(3) The administrator of an automatic contribution arrangement within the meaning of paragraph (f)(1) of this section shall be considered to have satisfied the notice requirements of section 514(e)(3) of the Act if notices are furnished in accordance with paragraphs (c)(3) and (d) of this section. (4) Nothing in this paragraph (f) precludes a pension plan from including an automatic contribution arrangement that does not meet the conditions of paragraphs (a) through (e) of this section.

Signed at Washington, DC, this 15th day of October, 2007.

Bradford P. Campbell,

Assistant Secretary, Employee Benefits Security Administration, Department of Labor.

Appendix E — Employee Benefit Law

Employer Securities and Real Property - General

Originally issued September 20, 1977 (42 FR 47201)

a. In General. Section 407(a)(1) of the Employee Retirement Income Security Act of 1974 (the Act) states that except as otherwise provided in section 407 and section 414 of the Act, a plan may not acquire or hold any employer security which is not a qualifying employer security or any employer real property which is not qualifying employer real property. Section 406(a)(1)(E) prohibits a fiduciary from knowingly causing a plan to engage in a transaction which constitutes a direct or indirect acquisition, on behalf of a plan, of any employer security or employer real property in violation of section 407(a), and section 406(a)(2) prohibits a fiduciary who has authority or discretion to control or manage assets of a plan to permit the plan to hold any employer security or employer real property if he knows or should know that holding such security or real property violates section 407(a).
b. Requirements applicable to all plans. A plan may hold or acquire only employer securities which are qualifying employer securities and employer real property which is qualifying employer real property. A plan may not hold employer securities and employer real property which are not qualifying employer securities and qualifying employer real property, except to the extent that:

    1. The employer security is held by a plan which has made an election under section 407(c)(3) of the Act; or
    2. The employer security is a loan or other extension of credit which satisfies the requirements of section 414(c)(1) of the Act or the employer real property is leased to the employer pursuant to a lease which satisfies the requirements of section 414(c)(2) of the Act.

Regulation published in Federal Register September 20, 1977 (42 FR 47201) and amended November 22, 1977 (42 FR 59842).

Codified to 29 C.F.R. 2550.407a-1.

Employer Securities and Real Property - Acquisition

Originally issued September 20, 1977 (42 FR 47201)

a. In General. Section 407(a)(2) of the Employee Retirement Income Security Act of 1974 (the Act) provides that a plan may not acquire any qualifying employer security or qualifying employer real property, if immediately after such acquisition the aggregate fair market value of qualifying employer securities and qualifying employer real property held by the plan exceeds 10 percent of the fair market value of the assets of the plan.
b. Acquisitions. For purposes of section 407(a) of the Act, an acquisition by a plan of qualifying employer securities or qualifying employer real property shall include, but not be limited to, an acquisition by purchase, by the exchange of plan assets, by the exercise of warrants or rights, by the conversion of a security (except any acquisition pursuant to a conversion exempt under section 408(b)(7) of the Act), by default of a loan where the qualifying employer security or qualifying employer real property was security for the loan, or by the contribution of such securities or real property to the plan. However, an acquisition of a security shall not be deemed to have occurred if a plan acquires the security as a result

of a stock dividend or stock split.

c. Fair Market Value - Indebtedness incurred in connection with the acquisition of a plan asset. In determining whether a plan is in compliance with the limitation on the acquisition of qualifying employer securities and qualifying employer real property in section 407(a)(2), the limitation on the holding of qualifying employer securities and qualifying employer real property in section 407(a)(3) and the requirement regarding the disposition of employer securities and employer real property in section 407(a)(4) thereunder, the fair market value of total plan assets shall be the fair market value of such assets less the unpaid amount of:

    1. Any indebtedness incurred by the plan in acquiring such assets;
    2. Any indebtedness incurred before the acquisition of such assets if such indebtedness would not have been incurred but for such acquisition; and
    3. Any indebtedness incurred after the acquisition of such assets if such indebtedness would not have been incurred but for such acquisition and the incurrence of such indebtedness was reasonably foreseeable at the time of such acquisition. However, the fair market value of qualifying employer securities and qualifying employer real property shall be the fair market value of such assets without any reduction for the unpaid amount of any indebtedness incurred by the plan in connection with the acquisition of such employer securities and employer real property.

d. Examples.

    1. Plan assets have a fair market value of $100,000. The plan has no liabilities other than liabilities for vested benefits of participants and does not own any employer securities or employer real property. The plan proposes to acquire qualifying employer securities with a fair market value of $10,000 by paying $1,000 in cash and borrowing $9,000. The fair market value of plan assets would be $100,000 ($100,000 of plan assets less $1,000 cash payment plus $10,000 of employer securities less $9,000 indebtedness), the fair market value of the qualifying employer securities would be $10,000, which is 10 percent of the fair market value of plan assets. Accordingly, the acquisition would not contravene section 407(a).
    2. Plan assets have a fair market value of $100,000. The plan has liabilities of $20,000 which were incurred in connection with the acquisition of those assets, and does not own any employer securities or employer real property. The plan proposes to pay cash for qualifying employer securities with a fair market value of $10,000. The fair market value of plan assets would be $80,000 ($100,000 of plan assets less $10,000 cash payment plus $10,000 of employer securities less $20,000 indebtedness), the fair market value of the qualifying employer securities would be $10,000, which is 12.5 percent of the fair market value of plan assets. Accordingly, the acquisition would contravene section 407(a).

"Qualifying" Employer Security - Defined

Originally issued September 2, 1977 (42 FR 44388)

a. In General. For purposes of this section and section 407(d)(5) of the Employee Retirement Income Security Act of 1974 (the Act), the term "qualifying employer security" means an employer security which is:

    1. Stock; or
    2. A marketable obligation, as defined in paragraph (b) of this section and section 407(e) of the Act.

b. For purposes of paragraph (a)(2) of this section and section 407(d)(5) of the Act, the term "marketable obligation" means a bond, debenture, note, or certificate, or other evidence of indebtedness (hereinafter in this paragraph referred to as "obligation") if:

    1. Such obligation is acquired -

        i. On the market, either

A. At the price of the obligation prevailing on a national securities exchange which is registered with the Securities and Exchange Commission, or
B. If the obligation is not traded on such a national securities exchange, at a price not less favorable to the plan than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer;

ii. From an underwriter, at a price -

A. Not in excess of the public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, and
B. At which a substantial portion of the same issue is acquired by persons independent of the issuer; or

iii. Directly from the issuer at a price not less favorable to the plan than the price paid currently for a substantial portion of the same issue by persons independent of the issuer;

2. Immediately following acquisition of such obligation,

i. Not more than 25 percent of the aggregate amount of obligations issued in such issue and outstanding at the time of acquisition is held by the plan, and
ii. At least 50 percent of the aggregate amount referred to in paragraph (A) is held by persons independent of the issuer; and

3. Immediately following acquisition, of the obligation, not more than 25 percent of the assets of the plan is invested in obligations of the employer or an affiliate of the employer.

Regulation 2550.407d-6

29 C.F.R. 2550.407d-6

"Employee Stock Ownership Plan" - Defined

Originally issued September 2, 1977 (42 FR 44388)

a. In General. -

1. Type of plan. To be an "ESOP" (employee stock ownership plan), a plan described in section 407(d)(6)(A) of the Employee Retirement Income Security Act of 1974 (the Act) must meet the requirements of this section. See section 407(d)(6)(B).
2. Designation as ESOP. To be an ESOP, plan must be formally designated as such in the plan document.
3. Retroactive amendment. A plan meets the requirements of this section as of the date that it is designated as an ESOP if it is amended retroactively to meet, and in fact does meet, such requirements at any of the following times:

i. 12 months after the date on which the plan is designated as an ESOP;
ii. 90 days after a determination letter is issued with respect to the qualification of the plan as an ESOP under this section, but only if the determination is requested by the date in paragraph (a)(3)(i) of this section; or
iii. A later date approved by the Internal Revenue Service district director.

4. Addition to other plan. An ESOP may form a portion of a plan the balance of which includes a qualified pension, profit-sharing, or stock bonus plan which is not an ESOP. A reference to an ESOP includes an ESOP that forms a portion of another plan.
5. Conversion of existing plan to an ESOP. If an existing pension, profit-sharing, or stock bonus plan is converted into an ESOP, the requirements of section 404 of the Act, relating to fiduciary duties, and section 401(a) of the Internal Revenue Code (the Code), relating to requirements for plans established for the exclusive benefit of employees, apply to such conversion. A conversion may constitute a termination of an existing plan. For definition of a termination, see the

regulations under section 411(d)(3) of the Code and section 4041(f) of the Act.
6. Certain arrangements barred. (i) buy-sell agreements. An arrangement involving an ESOP that creates a put option must not provide for the issuance of put options other than as provided under Section 2550.408b-3(j), (k) and (l). Also, an ESOP must not otherwise obligate itself to acquire securities from a particular security holder at an indefinite time determined upon the happening of an event such as the death of the holder.

b. Plan designed to invest primarily in qualifying employer securities. A plan constitutes an ESOP only if the plan specifically states that it is designed to invest primarily in qualifying employer securities. Thus, a stock bonus plan or a money purchase pension plan constituting an ESOP may invest part of its assets in other than qualifying employer securities. Such plan will be treated the same as other stock bonus plans or money purchase pension plans qualified under section 401(a) of the Code with respect to those investments.
c. Regulations of the secretary of the treasury. A plan constitutes an ESOP for a plan year only if it meets such other requirements as the Secretary of the Treasury may prescribe by regulation under section 4975(e)(7) of the Code. See 26 C.F.R. 54.4975-11.

Regulation 2550.408b-1

29 C.F.R. 2550.408b-1

Loans to Plan Participants and Beneficiaries

Originally issued July 20, 1989 (54 FR 30520)

a. (1) In General. Section 408(b)(1) of the Employee Retirement Income Security Act of 1974 (the Act of ERISA) exempts from the prohibitions of section 406(a), 406(b)(1), and 406(b)(2) loans by a plan to parties in interest who are participants or beneficiaries of the plan, provided that such loans:

    i. Are available to all such participants and beneficiaries on a reasonably equivalent basis;
    ii. Are not made available to highly compensated employees, officers or shareholders in an amount greater than the amount made available to other employees;
    iii. Are made in accordance with specific provisions regarding such loans set forth in the plan;
    iv. Bear a reasonable rate of interest; and
    v. Are adequately secured.

    The Internal Revenue Code (the Code) contains parallel provisions to section 408(b)(1) of the Act. Effective, December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to promulgate regulations of the type published herein to the Secretary of Labor. Therefore, all references herein to section 408(b)(1) of the Act should be read to include reference to the parallel provisions of section 4975(d)(1) of the Code.

    Section 1114(b)(15)(B) of the Tax Reform Act of 1986 amended section 408(b)(1)(B) of ERISA by deleting the phrase "highly compensated employees, officers or shareholders" and substituting the phrase "highly compensated employees (within the meaning of section 414(q) of the Internal Revenue Code of 1986)." Thus, for plans with participant loan programs which are subject to the amended section 408(b)(1)(B), the requirements of this regulation should be read to conform with the amendment.

2. Scope. Section 408(b)(1) of the Act does not contain an exemption from acts described in section 406(b)(3) of the Act (prohibiting fiduciaries from receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving plan assets). If a loan from a plan to a participant who is a party in interest with respect to that plan involves an act described in section 406(b)(3), such an act constitutes a separate transaction which is not exempt under section 408(b)(1) of the Act. The provisions of section 408(b)(1) are further limited by section 408(d) of the Act (relating to transactions with owner-employees and related persons).

3. Loans.

    i. Section 408(b)(1) of the Act provides relief from the prohibitions of section 406(a), 406(b)(1) and 406(b)(2) for the making of a participant loan. The term "participant loan" refers to a loan which is arranged and approved by the fiduciary administering the loan program primarily in the interest of the participant and which otherwise satisfies the criteria set forth in section 408(b)(1) of the Act. The existence of a participant loan or participant loan program will be determined upon consideration of all relevant facts and circumstances. Thus, for example, the mere presence of a loan document appearing to satisfy the requirements of section 408(b)(1) will not be dispositive of whether a participant loan exists where the subsequent administration of the loan indicates that the parties to the loan agreement did not intent the loan to be repaid. Moreover, a loan program containing a precondition designed to benefit a party in interest (other than the participant) is not afforded relief by section 408(b)(1) or this regulation. In this regard, section 408(b)(1) recognizes that a program of participant loans, like other plans investments, must be prudently established and administered for the exclusive purpose of providing benefits to participants and beneficiaries of the plan.
    ii. For the purpose of this regulation, the term "loan" will include any renewal or modification of an existing loan agreement, provided that, at the time of each such renewal or modification, the requirements of section 408(b)(1) and this regulation are met.

4. Examples. The following examples illustrate the provisions of section 2550.408b-1(a).

Example (1): T, a trustee of plan P, has exclusive discretion over the management and disposition of plan assets. As a result, T is a fiduciary with respect to P under section 3(21)(A) of the Act and a party in interest with respect to P pursuant to section 3(14)(A) of the Act. T is also a participant in P. Among T's duties as fiduciary is the administration of a participant loan program which meets the requirements of section 408(b)(1) of the Act. Pursuant to strict objective criteria stated under the program, T, who participates in all loan decisions, receives a loan on the same terms as other participants. Although the exercise of T's discretion on behalf of himself may constitute an act of self-dealing described in section 406(b)(1), section 408(b)(1) provides an exemption from section 406(b)(1). As a result, the loan from P to T would be exempt under section 408(b)(1), provided the conditions of that section are otherwise satisfied.

Example (2): P is a plan covering all the employees of E, the employer who established and maintained P. F is a fiduciary with respect to P and an officer of E. The plan documents governing P give F the authority to establish a participant loan program in accordance with section 408(b)(1) of the Act. Pursuant to an arrangement with E, F establishes such a program but limits the use of loan funds to investments in a limited partnership which is established and maintained by E as general partner. Under these facts, the loan program and any loans made pursuant to this program are outside the scope of relief provided by section 408(b)(1) because the loan program is designed to operate for the benefit of E. Under the circumstance described, the diversion of plan assets for E's benefit would also violate sections 403(c)(1) and 404(a) of the Act.

Example (3): Assume the same facts as in Example 2, above, except that F does not limit the use of loan funds. However, E pressures his employees to borrow funds under P's participant loan program and then reloan the loan proceeds to E. F, unaware of E's activities, arranges and approves the loans. If the loans meet all the conditions of section 408(b)(1), such loans will be exempt under that section. However, E's activities would cause the entire transaction to be viewed as an indirect transfer of plan assets between P and E, who is a party in interest with respect to P, but not the participant borrowing from P. By coercing the employees to engage in loan transactions for its benefit, E has engaged in separate transactions that are not exempt under section 408(b)(1). Accordingly, E would be liable for the payment of excise taxes under section 4975 of the Code.

Example (4): Assume the same facts as in Example 2, above, except that, in return for structuring and administering the loan program as indicated, E agrees to pay F an amount equal to 10 percent of the funds loaned under the program. Such a payment would result in a separate transaction not covered by section 408(b)(1). This transaction would be prohibited under

section 406(b)(3) since F would be receiving consideration from a party in connection with a transaction involving plan assets.

Example (5): F is a fiduciary with respect to plan P. D is a party in interest with respect to plan D. Section 406(a)(1)(B) of the Act would prohibit F from causing P to lend money to D. However, F enters into an agreement with Z, a plan participant, whereby F will cause P to make a participant loan to Z with the express understanding that Z will subsequently lend the loan proceeds to D. An examination of Z's credit standing indicates that he is not creditworthy and would not, under normal circumstances, receive a loan under the conditions established by the participant loan program. F's decision to approve the participant loan to Z on the basis of Z's prior agreement to lend the money to D violates the exclusive purposes requirements of sections 403(c) and 404(a). In effect, the entire transaction is viewed as an indirect transfer of plan assets between P and D, and not a loan to a participant exempt under section 408(b)(1). Z's lack of credit standing would also cause the transaction to fail under section 408(b)(1)(A) of the Act.

Example (6): F is a fiduciary with respect to Plan P. Z is a plan participant. Z and D are both parties in interest with respect to P. F approves a participant loan to Z in accordance with the conditions established under the participant loan program. Upon receipt of the loan, Z intends to lend the money to D. If F has approved this loan solely upon consideration of those factors which would be considered in a normal commercial setting by an entity in the business of making comparable loans, Z's subsequent use of the loan proceeds will not affect the determination of whether loans under P's program satisfy the conditions of section 408(b)(1).

Example (7): A is the trustee of a small individual account plan. D, the president of the plan sponsor, is also a participant in the plan. Pursuant to a participant loan program meeting the requirements of section 408(b)(1), D applies for a loan to be secured by a parcel of real property. D does not intent to repay the loan; rather, upon eventual default, he will permit the property to be foreclosed upon and transferred to the plan in discharge of his legal obligation to repay the loan. A, aware of D's intention, approves the loan. D fails to make two consecutive quarterly payments of principal and interest under the note evidencing the loan thereby placing the loan in default. The plan then acquires the real property upon foreclosure. Such facts and circumstances indicate that the payment of money from the plan to D was not a participant loan eligible for the relief afforded by section 408(b)(1). In effect, this transaction is a prohibited sale or exchange of property between a plan and a party in interest from the time D receives the money.

Example (8): Plan P establishes a participant loan program. All loans are subject to the condition that the borrowed funds must be used to finance home purchases. Interest rates on the loans are the same as those charged by a local savings and loan association under similar circumstances. A loan by P to a participant to finance a home purchase would be subject to the relief provided by section 408(b)(1) provided that the conditions of 408(b)(1) are met. A participant loan program which is established to make loans for certain stated purposes (e.g., hardship, college tuition, home purchases, etc.) but which is not otherwise designed to benefit parties in interest (other than plan participants) would not, in itself, cause such program to be ineligible for the relief provided by section 408(b)(1). However, fiduciaries are cautioned that operation of a loan program with limitations may result in loans not being made available to all participants and beneficiaries on a reasonably equivalent basis.

b. Reasonably Equivalent Basis.

1. Loans will not be considered to have been made available to participants and beneficiaries on a reasonably equivalent basis unless:

    i. Such loans are available to all plan participants and beneficiaries without regard to any individual's race, color, religion, sex, age or national origin:
    ii. In making such loans, consideration has been given only to those factors which would be considered in a normal commercial setting by an entity in the business of making similar types of loans. Such factors may include the applicant's creditworthiness and financial need; and
    iii. An evaluation of all relevant facts and circumstances indicates that, in actual practice, loans are not unreasonably withheld from any applicant.

2. A participant loan program will not fail the requirement of paragraph (b)(1) of this section or

section 2550.408b-1(c) if the program establishes a minimum loan amount of up to $1,000, provided that the loans granted meet the requirements of section 2550.408b-1(f).

3. Examples. The following examples illustrate the provisions of section 2550.408b-1(b)(1):

   Example (1): T, a trustee of plan P, has exclusive discretion over the management and disposition of plan assets. T's duties include the administration of a participant loan program which meets the requirements of section 408(b)(1) of the Act. T receives a participant loan at a lower interest rate than the rate made available to other plan participants of similar financial condition or creditworthiness with similar security. The loan by P to T would not be covered by the relief provided by section 408(b)(1) because loans under P's program are not available to all plan participants on a reasonably equivalent basis.

   Example (2): Same facts as in example 1 except that T is a member of a committee of trustees responsible for approving participant loans. T pressures the committee to refuse loans to other qualified participants in order to assure that the assets allocated to the participants loan program would be available for a loan by P to T. The loan by P to T would not be covered by the relief provided by section 408(b)(1) since participant loans have not been made available to all participants and beneficiaries on a reasonably equivalent basis.

   Example (3): T is the trustee of plan P, which covers the employees of E. A, B and C are employees of E, participants in P, and friends of T. The documents governing P provide that T, in his discretion, may establish a participant loan program meeting certain specified criteria. T institutes such a program and tells A, B and C of his decision. Before T is able to notify P's other participants and beneficiaries of the loan program, A, B, and C file loan applications which, if approved, will use up substantially all of the funds set aside for the loan program. Approval of these applications by T would represent facts and circumstances showing that loans under P's program are not available to all participants and beneficiaries on a reasonably equivalent basis.

c. Highly Compensated Employees.

   1. Loans will not be considered to be made available to highly compensated employees, officers or shareholders in an amount greater that the amount made available to other employees if, upon consideration of all relevant facts and circumstances, the program does not operate to exclude large numbers of plan participants from receiving loans under the program.
   2. A participant loan program will not fail to meet the requirement in paragraph (c)(1), of this section, merely because the plan documents specifically governing such loans set forth either (i) a maximum dollar limitation, or (ii) a maximum percentage of vested accrued benefit which no loan may exceed.
   3. If the second alternative in paragraph (c)(2) of this section (maximum percentage of vested accrued benefit) is chosen, a loan program will not fail to meet this requirement solely because maximum loan amounts will vary directly with the size of the participant's accrued benefit.
   4. Examples. The following examples illustrate the provisions of section 2550.408b-1(c).

      Example (1): The documents governing plan P provide for the establishment of a participant loan program in which the amount of any loan under the program (when added to the outstanding balance of any other loans under the program to the same participant) does not exceed the lesser of (i) $50,000, or (ii) one-half of the present value of that participant's vested accrued benefit under the plan (but not less than $10,000). P's participant loan program does not fail to meet the requirement in section 408(b)(1)(B) of the Act, and would be covered by the relief provided by section 408(b)(1) if the other conditions of that section are met.

      Example (2): The documents governing plan T provide for the establishment of a participant loan program in which the minimum loan amount would be $25,000. The documents also require that the only security acceptable under the program would be the participant's vested accrued benefit. A, the plan fiduciary administering the loan program, finds that because of the restrictions in the plan documents only 20 percent of the plan participants, all of whom earn in excess of $75,000 a year, would meet the threshold qualifications for a loan. Most of these participants are high-level supervisors or corporate officers. Based on these facts, it appears that loans under the program would be made available to highly compensated employees in an amount greater than the amount made available to other employees. As a result, the loan program would fail to meet the requirements in section 408(b)(1)(B) of the Act and would not be covered by the relief provided in section 408(b)(1).

d. Specific Plan Provisions. For the purpose of section 408(b)(1) and this regulation, the Department will consider that participant loans granted or renewed at any time prior to the last day of the first plan year beginning on or after January 1, 1989, are made in accordance with specific provisions regarding such loans set forth in the plan if:

1. The plan provisions regarding such loans contain (at a minimum) an explicit authorization for the plan fiduciary responsible for investing plan assets to establish a participant loan program; and
2. For participant loans granted or renewed on or after the last day of the first plan year beginning on or after January 1, 1989, the participant loan program which is contained in the plan or in a written document forming part of the plan includes, but need not be limited to, the following:

    i. The identify of the person or positions authorized to administer the participant loan program;
    ii. A procedure for applying for loans;
    iii. The basis on which loans will be approved or denied;
    iv. Limitations (if any) on the types and amount of loans offered;
    v. The procedure under the program for determining a reasonable rate of interest;
    vi. The types of collateral which may secure a participant loan; and
    vii. The events constituting default and the steps that will be taken to preserve plan assets in the event of such default.

Example (1): Plan P authorizes the trustee to establish a participant loan program in accordance with section 408(b)1) of the Act. Pursuant to this explicit authority, the trustee establishes a written program which contains all of the information required by section 2550.408b-1(d)(2) . Loans made pursuant to this authorization and the written loan program will not fail under section 408(b)(1)(C) of the Act merely because the specific provisions regarding such loans are contained in a separate document forming part of the plan. The specific provisions describing the loan program whether contained in the plan or in a written document forming part of a plan, do affect the rights and obligations of the participants and beneficiaries under the plan and, therefore, must in accordance with section 102(a)(1) of the Act, be disclosed in the plan's summary plan description.

e. Reasonable Rate of Interest. A loan will be considered to bear a reasonable rate of interest if such loan provides the plan with a return commensurate with the rates of charged by persons in the business of lending money for loans which would be made under similar circumstances.

Example (1): Plan P makes a participant loan to A at the fixed interest rate of 8% for 5 years. The trustees, prior to making the loan, contacted two local banks to determine under what terms the banks would make a similar loan taking into account A's creditworthiness and the collateral offered. One bank would charge a variable rate of 10% adjusted monthly for a similar loan. The other bank would charge a fixed rate of 12% under similar circumstances. Under these facts, the loan to A would not bear a reasonable rate of interest because the loan did not provide P with a return commensurate with interest rates charged by persons in the business of lending money for loans which would be made under similar circumstances. As a result, the loan would fail to meet the requirement of section 408(b)(1)(D) and would not be covered by the relief provided by section 408(b)(1) if the Act.

Example (2): Pursuant to the provisions of plan P's participant loan program, T, the trustee of P, approves a loan to M, a participant and party in interest with respect to P. At the time of execution, the loan meets all of the requirements of section 408(b)(1) of the Act. The loan agreement provides that at the end of two years M must pay the remaining balance in full or the parties may renew for an additional two year period. At the end of the initial two year period, the parties agree to renew the loan for an additional two years. At the time of renewal, however, A fails to adjust the interest rate charged on the loan in order to reflect current economic conditions. As a result, the interest rate on the renewal fails to provide a "reasonable rate of interest" as required by section 408(b)(1)(D) of the Act. Under such circumstance, the loan would not be exempt under section 408(b)(1) of the Act from the time of renewal.

Example (3): The documents governing plan P's participant loan program provide that loans must bear an interest rate no higher than the maximum interest rate permitted under State X's usury law. Pursuant to the loan program, P makes a participant loan to A, a plan participant, at a time when the interest rates charged by financial institutions in the community (not subject to the usury limit) for similar loans are higher than the usury limit. Under these circumstances, the loan would not bear a reasonable rate of interest because the loan does not provide P with a return commensurate with the interest rates

charged by persons in the business of lending money under similar circumstances. In addition, participant loans that are artificially limited to the maximum usury ceiling then prevailing call into question the status of such loans under sections 403(c) and 404(a) where higher yielding comparable investment opportunities are available to the plan.

f. Adequate Security.

1. A loan will be considered to be adequately secured if the security posed for such loan is something in addition to and supporting a promise to pay, which is so pledged to the plan that it may be sold, foreclosed upon, or otherwise disposed of upon default of repayment of the loan, the value and liquidity of which security is such that it may reasonably be anticipated that loss of principal or interest will not result from the loan. The adequacy of such security will be determined in light of the type and amount of security which would be required in the case of an otherwise identical transaction in a normal commercial setting between unrelated parties on arms'-length terms. A participant's vested accrued benefit under a plan may be used as security for a participant loan to the extent of the plan's ability to satisfy the participant's outstanding obligation in the event of default.
2. For purposes of this paragraph -

    i. no more than 50% of the present value of a participant's vested accrued benefit may be considered by a plan as security for the outstanding balance of all plan loans made to that participant;
    ii. a plan will be in compliance with paragraph (f)(2)(i) of this section if, with respect to any participant, it meets the provisions of paragraph (f)(2)(i) of this section immediately after the origination of each participant loan secured in whole in part by that participant's vested accrued benefit; and
    iii. any loan secured in whole or in part by a portion of a participant's vested accrued benefit must also meet the requirements of paragraph (f)(1) of this section.

g. Effective date. This section is effective for all participant loans granted or renewed after October 18, 1989, except with respect to paragraph (d)(2) of this section relating to specific plan provisions. Paragraph (d)(2) of this section is effective for participant loans granted or renewed on or after the last day of the first plan year beginning on or after January 1, 1989.

Department of Labor

Regulation 2550.408b-2

29 C.F.R. 2550.408b-2

Services or Office Space Class Exemption

Originally issued June 24, 1977 (42 FR 32390)

a. In General. Section 408(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) exempts from the prohibitions of section 406(a) of the Act payment by a plan to a party in interest, including a fiduciary, for office space or any service (or a combination of services) if (1) such office space or service is necessary for the establishment or operation of the plan (2) such office space or service is furnished under a contract or arrangement which is reasonable and (3) no more than reasonable compensation is paid for such office space or service. However, section 408(b)(2) does not contain an exemption from acts described in section 406(b)(1) of the Act (relating to fiduciaries dealing with the assets of plans in their own interest or for their own account), section 406(b)(2) of the Act (relating to fiduciaries in their individual or in any other capacity acting in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries) or section 406(b)(3) of the Act (relating to fiduciaries receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving the assets of the plan). Such acts are separate transactions not described in section 408(b)(2). See 2550.408b-2(e) and (f) for guidance as to whether transactions relating to the furnishing of office space or services by fiduciaries to plans involve acts described in section 406(b)(1) of the Act. Section 408(b)(2) of the Act does not contain an exemption from other provisions of the Act, such as section 404, or other provisions of law which may impose requirements or restrictions relating to the transactions which are exempt under section 408(b)(2). See, for example, section 401 of the Internal Revenue Code of 1954. The provisions of section 408(b)(2) of the Act are further limited by section 408(d) of the Act (relating to transactions with owner-employees and related

persons).

b. Necessary service. A service is necessary for the establishment or operation of a plan within the meaning of section 408(b)(2) of the Act and 2550.408b-2(a)(1) if the service is appropriate and helpful to the plan obtaining the service in carrying out the purposes for which the plan is established or maintained. A person providing such a service to a plan (or a person who is a party in interest solely by reason of a relationship to such a service provider described in section 3(14)(F), (G), (H), or (I) of the Act) may furnish goods which are necessary for the establishment or operation of the plan in the course of, and incidental to, the furnishing of such service to the plan.
c. Reasonable contract or arrangement. No contract or arrangement is reasonable within the meaning of section 408(b)(2) of the Act and 2550.408b-2(a)(2) if it does not permit termination by the plan without penalty to the plan on reasonably short notice under the circumstances to prevent the plan from becoming locked into an arrangement that has become disadvantageous. A long-term lease which may be terminated prior to its expiration (without penalty to the plan) on reasonably short notice under the circumstances is not generally an unreasonable arrangement merely because of its long term. A provision in a contract or other arrangement which reasonably compensates the service provider or lessor for loss upon early termination of the contract, arrangement or lease is not a penalty. For example, a minimal fee in a service contract which is charged to allow recoupment of reasonable start-up costs is not a penalty. Similarly, a provision in a lease for a termination fee that covers reasonably foreseeable expenses related to the vacancy and reletting of the office space upon early termination of the lease is not a penalty. Such a provision does not reasonably compensate for loss if it provides for payment in excess of actual loss or if it fails to require mitigation of damages.
d. Reasonable compensation. Section 408(b)(2) of the Act and 2550.408b-2(a)(3) permit a plan to pay a party in interest reasonable compensation for the provision of office space or services described in section 408(b)(2). Section 2550.408c-2 of these regulations contains provisions relating to what constitutes reasonable compensation for the provision of services.
e. Transactions with fiduciaries.

    1. In General. If the furnishing of office space or a service involves an act described in section 406(b) of the Act (relating to acts involving conflicts of interest by fiduciaries), such an act constitutes a separate transaction which is not exempt under section 408(b)(2) of the Act. The prohibitions of section 406(b) supplement the other prohibitions of section 406(a) of the Act by imposing on parties in interest who are fiduciaries a duty of undivided loyalty to the plans for which they act. These prohibitions are imposed upon fiduciaries to deter them from exercising the authority, control, or responsibility which makes such persons fiduciaries when they have interests which may conflict with the interests of the plans for which they act. In such cases, the fiduciaries have interests in the transactions which may affect the exercise of their best judgment as fiduciaries. Thus, a fiduciary may not use the authority, control, or responsibility which makes such person a fiduciary to cause a plan to pay an additional fee to such fiduciary (or to a person in which such fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary) to provide a service. Nor may a fiduciary use such authority, control, or responsibility to cause a plan to enter into a transaction involving plan assets whereby such fiduciary (or a person in which such fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary) will receive consideration from a third party in connection with such transaction. A person in which a fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary includes, for example, a person who is a party in interest by reason of a relationship to such fiduciary described in section 3(14)(E), (F), (G), (H), or (I).
    2. Transactions not described in Section 406(b)(1). A fiduciary does not engage in an act described in section 406(b)(1) of the Act if the fiduciary does not use any of the authority, control or responsibility which makes such person a fiduciary to cause a plan to pay additional fees for a service furnished by such fiduciary or to pay a fee for a service furnished by a person in which such fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary. This may occur, for example, when one fiduciary is retained on behalf of a plan by a second fiduciary to provide a service for an additional fee. However, because the authority, control or responsibility which makes a person a fiduciary may be exercised "in effect" as well as in form, mere approval of the transaction by a second fiduciary does not mean that the first fiduciary has not used any of the authority, control or responsibility which makes such person a fiduciary to cause the plan to pay the first fiduciary an additional fee for a service. See paragraph (f) below.
    3. Services without compensation. If a fiduciary provides services to a plan without the receipt of compensation or other consideration [other than reimbursement of direct expenses properly and actually incurred in the performance of such services within the meaning of 2550.408c-2(b)(3)],

the provision of such services does not, in and of itself, constitute an act described in section 406(b) of the Act. The allowance of a deduction to an employer under section 162 or 12 of the Code for the expense incurred in furnishing office space or services to a plan established or maintained by such employer does not constitute compensation or other consideration.

f. Examples. The provisions of 2550.408b-2(e) may be illustrated by the following examples.

Example (1). E, an employer whose employees are covered by plan P, is a fiduciary of P. I is a professional investment adviser in which E has no interest which may affect the exercise of E's best judgment as a fiduciary. E causes P to retain I to provide certain kinds of investment advisory services of a type which causes I to be a fiduciary of P under section 3(21)(A)(ii) of the Act. Thereafter, I proposes to perform for additional fees portfolio evaluation services in addition to the services currently provided. The provision of such services is arranged by I and approved on behalf of the plan by E. I has not engaged in an act described in section 406(b)(1) of the Act, because I did not use any of the authority, control or responsibility which makes I a fiduciary (the provision of investment advisory services) to cause the plan to pay I additional fees for the provision of the portfolio evaluation services. E has not engaged in an act which is described in section 406(b)(1). E, as the fiduciary who has the responsibility to be prudent in this selection and retention of I and the other investment advisers of the plan, has an interest in the purchase by the plan of portfolio evaluation services. However, such an interest is not an interest which may affect the exercise of E's best judgment as a fiduciary.

Example (2). D, a trustee of plan P with discretion over the management and disposition of plan assets, relies on the advice of C, a consultant to P, as to the investment of plan assets, thereby making C a fiduciary of the plan. On January 1, 1978, C recommends to D that the plan purchase an insurance policy from U, an insurance company which is not a party in interest with respect to P. C thoroughly explains the reasons for the recommendation and makes a full disclosure concerning the fact that C will receive a commission from U upon the purchase of the policy by P. D considers the recommendation and approves the purchase of the policy by P. C receives a commission. Under such circumstances, C has engaged in an act described in section 406(b)(1) of the Act (as well as sections 406(b)(2) and (3) of the Act) because C is in fact exercising the authority, control or responsibility which makes C a fiduciary to cause the plan to purchase the policy. However, the transaction is exempt from the prohibited transaction provisions of section 406 of the Act, if the requirements of Prohibited Transaction Exemption 77-9 are met.

Example (3). Assume the same facts as in Example (2) except that the nature of C's relationship with the plan is not such that C is a fiduciary of P. The purchase of the insurance policy does not involve an act described in section 406(b)(1) of the Act (or sections 406(b)(2) or (3) of the Act) because such sections only apply to acts by fiduciaries.

Example (4). E, an employer whose employees are covered by plan P, is a fiduciary with respect to P. A, who is not a party in interest with respect to P, persuades E that the plan needs the services of a professional investment adviser and that A should be hired to provide the investment advice. Accordingly, E causes P to hire A to provide investment advice of the type which makes A a fiduciary under 2510.3-21(c)(1)(ii)(B). Prior to the expiration of A's first contract with P, A persuades E to cause P to renew A's contract with P to provide the same services for additional fees in view of the increased costs in providing such services. During the period of A's second contract, A provides additional investment advice services for which no additional charge is made. Prior to the expiration of A's second contract, A persuades E to cause P to renew his contract for additional fees in view of the additional services A is providing. A has not engaged in an act described in section 406(b)(1) of the Act, because A has not used any of the authority, control or responsibility which makes A a fiduciary (the provision of investment advice) to cause the plan to pay additional fees for A's services.

Example (5). F, a trustee of plan P with discretion over the management and disposition of plan assets, retains C to provide administrative services to P of the type which makes C a fiduciary under section 3(21)(A)(iii). Thereafter, C retains F to provide for additional fees actuarial and various kinds of administrative services in addition to the services F is currently providing to P. Both F and C have engaged in an act described in section 406(b)(1) of the Act. F, regardless of any intent which he may have had at the time he retained C, has engaged in such an act because F has, in effect, exercised the authority, control or responsibility which makes F a fiduciary to cause the plan to pay F additional fees for the services. C, whose continued

employment by P depends on F, has also engaged in such an act, because C has an interest in the transaction which might affect the exercise of C's best judgment as a fiduciary. As a result, C has dealt with plan assets in his own interest under section 406(b)(1).

Example (6). F, a fiduciary of plan P with discretionary authority respecting the management of P, retains S, the son of F, to provide for a fee various kinds of administrative services necessary for the operation of the plan. F has engaged in an act described in section 406(b)(1) of the Act because S is a person in whom F has an interest which may affect the exercise of F's best judgment as a fiduciary. Such act is not exempt under section 408(b)(2) of the Act irrespective of whether the provision of the services by S is exempt.

Example (7). T, one of the trustees of plan P, is president of bank B. The bank proposes to provide administrative services to P for a fee. T physically absents himself from all consideration of B's proposal and does not otherwise exercise any of the authority, control or responsibility which makes T a fiduciary to cause the plan to retain B. The other trustees decide to retain B. T has not engaged in an act described in section 406(b)(1) of the Act. Further, the other trustees have not engaged in an act described in section 406(b)(1) merely because T is on the board of trustees of P. This fact alone would not make them have an interest in the transaction which might affect the exercise of their best judgment as fiduciaries.

Department of Labor

Regulation 2550.408b-3

29 C.F.R. 2550.408b-3

Loans to Employee Stock Ownership Plans

Originally issued September 2, 1977 (42 FR 44385)

Technical corrections September 13, 1977 (42 FR 45907)

Amended April 30, 1984 (49 FR 18295)

a. Definitions. When used in this section, the terms listed below have the following meanings:

1. ESOP. The term "ESOP" refers to an employee stock ownership plan that meets the requirements of section 407(d)(6) of the Employee Retirement Income Security Act of 1974 (the Act) and 29 C.F.R. 2550.407d-6. It is not synonymous with "stock bonus plan." A stock bonus plan must, however, be an ESOP to engage in an exempt loan. The qualification of an ESOP under section 401(a) of the Internal Revenue Code (the Code) and 26 C.F.R. 54.4975-11 will not be adversely affected merely because it engages in a non-exempt loan.
2. Loan. The term "loan" refers to a loan made to an ESOP by a party in interest or a loan to an ESOP which is guaranteed by a party in interest. It includes a direct loan of cash, a purchase-money transaction, and an assumption of the obligation of the ESOP. "Guarantee" includes an unsecured guarantee and the use of assets of a party in interest as collateral for a loan, even though the use of assets may not be a guarantee under applicable state law. An amendment of a loan in order to qualify as an exempt loan is not a refinancing of the loan or the making of another loan.
3. Exempt Loan. The term "exempt loan" refers to a loan that satisfies the provisions of this section. A "non-exempt loan" is one that fails to satisfy such provisions.
4. Pubicly traded. The term "publicly traded" refers to a security that is listed on a national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f) or that is quoted on a system sponsored by a national securities association registered under section 15A(b) of the Securities Exchange Act (15 U.S.C. 78o).
5. Qualifying Employer Security. The term "qualifying employer security" refers to a security described in 29 C.F.R. 2550.407d-5.

b. Statutory Exemption -

1. Scope. Section 408(b)(3) of the Act provides an exemption from the prohibited transaction provisions of sections 406(a) and 406(b)(1) of the Act (relating to fiduciaries dealing with the assets of plans in their own interest or for their own account) and 406(b)(2) of the Act (relating to fiduciaries in their individual or in any other capacity acting in any transaction involving the plan

on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries). Section 408(b)(3) does not provide an exemption from the prohibitions of [section 406(b)(3) of the Act] (relating to fiduciaries receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving the income or assets of the plan).

2. Special scrutiny of transaction. The exemption under [section 408(b)(3)] includes within its scope certain transactions in which the potential for self-dealing by fiduciaries exists and in which the interests of fiduciaries may conflict with the interests of participants. To guard against these potential abuses, the Department of Labor will subject these transactions to special scrutiny to ensure that they are primarily for the benefit of participants and their beneficiaries. Although the transactions need not be arranged and approved by an independent fiduciary, fiduciaries are cautioned to scrupulously exercise their discretion in approving them. For example, fiduciaries should be prepared to demonstrate compliance with the net effect test and the arm's-length standard under paragraphs (c)(2) and (3) of this section. Also, fiduciaries should determine that the transaction is truly arranged primarily in the interest of participants and their beneficiaries rather than, for example, in the interest of certain selling shareholders.

c. Primary benefit requirement --

1. In General. An exempt loan must be primarily for the benefit of the ESOP participants and their beneficiaries. All the surrounding facts and circumstances, including those described in paragraphs (c)(2) and (3) of this section, will be considered in determining whether such loan satisfies this requirement. However, no loan will satisfy such requirement unless it satisfies the requirements of paragraphs (d), (e) and (f) of this section.
2. Net effect on plan assets. At the time that a loan is made, the interest rate for the loan and **the price of securities to be acquired with the loan proceeds should not be such that plan assets might be drained off** (Emphasis added).
3. Arm's-length standard. The terms of a loan, whether or not between independent parties, must, at the time the loan is made, be at least as favorable to the ESOP as the terms of a comparable loan resulting from arm's-length negotiations between independent parties.

d. Use of loan proceeds. The proceeds of an exempt loan must be used, within a reasonable time after their receipt, by the borrowing ESOP only for any or all of the following purposes:

1. To acquire qualifying employer securities.
2. To repay such loan.
3. To repay a prior exempt loan. A new loan, the proceeds of which are so used, must satisfy the provisions of this section. Except as provided in paragraphs (i) and (j) of this section or as otherwise required by applicable law, no security acquired with the proceeds of an exempt loan may be subject to a put, call, or other option, or buy-sell or similar arrangement while held by and when distributed from a plan, whether or not the plan is then an ESOP.

e. Liability and collateral of ESOP for loan. An exempt loan must be without recourse against the ESOP. Furthermore, the only assets of the ESOP that may be given as collateral on an exempt loan are qualifying employer securities of two classes: those acquired with the proceeds of the exempt loan and those that were used as collateral on a prior exempt loan repaid with the proceeds of the current exempt loan. No person entitled to payment under the exempt loan shall have any right to assets of the ESOP other than:

1. Collateral given for the loan,
2. Contributions (other than contributions of employer securities) that are made under an ESOP to meet its obligations under the loan, and
3. Earnings attributable to such collateral and the investment of such contributions.

The payments made with respect to an exempt loan by the ESOP during a plan year must not exceed an amount equal to the sum of such contributions and earnings received during or prior to the year less such payments in prior years. Such contributions and earnings must be accounted for separately in the books of account of the ESOP until the loan is repaid.

f. Default. In the event of default upon an exempt loan, the value of plan assets transferred in satisfaction of the loan must not exceed the amount of default. If the lender is a party in interest, a loan must provide for a transfer of plan assets upon default only upon and to the extent of the failure of the plan to meet the payment schedule of the loan. For purposes of this paragraph, the making of a guarantee

does not make a person a lender.

g. Reasonable rate of interest. The interest rate of a loan must not be in excess of a reasonable rate of interest. All relevant factors will be considered in determining a reasonable rate of interest, including the amount and duration of the loan, the security and guarantee (if any) involved, the credit standing of the ESOP and the guarantor (if any), and the interest rate prevailing for comparable loans. When these factors are considered, a variable interest rate may be reasonable.

h. Release from encumbrance --

   1. General rule. In general, an exempt loan must provide for the release from encumbrance of plan assets used as collateral for the loan under this paragraph. For each plan year during the duration of the loan, the number of securities released must equal the number of encumbered securities held immediately before release for the current plan year multiplied by a fraction. The numerator of the fraction is the amount of principal and interest paid for the year. The denominator of the fraction is the sum of the numerator plus the principal and interest to be paid for all future years. See Section 2550.408b-3(h)(4). The number of future years under the loan must be definitely ascertainable and must be determined without taking into account any possible extensions or renewal periods. If the interest rate under the loan is variable, the interest to be paid in future years must be computed by using the interest rate applicable as of the end of the plan year. If collateral includes more than one class of securities, the number of securities of each class to be released for a plan year must be determined by applying the same fraction to each class.
   2. Special rule. A loan will not fail to be exempt merely because the number of securities to be released from encumbrance is determined solely with reference to principal payments. However, if release is determined with reference to principal payments only, the following three additional rules apply. The first rule is that the loan must provide for annual payments of principal and interest at a cumulative rate that is not less rapid at any time than level annual payments of such amounts for 10 years. The second rule is that interest included in any payment is disregarded only to the extent that it would be determined to be interest under standard loan amortization tables. The third rule is that subdivision (2) is not applicable from the time that, by reason of a renewal, extension, or refinancing, the sum of the expired duration of the exempt loan, the renewal period, the extension period, and the duration of a new exempt loan exceeds 10 years.
   3. Caution against plan disqualification. Under an exempt loan, the number of securities released from encumbrance may vary from year to year. The release of securities depends upon certain employer contributions and earnings under the ESOP. Under [26 C.F.R. 54.4975-11(d)(2)] actual allocations to participants' accounts are based upon assets withdrawn from the suspense account. Nevertheless, for purposes of applying the limitations under section 415 of the Code to these allocations, under [26 C.F.R. 54.4975-11(a)(8)(ii)] contributions used by the ESOP to pay the loan are treated as annual additions to participants' accounts. Therefore, particular caution must be exercised to avoid exceeding the maximum annual additions under section 415 of the Code. At the same time, release from encumbrance in annually varying numbers may reflect a failure on the part of the employer to make substantial and recurring contributions to the ESOP which will lead to loss of qualification under section 401(a) of the Code. The Internal Revenue Service will observe closely the operation of ESOPs that release encumbered securities in varying annual amounts, particularly those that provide for the deferral of loan payments or for balloon payments. See 26 C.F.R. 54.4975-7(b)(8)(iii).
   4. Illustration. The general rule under paragraph (h)(1) of this section operates as illustrated in the following example:

      Example. Corporation X establishes an ESOP that borrows $750,000 from a bank. X guarantees the loan which is for 15 years at 5% interest and is payable in level annual amounts of $72,256.72. Total payments on the loan are $1,083,850.80. The ESOP uses the entire proceeds of the loan to acquire 15,000 shares of X stock which is used as collateral for the loan. The number of securities to be released for the first year is 1,000 shares,

      i.e., 15,000 shares x $72,256.72/$1,083,850.80 = 15,000 shares x 1/15. The number of securities to be released for the second year is 1,000 shares, i.e., 14,000 shares x $72,256.72/$1,011,594.08 = 14,000 shares x 1/14. If all loan payments are made as originally scheduled, the number of securities released in each succeeding year of the loon will also be 1,000.

i. Right of first refusal. Qualifying employer securities acquired with proceeds of an exempt loan may, but need not, be subject to a right of first refusal. However, any such right must meet the requirements of

this paragraph. Securities subject to such right must be stock or an equity security, or a debt security convertible into stock or an equity security. Also, they must not be publicly traded at the time the right may be exercised. The right of first refusal must be in favor of the employer, the ESOP, or both in any order of priority. The selling price and other terms under the right must not be less favorable to the seller than the greater of the value of the security determined under 26 C.F.R. 54.4975-11(d)(5), or the purchase price and other terms offered by a buyer, other than the employer or the ESOP, making a good faith offer to purchase the security. The right of first refusal must lapse no later than 14 days after the security holder gives written notice to the holder of the right that an offer by a third party to purchase the security has been received.

j. Put option. A qualifying employer security acquired with the proceeds of an exempt loan by an ESOP after September 30, 1976, must be subject to a put option if it is not publicly traded when distributed or if it is subject to a trading limitation when distributed. For purposes of this paragraph, a "trading limitation" on a security is a restriction under any Federal or State securities law or any regulation thereunder, or an agreement (not prohibited by this section) affecting the security which would make the security not as freely tradable as one not subject to such restriction. The put option must be exercisable only by a participant, by the participant's donee(s), or by a person (including an estate or its distributes) to whom the security passes by reason of a participant's death. (Under this paragraph "participant" means a participant and the beneficiaries of the participant under the ESOP.) The put option must permit a participant to put the security to the employer. Under no circumstances may the put option bind the ESOP. However, it may grant the ESOP an option to assume the rights and obligations of the employer at the time that the put option is exercised. If it is known at the time a loan is made that Federal or state law will be violated by the employer's honoring such option, the put option must permit the security to be put, in a manner consistent with such law, to a third party (e.g., an affiliate of the employer or a shareholder other than the ESOP) that has substantial net worth at the time the loan is made and whose net worth is reasonably expected to remain substantial.

k. Duration of put option. --

    1. General rule. A put option must be exercisable at least during a 15-month period which begins the date the security subject to the put option is distributed by the ESOP.
    2. Special rule. In the case of a security that is publicly traded without restriction when distributed but ceases to be so traded within 15 months after distribution, the employer must notify each security holder in writing on or before the tenth day after the date the security ceases to be so traded that for the remainder of the 15-month period the security is subject to a put option. The number of days between the tenth day and the date on which notice is actually given, if later than the tenth day, must be added to the duration of the put option. The notice must inform distributee(s) of the terms of the put options that they are to hold. The terms must satisfy the requirements of paragraphs (j) through (i) of this section.

l. Other put option provisions. --

    1. Manner of exercise. A put option is exercised by the holder notifying the employer in writing that the put option is being exercised.
    2. Time excluded from duration of put option. The period during which a put option is exercisable does not include any time when a distributee is unable to exercise it because the party bound by the put option is prohibited from honoring it by applicable Federal or state law.
    3. Price. The price at which a put option must be exercisable is the value of the security, determined in accordance with paragraph (d)(5) of 26 C.F.R. 54.4975-11.
    4. Payment terms. The provisions for payment under a put option must be reasonable. The deferral of payment is reasonable if adequate security and a reasonable interest rate are provided for any credit extended and if the cumulative payments at any time are no less than the aggregate of reasonable periodic payments as of such time. Periodic payments are reasonable if annual installments, beginning with 30 days after the date the put option is exercised, are substantially equal. Generally, the payment period may not end more than 5 years after the date the put option is exercised. However, it may be extended to a date no later than the earlier of 10 years from the date the put option is exercised or the date the proceeds of the loan used by the ESOP to acquire the security subject to such put option are entirely repaid.
    5. Payment restrictions. Payment under a put option may be restricted by the terms of a loan, including one used to acquire a security subject to a put option, made before November 1, 1977. Otherwise, payment under a put option must not be restricted by the provisions of a loan or any other arrangement, including the terms of the employer's articles of incorporation, unless so required by applicable state law.

m. Other terms of loan. An exempt loan must be for a specific term. Such loan may not be payable at the

demand of any person, except in the case of default.

n. Status of paln as ESOP. To be exempt, a loan must be made to a plan that is an ESOP at the time of such loan. However, a loan to a plan formally designated as an ESOP at the time of the loan that fails to be an ESOP because it does not comply with section 401 (a) of the Code or 26 C.F.R. 54.4975-11 will be exempt as of the time of such loan if the plan is amended retroactively under section 401(b) of the Code or 26 C.F.R. 54.4975-11(a)(4).
o. Special rules for certain loans. --

1. Loans made before January 1, 1976. A loan made before January 1, 1976, or made afterwards under a binding agreement in effect on January 1, 1976 (or under renewals permitted by the terms of such an agreement on that date) is exempt for the entire period of such loan if it otherwise satisfies the provisions of this section for such period, even though it does not satisfy the following provisions of this section:

    i. The last sentence of paragraph (d);
    ii. Paragraphs (e), (f), and (h)(1) and (2); and
    iii. Paragraphs (i) through (m), inclusive.

2. Loans made after December 31, 1975, BUT BEFORE November 1, 1977. A loan made after December 31, 1975, but before November 1, 1977, or made afterwards under a binding agreement in effect on November 1, 1977, (or under renewals permitted by the terms of such an agreement on that date) is exempt for the entire period of such loan if it otherwise satisfies the provisions of this section for such period even though it does not satisfy the following provisions of this section:

    i. Paragraph (f);
    ii. The three provisions of paragraph (h)(2): and
    iii. Paragraph (i).

3. Release rule. Notwithstanding paragraphs (o)(1) and (2) of this section, if the proceeds of a loan are used to acquire securities after November 1, 1977, the loan must comply by such date with the provisions of paragraph (h) of this section.
4. Default rule. Notwithstanding paragraphs (o)(1) and (2) of this section, a loan by a party in interest other than a guarantor must satisfy the requirements of paragraph (f) of this section. A loan will satisfy these requirements if it is retroactively amended before November 1, 1977, to satisfy these requirements.
5. Put option rule. With respect to a security distributed before November 1, 1977, the put option provisions of paragraphs (j), (k), and (l) of this section will be deemed satisfied as of the date the security is distributed if by December 31, 1977, the security is subject to a put option satisfying such provisions. For purposes of satisfying such provisions, the security will be deemed distributed on the date the put option is issued. However, the put option provisions need not be satisfied with respect to a security that is not owned on November 1, 1977, by a person in whose hands a put option must be exercisable.

Department of Labor

Regulation 2550.408b-4

29 C.F.R. 2550.408b-4

Investment in Own-Bank Interest-Bearing Deposits

Originally issued June 24, 1977 (42 FR 32392)

a. In General.

Section 408(b)(4) of the Employee Retirement Income Security Act of 1974 (the Act) exempts from the prohibition of Section 406 of the Act the investment of all or a part of a plan's assets in deposits bearing a reasonable rate of interest in a bank or similar financial institution supervised by the United States or a State, even though such bank or similar financial institution is a fiduciary or other party in interest with respect to the plan, if the conditions of either Part 2550.408b-4(b)(1) or Part 2550.408b-4(b)(2) are met.

Section 408(b)(4) provides an exemption from Section 406(b)(1) of the Act (relating to fiduciaries dealing with the assets of plans in their own interest or for their own account) and 406(b)(2) of the Act

(relating to fiduciaries in their individual or in any other capacity acting in any transaction involving the plan on behalf of a party -- or representing a party -- whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries), as well as Section 406(a)(1), because Section 408(b)(4) contemplates a bank or similar financial institution causing a plan for which it acts as a fiduciary to invest plan assets in its own deposits if the requirements of Section 408(b)(4) are met.

However, it does not provide an exemption from Section 406(b)(3) of the Act (relating to fiduciaries receiving consideration for their own personal account from any part dealing with a plan in connection with a transaction involving the assets of the plan). The receipt of such consideration is a separate transaction not described in the statutory exemption. Section 408(b)(4) does not contain an exemption from other provisions of the Act, such as Section 404, or other provisions of law which may impose requirements or restrictions relating to the transactions which are exempt under Section 408(b)(4) of the Act. See, for example, Section 401 of the Internal Revenue Code of 1954 (Code). The provisions of Section 408(b)(4) of the Act are further limited by Section 408(d) of the Act (relating to transactions with owner-employees and related persons).

b. (1) Plan Covering Own Employees.

Such investment may be made if the plan is one which covers only the employees of the bank or similar financial institution, the employees of any of its affiliates, or the employees of both.

(2) Other Plans.

Such investment may be made if -

- The investment is expressly authorized by a provision of the plan or trust instrument, or
- The investment is expressly authorized (or made) by a fiduciary of the plan (other than the bank or similar financial institution or any of its affiliates) who has authority to make such investments, or to instruct the trustee or other fiduciary with respect to investments, and who has no interest in the transaction which may affect the exercise of such authorizing fiduciary's best judgment as a fiduciary so as to cause such authorization to constitute an act described in Section 406(b) of the Act.

Any authorization to make investments contained in a plan or trust instrument will satisfy the requirement of express authorization for investments made prior to November 1, 1977.

Effective November 1, 1977, in the case of a bank or similar financial institution that invests plan assets in deposits in itself or its affiliates under an authorization contained in a plan or trust instrument, such authorization -

- Must name such bank or similar financial institution, and
- Must state that such bank or similar financial institution may make investments in deposits which bear a reasonable rate of interest in itself (or in an affiliate).

(3) Example.

B, a bank, is the trustee of plan P's assets. The trust instruments give the trustees the right to invest plan assets in its discretion. B invests in the certificates of deposit of bank C, which is a fiduciary of the plan by virtue of performing certain custodial and administrative services. The authorization is sufficient for the plan to make such an investment under Section 408(b)(4). Further, such authorization would suffice to allow B to make investments in deposits in itself prior to November 1, 1977. However subsequent to October 31, 1977, B may not invest in deposits in itself, unless the plan or trust instrument authorizes it to invest in deposits of B.

c. Definitions.

1. The term "bank or similar financial institutions" . . . includes a bank (as defined in Section 581 of the Code), a domestic building and loan association (as defined in Section 7701(a)(19) of the Code) . . .
2. A person is an "affiliate" of a bank or similar financial institution if such person and such bank or similar financial institution would be treated as members of the same controlled group of corporations or as members of two or more trades or businesses under common control within the meaning of Section 414(b) or (c) of the Code and regulations thereunder.

3. The term "deposits" includes any account, temporary or otherwise, upon which a reasonable rate of interest is paid, including a certificate of deposit issued by a bank or similar financial institution.

Note: Also refer to ERISA Section 408(b)(4), "Investment in Own-Bank Interest-Bearing Deposits".

Department of Labor

Regulation 2550.408b-6

29 C.F.R. 2550.408b-6

Ancillary Services by Banks or Similar Financial Institutions

Originally issued June 24, 1977 (42 FR 32392)

Technical corrections of July 18, 1977 (42 FR 36823)

did not contain any changes to this regulation

a. In General. Section 408(b)(6) of the Employee Retirement Income Security Act of 1974 (the Act) exempts from the prohibitions of section 406 of the Act the provision of certain ancillary services by a bank or similar financial institution (as defined in 2550.408b-4(c)(1)) supervised by the United States or a State to a plan for which it acts as a fiduciary if the conditions of 2550.408b-6(b) are met. Such ancillary services include services which do not meet the requirements of section 408(b)(2) of the Act because the provision of such services involves an act described in section 406(b)(1) of the Act (relating to fiduciaries dealing with the assets of plans in their own interest or for their own account) by the fiduciary bank or similar financial institution or an act described in section 406(b)(2) of the Act (relating to fiduciaries in their individual or in any other capacity acting in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries). Section 408(b)(6) provides an exemption from sections 406(b)(1) and (2) because section 408(b)(6) contemplates the provision of such ancillary services without the approval of a second fiduciary (as described in 2550.408b-2(e)(2)) if the conditions of 2550.408b-6(b) are met. Thus, for example, plan assets held by a fiduciary bank which are reasonably expected to be needed to satisfy current plan expenses may be placed by the bank in a non-interest-bearing checking account in the bank if the conditions of 2550.408b-6(b) are met, notwithstanding the provisions of section 408(b)(4) of the Act (relating to investments in bank deposits). However, section 408(b)(6) does not provide an exemption for an act described in section 406(b)(3) of the Act (relating to fiduciaries receiving consideration for their own personal account from any party dealing with a plan in connection with a transaction involving the assets of the plan). The receipt of such consideration is a separate transaction not described in section 408(b)(6). Section 408(b)(6) does not contain an exemption from other provisions of the Act, such as section 404, or other provisions of law which may impose requirements or restrictions relating to the transactions which are exempt under section 408(b)(6) of the Act. See, for example, section 401 of the Internal Revenue Code of 1954. The provisions of section 408(b)(6) of the Act are further limited by section 408(d) of the Act (relating to transactions with owner-employees and related persons).

b. Conditions. Such service must be provided -

   1. At not more than reasonable compensation;
   2. Under adequate internal safeguards which assure that the provision of such service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority; and
   3. Only to the extent that such service is subject to specific guidelines issued by the bank or similar financial institution which meet the requirements of 2550.408b-6(c).

c. Specific guidelines. (Reserved)

Department of Labor

Regulation 2550.408c-2

29 C.F.R. 2550.408c-2

Compensation for Services

Originally issued June 24, 1977 (42 FR 32393)

a. In General. Section 408(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) refers to the payment of reasonable compensation by a plan to a party in interest for services rendered to the plan. Section 408(c)(2) of the Act and Section 2550.408c-2(b)(1) through 2550.408c-2(b)(4) clarify what constitutes reasonable compensation for such services.
b. (1) General Rule. Generally, whether compensation is "reasonable" under sections 408(b)(2) and 408(c)(2) of the Act depends on the particular facts and circumstances of each case.

    1. Payments to certain fiduciaries. Under sections 408(b)(2) and 408(c)(2) of the Act, the term "reasonable compensation" does not include any compensation to a fiduciary who is already receiving full-time pay from an employer or association of employers (any of whose employees are participants in the plan) or from an employee organization (any or whose members are participants in the plan), except for the reimbursement of direct expenses properly and actually incurred and not otherwise reimbursed. The restrictions of this paragraph (b)(2) do not apply to a party in interest who is not a fiduciary.
    2. Certain expenses not direct expenses. An expense is not a direct expense to the extent it would have been sustained had the service not been provided or if it represents an allocable portion of overhead costs.
    3. Expense advances. Under sections 408(b)(2) and 408(c)(2) of the Act, the term "reasonable compensation" , as applied to a fiduciary or an employee of a plan, includes an advance to such a fiduciary or employee by the plan to cover direct expenses to be properly and actually incurred by such person in the performance of such person's duties with the plan if:

        i. The amount of such advance is reasonable with respect to the amount of the direct expense which is likely to be properly and actually incurred in the immediate future (such as during the next month) and
        ii. The fiduciary or employee accounts to the plan at the end of the period covered by the advance for the expenses properly and actually incurred.

    4. Excessive compensation. Under sections 408(b)(2) and 408(c)(2) of the Act, any compensation which would be considered excessive under 26 C.F.R. 1.162-7 (Income Tax Regulations relating to compensation for personal services which constitutes an ordinary and necessary trade or business expense) will not be "reasonable compensation". Depending upon the facts and circumstances of the particular situation, compensation which is not excessive under 26 C.F.R. 1.162-7 may, nevertheless, not be "reasonable compensation" within the meaning of sections 408(b)(2) and 408(c)(2) of the Act.

Department of Labor

Regulation 2550.408e

29 C.F.R. 2550.408e

Qualifying Employer Securities and Real Estate

Acquisition or Sale of Qualifying Employer Securities

Acquisition/Sale/Lease of Qualifying Employer Real Estate

Originally issued August 1, 1980 (45 FR 51197)

a. In General. Section 408(e) of the Employee Retirement Income Security Act of 1974 (the Act) exempts from the prohibitions of section 406(a) and 406(b)(1) and (2) of the Act any acquisition or sale by a plan of qualifying employer securities (as defined in section 407(d)(5) of the Act), or any acquisition, sale or lease by a plan of qualifying employer real property (as defined in section 407(d)(4) of the Act) if certain conditions are met. The conditions are that:

    1. The acquisition, sale or lease must be for adequate consideration (which is defined in paragraph (d) of this section);
    2. No commission may be charged directly or indirectly to the plan with respect to the transaction; and
    3. In the case of an acquisition or lease of qualifying employer real property, or an acquisition of qualifying the securities, by a plan other than an eligible individual account plan (as defined in

section 407(d)(3) of the Act), the acquisition or lease must comply with the requirements of section 407(a) of the Act.

b. Acquisition. For purposes of section 408(e) and this section, an acquisition by a plan of qualifying employer securities or qualifying employer real property shall include, but not be limited to, an acquisition by purchase, by the exchange of plan assets, by the exercise of warrants or rights, by the conversion of a security, by default of a loan where the qualifying employer security or qualifying employer real property was security for the loan, or in connection with the contribution of such securities or real property to the plan. However, an acquisition of a security shall not be deemed to have occurred if a plan acquires the security as a result of a stock dividend or stock split.
c. Sale. For purposes of section 408(e) and this section, a sale of qualifying employer real property or qualifying employer securities shall include any disposition for value.
d. Adequate consideration. For purposes of section 408(e) and this section, adequate consideration means:

    1. In the case of a marketable obligation, a price not less favorable to the plan than the price determined under section 407(e)(1) of the Act and
    2. In all other cases, a price not less favorable to the plan than the price determined under section 3(18) of the Act.

e. Commission. For purposes of section 408(e) and this section, the term "commission" includes any fee, commission or similar charge paid in connection with a transaction, except that the term "commission" does not include a charge incurred for the purpose of enabling the appropriate plan fiduciaries to evaluate the desirability of entering into a transaction to which this section would apply, such as an appraisal or investment advisory fee.

Regulation 2570.30 through .52

29 C.F.R. 2570.30 through .52

Individual and Class Prohibited Transaction Exemption Requests (Replaces ERISA Procedure 75-1)

Originally issued August 10, 1990 (55 FR 32847)

§ .35 Amended through April 12, 1991 (56 FR 14861)

Agency: Pension and Welfare Benefits Administration, Labor.

Action: Final regulation and removal of interim final regulation.

Summary: This document contains a final regulation that describes the procedures for filing and processing applications for exemptions from the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA), the Internal Revenue Code of 1986 (the Code), and the Federal Employees' Retirement System Act of 1986 (FERSA). At this time, the Department is also removing an interim regulation which describes the exemption procedures under FERSA because such regulation is superseded by the final regulation contained herein. The Secretary of Labor is authorized to grant exemptions from the prohibited transaction provisions of ERISA, the Code, and FERSA and to establish an exemption procedure to provide for such exemptions. The final regulation updates the description of the Department of Labor's procedures to reflect changes in the Department's exemption authority and to clarify the procedures by providing a more comprehensive description of the prohibited transaction exemption process.

Note
In 1995, the Labor Department also issued a booklet, Exemption Procedures Under Federal Pension Law, explaining how to obtain ERISA exemptions. The text of the exemption request procedure is included in the booklet. The free booklet is available from the Division of Public Affairs; Pension and Welfare Benefits Administration; U.S. Department of Labor; 200 Constitution Avenue, NW; Washington, DC 20210; phone 202/219-8921.

Effective Date: This regulation is effective September 10, 1990, and applies to all exemption applications filed at any time on or after that date.

Explanatory Preamble

(Final Regulation)

For further information contact: Miriam Freund, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, Washington, DC 20210, (202) 523-8194, or Susan Rees, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, DC 20210, (202) 523-9141.

Supplementary information: Public reporting burden for this collection of information is estimated to average 28.5 hours per response, including the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Director, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-1301, Washington, DC 20210; and to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for PWBA, Office of Management and Budget, Room 3001, Washington, DC 20503.

Section 406 of ERISA prohibits certain transactions between employee benefit plans and "Parties in interest" (as defined in section 3(14) of ERISA). In addition, sections 406 and 407(a) of ERISA impose restrictions on plan investments in "employer securities" (as defined in section 407(d)(1) of ERISA) and "employer real property" (as defined in section 407(d)(2) of ERISA). Most of the transactions prohibited by section 406 of ERISA are likewise prohibited by section 4975 of the Code, which imposes an excise tax on those transactions to be paid by each "disqualified person" (defined in section 4975(e)(2) of the Code in virtually the same manner as the term "party in interest") who participates in the transactions.

Both ERISA and the Code contain various statutory exemptions from the. prohibited transaction rules. In addition, section 408(a) of ERISA authorizes the Secretary of Labor to grant administrative exemptions from the restrictions of ERISA sections 406 and 407(a) while section 4975(c)(2) of the Code a authorizes the Secretary of the Treasury or his delegate to grant exemptions from the prohibitions of Code section 4975(c)(1). Sections 408(a) of ERISA and 4975(c)(2) of the Code direct the Secretary of Labor and the Secretary of the Treasury, respectively, to establish procedures to carry out the purposes of these sections.

Under section 3003(b) of ERISA, the Secretary of Labor and the Secretary of the Treasury are directed to consult and coordinate with each other with respect to the establishment of rules applicable to the granting of exemptions from the Prohibited transaction restrictions of ERISA and the Code. Under section 3004 of ERISA, moreover, the Secretaries are authorized to develop jointly rules appropriate for the efficient administration of ERISA. Pursuant to these provisions, the Secretaries jointly issued an exemption procedure on April 28, 1975 (ERISA Proc. 75-1, 40 FR 18471. also issued as Rev. Proc. 75-26, 1975-1 C.B. 722). Under these procedures, a person seeking an exemption under both section 408(a) of ERISA and section 4975(c)(2) of the Code was obliged to file an exemption application with the Rules and Regulations of the Internal Revenue Service as well as with the Department of Labor.

Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1918, effective on December 31, 1978), transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975 of the Code, with certain enumerated exceptions, to the Secretary, of Labor. As a result, the Secretary of Labor now possesses authority under section 4975(c)(2) of the Code, as well as under section 408(a) of ERISA, to issue individual and class exemptions from the prohibited transaction rules of ERISA and the Code. The Secretary has delegated this authority, along with most of his other responsibilities under ERISA, to the Assistant Secretary for Pension and Welfare Benefits. See Secretary of Labor's Order 1-87, 52 FR 13139 (April 21, 1987).

FERSA also contains prohibited transaction rules that are applicable to parties in interest with respect to the Federal Thrift Savings Fund established by ERISA, and the Secretary of Labor is directed to prescribe, by regulation, a procedure for granting administrative exemptions from certain of those prohibited transactions. See 5 USC 8477(c)(3).

On June 28, 1988, the Department published a proposed rule in the Federal Register (53 FR 24422) updating ERISA Procedure 75-1 to reflect the changes made by Reorganization Plan No. 4 and extending the procedure to applications for exemptions from the FERSA prohibited transaction rules. In addition, the

proposed regulation codified various procedures developed by PWBA since the adoption of ERISA Proc. 75-1. Formal adoption of those procedures will facilitate review of exemption applications. These new procedures also fill in some of the gaps left in ERISA Proc. 75-1. thereby providing a more detailed description both of the steps to be taken by applicants in applying for exemptions and the steps normally taken by the Department in processing such applications. Finally, the proposed regulation modified some of the procedures described in ERISA Proc. 75-1 to better serve the needs of the administrative exemption program as demonstrated by the Department's experience with the program over the previous fourteen years. These amendments were intended to promote the prompt and fair consideration of all exemption applications.

The notice of proposed rulemaking gave interested persons an opportunity to comment on the proposal. In response, the Department received three letters of comment regarding several aspects of the proposed regulation. The following discussion summarizes the proposed regulation and the issues raised by the commentators and explains the Department's reasons for adopting the provisions of the final regulation.

The Scope of the Regulation

As explained in the notice of proposed rulemaking, the regulation establishes new procedures to replace ERISA Proc. 75-1. These new procedures reflect changes in the Department of Labor's exemption authority effected by Reorganization Plan No. 4 of 1978. Thus, the procedures apply to all applications for exemption which the Department has authority to issue under section 408(a) of ERISA, or, as a result of Reorganization Plan No. 4, under section 4975(c)(2) of the Code. The procedures reflect current practice under which the Department generally treats any exemption application filed solely under section 408(a) of ERISA or solely under section 4275(c)(2) of the Code as an application for exemption filed under both of these sections if the application relates to a transaction prohibited under corresponding provisions of both ERISA and the Code. The grant of an exemption by the Department in such instances protects disqualified persons covered by the exemption from the excise taxes otherwise assessable under section 4975(a) and (b) of the Code.

However, the procedures do not apply to applications for exemption reserved to the jurisdiction of the Secretary of the Treasury by Reorganization Plan No. 4. To ascertain the correct procedures for filing and processing applications for these exemptions, applicants should consult the Internal Revenue Service.

The Department has also concluded that it is appropriate to apply the procedures provided here to exemption applications filed under FERSA, as well as those filed under ERISA or the Code, as provided by proposed § 2570.30, which has been adopted without change in the final regulation. Although the prohibited transaction provisions of FERSA and the scope of the Department's exemptive authority under FERSA differ somewhat from that under ERISA and the Code, administrative exemption matters under FERSA are likely to involve many of the issues as are presented by similar matters involving private plans. Thus, adopting uniform procedures should help assure uniform administration of the exemption programs.

Applications for Exemption under FERSA

On December 29, 1988, the Department published an interim regulation in the Federal Register (29 C.F.R. part 2585, 53 FR 52088) describing the procedures for filing and processing applications for exemptions from the prohibited transaction provisions of FERSA. For such applications, the interim regulation adopted the procedures then currently followed (pursuant to ERISA Proc. 75-1) by applicants for exemptions from the prohibited transaction provisions of ERISA and the Code. The interim final regulation was effective commencing December 29, 1988 until the effective date of the final regulation contained herein for all prohibited transaction exemption applications (under ERISA, the Code and FERSA).[1]

Section 2585.12 of the interim regulation provides that this regulation shall expire on the effective date of the revised prohibited transaction exemption procedure, published in proposed form on June 28, 1988, 53 FR 24422, and that the Department will publish a document removing these interim regulations when it adopts final regulations based on the published proposal. Accordingly, this notice of final rulemaking removes the interim regulations, as of September 10, 1990, the effective date of the final regulation contained herein.

In regard to FERSA exemption applications, the Department received a comment relating to the adoption of ERISA class exemptions for FERSA purposes. This comment suggested that the final regulation clarify that the Department will follow the procedure authorized under section 8477(c)(3)(E) of FERSA, which permits the Secretary of Labor to determine that an exemption granted for any class of fiduciaries or transactions under section 408(a) of ERISA shall constitute an exemption for FERSA purposes upon publication of notice in the Federal Register without affording interested parties opportunities to present their views (in writing or at a hearing).

The procedures described in the preceding paragraph was not used in conjunction with the Department's adoption for FERSA purposes of a number of specific class exemptions under ERISA (for example, Prohibited Transaction Exemptions (PTE) 75-1, 78-19, 80-26, 80-51, 82-63 and 86-128). In that instance, the Department published in the Federal Register both a notice of proposed adoption of class exemptions under ERISA (53 FR 38105, September 29, 1988), which invited the public to submit written comments or requests for a hearing on the proposed adoption, and also a notice of final adoption of these class exemptions (PTE T88-1, 53 FR 52838, December 29, 1988). In this regard, the Department notes that, with respect to ERISA class exemptions which may be proposed in the future and which may also be relevant under FERSA, the Department will solicit the views of the Executive Director of the Federal Retirement Thrift Investment Board in advance of the publication of the proposed exemption to determine whether such exemption should also be proposed for FERSA purposes.

Also regarding FERSA exemption applications, the Department received another comment requesting clarification that the mere existence of routine audit activity conducted by the Department pursuant to the requirements of section 8477(g) of FERSA[2] will not provide a basis for denial of, or failure to consider, an application for exemption under FERSA. It is the view of the Department that those audits conducted by the Department in carrying out its responsibilities in connection with its regular program of compliance audits under FERSA section 8477(g) would not constitute an "investigation" for purposes of § 2570.33(a)(2) and 2570.37(b) of the regulation[3] or an "examination" for purposes of § 2570.35(a)(7).[4] The Department would not, however, be precluded from denying, or failing to consider, an application based on an investigation prompted by information arising as a result of such a routine audit.

Definitions

Section 2570.31 of the proposed regulation defined the following terms for purposes of the exemption procedures: affiliate, class exemption, Department, exemption transaction, individual exemption, and party in interest. No comments were received regarding these definitions which are adopted in the final regulation as proposed. However, the Department has added to this section a definition of the term "pooled fund" in response to a comment requesting that a special rule be added to the final regulation regarding information to be furnished in exemption applications relating to plans affected by an exemption transaction undertaken by a pooled investment vehicle. (This comment is discussed in more detail below.)

Who May Apply for Exemptions

Section 2570.32(a) of the proposed regulation provided that exemption proceedings may be initiated by the Department either on its own motion or upon the application of: (1) Any party in interest to a plan which is or may be a party to the exemption transaction, (2) any plan which is a party to the exemption transaction, or (3) an association or organization representing parties in interest who may be parties to an exemption transaction covering a class of parties in interest or a class of transactions.

One of the comments received recommended modifying this paragraph of the regulation to permit an exemption application to be filed by any fiduciary or prospective fiduciary with respect to plan assets under such fiduciary's management or control, regardless of whether such fiduciary either represents a specific plan with respect to the exemption application or would be a party to the exemption transaction. The commentator clarified his comment by explaining that he intended this category of applicants to cover prospective fiduciaries, such as persons creating and/or managing a new investment vehicle in which plans are expected to participate if the requested exemption is granted, but in which no plans participate at the time the exemption application is filed. The commentator noted that in the past the Department has granted individual exemptions to institutional investment managers in connection with their investment management of individual plans' investment accounts or pooled investment funds in which several unidentified plans may participate.

In the Department's view, the reference in proposed § 2570.32(a)(1) to "any party in interest to a plan who is or may be a party to the exemption transaction" includes the prospective fiduciaries mentioned by the commentator. Therefore, § 2570.32(a) is adopted in the final regulation without change.

Section 2570.32(b) and (c) of the proposed regulation set forth simplified rules relating to representation of applicants by third parties. No comments were received regarding these paragraphs, which are adopted in the final regulation without change.

Applications the Department Will Not Ordinarily Consider

Section 2570.33(a) of the proposed regulation described the circumstances under which the Department will not ordinarily consider the merits of an exemption application. Thus, this paragraph provided that *the*

Department will not ordinarily consider an incomplete application. In this regard, the Department emphasizes that applicants should not file exemption applications until they have compiled all the information required by § 2570.34 and, if applicable, § 2570.35, and can submit this information in an organized and comprehensive fashion together with all necessary supporting documents and statements. In addition, the proposal made it clear that the Department ordinarily will not consider applications that involve a transaction, or a party in interest with respect to such transaction, that is the subject of an ERISA enforcement action or investigation. In certain cases, however, the Department may exercise its discretion to consider exemption applications in these categories where, for example, deficiencies in the exemption application are merely technical, or where an enforcement matter is clearly unrelated to the exemption transaction.

One comment was received specifically regarding investigations, and it is discussed above under the heading "Applications for Exemption under FERSA." In addition, the Department has amended § 2570.33(a)(2) (relating to certain investigations and enforcement actions) to conform to a similar revision to § 2570.35(a)(7) (discussed below) made in response to two other comments received regarding the proposed requirement to include information in an application concerning certain investigations, examinations, litigation, or continuing controversy involving specified Federal agencies with respect to any plan or party in interest involved in the exemption transaction. The effect of these amendments is to expand the proposed regulation in order to broaden the scope of exemption applications which the Department will ordinarily consider.

No comments were received on paragraphs (b) and (c) of proposed § 2570.33, which are adopted without change in the final regulation. These paragraphs relate to the Department's written explanation to an applicant whose exemption application the Department has decided not to consider, and to applications for individual exemption relating to transaction(s) covered by a class exemption under consideration by the Department.

Exemption Application Contents - General Information

As previously noted in the proposed regulation, the Department's experience to date with the administrative exemption program suggests that the program's efficiency could be increased and *applicants can receive more timely treatment of their applications for exemption if the quality of exemption applications filed were improved. In the past, applications have been incomplete, have omitted or misstated facts or legal analyses needed to justify requests for exemptive relief, and in some cases have been so poorly drafted that the details of the transactions for which exemptive relief is sought ("exemption transactions") are unclear. The time and effort required to deal with such deficient applications and to obtain accurate and complete information about exemption transactions have contributed to processing delays.* Moreover, in many exemption applications, the discussion of the substantive basis for the exemption does not take adequate account of positions adopted by the Department with respect to other similar applications.

The proposed regulation attempted to address these problems in a number of ways. First, the proposal required that applicants provide more complete information in their applications about exemption transactions and about the plans and the parties in interest involved in those transactions. The Department's experience suggests that this additional information is very helpful, and often essential, for a complete understanding of the exemption transaction and of the context surrounding it, and that the omission of such additional information in exemption applications will delay review of these applications on their merits.

For the same reason the proposed regulation required filing with the exemption copies of the relevant portions of documents. By filing comprehensive applications with necessary supporting documentation, applicants can do much to facilitate the Department's review of requested exemptions and to expedite the exemption process as a whole.

To further expedite the exemption process, the proposed regulation required that an applicant include with his application a statement explaining why the requested exemption satisfies requirements set forth in sections 408(a) of ERISA and 4975(c)(2) of the Code and 5 USC 84711(c)(3)(C) that an exemption be:

1. Administratively feasible;
2. In the interests of the plan and of its participants and beneficiaries; and
3. Protective of the rights of the plan's participants and beneficiaries.

This requirement is not new. Under ERISA Proc. 75-1, applicants have been required to include with their applications statements explaining why a requested exemption satisfies the statutory prerequisites for an exemption. Too often, however, applicants have attempted to satisfy this requirement with generalizations and perfunctory assurances about the benefits to be reaped by plans and their participants and beneficiaries from the proposed exemption.

The Department will not seek out reasons to grant an exemption that has not been adequately justified by an

applicant. Indeed, the Department considers that it is the responsibility of applicants to demonstrate clearly that exemptions they are requesting meet statutory criteria. Accordingly, under both the proposed and the final regulation, applicants are expected to review the statutory criteria for granting administrative exemptions and explain with as much specificity as possible why a requested exemption would pose no administrative problems, what benefits affected plans and their participants and beneficiaries can expect to receive from it, and what conditions word be attached to protect the rights of participants and beneficiaries of affected plans.[5]

Under ERISA Proc. 75-1, applicants have been given the option, but have not been required, to submit a draft of the proposed exemption. Both the proposed and the final regulation preserve this option. However, while not requiring the submission of a draft of the proposed exemption, *the Department recommends that applicants include in their exemption applications draft language which defines the scope of the requested exemption, including the specific conditions under which the proposed exemption would apply. A draft which explains the exemption requested in a clear and concise manner and focuses on what the applicant considers to be the essential features of the exemption transaction and the critical safeguards supporting the requested relief is likely to facilitate the process of review.* Obviously, the degree of detail necessary to describe the proposed exemption adequately will vary depending on the complexity of the transaction and the kind of relief requested.

Section 2570.34 of the proposed regulation listed the information that is required in every exemption application, whether it be an application for individual or class exemption. In addition, the information specified in § 2570.35 of the regulation must be included in applications for individual exemptions. Some specific items of information are described below.

Shared Representation

Section 2570.34(a)(3) of the proposed regulation required each exemption application to disclose whether the same person will represent both the plan and the parties in interest involved in an exemption transaction in matters relating to the application. The proposal noted that such shared representation may raise questions under the exclusive purpose and prudence requirements of sections 403(b) and 404(a) of ERISA and under the prohibited transaction provisions of section 406 of ERISA and section 4975(c)(1) of the Code. No comments have been received regarding this subparagraph, which is adopted as proposed.

Third-Party Declarations

Section 2570.34(b)[5)(iii) of the proposed regulation required a declaration under penalty of perjury to accompany specialized statements from third-party experts submitted to support an exemption application, such as appraisals, analyses of market conditions, or opinions of independent fiduciaries. Specifically, the proposal required a declaration under penalty of perjury that to the best of the expert's knowledge and belief, the representations made in the specialized statement are true and correct. This declaration was to be dated and signed by the expert who prepared the statement.

One of the commenters urged deletion of this requirement and expressed concern that it would cause additional expense to applicants because new third-party statements would be required once the appraiser, engineer, financial specialist, or other expert became aware of their intended use as part of an exemption application. The commentator advised subsequently that such experts either may be reluctant to provide any sort of attestation because of unknown liabilities which may arise by using the expert's report as part of an exemption application, or may seek an additional, and perhaps substantial, fee for furnishing an attestation due to the unknown liabilities.

In this regard the Department notes that, with respect to any matter within the jurisdiction of any department or agency of the United States, it is a crime, punishable by a fine of up to $10,000 and/or imprisonment of up to five years, for anyone knowingly and willfully to falsify, conceal or cover up by any trick, scheme or device a material fact; to make any false, fictitious, or fraudulent statements or representations; or to make or use any false writing or document knowing the same contains any false, fictitious, or fraudulent statement or entry (18 USC 1001). It is the view of the Department that this provision applies to applicants for exemptions under ERISA, the Code, or FERSA, to fiduciaries (independent or otherwise) representing the plan in an exemption, transaction, and to third-party experts who prepare statements or reports that such experts know will be included in exemption applications.

Nevertheless, the Department recognizes that third-party experts, such as appraisers, bankers, financial analysts, and other specialized consultants usually do not function as fiduciaries with respect to a plan if such experts authority, responsibility, or contact with respect to the plan is limited to providing an opinion which may be included in an exemption application, and which will be considered by plan fiduciaries who will decide what,

if any, action they will take on behalf of the plan based upon such opinion. The Department believes that such experts need not be held to the same degree of accountability regarding exemption applications covering transactions where a plan fiduciary has the authority and responsibility to make decisions on behalf of a plan. Thus, the Department has decided to modify proposed § 2570.34(b)(5)(iii) to provide that a statement of consent, rather than a declaration under penalty of perjury, is required from each such expert which acknowledges that his or her statement is being submitted to the Department as part of an exemption application. The Department believes that such a consent statement from a third-party expert will not require an applicant to obtain a new report from the expert because the expert's consent statement may refer to his or her previously issued report. (However, the Department may require an updated report in any case if the substantive information contained in a report submitted with an exemption application is out of date.)

Conversely, where an independent fiduciary represents the plan in an exemption transaction, that fiduciary is subject to all of the responsibilities imposed by part 4 of subtitle B of title A of ERISA. None of the comments received questioned the need for such a fiduciary to provide the declaration under penalty of perjury required under the proposed regulation, and the Department has decided to retain this proposed requirement for such plan fiduciaries in the final regulation. As a result, the Department has modified § 2570.34(b)(5)(ii) and has added § 2570.34(b)(5)(iv) to clarify that a declaration is required for such plan fiduciaries,

Pooled Funds

One comment suggested that § 2570.35 of the proposed regulation be modified to provide a special rule regarding information to be included in an application for an individual exemption involving a pooled investment fund, such as a pooled separate account maintained by an insurance company or a collective investment fund maintained by another financial institution. The commentator pointed out that, as proposed, § 2570.35 would require information to be submitted regarding each plan participating in a pooled investment fund, resulting in the submission of an overwhelming volume of information unrelated to the exemption transaction. However, the commentator recognized that information regarding certain plans may be relevant to the exemption application in view of the potential for conflicts of interest involving such plans. Such plans would include any plan maintained for employees of the sponsor or other fiduciary of the pooled investment fund, and a plan whose participation in the pooled fund exceeded a specified percentage of the total fund assets.

The Department agrees with this comment and, accordingly, has added a new paragraph (c) to § 2570.35, which contains a special rule for applications for individual exemptions involving pooled funds [as defined in § 2570.31(g)]. Subparagraph (1) of § 2570.35(c) excepts such applications from including certain information otherwise required relating to among other things: reportable events under section 4043 of ERISA, notice of intent to terminate a plan (section 4041 of ERISA), the number of participants and beneficiaries of each plan participating in the pooled fund, and the percentage of each such plan's assets involved in the exemption transaction.

Subparagraph (2) of the special rule provides that certain information otherwise required by § 2570.35(a) and (b) of the regulation must be furnished by reference to the pooled fund rather than the plans participating in such fund. This information pertains to: Identifying information; any prior violations of the Code's exclusive benefit rule or of the prohibited transaction provisions of the Code, ERISA or FERSA, any prior applications for exemption from such prohibited transaction provisions; any lawsuits or criminal actions regarding conduct with respect to any employee plan; any criminal convictions described in section 411 of ERISA; any investigation or continuing controversy with specified Federal agencies regarding compliance with ERISA, Code provisions relating to employee plans, or FERSA provisions relating to the Federal Thrift Savings Fund; whether the exemption transaction has been consummated and, if so, certain related information regarding correction of the prohibited transaction and payment of excise taxes; the identification of persons with investment discretion over any assets involved in the exemption transaction and each such person's relationship to the parties in interest involved in the exemption transaction; investments involving certain parties in interest, the fair market value of the pooled fund; the identity of the person who will pay the costs of the exemption application, notifying interested persons, and the fee of any independent fiduciary involved in the exemption transaction; and an analysis of the facts relevant to the exemption transaction as reflected in documents submitted with the application. The pooled fund, rather than participating plans, must also furnish copies of all relevant documents, including, for example, the most recent financial statements of the pooled fund.

Subparagraph (3) of the special rule requires information to be furnished with pooled fund exemption applications with respect to: the aggregate number of plans expected to participate in the pooled fund, and the limits (if any) imposed by the pooled fund on the amount or percentage of each participating plan's assets that may be invested in the pooled fund.

Subparagraph (4) of § 2570.35(c) contains additional requirements for applications for individual exemptions involving pooled funds. These requirements apply to plans whose investments in the pooled fund represent more than 20% of the pooled fund's total assets[6] and those plans covering employees of the pooled fund's sponsor, and other fiduciaries with discretion over pooled fund assets. The Department believes that additional information is warranted in those situations where the potential for decision making that may inure to the benefit of a fiduciary or other party in interest is increased. For each of these plans, the additional requirements provide for the furnishing of certain individual plan information described in 2570.35(a), in addition to the information required under § 2570.35(c)(2) and (c)(3). The Department believes this information is necessary for its determination as to whether sufficient protections are incorporated into the exemption transaction.

The Department further notes that the decision by the fiduciaries of certain plans to invest in a pooled fund may involve a separate prohibited transaction, apart from any prohibited transaction which may be entered into by the pooled fund itself In this regard, the Department notes that the information required to be submitted on behalf of such plans is to be provided in accordance with the general rule contained in § 2570.35, rather than the special rule for pooled funds.

Finally, the Department believes that the special rule for pooled funds is less burdensome to applicants than the rules set forth in the proposed regulation. As noted by a commentator, the proposed regulation would have required the submission of voluminous amounts of material, as information would have to be submitted on behalf of each plan investing in a pooled fund. The final regulation limits the amount of material to be submitted since it requires only information relating to the pooled fund and, where applicable, certain plans investing in the pooled fund. In addition, the Department believes that its ability to analyze and process applications for exemption involving pooled funds will be enhanced by this special rule. In this regard, the Department believes that the final regulation eliminates a significant amount of material that otherwise would have been required.

Lawsuits, Certain Criminal Convictions, Investigations, Examinations, Continuing Controversies, etc.

Sections 2570.35(a)(5), (6), and (7) of the proposed regulation ired exemption applications to disclose inf ormation regarding whether the appl lor any of the parties to the exemption transaction is or has been, within specified number of years past, a defendant in any lawsuit or criminal action concerning conduct as a fiduciary or other party in interest with respect to any employee benefit plan (§ 2570.35(a)(5)(b) convicted of a crime described in section 411 of ERISA (§ 2570.35(a)(6)), or under investigation or examination or engaged in litigation or a continuing controversy with certain Federal agencies (§ 2570.35(a)(7)). Proposed § 2570.35(a)(7) also required disclosure of whether any plan affected by the exemption transaction has been under such investigation, examination, litigation, or any controversy, and further required the applicant to submit copies of all correspondence with the specified Federal agencies regarding substantive issues involved in such investigation, etc.

Two of the comments urged deletion of the disclosure requirements of proposed § 2570.35(a)(5) and (7) on the basis that such disclosure is difficult, costly, and almost always irrelevant to the exemption transaction.

The Department continues to believe that the proposed disclosure is relevant to the exemption transaction. With regard to § 2570.35(a)(5) (relating to lawsuits or certain criminal actions), the Department views the disclosure required as directly concerning the conduct of the applicant and other parties in interest participating in the exemption transaction. The Department believes that such information is necessary in evaluating the credibility and integrity of such parties, some of whom may possess substantial discretion regarding the exemption transaction or may make representations upon which the Department must rely in determining whether the statutory criteria for an exemption have been satisfied. In addition, the proposed disclosure assists the Department in ensuring that the exemption contains appropriate safeguards.

Further, the Department does not agree that the disclosure required by § 2570.35(a)(5) imposes any "significant" burdens on applicants. The Department believes that prudent fiduciaries would in the normal course of carrying out their responsibilities, ascertain such information about the parties they intend to deal with in investment and other plan transactions. However, the Department has determined that it would be appropriate to modify proposed § 2570.35(a)(5) in the final regulation to limit disclosure to the applicant or any of the parties in interest involved in the exemption transaction.

Regarding the disclosure required by proposed § 2570.35(a)(7) (relating to, investigations, examinations, litigation, and continuing controversy by or with the specified Federal agencies), the Department believes that such information is necessary to ensure that the Department's exemption activities do not compromise its enforcement efforts. Although the Department is most interested in information involving investigations, etc.

that are directly related to the subject exemption transactions and the participating parties, the Department believes, nevertheless, that its exemption staff, and not the applicants, should determine which investigations, examinations, etc., are relevant.

One of the comments further suggested that it is inappropriate to require applicants to disclose matters which have resulted in no formal allegations of violations of law. The Department notes, however, that the affected parties may include, as part of their disclosure, any qualification or explanations they deem appropriate for consideration by the Department, including information on the final disposition of any matter;

Another commentator suggested that disclosure under § 2570.35(a)(7) be limited to a reference to the investigation or litigation without requiring submission of copies of "all correspondence" involved in the investigation. In this regard, the Department notes that the proposed regulation did not require submission of copies of all correspondence, but only of correspondence relating to the, substantive issues involved in the investigation, examination, litigation, or controversy. Specifically, the Department intended to require submission of copies of correspondence containing only that information directly relevant to determining whether or not the requested exemption should be granted. After considering the comment, the Department has modified § 2570.35(a)(7) to clarify that the phrase "substantive issues" refers to issues related to compliance with the provisions of parts 1 and 4 of subtitle B of title I of ERISA (reporting and disclosure (part 1) and fiduciary responsibility (part 4)), section 4975 of the Code, or sections 8477 or 8478 of FERSA (fiduciary responsibilities, liability and penalties (section 8477) and bonding (section 8478). Copies of correspondence relating to any of these substantive issues is necessary in order for the Department to determine the effect the requested exemption may have on the Department's enforcement activities in each case under investigation, examination, etc.

One of the comments noted that proposed § 2570.35(a)(5), (6) and (7) required the disclosure of information regarding any parties to the exemption transaction and suggested limiting the disclosure to fiduciaries authorizing the transaction and any parties in interest involved in the exemption transaction. This comment pointed out that investment transactions may involve multiple parties, many of wham are neither plan fiduciaries nor parties in interest. After due consideration, the Department agrees with this suggestion and, accordingly, has modified § 2570.35(a)(5), (6) and (7) to limit the required disclosure to any parties in interest involved in the exemption transaction. The Department rates that this group includes, among others, the fiduciary authorizing the exemption transaction.

See the heading "Applications for Exemption under FERSA," above, regarding modification to proposed § 2570.35(a)(7) as applicable to the Federal Thrift Savings Plan established by FERSA.

Party-in-Interest Investments

Proposed § 2570.35(a)(16) required an application for individual exemption to disclose information regarding any plan investments in loans to, property leased to, or securities issued by, any party in interest involved in the exemption transaction. One of the comments suggested deletion of this requirement due to the difficulty of identifying such investments in view of the "look-through" rule contained in the Department's plan asset regulation (29 C.F.R. 2510.101). This comment suggested that the proposed disclosure may invoke many transactions, by an entity whose underlying assets include "plan assets," which are totally unrelated to the exemption transaction. The comment further indicated that this disclosure would be burdensome for exemption transactions involving numerous parties in interest, such as those involving pooled funds.

The Department agrees that, for exemption applications involving pooled funds, furnishing the proposed disclosure could be burdensome inasmuch as such applications generally do not relate to specific plans. Accordingly, the Department has adopted a special rule for applications for individual exemption involving pooled funds, discussed above (under the heading "Pooled Funds"), which limits this type of disclosure to the pooled fund and to certain plans participating therein.

Regarding exemption applications involving specific individual plans, it appears to the Department that the information to be disclosed under proposed § 2570.35(a)(16) must be maintained, in any event, to satisfy the annual reporting requirements of section 103 of ERISA, as well as the recordkeeping requirements of section 107. Therefore, the Department believes that this disclosure requirement should not impose any additional burdens on the applicant. The information to be disclosed will enable the Department to determine whether the exemption transaction, in conjunction with other plan investments involving parties in interest, would unduly concentrate the plan's assets in such investments so as to raise questions under the fiduciary responsibility provisions of section 404 of ERISA. For these reasons, the Department has decided to adopt § 2570.35(a)(16) as proposed, subject to the special rule for applications for individual exemption involving pooled funds in § 2570.35(c).

Costs Related to the Exemption Application

Proposed § 2570.35(a)(18) and (19) required the exemption application to identify the person who will bear the costs of the exemption application, of notifying interested persons, and of the fee charged by any independent fiduciary involved in the exemption transaction. The preamble to the proposed regulation noted that a plan's payment of the expenses associated with the filing or processing of an exemption application raises questions under the fiduciary responsibility and the prohibited transaction restrictions to the extent that any party in interest benefits from the transaction for which an exemption is sought (see section 406(a)(1)(D) of ERISA).

One of the commentators requested that the Department provide a more specific discussion of when it believes such questions will be raised. The comment states that, in many cases, it is appropriate for the plan to pay the expenses attributable to obtaining an exemption, and that an independent fiduciary's fees are generally paid by the plan receiving such fiduciary's services in order to ensure that such fiduciary conducts its activities in a totally independent manner and without any potential influence from persons other than the plan paying such fees.

The proposed disclosure of who pays the fees for an exemption application is intended to enable the Department to review the appropriateness of such payment by a plan in the context of a specific exemption request. Such disclosure is also intended to aid the exemption staff in evaluating whether the economic merits of the transaction, taking into account the costs attributable to the exemption application, support a finding that the proposed transaction is in the interests of the plan and its participants and beneficiaries. While the Department agrees that there may be certain instances in which it would be appropriate for a plan to pay all or part of the costs attendant with obtaining an exemption, such as where it is necessary to ensure the independence of an independent fiduciary or third-party expert, the Department believes that the propriety of such payments by a plan is an inherently factual determination which can be made only on a case-by-case basis.

In this regard, the Department notes that, when evaluating the propriety of the payment by a plan of certain expenses, plan fiduciaries must first consider the general fiduciary responsibility provisions of sections 403 and 404 of ERISA. Section 403(c)(1) provides, in part, that the assets of an employee benefit plan shall never inure to the benefit of any employer and shall be held for the exclusive purpose of providing benefits to participants and beneficiaries and defraying reasonable expenses of administering the plan. Similarly, section 404(a)(1)(A) requires, in part, that a fiduciary of a plan discharge his duties for the exclusive purpose of providing benefits to participants and their beneficiaries and defraying reasonable expenses of administering the plan. Thus, a payment that is not a distribution of benefits to participants or beneficiaries of a plan would not be consistent with the requirements of sections 403(c)(1) and 404(a)(1)(A) unless it was used to defray a reasonable expense of administering the plan.

In addition, section 406(a)(1)(D) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction if he knows or should know that such transaction constitutes a direct or indirect transfer to, or use by or for the benefit of, a party in interest of any assets of the plan. It is the responsibility of appropriate plan fiduciaries to determine whether a particular expense is a reasonable administrative expense under sections 403(c)(1) and 404(a)(1)(A) of ERISA or whether plan payment of an expense would constitute a prohibited use of plan assets for the benefit of a party in interest under section 406(a)(1)(D) of ERISA.

Copies of Documents

Section 2570.35(b)(1) of the proposed regulation required each application for individual exemption to include true copies of all documents bearing on the exemption transaction, such as contracts, deeds, agreements, instruments, and relevant portions of plan documents, including trust agreements.

One comment objected to this requirement on the grounds that having to assemble the required documents is time consuming, costly, and unnecessary if the exemption application properly describes all pertinent plan provisions and other documents in sufficient detail to allow the Department to evaluate the merits of the exemption transaction. In this regard, the Department notes that the documents with respect to which copies are requested are all documents which would be readily available to the parties to the exemption transaction. Accordingly, the Department does not believe that there would be a significant burden in either compiling the documents or in transmitting copies to the Department. Further, the Department notes that it is not uncommon for representations contained in an exemption application to be inconsistent with the provisions of the governing documents or for the latter to contain provisions with respect to which clarifications or other representations are needed in order for the requested exemption to be proposed. On the basis of the Department's experience with exemptions, scrutiny of the relevant documents is, in the large majority of cases, a necessary prerequisite to a complete understanding of the exemption transaction and the implications for

affected plans and parties in interest. Moreover, in the Department's experience, the inclusion of copies of the requested documents, as part of the exemption application, has expedited the processing of the requested exemption.

For these reasons, the final regulation adopts proposed § 2570.35(b)(1) without change. However, the Department wishes to clarify three points regarding this requirement. -

- First, for exemption transactions in which identical documents will be executed by more than one party, the submission of only one specimen document will satisfy the requirements of this paragraph.
- in the case of exemption transactions which are proposed, copies of the documenting to t he proposed transaction need not be executed or dated when they are submitted with the exemption application if the documents are complete in every other respect. In this regard, the Department strongly encourages requesting an administrative exemption before entering into a prohibited transaction because of the ability to incorporate all of the necessary safeguards into the transaction. By contrast, such safeguards cannot be put into place after a prohibited transaction has occurred.
- Third, only copies of documents need be submitted. The Department may not be able to return original documents and, therefore, urges that only true copies of documents be submitted.

Where To File an Application

Although no comments were received regarding this section, which is adopted as proposed, the Department wishes to advise applicants that including the room number of the Division of Exemptions in the address will generally expedite its delivery. The current room number of the Division of Exemptions, Room N-5671, is not included in the regulation to avoid the need to amend the regulation every time the room, number of the Division changes.

Duty To Amend and Supplement Information

The proposed regulation contained the requirement established in ERISA Proc. 75-1 that an applicant promptly notify the Division of Exemptions if he discovers that any material fact or representation contained in his application, or in any supporting documents or testimony, was inaccurate or if any such fact or representation changes. However, the proposed regulation added the requirement that an applicant notify the Division of Exemptions when anything occurs that may affect the continuing accuracy of such facts or representations.

Two comments received indicated confusion as to the expiration date of the duty to update information submitted as part of an exemption application. Accordingly, the final Regulation clarifies § 2570.37(a) and (b) to indicate that such duty applies only during the pendency of the exemption application and expires after the exemption is granted. The Department also wishes to clarify that, in § 2570.37(a), the phrase "continuing accuracy of any such fact or representation" refers to future events or changes known before the exemption is granted that will render inaccurate facts stated or representations made before such grant. The Department wishes to note that exemptions are granted only to transactions as described. Therefore, if an exemption is granted and the transaction is not as described in some material aspect, the exemption does not take effect or protect parties in interest from liability for the transaction. See § 2570.49 of the regulation.

Tentative Denial Letters

Although ERISA Proc. 75-1 established no procedures to be followed by the Department in denying exemption applications or by applicants in responding to such denials, the Department has developed procedures over the years to notify applicants first to the tentative and, later, of the final denial of their applications. In large part, the proposed regulation codified these procedures.

Under the proposed regulation, the Department may decide to deny an exemption request at any of a number of stages in the review process. For example, it may decide after its initial review of an application that the requested exemption does not satisfy the statutory criteria set forth in sections 408(a) of ERISA and 4975(c)(2) of the Code. In that event, the Department will send a tentative denial letter to the applicant pursuant to § 2570.38 of the regulation. That letter will inform the applicant of the Department's tentative decision to deny the application and of the reasons therefore. Under § 2570.38, an applicant has 20 days from the date of this letter to request a conference with the Department and/or to notify the Department of his intern to submit additional information in writing to support the application. If the Department receives no request for a

conference and no notice of intent to submit additional information within that time, it will send the applicant a final denial letter pursuant to § 2570.41 of the regulation.

One of the comments received suggested that: (1) The final regulation should clarify that the Department's exemption staff may request applicants to provide additional information before a tentative denial letter is issued, and (2) rather than a "short statement" of the reasons for a tentative denial, the tentative denial letter should provide a detailed explanation of the basis for the Department's decision. Regarding the first suggestion, the comment indicates that it is unreasonable to expect an applicant to anticipate, when the exemption application is filed, all of the material which the Department may find pertinent to its consideration of an exemption application.

As stated above (under the heading "Exemption Application Contents - General Information), the Department's view is that the applicant bears the responsibility to demonstrate clearly that the requested exemption meets the statutory criteria. While nothing in the proposed regulation would preclude the Department's exemption staff from exercising its discretion and contacting an applicant for a clarification or additional information, the Department anticipates that such contact will be limited to exemption applications which, upon initial review, meet the essential requirements of the regulation. It is not administratively feasible to expect the Department's exemption staff to solicit information in every case. Moreover, such a procedure would, in effect, shift the burden of developing the exemption application from the applicant to the exemption staff.

Similarly, the imposition of a requirement that tentative denial letters detail all the reasons for the denial would, in effect, shift the analytical burden from the applicant to the Department. As with the circumstances under which additional information is solicited from applicants, the Department believes that the degree of detail required for a tentative denial letter should be left to the discretion of the exemption staff. The Department believes that a general statement of the reasons for a tentative denial is sufficient inasmuch as the issuance of a tentative denial letter does not terminate the exemption proceedings. Rather, the tentative denial letter offers the applicant the opportunity to have a conference and/or to submit additional information for consideration. In addition, a requirement to issuer a comprehensive and detailed tentative denial letter in most cases would significantly increase the time required to conclude a final action.

For these reasons, the Department has decided to adopt proposed § 2570.38 without change.

Opportunities To Submit Additional Information

Section 2570.39 of the proposed regulation provided that if an applicant wishes to submit additional information in support of a tentatively denied exemption application, he may notify the Department of his intention to do so within the prescribed 20-day period either by telephone or by letter. After issuing such a notice, an applicant has 30 days from the date of the notice to furnish additional information to the Department. If an applicant notifies the Department of his intent to submit additional information but requests no conference, and subsequently fails to submit the promised information within the prescribed 30-day period, the Department will issue the applicant a final denial letter pursuant to § 2570.41 of the regulation. However, an applicant who realizes that he will be unable to submit his additional information within the allotted time may avoid receiving a final denial letter by withdrawing his application before the end of the 30-day period pursuant to § 2570.44.

As an alternative to withdrawing his application, an applicant who, for reasons beyond his control, is unable to meet the 30-day deadline may request an extension of time for filing additional information, pursuant to § 2570.39 of the regulation. However, the Department will grant such extensions of time only in unusual circumstances.

No comments were received on this section of the proposed regulation which is adopted without change in the final regulation.

Conferences

Section 2570.40 of the proposed regulation described the procedures regarding conferences on exemption applications which the Department has tentatively decided to deny. Under this proposed section, an applicant is entitled to only one conference with respect to any exemption application, and is also given 20 days after the date of any conference to submit to the Department in writing any additional data or arguments discussed at the conference but not previously or adequately presented in writing. Under the proposal, an applicant is deemed to have waived his right to a conference if he fails, without good cause, to appear for a scheduled conference or to schedule a conference for any of the times proposed by the Department within the 45-day period following the receipt of his request for a conference.

Proposed § 2570.40 is adopted without change in the final regulation. The only comment received regarding this proposed section suggested that the Department continue its practice of informally consulting with applicants on exemption applications in addition to holding conferences. In this regard, the Department will continue to informally contact applicants as it deems appropriate.

Final Denial Letters

Proposed § 2570.41 is adopted without change in the final regulation. No comments were received on this section which specifies the circumstances in which the Department may issue a final denial letter denying a requested exemption. In most cases, the same procedure will also be followed in denying exemptions that the Department has already proposed through publication of a notice of proposed exemption in the Federal Register. However, in cases where the Department holds a hearing on an exemption, § 2570.41(a)(3) of the proposed regulation allowed the Department to issue a final denial letter without first issuing a tentative denial letter and without providing the applicant with the opportunity for a conference. In the Department's view, where a hearing on a proposed exemption is conducted, the applicant and other proponents of the exemption have adequate opportunity to present their views and other evidence in support of the exemption.

Notice of Proposed Exemption

The proposed regulation did not significantly alter the procedures established by ERISA Proc. 75-1 for granting an exemption. Under § 2570.42 of the regulation, the Department will publish a notice of proposed exemption in the Federal Register if, after reviewing an exemption application and any additional information submitted by an applicant, the Department tentatively concludes that the requested exemption satisfies the statutory criteria for the granting of an exemption and that the requested exemption is otherwise appropriate. This proposed section also described the contents of the notice of proposed exemption.

No comments were received on proposed § 2570.42, which is adopted without change in the final regulation.

Notifying Interested Persons

Like ERISA Proc. 75-1, the proposed regulation required applicants to provide notice to interested persons in the event that the Department decides to propose the exemption. Section 2570.34 of the proposal required an applicant to submit with his application a description of the interested persons to whom notice will be provided and a description of the manner in which the applicant proposed to provide notice. That section also required an applicant to provide an estimate of the time he will need to furnish notice to interested persons following publication of a notice of proposed exemption.

Section 2570.43 of the proposed regulation provided guidance on methods an applicant may use to notify interested persons of a proposed exemption and indicated what must be included in the notice. In addition to the Notice of Proposed Exemption published in the Federal Register, the applicant must include in the notification to interested persons a supplemental statement. Section 2570.43 also stated that, once the Department has published a notice of proposed exemption, the applicant must notify the interested persons described in his application in the manner indicated in the application unless the Department has informed the applicant beforehand that it considers the method of notification described in the application to be inadequate. Where the Department has so informed an applicant, it will also secure from the applicant an agreement to provide notice in the time and manner and to the persons designated by the Department. After furnishing notification, an applicant must provide the Department with a declaration under penalty of perjury certifying that notice was given to the persons and in the manner and time specified in his application or the superseding agreement with the Department.

One of the comments received concerning notification requested clarification that, in the case of a pooled fund, the notification requirement would be satisfied if the notice to interested persons is furnished to the appropriate fiduciary of each of the plans participating in the pooled fund, but not to all participants and beneficiaries of such plans.

In the Department's view, the individuals or organizations that will constitute erested persons" depends on the nature of the exemption being requd. For this reason, the proposed regulation did not attempt to delinea
ee term "interested persons" for purposes of the notification uirements of § 2570.43. As previously note
d, the applicant is required to i de, as part of the exemption application, a description of the interested persoo w
hom the applicant intends to provide notice (§ 2570.34(b)(2)(i)). If Department finds that either the method of p
roviding notice or the persto whom the applicant proposes to provide notice is inadequate, the Depart will, pu
rsuant to § 2570.43, secure an agreement from the applicant on the appropriate method of providing the notice and/or the scope of the notice to be provided. The Department believes that this approach provides the flexibility necessary to accommodate the varied types of exemption applications, as well as circumstances

unique to a particular applicant.[7]

Accordingly, the Department has decided to adopt § 2570.43 as proposed. However, subparagraph (b)(2) of this section has been modified to insert references to the Code and FERSA and to reflect the current room number of the Division of Exemptions in a footnote to that section. Paragraph (d), of this section has also been modified to clarify that the declaration accompanying the statement to be furnished to the Department regarding the notice to, interested persons must be made under penalty of perjury, as stated in the preamble to the proposed regulation (53 FR 24422, at 24425, June 28,1988).

Withdrawal and Reinstatement of Exemption Applications

Section 2570.44 of the proposed regulation permitted an applicant to withdraw his application at any time and to reinstate the application later. Reinstatement may be requested without resubmitting any information or materials previously furnished if no more than two years has elapsed from the withdrawal date. The request for reinstatement must be accompanied by any additional information that was outstanding at the time of withdrawal.

No comments were received on the proposed section, which is adopted in the final regulation without change.

Requests for Reconsideration of Final Denials

Under § 2570.45 of the proposed regulation, after the Department has issued a final denial letter on an exemption, it will not reconsider an application covering the same transaction unless the applicant presents significant new facts or arguments in support of the exemption which, for good reason, the applicant could not have submitted for consideration during the Department's initial review of the exemption. An applicant must present the significant new facts or arguments in a request for reconsideration within 180 days after the issuance of the final denial letter.

Proposed § 2570.45 also stated that only one request for reconsideration of any finally denied application will be considered by the Department. Although no comments were received on this section of the proposed regulation, the Department has modified this section in the final regulation to clarify that the Department will not limit the number of requests for reconsideration of final denials based solely on the applicant's failure to respond timely to a tentative denial letter or to furnish additional information timely (i.e., within the time frames provided under § 2570.38(b) or 2570.39(e), respectively).

The Department has also clarified in the final regulation that the declaration required under § 2570.45(c) must be made under penalty of perjury. This clarification is consistent with the requirement of § 2570.34(b)(5) that every original exemption application must be accompanied by a similar declaration under penalty of perjury. The Department intends that the same type of declaration should accompany both an original exemption application and request for reconsideration of a final denial based on the merits of such an application.

Hearings

Section 408(a) of ERISA precludes the Department from granting an exemption from the fiduciary self-dealing prohibitions of section 406(b) unless the Department affords an opportunity for a hearing and makes a determination on the record with respect to the three statutory criteria established for granting an exemption.[8] Because these provisions specify that an opportunity for a hearing must be given before an exemption from these prohibitions is granted, but not before such an exemption is denied, the Department interprets these provisions to mean that only opponents of such an exemption must be given an opportunity for a hearing. Moreover, the Department has concluded that it must provide a hearing on the record to opponents of such a proposed exemption only where it appears that there are material factual issues relating to the proposed exemption that cannot be fully explored without such a hearing. Indeed, in the Department's experience, such hearings are not useful where the only issues to be decided are matters of law or where material factual issues can be adequately explored by less costly and more expeditious means, such as written submissions. Accordingly, under § 2570.46 of the proposed regulation, the Department requires that persons who may be adversely affected by the grant of an exemption from the fiduciary self-dealing prohibitions offer some evidence of the existence of issues that can be fully examined only at a hearing before it will grant a request for a hearing. Where persuasive evidence of the existence of such issues is offered, however, the Department will grant the requested hearing.

Under § 2570.47 of the proposed regulation, the Department may schedule a hearing on its own motion if it determines that a hearing would be useful in exploring issues relevant to the requested exemption. Under the proposed procedures, if the Department decides to conduct a hearing on an exemption under either § 2570.46

or § 2570.47, the applicant must notify interested persons of the hearing in the manner prescribed by the Department. Ordinarily, such notice may be provided by furnishing interested persons with a copy of the notice of hearing published by the Department in the Federal Register within 10 days of its publication. After furnishing notice, the applicant must submit to the Department a declaration under penalty of perjury certifying that notice has been provided in the manner prescribed.

Any testimony or other evidence offered at a hearing held under either § 2570.46 or § 2570.47 becomes part of the administrative record to be used by the Department in making its final decision on an exemption application.

No comments were received on proposed § 2570.46 and 2570.47, which are adopted without change in the final regulation.

Grant of Exemption

Section 2570.48 of the proposed regulation provided that if, after considering all of an applicant's submissions, together with any comments received from interested persons and the record of any hearing held in connection with a requested exemption, the Department determines that the exemption should be granted, it will publish a notice in the Federal Register granting the exemption. This proposed section also described the contents of the grant notice.

No comments were received on proposed § 2570.48, which is adopted without change in the final regulation.

Limits on the Effect of Exemptions

Notwithstanding the duty to amend and supplement exemption applications provided under § 2570.37, the Department expressly conditions every exemption on the accuracy and completeness of the facts and representations provided by an applicant in support of the exemption. Therefore, as indicated under § 2570.49 of the proposed regulation, an exemption does not take effect or protect parties in interest from liability unless the material facts and representations contained in the application or in any other materials, documents, or testimony submitted by the applicant in support of the application were true and complete Thus, for example, in the case of a continuing exemption transaction such as a loan or a lease, if any of the material facts described in the application were to change after the exemption is granted, the exemption would cease to apply as of the date of such change even though, pursuant to § 2570.37, the applicant would not be obligated to notify the Department of such change. In the event of any such change, the parties in interest involved in the exemption transaction may apply for a new exemption to protect themselves from liability on or after the date of such change. Such an application should be submitted before such change occurs (see the discussion of prospective, versus retroactive, exemptions under the heading "Copies of Documents," above).

No comments were received on proposed § 2570.49, which is adopted without change in the final regulation.

Revocation or Modification of Exemptions

Section 2570.50 of the proposed regulation described the circumstances under which the Department may revoke or modify a previously granted exemption and the rights afforded to the applicant and to other interested persons in the event such revocation or modification is proposed. This section also provided that ordinarily such revocation or modification will be prospective only. Under this proposed section, one of the circumstances permitting the Department to modify or revoke an exemption was a change in policy which calls into question the continuing validity of the Department's original conclusions regarding the granted exemption.

Two of the comments objected to permitting a change in policy as grounds for revoking or modifying a granted exemption. The commentators argued that disturbing transactions already reviewed and approved by the Department would inject an unneeded element of uncertainty into the exemption process. Moreover, concern was expressed that the revocation of an exemption could severely disrupt an applicant's business and impose great financial hardship. A commentator suggested that the final regulation include a prohibition against revocation of an exemption until the affected party in interest is given both written notice of the facts or conduct which may warrant the revocation and an opportunity to demonstrate compliance with the requirements of the exemption.[9]

Proposed § 2570.50 is intended to provide the Department with the flexibility to undertake appropriate action in those cases where, subsequent to the grant of an exemption, potentially abusive practices or changes in the regulatory environment of an industry are identified which would cause the Department to reconsider its policy with respect to whether the exemption transactions continue to satisfy the statutory criteria under section 408(a) of ERISA.

With regard to the procedural issues raised by one of the comments, the Department notes that paragraph (b) of proposed § 2570.50 provides for notice to interested persons by publication in the Federal Register, notice to the applicant of the proposed revocation or modification, and an opportunity for the interested persons and the applicant to submit comments on the proposed revocation or modification.

After careful consideration of the comments, the Department has decided to adopt § 2570.50 as proposed. However the Department has clarified paragraph (b) to provide that the notice of proposed revocation or modification given to the applicant must be in writing.

Public Inspection and Copies

Section 2570.51 of the proposed regulation provided that the public may examine and copy any exemption application and all correspondence and documents submitted in regard thereto and may receive photocopies of all or any portion of such administrative record for a specified charge per page. For this reason, the Department cannot honor requests to keep confidential any information submitted regarding an exemption application. Therefore, none of the information submitted in regard to a requested exemption should be material that the applicant or other sender does not wish to disclose to the public.

No comments were received on proposed § 2570.51, which is adopted without change in the final regulation.

Executive Order 12291 Statement

The Department has determined that this regulatory action would not constitute a "major rule" as that term is used in Executive Order 12291 because the action would not result in: an annual effect on the economy of $100 million; a major increase in costs or prices for consumers, individual industries, government agencies, or geographical regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in the domestic or export markets.

Regulatory Flexibility Act Statement

The Department has determined that this regulation would not have a significant economic impact on small plans or other small entities. As stated previously, this regulation would do little more than describe procedures that reflect practices already in place for filing and processing applications for exemptions from the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974. the Internal Revenue Code of 1986, and the Federal Employee Retirement System Act of 1986.

Paperwork Reduction Act

This regulation modifies current collection of information requirements. It does so largely by codifying requests for facts and opinions that are routinely addressed to applicants for exemptions under current procedures. Accordingly, the regulation will not increase the paperwork burden for applicants. The regulation has been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511). The final regulation is assigned control number 1210-0060.

Authority

The final regulation set forth herein is issued pursuant to the authority granted in sections 408(a) (Pub. L. 93-406, 88 Stat. 883, 29 USC 1108(a)) and 505 (Pub. L. 93-406, 88 Stat. 894, 29 USC 1135) of ERISA, under Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), under 5 USC 8477(c)(3), and under Secretary of Labor's Order No. 187 (52 FR 13139, April 21, 1987).

List of Subjects in 29 C.F.R. Part 2570

Administrative practice and procedure, Employee benefit plans, Employee Retirement Income Security Act, Federal Employees' Retirement System Act, Party in interest, Pensions, Prohibited transactions.

Final Regulation

For the reasons set out in the preamble, parts 2570 and 2585 of chapter XXV of title 29 of the Code of Federal Regulations are amended as follows:

Part 2570-[Amended]

1. The authority for part 2570 is revised to read as follows:

Authority: 29 USC 1108(a), 1135; Reorganization Plan No. 4 of 1978; 5 USC 8477(c)(3); Secretary of Labor's Order No. 187.

Subpart A is also issued under 29 USC 1132(i).

2. By adding in the appropriate place the following new subpart B to part 2570.

Subpart B - Procedures for Filing and Processing Prohibited Transaction Exemption Applications

Sec.

2570.30 Scope of rules.

2570.31 Definitions.

2570.32 Persons who may apply for exemptions.

2570.33 Applications the Department will not ordinarily consider.

2570.34 Information to be included in every exemption application.

2570.35 Information to be included in applications for individual exemptions only.

2570.36 Where to file an application.

2570.37 Duty to amend and supplement exemption applications.

2570.38 Tentative denial letters.

2570.39 Opportunities to submit additional information.

2570.40 Conferences.

2570.41 Final denial letters.

2570.42 Notice of proposed exemption.

2570.43 Notification of interested persons by applicant.

2570.44 Withdrawal of exemption applications.

2570.45 Requests for reconsideration.

2570.46 Hearings in opposition to exemptions from restrictions on fiduciary self-dealing.

2570.47 Other hearings.

2570.46 Decision to grant exemptions.

2570.49 Limits on the effect of exemptions.

2570.50 Revocation or modification of exemptions.

2570.51 Public inspection and copies.

2570.52 Effective date.

Subpart B - Procedures for Filing and Processing Prohibited Transaction Exemption Applications

§ 2570.30 Scope of rules.

a. (1)The rules of procedure set forth in this subpart apply to all applications for exemption which the Department has authority to issue under:

    i. Section 408(a) of the Employee Retirement Income Security Act of 1974 (ERISA);
    ii. Section 4975(c)(2) of the Internal Revenue Code of 1986 (the Code) (see Reorganization Plan No. 4 of 1978); or

    iii. The Federal Employees' Retirement System Act of 1986 (FERSA) (5 USC 8477(c)(3)).

b. The Department will generally treat any exemption application which is filed solely under section 408(a) of ERISA or solely under section 4975(c)(2) of the Code as an exemption filed under both section 408(a) and section 4975(c)(2) if it relates to a transaction that would be prohibited by ERISA and by the corresponding provisions of the Code.
c. The procedures set forth in this subpart represent the exclusive means by which the Department will issue administrative exemptions. The Department will not issue exemptions upon oral request alone. Likewise, the Department will not grant exemptions orally. An applicant for an administrative exemption may request and receive oral advice from Department employees in preparing an exemption application. However, such advice does not constitute part of the administrative record and is not binding on the Department in its processing of an exemption application or in its examination or audit of a plan.

§ 2570.31 Definitions.

For purposes of these procedures, the following definitions apply:

a. An affiliate of a person means -

    1. Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person;
    2. Any director of, relative of, or partner in, any such person;
    3. Any corporation, partnership, trust, or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner; and
    4. Any employee or officer of the person who -

        i. Is highly compensated (as defined in section 4975(e)(2)(H) of the Code), or
        ii. Has direct or indirect authority, responsibility, or control regarding the custody, management, or disposition of plan assets.

b. A class exemption is an administrative exemption, granted under section 408(a) of ERISA, section 4975(c)(2) of the Code, and/or 5 USC 8477(c)(3), which applies to any parties in interest within the class of parties in interest specified in the exemption who meet the conditions of the exemption.
c. Department means the U.S. Department of Labor and includes the Secretary of Labor or his delegate exercising authority with respect to prohibited transaction exemptions to which this subpart applies.
d. Exemption transaction means the transaction or transactions for which an exemption is requested.
e. An individual exemption is an administrative exemption, granted under section 408(a) of ERISA, section 4975(c)(2) of the Code, and/or 5 USC 8477(c)(3), which applies only to the specific parties in interest named or otherwise defined in the exemption.
f. A party in interest means a person described in section 3(14) of ERISA or 5 USC 8477(a)(4) and includes a disqualified person, as defined in section 4975(e)(2) of the Code.
g. Pooled fund means an account or fund for the collective investment of the assets of two or more unrelated plans, including (but not limited to) a pooled separate account maintained by an insurance company and a common or collective trust fund maintained by a bank or similar financial institution.

§ 2570.32 Persons who may apply for exemptions.

a. The Department may initiate exemption proceedings on its own motion. In addition, the Department will initiate exemption proceedings upon the application of -

    1. Any party in interest to a plan who is or may be a party to the exemption transaction;
    2. Any plan which is a party to the exemption transaction; or
    3. In the case of an application for an exemption covering a class of parties in interest or a class of transactions, in addition to any person described in paragraphs (a)(1) and (a)(2) of this section, an association or organization representing parties in interest who may be parties to the exemption transaction.

b. An application by or for a person described in paragraph (a) of this section, may be submitted by the applicant or by his authorized representatives. If the application is submitted by a representative of the applicant, the representative must submit proof of his authority in the form of

    1. A power of attorney; or

2. A written certification from the applicant that the representation is authorized.

c. If the authorized representative of an applicant submits an application for an exemption to the Department together with proof of his authority for file the application as required by paragraph (b) of this section, the Department will direct all correspondence and inquiries concerning the application to the representative unless requested to do otherwise by the applicant.

§ 2570.33 Applications the Department will not ordinarily consider -

a. The Department will not ordinarily consider:

  1. An application that fails to include all the information required by § 2570.34 and 2570.35, or otherwise fails to conform to the requirements of these procedures; or
  2. An application for exemption involving a transaction or transactions which are the subject of an investigation for possible violations of part 1 or 4 of subtitle B of title I of ERISA or section 8477 or 8478 of FERSA or an application for an exemption involving a party in interest who is the subject of such an investigation or who is a defendant in an action by the Department or the Internal Revenue Service to enforce the above-mentioned provisions of ERISA or FERSA.

b. If for any reason the Department decides not to consider an exemption application, it will inform the applicant of that decision in writing and of the reasons therefore.
c. An application for an individual exemption relating to a specific transaction or transactions will ordinarily not be considered separately if the Department is considering a class exemption relating to the same type of transaction or transactions.

§ 2570.34 Information to be included in every exemption application.

a. All applications for exemptions must contain the following information:

  1. The name(s) of the applicant(s);
  2. A detailed description of the exemption transaction and the parties in interest for whom an exemption is requested, including a description of any larger integrated transaction of which the exemption transaction is a part;
  3. Whether the affected plan(s) and any parties in interest will be represented by the same person with regard to the exemption application;
  4. Reasons a plan would have for entering into the exemption transaction;
  5. The prohibited transaction provisions from which exemptive relief is requested and the reason why the transaction would violate each such provision;
  6. Whether the exemption transaction is customary for the industry or class involved;
  7. Whether the exemption transaction is or has been the subject of an investigation or enforcement action by the Department or by the Internal Revenue Service; and
  8. The hardship or economic loss, if any, which would result to the person or persons on behalf of whom the exemption is sought, to affected plans and to their participants and beneficiaries from denial of the exemption.

b. All applications for exemption must also contain the following:

  1. A statement explaining why the requested exemption would be -

     i. Administratively feasible;
     ii. In the interests of affected plans and their participants and beneficiaries; and
     iii. Protective of the rights of participants and beneficiaries of affected plans.

  2. With respect to the notification of interested persons required by § 2570.43:

     i. A description of the interested person(s) to whom the applicant intends to provide notice;
     ii. The manner in which the applicant will provide such notice; and
     iii. An estimate of the time the applicant will need to furnish notice to all interested persons following publication of a notice of the proposed exemption in the Federal Register.

  3. If an advisory opinion has been requested with respect to any issue relating to the exemption transaction -

i. A copy of the letter concluding the Department's action on the advisory opinion request; or
ii. If the Department has not yet concluded its action on the request:

A. A copy of the request or the date on which it was submitted together with the Department’s correspondence control number as indicated in the acknowledgment letter; and
B. An explanation of the effect of a favorable advisory opinion upon the exemption transaction.

4. If the application is to be signed by anyone other than an individual party in interest seeking exemptive relief on his own behalf, a statement which -

i. Identifies the individual, who will be signing the application and his position with the applicant; and
ii. Explain briefly the basis of his familiarity with the matters discussed in the application.

