west of South Mangrove Point, then due east to the point of origin at the westernmost tip of South Mangrove Point at 29.0754, -82.8171.

Management: The area will be temporarily closed to shellfish harvesting when: 1) Withlacoochee River discharge measured at the main gate of the Withlacoochee River dam at Inglis, Florida, exceeds 1,736 cubic feet per seconds; 2) Two-day cumulative rainfall recorded at Usher Forestry Tower, exceeds 2.03 inches; 3) Environmental data is not available; or 4) Emergencies occur as defined in Rule 5L-1-1.003, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Withlacoochee Bay prohibited**

Classification Boundaries: The area includes all waters north and east of the line beginning at the westernmost tip of South Mangrove Point at 29.0754, -82.8171, then due eastward to a point on the marsh island at the northeastern most boundary of Lowe's bay at 29.0750, -82.7869, then continuing southward to the un-named island at 29.0713, -82.7870 on the eastern portion of Lowe's Bay. Then continuing east southeastward to a point of land on the south shore of Lowe's Bay at 29.0688, -82.7805. Then all waters eastward of the mouth of Spring Run from the north shore of Spring Run at 29.0635, -82.7828 across the mouth to the south shore at 29.0602, -82.7743. Then east and northeast along the shoreline to a point on the west shore of Smith Creek at 29.0609, -82.7722 then all waters eastward from said waypoint on the west shore of Smith Creek across the creek to 29.0600, -82.7710 on the south bank of Smith Creek. Then eastward to a point at 29.0597, -82.7645 on the north bank of Thousand Mile Creek, then all waters north and eastward across the mouth of Thousand Mile Creek to a point at 29.0577, -82.7627 on the south bank. Then continuing southeastward to a point at 29.0561, -82.7600 at the north bank of the mouth of Demory Creek, then all waters north and eastward of Demory Creek across the mouth of Demory Creek to a point at 29.0547, -82.7586 on the south bank. Then continuing southward to a point at 29.054303, -82.758512 at the north bank of the mouth of Jones Creek, including all waters eastward of the line across the mouth of Jones Creek to a point at 29.0525, -82.7579 on the south bank. Continuing along the shoreline to a point on the north shore of un-named tidal creek (1) at 29.0489, -82.7539 including all waters eastward of the line across the mouth of un-named tidal creek (1) to a point at 29.0461, -82.7524 on the south bank of the mouth of the un-named tidal creek (1). Then southwestward including all waters east and southeastward from the south shore at the mouth of un-named tidal creek (1) southwestward to the south shore of the mouth of un-named tidal creek (2) at 29.0450, -82.7533. Then southward to the south westernmost point of land at 29.0437, -82.7534 at the northern cut of Covas Creek including all waters east and southeast of a line southwest to the westernmost point of land on an island between the northern cut of Covas Creek at 29.0422, -82.7553 then southward to the eastern shore of the island with a modern two-story metal framed house at 29.0392, -82.7551. Continuing southward to a pole on the small un-named marsh island on the southern shore of Covas Creek at 29.0370, -82.7553. Then south southeastward across Hodges Island Road to a pole at 29.0345, -82.7539 on the north shoreline of Vassey Creek including all waters east of the line continuing due south across the mouth of Vassey Creek to the easternmost point of Vassey Creek island in the southern mouth of Vassey Creek at 29.0311, -82.7540. Then south to the northern most tip of Jubb Island at 29.0296, -82.7539 including all waters east of said line. Continuing from the southernmost tip of Jubb Island at the north shore of Fuller Creek and continuing south southeastward across the mouth of Fuller Creek including all waters eastward of the line at the mouth of Fuller Creek to 29.0269, -82.7539 at the westernmost tip of the un-named marsh island. Then south southwestward to the northern most tip of the un-named marsh island at the north cut of Helverson Creek at 29.0234, -82.7539 including all waters eastward southward and westward behind the large un-named marsh island to the eastern point of the island between Helverson and Kelly creeks at 29.0201, -82.7566. Then southeastward to a point of land on an un-named marsh island of the south shore of Kelly Creek at 29.0177, -82.7551 including all waters east of said line. Then continuing from the southernmost point of the un-named marsh island on the north shore at the mouth of McDonald Creek at 29.0160, -82.7546 then going southwestly, including all waters easterly of said line terminating at northernmost point of the un-named island at the southern mouth of McDonald Creek at 29.0150, -82.7555. Then from the southernmost point of the previous un-named island at the north shore of Bird Creek at 29.0127, -82.7566 continue westerly to the northeastern most tip of the island outside of the mouth of Bird Creek at 29.0127, -82.7574 including all waters south and east of the mouth of Bird Creek. Then from the western most tip of the

island outside of the mouth of Bird Creek at 29.0125, -82.7590 continuing southwestward to a pole on the small un-named island at 29.0084, -82.7654 including all waters easterly and southerly of said line. Then continuing southwestward to a pole on another small un-named island at 29.0056, -82.7671 continuing southwestward to another pole on another small un-named oyster bar island outside the Withlacoochee River channel near channel marker #38 at 29.0016, -82.7701 including all waters south and easterly of said line. Then southwestward along the northern edge of the Withlacoochee River Channel to channel marker #24 at 28.9822, -82.7767, then southeastward to Cross Florida Barge Canal channel marker #37 at 28.9882, -82.7848, then east northeastward along the southern edge of the Cross Florida Barge Canal channel into and including all waters of the Cross Florida Barge Canal. Including all waters east of channel marker #37 of the Cross Florida Barge Canal channel and all waters of the Withlacoochee River east of channel marker #24 not previously described in the conditionally approved areas including all creeks south of McDonald Creek and north of the Cross Florida Barge Canal; Withlacoochee River; Cross Florida Barge Canal; man-made ditches, canals and marinas.

**37 CITRUS COUNTY SHELLFISH HARVESTING AREA CLASSIFICATION BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	County(s)
Spring/Fall (Month of March-June, October) 3701 Citrus County Approved Citrus County Prohibited	Citrus
Winter (November-February) 3702 Citrus County Conditionally Approved Citrus County Prohibited	Citrus

**3701 Citrus County Approved Spring/Fall (Months of October, March, April, May, June)**

Classification Boundaries: The Approved area includes all waters within the following polygon: beginning at a point at 28.952832, -82.719203 on the southern shoreline of the Duke Energy intake canal berm north of Negro point, due south to 28.948379, -82.719203 on the westernmost tip of Negro Island, then southeastward to 28.936159, 82.710151 at Black Point, then southwestward across open water to Crystal River Channel marker 18 at 28.924905, -82.717648, then southeastward across open water to 2 8.909793, -82.698369 on the southernmost tip of an unnamed island west of Fort Island Beach, then southeastward to 28.905405, -82.687773 on the southernmost tip of Fort Island, then eastward along the southern shoreline of Ft. Island and across the mouth of a small unnamed creek to the next marsh point at 28.905394, -82.686043, then southeastward to 28.901052, -82.674596 on the northernmost tip of an unnamed island west of Camp Island, then southeastward along the northern shoreline to 28.897655, -82.669819 at the easternmost tip, then southeastward to 28.896399, -82.667771 at the westernmost tip of Camp Island, then north and eastward along the southern shoreline of Camp Island to 28.896211, -82.662169 on the southeastern shoreline, then southward across the water to 28.894178, -82.661509 on the westernmost tip of the unnamed marsh island southeast of Camp Island, then eastward and southeastward along the southern shoreline of the unnamed marsh island southeast of Camp Island to 28.892133, -82.654327 at the southeastern corner, then eastward across the water to 28.892322, -82.652886 on the westernmost tip of the next unnamed marsh island, then southeastward along the western shoreline of the unnamed island to 28.886938, -82.647579 at a marsh point on the southwestern corner, then south-southeastward across the water to 28.886284, -82.645063 on the northwestern corner of the next unnamed island, then continuing southeastward along the southern shoreline of the unnamed island to 28.880501, -82.638486 at the southeastern corner of the island, then southward across the water to 28.879205, -82.639197 on the large unnamed island on the western shoreline of Dixie Bay north of The Narrows, then northwestward along the northern shoreline of the large unnamed island to 28.888371, -82.656147 on its northernmost tip, then southwestward along the northern shoreline of the unnamed island South of Spice Key to 28.886697, -82.658745 on the northwestern corner, then southwestward to 28.876658, -82.676028 on the northernmost tip of the unnamed marsh island northeast of Chair Island, then due west to 28.876170, -82.681302 on the northernmost tip of the unnamed marsh island north of Bear Island, then southwestward along the western shoreline of the unnamed marsh island to 28.874723 -82.682234 on its westernmost tip, then southwest to 28.871555, -82.684792 at the northernmost tip of Bear Island, then westward to 28.873001, -82.703956 on the easternmost tip of the unnamed marsh island at Shark Point, then northward and westward along the eastern shoreline of the unnamed island to 28.875704, -82.712119 at Shark Point, then west southwestward to 28.868787, -82.725538 at Mangrove Point, then south southwestward to 28.853575, -82.733188 at Long Point, then south southwestward to 28.836158, -82.735933 at Green Point, then south southwestward to 28.823888, -82.741081 on the western shoreline of Rock Island, then due west to the Submerged Lands Act Boundary (SLAB), then northward following the SLAB to the intersection of the SLAB and the Cross Florida Barge Canal Channel marker 28, then east-northeastward along the southern edge of the Duke Energy Channel intake canal to 28.946390, -82.752227 at Short Point, then continuing east-northeastward to 28.952832, -82.719203 at the point of origin on the southern shoreline of the Duke Energy intake canal berm north of Negro point.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any six-day period measured at the Crystal River Forestry Tower exceeds 14.45 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Citrus County Spring/Fall Prohibited area**

Classification Boundaries: The prohibited area includes all waters within the following polygons:

Polygon 1: Beginning at a point at 28.952832, -82.719203 on the southern shoreline of the Duke Energy intake canal berm north of Negro point, due south to 28.948379, -82.719203 on the westernmost tip of Negro Island, then southeastward to 28.936159, 82.710151 at Black Point northwest of the mouth of the Crystal River, then northward in a counterclockwise direction along the mainland shoreline to the shoreline of the southern Duke Energy intake canal berm, then westward 28.952832, -82.719203 at the point of origin on the southern shoreline of the Duke Energy intake canal berm north of Negro point.

Polygon 2: Beginning at 28.875704° -82.712119° at Shark Point, then west southwestward to 28.868787, -82.725538 at Mangrove Point, then south southwestward to 28.853575, -82.733188 at Long Point, then south southwestward to 28.836158, -82.735933 at Green Point, then south southwestward to 28.823888, -82.741081 on the western shoreline of Rock Island, then due east through all waters and islands to the mainland, then north along the mainland shoreline, following counter-clockwise along the shorelines of the Salt River and the Crystal River (including all creeks, canals and embayments) to 28.936159, 82.710151 at Black Point, then southwestward across open water to Crystal River Channel marker 18 at 28.924905, -82.717648, then southeastward across open water to 28.909793, -82.698369 on the southernmost tip of an unnamed island west of Fort Island Beach, then southeastward to 28.905405, -82.687773 on the southernmost tip of Fort Island, then eastward along the southern shoreline of Ft. Island and across the mouth of a small unnamed creek to the next marsh point at 28.905394, -82.686043, then southeastward to 28.901052, -82.674596 on the northernmost tip of an unnamed island west of Camp Island, then southeastward along the northern shoreline to 28.897655, -82.669819 at the easternmost tip, then southeastward to 28.896399, -82.667771 at the westernmost tip of Camp Island, then north and eastward along the southern shoreline of Camp Island to 28.896211, -82.662169 on the southeastern shoreline, then southward across the water to 28.894178, -82.661509 on the westernmost tip of the unnamed marsh island southeast of Camp Island, then northeastward and southeastward along the southern shoreline of the unnamed marsh island southeast of Camp Island to 28.892133, -82.654327 at the southeastern corner, then eastward across the water to 28.892322, -82.652886 on the westernmost tip of the next unnamed marsh island, then southeastward along the western shoreline of the unnamed island to 28.886938, -82.647579 at a marsh point on the southwestern corner, then south-southeastward across the water to 28.886284, -82.645063 on the northwestern corner of the next unnamed island, then continuing southeastward along the southern shoreline of the unnamed island to 28.880501, -82.638486 at the southeastern corner of the island, then southward across the water to 28.879205, -82.639197 on the large unnamed island on the western shoreline of Dixie Bay north of The Narrows, then northwestward along the northern shoreline of the large unnamed island to 28.888371, -82.656147 on its northernmost tip, then southwestward along the northern shoreline of the unnamed island South of Spice Key to 28.886697, -82.658745 on the northwestern corner, then southwestward to 28.876658, -82.676028 on the northernmost tip of the unnamed marsh island east of Chair Island, then due west to 28.876170, -82.681302 on the northernmost tip of the unnamed marsh island north of Bear Island, then southwestward along the western shoreline of the unnamed marsh island to 28.874723, -82.682234 on its westernmost tip, then southwest to 28.871555, -82.684792 at the northernmost tip of Bear Island, then westward to 28.873001, -82.703956 on the easternmost tip of the unnamed marsh island at Shark Point, then northward and westward along the eastern shoreline of the unnamed island to the point of origin at 28.875704, -82.712119 Shark Point.

The prohibited area also includes all creeks, ditches, man-made canals and marinas.

### **3702 Citrus County Conditionally Approved Winter (Months of November - February)**

Classification Boundaries: The Conditionally Approved area includes all waters within the following polygon: Beginning at a point at 28.952832, -82.719203 on the southern shoreline of the Duke Energy intake canal berm north of Negro point, due south to 28.948379, -82.719203 on the westernmost tip of Negro Island, then southwestward across open water to 28.920992, -82.734269 at Crystal River Channel marker 4, then southeastward across open water to

28.897685, -82.687893 on the northernmost tip of an unnamed island northeast of Sandy Hook, then eastward along the northern shoreline to 28.896887, -82.680103 on the easternmost tip, then northeastward across open water to 28.899615, -82.676289 on the westernmost tip of the unnamed island west of Camp Island, then northeastward and southeastward along the northern shoreline to 28.897655, -82.669819 at the easternmost tip, then southeastward to 28.896399, -82.667771 at the westernmost tip of Camp Island, then eastward along the southern shoreline of Camp Island to 28.896211, -82.662169 on the southeastern shoreline, then southward across the water to 28.894178, -82.661509 on the westernmost tip of the unnamed marsh island southeast of Camp Island, then southeastward to 28.888092, -82.662317 on the westernmost tip of Spice Key, then southeastward across the water to 28.886697, -82.658745 on the northwestern corner of the unnamed marsh island south of Spice Key, then southwestward to 28.876658, -82.676028 on the northernmost tip of the unnamed marsh island northeast of Chair Island, then due west to 28.876170, -82.681302 on the northernmost tip of the unnamed marsh island north of Bear Island, then southwestward along the western shoreline of the unnamed marsh island to 28.874723, -82.682234 on its westernmost tip, then southwest to 28.871555, -82.684792 at the northernmost tip of Bear Island, then westward to 28.873001, -82.703956 on the easternmost tip of the unnamed marsh island at Shark Point, then northward and westward along the eastern shoreline of the unnamed island to 28.875704, -82.712119 at Shark Point, then west southwestward to 28.868787, -82.725538, at Mangrove Point, then south southwestward to 28.853575, -82.733188 at Long Point, then south southwestward to 28.836158, -82.735933 at Green Point, then south southwestward to 28.823888, -82.741081 on the western shoreline of Rock Island, then due west to the Submerged Lands Act Boundary (SLAB), then northward following the SLAB to the intersection of the SLAB and the Cross Florida Barge Canal Channel marker 28, then east-northeastward along the southern edge of the Duke Energy Channel intake canal to 28.946390, -82.752227 at Short Point, then continuing east-northeastward to 28.952832, -82.719203 at the point of origin on the southern shoreline of the Duke Energy intake canal berm north of Negro point.

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any three-day period measured at the Homosassa Springs State Park exceeds 1.43 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Citrus County Prohibited**

Classification Boundaries: The prohibited area includes all waters within the following polygon: Beginning at a point at 28.952832, -82.719203 on the southern shoreline of the Duke Energy intake canal berm north of Negro point, due south to 28.948379, -82.719203 on the westernmost tip of Negro Island, then southwestward across open water to 28.920992, -82.734269 at Crystal River Channel marker 4, then southeastward across open water to 28.897685, -82.687893 on the northernmost tip of an unnamed island northeast of Sandy Hook, then eastward along the northern shoreline to 28.896887, -82.680103 on the easternmost tip, then northeastward across open water to 28.899615, -82.676289 on the westernmost tip of the unnamed island west of Camp Island, then northeastward and southeastward along the northern shoreline to 28.897655, -82.669819 at the easternmost tip, then southeastward to 28.896399, -82.667771 at the westernmost tip of Camp Island, then eastward along the southern shoreline of Camp Island to 28.896211, -82.662169 on the southeastern shoreline, then southward across the water to 28.894178, -82.661509 on the westernmost tip of the unnamed marsh island southeast of Camp Island, then southeastward to 28.888092, -82.662317 on the westernmost tip of Spice Key, then southeastward across the water to 28.886697, -82.658745 on the northwestern corner of the unnamed marsh island south of Spice Key, then southwestward to 28.876658, -82.676028 on the northernmost tip of the unnamed marsh island northeast of Chair Island, then due west to 28.876170, -82.681302 on the northernmost tip of the unnamed marsh island north of Bear Island, then southwestward along the western shoreline of the unnamed marsh island to 28.874723, -82.682234 on its westernmost tip, then southwest to 28.871555, -82.684792 at the northernmost tip of Bear Island, then westward to 28.873001, -82.703956 on the easternmost tip of the unnamed marsh island at Shark Point, then northward and westward along the eastern shoreline of the unnamed island to 28.875704, -82.712119 at Shark Point, then west southwestward to 28.868787, -82.725538 at Mangrove Point, then south southwestward to 28.853575 -82.733188, at Long Point, then south southwestward to 28.836158, -82.735933 at Green Point, then south southwestward to 28.823888, -82.741081 on the western shoreline of Rock Island, then due east through all waters and islands to the mainland, then northward along the mainland shoreline, following counter-clockwise along the shorelines of the Salt River and the Crystal River (including all creeks, canals and embayments) to 28.948379, -82.719203 on the westernmost tip of Negro Island, northwest of the mouth of the Crystal River, then northward to the

southern shoreline of the Duke Energy intake canal berm at 28.948379, -82.719203, the point of origin north of Negro point.

The ~~p~~rohibited ~~a~~Area also includes all creeks, ditches, man-made canals and marinas.

**42 BOCA CIEGA BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
4202 Boca Ciega Bay conditionally approved ----- Boca Ciega Bay prohibited	Pinellas, Hillsborough

**4202 Boca Ciega Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at ICWW marker 20 then eastward along the northern boundary of the ICWW to ICWW marker 8, then southward to channel marker 3A of Cut A, then southwestward along the northern boundary of Cut A and the Mullet Key Channel to channel marker 19, the northeastward to the southernmost point of Mullet Key, then northeastward along the southern shoreline of Mullet Key across the mouths of all creeks, ditches and man-made canals to its easternmost point, then westward and northward along the northern boundary of Mullet Key and the eastern shoreline of Bonne Fortune Key to the northernmost point of Bonne Fortune Key, then northward to the easternmost tip of Madelaine Key, then westward and southward along the western shoreline of all keys, across the mouths of all creeks, bayous, ditches, man-made canals, and coves to the northern shoreline of Mullet Key, then westward along the northern shoreline of Mullet Key to the northernmost point of Mullet Key on the eastern shoreline of Soldier Hole, then northward to the southernmost point of the unnamed island north of Soldier Hole, then northward along the eastern shoreline of the unnamed island to its northernmost point, then northward to the easternmost point on the Mullet Key shoreline on the western shoreline of Mullet Key Bayou, then westward along the northern shoreline of Mullet Key, across the mouths of all creeks, ditches, and man-made canals to its northernmost tip, then northward to the westernmost tip of Summer Resort Key, the northward along the western shoreline of Summer Resort Key to its northernmost point, then northeastward to the northernmost tip of Sawyer Key, then due east to the western shoreline of Cabbage Key, then counterclockwise along the shoreline, across the mouths of all creeks, ditches and man-made canals to the easternmost point of Cabbage Key north of Mule Key and south of Jackass Key, then northeastward to the westernmost tip of Jackass Key, then northeastward to the point of origin at ICWW marker 20.

Management: The conditionally approved area will be temporarily closed to harvesting when: 1) One- day rainfall measured at the City of St. Petersburg Southwest Wastewater Treatment Plant exceeds 3.01 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Boca Ciega Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons: Polygon 1: Beginning at ICWW marker 20 then eastward along the northern boundary of the ICWW to ICWW marker 8, then due north to the southern shoreline of the Pinellas Peninsula, then westward along the southern shoreline of the Pinellas Peninsula to the Pinellas Bayway, then westward along the Pinellas Bayway and the southern shoreline of its islands to the western shoreline of Long Key, then southward along the eastern shoreline of Long Key to its southernmost point, then southward to the northernmost tip of Summer Resort Key, then northeastward to the northernmost tip of Sawyer Key, then due east to the western shoreline of Cabbage Key, then clockwise along the shoreline of Cabbage Key to the easternmost point of Cabbage Key north of Mule Key and south of Jackass Key, then northeastward to the westernmost tip of Jackass Key, then northeastward to the point of origin at ICWW marker 20.

Polygon 2: Beginning at the easternmost point of Madelaine Key, then counterclockwise along the eastern shoreline of Madelaine Key and all keys to the northernmost point of Bonne Fortune Key, then northwestward to the point of origin at the easternmost point of Madelaine Key.

Polygon 3: Beginning at the northernmost point of Mullet Key on the eastern shoreline of Soldier Hole, the northward to the southernmost point of the unnamed island north of Soldier Hole, then northward along the eastern shoreline of the unnamed island to its northernmost point, then northward to the easternmost point on the Mullet Key shoreline on the western shoreline of Mullet Key Bayou, then counterclockwise along the shoreline of Mullet Key to the point of origin at the northernmost point of Mullet Key on the eastern shoreline of Soldier Hole.

The prohibited area also includes the unnamed bayous on the shoreline of St. Christopher Key, all creeks, man-made canals, marinas and ditches.

**48 LOWER TAMPA BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
4802 Lower Tampa Bay conditionally approved ----- Lower Tampa Bay prohibited	Manatee, Hillsborough

**4802 Lower Tampa Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at ICWW marker 63 (27.530067, -82.703283), then northeastward to Mullet Key Channel marker 25 (27.613574, -82.675650), then northeastward along the northern boundary of Mullet Key Channel and Cut A to channel marker 3A (27.627521, -82.641843), then northeastward to Port Manatee Channel marker 5 (27.657102, -82.595686), then southeastward to the northernmost tip of land on the largest unnamed spoil island west of Port Manatee (27.637492, -82.575113), then counterclockwise along the shoreline of the island to its southernmost tip (27.631121, -82.570573), then southeastward to the northernmost tip of land on the northern ~~southern~~ shoreline in the mouth of Little Redfish Creek (27.62207, -82.56413), then southward across the mouth of Little Redfish creek to a point on the southern shoreline in the mouth of Little Redfish Creek (27.62181, -82.56449), then southward, along the mainland shoreline across the mouth of all creeks, ditches and man-made canals to the southernmost tip of Harbor Key (27.608520, -82.570289), then southwestward across the mouth of Bishop Harbor to the northernmost tip of land on Mariposa Key (27.607452, -82.571362), then southward along the western shoreline, across the mouths of all creeks, ditches and man-made canals to Fletcher Point (27.577240, -82.605970), then eastward to the southeast tip of Fletcher Point (27.575, -82.602), then southwestward across Miguel Bay to the northernmost tip of Rattlesnake Key (27.571009, -82.611740), then southwestward along the western shoreline of Rattlesnake Key, across the mouths of all creeks, ditches and man-made canals to the southeastern tip of Rattlesnake Key (27.548269, -82.630619), then northeastward to the western point of Bird Key (27.552439, -82.602594), then southwestward across Terra Ceia Bay to the tip of Gus Point (27.544232, -82.606121), then westward to a point in the mouth of Terra Ceia Bay (27.544569, -82.632449), then southwestward then southeastward along the western shoreline of Rattlesnake Key, across the mouths of all creeks, ditches and man-made canals to its southernmost tip, then southwestward across the mouth of Terra Ceia Bay to Emerson Point on Snead Island (27.532038, -82.646809), then southwestward across the mouth of the Manatee River to the northernmost tip of land on the mainland shoreline west of Desoto Point (27.522520, -82.664465), then westward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to Mead Point (27.514216, -82.681822), then southwestward across the mouth of Perico Bayou to the northernmost tip of Perico Island (27.512926, -82.683075), then northwestward to the point of origin at ICWW marker 63 (27.530067, -82.703283).

Management: The area will be temporarily closed to harvesting when: 1) Six-day cumulative rainfall measured by NOAA exceeds 5.71 inches ~~Three-day cumulative rainfall measured at the City of Palmetto Wastewater Treatment Plant exceeds 4.22 inches;~~ 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Lower Tampa Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at Port Manatee Channel Marker 5 (27.657102, -82.595686), then southeastward through channel marker 7 (27.651133, -82.587517) and 9 (27.64383, -82.57692) to the southwesternmost tip of land on the northern shoreline in the mouth of Port Manatee (27.635183, -82.563320), then clockwise along the shoreline across the mouths of all creeks, ditches and man-made canals to the northernmost tip of land on the southern shoreline in the mouth of Little Redfish Creek (27.62181, -82.56449), then northwestward to the southernmost tip of the largest

unnamed spoil island west of Port Manatee (27.631121, -82.570573), then northward along the western shoreline to its northernmost tip (27.637492, -82.575113), then northwestward to the point of origin at Port Manatee Channel marker 5 (27.657067, -82.595650). Beginning at the southernmost tip of Harbor Key, then southwestward across the mouth of Bishop Harbor to the northernmost tip of land on Mariposa Key, then counterclockwise along the shoreline of Bishop Harbor across the mouths of all creeks and canals to the point of origin at the southernmost tip of Harbor Key.

Polygon 2: Beginning at the southernmost tip of Harbor Key (27.608520, -82.570289), then southwestward across the mouth of Bishop Harbor to the northernmost tip of land on Mariposa Key (27.60731, -82.57125), then counterclockwise along the shoreline of Bishop Harbor across the mouths of all creeks, ditches and man-made canals to the point of origin at the southernmost tip of Harbor Key (27.608520, -82.570289). Beginning at southeastern tip of Fletcher Point (27.575, -82.602), then southwestward across Miguel Bay to the northernmost tip of Rattlesnake Key (27.571009, -82.611740), then counterclockwise along the shoreline of Miguel Bay, across the mouths of all creeks and canals to the point of origin at Fletcher Point (27.575, -82.602).

Polygon 3: Beginning at southeastern tip of Fletcher Point (27.575, -82.602), then southwestward across Miguel Bay to the northernmost tip of Rattlesnake Key (27.571009, -82.611740), then counterclockwise along the shoreline of Miguel Bay, across the mouths of all creeks, ditches and man-made canals to the point of origin at Fletcher Point (27.575, -82.602). Beginning at Port Manatee Channel marker 5, then southeastward through channel marker 7 and 9 to the southwesternmost tip of land on the northern shoreline in the mouth of Port Manatee, then southward along the shoreline to the northernmost tip of land on the southern shoreline in the mouth of Little Redfish Creek, then northwestward to the southernmost tip of the largest unnamed spoil island west of Port Manatee, then northward along the western shoreline to its northernmost tip, then northwestward to the point of origin at Port Manatee Channel marker 5.

Polygon 4: Beginning at the southernmost tip of Rattlesnake Key, (27.548269, -82.630619), [including all creeks north of the conditionally approved boundary], then northeastward across the mouths of all creeks, ditches and man-made canals to the western tip point of Bird Key (27.552439, -82.602594), then southwestward across Terra Ceia Bay to the tip of Gus Point (27.544232, -82.606121), then westward to a point in the mouth of Terra Ceia Bay at 27.544569, -82.632449, then southwestward to a point on the western tip of Snead Island at 27.53318 -82.64614, then counterclockwise along the shoreline of Terra Ceia Bay, across the mouths of all creeks, ditches and man-made canals, to the point of origin at the southernmost tip of Rattlesnake Key (27.548269, -82.630619). then southwestward across the mouth of Terra Ceia Bay to Emerson Point on Snead Island, then southwestward across the mouth of the Manatee River to the northernmost tip of land on the mainland shoreline west of Desoto Point, then eastward along the southern shoreline of the Manatee River to the State Road Business 41 bridge, then northward along the bridge to the mainland shoreline, then westward along the northern shoreline of the Manatee River, to the cut between the mainland and Snead Island, then northeast along the eastern shoreline of the cut to Terra Ceia Bay, then counterclockwise along the shoreline of Terra Ceia Bay and its tributaries to the point of origin at the southernmost tip of Rattlesnake Key.

Polygon 5: Beginning at Emerson Point on Snead Island (27.53191 -82.64659), the westward to Manatee River channel marker 4 (27.532840, -82.666312), then due south to the northernmost tip of land on the mainland shoreline west of Desoto Point (27.52250 -82.66541), then eastward along the southern shoreline of the Manatee River to the State Road Business 41 bridge (27.49936 -82.57134), then northward along the bridge to a point on the mainland shoreline at 27.51173 -82.57363, then westward along the northern shoreline of the Manatee River to the point of origin at Emerson Point on Snead Island (27.53191 -82.64659).

Polygon 6: Beginning at Mead Point (27.514216, -82.681822), then southwestward across the mouth of Perico Bayou to the northernmost tip of Perico Island (27.512926, -82.683075), then northwestward to ICWW 63 (27.530067, -82.703283), then southwestward to the most western tip of Anna Maria Island (27.522992, -82.707858), then southwestward along the shoreline, across the mouths of all creeks, ditches and man-made canals to a point on the eastern shoreline of Anna Maria Island at 27.47269 -82.69920, then eastward to the westernmost point on Cortez Island (27.47389 -82.69223), then counterclockwise along the shorelines of Palma Sola Bay and Perico Bayou, across the mouths of all creeks, ditches and man-made canals, to the point of origin at Mead Point (27.514216, -82.681822). then southward along the western shoreline of Perico Bayou to the County Road 64 bridge, then eastward along the bridge to the mainland shoreline, then northward along the eastern shoreline of Perico Bayou to the point of origin at Mead Point.

The prohibited area also includes the Terra Ceia River and all creeks, ditches, man-made canals, and marinas.

**54 SARASOTA BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
5402 Sarasota Bay conditionally approved ----- Sarasota Bay prohibited	Sarasota, Manatee

**5402 Sarasota Bay conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at beginning at ICWW marker 15 in Sarasota Bay, then south to Quick Point marker 2, then northwest following the red markers of the channel to marker 18, then northwest to the privately maintained channel marker 2 at the entrance to the Bay Isles canals, then northwest to the eastern tip of Bishop's Point, then along the shoreline of Longboat Key, across the mouths of all creeks, ditches and man-made canals to the tip of the spit of land enclosing Buttonwood Harbor, then northwest to the privately maintained Buttonwood Harbor channel marker 10, thence northwesterly to the privately maintained marker 12A, then north to the eastern tip of the unnamed island southeast of White Key, then along the eastern shoreline of unnamed island to its northeasternmost tip, then northwest to the southeastern tip of White Key, then along the eastern shoreline of White Key to its northeasternmost tip, then north to ICWW marker 26, then northwest along the ICWW to marker 28, then north to the eastern tip of the Sister Keys, then northwest along the northeastern shoreline of Sister Keys to ICWW marker 39, then northwest to the southern tip of Jewfish Key, then north along the eastern shoreline of Jewfish Key to its northeasternmost tip, then southeast to Long Bar Point, then southeast to ICWW marker 17, then southeast to ICWW marker 15, the point of origin.

Management: The area will be temporarily closed to harvesting when: 1) One-day rainfall measured by NOAA at the City of Sarasota Wastewater Treatment Plant exceeds 0.971-11 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Sarasota Bay prohibited**

Classification Boundaries: The area includes all waters within Sarasota and Roberts Bays south of the State Road 684 Bridge and north of Phillippi Creek which are not included in the conditionally approved polygon. The prohibited area also includes Phillippi Creek, Hudson Bayou, Whitaker Bayou, Bowles Creek, ditches, man-made canals and marinas.

**56 LEMON BAY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
5602 Lemon Bay conditionally approved ----- Lemon Bay prohibited	Sarasota, Charlotte

**5602 Lemon Bay conditionally approved**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at ICWW channel marker 36 (26.986050, -82.392833), then southward along the eastern boundary of the ICWW to ICWW channel marker 24 (26.940042, -82.357033), then due west to the eastern shoreline of Manasota Key (26.940042, -82.367330), then northward along the eastern shoreline of Manasota Key, across the mouths of all creeks, ditches and man-made canals, to a point due west of ICWW channel marker 36 (26.986050, -82.397593), then due east to the point of origin at ICWW channel marker 36 (26.986050, -82.392833).

Polygon 2: Beginning at ICWW channel marker 22 (26.930583, -82.350067), then southward along the eastern boundary of the ICWW to ICWW channel marker 18 (26.9093, -82.3339), then south to the southeasternmost tip of the unnamed island east of Whidden Key (26.900933, -82.332134), then east to ICWW channel marker 17 (26.9014, -82.328367), then southward along the eastern boundary of the ICWW to ICWW channel marker 10 (26.883683, -82.321333), then westward to the southeasternmost point of Thornton Key (26.884168, -82.323487), then northwestward along the eastern shoreline of Thornton Key which becomes Knight Island across the mouths of all creeks, ditches and man-made canals to the northwesternmost tip of Knight Island (26.892755, -82.340086) then northwestward to the south westernmost point of Manasota Key (26.896745, -82.341895), then northward along the eastern shoreline of Manasota Key across the mouths of all creeks, ditches and man-made canals to a point due west of the "No Wake" sign at the mouth of Ski Alley and west of Peterson Island (26.910988, -82.351801), then eastward to the "No Wake" sign (26.911012, -82.351136), then eastward to the western shoreline of Peterson Island across the mouths of all creeks, ditches and man-made canals, then northwestward along the western shoreline of Peterson Island across the mouths of all creeks, ditches and man-made canals to its northernmost point (26.913468, -82.350803), then northward to the point of origin at ICWW marker 22(26.930583, -82.350067).

Polygon 3: Beginning at ICWW channel marker 4 (26.853317, -82.301967), then southward along the eastern boundary of the ICWW to ICWW channel marker 30A (26.844933, -82.290233), then southward to the northeastern most point of the spoil island due south of Coon Key (26.841421, -82.289636), then southeastward to Private marker 7 (26.82447, -82.27240), then southwestward along the eastern edge of the CR 771 bridge and its causeway islands to the intersection of the CR 771 bridge and the northern shoreline of Cole Island (26.815456, -82.273904), then southwestward along the eastern shoreline of Cole Island to the intersection of the 771 bridge and the southern shoreline of Cole Island (26.808804, -82.276203), then southwestward along the eastern edge of the CR 771 bridge to the intersection with the eastern shoreline of Gasparilla Island (26.808222, -82.276399), then northward along the eastern shoreline of Gasparilla Island across the mouths of all creeks, ditches and man-made canals to its northernmost point (26.811014,

-82.280406), then northward to the southernmost point of Little Gasparilla Island (26.814911, -82.281344), then northward along the eastern shoreline of Little Gasparilla Island, which becomes Don Pedro Island, across the mouths of all creeks, ditches, marinas and man-made canals, to a point due west of the ICWW channel marker 4 (26.853317, -82.304156), then due east to the point of origin at ICWW channel marker 4 (26.853317, -82.301967).