5. (i)A declaration in the following form: Under penalty of perjury, I declare that I am familiar with the matters discussed in this application and to the best of my knowledge and belief, the representations made in this application are true and correct.

(ii) This declaration must be dated and signed by:

A. The applicant himself in the case of an individual party in interest seeking exemptive relief on his own behalf;
B. A corporate officer or partner where the applicant is a corporation or partnership;
C. A designated officer or official where the applicant is an association, organization or other unincorporated enterprise;
D. The plan fiduciary who has the authority, responsibility, and control with respect to the exemption transaction where the applicant is a plan.

(iii) Specialized statements from third party experts, such as appraisals or analyses of market conditions, submitted to support an application for exemption must also be accompanied by a statement of consent from such expert acknowledging that he or she knows that his or her statement is being submitted to the Department as part of an application for exemption.

(iv) For those applications requiring an independent fiduciary to represent the plan in the exemption transaction, each statement submitted by said independent fiduciary must contain a signed and dated declaration under penalty of perjury that, to the best of said fiduciary's knowledge and belief the representations made in such statement are true and correct.

c. An application for exemption may also include a draft of the requested exemption which defines the transaction and parties in interest for which exemptive relief is sought and the specific conditions under which the exemption would apply.

§ 2570.35 Information to be included in applications for Individual exemptions only.

a. Except as provided in paragraph (c) of this section, every application for an individual exemption must include, in addition to the information specified in § 2570.34, the following information:

1. The name, address, telephone number, and type of plan or plans to which the requested exemption applies;
2. The Employer Identification Number (EIN) and the plan number (PN) used by such plan or plans in all reporting and disclosure required by the Department;
3. Whether any plan or trust affected by the requested exemption has ever been found by the Department, the Internal Revenue Service, or by a court to have violated the exclusive benefit rule of section 401(a) of the Code, or to have engaged in a prohibited transaction under

section 503(b) of the Code or corresponding provisions of prior law, section 4975(c)(1) of the Code, section 406 or 407(a) of ERISA, or 5 USC 8477(c)(3);

4. Whether any relief under section 408(a) of ERISA, section 4975(c)(2) of the Code, or 5 USC 8477(c)(3) has been requested by, or provided to, the applicant or any of the parties on behalf of whom the exemption is sought and, if so, the exemption application number or the prohibited transaction exemption number;
5. Whether the applicant or any of the parties in interest involved in the exemption transaction is currently, or has been within the last five years, a defendant in any lawsuit or criminal action concerning such person's conduct as a fiduciary or party in interest with respect to any plan;
6. Whether the applicant or any of the parties in interest involved in the exemption transaction has within the last 13 years, been convicted of any crime described in section 411 of ERISA.
7. Whether, within the last five years, any plan affected by the exemption transaction or any party in interest involved in the exemption transaction has been under investigation or examination by, or has been engaged in litigation or a continuing controversy with, the Department, the Internal Revenue Service, the Justice Department, the Pension Benefit Guaranty Corporation, or the Federal Retirement Thrift Investment Board involving compliance with provisions of FERSA, provisions of the Code relating to employee benefit plans, or provisions of FERSA relating to the Federal Thrift Savings Fund. If so, the applicant must submit copies of all correspondence with the Department, the Internal Revenue Service, the Justice Department, the Pension Benefit Guaranty Corporation, or the Federal Retirement Thrift Investment Board regarding the substantive issues involved in the investigation, examination, litigation, or controversy which relate to compliance with the provisions of part 1 or 4 of subtitle B of title I of ERISA, section 4975 of the Code, or section 8477 or 8478 of FERSA. For this purpose, the term "examination" does not include routine audits conducted by the Department pursuant to section 8477(g) of FERSA;
8. Whether any plan affected by the requested exemption has experienced a reportable event under section 4043 of ERISA;
9. Whether a notice of intent to terminate has been filed under section 4041 of ERISA respecting any plan affected by the requested exemption;
10. Names, addresses, and taxpayer identifying numbers of all parties in interest involved in the subject transaction;
11. The estimated number of participants and beneficiaries in each plan affected by the requested exemption as of the date of the application;
12. The percentage of the fair market value of the total assets of each affected plan that is involved in the exemption transaction;
13. Whether the exemption transaction has been consummated or will be consummated only if the exemption is granted;
14. If the exemption transaction has already been consummated:

    i. The circumstances which resulted in plan fiduciaries causing the plan to engage in the subject transaction before obtaining an exemption from the Department;
    ii. Whether the transaction has been terminated;
    iii. Whether the transaction has been corrected as defined in Code section 4975(f)(5);
    iv. Whether Form 5330, Return of Excise Taxes Related to Employee Benefit Plans, has been filed with the Internal Revenue Service with respect to the transaction; and
    v. Whether any excise taxes due under section 4975(a) and (b) of the Code by reason of the transaction have been paid.

15. The name of every person who has investment discretion over any assets involved in the exemption transaction and the relationship of each such person to the parties in interest involved in the exemption transaction and the affiliates of such parties in interest;
16. Whether or not the assets of the affected plan(s) are invested in loans to any party in interest involved in the exemption transaction, in property leased to any such party in interest, or in securities issued by any such party in interest, and, if such investments exist, a statement for each of these three types of investments which indicates:

    i. The type of investment to which the statement pertains;
    ii. The aggregate fair market value of all investments of this type as reflected in the plan's most recent annual report;
    iii. The approximate percentage of the fair market value of the plan's total assets as shown in such annual report that is represented by all investments of this type; and

iv. The statutory or administrative exemption covering these investments, if any.

17. The approximate aggregate fair market value of the total assets of each affected plan;
18. The person(s) who will bear the costs of the exemption application and of notifying interested persons; and
19. Whether an independent fiduciary is or will be involved in the exemption transaction and, if so, the names of the persons who will bear the cost of the fee payable to such fiduciary.

b. Each application for an individual exemption must also include:

1. True copies of all contracts, deeds, agreements, and instruments, as well as relevant portions of plan documents, trust agreements, and any other documents bearing on the exemption transaction;
2. A discussion of the facts relevant to the exemption transaction that are reflected in these documents and an analysis of their bearing on the requested exemption; and
3. A copy of the most recent financial statements of each plan affected by the requested exemption.

c. Special rule for applications for individual exemption involving pooled funds:

1. The information required by paragraphs (a)(8) through (12) of this section is not required to be furnished in an application for individual exemption involving one or more pooled funds;
2. The information required by paragraphs (a)(1) through (7) and (a)(13) through (19) of this section and by paragraphs (b)(1) through (3) of this section must be furnished by reference to the pooled fund, rather than to the plans participating therein. (For purposes of this paragraph, the information required by paragraph (a)(16) of this section relates solely to other pooled fund transactions with, and investments in, parties in interest involved in the exemption transaction which are also sponsors of plans which invest in the pooled fund.);
3. The following information must also be furnished -

    i. The estimated number of plans that are participating (or will participate) in the pooled fund; and
    ii. The minimum and maximum limits imposed by the pooled fund (if any) on the portion of the total assets of each Plan that may be invested in the pooled fund.

4. Additional requirements for applications for individual exemption involving pooled funds in which certain plans participate.

    i. This paragraph applies to any application for individual exemption involving one or more pooled funds in which any plan participating therein -

        A. Invests an amount which exceeds 20% of the total assets of the pooled fund, or
        B. Covers employees of -

            I. The party sponsoring or maintaining the pooled fund, or any affiliate of such party, or
            II. Any fiduciary with investment discretion over the pooled fund's assets, or any affiliate of such fiduciary.

    ii. The exemption application must include, with respect to each plan described in paragraph (c)(4)(i) of this section, the information required by paragraphs (a)(1) through (3), (a)(5) through (7), (a)(10), (a)(12) through (16), and (a)(18) and (19) of this section. The information required by this paragraph must be furnished by reference to the plan's investment in the pooled fund (e.g., the names, addresses and taxpayer identifying numbers of all fiduciaries responsible for the plan's investment in the pooled fund (§ 2570.35(a)(10), the percentage of the assets of the plan invested in the pooled fund [§ 2570.35(a)(12)], whether the plan's investment in the pooled fund has been consummated or will be consummated only if the exemption is granted [§ 2570.35(a)(13), etc.).
    iii. The information required by paragraph (c)(4) of this section is in addition to the information required by paragraphs (c)(2) and (3) of this section relating to information furnished by reference to the pooled fund.

5. The special rule and the additional requirements described in paragraphs (c)(1) through (4) of

this section do not apply to an individual exemption request solely for the investment by a plan in a pooled fund. Such an application must provide the information required by paragraphs (a) and (b) of this section.

§ 2570.36 Where to file an application.

The Department's prohibited transaction exemption program is administered by ension and Welfare Bene fits Administration (PWBA). Any exemption application governed by these procedures should be mailed or otherwise delivered to: Exemption Application, PWBA, Office of Exemption Determinations, Division of Exemptions, US Department of Labor, 200 Constitution Avenue, NW, Washington, DC 20210.

§ 2570.37 Duty to amend and supplement exemption applications.

a. During the pendency of his exemption application, an applicant must promptly notify the Division of Exemptions in writing, if he discovers that any material fact or representation contained in his application or any documents or testimony provided in support of the application is inaccurate, if any such fact or representation changes during this period, or if, during the pendency of the application, anything occurs that may affect the continuing accuracy of any such fact or representation.
b. If, at any time during the pendency of his exemption application, an applicant or any other party in interest who would participate in the exemption transaction becomes the subject of an investigation or enforcement action by the Department, the Internal Revenue Service, the Justice Department, the Pension Benefit Guaranty Corporation, or the Federal Retirement Thrift Investment Board involving compliance with provisions of ERISA, provisions of the Code relating to employee benefit plans, or provisions of FERSA relating to the Federal Thrift Savings Fund, the applicant must promptly notify the Division of Exemptions.
c. The Department may require an applicant provide documentation it considers necessary to verify any statements contained in the application or in supporting materials or documents.

§ 2570.38 Tentative denial letters.

a. If, after reviewing an exemption file, the Department concludes that it will not grant the exemption. it will notify the applicant in writing of its tentative denial of the exemption application. At the same time, the Department will provide a short statement of the reasons for its tentative denial.
b. An applicant will have 20 days from the date of a tentative denial letter to request a conference under § 2570.40 of these procedures and/or to notify the Department of its intent to submit additional information in writing, under § 2570.39 of these procedures. If the Department does not receive a request for a conference or a notification of intent to submit additional information within that time, it will issue a final denial letter pursuant to § 2570.41.
c. The Department need not issue a tentative denial letter to an applicant before issuing a final denial letter where the Department has conducted a hearing on the exemption pursuant to either § 2570.46 or § 2570.47 of these procedures.

§ 2570.39 Opportunities to submit additional information.

a. An applicant may notify the Department of its intent to submit additional information supporting an exemption application either by telephone or by letter sent to the address, furnished in, the applicant's tentative denial letter. At the same time, the applicant should indicate generally the type of information that he will submit.
b. An applicant will have 30 days from the date of the notification discussed in paragraph (a) of this section to submit in writing all of the additional information he intends to provide in support of his application. All such information must be accompanied by a declaration under penalty of perjury attesting to the truth and correctness of the information provided, which is dated and signed by a person qualified under § 2570.34(b)(5) of these procedures to sign such a declaration.
c. If, for reasons beyond his control, an applicant is unable to submit in writing all the additional information he intends to provide in support of his application within the 30-day period described in paragraph (b) of this section, he may request an extension of time to furnish the information. Such requests must be made before the expiration of the 30-day period and will be granted only in unusual circumstances and for limited periods of time.
d. If an applicant is unable to submit all of the additional information he intends to provide in support of his exemption application within the 30-day period specified in paragraph (b) of this section or within any additional period of time granted to him pursuant to paragraph (c) of this section, the applicant may withdraw the exemption application before expiration of the applicable time period and reinstate it later pursuant to § 2570.44 of these procedures.

e. The Department will issue without further notice the final denial letter, denying the requested exemption pursuant to § 2570.41 of these procedures where -

    1. The Department has not received the additional information that the applicant indicated he would submit within the 30-day period described in paragraph (b) of this section, or within any additional period of time granted pursuant to paragraph (c) of this section;
    2. The applicant did not request a conference pursuant to § 2570.38(b) of these procedures; and
    3. The applicant has not withdrawn his application as permitted by paragraph (d) of this section.

§ 2570.40 Conferences.

a. Any conference between the Department and an applicant pertaining to a requested exemption will be held in Washington, DC, except that a telephone conference will be held at the applicant's request.
b. An applicant is entitled to only one conference with respect to any exemption application. An applicant will not be entitled to a conference, however, where the Department has held a hearing on the exemption under either § 2570.46 or § 2570.47 of these procedures.
c. Insofar as possible, conferences will be scheduled as joint conferences with all applicants present where:

    1. More than one applicant has requested an exemption with respect to the same or similar types of transactions;
    2. The Department is considering the applications together as a request for a class exemption;
    3. The Department contemplates not granting the exemption; and
    4. More than one applicant has requested a conference.

d. The Department will attempt to schedule a conference under this section for a mutually convenient time during the 45-day period following the later of -

    1. The date the Department receives the applicant's request for a conference, or
    2. The date the Department notifies the applicant, after reviewing additional information submitted pursuant to § 2570.39, that it is still not prepared to propose the requested exemption. If the applicant is unable to attend a conference at any of the times proposed by the Department during this 45-day period or if the applicant fails to appear for a scheduled conference, he will be deemed to have waived his right to a conference unless circumstances beyond his control prevent him from scheduling a conference or attending a scheduled conference within this period.

e. Within 20 days after the date of any conference held under this section, the applicant may submit to the Department a written record of any additional data, arguments, or precedents discussed at the conference but not previously or adequately presented in writing.

§ 2570.41 Final denial letters.

a. The Department will issue a final denial letter denying a requested exemption where:

    1. The conditions for issuing a final denial letter specified in § 2570.38(b) or § 2570.39(e) of these procedures are satisfied;
    2. After issuing a tentative denial letter under § 2570.38 of this part and considering the entire record in the case, including all written information submitted pursuant to § 2570.39 and § 2570.40(e) of these procedures, the Department decides not to propose an exemption or to withdraw an exemption already proposed; or
    3. After proposing an exemption and conducting a hearing on the exemption under either § 2570.46 or § 2570.47 of this part and after considering the entire record in the case, including the record of the hearing, the Department decides to withdraw the proposed exemption.

§ 2570.42 Notice of proposed exemption.

If the Department tentatively decides, based on all the information submitted by an applicant, that the exemption should be granted, it will publish a notice of proposed exemption in the Federal Register. The notice will:

a. Explain the exemption transaction and summarize the information received by the Department in support of the exemption;
b. Specify any conditions under, which the exemption is proposed;

c. Inform interested persons of their right to submit comments in writing to the Department relating to the proposed exemption and establish a deadline for receipt of such comments;
d. If the proposed exemption includes relief from the prohibitions of section 406(b) of ERISA, section 4975(c)(1)(E) or (F) of the Code, or section 8477(c)(2) of FERSA, inform interested persons of their right to request a hearing under § 2570.46 of this part and establish a deadline for receipt of requests for such hearings.

§ 2570.43 Notification of Interested persons by applicant.

a. If, as set forth in the exemption application, the notification that an applicant intends to provide to interested persons upon publication of a notice of proposed exemption in the Federal Register is inadequate, the Department will so inform the applicant and will secure the applicant's written agreement to provide what it considers to be adequate notice under the circumstances.
b. If a notice of proposed exemption is published in the Federal Register in accordance with § 2570.42 of this part, the applicant must notify interested persons of the pendency of the exemption in the manner and time period specified in the application or in any superseding agreement with the Department. Any such notification must include:

    1. A copy of the notice of proposed exemption; and
    2. A supplemental statement in the following form:

> You are hereby notified that the United States Department of Labor is considering granting an exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974, the Internal Revenue Code of 1986, or the Federal Employees' Retirement System Act of 1986. The exemption under consideration is explained in the enclosed Notice of Proposed Exemption. As a person who may be affected by this exemption, you have the right to comment on the proposed exemption by [date].[1] [If you may be adversely affected by the grant of the exemption, you also have the right to request a hearing on the exemption by [date].][2]
>
> Comments or requests for a hearing should be addressed to: Office of Exemption Determinations, Pension and Welfare Benefits Administration, Room ---,[3] US Department of Labor, 200 Constitution Avenue, NW, Washington, DC 20210, Attention: Application No. ---,[4] The Department will make no final decision on the proposed exemption until it reviews all comments received in response to the enclosed notice. If the Department decides to hold a hearing on the exemption before making its final decision, you will be notified of the time and place of the hearing.

c. The method used to furnish notice to interested persons must be reasonably calculated to ensure that interested persons actually receive the notice. In all cases, personal delivery and delivery by first-class mail will be considered reasonable methods of furnishing notice.
d. After furnishing the notice required by this section, an applicant must provide the Department with a statement confirming that notice was furnished to the persons and in the manner and time designated in its exemption application or in any superseding agreement with the Department. This statement must be accompanied by a declaration under penalty of perjury attesting to the truth of the information provided in the statement and signed by a person qualified under § 2570.34(b)(5) of these procedures to sign such a declaration. No exemption will be granted until such a statement and its accompanying declaration have been furnished to the Department.

§ 2570.44 Withdrawal of exemption applications.

a. An applicant may withdraw his application for an exemption at any time by informing the Department, either orally or in writing, of his intent to withdraw.
b. Upon receiving an applicant's notice of intent to withdraw an application for an individual exemption, the Department will confirm by letter the applicant's withdrawal of the application and will terminate all proceedings relating to the application. If a notice of proposed exemption has been published in the Federal Register, the Department will publish a notice withdrawing the proposed exemption.
c. Upon receiving an applicant's notice of intent to withdraw an application for a class exemption or for an individual exemption that is being considered with other applications as a request for a class exemption, the Department will inform any other applicants for the exemption of the withdrawal. The Department

will continue to process other applications for the same exemption. If all applicants for a particular class exemption withdraw their applications, the Department may either terminate all proceedings relating to the exemption or propose the exemption on its own motion.

d. If, following the withdrawal of an exemption application, an applicant decides to reapply for the same exemption, he may submit a letter to the Department requesting that the application be reinstated and referring to the application number assigned to the original application. If, at the time the original application was withdrawn, any additional information to be submitted to the Department under § 2570.39 of these procedures was outstanding, that information must accompany the letter requesting reinstatement of the application. However, the applicant need not resubmit information previously furnished to the Department in connection with a withdrawn application unless reinstatement of the application is requested more than two years after the date of its withdrawal.
e. Any request for reinstatement of a withdrawn application submitted in accordance with paragraph (d) of this section, will be granted by the Department, and the Department will take whatever steps remained at the time the application was withdrawn to process the application.

§ 2570.45 Requests for reconsideration.

a. The Department will entertain one request for reconsideration of an exemption application that has been finally denied pursuant to § 2570.41(a)(2) or (a)(3) of this part if the applicant presents in support of the application significant new facts or arguments which for good reason could not have been submitted for the Department's consideration during its initial review of the exemption application.
b. A request for reconsideration of a previously denied application must be made within 180 days after the issuance of the final denial letter and must be accompanied by a copy of the Department's final letter denying the exemption and a statement setting forth the new information and/or arguments that provide the basis for reconsideration.
c. A request for reconsideration must also be accompanied by a declaration under penalty of perjury attesting to the truth of the new information provided, which is signed by a person qualified under § 2570.34(b)(5) of these procedures to sign such a declaration.
d. If, after reviewing a request for reconsideration, the Department decides that the facts and arguments presented do not warrant reversal of its original decision to deny the exemption, it will send a letter to the applicant reaffirming that decision.
e. If, after reviewing a request for reconsideration, the Department decides, based on the new facts and arguments submitted, to reconsider its denial letter, it will notify the applicant of its intent to reconsider the application in light of the new information provided. The Department will then take wherever steps remained at the time it issued its final denial letter to process the exemption application
f. If, at any point during its subsequent processing of the application, the Department decides again that the exemption is unwarranted, it will issue a letter affirming its final denial.

§ 2570.46 Hearings in opposition to exemptions from restrictions on fiduciary self-dealing.

a. Any interested person who may be adversely affected by an exemption which the Department proposes to grant from the restrictions of section 406(b) of ERISA, section 4975(c)(1)(E) or (F) of the Code, or section 8477(c)(2) of FERSA may request a hearing before the Department within the period of time specified in the Federal Register notice of the proposed exemption Any such request must state:

    1. The name, address, and telephone number of the person making the, request;
    2. The nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption; and
    3. A statement of the issues to be addressed and a general description of the evidence to be presented at the hearing.

b. The Department will grant a request for a hearing made in accordance with paragraph (a) of this section where a hearing is necessary to fully explore material factual issues identified by the person requesting the hearing. However, the Department may decline to hold a hearing where:

    1. The request for the hearing does not meet the requirements of paragraph (a);
    2. The only issues identified for exploration at the hearing are matters of law; or
    3. The factual issues identified can be fully explored through the submission of evidence in written form.

c. An applicant for an exemption must notify interested persons in the event that the Department schedules a hearing on the exemption. Such notification must be given in the form, time, and manner prescribed by the Department. Ordinarily, however, adequate notification can be given by providing to

interested persons a copy of the notice of hearing published by the Department in the Federal Register within 10 days of its publication, using any of the methods approved in § 2570.43(c) of this part.

d. After furnishing the notice required by paragraph (c) of this section, an applicant must submit a statement confirming that notice was given in the form, manner, and time prescribed. This statement must be accompanied by a declaration under penalty of perjury attesting to the truth of the information provided in the statement, which is signed by a person qualified under § 2570.34(b)(5) of these procedures to sign such a declaration.

2570.47 Other hearings.

a. In its discretion, the Department may schedule a hearing on its own motion where it determines that issues relevant to the exemption can be most fully or expeditiously explored at a hearing.
b. An applicant for an exemption must notify interested persons of any hearing on an exemption scheduled by the Department in the manner described in § 2570.46(c). In addition, the applicant must submit a statement subscribed as true under penalty of perjury like that required in § 2570.46(d).

§ 2570.48 Decision to grant exemptions.

a. If, after considering all the facts and representations submitted by an applicant in support of an exemption application, all the comments received in response to a notice of proposed exemption, and the record of any hearing held in connection with the proposed exemption, the Department determines that the exemption should be granted, it will publish a notice in the Federal Register granting the exemption.
b. A Federal Register notice granting an exemption will summarize the transaction or transactions for which exemptive relief has been granted and will specify the conditions under which such exemptive relief is available.

§ 2570.49 Limits on the effect of exemptions.

a. An exemption does not take effect or protect parties in interest from liability with respect to the exemption transaction unless the material facts and representations contained in the application and in any materials and documents submitted in support of the application were true and complete.
b. An exemption is effective only for the period of time specified and only under the conditions set forth in the exemption.
c. Only the specific parties to whom an exemption grants relief may rely on the exemption. If the notice granting an exemption does not limit exemptive relief to specific parties, all parties to the exemption transaction may rely on the exemption.

§ 2570.50 Revocation or modification of exemptions.

a. If, after an exemption takes effect, changes in circumstances, including changes in law or policy, occur which call into question the continuing validity of the Department's original conclusions concerning the exemption, the Department may take steps to revoke or modify the exemption.
b. Before revoking or modifying an exemption, the Department will publish a notice of its proposed action in the Federal Register and provide interested persons with an opportunity to comment on the proposed revocation or modification. In addition, the Department will give the applicant at least 30 days notice in writing of the proposed revocation or modification and the reasons therefore and will provide the applicant with the opportunity to comment on the revocation or modification.
c. Ordinarily the revocation modification of an exemption will have prospective effect only.

§ 2570.51 Public Inspection and copies.

a. The administrative record of each exemption application will be open to public inspection and copying at the Public Disclosure Branch, PWBA, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, DC 20210.
b. Upon request, the staff of the Public Disclosure Branch will furnish photocopies of an administrative record, or any specified portion of that record, for a specified charge per page.

§ 2570.52 Effective Date.

This regulation is effective with respect to all applications for exemptions filed with the Department under section 408(a) of ERISA, section 4975(c)(2) of the Code, or 5 USC 8477(c)(3) at any time on or after September 10, 1990. Applications for exemptions under section 408(a) of ERISA and/or section 4975 of the Code filed before September 10, 1990, are governed by ERISA Procedure 75-1. Applications for exemption

under 5 USC 8477(c)(3) filed before September 10, 1990, but after December 29, 1988 are governed by part 2585 of chapter XXV of title 29 of the Code of Federal Regulations, (section 29 C.F.R. part 2585 as revised July 1, 1990). Applications under 5 USC 8477(c)(3) filed before December 29, 1988 are governed by ERISA Procedure 75-1.

Part 2585 [Removed)

3. The regulations in part 2585 of chapter XXV of title 29 of the Code of Federal Regulations are removed.

Signed at Washington, DC, this 27th day of July, 1990.

David G. Ball, Assistant Secretary for Pension and Welfare Benefits

U.S. Department of Labor.

- Footnotes to Preamble -

1. Under section 111 of the FERSA Technical Corrections Act of 1986 (Pub.L. 99-566, October 27, 1986), the Department's existing exemption procedures were made applicable to exemption applications under FERSA until the earlier of the date of publication of final regulations adopting an exemption procedure or December 31, 1988.
2. Section 8477(g) of FERSA requires the Secretary of Labor to establish a program to carry out audits to determine the level of compliance with the requirements of this section relating to fiduciary responsibilities and prohibited activities of fiduciaries with respect to the Thrift Savings Fund of the Federal Employees' Retirement System. The Department has interpreted section 8477(g) to mean that the Department has a continuing responsibility to audit the Thrift Savings Fund established by FERSA.
3. These sections, relate, in pertinent part, to the Department's nonconsideration of exemption applications which are the subject of an investigation for possible violations of FERSA or which involve a party in interest who is the subject of such an investigation (§ 2570.33(a)(2)); and to the notification of the Division of Exemptions of certain investigations initiated after the filing of an exemption application (§ 2570.37(b)).
4. This section of the regulation requires certain exemption applications to include copies of correspondence relating to investigations, examinations, litigation, and continuing controversies with specified Federal agencies.
5. The Department must find that the statutory criteria are satisfied before granting a prohibited transaction exemption. The legislative history of ERISA makes it clear, however, that the Department has broad discretion in determining whether or not to grant an exemption. H.R. Rep. 1280, 93 Cong., 2d Sess. 311 (1974).
6. See section 1(e) of PTE 84-14 (49 FR 9494, March 13, 1984) the class exemption involving qualified professional asset managers [QPAM] (See page 5-).
7. The Department notes that the form of the notice is prescribed under § 2570.43(b) of the regulation.
8. Section 4975(c)(2) of the Code and 5 USC 8477(c)(3)(D) (added by FERSA) contain similar hearing requirements. The following discussion of the hearing requirements of section 408(a) of ERISA is equally applicable to those statutory provisions.
9. This comment compares the revocation of an exemption to the revocation of a license granted by an agency of the United States Government pursuant to 5 USC 558(c). The Department is expressing no opinion herein as to the applicability of 5 USC 558(c) to the revocation of prohibited transaction exemptions under ERISA, the Code, or FERSA.

- Footnotes to Regulation -

1. The applicant will write in this space the date of the last day of the time period specified in the notice of proposed exemption.
2. To be added in the case of an exemption that provides relief from section 406(b) of ERISA or corresponding sections of the Code or FERSA.
3. The applicant will fill in the room number of the Division of Exemptions. As of the date of this final regulation, the room number of the Division of Exemptions was N-5671.
4. The applicant will fill in the exemption application number, which is stated in the notice of proposed exemption, as well as in all correspondence from the Department to the applicant regarding the application.

Revenue Ruling 59-60

Valuation of Non-Traded Assets

As Modified by 65-193

In valuing the stock of closely held corporations, or the stock of corporations where market quotations are not available, all other available financial data, as well as all relevant factors affecting the fair market value must be considered for estate tax and gift tax purposes. No general formula may be given that is applicable to the many different valuation situations arising in the valuation of such stock. However, the general approach, methods, and factors which must be considered in valuing such securities are outlined.

Revenue Ruling 54-77, C.B. 1954-1, 187, superseded.

Section 1. Purpose.

The purpose of this Revenue Ruling is to outline and review in general the approach, methods and factors to be considered in valuing shares of the capital stock of closely held corporations for estate tax and gift tax purposes. The methods discussed herein will apply likewise to the valuation of corporate stocks on which market quotations are either unavailable or are of such scarcity that they do not reflect the fair market value.

Sec. 2. Background and definitions.

.01 All valuations must be made in accordance with the applicable provisions of the Internal Revenue Code of 1954 and the Federal Estate Tax and Gift Tax Regulations. Sections 2031(a), 2032 and 2512(a) of the 1954 Code (sections 811 and 1005 of the 1939 Code) require that the property to be included in the gross estate, or made the subject of a gift, shall be taxed on the basis of the value of the property at the time of death of the decedent, the alternate date if so elected, or the date of gift.

.02 Section 20.2031-1(b) of the Estate Tax Regulations (section 81.10 of the Estate Tax Regulations 105) and section 25.2512-1 of the Gift Tax Regulations (section 86.19 of Gift Tax Regulations 108) define fair market value, in effect, as the price at which the property would change hands between a willing buyer and a willing seller when the former is not under any compulsion to buy and the latter is not under any compulsion to sell, both parties having reasonable knowledge of relevant facts. Court decisions frequently state in addition that the hypothetical buyer and seller are assumed to be able, as well as willing, to trade and to be well informed about the property and concerning the market for such property.

.03 Closely held corporations are those corporations the shares of which are owned by a relatively limited number of stockholders. Often the entire stock issue is held by one family. The result of this situation is that little, if any, trading is the shares takes place. There is, therefore, no established market for the stock and such sales as occur at irregular intervals seldom reflect all of the elements of a representative transaction as defined by the term "fair market value."

Sec. 3. Approach to valuation.

.01 A determination of fair market value, being a question of fact, will depend upon the circumstances in each case. No formula can be devised that will be generally applicable to the multitude of different valuation issues arising in estate and gift tax cases. Often, an appraiser will find wide differences of opinion as to the fair market value of a particular stock. In resolving such differences, he should

maintain a reasonable attitude in recognition of the fact that valuation is not an exact science. A sound valuation will be based upon all the-relevant facts, but the elements of common sense, informed judgment and reasonableness must enter into the process of weighing those facts and determining their aggregate significance.

.02 The fair market value of specific shares of stock will vary as general economic conditions change from "normal" to "boom" or "depression," that is, according to the degree of optimism or pessimism with which the investing public regards the future at the required date of appraisal. Uncertainty as to the stability or continuity of the future income from a property decreases its value by increasing the risk of loss of earnings and value in the future. The value of shares of stock of a company with very uncertain future prospects is highly speculative. The appraiser must exercise his judgment as to the degree of risk attaching to the business of the corporation which issued the stock, but that judgment must be related to all of the other factors affecting value.

.03 Valuation of securities is, in essence, a prophesy as to the future and must be based on facts available at the required date of appraisal. As a generalization, the prices of stocks which are traded in volume in a free and active market by informed persons best reflect the consensus of the investing public as to what the future holds for the corporations and industries represented. When a stock is closely held, is traded infrequently, or is traded in an erratic market, some other measure of value must be used. In many instances, the next best measure may be found in the prices at which the stocks of companies engaged in the same or a similar line of business are selling in a free and open market.

Sec. 4. Factors to consider.

.01 It is advisable to emphasize that in the valuation of the stock of closely held corporations or the stock of corporations where market quotations are either lacking or too scarce to be recognized, all available financial data, as well as all relevant factors affecting the fair market value, should be considered. The following factors, although not all-inclusive are fundamental and require careful analysis in each case:

a. The nature of the business and the history of the enterprise from its inception.

a. The economic outlook in general and the condition and outlook of the specific industry in particular.
b. The book value of the stock and the financial condition of the business.
c. The earning capacity of the company.
d. The dividend-paying capacity.
e. Whether or not the enterprise has goodwill or other intangible value.
f. Sales of the stock and the size of the block of stock to be valued.
g. The market price of stocks of corporations engaged in the same or a similar line of business having their stocks actively traded in a free and open market, either on an exchange or over-the-counter.

.02 The following is a brief discussion of each of the foregoing factors:

a. The history of a corporate enterprise will show its past stability or instability, its growth or lack of growth, the diversity or lack of diversity of its operations, and other facts needed to form an opinion of the degree of risk involved in the business. For an enterprise which changed its form of organization but carried on the same or closely similar operations of its predecessor, the history of the former enterprise should be considered. The detail to be considered should increase with approach to the required date of appraisal, since recent events are of greatest help in predicting the future; but a study of gross and net income, and of dividends covering a long prior period, is highly desirable. The history to be studied should include, but need not be limited to, the nature of the business, its products or services, its operating and investment assets, capital structure, plant facilities, sales records and management, all of which should be considered as of the date of the appraisal, with due regard for recent significant changes. Events of the past that are unlikely to recur in the future should be discounted, since value has a close relation to future expectancy.
b. A sound appraisal of a closely held stock must consider current and prospective economic conditions as of the date of appraisal, both in the national economy and in the industry or industries with which the corporation is allied. It is important to know that the company is more or less successful than its competitors in the same industry, or that it is maintaining

a stable position with respect to competitors. Equal or even greater significance may attach to the ability of the industry with which the company is allied to compete with other industries. Prospective competition which has not been a factor in prior years should be given careful attention. For example, high profits due to the novelty of its product and the lack of competition often lead to increasing competition. The public's appraisal of the future prospects of competitive industries or of competitors within an industry may be indicated by price trends in the markets for commodities and for securities. The loss of the manager of a so-called "one-man" business may have a depressing effect upon the value of the stock of such business, particularly if there is a lack of trained personnel capable of succeeding to the management of the enterprise. In valuing the stock of this type of business, therefore, the effect of the loss of the manager on the future expectancy of the business, and the absence of management- succession potentialities are pertinent factors to be taken into consideration. On the other hand, there may be factors which offset, in whole or in part, the loss of the manager's services. For instance, the nature of the business and of its assets may be such that they will not be impaired by the loss of the manager. Furthermore, the loss may be adequately covered by life insurance, or competent management might be employed on the basis of the consideration paid for the former manager's services. These, or other offsetting factors, if found to exist, should be carefully weighed against the loss of the manager's services in valuing the stock of the enterprise.

c. Balance sheets should be obtained, preferably in the form of comparative annual statements for two or more years immediately preceding the date of appraisal, together with a balance sheet at the end of the month preceding that date, if corporate accounting will permit. Any balance sheet descriptions that are not self-explanatory, and balance sheet items comprehending diverse assets or liabilities, should be clarified in essential detail by supporting supplemental schedules. These statements usually will disclose to the appraiser (1) liquid position (ratio of current assets to current liabilities); (2) gross and net book value of principal classes of fixed assets; (3) working capital; (4) long-term indebtedness; (5) capital structure; and (6) net worth. Consideration also should be given to any assets not essential to the operation of the business, such as investments in securities, real estate, etc. In general, such nonoperating assets will command a lower rate of return than do the operating assets, although in exceptional cases the reverse may be true. In computing the book value per share of stock, assets of the investment type should be revalued on the basis of their market price and the book value adjusted accordingly. Comparison of the company's balance sheets over several years may reveal, among other facts, such developments as the acquisition of additional production facilities or subsidiary companies, improvement in financial position, and details as to recapitalizations and other changes in the capital structure of the corporation. If the corporation has more than one class of stock outstanding, the charter or certificate of incorporation should be examined to ascertain the explicit rights and privileges of the various stock issues including: (1) voting powers, (2) preference as to dividends, and (3) preference as to assets in the event of liquidation.

d. Detailed profit-and-loss statements should be obtained and considered for a representative period immediately prior to the required date of appraisal, preferably five or more years. Such statements should show:

1. Gross income by principal items;
2. Principal deductions from gross income including major prior items of operating expenses, interest and other expense on each item of long-term debt, depreciation and depletion if such deductions are made, officers' salaries, in total if they appear to be reasonable or in detail if they seem to be excessive, contributions (whether or not deductible for tax purposes) that the nature of its business and its community position require the corporation to make, and taxes by principal items, including income and excess profits taxes;
3. Net income available for dividends;
4. Rates and amounts of dividends paid on each class of stock;
5. Remaining amount carried to surplus; and
6. Adjustments to, and reconciliation with, surplus as stated on the balance sheet.

With profit and loss statements of this character available, the appraiser

should be able to separate recurrent from nonrecurrent items of income and expense, to distinguish between operating income and investment income, and to ascertain whether or not any line of business in which the company is engaged is operated consistently at a loss and might be abandoned with benefit to the company. The percentage of earnings retained for business expansion should be noted when dividend-paying capacity is considered. Potential future income is a major factor in many valuations of closely-held stocks, and all information concerning past income which will be helpful in predicting the future should be secured. Prior earnings records usually are the most reliable guide as to the future expectancy, but resort to arbitrary five-or-ten-year averages without regard to current trends or future prospects will not produce a realistic valuation. If, for instance, a record of progressively increasing or decreasing net income is found, then greater weight may be accorded the most recent years' profits in estimating earning power. It will be helpful, in judging risk and the extent to which a business is a marginal operator, to consider deductions from income and net income in terms of percentage of sales. Major categories of cost and expense to be so analyzed include the consumption of raw materials and supplies in the case of manufacturers, processors and fabricators; the cost of purchased merchandise in the case of merchants; utility services; insurance; taxes; depletion or depreciation; and interest.

e. Primary consideration should be given to the dividend-paying capacity of the company rather than to dividends actually paid in the past. Recognition must be given to the necessity of retaining a reasonable portion of profits in a company to meet competition. Dividend-paying capacity is a factor that must be considered in an appraisal, but dividends actually paid in the past may not have any relation to dividend-paying capacity. Specifically, the dividends paid by a closely held family company may be measured by the income needs of the stockholders or by their desire to avoid taxes on dividend receipts, instead of by the ability of the company to pay dividends. Where an actual or effective controlling interest in a corporation is to be valued, the dividend factor is not a material element, since the payment of such dividends is discretionary with the controlling stockholders. The individual or group in control can substitute salaries and bonuses for dividends, thus reducing net income and understating the dividend-paying capacity of the company. It follows, therefore, that dividends are less reliable criteria of fair market value than other applicable factors.
f. In the final analysis, goodwill is based upon earning capacity. The presence of goodwill and its value, therefore, rests upon the excess of net earnings over and above a fair return on the net tangible assets. While the element of goodwill may be based primarily on earnings, such factors as the prestige and renown of the business, the ownership of a trade or brand name, and a record of successful operation over a prolonged period in a particular locality, also may furnish support for the inclusion of intangible value. In some instances it may not be possible to make a separate appraisal of the tangible and intangible assets of the business. The enterprise has a value as an entity. Whatever intangible value there is, which is supportable by the facts, may be measured by the amount by which the appraised value of the tangible assets exceeds the net book value of such assets.
g. Sales of stock of a closely held corporation should be carefully investigated to determine whether they represent transactions at arm's length. Forced or distress sales do not ordinarily reflect fair market value nor do isolated sales in small amounts necessarily control as the measure of value. This is especially true in the valuation of a controlling interest in a corporation. Since, in the case of closely held stocks, no prevailing market prices are available, there is no basis for making an adjustment for blockage. It follows, therefore, that such stocks should be valued upon a consideration of all the evidence affecting the fair market value. The size of the block of stock itself is a relevant factor to be considered. Although it is true that a minority interest in an unlisted corporation's stock is more difficult to sell than a similar block of listed stock, it is equally true that control of a corporation, either actual or in effect, representing as it does an added element of value, may justify a higher value for a specific block of stock.
h. Section 2031(b) of the Code states, in effect, that in valuing unlisted securities the value of stock or securities of corporations engaged in the same or a similar line of business which are listed on an exchange should be taken into consideration along with all other factors.

> An important consideration is that the corporations to be used for comparisons have capital stocks which are actively traded by the public. In accordance with section 2031(b) of the Code, stocks listed on an exchange are to be considered first. However, if sufficient comparable companies whose stocks are listed on an exchange cannot be found, other comparable companies which have stocks actively traded in on the over-the-counter market also may be used. The essential factor is that whether the stocks are sold on an exchange or over-the-counter there is evidence of an active, free public market for the stock as of the valuation date. In selecting corporations for comparative purposes, care should be taken to use only comparable companies. Although the only restrictive requirement as to comparable corporations specified in the statute is that their lines of business be the same or similar, yet it is obvious that consideration must be given to other relevant factors in order that the most valid comparison possible will be obtained. For illustration, a corporation having one or more issues of preferred stock, bonds or debentures in addition to its common stock should not be considered to be directly comparable to one having only common stock outstanding. In like manner, a company with a declining business and decreasing markets is not comparable to one with a record of current progress and market expansion.

Sec. 5. Weight to be accorded various factors.

The valuation of closely held corporate stock entails the consideration of all relevant factors as stated in section 4. Depending upon the circumstances in each case, certain factors may carry more weight than others because of the nature of the company's business. To illustrate:

a. Earnings may be the most important criterion of value in some cases whereas asset value will receive primary consideration in others. In general, the appraiser will accord primary consideration to earnings when valuing stocks of companies which sell products or services to the public; conversely, in the investment or holding type of company, the appraiser may accord the greatest weight to the assets underlying the security to be valued.
b. The value of the stock of a closely held investment or real estate holding company, whether or not family owned, is closely related to the value of the assets underlying the stock. For companies of this type the appraiser should determine the fair market values of the assets of the company. Operating expenses of such a company and the cost of liquidating it, if any, merit consideration when appraising the relative values of the stock and the underlying assets. The market values of the underlying assets give due weight to potential earnings and dividends of the particular items of property underlying the stock, capitalized at rates deemed proper by the investing public at the date of appraisal. A current appraisal by the investing public should be superior to the retrospective opinion of an individual. For these reasons, adjusted net worth should be accorded greater weight in valuing the stock of a closely held investment or real estate holding company, whether or not family owned, than any of the other customary yardsticks of appraisal, such as earnings and dividend paying capacity.

Sec. 6. Capitalization rates.

In the application of certain fundamental valuation factors, such as earnings and dividends, it is necessary to capitalize the average or current results at some appropriate rate. A determination of the proper capitalization rate presents one of the most difficult problems in valuation. That there is no ready or simple solution will become apparent by a cursory check of the rates of return and dividend yields in terms of the selling prices of corporate shares listed on the major exchanges of the country. Wide variations will be found even for companies in the same industry. Moreover, the ratio will fluctuate from year to year depending upon economic conditions. Thus, no standard tables of capitalization rates applicable to closely held corporations can be formulated. Among the more important factors to be taken into consideration in deciding upon a capitalization rate in a particular case are: (1) the nature of the business; (2) the risk involved; and (3) the stability or irregularity of earnings.

Sec. 7. Average of factors.

Because valuations cannot be made on the basis of a prescribed formula, there is no means whereby the various applicable factors in a particular case can be assigned mathematical weights in deriving the fair market value. For this reason, no useful purpose is served by taking an average of several factors (for example, book value, capitalized earnings and capitalized dividends) and basing the valuation on the result. Such a process excludes active consideration of other pertinent factors, and the end result cannot be supported by a realistic application of the significant facts in the case except by mere chance.

Sec. 8. Restrictive agreements.

Frequently, in the valuation of closely held stock for estate and gift tax purposes, it will be found that the stock is subject to an agreement restricting its sale or transfer. Where shares of stock were acquired by a decedent subject to an option reserved by the issuing corporation to repurchase at a certain price, the option price is usually accepted as the fair market value for estate tax purposes. See Rev. Rul. 54-76, C.B. 1954-1, 194. However, in such case the option price is not determinative of fair market value for gift tax purposes. Where the option, or buy and sell agreement, is the result of voluntary action by the stockholders and is binding during the life as well as at the death of the stockholders, such agreement may or may not, depending upon the circumstances of each case, fix the value for estate tax purposes. However, such agreement is a factor to be considered, with other relevant factors, in determining fair market value. Where the stockholder is free to dispose of his shares during life and the option is to become effective only upon his death, the fair market value is not limited to the option price. It is always necessary to consider the relationship of the parties, the relative number of shares held by the decedent, and other material facts, to determine whether the agreement represents a bona fide business arrangement or is a device to pass the decedent's shares to the natural objects of his bounty for less than an adequate and full consideration in money or money's worth. In this connection see Rev. Rul. 157 C.B. 1953-2, 255, and Rev. Rul. 189, C.B. 1953-2, 294.

Sec. 9. Effect on other documents.

Revenue Ruling 54-77, C.B. 1954-1, 187, is hereby superseded.

T. D. 9072

Catch-Up Contributions for Individuals Age 50 or Older

Department of the treasury

Internal Revenue Service (IRS)

26 CFR Part 1

Agency: Internal Revenue Service (IRS), Treasury

Action: Final regulations

Summary:

This document contains final regulations that provide guidance concerning the requirements for retirement plans providing catch-up contributions to individuals age 50 or older pursuant to the provisions of section 414(v). These final regulations affect section 401(k) plans, section 408(p) SIMPLE IRA plans, section 408(k) simplified employee pensions, section 403(b) tax-sheltered annuity contracts, and section 457 eligible governmental plans, and affect participants eligible to make elective deferrals under these plans or contracts.

Dates:

Effective Date: These final regulations are effective on July 8, 2003.

Applicability Date: These final regulations are applicable to contributions in taxable years beginning on or after January 1, 2004.

Supplementary information:

Background

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under sections 402(g) and 414(v) of the Internal Revenue Code (Code). Section 414(v), added by the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) (Public Law 107-16; 115 Stat. 38), effective for years beginning after December 31, 2001, permits an individual age 50 or older to make additional elective deferrals each year, up to a dollar limit, if certain requirements provided under that section are satisfied. Under section 414(v)(3), these additional elective deferrals are not subject to certain otherwise applicable limitations on elective deferrals and are excluded from consideration for certain nondiscrimination tests. Under section 414(v)(4), catch-up contributions generally must be made available to all catch-up eligible individuals who participate under any plan maintained by the employer that provides for elective deferrals.

Adoption of Amendments to the Regulations

26 CFR part 1 is amended as follows:

Part 1-Income Taxes

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.402(g)-2 is added to read as follows:

§1.402(g)-2 Increased limit for catch-up contributions.

(a) General rule. Under section 402(g)(1)(C), in determining the amount of elective deferrals that are includible in gross income under section 402(g) for a catch-up eligible participant (within the meaning of §1.414(v)-1(g)), the otherwise applicable dollar limit under section 402(g)(1)(B) (as increased under section 402(*g)(7*), to the extent applicable) shall be further increased by the applicable dollar catch-up limit as set forth under §1.414(v)-1(c)(2).

(b) Participants in multiple plans. Paragraph (a) of this section applies without regard to whether the applicable employer plans (within the meaning of section 414(v)(6)) treat the elective deferrals as catch-up contributions. Thus, a catch-up eligible participant who makes elective deferrals under applicable employer plans of two or more employers that in total exceed the applicable dollar amount under section 402(g)(1) by an amount that does not exceed the applicable dollar catch-up limit under either plan may exclude the elective deferrals from gross income, even if neither applicable employer plan treats those elective deferrals as catch-up contributions.

(c) Effective date-

(1) Statutory effective date. Section 402(g)(1)(C) applies to contributions in taxable years beginning on or after January 1, 2002.

(2) Regulatory effective date. Paragraphs (a) and (b) of this section apply to contributions in taxable years beginning on or after January 1, 2004.

Par. 3. Section 1.414(v)-1 is added to read as follows:

§1.414(v)-1 Catch-up contributions.

(a) Catch-up contributions-

(1) General rule. An applicable employer plan shall not be treated as failing to meet any requirement of the Internal Revenue Code solely because the plan permits a catch-up eligible participant to make catch-up contributions in accordance with section 414(v) and this section. With respect to an applicable employer plan, catch-up contributions are elective deferrals made by a catch-up eligible participant that exceed any of the applicable limits set forth in paragraph (b) of this section and that are treated under the applicable employer plan as catch-up

contributions, but only to the extent they do not exceed the catch-up contribution limit described in paragraph (c) of this section (determined in accordance with the special rules for employers that maintain multiple applicable employer plans in paragraph (f) of this section, if applicable). To the extent provided under paragraph (d) of this section, catch-up contributions are disregarded for purposes of various statutory limits. In addition, unless otherwise provided in paragraph (e) of this section, all catch-up eligible participants of the employer must be provided the opportunity to make catch-up contributions in order for an applicable employer plan to comply with the universal availability requirement of section 414(v)(4). The definitions in paragraph (g) of this section apply for purposes of this section and §1.402(g)-2.

(2) Treatment as elective deferrals. Except as specifically provided in this section, elective deferrals treated as catch-up contributions remain subject to statutory and regulatory rules otherwise applicable to elective deferrals. For example, catch-up contributions under an applicable employer plan that is a section 401(k) plan are subject to the distribution and vesting restrictions of section 401(k)(2)(B) and (C). In addition, the plan is permitted to provide a single election for catch-up eligible participants, with the determination of whether elective deferrals are catch-up contributions being made under the terms of the plan.

(3) Coordination with section 457(b)(3). In the case of an applicable employer plan that is a section 457 eligible governmental plan, the catch-up contributions permitted under this section shall not apply to a catch-up eligible participant for any taxable year for which a higher limitation applies to such participant under section 457(b)(3). For additional guidance, see regulations under section 457.

(b) Elective deferrals that exceed an applicable limit-

(1) Applicable limits. An applicable limit for purposes of determining catch-up contributions for a catch-up eligible participant is any of the following:

(i) Statutory limit. A statutory limit is a limit on elective deferrals or annual additions permitted to be made (without regard to section 414(v) and this section) with respect to an employee for a year provided in section 401(a)(30), 402(h), 403(b), 408, 415(c), or 457(b)(2) (without regard to section 457(b)(3)), as applicable.

(ii) Employer-provided limit. An employer-provided limit is any limit on the elective deferrals an employee is permitted to make (without regard to section 414(v) and this section) that is contained in the terms of the plan, but which is not required under the Internal Revenue Code. Thus, for example, if, in accordance with the terms of the plan, highly compensated employees are limited to a deferral percentage of 10% of compensation, this limit is an employer-provided limit that is an applicable limit with respect to the highly compensated employees.

(iii) Actual deferral percentage (ADP) limit. In the case of a section 401(k) plan that would fail the ADP test of section 401(k)(3) if it did not correct under section 401(k)(8), the ADP limit is the highest amount of elective deferrals that can be retained in the plan by any highly compensated employee under the rules of section 401(k)(8)(C) (without regard to paragraph (d)(2)(iii) of this section). In the case of a simplified employee pension (SEP) with a salary reduction arrangement (within the meaning of section 408(k)(6)) that would fail the requirements of section 408(k)(6)(A)(iii) if it did not correct in accordance with section 408(k)(6)(C), the ADP limit is the highest amount of elective deferrals that can be made by any highly compensated employee under the rules of section 408(k)(6) (without regard to paragraph (d)(2)(iii) of this section).

(2) Contributions in excess of applicable limit-

(i) Plan year limits-

(A) General rule. Except as provided in paragraph (b)(2)(ii) of this section, the amount of elective deferrals in excess of an applicable limit is determined as of the end of the plan year by comparing the total elective deferrals for the plan year with the applicable limit for the plan year. In addition, except as provided in paragraph (b)(2)(i)(B) of this section, in the case of a plan that provides for separate employer-provided limits on elective deferrals for separate portions of plan compensation within the plan year, the applicable limit for the plan year is the sum

of the dollar amounts of the limits for the separate portions. For example, if a plan sets a deferral percentage limit for each payroll period, the applicable limit for the plan year is the sum of the dollar amounts of the limits for the payroll periods.

(B) Alternative method for determining employer-provided limit-

(*1*) General rule. If the plan limits elective deferrals for separate portions of the plan year, then, solely for purposes of determining the amount that is in excess of an employer-provided limit, the plan is permitted to provide that the applicable limit for the plan year is the product of the employee's plan year compensation and the time-weighted average of the deferral percentage limits, rather than determining the employer-provided limit as the sum of the limits for the separate portions of the year. Thus, for example, if, in accordance with the terms of the plan, highly compensated employees are limited to 8% of compensation during the first half of the plan year and 10% of compensation for the second half of the plan year, the plan is permitted to provide that the applicable limit for a highly compensated employee is 9% of the employee's plan year compensation.

(*2*) Alternative definition of compensation permitted. A plan using the alternative method in this paragraph (b)(2)(i)(B) is permitted to provide that the applicable limit for the plan year is determined as the product of the catch-up eligible participant's compensation used for purposes of the ADP test and the time-weighted average of the deferral percentage limits. The alternative calculation in this paragraph (b)(2)(i)(B)(*2*) is available regardless of whether the deferral percentage limits change during the plan year.

(ii) Other year limit. In the case of an applicable limit that is applied on the basis of a year other than the plan year (*e.g.*, the calendar-year limit on elective deferrals under section 401(a)(30)), the determination of whether elective deferrals are in excess of the applicable limit is made on the basis of such other year.

(c) Catch-up contribution limit-

(1) General rule. Elective deferrals with respect to a catch-up eligible participant in excess of an applicable limit under paragraph (b) of this section are treated as catch-up contributions under this section as of a date within a taxable year only to the extent that such elective deferrals do not exceed the catch-up contribution limit described in paragraphs (c)(1) and (2) of this section, reduced by elective deferrals previously treated as catch-up contributions for the taxable year, determined in accordance with paragraph (c)(3) of this section. The catch-up contribution limit for a taxable year is generally the applicable dollar catch-up limit for such taxable year, as set forth in paragraph (c)(2) of this section. However, an elective deferral is not treated as a catch-up contribution to the extent that the elective deferral, when added to all other elective deferrals for the taxable year under any applicable employer plan of the employer, exceeds the participant's compensation (determined in accordance with section 415(c)(3)) for the taxable year. See also paragraph (f) of this section for special rules for employees who participate in more than one applicable employer plan maintained by the employer.

(2) Applicable dollar catch-up limit-

(i) In general. The applicable dollar catch-up limit for an applicable employer plan, other than a plan described in section 401(k)(11) or 408(p), is determined under the following table:

For Taxable Years Beginning in	Applicable Dollar Catch-up Limit
2002	$1,000

2003	$2,000
2004	$3,000
2005	$4,000
2006	$5,000

(ii) Simple plans. The applicable dollar catch-up limit for a SIMPLE 401(k) plan described in section 401(k)(11) or a Simple IRA plan as described in section 408(p) is determined under the following table:

For Taxable Years Beginning in	Applicable Dollar Catch-up Limit
2002	$500
2003	$1,000
2004	$1,500
2005	$2,000
2006	$2,500

(iii) Cost of living adjustments. For taxable years beginning after 2006, the applicable dollar catch-up limit is the applicable dollar catch-up limit for 2006 described in paragraph (c)(2)(i) or (ii) of this section increased at the same time and in the same manner as adjustments under section 415(d), except that the base period shall be the calendar quarter beginning July 1, 2005, and any increase that is not a multiple of $500 shall be rounded to the next lower multiple of $500.

(3) Timing rules. For purposes of determining the maximum amount of permitted catch-up contributions for a catch-up eligible participant, the determination of whether an elective deferral is a catch-up contribution is made as of the last day of the plan year (or in the case of section 415, as of the last day of the limitation year), except that, with respect to elective deferrals in excess of an applicable limit that is tested on the basis of the taxable year or calendar year (*e.g.*, the section 401(a)(30) limit on elective deferrals), the determination of whether such elective deferrals are treated as catch-up contributions is made at the time they are deferred.

(d) Treatment of catch-up contributions-

(1) Contributions not taken into account for certain limits. Catch-up contributions are not taken into account in applying the limits of section 401(a)(30), 402(h), 403(b), 408, 415(c), or 457(b)(2) (determined without regard to section 457(b)(3)) to other contributions or benefits under an applicable employer plan or any other plan of the employer.

(2) Contributions not taken into account in application of ADP test-

(i) Calculation of ADR. Elective deferrals that are treated as catch-up contributions pursuant to paragraph (c) of this section with respect to a section 401(k) plan

because they exceed a statutory or employer-provided limit described in paragraph (b)(1)(i) or (ii) of this section, respectively, are subtracted from the catch-up eligible participant's elective deferrals for the plan year for purposes of determining the actual deferral ratio (ADR) (as defined in regulations under section 401(k)) of a catch-up eligible participant. Similarly, elective deferrals that are treated as catch-up contributions pursuant to paragraph (c) of this section with respect to a SEP because they exceed a statutory or employer-provided limit described in paragraph (b)(1)(i) or (ii) of this section, respectively, are subtracted from the catch-up eligible participant's elective deferrals for the plan year for purposes of determining the deferral percentage under section 408(k)(6)(D) of a catch-up eligible participant.

(ii) Adjustment of elective deferrals for correction purposes. For purposes of the correction of excess contributions in accordance with section 401(k)(8)(C), elective deferrals under the plan treated as catch-up contributions for the plan year and not taken into account in the ADP test under paragraph (d)(2)(i) of this section are subtracted from the catch-up eligible participant's elective deferrals under the plan for the plan year.

(iii) Excess contributions treated as catch-up contributions. A section 401(k) plan that satisfies the ADP test of section 401(k)(3) through correction under section 401(k)(8) must retain any elective deferrals that are treated as catch-up contributions pursuant to paragraph (c) of this section because they exceed the ADP limit in paragraph (b)(1)(iii) of this section. In addition, a section 401(k) plan is not treated as failing to satisfy section 401(k)(8) merely because elective deferrals described in the preceding sentence are not distributed or recharacterized as employee contributions. Similarly, a SEP is not treated as failing to satisfy section 408(k)(6)(A)(iii) merely because catch-up contributions are not treated as excess contributions with respect to a catch-up eligible participant under the rules of section 408(k)(6)(C). Notwithstanding the fact that elective deferrals described in this paragraph (d)(2)(iii) are not distributed, such elective deferrals are still considered to be excess contributions under section 401(k)(8), and accordingly, matching contributions with respect to such elective deferrals are permitted to be forfeited under the rules of section 411(a)(3)(G).

(3) Contributions not taken into account for other nondiscrimination purposes-

(i) Application for top-heavy. Catch-up contributions with respect to the current plan year are not taken into account for purposes of section 416. However, catch-up contributions for prior years are taken into account for purposes of section 416. Thus, catch-up contributions for prior years are included in the account balances that are used in determining whether the plan is top-heavy under section 416(g).

(ii) Application for section 410(b). Catch-up contributions with respect to the current plan year are not taken into account for purposes of section 410(b). Thus, catch-up contributions are not taken into account in determining the average benefit percentage under §1.410(b)-5 for the year if benefit percentages are determined based on current year contributions. However, catch-up contributions for prior years are taken into account for purposes of section 410(b). Thus, catch-up contributions for prior years would be included in the account balances that are used in determining the average benefit percentage if allocations for prior years are taken into account.

(4) Availability of catch-up contributions. An applicable employer plan does not violate §1.401(a)(4)-4 merely because the group of employees for whom catch-up contributions are currently available (*i.e.*, the catch-up eligible participants) is not a group of employees that would satisfy section 410(b) (without regard to §1.410(b)-5). In addition, a catch-up eligible participant is not treated as having a right to a different rate of allocation of matching contributions merely because an otherwise nondiscriminatory schedule of matching rates is applied to elective deferrals that include catch-up contributions. The rules in this paragraph (d)(4) also apply for purposes of satisfying the requirements of section 403(b)(12).

(e) Universal availability requirement-

(1) General rule-

(i) Effective opportunity. An applicable employer plan that offers catch-up contributions and that is otherwise subject to section 401(a)(4) (including a plan that is subject to section 401(a)(4) pursuant to section 403(b)(12)) will not satisfy the requirements of section 401(a)(4) unless all catch-up eligible participants who participate under any applicable employer plan maintained by the employer are provided with an effective opportunity to make the same dollar amount of catch-up contributions. A plan fails to provide an effective opportunity to make catch-up contributions if it has an applicable limit (*e.g.*, an employer-provided limit) that applies to a catch-up eligible participant and does not permit the participant to make elective deferrals in excess of that limit. An applicable employer plan does not fail to satisfy the universal availability requirement of this paragraph (e) solely because an employer-provided limit does not apply to all employees or different limits apply to different groups of employees under paragraph (b)(2)(i) of this section. However, a plan may not provide lower employer-provided limits for catch-up eligible participants.

(ii) Certain practices permitted-

(A) Proration of limit. A applicable employer plan does not fail to satisfy the universal availability requirement of this paragraph (e) merely because the plan allows participants to defer an amount equal to a specified percentage of compensation for each payroll period and for each payroll period permits each catch-up eligible participant to defer a *pro-rata* share of the applicable dollar catch-up limit in addition to that amount.

(B) Cash availability. An applicable employer plan does not fail to satisfy the universal availability requirement of this paragraph (e) merely because it restricts the elective deferrals of any employee (including a catch-up eligible participant) to amounts available after other withholding from the employee's pay (*e.g.*, after deduction of all applicable income and employment taxes). For this purpose, an employer limit of 75% of compensation or higher will be treated as limiting employees to amounts available after other withholdings.

(2) Certain employees disregarded. An applicable employer plan does not fail to satisfy the universal availability requirement of this paragraph (e) merely because employees described in section 410(b)(3) (*e.g.*, collectively bargained employees) are not provided the opportunity to make catch-up contributions.

(3) Exception for certain plans. An applicable employer plan does not fail to satisfy the universal availability requirement of this paragraph (e) merely because another applicable employer plan that is a section 457 eligible governmental plan does not provide for catch-up contributions to the extent set forth in section 414(v)(6)(C) and paragraph (a)(3) of this section.

(4) Exception for section 410(b)(6)(C)(ii) *period*. If an applicable employer plan satisfies the universal availability requirement of this paragraph (e) before an acquisition or disposition described in §1.410(b)-2(f) and would fail to satisfy the universal availability requirement of this paragraph (e) merely because of such event, then the applicable employer plan shall continue to be treated as satisfying this paragraph (e) through the end of the period determined under section 410(b)(6)(C)(ii).

(f) Special rules for an employer that sponsors multiple plans-

(1) General rule. For purposes of paragraph (c) of this section, all applicable employer plans, other than section 457 eligible governmental plans, maintained by the same employer are treated as one plan and all section 457 eligible governmental plans maintained by the same employer are treated as one plan. Thus, the total amount of catch-up contributions under all applicable employer plans of an employer (other than section 457 eligible governmental plans) is limited to the applicable dollar catch-up limit

for the taxable year, and the total amount of catch-up contributions for all section 457 eligible governmental plans of an employer is limited to the applicable dollar catch-up limit for the taxable year.

(2) Coordination of employer-provided limits. An applicable employer plan is permitted to allow a catch-up eligible participant to defer amounts in excess of an employer-provided limit under that plan without regard to whether elective deferrals made by the participant have been treated as catch-up contributions for the taxable year under another applicable employer plan aggregated with such plan under this paragraph (f). However, to the extent elective deferrals under another plan maintained by the employer have already been treated as catch-up contributions during the taxable year, the elective deferrals under the plan may be treated as catch-up contributions only up to the amount remaining under the catch-up limit for the year. Any other elective deferrals that exceed the employer-provided limit may not be treated as catch-up contributions and must satisfy the otherwise applicable nondiscrimination rules. For example, the right to make contributions in excess of the employer-provided limit is an other right or feature which must satisfy §1.401(a)(4)-4 to the extent that the contributions are not catch-up contributions. Also, contributions in excess of the employer provided limit are taken into account under the ADP test to the extent they are not catch-up contributions.

(3) Allocation rules. If a catch-up eligible participant makes additional elective deferrals in excess of an applicable limit under paragraph (b)(1) of this section under more than one applicable employer plan that is aggregated under the rules of this paragraph (f), the applicable employer plan under which elective deferrals in excess of an applicable limit are treated as catch-up contributions is permitted to be determined in any manner that is not inconsistent with the manner in which such amounts were actually deferred under the plan.

(g) Definitions-

(1) Applicable employer plan. The term applicable employer plan means a section 401(k) plan, a SIMPLE IRA plan as defined in section 408(p), a simplified employee pension plan as defined in section 408(k) (SEP), a plan or contract that satisfies the requirements of section 403(b), or a section 457 eligible governmental plan.

(2) Elective deferral. The term elective deferral means an elective deferral within the meaning of section 402(g)(3) or any contribution to a section 457 eligible governmental plan.

(3) Catch-up eligible participant. An employee is a catch-up eligible participant for a taxable year if-

(i) The employee is eligible to make elective deferrals under an applicable employer plan (without regard to section 414(v) or this section); and

(ii) The employee's 50th or higher birthday would occur before the end of the employee's taxable year.

(4) Other definitions.

(i) The terms employer, employee, section 401(k) plan, and highly compensated employee have the meanings provided in §1.410(b)-9.

(ii) The term section 457 eligible governmental plan means an eligible deferred compensation plan described in section 457(b) that is established and maintained by an eligible employer described in section 457(e)(1)(A).

(h) Examples.

The following examples illustrate the application of this section. For purposes of these examples, the limit under section 401(a)(30) is $15,000 and the applicable dollar catch-up limit is $5,000 and, except as specifically provided, the plan year is the calendar year. In addition, it is assumed that the participant's elective deferrals under all plans of the employer do not exceed the participant's section 415(c)(3) compensation, that the taxable year of the participant is the

calendar year and that any correction pursuant to section 401(k)(8) is made through distribution of excess contributions. The examples are as follows:

Example 1.

(i) Participant A is eligible to make elective deferrals under a section 401(k) plan, Plan P. Plan P does not limit elective deferrals except as necessary to comply with sections 401(a)(30) and 415. In 2006, Participant A is 55 years old. Plan P also provides that a catch-up eligible participant is permitted to defer amounts in excess of the section 401(a)(30) limit up to the applicable dollar catch-up limit for the year. Participant A defers $18,000 during 2006.

(ii) Participant A's elective deferrals in excess of the section 401(a)(30) limit ($3,000) do not exceed the applicable dollar catch-up limit for 2006 ($5,000). Under paragraph (a)(1) of this section, the $3,000 is a catch-up contribution and, pursuant to paragraph (d)(2)(i) of this section, it is not taken into account in determining Participant A's ADR for purposes of section 401(k)(3).

Example 2.

(i) Participants B and C, who are highly compensated employees each earning $120,000, are eligible to make elective deferrals under a section 401(k) plan, Plan Q. Plan Q limits elective deferrals as necessary to comply with section 401(a)(30) and 415, and also provides that no highly compensated employee may make an elective deferral at a rate that exceeds 10% of compensation. However, Plan Q also provides that a catch-up eligible participant is permitted to defer amounts in excess of 10% during the plan year up to the applicable dollar catch-up limit for the year. In 2006, Participants B and C are both 55 years old and, pursuant to the catch-up provision in Plan Q, both elect to defer 10% of compensation plus a *pro-rata* portion of the $5,000 applicable dollar catch-up limit for 2006. Participant B continues this election in effect for the entire year, for a total elective contribution for the year of $17,000. However, in July 2006, after deferring $8,500, Participant C discontinues making elective deferrals.

(ii) Once Participant B's elective deferrals for the year exceed the section 401(a)(30) limit ($15,000), subsequent elective deferrals are treated as catch-up contributions as they are deferred, provided that such elective deferrals do not exceed the catch-up contribution limit for the taxable year. Since the $2,000 in elective deferrals made after Participant B reaches the section 402(g) limit for the calendar year does not exceed the applicable dollar catch-up limit for 2006, the entire $2,000 is treated as a catch-up contribution.

(iii) As of the last day of the plan year, Participant B has exceeded the employer-provided limit of 10% (10% of $120,000 or $12,000 for Participant B) by an additional $3,000. Since the additional $3,000 in elective deferrals does not exceed the $5,000 applicable dollar catch-up limit for 2006, reduced by the $2,000 in elective deferrals previously treated as catch-up contributions, the entire $3,000 of elective deferrals is treated as a catch-up contribution.

(iv) In determining Participant B's ADR, the $5,000 of catch-up contributions are subtracted from Participant B's elective deferrals for the plan year under paragraph (d)(2)(i) of this section. Accordingly, Participant B's ADR is 10% ($12,000 / $120,000). In addition, for purposes of applying the rules of section 401(k)(8), Participant B is treated as having elective deferrals of $12,000.

(v) Participant C's elective deferrals for the year do not exceed an applicable limit for the plan year. Accordingly, Participant C's $8,500 of elective deferrals must be taken into account in determining Participant C's ADR for purposes of section 401(k)(3).

Example 3.

(i) The facts are the same as in *Example 2*, except that Plan Q is amended to change the maximum permitted deferral percentage for highly compensated

employees to 7%, effective for deferrals after April 1, 2006. Participant B, who has earned $40,000 in the first 3 months of the year and has been deferring at a rate of 10% of compensation plus a *pro-rata* portion of the $5,000 applicable dollar catch-up limit for 2006, reduces the 10% of pay deferral rate to 7% for the remaining 9 months of the year (while continuing to defer a *pro-rata* portion of the $5,000 applicable dollar catch-up limit for 2006). During those 9 months, Participant B earns $80,000. Thus, Participant B's total elective deferrals for the year are $14,600 ($4,000 for the first 3 months of the year plus $5,600 for the last 9 months of the year plus an additional $5,000 throughout the year).

(ii) The employer-provided limit for Participant B for the plan year is $9,600 ($4,000 for the first 3 months of the year, plus $5,600 for the last 9 months of the year). Accordingly, Participant B's elective deferrals for the year that are in excess of the employer-provided limit are $5,000 (the excess of $14,600 over $9,600), which does not exceed the applicable dollar catch-up limit of $5,000.

(iii) Alternatively, Plan Q may provide that the employer-provided limit is determined as the time-weighted average of the different deferral percentage limits over the course of the year. In this case, the time-weighted average limit is 7.75% for all participants, and the applicable limit for Participant B is 7.75% of $120,000, or $9,300. Accordingly, Participant B's elective deferrals for the year that are in excess of the employer-provided limit are $5,300 (the excess of $14,600 over $9,300). Since the amount of Participant B's elective deferrals in excess of the employer-provided limit ($5,300) exceeds the applicable dollar catch-up limit for the taxable year, only $5,000 of Participant B's elective deferrals may be treated as catch-up contributions. In determining Participant B's actual deferral ratio, the $5,000 of catch-up contributions are subtracted from Participant B's elective deferrals for the plan year under paragraph (d)(2)(i) of this section. Accordingly, Participant B's actual deferral ratio is 8% ($9,600 / $120,000). In addition, for purposes of applying the rules of section 401(k)(8), Participant B is treated as having elective deferrals of $9,600.

Example 4.

(i) The facts are the same as in *Example 1*. In addition to Participant A, Participant D is a highly compensated employee who is eligible to make elective deferrals under Plan P. During 2006, Participant D, who is 60 years old, elects to defer $14,000.

(ii) The ADP test is run for Plan P (after excluding the $3,000 in catch-up contributions from Participant A's elective deferrals), but Plan P needs to take corrective action in order to pass the ADP test. After applying the rules of section 401(k)(8)(C) to allocate the total excess contributions determined under section 401(k)(8)(B), the maximum deferrals which may be retained by any highly compensated employee in Plan P is $12,500.

(iii) Pursuant to paragraph (b)(1)(iii) of this section, the ADP limit under Plan P of $12,500 is an applicable limit. Accordingly, $1,500 of Participant D's elective deferrals exceed the applicable limit. Similarly, $2,500 of Participant A's elective deferrals (other than the $3,000 of elective deferrals treated as catch-up contributions because they exceed the section 401(a)(30) limit) exceed the applicable limit.

(iv) The $1,500 of Participant D's elective deferrals that exceed the applicable limit are less than the applicable dollar catch-up limit and are treated as catch-up contributions. Pursuant to paragraph (d)(2)(iii) of this section, Plan P must retain Participant D's $1,500 in elective deferrals and Plan P is not treated as failing to satisfy section 401(k)(8) merely because the elective deferrals are not distributed to Participant D.

(v) The $2,500 of Participant A's elective deferrals that exceed the applicable limit are greater than the portion of the applicable dollar catch-up limit ($2,000) that remains after treating the $3,000 of elective deferrals in excess of the section

401(a)(30) limit as catch-up contributions. Accordingly, $2,000 of Participant A's elective deferrals are treated as catch-up contributions. Pursuant to paragraph (d)(2)(iii) of this section, Plan P must retain Participant A's $2,000 in elective deferrals and Plan P is not treated as failing to satisfy section 401(k)(8) merely because the elective deferrals are not distributed to Participant A. However, $500 of Participant A's elective deferrals can not be treated as catch-up contributions and must be distributed to Participant A in order to satisfy section 401(k)(8).

Example 5.

(i) Participant E is a highly compensated employee who is a catch-up eligible participant under a section 401(k) plan, Plan R, with a plan year ending October 31, 2006. Plan R does not limit elective deferrals except as necessary to comply with section 401(a)(30) and section 415. Plan R permits all catch-up eligible participants to defer an additional amount equal to the applicable dollar catch-up limit for the year ($5,000) in excess of the section 401(a)(30) limit. Participant E did not exceed the section 401(a)(30) limit in 2005 and did not exceed the ADP limit for the plan year ending October 31, 2005. Participant E made $3,200 of deferrals in the period November 1, 2005, through December 31, 2005, and an additional $16,000 of deferrals in the first 10 months of 2006, for a total of $19,200 in elective deferrals for the plan year.

(ii) Once Participant E's elective deferrals for the calendar year 2006 exceed $15,000, subsequent elective deferrals are treated as catch-up contributions at the time they are deferred, provided that such elective deferrals do not exceed the applicable dollar catch-up limit for the taxable year. Since the $1,000 in elective deferrals made after Participant E reaches the section 402(g) limit for the calendar year does not exceed the applicable dollar catch-up limit for 2006, the entire $1,000 is a catch-up contribution. Pursuant to paragraph (d)(2)(i) of this section, $1,000 is subtracted from Participant E's $19,200 in elective deferrals for the plan year ending October 31, 2006, in determining Participant E's ADR for that plan year.

(iii) The ADP test is run for Plan R (after excluding the $1,000 in elective deferrals in excess of the section 401(a)(30) limit), but Plan R needs to take corrective action in order to pass the ADP test. After applying the rules of section 401(k)(8)(C) to allocate the total excess contributions determined under section 401(k)(8)(C), the maximum deferrals that may be retained by any highly compensated employee under Plan R for the plan year ending October 31, 2006, (the ADP limit) is $14,800.

(iv) Under paragraph (d)(2)(ii) of this section, elective deferrals that exceed the section 401(a)(30) limit under Plan R are also subtracted from Participant E's elective deferrals under Plan R for purposes of applying the rules of section 401(k)(8). Accordingly, for purposes of correcting the failed ADP test, Participant E is treated as having contributed $18,200 of elective deferrals in Plan R. The amount of elective deferrals that would have to be distributed to Participant E in order to satisfy section 401(k)(8)(C) is $3,400 ($18,200 minus $14,800), which is less than the excess of the applicable dollar catch-up limit ($5,000) over the elective deferrals previously treated as catch-up contributions under Plan R for the taxable year ($1,000). Under paragraph (d)(2)(iii) of this section, Plan R must retain Participant E's $3,400 in elective deferrals and is not treated as failing to satisfy section 401(k)(8) merely because the elective deferrals are not distributed to Participant E.

(v) Even though Participant E's elective deferrals for the calendar year 2006 have exceeded the section 401(a)(30) limit, Participant E can continue to make elective deferrals during the last 2 months of the calendar year, since Participant E's catch-up contributions for the taxable year are not taken into account in applying the section 401(a)(30) limit for 2006. Thus, Participant E can make an additional contribution of $3,400 ($15,000 minus ($16,000 minus $4,400)) without exceeding the section 401(a)(30) for the calendar year and without regard to any additional catch-up contributions. In addition, Participant E may make additional catch-up

contributions of $600 (the $5,000 applicable dollar catch-up limit for 2006, reduced by the $4,400 ($1,000 plus $3,400) of elective deferrals previously treated as catch-up contributions during the taxable year). The $600 of catch-up contributions will not be taken into account in the ADP test for the plan year ending October 31, 2007.

Example 6.

(i) The facts are the same as in *Example 5*, except that Participant E exceeded the section 401(a)(30) limit for 2005 by $1,300 prior to October 31, 2005, and made $600 of elective deferrals in the period November 1, 2005, through December 31, 2005 (which were catch-up contributions for 2005). Thus, Participant E made $16,600 of elective deferrals for the plan year ending October 31, 2006.

(ii) Once Participant E's elective deferrals for the calendar year 2006 exceed $15,000, subsequent elective deferrals are treated as catch-up contributions as they are deferred, provided that such elective deferrals do not exceed the applicable dollar catch-up limit for the taxable year. Since the $1,000 in elective deferrals made after Participant E reaches the section 402(g) limit for calendar year 2006 does not exceed the applicable dollar catch-up limit for 2006, the entire $1,000 is a catch-up contribution. Pursuant to paragraph (d)(2)(i) of this section, $1,000 is subtracted from Participant E's elective deferrals in determining Participant E's ADR for the plan year ending October 31, 2006. In addition, the $600 of catch-up contributions from the period November 1, 2005, to December 31, 2005, are subtracted from Participant E's elective deferrals in determining Participant E's ADR. Thus, the total elective deferrals taken into account in determining Participant E's ADR for the plan year ending October 31, 2006, is $15,000 ($16,600 in elective deferrals for the current plan year, less $1,600 in catch-up contributions).

(iii) The ADP test is run for Plan R (after excluding the $1,600 in elective deferrals in excess of the section 401(a)(30) limit), but Plan R needs to take corrective action in order to pass the ADP test. After applying the rules of section 401(k)(8)(C) to allocate the total excess contributions determined under section 401(k)(8)(C), the maximum deferrals that may be retained by any highly compensated employee under Plan R (the ADP limit) is $14,800.

(iv) Under paragraph (d)(2)(ii) of this section, elective deferrals that exceed the section 401(a)(30) limit under Plan R are also subtracted from Participant E's elective deferrals under Plan R for purposes of applying the rules of section 401(k)(8). Accordingly, for purposes of correcting the failed ADP test, Participant E is treated as having contributed $15,000 of elective deferrals in Plan R. The amount of elective deferrals that would have to be distributed to Participant E in order to satisfy section 401(k)(8)(C) is $200 ($15,000 minus $14,800), which is less than the excess of the applicable dollar catch-up limit ($5,000) over the elective deferrals previously treated as catch-up contributions under Plan R for the taxable year ($1,000). Under paragraph (d)(2)(iii) of this section, Plan R must retain Participant E's $200 in elective deferrals and is not treated as failing to satisfy section 401(k)(8) merely because the elective deferrals are not distributed to Participant E.

(v) Even though Participant E's elective deferrals for calendar year 2006 have exceeded the section 401(a)(30) limit, Participant E can continue to make elective deferrals during the last 2 months of the calendar year, since Participant E's catch-up contributions for the taxable year are not taken into account in applying the section 401(a)(30) limit for 2006. Thus Participant E can make an additional contribution of $200 ($15,000 minus ($16,000 minus $1,200)) without exceeding the section 401(a)(30) for the calendar year and without regard to any additional catch-up contributions. In addition, Participant E may make additional catch-up contributions of $3,800 (the $5,000 applicable dollar catch-up limit for 2006, reduced by the $1,200 ($1,000 plus $200) of elective deferrals previously treated as catch-up contributions during the taxable year). The $3,800 of catch-up contributions will not be taken into account in the ADP test for the plan year ending

October 31, 2007.

Example 7.

(i) Participant F, who is 58 years old, is a highly compensated employee who earns $100,000 per year. Participant F participates in a section 401(k) plan, Plan S, for the first 6 months of the year and then transfers to another section 401(k) plan, Plan T, sponsored by the same employer, for the second 6 months of the year. Plan S limits highly compensated employees' elective deferrals to 6% of compensation for the period of participation, but permits catch-up eligible participants to defer amounts in excess of 6% during the plan year, up to the applicable dollar catch-up limit for the year. Plan T limits highly compensated employees' elective deferrals to 8% of compensation for the period of participation, but permits catch-up eligible participants to defer amounts in excess of 8% during the plan year, up to the applicable dollar catch-up limit for the year. Participant F earned $50,000 in the first 6 months of the year and deferred $6,000 under Plan S. Participant F also deferred $6,500 under Plan T.

(ii) As of the last day of the plan year, Participant F has $3,000 in elective deferrals under Plan S that exceed the employer-provided limit of $3,000. Under Plan T, Participant F has $2,500 in elective deferrals that exceed the employer-provided limit of $4,000. The total amount of elective deferrals in excess of employer-provided limits, $5,500, exceeds the applicable dollar catch-up limit by $500. Accordingly, $500 of the elective deferrals in excess of the employer-provided limits are not catch-up contributions and are treated as regular elective deferrals (and are taken into account in the ADP test). The determination of which elective deferrals in excess of an applicable limit are treated as catch-up contributions is permitted to be made in any manner that is not inconsistent with the manner in which such amounts were actually deferred under Plan S and Plan T.

Example 8.

(i) Employer X sponsors Plan P, which provides for matching contributions equal to 50% of elective deferrals that do not exceed 10% of compensation. Elective deferrals for highly compensated employees are limited, on a payroll-by-payroll basis, to 10% of compensation. Employer X pays employees on a monthly basis. Plan P also provides that elective contributions are limited in accordance with section 401(a)(30) and other applicable statutory limits. Plan P also provides for catch-up contributions. Under Plan P, for purposes of calculating the amount to be treated as catch-up contributions (and to be excluded from the ADP test), amounts in excess of the 10% limit for highly compensated employees are determined at the end of the plan year based on compensation used for purposes of ADP testing (testing compensation), a definition of compensation that is different from the definition used under the plan for purposes of calculating elective deferrals and matching contributions during the plan year (deferral compensation).

(ii) Participant A, a highly compensated employee, is a catch-up eligible participant under Plan P with deferral compensation of $10,000 per monthly payroll period. Participant A defers 10% per payroll period for the first 10 months of the year, and is allocated a matching contribution each payroll period of $500. In addition, Participant A defers an additional $4,000 during the first 10 months of the year. Participant A then reduces deferrals during the last 2 months of the year to 5% of compensation. Participant A is allocated a matching contribution of $250 for each of the last 2 months of the plan year. For the plan year, Participant A has $15,000 in elective deferrals and $5,500 in matching contributions.

(iii) A's testing compensation is $118,000. At the end of the plan year, based on 10% of testing compensation, or $11,800, Plan P determines that A has $3,200 in deferrals that exceed the 10% employer provided limit. Plan P excludes $3,200 from ADP testing and calculates A's ADR as $11,800 divided by $118,000, or 10%. Although A has not been allocated a matching contribution equal to 50% of $11,800, because Plan P provides that matching contributions are calculated based on elective deferrals during a payroll period as a percentage of deferral

compensation, Plan P is not required to allocate an additional $400 of matching contributions to A.

(i) Effective date-

(1) Statutory effective date. Section 414(v) applies to contributions in taxable years beginning on or after January 1, 2002.

(2) Regulatory effective date. Paragraphs (a) through (h) of this section apply to contributions in taxable years beginning on or after January 1, 2004.

Robert E. Wenzel,
Deputy Commissioner for
Services and Enforcement.

Approved June 27, 2003.

Pamela F. Olson,
Assistant Secretary (Tax Policy).

Internal Revenue Service

Revenue Procedure 2003-13

Deemed Individual Retirement Accounts

" Deemed IRAs" were created under the Economic Growth and Tax Relief Reconciliation Act of 2001 when it added Section 408(q) to the Internal Revenue Code. Section 408q permits employees to make either regular IRA and/or Roth IRA contributions to an individual retirement account (IRA) within a qualified employer plan.

Part III. Administrative, Procedural, and Miscellaneous

26 CFR 601.201: Rulings and determination letters

Revenue Procedure 2003-13

Section 1. Purpose

This revenue procedure provides guidance for employers that want to amend their plans qualified under § 401(a) of the Internal Revenue Code to include "deemed IRAs" described in § 408(q) . The revenue procedure also provides a sample plan amendment that may be used, in conjunction with IRA language, to amend a qualified plan to provide for deemed IRAs.

Section 2. Background

.01 Section 408(q) was added to the Code by section 602 of the Economic Growth and Tax Relief Reconciliation Act of 2001 ("EGTRRA"), Pub. L. 107-16, effective for plan years beginning after December 31, 2002. Section 408(q) provides that if a qualified employer plan elects to allow employees to make voluntary employee contributions to a separate account or annuity established under the plan, and under the terms of the qualified employer plan such account or annuity meets the applicable requirements of § 408 or 408A for an individual retirement account or annuity, then such account or annuity shall be treated under the Code in the same manner as an IRA and not as a qualified employer plan. The Internal Revenue Service and Treasury expect to issue regulations under Code § 408(q) in the near future.

.02 Notice 2001-42, 2001-2 C.B. 70, provides a remedial amendment period under § 401(b), ending no earlier than the end of the first plan year beginning on or after January 1, 2005, in which any needed

retroactive EGTRRA plan amendment may be adopted (the "EGTRRA remedial amendment period"). The availability of the EGTRRA remedial amendment period is conditioned on the timely adoption of a good faith EGTRRA plan amendment.

.03 Notice 2001-57, 2001-2 C.B. 279, provides sample plan amendments that satisfy, in form, the "good faith EGTRRA plan amendment" requirement described in the preceding paragraph. Although not containing a sample plan amendment for deemed IRAs under Code § 408(q), the notice provides that the good faith plan amendment requirement applies to § 408(q). The notice also provides that, until further notice, the Service will not consider EGTRRA in issuing determination, opinion or advisory letters.

.04 Rev. Proc. 2002-10, 2002-4 I.R.B. 401, requires all prototype sponsors with currently approved IRAs, SEPs, and SIMPLE IRA plans to amend these documents and submit applications for opinion letters on the amended documents by December 31, 2002.

Section 3. Required language for deemed IRAs

.01 Plan sponsors that want to provide for deemed IRAs must have such provisions in their plan documents and must have deemed IRAs in effect for employees no later than the date deemed IRA contributions are accepted from such employees. Notwithstanding the preceding sentence, plan sponsors that want to provide for deemed IRAs for plan years beginning before January 1, 2004, (but after December 31, 2002) are not required to have such provisions in their plan documents before the end of such plan years. Plan sponsors must otherwise comply with the rules in Notice 2001-57. To satisfy the requirements for the EGTRRA remedial amendment period, the provisions must reflect a reasonable, good-faith interpretation of the statute. The sample plan amendment contained in the appendix to this revenue procedure, when used in conjunction with IRA language described in section 3.02 below, is a reasonable, good-faith interpretation of the statute.

.02 In addition to the sample plan amendment in the Appendix, a plan that intends to comply with Code § 408(q) must also contain language that satisfies § 408 or 408A, relating to traditional and Roth IRAs, respectively. The Service provides sample language (a "Listing of Required Modifications," or "LRMs") that satisfies §§ 408 and 408A on the Service's Web Site at www.irs.gov/ep. A plan will satisfy the "reasonable, good-faith interpretation of the statute" requirement with respect to IRA language if the language addresses every applicable point in the IRA LRMs.

Drafting information

The principal author of this revenue procedure is Roger Kuehnle of the Employee Plans, Tax Exempt and Government Entities Division. For further information regarding this revenue procedure, please contact Employee Plans' taxpayer assistance telephone service at 1-877-829-5500 (a toll-free number), between the hours of 8:00 a.m. and 6:30 p.m. Eastern Time, Monday through Friday. Mr. Kuehnle can be reached at 202-283-9888 (not a toll-free number).

Appendix

Sample Plan Amendment

(The following sample plan amendment may be adopted only by plans trusteed by a person eligible to act as a trustee of an IRA under § 408(a)(2) and plans that designate an insurance company to issue annuity contracts under § 408(b). Additional language that satisfies § 408 or 408A must also be added to the plan.)

Section ------ . Deemed IRAs

1. Applicability and effective date. This section shall apply if elected by the employer in the adoption agreement and shall be effective for plan years beginning after the date specified in the adoption agreement.

2. Deemed IRAs. Each participant may make voluntary employee contributions to the participant's ---------------- [insert "traditional" or "Roth"] IRA under the plan. The plan shall establish a separate ------------- [insert "account" or "annuity"] for the designated IRA contributions of each participant and any earnings properly allocable to the contributions, and maintain separate recordkeeping with respect to each such IRA.

3. Reporting duties. The ----------- [insert "trustee" or "issuer"] shall be subject to the reporting

requirements of section 408(i) of the Internal Revenue Code with respect to all IRAs that are established and maintained under the plan.

4. Voluntary employee contributions. For purposes of this section, a voluntary employee contribution means any contribution (other than a mandatory contribution within the meaning of section 411(c)(2) of the Code) that is made by the participant and which the participant has designated, at or prior to the time of making the contribution, as a contribution to which this section applies.

5. IRAs established pursuant to this section shall be held in ----------- [insert "a trust" or "an annuity"] separate from the trust established under the plan to hold contributions other than deemed IRA contributions and shall satisfy the applicable requirements of sections 408 and 408A of the Code, which requirements are set forth in section ---------- [insert the section of the plan that contains the IRA requirements].

(Adoption agreement provisions)

Section of the plan, Deemed IRAs: (check one)

shall be effective for plan years beginning after December 31, (enter a year later than 2001).

shall not apply.

Internal Revenue Code

2004-67

Roth and Deemed Individual Retirement Account Participation in Group Trusts Described in Revenue Ruling 81-100

Part I

Section 501.--Exemption From Tax on Corporations, Certain Trusts, Etc.

26 CFR 1.501(a)-1: Exemption from taxation.

(Also, §§ 457; 1.457-8.)

Revenue Ruling 2004-67

Purpose

This revenue ruling extends the ability to participate in group trusts described in Revenue Ruling 81-100, 1981-1 C.B. 326, to eligible governmental plans under § 457(b) of the Internal Revenue Code and clarifies the ability of Roth individual retirement accounts described in § 408A and deemed individual retirement accounts described in § 408(q) to participate in these group trusts. In addition, this revenue ruling provides related model language for eligible governmental plans under § 457(b).

Issue

Whether the assets of eligible governmental plan trusts described in § 457(b) may be pooled with the assets of a group trust described in Revenue Ruling 81-100 , without affecting the tax status of the eligible governmental plan trust or the group trust (including its current participants).

Law and analysis

Section 501(a) provides, in part, that a trust described in § 401(a) is exempt from income tax. Section 401(a)(1) provides that a trust or trusts created or organized in the United States and forming a part of a stock bonus, pension, or profit-sharing plan of an employer for the exclusive benefit of its employees or their beneficiaries is qualified under § 401(a) if contributions are made to the trust or trusts by the applicable employer, or employees, or both for the purpose of distributing to such employees or their beneficiaries the corpus and income of the fund accumulated in accordance with such plan. Section 401(a)(2) provides, in part, that under each trust instrument it must be impossible, at any time prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the plan and the trust or trusts, for any part of the corpus or income of the trust, to be used for or diverted to purposes other than for the exclusive benefit of the employees or their beneficiaries.

Section 401(a)(24) provides that any group trust that otherwise meets the requirements of § 401(a) will not fail to satisfy such requirements due to the participation or inclusion of a plan or governmental unit described in § 818(a)(6) in the group trust. Section 818(a)(6) provides, in part, that for these purposes the trust of a pension plan contract includes a governmental plan within the meaning of § 414(d) and an eligible deferred compensation plan within the meaning of § 457(b).

Section 401(f) provides that a custodial account, an annuity contract and certain other contracts issued by an insurance company will be treated as a qualified trust if the custodial account or contract would, except for the fact that it is not a trust, constitute a qualified trust under § 401, and, if the assets in any such custodial account are held by a bank or another person who demonstrates that he will hold the assets in a manner consistent with the requirements of § 401.

Section 408(e) provides for the exemption from taxation of an individual retirement account that meets the requirements of § 408 . Section 408(a)(5) provides that the assets of an individual retirement account may not be commingled with other property except in a common trust fund or common investment fund.

Section 408A provides that, except as otherwise provided in § 408A, a Roth IRA is treated for purposes of the Code as an individual retirement plan, which includes an individual retirement account that meets the requirement of § 408. Consequently, a Roth IRA that is an individual retirement account is exempt from tax under § 408(e). Section 408(q) provides, in part, that if a qualified employer plan, as defined in § 408(q)(3)(A), elects to allow employees to make voluntary employee contributions to a separate account established under the plan and, under the terms of the qualified employer plan, the account meets the requirements of § 408 or 408A for an individual retirement account, then that account is treated as an individual retirement account (deemed individual retirement account), and not as a qualified employer plan. An individual retirement account described in § 408(q) is exempt from taxation under § 408(e).

Rev. Rul. 81-100 holds that if certain requirements are satisfied, a group trust is exempt from taxation under § 501(a) with respect to its funds that equitably belong to participating trusts described in § 401(a) and also is exempt from taxation under § 408(e) with respect to its funds that equitably belong to individual retirement accounts that satisfy the requirements of § 408. Also, the status of individual trusts as qualified under § 401(a), or as meeting the requirements of § 408 and as being exempt from tax under § 501(a) or § 408(e), are not affected by the pooling of their funds in a group trust.

Section 457 provides that compensation deferred under an eligible deferred compensation plan of an eligible employer that is a State or political subdivision, agency, or instrumentality thereof (an eligible governmental plan) and any income attributable to the amounts deferred, is includible in gross income only in the taxable year in which it is paid to the plan participant or beneficiary.

Section 457(g)(1) requires an eligible governmental plan under § 457(b) to hold all assets and income of the plan in a trust for the exclusive benefit of participants and their beneficiaries.

Section 457(g)(2) provides, in part, that a trust described in § 457(g)(1) is treated as an organization exempt from federal income tax under § 501(a).

Section 457(g)(3) provides that custodial account and contracts described in § 401(f) are treated as trusts under rules similar to the rules under § 401(f).

This revenue ruling extends the holding of Revenue Ruling 81-100 to eligible governmental plans described in § 457(b). Therefore, if the requirements below are satisfied, the funds from qualified plan trusts, individual retirement accounts (including a Roth individual retirement account described in § 408A and a deemed individual retirement account described in § 408(q)) that are tax-exempt under § 408(e), and eligible governmental plan trusts described in § 457(b) and § 457(g) may be pooled without adversely affecting the tax status of the group trust or the tax status of the separate trusts.

Holding

The assets of eligible governmental plan trusts described in § 457(b) may be pooled with the assets of a group trust described in Revenue Ruling 81-100 without affecting the tax status of the eligible governmental plan trust or the group trust (including its current participants). Accordingly, under Revenue Ruling 81-100 and this revenue ruling, if the five criteria below are satisfied, a trust that is part of a qualified retirement plan, an individual retirement account (including a Roth individual retirement account described in § 408A and a deemed individual retirement account described in § 408(q)) that is exempt from taxation under § 408(e) , or an eligible governmental plan under § 457(b) may pool its assets in a group trust without adversely affecting the tax status of any of the separate trusts or the group trust. For this purpose, a trust includes a custodial

account that is treated as a trust under § 401(f), under § 408(h) , or under § 457(g)(3).

(1) The group trust is adopted as a part of each adopting employer's plan or each adopting individual retirement account.

(2) The group trust instrument expressly limits participation to pension, profit sharing, and stock bonus trusts or custodial accounts qualifying under § 401(a) that are exempt under § 501(a); individual retirement accounts that are exempt under § 408(e); and eligible governmental plan trusts or custodial accounts under § 457(b) that are exempt under § 457(g) (adopting entities).

(3) The group trust instrument prohibits any part of its corpus or income that equitably belongs to any adopting entity from being used for or diverted to any purpose other than for the exclusive benefit of the employees (and the individual for whom an individual retirement account is maintained) and their beneficiaries who are entitled to benefits under such adopting entity.

(4) The group trust instrument prohibits assignment by an adopting entity of any part of its equity or interest in the group trust.

(5) The group trust is created or organized in the United States and is maintained at all times as a domestic trust in the United States.

Model amendments

There are two model amendments set forth below. One is for those group trusts that have received favorable determination letters from the Service that the group trust satisfies Revenue Ruling 81-100 . The other is for those trusts of eligible governmental plans under § 457(b) that have received a letter ruling from the Service (in each instance issued prior to July 12, 2004).

Ammendment 1 - For group trust

A sponsor of a group trust that satisfies Revenue Ruling 81-100 may amend its group trust to include the model language below to reflect this revenue ruling: "This group trust is operated or maintained exclusively for the commingling and collective investment of funds from other trusts that it holds. Notwithstanding any contrary provision in this group trust, the trustee of this group trust is permitted, unless restricted in writing by the named fiduciary, to hold in this group trust funds that consist exclusively of trust assets held under plans qualified under Code section 401(a), individual retirement accounts that are exempt under Code section 408(e), and eligible governmental plans that meet the requirements of Code section 457(b). For this purpose, a trust includes a custodial account that is treated as a trust under Code section 401(f) or under Code section 457(g)(3).

"For purposes of valuation, the value of the interest maintained by the fund with respect to any plan or account in such group trust shall be the fair market value of the portion of the fund held for that plan or account, determined in accordance with generally recognized valuation procedures."

Reliance by trustees with prior determination letter

A trustee entitled to rely on a favorable determination letter issued to it prior to July 12, 2004, regarding eligibility of its group trust under Revenue Ruling 81-100 will not lose its right to rely on its determination letter merely because it adopts Model Amendment 1 set forth above in this revenue ruling on a word-for-word basis (or adopts an amendment that is substantially similar in all material respects). The group trust sponsor may adopt Model Amendment 1 on a word-for-word basis (or adopt an amendment that is substantially similar in all material respects) and continue to rely on the previously issued determination letter regarding its group trust without filing another request with the Service for a new determination letter.

A sponsor that satisfies the above requirements and amends its group trust to include Model Amendment 1 on a word-for-word basis (or adopts an amendment that is substantially similar in all material respects) will also not lose its right to rely on its prior determination letter merely because it becomes necessary, as a result of the adoption of such model amendment (or an amendment that is substantially similar in all material respects), to delete a prior provision that is inconsistent with the model amendment so adopted (or an amendment that is substantially similar in all material respects that is so adopted).

Generally, the group trust instrument will provide that amendments to the group trust will automatically pass through to the trusts of qualified plans under § 401(a); individual retirement accounts that are exempt under § 408(e); and trusts of eligible governmental plans under § 457(b). However, a group trust that has received a

favorable determination letter under Rev. Proc. 2004-6, 2004-1 Internal Revenue Bulletin 204, (or its predecessors) that does not contain such a pass-through provision may not adopt Model Amendment 1 and automatically continue to rely on its determination letter. In addition, further guidance will be issued to address the transition necessary to bring into compliance a group trust that has received a favorable determination letter under Rev. Proc. 2004-6, 2004-1 Internal Revenue Bulletin 204, (or its predecessors) that does not comply with this revenue ruling.

Amendment 2 - For eligible governmental plan under § 457(b)

A plan sponsor of a trust that funds an eligible governmental plan under § 457(b) may amend the trust agreement to include the model language below to reflect this revenue ruling:

"Notwithstanding any contrary provision in the instrument governing the [Name of eligible governmental plan under § 457(b)], the plan trustee may, unless restricted in writing by the named fiduciary, transfer assets of the plan to a group trust that is operated or maintained exclusively for the commingling and collective investment of monies provided that the funds in the group trust consist exclusively of trust assets held under plans qualified under Code section 401(a), individual retirement accounts that are exempt under Code section 408(e), and eligible governmental plans that meets the requirements of Code section 457(b).

For this purpose, a trust includes a custodial account that is treated as a trust under Code section 401(f) or under Code section 457(g)(3).

"For purposes of valuation, the value of the interest maintained by the [Name of eligible governmental plan under §457] in such group trust shall be the fair market value of the portion of the group trust held for the [Name of eligible governmental plan under § 457(b)], determined in accordance with generally recognized valuation procedures."

Reliance by employer on prior § 457(b) ruling

An employer described in section 457(e)(1)(A) entitled to rely on a favorable private letter ruling issued to it prior to July 12, 2004 regarding the eligibility of its plan under § 457(b) will not lose its right to rely on its letter ruling merely because it adopts Model Amendment 2 set forth above on a word-for-word basis (or adopts an amendment that is substantially similar in all material respects). Such an employer may adopt Model Amendment 2 on a word-for-word basis (or adopt an amendment that is substantially similar in all material respects) and continue to rely on the previously issued letter ruling regarding its § 457(b) plan without filing another request with the Service for a new letter ruling.

An employer described in § 457(e)(1)(A) that satisfies the above requirements and amends the trust of its eligible governmental plan under § 457(b) to include Model Amendment 2 on a word-for-word basis (or adopts an amendment that is substantially similar in all material respects) will not lose its right to rely on its prior letter ruling merely because it becomes necessary as a result of the adoption of such model amendment (or an amendment that is substantially similar in all material respects), to delete a prior provision that is inconsistent with the model amendment so adopted.

Effect on other documents

Revenue Ruling 81-100 is clarified and modified.

Drafting information

The principal author of this revenue ruling is Dana A. Barry of the Employee Plans, Tax Exempt and Government Entities Division. For further information regarding this revenue ruling, please contact the Employee Plans' taxpayer assistance telephone service at 1-877-829-5500 (a toll-free number) between the hours of 8:00 a.m. and 6:30 p.m. Eastern Time, Monday through Friday (a toll free call). IRS Self Correction Program Frequently Asked Questions

Summary

IRS published guidance regarding the Self Correction Program

Agency: Internal Revenue Service

IRS Self Correction Program Frequently Asked Questions Guidance

These frequently asked questions and answers are provided for general information only and should not be cited as any type of legal authority. They are designed to provide the user with information required to respond to general inquiries. Due to the uniqueness and complexities of Federal tax law, it is imperative to ensure a full understanding of the specific question presented, and to perform the requisite research to ensure a correct response is provided.

Is there a way to attain IRS approval prior to audit regarding the appropriate way to correct a failure under the SCP?

The SCP is a voluntary employer-initiated program that does not involve IRS approval; therefore, the IRS will not approve a Plan Sponsor's method of correction prior to audit. However, Rev. Proc. 2003-44 sets forth General Correction Principles designed to assist a plan sponsor in determining the appropriate method of correction for a failure. In addition, Appendix A and Appendix B of Rev. Proc. 2003-44 provide plan sponsors with sample correction methods for certain failures. To the extent the plan sponsor applies the applicable correction method set forth in either of these appendices, the correction is deemed to be reasonable and appropriate correction for the failure. Upon examination, the IRS has the right to review whether the taxpayer made the correct determination that such failure(s) were eligible under the SCP as well as whether the correction method is acceptable.

What practices and procedures are required to be in place in order for a plan to be eligible for relief under the SCP?

The IRS is concerned that the practices and procedures of a plan foster compliance with the requirements of the Code.

- Practices and procedures may be formal or informal.
- Practices and procedures must be routinely followed.
- Practices and procedures need not be in place for a specific failure (as long as practices and procedures exist that evidence an overall effort on the part of the Plan Sponsor to maintain the plan in compliance with the Code requirements).
- A plan document alone is not sufficient to establish evidence of good practices and procedures.
- An example of an acceptable practice or procedure outside of the plan document is a checksheet routinely followed for determining whether an employee is a key employee for purposes of meeting the top heavy requirements.

If a plan sponsor discovers a failure of the Actual Deferral Percentage (ADP), Actual Deferral Percentage (ACP), or Multiple Use tests in the plan sponsor's profit-sharing plan, may the failures be corrected under the SCP?

Yes. A failure of the ADP, ACP or Multiple Use Tests is treated as an Operational Failure for purposes of EPCRS. Under Code section 401(k) and (m), a Plan Sponsor has until the end of the plan year following the plan year in which an excess contribution or excess aggregate contribution was made to correct the failure; under the SCP , the two-year correction period applicable to Significant Operational Failures does not begin under the expiration of the statutory correction period. (Note that the Multiple Use Test has been repealed for plan years beginning after 12/31/01.)

Example - In 2004, a Plan Sponsor discovers that in 2003, when testing the contributions made in its section 401(k) plan during 2003 for the ADP test, mistakes were made in determining the correct amount of compensation that should have been taken into account under the test. When the ADP test was rerun with the correct data, the plan sponsor discovers that the ADP test was failed. Assuming the other eligibility requirements of Self-Correction Program are satisfied, if the ADP failure is a Significant Operation Failure, the plan sponsor may correct the failure to satisfy the ADP test by the end of the 2006 plan year. If the ADP failure is an Insignificant Operational Failure, the plan sponsor has even longer to correct the failure, and may correct even upon audit of the plan.

What are Insignificant Operational Failures under the SCP?

The SCP permits Plan Sponsors to correct significant Operational Failures within two years of the year in which the failure occurred, provided the other requirements of the SCP are satisfied. A number of factors are considered in determining whether Operational Failures are insignificant. These include, but are not limited to:

- whether other failures occurred during the period being examined (for this purpose, a failure is not considered to have occurred more than once merely because more than one participant is affected by the failure);
- the percentage of plan assets and contributions involved in the failure;
- the number of years the failure occurred;
- the number of participants affected relative to the total number of participants in the plan;
- the number of participants affected as a result of the failure relative to the number of participants who could have been affected by the failure;
- whether correction was made within a reasonable time after discovery of the failure; and
- the reason for the failure (for example, data errors such as errors in the transcription of data, the transposition of numbers, or minor arithmetic errors).

This is not an exclusive list and no single factor is determinative. Failures will not be considered significant merely because they occur in more than one year. In addition, the IRS will apply these factors in a way so as to not preclude small businesses from being eligible for the SCP merely because of their size.

When correcting Significant Operational Failures, what actions must be taken by a plan sponsor by the end of the two-year correction period in order to be entitled to relief under the SCP?

In general, correction must be completed by the end of the two-year correction period in order for a plan to be entitled to relief under the SCP . However, where a Plan Sponsor substantially completes correction within the correction period, the plan sponsor will not lose the relief provided under the SCP merely because correction wasn't completed during the correction period. There are two circumstances under which correction is considered to have been substantially completed:

First, where,

- during the correction period, the Plan Sponsor is reasonably prompt in identifying the Operational Failure , formulating a correction method, and initiating correction in a manner that demonstrates a commitment to completing correction of the Operational Failure as expeditiously as practicable, and
- within 90 days after the last day of the correction period, the Plan Sponsor completes correction of the Operational Failure; and

Second, where,

- during the correction period, correction is completed with respect to 85% of all participants affected by the Operational Failure, and
- thereafter, the Plan Sponsor completes correction of the Operational Failure with respect to the remaining affected participants in a diligent manner.

In addition, a Plan Sponsor will not be considered to have failed to fully correct within the correction period where a plan sponsor takes reasonable action to find but has not located all current and former participants and beneficiaries to whom additional benefits are due. Reasonable action includes the use of the Internal Revenue Service Letter Forwarding Program (see Rev. Proc. 94-22, 1994-1 C.B. 608) or the Social Security Administration Reporting Service. If an individual is later located, the additional benefits must be provided to the individual at that time.

If correction of an Operational Failure is being implemented through adoption of a plan amendment, the required application for a determination letter must be submitted within the two-year correction period in order for correction to be considered to have been timely implemented.

Assume a plan sponsor discovers a vesting problem in which the plan terms were not followed, should the plan sponsor use SCP or the Voluntary Correction Program to correct the problem?

The decision of whether to use the SCP or Voluntary Correction Program to correct an Operational Failure depends on a number of factors, including: (1) the type of failure involved, (2) the practices and procedures under the plan, (3) whether, if the failure is an Operational Failure, it would be considered to be a Significant Operational Failure, (4) whether a Favorable Letter has been issued with respect to the plan, (5) whether the failure is an Egregious Failure, (6) when the failure is discovered, and (7) the amount of comfort the Plan Sponsor has with respect to the method used to correct the failure.

Although the SCP does not require the payment of a fee or notification to the IRS, it is limited to correcting Operational Failures that are not egregious. In addition, if the failure is a Significant Operational Failure, the Plan Sponsor must complete correction of the failure within two years of the year in which the failure occurred. Although a plan sponsor does not necessarily get assurance that the correction method employed under the SCP is acceptable to the IRS, the IRS has provided several examples of failures and acceptable correction methods under Appendix A and Appendix B in Rev. Proc. 2003-44. If a plan sponsor corrects a failure listed in Appendix A or Appendix B in accordance with the method of correction method set forth in the appendix, the plan sponsor may be assured that the IRS will find that correction method to be acceptable.

In this example, an Operational Failure, a vesting failure, has occurred. Appendix B, section 2.03 provides examples of acceptable correction methods for a vesting failure. Therefore, if there are acceptable practices and procedures under the plan (see Q&A 2 above), and the failure is an Insignificant Operational Failure, the Plan Sponsor may use the SCP to correct the failure at any time, even if the plan is Under Examination. Further, if the plan sponsor uses one of the correction methods under Appendix B of the revenue procedure, it will have assurance that the plan would be entitled to relief under the SCP with respect to its correction method. If, however, the failure is a Significant Operational Failure, the plan would be entitled to relief under the SCP only if the failure is identified and corrected within the two-year correction period under the SCP. Also, if the failure is a Significant Operational Failure, the plan would be eligible for relief under the SCP only if a Favorable Letter has been issued with respect to the plan. If the failure would be considered an Egregious Failure, it would be eligible for correction under the Voluntary Correction Program but not under the SCP.

IRS Voluntary Compliance Program Frequently Asked Questions Guidance

The frequently asked questions and answers provided below are for general information only and should not be cited as any type of legal authority. They are designed to provide the user with information required to respond to general inquiries. Due to the uniqueness and complexities of Federal tax law, it is imperative to ensure a full understanding of the specific question presented, and to perform the requisite research to ensure a correct response is provided.

Is there an application form that plan sponsors must use to apply under the VCP?

There is no application form applicable to the VCP; however, the IRS provides Sample Submission Formats in Appendix D of Rev. Proc. 2003-44, which facilitate the submission process. The IRS also provides a Checklist designed to assist the Plan Sponsor and their representatives in preparing a submission that contains the information and documents required under each of those programs. The checklist must be completed, signed, and dated by the employer, plan sponsor, or the plan sponsor's representative, and should be placed on top of the submission.

What is the mailing address for applications submitted under the VCP?

All VCP submissions and accompanying determination letter applications (if applicable) should be mailed to the following address:

Internal Revenue Service
Attention: T:EP:RA:VC
P.O. Box 27063
McPherson Station
Washington, D.C.   20038

Some employers have very little involvement in their employees' 403(b) plans. Who should file a VCP application in these cases?

The employer is the only one who can submit an application to correct failures under the VCP. Although insurers and custodians may have some liability to the employer, they have no liability under the VCP. The employer is responsible for identifying the failures, correcting the failures, and insuring that necessary changes are made to administrative procedures for operating the 403(b) plan. When necessary for correction, the employer must secure the cooperation of the providers prior to submitting an application under the VCP.

For a VCP submission, what information must the plan sponsor supply with respect to correction of the failures?

The letter from the Plan Sponsor or the plan sponsor's representative must contain a detailed description of the method for correcting the failures that the plan sponsor has implemented or proposes to implement.

- Each step of the correction method must be described in narrative form.
- The description must include the specific information needed to support the suggested correction method, including:
  - the number of employees affected;
  - the expected cost of correction;
  - the years involved, and
  - calculations or assumptions the Plan Sponsor used to determine the amounts needed for correction.
- The number of employees affected and the expected cost of correction may be approximated if the exact number cannot be determined at the time of the request.
- A description of the methodology that will be used to calculate earnings or actuarial adjustments on any corrective contributions or distributions (indicating the computation periods and the basis for determining earnings or actuarial adjustments.
- Specific calculations for each affected employee or a representative sample of affected employees.
- The sample calculations must be sufficient to demonstrate each aspect of the correction method proposed. For example, if a Plan Sponsor requests a compliance statement with respect to a failure to satisfy the contribution limits of § 415(c) and proposes a correction method that involves elective contributions (both matched and unmatched) and matching contributions, the plan sponsor must submit calculations illustrating the correction method proposed with respect to each type of contribution. As another example, with respect to a failure to satisfy the actual deferral percentage (ADP) test in § 401(k)(3), the plan sponsor must submit the ADP test results both before the correction and after the correction.
- The method that will be used to locate and notify former employees and beneficiaries, or an affirmative statement that no former employees or beneficiaries were affected by the failures.
- A description of the measures that have been or will be implemented to ensure that the same failures will not recur.

If a plan with a Plan Document Failure is submitted under the VCP, is the plan sponsor required to concurrently submit an application for a determination letter?

"Yes. Anytime a Plan Sponsor is required to file for a determination letter in association with a VCP application, whether it be for the correction of a Plan Document Failure, Demographic Failure, or correction of an Operational Failure by plan amendment, if the amendment is other than the adoption of an amendment designated by the IRS as a model amendment or the adoption of a prototype or volume submitter plan for which the Plan Sponsor has reliance on the plan's opinion or advisory letter (see Rev. Proc. 2003-6, 2003-1 I.R.B. 191), the plan sponsor is required to submit a determination letter application with the appropriate user fee at the same time and to the same address that the VCP submission is sent.

Is there an avenue for plan sponsors to negotiate correction under the VCP on an anonymous basis?

Yes. Rev. Proc. 2003-44, section 10.11 sets forth the provisions of the Anonymous Submission procedure. The Anonymous Submission procedure permits Plan Sponsors to submit Qualified Plans, 403(b) Plans, SEPs , and Simple IRA Plans under VCP without initially identifying the applicable plan(s) or applicant. The

submission requirements relating to VCP apply to anonymous submissions on the same terms they apply to submissions in which the plan and plan sponsor are identified. However, information identifying the plan or the Plan Sponsor may be excluded from the submission until the IRS and the plan representative reach agreement with respect to all aspects of the submission.

Until the plan(s) and Plan Sponsor are identified to the IRS, an anonymous submission does not preclude an examination of the Plan Sponsor or its plan(s). Thus, a plan submitted under the Anonymous Submission procedure that comes Under Examination prior to the date the plan(s) and Plan Sponsor(s) identifying materials are received by the IRS will no longer be eligible under VCP .

Should a plan sponsor that discovers a Plan Document Failure in a plan that has been submitted for a determination letter raise the issue to the Employee Plans agent working the determination letter application?

If the Plan Sponsor knows about the failure prior to submitting a determination letter application, the plan sponsor should submit under the VCP and include the determination letter application with the VCP submission. If the failure is identified and voluntarily raised by the taxpayer to the Employee Plans Agent or Specialist assigned to the determination letter application, the taxpayer will be given an opportunity to perfect a VCP submission and have the issue resolved under the VCP.

What happens if the IRS and plan sponsor fail to reach resolution regarding the appropriate correction of a failure?

Under the VCP , if resolution cannot be reached (for example, where information is not timely provided to the IRS or because agreement cannot be reached on correction or a change in administrative procedures), the compliance fee will not be returned, and the case may be referred to the appropriate EP office for examination consideration.

May a plan sponsor receive an extension of the 150-day correction period under the VCP?

In appropriate circumstances, a Plan Sponsor will be granted an extension of the 150-day correction period under VCP . The plan sponsor should submit a written request explaining the reason for the request to the agent working the case. The request must be made prior to the expiration of the 150-day correction period.

Can trust assets be used for the payment of the fee or sanction under the VCP?

As a rule, fees or sanctions should be paid by parties other than the trust. Exceptions are allowed only in very narrow circumstances.

Has the IRS established a program to verify that plan sponsors are correcting failures in accordance with Compliance Statements that have been issued under the VCP?

Yes, the IRS has established a verification program. The program is not an examination of the Plan Sponsor books and records. The IRS checks available information from the plan sponsor to insure that all corrections were made in accordance with the terms of the compliance statement. If necessary corrections or administrative changes were not timely made, the plan may be referred to EP Examinations.

Are matters relating to excise taxes resolved under the EPCRS?

The correction programs are not available for events for which the Code provides tax consequences other than plan disqualification (such as the imposition of an excise tax or additional income tax). For example, funding deficiencies (failures to make the required contributions to a plan subject to § 412), prohibited transactions, and failures to file the Form 5500 cannot be corrected under the correction programs.

However, it should be noted that excise taxes and additional taxes, to the extent applicable, are not waived merely because the underlying failure has been corrected or because the taxes result from the correction. Thus, for example, the excise tax on certain excess contributions under § 4979 is not waived under these correction programs, even though the underlying Qualification Failure is corrected under the EPCRS.

Under Audit CAP, excise taxes that are reportable on the Form 5330 (e.g., prohibited transactions) may be resolved by the agent securing a Form 5330 providing for 100% of the tax and interest outstanding. The agent may, in his or her discretion, recommend to the Service Center waiver of the failure to file and/or failure to pay penalty, under IRC §6651.

Section 4974(d) provides for waiver of the minimum distribution excise tax under certain circumstances. As part of VCP , if the failure involves the failure to satisfy the minimum required distribution requirements of

§ 401(a)(9), in appropriate cases, the IRS will waive the excise tax under § 4974 applicable to plan participants. The waiver will be included in the compliance statement issued by the IRS. The Plan Sponsor, as part of the submission, must request the waiver and in cases where the participant subject to the excise tax is an owner-employee as defined in § 401(c)(3), or a 10 percent owner of a corporation, the Plan Sponsor must also provide an explanation supporting the request for the waiver.

Assume a plan sponsor discovers a vesting problem in which the plan terms were not followed, should the plan sponsor use the Self-Correction Program or the VCP to correct the problem?

The decision of whether to use the SCP or Voluntary Correction Program to correct an Operational Failure depends on a number of factors, including: (1) the type of failure involved, (2) the practices and procedures under the plan, (3) whether, if the failure is an Operational Failure, it would be considered to be a Significant Operational Failure, (4) whether a Favorable Letter has been issued with respect to the plan, (5) whether the failure is an Egregious Failure, (6) when the failure is discovered, and (7) the amount of comfort the Plan Sponsor has with respect to the method used to correct the failure.

Although the SCP does not require the payment of a fee or notification to the IRS, it is limited to correcting Operational Failures that are not egregious. In addition, if the failure is a Significant Operational Failure, the Plan Sponsor must complete correction of the failure within two years of the year in which the failure occurred. Although a plan sponsor does not necessarily get assurance that the correction method employed under the SCP is acceptable to the IRS, the IRS has provided several examples of failures and acceptable correction methods under Appendix A and Appendix B in Rev. Proc. 2003-44. If a plan sponsor corrects a failure listed in Appendix A or Appendix B in accordance with the method of correction method set forth in the appendix, the plan sponsor may be assured that the IRS will find that correction method to be acceptable.

In this example, an Operational Failure, a vesting failure, has occurred. Appendix B, section 2.03 provides examples of acceptable correction methods for a vesting failure. Therefore, if there are acceptable practices and procedures under the plan, and the failure is an Insignificant Operational Failure, the Plan Sponsor may use the SCP to correct the failure at any time, even if the plan is Under Examination. Further, if the plan sponsor uses one of the correction methods under Appendix B of the revenue procedure, it will have assurance that the plan would be entitled to relief under the SCP with respect to its correction method. If, however, the failure is a Significant Operational Failure, the plan would be entitled to relief under the SCP only if the failure is identified and corrected within the two-year correction period under the SCP. Also, if the failure is a Significant Operational Failure, the plan would be eligible for relief under the SCP only if a Favorable Letter has been issued with respect to the plan. If the failure would be considered an Egregious Failure, it would be eligible for correction under the Voluntary Correction Program but not under the SCP.

Refer Reply to:

E:EP:R:9

Date: February 24, 1993

Dear Mr.

This is in response to your letter to Martin Slate , Director of the Employee Plans Technical and Actuarial Division, dated December 24, 1992, in which you requested general information regarding valuation of assets in Individual Retirement Accounts and Individual Retirement Annuities ("IRAs"). In your letter, you posed the following questions: (1) Is an IRA required to value its assets on an annual basis? (2) Is an IRA required to value "hard to value" assets (e.g. partnerships, closely-held stock, collectibles, etc.) as well as exchange-traded securities? (3) Are non-traded asset value standards the same for IRAs as for defined benefit ("DB") plans and defined contribution ("DC") plans? (4) Who is responsible for insuring an IRA's assets are properly valued? (5) Can a fiduciary evade its valuation responsibilities by having the client sign a release, indemnification or other instrument?

Section 408(i) of the Internal Revenue Code of 1986 (the "Code") requires the trustee of an individual retirement account and the issuer of an endowment contract or an individual retirement annuity to make certain reports regarding such account, contract, or annuity to the Secretary of the Treasury and to the individual for whom such account, contract or annuity is maintained. Section 408(i) of the Code gives the Secretary authority to prescribe the manner of providing such reports and to determine the information required to be provided.

Section 1.408-5 of the Income Tax Regulations provides that the trustee of an individual retirement account or the issuer of an individual retirement annuity shall make annual calendar year reports concerning the status of the account or the annuity. The information required in the annual reports by the trustees and issuers of IRAs

includes: the amount of contributions, the amount of distributions, the amount of the premium paid for an endowment contract allocable to the cost of life insurance, the name and address of the trustee or issuer, and such other information as the Commissioner of Internal Revenue may require.

Internal Revenue Service Form 5498, Individual Retirement Arrangement Information, is the prescribed form for satisfying the annual reporting requirements of section 408(i) of the Code and the regulations thereunder. The instructions to Form 5498 require the trustee or issuer to report the fair market value of the IRA account as of December 31 of each year.

In response to your questions, first, based on the fact that the Internal Revenue Service (the "Service) requires that the fair market value of the assets as of December 31 be reported on Form 5498, an IRA is required to value its assets on an annual basis. Similarly, the requirement that fair market value be determined annually for purposes of Form 5498 necessitates the valuation of all IRA assets, including "hard to value" assets.

With respect to your third question, Revenue Ruling 59-60, 1959-1 C.B. 237, as modified by Revenue Ruling 65-193, 1965-2 C.B. 370, sets forth the proper approach to use to value corporate stock for estate and gift tax purposes. Revenue Ruling 68-609, 1968-2 C.B. 327, states that the general approach, methods and factors outlined in Revenue Ruling 59-60 are equally applicable to valuations of corporate stock for income and other tax purposes. The general approach, methods and factors also apply to valuations of corporate stock in IRAs.

With respect to your fourth question, the person responsible for insuring that an IRA's assets are properly valued is the IRA trustee or issuer, because under the Service's reporting requirements that person is responsible for reporting the correct fair market value of the assets.

Finally, the IRA trustee or issuer cannot evade valuation responsibility by having the participant sign a release, indemnification or other instrument, because the trustee's or issuer's responsibility for valuation derives from the Service's reporting requirements, which cannot be waived by participant action.

We believe this information will be of assistance to you. This is not a ruling, however, and may not be relied upon with respect to any specific transaction.

Sincerely,

John G. Riddle, Jr.

Acting Chief, Employee Plans

Rulings Branch

inventories of explosives must be maintained to assure employer and blaster accountability for explosives.

Ira L. Mills,

Departmental Clearance Officer.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

January 26, 2006.

The Department of Labor (DOL) has submitted the following public information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35). A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Department of Labor (DOL). To obtain documentation, contact Darrin King on 202–693–4129 (this is not a toll-free number) or e-mail: *king.darrin@dol.gov.*

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, 202–395–7316 (this is not a toll-free number), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Agency: Occupational Safety and Health Administration.

Type of Review: Extension of currently approved collection.

Title: Longshoring and Marine Terminal Operations (29 CFR Parts 1918 and 1917).

OMB Number: 1218–0196.

Frequency: On occasion; Weekly; Monthly; and Annually.

Type of Response: Recordkeeping and Third party disclosure.

Affected Public: Business or other for-profit; not-for-profit institutions; Federal Government; and State, Local, or Tribal Government.

Number of Respondents: 750.

Number of Annual Responses: 152,458.

Estimated Time per Response: Varies from 1 minute to 1 hour and five minutes.

Total Burden Hours: 35,948.

Total Annualized capital/startup costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: The Standards on Marine Terminals (29 CFR Part 1917) and Safety and Health Regulations for Longshoring (29 CFR Part 1918) contain a number of collections of information which are used by employers to ensure that employees are informed properly about the safety and health hazards associated with marine terminals and longshoring operations. OSHA uses the records developed in response to the collection of information requirements to find out if the employer is complying adequately with the provisions of the standards.

Ira L. Mills,

Departmental Clearance Officer.

[FR Doc. E6–1507 Filed 2–2–06; 8:45 am]

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application No. D–11184]

Amendment to Prohibited Transaction Exemption (PTE) 75–1, Exemptions From Prohibitions Respecting Certain Classes of Transactions Involving Employee Benefit Plans and Certain Broker-Dealers, Reporting Dealers and Banks

AGENCY: Employee Benefits Security Administration.

ACTION: Final Amendment to PTE 75–1, Part II and Part V.

SUMMARY: This document amends PTE 75–1, Part II and Part V (40 FR 50845, October 31, 1975). PTE 75–1, Part II, permits the purchase or sale of a security in a principal transaction between an employee benefit plan and a broker-dealer, reporting dealer, or bank. PTE 75–1, Part V, permits an extension of credit to a plan by a broker-dealer in connection with the purchase or sale of securities. The amendment affects participants, beneficiaries and fiduciaries of employee benefit plans, and broker-dealers, reporting dealers and banks entering into the described transactions.

DATES: *Effective Date:* This amendment is effective January 1, 1975.

FOR FURTHER INFORMATION CONTACT: Brian Buyniski or Karen Lloyd, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Room N–5649, 200 Constitution Avenue, NW., Washington, DC 20210, 202–693–8540. (This is not a toll free number.)

SUPPLEMENTARY INFORMATION: On April 28, 2004, notice was published in the **Federal Register** (69 FR 23216) of the pendency before the Department of Labor (the Department) of a proposed amendment to PTE 75–1, Part II and Part V. PTE 75–1 provides exemptive relief from certain of the restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (ERISA or the Act), and from certain taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of section 4975(c)(1) of the Code. The amendment was proposed by the Department on its own motion, pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).[1]

The notice gave interested persons an opportunity to comment or to request a hearing on the proposed amendment. The Department received three comments which are discussed below. One commenter requested a public hearing if the Department determined to modify a specific provision of the exemption. As the Department has not modified that provision in the final exemption, a public hearing will not be held with regard to this amendment.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether the

---

[1] Section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. at 214 (2000 ed.) generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

In the discussion of the exemption, references to specific provisions of the Act should be read to refer as well to the corresponding provisions of section 4975 of the Code.

regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This amendment has been drafted and reviewed in accordance with Executive Order 12866, section 1(b), Principles of Regulation. The Department has determined that this amendment is not a ''significant regulatory action'' under Executive Order 12866, section 3(f). Accordingly, it does not require an assessment of potential costs and benefits under section 6(a)(3) of that order.

Paperwork Reduction Act

The information collection request (ICR) included in the existing PTE 75–1 is currently approved under Office of Management and Budget (OMB) control number 1210–0092 (through March 31, 2007). The amendment does not modify the information collection provisions of the exemption. Therefore, the Department has not submitted an ICR to OMB in connection with this Final Amendment to PTE 75–1.

Description of the Exemption

Part I of PTE 75–1 provides relief for agency transactions and services; [2] Part II for principal transactions; Part III for underwritings; Part IV for market-making; and Part V for extension of credit.

PTE 75–1, Part II

Part II of PTE 75–1 provides relief from the restrictions of 406(a) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, for the purchase or sale of a security between an employee benefit plan and: (1) A broker-dealer registered under the Securities Exchange Act of 1934 (the 1934 Act); (2) a reporting dealer who makes primary markets in securities of the U.S. Government or of any agency thereof and reports daily to the Federal Reserve Bank of New York its positions with respect to Government securities and borrowings thereon; or (3) a bank supervised by the United States or a State.[3]

The exemption further provides relief from the restrictions of section 406(b) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(E) and (F) of the Code, for the purchase or sale by a plan of securities issued by an open-end investment company registered under the Investment Company Act of 1940, provided that a fiduciary with respect to the plan is not a principal underwriter for, or affiliated with, such investment company within the meaning of sections 2(a)(29) and 2(a)(3) of the Investment Company Act of 1940 (the Mutual Fund Exemption).