Management: The ~~conditionally approved~~ area will be ~~temporarily~~ closed to shellfish harvesting when: 1) ~~Two-day c~~Cumulative rainfall measured by for 5602 harvest area through NOAA exceeds 2.33 inches during any 2-day period; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

## **Lemon Bay prohibited**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: The area includes all waters within a polygon beginning at the intersection of the southern edge of the SR 774 bridge and the mainland shoreline (27.012204, -82.408939), then southward along the mainland shoreline, including all creeks, ditches, marinas and man-made canals, to the "Hideaway Ferry dock"( 26.837822, -82.274137), then southeastward along the mainland shoreline to the intersection of the northeastern edge of the SR 771 bridge (26.827655, -82.269874), than southward along the shoreline to private channel marker 7 (26.824470, -82.272400), then northwestward to the northeastern most point of the spoil island due south of Coon Key (26.841421, -82.289636), then northward to ICWW channel marker 30A (26.844933, -82.290233), then northward along the eastern boundary of the ICWW to ICWW channel marker 4 (26.853317, -82.301967), then due west to the eastern shoreline of Don Pedro Island (26.853317, -82.304156), then northward along the eastern shoreline of Don Pedro Island, which becomes Knight Island, including all creeks, ditches, marinas and man-made canals, to the southeasternmost point of Thornton Key (26.884168, -82.323487), then eastward to ICWW channel marker 10 (26.883683, -82.321333), then northward along the eastern boundary of the ICWW to ICWW channel marker 17 (26.9014, -82.328367), then to the southeasternmost tip of the unnamed island east of Whidden Key (26.900933, -82.332134), then northwestward to ICWW channel marker 18 (26.9093, -82.3339). than along the eastern boundary of the ICWW to ICWW channel marker 22 (26.930583, -82.350067), then southward to the northernmost point of Peterson Island (26.913468, -82.350803), then southwest along the shoreline of Peterson Island to a point due east of the "No Wake" sign at the northern entrance of Ski Alley (26.911018, -82.351062), then due west to the "No Wake" sign (26.911012, -82.351136), then due west to the eastern shoreline of Manasota Key (26.911012, -82.352477, then northward along the eastern shoreline of Manasota Key, including all creeks, ditches, marinas and man-made canals, to a point due west of ICWW channel marker 24 (26.940042, -82.367330), then due east to ICWW channel marker 24 (26.940042, -82.357033), then northward along the eastern boundary of the ICWW to ICWW channel marker 36 (26.986050, -82.392833), then due west to the eastern shoreline of Manasota Key (26.986050, -82.397602), then northward along the eastern shoreline of Manasota Key, including all creeks, ditches, marinas and man-made canals, to the intersection with the southern edge of the SR 774 bridge (27.011447, -82.410260), then eastward along the southern edge of the SR 774 bridge to the point of origin at the intersection with the mainland shoreline (27.012204, -82.408939).

**58 GASPARILLA SOUND SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
5802 Gasparilla Sound conditionally approved ---- Gasparilla Sound prohibited	Charlotte, Lee

**5802 Gasparilla Sound conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at Catfish Point (26.81884, -82.25404), then due east across the mouth of Catfish Creek to the eastern shoreline of Catfish Creek (26.818688, -82.245066), then eastward along the mainland shoreline, across the mouth of Boggess Hole Creek, and all ditches and man-made canals, then eastward to the easternmost tip of Mound Key (26.809241, -82.215233), then due east across the mouth of Whidden Creek to the eastern shoreline of Whidden Creek (26.809151, -82.211922), then eastward along the mainland shoreline across the mouths of all ditches, man-made canals and tidal creeks to the southernmost tip of Cash Mound (26.805407, -82.180125), then clockwise along the shoreline of Turtle Bay across the mouths of all creeks, ditches and man-made canals to the southwestern most point of land on the Cape Haze Peninsula (26.781244, -82.166145), then southward to Charlotte Harbor channel marker 4 (26.738667, -82.167267), then due south to the northern shoreline of Bokeelia Island (26.706022, -82.167267), then westward along the shoreline to a point due east of channel marker 8 (26.704333, -82.174436), then due west to channel marker 8 (26.704333, -82.184333), then westward to ICWW channel marker 75 (26.704933, -82.243083), then due west to the eastern shoreline of Cayo Costa (26.704933, -82.246210), then northwestward along the eastern shoreline of Cayo Costa to its northernmost tip (26.707525, -82.250512), then northwestward across the Boca Grande Channel to the southernmost tip of Gasparilla Island (26.71717, -82.26062), then northward along the eastern shoreline of Gasparilla Island, across the mouths of all creeks, ditches and man-made canals to a point due west of ICWW channel marker 1 (26.739750, -82.256025), then due east to ICWW channel marker 1 (26.739750, -82.249267), then northward along the western boundary of the ICWW to ICWW channel marker 9 (26.775817, -82.244467), then due west to the eastern shoreline of Gasparilla Island (26.775817, -82.265066), then northward along the eastern shoreline of Gasparilla Island, across the mouths of all creeks, ditches and man-made canals to the northeastern point of land on the northern shoreline of Peekins Ranch Cove (26.797131, -82.272613), then northeastward to a no name point (26.799083, -82.265787) then northwestward to the northeast corner of the southernmost span of the abandoned railroad trestle (26.813431, -82.271578), then northwestward to the intersection of the State Road 771 bridge and the northern shoreline of Cole Island (26.815422, -82.273736), then northeastward along the eastern edge of the bridge to its causeway island (26.824051, -82.27083) then southeastward to the point of origin at Catfish Point (26.81884, -82.25404).

Management: The area will be temporarily closed to harvesting when: 1) Cumulative three-day rainfall measured at Gasparilla Island Water Treatment Plant exceeds 6.97 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Gasparilla Sound Prohibited Area**

Classification Boundaries: The area includes all waters within the following polygons.

Polygon 1: Beginning at the northeastern point on Boca Grande Causeway (26.824051, -82.270853), then southeastward to Catfish Point (26.81884, -82.25404), then counterclockwise along the shorelines of Coral Creek, East Branch, West Branch and along the bridge to the point of origin at the northeastern point on Boca Grande Causeway (26.824051, -82.270853).

Polygon 2: Beginning at the intersection of the eastern edge of the State Road 771 bridge and the eastern

shoreline of Gasparilla Island, then northeastward along the eastern edge of the bridge to the intersection with the southern shoreline of Cole Island, then northeastward along the eastern shoreline of Cole Island to the intersection of its northern shoreline and the State Road 771 bridge (26.815422, -82.273736), then southeastward to the northeast corner of the southernmost span of the abandoned railroad trestle (26.813431, -82.271578), then southeastward to a no name point (26.799083, -82.265787) then southwestward to the north eastern point of land on the northern shoreline of Peekins Ranch cove (26.797131, -82.272613), then northwestward along the eastern shoreline of Gasparilla Island to the point of origin at the intersection of the eastern edge of the State Road 771 bridge and the eastern shoreline of Gasparilla Island.

Polygon 3: Beginning at ICWW channel marker 7, then southward along the western boundary of the ICWW to ICWW channel marker 1, then due west to the eastern shoreline of Gasparilla Island, then northward along the eastern shoreline of Gasparilla Island to a point due west of ICWW marker 7, then due east to the point of origin at ICWW channel marker 7.

Polygon 4: Beginning at the northernmost tip of Cayo Pelau, then eastward to the westernmost point of the first unnamed mangrove island, then southeastward along the western shoreline of this unnamed island to its southernmost tip, then southeastward to the westernmost tip of the first unnamed mangrove island to the south, then eastward along its southern shoreline to its easternmost tip, then southeastward to the northernmost tip of Bull Key, then southwestward along the northern shoreline of Bull Key to its westernmost tip, then southwestward to the easternmost tip of the unnamed mangrove island between Bull Key and Cayo Pelau, then southwestward to the eastern tip of Cayo Pelau, then northwestward along the eastern shoreline of Cayo Pelau to the point of origin at the northernmost tip of Cayo Pelau.

The ~~p~~Prohibited area also includes Catfish Creek, Boggess Hole Creek, Whidden Creek, Sister Ponds Creeks, tidal creeks, ditches, man-made canals, and marinas.

**60 MYAKKA RIVER SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
6002 Myakka River conditionally approved ----- Myakka River prohibited	Charlotte, Sarasota

**6002 Myakka Conditionally Approved**

Classification Boundaries: The area includes all waters within a polygon beginning at the southernmost tip of Mangrove Point on Hog Island (26.923955, -82.141930), then northeastward along the eastern shoreline of Hog Island to Locust Point(26.929616, -82.135124), then northeastward across the mouth of the Myakka Cutoff to the southernmost point of the northern shoreline at the southern mouth of the Myakka Cutoff(26.933555, -82.133629), then northwestward along the northern shoreline of the Myakka Cutoff and eastern shoreline of Myakka River, across the mouths of all creeks, ditches and man-made canals, to the westernmost point of land on the southern shoreline at the mouth of Deerfly Bay (26.9531,-82.1808), then southwestward across Myakka River through GDC Cove Channel Marker 1 (26.9456,-82.1944), then southward to the most northern point on the eastern shoreline of the mouth of GDC Cove (26.9433, -82.1953), then southeastward along the western shoreline of Myakka River, across the mouths of all coves, ditches, man-made canals and creeks, including Trout Creek, Blind Creek, and Big Muddy Creek, to the northern shoreline at the mouth of the unnamed creek south of Big Muddy Creek(26.889520, -82.169599), then northeastward across the mouth of the Myakka River to the point of origin at the southernmost tip of Mangrove Point on Hog Island(26.923955, -82.141930).

Management: The ~~conditionally approved~~ area will be temporarily closed to shellfish harvesting when: 1) River stage measured at the Myakka River State Park exceeds 15.51 feet; 2) ~~Six-day cumulative rainfall measured by for 6002 harvest area through NOAA exceeds 4.04 inches during any 6-day period;~~ 3) Environmental data is not available; or 4) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Myakka River Prohibited**

Classification Boundaries: The area includes all waters within a polygon beginning at the northeastern side of the State Road 776 Bridge, then eastward to Frizzel Canal channel, including all of Frizzel Canal, then due east along eastern shoreline of the Myakka River, then eastward along the eastern shoreline of Myakka River, across the mouths of all creeks, ditches and man-made canals to Ghost Point at the mouth of Tippecanoe Bay, then clockwise along the perimeter of Tippecanoe Bay, all creeks, ditches and all man-made canals, along the shoreline of Muddy Cove, to the westernmost point of the southern shoreline of Muddy Cove (26.968811, -82.18359), then southward along the eastern shoreline of the Myakka River, including Deerfly Bay, to the westernmost point of land (26.9531, -82.1808) on the southern shoreline at the mouth of Deerfly Bay, then southwestward across the Myakka River to Channel Marker 1 (26.9456,-82.1944), then southward to the most northern point on the eastern shoreline of the mouth of GDC Cove (26.9433, -82.1953), then northwestward including the GDC Cove, then northwestward along the western shoreline of the Myakka River, across the mouths of all coves, ditches, man-made canals and creeks, then clockwise along the southern edge of the US 41 bridge, and the eastern shoreline of the Myakka River, then to the point of origin northeastern side of the State Road 776 Bridge.

The area also includes Trout Creek, Blind Creek, Big Muddy Creek, Muddy Cove, Deerfly Bay, all tidal creeks, ditches, marinas and all man-made canals.

----- Pine Island Sound prohibited	

**6212 Pine Island Sound conditionally approved Section 1**

Classification Boundaries: The area includes all waters within a polygon beginning at channel marker 8 (26.704333, -82.184333), north-northwest of Pine Island, then due east to Bokeelia Island (26.704333, -82.174444), then southwestward along the northern shoreline of Bokeelia Island across the mouths of all creeks, ditches and man-made canals to the westernmost point of Bokeelia Island (26.699815, -82.179273), then southwestward to the northernmost point of the westernmost unnamed island between Bokeelia Island and Little Bokeelia Island (26.698974, -82.179875), then southwestward along the shoreline of the unnamed island to its westernmost point (26.697126, -82.180951), then southwestward to the northwesternmost point of Little Bokeelia Island (26.696985, -82.181800), then southward along the western shoreline of Little Bokeelia Island to its southernmost point (26.685110, -82.182352), then southeastward across the mouth of Little Bokeelia Bay to the westernmost point of Pine Island (26.681655, -82.181419), then southeastward to the easternmost point of Josslyn Island (26.629583, -82.149210), then southeastward to the westernmost tip of Anhinga Island (26.624133, -82.144101), then southwestward to the westernmost point of Panther Keys (26.610188, -82.146051), then southeastward to the northeast marker of Lease LE 110 (26.581548, -82.135126), then southeastward to the southeast marker of Lease LE 119 (26.57361, -82.132611), then southeastward to the northernmost point of Regla Island (26.541312, -82.122604), then southward along its western shoreline across the mouths of all creeks, ditches and man-made canals, to the southernmost point of Regla Island (26.530924, -82.118302), then southeastward to the westernmost point of Galt Island (26.515127, -82.109469), then southward to the northernmost point of York Island (26.491336, -82.105675), then southwestward across Pine Island Sound to Long Point on Sanibel Island (26.478375, -82.129530), then northwestward to northeasternmost point of the unnamed island northwest of Long Point (26.478524, -82.129921), then northwestward to the northeasternmost point of Sanibel Island (26.493025, -82.168213), then northwestward along the northern shoreline of Sanibel Island to its northernmost point (26.493761, -82.172154), across the mouths of all creeks, ditches and man-made canals, then northwestward to the easternmost point of Buck Key (26.497939, -82.175973), then northward along the eastern shoreline of Buck Key to its northernmost point (26.516444, -82.181733), across the mouths of all creeks, ditches and man-made canals, then northward to channel marker 5 east of Captiva Island (26.531767, -82.181617), then northeastward to channel marker 22 (26.546433, -82.175983), then northwestward to the southernmost tip of North Captiva Island (26.555244, -82.199401), then northwestward along the eastern shoreline of North Captiva Island across the mouths of all creeks to the northeastern point of Barrier Island Geopark peninsula (26.597571, -82.213709), then northeastward to an unnamed coordinate (26.599672, -82.212471), then northwestward to a northeastern point of North Captiva Island (26.602276, -82.215300), then to the northernmost point of North Captiva Island (26.607041, -82.219747), then northwestward across Captiva Pass to the southernmost point of Cayo Costa Island (26.613510, -82.222100), then northward along the eastern shoreline of Cayo Costa Island, across the mouths of all creeks, ditches and man-made canals to a point due west of ICWW marker 57 (26.647067, -82.231020), then due east to ICWW marker 57 (26.647067, -82.220167), then northeastward to the southernmost point of Useppa Island (26.653726, -82.213642), then northward along the eastern shoreline of Useppa Island to its northernmost point (26.668444, -82.210562), then northwestward to channel marker 4 (26.671733, -82.210633), then northwestward to the southernmost tip of Point Blanco Island (26.675790, -82.228008), then northwestward along the eastern shoreline of Point Blanco Island to its northernmost tip (26.692095, -82.240255), then northwestward across the mouth of Pelican Bay to the easternmost tip of Cayo Costa Island (26.695494, -82.242561), then northeastward along the eastern shoreline of Cayo Costa Island to a point due west of ICWW channel marker 75 (26.704933, -82.246209), then due east to ICWW channel marker 75 (26.704933, -82.243083), then eastward to the point of origin at channel marker 8 north-northwest of Pine Island (26.704333, -82.184333).

Management: The ~~area conditionally approved western section~~ will be temporarily closed to shellfish harvesting when: 1) ~~Two-day c~~Cumulative rainfall measured by ~~for 6212 harvest area through~~ NOAA exceeds 6.23 inches ~~during any 2 day period~~; 2) ~~E~~environmental data is not available; or 3) ~~E~~emergencies occur as defined by Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

### **6222/6232 Pine Island Sound conditionally approved Section 2 and Section 3**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1 Section 2; North Matlacha (6222): Beginning at the northern shoreline of Bokeelia Island (26.706022, -82.167267), then along the northern shoreline of Bokeelia Island to Jug Creek Point on the northern shoreline of Pine Island (26.699097, -82.124814), then southeastward along the eastern shoreline of Pine Island, across the mouths of all creeks, ditches and man-made canals to a point due west of Indian Key Island (26.665378, -82.105570), then due east to the northernmost point of Indian Key Island (26.665378, -82.104991), then southeastward to Matlacha Pass channel marker 62 (26.645750, -82.080550), then northeastward to the northernmost point of the unnamed island east of Matlacha Pass channel marker 62 (26.646127, -82.068163), then due east to the mainland shoreline (26.646127, -82.064578), then northward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to a point at the intersection of a line drawn on a bearing of 65 degrees true north from Jug Creek Point on the northern shoreline of Pine Island (26.717826, -82.080182), then westward to channel marker 89 (26.713650, -82.146600), then to the point of origin at the northern shoreline of Bokeelia Island (26.706022, -82.167267).

Polygon 2 Section 3; South Matlacha (6232): Beginning at Matlacha Pass channel marker 51 (26.618650, -82.062317), then due west to the eastern shoreline of an unnamed island east of Pine Island (26.618650, -82.067999), then due south along the eastern shoreline of the unnamed island to its southernmost tip (26.615502, -82.067003), then due west to the eastern shoreline of Little Pine Island (26.615502, -82.068588), then southward along the shoreline of Little Pine Island across the mouths of all creeks, ditches and man-made canals to a point due west of the northernmost point of the large unnamed island west of Matlacha Pass channel marker 36 (26.589805, -82.071625), then due east to northernmost point of this unnamed island (26.589805, -82.067790), then southward along the eastern shoreline of the unnamed island to its southernmost point (26.577868, -82.072325), then southeastward to Matlacha Pass channel marker 29 (26.562383, -82.069367), then southward along the eastern boundary of the Matlacha Pass channel to Matlacha Pass channel marker 23 (26.542300, -82.070550), then southwestward to the northernmost point of Rag Island (26.537279, -82.071540), then southward along the eastern shorelines of all the unnamed islands which make up the eastern boundary of St. James Creek to the southeasternmost point of Pine Island (26.493465, -82.057882), then northeastward to the westernmost point of Big Sister Key (26.494697, -82.055160), then northeastward to the northernmost tip of Merwin Key (26.508752, -82.045073), then northeastward to Sword Point (26.525361, -82.040479), then northward along the eastern shoreline of the unnamed islands west of Punta Blanca Bay to the northernmost point of the northernmost unnamed island (26.543089, -82.048811), then due north to the mainland shoreline (26.543215, -82.048811), across the mouths of all creeks, ditches and man-made canals, then northward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to a point due east of Matlacha Pass channel marker 51 (26.618650, -82.052736), then due west to the point of origin at Matlacha Pass channel marker 51 (26.618650, -82.062317).

Management: The ~~area conditionally approved eastern section~~ will be temporarily closed to shellfish harvesting when: 1) ~~Three-day c~~Cumulative rainfall measured by ~~for 6222/6232 harvest area through~~ NOAA exceeds 3.69 inches ~~during any 3 day period~~; 2) ~~E~~environmental data is not available; or 3) ~~E~~emergencies occur as defined by Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

### **Pine Island Sound prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the westernmost point of Bokeelia Island (26.699815, -82.179273), then southwestward (26.698974, -82.179875) to the northernmost point of the westernmost unnamed island between

Bokeelia Island and Little Bokeelia Island (26.697126, -82.180951), then southwestward along the shoreline of the unnamed island to its westernmost point, then southwestward to the northwesternmost point of Little Bokeelia Island (26.696985, -82.181800), then southward along the western shoreline of Little Bokeelia Island to its southernmost point (26.685110, -82.182352), then southeastward across the mouth of Little Bokeelia Bay to the westernmost point of Pine Island (26.681655, -82.181419), then northeastward along the northern shoreline of Pine Island, including all creeks, ditches and man-made canals to Jug Creek Point (26.699028, -82.124370), then westward across the eastern mouth of Jug Creek to the easternmost tip of Calusa Island, then westward along the northern shoreline of Calusa Island and Bokeelia Island to the point of origin at the westernmost point of Bokeelia Island (26.699815, -82.179273).

Polygon 2: Beginning at the westernmost point of Pine Island (26.681655, -82.181419), then southeastward to the easternmost point of Josslyn Island (26.629583, -82.149210), then southeastward to the westernmost tip of Anhinga Island (26.624133, -82.144101), then southwestward to the westernmost point of Panther Keys (26.610188, -82.146051), then southeastward to the northeast marker of Lease LE 110 (26.580033, -82.134633), then southeastward to the southeast marker of Lease LE 119 (26.573750, -82.132600), then southeastward to the northernmost point of Regla Island (26.541312, -82.122604), then southward along its western shoreline across the mouths of all creeks and canals, to the southernmost point of Regla Island (26.530924, -82.118302), then southeastward to the westernmost point of Galt Island (26.515127, -82.109469), then counterclockwise along the northern shoreline of Galt Island and the eastern shoreline of the Galt Island Causeway to the western shoreline of Pine Island, then northward along the western shoreline of Pine Island (26.518231, -82.101302), including all creeks, ditches, marinas and man-made canals to the point of origin at the westernmost point of Pine Island (26.681655, -82.181419).

Polygon 3: Beginning at the ICWW channel marker 57 (26.647067, -82.220167), then northeastward to the southernmost point of Useppa Island (26.653726, -82.213642), then northward along the eastern shoreline of Useppa Island (26.668444, -82.210562), including all creeks, ditches, marinas and man-made canals to its northernmost point, then northwestward to channel marker 4 (26.671733, -82.210633), then northwestward to the southernmost tip of Point Blanco Island (26.675790, -82.228008), then northwestward along the eastern shoreline of Point Blanco Island (26.692095, -82.240255), including all creeks, ditches, marinas and man-made canals, to its northernmost tip, then northwestward across the mouth of Pelican Bay to the easternmost tip of Cayo Costa Island (26.695494, -82.242561), then southwestward along the eastern shoreline of Cayo Costa, including all creeks, ditches, marinas and man-made canals to a point due west of ICWW channel marker (5726.647067, -82.231020), then due east to the point of origin at ICWW channel marker 57 (26.647067, -82.220167),.

Polygon 4: Beginning at the northernmost tip of Little Wood Key (26.634946, -82.178116), then westward to the ICWW channel marker 52 (26.628950, -82.207450), then southeastward along the eastern boundary of the ICWW to ICWW channel marker 50 (26.618667, -82.205467), then northeastward to the southern tip of Little Wood Key (26.628634, -82.178935, then northward along the western shoreline of Little Wood Key to the point of origin at the northernmost tip of Little Wood Key (26.634946, -82.178116).

Polygon 5: Beginning at a northeastern point of North Captiva Island (26.602276, -82.215300), then southeastward to an unnamed coordinate (26.599672, -82.212471), then to the northeastern point of Barrier Island Geopark peninsula (26.597571, -82.213709), then along the shoreline of Safety harbor to the point of origin at the northeastern point of North Captiva Island (26.602276, -82.215300).

Polygon 6: Beginning at the northernmost point of Sanibel Island (26.493761, -82.172154), then northwestward to the easternmost point of Buck Key (26.497939, -82.175973), then northward along the eastern shoreline of Buck Key to its northernmost point (26.516444, -82.181733), then northward to channel marker 5 east of Captiva Island (26.531767, -82.181617), then northeastward to channel marker 22 (26.546433, -82.175983), then northwestward to the southernmost tip of North Captiva Island (26.555244, -82.199401), then southward across Redfish Pass to the northernmost tip of Captiva Island (26.607041, -82.219747), then southward along the eastern shoreline of Captiva Island (26.482980, -82.182781) including all creeks, ditches, marinas and man-made canals to the bridge between Captiva and Sanibel Islands, then southeastward along the northern side of the bridge between Captiva and Sanibel Islands to the western shoreline of Sanibel Island (26.482751, -82.182196), then counterclockwise along the western shoreline of Sanibel Island to the point of origin at the northernmost point of Sanibel Island (26.493761, -82.172154).

Polygon 7: Beginning at the westernmost point of Galt Island (26.515127, -82.109469), then southward to the northernmost point of York Island (26.491336, -82.105675), then southwestward across Pine Island Sound to Long Point (26.478375, -82.129530) on Sanibel Island, then northwestward to northeasternmost point of the unnamed island northwest of Long Point (26.478524, -82.129921), then northwestward to the northeasternmost point of Sanibel Island (26.493025, -82.168213), then southeastward along the northern shoreline of Sanibel Island including all creeks, ditches, marinas and man-made canals to the intersection with the County Road 867 Bridge (26.454059, -82.036416),

then northeastward along the northern side of the bridge and causeway islands to the mainland shoreline (26.485600, -82.010843), then counterclockwise along the mainland shoreline including all creeks and canals to Iona Point (26.516588, -81.977123), then northward across the Caloosahatchee River to Piney Point (26.534363, -81.980354), then westward along the mainland shoreline including all creeks, ditches, marinas and man-made canals to the eastern shoreline of Punta Blanca Bay (26.543089, -82.048811), then northward along the eastern shoreline of Punta Blanca Bay including all creeks, ditches, marinas and man-made canals to a point due north of the northernmost point of the northernmost unnamed island west of Punta Blanca Bay, then due south to the northernmost point of the northernmost unnamed island west of Punta Blanca Bay, then southward along the eastern shorelines of the unnamed islands west of Punta Blanca Bay to Sword Point (26.525361, -82.040479), then southwestward to the northernmost tip of Merwin Key (26.508752, -82.045073), then southwestward to the westernmost point of Big Sister Key (26.494697, -82.055160), then southwestward to the southeasternmost tip of Pine Island (26.493465, -82.057882), then westward and northward along the shoreline of Pine Island including all creeks, ditches, marinas and man-made canals to the Galt Island Causeway (26.507907, -82.097006), then northwestward along the southern shoreline of the Galt Island Causeway to the point of origin at the westernmost point of Galt Island (26.515127, -82.109469).

Polygon 8: Beginning at the northernmost point of Indian Key Island (26.665378, -82.104991) then southeastward to Matlacha Pass channel marker 62 (26.645750, -82.080550), then northeastward to the northernmost point of the unnamed island east of Matlacha Pass channel marker 62 (26.646127, -82.068163) then due east to the mainland shoreline (26.646127, -82.064578), then southward along the mainland shoreline including all creeks and canals to a point due east of Matlacha Pass channel marker 51 (26.618650, -82.052750), then due west through Matlacha Pass channel marker 51 to the eastern shoreline of the unnamed island east of Little Pine Island (26.618650, -82.067999), then southward along the eastern shoreline of the unnamed island to its southernmost tip (26.615502, -82.067003), then due west to the eastern shoreline of Little Pine Island (26.615502, -82.068588), then southward along the eastern shoreline of Little Pine Island including all creeks, ditches, marinas and man-made canals to a point due west of the northernmost point of the large unnamed island west of Matlacha Pass channel marker 36 (26.589805, -82.071625), then eastward to the northernmost point of this unnamed island (26.589805, -82.067790), then southward along the eastern shoreline of the unnamed island to its southernmost point (26.577868, -82.072325), then southeastward to Matlacha Pass channel marker 29 (26.562383, -82.069367), then southward along the eastern boundary of the Matlacha Pass channel to Matlacha Pass channel marker 23 (26.542300, -82.070550), then southwestward to the northernmost point of Rag Island (26.537279, -82.071540), then southward along the eastern shorelines of the unnamed islands which make up the eastern boundary of St. James Creek to the southern shoreline of the southern entrance of St. James Creek (26.501827, -82.063197), then northwestward along the eastern shoreline of Pine Island including all creeks, ditches, marinas and man-made canals to a point due west of Indian Key Island (26.665378, -82.105570), then due east to the point of origin at the northernmost tip of Indian Key Island (26.665378, -82.104991).

The area also includes Pelican Bay, Murdock Bayou, Primo Bay, Chadwick Bayou, Braynerd Bayou, Wulfert Channel, Dinken Bayou, Clam Bayou, Old Blind Pass, Holloway Bayou, Kesson Bayou, Hardworking Bayou, Sanibel Bayou, Tarpon Bay, Punta Rasa Cove, Kinzie Cove, Glover Bight, Jewfish Creek, Punta Blanca Bay, Punta Blanca Creek, Oyster Creek, Underhill Creek, Pontoon Bay, Jug Creek, Tom Bay, Little Bokeelia Bay, Back Bay, Foster Bayou, Big Jim Creek, Rocky Creek, Upper 36 Bay, Lower 36 Bay, Forty Acre Bay, St. James Creek, Manatee Bay, Pine Island Creek, Mud Hole and Rock

**66 TEN THOUSAND ISLANDS SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
6602 Ten Thousand Islands conditionally approved ----- Ten Thousand Islands prohibited	Collier

**6602 Ten Thousand Islands conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at Cape Romano (25.845851, -81.679237), then northeast across Gullivan Bay to channel marker 2 (25.885139, -81.643406), then northeast to the southern tip of Coon Key (25.889053, -81.636403), then northeast across open water to the southwest tip of Tripod Key (28.896416, -81.631982), then northeast following the southeastern shoreline of Tripod Key along the Southwest Gate to the point of land located at the southwest corner of Palm Bay (25.933027, -81.617598), then east to the southeast corner of Palm Bay (25.933192, -81.616813), then east along the shoreline the west side of the mouth of Blackwater River (25.931872, -81.597941), then across the mouth to the east side Blackwater River (25.930362, -81.59697), then south following the shoreline to the west side of Gill Rattle Creek (25.923864, -81.59238), then across the mouth to the east side of Gill rattle Creek (25.923673, -81.591697), then east along the shoreline to the west side of Whitney River (25.918531, -81.58062), then crossing the mouth to the east side of Whitney River (25.918477, -81.5764), then south along the shoreline turning east and then south along the eastern shoreline of Fish Hawk Creek to its mouth, then generally northeast along the shoreline to the western side of the mouth of Pumpkin River (25.919512, -81.546268), then east across the mouth of Pumpkin River (25.91953, -81.545771), then south along the eastern shoreline of Pumpkin Bay to the southernmost point of land between Pumpkin and Little Wood Rivers (25.892214, -81.540284), then south east to unnamed point (25.886863, -81.536473), the east to unnamed point in the Faka union channel marker 19 (25.884283, -81.528935), then due east across open water and numerous unnamed islands to the southwestern most tip of land in Fakahatchee Bay (25.884019, -81.504743). Then due southwest 45 degrees across open water and numerous unnamed islands to the GPS point (25.832861 -81.520191) of the National Everglades boundary, then due south along National everglade boundary line to GPS point (25.818785 -81.520976), then due southeast to the GPS point (25.783763 -81.47439) then due southwest across open water to marker 1K (25.749636, -81.498414), then northwest across open water to the point of origin at Cape Romano (25.845851, -81.679237).

Management: The area will be temporarily closed to harvesting when: 1) Two-day cumulative rainfall measured by NOAA, exceeds 3.50 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003. F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**Ten Thousand Islands prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at channel marker 2 (25.885139, -81.643406), then northeast to the southern tip of Coon Key (25.889053, -81.636403), then northeast across open water to the southwest tip of Tripod Key (28.896416, -81.631982), then north to the west tip of Tripod Key (25.903046, -81.637846), then counter clockwise along the northeastern shoreline of Tripod Key, including Palm Bay and Goodland Bay, then south to the west tip of Tripod Key (25.903046, -81.637846), then southwest to channel marker 2 (25.885139, -81.643406), the point of origin.

Polygon 2: Beginning at the southernmost point of land between Pumpkin and Little Wood Rivers (25.892214, -81.540284), then south east to an unnamed point (25.886863, -81.536473), then east to an unnamed point in the Faka union channel marker 19 (25.884283, -81.528935), then due east across open water and numerous unnamed islands to the southwestern most tip of the Fakahatchee Bay (25.884019, -81.504743), then counterclockwise along the shoreline, including the Faka Union channel and Little Wood River to the southernmost point of

land between Pumpkin and Little Wood rivers (25.892214, -81.540284), the point of origin.

Polygon 3: Beginning at the westernmost tip of Fakahatchee Bay (25.884019, -81.504743), then clockwise around Fakahatchee Bay until the National Everglades Boundary line, then follows along the National Everglades Boundary line until unnamed point of the National Everglades Boundary line (25.832861, -81.520191), then north to the westernmost tip of Fakahatchee Bay (25.884019, -81.504743).

Prohibited waters include Blackwater River, Gill Rattle C~~ree~~ek, Whitney River, Fish Hawk C~~ree~~ek, Pumpkin River, Littlewood River, Faka Union Canal, Fakahatchee River and East River.

**70 INDIAN RIVER SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY
7001 Indian River/St. Lucie approved	Indian River, St. Lucie
7006 Indian River/St. Lucie restricted	
---- Indian River/St. Lucie prohibited	

**7001 Indian River/St. Lucie County approved**

Classification Boundaries: The area includes all waters within a polygon beginning at ICWW channel marker 173, then southeastward to the westernmost tip of Garfield Point, then northwestward to private channel marker 8, then northward to the westernmost tip of the unnamed marsh island north of Garfield Cut, then northward along the western shoreline of the unnamed marsh island to the next westernmost point of the unnamed marsh island, then 340° True across the mouth of Blue Hole Creek to the western shoreline of the barrier island south of Blue Hole Point, then northward along the western shoreline of the barrier island across the mouths of all creeks, ditches and man-made canals to the westernmost point of land which defines the northern shoreline of Big Starvation Cove, then northwestward to the southernmost tip of Round Island, then northward along the western shoreline of Round Island to its northernmost point, then southwestward to ICWW channel marker 168A, then due west to the mainland shoreline, then southward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals, including the mouth of the Harbor Branch peninsula, to a point due west of ICWW channel marker 173, then due east to the point of origin at ICWW channel marker 173.

Management: The area will be temporarily closed to harvesting when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**7006 Indian River/St. Lucie County restricted**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the intersection of the eastern shoreline of Jim Island and the North Beach Causeway, then northwestward to the southernmost tip of Mangrove Island, then northward along the western shoreline of Mangrove Island to its westernmost point, then northwestward to the southernmost tip of the unnamed island between Mangrove Island and Jack Island, then northward along the western shoreline of the unnamed island to its northwesternmost point, then northward across Snapper Cut to the westernmost tip of Jack Island, then northward along the western shoreline of Jack Island and the barrier island across the mouths of all creeks, ditches, man-made canals and inlets to the westernmost point of Garfield Point, then northwestward to ICWW channel marker 173, then southward along the eastern boundary of the ICWW channel to its intersection with the North Beach Causeway, then eastward along the North Beach Causeway to Jim Island, then eastward along the northern shoreline of Jim Island to the point of origin at the intersection of the eastern shoreline of Jim Island and the North Beach Causeway.

Polygon 2: Beginning at ICWW channel marker 168A, then eastward to the northernmost tip of Round Island, then due north across the mouth of Round Island Creek to the western shoreline of the barrier island, then northward along the western shoreline of the barrier island to the westernmost tip of land on the southern shoreline of Head Cove, then northwestward to private channel marker 8 west of Starvation Point, then northward to the westernmost tip of Porpoise Point, then due north across Little Starvation Cove to the western shoreline of the barrier island, then northward along the barrier island shoreline to the westernmost point of land that defines the southern entrance of Hell's Pocket, then northwestward across the mouth of Hell's Pocket to the southernmost tip of Prang Island, then northward along the western shoreline of Prang Island to its northernmost tip, then westward to ICWW channel marker 149, then southward along the eastern boundary of the ICWW channel to ICWW channel marker 155, then due west to the mainland shoreline, then southward along the mainland shoreline, across the mouths of all creeks,

ditches and man-made canals to a point due west of ICWW channel marker 168A, then due east to the point of origin at ICWW channel marker 168A.