The conditions of PTE 75–1, Part II, require that a broker-dealer must customarily purchase and sell securities for its own account in the ordinary course of its business as a broker-dealer. The conditions further require that reporting dealers and banks must customarily purchase and sell Government securities for their own accounts in the ordinary course of their businesses, and that any purchase or sale between the plan and such reporting dealer or bank be limited to a purchase or sale of Government securities.

All transactions entered into pursuant to Part II must be at least as favorable to the plan as an arm's length transaction with an unrelated party would be, and must not be, at the time of the transaction, a prohibited transaction within the meaning of section 503(b) of the Code.

Except with respect to the Mutual Fund Exemption, Part II as originally granted provided that the broker-dealer, reporting dealer or bank may not be a fiduciary with respect to the plan, and such broker-dealer, reporting dealer or bank may be a party in interest or disqualified person with respect to the plan solely by reason of section 3(14)(B) of the Act or section 4975(e)(2)(B) of the Code or a relationship to a person described in those sections. For purposes of this condition, a broker-dealer, reporting dealer or bank is not deemed to be a fiduciary with respect to a plan solely by reason of providing securities custodial services for a plan. Lastly, the exemption for principal transactions also contains certain recordkeeping requirements.

PTE 75–1, Part V

Part V of PTE 75–1 provides relief from the restrictions of section 406 of ERISA and the related excise taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, for any extension of credit to a plan by a broker or dealer registered under the 1934 Act.[4] As originally granted, Part V provided that the broker-dealer extending credit may not be a fiduciary with respect to any assets of the plan, unless no interest or other consideration is received by such fiduciary or any affiliate in connection with the extension of credit.

Under Part V, the extension of credit must be made in connection with the purchase or sale of securities, must be lawful under the 1934 Act, and may not be a prohibited transaction within the meaning of section 503(b) of the Code. Lastly, the exemption for extensions of credit also contains certain recordkeeping requirements.

Amendment

As part of the proposed amendment, the Department repositioned the following language found in section (d) of Part II of the exemption:

> Neither the restrictions of this paragraph nor (if the other conditions of this exemption are met) the restrictions of section 406(b) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(E) and (F) of the Code, shall apply to the purchase or sale by the plan of securities issued by an open-end investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 et seq.), provided that a fiduciary with respect to the plan is not a principal underwriter for, or affiliated with, such investment company within the meaning of sections 2(a)(29) and 2(a)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(29) and 80a–2(a)(3)).

The Department included the relief provided by this provision in a new paragraph (2) of Part II of the exemption for principal transactions. The Department also proposed to amend the language of this section to clarify that the fiduciary referenced therein is the

[2] Part I(a) expired on May 1, 1978. It ultimately was replaced by PTE 86–128 (51 FR 41686, Nov. 18, 1986).

[3] The exemption defines the terms ''broker-dealer,'' ''reporting dealer'' and ''bank'' to include such entities and any affiliate thereof. The term ''affiliate'' is defined as in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

[4] The exemption defines the terms ''broker'' and ''dealer'' to include such entities and any affiliate thereof. The term ''affiliate'' is defined as in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

fiduciary who makes the decision on behalf of the plan to enter into the transaction. The Department also requested public comment on the current utility of this exemption.

The Department additionally proposed to amend another provision of section (d) of Part II, which stated, in relevant part, that:

Such broker-dealer, reporting dealer or bank is not a fiduciary with respect to the plan, and such broker-dealer, reporting dealer or bank is a party in interest or disqualified person with respect to the plan solely by reason of section 3(14)(B) of the Act or section 4975(e)(2)(B) of the Code or a relationship to a person described in such sections. For purposes of this paragraph, a broker-dealer, reporting dealer, or bank shall not be deemed to be a fiduciary with respect to a plan solely by reason of providing securities custodial services for a plan.

Under the proposed amendment, the exemption permits plans to engage in transactions with broker-dealers, reporting dealers, banks and their affiliates except where the broker-dealer, reporting dealer, bank or an affiliate has or exercises any discretionary authority or control (except as a directed trustee) with respect to the investment of plan assets involved in the transaction, or renders investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to the investment of those assets.[5]

The Department likewise proposed to amend condition (a)(2) of PTE 75–1, Part V, which required that the party in interest or disqualified person providing the extension of credit to the plan:

[i]s not a fiduciary with respect to any assets of such plan, unless no interest or other consideration is received by such fiduciary or any affiliate thereof in connection with such extension of credit.

Under the proposed amendment, section (a)(2) states that the party in interest or disqualified person extending credit to the plan:

does not have or exercise any discretionary authority or control (except as a directed trustee) with respect to the investment of the plan assets involved in the transaction, nor does it render investment advice (within the meaning of 29 CFR section 2510.3–21(c)) with respect to those assets, unless no interest or other consideration is received by the party in interest or disqualified person or any affiliate thereof in connection with such extension of credit.

[5] Nothing herein should be construed to imply that a directed trustee is not a fiduciary under the Act. See 29 U.S.C. 103(a)(1). A plan may expressly provide that a trustee is subject to the direction of a named fiduciary who is not a trustee, in which case the trustee shall be subject to proper directions of such fiduciary which are made in accordance with the terms of the plan and which are not contrary to the Act.

Discussion of Comments

The Department received one comment concerning the effective date of the proposed amendments. The commenter requested that, with respect to the proposed amendments to condition (d) of Part II and condition (a)(2) of Part V, the Department state that it was the intention of the Department at the time of the granting of the final exemption in 1975 to focus only on fiduciaries with respect to the plan assets involved in the transaction, as opposed to any fiduciary of the plan. The commenter referenced the following language in the preamble of the proposed exemption in August 1975 regarding proposed regulations under the definition of fiduciary at section 3(21) of the Act:

It should be noted, moreover, that under the regulations proposed in conjunction with these proposed exemptions relating to the definition of the term ''fiduciary,'' a person who is a plan fiduciary would be deemed to be a fiduciary only with respect to those plan assets with respect to which he exercises those functions which make him a fiduciary.

40 FR 33566. The Department received a follow up submission from this commenter requesting that, in order to avoid confusion and uncertainty, this amendment to PTE 75–1 be made retroactive to October 31, 1975. The Department also has been urged informally to adopt a retroactive effective date.

While the Department acknowledges that some confusion may have arisen from the fact that two conditions of PTE 75–1, Part II and Part V, regarding fiduciaries, were broader than the Department's regulations regarding the definition of a fiduciary under section 3(21) of the Act, the Department is unable to concur with the commenter that its original intent with respect to such conditions was in fact to limit them to fiduciaries with respect to the plan assets involved in the transaction.[6] The conditions contained in the Department's administrative exemptions are designed to ensure that the Department can make findings required pursuant to section 408(a) of ERISA and 4975(c)(2) of the Code that the exemption is administratively feasible, and in the interests of, and protective of the rights of, plan participants and beneficiaries. The Department's regulations do not govern the scope of the conditions of its administrative exemptions. Therefore, the fact that a regulation defining the term ''fiduciary'' may have focused on the plan assets with respect to which a person exercises fiduciary functions does not necessarily govern the meaning of a condition of an administrative exemption. Prior to this amendment, the conditions in PTE 75–1, Part II and V, clearly referred to a fiduciary with respect to a plan.

[6] The Department notes that the language quoted by the commenter appeared in the preamble to Part III of PTE 75–1, which is not the subject of this amendment.

Nevertheless, in the Department's view, an interpretation of the conditions of PTE 75–1, Part II and Part V, which focused on fiduciaries with respect to the plan assets involved in the transaction would not have created an undue risk of loss of plan assets. As the Department has concluded that the amendments are sufficiently protective of plan assets on a prospective basis, the Department believes a similar conclusion would dictate in favor of granting the amendments on a retroactive basis. Accordingly, the Department has determined to make these amendments to PTE 75–1 retroactive to January 1, 1975, which is the effective date of PTE 75–1.

The Department received three comments on the current utility of the Mutual Fund Exemption. Based on the information received, the Department believes that additional time is needed to more fully consider the issues raised by the commenters. However, the Department does not wish to unduly delay finalization of the other amendments to PTE 75–1. Accordingly, this document contains final amendments to Parts II and V of PTE 75–1 and adopts the repositioning of the Mutual Fund Exemption to paragraph (2) of PTE 75–1, Part II, and adopts the clarifying language. As a result, the Mutual Fund Exemption remains in effect pending further action by the Department.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plan's participants and beneficiaries and in a prudent fashion in accordance with subsection (a)(1)(B) of section 404 of the Act; nor does it affect

the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of employees of the employer maintaining the plan and their beneficiaries;

(2) The Department finds that the amended exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan;

(3) The amended exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption; and

(4) The amended exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory and other exemptions and transitional rules. Furthermore, the fact that a transaction is the subject of an exemption is not dispositive of whether the transaction would have been a prohibited transaction in the absence of such exemption.

Amendment

Accordingly, PTE 75–1 is amended as follows under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).

I. PTE 75–1, Part II, is amended in its entirety to read as follows:

(1) The restrictions of section 406(a) of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to any purchase or sale of a security between an employee benefit plan and a broker-dealer registered under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*), a reporting dealer who makes primary markets in securities of the United States Government or of any agency of the United States Government (''Government securities'') and reports daily to the Federal Reserve Bank of New York its positions with respect to Government securities and borrowings thereon, or a bank supervised by the United States or a State, and

(2) The restrictions of section 406(a) and 406(b) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (F) of the Code, shall not apply to the purchase or sale by a plan of securities issued by an open-end investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*), provided that no fiduciary with respect to the plan who makes the decision on behalf of the plan to enter into the transaction is a principal underwriter for, or affiliated with, such investment company within the meaning of sections 2(a)(29) and 2(a)(3) of the Investment Company Act of 1940 (15 U.S.C. 80a–2(a)(29) and 80a–2(a)(3)).

The exemptions set forth in (1) and (2) above are subject to the following conditions:

(a) In the case of such broker-dealer, it customarily purchases and sells securities for its own account in the ordinary course of its business as a broker-dealer.

(b) In the case of such reporting dealer or bank, it customarily purchases and sells Government securities for its own account in the ordinary course of its business and such purchase or sale between the plan and such reporting dealer or bank is a purchase or sale of Government securities.

(c) Such transaction is at least as favorable to the plan as an arm's length transaction with an unrelated party would be, and it was not, at the time of such transaction, a prohibited transaction within the meaning of section 503(b) of the Code.

(d) Except with respect to transactions described in section (2) above, neither the broker-dealer, reporting dealer, bank, nor any affiliate thereof has or exercises any discretionary authority or control (except as a directed trustee) with respect to the investment of the plan assets involved in the transaction, or renders investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets.

(e) The plan maintains or causes to be maintained for a period of six years from the date of such transaction such records as are necessary to enable the persons described in paragraph (f) of this exemption to determine whether the conditions of this exemption have been met, except that:

(1) Such broker-dealer, reporting dealer, or bank shall not be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if such records are not maintained, or are not available for examination as required by paragraph (f) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(f) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (e) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan. For purposes of this exemption, the terms ''broker-dealer,'' ''reporting dealer'' and ''bank'' shall include such persons and any affiliates thereof, and the term ''affiliate'' shall be defined in the same manner as that term is defined in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

II. PTE 75–1, Part V, is amended in its entirety to read as follows:

The restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of section 4975(c)(1) of the Code, shall not apply to any extension of credit to an employee benefit plan by a party in interest or a disqualified person with respect to the plan, provided that the following conditions are met:

(a) The party in interest or disqualified person:

(1) Is a broker or dealer registered under the Securities Exchange Act of 1934; and

(2) Does not have or exercise any discretionary authority or control (except as a directed trustee) with respect to the investment of the plan assets involved in the transaction, nor does it render investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets, unless no interest or other consideration is received by the party in interest or disqualified person or any affiliate thereof in connection with such extension of credit.

(b) Such extension of credit:

(1) Is in connection with the purchase or sale of securities;

(2) Is lawful under the Securities Exchange Act of 1934 and any rules and regulations promulgated thereunder; and

(3) Is not a prohibited transaction within the meaning of section 503(b) of the Code.

(c) The plan maintains or causes to be maintained for a period of six years from the date of such transaction such records as are necessary to enable the persons described in paragraph (d) of this exemption to determine whether

the conditions of this exemption have been met, except that:

(1) If such party in interest or disqualified person is not a fiduciary with respect to any assets of the plan, such party in interest or disqualified person shall not be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if such records are not maintained, or are not available for examination as required by paragraph (d) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(d) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (c) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan. For purposes of this exemption, the terms ''party in interest'' and ''disqualified person'' shall include such party in interest or disqualified person and any affiliates thereof, and the term ''affiliate'' shall be defined in the same manner as that term is defined in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

Signed at Washington DC, this 30th day of January, 2006.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, Department of Labor.

BILLING CODE 4520–29–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Exemption Application D–11069]

Amendment to Prohibited Transaction Exemption 84–24 (PTE 84–24) For Certain Transactions Involving Insurance Agents and Brokers, Pension Consultants, Insurance Companies, Investment Companies and Investment Company Principal Underwriters

AGENCY: Employee Benefits Security Administration, U.S. Department of Labor.

ACTION: Adoption of Amendment to PTE 84–24.

SUMMARY: This document amends PTE 84–24, a class exemption that provides relief for certain transactions relating to the purchase, with plan assets, of investment company securities or insurance or annuity contracts, and the payment of associated sales commissions to insurance agents or brokers, pension consultants, or investment company principal underwriters that are parties in interest with respect to such plan. The amendment extends relief to purchase transactions involving insurance agents and brokers, pension consultants, and investment company principal underwriters whose affiliates exercise investment discretion over plan assets that are not involved in the transaction.

DATES: The amendment is effective February 3, 2006.

FOR FURTHER INFORMATION CONTACT: Christopher Motta, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, (202) 693–8540 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On September 14, 2004, notice was published in the **Federal Register** (69 FR 55463) of the pendency before the Department of a proposed amendment to PTE 84–24 (49 FR 13208 (April 3, 1984) as corrected at 49 FR 24819 (June 15, 1984)). PTE 84–24 provides an exemption from the restrictions of section 406(a)(1)(A) through (D) and section 406(b) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (F) of the Code.[1]

The amendment to PTE 84–24 was proposed by the Department on its own motion, pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).[2] The notice of pendency gave interested persons an opportunity to comment or to request a hearing on the proposed amendment. The Department received one comment on the proposed amendment. That comment, from the Investment Company Institute, supported the amendment as proposed. The Department did not receive a request for a public hearing.

For the sake of convenience, the entire text of PTE 84–24, as amended, has been reprinted in this notice.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This amendment has been drafted and reviewed in accordance with Executive Order 12866, section 1(b), Principles of Regulation. The Department has determined that this amendment is not a ''significant regulatory action'' under Executive Order 12866, section 3(f). Accordingly, it does not require an assessment of potential costs and benefits under section 6(a)(3) of that order.

[1] References to section 406 of ERISA as they appear throughout this amendment should be read to refer as well to the corresponding provisions of section 4975 of the Internal Revenue Code of 1986, as amended (the Code).

[2] Section 102 of the Reorganization Plan No. 4 of 1978 (5 U.S.C. App. at 214, 2000 ed.) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975 of the Code to the Secretary of Labor.

Trust Examination Manual

Appendix E — Employee Benefit Law

Prohibited Transaction Class Exemption 77-3

Class Exemption Involving Mutual Fund In-House Plans Requested by the Investment Company Institute

April 8, 1977 (42 FR 18743)

Recap
Permits an employee benefit plan which covers only employees of a mutual fund, the fund's investment adviser, the principal underwriter, or an affiliate of such persons, to "acquire" or sell shares of a registered open-end investment company .

Class Exemption

Agency: Department of Labor, Labor-Management Services Administration

Action: Grant of Class Exemption

Effective Date: December 31, 1974

Exemption

Effective for transactions occurring after December 31, 1974, the restrictions of sections 406 and 407(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, shall not apply to the acquisition or sale of shares of an open-end investment company registered under the Investment Company Act of 1940 by an employee benefit plan covering only employees of such investment company, employees of the investment adviser or principal underwriter for such investment company, or employees of any affiliated person (as defined in section 2(a)(3) of the Investment Company Act of 1940) of such investment adviser or principal underwriter, provided that the following conditions are met (whether or not such investment company, investment adviser, principal underwriter or any affiliated person thereof is a fiduciary with respect to the plan):

a. The plan does not pay any investment management, investment advisory or similar fee to such investment adviser, principal underwriter or affiliated person. This condition does not preclude the payment of investment advisory fees by the investment company under the terms of its investment advisory agreement adopted in accordance with section 15 of the Investment Company Act of 1940.

b. The plan does not pay a redemption fee in connection with the sale by the plan to the investment company of such shares unless (1) such redemption fee is paid only to the investment company, and (2) the existence of such redemption fee is disclosed in the investment company prospectus in effect both at the time of the acquisition of such shares and at the time of such sale.
c. In the case of transactions occurring more than 60 days after the granting of this exemption, the plan does not pay a sales commission in connection with such acquisition or sale.
d. All other dealings between the plan and the investment company, the investment adviser or principal underwriter for the investment company, or any affiliated person of such investment adviser or principal underwriter, are on a basis no less favorable to the plan than such dealings are with other shareholders of the investment company.

Signed at Washington, D.C., this 31st day of March, 1977.

J. Vernon Ballard,

Acting Administrator of Pension and Welfare Benefit Programs, Department of Labor.

and

William E. Williams,

Acting Commissioner of Internal Revenue

[FR Doc. 77-10157 Filed 4-1-77; 11:44 AM]

Prohibited Transaction Class Exemption 77-4

Investment in Advised or Affiliated Mutual Funds

March 31, 1977

Recap
Permits investment in mutual funds advised by or affiliated with a fiduciary if: (1) approved by a second, independent, fiduciary, (2) no front-end load is imposed, (3) redemption fees meet certain conditions, and (4) conditions on mutual fund fees are met.
Cross reference: See Advisory Opinion 93-13 regarding application of PTE 77-4 to purchase of affiliated mutual funds. Also see 1994 DOL letter to OCC regarding conversions of collective investment funds into mutual funds.

Class Exemption

To Invest in Mutual Funds Affiliated With or Advised By a Fiduciary

Agency: Department of Labor and Internal Revenue Service.

Action: Grant of class exemption.

Effective Date: Certain retroactive exemption is given for transactions between January 1, 1975 and ninety days after the exemption is granted. Prospective exemption is granted for transactions occurring ninety days after the exemption is granted. [Since the exemption was signed 3-31-77, the prospective exemption should be effective 7-1-77.]

Exemption

Section I - Retroactive.

The Retroactive portion of this Exemption covers transactions between 1-1-75 and 7-1-77. As such, it is not reprinted here.

Section II - Prospective. Effective 90 days after the date of granting of this exemption, the restrictions of section 406 of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, shall not apply to the purchase or sale by an employee benefit plan of shares of an open-end investment company registered under the Investment Company Act of 1940, the investment adviser for which is also a fiduciary with respect to the plan (or an affiliate of such fiduciary) and is not an employer of employees covered by the plan (hereinafter referred to as "fiduciary/investment adviser"), provided that the following conditions are met:

a. The plan does not pay a sales commission in connection with such purchase or sale.

b. The plan does not pay a redemption fee in connection with the sale by the plan to the investment company of such shares, unless:

    1. Such redemption fee is paid only to the investment company, and
    2. The existence of such redemption fee is disclosed in the investment company prospectus in effect both at the time of the purchase of such shares and at the time of such sale.

c. The plan does not pay an investment management, investment advisory, or similar fee with respect to the plan assets invested in such shares for the entire period of such investment.

    - This condition does not preclude the payment of investment advisory fees by the investment company under the terms of its investment advisory agreement adopted in accordance with section 15 of the Investment Company Act of 1940.

    - This condition also does not preclude the payment of an investment advisory fee by the plan based on total plan assets from which a credit has been subtracted representing the plan's pro rata share of investment advisory fees paid by the investment company.

    - If, during any fee period for which the plan prepaid its investment management, investment advisory or similar fee, the plan purchases shares of the investment company, the requirements of this paragraph (c) shall be deemed met with respect to such prepaid fee if, by a method reasonable designed to accomplish the same, the amount of the prepaid fee that constitutes the fee with respect to the plan assets invested in the investment company shares

        1. Is anticipated and subtracted from the prepaid fee at the time of payment of such fee,
        2. Is returned to the plan no later than during the immediately following fee period, or
        3. Is offset against the prepaid fee for the immediately following fee period or for the fee period immediately following thereafter.

        For purposes of this paragraph, a fee shall be deemed to be prepaid for any fee period if the amount of such fee is calculated as of a date not later than the first day of such period.

d. A second fiduciary with respect to the plan, who is independent of and unrelated to the fiduciary/investment adviser or any affiliate thereof, receives

    - A current prospectus issued by the investment company, and

    - Full and detailed written disclosure of the investment advisory and other fees charged to or paid by the plan and the investment company, including

        - The nature and extent of any differential between the rates of such fees,
        - The reasons why the fiduciary/investment adviser may consider such purchases to be appropriate for the plan, and
        - Whether there are any limitations on the fiduciary/investment adviser with respect to which plan assets may be invested in shares of the investment company and, if so, the nature of such limitations.

    For purposes of this exemption, such second fiduciary will not be deemed to be independent of and unrelated to the fiduciary/investment adviser or any affiliate thereof if:

    1. Such second fiduciary directly or indirectly controls, is controlled by, or under common control with the fiduciary/investment adviser or any affiliate thereof;
    2. Such second fiduciary or any officer, director, partner, employee or relative of such second fiduciary is an officer, director, partner, employee or relative of such fiduciary/investment adviser or any affiliate thereof; or
    3. Such second fiduciary directly or indirectly receives any compensation or other consideration for his or his own personal account in connection with any transaction described in this exemption.

    If an officer, director, partner, employee or relative of such fiduciary/investment adviser or any affiliate thereof is a director of such second fiduciary, and if he or she abstains from participation in

        i. The choice of the plan's investment adviser,

ii. The approval of any such purchase or sale between the plan and the investment company and
iii. The approval of any change of fees charged to or paid by the plan,

then paragraph (d)(2) of this section shall not apply.

For purposes of this exemption, the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual, and the term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or a sister.

e. On the basis of the prospectus and disclosure referred to in paragraph (d), the second fiduciary referred to in paragraph (d) approves such purchases and sales consistent with the responsibilities, obligations, and duties imposed on fiduciaries by Part 4 of Title I of the Act. Such approval may be limited solely to the investment advisory and other fees paid by the mutual fund in relation to the fees paid by the plain and need not relate to any other aspects of such investments. In addition, such approval must be either

1. Set forth in the plan documents or in the investment management agreement between the plan and the fiduciary/investment adviser,
2. Indicated in writing prior to each purchase or sale, or
3. Indicated in writing prior to the commencement of a specified purchase or sale program in the shares of such investment company.

f. The second fiduciary referred to in paragraph (d), or any successor thereto, is notified of any change in any of the rates of fees referred to in paragraph (d) and approves in writing the continuation of such purchases or sales and the continued holding of any investment company shares acquired by the plan prior to such change and still held by the change. Such approval may be limited solely to the investment advisory and other fees paid by the mutual fund in relation to the fees paid by the plan and need not relate to any other aspects of such investment.

Signed at Washington, D. C. this 31st day of March 1977.

J. Vernon Ballard,

Acting Administrator of Pension and Welfare Benefit Programs

Department of Labor.

William E. Williams

Acting Commissioner of Internal Revenue.

Prohibited Transaction Class Exemption 80-26

Interest-Free Loans (Including Overdrafts)

April 29, 1980 (45 FR 28545)

Recap
Interest-free loans. Permits interest-free loans (including overdrafts) between plans and parties in interest provided certain conditions are met.

Class Exemption for Certain Interest Free Loans to Employee Benefit Plans

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This class exemption permits parties in interest with respect to employee benefit plans to make interest free loans to such plans. Such loans would be prohibited by the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of

1964 (the Code). The exemption affects all employee benefit plans, their participants and beneficiaries, and parties in interest with respect to those plans.

Effective Date: January 1, 1975.

Exemption

Effective January 1, 1975, the restrictions of section 406(a)(1)(B) and (D) and section 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(B) and (D) of the Code, shall not apply to the lending of money or other extension of credit from party in interest or disqualified person to an employee benefit plan, nor to the repayment of such loan or other extension of credit in accordance with its terms or written modifications thereof, if:

a. No interest or other fee is charged to the plan, and no discount for payment in cash is relinquished by the plan in connection with the loan or extension of credit;
b. The proceeds of the loan or extension of credit are used only:
    1. For the payment of ordinary operating expenses of the plan, including the payment of benefits in accordance with the terms of the plan and periodic premiums under an insurance or annuity contract; or
    2. For a period of not more than three days, for a purpose incidental to the ordinary operation of the plan;
c. The loan or extension of credit is unsecured; and
d. The loan or extension of credit is not directly or indirectly made by an employee benefit plan.

Prohibited Transaction Class Exemption 80-51

Collective Investment Funds

June 25, 1980 (45 FR 49709)

Recap
Collective Investment Funds. ERISA plans are permitted to invest in collective investment funds operated by bank fiduciaries, subject to certain limitations and conditions.

Class Exemption Covering Collective Investment Funds

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This exemption allows collective investment funds that are maintained by banks and in which employee benefit plans participate to engage in certain transactions provided that specified conditions are met. In the absence of this exemption, these transactions might be prohibited by the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code).

Effective Date: January 1, 1975.

Exemption

Note: This exemption has been replaced by PTE 91-38.

Prohibited Transaction Class Exemption 80-83

Purchase of Securities Where Issuer May Use Proceeds To Reduce or Retire Indebtedness To Parties in Interest

November 4, 1980 (45 FR 73189)

Recap
Permits ERISA plans to invest in securities issued by plan sponsors, when proceeds are used to reduce debt at the fiduciary bank or its affiliates (even if fiduciary personnel know how proceeds will be used) subject to conditions: (1) Issuer has been in business for 3 or more years, or securities are not convertible and are rated in the highest 4 ratings by a nationally-recognized firm; (2) No more than 10% of the offering is subscribed to by the bank as fiduciary; (3) No more than 3% of the offering is subscribed to by an individual ERISA plan; (4) Consideration paid by the plan to acquire the securities does not exceed 3% of an ERISA plan's market value. Note: Covers discretionary, non-discretionary and custodial accounts.

Class Exemption for Certain Transactions Involving Purchase of Securities

Where Issuer May Use Proceeds To Reduce or Retire Indebtedness

To Parties in Interest

Agency: Department of Labor.

Action: Grant of Class Exemption.

Summary: This class exemption permits, under certain conditions, purchases of securities by employee benefit plans when the proceeds from the sale of such securities may be used by the issuer to reduce or retire indebtedness to persons who are parties in interest with respect to such plans. In the absence of the retroactive and prospective relief provided by this exemption, these transactions might be prohibited by the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code).

Effective Date: Section I(B) of this exemption is effective December 1, 1980. The remainder of this exemption is effective January 1, 1975.

Exemption

I. Transactions

A. Effective January 1, 1975 the restrictions of section 406(a)(1)(A) through (D) of the Act and the taxes imposed by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the purchase or other acquisition prior to December 1, 1980 in a public offering (defined in Section II(B)) of securities by a fiduciary on behalf of an employee benefit plan solely because the proceeds from the sale were or were to be used by the issuer of the securities to retire or reduce indebtedness owed to a party in interest with respect to the plan other than the fiduciary, provided that the price paid by the plan for the securities does not exceed adequate consideration as defined in section 3(18) of the Act.

B. Subject to the conditions described in section II(A), effective December 1, 1980, the restrictions of section 406(a)(1)(A) through (D) of the Act and the taxes imposed by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the purchase or other acquisition in a public offering (defined in section II(B)) of securities by a fiduciary on behalf of an employee benefit plan solely because the proceeds from the sale may be used by the issuer of the securities to retire or reduce indebtedness owed to a party in interest of the plan other than the fiduciary.

C. Subject to the conditions described in section II(A), effective January 1, 1975, the restrictions of sections 406(a)(1)(A) through (D) and 406(b)(1) and (2) of the Act and the taxes imposed by reason of section 4975(c)(I)(A) through (E) of the Code shall not apply to the purchase or other acquisition in a public offering (defined in section II(B)) of securities by a fiduciary, which is a bank or an affiliate thereof, on behalf of an employee benefit plan solely because the proceeds from the sale may be used by the issuer of the securities to retire or reduce indebtedness owed to such fiduciary or any affiliate thereof provided that, if such fiduciary of the plan knows (as defined in paragraph (7) that the proceeds of this issue will be used in whole or in part by the issuer of the securities to reduce or retire

indebtedness owed to such fiduciary or affiliate thereof the transaction shall have complied with the conditions set forth in paragraph 1 through 6 below:

1. Such securities are purchased prior to the end of the first full business day after the securities have been offered to the public, except that -

    a. If such securities are offered for subscription upon exercise of rights, they may be purchased on or before the fourth day preceding the day on which the rights offering terminates; or
    b. If such securities are debt securities, they may be purchased on a day subsequent to the end of such first full business day, if the effective interest rates on comparable debt securities offered to the public subsequent to such first full business day and prior to the purchase are less than effective interest rate of the debt securities being purchased;

2. Such securities are offered by the issuer pursuant to an underwriting agreement under which the members of the underwriting syndicate are committed to purchase all of the securities being offered, except if the securities

    a. Are purchased by others pursuant to a rights offering, or
    b. Are offered pursuant to an over allotment option;

3. The issuer of such securities has been in continuous operation for not less than three years, including the operations of any predecessors, unless such securities are nonconvertible debt securities rated in one of the four highest rating categories by at least one nationally recognized statistical rating organization;
4. The amount of securities purchased or otherwise acquired on behalf of the plan by the fiduciary does not exceed three percent of the total amount of the securities being offered;
5. The consideration to be paid by any plan in purchasing or otherwise acquiring such securities does not exceed three percent of the fair market value, as of the most recent valuation date of the plan prior to such transaction of the plan assets which are subject to the management and control of such fiduciary;
6. The total amount of securities in any single offering purchased by the fiduciary of behalf of the plan together with the total amount of such securities purchased by such fiduciary acting as a fiduciary on behalf of any other employee benefit plan subject to Title I of the Act does not exceed 10 percent of the amount of the offering;
7. As used in this section I(C), a fiduciary will be deemed to know that the proceeds of an issuance of securities will be used in whole or in part by the issuer of the securities to reduce or retire indebtedness owned [owed] to such fiduciary or an affiliate thereof, if

    a. Such knowledge is actually communicated to, or
    b. Information reasonably sufficient to cause belief that the proceeds will be used in whole or in part by the issuer of the securities to reduce or retire indebtedness owned [owed] to the fiduciary, or an affiliate thereof, is possessed by, the officers or employees of the fiduciary, who are authorized to be involved in carrying out the investment responsibilities, obligations, or duties of the fiduciary, or who in fact are involved in carrying out such responsibilities, obligations, or duties, regarding the purchase or other acquisition.

D. Effective January 1, 1975, the restrictions of sections 406(a)(I)(A) through (D) and 406(b)(1) and (2) of the Act and the taxes imposed by reason of section 4975(c)(I)(A) through (E) of the Code shall not apply to the receipt by a party in interest of any of the proceeds resulting from the issuance, in a public offering (as defined in section II(B)), of securities merely because such proceeds are used by the issuer of the securities to retire or reduce indebtedness owed to the party in interest provided that, when such party in interest is a fiduciary acquiring such securities on behalf of a plan, such fiduciary is a bank or an affiliate thereof (as defined in section II(B)) which meets the provisions of section I(C) of this exemption.

II. General Conditions

A. The following conditions apply to the transactions described in section I(B) and (C) above:

1. The price paid by the plan fiduciary for the securities shall not be in excess of the offering price described in an effective registration statement under the Securities Act of 1933 covering such

securities or in the case of securities described in section II(B)(l)(b), in the offering circular required under applicable federal law;

2. (a) The fiduciary, on behalf of the plan, maintains for a period of six years from the date of the transaction the records necessary to enable the persons described in section II(A)(2)(b) below to determine whether the conditions of this exemption have been met, except that a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the fiduciary, the records are lost or destroyed prior to the end of the six-year period;

   (b) Notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in section II(A)(2)(a) above are unconditionally available at their customary location for examination during normal business hours by:

   i. Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,
   ii. Any fiduciary of a plan who has authority to manage and control the assets of the plan, or to allocate to another fiduciary the authority to manage and control the assets of the plan, or any duly authorized employee or representative of such fiduciary,
   iii. Any contributing employer to the plan or representative of such employer,
   iv. Any participant or beneficiary of the plan or any duly-authorized employee or representative of such participant or beneficiary,
   v. None of the persons described in subparagraph (ii) through (iv) of this paragraph shall be authorized to examine any fiduciary's trade secrets or required to be kept commercial [sic] or financial information which is privileged or required to be kept confidential.

B. For the purposes of the exemptions contained in Part I,

1. The term "public offering" means -

   a. The offering of securities registered under the Securities Act of 1933 (Securities Act), or
   b. The offering of securities exempt from registration under the Securities Act which are -

      (i) Issued by a bank.

      (ii) Issued by a motor carrier if such issuance is subject to the provisions of section 214 of the Interstate Commerce Act, as amended,

      (iii) Exempt from the registration requirements of the Securities Act pursuant to a federal statute other than the Securities Act, or

      (iv) The subject of a distribution and of a class which is required to be registered under section 12 of the Securities Exchange Act of 1934 (15 USC 781), and the issuer of which has been subject to the reporting requirements of section 13 of that Act (15 USC 78m) for a period of at least 90 days immediately preceding the sale of securities and has filed all reports required to be filed thereunder with the Securities and Exchange Commission during the preceding 12 months.

2. An "affiliate" of a bank means any entity directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such bank.

   For the purposes of this paragraph, the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

3. Each plan participating in a collective or commingled fund shall be considered to own the same proportionate undivided interest in each asset of the collective investment fund as its proportionate interest in the total assets of the collective investment fund as calculated on the most recent preceding valuation date of the fund.

Prohibited Transaction Class Exemption 81-6

Securities Lending

January 23, 1981 (46 FR 7527)

[Amended on May 19, 1987 (52 FR 18754)]

Recap
Securities Lending: Loans by plans to banks and broker-dealers. - The lending of securities by employee benefit plans to broker-dealers and banks who are parties in interest is permitted under this class exemption. In order for such loans to be exempt from ERISA's prohibited transaction provisions, neither the borrower nor an affiliate may have discretionary authority with respect to the investment of the plan assets involved in the transaction. A 1987 amendment, which expanded the exemption to government securities dealers, is included in the Amended Exemption.
Also See:
PTE 82-63 permits payment of compensation to a fiduciary for securities lending services.

Class Exemption To Permit Certain Loans of Securities by Employee Benefit Plans

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This exemption will allow the lending of securities by employee benefit plans to banks and broker-dealers who are parties in interest with respect to such plans, if the conditions specified in the exemption are met. The exemption affects participants and beneficiaries of employee benefit plans, persons who manage the assets of such plans, and parties in interest who might engage in securities lending transactions with such plans. In the absence of this exemption, securities lending transactions between a plan and a party in interest would be prohibited by the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code).

Effective Date: January 23, 1981. For purposes solely of Prohibited Transaction Exemption 79-23 (the Grumman Corp. Pension Trust, 44 FR 31750, June 1, 1979). The final disposition of this class exemption will be deemed to occur on February 23, 1981.

Amended Exemption

Effective January 23, 1981, the restrictions of section 406(a)(1)(A) through (D) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the lending of securities that are assets of an employee benefit plan to a broker-dealer registered under the Securities Exchange Act of 1934 (the 1934 Act) or exempted from registration under section 15(a)(I) of the 1934 Act as a dealer in exempted Government securities (as defined in section 3(a)(12) of the 1934 Act) or to a bank, if:

1. Neither the borrower nor an affiliate of the borrower has discretionary authority or control with respect to the investment of the plan assets involved in the transaction, or renders investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to those assets;
2. The plan receives from the borrower (either by physical delivery or by, book entry in a securities depository) by the close of the lending fiduciary's business on the day in which the securities lent are delivered to the borrower, collateral consisting of cash, securities issued or guaranteed by the United States Government or its agencies, or irrevocable bank letters of credit issued by a person other than the borrower or an affiliate thereof, or any combination thereof, having, as of

the close of business on the preceding business day, a market value equal to not less than 100 percent of the market value of the securities lent;

3. Prior to the making of any such loan, the borrower shall have furnished the lending fiduciary with (1) the most recent available audited statement of the borrower's financial condition, (2) the most recent available unaudited statement of its financial condition (if more recent than such audited statement), and (3) a representation that, at the time the loan is negotiated, there has been no material adverse change in its financial condition since the date of the most recent financial statement furnished to the plan that has not been disclosed to the lending fiduciary. Such representation may be made by the borrower's agreeing that each such loan shall constitute a representation by the borrower that there has been no such material adverse change;
4. The loan is made pursuant to a written loan agreement, the terms of which are at least as favorable to the plan as an arm's length transaction with an unrelated party, would be. Such agreement may be in the form of a master agreement covering a series of securities lending transactions;
5. (a) The plan (1) receives a reasonable fee that is related to the value of the borrowed securities and the duration of the loan, or (2) has the opportunity to derive compensation through the investment of cash collateral. Where the plan has that opportunity, the plan may pay a loan rebate or similar fee to the borrower, if such fee is not greater than the plan would pay in a comparable transaction with an unrelated party;

   (b) The plan receives the equivalent of all distributions made to holders of the borrowed securities during the term of the loan, including, but not limited to, cash dividends, interest payments, shares of stock as a result of stock splits and rights to purchase additional securities;

6. If the market value of the collateral at the close of trading on a business day is less than 100 percent of the market value of the borrowed securities at the close of trading on that day, the borrower shall deliver, by the close of business on the following business day, an additional amount of collateral (as described in paragraph 2) the market value of which, together with the market value of all previously delivered collateral, equals at least 100 percent of the market value of all the borrowed securities as of such preceding day.

   Notwithstanding the foregoing, part of the collateral may be returned to the borrower if the market value of the collateral exceeds 100 percent of the market value of the borrowed securities, as long as the market value of the remaining collateral equals at least 100 percent of the market value of the borrowed securities;

7. The loan may be terminated by the plan at any time, whereupon the borrower shall deliver certificates for securities identical to the borrowed securities (or the equivalent thereof in the event of reorganization, recapitalization or merger of the issuer of the borrowed securities) to the plan within (1) the customary delivery period for such securities, (2) five business days, or (3) the time negotiated for such delivery by the plan and the borrower, whichever is lesser; and
8. In the event the loan is terminated, and the borrower fails to return the borrowed securities or the equivalent thereof within the time described in paragraph 7 above, (i) the plan may, under the terms of the loan agreement, purchase securities, identical to the borrowed securities (or their equivalent as described above) and may apply, the collateral to the payment of the purchase price, any other obligations of the borrower under the agreement, and any expenses associated with the sale and/or purchase, and (ii) the borrower is obligated, under the terms of the loan agreement, to pay, and does pay to the plan the amount of any remaining obligations and expenses not covered by the collateral plus interest at a reasonable rate.

   Notwithstanding the foregoing, the borrower may, in the event the borrower fails to return borrowed securities as described above, replace non-cash collateral with an amount of cash not less than the then current market value of the collateral, provided such replacement is approved by the lending fiduciary.

   If the borrower fails to comply with any condition of this exemption in the course of engaging in a securities lending transaction, the plan fiduciary who caused the plan to engage in such transaction shall not be deemed to have caused the plan to engage in a transaction prohibited by section 406(a)(1)(A) through (D) of the Act solely by reason of the borrower's failure to comply with the conditions of the exemption.

   For purposes of this class exemption the term "affiliate" of another person shall

include:

i. Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such other person;
ii. Any officer, director, or partner, employee or relative (as defined in section 3(15) of the Act) of such other person; and
iii. Any corporation or partnership of which such other person is an officer, director or partner.

For purposes of this definition the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

Prohibited Transaction Class Exemption 81-8

Short-term Investments & Repurchase Agreements

January 23, 1981 (46 FR 7511)

[Amended on April 9, 1985 (50 FR 14043)]

Recap
Employee benefit plans: Short-term investments. Employee benefit plans are permitted to engage in transactions involving certain short-term investments, notwithstanding the prohibited transaction provisions of ERISA. The class exemption allows four types of short-term investments: banker's acceptances, commercial paper, repurchase agreements, and certificates of deposit.

Class Exemption Covering Certain Short-Term Investments

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This exemption permits employee benefit plans to engage in transactions involving certain short-term investments notwithstanding the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act). The exemption will affect participants and beneficiaries of employee benefit plans, persons who manage the assets of such plans, and other persons who provide services to such plans.

Effective Date: January 1, 1975. (Certain conditions to the availability of the exemption are effective April 23, 1981).

AmendedExemption

Effective January 1, 1975, the restrictions of sections 408(a)(1)(A) (B) and (D) of the Act, and the taxes imposed by reason of section 4975(c)(1)(A), (B) and (D) of the Code shall not apply to an investment of employee benefit plan assets which involves the purchase or other acquisition, holding, sale, exchange or redemption by or on behalf of an employee benefit plan of the following:

I. Banker's Acceptances. A banker's acceptance that is issued by a bank if:

A. The banker's acceptance has a stated maturity date of one year or less from date of issue or has a maturity date of one year or less from the date of purchase on behalf of the plan;
B. Neither the bank nor any affiliate of the bank has discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to those assets;
C. The terms of the transaction are at least as favorable to the plan as those of an arm's length transaction with an unrelated party would be; and,
D. With respect to transactions occurring on or after April 23, 1981 the bank issuing the banker's acceptance is supervised by the United States or a State.

II. Commercial Paper. Commercial paper if:

A. It is not issued by an employer any of whose employees are covered by the plan or by an affiliate of such employer;
B. It has a stated maturity date of nine months or less from the date of issue, exclusive of days of grace, or is a renewal of an issue of commercial paper the maturity of which is likewise limited;
C. Neither the issuer of the commercial paper, any guarantor of the commercial paper, nor an affiliate of such issuer or guarantor, has discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to those assets;
D. With respect to an acquisition or holding of commercial paper (including an acquisition by exchange) occurring on or after April 23, 1981, at the time it is acquired, the commercial paper is ranked in one of the three highest rating categories by at least one nationally recognized statistical rating services.

III. Repurchase Agreement.

A repurchase agreement (or securities or other instruments under cover of a repurchase agreement) in which the seller of the underlying securities or other instruments is a bank which is supervised by the United States or a State; a broker-dealer registered under the Securities Exchange Act of 1934; or a dealer who makes primary markets in securities of the United States government or any agency thereof or in bankers acceptances and reports daily to the Federal Reserve Bank of New York its position with respect to these obligations, if each of the following conditions are satisfied.

A. The repurchase agreement is embodied in, or is entered into pursuant to a written agreement the terms of which are at least as favorable to the plan as an arm's length transaction with an unrelated party would be. For transactions occurring before April 23, 1981 a written confirmation of a repurchase agreement whose terms were at least as favorable to the plan as an arm's length transaction with an unrelated party would have been will be deemed to satisfy this condition.
B. The plan receives interest at a rate no less than that which it would receive in a comparable transaction with an unrelated party.
C. The repurchase agreement has a duration of one year or less.
D. The plan receives securities, banker's acceptances, commercial paper, or certificates of deposit having a market value equal to not less than 100 percent of the purchase price paid by the plan.
E. Upon expiration of the repurchase agreement and return of the securities or other instruments to the bank, broker-dealer or dealer (seller), the seller transfers to the plan an amount equal to the purchase price plus the appropriate interest.
F. Neither the seller nor an affiliate of the seller has discretionary authority or control with respect to the investment of the plan assets involved in the transaction or render investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to those assets.
G. The securities, banker's acceptances, commercial paper or certificates of deposit received by the plan:

    1. Could be acquired directly by the plan in a transaction not covered by this section III without violating sections 406(a)(1)(E), 406(a)(2) or 407(a) of the Act; and,
    2. If the securities are subject to the provisions of the Securities Act of 1933, they are obligations that are not "restricted securities" within the meaning of Rule 144 under that act.

H. With respect to transactions occurring on or after April 23, 1981:

    1. If the market value of the underlying securities or other instruments falls below the purchase price at any time during the term of the agreement, the plan may, under the written agreement required by paragraph A of this section, require the seller to deliver, by the close of business on the following business day, additional securities or other instruments the market value of which, together with the market value of securities previously delivered or sold to the plan under the repurchase agreement, equals at least 100 percent of the purchase price paid by the plan;
    2. If the seller does not deliver additional securities or other instruments as required above, the plan may terminate the agreement, and, if upon termination or expiration of the agreement, the amount owing is not paid to the plan, the plan may sell the securities or other instruments and apply the proceeds against the obligations of the seller under the agreement, and against any expenses associated with the sale; and,
    3. The seller agrees to furnish the plan with the most recent available audited statement of its financial condition as well as its most recent available unaudited statement, agrees to furnish additional audited and unaudited statements of its financial condition as they are issued and either:

A. Agrees that each repurchase agreement transaction pursuant to the agreement shall constitute a representation by the seller that there has been no material adverse change in its financial condition since the date of the last statement furnished that has not been disclosed to the plan fiduciary with whom such written agreement is made; or
B. Prior to each repurchase agreement transaction, the seller represents that, as of the time the transaction is negotiated, there has been no material adverse change in its financial condition since the date of the last statement furnished that has not been disclosed to the plan fiduciary with whom such written agreement is made.

4. In the event of termination and sale as described in (2) above, the seller pays to the plan the amount of any remaining obligations and expenses not covered by the sale of the securities or other instruments, plus interest at a reasonable rate.

If a seller involved in a repurchase agreement covered by this exemption fails to comply with any condition of this exemption in the course of engaging in the repurchase agreement, the plan fiduciary who caused the plan to engage in such repurchase agreement shall not be deemed to have caused the plan to engage in a transaction prohibited by section 406(a)(1)(A) through (D) of the Act solely by reason of the seller's failure to comply with the conditions of the exemption.

IV. Certificates of Deposit.

A certificate of deposit that is issued by a bank which is supervised by the United States or a State if neither the bank nor any affiliate of the bank has discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to those assets.

For purposes of this exemption the term affiliate is defined in 29 C.F.R. 2510.3-21(e).

V. Securities of Banks.

A security issued by a bank or an affiliate of the bank if:

A. The bank is supervised by the United States or a State;
B. The bank is a party in interest or disqualified person with respect to the plan solely by reason of the furnishing of checking account or related services to the plan
C. The terms of the transaction are at least as favorable to the plan as those of an arm's-length transaction with an unrelated party would be; and
D. The investment is not part of an arrangement under which the bank causes a transaction to be made with or for the benefit of a party in interest or disqualified person.

Prohibited Transaction Class Exemption 82-63

Securities Lending Compensation

April 6, 1982 (47 FR 14804)

Recap
Payment of compensation to a fiduciary for securities lending services. This class exemption allows certain compensation arrangements to be made for the provision by a fiduciary of securities lending services to an employee benefit plan, if the conditions specified in the exemption are met.
See Also:
PTE 81-6 permits plans to engage in securities lending with banks, broker-dealers, and government securities dealers.

Class Exemption to Permit Payment of Compensation to Plan Fiduciaries

for the Provision of Securities Lending Services

Agency: Office of Pension and Welfare Benefit Programs, Labor.

Action: Grant of class exemption.

Summary: This exemption will allow certain compensation arrangements to be made for the provision by a fiduciary of securities lending services to an employee benefit plan, if the conditions specified in the exemption are met. The exemption affects participants and beneficiaries of employee benefit plans and fiduciaries who provide securities lending services to such plans. In the absence of this exemption, certain compensation arrangements for the provision of securities lending services by a plan fiduciary to an employee benefit plan would be subject to the prohibitions of section 406(b)(1) of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1)(E) of the Code.

Effective Date: April 6, 1982.

The Explanatory Preamble, together with the full Exemption, are available in the PREAMBLE document.

Exemption

I. Transactions

Effective April 6, 1982, the restrictions of section 406(b)(1) of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1)(E) of the Code shall not apply to the payment to a fiduciary (the "lending fiduciary") of compensation for services rendered in connection with loans of plan assets that are securities, provided that:

a. The loan of securities is not prohibited by section 406(a) of the Act;
b. The lending fiduciary is authorized to engage in securities lending transactions on behalf of the plan;
c. The compensation is reasonable and is paid in accordance with the terms of a written instrument, which may be in the form of a master agreement covering a series of securities lending transactions;
d. Except as otherwise provided in paragraph (f), the arrangement under which the compensation is paid (1) is subject to the prior written authorization of a plan fiduciary (the "authorizing fiduciary"), who is (other than in the case of a plan covering only employees of the lending fiduciary or affiliates of such fiduciary) independent of the lending fiduciary and of any affiliate thereof, and (2) may be terminated by the authorizing fiduciary within (i) the time negotiated for such notice of termination by the plan and the lending fiduciary, or (ii) five business days, whichever is lesser, in either case without penalty to the plan;
e. No such authorization is made or renewed unless the lending fiduciary shall have furnished the authorizing fiduciary with any reasonably available information which the lending fiduciary reasonably believes to be necessary to determine whether such authorization should be made or renewed, and any other reasonably available information regarding the matter that the authorizing fiduciary may reasonably request; and
f. (Special Rule for Commingled Investment Funds) In the case of a pooled separate account maintained by an insurance company qualified to do business in a state or, a common or collective trust fund maintained by a bank or trust company supervised by a state or federal agency, the requirements of paragraph (d) of this exemption shall not apply: Provided, that -

1. The information described in paragraph (e) (including information with respect to any material change in the arrangement) shall be furnished by the lending fiduciary to the authorizing fiduciary described in paragraph (d) with respect to each plan whose assets are invested in the account or fund, not less than 30 days prior to implementation of the arrangement or material change thereto, and, where requested, upon the reasonable request of the authorizing fiduciary;
2. In the event any such authorizing fiduciary submits a notice in writing to the lending fiduciary objecting to the implementation of, material change in, or continuation of the arrangement, the plan on whose behalf the objection was tendered is given the opportunity to terminate its

investment in the account or fund, without penalty to the plan, within such time as may he necessary to effect such withdrawal in an orderly manner that is equitable to all withdrawing plans and to the nonwithdrawing plans. In the case of a plan that elects to withdraw pursuant to the foregoing, such withdrawal shall be effected prior to the implementation of, or material change in, the arrangement, but an existing arrangement need not be discontinued by reason of a plan electing to withdraw; and

3. In the case of a plan whose assets are proposed to be invested in the account or fund subsequent to the implementation of the compensation arrangement and which has not authorized the arrangement in the manner described in paragraphs (f)(1) and (f)(2), the plan's investment in the account or fund shall be authorized in the manner described in paragraph (d)(1).

Definitions

For purposes of this exemption, the term, "affiliate" of another person means:

1. Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such other person;
2. Any officer, director, partner, employee, relative (as defined in section 3(15) of the Act) of such other person, and
3. Any corporation or partnership of which such other person is an officer, director or partner.

For purposes of this paragraph, the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

Prohibited Transaction Class Exemption 82-87

Residential Mortgage Loans

May 18, 1982 (47 FR 21331)

Recap
Residential Mortgages. ERISA plans are permitted to invest in 1-to-4 family mortgages and mortgage participations, collect origination fees, and use affiliates to service the mortgages, subject to certain limitations and conditions. The PTE covers first and second liens on homes, townhouses, condominiums, cooperative apartments, and "manufactured housing". Rental housing is not covered.

Class Exemption for Transactions Involving

Certain Residential Mortgage Financing Arrangements

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This document contains a final exemption from certain of the prohibited transactions provisions of the Employee Retirement Security Income Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The exemption involves the issuance of commitments for the provision of mortgage financing to purchasers of residential dwelling units, the receipt of a fee in exchange for the issuance of such commitment, the making or purchase of loans or participation interests therein pursuant to such commitments, and the direct making, purchase, sale, exchange or transfer of mortgage loans or participation interests therein by employee benefit plans, if the conditions specified in the exemption are met. The exemption affects participants and beneficiaries of employee benefit plans involved in such transactions, certain employers who contribute to such plans and other persons who engage in the described transactions. In the absence of this exemption, certain purchase and sale transactions between the plan and parties in interest and certain extensions of credit transactions between the plan and other parties in interest would be prohibited by the Act and the Code.

Effective Date: January 1, 1975. [Certain conditions, as specified herein, are applicable effective June 17, 1982.]

Exemption

I. Transactions

Accordingly, the following exemption is hereby granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedure set forth in ERISA Procedure 75-1.

Effective January 1, 1975, the restrictions of section 406(a) of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1954 (Code) by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the following transactions if the conditions set forth in Part II below are met:

A. The issuance of a commitment by one or more employee benefit plans to provide mortgage financing to purchasers of residential dwelling units, either by making or participating in loans directly to purchasers or by purchasing mortgage loans or participation interests in mortgage loans originated by a third party;
B. The receipt by the plan of a fee in exchange for issuing such commitment;
C. The actual making or purchase of a mortgage loan or participation interest therein pursuant to such commitment;
D. The direct making or purchase by one or more employee benefit plans of a mortgage loan or a participation interest therein other than where a commitment has been issued; and
E. The sale, exchange or transfer of a mortgage loan or participation interest therein by an employee benefit plan prior to the maturity date of such instrument whether or not acquired pursuant to this exemption, provided that the ownership interest sold, exchanged or transferred represents the plan's entire interest in such investment.

II. Conditions

A. Effective January 1, 1975, the exemption provided for transactions described in Part I is available only if each of the following conditions, as applicable, is met:

    1. General Conditions

        a. Any mortgage loan to be acquired must be a "recognized mortgage loan" (as defined in Section D of Part III) or a participation interest in such loan for the purchase of a "residential dwelling unit" (as defined in Section E of Part III)
        b. Any mortgage loan must be originated (either directly for the plan or by the origination-purchase process) by an "established mortgage lender" (as defined in Section B of Part III) -

            i. Who qualifies the recipient, and
            ii. As to which neither the plan, nor an employer or group of employers contributing to the plan, nor an employee organization any of whose members are covered by the plan, has the power to exercise a controlling influence over the management or policies of such "established mortgage lender";

        c. The price paid or received by the plan must be at least as favorable to the plan as a similar transaction involving unrelated parties; and
        d. No person who is a developer or a builder involved in the development or construction of the units, or a lender who is associated with the construction financing arrangement for the units, or who, at the time the decision to purchase is made by the plan (whether directly or pursuant to a commitment) is the owner of a mortgage or a participation interest therein which is subsequently sold to the plan, shall have exercised any discretionary authority or control or rendered any investment advice that would make that person a fiduciary with respect to the plan's decision to purchase, or to commit to purchase, a mortgage loan or a participation interest therein or setting the terms thereof.

    2. Specific Conditions Applicable to Commitments. Where the decision by the plan involves a commitment to purchase either a mortgage loan or participation interest therein:

        a. The commitment must be in writing and must be at least as favorable to the plan as a commitment involving unrelated parties and consistent with customary practices

in the residential finance industry; and

b. The commitment must provide for the use of underwriting guidelines and mortgage instruments which will ensure that all mortgage loans originated pursuant to such commitment will result in a "recognized mortgage loan";

3. Specific Conditions Applicable to Participations Where the acquisition by the plan involves a participation interest in a mortgage loan(s) (whether directly or pursuant to a commitment):

   a. the participation agreement governing such transaction must provide that:

      i. The rights and interests evidenced by such participation interest not be subordinated to the rights and interests of other holders of the same participation agreement,
      ii. The majority interest in the participation agreement must be owned by parties independent of and not controlled by the person selling the participation interest and servicing the underlying mortgage(s), and
      iii. In the event of an inability to obtain collections on any mortgage loan(s) underlying the participation agreement, decisions regarding foreclosure options must be directed by persons other than the seller/service; and

   b. Such participation agreement must be in writing and must be at least as favorable to the plan as a participation agreement involving unrelated parties and consistent with customary practices in the residential finance industry.

B. Effective 30 days after date of publication of this notice in the Federal Register the exemption provided for transactions described in Part I is available only if each of the following conditions is satisfied in addition to each of the applicable conditions described in Section A of this Part II:

   1. The decision to purchase or sell the mortgage loan or participation interest therein, or to issue a commitment to do so, must be made on behalf of the plan by a "qualified real estate manager" (as defined in Section C of Part III) as to which neither the plan, nor an employer or group of employers contributing to the plan, nor an employee organization any of whose members are covered by the plan, has the power to exercise a controlling influence over the management or policies of such "qualified real estate manager."
   2. (a) The plan shall maintain for the duration of any loan made pursuant to this exemption records necessary to enable the persons described in paragraph (b) of this subsection to determine whether the conditions of this exemption have been met, except that,

      i. A prohibited transaction will not be deemed to have occurred, if due to circumstances beyond the control of the fiduciaries of the plan, records are lost or destroyed prior to the termination of the loan and,
      ii. No party in interest shall be subject to the civil penalty which may be assessed under section 502(i) of ERISA, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained or are not available for examination as required by sub-paragraph (b) below.

   b. Notwithstanding any provisions of subsection (a)(2) and (b) of section 504 of the Act, the records referred to in sub-paragraph (a) of this paragraph must be unconditionally available at their customary location for examination during normal business hours by: any trustee, investment manager, participant or beneficiary of the plan, or any duly authorized employee or representative of such person or of the Department or the Internal Revenue Service.

III. Definitions.

For purposes of this exemption:

A. References to persons described in this exemption includes their affiliates. An *affiliate* is defined as:

   1. Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such person;

2. Any officer, director, partner, employee or relative (as defined in section 3(15) of the Act) of such person; and
3. Any corporation or partnership of which such person is an officer, director or partner.

B. An "*established mortgage lender*" means an organized business enterprise which has as one of its principal purposes in the normal course of business the origination of loans secured by real estate mortgages or deeds of trust and which has satisfied the qualification requirements of one of the following categories:

1. Approval by the Secretary of the Department of Housing and Urban Development for participation in any mortgage insurance program under the National Housing Act;
2. Approval by the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation as a qualified Seller/Servicer; or
3. A State agency or independent State authority empowered by State law to raise capital to provide financing for residential dwelling units.

C. A "*qualified real estate manager*" means a fiduciary as defined in section 3(21) of the Act who:

1. Is a financial institution or business organization, which in the normal course of business advises institutional investors regarding investments similar to those in which the plan desires to engage and which are described in Part I of this exemption; and
2. Acknowledges in writing to the plan that it will make decisions regarding plan investments in mortgage loans or participation interests therein in its capacity as a fiduciary of such plan.

D. A "*recognized mortgage loan*" is any mortgage loan on a "residential dwelling unit" which, at the time of its origination, was eligible, through an established program, for purchase by the Federal National Mortgage Association, the Government National Mortgage Association or the Federal Home Loan Mortgage Corporation;
E. A "*residential dwelling unit*" or "*unit*" means:

1. Owner occupied non-farm property comprising one to four dwelling units, including detached houses, townhouses, manufactured housing, condominiums, units in a housing cooperative, or a unit in a multi unit subdivision (planned unit development) restricted by recorded documents which limit the use of the unit to residential purposes and provide for maintenance of common facilities; or
2. Certain non-owner occupied units where such unit complies with the uniform underwriting standards required for investor loans to qualify as a "recognized mortgage loan" under this exemption.

Signed at Washington, D.C. this 13th day of May 1982.

Prohibited Transaction Class Exemption 84-14

Qualified Professional Asset Managers (QPAMs)

March 13, 1984 (49 FR 9494)

[Amended on October 10, 1985 (50 FR 41430)]

Summary

Permits various parties who are related to employee benefit plans to engage in transactions involving plan assets if, among other conditions, the assets are managed by "qualified professional asset managers" (QPAMs), who are independent of the parties in interest and meet specified financial standards.

Additional exemptive relief is provided for: (1) employers to furnish limited amounts of goods and services in the ordinary course of business, and (2) leases of office or commercial space between managed funds and QPAMs or contributing employers.

Includes 1985 Amendment which clarified the term "Affiliate".

Class Exemption 84-14

for Plan Asset Transactions Determined by

Independent Qualified Professional Asset Managers

Agency: Department of Labor

Action: Grant of Class Exemption.

Summary: This document contains a final exemption from certain prohibited transactions restrictions of the Employee Retirement Income Security Act of 1974 (ERISA) and from certain taxes imposed by the Internal Revenue Code of 1954 (the Code). The exemption permits various parties who are related to employee benefit plans to engage in transactions involving plan assets if, among other conditions, the assets are managed by persons, defined for purposes of this exemption as "qualified professional asset managers" (QPAMs), which are independent of the parties in interest and which meet specified financial standards. Additional exemptive relief is provided for employers to furnish limited amounts of goods and services in the ordinary course of business. Limited relief is also provided for leases of office or commercial space between managed funds and QPAMs or contributing employers. The exemption will affect participants and beneficiaries of employee benefit plans, the sponsoring employers of such plans, QPAMs and other persons engaging in the described transactions.

Effective Date: December 21, 1982.

The Explanatory Preamble for the **original** PTE 84-14, together with the full Amended Exemption, are available in the PREAMBLE document. The Preamble for the Amendment appears in the PREAMBLE documents, immediately following the Amended Exemption.

Amended Exemption

Part I. *General Exemption*. Effective December 21, 1982, the restrictions of ERISA section 406(a)(1)(A) through (D) and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(I)(A) through (D), shall not apply to a transaction between a party in interest with respect to an employee benefit plan and an investment fund (as defined in section V(b)) in which the plan has an interest, and which is managed by a qualified professional asset manager (QPAM) (as defined in section V(a)), if the following conditions are satisfied:

a. At the time of the transaction (as defined in section V(i)) the party in interest, or its affiliate (as defined in section V(c)), does not have, and during the immediately preceding one year has not exercised, the authority to -

    1. Appoint or terminate the QPAM as a manager of any of the plan's assets or
    2. Negotiate the terms of the management agreement with the QPAM (including renewals or modifications thereof) on behalf of the plan;

b. The transaction is not described in -

    1. Prohibited Transaction Exemption 81-6 (46 FR 7527; January 23, 1981) (relating to securities lending arrangements),
    2. Prohibited Transaction Exemption 83-1 (28 FR 895; January 7, 1983) (relating to acquisitions by plans of interests in mortgage pools), or
    3. Prohibited Transaction Exemption 82-87 (47 FR 21331; May 18,1982) (relating to certain mortgage financing arrangements);

c. The terms of the transaction are negotiated on behalf of the investment fund by, or under the authority and general direction of, the QPAM, and either the QPAM, or (so long as the QPAM retains full fiduciary responsibility with respect to the transaction) a property manager acting in accordance with written guidelines established and administered by the QPAM, makes the decision on behalf of the investment fund to enter into the transaction, provided that the transaction is not part of an agreement, arrangement or understanding designed to benefit a party in interest;
d. The party in interest dealing with the investment fund is neither the QPAM nor a person related to the QPAM (within the meaning of section V(h));
e. The transaction is not entered into with a party in interest with respect to any plan whose assets

managed by the QPAM, when combined with the assets of other plans established or maintained by the same employer (or affiliate thereof described in section V(c)(1) of this exemption) or by the same employee organization, and managed by the QPAM, represent more than 20 percent of the total client assets managed by the QPAM at the time of the transaction;

f. At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the QPAM, the terms of the transaction are at least as favorable to the investment fund as the terms generally available in arm's length transactions between unrelated parties;
g. Neither the QPAM nor any affiliate thereof (as defined in section V(d)), nor any owner, direct or indirect, of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving the larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or any other crime described in section 411 of ERISA. For purposes of this section (g), a person shall be deemed to have been "convicted" from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

Part II. *Specific Exemptions for Employers*. Effective December 21, 1982, the restrictions of sections 406(a), 406(b)(1) and 407(a) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code, by reason of Code section 4975(e)(1)(A) through (E), shall not apply to:

a. The sale, leasing, or servicing of goods (as defined in section V(j)), or to the furnishing of services, to an investment fund managed by a QPAM by a party in interest with respect to a plan having an interest in the fund, if -

    1. The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in section V(c),
    2. The transaction is necessary for the administration or management of the investment fund,
    3. The transaction takes place in the ordinary course of a business engaged in by the party in interest with the general public,
    4. Effective for taxable years of the party in interest furnishing goods and services after the date this exemption is granted, the amount attributable in any taxable year of the party in interest to transactions engaged in with an investment fund pursuant to section II(a) of this exemption does not exceed one (1) percent of the gross receipts derived from all sources for the prior taxable year of the party in interest, and
    5. The requirements of sections I(c) through (g) are satisfied with respect to the transaction;

b. The leasing of office or commercial space by an investment fund managed by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if -

    1. The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in section V(c),
    2. No commission or other fee is paid by the investment fund to the QPAM or to the employer, or to an affiliate of the QPAM or employer (as defined in section V(c)), in connection with the transaction,
    3. Any unit of space leased to the party in interest by the investment fund is suitable (or adaptable without excessive cost) for use by different tenants,
    4. The amount of space covered by the lease does not exceed fifteen (15) percent of the rentable space of the office building, integrated office park, or of the commercial center (if the lease does not pertain to office space),
    5. In the case of a plan that is not an eligible individual account plan (as defined in section 407(d)(3) of ERISA), immediately after the transaction is entered into, the aggregate fair market value of employer real property and employer securities held by investment funds of the QPAM in which the plan has an interest does not exceed 10 percent of the fair market value of the assets of the plan held in those investment funds. In determining the aggregate fair market value of employer real property and employer securities as described herein, a plan shall be considered to own the same proportionate undivided interest in each asset of the investment fund or funds as its

proportionate interest in the total assets of the investment fund(s). For purposes of this requirement, the term "employer real property" means real property leased to, and the term "employer securities" means securities issued by, an employer any of whose employees are covered by the plan or a party in interest of the plan by reason of a relationship to the employer described in subparagraphs (E) or (G) of ERISA section 3(14), and

6. The requirements of sections I(c) through (g) are satisfied with respect to the transaction.

Part III. *Specific Lease Exemption for QPAMs*. Effective December 21, 1982, the restrictions of section 406(a)(1)(A) through (D) and 406(b)(1) and (2) of ERISA and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the leasing of office or commercial space by an investment fund managed by a QPAM to the QPAM, a person who is a party in interest of a plan by virtue of a relationship to such QPAM described in subparagraphs (G), (H), or (I) of ERISA section 3(14) or a person not eligible for the General Exemption of Part I by reason of section I(a), if -

a. The amount of space covered by the lease does not exceed the greater of 7500 square feet or one (1) percent of the rentable space of the office building, integrated office park or of the commercial center in which the investment fund has the investment,
b. The unit of space subject to the lease is suitable (or adaptable without excessive cost) for use by different tenants,
c. At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the QPAM, the terms of the transaction are not more favorable to the lessee than the terms generally available in arm's length transactions between unrelated parties, and
d. No commission or other fee is paid by the investment fund to the QPAM, any person possessing the disqualifying, powers described in section I(a), or any affiliate of such persons (as defined in section V(c)), in connection with the transaction.

Part IV. *Transactions Involving Places of Public Accommodation*. Effective December 21, 1982, the restrictions of section 406(a)(1)(A) through (D) and 406(b)(1) and (2) of ERISA and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the furnishing of services and facilities (and goods incidental thereto) by a place of public accommodation owned by an investment fund managed by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if the services and facilities (and incidental goods) are furnished on a comparable basis to the general public.

Part V. *Definitions and General Rules.* For the purposes of this exemption:

a. The term "qualified professional asset manager" or "QPAM" means -

    1. A bank, as described in section 202(a)(2) of the Investment Advisers Act of 1940 that has the power to manage, acquire or dispose of assets of a plan, which bank has, as of the last day of its most recent fiscal year, equity capital (as defined in section V(k)) in excess of $1,000,000, or
    2. A savings and loan association, the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, that has made application for and been granted trust powers to manage, acquire or dispose of assets of a plan by a State or Federal authority having supervision over savings and loan associations, which savings and loan association has, as of the last day of its most recent fiscal year, equity capital (as defined in section V(k)) or net worth (as defined in section V(l)) in excess of $1,000,000, or
    3. An insurance company which is qualified under the laws of more than one State to manage, acquire, or dispose of any assets of a plan, which company has, as of the last day of its most recent fiscal year, net worth (as defined in section V(l)) in excess of $1,000,000 and which is subject to supervision and examination by a State authority having supervision over insurance companies, or
    4. An investment adviser registered under the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, total client assets under its management and control in excess of $50,000,000, and either (A) shareholders' or partners' equity (as defined in section V(m)) in excess of $750,000, or (B) payment of all of its liabilities including any liabilities that may arise by reason of a breach or violation of a duty described in sections 404 or 406 of ERISA is unconditionally guaranteed by -

        i. A person with a relationship to such investment adviser described in section V(c)(I) if the investment adviser and such affiliate have, as of the last day of their most recent fiscal year, shareholders' or partners' equity, in the aggregate, in excess of

$750,000, or
ii. A person described in (a)(1), (a)(2) or (a)(3) of section V above, or
iii. A broker-dealer registered under the Securities Exchange Act of 1934 that has, as of the last day of its most recent fiscal year, net worth in excess of $750,000;

Provided that such bank, savings and loan association, insurance company or investment adviser has acknowledged in a written management agreement that it is a fiduciary with respect to each plan that has retained the QPAM.

b. An "investment fund" includes single customer and pooled separate accounts maintained by an insurance company, individual trusts and common, collective or group trusts maintained by a bank, and any other account or fund to the extent that the disposition of its assets (whether or not in the custody of the QPAM) is subject to the discretionary authority of the QPAM.
c. For purposes of section I(a) and Part II, and "affiliate" of a person means -

1. Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person,
2. Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, 5 percent or more partner, or employee (but only if the employer of such employee is the plan sponsor), and
3. Any director of the person or any employee of the person who is a highly compensated employee, as defined in section 4975(e)(2)(H) of the Code, or who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets. A named fiduciary (within the meaning of section 402(a)(2) of ERISA) of a plan and an employer any of whose employees are covered by the plan will also be considered affiliates with respect to each other for purposes of section I(a) if such employer or an affiliate of such employer has the authority, alone or shared with others, to appoint or terminate the named fiduciary or otherwise negotiate the terms of the named fiduciary's employment agreement.

d. For purposes of section I(g) an "affiliate" of a person means -

1. Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person,
2. Any director of, relative of, or partner in, any such person,
3. Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and
4. Any employee or officer of the person who -

A. Is a highly compensated employee (as defined in section 4975(e)(2)(H) of the Code) or officer (earning 10 percent or more of the yearly wages of such person), or
B. Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.

e. The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.
f. The term "party in interest" means a person described in ERISA section 3(14) and includes a "disqualified person," as defined in Code section 4975(e)(2).
g. The term "relative" means a relative as that term is defined in ERISA section 3(15), or a brother, a sister, or a spouse of a brother or sister.
h. A QPAM is "related" to a party in interest for purposes of section I(d) of this exemption if the party in interest (or a person controlling, or controlled by, the party in interest) owns a five percent or more interest in the QPAM or if the QPAM (or a person controlling, or controlled by, the QPAM) owns a five percent or more interest in the party in interest. For purposes of this definition:

1. The term "interest" means with respect to ownership of an entity -

A. The combined voting power of all classes of stock entitled to vote or the total value of the shares of all classes of stock of the entity if the entity is a corporation,
B. The capital interest or the profits interest of the entity if the entity is a partnership, or
C. The beneficial interest of the entity if the entity is a trust or unincorporated enterprise; and

2. A person is considered to own an interest held in any capacity if the person has or shares the authority -

   A. To exercise any voting rights or to direct some other person to exercise the voting rights relating to such interest, or
   B. To dispose or to direct the disposition of such interest.

i. The time as of which any transaction occurs is the date upon which the transaction is entered into. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into on or after December 21, 1982, or a renewal that requires the consent of the QPAM occurs on or after December 21, 1982 and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, the requirements will continue to be satisfied thereafter with respect to the transaction. Notwithstanding the foregoing, this exemption shall cease to apply to a transaction exempt by virtue of Part I or Part II at such time as the percentage requirement contained in section I(e) is exceeded, unless no portion of such excess results from an increase in the assets transferred for discretionary management to a QPAM. For this purpose, assets transferred do not include the reinvestment of earnings attributable to those plan assets already under the discretionary management of the QPAM. Nothing in this paragraph shall be construed as exempting a transaction entered into by an investment fund which becomes a transaction described in section 406 of ERISA or section 4975 of the Code while the transaction is continuing, unless the conditions of this exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption.
j. The term "goods" includes all things which are movable or which are fixtures used by an investment fund but does not include securities, commodities, commodities futures, money, documents, instruments, accounts, chattel paper, contract rights and any other property, tangible or intangible, which, under the relevant facts and circumstances, is held primarily for investment.
k. For purposes of section V(a)(1) and (2), the term "equity capital" means stock (common and preferred), surplus, undivided profits, contingency reserves and o her capital reserves.
l. For purposes of section V(a)(3), the term "net worth" means capital, paid-in and contributed surplus, unassigned surplus, contingency reserves, group contingency reserves, and special reserves.
m. For purposes of section V(a)(4), the term "shareholders' or partners' equity" means the equity shown in the most recent balance sheet prepared within the two years immediately preceding a transaction undertaken pursuant to this exemption, in accordance with generally accepted accounting principles.

Prohibited Transaction Class Exemption 86-128

Securities Transactions Involving Employee Benefit Plans and Broker-Dealers

November 18, 1986 (51 FR 41686)

Replaces Temporary PTE 79-9, March 23, 1979 (44 FR 17819)

Recap
Securities Transactions with Brokers. Permits use of affiliated brokerage services under certain conditions. Also covers collective investment fund transactions.

Class Exemption Covering Securities Transactions with Brokers

Explanatory Preamble to PTE 86-128 (Excerpt)

Agency: Department of Labor.

Action: Grant of class exemption.

Summary: This document contains an exemption which allows persons who serve as fiduciaries for employee benefit plans to effect or execute securities transactions under certain circumstances. The exemption also allows sponsors of pooled separate accounts and other pooled investment funds to use their affiliates to effect or execute securities transactions for such accounts when certain conditions are met. The exemption will replace Prohibited Transaction Exemption 79-1 and Prohibited Transaction Exemption 84-46. It affects

participants and beneficiaries of, and fiduciaries with respect to, employee benefit plans which invest in securities, and other persons who engage in the described transactions.

Effective Date: The later of December 18, 1986, or the date on which the Office of Management and Budget approves the information collection requests contained in this exemption under the Paperwork Reduction Act of 1980.

Exemption

In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code, and based upon the entire record including the written comments submitted in response to the notice of January 24, 1985, the Department makes the following determinations:

a. The class exemption set forth herein is administratively feasible;
b. It is in the interests of plans and of their participants and beneficiaries; and
c. It is protective of the rights of participants and beneficiaries of plans.

Accordingly, the following exemption is hereby granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1.

Section I

Definitions and Special Rules

The following definitions and special rules apply to this exemption:

a. The term "person" includes the person and affiliates of the person.
b. An "affiliate" of a person includes the following:

    1. Any person directly or indirectly controlling, controlled by, or under common control with, the person
    2. Any officer, director, partner, employee, relative (as defined in section 3(15) of ERISA), brother, sister, or spouse of a brother or sister, of the person;
    3. Any corporation or partnership of which the person is an officer, director or partner.

A person is not an affiliate of another person solely because one of them has investment discretion over the other's assets. The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

c. An "agency cross transaction" is a securities transaction in which the same person acts as agent for both any seller and any buyer for the purchase or sale of a security.
d. The term "covered transaction" means an action described in section II(a), (b) or (c) of this exemption.
e. The term "effecting or executing a securities transaction" means the execution of a securities transaction as agent for another person and/or the performance of clearance, settlement, custodial or other functions ancillary thereto.
f. A plan fiduciary is independent of a person only if the fiduciary has no relationship to or interest in such person that might affect the exercise of such fiduciary's best judgment as a fiduciary.
g. The term "profit" includes all charges relating to effecting or executing securities transactions, less reasonable and necessary expenses including reasonable indirect expenses (such as overhead costs) properly allocated to the performance of these transactions under generally accepted accounting principles.
h. The term "securities transaction" means the purchase or sale of securities.
i. The term "nondiscretionary trustee" of a plan means a trustee or custodian whose powers and duties with respect to any assets of the plan are limited to -

    1. The provision of nondiscretionary trust services to the plan, and
    2. Duties imposed on the trustee by any provision or provisions of the Act or the Code.

The term "nondiscretionary trust services" means custodial services and services ancillary to custodial services, none of which services are discretionary. For purposes of this exemption, a person does not fail to be a nondiscretionary trustee solely by reason of having been delegated, by the sponsor of a master or prototype plan, the power to amend such plan.

Section II

Covered transactions

Effective the later of December 18, 1986, or the date on which the Office of Management and Budget approves the information collection requests contained in this exemption under the Paperwork Reduction Act of 1980, if each condition of section III of this exemption is either satisfied or not applicable under section IV, the restrictions of section 406(b) of ERISA and the taxes imposed by sections 4975(a) and (b) of the Code by reason of section 4975(c)(1)(E) or (F) of the Code shall not apply to

a. A plan fiduciary's using its authority to cause a plan to pay a fee for effecting or executing securities transactions to that person as agent for the plan, but only to the extent that such transactions are not excessive, under the circumstances, in either amount or frequency;
b. A plan fiduciary's acting as the agent in an agency cross transaction for both the plan and one or more other parties to the transaction; or
c. The receipt by a plan fiduciary of reasonable compensation for effecting or executing an agency cross transaction to which a plan is a party from one or more other parties to the transaction.

Section III

Conditions

Except to the extent otherwise provided in section IV of this exemption, section II of this exemption applies only if the following conditions are satisfied:

a. The person engaging in the covered transaction is not a trustee (other than a nondiscretionary trustee) or an administrator of the plan, or an employer any of whose employees are covered by the plan.
b. The covered transaction is performed under a written authorization executed in advance by a fiduciary of each plan whose assets are involved in the transaction, which plan fiduciary is independent of the person engaging in the covered transaction.
c. The authorization referred to in paragraph (b) of this section is terminable at will by the plan, without penalty to the plan, upon receipt by the authorized person of written notice of termination. A form expressly providing an election to terminate the authorization described in paragraph (b) of this section with instructions on the use of the form must be supplied to the authorizing fiduciary no less than annually. The instructions for such form must include the following information:

    1. The authorization is terminable at will by the plan, without penalty to the plan, upon receipt by the authorized person of written notice from the authorizing fiduciary or other plan official having authority to terminate the authorization; and
    2. Failure to return the form will result in the continued authorization of the authorized person to engage in the covered transactions on behalf of the plan.

d. Within three months before an authorization is made, the authorizing fiduciary is furnished with any reasonably available information that the person seeking authorization reasonably believes to be necessary for the authorizing fiduciary to determine whether the authorization should be made, including (but not limited to) a copy of this exemption, the form for termination of authorization described in section III(c), a description of the person's brokerage placement practices, and any other reasonably available information regarding the matter that the authorizing fiduciary requests.
e. The person engaging in a covered transaction furnishes the authorizing fiduciary with either:

    1. A confirmation slip for each securities transaction underlying a covered transaction within ten business days of the securities transaction containing the information described in Rule 10b-10(a)(1-7) under Securities Exchange Act of 1934, 17 C.F.R. 240.10b-10; or
    2. At least once every three months and not later than 45 days following the period to which it relates, a report disclosing:

        A. A compilation of the information that would be provided to the plan pursuant to subparagraph (e)(1) of this section during the three-month period covered by the report;
        B. The total of all securities transaction-related charges incurred by the plan during such period in connection with such covered transactions; and
        C. The amount of the securities transaction-related charges retained by such person and the amount of such charges paid to other persons for execution or other services.

For purposes of this paragraph (e), the words "incurred by the plan" shall be construed to mean "incurred by the pooled fund" when such person engages in covered transactions on behalf of a pooled fund in which the plan participates.

f. The authorizing fiduciary is furnished with a summary of the information required under paragraph (e)(1) of this section at least once per year. The summary must be furnished within 45 days after the end of the period to which it relates, and must contain the following:

1. The total of all securities transaction-related charges incurred by the plan during the period in connection with covered securities transactions.
2. The amount of the securities transaction-related charges retained by the authorized person and the amount of these charges paid to other persons for execution or other services.
3. A description of the person's brokerage placement practices, if such practices have materially changed during the period covered by the summary.
4. (i)A portfolio turnover ratio, calculated in a manner which is reasonably designed to provide the authorizing fiduciary with the information needed to assist in discharging its duty of prudence. The requirements of this paragraph (f)(4)(i) will be met if the "annualized portfolio turnover ratio", calculated in the manner described in paragraph (f)(4)(ii), is contained in the summary.

    i. The "annualized portfolio turnover ratio" shall be calculated as a percentage of the plan assets consisting of securities or cash over which the authorized person had discretionary investment authority, or with respect to which such person rendered, or had any responsibility to render, investment advice (the "portfolio") at any time or times ("management period(s)") during the period covered by the report. First, the "portfolio turnover ratio" (not annualized) is obtained by dividing (A) the lesser of the aggregate dollar amounts of purchases or sales of portfolio securities during the management period(s) by (B) the monthly average of the market value of the portfolio securities during all management period(s). Such monthly average is calculated by totaling the market values of the portfolio securities as of the beginning and end of each management period and as of the end of each month that ends within such period(s), and dividing the sum by the number of valuation dates so used. For purposes of this calculation, all debt securities whose maturities at the time of acquisition were one year or less are excluded from both the numerator and the denominator.

       The "annualized portfolio turnover ratio" is then derived by multiplying the "portfolio turnover ratio" by an annualizing factor. The annualizing factor is obtained by dividing (C) the number twelve by (D) the aggregate duration of the management period(s) expressed in months (and fractions thereof).

       Examples of the use of this formula are provided in section V of this exemption.

    ii. The information described in this paragraph (f)(4) is not required to be furnished in any case where the authorized person has not exercised discretionary authority over trading in the plan's account during the period covered by the report.

       For purposes of this paragraph (f), the words "incurred by the plan" shall be construed to mean "incurred by the pooled fund" when such person engages in covered transactions on behalf of a pooled fund in which the plan participates.

g. If an agency cross transaction to which section IV(b) does not apply is involved, the following conditions must also be satisfied:

1. The information required under section III(d) or IV(d)(1)(B) of this exemption includes a statement to the effect that with respect to agency cross transactions the person effecting or executing the transactions will have a potentially conflicting division of loyalties and responsibilities regarding the parties to the transactions;
2. The summary required under section III(f) of this exemption includes a statement identifying the total number of agency cross transactions during the period covered by the summary and the total amount of all commissions or other remuneration received or to be received from all sources by the person engaging in the transactions in connection with those transactions during

the period;

3. The person effecting or executing the agency cross transaction has the discretionary authority to act on behalf of, and/or provide investment advice to, either (A) one or more sellers or (B) one or more buyers with respect to the transaction, but not both.
4. The agency cross transaction is a purchase or sale, for no consideration other than cash payment against prompt delivery of a security for which market quotations are readily available; and
5. The agency cross transaction is executed or effected at a price that is at or between the independent bid and independent ask prices for the security prevailing at the time of the transaction.

Section IV

Exceptions from conditions

a. Certain plans not covering employees. Section III of this exemption does not apply to covered transactions to the extent they are engaged in on behalf of individual retirement accounts meeting the conditions of 29 C.F.R. 2510.3-2(d), or plans, other than training programs, that cover no employees within the meaning of 29 C.F.R. 2510.3-3.
b. Certain agency cross transactions. Section III of this exemption does not apply in the case of an agency cross transaction, provided that the person effecting or executing the transaction

    1. Does not render investment advice to any plan for a fee within the meaning of section 3(21)(A)(ii) of ERISA with respect to the transaction;
    2. Is not otherwise a fiduciary who has investment discretion with respect to any plan assets involved in the transaction, see 29 C.F.R. 2510.3-21(d); and
    3. Does not have the authority to engage, retain or discharge any person who is or is proposed to be a fiduciary regarding any such plan assets.

c. Recapture of profits. Section III(a) of this exemption does not apply in any case where the person engaging in a covered transaction returns or credits to the plan all profits earned by that person in connection with the securities transactions associated with the covered transaction.
d. Special rules for pooled funds. In the case of a person engaging in a covered transaction on behalf of an account or fund for the collective investment of the assets of more than one plan (pooled fund):

    1. Sections III(b), (c) and (d) of this exemption do not apply if -

        A. The arrangement under which the covered transaction is performed is subject to the prior and continuing authorization, in the manner described in this paragraph (d)(1), of a plan fiduciary with respect to each plan whose assets are invested in the pooled fund who is independent of the person. The requirement that the authorizing fiduciary be independent of the person shall not apply in the case of a plan covering only employees of the person, if the requirements of section IV(d)(2)(A) and (B) are met.
        B. The authorizing fiduciary is furnished with any reasonably available information that the person engaging or proposing to engage in the covered transactions reasonably believes to be necessary to determine whether the authorization should be given or continued, not less than 30 days prior to implementation of the arrangement or material change thereto, including (but not limited to) a description of the person's brokerage placement practices, and, where requested, any reasonably available information regarding the matter upon the reasonable request of the authorizing fiduciary at any time.
        C. In the event an authorizing fiduciary submits a notice in writing to the person engaging in or proposing to engage in the covered transaction objecting to the implementation of, material change in, or continuation of, the arrangement, the plan on whose behalf the objection was tendered is given the opportunity to terminate its investment in the pooled fund, without penalty to the plan, within such time as may be necessary to effect the withdrawal in an orderly manner that is equitable to all withdrawing plans and to the nonwithdrawing plans. In the case of a plan that elects to withdraw under this subparagraph (d)(1)(C), the withdrawal shall be effected prior to the implementation of, or material change in, the arrangement; but an existing arrangement need not be discontinued by reason of a plan electing to withdraw.

D. In the case of a plan whose assets are proposed to be invested in the pooled fund subsequent to the implementation of the arrangement and that has not authorized the arrangement in the manner described in subparagraphs (d)(1)(B) and (C) of this section, the plan's investment in the pooled fund is subject to the prior written authorization of an authorizing fiduciary who satisfies the requirements of subparagraph (d)(1)(A).

2. Section III(a) of this exemption, to the extent that it prohibits the person from being the employer of employees covered by a plan investing in a pool managed by the person does not apply if -

   A. The person is an "investment manager" as defined in section 3(38) of ERISA, and
   B. Either (i) the person returns or credits to the pooled fund all profits earned by the person in connection with all covered transactions engaged in by the person on behalf of the fund, or (ii) the pooled fund satisfies the requirements of paragraph IV(d)(3).

3. A pooled fund satisfies the requirements of this paragraph for a fiscal year of the fund if -

   A. On the first day of such fiscal year, and immediately following each acquisition of an interest in the pooled fund during the fiscal year by any plan covering employees of the person, the aggregate fair market value of the interests in such fund of all plans covering employees of the person does not exceed twenty percent of the fair market value of the total assets of the fund; and
   B. The aggregate brokerage commissions received by the person, in connection with covered transactions engaged in by the person on behalf of all pooled funds in which a plan covering employees of the person participates, do not exceed five percent of the total brokerage commissions received by the person from all sources in such fiscal year.

Section V

Examples illustrating the use of the annualized portfolio turnover ratio described in Section III(F)(4)(ii)

(Note: This section containing examples has been omitted.)

Section VI

Effective dates and Transitional Rule

a. This exemption will be effective on the later of December 18, 1986, or the date on which the Office of Management and Budget approves the information collection requests contained in this exemption under the Paperwork Reduction Act of 1980.
b. PTE 79-1 and PTE 84-46 are revoked effective April 1, 1987.

Prohibited Transaction Class Exemption 91-38

Bank Collective Investment Funds

July 12, 1991 (56 FR 31966)

Summary
Replaces PTE 80-51. Permits investment in collective investment funds operated by bank fiduciaries, subject to certain limitations and conditions. 5% limitations of PTE 80-51 replaced by 10%.

Class Exemption

Amendment to Prohibited Transaction Exemption (PTE) 80-51

Involving Bank Collective Investment Funds

Agency: Pension and Welfare Benefits Administration, Labor Department.

Internal Revenue Service.

Action: Adoption of amendment to PTE 80-51, and redesignation as PTE 91-38.

Summary: This document amends PTE 80-51, a class exemption that permits Bank Collective Investment Funds, in which employee benefit plans have an interest, to engage in certain transactions, provided specified conditions are met. The amendment affects, among others, participants, beneficiaries and fiduciaries of plans that invest in the collective investment funds, banks, and other persons engaging in the described transactions.

Effective Date: The amendment to section I(a)(1)(A) of PTE 80-51 is effective as of July 1, 1990.

Exemption

For the sake of convenience, the entire text of PTE 80-51, as amended, has been reprinted with this notice. The Department has redesignated the exemption as PTE 91-38.

Section I

Exemption for Certain Transactions Involving Bank Collective Investment Funds

a. Effective January 1, 1975, the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A), (B), (C) or (D) of the Code, shall not apply to the transactions described below if the applicable conditions set forth in section III are met.

    1. Transactions between parties in interest and bank collective investment funds: General. Any transaction between a party in interest with respect to a plan and a collective investment fund that is maintained by a bank and in which the plan has an interest, or any acquisition or holding by the collective investment fund of employer securities or employer real property, if the party in interest is not the bank that maintains the collective investment fund, any other collective fund maintained by the bank or any affiliate of the bank, and if, at the time of the transaction, acquisition or holding, either -

        A. The interest of the plan together with the interests of any other plans maintained by the same employer or employee organization in the collective investment fund does not exceed -

            i. 10 percent of the total of all interests in the collective investment fund, if the transaction occurs prior to October 23, 1980; or
            ii. 5 percent of the total of all assets in the collective investment fund, if the transaction occurs on or after October 23, 1980, and on or before June 30, 1990; or
            iii. 10 percent of the total of all assets in the collective investment fund, if the transaction occurs on or after July 1, 1990; or

        B. The collective investment fund is a specialized fund that has a policy of investing, and invests, substantially all of its assets in short-term obligations (having a stated maturity date of one year or less or having a maturity date of one year or less from the date of acquisition by such specialized fund), including but not necessarily limited to --

            i. Corporate or governmental obligations or related repurchase agreements;
            ii. Certificates of deposit;
            iii. Bankers' acceptances; or
            iv. Variable amount notes of borrowers of prime credit.

    2. Special transactions not meeting the criteria of section I(a)(1)(A) between employers of employees covered by a multiple employer plan and collective investment funds. Any transaction between an employer (or an affiliate of an employer) of employees covered by a multiple employer plan and a collective investment fund maintained by a bank in which the plan has an

interest, or any acquisition or holding by the collective investment fund of employer securities or employer real property, if at the time of the transaction, acquisition or holding --

A. In the case of a transaction occurring prior to October 23, 1980, the employer is not a "substantial employer" with respect to the plan (within the meaning of section 4001(a)(2) of the Act); or
B. In the case of a transaction occurring on or after October 23, 1980:

i. The interest of the multiple employer plan in the collective investment fund does not exceed 10 percent of the total assets in the collective investment fund, and the employer is not a "substantial employer" with respect to the plan (within the meaning of section 4001(a)(2) of the Act); or
ii. The interest of the multiple employer plan in the collective investment fund exceeds 10 percent of the total assets in the collective investment fund, but the employer is not a "substantial employer" with respect to the plan and would not be a "substantial employer" within the meaning of section 4001(a)(2) of the Act if "5 percent" were substituted for "10 percent" in that definition.

3. Acquisition, sale or holding of employer securities and employer real property.

A. Except as provided in subsection (B) of this section (3), any acquisition, sale or holding of employer securities and any acquisition, sale or holding of employer real property by a collective investment fund in which a plan has an interest and which does not meet the requirements of paragraphs (a)(1) and (a)(2) of this section, if no commission is paid to the bank or to the employer or any affiliate of the bank or the employer in connection with the acquisition or sale of employer securities or the acquisition, sale or lease of employer real property; and

i. In the case of employer real property --

(aa) Each parcel of employer real property and the improvements thereon held by the collective investment fund are suitable (or adaptable without excessive cost) for use by different tenants, and

(bb) The property of the collective investment fund that is leased or held for lease to others, in the aggregate, is dispersed geographically.

ii. In the case of employer securities --

(aa) The bank in whose collective investment fund the security is held is not an affiliate of the issuer of the security, and

(bb) If the security is an obligation of the issuer, either

1. The collective investment fund owns the obligation at the time the plan acquires an interest in the collective investment fund, and interests in the collective fund are offered and redeemed in accordance with valuation procedures of the collective investment fund applied on a uniform or consistent basis, or
2. Immediately after acquisition of the obligation: (a) Not more than 25 percent of the aggregate amount of obligations issued in the issue and outstanding at the time of acquisition is held by such plan, and (b) in the case of an obligation that is a restricted security within the meaning of rule 144 under the Securities Act of 1933, at least 50 percent of the aggregate amount of obligations issued in the issue and outstanding at the time of acquisition is held by persons independent of the issuer. The bank, its affiliates and any collective investment fund maintained by the bank shall be considered to be persons independent of the issuer if the bank is not an affiliate of the issuer.

B. In the case of a plan that is not an eligible individual account plan (as defined in section 407(d)(3) of the Act), the exemption provided in subsection (A) of this paragraph (3) shall be available only if, immediately after the acquisition of the securities or real property, the aggregate fair market value of employer securities and employer real property with respect to which the bank has investment discretion does not exceed 10 percent of the fair market value of all the assets of the plan with respect to which the bank has such investment discretion.
C. For the purposes of the exemption contained in subsection (A) of this section (3), the term "employer securities" shall include securities issued by, and the term "employer real property" shall include real property leased to, a person who is a party in interest with respect to a plan (participating in the collective investment fund) by reason of a relationship to the employer described in section 3(14) (E), (G), (H) or (I) of the Act.

b. Effective January 1, 1975, the restrictions of section 406(a)(1) (A), (B), (C) and (D) and section 406(b) (1) and (2) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) (A), (B), (C), (D) or (E) of the Code, shall not apply to the transactions described below, if the conditions of section III are met.

1. Transactions with persons who are parties in interest with respect to the plan solely by virtue of being certain service providers or certain affiliates of service providers. Any transaction between a collective investment fund and a person who is a party in interest with respect to a plan that has an interest in the collective investment fund, if --

   A. The person is a party in interest (including a fiduciary) solely by reason of providing services to the plan, or solely by reason of a relationship to a service provider described in section 3(14) (F), (G), (H) or (I) of the Act, or both and the person neither exercised nor has any discretionary authority, control, responsibility or influence with respect to the investment of plan assets in, or held by, the collective investment fund, and
   B. The person is not an affiliate of the bank maintaining the collective investment fund.

2. Certain leases and goods. The furnishing of goods to a collective investment fund by a party in interest with respect to a plan participating in the collective investment fund, or the leasing of real property owned by the collective investment fund to such party in interest and the incidental furnishing of goods to such party in interest by the collective investment fund, if--

   A. In the case of goods, they are furnished to or by the collective investment fund in connection with real property owned by the collective investment fund;
   B. The party in interest is not the bank maintaining the collective investment fund, or any affiliate of the bank, or any other collective investment fund maintained by the bank; and
   C. The amount involved in the furnishing of goods or leasing of real property in any calendar year (including the amount under any other lease or arrangement for the furnishing of goods in connection with the real property investments of the collective investment fund with the same party in interest or any affiliate thereof) does not exceed the greater of $25,000 or 0.5 percent of the fair market value of the assets of the collective investment fund on the most recent valuation date of the fund prior to the transaction.

3. Management of real property. Any services provided to a collective investment fund in which a plan has an interest by the bank maintaining that fund or by an affiliate of that bank in connection with the management of the real property owned by the collective investment fund, if the compensation paid to the bank or its affiliate does not exceed the cost of the services to the bank or its affiliate.
4. Transactions involving places of public accommodation. The furnishing of services, facilities and any goods incidental to such services and facilities by a place of public accommodation owned by a bank collective investment fund, to a party in interest with respect to a plan, which plan has an interest in the collective investment fund, if the services, facilities and incidental goods are furnished on a comparable basis to the general public.

Section II

Excess Holdings Exemption for Employee Benefit Plans

a. Effective January 1, 1975, the restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A), (B), (C) or (D) of the Code shall not apply to any acquisition or holding of qualifying employer securities or qualifying employer real property (other than through a collective investment fund), if -

   1. The acquisition or holding contravenes the restrictions of sections 406(a)(1)(E), 406(a)(2) and 407(a) of the Act solely by reason of being aggregated with employer securities or employer real property held by a collective investment fund in which the plan has an interest;
   2. The requirements of either paragraph (a)(1) or paragraph (a)(2) of section I of this exemption are met; and
   3. The applicable conditions set forth in section III of this exemption are met.

Section III

General conditions

a. At the time the transaction is entered into, and at the time of any subsequent renewal thereof that requires the consent of the bank, the terms of the transaction are not less favorable to the collective investment fund than the terms generally available in arm's-length transactions between unrelated parties.
b. The bank maintains for a period of six years from the date of the transaction, the records necessary to enable the persons described in paragraph (c) of this section to determine whether the conditions of this exemption have been met, except that -

   1. a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the bank's control, the records are lost or destroyed prior to the end of the six-year period; and
   2. no party in interest other than the bank shall be subject to the civil penalty that may be assessed under 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (c) below.

c. (1)Except as provided in subsection 2 of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (b) of this section are unconditionally available at their customary location for examination during normal business hours by:

   A. Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,
   B. Any fiduciary of a plan who has authority to acquire or dispose of the interests of the plan in the collective investment fund, or any duly authorized employee or representative of such fiduciary.
   C. Any contributing employer to any plan that has an interest in the collective investment fund or any duly authorized employee or representative of such employer.
   D. Any participant or beneficiary of any plan that has an interest in the collective investment fund, or any duly authorized employee or representative of such participant or beneficiary.

   (2) None of the persons described in subparagraphs (B) through (D) of this paragraph shall be authorized to examine a bank's trade secrets or commercial or financial information which is privileged or confidential.

Section IV

Definitions and General Rules

For the purposes of this exemption,

a. An "*affiliate*" of a person includes -

   1. Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person;

2. Any officer, director, employee, relative of, or partner in any such person; and
3. Any corporation or partnership of which such person is an officer, director, partner or employee.

b. The term "*control*" means the power to exercise a controlling influence over the management or policies of a person other than an individual.
c. The term "*party in interest*" includes a "*disqualified person*" as defined in section 4975(e)(2) of the Code.
d. The term "*relative*" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or sister.
e. (1)Except as provided in subparagraph (2) of this paragraph, the term "*collective investment fund*" means a common or collective trust fund or pooled investment fund maintained by a bank or a trust company.

   (2) In the case of a common or collective trust fund or pooled investment fund maintained by a bank or trust company that consists of separate investment accounts, each separate investment account of that fund, rather than the entire fund, shall be considered to be a separate "collective investment fund" for purposes of this exemption.

f. The term "*multiple employer plan*" means an employee benefit plan that satisfies at least the requirements of section 3(37)(A)(i), (ii) and (v) of the Act and section 414(f)(1)(A), (B) and (E) of the Code.
g. The term "*obligation*" means a bond, debenture, note, certificate, or other evidence of indebtedness.
h. The time as of which any transaction, acquisition or holding occurs is the date upon which the transaction is entered into, the acquisition is made or the holding commences. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into, or an acquisition is made, on or after January 1, 1975, or a renewal that requires the consent of the bank occurs on or after January 1, 1975, and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, or at the time the acquisition is made, the requirements will continue to be satisfied thereafter with respect to the transaction or acquisition and the exemption shall apply thereafter to the continued holding of the securities or property so acquired. This exemption also applies to any transaction or acquisition entered into, or holding commencing prior to January 1, 1975, if either the requirements of this exemption would have been satisfied on the date the transaction was entered into or acquisition was made (or on which the holding commenced), or the requirements would have been satisfied on January 1, 1975, if the transaction had been entered into, the acquisition was made, or the holding had commenced, on January 1, 1975. Notwithstanding the foregoing, this exemption shall cease to apply to a holding exempt by virtue of section I(a)(1) at such time as the interest of the plan in the collective investment fund exceeds the percentage interest limitation of section I(a)(1), unless no portion of such excess results from an increase in the assets allocated to the collective investment fund by the plan. For this purpose, assets allocated do not include the reinvestment of fund earnings. Nothing in this paragraph shall be construed as exempting a transaction entered into by a collective investment fund which becomes a transaction described in section 406 of the Act or section 4975 of the Code while the transaction is continuing, unless the conditions of the exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption.
i. Each plan participating in a collective investment fund shall be considered to own the same proportionate undivided interest in each asset of the collective investment fund as its proportionate interest in the total assets of the collective investment fund as calculated on the most recent preceding valuation date of the fund.
j. Where any of the assets of a collective investment fund are invested in another collective investment fund, the interest of the plan in the second fund arising from its investment in the first fund shall be established by multiplying the percentage interest of the plan in the first fund by the percentage interest of the first fund in the second fund, such computation to be continued similarly in the event that further investments are made by the second investment fund in one or more other collective investment funds.

Prohibited Transaction Class Exemption 91-55

American Eagle Gold Coins Permitted as IRA Investment

September 27, 1991 (56 FR 49209)

Summary

Permits IRA accounts to invest in *American Eagle*. Other gold coins and "collectibles" still prohibited as investment vehicles.

Class Exemption

Transactions Between Individual Retirement Accounts

and Authorized Purchasers of American Eagle Coins

Agency: Pension and Welfare Benefits Administration, Labor Department.

Internal Revenue Service.

Action: Grant of class exemption.

Summary: This document contains a final class exemption from certain taxes imposed by the Internal Revenue Code of 1986 (the Code). The exemption permits purchases and sales by certain "individual retirement accounts," as defined in Code section 408 ("IRAs"), of American Eagle bullion coins ("Coins") in principal transactions from or to broker-dealers in Coins which are "authorized purchasers" of Coins in bulk quantities from the United States Mint (the "Mint") and which are also "disqualified persons," within the meaning of Code section 4975(e)(2), with respect to the IRAs. The exemption would also permit the interest-free extension of credit in connection with such purchases and sales. The exemption affects persons with an interest in the investments of IRAs, including IRA depositors and their beneficiaries, as well as persons who provide custodial services to IRAs.

Effective Date: January 1, 1987.

The Explanatory Preamble, together with the full Exemption, are available in the PREAMBLE document.

Exemption

Section I: Definitions and Special Rules

The following definitions apply to this exemption:

a. "*Authorized purchasers*" are banks or other persons referenced in section 408(a)(2) or (h) of the Internal Revenue Code of 1986 (Code) that are approved by the United States Mint (the Mint), for eligibility to purchase the American Eagle U.S. gold or silver bullion coins which are described in section 5112(a) (7), (8), (9), and (10) or section (e) of Title 31 of the United States Code (Coins), directly from the Mint in bulk quantities.
b. The term "*covered transaction*" means a transaction described in section II of this exemption.
c. "*IRA*" means an individual retirement account described in Code section 408 with respect to which the authorized purchaser is a disqualified person.
d. An "*affiliate*" of a person includes the following:
    1. Any person directly or indirectly controlling, controlled by, or under common control with, the person;
    2. Any officer, director, partner, employee, member of the family (as defined in Code section 4975(e)(6)), brother, sister, or spouse of a brother or sister, of the person;
    3. Any corporation or partnership of which the person is an officer, director or partner.

    The term "*control*" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

e. The term "*execution*" means the acceptance of an offer to purchase or sell a Coin in a covered transaction such that both the IRA and the authorized purchaser are legally obligated to complete the transaction as directed.
f. The term "*accredited person*" means any duly authorized employee of the Department of Labor or the Internal Revenue Service or the person directing the investments of an IRA.
g. The term "*independent third party*" excludes the authorized purchaser and any person affiliated

therewith.

Section II. Covered Transactions

Effective January 1, 1987, if each condition of section III of this exemption is satisfied, the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A), (B) or (D) of the Code shall not apply to -

a. The purchase of Coins by an IRA from an authorized purchaser; or
b. The sale by an IRA of Coins to be authorized purchaser;
c. The extension of credit in connection with the settlement of transactions described in (a) or (b).

Section III. Conditions

a. In the case of an IRA with is an employee benefit plan covered by Title I of the Employee Retirement Income Security Act of 1974 (ERISA), the covered transaction is the type of transaction described in section 404(c) of ERISA.
b. The transaction is directed either by the individual for whose benefit the IRA is maintained or by an independent third party appointed by such individual.
c. Neither the authorized purchaser nor any affiliate thereof has any discretionary authority or control respecting the management or disposition of the IRA assets involved in the transaction, or renders investment advice (within the meaning of 26 C.F.R. 54.4975-9(c)) respecting those assets.
d. Each denomination of Coins offered to IRAs pursuant to this exemption is purchased and sold by the authorized purchaser in transactions with unrelated parties in the ordinary course of its business with customers other than IRAs.
e. At the time the transaction is executed, the terms of the transaction must be not less favorable to the IRA than the terms afforded by the disqualified person or any affiliate thereof in comparable Coin transactions involving unrelated parties.
f. Payment for, and delivery of, Coins in settlement of a covered transaction is made simultaneously and in no event more than 10 business days after execution of the transaction involved, and no interest is charged for the period of time between execution and settlement.
g. The disqualified person provides current price quotations to the person directing the investments of the IRA immediately prior to the time a covered transaction is executed so that such person will know the exact price at which the purchase or sale will occur.
h. A separate written confirmation statement is issued with respect to each covered transaction to the person who directs the transaction for the IRA. The confirmation shall disclose the date, quantity, and price of the Coins bought or sold as well as the fact that the disqualified person acted as a principal in the transaction. The confirmation shall be issued in no event more than 10 business days after the execution of the transaction.
i. With regard to transactions entered into subsequent to (enter date 90 days after grant of the final exemption), prior to its engaging in covered transactions the disqualified person prepares and provides to the person directing the investments of the IRA material information regarding transactions in Coins, and furnishes supplemental information to the person directing the investments of IRAs which have invested in Coins if material changes occur. This information must include:

    1. A general description of the manner in which Coins are priced in the market.
    2. Disclosure of any fees for services or special or minimum transaction costs that will be incurred as the result of the purchase or sale of Coins by an IRA.
    3. Any minimum quantity of Coins which must be brought or sold.
    4. Disclosure of the role of the disqualified person as a principal in the transaction.
    5. An explanation that the purchase or sale of Coins between the IRA and the authorized purchaser would be prohibited in the absence of an exemption, a discussion of the arm's-length pricing standard of this exemption and disclosure that records are accessible which would enable the person directing investments of the IRA to determine whether the conditions of this exemption have been met.

j. The disqualified person maintains or causes to be maintained for a period of at least six years from the date of settlement of a covered transaction such records as are necessary to allow accredited persons to determine whether the conditions of the exemption have been met. The records shall include daily information indicating each customer (including each IRA and each other client) with whom a transaction involving Coins was consummated, the price and number of Coins involved, and the date and the time at which the transaction was executed. The persons directing the investments of an IRA are not authorized to examine a disqualified person's trade secrets or financial information which is

privileged or confidential. The records must be reasonably accessible and must be available for examination during normal business hours. Notwithstanding these recordkeeping requirements, a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the disqualified person, such records are lost or destroyed prior to the end of the six year period.

Amendment to Prohibited Transaction Class Exemption 93-33 [*Formerly PTE 93-2*]

Receipt of Services by Individuals for Whose Benefit IRAs or Retirement Plans for Self-Employed Individuals are Established

May 11, 1993

Recap
Permits the receipt of services from a bank at reduced or no cost by an IRA or Keogh Plan beneficiary under certain conditions.

Class Exemption

Receipt of Services by an IRA or Keogh Plan from a Bank

Agency: Pension and Welfare Benefits Administration, U.S. Department of Labor.

Action: Adoption of Amendment to PTE 93-33.

Effective Date: The amendment is effective January 1, 1998**.**

Exemption

Accordingly, PTE 93-33 is amended under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990).

Section I: Covered Transactions

Effective January 1, 1998, the restrictions of sections 406(a)(1)(D) and 406(b) of ERISA and the sanctions resulting from the application of section 4975 of the Code, including the loss of exemption of an individual retirement account (IRA) pursuant to section 408(e)(2)(A) of the Code, by reason of section 4975(c)(1)(D), (E) and (F) of the Code, shall not apply to the receipt of services at reduced or no cost by an individual for whose benefit an IRA, or, if self-employed, a Keogh Plan, is established or maintained, or by members of his or her family, from a bank pursuant to an arrangement in which the account balance in the IRA or Keogh Plan is taken into account for purposes of determining eligibility to receive such services, provided that each condition of Section II of this exemption is satisfied.

Section II: Conditions

(a) The IRA or Keogh Plan, the balance of which is taken into account for purposes of determining eligibility to receive services at reduced or no cost, is established and maintained for the exclusive benefit of the participant covered under the IRA or Keogh Plan, his or her spouse or their beneficiaries.

(b) The services must be of the type that the bank itself could offer consistent with applicable federal and state banking law.

(c) The services are provided by the bank (or an affiliate of the bank) in the ordinary course of the bank's business to customers who qualify for reduced or no cost banking services but do not maintain IRAs or Keogh Plans with the bank.

(d) For the purpose of determining eligibility to receive services at reduced or no cost, the account balance required by the bank for the IRA or Keogh Plan is equal to the lowest balance required for any other type of account which the bank includes to determine eligibility to receive reduced or no cost services.

(e) The rate of return on the IRA or Keogh Plan investment is no less favorable than the rate of return on an identical investment that could have been made at the same time at the same branch of the bank by a customer of the bank who is not eligible for (or who does not receive) reduced or no cost services.

Section III: Definitions

The following definitions apply to this exemption:

(a) The term bank means a bank described in section 408(n) of the Code.

(b) The term IRA means an individual retirement account described in Code section 408(a) or an education individual retirement account described in section 530 of the Code. For purposes of this exemption, the term IRA shall not include an IRA which is an employee benefit plan covered by Title I of ERISA, except for a Simplified Employee Pension (SEP) described in section 408(k) of the Code or a Simple Retirement Account described in section 408(p) of the Code which provides participants with the unrestricted authority to transfer their balances to IRAs or Simple Retirement Accounts sponsored by different financial institutions.

(c) The term Keogh Plan means a pension, profit sharing, or stock bonus plan qualified under Code section 401(a) and exempt from taxation under Code section 501(a) under which some or all of the participants are employees described in section 401(c) of the Code. For purposes of this exemption, the term Keogh Plan shall not include a Keogh Plan which is an employee benefit plan covered by title I of ERISA.

(d) The term account balance means deposits as that term is defined under 29 CFR 408b-4(c)(3), or i nvestments in securities for which market quotations are readily available. For purposes of this exemption, the term account balance shall not include investments in securities offered by the bank (or its affiliate) exclusively to IRAs and Keogh Plans.

(e) An affiliate of a bank includes any person directly or indirectly controlling, controlled by, or under common control with a bank. The term control means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(f) The term members of his or her family refers to beneficiaries of the individual for whose benefit the IRA or Keogh Plan is established or maintained, who would be members of the family as that term is defined in Code section 4975(e)(6), or a brother, a sister, or spouse of a brother or a sister.

(g) The term service includes incidental products of a de minimis value provided by third persons pursuant to an arrangement with the bank, which are directly related to the provision of banking services covered by the exemption.

Signed at Washington, DC this 26th day of February 1999.

Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefits Administration

U.S. Department of Labor.

[FR Doc. 99-5572 Filed 3-5-99]

Prohibited Transaction Class Exemption 94-20

Foreign Exchange

February 10, 1994

Summary

Permits ERISA plans to use fiduciary banks and broker-dealers, and their affiliates, to invest in foreign currency and options on foreign currencies, subject to conditions: (1) the fiduciary bank has no discretion to make the investment on its own authority, (2) the transaction is done on an arms-length basis, (3) written policies are maintained to ensure any third party

knows an ERISA account is involved, (4) written confirmations, with specified contents, are provided the independent fiduciary authorizing the transaction within 5 business days, and (5) records are maintained for 6 years on territory in the jurisdiction of US courts.

Class Exemption

Agency: Pension and Welfare Benefits Administration, Labor Department.

Action: Grant of Class Exemption.

Summary: This document contains a final exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and from certain taxes imposed by the Internal Revenue Code of 1986 (the Code). The class exemption permits the purchase and sale of foreign currencies between an employee benefit plan and a bank or a broker-dealer or an affiliate thereof which is a party in interest with respect to such plan.

The exemption affects participants and beneficiaries of employee benefit plans involved in such transactions, as well as banks and broker-dealers and their affiliates which act as dealers in foreign exchange.

Effective Date: Section I(a) of PTE 94-20 is effective for transactions occurring from January 1, 1975 to June 18, 1991. Section I(b) of PTE 94-20 is effective for transactions occurring on or after June 18, 1991.

The Explanatory Preamble, together with the full Exemption, are available in the PREAMBLE document.

Exemption

Section I. Transactions

a. For the period from January 1, 1975 to June 18, 1991, the restrictions of section 406(a)(1)(A) through (D) of the Employee Retirement Income Security Act of 1974 (the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code) by reason of Code section 4975(c)(1)(A) through (D) shall not apply to any foreign exchange transaction between a bank or broker-dealer or an affiliate thereof and an employee benefit plan with respect to which the bank or broker-dealer or affiliate thereof is a trustee, custodian, fiduciary or other party in interest, provided that (i) the transaction is directed (within the meaning of section IV(e)) on behalf of the plan by a fiduciary which is independent of the bank, the broker-dealer, and any affiliate thereof, and (ii) the conditions set forth in section II are met.
b. Effective June 18, 1991, the restrictions of section 406(a)(1)(A) through (D) of the Act and the taxes imposed by section 4975(a) and (b) of the Code by reason of Code section 4975(c)(1)(A) through (D) shall not apply to any foreign exchange transaction between a bank or broker-dealer or an affiliate thereof and an employee benefit plan with respect to which the bank or broker-dealer or an affiliate thereof is a trustee, custodian, fiduciary, or other party in interest, provided that (i) the transaction is directed (within the meaning of section IV(e)) on behalf of the plan by a fiduciary which is independent of the bank, the broker-dealer, and any affiliate thereof, and (ii) all of the conditions set forth in sections II and III are met.

Section II. General Conditions

Section I of this exemption applies only if the following conditions of this section II are satisfied. In the case of transactions described in section I(b), all of the conditions specified in section III below must also be satisfied.

a. At the time the transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms generally available in comparable arm's length foreign exchange transactions between unrelated parties.
b. Neither the bank, the broker-dealer, nor any affiliate thereof has any discretionary authority or control with respect to the investment of the plan, assets involved in the transaction or renders investment advice (within the meaning of 29 C.F.R. 2510.3-21(c)) with respect to the investments of those assets.

Section III. Specific Conditions

Section I(b) of this exemption applies only if the conditions specified in section II above and the following conditions are satisfied:

a. At the time the transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms afforded by the bank, the broker-dealer, or any affiliate thereof in comparable arm's length foreign exchange transactions involving unrelated parties.
b. The bank, or broker-dealer, maintains at all times written policies and procedures regarding the handling of foreign exchange transactions with plans with respect to which the bank or broker-dealer is a trustee, custodian, fiduciary or other party in interest or disqualified person which assure that the person acting for the bank or broker-dealer knows that he or she is dealing with a plan.
c. A written confirmation statement is issued with respect to each covered transaction to the independent plan fiduciary who directs the transaction for the plan.

   The confirmation shall disclose the following information:

   1. Account name;
   2. Transaction date;
   3. Exchange rates;
   4. Settlement date;
   5. Currencies exchanged:

      i. Identity of the currency sold,
      ii. The amount sold;
      iii. Identity of the currency purchased;
      iv. The amount purchased.

   The confirmation shall be issued in no event more than 5 business days after execution of the transaction.

d. The bank or broker-dealer, or affiliate thereof, maintains within territories under the jurisdiction of the United States Government, for a period of six years from the date of the transaction, the records necessary to enable the persons described in paragraph (e) of this section to determine whether the applicable conditions of this exemption have been met. Notwithstanding these recordkeeping requirements, a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the bank's or broker-dealer's control, the records are lost or destroyed prior to the end of the six-year period, and no fiduciary of a plan who is independent of the bank or broker-dealer or any affiliate thereof, which engages in a transaction covered by the exemption, shall be subject to the civil penalty that may be assessed under 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code solely because the records are not maintained by the bank, the broker-dealer, or its affiliate, or are not made available for examination by the bank or broker-dealer or affiliate as required by paragraph (e) below.
e. (i) Except as provided in subparagraph (ii) of this paragraph and notwithstanding any provisions of subsection (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (d) of this Section are available at their customary location for examination, upon reasonable notice, during normal business hours by:

   A. Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service.
   B. Any fiduciary of a plan who has authority to acquire or dispose, of the assets of the plan involved in the foreign exchange transaction or any duly authorized employee and representative of such fiduciary.
   C. Any contributing employer to the plan involved in the foreign exchange transaction or any duly authorized employee or representative of such employer.

      (ii) None of the persons described in subparagraphs (B) and (C) shall be authorized to examine a bank's or broker-dealer's trade secrets or commercial or financial information of a bank or broker-dealer or an affiliate thereof which is privileged or confidential.

Section IV. Definitions and General Rules

For purposes of this exemption.

a. A "foreign exchange transaction" means the exchange of the currency of one nation for the currency of another nation, or a contract for such an exchange. The term foreign exchange transaction includes options contracts on foreign exchange transactions.
b. A "bank" means a bank which is supervised by the United States or a State thereof, or any affiliate thereof.
c. A "broker-dealer" means a broker-dealer registered under the Securities Exchange Act of 1934, or any affiliate thereof.
d. An "affiliate" of a bank or broker-dealer means any entity directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such bank or broker-dealer.
e. The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.
f. A foreign exchange transaction involving assets of an employee benefit plan shall be considered "directed" only where the independent plan fiduciary who has not been appointed by the bank or broker-dealer or affiliate dealer or affiliate thereof, directs such bank or broker-dealer or affiliate thereof to effect the purchase or sale of a specific amount of currency at a specific exchange rate.
g. For purposes of this exemption, the term "employee benefit plan" refers to a pension plan described in 29 C.F.R. 2510.3-2 and/or a welfare benefit plan described In 29 C.F.R. 2510.3-1.

Prohibited Transaction Class Exemption 97-41

Collective Investment Fund Conversion Transactions

August 8, 1997 (62 FR 42830)

Recap
Permits an employee benefit plan (Plan) to purchase shares of a mutual fund, advised by a bank or investment adviser which is also a fiduciary to the Plan, in exchange for assets transferred in-kind from a collective investment fund (CIF), when the Plan's assets are completely withdrawn from the CIF.

Class Exemption

Conversion of Collective Investment Funds into a Registered Investment Company (Mutual Fund)

Agency: Department of Labor, Pension and Welfare Benefits Administration

Action: Grant of Class Exemption

Effective Date: Section I of this exemption is effective for transactions occurring from October 1, 1988 until August 8, 1997. Section II of the exemption is effective for transactions occurring after August 8, 1997.

Exemption

Section I.

Retroactive Exemption for the Purchase of Fund Shares With Assets Transferred In-Kind From a CIFF or the period from October 1, 1988 to August 8, 1997, the restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the taxes imposed by section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E), shall not apply to the purchase by an employee benefit plan (the Client Plan) of shares of one or more open-end management investment companies (the Fund or Funds) registered under the Investment Company Act of 1940, in exchange for assets of the Client Plan transferred in-kind to the Fund from a collective investment fund (the CIF) maintained by a bank (the Bank) or a plan adviser (the Plan Adviser), where the Bank or Plan Adviser is the investment adviser to the Fund and also a fiduciary of the Client Plan. The transfer and purchase must be in connection with a complete withdrawal of the Client Plan's assets from the CIF, and the following conditions must be met:

(a) No sales commissions or other fees are paid by the Client Plan in connection with the purchase

of Fund shares.

(b) All transferred assets are securities for which market quotations are readily available, or cash.

(c) The transferred assets constitute the Client Plan's pro rata portion of all assets that were held by the CIF immediately prior to the transfer.

(d) The Client Plan receives Fund shares that have a total net asset value equal to the value of the Client Plan's transferred assets on the date of the transfer, as determined with respect to securities, in a single valuation for each asset, with all valuations performed in the same manner, at the close of the same business day, in accordance with Securities and Exchange Commission Rule 17a-7 (using sources independent of the Bank or Plan Adviser and the Fund) and the procedures established by the Funds pursuant to Rule 17a-7.

(e) An independent fiduciary with respect to the Client Plan (the Independent Fiduciary) receives advance written notice of an in-kind transfer and purchase of assets and full written disclosure of information concerning the Fund which includes the following:

(1) A current prospectus for each Fund to which the CIF assets may be transferred;

(2) A statement describing the fees to be charged to, or paid by, a Client Plan and the Funds to the Bank or Plan Adviser, including the nature and extent of any differential between the rates of the fees;

(3) A statement of the reasons why the Bank or Plan Adviser may consider the transfer and purchase to be appropriate for the Client Plan; and

(4) A statement of whether there are any limitations on the Bank or Plan Adviser with respect to which plan assets may be invested in shares of the Funds, and, if so, the nature of such limitations.

(f) On the basis of the foregoing information, the Independent Fiduciary gives prior approval, in writing, for each purchase of Fund shares in exchange for the Client Plan's assets transferred from the CIF, consistent with the responsibilities, obligations and duties imposed on fiduciaries by Part 4 of Title I of the Act.

(g) The Bank or Plan Adviser sends by regular mail or personal delivery to the Independent Fiduciary of each Client Plan that purchases Fund shares in connection with the in-kind transfer, no later than 105 days after completion of each purchase, a written confirmation of the transaction containing--(1) The number of CIF units held by the Client Plan immediately before the in-kind transfer, the related per unit value and the total dollar amount of such CIF units; and (2) The number of shares in the Funds that are held by the Client Plan immediately following the purchase, the related per share net asset value and the total dollar amount of such shares.

(h) As to each Client Plan, the combined total of all fees received by the Bank or Plan Adviser for the provision of services to the Client Plan, and in connection with the provision of services to a Fund in which a Client Plan holds shares purchased in connection with the in-kind transfer, is not in excess of ``reasonable compensation'' within the meaning of section 408(b)(2) of the Act .

(i) All dealings in connection with the in-kind transfer and purchase between the Client Plan and a Fund are on a basis no less favorable to the Client Plan than dealings between the Fund and other shareholders.

Section II.

Prospective Exemption for the Purchase of Fund Shares With Assets Transferred In-Kind From a CIF Effective after August 8, 1997, the restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the taxes imposed by section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the purchase by an employee benefit plan (the Client Plan) of shares of one or more open-end management investment companies (the Fund or Funds) registered under the Investment Company Act of 1940, in exchange for assets of the Client Plan transferred in-kind to the Fund from a collective investment fund (the CIF) maintained by a bank (the Bank) or a plan adviser (the Plan Adviser),

where the Bank or Plan Adviser is the investment adviser to the Fund and also a fiduciary of the Client Plan. The transfer and purchase must be in connection with a complete withdrawal of the Client Plan's assets from the CIF, and the following conditions must be met:

(a) No sales commissions or other fees are paid by the Client Plan in connection with the purchase of Fund shares.

(b) All transferred assets are securities for which market quotations are readily available, or cash.

(c) The transferred assets constitute the Client Plan's pro rata portion of all assets that were held by the CIF immediately prior to the transfer. Notwithstanding the foregoing, the allocation of fixed-income securities held by a CIF among Client Plans on the basis of each Client Plan's pro rata share of the aggregate value of such securities will not fail to meet the requirements of this subsection if: (1) The aggregate value of such securities does not exceed one (1) percent of the total value of the assets held by the CIF immediately prior to the transfer; and (2) Such securities have the same coupon rate and maturity, and at the time of the transfer, the same credit ratings from nationally recognized statistical rating agencies.

(d) The Client Plan receives Fund shares that have a total net asset value equal to the value of the Client Plan's transferred assets on the date of the transfer, as determined with respect to securities, in a single valuation for each asset, with all valuations performed in the same manner, at the close of the same business day, in accordance with Securities and Exchange Commission Rule 17a-7 (using sources independent of the Bank or Plan Adviser and the Fund) and the procedures established by the Funds pursuant to Rule 17a-7.

(e) An independent fiduciary with respect to the Client Plan (the Independent Fiduciary) receives advance written notice of the in-kind transfer and purchase of assets and full written disclosure of information concerning the Funds which includes the following:

(1)A current prospectus for each Fund to which the CIF assets may be transferred;
(2)A statement describing the fees to be charged to, or paid by, a Client Plan and the Funds to the Bank or Plan Adviser, including the nature and extent of any differential between the rates of the fees paid by the Fund and the rates of the fees paid by the Client Plan in connection with the Client Plan's investment in the CIF;
(3)A statement of the reasons why the Bank or Plan Adviser may consider the transfer and purchase to be appropriate for the Client Plan;
(4)A statement of whether there are any limitations on the Bank or Plan Adviser with respect to which plan assets may be invested in shares of the Funds, and, if so, the nature of such limitations;
(5)The identity of all securities that will be valued in accordance with Rule 17a-7(b)(4) and allocated on the basis of the Client Plan's pro rata portion under section II(c); and
(6)The identity of any fixed-income securities that will be allocated on the basis of each Client Plan's pro rata share of the aggregate value of such securities pursuant to section II(c).

(f) On the basis of the foregoing information, the Independent Fiduciary gives prior approval, in writing, for each purchase of Fund shares in exchange for the Client Plan's assets transferred from the CIF, consistent with the responsibilities, obligations and duties imposed on fiduciaries by Part 4 of Title I of the Act. In addition, the Independent Fiduciary must give prior approval, in writing, for the receipt of confirmation statements described below in paragraph (g)(1) and (g)(2) by facsimile or electronic mail if the Independent Fiduciary elects to receive such statements in that form.

(g) The Bank or Plan Adviser sends by regular mail or personal delivery or, if applicable, by facsimile or electronic mail to the Independent Fiduciary of each Client Plan that purchases Fund shares in connection with the in-kind transfer, the following information:

1. No later than 30 days after the completion of the purchase, a written confirmation which contains--(i) The identity of each transferred security that was valued for purposes of the purchase of Fund shares in accordance with Rule 17a-7(b)(4); (ii) The current market price, as of the date of the in-kind transfer, of each such security involved in the purchase of Fund shares; and (iii) The identity of each pricing service or market-maker consulted in determining the current market price of such securities.
2. No later than 105 days after the completion of each purchase, a written confirmation which contains—

(i) The number of CIF units held by the Client Plan immediately before the in-kind transfer, the related per unit value and the total dollar amount of such CIF units; and (ii) The number of shares in the Funds that are held by the Client Plan immediately following the purchase, the related per share net asset value and the total dollar amount of such shares.

(h) With respect to each of the Funds in which the Client Plan continues to hold shares acquired in connection with the in-kind transfer, the Bank or Plan Adviser provides the Independent Fiduciary of the Client Plan with--(1) A copy of an updated prospectus of such Fund, at least annually; and (2) Upon request of the Independent Fiduciary, a report or statement (which may take the form of the most recent financial report, the current Statement of Additional Information, or some other written statement) containing a description of all fees paid by the Fund to the Bank or Plan Adviser.

(i) As to each Client Plan, the combined total of all fees received by the Bank or Plan Adviser for the provision of services to the Client Plan, and in connection with the provision of services to a Fund in which a Client Plan holds shares acquired in connection with the in-kind transfer, is not in excess of "reasonable compensation" within the meaning of section 408(b)(2) of the Act.

(j) All dealings in connection with the in-kind transfer and purchase between the Client Plan and a Fund are on a basis no less favorable to the Client Plan than dealings between the Fund and other shareholders.

Section III.

Availability of Prohibited Transaction Exemption (PTE) 77-4

Any purchase of Fund shares that complies with the conditions of either Section I or Section II of this class exemption shall be treated as a "purchase or sale" of shares of an open-end investment company for purposes of PTE 77-4 and shall be deemed to have satisfied paragraphs (a), (d) and (e) of section II of that exemption. 42 FR 18732 (April 8, 1977).

Section IV.

Definitions For purposes of this exemption:

(a) The term "Bank" means a bank or trust company, and any affiliate thereof [as defined below in paragraph (b)(1)], which is supervised by a state or federal agency.