Management: The area will be temporarily closed to harvesting when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted if relay activities are under way within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Indian River/St. Lucie County prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the intersection of the eastern shoreline of Jim Island and the North Beach Causeway, then northwestward to the southernmost tip of Mangrove Island, then northward along the western shoreline of Mangrove Island to its westernmost point, then northwestward to the southernmost tip of the unnamed island between Mangrove Island and Jack Island, then along the western shoreline of the unnamed island to its northwestmost point, then northward across Snapper Cut to the westernmost tip of Jack Island, then northward along the western shoreline of Jack Island across the mouths of Negro Cut and Old Inlet to the southwestern most point on the barrier island of the northern shoreline of Old Inlet, then eastward and southward along the barrier island shoreline, tracing the perimeter of all creeks, coves and canals to the easternmost tip of the north jetty of Ft. Pierce Inlet, then southwestward across the Ft. Pierce Inlet to the easternmost tip of the south jetty, then westward along the barrier island, tracing the perimeter of all creeks and canals to the intersection of the western shoreline of Causeway Island and Seaway Drive, then westward along the northern side of the Seaway Drive bridge to the mainland shoreline, then northward along the mainland shoreline to a point due west of ICWW marker 173, then due east to ICWW marker 173, then southward along the eastern boundary of the ICWW channel to its intersection with the North Beach Causeway, then eastward along the North Beach Causeway to the shoreline of Jim Island, then eastward along the northern shoreline of Jim Island to the point of origin at the intersection of the eastern shoreline of Jim Island and the North Beach Causeway.

Polygon 2: Beginning at the westernmost point of land of Garfield Point, then northwestward to private channel marker 8, then northward to the westernmost tip of the unnamed marsh island north of Garfield Cut, then northward along the western shoreline of the unnamed marsh island to the next westernmost point, then 340° True north across the mouth of Blue Hole Creek to the barrier island shoreline, then southward along the western shoreline of the barrier island tracing the perimeter of all creeks, canals and cuts to the point of origin at the westernmost tip of Garfield Point.

Polygon 3: Beginning at the northernmost tip of Round Island, then due north across the mouth of Round Island Creek to the western shoreline of the barrier island, then eastward and southward along the western shoreline of the barrier island to the westernmost point of land which defines the northern shoreline of Big Starvation Cove, then northwestward to the southernmost tip of Round Island, then northward along the western shoreline of Round Island to the point of origin at the northernmost tip of Round Island.

Polygon 4: Beginning at private channel marker 8 west of Starvation Point, then northward to the westernmost tip of Porpoise Point, then due north across Little Starvation Cove to the western shoreline of the barrier island, then southward along the western shoreline of the barrier island, tracing the perimeter of all creeks and canals to the westernmost tip of land on the southern shoreline of Head Cove, then northwestward to the point of origin at private channel marker 8 west of Starvation Point.

Polygon 5: Beginning at ICWW channel marker 155, then due west to the mainland shoreline, then northward along the mainland shoreline tracing the perimeter of all creeks and canals to the State Road 60 bridge, then northwestward along the southern side of the State Road 60 bridge to the western shoreline of the barrier island, then southward along the western shoreline of the barrier island tracing the perimeter of all creeks and canals to the westernmost point of land that defines the southern entrance of Hell's Pocket, then northwestward across the mouth of Hell's Pocket to the southernmost tip of Prang Island, then northward along the western shoreline of Prang Island to its northernmost tip, then westward to ICWW channel marker 149, then southward along the eastern boundary of the ICWW channel to the point of origin at ICWW channel marker 155.

The area also includes creeks, ditches, man-made canals, and marinas.

**72 NORTH INDIAN RIVER SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY
7202 North Indian River conditionally approved ---- North Indian River prohibited	Indian River

**7202 North Indian River conditionally approved**

Classification Boundaries: The area includes all waters within a polygon beginning at Intercostal Waterway (ICWW) channel marker 63 (27.846324, -80.473507) in the Indian River Lagoon near Sebastian Inlet, then southward along the eastern boundary of the ICWW to ICWW channel marker 71 (27.791798, -80.444196), then eastward to northwesternmost tip of Paul's Island (27.792246, -80.439857), then eastward along the northern shoreline of Paul's Island to its northeasternmost tip (27.792312 -80.438179), then due north to Spratt Point (27.802192, -80.438179), then northward along the western shoreline of the barrier island across the mouths of all creeks and canals to Coconut Point (27.848837, -80.456169), then westward to ICWW channel marker 63, the point of origin.

Management: The area will be temporarily closed to harvesting when: 1) Two-day cumulative rainfall measured by NOAA exceeds 2.54 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. ~~Florida Administrative Code~~. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**North Indian River prohibited**

Classification Boundaries: The area includes all waters within the following polygon:

Polygon : Beginning at ICWW channel marker 59 (27.860837, -80.481800), then due west of ICWW channel marker 59 (27.860836, -80.491938), then southward along the western mainland shoreline across all creeks, ditches, man-made canals, and marinas to a point on the northwestern edge of the Wabasso bridge/causeway (27.753744, -80.429694), then northeastward along the Wabasso bridge/causeway to the northeastern corner where the causeway meets the barrier island (27.762557, -80.414091), then north/northwestward along the barrier island shoreline to a point due north of the northeastern most tip of Paul's Island (27.802191, -80.438178), then due south the northeastern most tip of Paul's Island (27.792311, -80.438178), then westward along the northern shoreline of Paul's Island to the northwesternmost tip of Paul's Island (27.792245, -80.439856), then westward in a straight path to ICWW channel marker 71 (27.791797, -80.444196), then north along the eastern boundary of the ICWW to channel marker 63 (27.846264, -80.473486), then eastward to the western most tip of Coconut Point (27.848837, -80.456168), then northeastward along the northern shoreline of the southern Sebastian Inlet barrier island to the western intersection of the A1A bridge (27.859518, -80.448107), then north along the western side of the A1A bridge to the southern shoreline of the northern Sebastian Inlet barrier island (27.860781, -80.448769), then westward along the southern shoreline of the Northern barrier islands to a point due east of ICWW channel marker 59 (27.860836, -80.458269), then due west to the point of origin channel marker 59 ( 27.860837, -80.481800). The area also includes creeks, ditches, man-made canals, and marinas.

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at Intracoastal Waterway (ICWW) marker 71 (28.391289, -80.730949), then due west to a point on the mainland shoreline (28.391289, -80.741267), then north along the mainland shoreline across the mouths of all creeks and canals to the intersection of the mainland shoreline and the southern border of the 528 causeway (28.401144, -80.746043), then eastward along the southern border of the 528 causeway to a point on the western shoreline of Merritt Island that intersects with the southern border of the 528 causeway (28.404238, -80.719010), then south along the western shoreline of Merritt Island to a point due east of ICWW channel marker 71 (28.391289, -80.719548), then due west to the starting point at ICWW channel marker 71 (28.391289, -80.730949).

Polygon 2: Beginning at ICWW channel marker 85 (28.300514, -80.694065), then due east to a point on the western shoreline of Merritt Island (28.300514, -80.683238), then south along the western shoreline of Merritt Island across all canals, creeks, and lake entrances to the intersection of the western shoreline of Merritt Island and the northern border of the HWY 404 causeway (28.207987, -80.641186), the westward along the northern border of the 404 causeway to the northwestern corner of the causeway island that lies east of the ICWW (28.207167, -80.646885), then south along the western side of the causeway 404 island that lies east of the ICWW to the southwest corner of the 404 causeway island that lies east of the ICWW (28.206502, -80.646755), then eastward along the southern border of the 404 causeway to the intersection of the western shoreline of Merritt Island and the southern border of the 404 causeway (28.207234, -80.641029), then southward along the western shoreline of Merritt Island across all creeks, canals, and lake entrances until a point on the western shoreline of Merritt Island that lies true 70° NE of ICWW channel marker 102 (28.156960, -80.612458), then true 250° SW in a straight line to ICWW channel marker 102 (28.152252, -80.626928), then due west to a point on the mainland shoreline (28.152252, -80.635951), then northward along the mainland shoreline across all ditches, canals, and creeks to a point on the mainland shoreline due west of ICWW channel marker 101 (28.162531, -80.641359), the due east to ICWW channel marker 101 (28.162531, -80.630036), then northward along the western side of the ICWW to ICWW channel marker 99 (28.180290, -80.638133), then due west to a point on the mainland shoreline (28.1802909, -80.649507), then northward along the mainland shoreline until reaching the intersection of the mainland shoreline and southern border of the 404 causeway (28.204853, -80.658416), then eastward along the southern border of the 404 causeway to the southeastern corner of the 404 causeway island that lies west of the ICWW (28.205558, -80.653492), the north to the northeastern corner of the 404 causeway island that lies west of the ICWW (28.206231, -80.653602), then eastward along the northern border of the 404 causeway to the intersection of the western border of the ICWW and the northern border of the 404 causeway (28.206647, -80.650447), then north along the western border of the ICWW to ICWW channel marker 95 (28.217542, -80.654271), then bearing 284° true, move in a straight line to the easternmost point of Plover Pt on the mainland shoreline (28.220198, -80.666171), then north along the mainland shoreline across all creeks and canals to a point on the mainland due west of ICWW channel marker 91 (28.2518595, -80.678399), then due east to ICWW channel marker 91 (28.251859, -80.671732), then north along the western border of the ICWW to ICWW channel marker 89 (28.271965, -80.681323), then due west to a point on the mainland shoreline that lies due west of ICWW channel marker 89 (28.271965, -80.688315), then north along the mainland shoreline to a point that lies due west of ICWW channel marker 85 (28.300514, -80.699846), then due east to the point of origin, ICWW channel marker 85 (28.300514, -80.694065).

Management: The area is administratively closed due to lack of resource and industry. If resource and public interest were to return the Division will gather sufficient sample size and reevaluate the management plan, however for the purposed of this survey the Division has provided the latest management plan: 1) Cumulative rainfall for any two-day period measured at the Rockledge Waste Water Treatment Plant in Rockledge exceeds 0.44 inches; 2)

Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Florida Administrative Code. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **Body D prohibited**

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at the intersection of the mainland shoreline and the southern border of the 528 causeway (28.401144, -80.746043), then eastward along the southern border of the 528 causeway to a point on the western shoreline of Merritt Island that intersects with the southern border of the 528 causeway (28.404238, -80.719010), then south along the western shoreline of Merritt Island to a point on the western shoreline of Merritt Island that intersects with the northern border of the 520 causeway (28.356844, -80.709320), then south under the 520 causeway to a point on the western shoreline of Merritt Island that intersects with the southern border of the 520 causeway (28.356441, -80.709288), the south along the western shoreline of Merritt Island across all ditches, creeks, and canals to a point on the western shoreline of Merritt Island that is due east of ICWW channel marker 85 (28.300514, -80.683238), then due west to ICWW channel marker 85 (28.300514, -80.694065), then due west to the a point on the mainland shoreline due west of ICWW channel marker 85 (28.300514, -80.699846), then north along the mainland shoreline across all ditches, canals, marinas, and creeks to a point on the mainland shoreline that intersects with the southern border of the 520 causeway (28.354854, -80.723726), then north, beneath the 520 causeway to a point on the mainland shoreline that intersects with the northern border of the 520 causeway (28.356610, -80.721702), then north along the mainland shoreline across all creeks, canals, marinas, and ditches to the beginning point on the mainland shoreline that intersects with the southern border of the 528 causeway (28.401144, -80.746043).

Polygon 2: Beginning at ICWW channel marker 91 (28.251859, -80.67173), then north along the western border of the ICWW to channel marker 89 (28.271965, -80.681323), the due west to a point on the mainland shoreline (28.271965, -80.688315), then south encompassing all canals, creeks, and marinas to a point due west of ICWW channel marker 91 (28.251859, -80.678399), then due east to the point of origin, ICWW channel marker 91 (28.251859, -80.67173).

Polygon 3: Beginning at ICWW channel marker 95 (28.217542, -80.654271), then south along the western border of the ICWW to the intersection of the western border of the ICWW and the northern border of the 404 causeway (28.206647, -80.650447), then west to the intersection of the mainland shoreline and the northern border of the 404 causeway (28.206231, -80.653602), then west and north along the mainland shoreline encompassing all creeks, canals, and marinas to the easternmost point of Plover Point, which bears 284° true from ICWW channel marker 95 (28.220198, -80.666171), then bearing 104° true, travel in a straight line to the point of origin, ICWW channel marker 95 (28.217542, -80.654271).

Polygon 4: Beginning at ICWW channel marker 102 (28.152252, -80.626928), travel NW at 70° true to a point on the western shoreline of Merritt Island (28.156960, -80.612458), then travel south along the western shoreline of Merritt Island to the southernmost point of Dragon Point (28.142138, -80.603720), then, bearing SW 154° true to the northwesternmost point of the Eau Gallie Yacht Club Marina breakwater (28.139071, -80.60199), the south along the breakwater to the intersection of the western shoreline of the barrier island the northern border of HWY 518 Eau Gallie causeway (28.137862, -80.601502), then SW along the northern border of the 518 causeway to the intersection of the mainland shoreline and the northern border of the 518 causeway (28.131575, -80.621849), then west and north along the mainland shoreline encompassing all creeks, canals, and marinas to a point on the mainland shoreline that lies due west of ICWW channel marker 102 (28.152252, -80.635951), then east to the point of origin, ICWW channel marker 102 (28.152252, -80.626928).

**BODY C WINTER (MONTHS OF DECEMBER – FEBRUARY)**

**7732 Body C conditionally approved Winter (Months of December – February)**

Classification Boundaries: The area includes all waters in a polygon beginning at Intracoastal Waterway (ICWW) marker 52, then westward to the easternmost tip of the northern jetty of the Reliant Energy Indian River Power Plant, then northwestward to the northern end of the northernmost concrete and steel seawall on the mainland shoreline northwestward of the ICWW marker 48, then northward along the mainland shoreline across the mouths of creeks, ditches and man-made canals to the western State Road 405 Causeway, then eastward along the southern shoreline of the causeway to the intersection of the northern side of the northern State Road 405 Bridge, then eastward along the northern side of the northern bridge to the eastern State Road 405 Causeway, then eastward along the southern shoreline of the causeway to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of a straight line drawn northeastward from the northernmost pole of the eighth set of northern overhead powerline pole west of Merritt Island through the northernmost pole of the third set of poles west of Merritt Island, then southwestward to the northernmost pole of the third set of northern overhead powerline poles west of the Merritt Island shoreline, then along the northern poles of the northern overhead powerline to the northern pole of the eight set of poles west of Merritt Island, then northwestward to the point of origin at ICWW marker 52.

Management: The area will be temporarily closed to harvesting when: 1) One-day rainfall, measured at the Reliant Energy Indian River Power Plant in Port St. John, Florida, exceeds 0.68 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**7716 Body C conditionally restricted Winter (Months of December – February)**

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at ICWW marker 52, then southeastward to the northernmost pole of the eighth set of northern overhead power line poles west of Merritt Island, then northeastward along the northernmost poles of the powerline to the northernmost pole of the third set of poles west of Merritt Island, then eastward along the northernmost poles of the powerline to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection of a line drawn due east from ICWW marker 58 through a piling to the Merritt Island shoreline, then due west to the piling, then northwestward to ICWW marker 54, then northwestward to the easternmost tip of the southern jetty of the Reliant Energy Indian River Power Plant, then northward across the Power Plant channel to the easternmost tip of the northern jetty, then eastward to the point of origin at ICWW marker 52.

Polygon 2: Beginning at ICWW marker 64, then southeastward to a piling due east of ICWW marker 65, then northward to a piling south of the westernmost spoil island south of the Courtenay channel, then due east to

the western shoreline of Merritt Island, then southward along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection of the southern overhead powerline north of the State Road 528 Causeway, then southwestward to the intersection of the southern side of the southern State Road 528 Bridge and the eastern State Road 528 Causeway, then westward along the southern side of the southern State Road 528 Bridge and Causeway to the mainland shoreline, then northward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of a line drawn due west from ICWW marker 60 through a piling to the mainland shoreline, then due east to the piling, then southeastward to the point of origin at ICWW marker 64.

Management: The area will be temporarily closed to harvesting when: 1) One-day rainfall, measured at the Reliant Energy Indian River Power Plant in Port St. John, Florida, exceeds 0.73 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Body C prohibited Winter (Months of December – February)**

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at ICWW marker 54, then southeastward to a piling due east of ICWW marker 58, then due east to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline including all creeks, ditches and man-made canals to a point due east of a piling south of the westernmost spoil island south of the Courtenay channel, then due west to the piling, then southward to a piling due east of ICWW marker 65, then northwestward to ICWW marker 64, then northwestward to a piling due west of ICWW marker 60, then due west to the mainland shoreline, then northward along the mainland shoreline including all creeks, ditches and man-made canals to the northern end of the northernmost concrete and steel seawall on the mainland shoreline northwestward of ICWW marker 48, then southeastward to the easternmost tip of the northern jetty of the Reliant Energy Indian River Power Plant, then southward to the easternmost tip of the southernmost jetty, then southeastward to the point of origin at ICWW marker 54.

Polygon 2: Beginning at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island, then northeastward along a straight line drawn from the northernmost pole of the eighth set of northern overhead powerline poles west of Merritt Island, through the northernmost pole of the third set of poles west of Merritt Island to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline along all creeks, ditches and man-made canals to a point due east of the northernmost pole of the third set of northern overhead powerline poles of Merritt Island, then due west to the point origin at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island.

Polygon 3: Beginning at the intersection of the southern side of the southern State Road 528 Bridge and the eastern State Road 528 Causeway, then northeastward to the intersection of the southern overhead powerline north of the State Road 528 Causeway with the western shoreline of Merritt Island, then southward along the western shoreline of Merritt Island including all creeks, ditches and man-made canals to the mouth of the Canaveral Barge Canal, then eastward along the northern shoreline of the Canaveral Barge Canal to the State Road 3 bridge, then southward along the western side of the State Road 3 bridge to the southern shoreline of the Canaveral Barge Canal, then westward along the southern shoreline of the Canaveral Barge Canal and the northern shoreline of the eastern State Road 528 Causeway to the point of origin at the intersection of the southern side of the southern State Road 528 Bridge and the eastern State Road 528 Causeway.