(b) An "affiliate" of a person includes--(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person. (2) Any officer, director, employee or relative of such person, or partner in any such person; and (3) Any corporation or partnership of which such person is an officer, director, partner or employee.

(c) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(d) The term "collective investment fund" or "CIF" means a common or collective trust fund or pooled investment fund maintained by a "Bank" as defined in paragraph (a) of this Section IV or by a "Plan Adviser" as defined in paragraph (m) of this Section IV for the collective investment of the assets attributable to two or more plans maintained by unrelated employers.

(e) The term "Fund" or "Funds" means any open-end management investment company or companies registered under the 1940 Act for which the Bank or Plan Adviser serves as an investment adviser, and may also serve as a custodian, shareholder servicing agent, transfer agent or provide some other secondary service (as defined below in paragraph (i) of this section).

(f) The term "net asset value" means the amount calculated by dividing the value of all securities, determined by a method as set forth in a Fund's prospectus and Statement of Additional Information, and other assets belonging to each of the portfolios in such Fund, less the liabilities chargeable to each portfolio, by the number of outstanding shares.

(g) The term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or a sister.

(h) The term "Independent Fiduciary" means a fiduciary of a Client Plan who is independent of and unrelated to the Bank or Plan Adviser. For purposes of this exemption, the Independent Fiduciary will not be deemed to be independent of and unrelated to the Bank or Plan Adviser if: (1) Such fiduciary directly or indirectly controls, is controlled by, or is under common control with the Bank or Plan Adviser; (2) Such fiduciary, or any officer, director, partner, employee, or relative of such fiduciary, is an officer, director, partner, employee of the Bank or Plan Adviser (or is a relative of such persons); (3) Such fiduciary, directly or indirectly receives any compensation or other consideration for his or her own personal account in connection with any transaction described in this exemption.

If an officer, director, partner, employee of the Bank or Plan Adviser (or relative of such persons), is a director of such Independent Fiduciary, and if he or she abstains from participation in (i) the choice of the Client Plan's investment adviser, and (ii) the approval of any purchase or sale between the Client Plan and the Funds, as well as any transaction described in Sections I and II above, then paragraph (h)(2) of this Section IV shall not apply.

(i) The term "secondary service" means a service provided by a Bank or Plan Adviser to a Fund other than investment management, investment advisory or similar services.

(j) The term "fixed-income security" means any interest-bearing or discounted government or corporate security with a face amount of $1,000 or more that obligates the issues to pay the holder a specified sum of money, at specific intervals, and to repay the principal amount of the loan at maturity.

(k) The term "Client Plan" means a pension plan described in 29 CFR 2510.3-2, a welfare benefit plan described in 29 CFR 2510.3-1, and a plan described in section 4975(e)(1) of the Code , but does not include an employee benefit plan established or maintained by the Bank or a Plan Adviser for its own employees.

(l) The term "security" shall have the same meaning as defined in section 2(36) of the 1940 Act, as amended, 15 U.S.C. 80a-2(36) (1996).

(m) The term "Plan Adviser" means an investment adviser registered under the Investment Advisers Act of 1940, and any "affiliate" thereof [as defined above in paragraph (b)(1)].

(n) The term "business day" means a banking day as defined by federal or state banking regulations.

(o) The term "unrelated employers" means persons which are not, directly or indirectly, affiliates, as defined above in paragraph (b)(1).

(p) The term "personal delivery" means delivery of the information described in sections I(g) and II(g) above to an individual or individuals designated by the Client Plan to act on behalf of the Independent Fiduciary.

Signed at Washington, D.C., this 1st day of August, 1997.

Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare

Benefits Administration, Department of Labor.

Prohibited Transaction Class Exemption 98-54

Foreign Exchange Transactions Executed Pursuant to Standing Instructions

November 12, 1998 (FR Doc 98-30291)

Recap

Permits foreign exchange transactions between employee benefit plans and banks and broker-dealers, which are parties in interest with respect to such plans, pursuant to standing instructions.

Class Exemption

Foreign Exchange Transactions Executed Pursuant to Standing Instructions

Agency: Department of Labor, Pension and Welfare Benefits Administration

Action: Grant of Class Exemption

Effective Dates: Section II is effective for transactions occurring from June 18, 1991 to January 12, 999. Section III is effective for transactions occurring after January 12, 1999.

Exemption

Effective Dates: Section II is effective for transactions occurring from June 18, 1991 to January 12, 1999. Section III is effective for transactions occurring after January 12, 1999.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Section I Covered Transactions

a. For the period from June 18, 1991 to January 12, 1999, the restrictions of sections 406(a)(1)(A) through (D) and 406(b)(1) and (b)(2) of the Employee Retirement Security Act of 1974 (ERISA or the Act) and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the following foreign exchange transactions, between a bank or broker-dealer and an employee benefit plan with respect to which the bank or broker-dealer is a trustee, custodian, fiduciary or other party in interest, pursuant to a standing instruction, if the conditions set forth in section II below are met:
    1. An income item conversion; or
    2. A de minimis purchase or sale transaction.
b. Effective after January 12, 1999, the restrictions of sections 406(a)(1)(A) through (D) and 406(b)(1) and (b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of Code, by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the following foreign exchange transactions, between a bank or broker-dealer, and an employee benefit plan with respect to which the bank or broker-dealer is a trustee, custodian, fiduciary or other party in interest, pursuant to a standing instruction, if the conditions set forth in section III below are met:
    1. An income item conversion; or
    2. A de minimis purchase or sale transaction.

Section II Retroactive Conditions

a. At the time the foreign exchange transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms generally available in comparable arm's length foreign exchange transactions between unrelated parties.
b. At the time the foreign exchange transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms afforded by the bank or the broker-dealer in comparable arm's length foreign exchange transactions involving unrelated parties.
c. Neither the bank, the broker-dealer nor any foreign affiliate thereof, has any discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of 29 CFR 2510.3-21(c)) with respect to the investment of those assets.
d. The bank or broker-dealer maintains at all times written policies and procedures regarding the handling of foreign exchange transactions for plans with respect to which the bank or broker-dealer is a trustee, custodian, fiduciary or other party in interest or disqualified person which assure that

the person acting for the bank or broker-dealer knows that he or she is dealing with a plan.

e. The exchange rate used by the bank or broker-dealer for a particular foreign exchange transaction did not deviate by more than 10% (above or below) the interbank bid and asked rates at the time of the transaction as displayed on Reuters or another independent service in the foreign currency market for such currency; provided, however, that a prohibited transaction shall not be deemed to have occurred solely because records demonstrating compliance with this section with respect to specific transactions have been lost, destroyed or are not available to the bank or broker-dealer. Nothing in this section shall be deemed to relieve the bank or broker-dealer of its responsibility to demonstrate compliance with the conditions of this exemption.
f. A written confirmation statement is furnished with respect to each covered transaction to the independent plan fiduciary that authorized the standing instruction. The confirmation statement shall include:

    A. Account name;
    B. Transaction date;
    C. Exchange rates;
    D. Settlement date;
    E. Currencies exchanged;

    i. Identity of foreign currency sold;
    ii. Amount sold;
    iii. Identity of currency purchased; and
    iv. Amount purchased.

The confirmation shall be issued in no event more than 5 business days after execution of the transaction.

Section III Prospective Conditions

a. At the time the foreign exchange transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms generally available in comparable arm's-length foreign exchange transactions between unrelated parties.
b. At the time the foreign exchange transaction is entered into, the terms of the transaction are not less favorable to the plan than the terms afforded by the bank or broker-dealer in comparable arm's-length foreign exchange transactions involving unrelated parties.
c. Neither the bank, the broker-dealer, nor any foreign affiliate thereof has any discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of 29 CFR 2510.3-21(c)) with respect to the investment of those assets.
d. The bank or broker-dealer maintains at all times written policies and procedures regarding the handling of foreign exchange transactions for plans with respect to which the bank or broker-dealer is a trustee, custodian, fiduciary or other party in interest or disqualified person which assure that the person acting for the bank or broker-dealer knows that he or she is dealing with a plan.
e. The covered transaction is performed under a written authorization executed in advance by a fiduciary of the plan whose assets are involved in the transaction, which plan fiduciary is independent of the bank or broker-dealer engaging in the covered transaction or any foreign affiliate thereof. The written authorization must specify: (1) The identities of the currencies in which covered transactions may be executed; and (2) That the authorization may be terminated by either party without penalty on no more than ten days notice.
f. (1) Income item conversions are executed within no more than one business day from the date of receipt of notice by the bank or broker-dealer that such items are good funds, and a foreign custodian which is an affiliate of the bank or broker-dealer, provides such notice to the bank or broker-dealer within ``one business day'' of its receipt of good funds;

    (2) De minimis purchase and sale transactions are executed within no more than one business day from the date that either the bank or broker-dealer receives notice from a foreign custodian that the proceeds of a sale of foreign securities denominated in foreign currency are good funds, or the direction to acquire foreign currency was received by the bank or broker-dealer, and a foreign custodian which is an affiliate of the bank or broker-dealer, provides such notice to the bank or broker-dealer within one business day of its receipt of good funds from a sale.

g. (1) At least once each day, at the time(s) specified in its written policies and procedures, the bank or broker-dealer establishes either a rate of exchange or a range of rates to be used for income

item conversions and de minimis purchase and sale transactions covered by this exemption.

(2) Income item conversions are executed at the next scheduled time for conversions following receipt of notice by the bank or broker-dealer from the foreign custodian that such funds are good funds. If it is the policy of the bank or broker-dealer to aggregate small amounts of foreign currency until a specified minimum threshold amount is received, then the conversion may take place at a later time but in no event more than 24 hours after receipt of notice.

(3) De minimis purchase and sale transactions are executed at the next scheduled time for such transactions following receipt of either notice that the sales proceeds denominated in foreign currency are good funds, or a direction to acquire foreign currency. If it is the policy of the bank or broker-dealer to aggregate small transactions until a specified threshold amount is received, then the execution may take place at a later time but in no event more than 24 hours after receipt of either notice that the sales proceeds have been received by the foreign custodian as good funds, or a direction to acquire foreign currency. For purposes of this paragraph (g), the range of exchange rates established by the bank or broker-dealer for a particular foreign currency cannot deviate by more than three percent [above or below] the interbank bid and asked rates as displayed on Reuters or another nationally recognized independent service in the foreign exchange market, for such currency at the time such range of rates is established by the bank or broker-dealer.

h. Prior to the execution of the authorization referred to in paragraph (e), the bank or broker-dealer provides the independent fiduciary with a copy of the bank's or broker-dealer's written policies and procedures regarding the handling of foreign exchange transactions involving income item conversions and de minimis purchase and sale transactions. The policies and procedures must, at a minimum, contain the following information:

1. Disclosure of the time(s) each day that the bank or broker-dealer will establish the specific rate of exchange or the range of exchange rates for the covered transactions to be executed and the time(s) that such covered transactions will take place. The bank or broker-dealer shall include a description of the methodology that the bank or broker-dealer uses to determine the specific exchange rate or range of exchange rates;
2. Disclosure that income item conversions and de minimis purchase and sale transactions will be executed at the first scheduled transaction time after notice that good funds from an income item conversion or a sale have been received, or a direction to purchase foreign currency has been received. To the extent that the bank or broker-dealer aggregates small amounts of foreign currency until a specified minimum threshold amount is met, a description of this practice and disclosure of the threshold amount; and
3. A description of the process by which the bank's or broker-dealer's foreign exchange policies and procedures for income item conversions and de minimis purchase and sale transactions may be amended and disclosed to plans.

i. The bank or broker-dealer engaging in the covered transaction furnishes to the independent fiduciary a written confirmation statement with respect to each covered transaction not more than five business days after execution of the transaction.

1. With respect to income item conversions, the confirmation shall disclose the following information:

    A. Account name;
    B. Date of notice that good funds were received;
    C. Transaction date;
    D. Exchange rate;
    E. Settlement date;
    F. Identity of foreign currency;
    G. Amount of foreign currency sold;
    H. Amount of U.S. dollars or other currency credited to the plan; and

2. With respect to de minimis purchase and sale transactions, the confirmation shall disclose the following information:

    A. Account name;

B. Date of notice that sales proceeds denominated in foreign currency are received as good funds or direction to acquire foreign currency was received;
C. Transaction date;
D. Exchange rates;
E. Settlement date;
F. Currencies exchanged:

i. Identity of the currency sold;
ii. The amount sold;
iii. Identity of the currency purchased; and
iv. The amount purchased;

j. The bank or broker-dealer, maintains, within territories under the jurisdiction of the United States Government, for a period of six years from the date of the transaction, the records necessary to enable the persons described in paragraph (l) of this section to determine whether the applicable conditions of this exemption have been met, including a record of the specific exchange rate or range of exchange rates the bank or broker-dealer established each day for foreign exchange transactions effected under standing instructions for income item conversions and de minimis purchase and sale transactions. However, a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the bank's or broker-dealer's control, the records are lost or destroyed prior to the end of the six-year period, and no party in interest other than the bank or broker-dealer shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained by the bank or broker-dealer, or are not made available for examination by the bank or broker-dealer, or its affiliate as required by paragraph (k) of this section.
k. (1) Except as provided in subparagraph (2) of this paragraph and notwithstanding any provisions of subsection (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (j) of this Section are available at their customary location for examination, upon reasonable notice, during normal business hours by:

A. Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service.
B. Any fiduciary of a plan who has authority to acquire or dispose of the assets of the plan involved in the foreign exchange transaction or any duly authorized employee or representative of such fiduciary.
C. Any contributing employer to the plan involved in the foreign exchange transaction or any duly authorized employee or representative of such employer.

(2) None of the persons described in subparagraphs (B) and (C) shall be authorized to examine a bank's or broker-dealer's trade secrets or commercial or financial information of a bank or broker-dealer, which is privileged or confidential.

Section IV Definitions and General Rules

For purposes of this exemption,

a. A foreign exchange transaction means the exchange of the currency of one nation for the currency of another nation.
b. The term standing instruction means a written authorization from a plan fiduciary, who is independent of the bank or broker-dealer engaging in the foreign exchange transaction and any foreign affiliate thereof, to the bank or broker-dealer to effect the transactions specified therein pursuant to the instructions provided in such authorization.
c. A bank means a bank which is supervised by the United States or a State thereof, or any domestic affiliate thereof.
d. A broker-dealer means a broker-dealer registered under the Securities Exchange Act of 1934, or any domestic affiliate thereof.
e. A domestic affiliate of a bank or broker-dealer means any entity which is supervised by the United States or a State thereof and which is directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such bank or broker-dealer.
f. The term control means the power to exercise a controlling influence over the management or policies of a person other than an individual.

g. An income item conversion means: (1) The conversion into U.S. dollars of an amount which is the equivalent of no more than 300,000 U.S. dollars of interest, dividends or other distributions or payments with respect to a security, tax reclaims, proceeds from dispositions of rights, fractional shares or other similar items denominated in the currency of another nation that are received by the bank or broker-dealer on behalf of the plan from the plan's foreign investment portfolio; or (2) the conversion into any currency as required and specified by the standing instruction of an amount which is the equivalent of no more than 300,000 U.S. dollars of interest, dividends, or other distributions or payments with respect to a security, tax reclaims, proceeds from dispositions of rights, fractional shares or other similar items denominated in the currency of another nation that are received by the bank or broker-dealer on behalf of the plan from the plan's foreign investment portfolio, provided that the converted funds are either transferred to an interest bearing account which provides a reasonable rate of interest within 24 hours of the conversion and held therein pending reinvestment by the plan or the bank reinvests such proceeds within 24 hours of the conversion at the direction of the plan.
h. A de minimis purchase or sale transaction means the purchase or sale of foreign currencies in an amount of no more than 300,000 U.S. dollars or the equivalent thereof in connection with the purchase or sale of foreign securities by a plan.
i. For purposes of this exemption the term employee benefit plan refers to a pension plan described in 29 CFR Sec. 2510.3-2 and/or a welfare benefit plan described in 29 CFR Sec. 2510.3-1.
j. For purposes of this exemption, the term good funds means funds immediately available in cash with no sovereign or other governmental impediments or restrictions to the exchange or transfer of such funds.
k. For purposes of this exemption, the term business day means a banking day as defined by federal or state banking regulations.
l. For purposes of this exemption, the term foreign affiliate of a bank or broker-dealer means any non-U.S. entity which is directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such bank or broker-dealer.

Signed at Washington, DC this 6th day of November 1998.
Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare

Benefits Administration, Department of Labor.

Billing Code 4510-29-P

Prohibited Transaction Class Exemption 2000-14

Amendment to PTE 80-26 for Certain Interest Free Loans to Employee Benefit Plans

April 3, 2000 (65 FR 17540)

Recap
Provides a temporary amendment to PTE 80-26, permitting parties-in-interest to make interest free loans to a plan to continue the plan's ordinary operation, in the event it experiences an inability to liquidate or access assets, or to access data as a result of a Y2K problem, but permits the loans to be repaid no later than December 31, 2000.

Class Exemption

Amendment to PTE 80-26 for Certain Interest Free Loans to Employee Benefit Plans

Agency: Department of Labor, Pension and Welfare Benefits Administration

Action: Grant of Class Exemption

Effective Date: The amendment to PTE 80-26 is effective from November 1, 1999 until

December 31, 2000.

Exemption

Section I: General Exemption

Effective January 1, 1975, the restrictions of section 406(a)(1)(B) and (D) and section 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(B) and (D) of the Code, shall not apply to the lending of money or other extension of credit from a party in interest or disqualified person to an employee benefit plan, nor to the repayment of such loan or other extension of credit in accordance with its terms or written modifications thereof, if:

a. No interest or other fee is charged to the plan, and no discount for payment in cash is relinquished by the plan, in connection with the loan or extension of credit;
b. The proceeds of the loan or extension of credit are used only:

    1. For the payment of ordinary operating expenses of the plan, including the payment of benefits in accordance with the terms of the plan and periodic premiums under an insurance or annuity contract; or
    2. For a period of no more than three business days, for a purpose incidental to the ordinary operation of the plan;

c. The loan or extension of credit is unsecured; and

d. The loan or extension of credit is not directly or indirectly made by an employee benefit plan.

Section II: Temporary Exemption

Effective November 1, 1999 through December 31, 2000, the restrictions of section 406(a)(1)(B) and (D) and section 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(B) and (D) of the Code , shall not apply to the lending of money or other extension of credit from a party in interest or disqualified person to an employee benefit plan, nor to the repayment of such loan or other extension of credit in accordance with its terms or written modifications thereof, if:

a. No interest or other fee is charged to the plan, and no discount for payment in cash is relinquished by the plan, in connection with the loan or extension of credit;

b. The proceeds of the loan or extension of credit are used only for a purpose incidental to the ordinary operation of the plan which arises in connection with the plan's inability to liquidate, or otherwise access its assets or access data as a result of a Y2K problem.

    c. The loan or extension of credit is unsecured;
    d. The loan or extension of credit is not directly or indirectly made by an employee benefit plan;
    e. The loan or extension of credit begins on or after November 1, 1999 and is repaid or terminated no later than December 31, 2000.

For the purposes of section II, a Y2K problem is a disruption of computer operations resulting from a computer system's inability to process data because such system recognizes years only by the last two digits, causing a "00" entry to be read as the year "1900" rather than the year "2000."

Signed at Washington, D.C., this 28th day of March, 2000.

Ivan L. Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

requirements. The following sections describe who uses the information collected under each requirement, as well as how they use it. The purpose these requirements is to reduce employees' risk of death or serious injury by ensuring that forging machines used by them are in safe operating condition, and that they are able to clearly and properly identify manually operated valves and switches.

Inspection of Forging Machines, Guards, and Point-of-Operation Protection Devices (paragraphs (a)(2)(i) and (a)(2)(ii)). Paragraph (a)(2)(i) requires employers to establish periodic and regular maintenance safety checks, and to develop and keep a certification record of each inspection. The certification record must include the date of inspection, the signature of the person who performed the inspection, and the serial number (or other identifier) of the forging machine inspected. Under paragraph (a)(2)(ii), employers are to schedule regular and frequent inspections of guards and point-of-operation protection devices, and prepare a certification record of each inspection that contains the date of the inspection, the signature of the person who performed the inspection, and the serial number (or other identifier) of the equipment inspected. These inspection certification records provide assurance to employers, employees, and OSHA compliance officers that forging machines, guards, and point-of-operation protection devices have been inspected, assuring that they will operate properly and safely, thereby preventing impact injury and death to employees during forging operations. These records also provide the most efficient means for the compliance officers to determine that an employer is complying with the Standard.

Identification of Manually Controlled Valves and Switches (paragraphs (c), (h)(3), (i)(1) and (i)(2)). These paragraphs require proper and clear identification of manually operated valves and switches on presses, upsetters, boltheading equipment, and rivet-making machines, respectively. Marking valves and switches provide information to employees to ensure that they operate the forging machines correctly and safely.

Darrin A. King,

Acting Departmental Clearance Officer.

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application Number D–11047]

Amendment to Prohibited Transaction Exemption (PTE) 84–14 for Plan Asset Transactions Determined by Independent Qualified Professional Asset Managers

AGENCY: Employee Benefits Security Administration.

ACTION: Adoption of amendment to PTE 84–14.

SUMMARY: This document amends PTE 84–14, a class exemption that permits various parties that are related to employee benefit plans to engage in transactions involving plan assets if, among other conditions, the assets are managed by ''qualified professional asset managers'' (QPAMs), which are independent of the parties in interest and which meet specified financial standards. Additional exemptive relief is provided for employers to furnish limited amounts of goods and services to a managed fund in the ordinary course of business. Limited relief is also provided for leases of office or commercial space between managed funds and QPAMs or contributing employers. Finally, relief is provided for transactions involving places of public accommodation owned by a managed fund. The amendment affects participants and beneficiaries of employee benefit plans, the sponsoring employers of such plans, and other persons engaging in the described transactions.

DATES: Except where otherwise indicated herein, the amendment is effective August 23, 2005.

FOR FURTHER INFORMATION CONTACT: Christopher J. Motta or Karen E. Lloyd, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Room N–5649, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 693–8540 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On September 3, 2003, a notice was published in the **Federal Register** (68 FR 52419) of the pendency before the Department of Labor (the Department) of a proposed amendment to PTE 84–14 (49 FR 9494, March 13, 1984, as corrected at 50 FR 41430, October 10, 1985). PTE 84–14 provides an exemption from certain of the restrictions of section 406 of ERISA, and from certain taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code. The Department proposed to amend to PTE 84–14 on its own motion, pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).[1]

The notice of pendency gave interested persons an opportunity to comment on the proposed exemption. The Department received six comment letters. In general, the commenters expressed support for the proposed amendments. Upon consideration of all the comments received, the Department has determined to grant the proposed amendment, subject to certain modifications. These modifications and the major comments are discussed below.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether the regulatory action is ''significant'' and therefore subject to the requirements of

[1] Section 102 of the Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), generally transferred the authority of the Secretary of Treasury to issue administrative exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

For purposes of this exemption, references to specific provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This amendment has been drafted and reviewed in accordance with Executive Order 12866, section 1(b), Principles of Regulation. Pursuant to the terms of the Executive Order, it has been determined that this action is a ''significant regulatory action.'' Accordingly, this action has been reviewed by OMB.

Paperwork Reduction Act

The information collections in the exemption, as re-stated and amended in the adoption of Amendment to PTE 84–14, and in the Proposed Amendment to Prohibited Transaction Exemption 84–14 for Plan Asset Transactions Determined by Independent Qualified Professional Asset Managers have been combined in one ICR that is described in the Paperwork Reduction Act section of the Notice of the Proposed Amendment also published in this issue of the **Federal Register**.

Description of the Exemption

PTE 84–14 consists of four separate parts. The General Exemption, set forth in Part I, permits an investment fund managed by a QPAM to engage in a wide variety of transactions described in ERISA section 406(a)(1)(A) through (D) with virtually all parties in interest except the QPAM which manages the assets involved in the transaction and those parties most likely to have the power to influence the QPAM. In this regard, under section I(a), the exemption would not be available if a QPAM caused the investment fund to enter into a transaction with a party in interest dealing with the fund, if the party in interest or its ''affiliate,'' (1) was authorized to appoint or terminate the QPAM as a manager of any of the plan's assets, (2) was authorized to negotiate the terms of the management agreement with the QPAM (including renewals or modifications thereof) on behalf of the plan, or (3) had exercised such powers in the immediately preceding one year. Additionally, under section I(d), the QPAM may not cause the investment fund which it manages to engage in a transaction with itself or a ''related'' party. Section V(h) provides generally that a party in interest and a QPAM are ''related'' if either entity (or parties controlling or controlled by either entity) owns a five percent or more interest in the other entity.

Part II of the exemption provides limited relief under both section 406(a) and (b) of ERISA for certain transactions involving those employers and certain of their affiliates which could not qualify for the General Exemption provided by Part I. Part III of the exemption provides limited relief under section 406(a) and (b) of ERISA for the leasing of office or commercial space by an investment fund to the QPAM, an affiliate of the QPAM, or a person who could not qualify for the General Exemption provided by Part I because it held the power of appointment described in section I(a). Part IV of the exemption provides limited relief under section 406(a) and 406(b)(1) and (2) of ERISA for the furnishing of services and facilities by a place of public accommodation owned by an investment fund managed by a QPAM, to all parties in interest, if the services and facilities are furnished on a comparable basis to the general public.

In the notice published September 3, 2003, the Department proposed to amend the General Exemption of PTE 84–14 in several respects. With respect to section I(a) (power of appointment), the Department proposed to delete the ''one year look-back rule'' under which the exemption would have been unavailable to a party in interest if it had exercised the power of appointment within the one-year period preceding the transaction. The Department also proposed to clarify that section I(a)'s power of appointment refers only to the power to appoint the QPAM as manager of the assets involved in the transaction, as opposed to any of the plan's assets. In addition, the Department proposed to modify section I(a) to make the class exemption available to a party in interest with respect to a plan investing in a commingled investment fund, notwithstanding that the party in interest has the authority to redeem or acquire units of such a fund on behalf of the plan, if the plan's interest in the fund represents less than 10% of the investment fund's total assets. Finally, the Department proposed to amend section V(c), the definition of affiliate as it applies to section I(a) and Part II, to delete those partnerships in which the person has less than a 10 percent interest and to only include highly compensated employees as defined in section 4975(e)(2)(H) of the Code.

With respect to section I(d) and the definition of ''related'' under section V(h), the Department proposed to amend section V(h) to provide that a QPAM is ''related'' to a party in interest for purposes of section I(d) if:

- The QPAM or the party in interest owns a 10 percent or more interest in the other entity;
- A person controlling or controlled by the QPAM or the party in interest owns a 20 percent or more interest in the other entity; or
- A person controlling, or controlled, by the QPAM or the party in interest owns less than a 20 percent interest in the other entity, but nevertheless exercises control over the management or policies of the other party by reason of its ownership interest.

In addition, the Department proposed to modify section V(h) to provide that generally determinations of whether the QPAM is ''related'' to a party in interest for purposes of section I(d) may be made as of the last day of the most recent calendar quarter. Finally, the Department proposed to amend section V(h)(2) to provide that shares held in a fiduciary capacity need not be considered in applying the percentage limitations.

With respect to the definition of QPAM, the Department proposed to clarify that the phrase in section V(a)(4) ''as of the last day of its most recent fiscal year'' only modifies the term ''total client assets under its management and control in excess of $50,000,000,'' and does not refer to the shareholders' or partners' equity requirement.

The Department also proposed to adjust the $50 million of client assets under management standard utilized in section V(a)(4) to $85 million, to reflect the change in the Consumer Price Index. Additionally, the Department proposed to increase the shareholders' and partners' equity requirement from $750,000 to $1,000,000, to correspond to the preceding subsections of section V(a).

Finally, the Department proposed to clarify the exemption to specifically provide that a QPAM must be independent of an employer with respect to a plan whose assets are managed by the QPAM.

Written Comments

Comments on Proposed Amendments

QPAM Independence

A number of commenters addressed the Department's proposed clarification of the QPAM requirement that it must be independent of an employer with respect to a plan whose assets are managed by the QPAM. According to the commenters, many employers in the financial services industry believed, based on the advice of counsel, that they were eligible to serve as QPAMs for their own plans. One commenter stated that as in-house counsel it obtained written legal advice from outside ERISA counsel and, in good faith reliance on such advice, determined that the class exemption allowed an employer to act as QPAM for its own plan. According to the advice memorandum submitted to the Department for the record, the ERISA counsel noted that there are several exceptions to the availability of relief under Part I of the class exemption. The general exemption will not apply to transactions with parties in interest who have the power to appoint the QPAM. In addition, no relief is available for transactions with the QPAM or a person ''related to'' the QPAM. The memorandum concluded that there is no exception from the availability of Part I relief for situations in which the QPAM is both employer and asset manager.

Another comment submitted on behalf of an asset manager stated that its in-house counsel initially determined that the class exemption did not preclude the manager from acting as QPAM for its own plan based on legal advice from outside counsel; and, subsequently, this determination was confirmed by discussions in-house counsel had with outside counsel and with potential plan counterparties. Another commenter stated that, as in-house counsel to a large financial services organization, it concluded based upon its analysis that the class exemption permitted an investment manager to act as a QPAM for its own plan. In considering the issue, the commenter noted that the class exemption focuses on the relationship between the investment manager and the party in interest. According to the commenter, neither Part I, nor the related definitions and the general rules under Part V, make mention of the relationship between the plan sponsor and the investment manager.

The commenters stated further that they are unaware of any examples of abuse associated with an advisor acting as a QPAM for its own plan. In addition, these commenters argued that the other conditions of the exemption are sufficient to protect plans from abuse. These commenters urged the Department to reverse its position that a QPAM must be independent of an employer with respect to a plan whose assets are managed by the QPAM.

As to the assertion that many practioners were ''unaware'' of the scope of the independence requirement discussed in the paragraph above, the Department notes that the preamble to PTE 84–14 (49 FR 9497) states:

> This class exemption was developed, and is being granted, by the Department based on the essential premise that broad exemptive relief from the prohibitions of section 406(a) of ERISA can be afforded for all types of transactions in which a plan engages only if the commitments and the investments of plan assets and the negotiations leading thereto, are the sole responsibility of an independent investment manager. [Emphasis added.]

In addition, the Department has received informal comments from other practitioners who were aware of the requirement that a QPAM must be independent of an employer with respect to a plan whose assets are managed by the QPAM and so advised their clients.

After carefully considering the entire record, the Department acknowledges that good faith efforts appear to have been made by the regulated community to comply with the QPAM independence requirement, based on advice of counsel. Although the Department is not revising the final amendment to permit financial services entities to act as QPAMs for their own plans, we are providing limited retroactive and transitional relief herein.[2] Accordingly, the independent fiduciary requirement of the QPAM definition will not apply for the period from December 21, 1982, through the date on which the Department grants a final amendment to the QPAM class exemption which specifically addresses relief for a financial institution to act as investment manager for its own in-house plan. In addition, by notice appearing elsewhere in this issue of the **Federal Register**, the Department is publishing a notice of proposed amendment to PTE 84–14 that would permit a financial institution to act as a QPAM for its own plan.

[2] The Department notes that the definition of independent fiduciary in the final amendment has been re-designated section V(o). The Department has inserted as section V(n) the amendment to the QPAM class exemption pursuant to PTE 2002–13 (67 FR 9483, March 1, 2002) which defines the term ''employee benefit plan'' or ''plan.''

Definition of QPAM

As part of the proposed amendment, the Department clarified that the language in section V(a)(4) ''as of the last day of its most recent fiscal year'' only modified the term ''total client assets under its management * * *'' and not the term ''shareholders' or partners' equity.'' A commenter noted that the language ''as of the last day of its most recent fiscal year'' also appears in connection with the shareholders'/ partners' equity requirement in another portion of section V(a)(4), and requested that the Department delete that language. The Department concurs with the commenter and has deleted the language.

Assets Involved in the Transaction

The Department proposed to amend section I(a), the power of appointment rule, to focus only on the power of appointment over the plan assets involved in the transaction. One commenter requested that the definition of affiliate in section V(c) be similarly amended. In this regard, an affiliate of a person is defined in section V(c) to include:

> (3) Any director of the person or any employee of the person who is a highly compensated employee, as defined in section 4975(e)(2)(H) of the Code, or who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets. A named fiduciary (within the meaning of section 402(a)(2) of ERISA) of a plan and an employer any of whose employees are covered by the plan will also be considered affiliates with respect to each other for purposes of section I(a) if such employer or an affiliate of such employer has the authority, alone or shared with others, to appoint or terminate the named fiduciary or otherwise negotiate the terms of the named fiduciary's employment agreement.

The commenter requested that the portion of the definition that refers to ''any employee * * * who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets'' be amended to refer only to the plan assets involved in the transaction. Likewise, the commenter requested a similar amendment with respect to the language that refers to ''a named fiduciary of a plan * * *'' The Department concurs with this comment and has revised the final exemption accordingly.

''Related'' Definition

The Department has proposed to amend the definition in section V(h) for purposes of determining whether a QPAM is ''related'' to a party in interest, as follows:

A QPAM is ''related'' to a party in interest * * * if, as of the last day of its most recent calendar quarter, (i) the QPAM owns a ten percent or more interest in the party in interest; (ii) a person controlling, or controlled by, the QPAM owns a twenty percent or more interest in the party in interest; (iii) the party in interest owns a ten percent or more interest in the QPAM; or (iv) a person controlling, or controlled by, the party in interest owns a twenty percent or more interest in the QPAM. Notwithstanding the foregoing, a party in interest is ''related'' to a QPAM if: (i) a person controlling, or controlled by, the party in interest owns less than a twenty percent interest in the QPAM and such person exercises control over the management or policies of the QPAM by reason of its ownership interest, or (ii) a person controlling, or controlled by, the QPAM owns less than a twenty percent interest in the party in interest and such person exercises control over the management or policies of the party in interest by reason of its ownership interest.

One commenter suggested that the threshold for determining whether a QPAM and a party in interest are related be increased from a 10 percent or more interest to a 20 percent or more interest. Another commenter suggested that the last sentence of the definition under which the QPAM and a party in interest are considered related parties with an ownership interest of less than 20 percent due to the exercise of actual control, be amended so that only ownership interests of less than 20 percent but greater than 10 percent would be excluded under this part of the definition.

The Department has determined not to adopt the commenter's suggestion to raise the ownership interest from 10 percent to 20 percent. The Department believes that it is not overly burdensome for the QPAM and the party in interest to keep track of ownership interests in each other. In addition, the Department views a 10 percent interest in either the QPAM or the party in interest by the other entity as a meaningful measure for determining whether a QPAM is related to a party in interest. Lastly, the Department has determined to adopt the second comment for ease of administration of this provision. However, the Department cautions that a QPAM that engages in a transaction with a party that has actual control over it (regardless of the percentage of ownership involved) might be engaging in a violation of 406(b) of ERISA for which the General Exemption does not provide relief.

Transitional Relief

Several commenters urged the Department to delay the effective date for certain of the proposed amendments in order to give parties more time to comply with the changes. In particular, transitional relief was requested for the client assets under management requirement and the shareholders/partners' equity requirement for QPAMs that are investment advisers registered under the Investment Advisers Act of 1940 (section V(a)(4)). One commenter requested that the client assets under management and shareholders' or partners' equity standards be effective as of the first fiscal year following the publication of the final amendment in the **Federal Register**. Another commenter requested two fiscal years for a QPAM to comply with the increased assets under management standard and one fiscal year for the increased shareholders'/partners' equity standard.

The Department concurs that transitional relief is appropriate in these cases to permit QPAMs to conform to the amended exemption. Accordingly, the effective date of the new client assets under management and the shareholders'/partners' equity standards of section V(a)(4) will be as of the last day of the first fiscal year beginning on or after the date of publication of this amendment in the **Federal Register**. The coordination of this transitional relief with section V(m) of the exemption, which defines ''shareholders'' or partners' equity,'' may be illustrated by the following example:

As of December 31, 2004, QPAM A had $55,000,000 in total client assets under its management and control, and $800,000 in shareholders' equity as demonstrated by the most recent balance sheet prepared within the immediately preceding two years. Based on these amounts, QPAM A, which operates on a calendar year basis and prepares audited balance sheets as of the last day of each calendar year, may continue to act as a QPAM until December 30, 2006 [assuming that this final amendment is published during 2005]. If QPAM A wishes to continue operating as a QPAM after that date, QPAM A: (i) must have total client assets under management in excess of $85,000,000 as of the last day of the most recent fiscal year preceding the transaction, and (ii) must have, as of the date of the transaction, shareholders' equity in excess of $1,000,000 as shown in the most recent balance sheet prepared within the immediately preceding two years.

Securities Lending Class Exemption Amendment

In October 2003, the Department proposed to amend and restate Prohibited Transaction Exemptions 81–6 and 82–63, relating to securities lending arrangements (68 FR 60715, October 23, 2003). The class exemption, if granted, would incorporate both PTEs 81–6 and 82–63 and would expand those class exemptions to additional parties, subject to modified conditions. It was brought to the attention of the Department that PTE 81–6 is referenced in section I(b)(1) of the QPAM class exemption. The Department intends that, following the finalization of the proposed amendment and restatement of PTEs 81–6 and 82–63, section I(b)(1) will continue to exclude transactions described therein from relief under the QPAM class exemption. Accordingly, the reference to PTE 81–6 in section I(b), as well as the references to other class exemptions therein, have been amended to include the phrase ''as amended or superseded.''

Comments Requesting Additional Amendments

Newly Formed Entities Serving as QPAMs

Under PTE 84–14, a QPAM that is an investment adviser registered under the Investment Advisers Act of 1940 must satisfy the assets under management test of section V(a)(4) as of the last day of the QPAM's most recent fiscal year. A commenter noted that it is difficult for newly-formed entities to satisfy this test and requested instead that the QPAM be permitted to satisfy the test based on its last fiscal quarter as demonstrated on a quarterly balance sheet.

The Department notes that the original QPAM class exemption required the QPAM to satisfy the client assets under management standard as of the last day of its most recent fiscal year to ensure that entities serving as QPAMs are established financial institutions which are large enough to discourage the exercise of undue influence upon their decisionmaking processes. Therefore, the Department has determined not to revise this condition.

Veto or Approval Power

Commenters on the original QPAM class exemption requested that plan officials be permitted to retain ultimate investment decision-making authority with respect to transactions negotiated by a QPAM. The Department did not adopt the suggestions of the commenters because of its view that retention of a veto or approval power would be inconsistent with the underlying concept of the QPAM exemption. The Department noted in the preamble to the QPAM class exemption that if exemptive relief were to be provided where the QPAM has less than ultimate discretion over acquisitions for an investment fund that it manages, the potential for decision making with regard to plan assets that would inure to the benefit of a party in interest would

be increased. A commenter with respect to the proposed amendments noted that in the INHAM class exemption, which was granted subsequent to the QPAM class exemption, approval power is reserved to the plan sponsor for transactions involving $5 million or more. The commenter requested that the Department likewise amend the QPAM class exemption to permit approval or veto by plan officials.

The Department is not persuaded by the argument in favor of retention of a veto or approval power by the plan sponsor or its designee. The relief contained in the QPAM class exemption was predicated upon the existence of an independent, professional asset manager who is solely responsible for the discretionary management of plan assets that are transferred to its control. The QPAM class exemption did not provide relief for transactions involving the assets of plans managed by in-house asset managers. Conversely, the INHAM class exemption provided more limited relief for plan assets managed by an in-house manager, subject to a number of conditions, which reflected the differences between the QPAM and the INHAM class exemptions. Thus, for example, relief under the INHAM class exemption is predicated upon an annual exemption audit conducted by an independent auditor to assure compliance with the conditions of the exemption. Although the INHAM class exemption permits the plan sponsor to retain a veto or approval power, the Department notes that the plan's assets under the INHAM class exemption, unlike the QPAM class exemption, remain under the management of an affiliate of the plan sponsor. Accordingly, the Department has determined not to revise this condition.

Section I(e)—20% Limitation

Section I(e) provides that a QPAM may not enter into a transaction with a party in interest with respect to any plan whose assets managed by the QPAM, when combined with the assets of other plans maintained by the same employer or affiliates of the employer, represent more than 20 percent of the total client assets managed by the QPAM at the time of the transaction. One commenter suggested that the Department's grant of the INHAM class exemption indicated that it was no longer concerned about the potential for undue influence by plan sponsors on managers with large amounts of plan assets under management. As a result, the commenter proposed that the 20 percent limitation contained in section I(e) of the QPAM class exemption be eliminated or increased.

The Department notes that the relief provided under both the QPAM exemption and the INHAM exemption, as well as the conditions and restrictions contained in each exemption, were designed to address the issues unique to in-house management and the retention of an independent manager. Since in-house managers primarily manage the assets of in-house plans, it would not have been practical for the Department to impose a 20 percent limitation similar to that found in the QPAM exemption. However, the Department developed other conditions and safeguards that enabled it to provide relief to in-house managers, consistent with the findings under section 408(a) of the Act. In this regard, the Department continues to believe that the 20 percent limitation plays a role in ensuring that the investment decisions of a QPAM are not improperly influenced by any one large plan client. Therefore, the Department has determined not to modify the 20 percent limitation in the QPAM class exemption.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of ERISA which require, among other things, that a fiduciary discharge his or her duties respecting plan solely in the interests of the participants and beneficiaries of the plan. Additionally, the fact that a transaction is the subject of an exemption does not affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The Department finds that the amended exemption is administratively feasible, in the interests of plans and of their participants and beneficiaries, and protective of the rights of participants and beneficiaries of plans;

(3) The amended exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption; and

(4) The amended exemption is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Exemption

Under section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990), effective August 23, 2005, the Department amends PTE 84–14 as set forth below:

Part I—General Exemption

Effective as of August 23, 2005, the restrictions of ERISA section 406(a)(1)(A) through (D) and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A) through (D), shall not apply to a transaction between a party in interest with respect to an employee benefit plan and an investment fund (as defined in section V(b)) in which the plan has an interest, and which is managed by a qualified professional asset manager (QPAM) (as defined in section V(a)), if the following conditions are satisfied:

(a) At the time of the transaction (as defined in section V(i)) the party in interest, or its affiliate (as defined in section V(c)), does not have the authority to—

(1) Appoint or terminate the QPAM as a manager of the plan assets involved in the transaction, or

(2) Negotiate on behalf of the plan the terms of the management agreement with the QPAM (including renewals or modifications thereof) with respect to the plan assets involved in the transaction;

Notwithstanding the foregoing, in the case of an investment fund in which two or more unrelated plans have an interest, a transaction with a party in interest with respect to an employee benefit plan will be deemed to satisfy the requirements of section I(a) if the assets of the plan managed by the QPAM in the investment fund, when combined with the assets of other plans established or maintained by the same employer (or affiliate thereof described in section V(c)(1) of the exemption) or by the same employee organization, and managed in the same investment fund, represent less than 10 percent of the assets of the investment fund;

(b) The transaction is not described in—

(1) Prohibited Transaction Exemption 81–6 (46 FR 7527; January 23, 1981) (relating to securities lending arrangements) (as amended or superseded),

(2) Prohibited Transaction Exemption 83–1 (48 FR 895; January 7, 1983) (relating to acquisitions by plans of interests in mortgage pools) (as amended or superseded), or

(3) Prohibited Transaction Exemption 82–87 (47 FR 21331; May 18, 1982) (relating to certain mortgage financing arrangements) (as amended or superseded);

(c) The terms of the transaction are negotiated on behalf of the investment fund by, or under the authority and general direction of, the QPAM, and either the QPAM, or (so long as the QPAM retains full fiduciary responsibility with respect to the transaction) a property manager acting in accordance with written guidelines established and administered by the QPAM, makes the decision on behalf of the investment fund to enter into the transaction, provided that the transaction is not part of an agreement, arrangement or understanding designed to benefit a party in interest;

(d) The party in interest dealing with the investment fund is neither the QPAM nor a person related to the QPAM (within the meaning of section V(h));

(e) The transaction is not entered into with a party in interest with respect to any plan whose assets managed by the QPAM, when combined with the assets of other plans established or maintained by the same employer (or affiliate thereof described in section V(c)(1) of this exemption) or by the same employee organization, and managed by the QPAM, represent more than 20 percent of the total client assets managed by the QPAM at the time of the transaction;

(f) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the QPAM, the terms of the transaction are at least as favorable to the investment fund as the terms generally available in arm's length transactions between unrelated parties;

(g) Neither the QPAM nor any affiliate thereof (as defined in section V(d)), nor any owner, direct or indirect, of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of: any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving the larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or any other crime described in section 411 of ERISA. For purposes of this section (g), a person shall be deemed to have been "convicted" from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.

Part II—Specific Exemption for Employers

Effective as of August 23, 2005, the restrictions of sections 406(a), 406(b)(1) and 407(a) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code, by reason of Code section 4975(c)(1)(A) through (E), shall not apply to:

(a) The sale, leasing, or servicing of goods (as defined in section V(j)), or to the furnishing of services, to an investment fund managed by a QPAM by a party in interest with respect to a plan having an interest in the fund, if—

(1) The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in section V(c),

(2) The transaction is necessary for the administration or management of the investment fund,

(3) The transaction takes place in the ordinary course of a business engaged in by the party in interest with the general public,

(4) Effective for taxable years of the party in interest furnishing goods and services after August 23, 2005, the amount attributable in any taxable year of the party in interest to transactions engaged in with an investment fund pursuant to section II(a) of this exemption does not exceed one (1) percent of the gross receipts derived from all sources for the prior taxable year of the party in interest, and

(5) The requirements of sections I(c) through (g) are satisfied with respect to the transaction;

(b) The leasing of office or commercial space by an investment fund maintained by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if—

(1) The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in section V(c),

(2) No commission or other fee is paid by the investment fund to the QPAM or to the employer, or to an affiliate of the QPAM or employer (as defined in section V(c)), in connection with the transaction,

(3) Any unit of space leased to the party in interest by the investment fund is suitable (or adaptable without excessive cost) for use by different tenants,

(4) The amount of space covered by the lease does not exceed fifteen (15) percent of the rentable space of the office building, integrated office park, or of the commercial center (if the lease does not pertain to office space),

(5) In the case of a plan that is not an eligible individual account plan (as defined in section 407(d)(3) of ERISA), immediately after the transaction is entered into, the aggregate fair market value of employer real property and employer securities held by investment funds of the QPAM in which the plan has an interest does not exceed 10 percent of the fair market value of the assets of the plan held in those investment funds. In determining the aggregate fair market value of employer real property and employer securities as described herein, a plan shall be considered to own the same proportionate undivided interest in each asset of the investment fund or funds as its proportionate interest in the total assets of the investment fund(s). For purposes of this requirement, the term "employer real property" means real property leased to, and the term "employer securities" means securities issued by, an employer any of whose employees are covered by the plan or a party in interest of the plan by reason of a relationship to the employer described in subparagraphs (E) or (G) of ERISA section 3(14), and

(6) The requirements of sections I(c) through (g) are satisfied with respect to the transaction.

Part III—Specific Lease Exemption for QPAMs

Effective as of August 23, 2005, the restrictions of section 406(a)(1)(A) through (D) and 406(b)(1) and (2) of ERISA and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the leasing of office or commercial space by an investment fund managed by a QPAM to the QPAM, a person who is a party in interest of a

plan by virtue of a relationship to such QPAM described in subparagraphs (G), (H), or (I) of ERISA section 3(14) or a person not eligible for the General Exemption of Part I by reason of section I(a), if—

(a) The amount of space covered by the lease does not exceed the greater of 7500 square feet or one (1) percent of the rentable space of the office building, integrated office park or of the commercial center in which the investment fund has the investment,

(b) The unit of space subject to the lease is suitable (or adaptable without excessive cost) for use by different tenants,

(c) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the QPAM, the terms of the transaction are not more favorable to the lessee than the terms generally available in arm's length transactions between unrelated parties, and

(d) No commission or other fee is paid by the investment fund to the QPAM, any person possessing the disqualifying powers described in section I(a), or any affiliate of such persons (as defined in section V(c)), in connection with the transaction.

Part IV—Transactions Involving Places of Public Accommodation

Effective as of August 23, 2005, the restrictions of section 406(a)(1)(A) through (D) and 406(b)(1) and (2) of ERISA and the taxes imposed by Code section 4975(a) and (b), by reason of Code section 4975(c)(1)(A) through (E), shall not apply to the furnishing of services and facilities (and goods incidental thereto) by a place of public accommodation owned by an investment fund managed by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if the services and facilities (and incidental goods) are furnished on a comparable basis to the general public.

Part V—Definitions and General Rules

For purposes of this exemption:

(a) The term ''qualified professional asset manager'' or ''QPAM'' means an independent fiduciary (as defined in section V(o)) which is—

(1) A bank, as defined in section 202(a)(2) of the Investment Advisers Act of 1940 that has the power to manage, acquire or dispose of assets of a plan, which bank has, as of the last day of its most recent fiscal year, equity capital (as defined in section V(k)) in excess of $1,000,000 or

(2) A savings and loan association, the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, that has made application for and been granted trust powers to manage, acquire or dispose of assets of a plan by a State or Federal authority having supervision over savings and loan associations, which savings and loan association has, as of the last day of its most recent fiscal year, equity capital (as defined in section V(k)) or net worth (as defined in section V(l)) in excess of $1,000,000 or

(3) An insurance company which is qualified under the laws of more than one State to manage, acquire, or dispose of any assets of a plan, which company has, as of the last day of its most recent fiscal year, net worth (as defined in section V(l)) in excess of $1,000,000 and which is subject to supervision and examination by a State authority having supervision over insurance companies, or

(4) An investment adviser registered under the Investment Advisers Act of 1940 that has total client assets under its management and control in excess of $50,000,000 as of the last day of its most recent fiscal year, and either (A) shareholders' or partners' equity (as defined in section V(m)) in excess of $750,000, or (B) payment of all of its liabilities including any liabilities that may arise by reason of a breach or violation of a duty described in sections 404 and 406 of ERISA is unconditionally guaranteed by—(i) A person with a relationship to such investment adviser described in section V(c)(1) if the investment adviser and such affiliate have shareholders' or partners' equity, in the aggregate, in excess of $750,000, or (ii) A person described in (a)(1), (a)(2) or (a)(3) of section V above, or (iii) A broker-dealer registered under the Securities Exchange Act of 1934 that has, as of the last day of its most recent fiscal year, net worth in excess of $750,000; and (C) effective as of the last day of the first fiscal year of the investment adviser beginning on or after August 23, 2005, substitute ''$85,000,000'' for ''$50,000,000'' and ''$1,000,000'' for ''$750,000'' in (a)(4)(A) or (B) of section V above;

Provided that such bank, savings and loan association, insurance company or investment adviser has acknowledged in a written management agreement that it is a fiduciary with respect to each plan that has retained the QPAM.

(b) An ''investment fund'' includes single customer and pooled separate accounts maintained by an insurance company, individual trusts and common, collective or group trusts maintained by a bank, and any other account or fund to the extent that the disposition of its assets (whether or not in the custody of the QPAM) is subject to the discretionary authority of the QPAM.

(c) For purposes of section I(a) and Part II, an ''affiliate'' of a person means—

(1) Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person,

(2) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, 10 percent or more partner (except with respect to Part II this figure shall be 5 percent), or highly compensated employee as defined in section 4975(e)(2)(H) of the Code (but only if the employer of such employee is the plan sponsor), and

(3) Any director of the person or any employee of the person who is a highly compensated employee, as defined in section 4975(e)(2)(H) of the Code, or who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets involved in the transaction. A named fiduciary (within the meaning of section 402(a)(2) of ERISA) of a plan with respect to the plan assets involved in the transaction and an employer any of whose employees are covered by the plan will also be considered affiliates with respect to each other for purposes of section I(a) if such employer or an affiliate of such employer has the authority, alone or shared with others, to appoint or terminate the named fiduciary or otherwise negotiate the terms of the named fiduciary's employment agreement.

(d) For purposes of section I(g) an ''affiliate'' of a person means—

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person,

(2) Any director of, relative of, or partner in, any such person,

(3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, or a 5 percent or more partner or owner, and

(4) Any employee or officer of the person who—

(A) Is a highly compensated employee (as defined in section 4975(e)(2)(H) of the Code) or officer (earning 10 percent or more of the yearly wages of such person), or

(B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.

(e) The term ''control'' means the power to exercise a controlling influence over the management or

policies of a person other than an individual.

(f) The term ''party in interest'' means a person described in ERISA section 3(14) and includes a ''disqualified person,'' as defined in Code section 4975(e)(2).

(g) The term ''relative'' means a relative as that term is defined in ERISA section 3(15), or a brother, a sister, or a spouse of a brother or sister.

(h) A QPAM is ''related'' to a party in interest for purposes of section I(d) of this exemption if, as of the last day of its most recent calendar quarter: (i) the QPAM owns a ten percent or more interest in the party in interest; (ii) a person controlling, or controlled by, the QPAM owns a twenty percent or more interest in the party in interest; (iii) the party in interest owns a ten percent or more interest in the QPAM; or (iv) a person controlling, or controlled by, the party in interest owns a twenty percent or more interest in the QPAM. Notwithstanding the foregoing, a party in interest is ''related'' to a QPAM if: (i) a person controlling, or controlled by, the party in interest has an ownership interest that is less than twenty percent but greater than ten percent in the QPAM and such person exercises control over the management or policies of the QPAM by reason of its ownership interest; (ii) a person controlling, or controlled by, the QPAM has an ownership interest that is less than twenty percent but greater than ten percent in the party in interest and such person exercises control over the management or policies of the party in interest by reason of its ownership interest. For purposes of this definition:

(1) The term ''interest'' means with respect to ownership of an entity—

(A) The combined voting power of all classes of stock entitled to vote or the total value of the shares of all classes of stock of the entity if the entity is a corporation,

(B) The capital interest or the profits interest of the entity if the entity is a partnership, or

(C) The beneficial interest of the entity if the entity is a trust or unincorporated enterprise; and

(2) A person is considered to own an interest if, other than in a fiduciary capacity, the person has or shares the authority—

(A) To exercise any voting rights or to direct some other person to exercise the voting rights relating to such interest, or

(B) To dispose or to direct the disposition of such interest.

(i) The time as of which any transaction occurs is the date upon which the transaction is entered into. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into on or after December 21, 1982, or a renewal that requires the consent of the QPAM occurs on or after December 21, 1982 and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, the requirements will continue to be satisfied thereafter with respect to the transaction. Notwithstanding the foregoing, this exemption shall cease to apply to a transaction exempt by virtue of Part I or Part II at such time as the percentage requirement contained in section I(e) is exceeded, unless no portion of such excess results from an increase in the assets transferred for discretionary management to a QPAM. For this purpose, assets transferred do not include the reinvestment of earnings attributable to those plan assets already under the discretionary management of the QPAM. Nothing in this paragraph shall be construed as exempting a transaction entered into by an investment fund which becomes a transaction described in section 406 of ERISA or section 4975 of the Code while the transaction is continuing, unless the conditions of this exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption.

(j) The term ''goods'' includes all things which are movable or which are fixtures used by an investment fund but does not include securities, commodities, commodities futures, money, documents, instruments, accounts, chattel paper, contract rights and any other property, tangible or intangible, which, under the relevant facts and circumstances, is held primarily for investment.

(k) For purposes of section V(a)(1) and (2), the term ''equity capital'' means stock (common and preferred), surplus, undivided profits, contingency reserves and other capital reserves.

(l) For purposes of section V(a)(3), the term ''net worth'' means capital, paid-in and contributed surplus, unassigned surplus, contingency reserves, group contingency reserves, and special reserves.

(m) For purposes of section V(a)(4), the term ''shareholders' or partners' equity'' means the equity shown in the most recent balance sheet prepared within the two years immediately preceding a transaction undertaken pursuant to this exemption, in accordance with generally accepted accounting principles.

(n) The terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

(o) For purposes of section V(a), the term ''independent fiduciary'' means a fiduciary managing the assets of a plan in an investment fund that is independent of and unrelated to the employer sponsoring such plan. For purposes of this exemption, the independent fiduciary will not be deemed to be independent of and unrelated to the employer sponsoring the plan if such fiduciary directly or indirectly controls, is controlled by, or is under common control with the employer sponsoring the plan. Notwithstanding the foregoing, for the period from December 21, 1982, through the date on which the Department grants a final amendment which addresses relief for financial institutions that serve as investment managers for their own plans, a QPAM managing the assets of a plan in an investment fund will not fail to satisfy the requirements of section V(a) solely because such fiduciary is the employer sponsoring the plan or directly or indirectly controls, is controlled by, or is under common control with the employer sponsoring the plan.

Signed at Washington, DC, this 11th day of August, 2005.

Ivan L. Strasfeld,

Director, Office of Exemption, Determinations, Employee Benefits Security Administration, Department of Labor.

[Prohibited Transaction Exemption 96-23;

Application Number D-09602]

Class Exemption for Plan Asset Transactions Determined by

In-House Asset Managers

Agency: Pension and Welfare Benefits Administration, Labor.

Action: Grant of class exemption.

Summary: This document contains a final exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from certain taxes imposed by the Internal Revenue Code of 1986 (the Code). The exemption permits various transactions involving employee benefit plans whose assets are managed by in-house managers (INHAMS), provided that the conditions of the exemption are met. The exemption affects participants and beneficiaries of employee benefit plans, the sponsoring employers of such plans, INHAMS, and other persons engaging in the described transactions.

EFFECTIVE DATE: The effective date of the exemption is April 10, 1996.

FOR FURTHER INFORMATION CONTACT: Lyssa Hall or Virginia J. Miller, Pension and Welfare Benefits Administration, Office of Exemption Determinations, U.S. Department of Labor, Washington, DC 20210, (202) 219-8971 (not a toll-free number) or Paul D. Mannina, Plan Benefits Security Division, Office of the Solicitor, (202) 219-9141 (not a toll-free number).

Supplementary Information: Exemptive relief for the transactions described herein was requested in an application dated December 16, 1993 submitted by the Committee on Investment of Employee Benefit Assets (CIEBA), pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR section 2570 subpart B (55 FR 32836 August 10, 1990).

On March 24, 1995, the Department published a notice in the Federal Register (60 FR 15597) of the pendency of a proposed class exemption from certain of the restrictions of sections 406 and 407(a) of ERISA and from certain taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code.1

The notice gave interested persons an opportunity to submit written comments or requests for a hearing on the proposed class exemption to the Department. The Department received fourteen written comments and no requests for a public hearing. Upon consideration of all of the comments received, the Department has determined to grant the proposed class exemption, subject to certain modifications. These modifications and the major comments are discussed below.

Discussion of the Comments

A. Basic Exemption

1. INHAM as Decision Maker (Section I(a)). The proposed general exemption, set forth in Part I, permitted that portion of a plan that is managed by an INHAM to engage in all transactions described in section 406(a)(1)(A) through (D) with virtually all party in interest service providers except the INHAM or a person related to the INHAM. Under section I(a) of the proposed exemption, the INHAM must function as the decision maker for the plan in all covered transactions. Specifically, section I(a) requires that the terms of the transaction be

negotiated by, or under the authority and general direction of, the INHAM and that the INHAM make the decision to enter into the transaction.

Under section I(a) of the proposal, the exemption would be available for a transaction involving an amount in excess of $5,000,000 notwithstanding the fact that the transaction that had been negotiated by the INHAM was subject to a veto or approval by the plan sponsor. A commenter suggested that section I(a) should be modified to permit the plan sponsor or its designee to retain the right to veto or approve any transaction, regardless of the size of the transaction. Although the exemption permits the retention of a veto power for large transactions, the exemption was developed based on the premise that independent decisionmaking was more likely to be assured if day to day transactions are negotiated and approved by an INHAM. Therefore, the Department has determined not to adopt the commenter's suggestion.

A commenter is concerned that the requirement under section I(a) of the proposal that the INHAM negotiate and make the decision on behalf of the plan to enter into the transaction may foreclose a transaction where an INHAM retains a QPAM to locate and negotiate the terms of a possible plan investment. According to the commenter, it is frequently advantageous for a plan to retain a QPAM to identify investment opportunities and to negotiate the terms of these types of investments, while permitting the INHAM to perform its own "due diligence" review of each investment opportunity presented and evaluate the appropriateness of the investment for the plan's particular investment needs. The Department does not believe that it would be appropriate in the context of this exemption proceeding to modify the INHAM exemption to, in effect, permit a transaction that was previously rejected by the Department during its consideration of the final QPAM class exemption.2

A commenter questioned whether Part I of the exemption would apply to "drag along" and similar transactions that are not actually negotiated by the INHAM. According to the commenter, when a plan makes an investment in a non-publicly traded entity, both the plan and other investors want to be able to dispose of their investment at a favorable price. In order to accomplish this objective, plans and other investors may negotiate certain rights at the time they make their initial investments. One such right would be the ability of the plan to "tag along" and sell out its interest at the same price as the majority investors if the majority investors sell their interests to a third party. The converse of this right would be the ability of the majority investors to "drag along" the plan if they sell their interest to a third party. When these rights are exercised, it may turn out that the party to whom the interests are sold is a party in interest. The commenter argues that the "drag along" or similar transactions should be treated as subordinate to the initial investment transaction and, therefore, subject to the authority or general direction of the INHAM for purposes of section I(a) of the exemption. The commenter represents that, while the INHAM is not involved in selecting the party to whom the plan's interest is sold, the transaction is determined by an independent party pursuant to rights negotiated by the INHAM at arm's- length at the outset of the investment transaction. The commenter further represents that these rights would be taken into account by the INHAM in determining whether the initial investment would be prudent. It is the view of the Department that section I(a) of the exemption will be deemed satisfied in the case of "drag along" or similar transactions that are entered into pursuant to rights that were negotiated by the INHAM as part of the primary investment transaction. The Department notes, however, that it does not interpret section I(a) as exempting a "drag along" or similar transaction unless such transaction is itself subject to relief under the exemption and the applicable conditions are otherwise met. In this regard, the Department expects that any determination regarding the appropriate price to be paid for the investment would reflect the effect on the value of such investment of rights which may be exercised in the future at the discretion of unrelated third persons.

One commenter requested that the Department clarify that the requirements of section I(a) would be met if an officer of the INHAM also serves as a member of the employer's investment committee or other named fiduciary under the plan. Nothing contained in section I(a) would preclude an officer of the INHAM from also serving as a member of the employer's investment committee or other named fiduciary under the plan, provided that the INHAM otherwise meets the definition set forth in section IV(a), including the requirement that the INHAM must be a separate entity that is registered as an investment adviser.

A commenter requested that the Department clarify that the requirements of section I(a) will be satisfied notwithstanding the fact that the INHAM also manages assets of outside clients.

In the Department's view, nothing contained in the exemption would preclude the INHAM from providing services to outside clients who have no affiliation with the INHAM.

In response to a comment regarding typical investment increments used in financial transactions, the Department has revised section I(a) by replacing "an amount in excess of $5,000,000" to "$5,000,000 or more" in connection with the plan sponsor's right to veto or approve such transactions.

2. Transactions Involving Arrangements Designed to Benefit Parties in Interest (Section I(c)). Section I(c) of the proposal requires that the transaction not be part of an agreement, arrangement or understanding designed to benefit a party in interest. A commenter suggested that the Department clarify that to the extent that the INHAM's purpose in entering into a transaction is not to benefit a party in interest, so that any benefit to the party in interest is incidental to the purpose of the transaction, the transaction should not give rise to an agreement, arrangement or understanding designed to benefit a party in interest which is described in section I(c). The Department concurs with the commenter and notes that the intent of the condition in section I(c) was not to deny direct benefits to other parties to a transaction but, rather, to exclude relief for transactions that are part of a broader overall agreement, arrangement or understanding designed to benefit parties in interest.

3. Transactions with Service Providers (Section I(e)). Under section I(e) of the proposed exemption, relief was limited to transactions with party in interest service providers who do not have discretionary authority or control with respect to the assets involved in the transaction or otherwise render investment advice with respect to such assets. A commenter urged the Department to expand the scope of the final exemption to include relief for all parties in interest. The Department does not believe that a sufficient showing has been made that the safeguards contained in the proposed exemption would adequately discourage the exercise of undue influence upon the INHAM if the final exemption were expanded as requested by the commenter. Accordingly, the Department cannot conclude that further relief is warranted.

Several commenters suggested that the Department clarify that section I(e) of the proposal would not preclude a directed trustee of a plan or a trustee with discretionary authority over plan assets not involved in the transaction from engaging in transactions with the plan. In the Department's view, a nondiscretionary trustee subject to the direction of an INHAM, and that does not otherwise render investment advice with respect to the plan assets involved in the transaction may carry out proper directions that are not contrary to ERISA with respect to the transactions covered by the class exemption. Similarly, the exemption would be available for transactions with a trustee that exercises investment discretion with respect to a portion of plan assets not involved in the transaction.

Another commenter objected to the requirement in section I(e)(2) that the party in interest dealing with the plan not have discretionary authority or control with respect to the investment of the plan assets involved in the transaction and not render investment advice (within the meaning of 29 CFR 2510.3-21(c)) with respect to those assets. According to the commenter, the first part of this condition regarding discretionary authority or control is unnecessary in view of the requirement under section I(a) that the terms of the transaction must be negotiated by the INHAM, and that the INHAM make the decision on behalf of the plan to enter into the transaction. The commenter further believed that the requirement contained in section I(e)(2) that the party in interest dealing with the plan not render "investment advice" would create uncertainty and is unnecessary in view of the limited scope of relief provided. Accordingly, the commenter requests that the Department eliminate this requirement from the final exemption.

This class exemption was developed, and is being granted by the Department, based on the essential premise that broad exemptive relief from the prohibitions of section 406(a) of ERISA can be afforded for all types of service provider transactions in which a plan engages only if the INHAM independently negotiates the transaction and makes the decision on behalf of the plan to enter into the transaction. The limitations contained in section I(e)(2) were included in the proposal in order to further emphasize that the INHAM must be the decision-maker in order for transactions to be covered by the class exemption. In addition, the Department believes that, if exemptive relief were to be provided where the party in interest renders investment advice to the plan, with respect to the transaction at issue, the potential for decision making with regard to the plan assets that would inure to the benefit of a party in interest would be increased. For these reasons, the Department believes that a separate condition is warranted and has determined not to revise the exemption as requested by the commenter.

4. Fiduciary Audit (Section I(g)). Section I(g) of the proposed exemption required that an independent auditor conduct an annual fiduciary audit to determine whether the written procedures adopted by the INHAM are designed to assure compliance with the conditions of the exemption. Section IV(f) defined fiduciary audit as including: (1) a determination by the auditor as to whether or not the plan has developed adequate internal policies and procedures designed to assure compliance with the terms of the exemption; (2) a test of a representative sample of the plan's transactions to determine operational compliance with such policies and procedures; (3) a determination as to whether the INHAM meets the definition of INHAM set forth in the exemption; and (4) a written report describing the steps performed by the auditor during the course of its review and the auditor's findings and recommendations.

Several commenters requested that the Department clarify the types of "policies and procedures" that the INHAM is required to adopt for purposes of sections I(g) and IV(f) of the proposal, and the criteria the

independent auditor should apply in conducting the audit. Another commenter recommended that the audit be conducted in accordance with standards established by the American Institute of Certified Public Accountants (AICPA), and that the Department establish criteria against which the independent auditor can make a determination that the procedures are designed to operate in the manner contemplated by the exemption. In this regard, a commenter raised a related question concerning whether the proposed audit condition would require that the policies and procedures include substantive criteria regarding expected risk, gross return and expenses of a proposed transaction that the INHAM should consider. One commenter suggested that the scope of the audit should be expanded to include a determination by the auditor regarding compliance with section 404(a) of ERISA. Lastly, a commenter urged the Department to delete this requirement entirely.

As noted in the preamble to the proposed exemption, the Department proposed the audit requirement in order to address the lack of independence of the INHAM. The Department continues to believe that an annual fiduciary audit is necessary to address this lack of independence and, accordingly, has determined not to delete this requirement. In this regard, it was the Department's intent that the role of the auditor would be limited to determining whether the written procedures adopted by the INHAM are designed to assure compliance with the conditions of the exemption. Since the sole purpose of the audit requirement is to assure compliance with the exemption, the Department does not believe that it would be appropriate to expand the scope of this requirement to include either determinations under section 404 of the Act or determinations regarding the appropriateness of investments entered into under the exemption. In response to the comment concerning the adoption of AICPA standards as part of the audit requirement, the Department does not believe that it would be appropriate to adopt a definition that would require compliance with standards developed by certain professional organizations. However, in consideration of the concerns expressed by the commenters, the Department has adopted a new section I(g) which specifically requires that the INHAM adopt written policies and procedures designed to assure compliance with the conditions of the exemption. (The fiduciary audit requirement, set forth in section I(g) of the proposal, has been renumbered as section I(h) under the final exemption.) The Department has also adopted a new definition, under section IV(g), that contains a list of the objective requirements of the exemption that must be described in the written policies and procedures and that must be reviewed by the auditor.3 In addition, the Department notes that, although the exemption provides flexibility with respect to the specific procedures adopted by the INHAM, it expects such procedures to be designed in a manner that assures that the INHAM's operations are consistent with the requirements of the exemption.

On a related issue, another commenter noted that the role of the auditor under the exemption should be limited to determining compliance with policies and procedures designed by the INHAM and should not include a determination by the auditor as to whether the plan has developed adequate policies and procedures as required under section IV(f) of the proposal. According to the commenter, having the auditor review the adequacy of the procedures would expand the auditor's role beyond the typical role of an independent auditor. In response to the commenter, the Department has determined to modify section IV(f) to delete the requirement that the auditor make a determination regarding the adequacy of the policies and procedures adopted by the INHAM. Under the revised section IV(f)(1), the auditor would be required to review the policies and procedures for consistency with the objective requirements of the exemption. In light of the decision to revise section (IV)(f)(1), the Department has also determined to expand section IV(f)(2) to require the auditor to test for compliance with both the written policies and procedures adopted by the INHAM and the objective requirements of the exemption. In the Department's view, this revised condition will help to assure that the INHAM properly carries out its responsibilities under the exemption.

A commenter noted that the proposal did not make clear the consequences on existing transactions of an unsatisfactory audit. In response to the comment, the Department notes that an adverse finding in the auditor's report would not, in itself, render the exemption unavailable for any transaction engaged in by the INHAM on behalf of the plan.4 However, if a transaction did not meet a condition of the exemption (e.g., because relief was not available for transactions with the party with whom the INHAM dealt), the exemption would not be available for that transaction, but the exemption would continue to be available for those transactions that did satisfy its conditions. Conversely, a failure to comply with the general terms of the exemption applicable to all transactions would render the exemption unavailable, regardless of whether the failure is identified in the audit. Thus, if the INHAM failed to adopt policies and procedures that complied with the requirements of section I(g) or if no audit were conducted, the exemption would not cover transactions engaged in on behalf of the plan by the INHAM.

Several commenters were concerned that the exemption could be interpreted to mean that only financial accounting firms or auditing firms could conduct the fiduciary audit required under section I(g) of the proposal. According to the commenters, other types of financial service organizations may well be capable of conducting a fiduciary audit. The Department did not intend to limit eligibility to serve as independent auditors under the exemption solely to accounting or auditing firms. Accordingly, any person who otherwise possesses the

requisite technical training and proficiency with ERISA's fiduciary responsibility provisions may conduct a fiduciary audit.

A number of commenters also requested that we clarify the requirement that the person performing the fiduciary audit must be "independent". In the Department's view, whether an auditor is independent for purposes of the exemption would depend on the particular facts and circumstances of each case. However, the Department would not view an auditor as independent under circumstances where the auditor has a financial interest, including an ownership interest, in the INHAM , the employer, any parties dealing with the plan under the exemption, or any affiliates thereof, or otherwise receives more than a de minimis amount of its compensation from the INHAM, the employer, its affiliates, or the plan.

One commenter questioned whether the auditor performing the fiduciary audit can be an entity or individual who provides other services to the plan, e.g., the firm that audits the plan in connection with preparation of the plan's annual report (Form 5500). In the Department's view, the provision of other services would not, in itself, preclude a firm from meeting the requirement under the exemption that the person performing the fiduciary audit must be independent. However, the Department notes that the provision of other services could raise questions regarding the independence of the auditor if the aggregate services result in the auditor deriving more than a de minimis amount of its compensation from the INHAM, the employer, its affiliates, or the plan.

One of the commenters expressed concern about how the audit requirement would apply to the condition, contained in section I(b), that the transaction not be described in certain specified class exemptions. The commenter suggested that the auditor's role regarding this condition should be limited to a finding as to whether the transaction is of the type described in the specified class exemptions, rather than a finding regarding compliance with the terms and conditions of such class exemptions. The Department concurs with this comment. The Department believes, however, that it is the ongoing responsibility of the INHAM to determine whether a transaction is covered by one of the specified class exemptions or the INHAM exemption.

A commenter suggested that the Department revise the requirement under section I(g) of the proposal that the independent auditor must have appropriate technical training and proficiency with ERISA's fiduciary responsibility provisions. According to the commenter, the most likely candidates to conduct an audit are people who have experience with ERISA's fiduciary responsibility provisions rather than technical training. On the basis of this comment, the Department has determined to modify section I(g) to provide that the independent auditor must have appropriate technical training or experience, and proficiency with ERISA's fiduciary responsibility provisions. Another commenter urged the Department to delete this requirement entirely. In response to this comment, the Department believes that the requirement that the auditor be familiar with ERISA's fiduciary responsibility provisions provides an additional protection under the class exemption. Therefore, the Department has determined not to further revise this condition.

According to a commenter, the language in section IV(f)(4) of the proposal, which provides that the auditor must make recommendations in its written report, would require the auditor to go beyond its auditing role of providing findings regarding compliance. The Department concurs with this comment and, accordingly, has deleted the words "and recommendations" from section IV(f). In response to a related comment, the Department has deleted the words "among other things" from the definition of fiduciary audit in order to clarify that the definition sets out the specific steps for a fiduciary audit. The Department cautions that the auditor would be responsible for taking any actions necessary to adequately perform the steps described in the definition of fiduciary audit.

A commenter suggested that the Department modify sections I(g) and IV(f) by deleting the word "fiduciary" from "fiduciary audit" wherever it appears in those sections and substituting the word "exemption" to reflect the fact that the auditor's role is to assure compliance with the policies and procedures established for purposes of the exemption and does not otherwise involve examining for compliance with ERISA's fiduciary responsibility provisions. The Department concurs with the commenter's suggestion and has modified the exemption accordingly.

The following examples illustrate the types of transactions which would be covered by Part I of the exemption:

(1) Corporation C designates INHAM X to manage a portion of Plan P's assets. Assume that X meets the criteria for an INHAM under the exemption. X uses Plan P assets to purchase a building from Y, a wholly-owned subsidiary of a broker-dealer that provides services to the Plan. Absent this exemption, the purchase of the building from Y, a party in interest described in ERISA section 3(14)(G), would violate the restrictions contained in section 406(a)(1)(A), and the transaction could not proceed until exempted by the Department. The general exemption set forth in Part I would allow such transaction if the conditions contained therein are met.

(2) INHAM X invests part of a pension fund's assets to acquire a parcel of unimproved real property from the president of the employer sponsoring the Plan. Part I does not provide an exemption for the purchase of the property since relief is limited under that Part to transactions with service providers and their affiliates. In addition, no relief would be provided under the exemption for the act of self-dealing described in section 406(b)(1) arising in connection with X's use of the fund's assets in a transaction that benefits a person in whom X has an interest that may affect the exercise of its best judgement as a fiduciary.

(3) Corporation C is the named fiduciary of Plan P. C chooses INHAM X to manage the portion of P's assets allocated for real estate investments. X, using its discretionary authority, locates and negotiates the purchase for $6 million of a commercial building in New York that is being offered for sale by Corporation Z. Z provides accounting services to Plan P. Pursuant to its arrangement with C, X is required to seek the approval of C for all real estate transactions involving amounts of $5 million or more. On the basis of X's recommendation, C approves the transaction. Despite the retention of approval power by C, Part I of the exemption would be available for the purchase of the building provided there is no arrangement with C that requires X to buy the building from Z and the conditions of Part I are otherwise met.

(4) Corporation C allocates part of the assets of its Plan P to a master trust managed by INHAM X. X uses master trust assets to purchase an office building that is subsequently leased to M. M provides administrative services to Plan P. During the term of the lease, M becomes a wholly-owned subsidiary of Corporation C. Although M is no longer a party in interest with respect to Plan P solely by reason of providing services to such Plan, Part I will continue to be available for the entire lease term since, at the time the transaction was entered into (as defined in section IV(e)), M was not affiliated with the plan sponsor and its relationship to Plan P was solely that of a service provider.

(5) INHAM X retains Broker-Dealer B to provide brokerage services to Plan P. In a separate transaction, X uses Plan P assets to purchase corporate bonds directly from B. The bonds were originally issued by Corporation Z, an investment manager for a portion of the Plan's assets that are not controlled by INHAM X. Since the Department expects that, as part of its fiduciary responsibilities, the INHAM would have analyzed the terms of the bonds prior to purchase, the relief provided by Part I could extend to both the acquisition of the bonds and the underlying extension of credit. Thus, Part I could cover a subsidiary transaction with a party in interest if such transaction is itself subject to relief under the exemption and the applicable conditions are otherwise met.

(6) Corporation C designates INHAM X to manage a portion of Plan P's assets. X uses plan assets to purchase an office building that is subsequently leased to Broker-Dealer BD, a non-party in interest with respect to Plan P. During the term of the lease, BD becomes a service provider to Plan P. Although BD was not a party in interest service provider at the time the lease was executed, section IV(e) provides that Part I of the exemption would be available for the entire lease term provided that the remaining conditions of the exemption were met at the time the transaction was entered into. Alternatively, section IV(e) provides that Part I of the exemption would be available to exempt the transaction if the conditions of the exemption were met as of the time the transaction would have become prohibited.

B. Specific Exemptions for Employers

A commenter urged the Department to expand the relief provided under Part II of the proposal to permit an INHAM to select an affiliate to provide telecommunications related goods and services to any real property that may be considered an asset of the plan or to an entity in which the plan owns a controlling interest and that is managed by an INHAM. While the commenter has identified the need for exemptive relief, the Department does not believe that it has sufficient information on the record at this time to provide additional relief for a class of transactions that would otherwise violate section 406(b) of ERISA. Finally, the Department believes that adoption of the commenter's suggestion would arbitrarily favor one specific industry over another under similar circumstances.

C. Definitions

1. INHAM (Section IV(a)). A commenter requested that the definition of an INHAM be revised to include a division or group within the employer's management structure. The Department believes that an INHAM that is organized as a separate legal entity, is separately managed, and is subject to oversight by the Securities and Exchange Commission as a result of registration as an investment adviser under the Investment Advisers Act of 1940 provides an important safeguard under the exemption. Therefore, the Department cannot conclude that further relief is warranted.

Another commenter suggested that the Department modify the definition of INHAM to permit a majority-owned

subsidiary of an employer, or a direct or indirect majority-owned subsidiary of a parent organization of such an employer to serve as an INHAM. The Department does not believe that a sufficient showing has been made that the requirement that the INHAM be wholly-owned under the proposal would raise compliance problems for those persons intending to use the exemption. Accordingly, the Department has determined not to revise the final exemption as requested.

Several commenters urged the Department to expand the definition of an INHAM to include an entity established by a multiemployer plan or its plan sponsor. A commenter further noted that the definition of an affiliate of the INHAM contained in sections IV(a) and IV(b) of the proposal should be broadened to include families of multiemployer plans. The Department notes that the exemption application requested relief for transactions involving the assets of single employer plans managed by in-house managers. Accordingly, the Department does not believe that it has sufficient information regarding the operation and management of multiemployer plans to make the findings necessary to grant exemptive relief. Moreover, the Department does not believe that a sufficient showing has been made by the commenters that the conditions contained in the exemption would adequately protect the interests of participants and beneficiaries of internally managed multiemployer plans. Of course, the Department would be prepared to consider additional relief upon proper demonstration that the findings can be made under section 408(a) of ERISA with respect to such plans.

A commenter requested that the Department clarify that the relief provided for employee benefit plans whose assets are managed by INHAMs extends, not only to plans sponsored by affiliates of the INHAM, but also includes plans sponsored by the INHAM itself. According to the commenter, the INHAM may establish a stand-alone plan to cover its employees, or its employees may participate in a plan established and maintained by an affiliate of the INHAM. Therefore, the commenter urged that the Department adopt a definition of "plan", which would include plans maintained by the INHAM or an affiliate of the INHAM. In consideration of the concerns raised by the commenter, the Department has determined to adopt a definition of plan under section IV(h) that includes plans maintained by the INHAM and affiliates of the INHAM. The commenter further requested that the requirements under section IV(a) that the INHAM have $50 million of plan assets under management and control, and that plans maintained by affiliates of the INHAM have $250 million of aggregate plan assets also should be modified to clarify that these requirements are not intended to exclude any plan maintained by the INHAM. The requirement that the INHAM be affiliated with a plan sponsor (or group of related plan sponsors) whose plan(s) hold in the aggregate assets of at least $250 million, $50 million of which is under the direct management and control of the INHAM was imposed because the Department believes that INHAMs of large plans are more likely to have an appropriate level of expertise in financial and business matters. In this regard, the Department believes that the requirement that the INHAM have a significant dollar amount of assets under its management and control attributable to plans maintained by affiliates which are separately accountable for the operation of their respective plans provides an additional safeguard under the exemption. Accordingly, the Department has determined not to revise the $50 million requirement. However, the Department has determined that it would be appropriate to include the assets of plans maintained by the INHAM in determining compliance with the $250 million standard.

Finally, a commenter requested that the $50 million requirement be revised to permit the $50 million threshold to be met during the INHAM's first fiscal year as a separate legal entity. According to the commenter, the requirement that the INHAM have in excess of $50 million of plan assets under its management and control as of the last day of its most recent fiscal year could unintentionally prevent the exemption from being immediately available for an employer's in-house management group in its first year as a separate wholly-owned subsidiary of the employer. In response to this comment, the Department has revised section IV(a)(2) to specify that an existing asset management group that is newly-incorporated as a separate subsidiary of the employer may satisfy the $50 million requirement in its initial fiscal year if the requirement is met as of the date during its initial fiscal year as a separate legal entity that responsibility for the management of such assets in excess of $50 million was transferred to it from the employer.

2. Continuing Transactions (Section IV(e)). A commenter asserted that the last sentence of section IV(e), which deals with transactions which are continuing in nature, is unclear. This sentence addresses the issue of whether a continuing transaction that is not prohibited and, therefore, not subject to the exemption at the outset, may become covered by the exemption during the course of the transaction if it later becomes prohibited. According to the commenter, certain of the conditions of the exemption can be met only at the time the transaction is entered into, such as the condition in section I(d) dealing with arms-length terms. Conversely, the requirements of section I(e)(1) dealing with the party in interest relationships permitted under the exemption can only be determined at the time the transaction would have become prohibited. It is the view of the Department that section I(d) will be deemed satisfied in the case of a continuing transaction that later becomes prohibited if the transaction negotiated by the INHAM satisfied such section at the time the transaction was entered into. The Department notes that it does not interpret section IV(e) as exempting a continuing transaction that becomes prohibited subsequent to a renewal or modification that required the

consent of the INHAM, unless the renewal or modification otherwise met the arm's-length requirement of section I(d). Lastly, the Department has modified section IV(e) to clarify that in determining compliance with the conditions of the exemption at the time that the transaction was entered into, section I(e) will be deemed satisfied if the transaction was entered into between a plan and a person who was not then a party in interest.

D. Miscellaneous

1. In response to a comment, the Department has added section IV(d)(3) to the exemption in order to define "control" for purposes of determining whether or not an INHAM is "related" to a party in interest under section IV(d).

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code, and based upon the entire record, the Department finds that the exemption is administratively feasible, in the interests of plans and of their participants and beneficiaries and protective of the rights of participants and beneficiaries;

(3) The exemption is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the class exemption.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).

Part I--Basic Exemption

Effective April 10, 1996, the restrictions of section 406(a)(1) (A) through (D) of the Act and the taxes imposed by Code section 4975 (a) and (b) of the Code, by reason of 4975(c)(1) (A) through (D), shall not apply to a transaction between a party in interest with respect to a plan (as defined in section IV(h)) and such plan, provided that an in- house asset manager (INHAM) (as defined in section IV(a)) has discretionary authority or control with respect to the plan assets involved in the transaction and the following conditions are satisfied:

(a) The terms of the transaction are negotiated on behalf of the plan by, or under the authority and general direction of, the INHAM, and either the INHAM, or (so long as the INHAM retains full fiduciary responsibility with respect to the transaction) a property manager acting in accordance with written guidelines established and administered by the INHAM, makes the decision on behalf of the plan to enter into the transaction. Notwithstanding the foregoing, a transaction involving an amount of $5,000,000 or more, which has been negotiated on behalf of the plan by the INHAM will not fail to meet the requirements of this section I(a) solely because the plan sponsor or its designee retains the right to veto or approve such transaction;

(b) The transaction is not described in--

(1) Prohibited Transaction Exemption 81-6 (46 FR 7527; January 23, 1981) (relating to securities lending arrangements),

(2) Prohibited Transaction Exemption 83-1 (48 FR 895; January 7, 1983) (relating to acquisitions by plans of interests in mortgage pools), or

(3) Prohibited Transaction Exemption 88-59 (53 FR 24811; June 30, 1988) (relating to certain mortgage financing arrangements);

(c) The transaction is not part of an agreement, arrangement or understanding designed to benefit a party in interest;

(d) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the INHAM, the terms of the transaction are at least as favorable to the plan as the terms generally available in arm's length transactions between unrelated parties;

(e) The party in interest dealing with the plan: (1) is a party in interest with respect to the plan (including a fiduciary) solely by reason of providing services to the plan, or solely by reason of a relationship to a service provider described in section 3(14) (F), (G), (H), or (I) of ERISA; and (2) does not have discretionary authority or control with respect to the investment of the plan assets involved in the transaction and does not render investment advice (within the meaning of 29 CFR 2510.3-21(c)) with respect to those assets;

(f) The party in interest dealing with the plan is neither the INHAM nor a person related to the INHAM (within the meaning of section IV(d));

(g) The INHAM adopts written policies and procedures that are designed to assure compliance with the conditions of the exemption; and

(h) An independent auditor, who has appropriate technical training or experience and proficiency with ERISA's fiduciary responsibility provisions and so represents in writing, conducts an exemption audit (as defined in section IV(f)) on an annual basis. Following completion of the exemption audit, the auditor shall issue a written report to the plan presenting its specific findings regarding the level of compliance with the policies and procedure adopted by the INHAM in accordance with section I(g).

Part II--Specific Exemptions

Effective April 10, 1996, the restrictions of sections 406(a), 406(b)(1), 406(b)(2) and 407(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of Code section 4975(c)(1) (A) through (E), shall not apply to:

(a) The leasing of office or commercial space owned by a plan managed by an INHAM to an employer any of whose employees are covered by the plan or an affiliate of such an employer (as defined in section 407(d)(7) of the Act), if--

(1) The plan acquires the office or commercial space subject to an existing lease with an employer, or its affiliate as a result of foreclosure on a mortgage or deed of trust;

(2) The INHAM makes the decision on behalf of the plan to foreclose on the mortgage or deed of trust as part of the exercise of its discretionary authority;

(3) The exemption provided for transactions engaged in with a plan pursuant to section II(a) is effective until the later of the expiration of the lease term or any renewal thereof which does not require the consent of the plan lessor;

(4) The amount of space covered by the lease does not exceed fifteen (15) percent of the rentable space of the office building or the commercial center; and

(5) The requirements of sections I(c), I(g) and I(h) are satisfied with respect to the transaction.

(b) The leasing of residential space by a plan to a party in interest if--

(1) The party in interest leasing space from the plan is an employee of an employer any of whose employees are covered by the plan or an employee of an affiliate of such employer (as defined in section 407(d)(7) of the Act);

(2) The employee who is leasing space does not have any discretionary authority or control with respect to the investment of the assets involved in the lease transaction and does not render investment advice (within the meaning of 29 CFR 2510.3-21(c)) with respect to those assets;

(3) The employee who is leasing space is not an officer, director, or a 10% or more shareholder of the employer or an affiliate of such employer;

(4) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of the INHAM, the terms of the transaction are not less favorable to the plan than the terms afforded by the plan to other, unrelated lessees in comparable arm's length transactions;

(5) The amount of space covered by the lease does not exceed five percent (5%) of the rentable space of the apartment building or multi- unit residential subdivision [townhouses or garden apartments], and the aggregate amount of space leased to all employees of the employer or an affiliate of such employer does not exceed ten percent (10%) of such rentable space; and

(6) The requirements of sections I(a), I(c), I(d), I(g) and I(h) are satisfied with respect to the transaction.

Part III--Places of Public Accommodation

Effective April 10, 1996, the restrictions of sections 406(a)(1) (A) through (D) and 406(b) (1) and (2) of ERISA and the taxes imposed by Code section 4975 (a) and (b), by reason of Code section 4975(c)(1) (A) through (E), shall not apply to the furnishing of services and facilities (and goods incidental thereto) by a place of public accommodation owned by a plan and managed by an INHAM to a party in interest with respect to the plan, if the services and facilities (and incidental goods) are furnished on a comparable basis to the general public.

Part IV--Definitions

For the purposes of this exemption:

(a) The term "in-house asset manager" or "INHAM" means an organization which is--

(1) either (A) a direct or indirect wholly-owned subsidiary of an employer, or a direct or indirect wholly-owned subsidiary of a parent organization of such an employer, or (B) a membership nonprofit corporation a majority of whose members are officers or directors of such an employer or parent organization; and

(2) an investment adviser registered under the Investment Advisers Act of 1940 that, as of the last day of its most recent fiscal year, has under its management and control total assets attributable to plans maintained by affiliates of the INHAM (as defined in section IV(b)) in excess of $50 million; provided that if it has no prior fiscal year as a separate legal entity as a result of it constituting a division or group within the employer's organizational structure, then this requirement will be deemed met as of the date during its initial fiscal year as a separate legal entity that responsibility for the management of such assets in excess of $50 million was transferred to it from the employer.

In addition, plans maintained by affiliates of the INHAM and/or the INHAM, must have, as of the last day of each plan's reporting year, aggregate assets of at least $250 million.

(b) For purposes of sections IV(a) and IV(h), an "affiliate" of an INHAM means a member of either (1) a controlled group of corporations (as defined in section 414(b) of the Code) of which the INHAM is a member, or (2) a group of trades or businesses under common control (as defined in section 414(c) of the Code) of which the INHAM is a member; provided that "50 percent" shall be substituted for "80 percent" wherever "80 percent" appears in section 414(b) or 414(c) or the rules thereunder.

(c) The term "party in interest" means a person described in Act section 3(14) and includes a "disqualified person" as defined in Code section 4975(e)(2).

(d) An INHAM is "related" to a party in interest for purposes of section I(f) of this exemption if the party in interest (or a person controlling, or controlled by, the party in interest) owns a five percent or more interest in the INHAM or if the INHAM (or a person controlling, or controlled by, the INHAM) owns a five percent or more interest in the party in interest. For purposes of this definition:

(1) The term "interest" means with respect to ownership of an entity--

(A) The combined voting power of all classes of stock entitled to vote or the total value of the shares of all classes of stock of the entity if the entity is a corporation.

(B) The capital interest or the profits interest of the entity if the entity is a partnership, or

(C) The beneficial interest of the entity if the entity is a trust or unincorporated enterprise;

(2) A person is considered to own an interest held in any capacity if the person has or shares the authority--

(A) To exercise any voting rights or to direct some other person to exercise the voting rights relating to such interest, or

(B) To dispose or to direct the disposition of such interest; and

(3) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(e) For purposes of this exemption, the time as of which any transaction occurs is the date upon which the transaction is entered into. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into on or after April 10, 1996, or any renewal that requires the consent of the INHAM occurs on or after April 10, 1996, and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, the requirements will continue to be satisfied thereafter with respect to the transaction. Nothing in this paragraph shall be construed as exempting a transaction entered into by a plan which becomes a transaction described in section 406 of the Act or section 4975 of the Code while the transaction is continuing, unless the conditions of the exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption. In determining compliance with the conditions of the exemption at the time that the transaction was entered into for purposes of the preceding sentence, section I(e) will be deemed satisfied if the transaction was entered into between a plan and a person who was not then a party in interest.

(f) Exemption Audit. An "exemption audit" of a plan must consist of the following:

(1) A review of the written policies and procedures adopted by the INHAM pursuant to section I(g) for consistency with each of the objective requirements of this exemption (as described in section IV(g)).

(2) A test of a representative sample of the plan's transactions in order to make findings regarding whether the INHAM is in compliance with (i) the written policies and procedures adopted by the INHAM pursuant to section I(g) of the exemption and (ii) the objective requirements of the exemption.

(3) A determination as to whether the INHAM has satisfied the definition of an INHAM under the exemption; and

(4) Issuance of a written report describing the steps performed by the auditor during the course of its review and the auditor's findings.

(g) For purposes of section IV(f), the written policies and procedures must describe the following objective requirements of the exemption and the steps adopted by the INHAM to assure compliance with each of these requirements:

(1) The definition of an INHAM in section IV(a).

(2) The requirements of Part I and section I(a) regarding the discretionary authority or control of the INHAM with respect to the plan assets involved in the transaction, in negotiating the terms of the transaction, and with regard to the decision on behalf of the plan to enter into the transaction.

(3) That any procedure for approval or veto of the transaction meets the requirements of section I(a).

(4) For a transaction described in Part I:

(A) that the transaction is not entered into with any person who is excluded from relief under section I(e)(1), section I(e)(2), to the extent such person has discretionary authority or control over the plan assets involved in the transaction, or section I(f), and

(B) that the transaction is not described in any of the class exemptions listed in section I(b).

(5) For a transaction described in Part II:

(A) If the transaction is described in section II(a),

(i) that the transaction is with a party described in section II(a);

(ii) that the transaction occurs under the circumstances described in section II(a) (1) and (2);

(iii) that the transaction does not extend beyond the period of time described in section II(a)(3); and

(iv) that the percentage test in section II(a)(4) has been satisfied or

(B) If the transaction is described in section II(b),

(i) that the transaction is with a party described in sections II(b)(1);

(ii) that the transaction is not entered into with any person excluded from relief under section II(b)(2) to the extent such person has discretionary authority or control over the plan assets involved in the lease transaction or section II(b)(3); and

(iii) that the percentage test in section II(b)(5) has been satisfied.

(h) The term "plan" means a plan maintained by the INHAM or an affiliate of the INHAM.

Signed at Washington,DC, 4th day of April 1996.

ALAN D. LEBOWITZ
Deputy Assistant Secretary of
Program Operations
Pension and Welfare Benefits
Administration

U.S. Department of Labor

1. Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), effective December 31, 1978 (44 F.R. 1063, January 3, 1978), generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor. In the discussion of the exemption, references to sections 406 and 408 of the Act should be read to refer as well to the corresponding provisions of section 4975 of the Code.
2. In this regard, see PTE 84-14, 49 FR 9497 (March 13, 1984).
3. Although the Department has limited the auditor's responsibilities under the final exemption to making findings on the INHAM's compliance with the objective requirements of the exemption, the INHAM remains responsible for assuring compliance with all of the conditions of the exemption. Accordingly, the failure of the INHAM to comply with a condition of the exemption not described in section IV(g) would render the exemption unavailable.
4. The Department cautions that the failure of the INHAM to take appropriate steps to address any adverse findings in an unsatisfactory audit would raise issues under ERISA's fiduciary responsibility provisions.

DEPARTMENT OF LABOR

Employment and Training Administration

[NAFTA–006531]

Venice T-Shirt and Medical Corporation, Venice, CA; Notice of Termination

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–1) concerning transitional adjustment assistance, hereinafter called NAFTA–TAA and in accordance with section 250(a), subchapter D, chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2331), an investigation was initiated on August 30, 2002, in response to a petition filed on behalf of workers at Venice T-Shirt and Medical Corporation, Venice, California. Workers produced knit t-shirts.

The petitioner has requested that the petition be withdrawn. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC, this 18th day of November, 2002.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

BILLING CODE 4510–30–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application Number: D–10934]

Amendment to Prohibited Transaction Exemption 97–11 (PTE 97–11) for the Receipt of Certain Investment Services by Individuals for Whose Benefit Individual Retirement Accounts or Retirement Plans for Self-Employed Individuals Have Been Established or Maintained

AGENCY: Pension and Welfare Benefits Administration, U.S. Department of Labor.

ACTION: Adoption of amendment to PTE 97–11.

SUMMARY: This document amends PTE 97–11, a class exemption that permits the receipt of services at reduced or no cost by an individual for whose benefit an individual retirement account (IRA) [1] or, if self-employed, a Keogh Plan, is established or maintained, or by members of his or her family, from a broker-dealer, provided that the conditions of the exemption are met. The amendment affects individuals with beneficial interests in such plans who receive such services as well as the broker-dealers who provide such services.

FOR FURTHER INFORMATION CONTACT: Ms. Allison Padams Lavigne or Mr. Christopher Motta, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 693–8540, (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On June 18, 2002, the Department proposed an amendment to PTE 97–11 (67 FR 41504) [2] PTE 97–11 provides relief from the restrictions of sections 406(a)(1)(D) and 406(b) of ERISA and the sanctions resulting from the application of sections 4975(a) and (b), 4975(c)(3) and 408(e)(2) of the Code by reason of section 4975(c)(1)(D), (E) and (F) of the Code.[3] The amendment to PTE 97–11 was requested in an exemption application dated September 26, 2000, filed on behalf of American Funds Distributors, Inc. (AFD), a broker-dealer registered under the Securities Exchange Act of 1934.

The notice of pendency gave interested persons an opportunity to comment on the proposed amendment. Two comments were received pursuant to the provisions of section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B. No requests for a public hearing were received.

For the sake of convenience, the entire text of PTE 97–11, as amended, has been reprinted.

1. Description of the Exemption

PTE 97–11 permits the receipt of services at reduced or no cost by an individual for whose benefit an IRA or Keogh Plan is established or maintained or by members of his or her family, from a broker-dealer registered under the Securities Exchange Act of 1934 pursuant to an arrangement in which the account value of, or the fees incurred for services provided to, the IRA or Keogh Plan is/are taken into account for purposes of determining eligibility to receive such services, provided that certain conditions are met.

Relief under PTE 97–11, as originally amended, was limited to transactions involving IRAs, as defined in section III(b) of the class exemption. In this regard, section III(b) defined the term ‘‘IRA’’ as ‘‘an individual retirement account described in Code section 408(a) or an education individual retirement account described in section 530 of the Code.’’ The exemption stated further that ‘‘(f)or purposes of the exemption, the term IRA shall not include an IRA which is an employee benefit plan covered by Title I of ERISA, except for a Simplified Employee Pension (SEP) described in section 408(k) of the Code or a Simple Retirement Account described in section 408(p) of the Code which provides participants with the unrestricted authority to transfer their balances to IRAs or Simple Retirement Accounts sponsored by different financial institutions.’’

AFD requested that PTE 97–11 be amended to expand the definition of IRA contained in section III(b) of PTE 97–11 to include Individual Retirement Annuities, as such term is defined in section 408(b) of the Code.

2. Discussion of the Comments Received

The Department received two comments on the proposed amendment to PTE 97–11. One of the commenters, the American Council of Life Insurers (ACLI), supported the amendment. The second commenter sought clarification with respect to the reduction of commissions in connection with the aggregation of variable annuity contracts and mutual funds that are offered and/or managed by unaffiliated entities. Specifically, the commenter asked the Department whether the amendment to PTE 97–11 is applicable to situations where the distributor of the annuity contract, the investment manager of the variable annuity separate account and mutual funds, and the provider of the annuity contracts are not affiliated.

---

[1] In Advisory Opinion 98–03A (March 6, 1998), the Department stated that a Roth IRA which satisfies the definition of an individual retirement plan contained in section 7701(a)(37)(A) of the Internal Revenue Code of 1986 (the Code) is an ‘‘individual retirement account’’ described in section 408(a) of the Code. Therefore, a Roth IRA which is not an employee benefit plan covered by Title I of ERISA (except for certain Simplified Employee Pensions and Simple Retirement Accounts described in section 408(k) and 408(p) of the Code, respectively) would be covered by the relief provided in PTE 97–11, if all conditions therein are met. In this regard, the Department wishes to clarify that this proposed modification of section III(b) of PTE 97–11 would include Roth individual retirement annuities described in section 7701(a)(37)(B) of the Code.

[2] PTE 97–11 was granted on February 7, 1997 (62 FR 5855) and amended on March 8, 1999 (64 FR 11042). Any references to PTE 97–11 include the 1999 amendment.

[3] Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978 (5 U.S.C. App. 1 (1996)) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

As stated above, PTE 97–11 permits a broker-dealer to offer reduced or no cost services to individuals for whose benefit an IRA or Keogh Plan is established or maintained, provided that the conditions of the exemption have been met. The Department notes that the exemption does not limit relief to those services that are offered pursuant to an arrangement involving only affiliated entities.

Accordingly, a broker-dealer offering reduced commissions to an individual in connection with the purchase of a variable annuity contract under circumstances where the broker-dealer, the investment manager of the variable annuity separate account and mutual funds, and the provider of the annuity contracts are unaffiliated would be covered by the class exemption are met. In particular, the Department notes that PTE 97–11 requires, among other things, that the services offered under the relationship brokerage arrangement must be of the type that the broker-dealer itself could offer consistent with all applicable federal and state laws regulating broker-dealers. Additionally, the services offered under the arrangement must be provided by the broker-dealer or its affiliate in the ordinary course of the broker-dealer's business to customers who qualify for reduced or no cost services, but do not maintain IRAs or Keogh Plans with the broker-dealer.

General Information

The attention of interested persons is directed to the following:

(1) The Department finds that the amendment is administratively feasible, in the interest of the IRAs and Keogh Plans and their participants and beneficiaries and protective of the rights of the participants and beneficiaries of such plans.

(2) The amendment is supplemental to, and not in derogation of, any other provisions of ERISA and the Code including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The amendment is applicable to a transaction only if the conditions specified in the class exemption are met.

Exemption

Accordingly, PTE 97–11 is amended under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, Subpart B (55 CFR 32836, August 10, 1990).

Section I: Covered Transactions

Effective January 1, 1998, the restrictions of sections 406(a)(1)(D) and 406(b) of ERISA and the sanctions resulting from the application of section 4975 of the Code, including the loss of exemption of an IRA pursuant to section 408(e)(2)(A) of the Code, by reason of the section 4975(c)(1)(D), (E) and (F) of the Code, shall not apply to the receipt of services at reduced or no cost by an individual for whose benefit an IRA or, if self-employed, a Keogh Plan, is established or maintained, or by members of his or her family, from a broker-dealer registered under the Securities Exchange Act of 1934 pursuant to an arrangement in which the account value of, or the fees incurred for services provided to, the IRA or Keogh Plan is taken into account for purposes of determining eligibility to receive such services, provided that each condition of Section II of this exemption is satisfied.

Section II: Conditions

(a) The IRA or Keogh Plan whose account value or whose fees are taken into account for purposes of determining eligibility to receive services under the arrangement is established and maintained for the exclusive benefit of the participant covered under the IRA or Keogh Plan, his or her spouse or their beneficiaries.

(b) The services offered under the relationship brokerage arrangement must be of type that the broker-dealer itself could offer consistent with all applicable federal and state laws regulating broker-dealers.

(c) The services offered under the arrangement are provided by the broker-dealer (or an affiliate of the broker-dealer) in the ordinary course of the broker-dealer's business to customers who qualify for reduced or no cost services, but do not maintain IRAs or Keogh Plans with the broker-dealer.

(c) For the purpose of determining eligibility to receive services, the arrangement satisfies one of the following:

(i) Eligibility requirements based on the account value of the IRA or Keogh Plan are as favorable as any such requirements based on the value of any other type of account which the broker-dealer includes to determine eligibility; or

(ii) Eligibility requirements based on the amount of fees incurred by the IRA or Keogh Plan are as favorable as any requirements based on the amount of fees incurred by any other type of account which the broker-dealer includes to determine eligibility.

(e) The combined total of all fees for the provision of services to the IRA or Keogh Plan is not in excess of reasonable compensation within the meaning of section 4975(d)(2) of the Code.

(f) The investment performance of the IRA or Keogh Plan investment is no less favorable than the investment performance of an identical investment(s) that could have been made at the same time by a customer of the broker-dealer who is not eligible for (or who does not receive) reduced or no cost services.

(g) The services offered under the arrangement to the IRA or Keogh Plan customer must be the same as are offered to non-IRA or non-Keogh Plan customers with account values of the same amount or the same amount of fees generated.

Section III: Definitions

The following definitions apply to this exemption:

(a) The term ''broker-dealer'' means a broker-dealer registered under the Securities Exchange Act of 1934.

(b) The term ''IRA'' means an individual retirement account described in Code section 408(a), an individual retirement annuity described in Code section 408(b) or an education individual retirement account described in section 530 of the Code. For purposes of this exemption, the term IRA shall not include an IRA which is an employee benefit plan covered by Title I of ERISA, except for a Simplified Employee Pension (SEP) described in section 408(k) of the Code or a Simple Retirement Account described in section 408(p) of the Code which provides participants with the unrestricted authority to transfer their balances to IRAs or Simple Retirement Accounts sponsored by different financial institutions.

(c) The term ''Keogh Plan'' means a pension, profit-sharing, or stock bonus plan qualified under Code section 401(a) and exempt from taxation under Code section 501(a) under which some or all of the participants are employees described in section 401(c) of the Code. For purposes of this exemption, the term Keogh Plan shall not include a Keogh Plan which is an employee benefit plan covered by Title I of ERISA.

(d) The term ''account value'' means investments in cash or securities held in the account for which market quotations are readily available. For purposes of this exemption, the term cash shall include savings accounts that are insured by a federal deposit insurance

agency that constitute deposits as that term is defined in section 29 CFR 2550.408b–4(c)(3). The term account value shall not include investments in securities that are offered by the broker-dealer [or its affiliate] exclusively to IRAs and Keogh Plans.

(e) An affiliate or a broker-dealer includes any person directly or indirectly controlling, controlled by, or under common control with the broker-dealer. The term control means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(f) The term ''members of his or her family'' refers to beneficiaries of the individual for whose benefit the IRA or Keogh Plan is established or maintained, who would be members of the family as that term is defined in Code section 4975(e)(6), or a brother, a sister, or a spouse of a brother or sister.

(g) The term ''service'' includes incidental products of a de minimis value which are directly related to the provision of services covered by the exemption.

(h) The term ''fees'' means commissions and other fees received by the broker-dealer from the IRA or Keogh Plan for the provision of services, including, but not limited to, brokerage commissions, investments management fees, custodial fees, and administrative fees.

Dated: Signed at Washington, DC, this 9th day of December, 2002.

Department of Labor

Pension and Welfare Benefits Administration

Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds; Notice

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 2002–12; Application No. D–10851]

Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This document contains a final exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act or ERISA), the Federal Employees' Retirement System Act (FERSA), and from certain taxes imposed by the Internal Revenue Code of 1986 (the Code). The exemption permits cross-trades of securities among Index and Model-Driven Funds (Funds) managed by investment managers, and among such Funds and certain large accounts which engage such managers to carry out a specific portfolio restructuring program or to otherwise act as a ''trading adviser'' for such a program. The exemption affects participants and beneficiaries of employee benefit plans whose assets are invested in Index or Model-Driven Funds, large pension plans and other large accounts involved in portfolio restructuring programs, as well as the Funds and their investment managers. This exemption does not address cross-trades of securities among ''actively-managed'' accounts. The Department is considering additional safeguards to protect participants in plans that engage in active cross-trading prior to publishing a proposal to permit such cross-trades.

EFFECTIVE DATE: The effective date of the exemption is April 15, 2002.

FOR FURTHER INFORMATION CONTACT: Karen E. Lloyd or Christopher J. Motta of the Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, Washington, DC 20210 at (202) 693–8540; or Michael Schloss, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, DC 20210, at (202) 693–5600. (These are not toll-free numbers.)

Paperwork Reduction Act Analysis

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520)(PRA 95), the Department submitted the information collection request (ICR) included in the Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds to the Office of Management and Budget (OMB) for review and clearance at the time the Notice of proposed class exemption was published in the **Federal Register** (December 15, 1999, 64 FR 70057). OMB subsequently approved the ICR under OMB control number 1210–0115. The approval will expire on April 30, 2003. The public is not required to respond to an information collection request unless it displays a currently valid OMB control number.

As described in detail in the **SUPPLEMENTARY INFORMATION** section which follows, the Department of Labor (Department) has made certain modifications to the terms of the proposed class exemption in response to comments received from the public. Although the recordkeeping and information disclosure requirements which constitute the information collection provisions of the final class exemption have been clarified in certain respects, the information collection provisions have not been substantively or materially changed from the proposed exemption. The Department has, however, made certain adjustments to its burden estimates and underlying assumptions in response to comments on the proposal. These adjustments relate to the numbers of entities offering Index and Model-Driven Funds and their client plans, and the number of Large Accounts that may make use of the exemption, and the estimated burden of the record-keeping requirement.

The Department's original estimates of the number of users of the exemption were based on the number of individual exemptions granted and applications received, and information received from exemption applicants about the number of plans involved, resulting in estimates of 10 entities with an average of 20 client plans for each. One commenter expressed the view that at least 50 entities with an average of 40 client plans would make use of the exemption. Because the Department acknowledges that the grant of this final exemption may affect the number of entities that would consider implementing a program of cross trading involving index and model funds, the assumed numbers of entities and plans have been increased for purposes of burden estimates to 20 entities and 40 plans, respectively. Similarly, the number of Large Accounts assumed for purposes of estimating burden has been increased from 10 to 40. While the assumed number of Large Accounts is smaller than the 1,000 offered by the commenter, the Department believes that a number approximating 18% of all plans with $50 million in assets would substantially overstate the number likely to make use of the exemption in connection with a portfolio restructuring program in a given year.

The commenter also indicated that the Department's estimates of the time required to establish and maintain the record-keeping systems that would be needed to comply with the exemption were significantly low. The comment states that a significant investment of $4 to $5 million would be required for each user to establish the necessary record-keeping systems, and that substantial amounts of time would be required daily for ongoing record-keeping, and annually for ongoing disclosures. Upon consideration of the comment, the Department has concluded that its original estimates did omit the impact of the initial investment of resources that would be required to enhance existing software and systems to track cross-trades to triggering events. As a result, the Department has revised its estimates to include the hours, or costs as applicable, of 1,040 hours of systems analyst time at $51 per hour (based on Occupational Employment Survey data and 1999 Employment Cost Index, adjusted for non-wage compensation and overhead.) This change adds approximately 12,500 hours and $424,000 to the estimated burden of the final exemption. These totals are distributed over a three year period for purposes of the annual burden shown below.

Given that record-keeping systems for securities transactions are primarily electronic in nature, and that the Department's burden estimates now take into account the start-up cost of modifying automated record-keeping systems, the Department has decided not to revise the estimated time required to maintain the required records of trades and to prepare disclosure materials. In the Department's view, the original estimates are reasonable in light of the degree to which record-keeping is automated, the industry's existing record-keeping practices involving cross-trading, and the information provided by other commenters.

In addition, the final exemption clarifies that the annual disclosures are required to be made with respect to only those Funds that hold plan assets and in which a given plan invests. The commenter had indicated that eliminating the annual disclosure requirement with respect to Funds in which a plan had no investments would substantially reduce the burden. This clarification, therefore, further supports retention of the original assumptions.

Finally, the commenter expressed the view that certain of the information required to be disclosed by the terms of the proposed exemption was duplicative and unnecessary. As noted earlier, with the exception of certain clarifications, the information collection provisions of the final exemption are unchanged from the proposal. The Department's basis for its conclusions with respect to the need for the disclosure and record-keeping provisions of the final exemption are discussed in detail in the **SUPPLEMENTARY INFORMATION** section that follows.

The burden estimates that result from the revised assumptions are presented below:

Title: Prohibited Transaction Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds.

Agency: Department of Labor, Pension and Welfare Benefits Administration.

Affected Entities: Business or other for-profit.

Respondents: 60 (20 entities and 40 Large Accounts).

Responses: 840.

Annual Hour Burden: $9,100.

Annualized Capital/Start-up Cost: $141,000.

Annual Cost (Operating and Maintenance): $280,000.

Annual Cost Burden: $421,000.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of the Executive Order, it was determined that this action is ''significant'' under section 3(f)(1) of the Executive Order. Accordingly, this action has been reviewed by OMB.

Economic Analysis

Establishing a class exemption that permits plans to cross-trade can be expected to have a variety of positive economic effects that will considerably exceed the direct costs incurred by plans to comply with the record keeping and reporting requirements enumerated in the PRA section of the final class exemption. By removing existing barriers to these types of transactions, the exemption will significantly increase the utilization of cross-trading among index and model-driven portfolios. This will result in substantial savings to plans by lowering the transaction costs in a number of ways. Although there is currently no source of data that can be used to precisely estimate the level of these savings or the distribution of these effects among various parties, extrapolating from several sources can provide a reasonable estimate of their overall magnitude.

Limiting the exemption to index and model-driven portfolio management techniques should preclude any changes in the incidence of trading activity. In contrast to active management techniques, index and model funds will continue to execute trades at the same levels that they would in the absence of the exemption because their trading is motivated by the need to remain within their tracking parameters rather than in response to marginal changes in expected transaction costs. It is therefore reasonable to assume that the changes in costs will result solely from a decrease in the cost of executing many individual trades rather than from a change in the levels of trades.

Changes in the costs of individual trades will result from (1) the elimination of commission costs that would otherwise be associated with a trade, (2) the avoidance of bid-ask spreads that impose costs for transactions executed through dealers, (3) the absence of fees and taxes that might otherwise apply, and (4) the avoidance of the market impact of large trades which might otherwise require price concessions to execute or effect the trade which would directly impact the market value of the resulting holdings.

Only the first three of these effects are considered in the analysis. The last, market impact, is not included because it can reasonably be expected to have largely offsetting effects. ERISA plans are equally likely to be on either side of a cross trade and in most cases are likely to represent both parties to a transaction. In some instances, they will be advantaged by avoiding the changes in an individual securities price that might otherwise have resulted from a trade executed through another venue. In other circumstances, they will be disadvantaged. An equal probability of either will result in essentially offsetting effects in the aggregate.

A similarly conservative approach is taken in regard to two other aspects of the analysis. These are a result of the limitations in the available data and the absence of any experience with the full scope of relief afforded by the exemption on which to base an estimate. Although some data on the amount of ERISA plan assets in index funds is available, there is no similar source of reliable information to estimate the size of ERISA model driven assets to which the exemption would apply. There is also no experience with more extensive opportunities for cross-trading that are available under the exemption resulting from increased flexibility in allocating cross-trading opportunities, the extension of relief to a broader range of entities, and the inclusion of debt securities in the allowable transactions. Consequently the analysis is limited to index funds and does not incorporate increases in savings resulting from the extension of relief to circumstances with which there is no prior experience. As such, it should be interpreted as an extremely conservative estimate that is likely to represent a lower bound of the level of savings that can be expected to accrue to plans.

Two large financial services firms currently operating under individual exemptions that permit cross-trading among ERISA plans provided estimates of the savings in commissions, spreads, and fees that they have experienced managing both ERISA and non-ERISA indexed assets. These two estimates represent a significant portion of the ERISA plan universe and are therefore likely to be representative of the cost savings likely to occur. One of the firms estimated the cost savings to be approximately $275 million per year for a total indexed portfolio of $400 billion. The other estimated a savings of $207 million for $441 billion of indexed assets under management. Both of these include ERISA and non-ERISA assets, however, the experience should be indicative of expected results because the nature of trading costs for indexed funds should be virtually identical. Averaging these figures yields an estimate that costs savings of .057% or 5.7 basis points for each dollar of affected ERISA plan assets can be expected.

A recent survey of pension funds indicates that among the largest private sector defined benefit pension funds, 14% of the total assets were held in index funds. Among defined contribution plans, index funds constituted 12% of total assets. Applying these percentages to the most recent estimates of the total value of private pension funds yields an estimate of approximately $584 billion of ERISA pension funds that are currently managed as indexed funds.

Applying the estimate of $.00057 of savings for each dollar of assets under management results in an estimated level of cost reductions of approximately $332 million per year that will result from the class exemption. This total cost savings estimate overlaps, in part, current costs savings experienced by plans whose managers have cross-trading programs covered under existing individual exemptions. While certain large index fund managers are successfully operating cross-trading programs for ERISA plans at this time, the class exemption is expected to create additional cost savings for these plans by increasing the number and frequency of cross-trading opportunities among the managers' client accounts. In addition, new cross-trading opportunities will be made available for plans whose assets are managed by entities that currently do not have individual exemptions. Finally, the conservative nature of the total estimate is highlighted by the fact that cost savings associated with cross-trading by model-driven funds have not been factored into the estimate of total cost savings due to the absence of available data.

SUPPLEMENTARY INFORMATION: On December 15, 1999, the Department of Labor (the Department) published a notice in the **Federal Register** (64 FR 70057) of the pendency of a proposed class exemption from the restrictions of sections 406(a)(1)(A) and 406(b)(2) of the Act, section 8477(c)(2)(B) of FERSA,[1] and from the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) of the Code.

The Department proposed the class exemption on its own motion pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B, (55 FR 32836, August 10, 1990).[2] The Department's determination to proceed with the proposed class exemption was based, in part, on information received from interested persons in response to a notice (the Notice) published in the **Federal Register** on March 20, 1998 (63 FR 13696).

The notice of pendency gave interested persons an opportunity to comment or request a public hearing on the proposal. Fourteen (14) public comments were received by the Department. Upon consideration of all the comments received, the Department has determined to grant the proposed class exemption subject to certain modifications. These modifications and the major comments are discussed below.

Discussion of Comments Received

The comments received by the Department were generally supportive of the issuance of a separate class exemption for cross-trading of securities by Index and Model-Driven Funds. However, many of the commenters requested specific modifications to the proposal in the following areas:

1. *Accounts Permitted to Cross-Trade.* Several comments noted that section I(a) and (b) of the proposal does not explicitly permit cross-trades between two or more Large Accounts. These comments noted that when more than one Large Account is buying or selling a particular security as part of a manager's cross-trading program, that security could be traded between two Large Accounts, two Index or Model-Driven Funds, or any combination thereof. In the operation of a cross-trading program, the matching of the buyer and seller would be coincidental. The commenters believe that a manager should be permitted to submit trade lists from each Large Account to its cross-trade allocation system and allow trades submitted on behalf of one Large Account to be crossed with trades submitted on behalf of another Large Account.

The Department notes that section I(a) and (b) of the proposal does not provide relief for cross-trades exclusively between two or more Large Accounts. The Department is of the view that such cross-trading would be outside the scope of the exemption because, among other things, there would be no ''triggering event'' to limit the amount of discretion exercised by the manager where such transactions occurred solely between Large Accounts.

The Department does recognize, however, that a manager's cross-trading program that complies with the requirements of the proposal may produce cross-trade opportunities that result from both triggering events of particular Index and Model-Driven Funds as well as from the decision of an independent fiduciary to restructure all or a portion of a Large Account's portfolio. Under such circumstances, the Department anticipates that the allocation of buying and selling opportunities across all Funds and Accounts participating in the cross-trading program may result in some individual cross-trades between two Large Accounts. In such an event, the exemption would permit the ''coincidental'' matching of a buyer and seller of particular securities where both buyer and seller are Large Accounts since such cross trades would be part of a unified process-driven cross-trading program where the allocations of available securities (from all Funds and/or Large Accounts) resulted from an objective process which did not permit the exercise of discretion by the manager, as required under section II(d) of the exemption. The Department has revised section I of the exemption to clarify this point.

Another commenter noted that no specific relief for cross-trades between two Large Accounts may be necessary where the decision to liquidate or restructure is made by an independent fiduciary or independent Account representative, and, therefore, the manager would not be acting as a fiduciary for either side of the transaction. Thus, the commenter suggested that the Department may wish to clarify whether additional relief for cross-trades exclusively between two or more Large Accounts is necessary. Alternatively, the commenter suggested that section I(b) of the proposal be modified to explicitly permit cross-trades solely between Large Accounts.

In response to this comment, the Department notes that violations of section 406(b)(2) of the Act would occur if the manager used its discretionary authority to determine whether to cross-trade securities between two Large Accounts at least one of which holds plan assets, which securities to cross-trade, the timing of such cross-trades,

[1] The Department has responsibility for the administration and enforcement of section 8477 of FERSA. Section 8477 establishes the standards of fiduciary responsibility and requirements relating to the activities of fiduciaries with respect to the Federal Thrift Savings Fund. All references herein to the fiduciary responsibility provisions of Part 4 of Title I of ERISA also apply to the corresponding provisions of FERSA. Accordingly, the relief provided under this class exemption applies to cross-trades of securities by the Federal Thrift Savings Fund.

[2] Section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996) generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

In the discussion of the exemption, references to specific provisions of the Act should be read to refer as well to the corresponding provisions of section 4975 of the Code.

and the amount of securities to cross-trade notwithstanding that the overall determination to restructure the accounts was made by independent fiduciaries.

Accordingly, except as provided above, the Department has determined not to expand the relief provided under this exemption to include cross-trades solely between two or more Large Accounts. The Department notes that the final exemption provides a manager with a significant amount of time in which to conduct cross-trades for a Large Account in connection with a specific portfolio restructuring program. A manager's discretion to time specific cross-trades for two Large Accounts, absent the limitations provided by a process-driven cross-trading program involving ''triggering events'' for Index and Model-Driven Funds, would entail the type of discretion commonly exercised by managers for ''actively-managed'' accounts. In this regard, relief for cross-trades by ''actively-managed'' accounts and pooled funds containing ''plan assets'' will be considered by the Department in a separate proceeding.

2. *Use of closing prices.* One commenter suggested that the Department modify the requirement that all cross-trades occur at the closing prices for the securities on the relevant market in order to allow for alternate pricing methodologies (*e.g.,* ''volume weighted average price'' or ''VWAP''), after appropriate disclosure to the affected plans. Section II(a) of the proposal requires that the cross-trade be executed at the closing price, as defined in section IV(h). Section IV(h) of the proposal defines ''closing price'' as the price for a security on the date of the transaction, as determined by objective procedures disclosed to Fund investors in advance and consistently applied with respect to securities traded in the same market, which procedures shall indicate the independent pricing source used to establish the closing price and the time frame after the close of the market in which the closing price will be determined. The commenter does note that ''closing prices'' are the most appropriate prices currently in use for cross-trades of securities by Index and Model-Driven Funds, whose objective is to track the return of an index, since the calculation of an Index Fund's ''tracking error'' is based on closing prices for the securities listed in the relevant index. However, the commenter states that index providers may utilize alternative pricing methodologies in the future and suggests that the Department should consider broadening the exemption to include such pricing methodologies.

The Department notes that many commenters have indicated that the use of closing prices for cross-trades of securities by Index and Model-Driven Funds is common industry practice at the present time. The Department does not believe that it has sufficient information at this time to determine which types of alternative pricing methodologies may be used by managers in the future or how such pricing systems would enable Index and Model-Driven Funds to better achieve their investment goals and strategies. Therefore, the Department has determined not to modify the requirement that cross-trades be executed at the closing price. The Department would be prepared to consider additional relief at a later date upon proper demonstration that the appropriate findings can be made under section 408(a) of the Act with respect to other pricing methods for cross-traded securities.

3. *''Triggering Events'' and Cross-Trade Executions.* Several of the comments objected to the requirement in section II(b) of the proposal that any cross-trade of securities by a Fund be executed no later than the close of the second business day following a ''triggering event.'' These comments noted that previously issued individual exemptions for cross-trades by Index and Model-Driven Funds allowed cross-trades to be executed within three (3) business days of a ''triggering event'' and that the proposal's reduction of this requirement to two days is inconsistent with the stated premise of the proposal that cross-trading is beneficial to plans. Other comments noted that, once an investment decision is made, a manager should have 5 days to trade after a ''triggering event''—the same period of time to execute the trade as is permitted under the safe harbor provided in the Department's regulations for determining whether a broker-dealer is a fiduciary when it executes a securities transaction on behalf of a plan (see 29 CFR 2510.3–21(d)). Another comment requested that section II(b) be revised to require that cross-trades be executed either within three (3) days of a ''triggering event,'' or within such other period of time as the manager may disclose to the independent plan fiduciary pursuant to the disclosure requirements under section II(l) of the proposal.

In response to the comments, the Department has determined that it would be appropriate to modify section II(b) of the final exemption to require that all cross-trades by a Fund be executed no later than the close of the third business day following a Fund's ''triggering event.'' The Department notes that a three-day limit for cross-trades by a Fund following the relevant ''triggering event(s)'' has worked successfully in the past for managers who were granted individual exemptions.[3]

4. *Blackout Period for Cross-Trades by Model-Driven Funds.* Many of the comments objected to the requirement in section II(c) of the proposal that no cross-trades by a Model-Driven Fund may take place within ten (10) business days following any change made by the manager to the model underlying the Fund. The preamble to the proposal indicated that this restriction is intended to prevent model changes which might be made by managers, in part, to deliberately create additional cross-trading activity. The comments suggested that such a long delay on the ability of a manager to cross-trade after a change in the computer model was unnecessarily restrictive. According to the commenters, this condition would prevent cross-trading during the 10-day ''blackout'' period even though other ''triggering events'' were occurring in the Fund. Other commenters noted that there are already sufficient restrictions on a manager's discretion built into the proposal.

While most comments objected to the 10-day ''blackout'' period, several of the comments indicated that a 5-day period would be sufficient to safeguard against the Department's concerns regarding model changes that may be timed to create additional cross-trading opportunities. Other commenters suggested that, rather than imposing a ''blackout'' period for an arbitrary period of time (*e.g.,* 5 or 10 days), a more flexible approach could be used where a Model-Driven Fund would be able to cross-trade following the period of time necessary to complete the first re-balancing of the Fund's portfolio after the change is made by the manager to the Fund's model. Thus, under this approach, the ''blackout'' period could be less than three (3) days. One comment suggested that any cross-trading ''hiatus'' for a Fund should not be more than three (3) days. Other comments simply requested that the condition for a ''blackout'' period after a model change be deleted. Still other comments noted that, in the absence of a ''blackout'' period, a requirement for 10-day prior notice of a model change to each relevant plan's independent fiduciary should suffice. Finally, some

[3] See, for example, Prohibited Transaction Exemption (PTE) 95–56, 60 FR 35933 (July 12, 1999), regarding Mellon Bank, N.A., and its Affiliates.

commenters requested clarification that model changes made either (i) at the direction of a client plan, or (ii) as a direct result of input changes furnished by a third party data vendor (*e.g.,* BARRA or Vestek), would not invoke a ''blackout'' period because such model changes would not be the result of an exercise of discretion on the part of the manager.

The Department continues to believe that some ''blackout'' period is necessary to prevent managers from exercising their discretion over the criteria or data used for a model to generate specific cross-trade opportunities. However, in recognition that a 10-day restriction may be too long a period to prevent a Model-Driven Fund from cross-trading, the Department has decided to modify the final exemption to require that cross-trades not take place within three (3) business days following any change made by the manager to the model underlying the Fund.

In addition, with respect to the one commenter's concerns that model changes resulting from independent events should not invoke a ''blackout'' period for a Model-Driven Fund, the Department acknowledges that any change to a model which is not the result of an exercise of discretion by the manager (*e.g.,* changes directed by an independent plan fiduciary or furnished by a third party data vendor whose model is being used by the manager) would not require a ''blackout'' period for cross-trades by such Fund.

5. *Restrictions on Cross-Trades by a Manager Plan.* One comment objected to, and requested the deletion of, the requirement in section II(e) of the proposal that no more than ten (10) percent of the assets of any Fund or Large Account engaging in a cross-trade may be comprised of assets of employee benefit plans maintained by the manager for its own employees (*i.e.,* a Manager Plan), for which the manager exercises investment discretion. The comment stated that this condition would create a disincentive to in-house management and may cause investment managers to place assets of a Manager Plan with outside managers solely on the basis of the potential cost savings that the outside managers could derive from cross-trades.