The area also includes ditches, man-made canals, and marinas.

## **BODY C SPRING/SUMMER/FALL MARCH - NOVEMBER**

### **7712 Body C conditionally approved Zone 1 Spring/Summer/Fall (Months of March – November)**

Classification Boundaries: The area includes all waters within a polygon beginning at the intersection of the western State Road 405 Causeway and the northern side of the northern State Road 405 Bridge, then eastward along the northern side of the northern bridge to the eastern State Road 405 Causeway, then eastward along the southern shoreline of the causeway to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection of a straight line drawn northeastward from the northernmost pole of the eighth set of northern overhead powerline poles west of Merritt Island through the northernmost pole of the third set of poles west of Merritt Island, then southwestward to the northernmost pole of the third set of northern overhead powerline poles from Merritt Island, then southwestward along the northernmost poles of the northern overhead powerline to the northernmost poles of the third set of poles east of the mainland, then northward through two pilings to the easternmost tip of the southern jetty of the Reliant Energy Power Plant, then northward across the power plant channel to the easternmost tip of the northern jetty, then northwestward to the northern end of the northernmost concrete and steel seawall on the mainland shoreline northwestward of ICWW marker 48, then northward along the mainland shoreline across the mouths of all creeks, ditches and man-made canals to the western State Road 405 Causeway, then eastward along the southern shoreline of the causeway to the point of origin at the intersection of the western State Road 405 Causeway and the northern side of the northern State Road 405 Bridge.

Management: The area will be temporarily closed to harvesting when: 1) Four-day rainfall, measured at the Reliant Energy Indian River Power Plant in Port St. John, Florida, exceeds 5.15 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **7722 Body C conditionally approved Zone 2 Spring/Summer/Fall (Months of March – November)**

Classification Boundaries: The area includes all waters a polygon beginning at the intersection of the eastern State Road 528 Causeway and the southern side of the southern State Road 528 Bridge, then westward along the southern side of the southern State Road 528 Bridge to the State Road 528 Causeway island, then northward along the shoreline of the island to the northernmost tip, then northwestward to the northernmost pole of the fourth set of southern overhead powerline poles east of the mainland, then northward through a piling to the southwest corner marker of lease number 05-AQ-050, then northward to the northwest corner marker of lease 05-AQ-048, then northeastward to a piling due west of ICWW marker 60, then due north to the easternmost tip of the FP&L jetty, then northwestward to the northernmost pole of the third set of northern overhead powerline poles east of the mainland, then northeastward along the northernmost poles of the northern overhead powerline to the northernmost pole of the third set of poles west of Merritt Island, then southeastward to a piling due east of ICWW marker 58, then southward to a piling northwest of the westernmost Courtenay Channel spoil island, then southwestward to a piling northeastward of ICWW marker 62, then southward to a piling east of ICWW marker 62, then northeastward to a piling south of the westernmost Courtenay Channel spoil island, then southward to a piling due east of ICWW marker 65, then due east to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection with the southernmost overhead powerlines, then southwestward to the point of origin, the intersection of the southern side of the southern State Road 528 Bridge and the eastern State Road 528 Causeway.

Management: The area will be temporarily closed to harvesting when: 1) Four-day rainfall, measured at the Reliant Energy Indian River Power Plant in Port St. John, Florida, exceeds 4.81 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **7726 Body C conditionally restricted Spring/Summer/Fall (Months of March – November)**

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island, then eastward along the northernmost poles of the powerline to the western shoreline of Merritt Island, then southwest along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection of a line drawn due east from ICWW marker 58 through a piling to the Merritt Island shoreline, then due west to the piling, then northwestward to the point of origin at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island.

Polygon 2: Beginning at a piling due east of ICWW marker 65, then northward to a piling south of the westernmost spoil island south of the Courtenay channel, then due east to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline across the mouths of all creeks, ditches and man-made canals to the intersection of a line drawn due east from ICWW marker 65 through a piling to the Merritt Island shoreline, then due west to the point of origin at a piling due east of ICWW 65.

Polygon 3: Beginning at the northernmost tip of the western State Road 528 Causeway island, then northwestward to the northernmost pole of the fourth set of southern overhead powerline poles east of the mainland, then northward through a piling to the southwest corner marker of lease number 05-AQ-050, then northward to the northwest corner marker of lease number 05-AQ-048, then northeastward to a piling due west of ICWW marker 60, then northward to the easternmost tip of the FP&L jetty, then northwestward to the northernmost pole of the third set of northern overhead powerline poles east of the mainland, then northward through two pilings to the easternmost tip of the southern jetty of the Reliant Energy Indian River Power Plant, then northward across the Power Plant channel to the easternmost tip of the northern jetty, then northwestward to the northern end of the northernmost concrete and steel seawall on the mainland shoreline northwestward of ICWW marker 48, then southward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of the southern side of the southern State Road 528 Bridge, then eastward along the southern side of the State Road 528 Bridge to the State Road 528 Causeway island, then eastward along the northern shoreline of the island to the point of origin at the northernmost tip of the western State Road 528 Causeway island.

Management: The area will be temporarily closed to harvesting when: 1) Four-day rainfall, measured at the Reliant Energy Indian River Power Plant in Port St. John, Florida, exceeds 4.30 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Body C prohibited Spring/Summer/Fall (Months of March – November)**

Classification Boundaries: The area includes all waters in the following polygons:

Polygon 1: Beginning at the piling due east of ICWW marker 58, then southward to a piling northwest of the westernmost Courtenay Channel spoil island, then southwestward to a piling northeastward of ICWW marker 62, then southward to a piling east of ICWW marker 62, then northeastward to a piling south of the westernmost Courtenay Channel spoil island, then due east to the western shoreline of Merritt Island, then northward along the Merritt Island shoreline including all creeks, ditches and man-made canals to a point due east of ICWW marker 58, then due west to the point of origin at the piling due east of ICWW marker 58.

Polygon 2: Beginning at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island, then northeastward along a straight line drawn from the northernmost pole of the eighth set of northern overhead powerline poles west of Merritt Island through the northernmost pole of the third set of poles west of Merritt Island to the western shoreline of Merritt Island, then southward along the Merritt Island shoreline including all creeks, ditches and man-made canals to a point due east of the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island, then due west to the point of origin at the northernmost pole of the third set of northern overhead powerline poles west of Merritt Island.

Polygon 3: Beginning at the intersection of the southern side of the southern State Road 528 Bridge and eastern State Road 528 Causeway, then northeastward to the intersection of the southern overhead powerline north of the State Road 528 Causeway, then southward along the western shoreline of Merritt Island including all creeks and canals to the mouth of the Canaveral Barge Canal, then eastward along the northern shoreline of the Canaveral Barge Canal to the State Road 3 bridge, then southward along the western side of the State Road 3 bridge to the southern shoreline

of the Canaveral Barge Canal, then westward along the southern shoreline of the Canaveral Barge Canal and northern shoreline of the eastern State Road 528 Causeway to the point of origin at the intersection of the southern side of the southern State Road 528 Bridge and eastern State Road 528 Causeway.

The area also includes ditches, man-made canals, and marinas.

**78 BODY B SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY
7812 Body B Conditionally approved ---- Body B Prohibited	Brevard

**7812 Body B conditionally approved**

Classification Boundaries: The area includes all waters beginning at the ICWW channel marker 32 (28.60606, -80.794108), then northeastward to the southeasternmost point of the unnamed spoil island at 28.61784, -80.790713, then northeastward along the southeastern shoreline of the unnamed spoil island to the easternmost point at 28.61835, -80.790229, then northeastward to the intersection of the eastern causeway of the State Road 402 bridge and the western shoreline of Merritt Island at 28.62737, -80.788471, then southward along the western shoreline of Merritt Island, across the mouths of all creeks and canals, to the northern shoreline of the eastern causeway of the State Road 405 Bridge at 28.52748, -80.728994, then westward along the northern shoreline to the eastern side of the State Road 405 Bridge at 28.52744, -80.759065, then westward, along the northern side of the State Road 405 Bridge, to the northern shoreline of the western causeway of the State Road 405 Bridge at 28.52744, -80.759065, then westward along the northern shoreline to the eastern shoreline of the mainland, then northwestward along the mainland shoreline, across the mouths of all creeks and canals, to Addison Creek Point at 28.54512, -80.78769, then northeastward to ICWW channel marker 40 (28.55375, -80.773888), then northwestward to ICWW channel markers 38 (28.56888, -80.780506), then westward to the Manatee Zone sign west of ICWW channel marker 38 at 28.56735, -80.79119, then northward through all Manatee Zone signs (28.57693, -80.79180; 28.58633, -80.79362; 28.59353, -80.79689), to the Manatee Zone sign southwest of ICWW 32 at 28.60255, -80.798722, then northeastward to ICWW channel marker 32, the point of origin.

Management: The ~~area conditionally approved~~ will be temporarily closed to shellfish harvesting when: 1) ~~Three-day c~~umulative rainfall measured by ~~for 7812 harvest area through~~ NOAA exceeds 4.44 inches ~~during any 3-day period~~; 2) ~~E~~nvironmental data is not available; 3) ~~E~~mergencies occur as defined by Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

**Body B Prohibited**

Classification Boundaries: The area includes all waters within a polygon beginning at the ICWW channel marker 32 (28.60606, -80.794108), then northeastward to the southernmost point of the unnamed spoil island at 28.61765, -80.790397, the northeastward along the northwestern shoreline of the unnamed spoil island to the northeasternmost point at 28.61835, -80.790229, then northeastward to where the western shoreline of Merritt Island intersects with the southern shoreline of the eastern causeway of the State Road 402 Bridge at 28.62765, -80.787985, then southwestward along the southern shoreline to the State Road 402 Bridge, then southwestward, along the southern side of the State Road 402 Bridge, to the southern shoreline of the western causeway of the State Road 402 Bridge at 28.61757, -80.802685, then southwestward along the southern shoreline to the eastern shoreline of the mainland, then southward along the eastern shoreline of the mainland to Addison Creek Point at 28.54512, -80.78769, then northeastward to ICWW channel marker 40 (28.55375, -80.773888), then northwestward to ICWW channel marker 38 (28.56888, -80.780506), then westward to the Manatee Zone sign at 28.56735, -80.79119, then northwestward, through all Manatee Zone signs, to the Manatee Zone sign westward of ICWW channel marker 32 at 28.60255, -80.798722, then northeastward to the ICWW channel marker 32, the point of origin.

The area also includes Gator Creek, Catfish Creek, Brock Creek, Banana Creek and Moore Creek.

---- South Banana prohibited	

**7902 South Banana River conditionally approved**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at Banana River channel marker 6B (28.22737, -80.62670), then due east to the barrier island shoreline at Patrick Air Force Base at 28.22713, -80.61652, then northward along the western shoreline of the barrier island shoreline at Patrick Air Force Base across the mouths of all creeks, ditches and man-made canals to a point on the western shoreline of the barrier island at Patrick Air Force Base due east of the southernmost tip of the southernmost of two large spoil islands south of Newfound Harbor at 28.27090, -80.60778, then due west to the southernmost tip of the southernmost of two large spoil islands south of Newfound Harbor at 28.272454, -80.656697, then due west to the eastern shoreline of Merritt Island at 28.272454, -80.664116, then southward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to the State Road 404 Pineda Causeway Bridge at 28.20894, -80.63796, then eastward along the northern edge of the State Road 404 Pineda Causeway Bridge and eastern Causeway Island to the western tip of the eastern State Road 404 Pineda Causeway Island at 28.211093, -80.626763, then northward to Banana River through channel marker 6A (28.218352, -80.627837), to the point of origin at Banana River channel marker 6B (28.22737, -80.62670).

Polygon 2: Beginning at Buck Point at the southern tip of Horti Point on Merritt Island at 28.300001, -80.656522, then due west across the mouth of Newfound Harbor to the eastern shoreline of Merritt Island at 28.300001, -80.673556, then northward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to the southern intersection of the eastern shoreline of Merritt Island with the Merritt Island Regional Airport runway peninsula at 28.339918, -80.683022, then southeastward along the Merritt Island Regional Airport runway peninsula to the southern tip of the Merritt Island Regional Airport runway peninsula at 28.33928, -80.68041, then due east to the western shoreline of Horti Point on Merritt Island at 28.339303, -80.666491, then southward along the western shoreline of Horti Point on Merritt Island across the mouths of all creeks, ditches and man-made canals to the point of origin at Buck Point at 28.300001, -80.656522.

Polygon 3: Beginning at Banana River channel marker 25 (28.339805, -80.654518), then northwestward to Banana River channel marker 27 (28.350279, -80.650932), then ~~northwestward~~ ~~due north~~ to the State Road 520 Causeway Island at 28.357447, -80.649226, the westward along the northern edge of the SR 520 Causeway Island to the eastern shoreline of Merritt Island at 28.357595, -80.660556, then northward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to a point due west of channel marker 28 at 28.364826, -80.662427, then due east to the intersection with a line of north/south running manatee signs at 28.364879, -80.657548, then northward along the line of manatee signs to the manatee sign (~~-28.394010, -80.657410~~) at the beginning of the marked channel to Kelly Park at 28.394010, -80.657410, then northeastward to the eastern tip of the western State Road 528 Causeway Island at 28.40484, -80.647759, ~~then westward along the northern edge of the State Road 528 Causeway Island and Bridge to the eastern shoreline of Merritt Island, then northward along the eastern shoreline of the Merritt Island across the mouths of all creeks, ditches and man made canals to the intersection with the Federal No Motor Zone boundary of the North Banana River Manatee Sanctuary, then eastward across the Banana River along the Federal No Motor Zone boundary to the western shoreline of the Canaveral Peninsula, then southward along the western shoreline of the Canaveral Peninsula across the mouths of all creeks, ditches and man made canals to the western end of the eastern State Road 528 Bridge Causeway, then southeastward to a manatee sign (~~28.383530, -80.632290~~) located southwestward of Long Point at 28.383530, -80.632290, then southwestward to the northwestern tip of the Cape Canaveral Hospital Peninsula at 28.360937, -80.623966, then westward around the Cape Canaveral Hospital Peninsula and eastern State Road 520 Causeway Island to its westernmost tip, then eastward along the southern edge of the eastern State Road 520 Causeway Island to a point due north of private channel marker 117 located south of the eastern causeway island of the State Road 520 Bridge at 28.357699, -~~

80.62003, then due south to private channel marker 117 (28.356863, -80.619979), then southwestward to Shell Point at 28.346654, -80.624426, then southwestward along the western shorelines of the unnamed islands south and west of Shell Point to a point due east of channel marker 25 at 28.33904, -80.63248, then westward to a point on the eastern shoreline of Big Island at 28.33916, -80.63837, then westward along the northern shoreline of Big Island to a point on the western shoreline of Big Island at 28.3391, -80.64028, then due west to the point of origin at channel marker 25 (28.339805, -80.654518).

Polygon 4: Beginning at Banana River channel marker 13A (28.413972, -80.645021), then due west to the eastern shoreline of Merritt Island at 28.413972, -80.647789, then northward along the eastern shoreline of the Merritt Island across the mouths of all creeks, ditches and man-made canals to the intersection with the Federal No Motor Zone boundary of the North Banana River Manatee Sanctuary at 28.434858, -80.659828, then eastward across the Banana River along the Federal No Motor Zone boundary to the western shoreline of the Canaveral Peninsula at 28.420933, -80.603459, then southward along the western shoreline of the Canaveral Peninsula across the mouths of all creeks, ditches and man-made canals to a point due east of Banana River channel marker 13A at 28.413972, -80.635798, then due east to the point of origin at Banana River channel marker 13A (28.413972, -80.645021).