The comment noted that for large plans, in-house management is frequently more cost-effective and keeps the asset management function closer to the people who have the most to gain from maximizing investment performance and minimizing investment risk. The comment further noted that larger in-house fiduciaries also manage assets for unaffiliated plans and other institutional investors, often as a result of a corporate spin-off with an accompanying plan restructuring. The comment stated that it understood the Department's concern regarding a manager's potential ability, through cross-trades, to unduly benefit a Manager Plan at the expense of its outside clients. However, the commenter believes that the other conditions of the proposal, including ''triggering events'' for cross-trades, detailed disclosures of cross-trading procedures and reporting of cross-trades resulting from a portfolio restructuring, would serve as a check on the manager's ability to favor a Manager Plan. Moreover, the commenter notes that to the extent that a Manager Plan's assets are commingled with assets of outside clients that are held in an Index or Model-Driven Fund managed as a collective investment fund, it would not be possible for the manager to ''favor'' only the Manager Plan in that Fund, even if the Manager Plan's assets represented more than 10 percent of the Fund's total assets. In any event, the comment noted that the 10 percent limitation should not apply to cross-trades that are made solely between Manager Plans.

With respect to the commenter's request to delete the 10% limitation in section II(e) of the proposal, the Department notes that, without such a percentage limitation, a substantial majority of the investors in a Fund could be comprised of Manager Plans. The Department does not believe that deletion of this percentage requirement would ensure a sufficient level of independent investor oversight of the manager's cross-trading program.

However, in consideration of the arguments raised by the commenters, the Department believes that a 20% limitation would still ensure a sufficient level of independent investor oversight in a Fund and would not unduly restrict the investment opportunities available for a Manager Plan with respect to such Funds. Therefore, the Department has modified section II(e) to increase the percentage limitation to 20%.

Accordingly, this exemption does not provide relief for cross-trades of securities of Index and Model-Driven Funds maintained by a manager under circumstances where the assets of the Manager Plans comprise all or a high percentage of the assets of the Fund. As noted above, the Department believes that the presence of independent fiduciaries to approve of plan participation in cross-trading programs following receipt of meaningful disclosures and the ability of such fiduciaries to periodically monitor the arrangements provide important protections under the exemption. However, in response to several comments, the Department wishes to take the opportunity to state that the granting of this exemption does not foreclose future consideration of additional relief for cross-trading transactions that do not fit within the framework developed by the Department for this exemption. For example, the Department is currently considering additional relief for transactions involving assets of plans managed by in-house managers, as well as for transactions involving discretionary asset managers.

With respect to the comments requesting that the exemption allow cross-trades to occur solely between two or more Manager Plans, the Department notes that relief for these transactions could involve the exercise of discretion on both sides to a transaction that is inconsistent with the underlying concept of the proposal—which is to provide relief for cross-trades made pursuant to ''process-driven'' investment strategies. For this reason, the Department has determined not to revise the exemption in this regard.

Another comment stated that section II(e) of the proposal does not adequately address how the independent authorization conditions in section II(i) through (n) of the proposal would apply to a Manager Plan, given that the plan fiduciary responsible for the plan's investment matters is unlikely to be independent of the manager. This comment suggested that the Department not require an independent fiduciary authorization for a Manager Plan's participation in the manager's cross-trading program. The commenter stated that the suggested modification would be consistent with other exemptions that do not apply an independent authorization requirement to plans of the fiduciary for whom relief is provided.[4] Accordingly, the commenter requests that the Department adopt a similar provision under the final exemption.

The Department concurs with the comments and has determined to modify section II(h) of the final exemption (formerly section II(i) of the proposal) to clarify that the requirement that the authorizing fiduciary be independent of the manager shall not apply in the case of a Manager Plan. Nevertheless, the appropriate fiduciary for the Manager Plan must still receive the proper disclosures and provide an

[4] In this regard, see section IV(d)(1)(A) of PTE 86–128 (51 FR at 41696, November 18, 1986).

authorization for the Manager Plan to participate in the manager's cross-trading program. This clarification modifies the disclosure and authorization requirements applicable to a plan's participation in a manager's cross-trading program, as described in section II(h) through (l) of the final exemption (formerly section II(i) through (m) of the proposal).

In addition, the Department has also determined to modify the requirements contained in section II(n) of the proposal, relating to disclosures to, and authorization by, a fiduciary of a Large Account who is independent of the manager for cross-trades in connection with a portfolio restructuring for the Large Account. To clarify this matter, the Department has revised section II(m) of the final exemption (formerly section II(n) of the proposal) by adding the parenthetical phrase ''* * * (other than in the case of any assets of a Manager Plan)'' to the requirements for an independent fiduciary discussed in section II(m)(1) through (4). In this regard, the Department notes that the final exemption still requires that proper disclosures be made to, and written authorization be made by, a Manager Plan's fiduciary in order for the Manager Plan to participate in a specific portfolio restructuring program.

6. *Exclusion of Thinly-Traded Equity Securities.* A number of commenters objected to the condition contained in section II(f)(1) of the proposal that required that cross-trades of equity securities involve only securities that are widely-held, actively-traded, and for which market quotations are readily available from independent sources. In this regard, the terms ''widely-held'' and ''actively-traded'' are deemed to include any security listed in an ''Index'' (as that term is defined in section IV(c) of the proposal).

The comments stated that this requirement was not necessary for an exemption for cross-trading by Index and Model-Driven Funds. According to the comments, security selection for such Funds is driven solely by objective factors. The commenters argued that the level of trading and diversity of holdings for securities are not relevant to security selections made by Funds and that such factors should not serve as a constraint on the ability of such Funds to cross-trade. Generally, the comments noted that if market prices are readily available, the exclusion of ''closely-held'' and ''thinly-traded'' equity securities is unduly restrictive. They further argued that such limitations would prevent use of the exemption for many ''small-cap'' and foreign equity securities. Thus, the commenters urged the Department to delete the requirement that cross-traded equity securities be ''widely-held'' and ''actively-traded.''

As an alternative approach, one commenter suggested a limitation based on a comparison of the size of the cross-trade to the prior public trading volume in the security over a reasonable period of time prior to the date of the transaction. Such a volume limitation would prevent cross-trades of equity securities where the total volume of shares being cross-traded would exceed a certain percentage of the total number of shares publicly traded on the market during a particular period of time.

The Department is not persuaded by the arguments submitted in favor of deletion of the requirements contained in section II(f)(1) that equity securities that are cross-traded must be ''widely-held'' and ''actively-traded.'' The Department continues to believe that cross-trades of ''thinly-traded'' securities raise issues as to whether both sides of the cross-trade have benefitted equally from the avoidance of adverse market impact. The avoidance of market impact would be more dramatic with ''thinly-traded'' equity securities than with equity securities that are ''widely-held'' and ''actively-traded.''[5] Similarly, the avoidance of liquidity restraints would be more dramatic with ''thinly-traded'' equity securities than with equity securities that are ''widely-held'' and ''actively-traded.''

In order to address its concerns without unnecessarily restricting the scope of relief under the proposal, the Department determined to deem equity securities that are included in an Index (as defined in section IV(c) of the exemption) to be ''widely-held'' and ''actively-traded'' for purposes of the exemption. However, the Department notes that the exemption does not preclude a manager from cross-trading a particular equity security not included in an index if the manager otherwise determines that such security is ''widely-held'' and ''actively-traded.''[6]

With respect to the comment suggesting a trading volume limitation, the Department notes that other commenters have discouraged it from addressing its concerns about cross-trades of ''thinly-traded'' securities through volume limitations, based on arbitrary percentages of the average daily trading volume for the securities. These commenters noted that the systems used by managers to allocate cross-trades among various Funds would have difficulty monitoring and re-allocating cross-traded securities to conform to such volume limitations.

In consideration of the above, the Department has determined not to modify section II(f)(1) in the final exemption.

7. *Cross-Trades of Securities Issued By the Manager.* Several comments objected to the requirement in section II(h) of the proposal that cross-trades not involve securities issued by the manager, unless the manager has obtained a separate prohibited transaction exemption for the acquisition of such security. One commenter noted that, although some institutions have obtained individual exemptions to deal with issues relating to acquisitions and dispositions of the manager's own stock by its Index and Model-Driven Funds,[7] others have concluded that no exemptive relief is necessary based on the facts and circumstances surrounding their individual situations. The commenter noted that, with regard to certain Index Funds, the manager does not exercise discretion in choosing the individual stocks to buy or sell, but rather seeks to mechanically purchase stocks selected through objective criteria which is outside of the manager's control. For example, in an Index Fund that is designed to replicate the exact capitalization-weighted composition of the Standard & Poor's 500 Composite Stock Price Index (the S&P 500 Index), if the manager's stock is included in the index, that stock will be purchased in the proportion dictated by the index without the manager exercising any investment discretion. In such instances, the commenter stated that a manager's failure to acquire the stock would cause ''tracking error,'' thereby subverting the goal of plan investors in

[5] The Department notes that these concerns would also arise with ''thinly-traded'' debt securities. However, since ''thinly-traded'' debt securities of different issuers with the same coupon rate, maturity, and credit rating are relatively fungible, the Department did not believe that it would be appropriate to apply these concepts to such securities for purposes of this exemption.

[6] With respect to the selection criteria for securities included in a Fund's portfolio which are not included in an Index, the Department assumes that any screening criteria and/or weighting procedures used to create the portfolio will be determined using purely mathematical computations based upon objective raw data. In addition, the Department assumes that the investment management agreement relating to each Fund, as approved by plan investors in the Fund, would set forth the specific dates on which the Fund's portfolio will be re-balanced. In this regard, the Department notes that no relief would be provided under this exemption for violations of section 406(b)(1) of the Act which may occur as a result of a manager's exercise of fiduciary authority or discretion to affect the components of an Index.

[7] For example, see Prohibited Transaction Exemption (PTE) 2000–30, 65 FR 37166 (June 13, 2000), regarding Barclays Bank PLC and its Affiliates.

the Fund to replicate the performance of the index. Other comments stated that it was not clear why a restriction for cross-trades of a manager's own stock is necessary and that there appears to be no reason to exclude such securities from the exemption. The Department accepts these comments and has determined to delete section II(h) of the proposal from the final exemption.

However, the Department notes that the exemption does not provide relief for any discretionary changes in an Index or Model-Driven Fund made by a manager, or any other discretionary decisions by the manager, which are designed to result in cross-trades of the manager's own stock for the benefit of the manager. Only cross-trades generated by non-discretionary changes in a Fund (*e.g.,* changes in the capitalization weighting of the manager's stock within an index, or the addition or removal of the manager's stock from an index) are covered by this exemption. Accordingly, no relief is provided for such discretionary changes regarding the manager's own stock.

As noted previously, all conditions in the final exemption have been re-designated to reflect the deletion of section II(h) of the proposal.

8. *Disclosure and Authorization Requirements.* Many comments raised concerns about the scope of the disclosure and authorization requirements contained in section II(j), (k), (l) and (m) of the proposal. In this regard, the comments noted that section II(i) of the proposal expressly states that the written authorization requirement for a plan's participation in a manager's cross-trading program only applies to plans investing in an Index or Model-Driven Fund that holds ''plan assets'' subject to the Act. The commenters urged the Department to clarify that the notice and disclosure requirements contained in section II(j), (k), (l) and (m) of the proposal similarly apply only to independent fiduciaries of employee benefit plans that invest in Funds holding plan assets.

The Department acknowledges the commenters' concerns regarding the intended scope of the disclosure and authorization requirements of the proposal and wishes to clarify that such requirements were meant to apply only to those Index and Model-Driven Funds which hold ''plan assets,'' as defined under the Department's regulations (*see* 29 CFR 2510.3–101). Therefore, the Department has revised section II(i) and (l) of the final exemption (formerly section II(j) and (m) of the proposal) accordingly.

Other comments objected to the prior written authorization requirement contained in section II(i) of the proposal, noting that prior individual exemptions granted by the Department for cross-trades by Index and Model-Driven Funds did not contain a similar requirement. These comments expressed the view that requiring prior written consent from an independent plan fiduciary as a condition for the plan to invest in a Fund that is part of a manager's cross-trading program serves no useful purpose. The comments noted that if a plan fiduciary were to develop any objections to cross-trading on philosophical grounds, then the plan would be free to withdraw from the Fund without penalty. The commenters believed that imposition of such a requirement will be perceived negatively by plan sponsors as an unnecessary obstacle to their ability to freely invest and reinvest plan assets in a manager's Funds.

The Department disagrees with the commenters' assertion that prior written consent from an independent plan fiduciary is unnecessary. The Department notes that part of the reason for proposing a class exemption for cross-trades of securities by Index and Model-Driven Funds was to address issues which had come to the Department's attention subsequent to its granting of a number of individual cross-trading exemptions.

As stated in the Notice published on March 20, 1998, the Department recognizes that it is important to retain the flexibility to periodically review its exemption policy in the context of changed circumstances or new facts that may be brought to its attention (*see* 63 FR at 13698, first paragraph of section entitled ''Issues and Developments''). The Department became aware of new issues involving cross-trades, including cross-trades by certain ''passive'' investment managers, through enforcement proceedings that raised concerns about whether plan fiduciaries were being provided with adequate disclosures regarding a manager's cross-trading program.

The Department continues to believe that adequate disclosures are necessary in order to enable a plan fiduciary to understand a manager's cross-trading program and how that program may affect the investment goals and objectives of Funds in which the plan may invest. The Department notes that the written authorization required by section II(i) of the proposal will apply to all of the Funds which participate in a manager's cross-trading program. Thus, once an authorization is provided by an independent fiduciary, a plan will be able to invest in any of the Funds without any additional authorization. The Department further notes that the authorizations required under the exemption for existing plan investors in any Funds may be obtained through a separate notice which describes the Funds' participation in the manager's cross-trading program. Under this requirement, failure to return the termination form by the date specified in the notice will be deemed to be an approval by the independent plan fiduciary of the plan's participation in the cross-trading program. Therefore, the Department has determined not to revise the authorization requirements in the final exemption.

With respect to the required content for the disclosures that must be furnished pursuant to sections II(l) and (m) of the proposal, the commenters were concerned that the initial and annual notices must identify all Index and Model-Driven Funds participating in the manager's cross-trading program, together with detailed information regarding the ''triggering events'' and other information relating to each Fund. The comments noted that requiring such disclosures would cause managers to violate confidentiality restrictions contained in many client agreements and would also raise privacy concerns for clients who do not wish their identity, or the fact that they maintain an investment account with the manager, to be disclosed. In this regard, the comments noted that managers are restricted from disclosing confidential information about clients, particularly the Funds in which clients invest. In addition, the comments stated that such detailed disclosure would be of little practical value to plan fiduciaries when deciding whether to authorize or maintain plan investments in a particular Fund. As an alternative, several comments suggested that the initial and annual notices should include only general descriptions of the types of Funds that participate in the manager's cross-trading program and of the ''triggering events'' that give rise to cross-trade opportunities.

The Department acknowledges the concerns expressed by the commenters regarding the confidentiality restrictions contained in client agreements and privacy concerns relating to the identity of such clients and the Funds in which they may invest. Nevertheless, the Department continues to believe that the required disclosures will be useful to a plan fiduciary in understanding the scope and operation of the manager's cross-trading program and whether participation in the program remains in the plan's best interests. However, the Department does not intend for the disclosures in section II(k) of the

exemption (relating to a manager's ongoing disclosures of information about the cross-trading program) or section II(l) of the exemption (relating to disclosures for an annual re-authorization of the cross-trading program by an independent plan fiduciary) to require that privileged or confidential information be revealed by the manager. For example, these provisions, as revised herein, do not require a manager to furnish to independent plan fiduciaries the identity of any clients of the manager that are invested in other Funds that are added to the cross-trading program. In addition, any information disclosed by the manager regarding new ''triggering events'' for existing Funds need only provide such information with respect to Funds in which the plans are invested. With respect to disclosures regarding new ''triggering events'' which must be provided to the relevant independent plan fiduciaries of the affected Funds (as discussed further below), the Department does not believe that the final exemption requires the disclosure of privileged or confidential information.

Other commenters requested that the Department clarify that portion of section II(l) of the proposal which requires that the manager notify each relevant independent plan fiduciary of the addition of Funds to the manager's cross-trading program, or changes to, or additions of, ''triggering events'' regarding Funds, following a plan's initial authorization of participation in the program. Specifically, the comments requested clarification as to whether the phrase ''each relevant independent plan fiduciary'' was intended by the Department to be limited to fiduciaries of plans invested in those specific Funds that are added to a manager's cross-trading program or whose ''triggering events'' have been modified. The comments noted that it would be burdensome to require managers to notify all plans regarding modifications to ''triggering events'' that may occur in all Funds, including Funds in which such plans are not invested, just because such Funds participate in the cross-trading program. In addition, it would be difficult to provide notice to all plans prior to, or within 10 days following, such events affecting any of the Funds.

In consideration of such comments, the Department has modified section II(k) of the final exemption (formerly section II(l) of the proposal) to provide that the ongoing notices of information that must be furnished to ''each relevant independent plan fiduciary'' are required to be made only to those fiduciaries whose plans are invested in the affected Funds (*i.e.*, the Funds added to the program or whose ''triggering events'' have been changed).

Other commenters stated that certain of the disclosures are unnecessary. For example, several comments objected to the statement required by section II(k) of the proposal, relating to investment decisions for a Fund not being based on the availability of cross-trade opportunities. These comments noted that this statement would be duplicative of other information required in the proposal and would provide no added protection to plans, other than the manager's promise to follow the conditions of the exemption. Certain comments objected to the disclosures described in section II(l) of the proposal including the required statement that ''* * * the Manager will have a potentially conflicting division of loyalties and responsibilities to the parties to any cross-trade transaction * * *.'' In addition, section II(l) of the proposal required that the Manager explain how its cross-trading practices and procedures will mitigate such conflicts. According to the comments, following the terms of the exemption should be viewed as precisely what is necessary to mitigate the conflicts. Thus, the commenters believed that it will be misleading to inform client plans that the operation of a manager's cross-trading program, even with adherence to the terms of the proposed exemption, will still create conflicts.

The Department believes that specific statements relating to the fact that investment decisions for a Fund will not be based on cross-trade opportunities (as described in section II(k) of the proposal), and that there are potential conflicts of interest in such cross-trades (as described in section II(l) of the proposal), are important to an independent plan fiduciary's understanding of the issues involved with cross-trades of securities. The Department notes that, in any cross-trading program, including cross-trading programs maintained by ''passive'' investment managers, there would be a potential for abuse if a manager were able to control cross-trade opportunities to favor the interests of particular clients. Therefore, the Department has determined not to revise the exemption as requested.

Section II(l) of the proposal requires that independent plan fiduciaries be furnished with detailed disclosure of the procedures to be implemented under the manager's cross-trading program (including the ''triggering events'' that will create cross-trading opportunities, the independent pricing services that will be used by the manager to price the cross-traded securities, and the methods that will be used for determining closing price). The comments noted that the preamble to the proposal suggests with respect to foreign securities that the applicable independent pricing source should provide the price in local currency rates and, if that currency is other than U.S. dollars, also provide the U.S. dollar exchange rate (*see* first paragraph of Section IV.B. of the preamble, 64 FR at 70062). In this regard, the comments noted that most pricing services that price foreign securities do not provide currency conversion rates. These commenters suggested that managers be allowed to use another independent service to provide such conversion rates, so long as the service is disclosed to plan investors.

The Department acknowledges the commenter's concerns, based on the language contained in the preamble to the proposal. However, the Department did not intend to prevent a manager from using another independent service to provide the appropriate currency exchange rates for a foreign security. Thus, the Department notes that no modification to section II(k) of the final exemption (formerly section II(l) of the proposal) is necessary.

A number of the comments noted that Section II(m) of the proposal (relating to a plan's annual re-authorization of its participation in the manager's cross-trading program) appears to require, among other things, that each plan fiduciary be notified annually of: (i) Any change in the ''triggering events'' in the Funds in which their plans are invested; (ii) any change in the ''triggering events'' in the Funds in which their plans are not invested; and (iii) any ''triggering events'' and other disclosure items for new Funds added to the cross-trading program since the last annual notice. These comments stated that the latter two categories of disclosures noted above are irrelevant to a plan fiduciary who has no assets invested in those Funds. The commenters believe that such information in the annual disclosures will make it more difficult for plans to properly analyze data which is relevant to an annual re-authorization of the plan's participation in the manager's cross-trading program. The comments suggested that annual disclosures to a plan fiduciary should be limited to that material which is relevant to its plan's investments in the manager's Funds. If a plan fiduciary determines to invest in other Funds for which no annual disclosure information has been previously provided, the fiduciary would then be provided with

the material relevant to the new Funds in such annual disclosures.[8]

Upon consideration of these comments, the Department believes that some plan fiduciaries may still find information about other Funds to be useful and should be provided that information by the manager upon request. Therefore, in order to limit the scope of the annual disclosures required in section II(l) of the exemption (formerly section II(m) of the proposal), the Department has modified that section to read as follows:

> ''* * * Such annual re-authorization must *provide information to the relevant independent plan fiduciary regarding each Fund in which the plan is invested as well as explicit notification that the plan fiduciary may upon request obtain* disclosures regarding any new Funds *in which the plan is not invested* that are added to the cross-trading program, or any new triggering events that may have been added to existing Funds *in which the plan is not invested,* since the time of the initial authorization * * * etc.'' [emphasis added]

A commenter requested that the annual re-authorization requirement contained in section II(m) of the proposal be deleted in its entirety. The commenter stated that coordinating such a re-authorization would entail the same administrative burdens as a requirement for periodic notice of new Funds to all plan fiduciaries investing in Funds which participate in the manager's cross-trading program. According to the commenter, a plan could request that the plan's investment in any Fund that participates in the cross-trading program be terminated without penalty. Thus, the commenter maintained that a plan's participants and beneficiaries should be adequately protected without having to re-authorize participation in the cross-trading program every year.

In the event that the Department determined to retain the annual re-authorization requirement, the commenter requested two modifications to section II(m) of the proposal. First, the commenter believed that providing a plan fiduciary with a list of new Funds participating in the manager's cross-trading program would not provide the fiduciary with any useful information. Therefore, the commenter requested that the requirement in section II(m) of the proposal for disclosure regarding new Funds added to the manager's cross-trading program or any new triggering events be modified to permit the manager to make such information available upon request. Second, the commenter noted that section II(m) of the proposal requires the use of a ''special termination form'' in the annual re-authorization. The commenter noted that there are other methods of communication which would be easier and more efficient for a plan fiduciary to use in the event that the fiduciary decides to terminate its prior authorization.

The Department has determined that it would not be appropriate to delete the requirement for plan fiduciaries of affected Funds to provide an annual re-authorization of their plan's participation in the manager's cross-trading program. The Department believes that annual re-authorization will help ensure effective monitoring of a cross-trading program by the affected plans. Therefore, the Department has retained this requirement in section II(l) of the exemption.

However, in response to the comments regarding the need for a special termination form to be sent to each plan fiduciary, the Department has modified section II(l) of the exemption (formerly section II(m) of the proposal) to permit other forms of written communication to be used to terminate an authorization. Thus, the following new sentence has been added to section II(l) of the final exemption:

> ''* * * In lieu of providing a special termination form, the notice may permit the independent plan fiduciary to utilize another written instrument by the specified date to terminate the plan's participation in the cross-trading program, provided that in such case the notice explicitly discloses that a termination form may be obtained from the Manager upon request.''

In response to the comments regarding the requirement in the proposal for the annual disclosures to include a list of any new Funds participating in the manager's cross-trading program in which the plan is not invested, or any new triggering events for a manager's Funds in which the plan is not invested, the Department has previously noted above that section II(l) of the exemption has been modified to require that such information need only be provided by a manager upon request.

9. *Authorizations for Large Account Restructures.* Under section II(n)(3) of the proposal, a portfolio restructuring program must be completed within the later of: (i) 30 days of the initial authorization by an independent fiduciary of the Large Account; or (ii) 30 days of the manager's initial receipt of assets associated with the portfolio restructuring, unless such fiduciary agrees to extend this period for another 30-days. The comments requested a number of revisions and clarifications to this provision. First, the commenters noted that most portfolio restructuring programs are completed within a thirty (30) day period. However, very large portfolio restructurings may take considerably longer. In such instances, the commenters believe that it would be more efficient to allow the manager to obtain authorization to extend the 30-day restructure period at the time of the Large Account fiduciary's initial authorization. Second, one commenter questioned whether securities that cannot be cross-traded with the manager's Funds and, therefore, must be traded on the open market, are affected by the 30-day deadline. Third, another commenter suggested that the 30-day period should begin for each asset on the date on which the asset is included as part of the restructuring account. According to the comment, this change would be responsive to the fact that the manager or trading adviser for a Large Account may not receive all assets to be restructured at the same time.

In response to these comments, the Department has determined to modify section II(m)(3) of the exemption (formerly section II(n)(3) of the proposal) to allow the initial authorization by an independent fiduciary of the Large Account for a specific portfolio restructuring to be effective for 60 days. The 60-day restructure period can be extended for another 30 days if the independent fiduciary for the Large Account agrees to the extension. In addition, the Department wishes to clarify that only securities that are cross-traded are affected by the requirements of section II(m) of the final exemption.

Accordingly, the Department has revised section II(m)(3) of the exemption (formerly section II(n)(3) of the proposal) to provide that:

> ''* * **All cross-trades made in connection with* the portfolio restructuring program must be completed by the Manager within *sixty (60) days* of the initial authorization * * *'' [emphasis added]

In light of the Department's revision to section II(m)(3), the Department does not believe that any further relief is warranted.

10. *Record-keeping.* Several comments expressed concerns regarding the record-keeping requirements contained in section III(a) of the proposal. In this regard, section III(a)(2)

[8] With respect to such annual disclosures, it should be noted that all relevant independent plan fiduciaries of plans invested in a Fund that is added to a manager's cross-trading program, or has changed or added any ''triggering events'' for cross-trades by such Fund after the Fund is included in the program, will already have been provided a separate notice of such event(s) prior to, or within ten (10) days following, each event, as required by section II(k) of the exemption.

requires, among other things, that each manager retain, on a Fund by Fund basis, trade lists which specify the amounts of each security to be purchased or sold for a Fund. This information should be provided in sufficient detail to allow an independent plan fiduciary to verify that each of the investment decisions for the Fund were made in response to specific triggering events. Section III(a)(3) of the proposal requires that, on a Fund by Fund basis, the manager must record the actual trades executed on a particular day, noting which of those trades (including all cross-trades) resulted from triggering events. The comments noted that the preamble to the proposal does not seem to require that the notations necessary to meet the requirements of section III(a)(3) specify which specific triggering event caused each trade (or cross-trade), provided that it is clear that a triggering event(s) caused such trades.

Other commenters stated that the record-keeping requirements of section III(a) are unnecessary because, under the proposed exemption, an Index or Model-Driven Fund can only cross-trade as a result of a triggering event. In addition, these commenters suggested that such a record-keeping requirement would be extremely burdensome if it became necessary to ''tag'' each purchase or sale of a security to a specific triggering event. In such instances, the comments stated that the exemption would involve so much additional record-keeping and costs (*i.e.,* millions of dollars worth per year per manager) that no manager will be able to economically maintain or operate a cross-trading program for its client accounts. Conversely, the comments noted that if the Department believes that ''tagging'' is not required under the proposal, this record-keeping requirement should be deleted since all cross-trades by a manager's Funds will result from at least one ''triggering event'' in order to meet the conditions of the exemption. Other comments noted that records regarding specific triggering events should be retained only if the triggering event resulted in actual cross-trading.

In response to these comments, the Department notes that other commenters have indicated that the record-keeping requirements contained in section III of the proposal are consistent with their current record-keeping practices. In this regard, the Department understands that under the individual exemptions granted for cross-trades by Index and Model-Driven Funds, managers have established record-keeping and monitoring systems designed to ensure compliance with the terms and conditions of those exemptions.

The Department notes that the record-keeping requirements contained in the proposal, while more specific than those of the individual exemptions, were designed to be consistent with the record-keeping systems of managers operating cross-trading programs under the individual exemptions. Thus, the Department is not persuaded by the arguments submitted in favor of deletion of this record-keeping requirement. The Department continues to believe that records must be maintained with sufficient specificity to permit an independent plan fiduciary to verify compliance with the conditions of the exemption.

In response to the commenter's request for clarification as to whether the record-keeping requirements contained in section III(a) of the proposal would mandate that a manager's records demonstrate that each cross-trade by a Fund resulted from a specific ''triggering event,'' the Department believes that the following discussion will be helpful.

When more than one bona fide ''triggering event'' has occurred, the Department expects that a manager's record-keeping system will be able to demonstrate that the cross-trades by the Fund resulted from such ''triggering events.'' For example, if a manager's record-keeping system enables the manager to ''link'' purchases and sales of specific amounts of securities in each cross-trade by a Fund to ''triggering events'' within the 3-day period, then such a system would satisfy the record-keeping requirements of the exemption.

As discussed by the Department in the preamble to the proposal, the record-keeping requirements are intended to assure that independent plan fiduciaries will be able to determine whether Funds and their underlying models or indexes operate consistently in following the input of triggering event information. This information should be kept in sufficient detail to enable a replication of specific historical events in order to satisfy an inquiry by interested persons (as described in section III(b)(1) of the exemption). The Department further notes that records regarding specific triggering events need only be maintained if such events resulted in cross-trades that are subject to the conditions of this exemption.

Another comment noted that section III(a) of the proposal requires that the records must be ''* * * readily available to assure accessibility and maintained so that an independent fiduciary'' may obtain them within a reasonable period of time. The comment noted that most of the required records would be maintained electronically and archived after a few months. The commenter maintained that, while such records are retrievable within a period of days or weeks, the exemption should recognize that the volume of trading and records involved would make faster retrieval impossible. Another comment requested that the Department acknowledge that a ''reasonable period of time'' in this context would be thirty (30) days. In this regard, the Department acknowledges that thirty (30) days may be a reasonable period of time for obtaining and assembling the required information for interested persons if the volume and complexity of the cross-trading records that must be assembled for such persons is significant.

Other comments noted that making records available to plan participants and beneficiaries would be unduly burdensome and would add no significant additional protections.

The Department has determined that it would be appropriate to modify section III(b)(1) to exclude plan participants and beneficiaries unless such persons are participants or beneficiaries in a Manager Plan.

11. *Definition of ''Index Fund'' and ''Model-Driven Fund.''* Several comments noted that, unlike prior individual exemptions for cross-trading, the definition of the term ''Index Fund'' in the proposal (*see* section IV(a) below) requires not only that a Fund be designed to track the rate of return, risk profile and other characteristics of an independently maintained securities index, but also that such tracking occur either by ''* * * replicating the same combination of securities which compose such index'' or by ''* * * sampling the securities which compose such index based on objective criteria and data.'' The commenters urged the Department to clarify that this definition was not intended to preclude an Index Fund from holding cash, cash equivalents or other equitizing cash investments.

The Department concurs with this comment. The definition of the term ''Index Fund'' under section IV(a) of the exemption is not intended to prevent a Fund from holding cash, cash equivalents or other equitizing cash investments. For example, the Department notes that the definition of ''triggering event'' contained in section IV(d)(3) of the exemption specifically contemplates that a Fund may have an accumulation of cash which is attributable to interest or dividends on,

and/or tender offers for, portfolio securities.

In this regard, the Department recognizes that significant levels of cash or cash equivalents in an Index Fund generally will create ''tracking error'' vis-a-vis the independently maintained securities index which the Fund is designed to track. Therefore, assets other than securities which are included in the designated index will only be held by a Fund for a limited period of time.

However, the Department also understands that many managers use temporary cash investments to buy index futures contracts (*e.g.,* S&P 500 futures) in order to more precisely replicate the rate of return and other characteristics of the index prior to investing in the actual securities. It is the view of the Department that the term ''Index Fund'' would allow the use of futures contracts by an Index Fund in order to reduce ''tracking error'' and to achieve the designated investment objectives of the Fund provided that such use is disclosed to plan investors. The disclosures should adequately describe the appropriate parameters and limitations on a manager's use of futures contracts for a Fund.

In this regard, the Department's conclusion is based upon its understanding that ''passive'' investment strategies employed by managers for Index Funds do not primarily rely on futures contracts to achieve a Fund's investment objectives, but rather rely on such contracts as a means for temporarily investing cash accumulations in the Fund prior to actually investing in and holding securities contained in the index. Conversely, the Department is unable to conclude that an Index Fund which invests primarily in index futures contracts as a means of achieving its investment objectives would meet the definition of ''Index Fund'' under section IV(a) of this exemption.

Several comments noted that the definition of the term ''Model-Driven Fund'' under the proposal (see section IV(b) below) requires that the identity and amount of a Fund's securities be ''* * * selected by a computer model that is based on prescribed objective criteria using independent third party data, not within the control of the Manager * * *'' These comments expressed concern that the definition does not appear to include separately managed Index Fund portfolios that exclude specific securities based on independent plan sponsor direction (as opposed to the determination of a computer model). In this regard, the comments noted that the Department has recognized in the past that the composition of a Model-Driven Fund may be influenced by client-initiated instructions to delete certain securities (*e.g.,* tobacco stocks) from an index that is otherwise being tracked. The comments suggested that the definition should be modified to include plan sponsor direction. According to the comments, this modification will not affect the intended purpose of the definition, which is to limit the amount of discretion a manager may exercise to affect the identity or amount of securities to be purchased or sold and to assure that such transactions are not part of an arrangement to benefit the manager.

In response to these comments, the Department notes that the definition of ''Model-Driven Fund'' in section IV(b)(1) of the exemption would include separately managed Fund portfolios which exclude specific securities based upon an independent plan fiduciary's (*e.g.,* a plan sponsor's) direction. The Department understands that managers will often use computer models which are designed to ''screen'' certain securities that are listed in an index from the acquisitions that a Fund would otherwise make, in order to accommodate plan sponsor direction. The definition of ''Model-Driven Fund,'' by allowing the identity of the securities which compose the Fund to be selected by a computer model, can accommodate Fund portfolios which are specifically designed to meet the guidelines dictated by plan sponsors. Thus, the Department does not believe that any further modification to this definition is necessary.

Another commenter noted that the definition of ''Model-Driven Fund'' in section IV(b) of the proposal is limited to Funds which use a computer model to ''transform an Index.'' The commenter stated that many Model-Driven Funds do not seek merely to ''transform an index'' by limiting their investment universe to those securities contained in a single Index, but rather seek to apply quantitative techniques using various forms of publicly available data across a wide spectrum of securities. For example, the Fund may seek to design a portfolio based on the largest 2500 stocks in the United States, based on market capitalization. These stocks may be contained in various independently maintained indexes, but not all 2500 stocks will be contained in a single index. The commenter urged the Department to delete the phrase ''* * * to transform an Index'' from section IV(b)(1) of the proposal and to substitute in its place the following ''* * * to achieve an investment return that is either based upon or measured by an Index.''

The Department does not believe that it would be appropriate in the context of a passive cross-trading exemption to permit managers to use indexes merely as a benchmark for the performance of a portfolio of a Model-Driven Fund. Accordingly, the Department has determined not to revise this definition.

Another comment related to both the definitions of ''Index Fund'' and ''Model-Driven Fund.'' The commenter noted that sections IV(a)(3) and IV(b)(2) of the proposal provide that each definition includes any investment fund, account or portfolio which either contains ''plan assets,'' is an investment company registered under the Investment Company Act of 1940, ''* * * or is an institutional investor.'' The comment noted that many index and model-driven funds are structured as common trust funds, limited liability companies, New Hampshire trusts or other forms of collective investment vehicles. Many of these funds do not contain ''plan assets'' subject to the Act, but are managed in the exact same manner as Funds that do contain ''plan assets.'' The commenter is concerned that the definitions of ''Index Fund'' and ''Model-Driven Fund'' will not include such funds unless the phrase ''* * * or is an institutional investor'' contained in sections IV(a)(3) and IV(b)(2) is modified to provide ''* * * or contains assets of one or more institutional investors.''

The Department concurs with the commenter's suggestion and, accordingly, has modified sections IV(a)(3) and IV(b)(2) of the final exemption.

12. *Definition of ''Triggering Event.''* Section IV(d) of the proposal defines the term ''triggering event'' by listing four specific ''events'' that are included within the definition. In this regard, the comments noted that the preamble to the proposal states that if a computer model used to create a portfolio for a Model-Driven Fund is designed to exclude particular securities for reasons specified by a plan client or the plan's investment guidelines, such exclusions would not be considered a separate triggering event. However, the comments noted that some of the Department's prior individual exemptions for cross-trading included, as a separate triggering event, the following:

''* * * a change in the composition or weighting of a portfolio used for a Model-Driven Fund which results from an independent fiduciary's decision to exclude certain stocks or types of stocks from the

Fund even though such stocks are part of the index used by the Fund.''[9]

The commenters requested that the Department modify the definition of ''triggering event'' to include a similar provision under the final exemption.

In response to the comments, the Department has added a fifth ''triggering event'' to section IV(d) of the exemption to incorporate the suggestion made by the commenters. Thus, section IV(d)(5) of the exemption includes within the definition of the term ''triggering event'' purchases and sales of securities made by Funds after changes to the portfolio of an Index or Model-Driven Fund solely as a result of an independent fiduciary's decision to exclude certain securities from the Fund.

In this regard, the Department notes that with respect to a Model-Driven Fund, if the exclusion of certain securities is ''built into'' the original design of the model, the operation of that model by the manager should not create additional cross-trade opportunities for the Fund, since the Fund was not designed to buy the specific securities which are excluded. Similarly, if an ''excluded security'' is added to an index which has been used by the model to create a portfolio for a Model-Driven Fund, the model should have been already programed to ''screen'' such securities from the acquisitions made by the Fund. Moreover, the additional triggering event would not apply with respect to any Index Fund or Model-Driven Fund that is a collective investment fund maintained by the manager, if the decision to exclude certain securities from the Fund's portfolio was made by the manager.

Lastly, the Department notes that the ''triggering event'' contained in section IV(d) would be effective on the date that the independent fiduciary directed the manager to exclude the securities from the Index or Model-Driven Fund, and, accordingly, the cross-trades of such securities would have to occur within three (3) business days, pursuant to the requirements of section II(b) of the exemption.

Another comment suggested a further modification to the definition of ''triggering event'' in the proposal. The commenter objected to the requirement in section IV(d)(2) of the proposal that a triggering event include a ''specific amount'' of net change in the overall level of assets in a Fund, as a result of investments and withdrawals, and the requirement in section IV(d)(3) of a ''specified amount'' of accumulated cash or stock in a Fund. The commenter suggested that the references to ''specific amount'' and ''specified amount'' be changed to ''material amount'' in both section IV(d)(2) and (3). In connection with this modification, the commenter also requested that a manager be allowed to either (i) identify such material amount in advance as a specified amount of net change (or accumulated cash or securities) relating to such Fund, or (ii) disclose, in the description of the manager's cross-trading practices, pursuant to section II(l) of the proposal, the parameters for determining a material amount of net change (or accumulated cash or stock), including any amount of discretion retained by the manager that may affect such net change (or accumulated cash or securities), in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given.

The Department has considered the commenter's suggestions for changes to the definition of ''triggering event,'' as contained in section IV(d)(2) and (3) of the proposal, and has determined that it would be appropriate to modify the final exemption. Thus, section IV(d)(2) and (3) of the exemption now reads as follows:

''(d) Triggering Event:

(2) A *material* amount of net change in the overall level of assets in a Fund, as a result of investments in and withdrawals from the Fund, provided that: (A) such *material* amount has either been *identified in advance as a specified amount of net change relating to such Fund and* disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days following, its inclusion as a ''triggering event'' for such Fund, *or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of net change, including any amount of discretion retained by the Manager that may affect such net change, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given;* and * * *.'' [emphasis added]

(3) An accumulation in the Fund of a *material* amount of either:

(A) cash which is attributable to interest or dividends on, and/or tender offers for, portfolio securities; or

(B) stock attributable to dividends on portfolio securities; provided that such *material* amount has *either* been *identified in advance as a specified amount relating to such Fund and* disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days after, its inclusion as a ''triggering event'' for such Fund, *or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of accumulated cash or securities, including any amount of discretion retained by the Manager that may affect such accumulated amount, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given* * * * '' [emphasis added]

In connection with the modification noted above, the Department cautions managers that any parameters established for determining a material amount of net change (or accumulated cash or securities), and any discretion retained by the manager which may affect such amounts, must be sufficiently limited and described in enough detail to enable proper identification and monitoring of such triggering events by plan fiduciaries.

Further, with respect to the ''triggering events'' that must be disclosed to client plans, certain comments noted that section III(b)(2) of the proposal permits a manager, under certain circumstances, to refuse to disclose to clients any trade secrets, or commercial or financial information that is privileged or confidential, where such information is contained in the manager's record-keeping system. However, these comments noted that the proposal does not include a similar protection for privileged or confidential information included within the mandated client disclosures for triggering events. For example, the triggering event contained in section IV(d)(4) of the proposal (*i.e.,* a change in the model-prescribed portfolio solely by operation of the formulae contained in the computer model underlying the Fund) can only be utilized if certain disclosures are made to an independent fiduciary of each of the plans participating in the Model-Driven Fund. The comments stated that certain of these disclosures may involve highly proprietary information that the investment manager is reluctant to disclose to clients, particularly through a written communication that a client could easily transmit to others. Thus, the comments requested that the Department allow a manager to refuse to disclose trade secrets, or commercial or financial information that is privileged or confidential, so long as the manager notes the reason for non-disclosure in its general disclosure to clients.

In this regard, the Department does not believe that the disclosure of basic factors for making changes in a portfolio for a Model-Driven Fund would require that privileged or confidential information be revealed by the manager to independent plan fiduciaries. Therefore, the Department has not modified the language of section IV(d)(4) in the final exemption.

13. *Definition of ''Large Account.''* One comment noted that section IV(e) of the proposal excludes from the definition of ''Large Account'' any ''

[9] *See,* for example, condition (c)(2) of PTE 94–36 (59 FR 19249, April 22, 1994) regarding The Northern Trust Company.

* * * Index Fund or Model-Driven Fund sponsored, maintained, *trusteed* or managed by the Manager * * *'' [emphasis added] The commenter noted that some banks act as a directed trustee for group trusts which are managed by third party investment managers. In these situations, the bank acts as a non-discretionary trustee and its primary role is to provide custody and record-keeping services for the group trust. The commenter stated that there is no reason that an independent investment manager should be precluded from retaining the bank as a trading adviser for the liquidation or restructuring of the Large Account since, in its capacity as a non-discretionary trustee, the bank will not be making the underlying investment decisions for the portfolio restructuring of the Large Account. Therefore, the commenter requested that the word ''trusteed'' be deleted from the definition of ''Large Account'' in section IV(e) of the proposal.

In this regard, the Department does not believe that it would be appropriate to include all investment funds trusteed by the manager in the definition of ''Large Account'' contained in the exemption. However, the Department has determined it would be appropriate to modify the language of section IV(e) of the final exemption to include an Index Fund or a Model-Driven Fund for which the manager is a nondiscretionary trustee. Consequently, the Department has added a definition of the term ''nondiscretionary trustee'' to the exemption under section IV(m).

Other comments suggested that the definition of ''Large Account'' in section IV(e) of the proposal should be modified by deleting entirely the phrase which provides that a Large Account '' * * * is not an Index Fund or a Model-Driven Fund sponsored, maintained, trusteed or managed by the Manager.'' These comments stated that, if the decision to liquidate a Fund's portfolio is made by an independent plan fiduciary, and such decision is entirely out of the manager's control, it should not matter whether the portfolio is an Index or Model-Driven Fund that is managed by the manager.

In response to these comments, the Department has determined that it would not be appropriate to make the requested modification to the definition of the term ''Large Account'' in section IV(e) of the exemption. The Department continues to believe that cross-trades by a manager's Index and Model-Driven Funds should be subject to the requirements and limitations applicable to Funds under the exemption, such as specified ''triggering events'' for cross-trade opportunities.

Another comment noted that section IV(e) of the proposal defines a ''Large Account'' as any investment fund, account or portfolio that, among other things, holds assets of a registered investment company other than an investment company advised or sponsored by the manager. The commenter believes that the limitation excluding investment companies advised or sponsored by the manager should be deleted. The commenter argued that the Large Account would not be participating in the manager's cross-trading program unless it were advised by the manager, and that the definition in the proposal excludes the very category of investment companies for which relief was intended.

The Department notes that the commenter's argument that a Large Account could be, and most likely would be, a registered investment company advised or sponsored by the manager is not consistent with the record upon which the exemption was developed by the Department. In this regard, the category of investment companies for which relief was intended under this exemption, as well as under prior individual exemptions, were those entities that are independent of the manager operating the cross-trading program, but who decide to hire the manager in order to carry out a specific portfolio restructuring program. In such instances, the restructured portfolio will often become an ''Index Fund'' or ''Model-Driven Fund'' (as defined herein) that will be managed by the manager.

However, the situation described by the commenter, which would permit the inclusion within a manager's cross-trading program for Large Accounts of ''actively-managed'' investment company portfolios advised by the manager, would expand the scope of the exemption beyond that intended by the Department. As discussed further below, the Department is not providing relief at this time for cross-trading programs involving ''actively-managed'' accounts or funds. Therefore, in response to this comment, the Department has determined not to modify section IV(e)(3) of the final exemption.

Other comments noted that the definition of ''Large Account'' in section IV(e) of the proposal requires that the plan or institutional investor whose assets are held by the Large Account have $50 million or more in total assets. The commenter suggested that the definition be revised to permit assets of affiliated plans maintained by the same employer, or controlled group of employers, to be aggregated for purposes of meeting the $50 million threshold.

In consideration of the commenter's suggestion, the Department has modified the definition of ''Large Account'' in section IV(e)(1) of the exemption to permit the aggregation of assets of employee benefit plans maintained by the same employer, or controlled group of employers, provided that such assets are pooled for investment purposes in a single master trust.

14. *Definition of ''Portfolio Restructuring Program.''* Several comments noted that the term ''portfolio restructuring program'' is defined in section IV(f) of the proposal to include the buying and selling of securities on behalf of a Large Account in order to produce a portfolio of securities which will be an Index Fund or a Model-Driven Fund ''managed by the Manager * * *'' In this regard, the comments noted that portfolio restructuring assignments occasionally contemplate that a manager will construct an Index Fund or Model-Driven Fund portfolio or some other type of portfolio which, once formed, will be managed on an ongoing basis by either the plan sponsor or an independent third party manager. In addition, the comments stated that since the terms ''Index Fund'' and ''Model-Driven Fund'' are already defined in the proposal, the phrase ''* * * managed by the Manager'' in the definition of ''portfolio restructuring program'' is unnecessary. Accordingly, the commenters suggested that the phrase ''managed by the Manager'' be deleted from the definition in section IV(f) of the final exemption.

In response to the comments, the Department has modified the definition of the term ''portfolio restructuring program'' in section IV(f) of the exemption to reads as follows:

''(f) Portfolio restructuring program—Buying and selling the securities on behalf of a Large Account in order to produce a portfolio of securities which will be an Index Fund or a Model-Driven Fund managed by the Manager *or by another investment manager, or in order to produce a portfolio of securities the composition of which is designated by a party independent of the Manager,* without regard to the requirements of * * * etc.'' [emphasis added]

15. *Volume Restrictions for Cross-Traded Securities.* A number of commenters responded to the Department's request for information on whether Index and Model-Driven Funds may hold a significant amount of the outstanding shares of a particular security, whether cross-trades of securities by a manager's Funds may represent a high percentage of the

outstanding daily trading volume for such securities, and whether some volume limitation for cross-traded securities would be appropriate. The commenters expressed the view that, even if a manager's Funds were cross-trading securities representing a high percentage of the average daily trading volume, there is no reason to impose a volume limitation in the exemption so long as the purchase or sale of such securities is mandated by a triggering event of an Index or Model-Driven Fund and the securities can be crossed at the closing market price, as established through an independent pricing source. These comments noted that such cross-trades are beneficial to plans regardless of whether the securities involved are thinly-traded, whether the Index and Model-Driven Funds hold significant amounts of the outstanding shares of the securities, or whether the manager's trading represents a high percentage of the trading volume for the securities. The commenters again noted the significant savings which are incurred by avoiding brokerage commissions and bid-ask spreads.

Thus, most commenters expressed the view that if a manager's Index and Model-Driven Funds have a bona fide need to buy or sell specific amounts of securities on any particular business day, in response to various triggering events, there should not be an arbitrary percentage limitation that would inhibit the manager from taking advantage of all cross-trade opportunities for such securities. However, another commenter expressed the view that the Department's exclusion of ''thinly-traded'' equity securities (by requiring in section II(f)(1) of the proposal that all cross-traded equity securities must be ''widely-held'' and ''actively-traded'') is unduly burdensome and unnecessary. As an alternative, this commenter recommended that the Department include ''thinly-traded'' equity securities, but impose some reasonable limitation on cross-trades of such securities, based on a comparison of the size of the cross-trade to the prior trading volume in the security over a reasonable period of time prior to the date of the transaction.

After considering the comments regarding the inclusion of ''thinly-traded'' equity securities in the exemption if an appropriate volume limitation is imposed, the Department has determined not to adopt this approach. The Department's decision is based, in part, on its understanding that, since a process-driven cross-trading program must allocate cross-trade opportunities in a mechanical fashion, it would not be economically feasible to override such allocations whenever the equity securities involved exceeded a specified volume limitation. Therefore, the Department continues to believe that it is more appropriate to allow cross-trades of all equity securities that are listed in an independently maintained third party index (*see* definition of ''Index'' in section IV(c) of the exemption), without any volume limitations. Under the exemption, the Department deemed all equity securities listed in an index to be ''widely-held'' and ''actively-traded'' for purposes of this exemption in order to allow the largest possible universe of equity securities to be cross-traded within the parameters of the conditions of the exemption. In the Department's view, the inclusion of ''thinly-traded'' equity securities that are not listed in an index would require additional safeguards, such as volume information and limitations, which may not be economically feasible in connection with the operation of a manager's cross-trading program.

16. *Avoidance of Adverse Market Impact; Savings in Transaction Costs; A Computer Model's Consideration of Liquidity.* In response to specific questions posed by the Department in the preamble to the proposal on the avoidance of market impact through cross-trades (*see* Section IV.B. of the preamble, 64 FR at 70063), several commenters noted that, by cross-trading at the close of market price, both sides of the cross-trade benefit by avoiding the potential for adverse market impact. The comments stated that adverse market impact occurs each time an investor trades through the market as the market price moves away from the offered price, meaning that the price decreases when the investor wants to sell and increases when the investor wants to buy.

One commenter stated that the Department appears to have concerns about the fact that a manager's avoidance of market impact may not be beneficial to plans at certain times. These concerns originate from the assumption that a manager could benefit certain plans by using a particular trade's market impact as an opportunity for obtaining a better price for a security on the open market. In this regard, the commenter noted that market impact is unpredictable and cannot be forecast by the manager. The commenter stated that managers believe that in most cases market impact is to be avoided, if possible. Thus, the commenter expressed the view that cross-trading, by avoiding the uncertainty of market impact, enables a manager to avoid the possibility of harm to certain clients which would result if trades were placed on the open market, and also eliminate transaction costs and custody costs.

Most commenters noted that a ''passive'' manager would have no incentive to use the limited amount of discretion allowed by its cross-trading program to favor one Fund or Account over another. One commenter stated that each manager would have the same trading goals for all Funds and Large Accounts—i.e., to maximize cross-trading and to minimize transaction costs for open market transactions.

Another commenter noted that Index and Model-Driven Funds are often buying and selling the same securities because there are many different Funds maintained by a manager that are tracking the same index (*e.g.,* the S&P 500 Index). Many managers also design portfolios for Model-Driven Funds that are based on the same index. Moreover, many large capitalization stocks are listed in more than one index. The commenters noted that cross-trades of such stocks between Index and Model-Driven Funds, pursuant to triggering events that occur without a manager's exercise of any investment discretion, at an objectively determined ''closing price'' as reported from a reputable third party source, are an efficient and effective way of meeting the investment objectives of plans which invest in such Funds.

In response, the Department recognizes the merits of cross-trading to reduce or eliminate transaction costs in the context of ''passively managed'' assets. In such instances, a manager has limited investment discretion as a result of independently determined triggering events.

With respect to the Department's concerns that the avoidance of market impact through cross-trades may not equally benefit both sides of such transactions, the Department notes that the potential for abuse appears to be significantly less with ''passively-managed'' assets than with ''actively-managed'' assets. However, the Department does not believe that the commenters have demonstrated that cross-trading creates market impact savings, if any, for both sides to any given cross-trade. The Department has been provided with data by one commenter demonstrating some market impact savings for one side in cross-trades of significant amounts of securities (*i.e.* market impact savings were measured where the cross-trades involved a large capitalization security traded in amounts averaging one and a quarter days of the average public trading volume of the security). No data

was provided to the Department measuring market impact savings for smaller cross-trades, nor was data provided measuring the market impact savings, if any, for each side in a particular cross-trade. Even so, as noted below, certain commenters have concluded that there has been significant transaction cost savings with cross-trading ''passively-managed'' assets and that these savings are attributable solely to the reduction or elimination of brokerage commissions and bid-ask spreads.

Another commenter noted that the preamble to the proposal suggests that relief would not be available under the exemption if the computer model used for a Fund considered the liquidity or availability of securities that are in the cross-trading ''network'' of Funds managed by the manager (*see* the sixth paragraph of Section IV.A. of the preamble, 64 FR at 70062). This commenter expressed the view that such a restriction is harmful to plans and misapprehends the operation of some ''passively-managed'' Funds. The commenter stated that truly ''passive'' Index Funds track the relevant indices and attempt to reduce or eliminate ''tracking error'' between the value of the Fund's portfolio vis-a-vis the value of the index's portfolio. The more identical an Index Fund's portfolio looks when compared to the underlying index's portfolio, and the cheaper the acquisition and disposition costs of the securities in the index, the lower the ''tracking error'' becomes. Thus, a successful ''passive'' manager is one who has the least amount of tracking error in its Index Funds. The commenter noted that the model used for such an Index Fund will always start with the proposition that the portfolio wants each security in the index in its precise capitalization-weighting, as determined by the index. The more information the model has about the costs of acquisition of any security, the less the tracking error will be for the Fund's portfolio and the more successful the manager will be in meeting the plan's investment objectives.

The Department's concerns regarding a computer model's consideration of liquidity or availability of certain securities that are in the manager's cross-trading ''network'' are best illustrated by the following example:

A computer model for a Model-Driven Fund identifies three possible securities for acquisition by the Fund in an attempt to achieve the optimal portfolio for the Fund within the specified guidelines dictated by the Fund's investors. These securities are identified, for purposes of this example, as ''A'', ''B'', and ''C''. Security ''A'' is the most liquid of the three securities, based on third party data, and security ''C'' is the least liquid. The model considers each security's liquidity factor, among other factors, and the estimated transaction costs which would be incurred to acquire the security, as part of its determination as to which security to buy and how much of the security to buy.

Assume that the model is programmed to make the selection of which security to buy, and the amount to buy, by considering only the liquidity information about each security that is available based on third party market data. Let's also assume that, based on such data, the model chooses security ''A'' and does not choose securities ''B'' or ''C''. The exemption would apply for acquisition of security ''A'' to be made by the Fund through cross-trades.

However, let's assume that the model is programmed to make the selection of which security to buy, and the amount to buy, by considering cross-trade opportunities that are available for each security, in addition to other liquidity information that is available based on third party data. Let's also assume that security ''C'' is available through a cross-trade and that the Fund can acquire all the securities it needs through cross-trades of that security. The model has been programmed to ''view'' security ''C'' as having ''infinite liquidity'' because the data within the control of the manager suggests that it can be acquired without incurring any transaction costs. However, this circumstance results from the fact that the necessary number of shares of security ''C'' which the model has determined that the Fund needs is available through cross-trades. Under this example, security ''C'' is considerably less liquid than security ''A'' based upon available third party data. The exemption would not apply for acquisitions of security ''C'' to be made by the Fund through cross-trades because the selection of security ''C'' was based upon the manager's own liquidity information at that time and not liquidity information based solely on third party data.

The Department believes that adoption of the commenter's liquidity approach could result in cross-trading opportunities within the control of the manager impacting upon the investment determinations of the Fund. In this regard, the Department notes that investment decisions made by a Fund may not be based in whole or in part by the manager on the availability of cross-trade opportunities and must be made prior to the identification and determination of any cross-trade opportunities, pursuant to the statement required under section II(j) of the exemption. Therefore, any model's consideration of information relating to cross-trade opportunities for particular securities, as part of the model's determination of which securities to buy or sell, how much of a security to buy or sell, or when to execute a sale or purchase of the securities for the Fund, would not be permitted under the exemption. The Department continues to believe that liquidity considerations and other factors considered by a computer model must be based on independent third party data, not within the control of the manager, as described under section IV(b) of the exemption.

Other commenters noted that the transaction cost savings attributable to cross-trades, pursuant to cross-trading programs operating under the Department's existing individual exemptions, are significant. In response to the Department's questions about whether such cost savings are attributable to the avoidance of market impact or only commission savings, one commenter stated that its clients have saved over $300 million annually through cross-trading and that this calculation is based entirely on the avoidance of brokerage commissions and bid-ask spreads. Another commenter stated that its clients saved approximately $282 million in the calendar year 1999, based on the total number of shares that were cross-traded during the year, broken down by the market in which each share would have been traded if it went to the open market. This commenter also confirmed that these savings are attributable to savings in brokerage commissions, bid-ask spreads and taxes, as applicable in each market. Thus, in both instances, the commenters noted significant cost savings even without taking into consideration whatever measurable ''savings'' may have been attributable to the avoidance of market impact.

17. *Effect of Class Exemption on Individual Exemptions; Appropriate Scope of Relief for the Exemption.* The commenters expressed many different points of view in response to the Department's invitation for comments on the effect that the continuation of current individual exemptions, for cross-trades by Index and Model-Driven Funds, would have in offering an advantage to those investment managers granted such relief compared to those managers which would utilize this exemption (*see* Section IV.H. of the preamble to the proposal, 64 FR at 70066).

One comment noted that the proposal would expand the relief for cross-trading beyond the relief currently available under the individual exemptions, particularly by permitting cross-trades of debt securities and by expanding the definitions of Funds and Large Accounts that are permitted to cross-trade. However, the comment also noted that the proposal imposes a number of additional disclosure, authorization and operational requirements on cross-trading programs. Thus, the comment stated that it is not

clear whether managers who continue to utilize their individual exemptions would have an advantage over those utilizing the class exemption.

Another comment stated that some individual exemptions have been relied upon by managers for more than a decade and that such exemptions should remain in place after the class exemption is granted. This commenter noted that managers have invested substantial time and resources in the current cross-trading systems, and other programmatic features in such systems have been developed in reliance upon the conditions of the individual exemptions. Any revocation of the existing exemptions would mandate conformance with the new exemption's requirements and features, and the manager's cross-trading procedures and systems would have to be significantly revised. The commenter stated that such revisions would place an undue burden on the managers, would add significant costs to the operation of the existing cross-trading programs, and would not provide any added benefits to the managers' client plans.

However, other commenters stated that, by permitting firms to continue to rely on individual exemptions that have, in some respects, less stringent conditions than the proposal, the Department would create a competitive advantage for advisers who already have exemptions. Some commenters further stated that, by granting the class exemption, the Department is already creating a competitive advantage for firms that ''passively manage'' plan assets over those which ''actively manage'' such assets. These commenters urged the Department to hold all firms to the same standard, at least with respect to the class exemption, and eliminate the existing individual exemptions to ensure an ''equal playing field'' for all similarly situated managers that ''passively-manage'' assets.

In this regard, the Department has not made a determination at the present time whether to revoke any past individual exemptions for cross-trading programs involving Index and Model-Driven Funds. It is not clear whether managers who continue to utilize their individual exemptions will have an advantage over those utilizing the class exemption since cross-trades may only be performed if they conform with either all of the provisions of an individual exemption or all of the provisions of the class exemption (*i.e.,* managers who hold individual exemptions may not pick and choose selected provisions from their own exemptions and the class exemption). As noted in the preamble to the proposal, prior to modifying or revoking any individual exemption, the Department must publish a notice of its proposed action in the **Federal Register** and provide interested persons with an opportunity to comment on any proposed revocation or modification of such exemptions.

Other commenters requested that the Department expand the proposal to permit cross-trades by ''actively-managed'' plan accounts of a manager. These commenters noted that the clear advantages of cross-trading should be available to both actively and passively managed funds, and that the Department's exclusion of ''actively-managed'' funds from the current exemption is unfair.

Other commenters stated that it was appropriate for the Department to handle cross-trades by ''passively-managed'' funds separately. Such commenters noted that ''passive'' managers have far less discretion than ''active'' managers. One comment stated that a class exemption attempting to address both ''actively'' and ''passively'' managed funds would be confusing and could lead to the application of unnecessarily burdensome conditions on ''passively-managed'' funds to address concerns applicable only to ''actively-managed'' funds.

The Department has determined to grant this exemption for cross-trading programs involving Index and Model-Driven Funds and to separately proceed with its consideration of relief for cross-trades by ''actively-managed'' plan accounts or pooled funds containing ''plan assets'' covered by the Act.[10] The Department acknowledges that appropriate cross-trades of securities by ''actively-managed'' accounts or funds would be beneficial to employee benefit plans in saving transaction costs and avoiding adverse market impact for both sides of the transactions. However, the Department believes that adequate safeguards must be developed in order to prevent abuses which could occur when an investment manager has significant investment discretion which could be used to benefit certain clients or the manager itself at the expense of its ERISA-covered accounts.

The Department is currently considering what conditions may be necessary to address potential abuses in cross-trading programs that would involve ''actively-managed'' plan accounts. The Department continues to receive and review additional information from various interested persons which will assist the Department in developing a separate class exemption for cross-trades by ''actively-managed'' plan accounts.

Description of the Exemption

A. Scope and General Rule

The exemption consists of four parts. Section I sets forth the general exemption and describes the transactions covered by the exemption. Sections II and III contain specific and general conditions applicable to transactions described in section I. Section IV contains definitions for certain terms used in the exemption.

The exemption set forth in section I provides relief from the restrictions of sections 406(a)(1)(A) and 406(b)(2) of ERISA and section 8477(c)(2)(B) of FERSA for: (a) The purchase and sale of securities between an Index or Model-Driven Fund and another such Fund, at least one of which holds ''plan assets'' subject to the Act; and (b) the purchase and sale of securities between such Funds and certain large accounts (Large Accounts) pursuant to portfolio restructuring programs of the Large Accounts. The exemption also would apply to cross-trades between two or more Large Accounts if such cross-trades occur as part of a single cross-trading program involving both Funds and Large Accounts pursuant to which securities are cross-traded solely as a result of the objective operation of the program.

The exemption under section I(a) applies to cross-trades of securities among Index or Model-Driven Funds managed by the same investment manager where both Funds contain plan assets. However, as stated above, a violation of section 406(b)(2) occurs when an investment manager has investment discretion with respect to both sides of a cross-trade of securities and at least one side is an entity which contains plan assets. As a result, the exemption is also applicable to situations where the investment manager has investment discretion for both Funds involved in a cross-trade but one Fund does not contain plan assets

[10] Interested persons may wish to review the information received by the Department in response to the Notice published in the **Federal Register** on March 20, 1998 (63 FR 13696) and in the testimony provided at the public hearing on cross-trades of securities by ''actively-managed'' plan accounts and pooled funds (the Hearing), which was held at the Department on February 10 and 11, 2000. Copies of the comments received by the Department in response to the Notice, and the testimony received at the Hearing, are available for public inspection in the Public Documents Room, Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–1513, 200 Constitution Avenue NW, Washington, DC 20210. For copies of the comments relating to the Notice, interested persons should request File No. M–9043. For copies of the testimony received at the Hearing, interested persons should request File No. D–10851 (Cross-Trades of Securities Hearing).

because, for example, it is registered as an investment company under the Investment Company Act of 1940 (*e.g.,* a mutual fund). Any mutual fund or other institutional investor covered by the exemption under section I(a) must meet the definition of an Index Fund or a Model-Driven Fund, contained in section IV(a) and (b). Institutional investors which meet the definitions contained in section IV(a) and (b) may include, but are not limited to, entities such as insurance company separate accounts or general accounts, governmental plans, university endowment funds, charitable foundation funds, trusts or other funds exempt from taxation under section 501(a) of the Code.

The exemption under section I(b) applies to the purchase and sale of securities between a Fund and a Large Account, at least one of which holds ''plan assets'' subject to ERISA or FERSA, pursuant to portfolio restructuring programs initiated on behalf of certain Large Accounts. The term ''Large Account'' is defined in section IV(e) to include certain large employee benefit plans or other large institutional investors with at least $50 million in total assets, including certain insurance company separate and general accounts and registered investment companies. For purposes of the $50 million requirement, the assets of one or more employee benefit plans maintained by the same employer, or controlled group of employers, may be aggregated, provided that such assets are pooled for investment purposes in a single master trust. A portfolio restructuring program, as defined in section IV(f), involves the buying and selling of securities on behalf of a Large Account in order to produce a portfolio of securities which either becomes an Index Fund or a Model-Driven Fund or resembles such a Fund, or to carry out a liquidation of a specified portfolio of securities for a Large Account. The Fund or other portfolio resulting from the restructuring program will be either managed by the manager of the Fund or by an investment manager that is independent of the Fund manager. The definition of a Large Account requires that an independent fiduciary authorize a Fund manager (*i.e.,* a Manager, as defined in section IV(i)) to restructure all or part of the portfolio or to act as a ''trading adviser'' as defined in section IV(g) with respect to the restructuring of such portfolio. The trading adviser's role is limited under the exemption to the disposition within a stated period of time of a securities portfolio of a Large Account and/or the creation of the required portfolio.

Under this definition, the manager may not have any discretionary authority for any asset allocation, restructuring or liquidation decisions or otherwise provide investment advice with respect to such transactions. In this regard, the Department notes that it expects the investment manager to comply with the applicable securities laws in connection with any portfolio restructuring program.

Section IV(a) and (b) require that the Index or Model-Driven Fund be based upon an index which represents the investment performance of a specific segment of the public market for equity or debt securities. Section IV(c) requires that the index be established and maintained by an independent organization which is: in the business of providing financial information or brokerage services to institutional clients; a publisher of financial news or information; or a public stock exchange or association of securities dealers. The index must be a standardized index of securities which is not specifically tailored for the use of the Fund manager.

Section IV(a) and (b) specifically define Index and Model-Driven Funds for purposes of the exemption. These definitions are designed to limit the amount of discretion the manager can exercise to affect the identity or amount of securities to be purchased or sold and to assure that the purchase or sale of any security is not part of an arrangement, agreement or understanding designed to benefit the manager. Under the definition of ''Index Fund'' contained in section IV(a), the investment manager must track the rate of return of an independently maintained securities index by either replicating the same combination of securities which compose such index or by investing in a representative sample of such portfolio based on objective criteria and data designed to recreate the projected return, risk profile and other characteristics of the index. Under the definition of ''Model-Driven Fund'' contained in section IV(b), trading decisions are passive or process-driven since the identity and the amount of the securities contained in the Fund must be selected by a computer model. Although the manager can use its discretion to design the computer model, the model must be based on prescribed objective criteria using third party data, not within the control of the manager, to transform an independently maintained index. Thus, for example, no exemptive relief would be available if the manager designed the computer model to consider the liquidity or the availability of a security based on information that was solely within the control of the manager. In such instances, the computer model would be considering data that was not from a third party source, and that was within the control of the manager.

B. Price and Securities

Section II(a) of the exemption requires that each cross-trade be executed at the closing price for that security. In addition, section II(g) of the exemption requires that the manager may not receive any brokerage fees or commissions as a result of the cross-trades.

Closing price is defined in section IV(h) as the price for the security on the date of the transaction, as determined by objective procedures disclosed to Fund investors in advance and consistently applied with respect to securities traded in the same market. The procedures shall indicate the independent pricing source (and alternates, if the designated pricing source is unavailable) used to establish the closing price and the time frame after the close of the market in which the closing price will be determined. The pricing source must be independent of the manager and must be engaged in the ordinary course of business of providing financial news and pricing information to institutional investors and/or the general public, and must be widely recognized as an accurate and reliable source for such information. In this regard, some managers may use one pricing service for pricing domestic securities and another pricing service for pricing foreign securities. With respect to foreign securities, the applicable independent pricing source should provide the price in local currency rates and, if that currency is other than U.S. dollars, may also provide the U.S. dollar exchange rate. Thus, securities must be cross-traded in all cases at the closing prices received by the manager from the relevant independent pricing source.

The Department has adopted this definition of the term ''closing price'' in an effort to be consistent with the methods for determining the price of cross-traded securities currently utilized by Index and Model-Driven Fund investment managers, according to both the comments received in response to the proposal published on December 15, 1999 and the comments received in response to the Notice published on March 20, 1998. In addition, the Department believes that this pricing approach will ensure that the pricing procedures utilized are objective and not subject to the discretion or

manipulation of any of the involved parties.

Section II(f) of the exemption requires that cross-trades of either equity securities or fixed income securities involve only securities for which market quotations are readily available from independent sources that are engaged in the ordinary course of business of providing financial news and pricing information to institutional investors and/or the general public, and are widely recognized as accurate and reliable sources for such information. Section II(f)(1) further requires that cross-trades of equity securities only involve securities which are widely-held and actively-traded. In this regard, the Department notes that equity securities will be deemed to be ''widely-held'' and ''actively-traded'' under this exemption if such securities are included in an independently maintained index, as defined in section IV(c) herein. The Department expects that managers, in making their determinations regarding the types of securities included within the scope of this condition, would consider information about the average daily trading volume for equities traded on any recognized securities exchange or automated broker-dealer quotation system which would be readily available from independent pricing sources or other independent sources which publish financial news and information.

C. Triggering Events

Section II(b) of the exemption requires that any purchase or sale of securities by a Fund in a cross-trade with another Fund or with a Large Account occur as a direct result of a ''triggering event,'' as defined in section IV(d), and that such cross-trade be executed no later than the close of the third business day following such ''triggering event.'' The Department believes that trading pursuant to triggering events limits the discretion of the manager to affect the identity or amount of securities to be purchased or sold. Triggering events, as defined in section IV(d), are outside the control of the manager and will ''automatically'' cause the buy or sell decision to occur.

Triggering events are defined in section IV(d) as:

(1) A change in the composition or weighting of the index underlying the Fund by the independent organization creating and maintaining the index;

(2) A material amount of net change in the overall level of assets in a Fund, as a result of investments in and withdrawals from the Fund, provided that:

(A) Such material amount has either been identified in advance as a specified amount of net change relating to such Fund and disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days following, its inclusion as a ''triggering event'' for such Fund or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of net change, including any amount of discretion retained by the Manager that may affect such net change, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given; and

(B) Investments or withdrawals as a result of the manager's discretion to invest or withdraw assets of a Manager Plan, other than a Manager Plan which is a defined contribution plan under which participants direct the investment of their accounts among various investment options, including such Fund, will not be taken into account in determining the specified amount of net change;

(3) An accumulation in the Fund of a material amount of either:

(A) Cash which is attributable to interest or dividends on, and/or tender offers for, portfolio securities; or

(B) Stock attributable to dividends on portfolio securities;

provided that such material amount has either been identified in advance as a specified amount relating to such Fund and disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days after, its inclusion as a ''triggering event'' for such Fund, or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of accumulated cash or securities, including any amount of discretion retained by the Manager that may affect such accumulated amount, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given;

(4) A change in the composition of the portfolio of a Model-Driven Fund mandated solely by operation of the formulae contained in the computer model underlying the Fund where the basic factors for making such changes (and any fixed frequency for operating the computer model) have been disclosed in writing to an independent fiduciary of each plan having assets held in the Fund, prior to, or within ten (10) days after, its inclusion as a ''triggering event'' for such Fund; or

(5) A change in the composition or weighting of a portfolio for an Index Fund or a Model-Driven Fund which results from an independent fiduciary's direction to exclude certain securities or types of securities from the Fund, notwithstanding that such securities are part of the index used by the Fund.

The first three triggering events have been adopted based upon those triggering events utilized in prior individual exemptions, with an additional requirement in the second and third triggering events for the amounts involved, or the parameters for determining such amounts, to be specified and disclosed to independent fiduciaries of plans investing in the Funds. In addition, the fourth triggering event has been added in order to clarify that a triggering event also occurs as a result of a change in the composition of a Fund's portfolio mandated solely by operation of the computer model underlying the Fund. For example, if a model contained a formula for a Fund requiring only stocks with a certain price/earnings ratio and some of the originally prescribed stocks now were above the specified tolerances of the formula relating to that model, a triggering event would occur requiring that those stocks be sold by the Fund. The Department has included this triggering event under this exemption in order to clarify that Model-Driven Funds may need to buy or sell securities to conform to changes to the portfolio prescribed by the model that differ from changes to a portfolio necessitated as a result of changes to the underlying index. The exemption does not require that a computer model be operated according to any fixed frequency. However, the Department is of the view that the exemption would not be available unless the formulae contained in the computer model underlying a Fund were operated by the manager on an objective basis rather than being used for the purpose of creating cross-trade opportunities in response to the needs of other Funds or certain Large Accounts.

The Department further notes that under section II(k), disclosures must be made to independent plan fiduciaries of the affected Funds regarding the triggering events that would create cross-trading opportunities for such Funds under the manager's cross-trading program. Under the model-driven triggering event contained in the exemption, the basic factors for making changes in the composition of the

portfolio of a Model-Driven Fund mandated solely by operation of the formulae contained in the computer model must be included in these disclosures.

The Department notes that a fifth triggering event has been added to the final exemption, based on comments received, which permits plan sponsors to direct the manager to delete certain securities from an Index or Model-Driven Fund where the Fund otherwise would hold such securities based upon the particular index or computer model. The Department understands that this triggering event is consistent with practices utilized by certain managers in prior individual exemptions and will facilitate additional cross-trade opportunities.

D. Modifications to the Computer Model

Section II(c) requires that, if the model or the computer program used to generate the model underlying the Fund is changed by the manager, no cross-trades of any securities can be engaged in pursuant to the exemption for three (3) business days following the change. This restriction recognizes the authority of the manager to change assumptions involving computer models after the model's activation.

The Department notes that the three (3) business day ''blackout'' period for cross-trades by a Fund after any change made by the manager to the model underlying the Fund is intended to prevent model changes which might be made by managers, in part, to deliberately create additional cross-trading activity.

In addition, under section IV(b), a computer model for a Model-Driven Fund must use independent third party data, not within the control of the manager, to transform an index.

E. Allocation of Cross-Trade Opportunities

The Department notes that frequently the amount of a security which all of the Funds need to buy may be less than the amount of such security which all of the Funds will need to sell, or vice versa. Thus, section II(d) of the exemption requires that all cross-trade opportunities be allocated by the manager among potential buyers, or sellers, on an objective basis. Under section II(d), this basis for allocation must have been previously disclosed to independent fiduciaries on behalf of each plan investor, and must not permit the exercise of any discretion by the manager. In previous individual exemptions, applicants have relied on different systems (*e.g.* pro rata or queue) to objectively allocate cross-trade opportunities. While it appears to the Department that a pro rata basis of allocation would be the method least subject to scrutiny, the Department recognizes the validity of other workable objective systems. However, the Department cautions that such systems may not permit the exercise of discretion by the manager.

F. Requirements for Cross-Trades by a Manager Plan

Section II(e) of the exemption requires that no more than twenty (20) percent of the assets of the Fund or Large Account at the time of the cross-trade may be comprised of assets of employee benefit plans maintained by the Manager for its own employees (Manager Plans) for which the Manager exercises investment discretion. In this regard, the Department wishes to note that this percentage limitation would not apply to any Manager Plan(s) for which the Manager does not exercise investment discretion. For example, a Manager Plan which is a defined contribution plan under which participants direct the investment of their accounts among various investment options would not be subject to the twenty (20) percent limit.

G. Disclosures and Authorizations

Section II(h) of the exemption requires that a plan's participation in a cross-trade program of a manager involving Index and Model-Driven Funds at least one of which holds ''plan assets'' subject to the Act will be subject to the prior written authorization of a plan fiduciary who is independent of the manager. However, for purposes of this exemption, the requirement that the authorizing fiduciary be independent of the manager shall not apply in the case of a Manager Plan. In this regard, section II(e) of the exemption requires that no more than twenty (20) percent of the assets of the Fund or Large Account at the time of the cross-trade may be comprised of assets of a Manager Plan for which the Manager exercises investment discretion.

The authorization described in section II(h), once given, would apply to all Funds that comprise the manager's cross-trading program at the time of the authorization. Thus, a new authorization by an independent plan fiduciary for investment in a different Fund, in which the plan did not invest at the time of its initial written authorization, would not be necessary to the extent that such Fund was part of the program at the time of the original authorization. However, where a manager makes new Funds available for plan investors or changes triggering events relating to Funds subject to the initial authorization, and such Funds or triggering events were not previously disclosed as being part of the manager's cross-trading program, section II(k) of the exemption requires that the manager furnish additional disclosures to an independent plan fiduciary. The Manager shall provide a notice to each relevant independent plan fiduciary of plans invested in the affected Funds prior to, or within ten (10) days following, such addition of Funds or change to, or addition of, triggering events, which contains a description of such Fund(s) or triggering event(s). Such notice will also include a statement that the plan has the right to terminate its participation in the cross-trading program and its investment in any Index Fund or Model-Driven Fund without penalty at any time, as soon as is necessary to effectuate the withdrawal in an orderly manner.

As noted below, section II(l) requires that disclosures be made to the relevant independent plan fiduciaries regarding each Fund in which the plan is invested as part of the notice required for a plan's annual re-authorization of its participation in the manager's cross-trading program. In addition, section II(l) requires that disclosures regarding any new Funds, or new triggering events in any existing Funds, in which a plan is not invested be made available, upon request, as part of the notice required for a plan's annual re-authorization of its participation in the manager's cross-trading program.

Section II(i) clarifies the meaning of Section II(h) with respect to existing plan investors in any of the Funds, which hold plan assets subject to the Act, prior to a manager's implementation of a cross-trading program. Under section II(i), the authorizing independent fiduciary must be furnished notice and an opportunity to object to that plan's participation in the program not less than forty-five (45) days prior to the implementation of the cross-trade program. Section II(i) further states that the failure of the authorizing fiduciary to return a special termination form provided in the notice by a specified date that is at least thirty (30) days from receipt shall be deemed to be approval of the plan's participation in the program. If the authorizing plan fiduciary objects to the plan's inclusion in the program, the plan will be given the opportunity to withdraw without penalty prior to the program's implementation.

Sections II(j) and II(k) describe the type of information that is required to be disclosed to a plan fiduciary prior to the authorization defined in sections II(h)

and II(i). Important among these disclosures is a statement describing the conflicts that will exist as a result of the manager's cross-trading activities. This statement must also detail and explain how the manager's practices and procedures will mitigate such conflicts. Such writing must include a statement that:

Investment decisions will not be based in whole or in part by the manager on the availability of cross-trade opportunities. These investment decisions include:

- Which securities to buy or sell;
- How much of each security to buy or sell; and,
- When to execute a sale or purchase of each security.

Investment decisions will be made prior to the identification and determination of any cross-trade opportunities. In addition, all cross-trades by a Fund will be based solely upon triggering events set forth in the exemption. Records documenting each cross-trade transaction will be retained by the manager.

Section II(l) further requires that notice be provided to the authorizing plan fiduciary at least annually of the plan's right to terminate its participation in the cross-trading program and its investment in any of the Funds without penalty. Such notice must be accompanied by a special termination form. Failure to return the form by a specified date that is at least thirty (30) days from the receipt will be deemed approval of the plan's continued participation in the cross-trading program. In lieu of providing a special termination form, the notice may permit the independent plan fiduciary to utilize another written instrument by the specified date to terminate the plan's participation in the cross-trading program, provided that in such case the notice explicitly discloses that a termination form may be obtained from the Manager upon request. Such annual re-authorization will provide information to the relevant independent plan fiduciary regarding each Fund in which the plan is invested, as well as explicit notification that the plan fiduciary may request and obtain disclosures regarding any new Funds in which the plan is not invested that are added to the cross-trading program, or any new ''triggering events'' (as defined in Section IV(d) below) that may have been added to existing Funds in which the plan is not invested, since the time of the initial authorization described in Section II(h), or the time of the notice described in Section II(i).

Section II(m) of the exemption details specific requirements for cross-trades of securities which will occur in connection with a Large Account restructuring. In particular, section II(m)(2) requires that the authorization for such cross-trades must be made in writing prior to the cross-trade transactions by fiduciaries of the Large Account who are independent of the manager (except in the case of a Manager Plan). Such authorization must follow full written disclosure of information regarding the cross-trading program. Such authorization may be terminated at will upon receipt by the manager of written notice of termination. A termination form must be supplied to the Large Account fiduciary concurrent with the written description of the cross-trading program. Under section II(m)(3), the portfolio restructuring program must be completed within sixty (60) days of the initial authorization made by the Large Account's fiduciary (or initial receipt of assets associated with the restructuring, if later), unless the Large Account's fiduciary agrees in writing to extend this period for another thirty (30) days. Large Account fiduciaries may utilize the termination form or any other written instrument at any time within the 60-day period, or the additional 30-day period, to terminate their prior written authorization for cross-trading related to the portfolio restructuring program. Under section II(m)(4), within thirty (30) days of the completion of the restructuring program, the Large Account fiduciary must be fully apprised in writing of the results of the transactions. Such writing may include, upon request by the Large Account fiduciary, additional information sufficient to allow the independent fiduciary for the Large Account to verify the need for each cross-trade and the determination of the above decisions. However, pursuant to section III(b)(2) the manager may refuse to disclose to a Large Account fiduciary or other person any such information which is deemed confidential or privileged if the manager is otherwise permitted by law to withhold such information from such person, provided that by the close of the thirtieth (30th) day following the request, the manager gives a written notice to such person advising that person both the reasons for the refusal and that the Department may request such information.

H. Recordkeeping

Section III(a) requires that the manager maintain records necessary to allow a determination of whether the conditions of the exemption have been met. These records must be maintained for a period of six (6) years from the date of the transactions. These records must include records which identify the following:

(1) On a Fund by Fund basis, the specific triggering events which result in the creation of the model prescribed output or trade list of specific securities to be cross-traded;

(2) On a Fund by Fund basis, the model prescribed output or trade list which describes: (A) which securities to buy or sell; (B) how much of each security to buy or sell; in detail sufficient to allow an independent plan fiduciary to verify that each of the above decisions for the Fund was made in response to specific triggering events; and

(3) On a Fund by Fund basis, the actual trades executed by the Fund on a particular day and which of those trades were associated with triggering events.

As explained to the Department, the triggering event relating to net investments in, or withdrawals from, a Fund results in new cash to invest in the Fund or the need to liquidate securities from a Fund. The model or index underlying the Fund determines which securities to purchase or sell based on the amount of net investments or withdrawals. This process results in the creation of a trade list or a model prescribed output of securities to be purchased or sold. The manager then applies its objective allocation system to the trade lists or model prescribed outputs used for other Funds participating in the cross-trade program to determine which particular cross-trades will occur between Funds. For those securities which cannot be cross-traded after application of the manager's allocation system, the necessary purchases and sales are made through other means.

In the view of the Department, records must be maintained of this cross-trading activity with enough specificity to allow an independent plan fiduciary to verify whether the safeguards of this exemption have been met. Section II(b) requires that any cross-trade of securities by a Fund occur as a direct result of a ''triggering event'' as defined in section IV(d) and is executed no later than the close of the third business day following such ''triggering event.'' Among the records needed to verify that this condition has been satisfied, section III(a)(1) requires that, on a Fund by Fund basis, the manager maintain a record of the specific triggering events which result in the creation of the list of specific securities for the manager's cross-trading system. Section III(a)(2) further requires that, on a Fund by Fund basis, the manager maintain records of

the model prescribed output or trade list, as well as the procedures utilized by the manager to determine which securities to buy or sell and how much of each security to buy or sell, in detail sufficient to allow an independent plan fiduciary to verify that each of the above decisions for the Fund was made in response to specific triggering events. As provided by section III(b)(2), if such material is viewed as a trade secret, or privileged or confidential, the manager may refuse to disclose such information if reasons for the refusal are given and the person is also notified that the Department of Labor may request such information.

This record-keeping requirement is intended to assure that independent plan fiduciaries will be able to determine whether Funds and their underlying models or indexes operate consistently in following the input of triggering event information. The Department does not intend to prescribe a detailed list of records that are necessary to enable a determination of compliance with the exemption because the necessary records will depend on the nature of the Index or Model-Driven Funds involved and other factors. This information, however, should be kept in sufficient detail to enable a replication of specific historical events in order to satisfy an inquiry by persons identified in section III(b)(1). Section III(a)(3) requires that, on a Fund by Fund basis, records be maintained of the actual trades executed by the Fund on a particular day and which of those trades resulted from triggering events.

Further, Section III(a) requires that the records must be readily available to assure accessibility and maintained so that an independent fiduciary, or other persons identified in section III(b)(1), may obtain them within a reasonable time. This requirement should permit the records to be retrieved and assembled quickly, regardless of the location in which they are maintained. For those records which are not maintained electronically, the records should be maintained in a central location to facilitate assembly and examination.

All records must be unconditionally available at their customary location for examination during normal business hours by the persons described in section III(b)(1). However, as noted with respect to information which may be disclosed to a Large Account fiduciary or other person, the manager may refuse to disclose to a person, other than a duly authorized employee or representative of the Department or the Internal Revenue Service, any such information which is deemed confidential or privileged if the manager is otherwise permitted by law to withhold such information from such person. In such instances, the manager shall provide, by the close of the thirtieth (30th) day following the request, a written notice to such person advising that person of the reasons for the refusal and that the Department may request such information.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties with respect to the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code, and based upon the entire record, the Department finds that the exemption is administratively feasible, in the interests of the plans and their participants and beneficiaries and protective of the rights of participants and beneficiaries of such plans;

(3) The exemption is applicable to a particular transaction only if the conditions specified in the class exemption are met; and

(4) The exemption is supplemental to, and not in derogation of, any other provisions of the Code and the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990.)

Section I—Exemption for Cross-Trading of Securities by Index and/or Model-Driven Funds

Effective April 15, 2002, the restrictions of sections 406(a)(1)(A) and 406(b)(2) of the Act, section 8477(c)(2)(B) of FERSA, and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) of the Code, shall not apply to the transactions described below if the applicable conditions set forth in Sections II and III below are satisfied.

(a) The purchase and sale of securities between an Index Fund or a Model-Driven Fund (a ''Fund''), as defined in Sections IV(a) and (b) below, and another Fund, at least one of which holds ''plan assets'' subject to the Act or FERSA; or

(b) The purchase and sale of securities between a Fund and a Large Account, as defined in Section IV(e) below, at least one of which holds ''plan assets'' subject to the Act or FERSA, pursuant to a portfolio restructuring program, as defined in Section IV(f) below, of the Large Account;

Notwithstanding the foregoing, this exemption shall apply to cross-trades between two or more Large Accounts pursuant to a portfolio restructuring program if such cross-trades occur as part of a single cross-trading program involving both Funds and Large Accounts for which securities are cross-traded solely as a result of the objective operation of the program.

Section II. Specific Conditions

(a) The cross-trade is executed at the closing price, as defined in Section IV(h) below.

(b) Any cross-trade of securities by a Fund occurs as a direct result of a ''triggering event,'' as defined in Section IV(d) below, and is executed no later than the close of the third business day following such ''triggering event.''

(c) If the cross-trade involves a Model-Driven Fund, the cross-trade does not take place within three (3) business days following any change made by the Manager to the model underlying the Fund.

(d) The Manager has allocated the opportunity for all Funds or Large Accounts to engage in the cross-trade on an objective basis which has been previously disclosed to the authorizing fiduciaries of plan investors, and which does not permit the exercise of discretion by the Manager (*e.g.,* a pro rata allocation system).

(e) No more than twenty (20) percent of the assets of the Fund or Large Account at the time of the cross-trade is

comprised of assets of employee benefit plans maintained by the Manager for its own employees (Manager Plans) for which the Manager exercises investment discretion.

(f)(1) Cross-trades of equity securities involve only securities that are widely-held, actively-traded, and for which market quotations are readily available from independent sources that are engaged in the ordinary course of business of providing financial news and pricing information to institutional investors and/or the general public, and are widely recognized as accurate and reliable sources for such information. For purposes of this requirement, the terms ''widely-held'' and ''actively-traded'' shall be deemed to include any security listed in an Index, as defined in Section IV(c) below; and

(2) Cross-trades of fixed-income securities involve only securities for which market quotations are readily available from independent sources that are engaged in the ordinary course of business of providing financial news and pricing information to institutional investors and/or the general public, and are widely recognized as accurate and reliable sources for such information.

(g) The Manager receives no brokerage fees or commissions as a result of the cross-trade.

(h) As of the date this exemption is granted, a plan's participation in the Manager's cross-trading program as a result of investments made in any Index or Model-Driven Fund that holds plan assets is subject to a written authorization executed in advance of such investment by a fiduciary of the plan which is independent of the Manager engaging in the cross-trade transactions. For purposes of this exemption, the requirement that the authorizing fiduciary be independent of the Manager shall not apply in the case of a Manager Plan.

(i) With respect to existing plan investors in any Index or Model-Driven Fund that holds plan assets as of the date this exemption is granted, the independent fiduciary is furnished with a written notice, not less than forty-five (45) days prior to the implementation of the cross-trading program, that describes the Fund's participation in the Manager's cross-trading program, provided that:

(1) Such notice allows each plan an opportunity to object to the plan's participation in the cross-trading program as a Fund investor by providing the plan with a special termination form;

(2) The notice instructs the independent plan fiduciary that failure to return the termination form to the Manager by a specified date (which shall be at least 30 days following the plan's receipt of the form) shall be deemed to be an approval by the plan of its participation in the Manager's cross-trading program as a Fund investor; and

(3) If the independent plan fiduciary objects to the plan's participation in the cross-trading program as a Fund investor by returning the termination form to the Manager by the specified date, the plan is given the opportunity to withdraw from each Index or Model-Driven Fund without penalty prior to the implementation of the cross-trading program, within such time as may be reasonably necessary to effectuate the withdrawal in an orderly manner.

(j) Prior to obtaining the authorization described in Section II(h), and in the notice described in Section II(i), the following statement must be provided by the Manager to the independent plan fiduciary:

Investment decisions for the Fund (including decisions regarding which securities to buy or sell, how much of a security to buy or sell, and when to execute a sale or purchase of securities for the Fund) will not be based in whole or in part by the Manager on the availability of cross-trade opportunities and will be made prior to the identification and determination of any cross-trade opportunities. In addition, all cross-trades by a Fund will be based solely upon a ''triggering event'' set forth in this exemption. Records documenting each cross-trade transaction will be retained by the Manager.

(k) Prior to any authorization set forth in Section II(h), and at the time of any notice described in Section II(i) above, the independent plan fiduciary must be furnished with any reasonably available information necessary for the fiduciary to determine whether the authorization should be given, including (but not limited to) a copy of this exemption, an explanation of how the authorization may be terminated, detailed disclosure of the procedures to be implemented under the Manager's cross-trading practices (including the ''triggering events'' that will create the cross-trading opportunities, the independent pricing services that will be used by the manager to price the cross-traded securities, and the methods that will be used for determining closing price), and any other reasonably available information regarding the matter that the authorizing fiduciary requests. The independent plan fiduciary must also be provided with a statement that the Manager will have a potentially conflicting division of loyalties and responsibilities to the parties to any cross-trade transaction and must explain how the Manager's cross-trading practices and procedures will mitigate such conflicts.

With respect to Funds that are added to the Manager's cross-trading program or changes to, or additions of, triggering events regarding Funds, following the authorizations described in section II(h) or section II(i), the Manager shall provide a notice to each relevant independent plan fiduciary of each plan invested in the affected Funds prior to, or within ten (10) days following, such addition of Funds or change to, or addition of, triggering events, which contains a description of such Fund(s) or triggering event(s). Such notice will also include a statement that the plan has the right to terminate its participation in the cross-trading program and its investment in any Index Fund or Model-Driven Fund without penalty at any time, as soon as is necessary to effectuate the withdrawal in an orderly manner.

(l) At least annually, the Manager notifies the independent fiduciary for each plan that has previously authorized participation in the Manager's cross-trading program as a Fund investor, that the plan has the right to terminate its participation in the cross-trading program and its investment in any Index Fund or Model-Driven Fund that holds plan assets without penalty at any time, as soon as is necessary to effectuate the withdrawal in an orderly manner. This notice shall also provide each independent plan fiduciary with a special termination form and instruct the fiduciary that failure to return the form to the Manager by a specified date (which shall be at least thirty (30) days following the plan's receipt of the form) shall be deemed an approval of the subject plan's continued participation in the cross-trading program as a Fund investor. In lieu of providing a special termination form, the notice may permit the independent plan fiduciary to utilize another written instrument by the specified date to terminate the plan's participation in the cross-trading program, provided that in such case the notice explicitly discloses that a termination form may be obtained from the Manager upon request. Such annual re-authorization must provide information to the relevant independent plan fiduciary regarding each Fund in which the plan is invested, as well as explicit notification that the plan fiduciary may request and obtain disclosures regarding any new Funds in which the plan is not invested that are added to the cross-trading program, or

any new triggering events (as defined in Section IV(d) below) that may have been added to any existing Funds in which the plan is not invested, since the time of the initial authorization described in Section II(h), or the time of the notice described in Section II(i).

(m) With respect to a cross-trade involving a Large Account:

(1) The cross-trade is executed in connection with a portfolio restructuring program, as defined in Section IV(f) below, with respect to all or a portion of the Large Account's investments which an independent fiduciary of the Large Account (other than in the case of any assets of a Manager Plan) has authorized the Manager to carry out or to act as a ''trading adviser,'' as defined in Section IV(g) below, in carrying out a Large Account-initiated liquidation or restructuring of its portfolio;

(2) Prior to the cross-trade, a fiduciary of the Large Account who is independent of the Manager (other than in the case of any assets of a Manager Plan) [11] has been fully informed of the Manager's cross-trading program, has been provided with the information required in Section II(k), and has provided the Manager with advance written authorization to engage in cross-trading in connection with the restructuring, provided that—

(A) Such authorization may be terminated at will by the Large Account upon receipt by the Manager of written notice of termination.

(B) A form expressly providing an election to terminate the authorization, with instructions on the use of the form, is supplied to the authorizing Large Account fiduciary concurrent with the receipt of the written information describing the cross-trading program. The instructions for such form must specify that the authorization may be terminated at will by the Large Account, without penalty to the Large Account, upon receipt by the Manager of written notice from the authorizing Large Account fiduciary;

(3) All cross-trades made in connection with the portfolio restructuring program must be completed by the Manager within sixty (60) days of the initial authorization (or initial receipt of assets associated with the restructuring, if later) to engage in such restructuring by the Large Account's independent fiduciary, unless such fiduciary agrees in writing to extend this period for another thirty (30) days; and,

(4) No later than thirty (30) days following the completion of the Large Account's portfolio restructuring program, the Large Account's independent fiduciary must be fully apprised in writing of all cross-trades executed in connection with the restructuring. Such writing shall include a notice that the Large Account's independent fiduciary may obtain, upon request, the information described in Section III(a), subject to the limitations described in Section III(b). However, if the program takes longer than sixty (60) days to complete, interim reports containing the transaction results must be provided to the Large Account fiduciary no later than fifteen (15) days following the end of the initial sixty (60) day period and the succeeding thirty (30) day period.

[11] However, proper disclosures must be made to, and written authorization must be made by, an appropriate fiduciary for the Manager Plan in order for the Manager Plan to participate in a specific portfolio restructuring program as part of a Large Account.

Section III—General Conditions

(a) The Manager maintains or causes to be maintained for a period of six (6) years from the date of each cross-trade the records necessary to enable the persons described in paragraph (b) of this Section to determine whether the conditions of the exemption have been met, including records which identify:

(1) On a Fund by Fund basis, the specific triggering events which result in the creation of the model prescribed output or trade list of specific securities to be cross-traded;

(2) On a Fund by Fund basis, the model prescribed output or trade list which describes: (A) Which securities to buy or sell; and (B) how much of each security to buy or sell; in detail sufficient to allow an independent plan fiduciary to verify that each of the above decisions for the Fund was made in response to specific triggering events; and

(3) On a Fund by Fund basis, the actual trades executed by the Fund on a particular day and which of those trades resulted from triggering events.

Such records must be readily available to assure accessibility and maintained so that an independent fiduciary, or other persons identified below in paragraph (b) of this Section, may obtain them within a reasonable period of time. However, a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the Manager, the records are lost or destroyed prior to the end of the six-year period, and no party in interest other than the Manager shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by sections 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (b) below.

(b)(1) Except as provided in paragraph (b)(2) and notwithstanding any provisions of sections 504(a)(2) and (b) of the Act, the records referred to in paragraph (a) of this Section are unconditionally available at their customary location for examination during normal business hours by—

(A) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(B) Any fiduciary of a Plan participating in a cross-trading program who has the authority to acquire or dispose of the assets of the Plan, or any duly authorized employee or representative of such fiduciary,

(C) Any contributing employer with respect to any Plan participating in a cross-trading program or any duly authorized employee or representative of such employer, and

(D) Any participant or beneficiary of any Manager Plan participating in a cross-trading program, or any duly authorized employee or representative of such participant or beneficiary.

(2) If in the course of seeking to inspect records maintained by a Manager pursuant to this exemption, any person described in paragraph (b)(1)(B) through (D) seeks to examine trade secrets, or commercial or financial information of the Manager that is privileged or confidential, and the Manager is otherwise permitted by law to withhold such information from such person, the Manager may refuse to disclose such information provided that, by the close of the thirtieth (30th) day following the request, the Manager gives a written notice to such person advising the person of the reasons for the refusal and that the Department of Labor may request such information.

(3) The information required to be disclosed to persons described in paragraph (b)(1)(B) through (D) shall be limited to information that pertains to cross-trades involving a Fund or Large Account in which they have an interest.

Section IV—Definitions

The following definitions apply for purposes of this exemption:

(a) *Index Fund*—Any investment fund, account or portfolio sponsored, maintained, trusteed, or managed by the Manager or an Affiliate, in which one or more investors invest, and—

(1) Which is designed to track the rate of return, risk profile and other characteristics of an Index, as defined in Section IV(c) below, by either (i) replicating the same combination of securities which compose such Index or

(ii) sampling the securities which compose such Index based on objective criteria and data;

(2) For which the Manager does not use its discretion, or data within its control, to affect the identity or amount of securities to be purchased or sold;

(3) That either contains ''plan assets'' subject to the Act, is an investment company registered under the Investment Company Act of 1940, or contains assets of one or more institutional investors, which may include, but not be limited to, such entities as an insurance company separate account or general account, a governmental plan, a university endowment fund, a charitable foundation fund, a trust or other fund which is exempt from taxation under section 501(a) of the Code; and,

(4) That involves no agreement, arrangement, or understanding regarding the design or operation of the Fund which is intended to benefit the Manager, its Affiliates, or any party in which the Manager or an Affiliate may have an interest.

(b) *Model-Driven Fund*—Any investment fund, account or portfolio sponsored, maintained, trusteed, or managed by the Manager or an Affiliate, in which one or more investors invest, and—

(1) Which is composed of securities the identity of which and the amount of which are selected by a computer model that is based on prescribed objective criteria using independent third party data, not within the control of the Manager, to transform an Index, as defined in Section IV(c) below;

(2) Which either contains ''plan assets'' subject to the Act, is an investment company registered under the Investment Company Act of 1940, or contains assets of one or more institutional investors, which may include, but not be limited to, such entities as an insurance company separate account or general account, a governmental plan, a university endowment fund, a charitable foundation fund, a trust or other fund which is exempt from taxation under section 501(a) of the Code; and

(3) That involves no agreement, arrangement, or understanding regarding the design or operation of the Fund or the utilization of any specific objective criteria which is intended to benefit the Manager, its Affiliates, or any party in which the Manager or an Affiliate may have an interest.

(c) *Index*—A securities index that represents the investment performance of a specific segment of the public market for equity or debt securities in the United States and/or foreign countries, but only if—

(1) The organization creating and maintaining the index is—

(A) Engaged in the business of providing financial information, evaluation, advice or securities brokerage services to institutional clients,

(B) A publisher of financial news or information, or

(C) A public securities exchange or association of securities dealers; and,

(2) The index is created and maintained by an organization independent of the Manager, as defined in Section IV(i) below; and,

(3) The index is a generally accepted standardized index of securities which is not specifically tailored for the use of the Manager.

(d) *Triggering Event*:

(1) A change in the composition or weighting of the Index underlying a Fund by the independent organization creating and maintaining the Index;

(2) A material amount of net change in the overall level of assets in a Fund, as a result of investments in and withdrawals from the Fund, provided that: (A) Such material amount has either been identified in advance as a specified amount of net change relating to such Fund and disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days following, its inclusion as a ''triggering event'' for such Fund or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of net change, including any amount of discretion retained by the Manager that may affect such net change, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given; and

(B) Investments or withdrawals as a result of the Manager's discretion to invest or withdraw assets of a Manager Plan, other than a Manager Plan which is a defined contribution plan under which participants direct the investment of their accounts among various investment options, including such Fund, will not be taken into account in determining the specified amount of net change;

(3) An accumulation in the Fund of a material amount of either:

(A) Cash which is attributable to interest or dividends on, and/or tender offers for, portfolio securities; or

(B) Stock attributable to dividends on portfolio securities; provided that such material amount has either been identified in advance as a specified amount relating to such Fund and disclosed in writing as a ''triggering event'' to an independent fiduciary of each plan having assets held in the Fund prior to, or within ten (10) days after, its inclusion as a ''triggering event'' for such Fund, or the Manager has otherwise disclosed in the description of its cross-trading practices pursuant to section II(k) the parameters for determining a material amount of accumulated cash or securities, including any amount of discretion retained by the Manager that may affect such accumulated amount, in sufficient detail to allow the independent fiduciary to determine whether the authorization to engage in cross-trading should be given;

(4) A change in the composition of the portfolio of a Model-Driven Fund mandated solely by operation of the formulae contained in the computer model underlying the Fund where the basic factors for making such changes (and any fixed frequency for operating the computer model) have been disclosed in writing to an independent fiduciary of each plan having assets held in the Fund, prior to, or within ten (10) days after, its inclusion as a ''triggering event'' for such Fund; or

(5) A change in the composition or weighting of a portfolio for an Index Fund or a Model-Driven Fund which results from an independent fiduciary's direction to exclude certain securities or types of securities from the Fund, notwithstanding that such securities are part of the index used by the Fund.

(e) *Large Account*—Any investment fund, account or portfolio that is not an Index Fund or a Model-Driven Fund sponsored, maintained, trusteed (other than a Fund for which the Manager is a nondiscretionary trustee) or managed by the Manager, which holds assets of either:

(1) An employee benefit plan within the meaning of section 3(3) of the Act that has $50 million or more in total assets (for purposes of this requirement, the assets of one or more employee benefit plans maintained by the same employer, or controlled group of employers, may be aggregated provided that such assets are pooled for investment purposes in a single master trust);

(2) An institutional investor that has total assets in excess of $50 million, such as an insurance company separate account or general account, a governmental plan, a university endowment fund, a charitable foundation fund, a trust or other fund

which is exempt from taxation under section 501(a) of the Code; or

(3) An investment company registered under the Investment Company Act of 1940 (e.g., a mutual fund) other than an investment company advised or sponsored by the Manager;

provided that the Manager has been authorized to restructure all or a portion of the portfolio for such Large Account or to act as a ''trading adviser'' (as defined in Section IV(g) below) in connection with a portfolio restructuring program (as defined in Section IV(f)) for the Large Account.

(f) *Portfolio restructuring program*—Buying and selling the securities on behalf of a Large Account in order to produce a portfolio of securities which will be an Index Fund or a Model-Driven Fund managed by the Manager or by another investment manager, or in order to produce a portfolio of securities the composition of which is designated by a party independent of the Manager, without regard to the requirements of Section IV(a)(3) or (b)(2), or to carry out a liquidation of a specified portfolio of securities for the Large Account.

(g) *Trading adviser*—A person whose role is limited with respect to a Large Account to the disposition of a securities portfolio in connection with a portfolio restructuring program that is a Large Account-initiated liquidation or restructuring within a stated period of time in order to minimize transaction costs. The person does not have discretionary authority or control with respect to any underlying asset allocation, restructuring or liquidation decisions for the account in connection with such transactions and does not render investment advice [within the meaning of 29 CFR 2510.3–21(c)] with respect to such transactions.

(h) *Closing price*—The price for a security on the date of the transaction, as determined by objective procedures disclosed to investors in advance and consistently applied with respect to securities traded in the same market, which procedures shall indicate the independent pricing source (and alternates, if the designated pricing source is unavailable) used to establish the closing price and the time frame after the close of the market in which the closing price will be determined.

(i) *Manager*—A person who is:

(1) A bank or trust company, or any Affiliate thereof, as defined in Section IV(j) below, which is supervised by a state or federal agency; or,

(2) An investment adviser or any Affiliate thereof, as defined in Section IV(j) below, which is registered under the Investment Advisers Act of 1940.

(j) *Affiliate*—An ''affiliate'' of a Manager includes:

(1) Any person, directly or indirectly, through one or more intermediaries, controlling, controlled by or under common control with the person;

(2) Any officer, director, employee or relative of such person, or partner of any such person; and

(3) Any corporation or partnership of which such person is an officer, director, partner or employee.

(k) *Control*—The power to exercise a controlling influence over the management or policies of a person other than an individual.

(l) *Relative*—A ''relative'' is a person that is defined in section 3(15) of the Act (or a ''member of the family'' as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or a sister.

(m) *Nondiscretionary trustee*—A plan trustee whose powers and duties with respect to any assets of the plan are limited to (1) the provision of nondiscretionary trust services to the plan, and (2) duties imposed on the trustee by any provision or provisions of the Act or the Code. The term ''nondiscretionary trust services'' means custodial services and services ancillary to custodial services, none of which services are discretionary. For purposes of this exemption, a person who is otherwise a nondiscretionary trustee will not fail to be a nondiscretionary trustee solely by reason of having been delegated, by the sponsor of a master or prototype plan, the power to amend such plan.

Signed at Washington, DC, this 6th day of February, 2002.

Alan D. Lebowitz,

Deputy Assistant Secretary for Program Operations, Pension and Welfare Benefits Administration, Department of Labor.

General Wage Determination Publication

General Wage Determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled ''General Wage Determinations Issued Under The Davis-Bacon and Related Acts.'' This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

General wage determinations issued under the Davis-Bacon and related Acts are available electronically at no cost on the Government Printing Office site at *www.access.gpo.gov/davisbacon.* They are also available electronically by subscription to the Davis-Bacon Online Service *(http://davisbacon.fedworld.gov)* of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1–800–363–2068. This subscription offers value-added features such as electronic delivery of modified wage decisions directly to the user's desktop, the ability to access prior wage decisions issued during the year, extensive Help Desk Support, etc.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, DC, this 19th day of February 2002.

Carl J. Poleskey,

Chief, Branch of Construction Wage Determinations.

[Prohibited Transaction Exemption 2002–13 Application Number: D–10616]

Amendment to Prohibited Transaction Exemption (PTE) 79–15 (44 FR 26979, May 8, 1979); PTE 80–26 (45 FR 28545, April 29, 1980); PTE 80–83 (45 FR 73189, November 4, 1980); PTE 81–6 (45 FR 7527, January 23, 1981 (as Amended at 52 FR 18754, May 19, 1987)); PTE 81–8 (46 FR 7511, January 23, 1981 (as Amended by 50 FR 14043, April 9, 1985)); PTE 82–63 (47 FR 14804, April 6, 1982); PTE 83–1 (48 FR 895, January 7, 1983); PTE 84–14 (49 FR 9494, March 13, 1984) PTE 88–59 (53 FR 24811, June 30, 1988); PTE 91–38 (56 FR 31966, July 12, 1991); PTE 95–60 (60 FR 35925, July 12, 1995); PTE 96–62 (61 FR 39988, July 31, 1996)

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Adoption of amendment to certain class exemptions.

SUMMARY: This document amends certain class exemptions to define the term ''employee benefit plan,'' as such term is used therein, to include plans described in section 4975(e)(1) of the Internal Revenue Code of 1986 (the Code). The amendment affects individuals with beneficial interests in such plans, as well as the financial institutions that provide services and products to the plans.

EFFECTIVE DATES: The amendment is effective as of: May 1, 1979 with respect to PTE 79–15; January 1, 1975 with respect to PTE 80–26; December 1, 1980 with respect to Section I(B) of PTE 80–83 (the amendment is effective January 1, 1975 with respect to the remainder of PTE 80–83); January 23, 1981 with respect to PTE 81–6; January 1, 1975 with respect to PTE 81–8; April 6, 1982 with respect to PTE 82–63; January 1, 1975 with respect to PTE 83–1; December 21, 1982 with respect to PTE 84–14; January 1, 1975 with respect to PTE 88–59; July 1, 1990 with respect to PTE 91–38; January 1, 1975 with respect to PTE 95–60; and July 31, 1996 with respect to PTE 96–62.

FOR FURTHER INFORMATION CONTACT: Christopher J. Motta, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 693–8544, (this is not a toll-free number); or Paul Mannina, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor (202) 693–5600. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: On October 29, 2001, notice was published in the **Federal Register** (66 FR 54541) of the pendency before the Department of Labor (the Department) of a proposed amendment to PTE 79–15; PTE 80–26; PTE 80–83; PTE 81–6; PTE 81–8; PTE 82–63; PTE 83–1; PTE 84–14; PTE 88–59; PTE 91–38; PTE 95–60; and PTE 96–62. These class exemptions provide relief from certain of the restrictions described in section 406 of the Employee Retirement Income Security Act of 1974 (ERISA), and the taxes imposed by sections 4975(a) and (b) of the Code, by reason of a parallel provision described in section 4975(c)(1)(A) through (F) of the Code, provided that the conditions of the relevant exemption have been met. The amendment to the above-described exemptions adopted by this notice was proposed by the Department on its own motion, pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).

The notice gave interested persons an opportunity to submit written comments or requests for a public hearing on the proposed amendment to the Department. No public comments or requests for a hearing were received.

As noted in the proposed amendment, after consultation with the Internal Revenue Service (the Service), the Department determined that plans described in 4975(e)(1) of the Code are included within the scope of relief provided by certain class exemptions issued jointly by the Department and the Service. These exemptions are as follows:

PTE 75–1, 40 FR 50845 (1975);
PTE 77–4, 42 FR 18732 (1977);
PTE 77–7, 42 FR 31575 (1977), amended and redesignated as PTE 92–5 by 57 FR 5019 (1992);
PTE 77–8, 42 FR 31574 (1977), amended and redesignated as PTE 92–6, 57 FR 5189 (1992);
PTE 77–9, 42 FR 32395 (1977), amended and redesignated as PTE 84–24, 49 FR 13208 (1984); and
PTE 78–19, 43 FR 59915 (1978), amended and redesignated as PTE 90–1, 55 FR 2891 (1990).

The class exemptions amended by this notice were issued pursuant to the sole authority of the Department. These exemptions did not always expressly define the terms ''employee benefit plan'' and ''plan'' as used therein.[1] The amendment adopted by this notice expressly defines the terms ''employee benefit plan'' and ''plan'', as such terms are found in such exemptions, to include an employee benefit plan described in ERISA section 3(3)[2] and/or a plan described in section 4975(e)(1) of the Code.[3]

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties with respect to the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of ERISA; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries,

(2) In accordance with section 408(a) of ERISA and 4975(c)(2) of the Code, the Department makes the following determinations:

(i) The amendment set forth herein is administratively feasible;

(ii) The amendment set forth herein is in the interests of plans and of their participants and beneficiaries; and

(iii) The amendment set forth herein is protective of the rights of participants and beneficiaries of plans,

(3) Each exemption amended herein is applicable to a particular transaction only if the transaction satisfies the conditions specified in such exemption, and

(4) The amendment is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Paperwork Reduction Act

This proposed amendment to the class exemptions specifically enumerated does not contain a collection of information as that term is defined in 44 U.S.C. 3502(3), nor does it substantially or materially modify the terms of any collection of information included in the class exemptions that would be amended as to the definition of ''employee benefit plan'' and ''plan'' (specifically, PTE 80–83, PTE 81–6, PTE 81–8, PTE 82–63, PTE 88–59, PTE 91–38, and PTE 96–62). The amendment would clarify definitions already relied upon in the analyses of these information collections conducted in pursuant to the Paperwork Reduction Act of 1995.

Amendment

Under section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990), the Department amends the following class exemptions as set forth below:

1. PTE 79–15 is amended by adding the following paragraph at the end of the exemption to read as follows: For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

2. PTE 80–26 is amended by adding the following paragraph at the end of the exemption to read as follows: For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

3. PTE 80–83 is amended by adding the following paragraph 4. to Section II. b. to read as follows: 4. For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

---

[1] Section 102 of the Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 [1996]) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975 of the Code to the Secretary of Labor.

[2] Section 3(3) of ERISA provides that the term ''employee benefit plan'' or ''plan'' means an employee welfare benefit plan or an employee pension benefit plan or a plan which is both an employee welfare benefit plan and an employee pension benefit plan.

[3] Section 4975(e)(1) of the Code provides that, for purposes of that Code section, the term ''plan'' means: (A) A trust described in Code section 401(a) which forms a part of a plan, or a plan described in Code section 403(a), which trust or plan is exempt from tax under section 501(a); (B) an individual retirement account described in Code section 408(a); (C) an individual retirement annuity described in section Code 408(b); (D) an Archer MSA described in Code section 220(d); (E) an education individual retirement account described in Code section 530, or (f) a trust, plan, account, or annuity which, at any time, has been determined by the Secretary to be described in any preceding subparagraph of this paragraph.

4. PTE 81–6 is amended by adding the following paragraph at the end of the exemption to read as follows: For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

5. PTE 81–8 is amended by adding the following paragraph at the end of the exemption to read as follows: For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

6. PTE 82–63 is amended by adding the following paragraph (4) to section II. Definitions to read as follows: (4) For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

7. PTE 83–1 is amended by adding the following paragraph I. to Section III. Definitions to read as follows: I. For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in ERISA section 3(3) and/or a plan described in section 4975(e)(1) of the Code.

8. PTE 84–14 is amended by adding the following paragraph (n) to Part V. Definitions and General Rules to read as follows: (n) The terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

9. PTE 88–59 is amended by adding the following paragraph (F) to Section III. Definitions to read as follows: (F) The terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

10. PTE 91–38 is amended by adding the following paragraph (k) to Section IV. Definitions and General Rules to read as follows: The terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

11. PTE 95–60 is amended by adding the following paragraph (j) to Section V. Definitions to read as follows: (j) The terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

12. PTE 96–62 is amended by adding paragraph (g) to Section IV. Definitions to read as follows: (g) For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

Signed at Washington, DC, this 25th day of February, 2002.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 2002–14 Application Number D–11034]

Amendment to Prohibited Transaction Exemption 80–26 (PTE 80–26) for Certain Interest Free Loans to Employee Benefit Plans

AGENCY: Pension and Welfare Benefits Administration, Department of Labor.

ACTION: Adoption of amendment to PTE 80–26.

SUMMARY: This document amends PTE 80–26, a class exemption that permits parties in interest with respect to employee benefit plans to make interest free loans to such plans, provided the conditions of the exemption are met. The amendment affects all employee benefit plans, the participants and beneficiaries of such plans, and parties in interest with respect to those plans engaging in the described transactions.

DATES: The amendment is effective from September 11, 2001 until January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Christopher Motta, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, (202) 693–8544. (This is not a toll-free number); or Charles Jackson, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, (202) 693–5600. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: On September 28, 2001, notice was published in the **Federal Register** (66 FR 49703) of the pendency before the Department of a proposed amendment to PTE 80–26 (45 FR 28545, April 29, 1980, as amended at 65 FR 17540, April 3, 2000).[1] PTE 80–26 provides an exemption from the restrictions of section 406(a)(1)(B) and (D) and section 406(b)(2) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986 (the Code), by reason of section 4975(c)(1)(B) and (D) of the Code.

The amendment to PTE 80–26 adopted by this notice was proposed by the Department on its own motion pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).[2]

The notice of pendency gave interested persons an opportunity to comment or to request a hearing on the proposed amendment. No public comments or requests for a hearing were received.

For the sake of convenience, the entire text of PTE 80–26, as amended, has been reprinted with this notice.

Description of the Exemption

Section I of PTE 80–26 permits the lending of money or other extension of credit from a party in interest or disqualified person to an employee benefit plan, and the repayment of such loan or other extension of credit in accordance with its terms or other written modifications thereof, if:

(a) No interest or other fee is charged to the plan, and no discount for payment in cash is relinquished by the plan, in connection with the loan or extension of credit;

(b) The proceeds of the loan or extension of credit are used only—

(1) For the payment of ordinary operating expenses of the plan, including the payment of benefits in accordance with the terms of the plan and periodic premiums under an insurance or annuity contract, or

(2) For a period of no more than three days, for a purpose incidental to the ordinary operation of the plan;

(c) The loan or extension of credit is unsecured; and

(d) The loan or extension of credit is not directly or indirectly made by an employee benefit plan.

On April 3, 2000, PTE 80–26 was amended through the addition of

---

[1] A minor correction was made to the title of the final exemption in a notice published in the **Federal Register** on May 23, 1980. (45 FR 35040).

[2] Section 102 of the Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 [1996]) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975 of the Code to the Secretary of Labor.

their capacity, develop new and improved products, and focus on improving overall customer service. No firm could provide superior products to customers at a sustained loss.

The government understands this, though they're loathe to admit it. In paragraph 17 of the complaint in this case, the Department of Justice describes some of the reasons for the dominance of just three firms in the boom truck market: ''superior production capacity and capability, strong dealer networks, broad product lines and strong reputation for safety and reliability.'' The government notes, correctly, that it would be difficult for any new competitor to quickly enter the market because they would need to ''establish a strong reputation'' in order to effectively compete with the dominant firms.[7] But this is not a weakness of the market, but a strength. Every factor the government lists above is the result of honest, ethical activity. Manitowoc's superior production capacity is not the result of coercion. National Crane's strong reputation is not derived from violent acts against competitors. This, essentially, is the difference between ''market power'' derived from free trade, and ''political power'' derived from the use of force. The government's case fails to make this crucial distinction.

The remedy in the proposed final judgment replaces market power with political power. The defendants are forced to divest one of their crane businesses to a yet-to-be-determined third party. The government says this will protect competition. It does no such thing. ''Competition'' only exists in a capitalist economy; a forced divestiture is hardly capitalist, since it's neither voluntary nor based on respect for property rights. In a capitalist system, the marketplace decides economic outcomes. In the Department of Justice's system, however, economic outcomes are decided by government mandates. Such is the case here. The government dislikes the potential post-merger structure of the boom truck market, so they brought this case to rearrange things to their liking. If the government did not have a monopoly on the use of political force, it would not be able to obtain this result.

And far from ''protecting'' consumers, the government's remedy here denies consumers the fundamental right to act for themselves. The government assumes consumers won't pay any price increase that may result from the merger. But there's no proof of this hypothesis in the record. Consumers often pay higher prices if they feel the product is worth it, or it they believe that the product will improve in the future. Consumers are certainly a far better judge of these things than attorneys at the Department of Justice. The final judgment's remedy wrecks all that, however. By employing its political power, the government has stripped consumers of their economic power.

Finally, there is an obvious contradiction in the government recognizing the factors behind Manitowoc's dominance on the one hand, but ignoring these same factors in fashioning the final judgment's remedy. The government says a new firm is unlikely to enter the market because of the need to ''establish a strong reputation,'' among other things. So how does creating a new competitor by force accomplish this? Does the government believe that a reputation can be established simply by handing a corporation assets and customers they didn't actually earn? If that's the case, why doesn't the Department of Justice simply allocate resources and market shares in all sectors of American industry? They obviously consider their judgment superior to consumers.

[7] Complaint at 7.

Conclusion

The government claims to serve the ''public interest'' in presenting this proposed final judgment. But it's unclear what those interests are. It's certainly not legal interests, since no constitutional or statutory right of consumers was violated by the defendants. And it's not economic interests, since a capitalist economy is built on voluntary actions free of government interference. ''Free competition enforced by law is a grotesque contradiction in terms,''[8] not to mention a highly unstable way to govern an economy. The companies prosecuted in this case did compete and are competing. The government just doesn't like the outcome of that competition, so they've come to court seeking to overrule the judgment of consumers and producers. The result of the government's actions is to introduce fear and uncertainty into a market that previously functioned well. It's hard to see how that serves any identifiable ''public interest.''

Since it is unlikely the Department of Justice will see the error of its ways, CVT respectfully asks the Court to consider our comments and take appropriate action. We believe the only just action here is to reject entry of the proposed final judgment, and to dismiss the government's complaint with prejudice.

Dated: October 18, 2002.

Respectfully Submitted,

Citizens for Voluntary Trade

S.M. Oliva,

President, 2000 F Street, N.W., Suite 315, Washington, DC 20006; Telephone: (202) 223–0071; Facsimile: (760) 418–9010; E-mail: *info@voluntarytrade.org.*

PENSION AND WELFARE BENEFITS ADMINISTRATION

[Prohibited Transaction Exemption 2002–51; Application No. D–10933]

Class Exemption to Permit Certain Transactions Identified in the Voluntary Fiduciary Correction Program

AGENCY: Pension and Welfare Benefits Administration, U.S. Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This document contains a final exemption from certain prohibited transaction restrictions of the Internal Revenue Code of 1986 (the Code). The exemption was proposed in conjunction with the Department's Voluntary Fiduciary Correction (VFC) Program, the final version of which was published in the March 28, 2002, issue of the **Federal Register**. The VFC Program allows certain persons to avoid potential civil actions under the Employee Retirement Income Security Act of 1974 (ERISA) initiated by the Department and the assessment of civil penalties under section 502(l) of ERISA in connection with investigation or civil action by the Department. The exemption will affect plans, participants and beneficiaries of such plans and certain other persons engaging in such transactions.

EFFECTIVE DATE: The exemption is effective November 25, 2002.

FOR FURTHER INFORMATION CONTACT: Karen E. Lloyd, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5649, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 693–8540 (not a toll free number) or Cynthia Weglicki, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 693–5600 (not a toll free number).

SUPPLEMENTARY INFORMATION: On March 28, 2002, the Department published a notice in the **Federal Register** (67 FR 15083) of the pendency of a proposed class exemption from the sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The Department proposed the class exemption on its own motion pursuant to section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).[1]

The notice of pendency gave interested persons an opportunity to comment or request a public hearing on the proposal. Two (2) public comments were received by the Department. Upon consideration of the comments received, the Department has determined to grant the proposed class exemption subject to certain modifications. These

[1] Section 102 of the Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996) generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

modifications and the comments are discussed below.

Executive Order 12866

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of the Executive Order, it was determined that this action is ''significant'' under Section 3(f)(4) of the Executive Order. Accordingly, this action has been reviewed by OMB.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520)(PRA 95), the Department submitted the information collection request (ICR) included in the Proposed Class Exemption to Permit Certain Transactions Identified in the Voluntary Fiduciary Correction to the Office of Management and Budget (OMB) for review and clearance at the time the Notice of the Proposed Class Exemption was published in the **Federal Register** (March 28, 2002, 67 FR 15083). OMB approved the Notice under OMB control number 1210–0118. The approval will expire on November 30, 2003.

The Department solicited comments concerning the ICR in connection with the Notice of Proposed Class Exemption. The Department received no comments addressing its burden estimates and no substantive changes have been made in the final exemption that would affect the Department's earlier burden estimates.

Agency: Pension and Welfare Benefits Administration, Department of Labor.

Frequency of Response: On occasion.

Responses: 700.

Estimated Total Burden Hours: 5,710 hours.

Total Burden Cost (Operating and Maintenance): $272,928.

Discussion of Comments Received

The Department received two comments regarding the proposed class exemption. The commenters requested specific modifications to the proposal in the following areas:

1. Notice to Interested Persons

Both commenters addressed Section IV of the proposed exemption which required applicants to provide notice to interested persons of the transaction and the method of correction. It was noted that, in many cases, applicants who may be subject to the excise taxes under section 4975 of the Code will not be the employer whose employees are covered by the plan, and may be unrelated to the employer.

In this regard, one of the commenters stated that, without the cooperation of the employer, applicants might find it difficult to provide notice to participants and beneficiaries because they would not have access to the participants' and beneficiaries' names and addresses. The commenter further noted that employers might not be willing to provide access to such information due to privacy concerns or concerns that receipt of the notice might cause confusion among the participants and beneficiaries.

In the commenter's view, relief under the exemption should not be conditioned on the cooperation of an employer or other person that is unrelated to the applicant, particularly since the underlying prohibited transaction will have been corrected pursuant to the VFC Program. The commenter proposed that, in the case of an applicant unrelated to the employer whose employees are covered by the plan, the exemption permit notice to be provided to the employer or other plan fiduciary unrelated to the applicant who was not involved in the transaction that is the subject of the VFC Program application, rather than each participant and beneficiary. The commenter noted that the unrelated fiduciary could then determine whether plan participants and beneficiaries should be notified of the underlying transaction and its correction under the VFC Program.

The other commenter stated generally that the notice requirement was unnecessary and burdensome, but subsequently clarified that it had the same concerns as the first commenter.

The Department concurs with the commenters' views on the notice issue. In this regard, the Department notes that the proposed exemption does not contain a definition of interested persons to whom notice must be provided. It is the view of the Department that, where an applicant is unaffiliated with, and unrelated to, the employer whose employees are covered by the plan, the notice requirement will be deemed satisfied if the applicant provides notice to a fiduciary of the plan who is unrelated to the applicant and all other parties involved in the prohibited transaction. In many cases, this may be the employer or an administrative committee composed of officers and employees of the employer. However, the Department cautions that the notice requirement will not be considered satisfied if notice is given to an employer who is not unrelated to all parties involved in the prohibited transaction. Under no circumstances should plan assets be used to pay for the notice.

2. Three Year Rule

One of the commenters also was concerned about Section II.F. of the proposed exemption, which provided that an applicant seeking relief under the exemption could not have taken advantage of the relief provided under the VFC Program and this exemption for a similar type of transaction identified in the current application during the period which is three years prior to the submission of the current application. The commenter argued that applicants that are service providers, as opposed to plan officials, should be permitted to take advantage of the VFC Program as often as necessary without regard to the three year rule.

The commenter stated that subjecting service providers to the three year rule would not, in all cases, further the rule's purpose of ensuring that relief is not provided to fiduciaries who repeatedly make the same legal mistake. In contrast to plan sponsors, for example, service providers such as broker-dealers, banks and insurance companies may engage in numerous transactions with plans each day which could be prohibited except for the availability of a statutory or administrative exemption. The commenter noted that, if the plan fiduciary directing the transaction is relying on an exemption to deal with a party in interest, and that fiduciary is factually incorrect on an element of the exemption, the broker-dealer may

engage in many transactions that would need relief under this exemption.

As an example, the commenter explained that a service provider could enter into a transaction that otherwise would be prohibited based on a fiduciary's representation that the QPAM class exemption (PTE 84–14) (49 FR 9494, March 13, 1984) applied. The QPAM class exemption requires, among other things, that neither the QPAM, an affiliate, nor any owner of a 5% or more interest in the QPAM, have been convicted or released from imprisonment as a result of certain crimes within the ten years immediately preceding the transaction. Information regarding past crimes of affiliates and 5% owners of the QPAM is not likely to be within the knowledge of the service provider, and the service provider must rely on the QPAM for assurance that the condition is satisfied.

The commenter suggested that Section II.F. be modified to provide an exception from the three year rule for applicants that are banks, broker-dealers or insurance companies (or affiliates thereof) which did not exercise discretionary authority or control to cause the plan to enter into the transaction. The commenter proposed that the exception be limited to applicants that were parties in interest (including fiduciaries) solely by reason of providing services to the plan (or solely by reason of a relationship to such service provider described in section 3(14)(F), (G), (H), or (I) and the corresponding provisions of the Code), and that ''did not believe that an exemption was unavailable'' with respect to the transaction. The commenter suggested that the applicant must have established written policies and procedures reasonably designed to ensure compliance with the prohibited transaction rules, and have engaged in periodic monitoring for compliance, at the time of the transaction.

The Department agrees that, in the narrow circumstances described above, such service providers should not be excluded from obtaining relief under the exemption by the three year rule. Accordingly, the Department has modified Section II.F. to clarify that the exemption will continue to be available notwithstanding the applicant's inability to satisfy the three year rule, provided that:

- The applicant was a broker-dealer registered under the Securities Exchange Act of 1934, a bank supervised by the United States or a State thereof, a broker-dealer or bank subject to foreign government regulation, an insurance company qualified to do business in a State, or any affiliate thereof;
- The applicant was a party in interest (including a fiduciary) solely by reason of providing services to the plan or solely by reason of a relationship to such service provider described in section 3(14)(F), (G), (H) or (I) (and/or the corresponding provisions of section 4975 of the Code);
- Neither the applicant nor any affiliate (i) was a fiduciary (within the meaning of section 3(21)(A) of ERISA) with respect to the assets of the plan involved in the transaction, and (ii) used its discretion to cause the plan to engage in the transaction;
- The individuals acting on behalf of the applicant in connection with the transaction had no actual knowledge or reason to know that the transaction was not exempt pursuant to a statutory or administrative exemption under ERISA and/or the Code; and
- Prior to the transaction, the applicant established written policies and procedures that were reasonably designed to ensure compliance with the prohibited transaction rules and the applicant engaged in periodic monitoring for compliance.

3. Participant Loan Repayments

The Department has made one additional modification to the final exemption. As discussed more fully below, the exemption provides relief for certain transactions described in the VFC Program, including the failure to transmit participant contributions to a pension plan within the time frames described in the Department's regulations at 29 CFR 2510.3–102. Subsequent to the publication of the final VFC Program, the Department issued guidance stating that applicants may correct the failure to forward participant loan repayments to a plan in a timely fashion under the VFC Program in the same manner.[2] Accordingly, the Department revised the language of Section I.A. of the exemption to explicitly cover the failure to transmit participant loan repayments to a pension plan within a reasonable time after withholding or receipt by the employer.

[2] *See* Frequently Asked Questions on the VFC Program, at *http://www.dol.gov/pwba/faqs/faq_vfcp2.html.* For the Department's views on the time frames for repayment of participant loans to pension plans, *see* the preamble to the final participant contribution regulation, 29 CFR section 2510.3–102, published at 61 FR 41220, 41226 (August 7, 1996). *See* also DOL Advisory Opinion No. 2002–02A (May 17, 2002).

Description of the Exemption

1. Scope

The exemption provides relief from the sanctions imposed under section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, for certain eligible transactions identified in the VFC Program. The exemption does not provide relief for any transactions identified in the VFC Program that are not specifically described as eligible transactions under Section I of the exemption.

The four eligible transactions described in the exemption are as follows:

(A) The failure to transmit participant contributions to a pension plan within the time frames described in the Department's regulations at 29 CFR section 2510.3–102 and/or the failure to transmit participant loan repayments to a pension plan within a reasonable time after withholding or receipt by the employer.

(B) The making of a loan by a plan at a fair market interest rate to a party in interest with respect to the plan.

(C) The purchase or sale of an asset (including real property) between a plan and a party in interest at fair market value.

(D) The sale of real property to a plan by the employer and the leaseback of such property to the employer, at fair market value and fair market rental value, respectively.

The eligible transactions may be illustrated by the following examples:

Example (1): Corporation A sponsors a pension plan for its employees. Corporation A borrowed $100,000 from the plan. The loan was made at an interest rate no less than that available for a loan with similar terms (for example, the amount of the loan, amount and type of security, repayment schedule, and duration of loan) obtainable in an arm's-length transaction between unrelated parties.

Example (2): Corporation B sponsors a pension plan for its employees. The plan sold a parcel of real property to Corporation B. The price Corporation B paid to the plan was the fair market value of the property as determined by a qualified independent appraiser as of the date of the transaction and reflected in a qualified appraisal report. (If there is a generally recognized market for the property, such as the New York Stock Exchange, the fair market value of the property is the value objectively determined by reference to the price on such market on the date of the transaction, and a determination by a qualified independent appraiser is not required.)

Example (3): Corporation C sponsors a pension plan for its employees. Corporation C sold a parcel of real property to the plan which was simultaneously leased back to Corporation C. The price paid by the plan for the property was its fair market value, and

the rent paid by Corporation C to the plan is the fair market rental value, as determined by a qualified independent appraiser and reflected in a qualified appraisal report. The terms of the lease (for example, rent, duration and allocation of expenses) are not less favorable to the plan than those obtainable in an arm's-length transaction between unrelated parties.

2. General Conditions

Section II of the exemption contains general conditions, as discussed below, which the Department views as necessary to ensure that any transaction covered by the exemption would be in the interests of plan participants and beneficiaries, and to support a finding that the exemption met the statutory requirements of section 4975(c)(2) of the Code.

With respect to a transaction involving delinquent transmittal of participant contributions and/or participant loan repayments to a pension plan, the exemption requires that the contributions or repayments be transmitted to the pension plan not more than 180 calendar days from the date the amounts were received by the employer (in the case of amounts that a participant or beneficiary pays to an employer) or the date the amount otherwise would have been payable to the participant in cash (in the case of amounts withheld by an employer from a participant's wages).

Second, the exemption requires that, with respect to the transactions described in Sections I.B., I.C. and I.D., the amount of plan assets involved in the transaction did not exceed 10 percent of the fair market value of all the assets of the plan at the time of the transaction. For purposes of this requirement, the 10 percent limitation would apply after aggregating the value of a series of related transactions.

Third, under the exemption, the fair market value of any plan asset involved in a transaction described in Sections I.C. or I.D. must have been determined in accordance with section 5 of the VFC Program. Section 5 of the VFC Program requires that the valuation meet the following conditions: (1) If there is a generally recognized market for the property (*e.g.*, the New York Stock Exchange), the fair market value of the asset is the average value of the asset on such market on the applicable date, unless the plan document specifies another objectively determined value (*e.g.*, the closing price); and (2) if there is no generally recognized market for the asset, the fair market value of that asset must be determined in accordance with generally accepted appraisal standards by a qualified independent appraiser and reflected in a written appraisal report signed by the appraiser. For purposes of these requirements under the VFC Program, an appraiser is considered qualified if the appraiser has met the education, experience and licensing requirements that are generally recognized for appraisal of the type of asset being appraised. An appraiser is ''independent'' if the appraiser is not one of the following, does not own or control any of the following, and is not owned or controlled by, or affiliated with, any of the following: (i) The prior owner of the asset, if the asset was purchased by the plan; (ii) the purchaser of the asset, if the asset was or is now being sold by the plan; (iii) any other owner of the asset, if the plan is not the sole owner; (iv) a fiduciary of the plan; (v) a party in interest with respect to the plan (except to the extent the appraiser becomes a party in interest when retained to perform this appraisal for the plan); or (vi) the VFC Program applicant.

Fourth, under the exemption, the terms of a transaction described in Sections I.B., I.C., or I.D., must have been at least as favorable to the plan as the terms generally available in arm's-length transactions between unrelated parties.

Fifth, with respect to all of the eligible transactions, the transaction may not have been part of an agreement, arrangement or understanding designed to benefit a party in interest. The Department notes that the intent of this condition is not to deny a direct benefit to the party in interest but, rather, to exclude relief for transactions that are part of a broader overall agreement, arrangement or understanding designed to benefit parties in interest.

Sixth, with respect to all of the eligible transactions, the applicant may not have taken advantage of the relief provided by the VFC Program and the exemption for a similar type of transaction identified in the application during the three-year period prior to the submission of the application. As modified, however, the final exemption contains a limited exception from this condition for service providers. Pursuant to the amended Section II.F., a broker-dealer, bank or insurance company that is a service provider to a plan would not be subject to this condition if it engaged in a prohibited transaction described in Section I, provided that: it was not a fiduciary that used its discretion to cause the plan to engage in the transaction; individuals acting on its behalf in connection with the transaction had no actual knowledge or reason to know that the transaction was not exempt pursuant to a statutory or administrative exemption under ERISA and/or the Code; and, prior to the transaction, it established written policies and procedures that were reasonably designed to ensure compliance with the prohibited transaction rules and it engaged in periodic monitoring for compliance.

3. Compliance with VFC Program

In addition to compliance with the general conditions set forth above, Section III of the exemption requires that the applicant meet the requirements set forth in the VFC Program that are applicable to the particular transaction. The exemption also requires that the applicant have received a no action letter issued by PWBA with respect to such transaction, which must be an eligible transaction otherwise described in Section I of the exemption. However, the fact that an applicant receives a no action letter issued by PWBA should not be viewed as a determination by PWBA that the applicant has satisfied all of the conditions of the exemption. Each applicant must determine whether the pertinent conditions of the exemption have been met.

4. Notice

Notice under the exemption must be given to interested persons within 60 calendar days following the date of the submission of an application under the VFC Program to the Department. Plan assets may not be used to pay for the notice. The exemption does not specify the format or specific content of the notice. However, the notice must include an objective description of the transaction and the steps taken to correct it, written in a manner reasonably calculated to be understood by the average plan participant or beneficiary. The notice also must provide for a period of 30 calendar days, beginning on the date the notice is distributed, for interested persons to provide comments to the appropriate Regional Office of the United States Department of Labor, Pension and Welfare Benefits Administration. The notice must include the address and telephone number of such Regional Office.

A copy of the notice to interested persons, along with an indication of the date on which it was distributed, must be provided to the appropriate Regional Office within the same 60-day period following the date of the submission of the application. Accordingly, applicants under the VFC Program who intend to take advantage of the relief provided under this exemption would indicate on the checklist submitted as part of the VFC Program application that they will, within 60 calendar days following the

date of the submission of the application, provide the Department's Regional Office with a copy of the notice to interested persons.

Notice may be given in any manner that is reasonably calculated, taking into consideration the particular circumstances of the plan, to result in the receipt of such notice by interested persons, including but not limited to posting, regular mail, or electronic mail, or any combination thereof.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person with respect to a plan from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply, the requirement that all assets of an employee benefit plan be held in trust by one or more trustees, and the general fiduciary responsibility provisions of ERISA which require, among other things, that a fiduciary discharge his or her duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The exemption does not extend to transactions prohibited under section 4975(c)(1)(F) of the Code.

(3) In accordance with section 4975(c)(2) of the Code, the Department finds that the exemption is administratively feasible, in the interests of plans and their participants and beneficiaries, and protective of the rights of participants and beneficiaries of such plans.

(4) The exemption is supplemental to, and not in derogation of other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(5) The exemption is applicable to a transaction only if the conditions specified in the class exemption are satisfied.

Exemption

Accordingly, the following exemption is granted under the authority of section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).

Section I: Eligible Transactions

The sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the following eligible transactions described in section 7 of the Voluntary Fiduciary Correction (VFC) Program (67 FR 15061, March 28, 2002), provided that the applicable conditions set forth in Sections II, III and IV are met:

A. Failure to transmit participant contributions to a pension plan within the time frames described in the Department's regulation at 29 CFR section 2510.3–102, (*see* VFC Program, section 7.A.1.), and/or the failure to transmit participant loan repayments to a pension plan within a reasonable time after withholding or receipt by the employer.

B. Loan at a fair market interest rate to a party in interest with respect to a plan. (*See* VFC Program, section 7.B.1.).

C. Purchase or sale of an asset (including real property) between a plan and a party in interest at fair market value. (*See* VFC Program, sections 7.C.1. and 7.C.2.).

D. Sale of real property to a plan by the employer and the leaseback of the property to the employer, at fair market value and fair market rental value, respectively. (*See* VFC Program, section 7.C.3.).

Section II: Conditions

A. With respect to a transaction involving participant contributions or loan repayments to pension plans described in Section I.A., the contributions or repayments were transmitted to the pension plan not more than 180 calendar days from the date the amounts were received by the employer (in the case of amounts that a participant or beneficiary pays to an employer) or the date the amounts otherwise would have been payable to the participant in cash (in the case of amounts withheld by an employer from a participant's wages).

B. With respect to the transactions described in Sections I.B., I.C., or I.D., the plan assets involved in the transaction, or series of related transactions, did not, in the aggregate, exceed 10 percent of the fair market value of all the assets of the plan at the time of the transaction.

C. The fair market value of any plan asset involved in a transaction described in Sections I.C. or I.D. was determined in accordance with section 5 of the VFC Program.

D. The terms of a transaction described in Sections I.B., I.C., or I.D. were at least as favorable to the plan as the terms generally available in arm's-length transactions between unrelated parties.

E. With respect to any transaction described in Section I, the transaction was not part of an agreement, arrangement or understanding designed to benefit a party in interest.

F. (1) With respect to any transaction described in Section I, the applicant has not taken advantage of the relief provided by the VFC Program and this exemption for a similar type of transaction(s) identified in the current application during the period which is three years prior to submission of the current application.

(2) Notwithstanding the foregoing, Section II.F.(1) shall not apply to an applicant provided that:

(a) The applicant was a broker-dealer registered under the Securities Exchange Act of 1934, a bank supervised by the United States or a State thereof, a broker-dealer or bank subject to foreign government regulation, an insurance company qualified to do business in a State, or an affiliate thereof;

(b) The applicant was a party in interest (including a fiduciary) solely by reason of providing services to the plan or solely by reason of a relationship to such service provider described in section 3(14)(F), (G), (H) or (I) (and/or the corresponding provisions of section 4975 of the Code);

(c) Neither the applicant nor any affiliate (i) was a fiduciary (within the meaning of section 3(21)(A) of ERISA) with respect to the assets of the plan involved in the transaction and (ii) used its discretion to cause the plan to engage in the transaction;

(d) Individuals acting on behalf of the applicant had no actual knowledge or reason to know that the transaction was not exempt pursuant to a statutory or administrative exemption under ERISA and/or the Code; and

(e) Prior to the transaction, the applicant established written policies and procedures that were reasonably designed to ensure compliance with the prohibited transaction rules and the applicant engaged in periodic monitoring for compliance.

Section III: Compliance with VFC Program

A. The applicant has met all of the applicable requirements of the VFC Program.

B. PWBA has issued a no action letter to the applicant pursuant to the VFC Program with respect to a transaction described in Section I.

Section IV: Notice

A. Written notice of the transaction(s) for which the applicant is seeking relief pursuant to the VFC Program and this exemption, and the method of correcting the transaction, was provided to interested persons within 60 calendar days following the date of the submission of an application under the VFC Program. A copy of the notice was provided to the appropriate Regional Office of the United States Department of Labor, Pension and Welfare Benefits Administration within the same 60-day period, and the applicant indicated the date upon which notice was distributed to interested persons. Plan assets were not used to pay for the notice. The notice included an objective description of the transaction and the steps taken to correct it, written in a manner reasonably calculated to be understood by the average plan participant or beneficiary. The notice provided for a period of 30 calendar days, beginning on the date the notice was distributed, for interested persons to provide comments to the appropriate Regional Office. The notice included the address and telephone number of such Regional Office.

B. Notice was given in a manner that was reasonably calculated, taking into consideration the particular circumstances of the plan, to result in the receipt of such notice by interested persons, including but not limited to posting, regular mail, or electronic mail, or any combination thereof. The notice informed interested persons of the applicant's participation in the VFC Program and intention of availing itself of relief under the exemption.

Signed at Washington, DC, this 11th day of November, 2002.

Ivan L. Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510–29–P

NATIONAL LABOR RELATIONS BOARD

Order Delegating Authority to the General Counsel; Before Members Wilma B. Liebman, William B. Cowen, and Michael J. Bartlett

November 19, 2002.

The Board is faced with the prospect that it may for a temporary period have fewer than three Members of its statutorily prescribed full complement of five Members. The Board recognizes that it has a continuing responsibility to fulfill its statutory obligations in the most effective and efficient manner possible. To assure that the Agency will be able to meet its obligations, the Board has decided to temporarily delegate to the General Counsel full authority to certify the results of any secret ballot election conducted under the National Emergency provisions of the Labor Management Relations Act, sections 206–210, 29 U.S.C. 176–180.[1] This delegation shall be effective during any time when the Board has fewer than three Members and is made under the authority granted to the Board under sections 3, 4, 6, and 10 of the National Labor Relations Act.

Accordingly, the Board delegates to the General Counsel full and final authority and responsibility on behalf of the Board to certify to the Attorney General the results of any secret ballot elections held among employees on the question of whether they wish to accept the final offer of settlement made by their employer pursuant to section 209(b) of the Labor Management Relations Act, 29 U.S.C. 179(b). This delegation shall cease to be effective whenever the Board has at least three Members.

This delegation relates to the internal management of the National Labor Relations Board and is therefore, pursuant to 5 U.S.C. 553, exempt from the notice and comment requirements of the Administrative Procedure Act. Further, public notice and comment is impractical because of the immediate need for Board action. The public interest requires that this delegation take effect immediately.

All existing delegations of authority to the General Counsel and to staff in effect prior to the date of this order remain in full force and effect, including the December 14, 2001, delegation regarding court litigation authority and the April 1, 1955, delegation by the Board to the General Counsel of the authority and responsibility to conduct secret ballots pursuant to section 209(b) of the Labor Management Relations Act, 29 U.S.C. 179(b). For the reasons stated above, the Board finds good cause to make this order effective immediately in accordance with 5 U.S.C. 553(d).

By direction of the Board.

[1] On December 14, 2001, the Board previously delegated to the General Counsel, on the same basis, full authority on all court litigation matters that would otherwise require Board authorization, effective during any time when the Board has fewer than three Members. *See* 66 FR 65998 (December 21, 2001).

Dated in Washington, DC, November 19, 2002.

Lester A. Heltzer,

Acting Executive Secretary, National Labor Relations Board.

NUCLEAR REGULATORY COMMISSION

Notice of Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a Director's Decision with regard to a petition dated March 11, 2002, and supplements dated March 21, 22, and 27, 2002 (the Petition), submitted by Mr. David A. Lochbaum, a Nuclear Safety Engineer in the Washington, DC Office of the Union of Concerned Scientists (UCS), and the co-petitioners identified in the petition supplements dated March 21 and March 22, 2002 (the Petitioners). The Petitioners have requested that the U.S. Nuclear Regulatory Commission (NRC or the Commission) take action with regard to the nuclear power facilities listed in Attachment 1 to the Petition (multiple nuclear power facilities). The

September 11, 1993. These Customer Satisfaction Surveys provide information on customer attitudes about the delivery and quality of agency products/services and are used as part of an ongoing process to improve DOL programs. This generic clearance allows agencies to gather information from both Federal and non-Federal users.

In addition to conducting Customer Satisfaction Surveys, the Department also includes the use of evaluation forms for those DOL agencies conducting conferences. These evaluations are helpful in determining the success of the current conference, in developing future conferences, and in meeting the needs of the Department's product/service users.

II. Current Actions

Over the past three years the DOL has conducted more than two dozen customer satisfaction surveys and conference evaluations, which have helped assess the Department's products and services and has led to improvements in areas deemed necessary. Office of Management and Budget approval for this collection of information expires July 31, 2006. DOL proposes to seek continued approval for this collection of information for an additional three years.

Type of Review: Extension of a currently approved collection.

Agency: Office of the Assistant Secretary for Administration and Management.

Title: Customer Satisfaction Surveys and Conference Evaluations Generic Clearance.

OMB Number: 1225–0059.

Affected Public: Individuals and households; business or other for-profit; not-for-profit institutions; Farms; Federal Government; and State, Local, or Tribal Government.

Estimated Total Respondents/Responses: 200,000.

Frequency: On occasion and usually only one-time per respondent.

Average Time per Response: Varies by survey/evaluation generally ranging from 3 to 15 minutes with an average of approximately 6 minutes.

Total Burden Hours: 20,000.

Total Burden Cost (Capital/Startup): $0.

Total Burden Cost (Operating/Maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 13th day of April, 2006.

Darrin A. King,

Agency Clearance Officer, Office of the Assistant Secretary for Administration and Management.

BILLING CODE 4510–23–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Application No. D–11261]

RIN 1210–A05

Amendment to Prohibited Transaction Exemption 2002–51 (PTE 2002–51) to Permit Certain Transactions Identified in the Voluntary Fiduciary Correction Program

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Adoption of Amendment to PTE 2002–51.

SUMMARY: This document amends PTE 2002–51 (67 FR 70623 November 25, 2002), a class exemption that provides relief from certain prohibited transaction restrictions imposed by section 4975 of the Internal Revenue Code of 1986 (the Code) for certain eligible transactions identified in the Department of Labor's (the Department) Voluntary Fiduciary Correction (VFC) Program, which was adopted on March 28, 2002. This amendment is being adopted in conjunction with the Department's adoption of the updated VFC Program (final VFC Program), which is being published simultaneously in this issue of the **Federal Register**. The VFC Program allows certain persons to avoid potential civil actions under the Employee Retirement Income Security Act of 1974 (ERISA) initiated by the Department and the assessment of civil penalties under section 502(l) or 502(i) of ERISA in connection with an investigation or civil action by the Department. The amendment affects plans, participants and beneficiaries of such plans and certain other persons engaging in such transactions.

EFFECTIVE DATE: The class exemption is effective May 19, 2006.

FOR FURTHER INFORMATION CONTACT: Brian J. Buyniski, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Room N–5649, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 693–8545 (this is not a toll free number).

SUPPLEMENTARY INFORMATION: On April 6, 2005, a notice was published in the **Federal Register** (70 FR 17476) of the pendency before the Department of a proposed amendment to PTE 2002–51. PTE 2002–51 provides relief from the sanctions resulting from the application of section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code. The amendment expands the relief under the exemption to additional transactions included in the final VFC Program. The amendment to PTE 2002–51 adopted by this notice was proposed by the Department on its own motion pursuant to section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR 2570, subpart B (55 FR 32836, 32847, August 10, 1990).[1]

The notice of pendency gave interested persons an opportunity to comment on the proposed amendment. The Department received two comment letters. Upon consideration of all the comments received, the Department has determined to grant the proposed amendment, subject to certain modifications. These modifications and the comments are discussed below.

Executive Order 12866 Statement

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f) of the Executive Order, a ''significant regulatory action'' is an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. OMB has determined that the final VFC Program is significant under

[1] Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978, 5 U.S.C. App. 1 [1996]) generally transferred the authority of the Secretary of the Treasury to issue administrative exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

section 3(f)(4) because it raises novel legal or policy issues arising from the President's priorities.

The amended PTE 2002–51 provides excise tax relief for six of the transactions identified in the final VFC Program. Parties who wish to take advantage of the exemption must have met all of the applicable requirements of the final VFC Program and the conditions of the exemption. One of those conditions is receipt of a no action letter from the Employee Benefits Security Administration (EBSA) with respect to the transaction at issue. In conjunction with the final VFC Program, PTE 2002–51, as amended, has also been determined to be significant under section 3(f)(4) of the Executive Order. Accordingly the Department has assessed the costs and benefits of this amendment to PTE 2002–51.

PTE 2002–51 provides relief from the sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. In general, the exemption enhances the benefits of participation in the VFC Program by granting relief from excise taxes under section 4975 for certain breaches of fiduciary duty that are prohibited transactions. The purpose of the VFC Program is to encourage the correction of breaches of fiduciary duty, resulting in the recovery of lost earnings or profits for the benefit of plan participants and beneficiaries. The class exemption will have positive economic effects by eliminating excise taxes and promoting increased participation in the VFC Program.

The amendment to PTE 2002–51 is being adopted in connection with the final VFC Program, which is published in this issue of the **Federal Register**. The class exemption has been amended to provide relief for two additional transactions. One of the transactions was introduced in the April 2005 VFC Program and the proposed Amendment to PTE 2002–51. That transaction has now become effective in the amended exemption. The transaction concerns the purchase of an asset (including real property) by a plan where the asset has later been determined to be illiquid as described in the final VFC Program, and/or the subsequent sale of the illiquid asset by the plan in a transaction that was prohibited pursuant to section 4975(c)(1) of the Code. The second transaction included in this amendment covers the use of plan assets to pay expenses to a service provider for services that are properly characterized as settlor expenses, provided such payments were not expressly prohibited in the plan documents.

The Department has assumed, based on experience, that not all applicants who apply to the final VFC Program will take advantage of the excise tax relief provided under the exemption, either by choice or because the exemption does not provide relief for the transaction they are correcting under the final VFC Program. The Department has more specifically calculated that the number of applicants who will rely on the class exemption will equal approximately one-fifth of the total number of applicants, or 250 applicants (.2 × 1,250).

Paperwork Reduction Act

The amendment to PTE 2002–51 engenders no significant new paperwork burden for the notification and other written documentation requirements in comparison with the previous version of this exemption. Applicants to the final VFC Program who rely on the amended class exemption may be eligible, as well, for a new optional provision. Under this option, qualifying applicants may choose not to send notices to interested persons. The conditions of the optional provision are described in detail in the amendment to PTE 2002–51. However, while these particular parties would be relieved of the responsibility to send notices to interested persons, they do need to provide the Department with certain additional documentation on their calculations and the payment they remitted to the plan when submitting their application to the VFC Program. Documentation of the calculation of the amount of excise tax otherwise due consists of a copy of a completed IRS Form 5330 or equivalent written evidence containing the information required by IRS Form 5330; proof of payment to the plan is required. The Department has determined that the difference between the paperwork burden of plans using the optional provision versus the burden of those that do not is negligible.

Service providers will likely do the work on behalf of parties relying on PTE 2002–51. For parties who do not rely on the optional provision, service providers will prepare and send out notices to interested persons. A copy of the notice must be provided to the Department. As to those parties that opt not to provide notice, service providers will submit to the Department evidence of the required calculations described in IRS Form 5330 and evidence of the payment to the plan of the excise tax otherwise payable along with the application to the final VFC program. These respective tasks should require no more than an hour for each service provider to complete. Assuming that as many as one-fifth of the annual 1,250 applicants to the VFC Program (250) also use the class exemption, the burden cost posed by PTE 2002–51 equals $8,625 ($34.50 × 1 hr. × 250). One-half of the parties using the exemption (125) are estimated to be eligible to take advantage of PTE 2002–51's new optional provision, thereby being relieved of the notice requirement, while the other half of the parties using the exemption (125) are estimated as being required to send notices to interested persons. Notices will be sent, on average, to 136 interested persons for each plan. PTE 2002–51 permits notification of interested persons by electronic means. The Department assumes that only 62 percent of the parties using the exemption will send notices to interested persons by first class mail. Therefore, the total number of notices sent by mail will be 10,540 (136 × 125 × 62 percent). The remaining 38 percent will be delivered electronically. The total mailing costs arising from the class exemption will equal roughly $4,427 ($0.42 × 10,540 mailings). The Department assumes, however, that all applicants who send interested party notices will send the Department its copy of the notice by mail, using certified or overnight delivery services and that this copy will be included in the application package described above under costs for the VFC Program. The annual mailing costs for notice to interested persons and the Department is therefore estimated at $4,427. In sum, the burden costs attributable to the amended PTE 2002–51 will be approximately $13,052 ($8,625 + $4,427).

Persons are not required to respond to the revised information collection unless it displays a currently valid OMB control number 1210–0118.

Description of the Exemption

Title I of ERISA, which establishes certain standards of conduct for fiduciaries of employee benefit plans covered by ERISA, includes provisions prohibiting fiduciaries from causing a plan to engage in certain classes of transactions with persons defined as parties in interest. Similarly, Title II of ERISA prohibits plans described in section 4975(e)(1) of the Code from engaging in certain classes of transactions with persons defined under the Code as disqualified persons. Generally, such transactions are subject to taxation under section 4975 of the Code.

The VFC Program was adopted by the Department on a permanent basis in

March 2002.[2] Under the VFC Program, persons who are potentially liable for a breach of fiduciary duty can avoid the possibility of civil investigations and/or civil actions initiated by the Department for that breach and the imposition of civil penalties under section 502(l) or 502(i) of ERISA if they satisfy the conditions for correcting the breach as described in the VFC Program. The VFC Program was based on the Department's experience with the Pension Payback Program, 61 FR 9203 (March 7, 1996), and continued public interest in such correction programs. In response to comments received on the VFC Program requesting that the Department provide relief from the excise taxes imposed by section 4975 of the Code for prohibited transactions, the Department proposed a class exemption for four of the eligible transactions described in the VFC Program. A final exemption, PTE 2002–51, was published in the **Federal Register** on November 25, 2002. The four eligible transactions described in the exemption are as follows:

(A) The failure to transmit participant contributions to a pension plan within the time frames described in the Department's regulations at 29 CFR section 2510.3–102 and/or the failure to transmit participant loan repayments to a pension plan within a reasonable time after withholding or receipt by the employer.

(B) The making of a loan by a plan at a fair market interest rate to a disqualified person[3] with respect to the plan.

(C) The purchase or sale of an asset (including real property) between a plan and a disqualified person at fair market value.

(D) The sale of real property to a plan by the employer and leaseback of such property to the employer, at fair market value and fair market rental value, respectively.

Based on growing public utilization and experience in administering the VFC Program, EBSA decided to amend and modify the VFC Program to expand the categories of eligible transactions and to make it more useful to employers and others who wish to avail themselves of the relief provided. Specifically, the VFC Program now includes relief under Title I of ERISA for the purchase of an asset by a plan where the asset was later determined to be illiquid as described under the final VFC Program.

In this regard, the final VFC Program provides relief for both the plan's original acquisition of the asset that was later determined to be illiquid under the final VFC Program, as well as the correction involving the sale of such asset in a transaction that violates the prohibited transaction rules under Title I of ERISA, and section 4975 of the Code provides that all of the requirements of the final VFC Program are met. Similarly, the class exemption has been amended to provide relief from the excise taxes imposed by section 4975 of the Code for both the plan's original acquisition and/or the subsequent sale of the illiquid asset by the plan in a transaction prohibited pursuant to section 4975(c)(1), provided all the requirements of the class exemption are met. Moreover, as distinguished from the other eligible transactions covered in the VFC Program[4] and PTE 2002–51, correction in the VFC Program for this category of eligible transactions will involve a prohibited transaction.

The other category of transactions being restructured under the final VFC Program (see Section 7.6) includes the use of plan assets to pay expenses, including commissions or fees, that should have been paid by the plan sponsor, to a service provider for: (i) services provided in connection with the administration and maintenance of the plan, in circumstances where a plan provision requires that such plan expenses be paid by the plan sponsor, or (ii) services provided in connection with the establishment, design, or termination, of the plan, which relate to the activities of the plan sponsor in its capacity as settlor. The class exemption is being amended to provide excise tax relief where plan assets are used to pay for services appropriately characterized as settlor expenses, which relate to the activities of the plan sponsor in its capacity as settlor.

Discussion of Written Comments Received

The Department received two letters commenting on the proposed amendments to PTE 2002–51. One commenter suggested expanding the scope of the VFC Program to include relief for plans that are subject to the prohibited transaction excise tax described in section 4975 of the Code, but are not subject to Title I of ERISA, including individual retirement accounts (IRAs) described in section 408 of the Code. This commenter suggested that certain VFC Program applicants (e.g., financial institutions) may have caused ERISA–covered plans, as well as plans that are subject only to the prohibited transaction provisions of the Code, to engage in prohibited transactions. According to the commenter, plan officials with respect to these IRAs and certain other plans are unable to participate in the VFC Program and, therefore, are not eligible for relief under PTE 2002–51. Accordingly, these plan officials must seek excise tax relief through an individual exemption application submitted to the Department.[5] The commenter believes that it would be administratively convenient if the Department extended VFC Program eligibility to encompass the full range of plans that are subject to section 4975 of the Code. The Department has determined that it cannot expand the VFC Program as requested by the commenter, since it lacks jurisdiction to issue a no action letter under the VFC Program with respect to violations of the prohibited transaction provisions under the Code. Consequently, in light of the decision not to expand the VFC Program to include plans only subject to section 4975 of the Code, the Department does not believe that it would be appropriate to modify the final exemption as requested by the commenter. Notwithstanding the foregoing, the Department wishes to take the opportunity to state that the grant of this amendment does not foreclose its future consideration of individual exemption requests for transactions involving IRAs that are outside the scope of relief provided by both the VFC Program and the class exemption under circumstances when, for example, a financial institution received a no action letter applicable only to plans subject to the Program for a transaction(s) that involved both plans and such IRAs. The Department cannot provide assurances in advance that an individual exemption will be issued with respect to a particular transaction involving an IRA, however, interested persons are encouraged to contact the Department to discuss the particular facts of their case.

[2] 67 FR 15062 (Mar. 28, 2002). Prior to adoption in March 2002, the VFC Program was made available on an interim basis during which the Department invited and considered public comments on the Program. (See 65 FR 14164, Mar. 15, 2000).

[3] The Department notes that the term ''party in interest'' was used in the description of the eligible transactions covered under PTE 2002–51 although that exemption provided, and this amendment will provide, relief only from the sanctions imposed under section 4975 of the Code, which prohibits certain transactions between a plan and a ''disqualified person.'' For purposes of clarity, references in the exemption to a ''party in interest'' are changed to ''disqualified person.''

[4] Under the VFC Program prior to the current revision, correction could not be achieved by engaging in a new prohibited transaction. *See* VFC Program, 67 FR 15073 (Mar. 28, 2002) Section 2(d).

[5] PTE 2002–51 requires that a VFC Program applicant comply with all of the applicable requirements of the VFC Program and receive a no action letter with respect to transactions corrected under the VFC Program.

The Internal Revenue Service (the Service) submitted a comment requesting a modification to the current requirement in PTE 2002–51 which provides that an applicant must notify interested persons in writing of the transactions for which relief is being sought pursuant to the VFC Program and this exemption.[6] The Service requested that the notice requirement not apply in those situations where: (a) The excise tax due under section 4975 of the Code for a failure to timely transmit participant contributions and loan repayments is less than or equal to $100.00; (b) the excise tax that otherwise would be owed and payable to the United States Treasury is contributed to the plan; and (c) the contribution is allocated to the accounts of the plan's participants and beneficiaries in a manner consistent with the plan's provisions concerning the allocation of plan earnings. Lastly, the Service noted that, under the circumstances outlined above, employers that meet the applicable conditions of the class exemption would not be required to file a Return of Excise Taxes Related to Employee Benefit Plans (IRS Form 5330) with the IRS. After considering the issue, the Department has determined to modify the final exemption as requested by the Service. The Department notes that, for the purpose of determining whether the excise tax due under section 4975 of the Code for failing to timely transmit participant contributions and loan repayments is less than or equal to $100, and determining the amount to be contributed to the plan, an applicant may calculate the excise tax that would otherwise be imposed by section 4975 of the Code based upon the Lost Earnings amount computed using the Online Calculator.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 4975(c)(2) of the Code does not relieve a fiduciary or other disqualified person with respect to a plan from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply, the requirement that all assets of an employee benefit plan be held in trust by one or more trustees, and the general fiduciary responsibility provisions of ERISA which require, among other things, that a fiduciary discharge his or her duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The amendment will not extend to transactions prohibited under section 4975(c)(1)(F) of the Code.

(3) In accordance with section 4975(c)(2) of the Code, the Department finds that the amendment is administratively feasible, in the interests of plans and their participants and beneficiaries, and protective of the rights of participants and beneficiaries of such plans.

(4) The amendment is supplemental to and not in derogation of other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(5) The amendment is applicable to a transaction only if the conditions specified in the class exemption are satisfied.

Amendment

Accordingly, the following amendment to Sections I and II of PTE 2002–51 is granted under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR 2570, subpart B (55 FR 32836, Aug. 10, 1990).

Section I. Eligible Transactions

The sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the following eligible transactions described in Section 7 of the Voluntary Fiduciary Correction (VFC) Program, published simultaneously in this issue of the **Federal Register**, provided that the applicable conditions set forth in Sections II., III. and IV. are met:

A. Failure to transmit participant contributions to a pension plan within the time frames described in the Department's regulation at 29 CFR section 2510.3–102, and/or the failure to transmit participant loan repayments to a pension plan within a reasonable time after withholding or receipt by the employer. (*See* VFC Program, Section 7.1(a)).

B. Loan at a fair market interest rate to a disqualified person with respect to a plan. (*See* VFC Program, Section 7.2(a)).

C. Purchase or sale of an asset (including real property) between a plan and a disqualified person at fair market value. (*See* VFC Program, Sections 7.4(a) and 7.4(b)).

D. Sale of real property to a plan by the employer and the leaseback of the property to the employer, at fair market value and fair market rental value, respectively. (*See* VFC Program, Section 7.4(c)).

E. Purchase of an asset (including real property) by a plan where the asset has later been determined to be illiquid as described under the VFC Program in a transaction which was a prohibited transaction pursuant to section 4975(c)(1) of the Code, or in which the asset was acquired from an unrelated third party, and/or the subsequent sale of such asset in a transaction prohibited pursuant to section 4975(c)(1). (*See* VFC Program, Section 7.4(f)).

F. Use of plan assets to pay expenses, including commissions or fees, to a service provider (*e.g.*, attorney, accountant, recordkeeper, actuary, financial advisor, or insurance agent) for services provided in connection with the establishment, design or termination of the plan (settlor expenses)[7], which relate to the activities of the plan sponsor in its capacity as settlor, provided that the payment of the settlor expense was not expressly prohibited by a plan provision relating to the payment of expenses by the plan. (*See* VFC Program, section 7.6(b)).

Section II. Conditions

A. With respect to a transaction involving participant contributions or loan repayments to pension plans described in Section I.A., the contributions or repayments were transmitted to the pension plan not more than 180 calendar days from the date the amounts were received by the employer (in the case of amounts that a participant or beneficiary pays to an employer) or the date the amounts otherwise would have been payable to the participant in cash (in the case of amounts withheld by an employer from a participant's wages).

B. With respect to the transactions described in Sections I.B., I.C., I.D., or I.E., the plan assets involved in the transaction, or series of related transactions, did not, in the aggregate, exceed 10 percent of the fair market value of all the assets of the plan at the time of the transaction.

C. The fair market value of any plan asset involved in a transaction described

[6] The class exemption mandates that notice be provided to interested persons of the transaction and the method of correction.

[7] See Advisory Opinion 2001–01A (Jan. 18, 2001).

in Sections I.C., I.D., or I.E. was determined in accordance with section 5 of the VFC Program.

D. The terms of a transaction described in Sections I.B., I.C., I.D., I.E., or I.F., were at least as favorable to the plan as the terms generally available in arm's-length transactions between unrelated parties.

E. With respect to any transaction described in Section I., the transaction was not part of an agreement, arrangement or understanding designed to benefit a disqualified person.

F. (1) With respect to any transaction described in Section I., the applicant has not taken advantage of the relief provided by the VFC Program and this exemption for a similar type of transaction(s) identified in the current application during the period which is three years prior to submission of the current application.

(2) Notwithstanding the foregoing, Section II.F.(1) shall not apply to an applicant provided that:

(a) The applicant was a broker-dealer registered under the Securities Exchange Act of 1934, a bank supervised by the United States or a State thereof, a broker-dealer or bank subject to foreign government regulation, an insurance company qualified to do business in a State, or an affiliate thereof;

(b) The applicant was a disqualified person (including a fiduciary) solely by reason of providing services to the plan or solely by reason of a relationship to such service provider described in section 4975(e)(2)(F) and (G) of the Code;

(c) Neither the applicant nor any affiliate (i) was a fiduciary (within the meaning of section 3(21)(A) of ERISA and 4975(e)(3)of the Code) with respect to the assets of the plan involved in the transaction and (ii) used its discretion to cause the plan to engage in the transaction;

(d) Individuals acting on behalf of the applicant had no actual knowledge or reason to know that the transaction was not exempt pursuant to a statutory or administrative exemption under ERISA and/or the Code; and

(e) Prior to the transaction, the applicant established written policies and procedures that were reasonably designed to ensure compliance with the prohibited transaction rules and the applicant engaged in periodic monitoring for compliance.

G. With respect to a transaction involving a sale of an illiquid asset under the VFC Program described in Section I.E., the plan paid no brokerage fees, or commissions in connection with the sale of the asset.

H. With respect to any transaction described in Section I.F., the amount of plan assets involved in the transaction or series of related transactions did not, in the aggregate, exceed the lesser of $10,000 or 5% of the fair market value of all the assets of the plan at the time of the transaction.

Section III. Compliance With the VFC Program

A. The applicant has met all of the applicable requirements of the VFC Program.

B. EBSA has issued a no action letter to the applicant pursuant to the VFC Program with respect to a transaction described in Section I.

Section IV. Notice

A. Written notice of the transaction(s) for which the applicant is seeking relief pursuant to the VFC Program, and this exemption, and the method of correcting the transaction, was provided to interested persons within 60 calendar days following the date of the submission of an application under the VFC Program. A copy of the notice was provided to the appropriate Regional Office of the United States Department of Labor, Employee Benefits Security Administration, within the same 60-day period, and the applicant indicated the date upon which notice was distributed to interested persons. Plan assets were not used to pay for the notice. The notice included an objective description of the transaction and the steps taken to correct it, written in a manner reasonably calculated to be understood by the average Plan participant or beneficiary. The notice provided for a period of 30 calendar days, beginning on the date the notice was distributed, for interested persons to provide comments to the appropriate Regional Office. The notice included the address and telephone number of such Regional Office.

B. Notice was given in a manner that was reasonably calculated, taking into consideration the particular circumstances of the plan, to result in the receipt of such notice by interested persons, including but not limited to posting, regular mail, or electronic mail, or any combination thereof. The notice informed interested persons of the applicant's participation in the VFC Program as amended and intention of availing itself of relief under the exemption.

C. Notwithstanding the foregoing, Section IV.A. and B. shall not apply to a transaction described in Section I.A., provided that (i) the applicant under the VFC Program has met all of the other Program requirements; (ii) the amount of the excise tax that otherwise would be imposed by section 4975 of the Code with respect to any transaction(s) described in Section I.A. would be less than or equal to $100.00; (iii) the amount of the excise tax that otherwise would be imposed by section 4975 of the Code was paid to the plan and allocated to the participants and beneficiaries in the same manner as provided under the plan with respect to plan earnings; and (iv) the applicant under the VFC Program provides a copy of a completed IRS Form 5330 or written documentation containing the information required by IRS Form 5330 and proof of payment with the submission of the application to the appropriate EBSA Regional Office. For the sole purpose of determining whether the excise tax due under section 4975 of the Code on the ''amount involved'' with respect to the prohibited transaction involving the failure to timely transmit participant contributions and loan repayments is less than or equal to $100, an applicant may calculate the excise tax due based upon the Lost Earnings amount computed using the Online Calculator.

Signed at Washington, DC, this 12th day of April, 2006.

Ivan L. Strasfeld,

Director of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Bureau of Labor Statistics (BLS) is soliciting

abstract: Primary: Individuals or households. Other: Business or other for-profit, Not-for-profit institutions. The data provided by this information collection request is used by ATF to determine if articles imported meet the statutory and regulatory criteria for importation and if the articles shown on the permit application have been actually imported.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that 20,000 respondents will complete a 24-minute form.

(6) An estimate of the total public burden (in hours) associated with the collection: There are 8,000 estimated annual total burden hours associated with this collection.

FOR FURTHER INFORMATION CONTACT: Brenda E. Dyer, Deputy Clearance Officer, United States Department of Justice, Policy and Planning Staff, Justice Management Division, Suite 1600, Patrick Henry Building, 601 D Street NW., Washington, DC 20530.

Dated: December 19, 2003.

Brenda E. Dyer,

Deputy Clearance Officer, United States Department of Justice.

BILLING CODE 4410–FY–M

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Prohibited Transaction Exemption 2003–39; Application No. D–11100]

Class Exemption for the Release of Claims and Extensions of Credit in Connection With Litigation

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This document contains a final class exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from certain taxes imposed by the Internal Revenue Code of 1986, as amended (the Code). The exemption permits transactions engaged in by a plan, in connection with the settlement of litigation. This exemption was proposed in response to concerns raised by the pension community regarding the impact of ERISA's prohibited transaction provisions on the settlement of litigation by employee benefit plans with parties in interest. The exemption affects all employee benefit plans, the participants and beneficiaries of such plans, and parties in interest with respect to those plans engaging in the described transactions.

EFFECTIVE DATE: The exemption is effective January 1, 1975.

FOR FURTHER INFORMATION CONTACT: Andrea W. Selvaggio, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Room N–5649, 200 Constitution Avenue NW., Washington, DC 20210 (202) 693–8540 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On February 11, 2003, the Department published a notice in the **Federal Register** (68 FR 6953) of the pendency of a proposed class exemption from the restrictions of section 406(a)(1)(A), (B) and (D) of the Act and from the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A), (B) and (D) of the Code. The Department proposed the class exemption on its own motion, pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR Part 2570 Subpart B (55 FR 32836, August 10, 1990).[1]

The notice of pendency gave interested persons an opportunity to comment or request a public hearing on the proposal. The Department received five (5) public comments. Upon consideration of all the comments received, the Department has determined to grant the proposed class exemption, subject to certain modifications. These modifications and the major comments are discussed below.

Executive Order 12866

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of the Executive Order, it was determined that this action is ''significant'' under Section 3(f)(4) of the Executive Order. Accordingly, this action has been reviewed by OMB.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) (PRA 95), the Department submitted the information collection request (ICR) included in the Class Exemption For Release of Claims and Extensions of Credit in Connection With Litigation to the Office of Management and Budget (OMB) for review and clearance at the time the proposed class exemption was published in the **Federal Register** (February 11, 2003, 68 FR 6953). The ICR for the proposed class exemption was combined with the ICR in PTCE 94–71,[2] also approved under OMB control number 1210–0091, because of the similarity of subject matter between the two exemptions. No comments were received about the burden estimates and no substantial or material changes have been made in the grant of the exemption that would affect the burden estimates in the proposal. The approval for each of the ICRs included in the two exemptions will expire on April 30, 2006.

In order to grant an exemption pursuant to section 408(a) of the Act, the Department must, among other things, make a finding that the terms of the exemption are protective of the rights of participants and beneficiaries of a plan. To support making such a finding, the Department normally imposes certain conditions on fiduciaries and parties in interest that may make use of the exemption. The information collection provisions of the exemption are among these conditions. The information collection provisions are found in sections III(c), (e), (g), and

[1] Section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996), generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code ot the Secretary of Labor. For purposes of this exemption, references to specific provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

[2] PTCE 94–71, 59 FR 51216, October 7, 1994, as corrected, 59 FR 60837, November 28, 1994—Settlement Agreements Resulting From An Investigation, involving remedial settlements resulting from an investigation of an employee benefit plan conducted by the Department.

(h). These requirements are summarized as follows:

Written Agreement. The exemption requires that the terms of the settlement be specifically described in a written agreement or consent decree. In the exemption as granted, the Department has added that, with regard to transactions involving assets other than cash, the assets and their fair market value, including the date for such valuation, must be described in writing in the settlement agreement. Because a description and valuation of the assets involved in a settlement transaction are usually included in a settlement agreement, the requirement serves only as a clarification about assets that are not cash for the parties seeking to use the class exemption. In addition, because the Department believes that the ability to make changes with regard to a settlement allows more flexibility to the parties involved, it has also provided in the final exemption that certain adjustments, such as the right to amend the plan, are permissible if written into the agreement. These two new requirements are only operative for certain provisions and under certain conditions that may or may not be included in the settlement. Where appropriate, including the provisions in the agreement enables interested parties described in the exemption to verify that the conditions of the exemption have been met. However, neither requirement produces a measurable burden beyond that which would be considered usual business practice, and no additional burden has been accounted for in this ICR.

Acknowledgement by a Fiduciary. On a prospective basis, the exemption also requires that a fiduciary acting on behalf of the plan acknowledge in writing that it is a fiduciary with respect to the settlement of the litigation. Under the Act, a person that exercises ''any authority or control respecting disposition of [the plan's] assets,'' is considered a fiduciary. It is anticipated that the applicable plan fiduciary will incorporate this acknowledgement in the written agreement outlining the terms and conditions of its retention as a plan service provider, and already in existence, as part of usual and customary business practice. As such, a written acknowledgement is not expected to impose any measurable additional burden.

Recordkeeping. Prospectively, the exemption requires a plan to maintain for a period of six years the records necessary to enable certain persons to determine whether the conditions of the exemption had been met. The six-year recordkeeping requirement is consistent with the requirements in section 107 of the Act as well as general record-keeping requirements for tax information under the Code. As such, the Department has not accounted for a burden related to recordkeeping for this exemption.

The exemption may affect employee benefit plans, the participants and beneficiaries of those plans, and parties in interest to plans engaging in the specified transactions. It is not possible to estimate the number of respondents or frequency of response to the information collection requirements of the exemption due to the wide variety of litigation involving plans, parties to that litigation, and jurisdictions in which litigation occurs. However, the lack of an ascertainable number of settlements does not impact the hour or cost burden because no additional burden is associated with the information collection requirements of the exemption.

I. Discussion of Comments Received

The comments received by the Department were generally supportive of the issuance of a class exemption for the release of claims and extensions of credit in connection with litigation. However, commenters requested specific modifications to the proposal in the following areas:

A. Whether the settlement of litigation with a party in interest is a prohibited transaction. Several commenters argued that settling litigation is not a transaction, and, therefore, not prohibited under section 406 of the Act. Other commenters requested that the Department clarify that only a fiduciary, a participant or beneficiary, or the Secretary of Labor, may bring suit to enforce ERISA's fiduciary duties. These commenters asserted that, because the statute does not identify a plan as a party with standing to pursue ERISA litigation, an ERISA claim is not a plan asset and the release of such an asset, in exchange for consideration from a party in interest, would not be a prohibited sale or exchange of any property under section 406 of ERISA. Other commenters asserted that the settlement of litigation with a party in interest is a prohibited transaction and urged stricter conditions for the provision of retroactive relief because the Department's position on this issue was clearly articulated in its 1995 Opinion Letter, AO 95–26A (October 17, 1995).

As the Department noted in proposing this exemption, the fact that a transaction is subject to an administrative exemption is not dispositive of whether the transaction is, in fact, a prohibited transaction. Rather, the exemption is being granted in response to uncertainty expressed on the part of plan fiduciaries charged with the responsibility under ERISA for determining whether it is in the interests of a plan's participants and beneficiaries to enter into a settlement agreement with a party in interest. The comments have confirmed the Department's earlier conclusion that there was considerable uncertainty surrounding this issue. After considering all of the comments, the Department has determined that the exemption, as revised, appropriately balances the concerns of these commenters while allowing plan fiduciaries to properly carry out their responsibilities under ERISA.

In response to the comments that ERISA civil actions for breach of fiduciary duty may only be brought by participants, beneficiaries, fiduciaries, and the Secretary of Labor, the Department has modified the final class exemption to include the release of claims by both the plan and a plan fiduciary. As the Department noted in the preamble to the proposed exemption, many situations in which a plan settles litigation may not give rise to a prohibited transaction or may be covered by an existing statutory or administrative exemption. For example, correction of a prohibited transaction that complies with section 4975(f)(5) of the Code [3]; reimbursement of a plan without a release of the plan's claim; settlement with a service provider of a dispute related to the provision of services or incidental goods to the plan that is otherwise exempt under ERISA 408(b)(2) (*See*, Opinion Letter, AO 95–26A); settlements authorized by the Department pursuant to PTE 94–71 (59 FR 51216, October 7, 1994, as corrected, 59 FR 60837, November 28, 1994); and judicially approved settlements where the Labor Department or the Internal Revenue Service is a party pursuant to PTE 79–15 (44 FR 26979, May 8, 1979).

In addition, the Department notes that this class exemption would be available for settlement agreements relating to an employer's failure to timely remit participant contributions to a plan, including a collectively bargained multiemployer or multiple employer plan, to the extent the conditions contained in this final exemption are

[3] IRC Reg. sec. 141.4975–13 provides that for purposes of the excise taxes on prohibited transactions, the definition of the term ''correction'' under IRC Reg. sec. 53.4941(e)–1 (concerning excise taxes on self-dealing with foundations) is controlling.

met.[4] In this regard, the Department notes that the relief provided by this exemption is limited to the prohibited transactions that arise where a plan trustee and an employer enter into a settlement involving the employer's failure to timely forward participant contributions to the plan as required under ERISA. Thus, nothing in this class exemption should be construed as exempting any of the prohibited transactions described in section 406(a) or 406(b) of ERISA that arise solely in connection with an employer's failure to timely forward participant contributions to a plan.[5]

This exemption does not, however, apply to transactions described in PTE 76–1, A.I. (41 FR 12740, March 26, 1976, as corrected, 41 FR 16620, April 20, 1976) relating to delinquent employer contributions to a collectively bargained multiemployer or multiple employer plan. Finally, PTE 76–1, A.I. does not extend relief to those settlement arrangements that arise from the failure of an employer to timely forward participant contributions to a multiemployer or multiple employer plan.

Section 502(d)(1) of the Act provides that ''an employee benefit plan may sue or be sued under this title as an entity.'' This exemption covers settlement of any type of suit the plan has brought. However this exemption is not available for settlement of claims brought by a party in interest against a plan. This exemption does not cover a plan's payment of money or other things of value to a party in interest in exchange for the dropping of claims against the plan. As with exchanges made for the release of claims in favor of the plan, the Department's determination in this regard is not dispositive of whether such an exchange constitutes a prohibited transaction.

Finally, the Department notes that a settlement between a plan and a participant or beneficiary made solely to resolve claims against a plan for the recovery of benefits, by a participant or beneficiary, may not involve a prohibited transaction. If the plan makes payment to a participant who is a party in interest to settle a benefits dispute, such payment generally would be viewed by the Department as the payment of a plan benefit that would not trigger the need for an exemption. As the Supreme Court noted in *Lockheed Corp.* v. *Spink*, 517 U.S. 882, 892–893 (1996), the payment of benefits is not a prohibited transaction.

B. The plan must obtain advice from an attorney representing the plan that a genuine controversy exists. Several commenters were concerned that imposing this requirement on past settlements would effectively limit the availability of the exemption. These commenters asserted that, prior to publication of the Department's proposed exemption, many fiduciaries were unaware that the settlement of litigation might be considered a prohibited transaction by the Department. Even if an attorney was retained in connection with the litigation, it is unlikely that the attorney would have opined as to whether or not there was a genuine controversy. Other commenters argued that: the filing of a lawsuit should be sufficient to find the existence of a genuine controversy; and class action settlements should not have to meet this requirement. Another commenter suggested retaining the requirement for a genuine controversy, but without requiring an attorney's determination. This commenter also suggested that the attorney review be permitted, but not required, as a safe harbor in certain situations. He explained that fiduciaries might find it prudent and in the interests of participants and beneficiaries to settle a frivolous case for a *de minimus* amount, rather than incur the cost of litigation. In this situation, such fiduciaries should be able to meet the condition of the class exemption by demonstrating that they sought and obtained advice of counsel before settling the case.

Several commenters asserted that the genuine controversy condition was unnecessary as the concern raised by the Department, the possibility of a collusive settlement, was addressed by the condition that the settlement is not an arrangement to benefit a party in interest. Another commenter suggested that independent legal advice and a written agreement or consent decree should be mandatory for all retroactive relief because, even if the fiduciary was unaware of the prohibited transaction issue, a prudent fiduciary would have obtained such written documentation before entering into a settlement.

On the basis of these comments, the Department has decided to amend the genuine controversy condition. No finding of genuine controversy will be required where the case has been certified as a class action by the court. In addition, for transactions entered into prior to the publication of the final exemption, and the first 30 days thereafter, no attorney review will be required to determine whether the genuine controversy exists. On a prospective basis, attorney review will be required. In response to a question from one of the commenters, the Department confirms that the independent fiduciary's in-house attorneys, as well as its outside counsel, could provide the appropriate advice concerning the existence of a genuine controversy.

C. The decision-making fiduciary has no interest in any of the parties involved in the litigation that might affect the exercise of its best judgment as a fiduciary (independent fiduciary). Several commenters suggested that the Department eliminate the requirement for an independent fiduciary or, in the alternative, limit its application to prospective relief. Among the suggestions were: limit the requirement for an independent fiduciary to material claims where there are no alternative safeguards; and eliminate the independent fiduciary requirement where a judge reviews the fairness of a class action settlement. Other commenters expressed concern that the plan's directed trustee, even if not a defendant, should not be considered sufficiently independent to make decisions settling a case. They suggested that an entirely independent fiduciary be retained. Another commenter argued that relief in large cases should be conditioned upon the retention of an independent fiduciary with no prior relationship to the plan, or the defendants, and no future relationship with the plan for three years after the engagement.

Except as noted above in connection with the finding of genuine controversy, the Department does not believe that it would be appropriate to make a distinction between the requirements applicable to class action settlements and other settlements. However, in response to comments, the Department has decided to eliminate the requirement that the independent fiduciary ''negotiate'' the settlement. The Department realizes that many of the settlements to which this class exemption would apply are class action settlements. Where the plan is not a lead plaintiff, the plan fiduciary's role in negotiating the terms of the settlement may be limited. The Department recognizes, however, that even where negotiation does not take place between the plan and the defendant, a fiduciary will be compelled, consistent with ERISA's fiduciary responsibility provisions, to make a decision regarding

[4] The Department notes that the relief provided by this exemption would be available for settlements involving participant or employer contributions to a single employer plan or to a non-collectively bargained multiple employer plan.

[5] In this regard, the failure of an employer to timely remit contributions made to a plan by an employee of such employer violates ERISA sections 403(a), 403(c)(1), 404(a)(1)(A), 406(a)(1)(D), and 406(b)(1).

the settlement on behalf of the plan, even if that decision is merely to accept or reject a proposed settlement negotiated by other class members.

As modified, the final class exemption covers settlements authorized by a fiduciary that are reasonable, in light of the plan's likelihood of full recovery, the risks and costs of litigation, and the value of claims foregone. Such settlements must be no less favorable to the plan than comparable arm's-length terms and conditions that would have been agreed to by unrelated parties in similar circumstances. In addition, the transaction must not be part of an agreement, arrangement or understanding designed to benefit a party in interest. Thus, an independent fiduciary could satisfy the authorization requirements under the final exemption by deciding not to opt out of class action litigation if, after a review of the settlement, such fiduciary concludes that the chances of obtaining any further relief for the plan are not justified by the expense involved in pursuing such relief. Although the Department has determined to delete the requirement for negotiation as a specific condition of the class exemption, the Department notes that this modification does not diminish the fiduciary's responsibilities with respect to the settlement terms.

As noted above, several of the commenters expressed concern about the degree of independence of institutional fiduciaries, such as directed trustees, that may serve as the fiduciary contemplated by the class exemption. Without agreeing or disagreeing with this comment, the Department emphasizes that this class exemption does not provide relief from section 406(b) of the Act. In addition, the fiduciary's decisions in authorizing a settlement are subject to the fiduciary responsibility provisions of the Act.

D. Plans must select an independent fiduciary. Several commenters expressed concern about the additional cost of hiring independent fiduciaries in connection with settlements. The Department believes that plans often will not need to retain fiduciaries specifically to comply with this exemption. In most cases, the plan will be able to use a current fiduciary who is not a party to the action and who is not so closely allied with a party (other than the plan) as to create a conflict of interest. As with any other expense, the Department expects that fiduciaries will engage in prudent cost/benefit analysis to select the appropriate independent fiduciary in each case. In some cases, the cost of the independent fiduciary may be included in the damages claimed by the plan and may be reimbursed by the defendant in settling the litigation.

One of the commenters suggested that to avoid duplication, the independent fiduciary should be permitted to rely on the opinion of plaintiffs' class counsel or experts hired to assist class counsel. The Department agrees that the fiduciary should not spend plan resources unnecessarily. Whether and to what extent a fiduciary should rely on a particular attorney or expert hired by one of the other parties are decisions that the fiduciary must make in accordance with its fiduciary responsibilities under ERISA.

In this regard, the Department notes that on occasion the independent fiduciary may wish to retain outside experts to assist the fiduciary in determining whether or not to settle litigation. The following are some of the factors that may assist the fiduciary in its determination: the size of the claim, the expertise of the fiduciary, and the subject matter of the litigation.

Several of the commenters asked the Department to clarify that the mere fact that a party in interest pays for an attorney, an independent fiduciary, or other expert hired by the plan, does not mean that these professionals are not independent for purposes of the exemption. The Department agrees with this assertion, assuming that the professional being paid by the party in interest understands that the plan is their client, not the party paying their bill. In addition, the amount of compensation paid to the professional by the party in interest constitutes no more than a small percentage of such professional's annual gross income.

E. What is the role of the independent fiduciary where there is judicial approval of a settlement? Several commenters recommended that judicial approval of a settlement should eliminate the need for an independent fiduciary. One of the commenters suggested that where the settlement is judicially approved, relief from section 406(b) of the Act should be available under the exemption for those fiduciaries that were defendants in the litigation. The Department has determined not to adopt these suggestions. The court, in reaching its conclusion that the settlement is fair, must balance the interests of all the litigants. ERISA, on the other hand, requires that a fiduciary make its decisions with an ''eye single to the interests of the participants and beneficiaries.'' *Donovan* v. *Bierwirth,* 680 F.2d 263, 271 (2d Cir. 1982), cert. denied, 459 U.S. 1069 (1982). In response to the request for relief from section 406(b), the Department does not believe that a sufficient showing has been made that such relief would be appropriate under the circumstances.

F. Should there be special rules for settling class action litigation? Several of the commenters explained that, with respect to certain types of class actions, class members do not have the option of opting out of the class—all are bound by the decision. The commenters explained that ERISA class actions are often non-opt out cases. According to the commenters, this means that where class action litigation is brought by the participants, the plan fiduciary may, without taking any action, be bound by the class action settlement. In light of this, the commenters asked how such a fiduciary could cause a prohibited transaction where it took no action and yet was bound by the settlement. The Department does not regard this exemption proceeding to be the appropriate setting for resolving questions concerning what types of settlement are more or less likely to be prohibited transactions.

The Department notes, however, that the fiduciary is unlikely to remain uninvolved in the settlement of an ERISA lawsuit initiated by participants for two reasons. First, the fiduciary will, in all likelihood, be named as a party to the lawsuit and the court will almost certainly require the plan fiduciary's input on the settlement. Alternatively, the party in interest likely will seek the involvement of the fiduciary because the party in interest (disqualified person) may need to take advantage of the relief provided by the class exemption in order to avoid the possible imposition of excise taxes under section 4975 of the Code. Under the Code, such excise taxes are paid by the disqualified person who participates in the prohibited transaction, not the fiduciary who caused the plan to engage in the transaction.

In order to meet the conditions of the class exemption, the fiduciary faced with a non-opt out class action must take such actions as are appropriate under the particular circumstances. For example, before such a settlement is imposed on a non-opt out class, generally there is an opportunity to object to its terms. If the fiduciary does not believe that the proposed terms and conditions of the settlement are as favorable to the plan as comparable arm's-length terms and conditions that would have been agreed to by unrelated parties under similar circumstances, it should object to the settlement.

In securities fraud class action cases, there is often an option to opt out of the class. Where the plan or the plan

trustee, as the holder of record of the securities, is a class member, whatever action or inaction that fiduciary determines to undertake has consequences for the plan. If the fiduciary takes no action, and the case is settled for far less than the full value of the plan's losses, the burden will be on the fiduciary to justify its inaction. The fiduciary responsible for authorizing settlement of class action claims must decide, not only whether or not to opt out of the class action, but also whether to protest the proposed settlement during the fairness hearing.[6]

G. Only cash may be received in exchange for the release, unless the transaction at issue is being rescinded. The commenters were universal in their objection to this condition. They pointed out that frequently, in cases involving investment in employer securities, the settlement consists of additional employer securities. In addition, settlements with plan sponsors often include nonmonetary relief, such as a promise of future contributions and plan amendments improving participants' rights, for example, the right to diversify their investments.

In response to these comments, the Department notes that the conditions for retroactive relief do not specify the type of the consideration that may be provided in exchange for the release. On a prospective basis, the Department has decided to modify the final exemption to permit assets other than cash to be provided in exchange for the plan's or the plan fiduciary's release of a claim. As modified, the final exemption permits contributions of qualifying employer securities, or other marketable securities, in certain instances. Any assets contributed to the plan, in connection with a settlement, must consist of securities that can be objectively valued to determine fair market value, in accordance with Section 5 of the Voluntary Fiduciary Correction (VFC) Program (67 FR 15062, March 28, 2002). The final exemption has also been modified to provide that plan amendments, additional employee benefits, and the promise of future contributions may be included as part of a settlement agreement covered by this exemption.

H. When is a settlement reasonable? One commenter urged the Department to apply this condition to all transactions and to include the costs of litigation among the factors to be considered in determining whether a settlement is reasonable. Another commenter asked to include the value of claims foregone. The Department has adopted these suggestions. The final exemption requires that the settlement must be reasonable in light of the plan's likelihood of full recovery, the risks and costs of litigation, and the value of claims foregone. How these factors are weighed by fiduciaries will differ, depending on the type of case, but will always involve a prudent decision-making process, given the facts and circumstances of the particular situation.

I. Should an interest rate be specified? Most of the commenters urged the Department to eliminate the requirement that a reasonable interest rate be charged for an extension of credit in connection with a settlement covered by the exemption. The commenters explained that often a settlement requires a payment of the promised sum over several years, without specifying an interest rate. In response to these comments, the Department has modified this condition to delete the reference to interest in connection with the loan or extension of credit. As modified, any extensions of credit must be made on terms that are reasonable. Although the final exemption provides more flexibility, fiduciaries that agree to an extension of credit with a party in interest nonetheless must consider that party's creditworthiness and the time value of money in evaluating the settlement.

As noted above, the settlement of litigation with a plan sponsor often involves the promise of future contributions. Another commenter requested that the Department clarify that the promise of future contributions is not loan or other extension of credit. The Department agrees with the commenter.

The Department encountered a case where the trustees had agreed to accept payments over time in order to collect amounts misappropriated by a party in interest. In this case, the trustees extended credit to the party in interest, but did not release their cause of action against him. In such a case, the class exemption will apply if the extension of credit is being made in connection with a settlement and both the settlement and the extension of credit meet all of the conditions of this exemption.

Several commenters urged the Department to require that extensions of credit be secured by property or a letter of credit. Although the Department has decided not to adopt this suggestion as a condition of the final exemption, the Department encourages fiduciaries to seek security for an extension of credit, wherever feasible, to protect the plan against the risk of default.

J. Certain applicants request that the scope of AO 95–26A (October 17, 1995) be extended. In AO 95–26A, the Department opined that settlement of litigation with a service provider may be covered by the statutory exemption for service providers provided under section 408(b)(2) of the Act. Several commenters asked whether the same rationale extended to the settlement of cases where the transaction at issue in the litigation is of the type addressed by a statutory or administrative exemption. The Department notes that the issues raised by the commenters, with respect to the scope of AO 95–26A, are beyond the scope of this exemption proceeding.

K. Who bears the burden of proof? Several commenters expressed concern that, if the retroactive conditions of the exemption are too subjective or difficult to meet, fiduciaries who acted in good faith in settling cases, particularly complex securities fraud cases, may be subject to litigation. According to the commenters, most practitioners were unaware of the Department's position that settling litigation with a party in interest might result in a prohibited transaction until the Department published the proposal for this class exemption. These commenters argued that, without a broad retroactive exemption, frivolous litigation may ensue.

Other commenters asserted that whether or not the fiduciaries were aware of potential prohibited transactions, these fiduciaries knew they were making decisions involving plan assets. If they acted prudently and in the interests of participants and

[6] For example, in *Great Neck Capital Appreciation Investment Partnership* v. *PriceWaterhouseCoopers,* In re Harnischfeger Industries, Inc. Securities Litigation, 212 F.R.D. 400 (E.D. Wisc. 2002), the original securities law class action settlement proposal included release of ERISA claims against the fiduciaries of the Harnischfeger employee benefit plans, even though the lawsuit had not alleged ERISA claims. At the fairness hearing, a participant protested that the participants' ERISA claims might be extinguished if this release was approved as part of the settlement. After considering the parties positions, the judge, during a conference call, "advised the parties that [he] was inclined to view the proposed settlement as unfair if its effect would be to extinguish the Plan participants' ERISA claims without compensation and that it also appeared to be unfair to require Plan participants to give up their right to participate in the settlement as a condition of asserting ERISA claims." 212 F.R.D. at 406. The securities law parties took the judge's hint and voluntarily agreed to exclude the ERISA claims from the release. In re IKON Office Solutions, Inc. Securities Litigation, 194 F.R.D. 166 (E.D.Pa. 2000), on the other hand, involved a securities law release that arguably released at least some of the ERISA claims and participants protested this at the fairness hearing. The court held that it would be premature, in the context of a settlement, for the court to address such issues—participants could either opt out and not be bound by the settlement, or take their chances pursuing what was left of their ERISA claims after receiving their portion of the securities class action settlement.

beneficiaries in settling the litigation with the party in interest, these fiduciaries should have no trouble meeting the retroactive requirements of the exemption. These commenters argued that, given the Department's guidance on this issue in 1995, it is appropriate to shift the burden of proving substantive and procedural prudence from the person challenging the settlement to the fiduciary seeking the protection of the exemption.

In light of these comments, the Department confirms that the party seeking to take advantage of any administrative exemption granted by the Department has the burden of proving that it met each condition of the exemption. Nonetheless, the Department has been persuaded that many practitioners were unaware of the prohibited transaction issues involved in settlements. The Department is also aware that some attorneys may have advised their clients that the settlement of litigation with a party in interest is not the type of transaction intended to be covered by section 406 of the Act. After considering these comments, the Department believes that it is appropriate to modify the retroactive relief under the final exemption. Accordingly, for settlements entered into on or before 30 days after the date of publication of the final exemption, the determination that there was a genuine controversy need not have been made by an attorney.

L. Should notice be required? Several commenters urged the Department to require notice to all participants and beneficiaries in connection with the settlement of litigation. One commenter pointed out that the Department requires notice in connection with PTE 94–71 (59 FR 51216, October 7, 1994, as corrected, 59 FR 60837, November 28, 1994) (settlement agreements between the U.S. Department of Labor and plans) where the Department is a party to the settlement. This commenter argued that without the involvement of the Department, notice is even more important to the participants and beneficiaries because their rights to pursue their own ERISA litigation could be compromised or waived entirely by the plan fiduciary. The commenter recommended that notice to participants of the nature of the allegations leading to the settlement and the terms of the proposed settlement should be required. This commenter also urged that all settlements should take the form of a proposed consent decree filed after, or contemporaneous with, the Complaint. In addition, the analytical basis for the settlement should be open to inspection by participants for a stated period of time. Another commenter explained that, in his experience, participants are not aware of litigation, or at least the plan's involvement, until after the settlement is final. Other commenters strongly oppose notice. These commenters asserted that such an undertaking could be very costly and disruptive, especially for minor litigation.

The Department has determined not to add a notice requirement as a condition of this class exemption. Requiring notice at the point where litigation is about to be settled could result in unnecessary delays and additional costs. The Department believes that the interests of the participants and beneficiaries will be sufficiently protected by the conditions of this class exemption, especially the requirement that the settlement is authorized by a fiduciary who is independent of the parties involved in the litigation.

M. Discussion of other comments. One of the commenters requested the Department's concurrence that, if ERISA claims are not covered by the release given by the plan or the plan fiduciary in settlement of litigation, the fiduciary need not obtain additional consideration to account for such claims. The Department agrees with this statement.

One commenter urged the Department to opine that, where a plan fiduciary causes a plan to release all the plan's non-ERISA claims arising out of a transaction, the fiduciary does not automatically release the fiduciary's own claims for breach of fiduciary duty arising out of the same transaction. The commenter explained that the proposed exemption did not distinguish between claims brought by the plan, *i.e.*, with the plan itself as a named party, and claims brought on behalf of the plan by a fiduciary. ERISA § 502(d)(1), 29 U.S.C. 1132(d)(1), provides that an employee benefit plan may sue and be sued as an entity. Claims for violations of title I of ERISA, however, may be brought by a fiduciary, participant or beneficiary of the plan or by the Secretary of Labor. ERISA §§ 502(a)(2), 502(a)(3), 502(a)(4), 502(a)(5), and 502(e)(1), 29 U.S.C. 1132(a)(2), 1132(a)(3), 1132(a)(4), 1132(a)(5) and 1132(e)(1). Some courts have concluded that plans may bring actions under other laws, but may not bring an action for a fiduciary breach under title I of ERISA. *E.g., Pressroom Unions-Printers League Income Security Fund* v. *Continental Assurance Co.*, 700 F.2d 889, 893 (2nd Cir. 1983). Other courts have not adopted this distinction. *E.g., Saramar Aluminum Co.* v. *Pension Plan for Employees of the Aluminum Indus. and Allied Indus.*, 782 F.2d 577, 581 (6th Cir. 1986). The commenter believes that a failure to distinguish between claims that a plan can make in its own name and those that must be made by a plan fiduciary, for example, could cause courts to conclude that releasing a plan's non-ERISA claims automatically releases a plan fiduciary's, or participant's or beneficiary's ERISA claims on behalf of the plan.

The Department amended the proposed exemption to clarify that it applies to releases by the plan or by a plan fiduciary. The issue of how a release of claims by a plan or plan fiduciary may affect ERISA claims that could otherwise be brought by a fiduciary, participant or beneficiary is beyond the scope of this exemption proceeding. In the Department's view, a fiduciary should understand, in advance of signing, the legal effect that a settlement agreement may have on all claims that might be brought by or on behalf of the plan or its participants and beneficiaries. Plan fiduciaries may need to obtain legal advice on the scope of claims affected by a proposed settlement agreement. The Department notes that it has long held the view that a fiduciary's release of ERISA claims does not bind the Secretary.

It is not uncommon for the same transactions to give rise to both ERISA and securities fraud claims. The plan, and by extension, the participants and beneficiaries of the plan, are entitled to the same recovery as other shareholders in the securities fraud settlement. However, the participants and beneficiaries may have another avenue of recovery not available to other shareholders. They are authorized, under ERISA, along with the plan fiduciary and the Secretary of Labor, to bring suit to make the plan whole for all losses caused by a breach of fiduciary duty. As noted above, the Department recognizes that, in a number of securities fraud class action settlements, the participants and/or plan fiduciaries have successfully objected to the original release and were able to modify the terms of the release to permit the plan to receive its share of the securities fraud settlement without releasing its ERISA claims against the parties in interest. In other instances, fiduciaries have successfully negotiated additional relief for the plan beyond that provided to shareholders who did not have ERISA claims against the defendants. The Department notes that plan fiduciaries should consider whether additional relief may be available for the ERISA claims before agreeing to a broad release.

In conclusion, the Department encourages participants, beneficiaries, fiduciaries, parties in interest and other interested persons to take advantage of the wide range of compliance assistance offered by the Department. Those with questions about their rights and responsibilities in particular situations should look first to our web site: *http://www.dol.gov/EBSA/*. You may also call, toll-free, the Employee & Employer Hotline 1–866–444–EBSA (3272). To discuss substantive ERISA issues in connection with particular cases, please contact your local EBSA field office. The EBSA web site mentioned above includes a state-by-state list of phone numbers and addresses for these offices. Click on ''About EBSA/EBSA Offices.''

II. Description of the Exemption

The exemption provides retroactive and prospective relief from the restrictions of section 406(a)(1)(A), (B) and (D) of the Act and from the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A), (B) and (D) of the Code, for the following transactions, effective January 1, 1975:

(1) The release by the plan or by a plan fiduciary of a legal or equitable claim against a party in interest in exchange for consideration, given by, or on behalf of, a party in interest to the plan in partial or complete settlement of the plan's or the fiduciary's claim; and

(2) An extension of credit by a plan to a party in interest in connection with a settlement whereby the party in interest agrees to repay, over time, an amount owed to the plan in settlement of a legal or equitable claim by the plan or a plan fiduciary against the party in interest.

A. Conditions Applicable to All Transactions

The exemption is conditioned upon the existence of a genuine controversy involving the plan unless the case has been certified as a class action by the court. The Department believes that this condition is necessary to prevent the plan and parties in interest from engaging in a sham transaction purporting to fall within this class exemption, thus shielding a transaction, such as an extension of credit or other transaction with a party in interest, that would otherwise be prohibited.

The fiduciary that authorizes the settlement must have no relationship to, or interest in, any of the other parties involved in the litigation, other than the plan, that might affect its best judgment as a fiduciary. The Department intends a flexible standard for fiduciary independence, recognizing that the exemption will encompass a wide range of situations, both in terms of the type of litigation and the cost of pursuing such litigation. For example, in some instances where there are complex issues and significant amounts of money involved, it may be appropriate to hire an independent fiduciary having no prior relationship to the plan, its trustee, any parties in interest, or any other parties to the litigation. In other instances, the plan's current trustee or investment manager, assuming that fiduciary's conduct is not at issue, may be an appropriate party to make the decision on behalf of the plan as to whether to settle the litigation.

In response to comments received by the Department regarding the settlement of class action litigation in which the ability to negotiate may be limited, the Department eliminated the requirement that the settlement be ''negotiated'' by the fiduciary. In lieu of this requirement, the exemption provides that the fiduciary may authorize a settlement if its terms and conditions are no less favorable to the plan than comparable arm's-length terms and conditions that would have been agreed to by unrelated parties under similar circumstances.

The exemption is conditioned upon the settlement being reasonable given the likelihood of full recovery, the costs and risks of litigation, and the value of claims foregone. The claims foregone may include additional causes of action not available to the other plaintiffs in the same case. For example, where shareholders have brought a class action securities fraud case against the Company and its officers, the Company's employee benefit plan or the trustee, as the holder of record, may be named as a member of the class because it holds employer securities. The plan or trustee may also have ERISA claims against the Company and some or all of its officers, as well as against other parties. Before entering into a settlement with any defendant, the plan fiduciary should consider the value of these additional claims against that defendant. The plan fiduciaries may also be able to pursue claims against defendants not named in the securities fraud case, including knowing participants in the breach. Under certain circumstances, the plan will have additional sources of recovery, including fiduciary liability insurance, the plan's fidelity bond, and the personal assets of the defendants, including their own employee benefit plan accounts.[7]

The exemption also provides that the settlement must not be part of an agreement, arrangement, or understanding designed to benefit a party in interest. The intent of this condition is not to deny direct benefits to other parties to a transaction but, rather, to exclude transactions that are part of a broader overall agreement, arrangement or understanding designed to benefit parties in interest.

Where a settlement includes an extension of credit by a plan to a party in interest for purposes of repaying an amount owed in settlement of litigation, the exemption requires that the credit terms be reasonable. Fiduciaries must consider the creditworthiness of the party in interest and the time value of money in evaluating extensions of credit to settle litigation. The settling fiduciary should also consider security for such loans, such as a third party guarantee or letter of credit, to protect against default.

The Department has added a new condition which clarifies that this class exemption does not cover those transactions that are described in PTE 76–1, A.I. (41 FR 12740, March 26, 1976, as corrected, 41 FR 16620, April 20, 1976) (relating to delinquent employer contributions to multiemployer and multiple employer collectively bargained plans).

Finally, in response to a question received during the comment period, the Department has defined the terms ''employee benefit plan'' and ''plan'' to include an employee benefit plan described in section 3(3) of ERISA and/or plans as defined in section 4975(e)(1) of the Code.

B. Conditions Applicable to Prospective Transactions

On a prospective basis, the existence of a genuine controversy must be determined by an attorney retained to advise the plan unless the case has been certified as a class action by the court. That attorney must be independent of the other parties to the litigation. All terms of the settlement must be specifically described in a written agreement or consent decree and the fiduciary authorizing the settlement must acknowledge its fiduciary status in writing.

The exemption provides that in certain instances assets, other than cash,

[7] Section 206(d)(4) of the Act permits a plan to offset the benefits of a participant under an employee pension plan against an amount that the participant is ordered or required to pay, if the order or requirement to pay arises under a judgment of conviction of a crime involving the plan, a civil judgment, including a consent order or decree, entered into by a court, or where there is a settlement agreement between the participant and the Secretary of Labor or the PBGC in connection with a violation of Part IV of ERISA.

may be received by the plan from a party in interest. Assets may be received by the plan if necessary to rescind transactions. The conditions for retroactive relief do not specify the nature of the consideration exchanged for the release. On a prospective basis, securities with a generally recognized market may be exchanged for the release, provided that such securities can be objectively valued. In addition, the contribution of additional qualifying employer securities is permitted in settlement of the dispute involving such qualifying employer securities. Where assets, other than cash, are provided to the plan in exchange for a release, such assets must be specifically described in the written settlement agreement and valued at their fair market value as determined in accordance with section 5 of the Voluntary Fiduciary Correction (VFC) Program (67 FR 15062 March 28, 2002). The final exemption also provides that the settlement may also include a written agreement to: make future contributions, adopt amendments to the plan, or provide additional employee benefits.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties with respect to the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code, and based upon the entire record, the Department finds that the exemption is administratively feasible, in the interests of the plans and their participants and beneficiaries, and protective of the rights of participants and beneficiaries of such plans;

(3) The exemption is applicable to a particular transaction only if the conditions specified in the class exemption are met; and

(4) The exemption is supplemental to, and not in derogation of, any other provisions of the Code and the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990.)

Section I. Covered Transactions

Effective January 1, 1975, the restrictions of section 406(a)(1)(A), (B) and (D) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A), (B) and (D) of the Code, shall not apply to the following transactions, if the relevant conditions set forth in sections II through III below are met:

(a) The release by the plan or a plan fiduciary, of a legal or equitable claim against a party in interest in exchange for consideration, given by, or on behalf of, a party in interest to the plan in partial or complete settlement of the plan's or the fiduciary's claim.

(b) An extension of credit by a plan to a party in interest in connection with a settlement whereby the party in interest agrees to repay, over time, an amount owed to the plan in settlement of a legal or equitable claim by the plan or a plan fiduciary against the party in interest.

Section II. Conditions Applicable to All Transactions

(a) There is a genuine controversy involving the plan. A genuine controversy will be deemed to exist where the court has certified the case as a class-action.

(b) The fiduciary that authorizes the settlement has no relationship to, or interest in, any of the parties involved in the litigation, other than the plan, that might affect the exercise of such person's best judgment as a fiduciary.

(c) The settlement is reasonable in light of the plan's likelihood of full recovery, the risks and costs of litigation, and the value of claims foregone.

(d) The terms and conditions of the transaction are no less favorable to the plan than comparable arms-length terms and conditions that would have been agreed to by unrelated parties under similar circumstances.

(e) The transaction is not part of an agreement, arrangement, or understanding designed to benefit a party in interest.

(f) Any extension of credit by the plan to a party in interest in connection with the settlement of a legal or equitable claim against the party in interest is on terms that are reasonable, taking into consideration the creditworthiness of the party in interest and the time value of money.

(g) The transaction is not described in Prohibited Transaction Exemption (PTE) 76–1, A.I. (41 FR 12740, March 26, 1976, as corrected, 41 FR 16620, April 20, 1976) (relating to delinquent employer contributions to multiemployer and multiple employer collectively bargained plans).

Section III. Prospective Conditions

In addition to the conditions described in section II, the following conditions apply to the transactions described in section I (a) and (b) entered into after January 30, 2004:

(a) Where the litigation has not been certified as a class action by the court, an attorney or attorneys retained to advise the plan on the claim, and having no relationship to any of the parties, other than the plan, determines that there is a genuine controversy involving the plan.

(b) All terms of the settlement are specifically described in a written settlement agreement or consent decree.

(c) Assets other than cash may be received by the plan from a party in interest in connection with a settlement only if:

(1) necessary to rescind a transaction that is the subject of the litigation; or

(2) such assets are securities for which there is a generally recognized market, as defined in ERISA section 3(18)(A), and which can be objectively valued. Notwithstanding the foregoing, a settlement will not fail to meet the requirements of this paragraph solely because it includes the contribution of additional qualifying employer securities in settlement of a dispute involving such qualifying employer securities.

(d) To the extent assets, other than cash, are received by the plan in exchange for the release of the plan's or the plan fiduciary's claims, such assets must be specifically described in the written settlement agreement and valued at their fair market value, as determined in accordance with section 5 of the Voluntary Fiduciary Correction (VFC) Program, 67 FR 15062 (March 28, 2002). The methodology for determining

fair market value, including the appropriate date for such determination, must be set forth in the written settlement agreement.

(e) Nothing in section III (c) shall be construed to preclude the exemption from applying to a settlement that includes a written agreement to: (1) Make future contributions; (2) adopt amendments to the plan; or (3) provide additional employee benefits.

(f) The fiduciary acting on behalf of the plan has acknowledged in writing that it is a fiduciary with respect to the settlement of the litigation on behalf the plan.

(g) The plan fiduciary maintains or causes to be maintained for a period of six years the records necessary to enable the persons described below in paragraph (h) to determine whether the conditions of this exemption have been met, including documents evidencing the steps taken to satisfy sections II (b), such as correspondence with attorneys or experts consulted in order to evaluate the plan's claims, except that:

(1) if the records necessary to enable the persons described in paragraph (h) to determine whether the conditions of the exemption have been met are lost or destroyed, due to circumstances beyond the control of the plan fiduciary, then no prohibited transaction will be considered to have occurred solely on the basis of the unavailability of those records; and

(2) No party in interest, other than the plan fiduciary responsible for record-keeping, shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by section 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (h) below;

(h)(1) Except as provided below in paragraph (h)(2) and notwithstanding any provisions of section 504(a)(2) and (b) of the Act, the records referred to in paragraph (g) are unconditionally available at their customary location for examination during normal business hours by—

(A) any duly authorized employee or representative of the Department or the Internal Revenue Service;

(B) any fiduciary of the plan or any duly authorized employee or representative of such fiduciary;

(C) any contributing employer and any employee organization whose members are covered by the plan, or any authorized employee or representative of these entities; or

(D) any participant or beneficiary of the plan or the duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in paragraph (h)(1)(B)–(D) shall be authorized to examine trade secrets or commercial or financial information which is privileged or confidential.

Section III. Definition

For purposes of this exemption, the terms ''employee benefit plan'' and ''plan'' refer to an employee benefit plan described in section 3(3) of ERISA and/or a plan described in section 4975(e)(1) of the Code.

Signed at Washington, DC this 24th of December, 2003.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–53,551]

Allegheny Ludlum Corporation, Brackenridge Works, Brackenridge, PA

Notice of Termination of Investigation Pursuant to Section 221 of the Trade Act of 1974, as amended, an investigation was initiated on November 17, 2003 in response to a petition filed by a company official on behalf of workers at Allegheny Ludlum Corporation, Brackenridge Works, Brackenridge, Pennsylvania.

The petitioning group of workers is covered by an earlier petition instituted on November 14, 2003 (TA–W–53,538) that is the subject of an ongoing investigation for which a determination has not yet been issued. Further investigation in this case would duplicate efforts and serve no purpose; therefore the investigation under this petition has been terminated.

Signed at Washington, DC this 19th day of November, 2003.

Linda G. Poole,

Certifying Officer, Division of Trade Adjustment Assistance.

EHV–Weidmann Industries, Inc., a Subsidiary of Wicor Americas, St. Johnsbury, Vermont; and Weidmann Systems International, Inc., St. Johnsbury, Vermont; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on November 25, 2002, applicable to workers of EHV–Weidmann Industries, Inc., a subsidiary of Wicor Americas, St. Johnsbury, Vermont. The notice was published in the **Federal Register** on December 23, 2002 (67 FR 78258).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of electrical insulation boards and components.

Information from the company shows that worker separations occurred at Weidmann Systems International, St. Johnsbury, Vermont a sister company of the subject firm. Workers at Weidmann Systems International, Inc. provide sales and customer services supporting the production of electrical insulation boards and components at the subject firm.

Based on these findings, the Department is amending the certification to include workers of Weidmann Systems International, Inc., St. Johnsbury, Vermont.

The intent of the Department's certification is to include all workers of EHV–Weidmann Industries, Inc., a subsidiary of Wicor Americas, St. Johnsbury, Vermont, who were adversely affected by increased imports.

The amended notice applicable to TA–W–42,222 is hereby issued as follows:

''All workers of EHV–Weidmann Industries, Inc., a subsidiary of Wicor Americas, St. Johnsbury, Vermont (TA–W–42,222) and Weidmann Systems International, Inc. St. Johnsbury, Vermont (TA–W–42,222A), who became totally or partially separated from employment on or after September 17, 2001, through November 25, 2004, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.''

BILLING CODE 4510–30–P

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review: Comment Request

September 22, 2004.

The Department of Labor (DOL) has submitted the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35). A copy of each ICR, with applicable supporting documentation, may be obtained by contacting the Department of Labor (DOL). To obtain documentation, contact Darrin King on 202–693–4129 (this is not a toll-free number) or email: *king.darrin@dol.gov*.

Comments should be sent to Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Mine Safety and Health Administration (MSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, 202–395–7316 (this is not a toll-free number), within 30 days from the date of this publication in the **Federal Register**.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Agency: Mine Safety and Health Administration.

Type of Review: Extension of currently approved collection.

Title: Record of Results of Examinations of Self-Rescuers (Underground Coal Mines).

OMB Number: 1219–0044.

Frequency: Quarterly.

Type of Response: Recordkeeping.

Affected Public: Business or other for-profit.

Number of Respondents: 773.

Number of Annual Responses: 143,592.

Estimated Time Per Response: 30 minutes to certify and document that an examination was conducted and 1 minute to document why a device was taken out of service.

Total Burden Hours: 71,748.

Total Annualized capital/startup costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: Title 30, CFR 75.1714–3(b), (c), (d), and (e) require that self-rescuers be examined regularly at intervals not to exceed 90 days by a qualified person who certifies by date and signature that the tests were conducted. A record must be made when a self-rescue device is removed from service and when corrective action is taken as a result of the examination. The records are used as an enforcement tool to insure that the devices have been examined and are maintained in operable and usable condition.

Agency: Mine Safety and Health Administration.

Type of Review: Extension of currently approved collection.

Title: Escape and Evacuation Plans 30 CFR 57.11053.

OMB Number: 1219–0046.

Frequency: On occasion and semi-annually.

Type of Response: Recordkeeping and Third party disclosure.

Affected Public: Business or other for-profit.

Number of Respondents: 243.

Number of Annual Responses: 486.

Estimated Time Per Response: 8.5 hours.

Total Burden Hours: 4,131.

Total Annualized capital/startup costs: $0.

Total Annual Costs (operating/maintaining systems or purchasing services): $0.

Description: Title 30 CFR 57.11053 requires the development of an escape and evacuation plan specifically addressing the unique conditions of each underground metal and nonmetal mine. Section 57.11053 also requires that revisions be made as mining progresses. The plan must be available to the inspector and conspicuously posted at locations convenient to all persons on the surface and underground. The information is prepared by the mine operator for use by miners, MSHA, and persons involved in rescue operations.

Darrin A. King,

Acting Departmental Clearance Officer.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[Prohibited Transaction Exemption 2004–16; Application No. D–11203]

Class Exemption for the Establishment, Investment and Maintenance of Certain Individual Retirement Plans Pursuant to a Mandatory Distribution

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This document contains a final class exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA) and from certain taxes imposed by the Internal Revenue Code of 1986 (the Code). The exemption permits a fiduciary of a plan who is also the employer maintaining the plan to establish, on behalf of its separated employees, an individual retirement plan at a financial institution which is the employer or an affiliate, in connection with a Mandatory Distribution, as defined herein. Relief also is provided for a plan fiduciary to select a proprietary product as the initial investment for such individual retirement plan. Finally, relief is provided for the receipt of certain fees by the Individual Retirement Plan Provider in connection with the establishment or maintenance of the individual retirement plan and the initial investment of the Mandatory Distribution. The class exemption affects plan sponsors, plan fiduciaries, Individual Retirement Plan Providers and individual retirement plan account holders.

EFFECTIVE DATE: The exemption is effective for Mandatory Distributions made on or after March 28, 2005.

FOR FURTHER INFORMATION CONTACT: Allison Padams Lavigne or Karen Lloyd, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Washington, DC 20210, at (202) 693–8540 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On March 2, 2004, the Department published a notice in the **Federal Register** (69 FR 9846[1]) of the pendency before the Department of a proposed class exemption from the restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of ERISA and from the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was published concurrently with the proposed Fiduciary Responsibility under the Employee Retirement Income Security Act of 1974 Automatic Rollover Safe Harbor to be promulgated at 29 CFR 2550.404a–2 (defined herein as ''Automatic Rollover Regulation''), which also was published on March 2, 2004 (69 FR 9899).

The Department proposed this class exemption on its own motion pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR 2570, Subpart B (55 FR 32836, August 10, 1990).[2] The notice gave interested persons an opportunity to comment or request a public hearing on the proposed exemption. Four comments were received by the Department regarding the proposed class exemption. No requests for a public hearing were received. Upon consideration of the comments received, the Department has determined to grant the proposed exemption subject to certain modifications. These modifications and the comments are discussed below.

[1] As corrected at 69 FR 11043 (March 9, 2004).

Executive Order 12866

Under Executive Order 12866, the Department must determine whether the regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. Pursuant to the terms of the Executive Order, it has been determined that this action is ''significant'' and therefore subject to review by the Office of Management and Budget (OMB). Accordingly, this action has been reviewed by OMB.

This final prohibited transaction class exemption is being published concurrently with a final regulation titled ''Fiduciary Responsibility under the Employee Retirement Income Security Act of 1974 Automatic Rollover Safe Harbor.'' The exemption permits plan fiduciaries that are also employers maintaining a pension plan to establish, for separated employees, individual retirement plans at financial institutions that are the employer or an affiliate, in connection with a Mandatory Distribution as that term is defined in this exemption. The exemption also permits plan fiduciaries to select a proprietary product as the initial investment for an individual retirement plan. Finally, the exemption provides relief from what would otherwise be a prohibited transaction for the receipt of certain fees by Individual Retirement Plan Providers in connection with the establishment or maintenance of the individual retirement plan and the initial investment of a Mandatory Distribution.

[2] Section 102 of Reorganization Plan No. 4 of 1978 generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

The modifications made to the exemption following the Department's consideration of comments received on both the proposed exemption and the proposed Automatic Rollover Regulation are described in detail in the discussion that follows this summary of costs and benefits. An overview of the economic impacts of those modifications is presented in this section.

In general, the costs and benefits that may accrue to fiduciaries have been described and quantified in connection with the economic impact of the final regulation describing the safe harbor for automatic rollovers of mandatory distributions also published in today's issue of the **Federal Register**. Although they are not separately identified, the fiduciaries of pension plans who are also employers maintaining the plan who would establish these individual retirement plans at a financial institution which is the employer or affiliate pursuant to this exemption are included within the estimates of affected plans and separated employees presented in the final regulation.

The estimates presented in the final regulation have been revised from the proposal to reflect the provision of the final rule with respect to the applicability of the safe harbor to mandatory distributions of $1,000 or less described in section 411(a)(11) of the Code, provided there is no affirmative distribution election by the participant and the fiduciary makes a rollover distribution into an individual retirement plan in accordance with the other conditions of the regulation, without regard to the fact that such a rollover is not described in section 401(a)(31) of the Code.

When the Department originally estimated the costs and benefits of the proposed regulation, which included the potential impact on the plans of financial institutions and affiliates that might make use of this exemption, the conditions of both the proposed regulation and the proposed exemption

provided that fees and expenses attendant to the individual retirement plan, other than establishment fees, could be charged only against the income earned by the individual retirement plan. This condition has not been modified in the final exemption. Although the condition has been revised in the final regulation, the change has no impact on the total estimated fees and expenses attendant to these individual retirement plans, regardless of whether they are established in accordance with the conditions of the regulation or exemption. This difference between the regulation and exemption with respect to this condition is expected to result in a difference in only the way in which fees and expenses are allocated between the individual retirement plan and the Individual Retirement Plan Provider. It is likely that the fees and expenses attendant to the individual retirement plan offered by the plan fiduciary or an affiliate will be allocated at least in part to the Individual Retirement Plan Provider due to the limitation on the amount that can be charged to the individual retirement plan. The likelihood of the provider incurring such a limit on the recovery of its cost is greater when rates of return are low.

Certain other costs may be allocated in connection with the conditions of the exemption to plan fiduciaries that select the proprietary products of an employer or an affiliate for investment of individual retirement plans, that would not be allocated to plan fiduciaries absent the prohibited transaction that would otherwise occur. Specifically, in connection with the acquisition of an Eligible Investment Product, section I(h) of the exemption provides that plan fiduciaries are not permitted to charge a sales commission to the individual retirement plans of their separated employees. Foregone sales commissions may result in costs in the form of a reduction in profit margin or an operating loss to some Individual Retirement Plan Providers.

The Department has no basis for estimating a wide array of factors that would affect costs, such as the amount of fees or expenses that might not be fully charged to the individual retirement plans, the extent to which plan fiduciaries will use one or more proprietary products, the number of accounts that could be rolled over into such products, or the lost income, if any, that may result from unpaid sales commissions. Therefore, the Department has not estimated a cost for these provisions of the exemption. However, fiduciaries are in no event required to make use of individual retirement plans offered by the plan fiduciary or an affiliate. In addition, many of the proprietary products permitted under the exemption generally do not charge a sales commission in connection with an initial purchase. In any case, it is likely that a plan fiduciary will use the individual retirement plans of itself or an affiliate, or a proprietary product for these individual retirement plans only if it is financially beneficial to do so, for example, as a way to retain deposits and increase earnings.

Paperwork Reduction Act

The final exemption permits a fiduciary of a pension plan that is also the employer maintaining the plan to establish, on behalf of its separated employees, an individual retirement plan at a financial institution that is the employer or an affiliate, in connection with a Mandatory Distribution. Relief is also being provided for a plan fiduciary to select a proprietary product as the initial investment for such an individual retirement plan. Finally, relief is provided for the receipt of certain fees by the Individual Retirement Plan Provider.

The exemption includes notice and recordkeeping requirements that are meant to inform separated employees and allow for verification by interested persons that the terms of the exemption have been met. Specifically, prior to an automatic rollover of a Mandatory Distribution, a plan fiduciary is required to notify a participant that the distribution may be rolled over into a proprietary investment selected by the plan fiduciary. Notification that a proprietary investment may be selected is to be provided in connection with a written explanation required under section 402(f) of the Code or in the plan's summary plan description or summary of material modifications thereto.

In the Department's view, neither alternative will result in a measurable burden. The additional information required to be included to meet this condition, though important, would require only a minor alteration to an existing disclosure. The fiduciary would also retain flexibility under the exemption as to the most efficient method of conveying the required information. As such, no burden for plan fiduciaries is expected to arise from the notice requirement in the exemption.

Similarly, because the records required to be maintained to enable verification of adherence to the conditions of the exemption would customarily be maintained as a part of usual business practices, this condition is not expected to impose a burden on Individual Retirement Plan Providers.

Accordingly, the Department has made no submission to OMB for approval of an information collection request in connection with the proposed or final exemption. Although the Department requested comments on any potential impact within the terms of the Paperwork Reduction Act of the notice and recordkeeping requirements of the exemption, no comments were received.

Discussion of Comments Received

The Department received four comments in response to the notice of proposed exemption. Additionally, the Department received a number of comments in connection with the proposed Automatic Rollover Regulation. Interested persons should refer to the final Automatic Rollover Regulation, published in this issue of the **Federal Register**, for discussion of these comments.

With respect to the proposed exemption, one commenter stated that the definition of Eligible Investment Product should not be limited to money market funds because such investments might not keep pace with inflation. The commenter asserted that a better safe harbor investment would be any diversified fund that invests in a substantial number of stocks and/or bonds. Another commenter asked that the definition of Eligible Investment Product be revised to include alternative default portfolio allocations for the assets, similar to what is permitted by the Internal Revenue Service (IRS) for automatic enrollments (*i.e.*, balanced funds). The same commenter suggested that the individual retirement plans should replicate the asset allocation that workers selected while in active employment. Upon consideration of the comments, the Department believes that given the nature and the amount of the automatic rollover, investments should be designed to minimize risk, preserve assets for retirement and maintain liquidity. Further, the Department does not believe that an investment strategy adopted by a participant while in a defined contribution plan would necessarily continue to be the appropriate strategy for the participant in the context of an automatic rollover, particularly given the small account balances covered under this exemption. Accordingly, the Department has determined not to modify the definition of ''Eligible Investment Product.''

One commenter on the proposed exemption requested that the dollar limit on accounts affected by the exemption be raised from $5,000 to $10,000, and that the $1,000 floor be

eliminated. The Department has determined to eliminate the $1,000 floor but retain the $5,000 limit.[3] In this regard, the Department has added a new section IV(i) to the exemption to define the term, ''Mandatory Distribution,'' which includes both an automatic rollover of a mandatory distribution described in section 401(a)(31)(B) of the Code and a mandatory distribution of one thousand dollars ($1,000) or less described in section 411(a)(11) of the Code.

Finally, a commenter asked that the Department address ''whether a credit union, or other 'Regulated Financial Institution' * * * can establish [individual retirement plans] at its own institution in order to satisfy the automatic rollover requirement with respect to distributions from qualified plans which it maintains for its own employees.'' The commenter also asked whether such credit union or ''Regulated Financial Institution'' could charge fees in connection with the establishment and maintenance of such individual retirement plans. The Department notes that the exemption currently permits a fiduciary of a plan to designate itself or an affiliate to provide an individual retirement plan and to receive fees in connection with the establishment and maintenance of the individual retirement plan, if the conditions of the exemption are met. Accordingly, a credit union or other ''Regulated Financial Institution'' may establish individual retirement plans for distributions from qualified plans it sponsors for its own employees, provided the credit union or ''Regulated Financial Institution'' meets the definition of Individual Retirement Plan Provider.[4]

The Department did not receive any comments on the proposed exemption regarding the amount of fees and expenses attendant to the individual retirement plan, including the investment of the assets thereof. However, the Department notes that such comments were received in connection with the parallel provisions of the proposed Automatic Rollover Regulation, and that the fee provisions of the final Automatic Rollover Regulation were revised in response to the commenters. Unlike the Automatic Rollover Regulation, the Department has determined to retain the condition of the exemption (section II(j)(2)) that limits fees and expenses other than establishment charges to the income earned by the individual retirement plan. The Department believes that the removal or modification of this requirement would increase the potential for self dealing. This situation presents potential violations of section 406(b) of the Act for which the Department is not prepared to provide additional relief. However, in accordance with the modifications made to the Automatic Rollover Regulation, the Department has revised the language of section II(j)(1). In the proposal, this condition stated that the fees and expenses attendant to the individual retirement plan could not exceed fees and expenses charged by the Individual Retirement Plan Provider for comparable individual retirement plans established for eligible rollover distributions that are not subject to the automatic rollover provisions of section 401(a)(31)(B) of the Code. As revised, the condition requires an Individual Retirement Plan Provider to charge fees and expenses that do not exceed the fees and expenses it charges to comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code. The Department has made the same revision to similar language in conditions II(e) and II(g).

Description of the Exemption

Section I of the exemption describes the transactions that are covered by the exemption. The plan fiduciary who provides the notice in section II(a) and meets the additional requirements described below would be able to be the Individual Retirement Plan Provider for its separated employees and to make an initial decision to invest the Mandatory Distribution in an investment product in which such plan fiduciary or its affiliate has an interest. Additionally, relief is provided for the receipt of fees by the Individual Retirement Plan Provider in connection with the establishment or maintenance of the individual retirement plan, and as a result of the investment of the Mandatory Distribution in an investment product in which the plan fiduciary or its affiliate has an interest.

Under the exemption, a plan fiduciary must, in connection with the written explanation provided pursuant to section 402(f) of the Code or in the plan's summary plan description or summary of material modifications thereto, notify the participant prior to the Mandatory Distribution that, absent his or her election, the Mandatory Distribution will be rolled over to an individual retirement plan provided by the plan fiduciary or an affiliate, and that the plan fiduciary may select its own proprietary investment as the initial investment of the Mandatory Distribution. In any case, the plan's summary plan description or summary of material modifications thereto will describe the plan's rollover provisions effectuating the requirements of sections 401(a)(31)(B) and 411(a)(11) of the Code.

The plan fiduciary must comply with the requirements of the Automatic Rollover Regulation. The term ''Automatic Rollover Regulation'' refers to the regulation promulgated by the Department at 29 CFR 2550.404a–2, which is published elsewhere in this issue of the **Federal Register**.

The plan fiduciary must be the employer, any of whose employees are covered by the plan from which the Mandatory Distribution is made, or an affiliate.

Under the exemption, the individual retirement plan must be established and maintained for the exclusive benefit of the account holder of the individual retirement plan, his or her spouse or their beneficiaries. Under section IV(a) of the exemption, the term individual retirement plan is defined in section 7701(a)(37) of the Code. Section 7701(a)(37) defines individual retirement plan as an individual retirement account described in section 408(a) of the Code and an individual retirement annuity described in section 408(b) of the Code. For purposes of this exemption, the term individual retirement plan shall not include an individual retirement plan which is an employee benefit plan covered by Title I of ERISA. *See* 29 CFR 2510.3–2(d).

The exemption requires that the terms of the individual retirement plan, including the fees and expenses for establishing and maintaining the individual retirement plan, be no less favorable than those available to comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code. The exemption further requires that all fees and expenses not be in excess of reasonable compensation within the meaning of section 4975(d)(2) of the Code. Corresponding service provider regulations under the Code provide guidance on the meaning of reasonable compensation under section 4975(d)(2). *See* 26 CFR 54.4975–6.

[3] For a further discussion of this issue, refer to the preamble to the final Automatic Rollover Regulation, published in this issue of the **Federal Register**.

[4] The Department notes that the term ''Regulated Financial Institution'' is defined in section IV(f) of the exemption and refers to the entity that can provide the initial investment product for the Mandatory Distribution. This term is separate from the term ''Individual Retirement Plan Provider,'' defined at section IV(d), which refers to the entity that may provide the individual retirement plan for the Mandatory Distribution.

Under the exemption, the individual retirement plan must be invested in an "Eligible Investment Product." Section IV(e) defines the term "Eligible Investment Product" to mean an investment product designed to preserve principal and provide a reasonable rate of return, whether or not such return is guaranteed, consistent with liquidity. For this purpose, the product must be offered by a Regulated Financial Institution and shall seek to maintain, over the term of the investment, the dollar value that is equal to the amount invested in the product by the individual retirement plan. Such term includes money market funds maintained by registered investment companies, and interest-bearing savings accounts and certificates of deposit of a bank or a similar financial institution. In addition, the term includes "stable value products" issued by a financial institution that are fully benefit-responsive to the individual retirement plan account holder, *i.e.*, that provide a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for liquidations or transfers initiated by the individual retirement plan account holder exercising his or her right to withdraw or transfer funds under the terms of an arrangement that does not include substantial restrictions to the account holder's access to the assets of the individual retirement plan.

The exemption would not apply to the initial investment transaction entered into by an individual retirement plan unless the Eligible Investment Product is offered by a Regulated Financial Institution. A Regulated Financial Institution is defined under the exemption as an entity that: (i) Is subject to state or federal regulation, and (ii) is a bank or savings association, the deposits of which are insured by the Federal Deposit Insurance Corporation; a credit union, the member accounts of which are insured within the meaning of section 101(7) of the Federal Credit Union Act; an insurance company, the products of which are protected by state guaranty associations; or an investment company registered under the Investment Company Act of 1940.

In addition, the exemption requires that the rate of return or the investment performance of the individual retirement plan investment(s) be no less favorable than the rate of return or investment performance of an identical investment that could have been made at the same time by a comparable individual retirement plan established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code.

The exemption does not permit the individual retirement plan to pay a sales commission in connection with the acquisition of an Eligible Investment Product.

Under the exemption, the individual retirement plan account holder must be able to, within a reasonable time after request and without penalty to the principal amount of the investment, transfer his individual retirement plan balance to a different investment offered by the Individual Retirement Plan Provider, or transfer his or her individual retirement plan balance to another individual retirement plan sponsored at a different financial institution. The Department wants to ensure that, once the account holder discovers that an individual retirement plan has been established on his or her behalf, he or she is able to make appropriate investment decisions with respect to the assets of the individual retirement plan or to change Individual Retirement Plan Providers without penalty.

Section II(j) of the exemption limits the fees that may be paid by the individual retirement plan, as follows: (1) The fees and expenses attendant to the individual retirement plan, including the investment of the assets of such plan, (*e.g.*, establishment charges, maintenance fees, investment expenses, termination costs, and surrender charges) shall not exceed the fees and expenses charged by the Individual Retirement Plan Provider for comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code; (2) the fees and expenses, other than establishment charges, attendant to the individual retirement plan, may be charged only against the income earned by the individual retirement plan; and (3) the fees and expenses shall not exceed reasonable compensation within the meaning of section 4975(d)(2) of the Code. In this regard, an Individual Retirement Plan Provider who has not previously offered comparable individual retirement plans will not be able to satisfy condition II(j)(1) of the exemption.

Lastly, the exemption contains a recordkeeping requirement. The Individual Retirement Plan Provider must maintain records to enable certain persons to determine whether the applicable conditions of the exemption have been met. The records must be available for examination by the IRS, the Department, and account holders and their beneficiaries for at least six years from the date of each automatic rollover.

General Information

The attention of interested persons is directed to the following:

(1) In accordance with section 408(a) of ERISA and section 4975(c)(2) of the Code, the Department finds that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of such plan;

(2) The exemption is supplemental to, and not in derogation of, any other provisions of ERISA and the Code including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction;

(3) The exemption does not extend to transactions prohibited under section 406(b)(3) of ERISA and section 4975(c)(1)(F) of the Code; and

(4) The class exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the exemption.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990).

I. Transactions

The restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to (i) the fiduciary of an Employee Pension Benefit Plan (plan) using its authority to designate itself or an affiliate as Individual Retirement Plan Provider to receive a Mandatory Distribution, (ii) the initial investment of the Mandatory Distribution by the plan fiduciary in an investment product in which the plan fiduciary or its affiliate has an interest, (iii) the receipt of fees by the Individual Retirement Plan Provider in connection with the establishment or maintenance of the individual retirement plan, and (iv) the receipt of investment fees by the Individual Retirement Plan Provider or an affiliate as a result of the initial investment of the Mandatory Distribution in an investment product in which the plan fiduciary or an affiliate

has an interest, provided that the conditions set forth in sections II and III are satisfied.

II. Conditions

(a) In connection with the written explanation provided to the separating participant pursuant to section 402(f) of the Code, or in the plan's summary plan description or summary of material modifications thereto, the plan fiduciary notifies the participant that, absent his or her election, the Mandatory Distribution will be rolled over to an individual retirement plan offered by the plan fiduciary or an affiliate, and that the plan fiduciary may select its own proprietary investment for the initial investment of the Mandatory Distribution.

(b) The requirements of the Automatic Rollover Regulation are met.

(c) The plan fiduciary is the employer any of whose employees are covered by the plan from which the Mandatory Distribution is made, or an affiliate.

(d) The individual retirement plan is established and maintained for the exclusive benefit of the individual retirement plan account holder, his or her spouse or their beneficiaries.

(e) The terms of the individual retirement plan, including the fees and expenses for establishing and maintaining the individual retirement plan, are no less favorable than those available to comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code.

(f) The Mandatory Distribution is invested in an Eligible Investment Product(s), as defined in section IV(e).

(g) The rate of return or the investment performance of the individual retirement plan investment(s) is no less favorable than the rate of return or investment performance of an identical investment(s) that could have been made at the same time by comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code.

(h) The individual retirement plan does not pay a sales commission in connection with the acquisition of an Eligible Investment Product.

(i) The individual retirement plan account holder may, within a reasonable period of time after his or her request and without penalty to the principal amount of the investment, transfer his individual retirement plan balance to a different investment offered by the Individual Retirement Plan Provider, or transfer his individual retirement plan balance to an individual retirement plan sponsored at a different financial institution.

(j)(1) Fees and expenses attendant to the individual retirement plan, including the investment of the assets of such plan, (*e.g.*, establishment charges, maintenance fees, investment expenses, termination costs, and surrender charges) shall not exceed the fees and expenses charged by the Individual Retirement Plan Provider for comparable individual retirement plans established for reasons other than the receipt of a Mandatory Distribution made pursuant to section 401(a)(31)(B) of the Code;

(2) Fees and expenses attendant to the individual retirement plan, with the exception of establishment charges, may be charged only against the income earned by the individual retirement plan; and

(3) Fees and expenses are not in excess of reasonable compensation within the meaning of section 4975(d)(2) of the Code.

(k) The present value of the nonforfeitable accrued benefit, as determined under section 411(a)(11) of the Code, does not exceed the maximum amount required to be rolled over under section 401(a)(31)(B) of the Code.

III. Recordkeeping

(a) The Individual Retirement Plan Provider maintains or causes to be maintained for a period of six (6) years from the date of each Mandatory Distribution the records necessary to enable the persons described in paragraph (b) of this section to determine whether the applicable conditions of this exemption have been met. Such records must be readily available to assure accessibility by the persons identified in paragraph (b) of this section.

(b) Notwithstanding any provisions of section 504(a)(2) and (b) of the Act, the records referred to in paragraph (a) of this section are unconditionally available at their customary location for examination during normal business hours by—

(1) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service; and

(2) Any account holder of an individual retirement plan established pursuant to this exemption, or any duly authorized representative of such account holder.

(c) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the Individual Retirement Plan Provider, the records are lost or destroyed prior to the end of the six-year period, and no party in interest other than the Individual Retirement Plan Provider shall be subject to the civil penalty that may be assessed under section 502(i) of ERISA or to the taxes imposed by sections 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (b).

IV. Definitions

(a) The term ''individual retirement plan'' means an individual retirement plan described in section 7701(a)(37) of the Code. For purposes of this exemption, the term individual retirement plan shall not include an individual retirement plan which is an employee benefit plan covered by Title I of ERISA.

(b) The term ''Employee Pension Benefit Plan'' refers to an employee pension benefit plan defined in ERISA section 3(2)(A).

(c) The term ''Automatic Rollover Regulation'' refers to the regulation promulgated by the Department at 29 CFR 2550.404a–2.

(d) The term ''Individual Retirement Plan Provider'' means an entity that is eligible to serve as an individual retirement account trustee under section 408(a)(2) of the Code, or for purposes of an individual retirement annuity described in section 408(b) of the Code, an insurance company which is qualified to do business under the law of the jurisdiction in which the annuity contract, or endowment contract (described in 26 CFR 1.408–3(e)), is sold.

(e) The term ''Eligible Investment Product'' means an investment product designed to preserve principal and provide a reasonable rate of return, whether or not such return is guaranteed, consistent with liquidity. For this purpose, the product must be offered by a Regulated Financial Institution and shall seek to maintain, over the term of the investment, the dollar value that is equal to the amount invested in the product by the individual retirement plan. Such term includes money market funds maintained by registered investment companies, and interest-bearing savings accounts and certificates of deposit of a bank or similar financial institution. In addition, the term includes ''stable value products'' issued by a financial institution that are fully benefit-responsive to the individual retirement plan account holder, *i.e.*, that provide a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for

liquidations or transfers initiated by the individual retirement plan account holder exercising his or her right to withdraw or transfer funds under the terms of an arrangement that does not include substantial restrictions to the account holder's access to the individual retirement plan's assets.

(f) The term ''Regulated Financial Institution'' means an entity that: (i) Is subject to state or federal regulation, and (ii) is a bank or savings association, the deposits of which are insured by the Federal Deposit Insurance Corporation; a credit union, the member accounts of which are insured within the meaning of section 101(7) of the Federal Credit Union Act; an insurance company, the products of which are protected by state guaranty associations; or an investment company registered under the Investment Company Act of 1940.

(g) An ''affiliate'' of a person includes:

(1) Any person directly or indirectly controlling, controlled by, or under common control with, the person; or

(2) Any officer, director, partner or employee of the person;

(h) The term ''control'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(i) The term ''Mandatory Distribution'' means the automatic rollover of a mandatory distribution described in section 401(a)(31)(B) of the Code, or a mandatory distribution of one thousand dollars ($1,000) or less described in section 411(a)(11) of the Code provided there is no affirmative distribution election by the participant.

Signed at Washington, DC, this 20th day of September, 2004.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

Department of Labor

Employee Benefits Security Administration

Class Exemption for Services Provided in Connection With the Termination of Abandoned Individual Account Plans; Notice

DEPARTMENT OF LABOR

Employee Benefits Security Administration

[ZRIN 1210–ZA05; Prohibited Transaction Exemption 2006–06; Application No. D–11201]

Class Exemption for Services Provided in Connection With the Termination of Abandoned Individual Account Plans

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Grant of class exemption.

SUMMARY: This document contains a final exemption from certain prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from certain taxes imposed by the Internal Revenue Code of 1986, as amended (the Code). The exemption permits a ''qualified termination administrator'' (QTA) of an individual account plan that has been abandoned by its sponsoring employer to select itself or an affiliate to provide services to the plan in connection with the termination of the plan, to pay itself or an affiliate fees for those services, and to pay itself for services provided prior to the plan's deemed termination. The exemption also permits a qualified termination administrator of an abandoned plan to: (1) Designate itself or an affiliate as the provider of an individual retirement plan or other account for the distribution of a participant or beneficiary who fails to make an election regarding the disposition of such benefits; (2) select a proprietary investment product as the initial investment for such plan or account; (3) provide a federally insured bank or savings association account for small distributions; and (4) pay itself or its affiliate fees in connection therewith. This exemption is being granted in connection with the Department's final regulation at 29 CFR 2578.1, relating to the Termination of Abandoned Individual Account Plans, the Department's final regulation at 29 CFR 2550.404a–3, relating to the Safe Harbor for Distributions From Terminated Individual Account Plans, and the Department's final regulation at 29 CFR 2520.103–13, relating to the Terminal Report for Abandoned Individual Account Plans, which are being published simultaneously in this issue of the **Federal Register**. The exemption will affect individual account plans, the participants and beneficiaries of such plans, certain plan service providers, and the fiduciaries of such plans.

DATES: *Effective Date:* The class exemption is effective May 22, 2006.

FOR FURTHER INFORMATION CONTACT: Brian Buyniski, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, Washington, DC 20210, (202) 693–8545. This is not a toll free number.

SUPPLEMENTARY INFORMATION: On March 10, 2005, the Department published a notice in the **Federal Register** (70 FR 12074) of the pendency of a proposed class exemption from the restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and (b)(2) of the Act and from the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The Department proposed the class exemption on its own motion pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).[1]

The notice of pendency gave interested persons an opportunity to comment or request a public hearing on the proposal. Five (5) public comments were received by the Department. No requests for a public hearing were received. Upon consideration of the comments received, the Department has determined to grant the proposed class exemption subject to certain modifications. These modifications and the comments are discussed below.

Executive Order 12866

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. It has been determined that this exemption is significant for ''raising novel policy issues'' under section 3(f)(4) of the Executive Order. Accordingly, the exemption has been reviewed by OMB.

This exemption is being published simultaneously with a group of three regulatory actions (the Abandoned Plan Regulations) that are also being issued in final form. In the Department's view, the conditional relief provided by the exemption is necessary in order to effectuate the purposes underlying the Abandoned Plan Regulations. Accordingly, the Department's basic statement regarding the economic benefits and costs of encouraging efficient, effective termination of abandoned plans, which is described in detail in the preamble to the Abandoned Plan Regulations, published elsewhere in this issue of the **Federal Register**, applies equally to this exemption. The following provides more specific analysis of the exemption and its specific economic costs and benefits.

The purpose of the Abandoned Plan Regulations is to facilitate the orderly, efficient termination of abandoned individual account plans in order to give participants and beneficiaries of those plans access to the amounts held in their individual accounts, which are frequently unavailable to them because of the abandonment. The relief provided by the exemption facilitates this goal by permitting a QTA, under the conditions of the exemption, to select itself or an affiliate to provide services to the plan, to pay itself or an affiliate fees for those services, and to pay itself fees for services provided prior to the plan's deemed termination, in connection with terminating the abandoned plan. Without the availability of the exemptive relief, QTAs and their affiliates would be unable to use plan assets as a source of compensation for their services; since those plan assets are usually the only available source of payment, QTAs would be highly unlikely to undertake abandoned plan terminations.

The exemption also permits a QTA to designate itself or an affiliate as the provider of an individual retirement plan or other account for distributions of benefits for which the participant or beneficiary has failed to make an election; select a proprietary investment product as the initial investment for the distributed benefits of a participant or

[1] Section 102 of Reorganization Plan No. 4 of 1978, 5 U.S.C. App. 1 (1996) generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor.

For purposes of this exemption, references to specific provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

beneficiary of a terminated plan who fails to make an election regarding the disposition of such benefits; provide federally insured bank or savings association accounts for small distributions of such benefits; and pay itself or its affiliate in connection with such distributions. By removing the barrier to use of proprietary or affiliated investment vehicles for distributions for which the participant or beneficiary has failed to make investment decisions, the exemption facilitates the winding-up of abandoned plan terminations. Because some proportion of the participants or beneficiaries in virtually every termination of an abandoned plan will fail to make decisions regarding the disposition of their benefits, QTAs will need to make distribution decisions for those benefits. Allowing QTAs to use their own or affiliated investment products to receive the distributions will accelerate and simplify the orderly termination and winding-up of a plan's affairs.

The exemption imposes certain conditions on use of proprietary or affiliated investments, including (1) the condition that fees other than establishment fees and expenses attendant to an individual retirement plan or account may be charged only against the income earned by the individual retirement plan or account and (2) the condition that no sales commissions may be imposed in connection with acquiring an Eligible Investment Product. The exemption also conditions relief for payment for services provided prior to a plan's deemed termination on the services' being provided in good faith pursuant to a written agreement and the QTA's providing the Department with a copy of the written agreement and a statement under penalty of perjury that such services were actually performed.

In response to comments on the proposed regulations concerning the limitations on fees, the Department has revised one of the Abandoned Plan Regulations (the QTA Regulation, discussed below under ''Discussion of Comments Received'') to permit QTAs to transfer certain small accounts to bank or savings association accounts or the unclaimed property fund of the relevant state, but has determined not to make further changes in the conditions imposed on transactions under the exemption. The Department believes that these conditions, which shape the transactions for which relief will be available, are justified by the protection they provide to participants and beneficiaries.

The conditions appropriately limit the extent to which a QTA may pay itself or its affiliate. Although the conditions restrict the fees that QTAs and their affiliates may receive for their services, they protect against potential self-dealing and depletion of account balances. In these circumstances, the fee limitations substitute for an independent fiduciary's assessment of the value of using products or services of the QTA or its affiliate. Further, QTAs are not required to make use of proprietary or affiliated individual retirement plans or accounts, but are merely permitted by the exemption to choose voluntarily whether to do so. The Department believes that the fee limitations will encourage a QTA to make decisions regarding whether to use its own or an affiliate's individual retirement plans or accounts and investment products based not on the availability of a pool of assets for payment of fees, but on whether it will be in the best interests of the participants and beneficiaries to do so.

Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department of Labor conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA 95) (44 U.S.C. 3506(c)(2)(A)). This helps to ensure that respondents will be able to provide the requested data in the desired format; that the public understands the Department's collection instruments; that the Department minimizes the reporting burden it imposes, both in time and financial resources; and that the Department properly assesses the impact of its collection requirements on respondents.

Because QTAs that rely on the exemption are required, as a condition for the relief, to comply with the requirements of the Abandoned Plan Regulations, published elsewhere in this issue of the **Federal Register**, the Department has combined the paperwork burden arising from the exemption with the paperwork burden attributable to the Abandoned Plan Regulations, including specifically the QTA Regulation, the Safe Harbor for Distributions From Terminated Individual Account Plans, and the Terminal Report for Abandoned Individual Account Plans, under one Information Collection Request (ICR). By combining these collections of information, the Department believes that the general public will gain a better understanding of the burden impact as it relates to terminating plans. The specific burden for the exemption includes a recordkeeping requirement for a QTA that terminates an abandoned plan and chooses to distribute the account balances of missing or nonresponsive participants into proprietary or affiliated individual retirement plans or accounts and a reporting requirement for a QTA that intends to pay itself for services provided to a plan prior to its deemed termination. The reporting requirement includes submitting to the Department a copy of the written agreement under which the services were provided, together with a representation, under penalty of perjury, that the services for which reimbursement is sought were in fact rendered. The hour and cost burdens for the ICR are described more fully in the preamble to the Abandoned Plan Regulations under the section on the Paperwork Reduction Act.

Discussion of Comments Received

The Department received five comment letters regarding the proposed class exemption.[2] Additionally, the Department received a number of comments in connection with the regulation relating to the Termination of Abandoned Individual Account Plans (the QTA Regulation) and the regulation relating to the Safe Harbor for Distributions from Terminated Individual Account Plans (the Safe Harbor Regulation). Interested persons should refer to these regulations, published elsewhere in this issue of the **Federal Register**, for a discussion of those comments.

The Department received several comments regarding the fees associated with the establishment of an account for participants and beneficiaries who fail to provide direction as to the disposition of their account balances. Two commenters requested that the Department eliminate the requirement in section III(i)(2) of the proposed exemption that fees and expenses attendant to the individual retirement plan or other account, with the exception of establishment charges, may be charged only against the income earned by the individual retirement plan or other account.

The Department recognizes that the fee limitations in the class exemption may serve as a disincentive to a QTA providing an individual retirement plan for distributions from abandoned

[2] The Department received one request for a public hearing which was subsequently withdrawn by the commenter after the Department informed the commenter that the issues raised in the comment letter would be addressed in the final exemption.

individual account plans, particularly with respect to accounts with small balances.[3] In such cases, the QTA Regulation permits the distribution to be made to an interest-bearing federally insured bank account in the name of the participant or beneficiary, to the unclaimed property fund of the state in which the participant's or beneficiary's last known address is located, or to an individual retirement plan provided by an unrelated financial institution. In light of this modification to the QTA Regulation, the Department does not believe that further relief is warranted. However, the Department has determined to modify the final exemption to provide relief for a QTA (or its affiliate) that is a provider of an interest-bearing, federally insured bank or savings association account, to designate itself or its affiliate as provider of such an account for the distribution of the account balances of participants or beneficiaries who do not provide direction as to the disposition of such balances, and to receive fees in connection with the establishment and maintenance of such accounts for distributions $1,000 or less.

A commenter also requested that the Department clarify that a one-time closing fee would be treated the same as an establishment fee which, under the exemption, is not limited to the amount of income earned by the account. The Department continues to believe that only establishment fees may be charged against the principal balance of the account. All other fees, including termination costs, can only be charged against the income earned.

The commenter further requested that the Department clarify whether an IRA owner's ability to transfer his or her account to a different institution must be made without penalty to principal. Section III(h) of the proposed exemption provided that the IRA owner may, within a reasonable period of time after his or her request and without penalty to the principal amount of the investment, transfer his or her account balance to a different investment offered by the QTA or its affiliate. The commenter asked for clarification of how this rule would apply if the transfer was made to a different financial institution. In response to this comment, the Department does not believe that a participant who determines to transfer his or her account balance to a different financial institution should be faced with a penalty deducted from the principal amount of the investment. Thus, the final exemption has been clarified to provide that the IRA owner must be able to transfer his or her account balance to a different financial institution without penalty to the principal.

Several comments addressed the definitions contained in section V of the proposed exemption. One commenter recommended that the definition of ''Eligible Investment Product'' be expanded to permit investments in lifestyle, retirement date and other balanced fund options. The commenter stated that these options are designed for long-term investors who choose not to actively manage their accounts. The Department notes that, given the nature of the accounts governed by this exemption, investments should be designed to minimize risk, preserve assets for retirement and maintain liquidity until the IRA owner becomes available to take control of his or her account. Accordingly, the Department has determined not to expand the definition of ''Eligible Investment Product'' as requested.

Several commenters requested expansion of the definition of QTA in the Regulation, as well as certain related changes to the class exemption. For reasons more fully set forth in the QTA Regulation, the Department has determined not to expand the definition of QTA. In light of the determination not to modify this final definition under the QTA Regulation, no changes have been made to the class exemption.

As proposed, the class exemption permitted a QTA to select itself to furnish services to the plan in its capacity as a QTA, and to pay itself for those services. It was suggested to the Department that the final exemption also should permit a QTA to pay itself for services rendered prior to becoming a QTA. Such services may have been rendered in connection with a determination of plan abandonment under the QTA Regulation or pursuant to an existing written contract previously entered into with the plan sponsor or other independent fiduciary prior to the time the service provider became the plan's QTA.