Management: The area will be temporarily closed to harvesting when: 1) Three-day cumulative rainfall measured by NOAA exceeds 3.42 for any one day period measured at the Cape Canaveral Wastewater Treatment Plant exceeds 1.55 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

#### **7906 South Banana River conditionally restricted**

~~Classification Boundaries: The area includes all waters within the following polygons:~~

~~Polygon 1: Beginning at the intersection of the eastern shoreline of Merritt Island and the State Road 404 Pineda Causeway Bridge, then eastward along the northern edge of the State Road 404 Causeway Bridge and eastern State Road 404 Pineda Causeway Island to the western tip of the eastern State Road 404 Pineda Causeway Island, then southeastward to the western tip of Nesbit Island, then due east to the western shoreline of the unnamed island west of the barrier island, then southward along the western shoreline of the unnamed island west of the barrier island to a point due east of an unnamed point of land on the eastern shoreline of Merritt Island located southwest of channel marker 4, then due west across Banana River to an unnamed point of land on the eastern shoreline of Merritt Island, then northward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man made canals to the point of origin at the intersection of the eastern shoreline of Merritt Island and the State Road 404 Pineda Causeway Bridge.~~

~~Polygon 2: Beginning at the southernmost tip of the southernmost of two large spoil island south of Newfound Harbor, then due west to the eastern shoreline of Merritt Island, then northwestward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to a point due west of the southern tip of Buck Point on the southern tip of Horti Point on Merritt Island, then due east across the mouth of Newfound Harbor to Buck Point, then northward along the eastern shoreline of Horti Point on Merritt Island across the mouths of all creeks, ditches and man made canals to a point due west of Banana River channel marker 15, then due east through Banana River channel marker 15 to the western shoreline of the first island south of the Minuteman Causeway Peninsula, then southeastward along the western shoreline of the first island south of the Minuteman Causeway Peninsula to its southernmost tip, then southeastward to the westernmost tip of the second island south of the Minuteman Causeway Peninsula, then southeastward along the southern shoreline of the second island south of the Minuteman Causeway Peninsula to its southernmost tip, then southeastward across the mouth of Shortys Pocket to southernmost unnamed point in the mouth of Shortys Pocket, then southward along the western shoreline of the barrier island across the mouths of all creeks, and man made canals to a point due east of the southernmost tip of the southernmost of two large spoil island south of Newfound Harbor, then due west to the point of origin at the southernmost tip of the southernmost of two large spoil island south of Newfound Harbor.~~

~~Polygon 3: Beginning at Banana River channel maker 25, then due east to the western shoreline of an unnamed island southwest of Shell Point, then southward along the western shoreline of unnamed islands east of Big Island to the northernmost tip of the Minuteman Causeway Peninsula, then westward and southward along the shoreline of the Minuteman Causeway Peninsula to a point due east of Banana River channel marker 21, then due west through Banana River channel marker 21 to the eastern shoreline of Horti Point on Merritt Island, then northward along the eastern shoreline of Horti Point on Merritt Island across the mouths of all creeks, ditches and~~

~~man-made canals to a point due west of Banana River channel marker 23, then due east to Banana River channel marker 23, then northward to the point of origin at Banana River channel marker 25.~~

~~Polygon 4: Beginning at a point on the eastern shoreline of Merritt Island due west of Banana River channel marker 28, then northward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to the eastern tip of the western State Road 528 Causeway Island, then southwestward to the manatee sign (-28.394010, -80.657410) at the beginning of the marked channel to Kelly Park, then southward through a line of north/south running manatee signs to a point due west of Banana River channel marker 28, then due west to the point of origin at a point on the eastern shoreline of Merritt Island due west of Banana River channel marker 28.~~

~~Polygon 5: Beginning at the northwesternmost tip of the Cape Canaveral Hospital peninsula on the State Road 520 Causeway, then northwestward to a manatee sign (-28.383530, -80.632290), then due east to the western shoreline of the barrier island, then southward along the western shoreline of the barrier island across the mouths of all creeks, ditches and man-made canals to the State Road 520 Causeway, then westward along the northern shoreline of the eastern State Road 520 Causeway Island to the point of origin at the northwesternmost tip of the Cape Canaveral Hospital Peninsula on the State Road 520 Causeway.~~

~~Polygon 6: Beginning at private channel marker 117 located south of the eastern causeway island of the State Road 520 Bridge, then southwestward to Shell Point, then eastward to the closest point of land on the western shoreline of the barrier island, then eastward and northward around the western shoreline of the barrier island across the mouths of all creeks, ditches and man-made canals to a point due east of private channel marker 127, then northwestward to the point of origin at private channel marker 117.~~

~~Polygon 7: Beginning at the southern intersection of the eastern shoreline of Merritt Island with the Merritt Island Regional Airport runway peninsula in Newfound Harbor, then counterclockwise around the Merritt Island Regional airport peninsula to the eastern shoreline of Merritt Island, then northward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to the intersection of the western State Road 520 Causeway Island, then east along the southern edge of the western State Road 520 Causeway Island and Bridge and eastern State Road 520 Causeway Island to the western shoreline of Horti Point, then southern along the western shoreline of Horti Point across the mouths of all creeks, ditches and man-made canals to a point due east of the southern intersection of the eastern shoreline of Merritt Island with the Merritt Island Regional Airport runway peninsula, then due east to the point of origin at the southern intersection of the eastern shoreline of Merritt Island with the Merritt Island Regional Airport runway peninsula.~~

~~Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall for any one-day period measured at the Cape Canaveral Wastewater Treatment Plant exceeds 1.57 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **South Banana River prohibited area**

~~Classification Boundaries: The area includes all waters within the following polygons:~~

~~Polygon 1: Beginning at Dragon Point on Merritt Island at 28.142138, -80.603728, then northwestward along the eastern shoreline of Merritt Island to the ~~unnamed point southwest of Banana River channel marker 4~~, then due east to the western shoreline of the ~~unnamed island west of the barrier island~~ intersection of the eastern shoreline of Merritt Island and the State Road 404 Pineda Causeway Bridge, then eastward along the southern edge of the State Road 404 Causeway Bridge and western State Road 404 Pineda Causeway Island to the western tip of the eastern State Road 404 Pineda Causeway Island at 28.211093, -80.626763, then northward through Banana River channel marker 6A (28.218352, -80.627837) to Banana River channel marker 6B (28.228562, -80.627433), then due east to the western shoreline of the barrier island at 28.228562, -80.616132, then southward along the western shoreline of the barrier island to the State Road 404 Pineda Bridge at 28.213134, -80.213134, then westward along the northern edge of the State Road 404 Pineda Bridge and the eastern Causeway Island to the western tip of the eastern causeway island of the State Road 404 Pineda Causeway then eastward to the intersection of the State Road 404 Pineda Causeway Island and the Barrier Island at 28.212145, -80.618726, then southward along the western shoreline of the unnamed island west of the barrier island and along the western shoreline of the barrier island to the southern edge of the State Road 518 bridge at 28.137876, -80.601487, then southwestward along the southern edge of the~~

State Road 518 bridge and the northern shoreline of the eastern State Road 518 causeway island to a point due south of Dragon Point at 28.137413, -80.603719, then due north to the point of origin at Dragon Point on Merritt Island at 28.142138, -80.603728.

Polygon 2: Beginning at the southernmost tip of the southernmost of two large spoil islands south of Newfound Harbor at 28.272454, -80.656697, then due west to the eastern shoreline of Merritt Island at 28.272454, -80.664116, then northwestward along the eastern shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to a point due west of the southern tip of Buck Point on the southern tip of Horti Point on Merritt Island at 28.300073, -80.673556, then due east across the mouth of Newfound Harbor to Buck Point at 28.300001, -80.656522, then northward along the eastern shoreline of Horti Point on Merritt Island across the mouths of all creeks, ditches and man-made canals to the intersection of the eastern shoreline of Horti Point on Merritt Island and the State Road 520 Causeway Bridge at 28.357595, -80.660556, then eastward along the northern edge of the State Road 520 Causeway Bridge and western State Road 520 Causeway Island to a point due north of Banana River channel marker 27 at 28.357447, -80.649226, then southward to Banana River channel marker 27 (28.350279, -80.650932), then southward to Banana River channel marker 25 (28.339805, -80.654518) then due east to the western shoreline of an unnamed island southwest of Shell Point at 28.33904, -80.63248, then west and southward along the western shoreline of the barrier island across the mouths of all creeks, ditches and man-made canals to a point due east the southernmost tip of the southernmost of two large spoil islands south of Newfound Harbor at 28.272325, -80.607964, then due west to the point of origin at the southernmost tip of the southernmost of two large spoil island south of Newfound Harbor at 28.272454, -80.656697.

~~Polygon 6: Beginning at the western tip of the eastern State Road 528 Causeway Island at 28.404852, -80.644619, then eastward along the southern edge of the eastern State Road 528 Causeway Island to the western shoreline of the barrier island at 28.402505, -80.622678, then southward along the western shoreline of the barrier island across the mouths of all creeks, ditches and man-made canals to the State Road 520 Causeway at 28.358066, -80.614851, then westward along the northern shoreline of the eastern State Road 520 Causeway Island to the northwesternmost tip of the Cape Canaveral Hospital Peninsula on the State Road 520 Causeway at 28.360937, -80.623966, then northwestward to a manatee sign at 28.383530, -80.632290, then northwestward to the point of origin at the western tip of the eastern State Road 528 Causeway Island 28.404852, -80.644619. Beginning at private channel marker 117 south of the eastern causeway island of the State Road 520 bridge, then due north to the southern shoreline of the eastern causeway Island of the State Road 520 bridge, then eastward along the southern edge of the State Road 520 Causeway Island and northern edge of the State Road 520 Bridge to the barrier island, then southward along the western shoreline of the barrier island to an unnamed point of land eastward of private channel marker 127, then northwestward to the point of origin at private channel marker 117.~~

~~Polygon 7: Beginning at Banana River channel marker 13A (28.413972, -80.645021), then due west to the eastern shoreline of Merritt Island at 28.413972, -80.647789, then southward along the eastern shoreline of the Merritt Island across the mouths of all creeks, ditches and man-made canals to the intersection of State Road 528 with the eastern shoreline of Merritt Island at 28.406087, -80.663129, then eastward along the northern edge of the State Road 528 Causeway Island and Bridge to the intersection with the western shoreline of the Canaveral Peninsula at 28.40566, -80.63836, then northward along the western shoreline of the Canaveral Peninsula across the mouths of all creeks, ditches and man-made canals to a point due east of Banana River channel marker 13A at 28.41408, -80.63278, then due west to the point of origin at Banana River channel marker 13A (28.413972, -80.645021). Beginning at the western tip of the eastern State Road 528 Causeway Island, then eastward along the southern edge of the eastern State Road 528 Causeway Island to the western shoreline of the barrier island, then southward along the western shoreline of the barrier island across the mouths of all creeks, ditches and man made canals to a point due west of a manatee sign ( 28.383530, -80.632290), then due west to the manatee sign ( 28.383530, -80.632290), then northwestward to the point of origin at the western tip of the eastern State Road 528 Causeway Island.~~

~~In addition, all waters and canals in the Banana River within the island formations north and south of the Minuteman Causeway Peninsula and all creeks and canals in the Banana River south of the southern boundary of the Federal No Motor Zone boundary of the North Banana River Manatee Sanctuary are classified prohibited, as are all marinas.~~

**80 BODY A SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY
8001 Body A approved <del>8005 Body A restricted</del> ---- Body A prohibited	Brevard

**8001 Body A approved**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at Boathouse Point at 28.78314 -80.83520 in the Indian River Lagoon, then due west to the mainland shoreline at 28.78344 -80.84811, then southward along the mainland shoreline, across the mouths of all creeks, ditches and man-made canals to the intersection of the western U.S. Government Railroad Bridge and the mainland shoreline at 28.652421, -80.81962, then eastward along the northern edge of the western U.S. Government Railroad Bridge island to the intersection with the ICWW at 28.65070 -80.80673, then southward along the eastern side of the ICWW to ICWW channel marker 23 (28.643414, -80.806803), then due east to the western shoreline of Merritt Island at 28.64297 -80.78630, then northward along the western shoreline of Merritt Island across the mouths of all creeks, ditches and man-made canals to the intersection with the eastern U.S. Government Railroad Bridge island at 28.64959 -80.78631, then westward along the southern shoreline of U.S Government Railroad bridge island to a point at 28.65068 -80.80338, then ~~and~~ eastward along the ~~northern shoreline~~ ~~perimeter~~ of the eastern U.S. Government Railroad Bridge island to the intersection with the western Merritt Island shoreline at 28.651404, -80.78453, then northward along the western shoreline of Merritt Island, across the mouths of all creeks and the western entrance of Haulover Canal, then north along the western shoreline of the mainland north of Haulover Canal, across the mouths of all creeks, ditches and man-made canals to Boathouse Point at 28.78314 -80.83520, the point of origin.

Polygon 2; Beginning at ICWW channel marker 29 (28.791668, -80.782176) in Mosquito Lagoon, then due east to the western shoreline of the Barrier Island at 28.791668, -80.745633 and 28.79205 -80.73741, then southward along the Barrier Island shoreline, across the mouths of all creeks, ditches and man-made canals to a point due east of the northernmost tip of Pelican Island at 28.67009 -80.65889, then ~~westward~~ ~~due west~~ through the northernmost tip of Pelican Island at 28.67024, -80.664696 to the eastern shoreline of Merritt Island at 28.66985 -80.68421 in Mosquito Lagoon, then northward along the eastern shoreline of Merritt Island, across the mouths of all creeks, ditches and man-made canals and the eastern entrance to Haulover Canal, then north along the eastern shoreline of the mainland in Mosquito Lagoon, across the mouths of all creeks, ditches and man-made canals to a point due west of ICWW channel marker 29 at 28.791668, -80.788728, then due east to ICWW channel marker 29 (28.791668, -80.782176), the point of origin.

Management: The area will be ~~temporarily~~ closed to harvesting when emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to ~~the~~ public health.

**~~8005 Body A restricted~~**

~~Classification Boundaries: The area includes all waters within a polygon beginning at ICWW channel marker 23, then due east to the western shoreline of Merritt Island, then southward along the western Merritt Island shoreline, across the mouths of all creeks, ditches and man made canals, to the intersection of the eastern causeway and the southern edge of the SR 402 bridge, then southwestward along the southern edge of the SR 402 bridge and southern shoreline of the causeway island to the intersection with the ICWW, then northwestward through ICWW channel markers 27 and 25 to ICWW channel marker 23, the point of origin.~~

~~Management: The area will be temporarily closed to harvesting when emergencies occur as defined in Rule 5L 1.002, F.A.C. Following temporary closure, sampling will be conducted if relay activities are under way within 5~~

~~days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L 1.003, F.A.C., and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.~~

### **Body A prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the intersection of the mainland shoreline and the ~~southern~~ northern side of the western U.S. Government Railroad Bridge at 28.65025 -80.81978, then eastward along the ~~southern~~ northern side of the U.S. Government Railroad Bridge to the intersection with the ICWW at 28.65070 -80.80673, then southward ~~to through~~ ICWW channel markers 23 (28.643414, -80.806803), then due east to the western shoreline of Merritt Island at 28.64298 -80.78631, then southward along the western Merritt Island shoreline, across the mouths of all creeks, ditches and man-made canals, to the intersection of the eastern causeway and the southern edge of the SR 402 bridge at 28.62228, -80.795618, 25, and 27 to the intersection with the southern edge of the SR 402 bridge at, then southwestward along the southern edge of the SR 402 bridge and southern shoreline of causeway island to the mainland shoreline at 28.617561, -80.802673, then northward along the mainland shoreline, including the Titusville Marina Basin, to the intersection of the mainland shoreline and the ~~southern~~ northern side of the western U.S. Government Railroad Bridge at 28.652421, -80.81962, the point of origin.

~~Polygon 2: Beginning at the intersection of the mainland shoreline and the northern side of the western U.S. Government Railroad Bridge at, then eastward along the northern side of the U.S. Government Railroad Bridge to the intersection with the ICWW at, then southward through ICWW channel markers 23, 25, and 27 to the intersection with the southern edge of the SR 402 bridge at, then southwestward along the southern edge of the SR 402 bridge and southern shoreline of causeway island to the mainland shoreline at, then northward along the mainland shoreline, including the Titusville Marina Basin, to the intersection of the mainland shoreline and the northern side of the western U.S. Government Railroad Bridge at, the point of origin.~~

Polygon ~~2~~<sup>3</sup>: Beginning at Boathouse Point at 28.78314 -80.83520 in the Indian River Lagoon, then counterclockwise following the mainland shoreline, across the mouth of Turnbull Creek, to a point due west of Boathouse Point at 28.78344 -80.84811, then due east to Boathouse Point at 28.78314 -80.83520, the point of origin.

Polygon ~~3~~<sup>4</sup>: Beginning at the northernmost point of Pelican Island at 28.67024, -80.664696 in Mosquito Lagoon, then due east to the western shoreline of the barrier island at 28.67009 -80.65889, then clockwise along the perimeter of Max Hoeck Creek, then northward along the eastern shoreline of Merritt Island to a point due west of the northernmost point of Pelican Island at 28.66985 -80.68421, then due east to the northernmost point of Pelican Island at 28.67024, -80.664696, the point of origin.

The area also includes Haulover Canal, ditches, man-made canals, and marinas.

### **South Volusia prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at the intersection of the southern edge of the New Smyrna Beach South (State Road A1A) Causeway and the mainland shoreline at 29.02287194, -80.91966537, then northeastward along the southern edge of the causeway to the western shoreline of the barrier island at 29.0247013, -80.91464846, then southeastward along the barrier island shoreline including all creeks and canals to a point of land where a Florida Power and Light "Cable crossing warning" sign (28.97278279, -80.88340505) is located east of lease 727, then due west to a point on the shoreline of the large unnamed spoil island at 28.97278279, -80.88680954, then northward along the eastern shoreline of the large unnamed spoil island to the northernmost point (28.976290, -80.890658) then due west to a point of land on the east side of an unnamed spoil island east of the ICW then northwestward along the eastern perimeter of the unnamed spoil island east of the ICW to its northernmost point, the southeastward along the western shoreline, including all creeks, canals and coves, of the large unnamed spoil island east of the ICW to a point due east of ICW channel marker 60 at 28.95681894, -80.88056979, then due west through ICW channel marker 60 (28.95677 -80.88195) to the mainland shoreline at 28.95677 -80.88256, then northwestward along the mainland shoreline including all creeks, ditches and man-made canals to the point of origin at the intersection with the southern edge of the New Smyrna Beach South (State Road A1A) Causeway and the mainland shoreline at 29.02287194, -80.91966537.

Polygon 2: Beginning at the southernmost tip of the large unnamed spoil island east of Turner Flats at 28.94284956, -80.8381616, then northeastward along the eastern shoreline of the large spoil island to its northernmost tip at 28.94648, -80.84004, then northward to the easternmost point of a horseshoe shaped spoil island east of Cedar Island at 28.950809, -80.843420, then northwestward along the northern shoreline of the horseshoe shaped spoil island to the westernmost tip at 28.95092683, -80.84645242, then northward to the southernmost tip of an unnamed spoil island northeast of Cedar Island at 28.95245088, -80.84650559, then northeastward along the eastern shoreline of the unnamed spoil island to its westernmost tip at 28.95905928, -80.8539636, then due west to the western shore of the cove north of Cedar Creek at 28.95906467, -80.85483528, then clockwise along the perimeter of all creeks and the western shoreline of the barrier island to a point due east of the southernmost tip of a small unnamed spoil island southeast of Turner Flats at 28.94214218, -80.83494111, then due west to the southernmost tip of the small unnamed spoil island southeast of Turner Flats at 28.94214218, -80.83578063, then northward along the eastern shoreline of the spoil island to the northernmost tip of the small spoil island at 28.94404 -80.83702, then southward to a point due east of the southernmost tip of a large unnamed spoil island east of Turner Flats at 28.94284956, -80.83642618, then due west to the southernmost tip of the large unnamed spoil island, the point of origin (28.94284956, -80.8381616).