After considering the issues, the Department has expanded the class exemption to permit a QTA to pay itself for services rendered before becoming a QTA. In this regard, the exemption applies to two scenarios involving the payment of fees. First, the exemption permits the payment for services provided pursuant to the terms of a written contract previously entered into with the plan sponsor, or other independent fiduciary. This modification recognizes that a service provider might be viewed as exercising authority or control with respect to the disposition of a plan's assets, and therefore acting as a fiduciary, when paying itself fees from plan assets for services under circumstances where the service provider knows that there is no plan fiduciary monitoring plan services or otherwise responsible for the management of the plan, as would be the case in a plan that is determined to have been abandoned by the plan sponsor. Second, the exemption also permits payment for services that were not provided pursuant to a written contract, but were rendered in connection with a determination of plan abandonment under the QTA Regulation. Such services will generally take place prior to the service provider becoming a QTA.

One commenter on the QTA Regulation requested clarification on how a QTA would be able to effect a distribution on behalf of a missing or non-responsive participant in circumstances when the benefit payable is subject to the Code's survivor annuity requirements. The Department has modified the final QTA Regulation by adding a provision that provides that if a QTA determines that the survivor annuity requirements in section 401(a)(11) and 417 of the Code prevent a distribution in accordance with the Safe Harbor Regulation, the QTA shall distribute benefits in any manner reasonably determined to achieve compliance with the survivor annuity requirements of the Code.

Although the commenter did not request exemptive relief for the purchase of annuity contracts from the QTA or an affiliate, it does not foreclose future consideration of additional exemptive relief if the requisite findings under section 408(a) of the Act can be made. Specifically, the Department is interested in information with regard to the types of products that are currently available in the marketplace to annuitize benefits, and the standards and safeguards that the Department would include in an exemption for the purchase of such annuities.

Description of the Exemption

The class exemption has five sections. Section I describes the transactions that are covered by the exemption. Section II contains conditions for the provision of termination services and the receipt of fees. Section III contains the conditions for distributions. Section IV contains the general recordkeeping provisions imposed on the QTA, and section V contains definitions.

Under section I(a), relief is provided from the restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and

[3] See the Safe Harbor Regulation at 2550.404a–3 at d(1)(iii).

406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, for a ''qualified termination administrator'' (QTA) within the meaning of section V(a) of the exemption to use its authority in connection with the termination of an abandoned individual account plan to select itself or an affiliate to provide services to the plan, to receive fees for services provided as a QTA, and to pay itself fees for services provided to the plan prior to the deemed termination of the plan.

Section I(b) of the exemption provides relief from the restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and 406(b)(2) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, for a QTA to use its authority in connection with the termination of an abandoned individual account plan to designate itself or an affiliate as provider of an individual retirement plan or other account to receive the account balance of a participant that does not provide direction as to the disposition of such assets. The other accounts authorized by the exemption include an account, other than an individual retirement account, as described in section (d)(1)(ii) of the Safe Harbor Regulation, for a distribution made to a distributee other than a participant or spouse, and an interest-bearing, federally insured bank or savings association account for distributions of less than $1,000, as described in section (d)(1)(iii) of the Safe Harbor Regulation.

Section I(b) of the class exemption further permits the QTA to make the initial investment of the distributed proceeds in a proprietary investment product, receive fees in connection with the establishment or maintenance of the individual retirement plan or other account, and receive investment fees as a result of the investment of the individual retirement plan or other account's assets in a proprietary investment product in which the QTA or an affiliate has an interest.

Section II of the exemption describes the conditions that apply to a transaction described in section I(a) of the exemption. The QTA must comply with the requirements of the QTA Regulation, which is published elsewhere in this issue of the **Federal Register**. Additionally, the QTA is required to provide, in a timely manner, any other reasonably available information requested by the Department regarding the proposed termination.

Under the exemption, fees and expenses paid to the QTA and its affiliate must be consistent with industry rates for such or similar services, based on the experience of the QTA, and must not be in excess of rates charged by the QTA (or its affiliate) for the same or similar services provided to customers that are not individual account plans terminated pursuant to the QTA Regulation, if the QTA (or its affiliate) provides the same or similar services to such other customers. The reference to ''industry rates'' and ''based on the experience of the QTA'' are intended to enable a QTA who possesses knowledge about the services needed for a plan termination and industry rates for such or similar services, to engage or retain itself, an affiliate, and other service providers without going through a potentially timely and costly bidding process.

With respect to payment to the QTA for services provided to the plan prior to its deemed termination, the exemption provides relief in two situations. First, the exemption covers payment for services performed by a service provider pursuant to the QTA Regulation prior to the deemed termination of the plan and the service provider becoming a QTA. Such services will generally have been performed by the service provider in determining that a plan has been abandoned and in preparing the notice of plan abandonment as required by section (c)(3) of the QTA Regulation.

Second, the exemption covers payment for services provided in good faith pursuant to the terms of a written agreement prior to the service provider becoming a QTA. This includes services provided under a valid, unexpired contract, as well as the continuation of such services after the contract had expired. With respect to such services, the QTA must demonstrate to the Department, in its initial notification of plan abandonment (as required in section (c)(3) of the QTA Regulation), by a representation under penalty of perjury, that such services were actually performed. The QTA also must provide a copy of the executed contract between the QTA and the plan fiduciary or plan sponsor that authorized such services.

Section III contains conditions for transactions described in section I(b) of the exemption. In this regard, the conditions of the QTA Regulation must be met. In addition, the QTA must inform the participant or beneficiary in the notice required by section (d)(2)(vi) of the QTA Regulation that: (1) Absent his or her election within the 30-day period from receipt of the notice, the QTA will directly distribute the account balance of the participant or beneficiary to an individual retirement plan or other account offered by the QTA or its affiliate; and (2) the account balance may be invested in the QTA's own proprietary investment product, which is designed to preserve principal and provide a reasonable rate of return and liquidity.

The exemption also requires that the individual retirement plan or other account must be established and maintained for the exclusive benefit of the individual retirement plan or other account holder, his or her spouse or their beneficiaries.

The terms of the individual retirement plan or other account, including the fees and expenses for establishing and maintaining the individual retirement plan or other account, must be no less favorable than those available to comparable individual retirement plans or other accounts established for reasons other than the receipt of a distribution described in the QTA Regulation.

In addition, the exemption requires that, other than in the case of a bank or savings account described in section I(b)(1)(iii) of the exemption for distributions of less than $1,000, the distribution must be invested in an Eligible Investment Product, as defined in section V(c) of the exemption. The rate of return or the investment performance received by the individual retirement plan or other account from an investment product must be no less than that received by comparable individual retirement plans or other accounts that are not established pursuant to the QTA Regulation but are invested in the same product. For example, the rate of return received by the individual retirement plan for an investment in a one-year certificate of deposit which is an Eligible Investment Product cannot be less than the rate of return received by an individual retirement plan or other account established for reasons other than the receipt of a distribution that is invested in an identical one-year certificate of deposit.

The exemption does not permit the individual retirement plan or other account to pay a sales commission in connection with the acquisition of an Eligible Investment Product.

Under the exemption, the individual retirement plan or other account holder must be able, within a reasonable period of time after his or her request and without penalty to the principal amount of the investment, to transfer his or her individual retirement plan or other account balance to a different

investment offered by the QTA or its affiliate. Also, the individual retirement plan holder or other account holder must be able, within a reasonable period of time after his or her request and without penalty to the principal amount of the investment, to transfer his or her individual retirement plan or other account balance to a different financial institution not related to the QTA or its affiliate.

Under the exemption, fees and expenses attendant to the individual retirement plan or other account, including the investment of the assets of such plan or account, (e.g., establishment charges, maintenance fees, investment expenses, termination costs, and surrender charges) must not exceed the fees and expenses charged by the QTA for comparable individual retirement plans or other accounts established for reasons other than the receipt of a distribution made pursuant to the QTA regulation. Additionally, fees and expenses attendant to the individual retirement plan or other account, other than establishment charges, may be charged only against the income earned by the individual retirement plan or other account. Finally, fees and expenses shall not exceed reasonable compensation within the meaning of section 4975(d)(2) of the Code.

Section IV of the exemption contains a recordkeeping requirement. The QTA must maintain records to enable certain persons to determine whether the applicable conditions of the class exemption have been met. The records must be made available for examination by the IRS, the Department, and any account holder or duly authorized representative of such account holder of an individual retirement plan or other account, for at least six years from the date the QTA provides notice to the Department of its determination of plan abandonment and its election to serve as the QTA.

Lastly, section V of the exemption contains certain definitions. The term ''qualified termination administrator'' is defined in section V(a) as an entity that is eligible to serve as a trustee or issuer of an individual retirement plan within the meaning of section 7701(a)(37) of the Code and that holds the assets of the abandoned plan.

The term ''Eligible Investment Product'' is defined in section V(c) to mean an investment product designed to preserve principal and provide a reasonable rate of return, whether or not such return is guaranteed, consistent with liquidity. In this regard, the product must be offered by a Regulated Financial Institution as defined in section V(d) and must seek to maintain, over the term of the investment, a dollar value that is equal to the amount invested in the product by the individual retirement plan or other account. Such term includes money market funds maintained by registered investment companies and interest-bearing savings accounts and certificates of deposit of a bank or similar financial institution. In addition, the term includes stable value products issued by a financial institution that are fully benefit-responsive to the individual retirement plan or other account holder. For purposes of this class exemption, the term ''benefit responsive'' means a stable value product that provides a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for liquidations or transfers initiated by the individual retirement plan or other account holder exercising his or her right to withdraw or transfer funds under the terms of an arrangement that does not include substantial restrictions to the account holder's access to the individual retirement plan or other account assets.

The term ''Regulated Financial Institution'' is defined in section V(d) to mean an entity that: (i) Is subject to state or federal regulation, and (ii) is a bank or savings association, the deposits of which are insured by the Federal Deposit Insurance Corporation; a credit union, the member accounts of which are insured within the meaning of section 101(7) of the Federal Credit Union Act; an insurance company, the products of which are protected by state guaranty associations; or an investment company registered under the Investment Company Act of 1940.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which require, among other things, that a fiduciary discharge his duties with respect to the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act;

(2) In accordance with section 408(a) of the Act and section 4975(c)(2) of the Code, the Department finds that the exemption is administratively feasible, in the interests of plans and their participants and beneficiaries and protective of the rights of participants and beneficiaries of such plans;

(3) The exemption is applicable to a transaction only if the conditions specified in the exemption are met; and

(4) The exemption is supplemental to and not in derogation of any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR 2570, subpart B (55 FR 32836, 32847, August 10, 1990).

I. Covered Transactions

(a) The restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to a QTA, (as defined in section V(a) of this class exemption), using its authority in connection with the termination of an abandoned individual account plan pursuant to the Department's regulation at 2550.404a–3, relating to the Termination of Abandoned Individual Account Plans (the QTA Regulation) to:

(1) Select itself or an affiliate to provide services to the plan;

(2) Receive fees for the services performed as a QTA; and

(3) Pay itself fees for services provided to the plan prior to the deemed termination of the plan, provided that the conditions set forth in sections II and IV of this exemption are satisfied.

(b) The restrictions of sections 406(a)(1)(A) through (D), 406(b)(1) and 406(b)(2) of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to a QTA, using its authority in connection with the termination of an abandoned individual account plan pursuant to the QTA Regulation to:

(1) Designate itself or an affiliate as: (i) Provider of an individual retirement plan; (ii) provider of an account (other

than an individual retirement plan) under the limited circumstances described in section (d)(1)(ii) of the Safe Harbor Regulation for Terminated Plans (2550.404a–3) (Safe Harbor Regulation); or (iii) provider of an interest-bearing, federally insured bank or savings association account maintained in the name of the participant or beneficiary, in the case of a distribution described in section (d)(1)(iii) of the Safe Harbor Regulation, for the distribution of the account balance of the participant or beneficiary of the abandoned individual account plan who does not provide direction as to the disposition of such assets;

(2) Make the initial investment of the account balance of the participant or beneficiary in the QTA's or its affiliate's proprietary investment product;

(3) Receive fees in connection with the establishment or maintenance of the individual retirement plan or other account; and

(4) Pay itself or an affiliate investment fees as a result of the investment of the individual retirement plan or other account assets in the QTA's or its affiliate's proprietary investment product, provided that the conditions set forth in sections III and IV of this exemption are satisfied.

II. Conditions for Provision of Termination Services and Receipt of Fees in Connection Therewith

(a) The requirements of the QTA Regulation are met. The QTA provides, in a timely manner, any other reasonably available information requested by the Department regarding the proposed termination.

(b) Fees and expenses paid to the QTA, and its affiliate, in connection with the termination of the plan and the distribution of benefits:

(1) Are consistent with industry rates for such or similar services, based on the experience of the QTA, and

(2) Are not in excess of rates ordinarily charged by the QTA (or affiliate) for the same or similar services provided to customers that are not plans terminated pursuant to the QTA regulation, if the QTA (or affiliate) provides the same or similar services to such other customers.

(c) In the case of a transaction described in section I(a)(3):

(1) Such services: (i) Were performed in good faith pursuant to the terms of a written agreement executed prior to the service provider becoming a QTA, or (ii) were performed pursuant to the QTA Regulation; and

(2) The QTA, in the initial notification of plan abandonment described in section (c)(3) of the QTA Regulation: (i) Represents under penalty of perjury that such services were actually performed and (ii) in the case of section II(c)(1)(i) above, provides the Department with a copy of the executed contract between the QTA and a plan fiduciary or the plan sponsor that authorized such services.

III. Conditions for Distributions

(a) The conditions of the QTA Regulation are met.

(b) In connection with the notice to participants and beneficiaries described in the QTA Regulation, a statement is provided explaining that:

(1) If the participant or beneficiary fails to make an election within the 30-day period referenced in the QTA Regulation, the QTA will directly distribute the account balance to an individual retirement plan or other account offered by the QTA or its affiliate;

(2) The proceeds of the distribution may be invested in the QTA's (or affiliate's) own proprietary investment product, which is designed to preserve principal and provide a reasonable rate of return and liquidity.

(c) The individual retirement plan or other account is established and maintained for the exclusive benefit of the individual retirement plan account holder or other account holder, his or her spouse, or their beneficiaries.

(d) The terms of the individual retirement plan or other account, including the fees and expenses for establishing and maintaining the individual retirement plan or other account, are no less favorable than those available to comparable individual retirement plans or other accounts established for reasons other than the receipt of a distribution described in the QTA Regulation.

(e) Except in the case of a QTA providing a bank or savings account pursuant to section I(b)(1)(iii) of the exemption, the distribution proceeds are invested in an Eligible Investment Product(s), as defined in section V(c) of this class exemption.

(f) The rate of return or the investment performance of the individual retirement plan or other account is no less favorable than the rate of return or investment performance of an identical investment(s) that could have been made at the same time by comparable individual retirement plans or other accounts established for reasons other than the receipt of a distribution described in the QTA Regulation.

(g) The individual retirement plan or other account does not pay a sales commission in connection with the acquisition of an Eligible Investment Product.

(h) The individual retirement plan account holder or other account holder must be able, within a reasonable period of time after his or her request and without penalty to the principal amount of the investment, to transfer his or her account balance to a different investment offered by the QTA or its affiliate, or to a different financial institution not related to the QTA or its affiliate.

(i)(1) Fees and expenses attendant to the individual retirement plan or other account, including the investment of the assets of such plan or account, (e.g., establishment charges, maintenance fees, investment expenses, termination costs, and surrender charges) shall not exceed the fees and expenses charged by the QTA for comparable individual retirement plans or other accounts established for reasons other than the receipt of a distribution made pursuant to the QTA Regulation;

(2) Fees and expenses attendant to the individual retirement plan or other account, with the exception of establishment charges, may be charged only against the income earned by the individual retirement plan or other account; and

(3) Fees and expenses attendant to the individual retirement plan or other account are not in excess of reasonable compensation within the meaning of section 4975(d)(2) of the Code.

IV. Recordkeeping

(a) The QTA maintains or causes to be maintained, for a period of six (6) years from the date the QTA provides notice to the Department of its determination of plan abandonment and its election to serve as the QTA described in the QTA Regulation, the records necessary to enable the persons described in paragraph (b) of this section to determine whether the applicable conditions of this exemption have been met. Such records must be readily available to assure accessibility by the persons identified in paragraph (b) of this section.

(b) Notwithstanding any provisions of section 504(a)(2) and (b) of the Act, the records referred to in paragraph (a) of this section are unconditionally available at their customary location for examination during normal business hours by—

(1) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service; and

(2) Any account holder of an individual retirement plan or other account established pursuant to this

exemption, or any duly authorized representative of such account holder.

(c) A prohibited transaction will not be considered to have occurred if due to circumstances beyond the control of the QTA, the records necessary to enable the persons described in paragraph (b) to determine whether the conditions of the exemption have been met are lost or destroyed, and no party in interest other than the QTA shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by sections 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (b).

(3) None of the persons described in paragraph (b)(2) of this section shall be authorized to examine the trade secrets of the QTA or its affiliates or commercial or financial information that is privileged or confidential.

V. Definitions

(a) A termination administrator is ''qualified'' for purposes of the QTA Regulation and this exemption if:

(1) The QTA is eligible to serve as a trustee or issuer of an individual retirement plan or other account, within the meaning of section 7701(a)(37) of the Code, and

(2) The QTA holds plan assets of the plan that is considered abandoned.

(b) The term ''individual retirement plan'' means an individual retirement plan described in section 7701(a)(37) of the Code. For purposes of this exemption, the term individual retirement plan shall not include an individual retirement plan which is an employee benefit plan covered by Title I of ERISA.

(c) The term ''Eligible Investment Product'' means an investment product designed to preserve principal and provide a reasonable rate of return, whether or not such return is guaranteed, consistent with liquidity. For this purpose, the product must be offered by a Regulated Financial Institution as defined in paragraph (d) of this section and shall seek to maintain, over the term of the investment, the dollar value that is equal to the amount invested in the product by the individual retirement plan or other account. Such term includes money market funds maintained by registered investment companies, and interest-bearing savings accounts and certificates of deposit of a bank or similar financial institution. In addition, the term includes ''stable value products'' issued by a financial institution that are fully benefit-responsive to the individual retirement plan account holder or other account holder, *i.e.*, that provide a liquidity guarantee by a financially responsible third party of principal and previously accrued interest for liquidations or transfers initiated by the individual retirement plan account holder or other account holder exercising his or her right to withdraw or transfer funds under the terms of an arrangement that does not include substantial restrictions to the account holder access to the individual retirement plan or other account's assets.

(d) The term ''Regulated Financial Institution'' means an entity that: (i) Is subject to state or federal regulation, and (ii) is a bank or savings association, the deposits of which are insured by the Federal Deposit Insurance Corporation; a credit union, the member accounts of which are insured within the meaning of section 101(7) of the Federal Credit Union Act; an insurance company, the products of which are protected by state guaranty associations; or an investment company registered under the Investment Company Act of 1940.

(e) An ''affiliate'' of a person includes:

(1) Any person directly or indirectly controlling, controlled by, or under common control with, the person; or

(2) Any officer, director, partner or employee of the person.

(f) The term ''control'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(g) The term ''individual account plan'' means an individual account plan as that term is defined in section 3(34) of the Act.

Signed at Washington, DC, this 17th day of April, 2006.

Ivan L. Strasfeld,

Director of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

[FR Doc. 06–3815 Filed 4–20–06; 8:45 am]

BILLING CODE 4150–29–P

I. Background

Section 104(b) of the Employee Retirement Income Security Act of 1974 (ERISA) requires the administrator of an employee benefit plan to furnish plan participants and certain beneficiaries with a Summary Plan Description (SPD) that describes, in language understandable to an average plan participant, the benefits, rights, and obligations of participants in the plan. The information required to be contained in the SPD is set forth in section 102(b) of ERISA. To the extent that there is a material modification in the terms of the plan or a change in the required content of the SPD, section 104(b)(1) of ERISA requires the administrator to furnish participants and specified beneficiaries a summary of material modifications (SMM) or summary of material reductions (SMR). The Department of Labor (Department) has issued regulations providing guidance on compliance with the requirements to furnish SPDs, SMMs, and SMRs. These regulations, which are codified at 29 CFR 2520.102–2,102–3, and 29 CFR 104b–2 and 104b–3, contain information collections for which the Department has obtained OMB approval under the OMB Control No. 1210–0039. The current approval is scheduled to expire on January 31, 2007, and the Department intends, following receipt of comments pursuant to this notice, to submit an ICR to OMB requesting an extension of its approval of these information collections. The public is not required to respond to an information collection unless it displays a valid control number. No change to the existing ICR is being proposed or made at this time.

II. Desired Focus of Comments

The Department is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., by permitting electronic submissions of responses.

III. Current Actions

This notice requests comments on an extension of OMB's approval of the information collections included in 29 CFR 2520.102–2,102–3, and 29 CFR 104b–2 and 104b–3. The Department is not proposing or implementing changes to the existing ICR at this time. A summary of the ICR and the current burden estimates follows:

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Summary Plan Description Requirements under ERISA.

Type of Review: Extension of a currently approved collection of information.

OMB Number: 1210–0039.

Affected Public: Business or other for-profit; Not-for-profit institutions.

Respondents: 900,000.

Responses: 50,000,000.

Estimated Total Burden Hours: 1,100,000.

Estimated Total Burden Cost (Operating and Maintenance): $400,000,000.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval; they will also become a matter of public record.

Joseph S. Piacentini,

Director, Office of Policy and Research, Employee Benefits Security Administration.

RIN 1210–ZA10

Prohibited Transaction Exemption (PTE) 2006–16; Class Exemption To Permit Certain Loans of Securities by Employee Benefit Plans

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Adoption of Amendment and Revocation of PTEs 81–6 and 82–63.

SUMMARY: This document amends and replaces Prohibited Transaction Exemption (PTE) 81–6 (46 FR 7527, January 23, 1981) and PTE 82–63 (47 FR 14804, April 6, 1982). PTE 81–6 exempts the lending of securities by employee benefit plans to certain banks and broker-dealers, and PTE 82–63 exempts certain compensation arrangements for the provision of securities lending services by a plan fiduciary to an employee benefit plan. The final amendment incorporates the exemptions into one renumbered exemption, and expands the relief that was provided in PTEs 81–6 and 82–63 to include additional parties and additional forms of collateral subject to the specified conditions. The exemption affects participants and beneficiaries of employee benefit plans, persons who lend securities on behalf of such plans, and parties in interest who engage in securities lending transactions with such plans.

DATES: The effective date of this amendment is January 2, 2007. The revocation of PTEs 81–6 and 82–63 is effective on January 2, 2007.

FOR FURTHER INFORMATION CONTACT: Allison Padams Lavigne, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor, (202) 693–8540 (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On October 23, 2003, the Department proposed a notice in the **Federal Register** of a proposed class exemption to amend PTEs 81–6 and 82–63 by incorporating PTEs 81–6 and 82–63 into a new class exemption and expanding the existing relief from the restrictions of sections 406(a)(1)(A) through (D) and 406(b)(1) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) of the Code to additional parties under modified conditions.[1] The notice also proposed the revocation of PTEs 81–6 and 82–63. The proposal was published in response to two exemption applications. One application was submitted by the American Bankers Association (ABA) (D–08295), and the second application was submitted by the Robert Morris Associates, now known as the Risk Management Association (RMA) (D–10365). The applications were filed pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR 2570, subpart B (55 FR 32836, August 10, 1990).

The notice of pendency gave interested persons an opportunity to comment or request a public hearing on the proposal. The Department received six public comments. No request for a hearing was received. Upon

[1] Section 102 of Reorganization Plan No. 4 of 1978 (5 U.S.C. App. 1 (1996)) generally transferred the authority of the Secretary of the Treasury to issue exemptions under Code section 4975(c)(2) to the Secretary of Labor.

consideration of the comments received, the Department has determined to grant the proposed class exemption, subject to certain modifications. These modifications and the comments are discussed below.

Executive Order 12866

Under Executive Order 12866, the Department must determine whether the regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Under section 3(f), the order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This class exemption has been drafted and reviewed in accordance with Executive Order 12866, section 1(b), Principles of Regulation. The Department has determined that this exemption is not a ''significant regulatory action'' under section 3(f) of the Executive Order. Accordingly, it does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order.

Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department of Labor conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA 95) (44 U.S.C. 3506(c)(2)(A)). This helps to ensure that requested data will be provided in the desired format, that the reporting burden (time and financial resources) imposed on respondents is minimized, that the public can clearly understand the Department's collection instruments, and that the Department can properly assess the impact of its collection requirements on respondents.

The Department previously solicited comments concerning the information collection request (ICR) included in the Proposed Amendment to PTE 81–6 and Proposed Restatement and Redesignation of PTE 82–63 (the Proposal) when that document was published in the **Federal Register** on October 23, 2003 (68 FR 60715). The ICR re-stated and combined then-existing ICRs previously approved under OMB Control Numbers 1210–0065 (PTE 81–6) and 1210–0062 (PTE–82–63) and requested approval for the program changes set forth in the Proposal, as well as an adjustment in the burden estimates based on updated information. The ICR was reviewed by OMB and approved on April 11, 2004, under the control number 1210–0065, and that approval is currently scheduled to expire on December 31, 2006.

The class exemption published in this notice has been revised from the Proposal in two basic ways. First, the categories of eligible foreign banks and broker dealers have been broadened to include foreign banks and broker dealers located in additional specified foreign countries, provided that such entities meet the additional specified conditions. Second, the permitted types of collateral for loans of securities by plans to eligible banks and broker dealers have been enlarged to include additional types of collateral. Currently, the Department is soliciting comments concerning revisions in the burden estimates for the ICR resulting from these modifications and from further changes in the Department's assumptions and estimation methodology, which are due to better understanding of the existing market for foreign and domestic securities lending. After consideration of any public comments received in response to this solicitation, the Department intends to submit an ICR to OMB for review of the paperwork burden modifications and changes described in this section. Under 5 CFR 1320.5(b), an Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number. The Department will publish notice in the **Federal Register** of OMB's decision upon review of the Department's ICR.

A copy of the ICR may be obtained by contacting Susan G. Lahne, Office of Policy and Research, U.S. Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue, NW., Room N–5647, Washington, DC 20210. Telephone: (202) 693–8410; Fax: (202) 219–5333. These are not toll-free numbers. The ICR also may be viewed via the internet at *http://www.reginfo.gov/public/do/PRAMain*. The Department and OMB are particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, by permitting electronic submission of responses.

Comments should be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503; Attention: Desk Officer for the Employee Benefits Security Administration. Although comments may be submitted through January 2, 2007, OMB requests that comments be received within 30 days of publication of this class exemption to ensure their consideration.

The Department has consulted with industry experts and has received additional information on the nature and operation of the foreign and domestic securities lending markets. Based on this new information, the Department is revising its prior paperwork burden analysis to reflect its better understanding of the likely impact of the exemption.

In its prior paperwork burden analysis, the Department based its estimates conservatively on the assumption that all domestic broker dealers and banks with trust powers would take advantage of the exemption. This led to an estimate of 13,900 domestic entities that would be respondents to the information collections of the Proposal. Given the highly sophisticated nature of the securities lending market in general and the specific limitations of the exemption in particular, including the required indemnification agreements, equity capital minimums, and levels of collateralization, the Department believes that its original estimate

overstated the likely incidence of reliance. The Department now assumes that the exemption will be relied upon only by the limited group of large, sophisticated domestic broker dealers and banks currently active in the securities lending market, which the Department estimates at approximately 140 separate entities. In addition, the Department estimates that in total 60 foreign broker dealers and banks will begin to rely upon the exemption in its final form, including the 13 entities located in the United Kingdom that were previously included in the Department's paperwork burden analysis for the Proposal. This produces a total estimate of 200 respondents.

Given the nature of securities lending practices, which require expert knowledge, efficient and sophisticated communications systems, and careful monitoring and control of the timing of securities loan transactions, the Department further believes that each of the borrowing entities will establish securities lending relationships with only a limited number of plans. For purposes of this estimate, the Department has assumed that each borrower will sign a contract with no more than 10 employee benefit plans.

The specific information collections of this exemption have not changed from the Proposal. As described in the prior ICR, the exemption provides that, before a plan can lend securities, the borrower must provide the plan with a financial statement. In addition, the agreements regarding the loan transaction or series of transactions and the compensation arrangement for the Lending Fiduciary must be described in a written document. The Department continues to assume that these documents are routinely prepared by the respondent entities in-house as part of usual and customary business practice. The Department has therefore treated the preparation and review of these documents as an hour burden for purposes of this analysis; the cost burden derives solely from material and postage costs for distribution. These costs were estimated at $4.00 per priority or overnight domestic mailing of the documents. Discussions with industry experts indicated that nearly all of the foreign-based institutions likely to rely on the exemption have established domestic branches. The Department assumes, therefore, that all mailings will be handled by the domestic-based operations and that there will be few, if any, respondents using foreign mail services.

The Department has also assumed that the respondents, all of which are large, sophisticated financial entities, will generally communicate by electronic means. Because electronic communications will be undertaken through existing electronic systems and databases, the Department has not added any additional burden for documents that are assumed to be distributed by electronic means.

Financial statements. The Department assumes that each of the 200 respondents will provide each plan with which it has a master lending agreement (10 plans each) with a new financial statement on a quarterly basis, resulting in an estimate of 8,000 financial statements distributed annually (200 respondents × 10 plans × 4 quarterly financial statements). No preparation burden for these statements is assumed, however, since the financial statements will have been prepared for other purposes. The Department has assumed that only 10 percent of the respondents will distribute the financial statements in paper by mail. For the 800 financial statements that are therefore assumed to be distributed annually by mail (10 percent of 8,000 = 800), the Department assumes an hour burden of 5 minutes per statement, consisting of the preparation of an overnight or priority delivery package, resulting in an annual hour burden of 67 hours of clerical time (800 mailings × 5 min./60 min.). For these purposes, each statement is assumed, based on financial statements filed with the Securities and Exchange Commission, to consist of 10 pages. For the 800 financial statements delivered via mail, the Department further assumes a total annual cost of $3,200 (800 mailings × $4.00 per mailing).

For the remaining 90 percent of the financial statements distributed annually, or 7,200 statements (8,000 − 800 = 7,200), the Department has assumed electronic distribution and has not estimated any additional distribution burden.

Lending and compensation agreements. The Department assumes that each respondent will use master agreements for both the lending agreement and the lending fiduciary compensation agreement and will review and distribute them on an annual basis. For purposes of burden analysis, the Department has assumed that each respondent will annually require 30 minutes to review each of these two agreements for compliance (1 hour total per respondent), resulting in an annual hour burden of 200 hours (200 respondents × 1 hour per respondent).

The respondents are further assumed to require 5 minutes to package and mail the agreements. Because of the nature of these agreements, the Department assumes that the respondents will provide each of their plan partners with a single mailing annually containing both the lending agreement and the compensation agreement for that partner and that all agreements will be distributed in paper form by priority or overnight mail. The total time for preparation is 167 hours (200 respondents × 10 lending partners × 5 minutes per agreement)/60). The cost for the distribution of these 2,000 documents (2,000 = 200 respondents × 10 lending partners each) by overnight or priority mail is estimated at $8,000.

The total annual hour burden for this information collection, based on these assumptions, is therefore 434 hours (67 hours + 200 hours + 167 hours). The equivalent cost of the annual hour burden is estimated at $21,514, based on $16,600 for legal staff review of the agreements (200 hours × $83 per hour = $16,600) and $4,914 for clerical time to prepare and distribute the documents (234 hours × $21 per hour = $4,914).

The total annual cost burden for this information collection is estimated at $11,200 ($8,000 for the agreements + $3,200 for the financial statements = $11,200).

The following summarizes the Department's paperwork burden estimates for this information collection:

Type of Review: Revision of a currently approved collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Securities Lending Prohibited Transaction Exemption.

OMB Number: 1210–0065.

Affected Public: Business or other for-profit, Not-for-profit institutions.

Total Respondents: 200.

Frequency: On occasion.

Total Responses: 2,000.

Estimated Total Burden Hours: 434.

Estimated Burden Cost: $11,200.

Discussion of Comments Received

The Department received six comments regarding the proposed class exemption. The commenters requested specific modifications to the proposal in the following areas:

1. Definition of "Foreign Broker-Dealer" and "Foreign Bank"

One commenter asked the Department to expand the definition of Foreign Broker-Dealers and Foreign Banks to include those foreign broker-dealers or foreign banks that are located in a foreign country in which a foreign broker-dealer or a foreign bank has received an individual exemption involving the lending of securities by plans. The commenter notes that, in each of these exemptions, the foreign

banks and foreign broker-dealers were under their country's governmental regulation and oversight, which provided a sufficient level of protection for plans. Another commenter asked the Department to expand relief to include broker-dealers and banks of Germany and the Netherlands within the definitions of Foreign Bank and Foreign Broker-Dealer. In the alternative, the commenter requested that relief be extended to broker-dealers and banks of Germany and the Netherlands, provided that the Lending Fiduciary is a U.S. Broker-Dealer or U.S. Bank and such fiduciary indemnifies the plan against losses that arise from a borrower's default. This commenter states that this type of indemnification agreement is present in most securities lending transactions.

The Department notes that the terms and conditions of the individual exemptions generally require that the foreign borrower be affiliated with a U.S. Bank or a U.S. Broker-Dealer that indemnifies the plan in the United States against potential loss resulting from a borrower's default. In addition, those exemptions require that the collateral be maintained in the United States in U.S. dollars or U.S. denominated securities. The Department notes that while these conditions were appropriate and protective of the plan in the context of an individual exemption, they may not be feasible in the context of a class exemption.[2] Thus, for purposes of the class exemption, it may be difficult for a plan to readily assess the risk of lending securities to broker-dealers and banks located in the various foreign jurisdictions. The Department believes that the presence of governmental regulation and oversight by the foreign countries that were involved in the individual exemptions, and an indemnification by a U.S. regulated entity, provide a significant degree of protection for plans. Accordingly, the Department has determined to expand the definition of Foreign Broker-Dealer (as defined in section V(c)) and Foreign Bank (as defined in section V(d)) under limited circumstances.

Under the final exemption, the definition of Foreign Broker-Dealer has been expanded to include those broker-dealers registered and regulated under the relevant securities laws of a governmental entity of a country other than the United States where such securities laws were applicable to a broker-dealer that received: (i) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a broker-dealer or (ii) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended, (61 FR 39988 (July 31, 1996); 67 FR 44622 (July 3, 2002)) involving the loan of securities by a plan to a broker-dealer. The term ''Foreign Bank'' has been expanded to include those banks subject to regulation by the relevant governmental banking agency(ies) of a country other than the United States, where the regulation and oversight of these banking agencies were applicable to a bank that received: (i) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a bank or (ii) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended, (61 FR 39988 (July 31, 1996); 67 FR 44622 (July 3, 2002)) involving the loan of securities by a plan to a bank.[3]

However, to further protect the plans from any unnecessary costs and risks associated with the lending of securities in the different foreign jurisdictions, a new condition has been added to section III(c) of the exemption. This condition requires, in the case of a securities lending transaction involving a Foreign Broker-Dealer or a Foreign Bank that is described above (as defined in section V(c)(2) and V(d)(2) of the exemption), the Lending Fiduciary to be a U.S. Bank or U.S. Broker-Dealer that indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under this provision) which the plan may incur or suffer directly arising out of a borrower default. In this regard, it is the Department's understanding that in a default situation, the plan will be able to recover the money it is owed under this indemnification agreement from the lending fiduciary in the United States.

Another commenter asked the Department to expand the definition of borrower to include Canadian broker-dealers and Canadian banks. The commenter described a strong similarity in the type of government oversight between broker-dealers and banks in Canada and the United States. In particular, the commenter described the regulation of Canadian broker-dealers. In Canada, securities regulation is within the jurisdiction of the Provinces. In Ontario, the Ontario Securities Commission (OSC) is responsible for regulating the securities markets with the purpose of protecting investors, ensuring optimal allocation of financial resources and maintaining public confidence in the markets. The OSC regulates market participants by notices and orders. It has an enforcement role in the market. It has the power to ensure that trading activities are carried out in accordance with applicable regulations. It can investigate, prosecute and impose penalties on individuals who do not comply with such regulations. Other provincial securities commissions operate similarly. All powers of all the commissions are subject to the oversight of the Ministers of Finance in each Province.

In addition, the commenter notes that the Canadian Securities Administration (CSA) reviews the activities of the provincial securities commissions to ensure consistency in the regulatory framework among the Provinces. The commenter adds that Canadian broker-dealers are subject to oversight by self-regulatory organizations (SRO's), which are subject to the supervision of the provincial commissions. According to the commenter, the Market Regulation Services is the independent regulation services provider for Canadian equity markets and is a recognized SRO by the CSA. Its mandate is to foster and protect investor confidence and market integrity through the administration, interpretation and enforcement of a

[2] The terms and conditions of the individual exemptions generally involve the lending of securities by a plan to a foreign affiliate of a U.S. broker-dealer or U.S. bank and require the U.S. affiliate to indemnify the plan in the United States against any potential losses arising from a default. In addition, these exemptions require that the collateral be maintained in U.S. dollars or U.S. denominated securities and be held in the U.S. The proposed class exemption did not contain an affiliate requirement and permitted non-U.S. forms of collateral that may be maintained outside the U.S.

[3] To date, individual exemptions have been granted and transactions have received final authorization under PTE 96–62, as amended, that involve securities loans by plans to broker-dealers and banks regulated under the applicable laws of Japan, Germany, the Netherlands, Sweden, Switzerland, France, Australia, Canada and the United Kingdom. Thus, any broker-dealer or bank that is subject to government regulation in any one of these countries would be able to utilize the relief provided in this exemption, if all applicable conditions are met. In this regard, if in the future, the Department grants individual exemptions or final authorizations under PTE 96–62 for transactions involving securities loans by plans to broker-dealers or banks regulated under the applicable laws of additional foreign countries, broker-dealers and banks subject to such government regulation would be able to utilize the final exemption provided all applicable conditions are met.

common set of market integrity principles.

The commenter also described the regulation of Canadian banks. The commenter noted that the Office of Superintendent of Financial Institutions (OSFI) regulates Canadian banks. OSFI is an independent agency of the Government of Canada and reports to the Minister of Finance. Its principal role is to safeguard depositors and other banking clients. OSFI imposes capital requirements to ensure that Canadian banks are able to meet their financial obligations as well as strict reporting, managing, accounting and auditing requirements.

Lastly, the commenter represented that under Canadian law, counterparties may agree to submit to the jurisdiction of the courts of the United States and the judgments of the courts in the United States are readily enforceable in Canada. Based on the representations of the commenter regarding the regulatory supervision of Canadian broker-dealers and banks, the Department has expanded the definition of ''Foreign Broker-Dealer'' to include any broker-dealer that: (i) Is regulated by a securities commission of a Province of Canada that is a ''member'' of the Canadian Securities Administration, and (ii) is subject to the oversight of a Canadian SRO; and has expanded the definition of ''Foreign Bank'' to include any bank that is regulated by the Office of the Superintendent of Financial Institutions in Canada.

Finally, one commenter requested that plans be permitted to loan securities to entities other than those permitted under the proposed exemption, provided that all obligations of the borrower are fully guaranteed by an entity that could have borrowed the securities itself. To the extent the commenter is referring to entities other than broker-dealers and banks for which the Department has previously granted relief, this comment raises issues that are beyond the scope of our original consideration, and the commenter has not provided sufficient information for the Department to consider this request. Accordingly, the Department has determined not to adopt this comment.

2. Level of Foreign Collateral That Must Be Pledged

One commenter expressed support for the collateral requirements found in the proposed exemption. Three commenters (including the Applicant) requested that the collateralization requirements (described in section II(b) of the proposed exemption) be made consistent with those in SEC Rule 15c3–3 (17 CFR 240.15c3–3).[4] The Applicant states that regulatory and market developments have occurred since the Applicant first filed its exemption application. The Applicant expressed concern that, if the exemption requires different collateralization levels for plans than what is required for other investors by Rule 15c3–3, plans would be placed at a competitive disadvantage. Another commenter suggested that the level of collateralization required in SEC Rule 15c3–3 be required for those transactions in which the lending fiduciary is a U.S. Bank and such lending fiduciary indemnifies the plan against losses resulting from the borrower's default. According to the commenter, most securities lending transactions include these types of indemnification arrangements. Lastly, a commenter suggested that the collateralization requirements stated in the proposed exemption only be modified for those transactions involving plans with total assets in excess of $500 million.

Rule 15c3–3 requires 100% collateralization if the collateral and securities are denominated in the same currency; 101% if the collateral and securities are denominated in a different currency (*i.e.*, Euros, British pounds, Swiss francs, Canadian dollars, and Japanese yen); and 105% if the collateral and securities are denominated in a different currency and such currency is other than those specified above.

On the basis of the comments, the Department has determined to adopt the collateralization requirements in Rule 15c3–3 for certain transactions where the lending fiduciary is a U.S. Broker-Dealer or U.S. Bank, and such fiduciary indemnifies the plan against loss in the event of borrower default.

Specifically, the Department has expanded section II(b) of the exemption to provide that: In the case of a securities lending transaction in which the Lending Fiduciary is a U.S. Bank or U.S. Broker-Dealer, and such Lending Fiduciary indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default, the plan receives from the borrower by the close of the Lending Fiduciary's business on the day in which the securities lent are delivered to the borrower: ''Foreign Collateral'' having, as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than: (i) 100 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is denominated in the same currency as the securities lent; or (ii) 101 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is in a different currency than the securities lent and such currency is denominated in Euros, British pounds, Japanese yen, Swiss francs or Canadian dollars; or (iii) 105 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) if the collateral posted is in a different currency than the securities lent and is denominated in a currency other than those specified above.

Lastly, the Department believes that the Lending Fiduciary indemnification requirement discussed above provides a sufficient safeguard to protect a plan's interest under the revised collateralization levels making the $500 million plan asset test unnecessary. Accordingly, the Department has not modified the exemption in this respect.

3. Expand The Types of Collateral Permitted Under The Exemption

Several commenters requested that the class exemption permit plans to accept the types of collateral permitted under SEC Rule 15c3–3. Another commenter requested that the definition of foreign collateral be broadened to include equity securities and fixed income securities.

Rule 15c3–3 permits the following forms of collateral:

1. Government securities as defined in section 3(42)(A) and (B) of the Securities Exchange Act of 1934 (the Exchange Act) (15 U.S.C. 78c(42)(A) and (B)) may be pledged when borrowing any securities.

2. Government securities as defined in section 3(42)(C) of the Exchange Act (15 U.S.C. 78c(42)(C)) and issued or guaranteed as to principal or interest by the following corporations may be pledged when borrowing any securities: (i) Federal Home Loan Mortgage Corporation, (ii) the Federal

[4] On April 16, 2003, the SEC issued the Order Regarding the Collateral Broker-Dealers Must Pledge When Borrowing Customer Securities (Release No. 47683). Rule 15c3–3 specifies the types and amount of collateral that may be offered by broker-dealers who borrow fully paid and excess margin securities from customers. For purposes of this exemption, the term ''Rule 15c3–3'' shall also refer to the SEC Order contained in Release No. 47683.

National Mortgage Corporation, (iii) the Student Loan Marketing Association and (iv) the Financing Corporation.

3. Securities issued by, or guaranteed as to principal and interest by, the following Multinational Banks—the obligations of which are backed by participating countries, including the United States—may be pledged when borrowing any securities: (i) International Bank for Reconstruction and Development, (ii) the Inter-American Development Bank, (iii) the Asian Development Bank, (iv) the African Development Bank, (v) the European Bank for Reconstruction and Development, and (vi) the International Finance Corporation.

4. Mortgage-backed securities that meet the definition of a ''mortgage related security'' as defined by section 3(a)(41) of the Exchange Act (15 U.S.C. 78c(a)(41)) may be pledged when borrowing any securities.

5. Negotiable certificates of deposit and bankers acceptances issued by a ''bank'' as that term is defined in section 3(a)(6) of the Exchange Act (15 U.S.C. 78c(a)(6)), and which are payable in the United States and deemed to have a ''ready market'' as that term is defined in 17 CFR 240.15c3–1, may be pledged when borrowing any securities.

6. Foreign sovereign debt securities may be pledged when borrowing any securities, provided that: (i) At least one nationally recognized statistical rating agency (NRSRO) has rated in one of its two highest rating categories either the issue, the issuer or guarantor, or other outstanding unsecured long-term debt securities issued or guaranteed by the issuer or guarantor; and (ii) if the securities pledged are denominated in a different currency than those borrowed, the broker-dealer shall provide collateral in an amount that exceeds the minimum collateralization requirements in paragraph (b)(3) of Rule 15c3–3 (100%) by 1% when the collateral is denominated in the Euro, British pound, Swiss franc, Canadian dollar or Japanese yen, or by 5% when it is denominated in another currency.

7. Foreign sovereign debt securities that do not meet the NRSRO rating condition set forth in Item 6 above may be pledged only when borrowing non-equity securities issued by a person organized or incorporated in the same jurisdiction (including other debt securities issued by the foreign sovereign); provided that, if such foreign sovereign debt securities have been assigned a rating lower than the securities borrowed, such foreign sovereign debt securities must be rated in one of the four highest rating categories by at least one NRSRO. If the securities pledged are denominated in a different currency than those borrowed, the broker-dealer shall provide collateral in an amount that exceeds the minimum collateralization requirement in paragraph (b)(3) of Rule 15c3–3 by 1% when the collateral is denominated in the Euro, British pound, Swiss franc, Canadian dollar or Japanese yen, or by 5% when it is denominated in another currency.

8. The Euro, British pound, Swiss franc, Canadian dollar or Japanese yen may be pledged when borrowing any securities, provided that, when the securities borrowed are denominated in a different currency than that pledged, the broker-dealer shall provide collateral in an amount that exceeds the minimum collateralization requirement in paragraph (b)(3) of Rule 15c3–3 by 1%. Any other foreign currency may be pledged when borrowing any non-equity securities denominated in the same currency.

9. Non-governmental debt securities may be pledged when borrowing any securities, provided that, in the relevant cash market they are not traded flat or in default as to principal or interest, and are rated in one of the two highest rating categories by at least one NRSRO. If such securities are not denominated in U.S. dollars or in the currency of the securities being borrowed, the broker-dealer shall provide collateral in an amount that exceeds the minimum collateralization requirement in paragraph (b)(3) of Rule 15c3–3 by 1% when the securities pledged are denominated in the Euro, British pound, Swiss franc, Canadian dollar or Japanese yen, or by 5% when they are denominated in any other currency.

The Department agrees with the commenters that the types of the collateral allowed under the class exemption should be expanded. Although the SEC concluded that the designation of additional categories of permissible collateral will add liquidity to the securities lending market and lower borrowing costs for broker-dealers, the Department does not believe that the commenters have made a sufficient showing that adopting all the categories of collateral described in Rule 15c3–3 would be protective of the interests of participants and beneficiaries if a borrower were to default.

In this regard, the Department notes that the collateral described in categories 1 and 2 of Rule 15c3–3 satisfies the definition of ''U.S. Collateral'' under the proposed exemption. For the sake of clarity, the Department has revised the definition of ''U.S. Collateral'' to specifically include: Government securities as defined in section 3(42)(A) and (B) of the Securities Exchange Act of 1934 (the Exchange Act); and Government securities as defined in section 3(42)(C) of the Exchange Act and issued or guaranteed as to principal or interest by the following corporations: (i) Federal Home Loan Mortgage Corporation, (ii) the Federal National Mortgage Corporation, (iii) the Student Loan Marketing Association and (iv) the Financing Corporation.

Additionally, the Department believes that it would be appropriate to expand the definition of ''U.S. Collateral'' to include: ''Mortgage-backed securities'' as described in category 4 of Rule 15c3–3, and ''negotiable certificates of deposit and banker acceptances'' as described in category 5 of Rule 15c3–3.

Further, the Department has determined that it would be appropriate to expand the definition of ''Foreign Collateral'' to include all other types of collateral that are specified under Rule 15c3–3, as amended by the SEC from time to time, provided the Lending Fiduciary is a U.S. Broker-Dealer or U.S. Bank, and such entity provides the plan with an indemnification with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs which a plan may incur or suffer directly arising out of a borrower default. In the absence of an indemnification by a U.S. Broker-Dealer or U.S. Bank, the definition of ''Foreign Collateral'' in the final exemption has been revised to include the types of collateral described in categories 3 of Rule 15c3–3, rated foreign sovereign debt described in category 6, and the British pound, the Canadian dollar, the Swiss franc, the Japanese yen or the Euro.

In response to a comment, the Department has determined not to revise the exemption to include equity securities and fixed-income securities as these items appear to be outside the scope of Rule 15c3–3, and the Department has insufficient information about how these items would function as collateral.

4. Issues Relating to the Lending Fiduciary's Indemnification of the Plan From Loss Upon a Borrower's Default

Two commenters requested that the Department revise the indemnification provision of section III(b) to limit the lending fiduciary's indemnification obligation to losses resulting from a borrower's default, and not from any shortfall in the earnings on the collateral. The Department notes that the indemnification by the Lending Fiduciary is only applicable when the borrower defaults and there is a difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under this provision) which the plan may incur or suffer directly arising out of a borrower default. The indemnification requirement, under the proposal, was never intended to encompass losses arising out of the investment of the collateral by a Lending Fiduciary or other party. Accordingly, the Department has clarified section III(b)(2) of the exemption to reflect this intent.

Another commenter asked the Department to expand section III(b)(2) of the proposed exemption to permit a parent corporation (which may or may not be domiciled in the United States) of a U.S. subsidiary acting as a Lending Fiduciary to provide the indemnity in lieu of the Lending Fiduciary itself. The Department believes that this request raises issues that are beyond the scope of the proposed exemption and has determined not to modify the exemption as requested by the commenter.

One commenter requested clarification regarding the scope of the indemnification provisions under the exemption. Specifically, the commenter questioned whether, in accordance with the provisions in an indemnification agreement, a Lending Fiduciary can stand in the shoes of the plan, and seek recovery from the borrower. Nothing in the final exemption would preclude a Lending Fiduciary from entering into an indemnification agreement that permits the Lending Fiduciary to seek recovery against a defaulting borrower after the Lending Fiduciary has made the plan whole pursuant to the indemnification agreement.

5. Miscellaneous Comments

Another commenter questioned whether the exemption would apply to repurchase agreements (repos). The commenter states that in the context of securities loans that are structured and documented as repos, a Master Repurchase Agreement is utilized instead of a Master Securities Lending Agreement. Except for the difference in the form of the arrangement, such an agreement contains all of the same information and substantive requirements that would be found in a typical Master Securities Lending Agreement. The commenter indicates that the Master Repurchase Agreement contains terms and conditions that satisfy all of the substantive requirements of the exemption, including the requirement that the securities be returned at termination of the loan (*i.e.*, repurchase transaction) in consideration for the return of the cash, the requirement that any interest or dividends on the securities lent (*i.e.*, sold) be paid by the securities borrower (*i.e.*, the purchaser) to the securities lender (*i.e.*, the seller) as and when paid, and the requirement that the securities lender (*i.e.*, the seller) receive reasonable compensation for the loan of the securities (which may consist of the ability to retain investment earnings on the cash collateral in excess of a pre-specified rebate amount).

The Department notes that the exemption permits securities loans that are structured as repos, provided that all of the other terms and conditions of the exemption are otherwise met. For the sake of clarity, the Department has added a definition of the terms ''lending of securities'' or ''loan of securities'' to include securities loans that are structured as repurchase agreements, provided that all terms of the exemption are otherwise met (section V(l) of the exemption).

Another commenter expressed concern that the exemption prevents plans from lending certain fixed income securities when a plan accepts foreign collateral by requiring the collateralization level for foreign collateral to be determined by reference to the market value of the securities lent on a ''recognized securities exchange,'' or an ''automated trading system.'' (*See* section II(b)(1)(B) and II(b)(2)(B))) The commenter requests that market value be determined in the same manner as set out under the 2000 version of the Master Securities Loan Agreement which was jointly published by the commenter and the Securities Industry Association. The Department believes that the objective standard contained in the proposal is an important safeguard, and is not persuaded by the comment.

One commenter requested that the Department clarify section IV(c) of the proposal. Section IV(c) of the proposal requires that the compensation be reasonable and be paid to the Lending Fiduciary in accordance with the terms of a written instrument, which may be in the form of a master agreement covering a series of securities lending transactions. The commenter was concerned that this provision could require that the aggregate compensation for all loans be reasonable. Thus, if one loan's compensation failed, then all loans would fail this condition. The Department intended that this condition apply on a loan-by-loan basis. Thus, the failure of one loan to meet this requirement would not cause all loans entered into pursuant to a master agreement to fail such requirement.

A commenter requested clarification on whether the exemption covers ''fee-for-hold'' arrangements. The commenter describes ''fee-for-holds'' as the following. The borrower pays a fee in exchange for the guaranteed availability of a particular security for a specified period of time or until the arrangement is terminated by either party. If a fee-for-hold arrangement is in place and the holding borrower chooses to borrow any such held securities, the fee-for-hold arrangement with respect to such securities terminates and the borrower will enter into a securities loan arrangement. These arrangements may take two forms: (1) The plan may grant the borrower the right of first refusal essentially giving the borrower an option to borrow the securities if the lending plan is approached by another party seeking to borrow the same held securities; or (2) the plan may grant the borrower the exclusive right to borrow the securities. The commenter stated that title to the securities does not transfer until securities are actually delivered. The borrower pays a fee related to the type, quantity and duration of the fee-for-hold arrangement. Once loaned, the lending fee paid is based on market conditions at the time of the loan. The plan may terminate the arrangement at any time so that it may dispose of the securities at any time. The Department is of the view that these arrangements are within the scope of the exemption, provided that all terms and conditions are otherwise met.

One commenter requested that relief be extended to transactions covered by the Federal Employee's Retirement System Act of 1986 (FERSA). The Department notes that relief from the prohibited transaction provisions of FERSA is provided for transactions described in section I(c) of the final amendment by reason of PTE T88–1, as amended (53 FR 52838 (December 29, 1988), 57 FR 8689 (March 11, 1992).) No additional exemptive relief is necessary under the final amendment for those prohibited transactions described in FERSA which parallel those described in section 406(a) of ERISA, if the plan receives no less than adequate consideration.

In this regard, PTE T88–1, as amended, adopted six prohibited transaction class exemptions (including PTE 82–63) for purposes of section 8477(c)(2) of FERSA. The amendment to PTE T88–1 extended such relief to any amendments of these class exemptions which are granted by the Department pursuant to section 408(a) of ERISA unless the Department determines that PTE T88–1, as amended does not apply to such amendment. Accordingly, the Department determines that PTE T88–1, as amended shall apply to this final amendment for purposes of FERSA.

One commenter noted that the requirements in section II(d) that the loan agreement identify the currency in which payment of any fees will be made to the plan would be burdensome. The commenter noted that, in the context of securities loans secured by cash collateral, it is industry practice that the lender pays a rebate to the borrower rather than receiving a fee. Secondly, it is industry practice that the borrower's rebate will be in the same currency as

the currency of the cash collateral. In addition, many loans are covered by a master agreement and, in the context of a securities loan secured by non-cash collateral, parties may need to offer different forms of collateral on a loan-by-loan basis. Thus, the commenter requests that the parties be permitted to specify the currency of the fees in the loan confirmation. The Department concurs with the comment, and has modified the final exemption accordingly.

A commenter asked the Department to clarify how the final exemption would apply to securities loans that were entered into pursuant to PTEs 81–6 and 82–63 prior to the effective date of the final exemption. The Department notes that loan transactions entered into prior to the effective date of this exemption would be covered by PTE 81–6 and PTE 82–63, provided all conditions of the exemption are met. Transactions entered into on or after the effective date of the final exemption would be covered by this exemption, provided that the conditions therein are met. The Department notes that the conditions of PTE 81–6 and PTE 82–63 have been incorporated into this class exemption.

Description of the Exemption

Section I of the exemption describes the transactions that are covered by the exemption. Section I(a) tracks the language of PTE 81–6 by permitting the lending of securities that are assets of an employee benefit plan to a U.S. Broker-Dealer or U.S. Bank, if the general conditions set forth in section II are met. However, the conditions contained in PTE 81–6 have been amended to permit additional types of collateral to be used for the securities loan. Section I(b) of the exemption expands PTE 81–6 by permitting the lending of securities that are assets of an employee benefit plan to a Foreign Broker-Dealer or a Foreign Bank. A Foreign Broker-Dealer or a Foreign Bank must meet both the general conditions set forth in section II of the proposed exemption, as well as the specific conditions described in section III.

Under the final exemption, a Foreign Broker-Dealer is defined in section V(c) as a broker-dealer that has, as of the last day of its most recent fiscal year, equity capital that is the equivalent of no less than $200 million and is: (1)(i) Registered and regulated under the laws of the Financial Services Authority in the United Kingdom, or (ii)(a) registered and regulated under the laws of a securities commission of a Province of Canada that is a member of the Canadian Securities Administration, and (b) is subject to the oversight of a Canadian self-regulatory authority; or (2) registered and regulated, under the relevant securities laws of a governmental entity of a country other than the United States, and such securities laws and regulation were applicable to a broker-dealer that received: (i) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a broker-dealer or (ii) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended involving the loan of securities by a plan to a broker-dealer.

Section V(d) of the final exemption defines the term ''Foreign Bank'' to mean: An institution that has, substantially similar powers to a bank as defined in section 202(a)(2) of the Investment Advisers Act, has as of the last day of its most recent fiscal year, equity capital which is the equivalent of no less than $200 million, and is subject to: (1) Regulation by the Financial Services Authority in the United Kingdom or the Office of the Superintendent of Financial Institutions in Canada, or (2) regulation by the relevant governmental banking agency(ies) of a country other than the United States, and the regulation and oversight of these banking agencies were applicable to a bank that received: (i) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a bank or (ii) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended involving the loan of securities by a plan to a bank.

Section I(c) permits the payment to a lending fiduciary of compensation for services rendered in connection with loans of plan assets that are securities, provided that the conditions set forth in section IV are met. The conditions found in section IV mirror the conditions that were found in PTE 82–63. Although the relief provided by section I(c) would apply to a broader range of lending activities, no changes have been made with respect to any of the conditions that are contained in PTE 82–63.

Section II(a) of the final exemption remains as proposed and requires that neither the borrower nor any affiliate of the borrower have or exercise discretionary authority or control with respect to the investment of the plan assets involved in the transaction, or render investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets.

Under the final exemption, section II(b)requires that the plan receive from the borrower by the close of the Lending Fiduciary's business on the day in which the securities lent are delivered to the borrower, (1) ''U.S. Collateral'' having, as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than 100 percent of the then market value of the securities lent; or (2) ''Foreign Collateral'' having as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than: (i) 102 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is denominated in the same currency as the securities lent, or(ii) 105 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in V(k)) on which the securities are primarily traded if the collateral posted is denominated in a different currency than the securities.

In addition, section II(b) has been expanded to include new collateralization requirements in the case of a securities lending transaction in which the Lending Fiduciary is a U.S. Bank or U.S. Broker-Dealer, and such Lending Fiduciary indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default. For those securities transactions involving such an indemnification, the plan may receive from the borrower by the close of the Lending Fiduciary's business on the day in which the securities lent are delivered to the borrower: Foreign Collateral having, as of the close of business on the preceding day, a market value or in the case of bank letters of credit, a stated amount, equal to not less than:

(i) 100 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is denominated in the same currency as the securities lent; or (ii) 101 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined

in section V(k)) on which the securities are primarily traded if the collateral posted is in a different currency than the securities lent and such currency is denominated in Euros, British pounds, Japanese yen, Swiss francs or Canadian dollars; or (iii) 105 percent of the then market value of the securities lent as valued on a recognized securities exchange or an automated trading system (as defined in section V(k)) if the collateral posted is in a different currency than the securities lent and is denominated in a currency other than those specified above.[5]

The final exemption contains a revised definition of ''U.S. Collateral'' that incorporates additional forms of collateral described in Rule 15c3–3. The term ''U.S. Collateral'' is defined in section V(e) as:

(1) U.S. currency,

(2) ''government securities'' as defined in section 3(a)(42)(A) and (B) of the Securities Exchange Act of 1934 (the Exchange Act),

(3) ''government securities'' as defined in section 3(a)(42)(C) of the Exchange Act issued or guaranteed as to principal or interest by the following corporations: The Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, the Student Loan Marketing Association and the Financing Corporation,

(4) mortgage-backed securities meeting the definition of a ''mortgage related security'' set forth in section 3(a)(41) of the Exchange Act,

(5) negotiable certificates of deposit and bankers' acceptances issued by a ''bank'' as that term is defined in section 3(a)(6) of the Exchange Act, and which are payable in the United States and deemed to have a ''ready market'' as that term is defined in 17 CFR 240.15c3–1, or

(6) irrevocable letters of credit issued by a U.S. Bank other than the borrower or an affiliate thereof, or any combination thereof.

The final exemption contains a revised definition of ''Foreign Collateral'' that permits U.S. Banks, U.S. Broker-Dealers, Foreign Banks and Foreign Broker-Dealers to accept a broader range of collateral. The term ''Foreign Collateral'' is defined in section V(f) as:

(1) Securities issued by or guaranteed as to principal and interest by the following Multilateral Development Banks—the obligations of which are backed by the participating countries, including the United States: The International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the European Bank for Reconstruction and Development and the International Finance Corporation.

(2) Foreign sovereign debt securities provided that at least one nationally recognized statistical rating organization has rated in one of its two highest categories either the issue, the issuer or guarantor;

(3) the British pound, Canadian dollar, Swiss franc, Japanese yen or the Euro;

(4) irrevocable letters of credit issued by a Foreign Bank, other than the borrower or an affiliate thereof, which has a counterparty rating of investment grade or better as determined by a nationally recognized statistical rating organization; or

(5) any type of collateral described in Rule 15c3–3 of the Exchange Act, as amended from time to time, provided that the lending fiduciary is a U.S. Bank or U.S. Broker-Dealer and such fiduciary indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs which a plan may incur or suffer directly arising out of a borrower default.

The Department notes that section II(c) of the exemption remains unchanged from the proposal and requires that plans receive collateral from borrowers by physical delivery, by wire transfer or by book entry in a securities depository located in the United States. For borrowers that are Foreign Banks and Foreign Broker-Dealers, the exemption requires that the plan receive either collateral by physical delivery, by wire entry or by book entry in a securities depository located in the United States or held on behalf of the plan at an Eligible Securities Depository as defined in section V(i)of the exemption.

Section II(d) of the exemption has been modified in light of the expanded definition of ''Foreign Broker-Dealer'' and ''Foreign Bank.'' That section requires that the borrower furnish the Lending Fiduciary with its most recent available audited statement of the borrower's financial condition, as audited by a United States certified public accounting firm or in the case of a borrower that is a Foreign Broker-Dealer or Foreign Bank, a firm which is eligible or authorized to issue audited financial statements in conformity with accounting principles generally accepted in the primary jurisdiction that governs the borrowing Foreign Broker-Dealer or Foreign Bank.

Under section II(e) of the exemption, the loan must be made pursuant to a written loan agreement. Section II(e) further requires that the securities lending agreement must give the plan a continuing security interest in, title to, or the rights of a secured creditor with respect to the collateral received by the plan. In section (f) of the exemption, the plan may receive a reasonable fee in connection with the securities loan or have the opportunity to derive compensation through the investment of the currency collateral. The plan may pay a loan rebate or similar fee to the borrower where the plan invests the currency collateral.

Section II(g) of the exemption requires that the fees and other consideration received by the plan in connection with the loan of securities must be reasonable. The identity of the currency in which payment of fees and rebates will be made must be disclosed to the plan either in the written loan agreement or the loan confirmation as agreed to by the borrower and the plan (or Lending Fiduciary) prior to the making of the loan.

Under the exemption, section II(h) requires that the plan receive the equivalent of all distributions made to holders of the borrower securities during the term of the loan including, but not limited to, dividends, interest payments, shares of stock as a result of stock splits and rights to purchase additional securities. Section II(i) requires that, if the market value of the collateral at the close of trading on a business day is less than the applicable percentage of the market value of the borrowed securities at the close of trading on that day, then the borrower shall deliver, by the close of business on the following business day, an additional amount of U.S. Collateral or Foreign Collateral, the market value of which, together with the market value of all previously delivered collateral, equals at least the applicable percentage of the market value of all borrowed securities as of such preceding day. Notwithstanding the foregoing, part of the U.S. Collateral or Foreign Collateral may be returned to the borrower if the market value of the collateral exceeds the applicable percentage described in this exemption as long as the market value of the remaining collateral equals the applicable percentage described in the exemption of the market value of the borrowed securities.

Under section II(j) of the exemption, a plan may terminate a loan at any time. Section II(k) of the exemption permits a plan to purchase securities identical to the loaned securities if the borrower does not return the loaned securities, and obligates the borrower to pay to the plan any amount of remaining obligation and expenses not covered by the collateral. Section II(l) of the

[5] The Department notes that this requirement would not preclude the Lending Fiduciary from requiring additional collateral should the circumstances so warrant.

exemption states that if a borrower fails to comply with any provision of a loan agreement which requires compliance with this exemption, the plan fiduciary who caused the plan to engage in such transaction shall not be deemed to have caused the plan to engage in a transaction prohibited by section 406(a)(1)(A) through (D) of ERISA solely by reason of the borrower's failure to comply with the conditions of the exemption.

Section III of the exemption contains conditions that are applicable to securities lending transactions with Foreign Broker-Dealers and Foreign Banks. Section III(a) requires that the lending fiduciary maintain the situs of the loan agreement in accordance with the indicia of ownership requirements under section 404(b) of ERISA and the regulations promulgated under 29 CFR 2550.404(b)-1. Further, section III(b) requires that a foreign borrower agree to submit to the jurisdiction of the district courts of the United States, and agree that the plan may in its sole discretion enforce the agreement in a U.S. court. It is the Department's understanding that in the event the borrower were to default, the plan would be able to secure a judgment in the United States which would be enforceable in a UK or a Canadian court. As an alternative to the requirement that the Foreign Broker-Dealer or Foreign Bank must agree to submit to the jurisdiction of the United States courts, the lending fiduciary may, if a U.S. Bank or U.S. Broker-Dealer, indemnify the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction cost incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under the exemption) which the plan may incur or suffer directly arising out of a borrower's default.

The final exemption contains a new condition in section III(c) which requires that in the case of a securities lending transaction involving a Foreign Broker-Dealer or a Foreign Bank that is described in section V(c)(2) or V(d)(2), the Lending Fiduciary must be a U.S. Bank or U.S. Broker-Dealer and prior to entering into the loan transaction, such fiduciary must agree to indemnify the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under this provision) which the plan may incur or suffer directly arising out of a borrower default. It is the Department's understanding that, in the event of a borrower default, the plan would be able to recover from the lending fiduciary, in the United States, the amount it is entitled to under the indemnification agreement.

As in the proposal, section IV of the exemption incorporates the conditions of PTE 82–63. Section V of the exemption contains the definitions. Unless noted above, the definitions of the exemption remain as they were in the proposed exemption.

The Department has added section VI that specifies the effective dates of the final exemption and the revocation of PTEs 81–6 and 82–63.

Lastly, the Department notes that section 611(d)(1) of the Pension Protection Act of 2006 (Pub. L. 109–280) (the PPA) amended the Employee Retirement Income Security Act of 1974 (ERISA) in part, by adding a new section 408(b)(17) which provides relief from ERISA section 406(a)(1)(A), (B) and (D) for any transaction between a plan and a person that is a party in interest other than fiduciary (or an affiliate) who has or exercises any discretionary authority or control with respect to the investment of the plan assets involved in the transaction or renders investment advice (within the meaning of section 3(21)(A)(ii)) with respect to those assets, solely by reason of providing services to the plan or solely by reason of a relationship to such a service provider described in ERISA section 3(14)(F), (G), (H) or (I), or both, but only if in connection with such transaction the plan receives no less, nor pays more, than adequate consideration.[6] The Department notes that to the extent that a transaction involving a loan of securities by a plan to a party in interest meets the requirements of ERISA section 408(b)(17), such transaction does not need to comply with the terms of this class exemption. The Department further notes that the new section 408(b)(17) will not be available for the payment of compensation to a plan's securities lending agent. In this regard, see 408(b)(2) of ERISA and section I(c) of this final exemption for relief permitting the payment of compensation related to foreign securities lending services.

[6] Section 611(d)(2) of the PPA provided similar exemptive relief in amending section 4975 of the Code to add the new section 4975(c)(20).

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and the Code. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of ERISA which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of ERISA; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) In accordance with section 408(a) of ERISA and section 4975(c)(2) of the Code, and based on the entire record, the Department finds that the exemption is administratively feasible, in the interests of the plan(s) and of its participants and beneficiaries, and protective of the rights of the participants and beneficiaries of the plan;

(3) This exemption is supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The class exemption is applicable to a particular transaction only if the transaction satisfies the conditions specified in the class exemption.

Exemption

Accordingly, the following exemption is granted under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990).

I. Transactions

(a) Effective January 2, 2007, the restrictions of section 406(a)(1)(A) through (D) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the lending of securities that are assets of an employee benefit plan to a ''U.S. Broker-Dealer'' or to a ''U.S. Bank,'' provided that the conditions set forth in section II below are met.

(b) Effective January 2, 2007, the restrictions of section 406(a)(1)(A) through (D) of ERISA and the taxes imposed by section 4975(a) and (b) of

the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the lending of securities that are assets of an employee benefit plan to a ''Foreign Broker-Dealer'' or ''Foreign Bank'', provided that the conditions set forth in sections II and III below are met.

(c) Effective January 2, 2007, the restrictions of section 406(b)(1) of ERISA and the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(E) of the Code shall not apply to the payment to a fiduciary (the Lending Fiduciary) of compensation for services rendered in connection with loans of plan assets that are securities, provided that the conditions set forth in section IV below are met.

II. General Conditions For Transactions Described in Sections I(a) and I(b)

(a) Neither the borrower nor any affiliate of the borrower has or exercises discretionary authority or control with respect to the investment of the plan assets involved in the transaction, or renders investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets;

(b) The plan receives from the borrower by the close of the Lending Fiduciary's business on the day in which the securities lent are delivered to the borrower, (1) ''U.S. Collateral'' having, as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than 100 percent of the then market value of the securities lent; or

(2) ''Foreign Collateral'' having as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than:

(i) 102 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is denominated in the same currency as the securities lent, or

(ii) 105 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in V(k)) on which the securities are primarily traded if the collateral posted is denominated in a different currency than the securities lent.

Notwithstanding the foregoing, if the Lending Fiduciary is a U.S. Bank or U.S. Broker-Dealer, and such Lending Fiduciary indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default, the plan receives from the borrower by the close of the Lending Fiduciary's business on the day in which the securities lent are delivered to the borrower, ''Foreign Collateral'' having as of the close of business on the preceding business day, a market value or, in the case of bank letters of credit, a stated amount, equal to not less than:

(i) 100 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in section V(k)) on which the securities are primarily traded if the collateral posted is denominated in the same currency as the securities lent; or

(ii) 101 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in V(k)) on which the securities are primarily traded if the collateral posted is denominated in a different currency than the securities lent and such currency is denominated in Euros, British pounds, Japanese yen, Swiss francs or Canadian dollars; or

(iii) 105 percent of the then market value of the securities lent as valued on a recognized securities exchange (as defined in section V(j)) or an automated trading system (as defined in V(k)) if the collateral posted is denominated in a different currency than the securities lent and such currency is other than those specified above.

(c)(1) If the borrower is a U.S. Bank or U.S. Broker-Dealer, the Plan receives such U.S. Collateral or Foreign Collateral from the borrower by the close of the Lending Fiduciary's business on the day in which the securities are delivered to the borrower. Such collateral is received by the plan either by physical delivery, wire transfer or by book entry in a securities depository located in the United States. or,

(2) If the borrower is a Foreign Bank or Foreign Broker-Dealer, the plan receives U.S. Collateral or Foreign Collateral from the borrower by the close of the Lending Fiduciary's business on the day in which the securities are delivered to the borrower. Such collateral is received by the plan either by physical delivery, wire transfer or by book entry in a securities depository located in the United States or held on behalf of the plan at an Eligible Securities Depository. The indicia of ownership of such collateral shall be maintained in accordance with section 404(b) of ERISA and 29 CFR 2550.404b–1.

(d) Prior to making of any such loan, the borrower shall have furnished the Lending Fiduciary with:

(1) The most recent available audited statement of the borrower's financial condition, as audited by a United States certified public accounting firm or in the case of a borrower that is a Foreign Broker-Dealer or Foreign Bank, a firm which is eligible or authorized to issue audited financial statements in conformity with accounting principles generally accepted in the primary jurisdiction that governs the borrowing Foreign Broker-Dealer or Foreign Bank;

(2) The most recent available unaudited statement of its financial condition (if the unaudited statement is more recent than such audited financial statement); and

(3) A representation that, at the time the loan is negotiated, there has been no material adverse change in its financial condition since the date of the most recent financial statement furnished to the plan that has not been disclosed to the Lending Fiduciary. Such representations may be made by the borrower's agreement that each loan shall constitute a representation by the borrower that there has been no such material adverse change.

(e) The loan is made pursuant to a written loan agreement, the terms of which are at least as favorable to the plan as an arm's-length transaction with an unrelated party would be. Such loan agreement states that the plan has a continuing security interest in, title to, or the rights of a secured creditor with respect to the collateral. Such agreement may be in the form of a master agreement covering a series of securities lending transactions.

(f) In return for lending securities, the plan:

(1) Receives a reasonable fee (in connection with the securities lending transaction), and/or

(2) Has the opportunity to derive compensation through the investment of the currency collateral. Where the plan has that opportunity, the plan may pay a loan rebate or similar fee to the borrower, if such fee is not greater than the plan would pay in a comparable transaction with an unrelated party.

(g) All fees and other consideration received by the plan in connection with the loan of securities are reasonable. The identity of the currency in which the payment of fees and rebates will be made shall be disclosed to the plan either in the written loan agreement or the loan confirmation as agreed to by the borrower and the plan (or Lending Fiduciary) prior to the making of the loan.

(h) The plan receives the equivalent of all distributions made to holders of the borrowed securities during the term of the loan including, but not limited to, dividends, interest payments, shares of stock as a result of stock splits and rights to purchase additional securities;

(i) If the market value of the collateral at the close of trading on a business day is less than the applicable percentage of the market value of the borrowed

securities at the close of trading on that day (as described in section II(b) of this exemption), then the borrower shall deliver, by the close of business on the following business day, an additional amount of U.S. Collateral or Foreign Collateral the market value of which, together with the market value of all previously delivered collateral, equals at least the applicable percentage of the market value of all the borrowed securities as of such preceding day.

Notwithstanding the foregoing, part of the U.S. Collateral or Foreign Collateral may be returned to the borrower if the market value of the collateral exceeds the applicable percentage (described in section II(b)) of the exemption) of the market value of the borrowed securities, as long as the market value of the remaining U.S. Collateral or Foreign Collateral equals at least the applicable percentage of the market value of the borrowed securities;

(j) The loan may be terminated by the plan at any time, whereupon the borrower shall deliver certificates for securities identical to the borrowed securities (or the equivalent thereof in the event of reorganization, recapitalization or merger of the issuer of the borrowed securities) to the plan within the lesser of:

(1) The customary delivery period for such securities,

(2) Five business days, or

(3) The time negotiated for such delivery by the plan and the borrower.

(k) In the event that the loan is terminated, and the borrower fails to return the borrowed securities or the equivalent thereof within the applicable time described in section II(j) above, the plan may, under the terms of the loan agreement:

(1) Purchase securities identical to the borrowed securities (or their equivalent as described above) and may apply the collateral to the payment of the purchase price, any other obligations of the borrower under the agreement, and any expenses associated with the sale and/or purchase, and

(2) The borrower is obligated, under the terms of the loan agreement, to pay, and does pay to the plan the amount of any remaining obligations and expenses not covered by the collateral, including reasonable attorney's fees incurred by the plan for legal action arising out of default on the loans, plus interest at a reasonable rate.

Notwithstanding the foregoing, the borrower may, in the event the borrower fails to return borrowed securities as described above, replace collateral, other than U.S. currency, with an amount of U.S. currency that is not less than the then current market value of the collateral, provided such replacement is approved by the Lending Fiduciary.

(l) If the borrower fails to comply with any provision of a loan agreement which requires compliance with this exemption, the plan fiduciary who caused the plan to engage in such transaction shall not be deemed to have caused the plan to engage in a transaction prohibited by section 406(a)(1)(A) through (D) of ERISA solely by reason of the borrower's failure to comply with the conditions of the exemption.

III. Specific Conditions For Transactions Described in Section I(b)

(a) The Lending Fiduciary maintains the written documentation for the loan agreement at a site within the jurisdiction of the courts of the United States.

(b) Prior to entering into a transaction involving a Foreign Broker-Dealer that is described in section V(c)(1) or a Foreign Bank that is described in section V(d)(1) either:

(1) The Foreign Broker-Dealer or Foreign Bank agrees to submit to the jurisdiction of the United States; agrees to appoint an agent for service of process in the United States, which may be an affiliate (the Process Agent); consents to service of process on the Process Agent; and agrees that any enforcement by a plan of its rights under the securities lending agreement will, at the option of the plan, occur exclusively in the United States courts; or

(2) The Lending Fiduciary, if a U.S. Bank or U.S. Broker-Dealer, agrees to indemnify the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under this provision) which the plan may incur or suffer directly arising out of a borrower default by the Foreign Broker-Dealer or Foreign Bank.

(c) In the case of a securities lending transaction involving a Foreign Broker-Dealer that is described in section V(c)(2) or a Foreign Bank that is described in section V(d)(2), the Lending Fiduciary must be a U.S. Bank or U.S. Broker-Dealer, and prior to entering into the loan transaction, such fiduciary must agree to indemnify the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs incurred (including attorney's fees of such plan arising out of the default on the loans or the failure to indemnify properly under this provision) which the plan may incur or suffer directly arising out of a borrower default by the Foreign Broker-Dealer or Foreign Bank.

IV. Specific Conditions for Transactions Described in Section I(c)

(a) The loan of securities is not prohibited by section 406(a) of ERISA or otherwise satisfies the conditions of this exemption.

(b) The Lending Fiduciary is authorized to engage in securities lending transactions on behalf of the plan.

(c) The compensation is reasonable and is paid in accordance with the terms of a written instrument, which may be in the form of a master agreement covering a series of securities lending transactions.

(d) Except as otherwise provided in section IV(f), the arrangement under which the compensation is paid:

(1) Is subject to the prior written authorization of a plan fiduciary (the "authorizing fiduciary"), who is (other than in the case of a plan covering only employees of the Lending Fiduciary or any affiliates of such fiduciary) independent of the Lending Fiduciary and of any affiliate thereof, and

(2) May be terminated by the authorizing fiduciary within:

(A) The time negotiated for such notice of termination by the plan and the Lending Fiduciary, or

(B) five business days, whichever is less, in either case without penalty to the plan.

(e) No such authorization is made or renewed unless the Lending Fiduciary shall have furnished the authorizing fiduciary with any reasonably available information which the Lending Fiduciary reasonably believes to be necessary to determine whether such authorization should be made or renewed, and any other reasonably available information regarding the matter that the authorizing fiduciary may reasonably request.

(f) (Special Rule for Commingled Investment Funds) In the case of a pooled separate account maintained by an insurance company qualified to do business in a State or a common or collective trust fund maintained by a bank or trust company supervised by a State or Federal agency, the requirements of section IV(d) of this exemption shall not apply, provided that:

(1) The information described in section IV(e) (including information with respect to any material change in the arrangement) shall be furnished by the Lending Fiduciary to the authorizing fiduciary described in section IV(d) with respect to each plan whose assets are invested in the account or fund, not less than 30 days prior to implementation of the arrangement or material change thereto, and, where requested, upon the reasonable request of the authorizing fiduciary;

(2) In the event any such authorizing fiduciary submits a notice in writing to the Lending Fiduciary objecting to the implementation of, material change in, or continuation of the arrangement, the plan on whose behalf the objection was tendered is given the opportunity to terminate its investment in the account or fund, without penalty to the plan, within such time as may be necessary to effect such withdrawal in an orderly manner that is equitable to all withdrawing plans and to the non-withdrawing plans. In the case of a plan that elects to withdraw pursuant to the foregoing, such withdrawal shall be effected prior to the implementation of, or material change in, the arrangement; but an existing arrangement need not be discontinued by reason of a plan electing to withdraw; and

(3) In the case of a plan whose assets are proposed to be invested in the account or fund subsequent to the implementation of the compensation arrangement and which has not authorized the arrangement in the manner described in sections IV(f)(1) and IV(f)(2), the plan's investment in the account or fund shall be authorized in the manner described in section IV(d)(1).

V. Definitions

For purposes of this exemption:

(a) The term ''U.S. Broker-Dealer'' means a broker-dealer registered under the Securities Exchange Act of 1934 (the 1934 Act or the Exchange Act) or exempted from registration under section 15(a)(1) of the 1934 Act as a dealer in exempted government securities (as defined in section 3(a)(12) of the 1934 Act).

(b) The term ''U.S. Bank'' means a bank as defined in section 202(a)(2) of the Investment Advisers Act.

(c) The term ''Foreign Broker-Dealer'' means a broker-dealer that has, as of the last day of its most recent fiscal year, equity capital that is equivalent of no less than $200 million and is:

(1) (i) Registered and regulated under the laws of the Financial Services Authority in the United Kingdom, or

(ii)(a) registered and regulated by a securities commission of a Province of Canada that is a member of the Canadian Securities Administration, and (b) is subject to the oversight of a Canadian self-regulatory authority; or

(2) registered and regulated under the relevant securities laws of a governmental entity of a country other than the United States, and such securities laws and regulation were applicable to a broker-dealer that received: (i) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a broker-dealer or (ii) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended, involving the loan of securities by a plan to a broker-dealer.

(d) The term ''Foreign Bank'' means an institution that has substantially similar powers to a bank as defined in section 202(a)(2) of the Investment Advisers Act, has as of the last day of its most recent fiscal year, equity capital which is equivalent of no less than $200 million, and is subject to:

(1) Regulation by the Financial Services Authority in the United Kingdom or the Office of the Superintendent of Financial Institutions in Canada, or

(2) regulation by the relevant governmental banking agency(ies) of a country other than the United States, and the regulation and oversight of these banking agencies were applicable to a bank that received: (a) An individual exemption, granted by the Department under section 408(a) of ERISA, involving the loan of securities by a plan to a bank or (b) a final authorization by the Department to engage in an otherwise prohibited transaction pursuant to PTE 96–62, as amended, involving the loan of securities by a plan to a bank.

(e) The term ''U.S. Collateral'' means:

(1) U.S. currency;

(2) ''government securities'' as defined in section 3(a)(42)(A) and (B) of the Exchange Act;

(3) ''government securities'' as defined in section 3(a)(42)(C) of the Exchange Act issued or guaranteed as to principal or interest by the following corporations: The Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, the Student Loan Marketing Association and the Financing Corporation

(4) mortgage-backed securities meeting the definition of a ''mortgage related security'' set forth in section 3(a)(41) of the Exchange Act;

(5) negotiable certificates of deposit and bankers acceptances issued by a ''bank'' as that term is defined in section 3(a)(6) of the Exchange Act, and which are payable in the United States and deemed to have a ''ready market'' as that term is defined in 17 CFR 240.15c3–1; or

(6) irrevocable letters of credit issued by a U.S. Bank other than the borrower or an affiliate thereof, or any combination, thereof.

(f) The term ''Foreign Collateral'' means:

(1) Securities issued by or guaranteed as to principal and interest by the following Multilateral Development Banks—the obligations of which are backed by the participating countries, including the United States: The International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the European Bank for Reconstruction and Development and the International Finance Corporation;

(2) foreign sovereign debt securities provided that at least one nationally recognized statistical rating organization has rated in one of its two highest categories either the issue, the issuer or guarantor;

(3) the British pound, the Canadian dollar, the Swiss franc, the Japanese yen or the Euro;

(4) irrevocable letters of credit issued by a Foreign Bank, other than the borrower or an affiliate thereof, which has a counterparty rating of investment grade or better as determined by a nationally recognized statistical rating organization; or

(5) any type of collateral described in Rule 15c3–3 of the Exchange Act as amended from time to time provided that the lending fiduciary is a U.S. Bank or U.S. Broker-Dealer and such fiduciary indemnifies the plan with respect to the difference, if any, between the replacement cost of the borrowed securities and the market value of the collateral on the date of a borrower default plus interest and any transaction costs which a plan may incur or suffer directly arising out of a borrower default. Notwithstanding the foregoing, collateral described in any of the categories enumerated in section V(e) will be considered U.S. Collateral for purposes of the exemption.

(g) The term ''affiliate'' of another person means:

(1) Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such person;

(2) Any officer, director, partner, employee, or relative (as defined in section 3(15) of ERISA) of such other person; and

(3) Any corporation or partnership of which such other person is an officer, director, partner or employee.

(h) The term ''control'' means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(i) The term ''Eligible Securities Depository'' means an eligible securities depository as that term is defined under Rule 17f-7 of the Investment Company Act of 1940 [15 U.S.C. 80a], as such definition may be amended from time to time.

(j) The term ''recognized securities exchange'' means a U.S. securities exchange that is registered as a ''national securities exchange'' under section 6 of the Exchange Act of 1934 (15 U.S.C. 78f) or a designated offshore securities market as defined in Regulation S of the Securities Act of 1933 [17 CFR part 230.902(B)], as such definition may be amended from time to time, which performs with respect to securities, the functions commonly performed by a stock exchange within the meaning of the definitions under the applicable securities laws (*e.g.*, 17 CFR part 240.3b-16).

(k) The term ''automated trading system'' means an electronic trading system that functions in a manner intended to simulate a securities exchange by electronically matching orders on an agency basis from multiple buyers and sellers such as an ''alternative trading system'' within the meaning of SEC's Reg. ATS [17 CFR part 242.300] as such definition may be amended from time to time, or an ''automated quotation system'' as described in section 3(a)(51)(A)(ii) of the Securities and Exchange Act of 1934 [15 U.S.C. 78c(a)(51)(A)(ii)].

(l) The term ''lending of securities'' or ''loan of securities'' shall include securities loans that are structured as repurchase agreements provided, that all terms of the exemption are otherwise met.

VI. Effective Dates

(a) This exemption is effective on January 2, 2007.

(b) PTEs 81–6 and 82–63 are revoked effective January 2, 2007.

Signed at Washington, DC, this 25th day of October, 2006.

Ivan L. Strasfeld,

Director, Office of Exemption Determinations, Employee Benefits Security Administration, U.S. Department of Labor.

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) number and alternative trade adjustment assistance (ATAA) by (TA–W) number issued during the period of October 2 through October 6, 2006.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Section (a)(2)(A) all of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. The sales or production, or both, of such firm or subdivision have decreased absolutely; and

C. Increased imports of articles like or directly competitive with articles produced by such firm or subdivision have contributed importantly to such workers' separation or threat of separation and to the decline in sales or production of such firm or subdivision; or

II. Section (a)(2)(B) both of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. There has been a shift in production by such workers' firm or subdivision to a foreign country of articles like or directly competitive with articles which are produced by such firm or subdivision; and

C. One of the following must be satisfied:

1. The country to which the workers' firm has shifted production of the articles is a party to a free trade agreement with the United States;

2. The country to which the workers' firm has shifted production of the articles to a beneficiary country under the Andean Trade Preference Act, African Growth and Opportunity Act, or the Caribbean Basin Economic Recovery Act; or

3. There has been or is likely to be an increase in imports of articles that are like or directly competitive with articles which are or were produced by such firm or subdivision.

Also, in order for an affirmative determination to be made for secondarily affected workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(b) of the Act must be met.

(1) Significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm (or subdivision) is a supplier or downstream producer to a firm (or subdivision) that employed a group of workers who received a certification of eligibility to apply for trade adjustment assistance benefits and such supply or production is related to the article that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied for the firm (or subdivision) described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss of business by the workers' firm with the firm (or subdivision) described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for the Division of Trade Adjustment Assistance to issue a certification of eligibility to apply for Alternative Trade Adjustment Assistance (ATAA) for older workers, the group eligibility requirements of Section 246(a)(3)(A)(ii) of the Trade Act must be met.

1. Whether a significant number of workers in the workers' firm are 50 years of age or older.

2. Whether the workers in the workers' firm possess skills that are not easily transferable.

3. The competitive conditions within the workers' industry (*i.e.*, conditions within the industry are adverse).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of Section 222(a)(2)(B) (shift in production) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of Section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) of the Trade Act have been met.

None.

The following certifications have been issued. The requirements of Section 222(b) (downstream producer for a firm whose workers are certified eligible to apply for TAA based on increased imports from or a shift in production to Mexico or Canada) of the Trade Act have been met.

None.

Affirmative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–60,003; Central Products Co., Brighton, CO: September 1, 2005.

TA–W–60,084; Hekman Furniture Co., Grand Rapids, MI: September 13, 2005.

TA–W–60,177; Hooker Furniture Corp., Martinsville, VA: September 29, 2005.

TA–W–59,980; Mechanical Products Manufacturing, Co., Lucasville, OH: August 18, 2005.

The following certifications have been issued. The requirements of Section 222(a)(2)(B) (shift in production) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

FDIC FEDERAL DEPOSIT INSURANCE CORPORATION

Trust Examination Manual

29 CFR 2509.75-2 - Interpretive bulletin relating to prohibited transactions.

Section Number: 2509.75-2
Section Name: Interpretive bulletin relating to prohibited transactions.

On February 6, 1975, the Department of Labor issued an interpretive bulletin, ERISA IB 75-2, with respect to whether a party in interest has engaged in a prohibited transaction with an employee benefit plan where the party in interest has engaged in a transaction with a corporation or partnership (withinthe meaning of section 7701 of the Internal Revenue Code of 1954) in which the plan has invested.On November 13, 1986 the Department published a final regulation
dealing with the definition of ``plan assets''. See Sec. 2510.3-101 of this title. Under that regulation,theassets of certain entities in which plans invest would include ``plan assets'' for purposes of the fiduciary responsibility provisions of the Act. Section 2510.3-101 applies only for purposes of identifying plan assets on or after the effective date of that section, however, and Sec. 2510.3-101 does not apply to plan investments in certain entities that qualify for the transitional relief provided for in paragraph (k) of that section. The principles discussed in paragraph (a) of this Interpretive Bulletin continue to be applicable for purposes of identifying assets of a plan for periods prior to the effective date of Sec. 2510.3-101 and for investments that are subject to the transitional rule in Sec. 2510.3-
101(k). Paragraphs (b) and (c) of this Interpretive Bulletin, however, relate to matters outside the scope of Sec. 2510.3-101, and nothing in that section affects the continuing application of the principles discussed in those parts.

(a) Principles applicable to plan investments to which Sec. 2510.3-101 does not apply. Generally, investment by a plan in securities (within the meaning of section 3(20) of the Employee Retirement Income Security Act of 1974) of a corporation or partnership will not, solely by reason of such investment, be considered to be an investment in the underlying assets of such corporation or partnership so as to make such assets of the entity ``plan assets'' and thereby make a subsequent
transaction between the party in interest and the corporation or partnership a prohibited transaction under section 406 of the Act. For example, where a plan acquires a security of a corporation or a
limited partnership interest in a partnership, a subsequent lease or sale of property between such corporation or partnership and a party in interest will not be a prohibited transaction solely by reason of the plan's investment in the corporation or partnership. This general proposition, as applied to corporations and partnerships, is consistent with section 401(b)(1) of the Act, relating to plan investments in investment companies registered under the Investment Company Act of 1940. Under section 401(b)(1), an investment by a plan in securities of such an investment company may be made
without causing, solely by reason of such investment, any of the assets of the investment company to be considered to be assets of the plan.

(b) [Reserved]

(c) Applications of the fiduciary responsibility rules. The preceding paragraphs do not mean that an investment of plan assets in a security of a corporation or partnership may not be a prohibited
transaction. For example, section 406(a)(1)(D) prohibits the direct or indirect transfer to, or use by or for the benefit of, a party in interest of any assets of the plan and section 406(b)(1) prohibits a
fiduciary from dealing with the assets of the plan in his own interest or for his own account.
Thus, for example, if there is an arrangement under which a plan invests in, or retains its investment in, an

investment company and as part of the arrangement it is expected that the investment company will purchase securities from a party in interest, such arrangement is a prohibited transaction. Similarly, the purchase by a plan of an insurance policy pursuant to an arrangement under which it is expected that the insurance company will make a loan to a party in interest is a prohibited transaction. Moreover, notwithstanding the foregoing, if a transaction between a party in interest and a plan would be a prohibited transaction, then such a transaction between a party in interest and such corporation or partnership will ordinarily be a prohibited transaction if the plan may, by itself, require the corporation or partnership to engage in such transaction. Similarly, if a transaction between a party in interest and a plan would be a prohibited transaction, then such a transaction between a party in interest and such corporation or partnership will ordinarily be a prohibited transaction if such party in interest, together with one or more persons who are parties in interest by reason of such persons' relationship (within the meaning of section 3(14)(E) through (I)) to such party in interest may, with the aid of the plan but without the aid of any other persons, require the corporation or partnership to engage in such a transaction. However, the preceding sentence does not apply if the parties in interest engaging in the transaction, together with one or more persons who are parties in interest by reason of such persons' relationship (within the meaning of section 3(14)(E) through (I)) to such party in interest, may, by themselves, require the corporation or partnership to engage in the transaction. Further, the Department of Labor emphasizes that it would consider a fiduciary who makes or retains an investment in a corporation or partnership for the purpose of avoiding the application of the fiduciary responsibility provisions of the Act to be in contravention of the provisions of section 404(a) of the Act.

[51 FR 41280, Nov. 13, 1986, as amended at 61 FR 33849, July 1, 1996]

Trust Examination Manual

29 CFR 2509.75-3 - Interpretive bulletin relating to investments by employee benefit plans in securities of registered investment companies.

Section Number: 2509.75-3
Section Name: Interpretive bulletin relating to investments by employee benefit plans in securities of registered investment companies.

On March 12, 1975, the Department of Labor issued an interpretive bulletin, ERISA IB 75-3, with regard to its interpretation of section 3(21)(B) of the Employee Retirement Income Security Act of 1974. That section provides that an investment by an employee benefit plan in securities issued by an investment company registered under the Investment Company Act of 1940 shall not by itself cause the investment company, its investment adviser or principal underwriter to be deemed to be a fiduciary or party in interest ``except insofar as such investment company or its investment adviser or principal underwriter acts in connection with an employee benefit plan covering employees of the investment company, the investment adviser, or its principal underwriter.''

The Department of Labor interprets this section as an elaboration of the principle set forth in section 401(b)(1) of the Act and ERISA IB 75-2 (issued February 6, 1975) that the assets of an investment company shall not be deemed to be assets of a plan solely by reason of an investment by such plan in the shares of such investment company. Consistent with this principle, the Department of Labor interprets this section to mean that a person who is connected with an investment company, such as the investment company itself, its investment adviser or its principal underwriter, is not to be deemed to be a fiduciary of or party in interest with respect to a plan solely because the plan has invested in the investment company's shares. This principle applies, for example, to a plan covering employees of an investment adviser to an investment company where the plan invests in the securities of the investment company. In such a case the investment company or its principal underwriter is not to be deemed to be a fiduciary of or party in interest with respect to the plan solely because of such investment.On the other hand, the exception clause in section 3(21) emphasizes that if an investment company, its investment adviser or its principal underwriter is a fiduciary or party in interest for a reason other than
the investment in the securities of the investment company, such a person remains a party in interest or fiduciary. Thus, in the preceding example, since an employer is a party in interest, the investment adviser remains a party in interest with respect to a plan covering its employees.

The Department of Labor emphasized that an investment adviser, principal underwriter or investment company which is a fiduciary by virtue of section 3(21)(A) of the Act is subject to the fiduciary responsibility provisions of part 4 of title I of the Act, including those relating to fiduciary duties under section 404.

[40 FR 31599, July 28, 1975. Redesignated at 41 FR 1906, Jan. 13, 1976]

29 CFR 2509.75-4 - Interpretive bulletin relating to indemnification of fiduciaries.

Section Number: 2509.75-4
Section Name: Interpretive bulletin relating to indemnification of fiduciaries.

On June 4, 1975, the Department of Labor issued an interpretive bulletin, ERISA IB 75-4, announcing the Department's interpretation of section 410(a) of the Employee Retirement Income Security Act of 1974, insofar as that section relates to indemnification of fiduciaries.
Section 410(a) states, in relevant part, that ``any provision in an agreement or instrument which purports to relieve a fiduciary from responsibility or liability for any responsibility, obligation, or duty under this part shall be void as against public policy.'' The Department of Labor interprets this section to permit indemnification agreements which do not relieve a fiduciary of responsibility or liability under part 4 of title I. Indemnification provisions which leave the fiduciary fully responsible and liable, but
merely permit another party to satisfy any liability incurred by the fiduciary in the same manner as insurance purchased under section 410(b)(3), are therefore not void under section 410(a).
Examples of such indemnification provisions are:

(1) Indemnification of a plan fiduciary by (a) an employer, any of whose employees are covered by the plan, or an affiliate (as defined in section 407(d)(7) of the Act) of such employer, or (b) an employee
organization, any of whose members are covered by the plan; and (2) Indemnification by a plan fiduciary of the fiduciary's employees who actually perform the fiduciary services.

The Department of Labor interprets section 410(a) as rendering void any arrangement for indemnification of a fiduciary of an employee benefit plan by the plan. Such an arrangement would have the same result as an exculpatory clause, in that it would, in effect, relieve the fiduciary of responsibility and liability to the plan by abrogating the plan's right to recovery from the fiduciary for breaches of fiduciary obligations. While indemnification arrangements do not contravene the provisions
of section 410(a), parties entering into an indemnification agreement should consider whether the agreement complies with the other provisions of part 4 of title I of the Act and with other applicable laws.

[40 FR 31599, July 28, 1975. Redesignated at 41 FR 1906, Jan. 13, 1976]

29 CFR 2509.75-6 - Interpretive bulletin relating to section 408(c)(2) of the Employee Retirement Income Security Act of 1974.

Section Number: 2509.75-6
Section Name: Interpretive bulletin relating to section 408(c)(2) of the Employee Retirement Income Security Act of 1974.

The Department of Labor today announced guidelines for determining when a party in interest with respect to an employee benefit plan may receive an advance for expenses to be incurred on behalf of the plan without engaging in a transaction prohibited by section 406 of the Employee Retirement Income Security Act of 1974. That section prohibits, among other things, any lending of money from a plan to a party in interest, or transfer to, or use by or for the benefit of, a party in interest of any assets of the plan, as well as any act whereby a fiduciary deals with the assets of a plan in his own interest or for his own account. However, section 408(c)(2) of the Act provides that nothing in section 406 of the Act shall be construed to prohibit the reimbursement by a plan of expenses properly and actually incurred by a fiduciary in the performance of his duties with the plan. Questions have arisen under
section 408(c)(2) of the Act as to whether a plan may reimburse a party in interest in the performance of his duties with the plan and as to whether a plan might make an advance to a fiduciary or other party in interest for expenses to be incurred in the future. The Department of Labor views the relevant provisions of section 408(c)(2) as clarifying the scope of section 406 so as to permit
reimbursement of fiduciaries for expenses incurred in the performance of their duties with a plan. Similarly, consistent with section 408(c)(2), section 406 is construed to permit the reimbursement by the plan of expenses properly and actually incurred by a party in interest in the
performance of his duties with the plan. If a plan makes an advance to a fiduciary or other party in interest to cover expenses to be properly and actually incurred by such person in
the performance of his duties with the plan, a prohibited transaction within the meaning of section 406 shall not occur when the plan makes the advance if--
(a) The amount of such advance is reasonable with respect to the amount of the expense which is likely to be properly and actually incurred in the immediate future (such as during the next month), and
(b) The party in interest accounts to the plan at the end of the period covered by the advance for the expenses actually incurred (whether computed on the basis of actual expenses incurred or on the
basis of actual transportation costs plus a reasonable per diem
allowance, where appropriate).

It should be noted, however, that despite the reasonableness of the amount of the advance and of the expenses underlying it, the question of whether incurring such expenses was prudent, and thus whether the advance was for reasonable expenses, is to be judged pursuant to section 404 of the Act (relating to fiduciary responsibilities).

[40 FR 31755, July 29, 1975. Redesignated at 41 FR 1906, Jan. 13, 1976]

29 CFR 2509.75-8 - Questions and answers relating to fiduciary responsibility under the Employee Retirement Income Security Act of 1974.

Section Number: 2509.75-8
Section Name: Questions and answers relating to fiduciary responsibility under the Employee Retirement Income Security Act of 1974.

The Department of Labor today issued questions and answers relating to certain aspects of fiduciary responsibility under the Act, thereby supplementing ERISA IB 75-5 (29 CFR 2555.75-5) which was issued on June 24, 1975, and published in the Federal Register on July 28, 1975 (40 FR 31598). Pending the issuance of regulations or other guidelines, persons may rely on the answers to these questions in order to resolve the issues that are specifically considered. No inferences should be drawn regarding issues not raised which may be suggested by a particular question and answer or as to why certain questions, and not others, are included. Furthermore, in applying the questions and answers, the effect of subsequent legislation, regulations, court decisions, and interpretive bulletins must be considered. To the extent that plans utilize or rely on these answers and the requirements of regulations subsequently adopted vary from the answers relied on, such plans may have to be amended. An index of the questions and answers, relating them to the appropriate sections of the Act, is also provided.

Index

Key to question prefixes: D--refers to definitions; FR--refers to fiduciary responsibility.

Section No.	Question No.
3(21)(A)	D-2, D-3, D-4, D-5.
3(38)	FR-15.
402(c)(1)	FR-12.
402(c)(2)	FR-15.
402(c)(3)	FR-15.
403(a)(2)	FR-15.
404(a)(1)(B)	FR-11, FR-17.
405(a)	FR-13, FR-14, FR-16.
405(c)(1)	FR-12, FR-15.
405(c)(2)	D-4, FR-13, FR-14, FR-16.
412	D-2.

Note: Questions D-2, D-3, D-4, and D-5 relate to not only section 3(21)(A) of title I of the Act, but also section 4975(e)(3) of the Internal Revenue Code (section 2003 of the Act). The Internal Revenue Service has indicated its concurrence with the answers to these questions.

D-2 Q: Are persons who have no power to make any decisions as to plan policy, interpretations, practices or procedures, but who perform the following administrative functions for an employee benefit plan, within a framework of policies, interpretations, rules, practices and procedures made by other persons,

fiduciaries with respect to the plan:
(1) Application of rules determining eligibility for participation or benefits;
(2) Calculation of services and compensation credits for benefits;
(3) Preparation of employee communications material;
(4) Maintenance of participants' service and employment records;
(5) Preparation of reports required by government agencies;
(6) Calculation of benefits;
(7) Orientation of new participants and advising participants of their rights and options under the plan;
(8) Collection of contributions and application of contributions as provided in the plan;
(9) Preparation of reports concerning participants' benefits;
(10) Processing of claims; and
(11) Making recommendations to others for decisions with respect to plan administration?

A: No. Only persons who perform one or more of the functions described in section 3(21)(A) of the Act with respect to an employee benefit plan are fiduciaries. Therefore, a person who performs purely ministerial functions such as the types described above for an employee benefit plan within a framework of policies, interpretations, rules, practices and procedures made by other persons is not a fiduciary because such person does not have discretionary authority or discretionary control respecting management of the plan, does not exercise any authority or control respecting management or disposition of the assets of the plan, and does not render investment advice with respect to any money or other property of the plan and has no authority or responsibility to do so. However, although such a person may not be a plan fiduciary, he may be subject to the bonding requirements contained in section 412 of the Act if he handles funds or other property of the plan within the meaning of applicable regulations. The Internal Revenue Service notes that such persons would not be considered plan fiduciaries within the meaning of section 4975(e)(3) of the Internal Revenue Code of 1954.

D-3 Q: Does a person automatically become a fiduciary with respect to a plan by reason of holding certain positions in the administration of such plan?

A: Some offices or positions of an employee benefit plan by their very nature require persons who hold them to perform one or more of the functions described in section 3(21)(A) of the Act. For example, a plan administrator or a trustee of a plan must, be the very nature of his position, have ``discretionary authority or discretionary responsibility in the administration'' of the plan within the meaning of section 3(21)(A)(iii) of the Act. Persons who hold such positions will therefore be fiduciaries. Other offices and positions should be examined to determine whether they involve the performance of any of the functions described in section 3(21)(A) of the Act. For example, a plan might designate as a ``benefit supervisor'' a plan employee whose sole function is to calculate the amount of benefits to which each plan participant is entitled in accordance with a mathematical formula contained in the written instrument pursuant to which the plan is maintained. The benefit supervisor, after calculating the benefits, would then inform the plan administrator of the results of his calculations, and the plan administrator would authorize the payment of benefits to a particular plan participant. The benefit supervisor does not perform any of the functions described in section 3(21)(A) of the Act and is not, therefore, a plan fiduciary. However, the plan might designate as a ``benefit supervisor'' a plan employee who has the final authority to authorize or disallow benefit payments in cases where a dispute exists as to the interpretation of plan provisions relating to eligibility for benefits. Under these circumstances, the benefit supervisor would be a fiduciary within the meaning of section 3(21)(A) of the Act. The Internal Revenue Service notes that it would reach the same answer to this question under section 4975(e)(3) of the Internal Revenue Code of 1954.

D-4 Q: In the case of a plan established and maintained by an employer, are members of the board of directors of the employer fiduciaries with respect to the plan?

A: Members of the board of directors of an employer which maintains an employee benefit plan will be

fiduciaries only to the extent that they have responsibility for the functions described in section 3(21)(A) of the Act. For example, the board of directors may be responsible for the selection and retention of plan fiduciaries. In such a case, members of the board of directors exercise ``discretionary authority or discretionary control respecting management of such plan'' and are,
therefore, fiduciaries with respect to the plan. However, their responsibility, and, consequently, their liability, is limited to the selection and retention of fiduciaries (apart from co-fiduciary liability arising under circumstances described in section 405(a) of the Act). In addition, if the directors are made named fiduciaries of the plan, their liability may be limited pursuant to a procedure provided
for in the plan instrument for the allocation of fiduciary responsibilities among named fiduciaries or for the designation of persons other than named fiduciaries to carry out fiduciary
responsibilities, as provided in section 405(c)(2).The Internal Revenue Service notes that it would reach the same answer to this question under section 4975(e)(3) of the Internal Revenue
Code of 1954.

D-5 Q: Is an officer or employee of an employer or employee organization which sponsors an employee benefit plan a fiduciary with respect to the plan solely by reason of holding such office or employment if he or she performs none of the functions described in section 3(21)(A) of the Act?

A: No, for the reasons stated in response to question D-2. The Internal Revenue Service notes that it would reach the same answer to this question under section 4975(e)(3) of the Internal Revenue
Code of 1954.

FR-11 Q: In discharging fiduciary responsibilities, may a fiduciary with respect to a plan rely on information, data, statistics or analyses provided by other persons who perform purely ministerial functions for such plan, such as those persons described in D-2 above?

A: A plan fiduciary may rely on information, data, statistics or analyses furnished by persons performing ministerial functions for the plan, provided that he has exercised prudence in the selection and retention of such persons. The plan fiduciary will be deemed to have acted prudently in such selection and retention if, in the exercise of ordinary care in such situation, he has no reason to doubt the competence, integrity or responsibility of such persons.

FR-12 Q: How many fiduciaries must an employee benefit plan have?

A: There is no required number of fiduciaries that a plan must have. Each plan must, of course, have at least one named fiduciary who serves as plan administrator and, if plan assets are held in trust, the plan must have at least one trustee. If these requirements are met, there is no limit on the number of fiduciaries a plan may have. A plan may have as few or as many fiduciaries as are necessary for its operation and administration. Under section 402(c)(1) of the Act, if the plan so provides, any person or group of persons may serve in more than one fiduciary capacity, including serving both as trustee and administrator. Conversely, fiduciary responsibilities not involving management and control of plan assets may, under section 405(c)(1) of the Act, be allocated among named fiduciaries and named fiduciaries may designate persons other than named fiduciaries to carry out such fiduciary responsibilities, if the plan instrument expressly provides procedures for such allocation or designation.

FR-13 Q: If the named fiduciaries of an employee benefit plan allocate their fiduciary responsibilities among themselves in accordance with a procedure set forth in the plan for the allocation of responsibilities for operation and administration of the plan, to what extent will a named fiduciary be relieved of liability for acts and omissions of other named fiduciaries in carrying out fiduciary
responsibilities allocated to them?

A: If named fiduciaries of a plan allocate responsibilities in accordance with a procedure for such allocation set forth in the plan, a named fiduciary will not be liable for acts and omissions of other named fiduciaries in carrying out fiduciary responsibilities which have been allocated to them, except as provided in section 405(a) of the Act, relating to the general rules of co-fiduciary responsibility, and section 405(c)(2)(A) of the

Act, relating in relevant part to standards for establishment and implementation of allocation procedures. However, if the instrument under which the plan is maintained does not provide for a procedure for the allocation of fiduciary responsibilities among named fiduciaries, any allocation which the named fiduciaries may make among themselves will be ineffective to relieve a named fiduciary from responsibility or liability for the performance of fiduciary responsibilities allocated to other named fiduciaries.

FR-14 Q: If the named fiduciaries of an employee benefit plan designate a person who is not a named fiduciary to carry out fiduciary responsibilities, to what extent will the named fiduciaries be relieved of liability for the acts and omissions of such person in the performance of his duties?

A: If the instrument under which the plan is maintained provides for a procedure under which a named fiduciary may designate persons who are not named fiduciaries to carry out fiduciary responsibilities, named fiduciaries of the plan will not be liable for acts and omissions of a person who is not a named fiduciary in carrying out the fiduciary responsibilities which such person has been designated to carry out, except as provided in section 405(a) of the Act, relating to the general rules of co-fiduciary liability, and section 405(c)(2)(A) of the Act, relating in relevant part to the designation of persons to carry out fiduciary responsibilities. However, if the instrument under which the plan is maintained does not provide for a procedure for the designation of persons who are not named fiduciaries to carry out fiduciary responsibilities, then any such designation which the named fiduciaries may make will not relieve the named fiduciaries from responsibility or liability for the acts and omissions of the persons so designated.

FR-15 Q: May a named fiduciary delegate responsibility for management and control of plan assets to anyone other than a person who is an investment manager as defined in section 3(38) of the Act so as to be relieved of liability for the acts and omissions of the person to whom such responsibility is delegated?

A: No. Section 405(c)(1) does not allow named fiduciaries to delegate to others authority ordiscretion to manage or control plan assets. However, under the terms of sections 403(a)(2) and 402(c)(3) of the Act, such authority and discretion may be delegated to persons who are investment managers as defined in section 3(38) of the Act. Further, under section 402(c)(2) of the Act, if the plan so provides, a named fiduciary may employ other persons to render advice to the named fiduciary to assist the named fiduciary in carrying out his investment responsibilities under the plan.

FR-16 Q: Is a fiduciary who is not a named fiduciary with respect to an employee benefit plan personally liable for all phases of the management and administration of the plan?

A: A fiduciary with respect to the plan who is not a named fiduciary is a fiduciary only to the extent that he or she performs one or more of the functions described in section 3(21)(A) of the Act. The personal liability of a fiduciary who is not a named fiduciary is generally limited to the fiduciary functions, which he or she performs with respect to the plan. With respect to the extent of liability of a named fiduciary of a plan where duties are properly allocated among named fiduciaries or where named fiduciaries properly designate other persons to carry out certain fiduciary duties, see question FR-13 and FR-14. In addition, any fiduciary may become liable for breaches of fiduciary responsibility committed by another fiduciary of the same plan under circumstances giving rise to co fiduciary liability, as provided in section 405(a) of the Act.

FR-17 Q: What are the ongoing responsibilities of a fiduciary who has appointed trustees or other fiduciaries with respect to these appointments?

A: At reasonable intervals the performance of trustees and other fiduciaries should be reviewed by the appointing fiduciary in such manner as may be reasonably expected to ensure that their performance has been in compliance with the terms of the plan and statutory standards, and satisfies the needs ofthe plan. No single procedure will be appropriate in all cases; the procedure adopted may vary in accordance with

the nature of the plan and other facts and circumstances relevant to the choice of the procedure.

Appendix E — Employee Benefit Law

Interpretive Bulletin 94-1

Economically Targeted Investments (Social Investing)

June 23, 1994 (59 FR 32606)

Summary
Establishes DOL position on permissibility of making investments which achieve a social goal in addition to a financial return. Indicates that ETIs are not prohibited by ERISA, and that their choice as an investment must follow DOL ERISA regulation 2550.404a-1 (Investment Duties), be prudent, not be a prohibited transaction, and not provide less return to a plan than a normal investment.

Interpretive Bulletin

Agency: Pension and Welfare Benefits Administration, Labor Department

Action: Interpretive Bulletin

Summary: This document sets forth the view of the Department of Labor (the Department) concerning the legal standard imposed by sections 403 and 404 of Part 4 of Title I of the Employee Retirement Income Security Act of 1974 (ERISA) with respect to a plan fiduciary's decision to invest plan assets in "economically targeted investments" (ETIs). ETIs are generally defined as investments that are selected for the economic benefits they create in addition to the investment return to the employee benefit plan investor. In this document, the Department states that the requirements of sections 403 and 404 do not prevent plan fiduciaries from deciding to invest plan assets in an ETI if the ETI has an expected rate of return that is commensurate to rates of return of alternative investments with similar risk characteristics that are available to the plan, and if the ETI is otherwise an appropriate investment for the plan in terms of such factors as diversification and the investment policy of the plan.

Effective Date: January 1, 1975

Interpretive Bulletin

Section 2509.94-1

Interpretive Bulletin Relating to the fiduciary standard under ERISA

in considering economically targeted investments

This Interpretive Bulletin sets forth the Department of Labor's interpretation of sections 403 and 404 of the Employee Retirement Income Security Act of 1974 (ERISA), as applied to employee benefit plan investments in "economically targeted investments" (ETIs), that is, investments selected for the economic benefits they create apart from their investment return to the employee benefit plan. Sections 403 and 404, in part, require that a fiduciary of a plan act prudently, and to diversify plan investments so as to minimize the risk of large losses, unless under the circumstances, it is clearly prudent not to do so. In addition, these sections require that a fiduciary act solely in the interest of the plan's participants and beneficiaries and for the exclusive purpose of providing benefits to their participants and beneficiaries. The Department has construed the requirements that a fiduciary act solely in the interest of, and for the exclusive purpose of providing benefits to,

participants and beneficiaries as prohibiting a fiduciary from subordinating the interests of participants and beneficiaries in their retirement income to unrelated objectives.

With regard to investing plan assets, the Department has issued a regulation, at 29 C.F.R. 2550.404a-1, interpreting the prudence requirements of ERISA as they apply to the investment duties of fiduciaries of employee benefit plans. The regulation provides that the prudence requirements of section 404(a)(1)(B) are satisfied if -

1. The fiduciary making an investment or engaging in an investment course of action has given appropriate consideration to those facts and circumstances that, given the scope of the fiduciary's investment duties, the fiduciary knows or should know are relevant, and
2. The fiduciary acts accordingly.

This includes giving appropriate consideration to the role that the investment or investment course of action plays (in terms or such factors as diversification, liquidity and risk/return characteristics) with respect to that portion of the plan's investment portfolio within the scope of the fiduciary's responsibility.

Other facts and circumstances relevant to an investment or investment course of action would, in the view of the Department, include consideration of the expected return on alternative investments with similar risks available to the plan. It follows that, because every investment necessarily causes a plan to forgo other investment opportunities, an investment will not be prudent if it would be expected to provide a plan with a lower rate of return than available alternative investments with commensurate degrees of risk or is riskier than alternative available investments with commensurate rates of return.

The fiduciary standards applicable to ETIs are no different than the standards applicable to plan investments generally. Therefore, if the above requirements are met, the selection of an ETI, or the engaging in an investment course of action intended to result in the selection of ETIs, will not violate section 404(a)(1)(A) and (B) and the exclusive purpose requirements of section 403.

Interpretive Bulletin 94-2

Voting of Proxies and Investment Policies

July 29, 1994 (59 FR 38860)

Summary
Establishes DOL position on (1) the desirability of plan investment policies, and when such policies must be followed as a "plan document" under ERISA 404(a)(1)(D); and (2) responsibilities by trustees, named fiduciaries, and investment managers (including collective investment funds) to vote proxies.

Interpretive Bulletin

Agency: Department of Labor.

Action: Interpretive Bulletin.

Summary: This document summarizes the Department of Labor's (the

Department) statements with respect to the duty of employee benefit plan fiduciaries to vote proxies appurtenant to shares of corporate stock held by their plans. In these statements, the Department has explained, among other things, that the voting of proxies is a fiduciary act of plan asset management This document also describes the Department's view of the legal standards imposed by sections 402(c)(3), 403(a) and 404(a)(1)(B) of part 4 of title I of the Employee Retirement Income Security Act of 1974 (ERISA) on the use of written statements of investment policy, including statements of proxy voting policy or guidelines. The bulletin makes clear that a named fiduciary who appoints an investment manager may, consistent with its fiduciary obligations, issue written statements of investment policy, including guidelines as to the voting of proxies by the investment manager. Moreover, an investment manager may be required to comply with such investment policies to the extent that any given investment decision (including a proxy voting decision) is consistent with the provisions of title I or title IV of ERISA. Finally, this document provides guidance concerning the appropriateness under ERISA of more active monitoring of corporate management by fiduciaries of plans that own corporate securities.

Effective Date: January 1, 1975

Interpretive Bulletin

This interpretive bulletin sets forth the Department of Labor's (the Department) interpretation of sections 402, 403 and 404 of the Employee Retirement Income Security Act of 1974 (ERISA) as those sections apply to voting of proxies on securities held in employee benefit plan investment portfolios and the maintenance of and compliance with statements of investment policy, including proxy voting policy. In addition, this interpretive bulletin provides guidance on the appropriateness under ERISA of active monitoring of corporate management by plan fiduciaries.

1. Proxy Voting

    The fiduciary act of managing plan assets that are shares of corporate stock includes the voting of proxies appurtenant to those shares of stock. As a result, the responsibility for voting proxies lies exclusively with the plan trustee except to the extent that either (1) the trustee is subject to the directions of a named fiduciary pursuant to ERISA § 403(a)(1); or (2) the power to manage, acquire or dispose of the relevant assets has been delegated by a named fiduciary to one or more investment managers pursuant to ERISA § 403(a)(2). Where the authority to manage plan assets has been delegated to an investment manager pursuant to § 403(a)(2), no person other than the investment manager has authority to vote proxies appurtenant to such plan assets except to the extent that the named fiduciary has reserved to itself (or to another named fiduciary so authorized by the plan document) the right to direct a plan trustee regarding the voting of proxies. In this regard, a named fiduciary, in delegating investment management authority to an investment manager, could reserve to itself the right to direct a trustee with respect to the voting of all proxies or reserve to itself the right to direct a trustee as to the voting of only those proxies relating to specified assets or issues.

    If the plan document or investment management agreement provides that the investment manager is not required to vote proxies, but does not expressly preclude the investment manager from voting proxies, the investment manager would have exclusive responsibility for voting proxies. Moreover, an investment manager would not be relieved of its own fiduciary responsibilities by following directions of some other person regarding the voting of proxies, or by delegating such responsibility to another person. If, however, the plan document or the investment management contract expressly precludes the investment manager from voting proxies, the responsibility for voting proxies would lie exclusively with the trustee. The trustee, however, consistent with the requirements of ERISA § 403(a)(1), may be subject to the directions of a named fiduciary if the plan so provides.

    The fiduciary duties described at ERISA § 404(a)(1)(A) and (B), require that, in voting proxies, the responsible fiduciary consider those factors that may affect the value of the plan's investment and not subordinate the interests of the participants and beneficiaries in their retirement income to unrelated objectives. These duties also require that the named fiduciary appointing an investment manager periodically monitor the activities of the investment manager with respect to the management of plan assets, including decisions made and actions taken by the investment manager with regard to proxy voting decisions. The named fiduciary must carry out this responsibility solely in the interest of the participants and beneficiaries and without regard to its relationship to the plan sponsor.

    It is the view of the Department that compliance with the duty to monitor necessitates proper documentation of the activities that are subject to monitoring. Thus, the investment manager or other responsible fiduciary would be required to maintain accurate records as to proxy voting. Moreover, if the named fiduciary is to be able to carry out its responsibilities under ERISA § 404(a) in determining whether the investment manager is fulfilling its fiduciary obligations in investing plans assets in a manner that justifies the continuation of the management appointment, the proxy voting records must enable the named fiduciary to review not only the investment manager's voting procedure with respect to plan-owned stock, but also to review the actions taken in individual proxy voting situations.

    The fiduciary obligations of prudence and loyalty to plan participants and beneficiaries require the responsible fiduciary to vote proxies on issues that may affect the value of the plan's investment. Although the same principles apply for proxies appurtenant to shares of foreign corporations, the Department recognizes that in voting such proxies, plans may, in some cases, incur additional costs. Thus, a fiduciary should consider whether the plan's vote, either by itself or together with the votes of other shareholders, is expected to have an effect on the value of the plan's investment that will outweigh the cost of voting. Moreover, a fiduciary, in deciding whether to purchase shares of a foreign corporation, should consider whether the difficulty and expense in voting the shares is reflected in their

market price.

2. Statements of Investment Policy

The maintenance by an employee benefit plan of a statement of investment policy designed to further the purposes of the plan and its funding policy is consistent with the fiduciary obligations set forth in ERISA § 404(a)(1)(A) and (B). Since the fiduciary act of managing plan assets that are shares of corporate stock includes the voting of proxies appurtenant to those shares of stock, a statement of proxy voting policy would be an important part of any comprehensive statement of investment policy. For purposes of this document, the term "statement of investment policy" means a written statement that provides the fiduciaries who are responsible for plan investments with guidelines or general instructions concerning various types or categories of investment management decisions, which may include proxy voting decisions. A statement of investment policy is distinguished from directions as to the purchase or sale of a specific investment at a specific time or as to voting specific plan proxies.

In plans where investment management responsibility is delegated to one or more investment managers appointed by the named fiduciary pursuant to ERISA § 402(c)(3), inherent in the authority to appoint an investment manager, the named fiduciary responsible for appointment of investment managers has the authority to condition the appointment on acceptance of a statement of investment policy. Thus, such a named fiduciary may expressly require, as a condition of the investment management agreement, that an investment manager comply with the terms of a statement of investment policy which sets forth guidelines concerning investments and investment courses of action which the investment manager is authorized or is not authorized to make. Such investment policy may include a policy or guidelines on the voting of proxies on shares of stock for which the investment manager is responsible. In the absence of such an express requirement to comply with an investment policy, the authority to manage the plan assets placed under the control of the investment manager would lie exclusively with the investment manager. Although a trustee may be subject to the directions of a named fiduciary pursuant to ERISA § 403(a)(1), an investment manager who has authority to make investment decisions, including proxy voting decisions, would never be relieved of its fiduciary responsibility if it followed directions as to specific investment decisions from the named fiduciary or any other person.

Statements of investment policy issued by a named fiduciary authorized to appoint investment managers would be part of the "documents and instruments governing the plan" within the meaning of ERISA § 404(a)(1)(D). An investment manager to whom such investment policy applies would be required to comply with such policy, pursuant to ERISA § 404(a)(1)(D) insofar as the policy directives or guidelines are consistent with titles I and IV of ERISA. Therefore, if, for example, compliance with the guidelines in a given instance would be imprudent then the investment manager's failure to follow the guidelines would not violate ERISA § 404(a)(1)(D). Moreover, ERISA § 404(a)(1)(D) does not shield the investment manager from liability for imprudent actions taken in compliance with a statement of investment policy.

The plan document or trust agreement may expressly provide a statement of investment policy to guide the trustee or may authorize a named fiduciary to issue a statement of investment policy applicable to a trustee. Where a plan trustee is subject to an investment policy, the trustee's duty to comply with such investment policy would also be analyzed under ERISA § 404(a)(1)(D). Thus, the trustee would be required to comply with the statement of investment policy unless, for example, it would be imprudent to do so in a given instance.

Maintenance of a statement of investment policy by a named fiduciary does not relieve the named fiduciary of its obligations under ERISA § 404(a) with respect to the appointment and monitoring of an investment manager or trustee. In this regard, the named fiduciary appointing an investment manager must periodically monitor the investment manager's activities with respect to management of the plan assets. Moreover, compliance with ERISA § 404(a)(1)(B) would require maintenance of proper documentation of the activities of the investment manager and of the named fiduciary of the plan in monitoring the activities of the investment manager. In addition, in the view of the Department, a named fiduciary's determination of the terms of a statement of investment policy is an exercise of fiduciary responsibility and, as such, statements may need to take into account factors such as the plan's funding policy and its liquidity needs as well as issues of prudence, diversification and other fiduciary requirements of ERISA.

An investment manager of a pooled investment vehicle that holds assets of more than one employee benefit plan may be subject to a proxy voting policy of one plan that conflicts with the proxy voting

policy of another plan. Compliance with ERISA § 404(a)(1)(D) would require such investment manager to reconcile, insofar as possible, the conflicting policies (assuming compliance with each policy would be consistent with ERISA § 404(a)(1)(D)) and, if necessary and to the extent permitted by applicable law, vote the relevant proxies to reflect such policies in proportion to each plan's interest in the pooled investment vehicle. If, however, the investment manager determines that compliance with conflicting voting policies would violate ERISA § 404(a)(1)(D) in a particular instance, for example, by being imprudent or not solely in the interest of plan participants, the investment manager would be required to ignore the voting policy that would violate ERISA § 404(a)(1)(D) in that instance. Such an investment manager may, however, require participating investors to accept the investment manager's own investment policy statement, including any statement of proxy voting policy, before they are allowed to invest. As with investment policies originating from named fiduciaries, a policy initiated by an investment manager and adopted by the participating plans would be regarded as an instrument governing the participating plans, and the investment manager's compliance with such a policy would be governed by ERISA § 404(a)(1)(D).

3. Shareholder Activism

An investment policy that contemplates activities intended to monitor or influence the management of corporations in which the plan owns stock is consistent with a fiduciary's obligations under ERISA where the responsible fiduciary concludes that there is a reasonable expectation that such monitoring or communication with management, by the plan alone or together with other shareholders, is likely to enhance the value of the plan's investment in the corporation, after taking into account the costs involved. Such a reasonable expectation may exist in various circumstances, for example, where plan investments in corporate stock are held as long-term investments or where a plan may not be able to easily dispose such an investment. Active monitoring and communication activities would generally concern such issues as the independence and expertise of candidates for the corporation's board of directors and assuring that the board has sufficient information to carry out its responsibility to monitor management. Other issues may include such matters as consideration of the appropriateness of executive compensation, the corporation's policy regarding mergers and acquisitions, the extent of debt financing and capitalization, the nature of long-term business plans, the corporation's investment in training to develop its work force, other workplace practices and financial and nonfinancial measures of corporate performance. Active monitoring and communication may be carried out through a variety of methods including by means of correspondence and meetings with corporate management as well as by exercising the legal rights of a shareholder.

Interpretive Bulletin 94-3

In-Kind Contributions to Employee Benefit Plans

December 28, 1994 (59 FR 66735)

Summary	
Covers non-cash ("in-kind") contributions to ERISA plans. Establishes DOL positions on whether the contributions constitute a prohibited transaction and what a fiduciary must consider before accepting them.	
I	For defined benefit plans, indicates that an in-kind contribution is a prohibited transaction.
I	For defined contribution plans, in-kind contributions may be acceptable, depending on the circumstances and provisions of the plan document. For these plans, a fiduciary must consider the fiduciary responsibility factors in ERISA § 404 in weighing whether to accept an in-kind contribution.

Interpretive Bulletin

Agency: Pension and Welfare Benefits Administration, Department of Labor

Action: Interpretive Bulletin.