Polygon 3: Beginning at ICW channel marker 71 (28.9098841, -80.85696768), then due east to a point of the western shoreline of an unnamed spoil island on the east side of the ICW at 28.9098841, -80.85666068, then southward along the western shoreline to a point due east of ICW channel marker 75 at 28.89583857, -80.84834099, then due west through ICW channel marker 75 (28.89583857, -80.84943077) to the mainland shoreline at

28.89583857, -80.85032918, then northward along the eastern shoreline of the mainland, across the mouths of all creeks, ditches and man-made canals, to a point due west of ICWW channel marker 71 at 28.9098841, -80.85788051, then due east to ICWW channel marker 71, the point of origin at 28.9098841, -80.85696768.

The area also includes all creeks above mean high tide, all man-made canals, ditches, and marinas.

**88 SOUTH ST. JOHNS SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
8802 South St. Johns conditionally approved ---- South St. Johns prohibited	St. Johns

**8802 South St. Johns Conditionally Approved**

Classification Boundaries: The area includes all waters within a polygon beginning at intersection of the southern side of the State Road 206 Bridge (Crescent Beach Bridge) and the mainland shoreline(29.76430, -81.26268), then northeastward along the southern side of the State Road 206 Bridge to the western shoreline of Anastasia Island(29.76919, -81.25752), then southward along the western shoreline of Anastasia Island, across the mouths of all creeks, ditches and man-made canals to the northwestern side of State Road A1A (Matanzas Inlet Bridge) (29.70535, -81.22819), then southward along the western side of the State Road A1A (Matanzas Inlet Bridge) to the barrier island shoreline, then westward and southward along the western shoreline of the barrier island, across the mouth of all creeks, ditches and man-made canals, to a point on the western shoreline of the barrier island due east of the southeast marker of Lease #888(29.67229, -81.21494) then due west to the southeast marker of Lease #888 (29.67234, -81.21712), then westward to the southwest marker of Lease #888 (29.67217, -81.21773), then due west, to the mainland shoreline (29.67223, -81.22060), then northward along the mainland shoreline, across the mouth of all creeks, ditches and man-made canals to the point of origin at the intersection of the southern side of the State Road 206 Bridge (Crescent Beach Bridge) and the mainland shoreline(29.76430, -81.26268).

Management: The area will be temporarily closed when: 1) Six-day cumulative rainfall recorded by the NOAA exceeds 4.84 inches; 2) Environmental data is not available; or 3) Emergencies occur as defined in Rule 5L-1.002, F.A.C. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule 5L-1.003 F.A.C. and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**South St. Johns Prohibited**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at a point on the mainland shoreline due north of the northernmost tip of the spoil island due west of ICWW channel marker 78 (29.73376, -81.2499), then south along the spoil islands' shorelines located west of the ICWW across all creek mouths to a point on the western shoreline due south of ICWW channel marker 80 (29.72351, -81.24770), then westward and northward along the mainland shoreline, tracing the perimeters of all creeks, to a point on the mainland shoreline due north of the northernmost tip of the spoil island due west of ICWW channel marker 78(29.73376, -81.2499), the point of origin. The Prohibited area also includes the creek on the southwestern side of Anastasia Island, across from the Fort Matanzas National Monument, and all creeks along the mainland shoreline, across from Rattlesnake Island, from ICWW channel marker 80 South to ICWW channel marker 8.

Polygon 2: Beginning at ICWW channel marker 87(29.66956, -81.2174), then due east to the western shoreline of the barrier island (29.66956, -81.2158), then northward along the western shoreline of the barrier island to a point due east of the southeast marker of Lease #888 (29.6723, -81.2149), then due west to the southeastern marker of Lease #888 (29.67234, -81.2171), then southwestward to the southwestern marker of Lease #888 (29.67218, -81.2177), the due west to the mainland shoreline (29.67223, -81.2206), then southeastward along the mainland shoreline to a point due west of ICWW channel marker 87 (29.66956, -81.2187), then due west to ICWW channel marker 87 (29.66956, -81.2174), the point of origin. The prohibited area includes all creeks, ditches, man-made canals, not otherwise classified, and marinas.

AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
9202 North St. Johns conditionally approved ---- North St. Johns prohibited	St. Johns

**9202 North St. Johns conditionally approved**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at Intracoastal Waterway (ICWW) channel marker 38 (30.001707,-81.3343689) in the Tolomato River, then due east to the barrier island shoreline at 30.001707,-81.334239, then southward along the western shoreline of the barrier island, across the mouths of all creeks and canals to the northern entrance of the Guana River, then northward along the western shoreline of the Guana River to a point at 30.012399, -81.3247, then due east to a point on the eastern shoreline of the Guana River at 30.012399, -81.323183, then southward along the eastern shoreline of the Guana River to the southern entrance of the Guana River, then southward along the western shoreline of the barrier island, across the mouths of all creeks and canals to a point on the western barrier island shoreline due east of ICWW channel marker 54 at 29.943221,-81.308609, then due west to ICWW channel marker 54 (29.943221,-81.311519), then southward to ICWW marker 55 (29.928501,-81.306284), then due west to the mainland shoreline at 29.928501, -81.310387, then northward along the mainland shoreline, across the mouths of all creeks, canals, and the St. Augustine Airport Basin to a point on the mainland shoreline due west of ICWW channel marker 38 at 30.001707, -81.344317, then due to ICWW channel marker 38 the point of origin.

Polygon 2: Beginning at the point on the eastern shoreline of Anastasia Island in Salt Run located at the northern boundary of the Anastasia State Recreation Area at 29.88085,-81.28187, then due east to the western shoreline of Conch Island at 29.88085, -81.275122, then southward across the mouths of all creeks and canals to a point on the western shoreline of Conch Island at 29.8766,-81.273567, then due west to the eastern shoreline of Anastasia Island at 29.8766,-81.277214, then north along the eastern shoreline of Anastasia Island to the point of origin at the point at the northern boundary of Anastasia State Recreation Area.

Management: The area will be temporarily closed to harvesting when: 1) One-day cumulative rainfall measured by NOAA exceeds 1.89 inches; 2) Environmental data is not available; or 3) Emergencies as defined in Rule Chapter 5L-1.002 F.A.C Florida Administrative Code. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule Chapter 5L-1.003 and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

**North St. Johns prohibited area**

Classification Boundaries: The area includes all waters within the following polygons:

Polygon 1: Beginning at ICWW channel marker 24 (30.062283, -81.370083), then due east to the western shoreline of the barrier island at 30.062283, -81.354363, then southward along the shoreline of the barrier island across the mouths of all creeks and canals to a point due east of ICWW channel marker 38 at 30.001707,-81.334239, then due west through ICWW channel marker 38 to the mainland shoreline at 30.001707,-81.344317, then northward along the mainland shoreline across the mouths of all creeks and canals to a point due west of ICWW channel marker 24 at 30.062283,-81.370583, then due east to the point of origin at ICWW channel marker 24.

Polygon 2: Beginning at point on the western shoreline of the Guana River at 30.012399, -81.330268, then northward to the Guana River Dam, then southward along the eastern shoreline of the Guana River to a point at 30.012399, -81.323163, then due west to the point of origin at 30.012399, -81.330268.

Polygon 3: Beginning at the southern terminus of Salt Run, then northward along the western shoreline of Conch Island to a point at 29.8766, -81.27357, then due west to the eastern shoreline of Anastasia Island, then southward to the point of origin at the southern terminus of Salt Run.

Polygon 4: Beginning at ICWW channel marker 54, then due east to the western shoreline of the barrier island, then southward along the western shoreline of the barrier island to its southeasternmost tip, then southeastward across the St. Augustine Inlet to the northernmost tip of Conch Island, then westward and southward along the western shoreline of Conch Island to a point at 29.88085,-81.275122 due east of a point at 29.88085,-81.28189 on the eastern shoreline of Anastasia Island at the northern boundary of the Anastasia State Recreation Area, then due west to the point, then counterclockwise along the shoreline of Anastasia Island to the State Road 312 Bridge, then westward along the northern edge of the State Road 312 Bridge to the mainland shoreline, then northward along the mainland shoreline to a point due west of ICWW channel marker 55, then due east to ICWW channel marker 55, then northwestward to the point of origin at ICWW channel marker 54.

The prohibited area includes Robinson, Pancho, Indian, Casa Cola, Sombrero, Stokes, Deep, and Capo Creeks, St. Augustine Airport Basin, Ximanies Creek, San Sebastian River, Matanzas River from the St. Augustine Inlet south to the State Road 312 Bridge, marinas, ditches and all man-made canals.

**96 DUVAL COUNTY SHELLFISH HARVESTING AREA CLASSIFICATION  
BOUNDARIES AND MANAGEMENT**

4-DIGIT AREA NUMBER AND NAME	COUNTY(S)
9602 Duval County conditionally approved ---- Duval County prohibited	Duval

**9602 Duval County Conditionally Approved**

Classification Boundaries: The area includes all waters within a polygon beginning at a point on the Western Shoreline of Sister’s Creek due West of Intracoastal Waterway (ICWW) Channel Marker 73 (30.4463, -81.4503), then North along the Western shoreline of Sister’s Creek across the creek located Northwest of ICWW Channel Marker 72 (30.4499, -81.4488), continuing North along the West shoreline of Sister’s Creek, then West along Southern shoreline of the creek that lies West of ICWW Channel Marker 71 (30.4542, -81.4495) across the mouths of all smaller creeks, to a point on the Western Shoreline of Gunnison Cut/Sister’s Creek that lies due West of ICWW Channel Marker 66 (30.4619, -81.4516), then West along the Southern bank of Broward Creek transitioning to North along the Western bank of Broward Creek and then Eastward along the Northern bank of Broward Creek to a point on the Western shoreline of Gunnison Cut/Sister’s Creek that lies due West of ICWW Channel Marker 65 (30.4662, -81.4562), then North along the Western shoreline of Gunnison Cut/Sawpit Creek to the Southern bank of the mouth of the creek that lies West of ICWW Channel Marker 53 (30.4909, -81.4651), then West along the Southern shoreline of the creek that lies West of Channel Marker 53 across the mouths of all smaller creeks, ditches, and man-made canals transitioning Northward along the Western Shoreline of the Creek West of ICWW Channel marker 53 and continuing Northward across the mouths of all smaller creeks to a point on the Western shoreline of Sawpit Creek that lies due West of ICWW Channel Marker 51 (30.4994, -81.4679), then North along the Western shoreline of Sawpit Creek across the mouths of all creeks, docks, ditches, and man-made canals to the intersection between the Southern bank of the Nassau River and the Western shoreline of Sawpit Creek/Clapboard Creek (30.5227, -81.4625) then Southeast across the mouth of Sawpit Creek to the Northernmost point of the Island that is directly North of Big Talbot Island (30.5214, -81.4608), then Southwest along the Eastern shoreline of Sawpit Creek/Clapboard Creek across the mouths of all smaller creeks continuing along the shoreline of the island directly North of Big Talbot Island across the mouths of all creeks to the point of intersection of the shoreline of the island directly north of Big Talbot island and the Western side of the George Crady Bridge Fishing Pier (30.5140, -81.4567), then South along the Western side of the George Crady Bridge Fishing Pier to the intersection of Big Talbot Island Shoreline and the Western side of the George Crady Bridge Fishing Pier (30.5130, -81.4571), then West along the Northern marsh shoreline of Big Talbot Island across the mouths of all creeks to the Westernmost point of the Big Talbot Island marshland (30.5069, -81.4703), then South along the Eastern bank of Sawpit/Clapboard Creek across the mouths of all smaller creeks to a point on the shoreline due East of ICWW Channel Marker 55 (30.4894, -81.4572), then Southward and Eastward along the Eastern shoreline of the creek that lies East of ICWW Channel Marker 55 across the mouths of all smaller creeks within until a point on the Eastern shoreline of Sawpit Creek due East of ICWW Channel Marker 59 (30.4818, -81.4569), then South along the Eastern shoreline of Sawpit Creek/Gunnison Cut across the mouths of all creeks to the Northern bank of the North mouth of Mud Creek (30.4579, -81.4471), then East along the Northern shoreline of Mud Creek and continuing South along to the Eastern shoreline of Mud Creek to a point on the East bank of the Southern mouth of Mud Creek that intersects with the Ft. George River (30.4444, -81.4392), then East along the Northern shoreline of the Ft. George River across the mouths of all creeks to the Western bank of the Southern mouth of Simpson Creek (30.4410, -81.4222), then North along the Western shoreline of Simpson Creek across the mouths of all smaller creeks to a point on the Southern marsh shoreline of Simpson creek that lies due South of the Eastern bank of the Southern mouth of Myrtle Creek (30.4511, -81.4226), then due North to the East bank of the Southern mouth of Myrtle Creek (30.4519, -81.4226), then Eastward and Southward along the Western shoreline of Little Talbot Island the point of intersection of Little Talbot Island and the Southern Side of the Hecksher Dr./A1A Bridge that connects Little Talbot Island and Ft. George Island (30.4212, -81.4159), then West along the South side of the Hecksher Dr. Bridge to the intersection of Ft. George Island and the Southern side of the Hecksher Dr. Bridge that connects Ft. George Island and Little Talbot Island (30.4194, -81.4193), then North along the shoreline of Ft. George Island across the mouths of all creeks, ditches, and man-made canals and continuing West along the Northern shoreline of Ft. George Island to the Northernmost point on the shoreline of the marsh of Ft. George Island that lies North of Garden Creek (30.4462, -81.4462), then

West to ICWW Channel Marker 73 (30.4463, -81.4503), then due West to the point of origin; a point on the Western Shoreline of Sister's Creek due West of Intracoastal Waterway (ICWW) Channel Marker 73 (30.4463, -81.4503).

Management: The area will be temporarily closed to harvesting when: 1) Cumulative rainfall measured by NOAA exceeds 2.26 inches during any six-day period; 2) Environmental data is not available; or 3) Emergencies as defined in Rule Chapter 5L-1.002 F.A.C. Florida Administrative Code. Following temporary closure, sampling will be conducted within 5 days after closure a minimum of 25 percent of the time, and within 10 days after closure 50 percent of the time. The area will be reopened when bacteriological levels meet standards as described in Rule Chapter 5L-1.003 and fecal coliform levels in shellfish return to normal background levels so that consumption of shellfish will not be a hazard to the public health.

### **Duval County prohibited**

Classification Boundaries: The area includes all waters within a polygon:

Polygon 1: Beginning at the intersection of the Southeastern shoreline of Pine Island and Northern side of Hecksher Dr. Bridge that connects Pine Island and Fanning Island (30.3947, -81.4602), then North along the Western shoreline of Sister's Creek across all creek mouths to a point due on the Western Shoreline of Sister's Creek due West of Intracoastal Waterway (ICWW) Channel Marker 73 (30.4463, -81.4503), then due East to ICWW Channel Marker 73 in Sister's Creek (30.4463, -81.4503), then Eastward from ICWW Channel Marker 73 to the Northernmost point on the shoreline of the marsh of Ft. George Island that lies North of Garden Creek (30.4462, -81.4462), then West along the Northern shoreline of marsh located on the Northwestern section of Ft. George Island, and South across the mouth of Garden Creek and continuing South along the Eastern shoreline of Sister's Creek across all creek mouths to the point on the Western shoreline of Fanning Island that intersects with the Northern side of the Hecksher Drive Bridge that connects Pine Island and Fanning Island (30.3931, -81.4588), then Northwest along the Northern side of the Hecksher Dr. Bridge to the point of origin; the intersection of the Southeastern shoreline of Pine Island and the Northern Side of the Hecksher Dr. Bridge (30.3947, -81.4602).

Polygon 2: Beginning at the point of intersection of the Southern side of the Hecksher Dr./A1A Bridge that connects Ft. George Island and Little Talbot Island, and the Eastern shoreline of Ft. George Island (30.4194, -81.4193), then South along the Ft. George Island shoreline and continuing along the shoreline of Huguenot Memorial Park to the Northernmost point of Ward's Bank that lies South of Little Talbot Island (30.4198, -81.4116), then due North of the Northernmost point of Ward's Bank to the Southern shoreline of Little Talbot Island (30.4238, -81.4116), the West along the Southern shoreline of Little Talbot Island and continuing West along the Southern side of Hecksher Dr./A1A Bridge to the point of origin; the intersection of the Southern side of the Hecksher Dr./A1A Bridge and the Eastern shoreline of Ft. George Island 30.4194, -81.4191).

Polygon 3: Beginning at a point of intersection between the East bank of the Southern mouth of Myrtle Creek and the Northern shoreline of Simpson Creek (30.4519, -81.4226), then due South across Simpson Creek to the Southern marsh shoreline (30.4511, -81.4226), then West along the Southern shoreline of Simpson Creek and continuing along the Western/Southern shoreline of Simpson creek to the intersection of the Northern mouth of Simpson Creek and Nassau Sound (30.4848, -81.4251), then West along the Eastern shoreline of Big Talbot Island to the point of intersection of the Southern Side of the Hecksher Dr./A1A Bridge that connects Big Talbot Island and Amelia Island, and the shoreline of Big Talbot Island (30.5127, -81.4568), the Northeast along the Southern side of the Hecksher Dr./A1A Bridge to the point of intersection of the Southern Side of the Hecksher Dr./A1A Bridge and the shoreline of Amelia Island (30.5217, -81.4456), then South along the shoreline of Amelia Island to the Southernmost point of Amelia Island (30.515 -81.438), then South in a straight line across the Nassau Sound to the Northernmost point on the Southern bank of the mouth of Nassau Sound (30.488, -81.417) then West along the Southern shoreline of Nassau Sound continuing South along the mouth of Simpson Creek to the Northern bank of the Northern mouth of Myrtle Creek (30.4833, -81.4232), then East and South along the Eastern bank of Myrtle creek, encompassing all of Myrtle Creek, across all creeks within Myrtle Creek, to the point of origin; the point of intersection between the East bank of the Southern mouth of Myrtle Creek and the Northern shoreline of Simpson Creek (30.4519, -81.4226).

The area also includes ditches, creeks, man-made canals, and marinas.