Summary: This document provides guidance on in-kind contributions to employee benefit plans under the Employee Retirement Income Security Act of 1974 (ERISA) and plans under section 4975 of the Internal Revenue Code (the Code). The Supreme Court addressed certain in-kind contributions to defined benefit pensions plans in *Commissioner of Internal Revenue v. Keystone Consolidated Industries, Inc.*, U.S. 113 S. Ct. 2006 (1993). The Court in *Keystone* held that an employer's contribution of unencumbered real properties to a tax-qualified defined benefit pension plan in satisfaction of the employer's funding obligation is a "sale or exchange" prohibited by section 4975(c)(1)(A) of the Code. Section 406(a)(1)(A) of ERISA is a parallel provision to section 4975(c)(1)(A) of the Code but applies to a different group of plans. This document sets forth the Department's view that in-kind contributions (for example, contributions of any property other than cash) that reduce an obligation to the plan constitute prohibited transactions under section 4975(c)(1)(A) of the Code and section 406(a)(1)(A) of ERISA.

Effective Date: The guidance announced in this bulletin is effective January 1, 1975.

Interpretive Bulletin

Part 2509

Interpretive Bulletin

Relating to In-Kind Contributions to Employee Benefit Plans.

a. *General*. This bulletin sets forth the views of the Department of Labor (the Department) concerning in-kind contributions (for example, contributions of property other than cash) in satisfaction of an obligation to contribute to an employee benefit plan to which part 4 of Title I of the Employee Retirement income Security Act of 1974 (ERISA) or a plan to which section 4975 of the Internal Revenue Code (the Code) applies. (For purposes of this document the term "plan" shall refer to either or both types of such entities as appropriate). Section 406(a)(1)(A) of ERISA provider that a fiduciary with respect to a plan shall not cause the plan to engage in a transaction if the fiduciary knows or should know that the transaction constitutes a direct or indirect sale or exchange of any property between a plan and a party in interest" as defined in section 3(14) of ERISA. The Code imposes a two-tier excise tax under section 4975(c)(1)(A) an any direct or indirect sale or exchange of any property between a plan and a "disqualified person" as defined in section 4975(e)(2) of the Code. An employer or employee organization that maintains a plan is included within the definitions of "party in interest" and "disqualified person."[1]

   In *Commissioner of Internal Revenue v. Keystone Consolidated Industries, Inc.*, U.S. , 113 S. Ct. 2006 (1993), the Supreme Court held that an employer's contribution of unencumbered real property to a tax-qualified defined benefit pension plan was a sale or exchange prohibited under section 4975 of the Code where the stated fair market value of the property was credited against the employer's obligation to the defined benefit pension plan. The parties stipulated that the property was contributed to the plan free of encumbrances and the stated fair market value of the property was not challenged. 113 S. Ct. at 2009. In reaching its holding the Court construed section 4975(f)(3) of the Code (and therefore section 406(c) of ERISA), regarding transfers of encumbered property, not as a limitation but rather as extending the reach of section 4975(c)(1)(A) of the Code (and thus section 406(a)(1)(A) of ERISA) to include contributions of encumbered property that do not satisfy funding obligations. *Id*. at 2013. Accordingly, the Court concluded that the contribution of unencumbered property was prohibited under section 4975(c)(1)(A) of the Code (and thus section 406(a)(1)(A) of ERISA) as "at least both an indirect type of sale and a form of exchange, since the property is exchanged for diminution of the employer's funding obligation." 113 S. Ct. at 2012.

b. *Defined benefit plans*. Consistent with the reasoning of the Supreme Court in *Keystone*, because an employer's or plan sponsor's in-kind contribution to a defined benefit pension plan is credited to the plan's funding standard account it would constitute a transfer to reduce an obligation of the sponsor or employer to the plan. Therefore, in the absence of an applicable exemption, such a contribution would be prohibited under section 406(a)(1)(A) of ERISA and section 4975(c)(1)(A) of the Code. Such an in-kind contribution would constitute a prohibited transaction even if the value of the contribution is in excess of the sponsor's or employer's funding obligation for the plan year in which the contribution is made and thus is not used to reduce the plan's accumulated funding deficiency for that plan year because the contribution would result in a credit against funding obligations which might arise in the future.
c. *Defined contribution and welfare plans*. In the context of defined contribution pension plans and welfare plans, it is the view of the Department that an in-kind contribution to a plan that reduces an obligation of

a plan sponsor or employer to make a contribution measured in terms of cash amounts would constitute a prohibited transaction under section 406(a)(1)(A) of ERISA (and section 4975(c)(1)(A) of the Code) unless a statutory or administrative exemption under section 408 of ERISA (or sections 4975(c)(2) or (d) of the Code) applies. For example, if a profit sharing plan required the employer to make annual contributions "in cash or in kind" equal to a given percentage of the employer's net profits for the year, an in-kind contribution used to reduce this obligation would constitute a prohibited transaction in the absence of an exemption because the amount of the contribution obligation is measured in terms of cash amounts (a percentage of profits) even though the terms of the plan purport to permit in-kind contributions.

Conversely, a transfer of unencumbered property to a welfare benefit plan that does not relieve the sponsor or employer of any present or future obligation to make a contribution that is measured in terms of cash amounts would not constitute a prohibited transaction under section 406(a)(1)(A) of ERISA or section 4975(c)(1)(A) of the Code . The same principles apply to defined contribution plans that are not subject to the minimum funding requirements of section 302 of ERISA or section 412 of the Code. For example, where a profit sharing or stock bonus plan, by its terms, is funded solely at the discretion of the sponsoring employer, and the employer is not otherwise obligated to make a contribution measured in terms of cash amounts, a contribution of unencumbered real property would not be a prohibited sale or exchange between the plan and the employer. If, however, the same employer had made an enforceable promise to make a contribution measured in terms of cash amounts to the plan, a subsequent contribution of unencumbered real property made to offset such an obligation would be a prohibited sale or exchange.

d. *Fiduciary standards*. Independent of the application of the prohibited transaction provisions, fiduciaries of plans covered by part 4 of Title I of ERISA must determine that acceptance of an in-kind contribution is consistent with ERISA's general standards of fiduciary conduct. It is the view of the Department that acceptance of an in-kind contribution is a fiduciary act subject to section 404 of ERISA. In this regard, Sections 406(a)(1)(A), and (B) of ERISA require that fiduciaries discharge their duties to a plan solely in the interests of the participants and beneficiaries, for the exclusive purpose of providing benefits and defraying reasonable administrative expenses, and with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. In addition, section 404(a)(1)(C) requires generally that fiduciaries diversify plan assets so as to minimize the risk of large losses. Accordingly, the fiduciaries of a plan must act "prudently," "solely in the interest" of the plan's participants and beneficiaries and with view to the need to diversify plan assets when deciding whether to accept in-kind contributions. If accepting an in-kind contribution is not "prudent," not "solely in the interest" of the participants and beneficiaries of the plan, or would result in an improper lack of diversification of plan assets, the responsible fiduciaries of the plan would be liable for any losses resulting from such a breach of fiduciary responsibility, even if a contribution in kind does not constitute a prohibited transaction under section 406 of ERISA. In this regard a fiduciary, should consider any liabilities appurtenant to the in-kind contribution to which the plan would be exposed as a result of acceptance of the contribution.

Footnote

1 Under Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), the authority of the Secretary of the Treasury to issue rulings under the prohibited transactions provisions of section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. Except with respect to the types of plans covered, the prohibited transaction provisions of section 406 of ERISA generally parallel the prohibited transaction provisions of section 4975 of the Code.

Interpretive Bulletin 96-1

29 C.F.R. Part 2509.96-1

Participant Investment Education for Individual Account [404(c)] Plans

June 11, 1996 (61 FR 29586)

Summary

Applicable to "individual account plans" (employer-sponsored plans which provide for self-directed investments), such as 401(k) plans. Provides information on the requirement to provide participants with sufficient information to make informed decisions about the investment vehicles available under the plan.
Cross Reference: See Section (b)(2)(B)(1) of DOL ERISA Regulation 2550.404c-1.

Interpretive Bulletin

Agency: Pension and Welfare Benefits Administration, Labor.

Action: Interpretive bulletin.

Summary: This interpretive bulletin sets forth the views of the Department of Labor (the Department) concerning the circumstances under which the provision of investment-related information to participants and beneficiaries in participant-directed individual account pension plans will not constitute the rendering of "investment advice" under the Employee Retirement Income Security Act of 1974, as amended (ERISA). This guidance is intended to assist plan sponsors, service providers, participants and beneficiaries in determining when activities designed to educate and assist participants and beneficiaries in making informed investment decisions will not cause persons engaged in such activities to become fiduciaries with respect to a plan by virtue of providing "investment advice" to plan participants and beneficiaries for a fee or other compensation.

Effective Date: January 1, 1975.

Mannina, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, DC 20210, telephone (202) 219-4592. These are not toll-free numbers.

Supplementary Information: In order to provide a concise and ready reference to its interpretations of ERISA, the Department publishes its interpretive bulletins in the Rules and Regulations section of the Federal Register. Published in this issue of the Federal Register is ERISA Interpretive Bulletin 96-1, which interprets section 3(21)(A)(ii), 29 USC 1002(21)(A)(ii), and the Department's regulation issued thereunder at 29 C.F.R. 2510.3-21(c). The Department is publishing this interpretive bulletin because it believes there is a need to clarify the circumstances under which the provision of investment-related information to participants and beneficiaries will not give rise to fiduciary status under ERISA section 3(21)(A)(ii). (Sec. 505, Pub. L. 93-406, 88 Stat. 894 (29 USC 1135).)

Background

With the growth of participant-directed individual account pension plans, more employees are directing the investment of their pension plan assets and, thereby, assuming more responsibility for ensuring the adequacy of their retirement income.* At the same time, there has been an increasing concern on the part of the Department, employers and others that many participants may not have a sufficient understanding of investment principles and strategies to make their own informed investment decisions. It has been represented to the Department that, while a number of employers sponsoring participant-directed individual account pension plans have instituted programs intended to educate their employees about investment principles, financial planning and retirement, many employers have not offered programs or offered only limited programs due to uncertainty regarding the extent to which the provision of investment-related information may be considered the rendering of "investment advice" under section 3(21)(A)(ii) of ERISA, resulting in fiduciary responsibility and potential liability in connection with participant-directed investments. Although section 404(c) of ERISA, 29 USC 1104(c), and the Department's regulations, at 29 C.F.R. 2550.404c-1, provide limited relief from liability for fiduciaries of pension plans that permit a participant or beneficiary to exercise control over the assets in his or her individual account, there remains a need for employers and others who provide investment information with respect to pension plan assets to know what standards apply in determining whether an

education activity may give rise to fiduciary status.

In view of the important role that investment education can play in assisting participants and beneficiaries in making informed investment and retirement-related decisions and the uncertainty relating to the fiduciary implications of providing investment-related information to participants and beneficiaries, the Department is clarifying, herein, the application of ERISA's definition of the term "fiduciary with respect to a plan" in section 3(21)(A)(ii) to the provision of investment-related information to participants and beneficiaries.

Interpretive Bulletin 96-1 identifies categories of information and materials regarding participant-directed individual account pension plans that do not, in the view of the Department, constitute "investment advice" under the definition of "fiduciary" in ERISA section 3(21)(A)(ii) and the corresponding regulation at 29 C.F.R. 2510.3-21(c)(1). The interpretive bulletin points out, in effect, a series of graduated safe harbors under ERISA for plan sponsors and service providers who provide participants and beneficiaries with four increasingly specific categories of investment information and materials -- plan information, general financial and investment information, asset allocation models and interactive investment materials -- as described in paragraph (d) of IB 96-1.

Comments on the Interpretive Bulletin

Interpretive Bulletin 96-1 was developed following extensive review of educational materials currently being provided by plan sponsors and service providers to participants. To further ensure that the guidance provided would be helpful, and would promote increased and improved participant education efforts, the Department also released an exposure draft of the interpretive bulletin for public comment. The response to the exposure draft was overwhelmingly positive. Both plan sponsor and service provider representatives unequivocally agreed that the guidance as drafted would strengthen participant investment education, and urged the Department to proceed as expeditiously as possible to adopt the interpretive bulletin. The commenters also suggested various technical and clarifying changes which, as discussed below, have been included in the interpretive bulletin.

Identifying Specific Investment Alternatives in Model Asset Allocations

The most frequent comment on the exposure draft concerned the safe harbor provision in paragraphs (d)(3) (asset allocation models) and (d)(4) (interactive investment materials) that if a model asset allocation identifies or matches any specific investment alternative available under the plan with a generic asset class, then all investment alternatives under the plan with similar risk and return characteristics must be similarly identified or matched. The commenters were concerned that in plans with investment alternatives offered by multiple service providers it would be difficult, and possibly inappropriate, for one service provider to identify and describe a competitor's products.

The requirement to identify other investment alternatives within an asset class was intended to address the concern that a service provider could effectively steer participants to a specific investment alternative by identifying only one particular fund in connection with an asset allocation model. Where it is possible to identify other investment alternatives within an asset class, the Department encourages service providers to do so. In response to the comments, however, safe harbors (d)(3) and (d)(4) have been revised to provide that, where an asset allocation model identifies any specific investment alternative available under the plan, an accompanying statement must indicate that other investment alternatives having similar risk and return characteristics may be available under the plan, and must identify where information on those investment alternatives may be obtained.

The Fiduciary Safe Harbors and Section 404(c)

Several commenters requested clarification of the statement in the exposure draft that issues relating to the circumstances under which information provided to participants and beneficiaries may affect their ability to exercise independent control for purposes of 404(c) are outside the scope of the IB. The commenters were concerned that activities which come within one of the safe harbors for participant education may nevertheless be viewed by the Department as compromising a participant's or beneficiary's ability to exercise independent control under section 404(c).

Whether a participant or beneficiary has exercised independent control over the assets in his or her individual account pursuant to section 404(c) is necessarily a factual inquiry. In general, however, the types of educational programs described in the safe harbors do not, in the view of the Department, raise issues under section 404(c). Accordingly, footnote 2 of IB 96-1 makes clear that the provision of investment-related information and materials to participants and beneficiaries in accordance with paragraph (d) of the IB will not, in and of itself, affect the availability of relief from the fiduciary responsibility provisions of ERISA that is

provided by section 404(c).

Applying Asset Allocations to Individual Participants and Beneficiaries

A number of commenters asked the Department to clarify the requirement to provide a statement that individual participants and beneficiaries should consider their other assets, income or investments (outside of the plan) when applying an asset allocation model or using interactive investment materials. The commenters pointed out that, in many instances, interactive models or materials already take into account an individual's other assets. Accordingly, they requested clarification that such models or materials come within the safe harbor in paragraph (d)(4). Commenters were also concerned that given the rationale for the safe harbor in paragraph (d)(4) -- i.e. that interactive investment models or materials enable participants and beneficiaries independently to design and assess multiple asset allocation models -- the Department may have intended to exclude from the safe harbors situations in which service providers assist individual participants or beneficiaries to develop possible asset allocation models based upon their personal financial information.

The provisions of the safe harbors are designed to ensure that participants and beneficiaries will have adequate information to enable them to make their own, informed asset allocation decisions. The Department has clarified that the safe harbor in paragraph (d)(4) for interactive investment materials would not be unavailable merely because the asset allocation models generated by the materials take into account a participant's or beneficiary's non-plan assets, income and investments. Nor does the Department consider that the safe harbor would be unavailable merely because participants and beneficiaries receive personal assistance in developing model asset allocations. In this regard, paragraph (d) of the IB states that providing the categories of information identified in paragraph (d) will not in and of itself constitute the rendering of "investment advice" irrespective of the form in which the materials are provided (e.g., whether on an individual or group basis, in writing or orally, or via video or computer software). The interpretive bulletin also makes clear that information and materials within each category may be furnished alone or combined with information and materials from other categories. For example, general financial and investment information on estimating future retirement income needs, determining investment time horizons and assessing risk tolerance, as described in paragraph (d)(2), may be combined with interactive investment materials described in paragraph (d)(4) in order to assist participants and beneficiaries to relate basic retirement planning concepts to their individual situations.

Generally Accepted Investment Theories

Several commenters requested clarification of the requirement that asset allocation models and interactive investment materials must be based on "generally accepted investment theories that take into account the historic returns of different asset classes (e.g., equities, bonds, or cash) over defined periods of time." The Department included this requirement to assure that, for purposes of the safe harbors, any models or materials presented to participants or beneficiaries will be consistent with widely accepted principles of modern portfolio theory, recognizing the relationship between risk and return, the historic returns of different asset classes, and the importance of diversification.

Plan Sponsor or Fiduciary Endorsements of Service Providers

The commenters also requested clarification regarding the circumstances in which a plan sponsor or fiduciary may be viewed as having fiduciary responsibility by virtue of endorsing a third party who has been selected by a participant or beneficiary to provide participant education or investment advice. Commenters noted, for example, that a plan sponsor may wish merely to provide office space or make computer terminals available for use by a service provider that has been selected by a participant or beneficiary to provide investment education using interactive materials. Whether a plan sponsor or fiduciary has effectively endorsed or made an arrangement with a particular service provider is an inherently factual inquiry which depends upon all the relevant facts and circumstances. It is the Department's view, however, that a uniformly applied policy of providing office space or computer terminals for use by participants or beneficiaries who have independently selected a service provider to provide investment education would not, in and of itself, constitute an endorsement of or arrangement with the service provider for purposes of the IB.

Participation Rates, Contribution Levels and Pre-retirement Withdrawals

With the objective of distinguishing between investment education and investment advice, IB 96-1 focuses primarily on educational activities relating to investment decision-making. However, as suggested in a recent study by the Employee Benefits Research Institute (EBRI), which was commissioned by the Department of Labor, plan participants also need to be informed about the impact on retirement savings of pre-retirement withdrawals and other fundamental principles regarding plan participation and contribution levels. According to the EBRI study, the impact of pre-retirement withdrawals on retirement income is one of the least often

provided topics and could have serious consequences for the adequacy of employees' retirement income. The Department, therefore, encourages educational service providers to emphasize that participants should: (1) participate in available plans as soon as they are eligible; (2) make the maximum contribution possible to the plan; and(3) if they change employment, refrain from withdrawing their retirement savings, and opt instead to directly transfer or roll over their plan account into an IRA or other retirement vehicle. Such information relating to plan participation is specifically encompassed within the safe harbor in paragraph (d)(1) of IB 96-1.

Application of the Investment Advisers Act of 1940

Employer sponsors of participant-directed individual account pension plans that provide investment-related information to employees who are participants in those plans have also raised questions regarding their status under the Investment Advisers Act of 1940, 15 USC 80b-1 et seq., ("Advisers Act"). In this regard, the staff of the Division of Investment Management of the Securities and Exchange Commission (SEC) has advised the Department of Labor that, generally, employers who provide their employees with investment information including, but not limited to, the type described in paragraph (d) of IB 96-1 would not be subject to registration or regulation under the Advisers Act. This position applies only to employers who provide such information, and not to third-party service providers, whose status under the Adviser's Act must be determined independently. See Letters from Jack W. Murphy, Associate Director (Chief Counsel), Division of Investment Management, SEC, to Olena Berg, Assistant Secretary, Pension and Welfare Benefit Administration, U.S. Department of Labor, dated February 22, 1996, and December 5, 1995. Persons who have questions regarding this issue are directed to contact the Office of the Chief Counsel, Division of Investment Management, at (202) 942-0660. This is not a toll free number.

Interpretive Bulletin

For the reasons set forth above, Part 2509 of Title 29 of The Code of Federal Regulations is amended as follows:

a. *Scope*. This interpretive bulletin sets forth the Department of Labor's interpretation of section 3(21)(A)(ii) of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and 29 C.F.R. 2510.3-21(c) as applied to the provision of investment-related educational information to participants and beneficiaries in participant-directed individual account pension plans (i.e., pension plans that permit participants and beneficiaries to direct the investment of assets in their individual accounts, including plans that meet the requirements of the Department's regulations at 29 C.F.R. 2550.404c-1).
b. *General*. Fiduciaries of an employee benefit plan are charged with carrying out their duties prudently and solely in the interest of participants and beneficiaries of the plan, and are subject to personal liability to, among other things, make good any losses to the plan resulting from a breach of their fiduciary duties. ERISA sections 403, 404 and 409, 29 USC 1103, 1104, and 1109. Section 404(c) of ERISA provides a limited exception to these rules for a pension plan that permits a participant or beneficiary to exercise control over the assets in his or her individual account. The Department of Labor's regulation, at 29 C.F.R. 2550.404c-1, describes the kinds of plans to which section 404(c) applies, the circumstances under which a participant or beneficiary will be considered to have exercised independent control over the assets in his or her account, and the consequences of a participant's or beneficiary's exercise of such control.[1]

   With both an increase in the number of participant-directed individual account plans and the number of investment options available to participants and beneficiaries under such plans, there has been an increasing recognition of the importance of providing participants and beneficiaries, whose investment decisions will directly affect their income at retirement, with information designed to assist them in making investment and retirement-related decisions appropriate to their particular situations. Concerns have been raised, however, that the provision of such information may in some situations be viewed as rendering "investment advice for a fee or other compensation," within the meaning of ERISA section 3(21)(A)(ii), thereby giving rise to fiduciary status and potential liability under ERISA for investment decisions of plan participants and beneficiaries.

   In response to these concerns, the Department of Labor is clarifying herein the applicability of ERISA section 3(21)(A)(ii) and 29 C.F.R. 2510.3-21(c) to the provision of investment-related educational information to participants and beneficiaries in participant directed individual account plans.[2] In providing this clarification, the Department does not address the "fee or other compensation, direct or indirect," which is a necessary element of fiduciary status under ERISA section 3(21)(A)(ii).[3]

c. *Investment Advice*. Under ERISA section 3(21)(A)(ii), a person is considered a fiduciary with respect to an employee benefit plan to the extent that person "renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority to do so * * *." The Department issued a regulation, at 29 C.F.R. 2510.3-21(c), describing the circumstances under which a person will be considered to be rendering "investment advice" within the meaning of section 3(21)(A)(ii). Because section 3(21)(A)(ii) applies to advice with respect to "any moneys or other property" of a plan and 29 C.F.R. 2510.3-21(c) is intended to clarify the application of that section, it is the view of the Department of Labor that the criteria set forth in the regulation apply to determine whether a person renders "investment advice" to a pension plan participant or beneficiary who is permitted to direct the investment of assets in his or her individual account.

   Applying 29 C.F.R. 2510.3-21(c) in the context of providing investment- related information to participants and beneficiaries of participant-directed individual account pension plans, a person will be considered to be rendering "investment advice," within the meaning of ERISA section 3(21)(A)(ii), to a participant or beneficiary only if: (i) the person renders advice to the participant or beneficiary as to the value of securities or other property, or makes recommendations as to the advisability of investing in, purchasing, or selling securities or other property (2510.3-21(c)(1)(i); and (ii) the person, either directly or indirectly, (A) has discretionary authority or control with respect to purchasing or selling securities or other property for the participant or beneficiary (2510.3-21(c)(1)(ii)(A)), or (B) renders the advice on a regular basis to the participant or beneficiary, pursuant to a mutual agreement, arrangement or understanding (written or otherwise) with the participant or beneficiary that the advice will serve as a primary basis for the participant's or beneficiary's investment decisions with respect to plan assets and that such person will render individualized advice based on the particular needs of the participant or beneficiary (2510.3-21(c)(1)(ii)(B)).[4]

   Whether the provision of particular investment-related information or materials to a participant or beneficiary constitutes the rendering of "investment advice," within the meaning of 29 C.F.R. 2510.3-21(c)(1), generally can be determined only by reference to the facts and circumstances of the particular case with respect to the individual plan participant or beneficiary. To facilitate such determinations, however, the Department of Labor has identified, in paragraph (d), below, examples of investment-related information and materials which if provided to plan participants and beneficiaries would not, in the view of the Department, result in the rendering of "investment advice" under ERISA section 3(21)(A)(ii) and 29 C.F.R. 2510.3- 21(c).

d. *Investment Education*. For purposes of ERISA section 3(21)(A)(ii) and 29 C.F.R. 2510.3-21(c), the Department of Labor has determined that the furnishing of the following categories of information and materials to a participant or beneficiary in a participant-directed individual account pension plan will not constitute the rendering of "investment advice," irrespective of who provides the information (e.g., plan sponsor, fiduciary or service provider), the frequency with which the information is shared, the form in which the information and materials are provided (e.g., on an individual or group basis, in writing or orally, or via video or computer software), or whether an identified category of information and materials is furnished alone or in combination with other identified categories of information and materials.

   1. Plan Information.

      i. Information and materials that inform a participant or beneficiary about the benefits of plan participation, the benefits of increasing plan contributions, the impact of pre-retirement withdrawals on retirement income, the terms of the plan, or the operation of the plan; or
      ii. Information such as that described in 29 C.F.R. 2550.404c-1(b)(2)(i) on investment alternatives under the plan (e.g., descriptions of investment objectives and philosophies, risk and return characteristics, historical return information, or related prospectuses).[5]

         The information and materials described above relate to the plan and plan participation, without reference to the appropriateness of any individual investment option for a particular participant or beneficiary under the plan. The information, therefore, does not contain either "advice" or "recommendations" within the meaning of 29 C.F.R. 2510.3-21(c)(1)(i). Accordingly, the furnishing of such information would not constitute the rendering of "investment advice" for purposes of section 3(21)(A)(ii) of ERISA.

2. General Financial and Investment Information. Information and materials that inform a participant or beneficiary about: (i) General financial and investment concepts, such as risk and return, diversification, dollar cost averaging, compounded return, and tax deferred investment; (ii) historic differences in rates of return between different asset classes (e.g., equities, bonds, or cash) based on standard market indices; (iii) effects of inflation; (iv) estimating future retirement income needs; (v) determining investment time horizons; and (vi) assessing risk tolerance.

   The information and materials described above are general financial and investment information that have no direct relationship to investment alternatives available to participants and beneficiaries under a plan or to individual participants or beneficiaries. The furnishing of such information, therefore, would not constitute rendering "advice" or making "recommendations" to a participant or beneficiary within the meaning of 29 C.F.R. 2510.3-21(c)(1)(i). Accordingly, the furnishing of such information would not constitute the rendering of "investment advice" for purposes of section 3(21)(A)(ii) of ERISA.

3. Asset Allocation Models. Information and materials (e.g., pie charts, graphs, or case studies) that provide a participant or beneficiary with models, available to all plan participants and beneficiaries, of asset allocation portfolios of hypothetical individuals with different time horizons and risk profiles, where: (i) Such models are based on generally accepted investments theories that take into account the historic returns of different asset classes (e.g., equities, bonds, or cash) over define periods of time; (ii) all material facts and assumptions on which such models are based (e.g., retirement ages, life expectancies, income levels, financial resources, replacement income ratios, inflation rates, and rates of return) accompany the models; (iii) to the extent that an asset allocation model identifies any specific investment alternative available under the plan, the model is accompanied by a statement indicating that other investment alternatives having similar risk and return characteristics may be available under the plan and identifying where information on those investment alternatives may be obtained; and (iv) the asset allocation models are accompanied by a statement indicating that, in applying particular asset allocation models to their individual situations, participants or beneficiaries should consider their other assets, income, and investments (e.g., equity in a home, IRA investments, savings accounts, and interests in other qualified and non-qualified plans) in addition to their interests in the plan.

   Because the information and materials described above would enable a participant or beneficiary to assess the relevance of an asset allocation model to his or her individual situation, the furnishing of such information would not constitute a "recommendation" within the meaning of 29 C.F.R. 2510.3-21(c)(1)(i) and, accordingly, would not constitute "investment advice" for purposes of section 3(21)(A)(ii) of ERISA. This result would not, in the view of the Department, be affected by the fact that a plan offers only one investment alternative in a particular asset class identified in an asset allocation model.

4. Interactive Investment Materials. Questionnaires, worksheets, software, and similar materials which provide a participant or beneficiary the means to estimate future retirement income needs and assess the impact of different asset allocations on retirement income, where: (i) Such materials are based on generally accepted investment theories that take into account the historic returns of different asset classes (e.g., equities, bonds, or cash) over defined periods of time; (ii) there is an objective correlation between the asset allocations generated by the materials and the information and data supplied by the participant or beneficiary; (iii) all material facts and assumptions (e.g., retirement ages, life expectancies, income levels, financial resources, replacement income ratios, inflation rates, and rates of return) which may affect a participant's or beneficiary's assessment of the different asset allocations accompany the materials or are specified by the participant or beneficiary; (iv) to the extent that an asset allocation generated by the materials identifies any specific investment alternative available under the plan, the asset allocation is accompanied by a statement indicating that other investment alternatives having similar risk and return characteristics may be available under the plan and identifying where information on those investment alternatives may be obtained; and (v) the materials either take into account or are accompanied by a statement indicating that, in applying particular asset allocations to their individual situations, participants or beneficiaries should consider their other assets, income, and investments (e.g., equity in a home, IRA investments, savings accounts, and interests in other qualified and non-qualified plans) in addition to their interests in the plan.

   The information provided through the use of the above-described materials enables participants and beneficiaries independently to

design and assess multiple asset allocation models, but otherwise these materials do not differ from asset allocation models based on hypothetical assumptions. Such information would not constitute a "recommendation" within the meaning of 29 C.F.R. 2510.3-21(c)(1)(i) and , accordingly, would not constitute "investment advice" for purposes of section 3(21)(A)(ii) of ERISA.

The Department notes that the information and materials described in subparagraphs (1)-(4) above merely represent examples of the type of information and materials which may be furnished to participants and beneficiaries without such information and materials constituting "investment advice." In this regard, the Department recognizes that there may be many other examples of information, materials, and educational services which, if furnished to participants and beneficiaries, would not constitute "investment advice." Accordingly, no inferences should be drawn from subparagraphs (1)-(4), above, with respect to whether the furnishing of any information, materials or educational services not described therein may constitute "investment advice." Determinations as to whether the provision of any information, materials or educational services not described herein constitutes the rendering of "investment advice" must be made by reference to the criteria set forth in 29 C.F.R. 2510.3-21(c)(1).

e. *Selection and Monitoring of Educators and Advisors.* As with any designation of a service provider to a plan, the designation of a person(s) to provide investment educational services or investment advice to plan participants and beneficiaries is an exercise of discretionary authority or control with respect to management of the plan; therefore, persons making the designation must act prudently and solely in the interest of the plan participants and beneficiaries, both in making the designation(s) and in continuing such designation(s). See ERISA sections 3(21)(A)(i) and 404(a), 29 USC 1002 (21)(A)(i) and 1104(a). In addition, the designation of an investment advisor to serve as a fiduciary may give rise to co-fiduciary liability if the person making and continuing such designation in doing so fails to act prudently and solely in the interest of plan participants and beneficiaries; or knowingly participates in, conceals or fails to make reasonable efforts to correct a known breach by the investment advisor. See ERISA section 405(a), 29 USC 1105(a). The Department notes, however, that, in the context of an ERISA section 404(c) plan, neither the designation of a person to provide education nor the designation of a fiduciary to provide investment advice to participants and beneficiaries would, in itself, give rise to fiduciary liability for loss, or with respect to any breach of part 4 of title I of ERISA, that is the direct and necessary result of a participant's or beneficiary's exercise of independent control. 29 C.F.R. 2550.404c-1(d). The Department also notes that a plan sponsor or fiduciary would have no fiduciary responsibility or liability with respect to the actions of a third party selected by a participant or beneficiary to provide education or investment advice where the plan sponsor or fiduciary neither selects nor endorses the educator or advisor, nor otherwise makes arrangements with the educator or advisor to provide such services.

Signed at Washington, DC, this 30th day of May, 1996.

Olena Berg,

Assistant Secretary

Pension and Welfare, Benefits Administration

U.S. Department of Labor.

- Footnotes -

* Under section 3(2) of ERISA, 29 USC 1002(2), the term "pension plan" encompasses any plan, fund or program established or maintained by an employer or employee organization, or by both, to the extent that by its express terms or as a result of surrounding circumstances, it provides retirement income to employees or results in a deferral of income by employees for periods extending to the termination of covered employment or beyond. The Department notes that, for purposes of Title I of ERISA, an employer-sponsored individual retirement account (IRA) is

considered to be an individual account pension plan. See 29 C.F.R. 2510.3-2(d).

1. The section 404(c) regulation conditions relief from fiduciary liability on, among other things, the participant or beneficiary being provided or having the opportunity to obtain sufficient investment information regarding the investment alternatives available under the plan in order to make informed investment decisions. Compliance with this condition, however, does not require that participants and beneficiaries be offered or provided either investment advice or investment education, e.g. regarding general investment principles and strategies, to assist them in making investment decisions. 29 C.F.R. 2550.404c-1(c)(4).
2. Issues relating to the circumstances under which information provided to participants and beneficiaries may affect a participant's or beneficiary's ability to exercise independent control over the assets in his or her account for purposes of relief from fiduciary liability under ERISA section 404(c) are beyond the scope of this interpretive bulletin. Accordingly, no inferences should be drawn regarding such issues. See 29 C.F.R. 2550.404c-1(c)(2). It is the view of the Department, however, that the provision of investment-related information and material to participants and beneficiaries in accordance with paragraph (d) of this interpretive bulletin will not, in and of itself, affect the availability of relief under section 404(c).
3. The Department has expressed the view that, for purposes of section 3(21)(A)(ii), such fees or other compensation need not come from the plan and should be deemed to include all fees or other compensation incident to the transaction in which the investment advise has been or will be rendered. See A.O. 83-60A (Nov. 21, 1983); Reich v. McManus, 883 F. Supp. 1144 (N.D. Ill. 1995).
4. This IB does not address the application of 29 C.F.R. 2510.3-21(c) to communications with fiduciaries of participant-directed individual account pension plan plans.
5. Descriptions of investment alternatives under the plan may include information relating to the generic asset class (e,g,, equities, bonds, or cash) of the investment alternatives. 29 C.F.R. 2550.404c-1(b)(2)(i)(B)(1)(ii).

29 CFR 2509.95-1 - Interpretive bulletin relating to the fiduciary standard under ERISA when selecting an annuity provider.

(a) Scope. This Interpretive Bulletin provides guidance concerning
certain fiduciary standards under part 4 of title I of the Employee
Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1104-1114,
applicable to the selection of annuity providers for the purpose of
pension plan benefit distributions where the plan intends to transfer
liability for benefits to the annuity provider.
(b) In General. Generally, when a pension plan purchases an annuity
from an insurer as a distribution of benefits, it is intended that the
plan's liability for such benefits is transferred to the annuity
provider. The Department's regulation defining the term ``participant
covered under the plan'' for certain purposes under title I of ERISA
recognizes that such a transfer occurs when the annuity is issued by an
insurance company licensed to do business in a State. 29 CFR 2510.3-
3(d)(2)(ii). Although the regulation does not define the term
``participant'' or ``beneficiary'' for purposes of standing to bring an
action under ERISA Sec. 502(a), 29 U.S.C. 1132(a), it makes clear that
the purpose of a benefit distribution annuity is to transfer the plan's
liability with respect to the individual's benefits to the annuity
provider.
Pursuant to ERISA section 404(a)(1), 29 U.S.C. 1104(a)(1),
fiduciaries must discharge their duties with respect to the plan solely
in the interest of the participants and beneficiaries. Section
404(a)(1)(A), 29 U.S.C. 1104(a)(1)(A), states that the fiduciary must
act for the exclusive purpose of providing benefits to the participants
and beneficiaries and defraying reasonable plan administration expenses.
In addition, section 404(a)(1)(B), 29 U.S.C. 1104(a)(1)(B), requires a
fiduciary to act with the care, skill, prudence and diligence under the
prevailing circumstances that a prudent person acting in a like capacity
and familiar with such matters would use.
(c) Selection of Annuity Providers. The selection of an annuity
provider for purposes of a pension benefit distribution, whether upon
separation or retirement of a participant or upon the termination of a
plan, is a fiduciary decision governed by the provisions of part 4 of
title I of ERISA. In discharging their obligations under section
404(a)(1), 29 U.S.C. 1104(a)(1), to act solely in the interest of
participants and beneficiaries and for the exclusive purpose of
providing benefits to the participants and beneficiaries as well as
defraying reasonable expenses of administering the plan, fiduciaries
choosing an annuity provider for the purpose of making a benefit
distribution must take steps calculated to obtain the safest annuity
available, unless under the circumstances it would be in the interests
of participants and beneficiaries to do otherwise. In addition, the
fiduciary obligation of prudence, described at section 404(a)(1)(B), 29
U.S.C. 1104(a)(1)(B), requires, at a minimum, that plan fiduciaries

conduct an objective, thorough and analytical search for the purpose of identifying and selecting providers from which to purchase annuities. In conducting such a search, a fiduciary must evaluate a number of factors relating to a potential annuity provider's claims paying ability and creditworthiness. Reliance solely on ratings provided by insurance rating services would not be sufficient to meet this requirement. In this regard, the types of factors a fiduciary should consider would include, among other things:

(1) The quality and diversification of the annuity provider's investment portfolio;

(2) The size of the insurer relative to the proposed contract;

(3) The level of the insurer's capital and surplus;

(4) The lines of business of the annuity provider and other indications of an insurer's exposure to liability;

(5) The structure of the annuity contract and guarantees supporting the annuities, such as the use of separate accounts;

(6) The availability of additional protection through state guaranty associations and the extent of their guarantees. Unless they possess the necessary expertise to evaluate such factors, fiduciaries would need to obtain the advice of a qualified, independent expert. A fiduciary may conclude, after conducting an appropriate search, that more than one annuity provider is able to offer the safest annuity available.

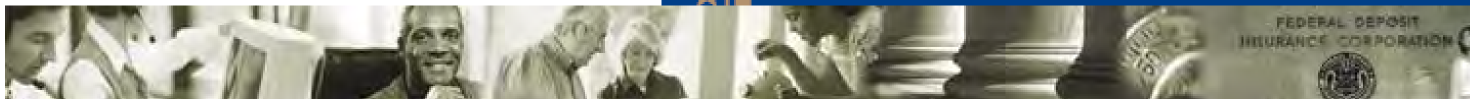
(d) Costs and Other Considerations. The Department recognizes that there are situations where it may be in the interest of the participants and beneficiaries to purchase other than the safest available annuity. Such situations may occur where the safest available annuity is only marginally safer, but disproportionately more expensive than competing annuities, and the participants and beneficiaries are likely to bear a significant portion of that increased cost. For example, where the participants in a terminating pension plan are likely to receive, in the form of increased benefits, a substantial share of the cost savings that would result from choosing a competing annuity, it may be in the interest of the participants to choose the competing annuity. It may also be in the interest of the participants and beneficiaries to choose a competing annuity of the annuity provider offering the safest available annuity is unable to demonstrate the ability to administer the payment of benefits to the participants and beneficiaries. The Department notes, however, that increased cost or other considerations could never justify putting the benefits of annuitized participants and beneficiaries at risk by purchasing an unsafe annuity.

In contrast to the above, a fiduciary's decision to purchase more risky, lower-priced annuities in order to ensure or maximize a reversion of excess assets that will be paid solely to the employer-sponsor in connection with the termination of an over-funded pension plan would violate the fiduciary's duties under ERISA to act solely in the interest of the plan participants and beneficiaries. In such circumstances, the interests of those participants and beneficiaries who will receive annuities lies in receiving the safest annuity available and other participants and beneficiaries have no countervailing interests. The fiduciary in such circumstances must make diligent efforts to assure that the safest available annuity is purchased.

Similarly, a fiduciary may not purchase a riskier annuity solely because there are insufficient assets in a defined benefit plan to purchase a safer annuity. The fiduciary may have to condition the purchase of annuities on additional employer contributions sufficient to purchase the safest available annuity.

(e) Conflicts of Interest. Special care should be taken in reversion situations where fiduciaries selecting the annuity provider have an interest in the sponsoring employer which might affect their judgment and therefore create the potential for a violation of ERISA Sec. 406(b)(1). As a practical matter, many fiduciaries have this conflict of interest and therefore will need to obtain and follow

independent expert advice calculated to identify those insurers with the highest claims-paying ability willing to write the business.
[60 FR 12329, Mar. 6, 1995]



Appendix E — Employee Benefit Law

Technical Bulletin 86-1

Soft Dollars and Directed Commission Arrangements

May 22, 1986

Summary

Establishes DOL positions on how (1) the "soft dollar" safe harbor of Section 28(e) of the Securities Exchange Act and (2) the directed commission arrangements on securities transactions apply to ERISA accounts and fiduciaries.

TechnicalBulletin

This statement reflects the views of the Pension and Welfare Benefits Administration (PWBA) with regard, to "soft dollar" and directed commission arrangements pursuant to its responsibility to administer and enforce the provisions of Title I of the Employee Retirement Income Security Act of 1974 (ERISA). Investment managers, plan sponsors and other members of the pension community which provide services to employee plans have expressed a great deal of interest in the application of the fiduciary responsibility provisions of ERISA to these arrangements.

"Soft dollar" and directed commission arrangements typically involve situations in which an investment manager of an employee benefit plan or other plan fiduciary purchases goods or services with a portion of the brokerage commission paid by a plan to a broker for executing a securities transaction. Prior to the elimination of fixed commission rates on stock exchange transactions, investment managers often purchased additional services with commission dollars beyond simple execution, clearance and settlement of securities transactions. After the elimination of fixed commission rates in May 1975, Congress, as part of the Securities Acts Amendments of 1975, added Section 28(e) to the Securities Exchange Act of 1934 (the 1934 Act) to address the practice whereby brokers provided investment managers with brokerage and research services. The Securities and Exchange Commission (the Commission) administers the 1934 Act and has exclusive authority to interpret the scope of Section 28(e) and the terms used therein.

Section 28(e) of the 1934 Act provides generally that no person who exercises investment discretion with respect to securities transactions will be deemed to have acted unlawfully or to have breached a fiduciary duty solely by reason of paying brokerage commissions for effecting a securities transaction in excess of the amount of commission another broker-dealer would have charged, if such person determined in good faith that the commission was reasonable in relation to the value of brokerage and research services provided by the broker-dealer. The limited safe harbor provided by Section 28(e) is available only for the provision of brokerage and research services to persons who exercise investment discretion with respect to an account as that term is defined in Section 3(a)(35) of the 1934 Act. The Commission has indicated that if a plan fiduciary does not exercise investment discretion with respect to the securities transaction or uses "soft dollars" to pay for non-research related services, the transaction falls outside the protection afforded by Section 28(e) of the 1934 Act and may be in violation of the securities laws and the fiduciary responsibility provisions of ERISA.

It has come to the attention of PWBA that ERISA fiduciaries may be involved in several types of "soft dollar" and directed commission arrangements which do not qualify for the "safe harbor" provided by Section 28(e) of the 1934 Act. In some instances, investment managers direct a portion of a plan's securities trades through specific broker-dealers, who then apply a percentage of the brokerage commissions to pay for travel, hotel

rooms and other goods and services for such investment managers which do not qualify as research within the meaning of Section 28(e).[1] In other instances, plan sponsors who do not exercise investment discretion with respect to a plan direct the plan's securities trades to one or more broker-dealers in return for research, performance evaluation, other administrative services or discounted commissions. The Commission has indicated that the safe harbor of Section 28(e) is not available for directed brokerage transactions.[2]

A fiduciary for an ERISA plan, such as a trustee or investment manager, must meet the fiduciary responsibility standards set forth in part 4 of Title I of ERISA. These standards are designed to help ensure that the fiduciary's decisions are made in the best interests of the plan and are not colored by self-interest.

Section 403(c)(1) provides, in part, that the assets of a plan shall be held for the exclusive purpose of providing benefits to the plan's participants and their beneficiaries and defraying reasonable expenses of administering the plan. Section 404(a)(1) sets forth a similar requirement on how a plan fiduciary must discharge his duties with respect to the plan, and provides further that such fiduciary must act prudently and solely in the interest of the participants and beneficiaries. Those basic provisions are supplemented by the *per se* prohibitions of certain classes of transactions set forth in section 406 of ERISA.

Section 406(a)(1)(D) of ERISA prohibits a fiduciary of an ERISA plan from causing that plan to engage in a transaction if he knows or should know that the transaction would constitute a direct or indirect transfer to, or use by or for the benefit of, a party in interest, of any assets of that plan. Section 3(14) includes, within the definition of "party in interest" with respect to a plan, any fiduciary with respect to that plan. Thus, section 406(a)(1)(D) would not only prohibit a fiduciary from causing the plan to engage in a transaction which would benefit a third person who is a party in interest, but it also would prohibit the fiduciary from similarly benefiting himself. In addition, section 406(b)(1) specifically prohibits a fiduciary with respect to a plan from dealing with the assets of that plan in his own interest or for his own account. Section 406(b)(3) supplements these provisions by prohibiting a plan fiduciary from receiving any consideration for his own personal account from any party dealing with the plan in connection with a transaction involving the assets of the plan.

When investment management responsibility has been properly delegated to an investment manager, the manager is responsible for all aspects of the investment process.[3] The manager, in those cases, is required to act prudently with respect to a decision to buy or sell securities as well as with respect to the decision concerning who will execute the transaction. If such a delegation has occurred, the named fiduciary of the plan is not liable for the particular acts or omissions of the manager but has oversight responsibility to periodically review the investment manager's performance.

Where an investment manager has entered into a "soft dollar" arrangement, Section 28(e) of the 1934 Act does not relieve anyone other than the person who exercises investment discretion from the applicability of the fiduciary provisions of ERISA. Therefore, the fiduciary who appoints the investment manager is not relieved of his ongoing duty to monitor the investment manager to assure that the manager has secured best execution of the plan's brokerage transactions and to assure that the commissions paid on such transactions are reasonable in relation to the value of the brokerage and research services provided to the plan.[4]

It is PWBA's understanding that where a plan sponsor or other plan fiduciary directs the investment manager to execute securities trades for the plan through one or more specified broker-dealers, the direction generally requires the investment manager to execute a specified percentage of the plan's trades or a specified amount of the plan's commission business through the particular broker-dealers, consistent with the manager's duty to secure best execution for the transactions.

A plan sponsor's decision to direct brokerage transactions must be made prudently and solely in the interest of the participants and beneficiaries. In directing a plan's brokerage transactions, the sponsor has an initial responsibility to determine that the broker-dealer is capable of providing best execution for the plan's brokerage transactions. In addition, the sponsor has an ongoing responsibility to monitor the services provided by the broker-dealer so as to assure that the manager has secured best execution of the plan's brokerage transactions and that the commissions paid are reasonable in relation to the value of the brokerage and other services received by the plan.

In considering "soft dollar" and directed commission arrangements, ERISA's prohibited transaction provisions also must be taken into account. A fiduciary with respect to an ERISA plan is generally prohibited, by section 406(b)(1), from causing the plan to engage in a transaction if the fiduciary has an interest in the matter which may affect the fiduciary's best judgment as a fiduciary. For example, an employer which is the named fiduciary for its plan and which does not exercise investment discretion would, normally be prohibited from directing the plan's brokerage transactions through a designated broker-dealer who agrees to utilize a portion

of the brokerage commissions received from the plan to procure goods or services for the benefit of the employer. (As previously noted, Section 28(e) is unavailable for such brokerage transactions.) Each use of the broker-dealer that results in the receipt of goods and services by the employer following that designation would create an additional violation of sections 406(a)(1)(D) and 406(b)(1) of ERISA. In addition, where the relief provided by Section 28(e) is unavailable, the receipt by a fiduciary (i.e., the employer) of goods or services for its own personal account from a party (i.e., the broker-dealer) dealing with a plan in connection with a transaction involving the assets of the plan would, in the opinion of PWBA, constitute a violation of section 406(b)(3). Such an arrangement would also violate sections 403(c)(1) and 404(a)(1) to the extent that the employer is benefiting from its use of its position.

However, where an investment manager directs brokerage transactions through a designated broker-dealer to procure goods and services on behalf of the plan, and for which the plan would be otherwise obligated to pay, such use of brokerage commissions ordinarily would not violate the fiduciary provisions of ERISA, provided that the amount paid for the brokerage and other goods and services is reasonable, and the investment manager has fulfilled its fiduciary duty to obtain best execution for the plan's securities transactions. This result does not depend on the availability of the "safe harbor" under Section 28(e) for these transactions.

In applying the fiduciary responsibility provisions of ERISA to the various "soft dollar" and directed commission arrangements that fall outside of the protection of Section 28(e), it is apparent to PWBA that issues are raised under section 406 of ERISA whenever there is an inducement for the investment manager or other plan fiduciary to direct plan brokerage transactions through particular broker-dealers. The following examples illustrate the application of the fiduciary responsibility provisions of ERISA to "soft dollar" and directed commission arrangements:

1. Employer X instructs the master trustee of its plan to direct all plan brokerage transactions through Broker-Dealer B. Part of the commissions are rebated to the master trustee, to reduce its fees. The plan provides that administrative costs, including the fees of the master trustee, are to be paid by the plan. Under these circumstances, this transaction would not, in itself, constitute a violation of the prohibited transaction provisions of ERISA since the "soft dollars" are being used for the exclusive benefit of the plan which generated the commissions. However, in order to act prudently under section 404(a)(1) of ERISA, Employer X would be obligated to initially determine that Broker-Dealer D is capable of providing best execution of the plan's brokerage transactions. In addition, Employer X must also periodically monitor the execution of the plan's brokerage transactions and evaluate whether the brokerage commissions paid by the plan are reasonable in light of the total services received by the plan. Moreover, Employer X would be obligated to assure that the arrangement does not result in the payment of unreasonable compensation to the master trustee.
2. Money Manager A enters into an arrangement with Broker-Dealer B whereby Money Manager A would direct brokerage on behalf of its managed plan accounts which would generate fees of $500,000 per year to Broker-Dealer B. In return, Broker-Dealer P would provide bookkeeping services that do not constitute research under Section 28(e) for the general corporate purposes of Money Manager A. Money Manager A has engaged in an act prohibited by sections 406(a)(1)(D), 406(b)(1) and 406(b)(3) of ERISA since Money Manager A has exercised its fiduciary authority over plan assets to benefit itself. Such a transaction would also violate the exclusive purpose provisions of sections 403(c)(1) and 404(a)(1) of ERISA. In these circumstances, the relief provided by Section 28(e) would not be available because the "soft dollars" are paid for services other than research.
3. The named fiduciaries of Plan P retain Money Manager C to manage part of the assets of Plan P. Money Manager C directs the plan's brokerage transactions through Broker-Dealer D. In return, Broker-Dealer D will provide research on tax-exempt securities to Money Manager C. Although tax-exempt securities would not be a suitable investment for Plan P, Money Manager C has, determined that this research would be useful to his managed accounts as a whole. Money Manager C's arrangement with Broker-Dealer P is therefore encompassed by Section 28(e) of the 1934 Act. However, in retaining Money Manager C, the named fiduciaries of Plan P are required under section 404(a)(1) of ERISA to periodically review the execution secured by Money Manager C and ensure that the brokerage commissions paid by Plan P to Broker-Dealer D are reasonable.

The foregoing discussion is intended to provide general guidance as to the nature of the analysis applicable to these situations. The discussion should not be viewed as expressing an opinion with respect to any specific case.

- Footnotes -

1. See Securities Exchange Act Release No. 34-23170 (April 23, 1986).
2. See Section VI of Securities Exchange Act Release No. 34-23170 (April 23, 1986).
3. Section 405 of ERISA limits the liability of certain plan fiduciaries if management of plan assets has been properly delegated to an investment manager.
4. In PWBA's view, an investment manager's responsibility to seek best execution under the circumstances requires the manager to consider not only the cost of the commissions for the transaction but the quality and reliability of the execution.

June 7, 1977 AO 77-46

Mr. Frederic S. Kramer

Assistant General Counsel

National Association of Mutual Savings Banks

200 Park Avenue

New York, N. Y. 10017

Dear Mr. Kramer:

Thank you for your letter requesting our advice as to whether the diversification rule of the Employee Retirement Income Security Act of 1974 (ERISA) permits savings bank trustees or custodians to invest contributions under self-employed retirement plans and individual retirement account plans (IRAs) in savings accounts and deposits with the trustee or custodian savings bank where the account balance exceeds the $40,000 amount covered by FDIC insurance. With respect to IRAs, we assume your question refers to an IRA which is established by an employer or union (or other employee association), since an IRA established by an individual for himself is not subject to Title I of ERISA. I regret the delay in responding to your letter.

You explain that the National Association of Mutual Savings Banks represents the 475 mutual savings banks in the United States which are authorized under the Internal Revenue Code of 1954 to act as trustees or custodians of self-employed retirement plan funds and IRAs. You advise that many jurisdictions in which savings banks do not enjoy trust powers have enacted legislation permitting savings banks to act as fiduciaries with respect to such plans and that New York law is typical of such legislation. You state that New York law provides that savings banks shall have the power to act as trustees of such plans provided that the provisions of these plans "require the funds of such trust to be invested exclusively in deposits in savings banks"

(section 237.7 and 237.8, New York Banking Law). Accordingly, typical provisions in self-employed retirement plans and IRAs in savings banks jurisdictions authorizing savings banks to act as trustees of these accounts provide that the funds of such trusts will be invested exclusively in savings accounts or deposits in the trustee (or custodian) savings bank.

You advise that mutual savings banks are state chartered institutions that derive their powers, including investment powers, from their respective states; as state chartered institutions, mutual savings bank investments are not regulated by federal law.

You have submitted a chart showing the types of legal investments for mutual savings banks, by state, which was most recently compiled as of September 30, 1975. The chart shows that mutual savings banks in Connecticut, Delaware, Maryland, Massachusetts, New Hampshire, Oregon, Pennsylvania, Rhode Island, and Washington are permitted to invest in the following: U.S. Government bonds; state, county, and municipal bonds; railroad bonds; equipment obligations; telephone bonds; electric utility bonds; Canadian bonds; real estate construction loans; conventional mortgage loans; 20 percent mortgage loans; FHA loans; VA loans; large-scale housing; equity securities; bank stock; collateral loans; unsecured notes; acceptances and bills of exchange. The chart also shows that mutual savings banks in Maine, New Jersey, New York, Ohio, and Vermont are permitted to invest in all but one of these types of investments and that Minnesota, Indiana, Alaska, and Wisconsin are somewhat more restrictive in the types of investments permitted for such banks. In all of the above-named states, except Indiana, Vermont, and Wisconsin, mutual savings banks are permitted to invest in equity securities, as well as in debt instruments.

You have also submitted a booklet containing a list of securities considered legal investments for savings banks under section 235 of the New York Banking Law as of July 1, 1975, and financial statements showing the actual investments of three mutual savings banks (a large bank, a small one, and a medium-sized one).

You explain that the investment authority of mutual savings banks differs from that of commercial banks in that while practically all mutual savings banks can invest in equity securities, commercial banks are prohibited, with limited exceptions, from investing in stocks of corporations. Also, while mutual savings banks' authority to invest in equity securities is generally far broader than that of commercial banks, commercial banks have the power to make short term commercial loans at rates which may be tied to the prime rate and further may make such loans to any one issuer or borrower in an amount up to ten percent of the bank's capital stock, paid-in and unimpaired, plus ten percent of its unimpaired surplus fund.

Section 404(a)(1)(C) of ERISA requires a fiduciary to discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and by diversifying the investments of the plan so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so. The Conference Report (H. Rep. No. 93-1280, 93rd Congress, 2nd Session) states, on page 305, that the conferees intend that, in general, whether the plan assets are sufficiently diversified is to be determined by examining the ultimate investment of the plan assets. For example, the conferees understand that for efficiency and economy plans may invest all their assets in a single bank or other pooled investment fund, but that the pooled fund itself could have diversified investments. It is intended that, in this case, the diversification rule is to be applied to the plan by examining the diversification of the investments in the pooled fund. The same is true with respect to investments in a mutual fund. Also, generally a plan may be invested wholly in insurance or annuity contracts without violating the diversification rules, since generally an insurance company's assets are to be invested in a diversified manner. The Conference Report also explains, on page 314, that it is expected that the prudent man, diversification, and other rules of section 404(a) of ERISA generally will not be violated if all plan assets in an individual account plan are invested in a federally-insured account, so long as the investments are fully insured. (If an individual's account balance is greater than the amount covered by federal insurance, this will not violate the prudence and diversification requirements if the individual participant or beneficiary has control over his account and determines, for himself, that the assets should be so invested.)

With respect to control, section 404(c) of ERISA states that in the case of a pension plan which provides for individual accounts and permits a participant or beneficiary to exercise control over assets in his account, if a participant or beneficiary exercises control over the assets in his account (as determined under regulations of the Secretary) -- (1) such participant or beneficiary shall not be deemed to be a fiduciary by reason of such exercise and (2) no person who is otherwise a fiduciary shall be liable under Part I of ERISA for any loss, or by reason of any breach, which results from such participant's or beneficiary's exercise of control. However, the Conference Report states, on pages 305-306, that the conferees recognize that there may be difficulties in determining whether the participant in fact exercises independent control over his account. Consequently, whether participants and beneficiaries exercise independent control is to be determined pursuant to regulations prescribed by the Secretary of Labor. The conferees expect that the regulations generally will require that for there to be independent control by participants, a broad range of investments must be available

to the individual participants and beneficiaries.

You believe that although the term "control" is not defined by ERISA, the requisite control would exist even though substantial penalties for withdrawal from retirement plan accounts are imposed both by the FDIC and the Internal Revenue Code. A participant can withdraw his funds, which are fully vested at all times, at any time subject to these penalties. A participant's control over his IRA is such that he can, once every three years, withdraw the entire amount of the funds in his account and reinvest the proceeds in another IRA funded through insurance contracts or a mutual fund, or through the deposits of another financial institution.

Alternatively, in the event it is determined that the individual participant or beneficiary does not have control over the account as that term might be defined in regulations, you suggest that recognition of the diversification of insurance company investments, discussed on page 305 of the Conference Report, should apply equally to those of a mutual savings bank. You believe that the investment alternatives of a savings bank are, in much the same way as the investment alternatives of an insurance company, strictly regulated to insure the sound and prudent investment of these kinds of funds.

As noted above, no regulations have yet been issued under section 404(c). In the absence of such regulations, we are unable to respond to the question of control.

[*FDIC Note:* DOL Regulation 2550.404c-1 *was not adopted until 10-13-92*.]

With respect to your second question as to whether section 404(a)(1)(C) of ERISA permits investment of all the assets of an individual account plan in savings accounts of mutual savings banks where the account balance exceeds the amount covered by Federal insurance, **it is the view of the Department of Labor that such an investment would not, in and of itself, contravene the diversification requirements of section 404(a)(1)(C), assuming that the bank invested its assets in a diversified manner. As noted by the Conference Report at p. 314, to the extent that the investment in the account balance is not in excess of the amount covered by Federal insurance, the diversification standard will not be violated, as there cannot be large losses.** However, the individual account plan may invest all its assets in a savings bank even if such amount exceeds the amount covered by Federal insurance, without violating the diversification rules, if the bank's assets are invested in a diversified manner. **The fiduciary making such investment would, of course, have to determine whether the bank's assets were diversified so as to minimize the risk of large losses.**

We are expressing no opinion as to whether in practice the investments of self-employed retirement plans or IRAs in any specific mutual savings bank or any specific group of mutual savings banks are actually sufficiently diversified to meet the requirements of section 404(a)(1)(C).

Sincerely,

Fred W. Stuckwisch

Mr. Alfred T. Spada

Hogan and Hartson

815 Connecticut Avenue, N.W.

Washington, D.C. 20006

Re: Riggs National Bank Amended Pension Plan

Dear Mr. Spada:

This is in response to your letter of September 8, 1977, in which you seek our opinion as to whether the appointment and service of the Riggs National Bank (the Bank) as trustee of the Riggs National Bank Amended Pension Plan (the Plan) would constitute a prohibited transaction under section 406 of the Employee Retirement Income Security Act of 1974 (ERISA) or would otherwise be prohibited under ERISA.

In your letter, you represent that the Board of Directors of the Bank adopted the Plan in September 1976 and the related amended trust agreement in May 1977. These documents include an amendment substituting Riggs as trustee of the Plan in place of various individuals currently serving as trustees. You further represent that the Bank will not receive any fee or other compensation from the Plan for its services as trustee.

A number of provisions in Part 4 of Subtitle B of Title I of ERISA seem to imply that an employer of a plan's participants may serve as trustee of the plan.

Section 402(c)(1) states that any employee benefit plan may provide that any person or group of persons may serve in more than one fiduciary capacity with respect to the plan (including service both as trustee and administrator).

Section 408(c)(3) provides that the restrictions of section 406 shall not prohibit a fiduciary from serving as a fiduciary in addition to being an officer, employee, agent, or other representative of a party in interest. Under section 3(14)(C), an employer any of whose employees are covered by a plan is a party in interest with respect to the plan.

Section 408(b)(4)(A) permits the investment of Plan assets in deposits which bear a reasonable interest rate in a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of the plan and if the plan covers only employees of the bank or other institution and employees of affiliates of such bank or other institution.

Part 4 of Subtitle B of Title I of ERISA contains no provision that prohibits an organization from being both an employer of a plan's participants and a trustee of the plan. We note, however, that the conduct of any organization in its capacity as trustee would be subject to the fiduciary responsibility requirements of Part 4, including section 404 (relating to fiduciary duties) and section 406 (relating to prohibited transactions).

Section 406(a)(1)(C) of ERISA provides generally that a plan fiduciary shall not cause the plan to engage in a transaction, if he knows or should know that such transaction constitutes a direct or indirect furnishing of goods, services, or facilities between the plan and a party in interest.

Section 408(b)(2), however, exempts from the prohibitions of section 406 contracting or making reasonable arrangements with a party in interest for office space, or legal, accounting, or other services necessary for the establishment or operation of a plan, if no more than reasonable compensation is paid therefore.

Regulation 2550.408b-2 explains that the 408(b)(2) exemption applies only to transactions described in section 406(a) of ERISA. If the furnishing of a service involves an act described in section 406(b) (relating to conflicts of interest by fiduciaries), such act constitutes a separate transaction which in not exempt under section 408(b)(2). The prohibitions of section 406(b) are intended to deter fiduciaries from exercising the authority, control, or responsibility which makes them fiduciaries when they have interests which may conflict with the interests of the plans for which they act. Thus, section 406(b) would prohibit a fiduciary from using the authority, control, or responsibility which makes such person a fiduciary to cause a plan to pay an additional fee to such fiduciary (or to a person in which such fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary) to provide a service.

Section 2550.408b-2(c)(3) **of the regulation states, however, that if a fiduciary provides services to a plan**

without the receipt of compensation or other consideration (other than reimbursement of direct expenses properly and actually incurred in the performance of such services), the provision of such services does not, in and of itself, constitute an act described in section 406(b) of ERISA.

We regret the delay in responding to your request, and hope you find this general information helpful.

Sincerely,

Alan D. Lebowitz

Advisory Opinion to OCC (80-OCC)

Investment in Fiduciary Bank/Holding Company Securities

July 25, 1980

Summary	
(1)	The discretionary purchase, retention, or sale of a fiduciary bank's own stock, or that of its own holding company, would involve a violation of ERISA's prudence requirement in § 404(a)(1)(B). If the fiduciary had a direct or indirect interest in the transaction, a violation of ERISA § 406(b) would occur.
(2)	The non-discretionary purchase, retention, or sale of a fiduciary bank's own stock, or that of its own holding company, would not involve a violation of ERISA.

Reply to the Attention of:

Ivan Strasfeld

(202) 523-8971

July 25, 1980

Mr. Dean E. Miller

Deputy Comptroller for Specialized Examinations

Comptroller of the Currency

Administrator of National Banks

Washington, D.C. 20219

Dear Mr. Miller:

By letter dated May 27, 1980, you presented certain issues arising under the prohibited transactions provisions contained in Part 4 of Title I of ERISA that are often discerned by your trust examiners during the course of their inspections.

Accordingly, you have requested guidance with regard to the following questions:

1. Where a bank has sole investment responsibility with respect to the assets of an employee benefit plan, will the purchase for the plan of the bank's stock or its holding company's stock constitute a prohibited transaction under ERISA? If so, which provisions of section 406 would it violate? (You have asked us to

assume that the stock will not be purchased from a party in interest).

2. Where the bank as trustee is directed by a named fiduciary authorized to direct the investments of a plan, will the directed purchase for the plan of the bank's stock or its holding company's stock constitute a prohibited transaction under ERISA? (Again, you ask us to assume that the stock will not be purchased from a party in interest).
3. Where an investment manager has been named, will the purchase of the bank trustee's stock or its holding company's stock at the direction of the investment manager constitute a prohibited transaction under ERISA?
4. Does the retention by a plan of the bank trustee's stock or its holding company's stock constitute a prohibited transaction under ERISA?

The prohibited transactions provisions of ERISA restrict the acquisition and holding by an employee benefit plan of securities issued by an employer-sponsoring company. See section 407 of ERISA. No such explicit proscription or limitation applies to stock of a bank trustee or holding company thereof.

However, section 406(a)(1)(D) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction if he knows or should know that such transaction constitutes a direct or indirect transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. The ERISA Conference Report (H.R. Rep. No. 93-1280; 93d Cong., 2d Session 308 (1974)) clarifies this prohibition by stating, among other things, "... securities purchases or sales by a plan to manipulate the price of the security to the advantage of a party in interest constitutes a use by or for the benefit of a party in interest of any assets of the plan."

Sections 406(b)(1) and (2) further prohibit a fiduciary from dealing with the assets of a plan in his own interest or for his own account or acting in any transaction involving the plan on behalf of a party or representing a party whose interests are adverse to the interests of its participants or beneficiaries. The prohibitions of section 406(b) of ERISA impose upon fiduciaries a duty of undivided loyalty to the plans for which they act. Moreover, the codification of the "prudent man rule" contained in section 404(a)(1) of ERISA provides in relevant part:

> ... a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and ...
>
> (B) with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like characters and with like aims.

Although a determination of whether a violation of sections 406(b)(1) or (2) and 404(a) has occurred will generally depend on the particular facts and circumstances of each case, *it burdens our imagination to envision a situation in which a trustee with investment discretion could make an objective decision, solely on the basis of the prudence standard, regarding the purchase or sale of its own stock* [emphasis added]. For example, a trustee may exercise his or her discretion based on inside information regarding the bank's financial condition. Although, in a particular case, it may be in the plan's best interest to sell the bank stock, the sale of such stock might cause a further decline in its market value. In such case, the bank trustee would have an interest in the transaction which would conflict with the interest of the plan for which he acts so as to be in violation of section 406(b)(2) of ERISA.

A bank trustee may avoid engaging in an act described in section 406(b)(1) or (2) of ERISA by not using the authority, control or responsibility which makes it a fiduciary to cause a plan to purchase or sell bank stock. Thus, the purchase or sale of bank stock by a trustee pursuant to the instructions of a named fiduciary or investment manager not affiliated with such trustee will not result in violations of such 406(b) of ERISA.

It should be noted that the inquiry concerning whether a fiduciary has violated section 406(b)(1) and (2) of ERISA is not limited to a decision whether to buy or sell bank stock. At all times that a trustee acts in a fiduciary capacity, he may make no decision on behalf of a plan which would have the effect of benefiting a person in which such fiduciary has an interest. A decision to retain bank stock in the plan portfolio, as well as decisions to buy or sell such stock, may involve acts described in section 406(b) of ERISA. However, to the extent a trustee has no discretion regarding retention of bank stock, (e.g., the decision to retain bank stock is, in fact, made by an independent investment manager), no violation of section 406(b)(1) or (2) will occur.

We hope this information provides adequate guidance to you in the implementation of examination policy. Of course, we would welcome any further inquiries raised under the fiduciary responsibility provisions of ERISA.

Sincerely,

Alan D. Lebowitz

Assistant Administrator for Fiduciary Standards

Pension and Welfare Benefit Programs

Advisory Opinion/Individual Exemption 85-36A

Loans Intended to Benefit Union Members/Employers

October 23, 1985

Summary
[Construction Loan by Construction Union Plan to Provide Employment for Union Members] (1) The loan would probably be a prohibited transaction in violation of ERISA § 406(a)(1)(D) as it would benefit employers contributing to plan, and (2) might violate ERISA § 404 (as imprudent and/or undiversified) and ERISA § 403 (as plan assets benefiting contributing employers).

U.S. Department of Labor

Office of Pension and Welfare Benefit Programs

Washington, D.C. 20210

Ralph P. Katz

Delson & Gordon

230 Park Avenue

New York, NY 10169

RE: Annuity Fund of the Electrical Industry of Long Island

Identification Number: F-2521

Dear Mr. Katz:

This is in response to your letter of September 23, 1982, in which you requested clarification regarding the application of the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA) to a proposed investment by the Annuity Fund of the Electrical Industry of Long Island (the Fund). Specifically, you inquired whether a prohibited transaction would occur if the trustees of the Fund made an investment which was part of an overall agreement obligating an insurance company to invest a specified amount of insurance company assets in construction mortgages within the geographic jurisdiction of the union whose members are participants in the Fund. The agreement would further require the insurance company to make such investments in construction projects employing only labor represented by unions affiliated with the AFL-CIO. You state that the trustees will make the investment after determining that the investment rate of return is equal to or greater than similar investments bearing similar risks.

Section 406(a)(1)(D) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction which the fiduciary knows or should know constitutes a direct or indirect transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 406(b)(1) and (2) of ERISA further prohibit a fiduciary with respect to a plan from dealing with the assets of a plan in his or her own interest or for his or her own account, or acting in any transaction on behalf of a party or representing a party whose interests are adverse to the interest of the plan or its participants.

Section 3(14) of ERISA defines the term party in interest to include a fiduciary, an employer any of whose employees are covered by the plan, and any employees of such employer.

We wish to point out, as we have done in prior correspondence regarding this matter, that ERISA's general standards of fiduciary conduct apply to your proposed investment course of action. Sections 403(c) and 404(a)

(1) of ERISA require, among other things, that a fiduciary of a plan act prudently, solely in the interest of the plan's participants and beneficiaries, and for the exclusive purpose of providing benefits to participants and beneficiaries. As you know the Department, on a number of occasions, has expressed its views as to the meaning of these requirements in the context of investment decision-making.

We have stated that, to act prudently, a plan fiduciary must consider, among other factors, the availability, riskiness, and potential return of alternative investments for his plan. Because the investment you propose causes the plan to forego other alternative investment opportunities, such an investment would not be prudent if it provided a plan with less return, in comparison to risk, than comparable investments available to the plan, or if it involved a greater risk to the security of plan assets than other investments offering a similar return.

We have construed the requirements that a fiduciary act solely in the interest of, and for the exclusive purpose of providing benefits to, participants and beneficiaries as prohibiting a fiduciary from subordinating the interests of participants and beneficiaries in their requirement income to unrelated objectives. Thus, in deciding whether and to what extent to invest in a particular investment, a fiduciary must ordinarily consider only factors relating to the interests of plan participants and beneficiaries in their retirement income. A decision to make an investment may not be influenced by desire to stimulate the construction industry and generate employment, unless the investment, judged solely on the basis of its economic value to the plan, would be equal or superior to alternative investments available to the plan.

Thus, it would not be inconsistent with the requirements of sections 403(c) or 404 of ERISA for plan fiduciaries to select an investment course of action that reflects non-economic factors, so long as application of such factors follows primary consideration of a broad range of investment opportunities that are, economically advantageous.

Based on the representations made in your letter, it does not appear that the arrangement you describe would involve a prohibited transaction of the kind described in sections 406(a)(1)(A), (B) or (C) of ERISA (relating to sales, leases or other exchanges of property, loans or other extensions of credit and the furnishing of goods, services or facilities). In addition, it does not appear that the arrangement involves a direct transfer of plan assets to, or use of plan assets by or for the benefit of, a party of interest of the kind described in section 406(a)(1)(D) of the Act.

Nonetheless, it is reasonable to infer that the arrangement will result in some benefit to parties in interest with respect to the plan, i.e. contributing employers and their employees. Thus, it is necessary to determine whether the arrangement would involve an indirect use of plan assets for the benefit of a party in interest.

In the circumstances you describe, where the arrangement would be prohibited, if at all, solely as an indirect use of plan assets for the benefit of a party in interest,* the Department believes that it is appropriate to examine the facts and circumstances surrounding the plan's investment to determine whether it is made for the purposes of providing a prohibited benefit. Since this is an inherently factual determination, the Department is not prepared to issue an advisory opinion regarding the specific arrangement described in your letter.

In our view, however, a plan investment which is made subject to a condition which can reasonably be expected to result in a benefit to one or more parties in interest would violate section 406(a)(1)(D) (as well as sections 403 and 404 of the Act) if it involves greater a greater risk or a lesser return to the plan than a comparable transaction that is not subject to such a condition.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,

Elliot I. Daniel

Assistant Administrator for Regulations and Interpretations

* This kind of arrangement should be distinguished from a plan investment made subject to a condition which in effect makes the transaction an indirect sale or loan.

ERISA Section 403(c)(1)

"Except as provided in paragraph (2) or (3) of subsection (d), or under section 4042 and 4044 (relating to termination of insured plans), the assets of a plan shall never insure to the benefit of an employer and shall be

held for the exclusive purposes of providing benefits to participants in the plan and their beneficiaries and defraying reasonable expenses of administering the plan."

> Editor Note: - Paras (2) and (3) [of 403(c)] relate to the tax-qualification and tax-deductibility of contributions, and so are not germane to this situation.
>
> - Subsection (d) [of 403] and sections 4042 and 4044 deal with returning excess plan assets to plan sponsors upon termination of plans, and so are not germane to this situation.

Advisory Opinion/Individual Exemption 86-FRB

Sweep Arrangements and Related Sweep Transaction Fees

August 1, 1986

Summary
Covers sweeps from ERISA accounts into own/affiliated-bank deposits and other internal short-term investment vehicles, together with fees that may be charged for such transactions.
Also released is an OCC Trust Interpretive Letter #40 dated August 1, 1986.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

Mr. Robert S. Plotkin

Assistant Director

Division of Banking Supervision and Regulation

Board of Governors of the Federal Reserve System

Washington, D.C. 20551

Dear Mr. Plotkin:

This is in response to your letter requesting our views regarding the application of the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA) to certain "sweep services" provided to employee benefit plans by banks acting as trustees and/or investment managers. Under such arrangements, banks transfer ("sweep") idle cash balances of customer accounts, including plan accounts, into short term interest bearing investment vehicles such as money market funds or bank-affiliated short-term collective investment funds. You have specifically asked whether such "sweep services" would qualify for the statutory exemptions provided by sections 408(b)(2), 408(b)(6) and/or 408(b)(8) of ERISA.

You indicate that the bank regulatory agencies for many years have been advising the institutions subject to their supervision of their duty to institute cash management procedures and to productively invest trust funds that are temporarily in their custody. Recent technological advances have permitted increased investment returns to trust accounts by the sweeping of once idle cash balances into interest-bearing investment vehicles. You further state that typically, as compensation for its sweep services, a bank retains as its fee a portion of the daily interest generated by the sweep fund, which fee is calculated as a percentage of the daily invested cash balance. In the case of an employee benefit plan, you believe that this compensation retained by a bank may violate the prohibited transaction provisions of ERISA in the absence of an applicable statutory exemption.[1]

Section 406(a) of ERISA provides, in pertinent part, that a fiduciary of an ERISA plan shall not cause the plan to engage in a transaction which the fiduciary knows or should know constitutes a direct or indirect: (1) sale or exchange, or leasing of any property between the plan and a party in interest; (2) furnishing of goods, services, or facilities between the plan and a party in interest; or (3) transfer to, or use by or for the benefit of a party in interest, of any asset of the plan. Section 3(14) defines the term "party in interest" to include a fiduciary

and a person providing services to the plan. In addition, section 406(b) provides that a fiduciary with respect to a plan shall not: (1) deal with the assets of the plan in its own interest or for its own account; (2) act on behalf of or represent a part whose interests are adverse to those of the plan; or (3) receive consideration from a third party in connection with a transaction involving plan assets.

ERISA section 408(b)(2) exempts from the prohibitions of section 406(a) the payment by a plan to a party in interest, including a fiduciary, for a service (or a combination of services if: (1) the service is necessary for the establishment or operation of the plan; (2) the service is furnished under a contract or arrangement which is reasonable; and (3) no more than reasonable compensation is paid for the service. Accordingly, the mere provision of cash sweep services by a bank or similar institution would be exempt from the prohibitions of ERISA section 406(a) if the conditions of the exemption described in section 408(b)(2) were met.[2]

With respect to the prohibitions in section 406(b), regulation 29 C.F.R. 2550.408b-2(a) indicates that ERISA section 408(b)(2) does not contain an exemption for an act described in ERISA section 406(b) (relating to conflicts of interest on the part of fiduciaries) even if such act occurs in connection with a provision of services which is exempt under section 408(b)(2). As explained in regulation 29 C.F.R. 2550.408b-2(e)(1), if a fiduciary uses the authority, control, or responsibility which makes it a fiduciary to cause the plan to enter into a transaction involving the provision of services when such fiduciary has an interest in the transaction which may affect the exercise of its best judgment as a fiduciary, a transaction described in section 406(b) would occur, and that transaction would be deemed to be a separate transaction from the transaction involving the provision of services and would not be exempted by section 408(b)(2).

As a general matter, a bank engages in violations of section 406(b)(1) whenever it uses its fiduciary authority or control with respect to plan funds to increase the amount of its compensation by determining the timing and/or the amount of plan funds to be transferred into the sweep fund.[3] Conversely, section 29 C.F.R. 2550.408b-2(e)(3) indicates that if a bank provides sweep services without the receipt of additional compensation or other consideration (other than reimbursement of direct expenses Properly and actually incurred in the performance of such services within the meaning of 29 C.F.R. 2550.408c-2(b)(3)), then the provision of sweep services by the bank would not, in itself, constitute a violation of section 406(b) of ERISA. Moreover, the provision by a bank of investment management services, including sweep services, under a single arrangement which is calculated as a investment management services, including sweep services, of the market value of the total assets under management would not, in itself, constitute an act described in section 406(b)(1) of ERISA because the bank would not be exercising its fiduciary authority or control to cause a plan to pay an additional fee.

The following examples illustrate the application of the of section 408(b)(2) of ERISA to sweep service arrangement. The examples assume that the underlying investment transactions otherwise comply with applicable statutory exemptions.

> (1) A plan enters into a standing arrangement with its bank investment manager which authorizes the bank to exercise its discretion to sweep idle cash balances into the bank's money market fund. For this service, the bank will charge the plan a fee calculated as a percentage of the daily invested cash balance in the money market fund. In effect, the bank would be using its fiduciary authority to cause the plan to pay an additional fee for a service performed by the bank in violation of section 406(b)(1) of ERISA. Although there would be initial approval of the arrangement by the plan, thereafter the bank would have total discretion to transfer plan funds into the money market fund and to determine how long the plan funds remain in such fund, thereby increasing its compensation. In this respect, we note that a bank which exercises its fiduciary authority in a manner which contravenes section 406(b)(1) cannot avoid liability simply by obtaining the consent of an independent plan fiduciary after disclosure to that fiduciary. See 29 C.F.R. 2550.408b-2(f), Example (2).
>
> (2) Bank A proposes to provide investment management services, including sweep services, to plans under a single fee arrangement which is calculated as a percentage of the market value of the plan funds under management. There will be no separate charges for the provision of sweep services. Under these circumstances, the provision by Bank A of investment management services, including sweep services, would not, in itself, constitute a violation of section 406(b)(1) because the bank would not be using its fiduciary authority or control to cause a plan to pay additional fees for a service furnished by the Bank. We are assuming for purposes of this example that the total fees to be paid by a plan are reasonable in light of the investment management services received by that plan.
>
> (3) Trustee Bank B proposes to enter into an arrangement with a plan for the provision of sweep services under the following circumstances. The Bank would have a standing authorization whereby, at the close of each business day, the Bank would be required to sweep all uninvested cash in excess of

$100 into the Bank's money market fund. For this service, the Bank will charge the plan a fee calculated as a percentage of the daily invested cash balance in the money market fund. Investment Manager C, who is unrelated to the Bank, is the plan's investment manager as described in section 3(38) with the power to acquire or dispose of the plan's assets. C has sole discretion as to when money will be withdrawn from the fund. The plan's arrangement with the Bank is subject to immediate termination without penalty and requires that the Bank notify the plan no less than 30 days prior to any change in the fees to be charged for its provisions of sweep services. This arrangement does not violate section 406(b)(1) because the Bank would not be exercising any of its fiduciary authority or control to cause the plan to pay an additional fee.

You further indicate that some banks have been relying on the exemption provided by section 408(b)(6) of ERISA. Section 408(b)(6) exempts from the prohibitions of section 406 the provision of certain ancillary services by a bank or similar financial institution supervised by the United States or a State to a plan for which it acts as a fiduciary if the conditions of 29 C.F.R. 2550.408b-6(b) are met. Such ancillary services include services which do not meet the requirements of ERISA section 408(b)(2) because the provision of such services involves an act described in section 406(b)(1) or (b)(2) of ERISA, section 2550.408b-6(b) requires that such services must be provided at not more than reasonable compensation; under adequate internal safeguards which assure that the provision of such service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority; and only to the extent such service is subject to specific guidelines issued by the bank or similar financial institution which meet the requirements of section 2550.408b-6(c). To date, no regulations have been issued clarifying that section. However, the Department has stated that the condition contained in section 408(b)(6)(B) requiring "specific guidelines" is satisfied (in the absence of such regulations) if the ancillary services are provided in accordance with specific guidelines issued by the bank or similar financial institution, and if adherence to the guidelines would reasonably preclude such bank or institution from providing the services in an excessive or unreasonable manner and in a manner that would be inconsistent with the best interests of the participants and beneficiaries. (See 47 FR 14806, April 6, 1982.)

A bank which is a fiduciary to a plan may receive additional fees for additional services rendered only if such services are "ancillary services." In the Department's view, the question of whether short-term cash management services constitute "ancillary services" within the meaning of section 408(b)(6) depends on the expectations of the parties as evidenced by the terms of the governing instrument and applicable Federal banking law. Thus, for example, the Department believes that where a plan appoints a bank trustee or investment manager with complete discretion to manage the assets placed in its control, and no provision for short-term cash management is made under the terms of the governing instrument, the plan does so with the expectation that such person will minimize uninvested cash balances and maximize the plan's rate of return in accordance with evolving technology for short-term cash management. However, where, for example, a plan appoints an independent investment manager to manage plan assets, the provision by a custodial trustee bank of sweep services for any idle cash balances may constitute an "ancillary service" within the meaning of section 408(b)(6). At the present time, the Department is not prepared to conclude that section 408(b)(6) is available in all cases For the arrangements described in your letter.

You further indicate that some banks appear to be relying on the exemption provided by ERISA section 408(b)(8) to invest plan funds in collective trust funds maintained by such banks.

Section 408(b)(8) of ERISA provides an exemption for any transaction between a plan and a common or collective trust fund maintained by a bank or trust company supervised by a State or Federal agency, if (a) the transaction is a sale or purchase of an interest in the fund, (b) the bank or trust company receives not more than reasonable compensation, and (c) the transaction is expressly permitted by the instrument under which the plan is maintained, or by a fiduciary (other than the bank or trust company, or an affiliate thereof) who has authority to manage and control the assets of the plan. The Department has been unwilling to indicate the extent to which section 408(b)(8) provides relief from the prohibitions of section 406(b) of ERISA (See 44 FR 44291 n. 3, July 27, 1979). However, if the bank does not exercise its fiduciary authority to cause a plan to pay an additional fee or other compensation in connection with the acquisition by a plan of an interest in a collective trust fund or for the provisions of services under such fund, the investment would not, in itself, involve acts described in section 406(b)(1) of ERISA.

We hope these comments have been helpful. However, if you should have any further questions or if we can provide any further assistance, please feel free to contact Ivan Strasfeld at (202) 523-8671.

Alan D. Lebowitz

Deputy Administrator for Program Operations

cc: Dean Miller

- Footnotes -

1. Your request appears to be limited to the situation where the bank fiduciary sweeps idle cash balances into its in-house short-term investment vehicles. Accordingly, our response focuses on that situation and does not address the sweep of cash balances into short-term vehicles maintained by parties unrelated to the bank.
2. The Department notes that, although section 408(b)(2) of ERISA provides relief for the furnishing of goods in the course of, and incidental to, the furnishing of services to a plan, the statutory exemption for services does not extend to underlying investment transactions, such as sales or extensions of credit otherwise described in section 406 of ERISA. Rather, section 408(b)(2) provides relief from the restrictions of section 406(a) only for those service transactions which satisfy the conditions of section 408(b)(2) and the regulations thereunder. For example, if a bank fiduciary sells repurchase agreements to a plan under a sweep service arrangement, section 408(b)(2) may provide relief for the provision of such sweep service, but does not provide relief for the acquisition of the repurchase agreements from the bank.
3. In this regard, the Department expresses no opinion as to whether the underlying investment transaction itself is the subject of statutory or administrative relief. See, for example, sections 408(b)(4) and 408(b)(8) of ERISA

Advisory Opinion/Individual Exemption 88-02A

Sweep Arrangements and Related Sweep Transaction Fees

February 2, 1988

Summary
Covers sweeps from *non-discretionary* ERISA accounts into *non-affiliated* mutual funds, together with fees that may be charged for such transactions.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

February 2, 1988 88-02A

Sec. 406(b)(1) & (3), 408(b)(2)

Ms. Charlotte 0. Roederer

Vice President and

Associate General Counsel

Manufacturers and Traders Trust Company

One M&T Plaza

Buffalo, NY 14240

Re: Identification Number: F-3634A

Dear Ms. Roederer;

This is in response to your request for an advisory opinion regarding the application of the Employee Retirement Income Security Act of 1974 (ERISA) to certain "sweep services" provided by Manufacturers and Traders Trust Company (the Bank) to employee benefit plans for which the Bank acts as custodian or directed trustee. You specifically ask whether the transactions would qualify for the statutory exemptions provided by sections 408(b)(2) and/or 408(b)(6) of ERISA.

You represent that the bank offers a daily cash "sweep service" to employee benefit plans for which the Bank

acts as custodian or directed trustee. For those plans which elect to utilize the sweep service, some or all of the plans' uninvested cash is swept into one of several money market funds, all of which are sponsored by independent third parties. For each plan to which the Bank offers this service, an independent third party (or the employer, other than the Bank) functions as the sole investment advisor. The investment advisor determines whether and how much uninvested cash will be swept, and chooses which of several money market funds will be utilized. The specified amount of uninvested cash is swept into the selected investment vehicle at the close of each business day.

Each month the plans participating in the sweep service receive a dividend from the money market funds based on the prior month's daily invested cash balance in the funds. The bank periodically calculates a "cash sweep" fee which is a percentage of the dividends received by each plan from the funds. The bank receives no fees or other compensation from the money market funds. Thus, you represent that no part of the dividends received are allocated to the Bank for its own account as compensation for sweep services. The cash sweep fee is recorded separately in the periodic accounting and billing which the Bank sends to the employer. For most plans, the fee is calculated and billed on a quarterly basis, but small plan accounts are billed annually. The cash sweep arrangement is subject to immediate termination without penalty and requires that the Bank notify the plan no less than 30 days prior to any change in the fees to be charged for the service.

The provisions of section 406(a)(1)(C) and (D) of ERISA prohibit a fiduciary with respect to a plan from causing the plan to engage in a transaction if he or she knows or should know that the transaction constitutes a direct or indirect furnishing of goods, services, or facilities between the plan and a party in interest, or transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 406(b)(1) of ERISA further prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in his or her own interest or for his or her own account. Section 406(b)(2) of ERISA provides that a fiduciary shall not in his or her individual or in any other capacity act in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries. Section 406(b)(3) of ERISA prohibits a fiduciary from receiving a fee or other consideration for his or her own personal account from a party dealing with a plan in connection with a transaction involving the assets of the plan.

Subject to the limitations of section 408(d), section 408(b)(2) of ERISA exempts from the prohibitions of section 406(a) contracting (or making reasonable arrangements) for services (or a combination of services) with a party in interest if: the service is necessary for the establishment or operation of the plan; (2) the service is furnished under a contract which is reasonable; and no more than reasonable compensation is paid for the service. Regulations issued by the Department clarify the terms "necessary service" (29 C.F.R. 2550.408b-2(b)), "reasonable contract or arrangement" (29 C.F.R. 2550.408b-2(c)), and "reasonable compensation" (29 C.F.R. 2550.408c-2).

Accordingly, the provision of sweep services would be exempt from the prohibitions of section 406(a) of ERISA if the conditions of section 408(b)(2) are met.[1] We note, however, that the questions of what constitutes a necessary service, a reasonable contract or arrangement, and reasonable compensation are inherently factual in nature. Section 5.01 of Advisory Opinion Procedure 76-1 (ERISA Proc. 76-1, 41 FR 36281, August 27, 1976) states that the Department generally will not issue opinions on such questions.

With respect to the prohibitions in section 406(b), regulation 29 C.F.R. 2550.408b-2(a) states that section 408(b)(2) of ERISA does not contain an exemption for an act described in section 406(b). As explained in 29 C.F.R. 2550.408b-2(e)(1), if a fiduciary uses the authority, control or responsibility that makes him or her a fiduciary to cause the plan to enter into a transaction involving the provision of services when such a fiduciary has an interest in the transaction that may affect the exercise of his or her best judgment as a fiduciary, a transaction described in section 406(b) of ERISA would occur, and the transaction would be deemed to be a separate transaction from the one involving the provision of services and would not be exempted by ERISA section 408(b)(2).

Your letter of March 31, 1987 states that the bank does not have investment discretion with respect to the plans to which the Bank offers the sweep service, and that the decision to utilize the sweep services and compensate the Bank therefore is made by independent investment advisors. Your submission also explains that the Bank will not receive a fee or other benefit from any of the unrelated money market funds into which uninvested cash is swept and that the Bank will notify a plan no less than 30 days prior to any change in the fees to be charged for the service. Your letter also states that each month, the plan receives from the fund into which the plan's assets are swept a dividend based on the prior month's activity and that the bank's "cash sweep" fee is a percentage of these dividends either paid by the plan sponsor or deducted by the Bank (at the instruction of the sponsor) from the assets of the plan.[2]

In the circumstances you describe, it appears that the Bank would not be exercising any of the authority, control, or responsibility that makes it a fiduciary to cause a plan to pay an additional fee in connection with the "sweep services". Thus, the provision of sweep services would not, in and of itself, involve acts described in section 406(b)(1) of ERISA. The Bank also would not appear to violate section 406(b)(2) because it would not, solely by reason of the circumstances you describe, be acting on behalf of a party whose interests are adverse to those of the plan.[3]

With respect to section 406(b)(3), the Department notes that, under the described circumstances, the receipt of fees by the Bank from the assets of a plan for the provision of sweep services would not, in itself, constitute a violation of section 406(b)(3) of ERISA.

You also ask whether the provision of sweep services by the Bank would qualify for the statutory exemption provided by section 408(b)(6) of ERISA. However, to the extent that the arrangement you describe is covered by section 408(b)(2), the Department does not find it necessary to address whether an additional statutory exemption is available.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. We note that pursuant to section 5 of ERISA Procedure 76-1, this advisory opinion relates solely to the arrangement described involving the Bank.

Sincerely,

Robert J. Doyle

Acting Associate Director for Regulations and Interpretations

- Footnotes -

1. The Department expresses no opinion herein regarding the underlying investment of plan assets in the money market funds. In this regard, the Department notes that the statutory exemption for services does not extend to underlying investment transactions such as sales between a plan and a party in interest described in section 406 of ERISA.
2. We assume that, where the bank's fee is deducted from the assets of a plan, the obligation to pay such fee is, under the governing plan documents, an obligation of the plan and not of the plan sponsor.
3. In expressing this opinion, the Department assumes that no arrangement exists between either the Bank and any of the above described mutual funds or the directing plan fiduciary and any of the funds such as described in 29 C.F.R. § 2509.75-2(c).

Advisory Opinion/Individual Exemption 88-09A

Investment in Fiduciary Bank/BHC Treasury Stock

April 15, 1988

Summary	
(1)	Permits self-directed IRAs to purchase stock of the fiduciary bank's parent holding company if: (1) the fiduciary bank is directed in writing to do so by the participant, who is authorized to direct investments, (2) the seller is not a "disqualified person" (the fiduciary bank or a bank insider), and (3) the participant is not a director or officer of the fiduciary bank.
(2)	Such purchases may be made from the holding company's treasury stock if the participant gives specific instructions to do so and the fiduciary bank has no decision authority in deciding the seller.

Lloyd V. Crawford

Rushton, Stakely, Johnston & Garrette

184 Commerce Street

Montgomery, AL 36104

Re: Bank of Prattville

Identification Number: F-3677A

Dear Mr. Crawford:

This is in response to your letters of May 29 and June 18, 1987 requesting an advisory opinion regarding the application of the prohibited transaction provisions of section 4975 of the Internal Revenue Code of 1986 (the Code). In particular, your letter concerns purchases of stock of the parent (the Parent) of the Bank of Prattville (the Bank) by various self-directed individual retirement accounts (IRAs) sponsored by the Bank.

You represent that the Bank is a banking corporation organized under the laws of the state of Alabama and is wholly owned by the Parent. The Bank qualifies under section 408(a)(2) and 408(n) of the Code as a trustee of IRAs.

The Bank is considering amending the existing master and prototype IRA for which it serves as custodian to include a self-directed feature which permits the participants to direct the investments of their accounts in securities selected by the participants, including stock of the Parent. Pursuant to these amendments, the participants will have complete and sole discretion over the investments, with the Bank acting only as a nondiscretionary trustee or custodian. The Bank will not make any investments or dispose of any investments for the IRAs except upon the written direction of the participants. Neither the Bank nor the Parent will provide any form of investment advice or make investment recommendations. Purchases and sales of securities will be conducted through brokerage accounts which the IRA participants will establish with the Bank.

Parent stock is not traded on any exchange or on the national over-the-counter market system. In cases where an IRA participant directs that funds in his or her account be invested in Parent stock, the stock would be purchased either from the Parent's treasury or from unrelated third parties.

You ask for an opinion with respect to the following questions:

(1) Will purchases of Parent stock by the Bank as custodian of its IRAs on behalf of and at the sole direction of participants who are neither executive officers nor directors of the Bank constitute prohibited transactions within the meaning of Code section 4975(c)(1), when the purchase is made directly from the Parent's treasury?

(2) Will purchases of Parent stock by the Bank as custodian of its IRAs on behalf of and at the sole direction of participants who are executive officers or directors of the Bank constitute prohibited transactions within the meaning of Code section 4975(c)(1), when the purchase is made directly from the Parent's treasury?

(3) Will purchases of Parent stock by the Bank as custodian of its IRAs on behalf of and at the sole direction of participants who are neither executive officers nor directors of the Bank constitute prohibited transactions within the meaning of Code section 4975(c)(1), when the purchase is made directly from a third party who is neither an executive officer or director of the Bank?

(4) Will purchases of Parent stock by the Bank as custodian of its IRAs on behalf of and at the sole direction of participants who are executive officers or directors of the Bank constitute prohibited transactions within the meaning of Code section 4975(c)(1), when the purchase is made directly from a third party who is neither an executive officer or director of the Bank?

(5) Will purchases of Parent stock by IRA custodians other than the Bank on behalf of and at the sole direction of participants who are executive officers or directors of the Bank constitute prohibited transactions within the meaning of Code section 4975(c)(1), whether the purchase is made directly from a third party or from the Parent's treasury?

Pursuant to section 2510.3-2(d) of the Department's regulations, the Department does not have jurisdiction

under Title I of the Employee Retirement Income Security Act (ERISA) over those individual retirement accounts described in section 408(2) of the Code which comply with the provisions of that section of the regulation.[1] Such IRAs are within the purview of Title II of ERISA, section 4975 of the Code. Under Presidential Reorganization No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor and the Secretary of the Treasury is bound by the interpretations of the Secretary of Labor pursuant to such authority. To the extent there is Title I jurisdiction regarding any IRA for which the Bank serves as custodian or trustee, references to specific sections of the Code in this letter shall also refer to the corresponding sections of ERISA.

Section 4975(c)(1) of the Code prohibits, in relevant part, the sale or exchange of property between a plan and a disqualified person (4975(c)(1)(A)), the furnishing of goods or services between a plan and a disqualified person (4975(c)(1)(C)), the use by or for the benefit of a disqualified person of the income or assets of a plan (4975(c)(1)(D)), and an act by a disqualified person who is a fiduciary whereby he or she deals with the income or assets of a plan in his or her own interest or for his or her own account (4975(c)(1)(E)).

Section 4975(e)(2) of the Code defines the term "disqualified person" to include a plan fiduciary and a person providing services to a plan.

Thus, the Bank is a disqualified person with respect to the IRAs. The Parent, however, is not a disqualified person with respect to the IRAs solely by reason of its ownership of the Bank.[2] The question of whether the Parent is a disqualified person with respect to the IRAs under any other provision of section 4975(e)(2) of the Code is inherently factual in nature. Section 5.01 of Advisory Opinion Procedure 76-1 (ERISA Proc. 76-1, 41 FR 36281, August 27, 1976) states that the Department generally will not issue opinions on such questions.

Therefore, with respect to questions 1 and 2, to the extent that the Parent is not a disqualified person with respect to the IRAs, purchases of stock from the Parent by the Bank on behalf of and at the direction of the IRA participants would not involve transactions described in section 4975(c)(1)(A) of the Code.

With respect to questions 3 and 4, it is the Department's opinion that if the seller of the Parent stock is not otherwise a disqualified person with respect to an IRA, the purchase by the Bank of Parent stock from unrelated third parties on behalf of the IRA does not constitute a transaction described in section 4975(c)(1)(A) of the Code.

With respect to question 5, regarding purchases of Parent stock by IRA custodians other than the Bank on behalf of and at the sole direction of participants who are officers or directors of the Bank from the Parent or an unrelated third party, it is our view that the purchases of Parent stock do not constitute transactions described in section 4975(c)(i)(A) of the Code to the extent that the seller of Parent stock is not a disqualified person with respect to the IRA.[3]

However, while the Parent may not be a disqualified person with respect to the IRAs sponsored by the Bank, purchases and holding of Parent stock by the self-directed IRAs of officers and directors of the Bank raise questions under section 4975(c)(1)(D) and (E) of the Code, depending on the degree (if any) of the participant's interest in the transaction. The IRA participants, as officers and directors of the Bank, may have interests in the proposed transactions which may affect their best judgment as fiduciaries of their IRAs. In such circumstances, the transactions may violate section 4975(c)(1)(D) and (E) of the Code.

In addition, although the Bank may have no discretion in selecting the investments to be made by the IRAs, it appears that the Bank may have discretion in determining the seller from which the IRAs will purchase Parent stock. To the extent that it does have such discretion, the Bank would be a plan fiduciary with respect to its exercise of such discretion.

Thus, if the IRA participants do not instruct the Bank with respect to such matters but, rather, rely on it as a fiduciary to select appropriate sellers for the transactions, a selection by the Bank of the Parent as seller would raise questions under section 4975(c)(1)(D) and (E) of the Code. This is because the Bank, as a wholly-owned subsidiary of the Parent, has an interest in the fortunes of the Parent. Therefore, the Bank may be in a position to indirectly use the assets of a plan for its own benefit or to deal with the assets of a plan in its own interest.[4]

We note that you have not requested and consequently the Department is not offering an opinion regarding the provision of brokerage services by the Bank to the IRAs.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Section 10 of the procedure describes the effect of advisory opinions.

Sincerely,

Robert J. Doyle

Acting Associate Director for

Regulations and Interpretations

1. Under the regulation, Title I is inapplicable only if: (1) no contributions to the plan are made by the employer or employee association; (2) participation is completely voluntary for employees or members; (3) the sole involvement of the employer or employee organization is to permit the sponsor to publicize the program and to collect contributions on behalf of the sponsor through payroll deductions or dues checkoffs; and (4) the employer or employee organization receives no consideration in the form of cash or otherwise, other than reasonable compensation for services actually rendered in connection with payroll deductions or dues checkoffs.
2. However, the Department notes that the Parent may be a party in interest with respect to any IRAs sponsored by the Bank which are within the jurisdiction of Title I of ERISA. In this regard, contrast section 3(14)(H) of ERISA with section 4975(e)(2)(H) of the Code.
3. We are assuming for the purposes of this letter that the Bank is not acting as an employer, as defined in section 4975(e)(2)(D) of the Code and section 3(14)(C) of ERISA, with respect to the IRAs of officers and directors of the Bank. See Advisory Opinion 85-26, April 10, 1985.
4. We assume, for purposes of this ruling, that the Bank does not have any authority or responsibility to vote or otherwise deal with Parent stock held by its self-directed IRAs.

Advisory Opinion/Individual Exemption 88-18A

Self-Directed IRA Loans to Company Where IRA Grantor/Beneficiary is Insider

December 23, 1988

Summary
Covers self-directed IRA account loans to company owned by the IRA's grantor/beneficiary.

Mr. Joseph E. Hurst, Jr.

Friday, Eldredge & Clark

2000 First Commercial Building

Little Rock, AR 72201

Re: Thomas E. Darragh

Identification Number: F-3819A

Dear Mr. Hurst:

Your letter dated January 22, 1988, to the Internal Revenue Service (the Service) has been forwarded to this office for our consideration and response. Your letter concerns whether a loan from an Individual Retirement Account (IRA) to a corporation would violate section 4975(c)(1)(B) of the Internal Revenue Code of 1986 (the Code).

You represent that Thomas F. Darragh established an IRA described in section 408 of the Code. Mr. Darragh is the only participant in the IRA and has reserved the right to direct the IRA's investments. You further represent that Mr. Darragh is currently an employee, shareholder and member of the Board of Directors of Darragh Company (the Corporation). Your subsequent letter of April 28, 1988, indicates that the Corporation has no involvement whatsoever with the establishment or maintenance of the IRA. The Corporation has two

classes of stock, Class A voting and Class B nonvoting. Mr. Darragh owns directly and indirectly (pursuant to section 4975(e)(4) and (6) of the Code) 46.04 percent of the total voting power of the Corporation and 48.14 percent of the total issued and outstanding shares of stock.

Mr. Darragh proposes to direct the IRA Custodian, One National Bank, to lend the Corporation approximately $500,000 pursuant to a promissory note entered into by the Corporation. The Corporation will pay the IRA interest on the note based on the then current prevailing market rate of interest which lenders are currently charging to the Corporation.

You have requested an advisory opinion that the proposed loan will not constitute a prohibited transaction under section 4975(c)(1)(B) of the Code.

Pursuant to section 2510.3-2(d) of the Department of Labor's (the Department) regulations, the Department does not have jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (ERISA) over those IRAs described in section 408(a) of the Code which comply with the provisions of that section of regulation.* Under Presidential Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor and the Secretary of the Treasury is bound by such interpretations of the Secretary of Labor pursuant to such authority.

Section 4975(c)(1)(B) of the Code prohibits any direct or indirect sale, lending of money or other extension of credit between a plan and a disqualified person. Section 4975(e)(1) of the Code, in relevant part, defines the term plan to include an IRA described in section 408(a) of the Code. Section 4975(e)(2) of the Code defines "disqualified person" to include a fiduciary, an employer any of whose employees are covered by the plan, and a corporation, partnership, or trust or estate of which (or in which) 50 percent or more of (i) the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of the corporation, (ii) the capital interest or profits interest of such partnership, or (iii) the beneficial interest of such trust or estate, is owned directly or indirectly, or held by a fiduciary. Section 4975(e)(3) of the Code defines the term fiduciary, in part, to include any person who exercises any discretionary authority or discretionary control respecting management of the plan, or exercised any authority or control respecting the management or the disposition of its assets.

Mr. Darragh is a fiduciary and, thus, a disqualified person with respect to the IRA because of the authority under the IRA to direct investments. You have stated that Mr. Darragh is employed by the Corporation. Although section 4975 does not define the term "employer", section 3(5) of ERISA provides, in part, that an "employer" is any person acting as an employer in relation to an employee benefit plan. You have stated that the Corporation has no involvement with the establishment or maintenance of the IRA. Therefore, it is the opinion of the Department that the Corporation is not a disqualified person with respect to the IRA under section 4975(e)(2)(C) of the Code. In addition, the Corporation is not a disqualified person with respect to the IRA under section 4975(e)(2)(G) of the Code by reason of Mr. Darragh's stock ownership in the Corporation.

Therefore, to the extent that the Corporation is not a disqualified person with respect to the IRA under any other provision of section 4975(e)(2) of the Code, the loan by the IRA to the Corporation would not violate section 4975(c)(1)(B) of the Code.

We note, however, that this conclusion does not preclude the existence of other prohibited transactions under section 4975 of the Code. Section 4975(c)(1)(D) of the Code prohibits any direct or indirect transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan. Section 4975(c)(1)(E) of the Code prohibits a fiduciary from dealing with the income or assets of a plan in his own interest or for his own account. Section 54.4975-6(a)(5) of the Pension Excise Tax Regulations characterizes transactions described in section 4975(c)(1)(E) as involving the use of authority by fiduciaries to cause plans to enter into transactions when those fiduciaries have interests which may affect the exercise of their best judgment as fiduciaries. Mr. Darragh is a fiduciary with respect to the IRA. In addition, he has a substantial interest in the Corporation. Therefore, the Corporation is a party in whom Mr. Darragh has an interest which might affect his best judgment as a fiduciary. ***Accordingly, a prohibited use of plan assets for the benefit of a disqualified person under*** section 4975(c)(1)(D) ***or an act of self-dealing under*** section 4975(c)(1)(E) ***is likely to result if Mr. Darragh directs the IRA to loan funds to the Corporation***. [Emphasis added]

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of the procedures, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,

Robert J. Doyle

Acting Associate Director for Regulations and Interpretations

- Footnote -

> * Under the regulations, Title I is inapplicable only if the following conditions are met: (1) no contributions to the plan are made by the employer or employee association; (2) participation is completely voluntary for employees or members; (3) the sole involvement of the employer or employee association is to permit the sponsor to publicize the program and to collect contributions on behalf of the sponsor through payroll deductions or dues checkoffs; and (4) the employer or employee association receives no consideration in the form of cash or otherwise other than reasonable compensation for services actually rendered in connection with such payroll deductions or dues checkoffs.

Advisory Opinion/Individual Exemption 88-28

Investment in Fiduciary Bank/BHC Stock in Initial Public Offering

January 26, 1988 (Exemption Application D-7187)

Summary
Self-directed IRA and Keogh accounts may invest in a new issue ("initial public offering") of own-bank stock or own holding company stock if: (1) the fiduciary bank is directed in writing to do so by the participant, who is authorized to direct investments, (2) other investment vehicles are available to the account, (3) not more than 25% of any account's assets will be invested in the stock issue, (4) no fees or commissions are paid, (5) no more than fair market value is paid, and (6) fair market value is determined by an independent appraiser.

U.S. Department of Labor

Office of Pension and Welfare Benefit Programs

Washington, D.C. 20210

People's Bank (People's) Located In

Bridgeport, Connecticut

(Application No. D-7187)

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 21 1975). If the exemption is granted the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) thru (D) of the Code shall not apply to the sale by People's of its subsidiary's stock to the Keogh Plans (the Keoghs) for which People's services [sic] as custodian, as part of an initial issue of such stock, and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the sale by People's of its subsidiary's stock to the individual retirement accounts (the IRAs) for which People's serves as custodian, as part of an initial issue of such stock, provided the Keoghs and IRAs pay no more than the fair market value of the stock on the date of the sale.[1]

Summary of Facts and Representations

1. People's is a mutual savings bank organized under the laws of the State of Connecticut. People's is in the process of reorganizing (the Reorganization) pursuant to Connecticut Public Act 85-330 (the Reorganization Act) from its current form as a mutual savings bank to a mutual holding company with a capital stock subsidiary bank (the Bank) which will assume substantially all of the operations of People's. The majority of the bank's stock will be held by People's in its reorganized form as a mutual holding company.

2. In connection with, and as part of the Reorganization, the Bank proposes to offer between 20% and 30% of its stock to the public. The Reorganization Act permits the Bank from selling or offering to sell its common stock or securities convertible into common stock unless it first gives to each "eligible account holder" subscription rights to acquire Bank stock pursuant to a subscription offering. Regulations issued by the Department of Banking of the State of Connecticut clearly establish that the IRAs and the Keoghs, held in time deposits by People's as custodian, are eligible accounts requiring that the holders of those accounts receive subscription rights to purchase Bank stock. Accordingly, People's intends to offer its IRA and Keogh depositors subscription rights to Bank stock in connection with the Reorganization. After the Reorganization, the Bank stock will be traded publicly on the Over-the-Counter market.
3. People's currently acts as custodian for approximately 64,000 IRA customers and 2,000 participants in custodial Keoghs with assets, in the aggregate, of approximately $500 million. These assets represents approximately 12% of total deposits held by People's. People's as custodian has no discretionary authority with respect to the investment of IRA or Keogh assets. All investments are made at the direction of the account holder within the range of investment choices permitted by the plan documents. The applicants represent that no single IRA or Keogh account will be permitted to invest more than 25% of the assets of such account in stock of the Bank in connection with this initial offering.
4. In accordance with the provisions of the Reorganization Act, People's must submit to the Connecticut Banking Commissioner (the Commissioner) a plan outlining the terms of the subscription offering. Within 15 days from the date of that submission, People's will be required to mail to each holder, including holders of IRAs and Keoghs, a notice that the Board of Trustees has approved the sale of a certain number of shares of common stock or securities convertible into common stock, a description of the rights of such depositors to subscribe to such stock and various other information concerning rights of stockholders. Subscription rights must be exercised within a period ending no sooner than 60 days from the date the subscription plan is submitted to the Commissioner, or they will expire. Pursuant to the terms of the proposed transaction, the IRA and Keogh customers would notify People's within that subscription period of their intention to invest the assets of their IRA and Keogh accounts in Bank stock. Since the purchase of stock will be made in connection with an initial issue, no broker will be involved and purchases will be made by the IRA or Keogh directly from the Bank. Since no broker is involved in the transaction, no commissions will be paid with respect to the purchase.
5. As part of the subscription plan submitted to the Commissioner, People's will include an appraisal prepared by an independent firm of the estimated market value of the Bank and the Bank stock to be issued. The valuation will be based on financial information relating People's and the economic environment in which it operates, a comparison of People's with selected publicly held thrift institutions and with other thrift institutions located in Connecticut, and any other factor as the independent appraiser may deem to be appropriate. The valuation will be stated in terms of a subscription price range, the maximum of which will be no more than 25% above the average of the minimum and maximum of such price range, and the minimum of which will be no more than 25% below such average. After the subscription plan is approved by the Commissioner, the independent appraiser will review, prior to the subscription offering, all developments consequent to its initial valuation in order to confirm or amend its determination of the initial subscription price range. The subscription price will be no less than the minimum of the price range, nor any greater than the maximum of the price range.
6. Concurrently with the subscription offering, People's may offer the opportunity to purchase all shares not subscribed for in the subscription offering to (a) Certain other customers of People's who may not have qualified as eligible account holders; (b) trustees, officers, or employees of People's or its affiliates, and (c) residents of Fairfield, New Haven, Tolland, Hartford and Litchfield Counties, Connecticut (the Community Offering). If all shares of Bank stock are sold through the exercise of subscription rights and through the Community Offering, the independent appraiser will re-examine its estimate of the market value of the Bank and of the shares of Bank stock as of the last day of the subscription offering and the Community Offering. If at that time the independent appraiser's estimate of the value of Bank stock is less than the subscription price (but not less than the minimum of the originally estimated price range), then that estimated value will become the final purchase price for Bank stock and the Bank will refund to all purchasers the difference between the subscription price and the independent appraiser's final estimate of the value of Bank stock. If, however, the independent appraiser's final estimate of the value of Bank stock exceeds the subscription price (or is less than the minimum of the originally estimated price range), then with the approval of the Commissioner, People's will either terminate the subscription plan, establish a new subscription price range, or adjust the total number of shares of the Bank so that the market value per share will be within the subscription price range.
7. If all the shares of Bank stock to be sold are not sold through the exercise of subscription rights or through the Community Offering, the remaining shares will be sold to the public after approval of a public offering circular by the Commissioner. The independent appraiser will again update its prior appraisal of the estimated market value of Bank stock. If there is any change in that appraisal, the

number of shares of the Bank may be adjusted to reflect the increase or decrease of the appraised value of the Bank stock. That number of shares will then be sold to or through the underwriters of the public offering pursuant to terms of an underwriting agreement. In the event the sale price of Bank stock pursuant to the public offering is less than the price paid for exercise of subscription rights or pursuant to the Community Offering the difference will be refunded to those who paid the higher price.

8. The applicants represent that the entire process is designed to ensure that the price paid for Bank stock is fair market value. In any event, the determination as to the price to be paid for Bank stock will be subject to approval by the Commissioner.
9. In summary, the applicants represent that the proposed transaction meets the criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because: (1) The decision to purchase the Bank stock will be made by IRA and Keogh customers out of a range of investment choices, and People's has no discretion over such decision; (2) no fees or commissions will be paid with respect to the transaction; (3) no more than 25% of the assets of any IRA or Keogh account will be invested in Bank stock in connection with the initial offering; and (4) the purchase price or the stock will be determined by independent appraisal and must be approved by the Commissioner.

People's Bank (People's) Located

Bridgeport, Connecticut

[Prohibited Transaction Exemption 88-28.

Exemption Application No. D-7187]

Exemption

The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(2)(A) through (D) of the Code, shall not apply to the sale by People's of its subsidiary's stock to the Keogh plans (the Keoghs) for which People's serves as custodian, as part of an initial issue of such stock, and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the sale by People's of its subsidiary's stock to the individual retirement accounts (the IRAs) for which People's serves as custodian, as part of an initial issue of such stock, provided the Keoghs and the IRAs pay no more than the fair market value of the stock on the date of the sale.[1]

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 26, 1988 at 53 FR 2106.

For Further Information Contact: Gary Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

1. Because the IRAs do not meet the conditions described in 29 C.F.R. 2510.3-2(d), there is no jurisdiction with respect to the IRAs under Title I of the Act. However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

Advisory Opinion/Individual Exemption 89-03

Self-Directed IRA Purchases of Employer Stock from Employer

March 23, 1989

Summary
Covers self-directed IRA account purchases of stock from the employer of the IRA's grantor/beneficiary.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

March 23, 1989

Ms. Maria Stefanis

Arthur Young

3000 K Street, N.W.

Washington, D.C. 20007

Re: Individual Retirement Accounts of Edward E. and Frances E. Bowns

Identification Number F-3879A

Dear Ms. Stefanis:

Your letter dated May 19, 1988, to the Internal Revenue Service has been forwarded to this office for our consideration and response. Your letter concerns whether a purchase of stock by an Individual Retirement Account (IRA) from a corporation would violate section 4975(c)(1)(A) of the Internal Revenue Code of 1986 (the Code).

You represent that Edward E. Bowns and his wife, Frances, established IRAs described in section 408 of the Code. Mr. and Mr. Bowns are the only participants in their respective IRAs and have reserved the right to direct their IRA's investments. Mr. Bowns is Executive Vice President and General Manager of the Partition Division of the Rock-Tenn Company. Mr. Bowns owns directly 1,122 shares. Mr. Bowns holds incentive stock options, expiring 1993 through 1998, to acquire an additional 27,020 shares. Assuming all options are exercised and including the 400 shares proposed to be purchased by the IRAs, the Bowns family would own a total of 29,327 shares. There are now approximately 2,500,000 shares of Rock-Tenn common stock outstanding. You further attest that Rock-Tenn has not sponsored, maintained or made any contribution to the IRAs.

Mr. and Mrs. Bowns propose to direct their IRA trustee to purchase Rock-Tenn common stock from Rock-Tenn on behalf of each of their IRAs. The trustee will pay no more than adequate compensation for the Rock-Tenn stock.

You have requested an advisory opinion that the proposed purchase will not constitute a prohibited transaction under section 4975(c)(1)(A) of the Code.

Pursuant to section 2510.3-2(d) of the Department of Labor's (the Department) regulations, the Department does not have jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (ERISA) over those IRAs described in section 408 of the Code which comply with the provisions of that section of regulation.[1] Such IRAs are, however, subject to section 4975 of the Code. Pursuant to Presidential Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code, subject to certain exceptions not here relevant, has been transferred to the Secretary of Labor and the Secretary of the Treasury is bound by such interpretations.

Section 4975(c)(1)(A) of the Code prohibits any direct or indirect sale, exchange or leasing of any property between a plan and a disqualified person. Section 4975(e)(1) of the Code, in relevant part, defines the term plan to include an IRA described in section 408(a) of the Code. Section 4975(e)(2) of the Code defines the term disqualified person to include a fiduciary, an employer any of whose employees are covered by the plan, and a corporation of which 50 percent or more of the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of the corporation, is owned directly or indirectly, or held by a fiduciary. Section 4975(e)(4) of the Code provides that, for purposes of section 4975(e)(2)(G), there shall be taken into account indirect stock holdings which would be taken into account under section 267(c) of the Code. Section 4975(e)(3) of the Code defines the term fiduciary, in part, to include any person who exercises any discretionary authority or discretionary control respecting management of the plan, or exercised any authority or control respecting the management or the disposition of its assets.

Mr. and Mrs. Bowns are fiduciaries and, thus, disqualified persons with respect to their IRAs because of their authority under the IRAs to direct investments. Although section 4975 does not define the term employer, section 3(5) of ERISA provides, in part, that an employer is any person acting as an employer in relation to an employee benefit plan. You have stated that Rock-Tenn has no involvement with the establishment or maintenance of the IRAs. Therefore, it is the opinion of the Department that Rock-Tenn is not a disqualified

person with respect to the IRAs under section 4975(e)(2)(C) of the Code. In addition, Rock-Tenn is not a disqualified person under section 4975(e)(2)(G) of the code by reason of the Bowns' stock ownership in Rock-Tenn.

Therefore, to the extent that Rock-Tenn is not a disqualified person under any other provisions of section 4975(e)(2) of the Code, the purchase of Rock-Tenn would not violate section 4975(c)(1)(A) of the Code.

We note, however, that this conclusion does not preclude the existence of other prohibited transactions under section 4975 of the Code. Section 4975(c)(1)(D) of the Code prohibits any direct or indirect transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan. Section 4975(c)(1)(E) of the Code prohibits a fiduciary from dealing with the income or assets of a plan in his own interest or for his own account. The Department will generally not issue advisory opinions with respect to inherently factual matters.[2] We note, however, that Mr. and Mrs. Bowns are fiduciaries with respect to their IRAs. In addition, Mr. Bowns is an officer of Rock-Tenn and the Bowns have stock ownership interests in Rock-Tenn. Accordingly, you may wish to consider whether the purchases of stock involve violations of section 4975(c)(1)(D) or (E) of the Code.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of the procedures, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,

Robert J. Doyle

Director of Regulations and Interpretations

403(a)(1),

Mr. John S. Brescher, Jr., Esq. 406(b)(1)

McCarter & English

Four Gateway Center

100 Mulberry Street

P. 0. Box 652

Newark, NJ 07101-0652

Dear Mr. Brescher:

This is in response to your request for an advisory opinion regarding the application of the prohibited transaction provisions of section 406 of the Employee Retirement Income Security Act of 1974 (ERISA) and section 4975 of the Internal Revenue Code (the Code). Your letter concerns purchases of securities issued by the parent company of Citizens First National Bank of New Jersey (the Bank) at the direction of fiduciaries of employee benefit plans for which the Bank serves an trustee.

According to your representations, the Bank is a wholly owned subsidiary of Citizens First Bancorp., Inc. (Bancorp), a bank holding company organized and existing under the laws of the State of New Jersey. Bancorp is a publicly held company; its stock is regularly traded on the American Stock Exchange.

You represent that the Bank, as part of its regular banking services, maintains a Prototype Defined Contribution Plan and Trustee/Custodial Account (the Prototype Plan) for adoption by those of its customers who wish to adopt a qualified retirement program. You state that the Bank may be appointed to serve either as custodian or trustee of an employee benefit plan that adopts the Prototype Plan. You indicate that, in either of these cases, the Bank must invest funds held thereunder in accordance with the requirements of ERISA.

You state that, where the Bank serves as trustee, the Prototype Plan permits investments "in any form of property," expressly including "securities issued by the Trustee and/or affiliates of the Trustee." An adopting employer has the option to direct investments by the trustee, to appoint an investment manager (registered as an investment advisor under the Investment Advisors Act of 1940) to direct investments by the trustee, or to give the trustee sole investment management responsibility. The employer must choose an option in its adoption agreement and the Bank must agree to it. You represent that if the Bank as trustee is subject to the investment direction of the employer or of an investment manager, any investment direction to the Bank must be made in writing by the authorized person.

According to your representations, the Bank, as directed trustee, anticipates receiving directions to purchase Bancorp stock on behalf of a plan. Such stock purchases would be made on the open market on the American Stock Exchange through an unaffiliated national brokerage firm selected by the Bank. No more than fair market value would be paid for the stock and the Bank would receive no commission as a result of any such purchase. The identity of the sellers of any stock so purchased would not be known to the Bank and would, you state, be difficult, if not impossible, to ascertain. You represent that the Bank does not act as market-maker for such stock.

You request an opinion as to whether the Bank would engage in a prohibited transaction within the meaning of section 406 of ERISA or section 4975 of the Code if, in its capacity as directed trustee of an employee benefit plan which adopts the Prototype Plan, it purchased Bancorp stock on the American Stock Exchange on behalf of any such plan, at the proper direction of a named fiduciary having the authority to direct investments by the Bank, or of an investment manager appointed by a named fiduciary.[1]

Section 403(a) of ERISA provides, in part, that a plan trustee shall have exclusive authority and discretion to manage and control the assets of the plan, except to the extent that: (1) the plan expressly provides that the trustees are subject to the direction of a named fiduciary who is not a trustee, in which case the trustee shall be subject to the proper directions of such fiduciary which are made in accordance with the terms of the plan and which are not contrary to ERISA; or (2) the authority to manage, acquire, or dispose of the assets of the

plan is delegated to one or more investment managers pursuant to section 402(c)(3) of ERISA.

Section 406(a)(1)(A) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction if he or she knows or should know that the transaction constitutes a direct or indirect sale or exchange, or leasing, of any property between the plan and a party in interest. Section 3(14) of ERISA defines the term "party in interest" to include a fiduciary with respect to a plan and a person providing services to a plan, as well as a 10 percent or more shareholder, directly or indirectly, of such a person.[2]

Section 406(b)(1) of ERISA prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in his or her own interest or for his or her own account.

With respect to purchases and sales of Bancorp stock on the open market in the manner described above, we note that the Conference Report accompanying ERISA states that:

> In general, it is expected that a transaction will not be a prohibited transaction (under either the labor or tax provisions) if the transaction is an ordinary "blind" transaction purchase or sale of securities through an exchange where neither buyer or seller (nor the agent of either) known the identity of the other party involved. In this case, there is no reason to impose a sanction on a fiduciary (or party-in-interest) merely because, by chance, the other party turns out to be a party-in-interest (or plan). H.R. Rep. 93-1280, 93rd Cong., 2d Sess., 307 (1974).

Based on your representations, it is the opinion of the Department that purchases and sales of Bancorp stock in blind transactions executed by unaffiliated brokers at the proper direction of named fiduciaries of plans of its customers would not constitute transactions described in section 406(a)(1)(A) of ERISA. Moreover, under such circumstances, the Bank would not exercise the authority, control or responsibility to cause the plans for which it serves as directed trustee to engage in purchases and sales of Bancorp stock. Accordingly, it is the Department's view that the Bank, as directed trustee, would not engage in prohibited self-dealing under section 406(b)(1) solely as a result of following the directions of an unaffiliated named fiduciary, made in accordance with section 403(a), to purchase Bancorp stock.[3]

It should be pointed out, however, that under section 403(a)(1) of ERISA, a trustee that is subject to proper directions from the plan's named fiduciary remains responsible for determining whether following a given direction would result in a violation of ERISA. The directed trustee also has responsibility to exercise discretion where the directed trustee has reason to believe that the named fiduciary's directions are not made in accordance with the terms of the plan or are contrary to ERISA. Furthermore, as with other fiduciary duties, the trustee must ascertain whether existing or potential conflicts of interest may interfere with the proper exercise of this responsibility. Whether, in light of all the facts and circumstances, a trustee is subject to a conflict of interest or has reason to believe that a particular direction is contrary to ERISA are inherently factual questions as to which the Department generally will not opine. See section 5.01 of ERISA Procedure 76-1, 41 Fed. Reg. 36281 (Aug. 27, 1976).

If the named fiduciary has designated an investment manager pursuant to ERISA section 402(c)(3), then pursuant to ERISA section 405(d)(1) the trustee is not liable for the acts and omissions of the investment manager and is under no obligation to invest or otherwise manage any asset of the plan which is subject to the management of such investment manager. Under ERISA section 405(d)(2), however, the trustee would remain liable for any acts of the trustee including knowing participation or knowing concealment of a breach by another fiduciary under ERISA section 405(a)(1).

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Section 10 of the procedure describes the affect of advisory opinions.

Sincerely,

Robert J. Doyle

Director of Regulations and Interpretations

- Footnotes -

1. Under Reorganization Plan No. 4 of 1978, 43 Fed. Reg 47713 (Oct. 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Code, with certain exceptions not here relevant has been transferred to the Secretary of Labor. Therefore, the references in this letter to specific sections of ERISA refer also to corresponding sections of the Code.
2. We note that while Bancorp is thus a party in interest for purposes of Title I of ERISA, it is not a

"disqualified person" under the parallel provisions of the Code. In this regard, contrast section 3(14)(H) of ERISA with section 4975(e)(2)(H) of the Code.
3. We assume, for purposes of this ruling, that the Bank does not have any additional authority to vote or otherwise deal with Bancorp stock held by plans for which it serves as directed trustee.

Advisory Opinion/Individual Exemption 93-13A

Investment in Affiliated Mutual Funds

April 27, 1993

Summary
Provides guidance on the application of PTE 77-4 to the purchase of affiliated mutual funds. Also indicates in footnote 4 that 12b-1 fees may not be paid by a mutual fund on transactions generated by ERISA accounts.

Fred R. Green, Esq.

Schulte Roth & Zabel

900 Third Avenue

New York, NY 10022

Re: Frank Russell Company

Identification No.: C-9103

Dear Mr. Green:

This is in response to your request for an advisory opinion on behalf of Frank Russell Trust Company and its affiliates regarding the application of Prohibited Transaction Exemption 77-4 (42 FR 18732, April 8, 1977) (PTE 77-4).

You represent that Frank Russell Company (FRC), Frank Russell Trust Company (FRTC), Frank Russell Investment Company (FRIC) and Frank Russell Investment Management Company (FRIMCO) are part of a group of affiliated companies referred to as the Frank Russell Group (hereinafter referred to collectively as FRG).

You further indicate that FRTC serves as trustee, or as investment manager with respect to employee benefit plans (Plans). In addition, FRIMCO serves as investment adviser[1] for a family of mutual funds (the Funds) sponsored by FRIC, each of which is an open-end, registered investment company under the Investment Company Act of 1940. FRIMCO develops the investment programs for each of the Funds, selects money managers/investment advisers (Sub-Advisers) within each of the Funds, allocates assets among the Sub-Advisers within each Fund and monitors the Sub-Advisers' investment programs and results.

FRTC proposes to invest plan assets in the Funds. The Plans will continue to pay an investment advisory fee to FRTC with respect to all plan assets for which FRTC is a trustee with investment discretion or investment manager, including plan assets invested in the Funds. The Plans and the Funds will not pay an investment advisory or similar fee to FRIMCO, or any affiliate, with respect to the plan assets invested in the shares of the Funds. However, shareholders of the Funds, other than the Plans, will pay an investment management fee directly to FRIMCO. In turn, FRIMCO is responsible for the payment of investment advisory fees to the Sub-Advisers of the Funds from fees it receives.

In addition, FRC and FRIMCO provide other services (Secondary Services) to the Funds including (i) transfer agent services; (ii) portfolio activity reports; (iii) analysis of international management reports; and (iv) tax record maintenance. FRIMCO and FRC propose to collect all fees for Secondary services provided to the Funds without waiver of, or credit for, the Plans' pro rata share of such fees.

You state that a fiduciary of a Plan who is independent of and unrelated to FRTC or any affiliate will receive a current prospectus provided by FRTC and written disclosure of the investment advisory and other fees, and any change in such fees, to be paid to FRG by the Funds.[2] After reviewing the written fee disclosures and the prospectus, the independent fiduciary will provide written approval of a program of investment of Plan assets in the shares of the Funds. The form of the written approval may include, but is not limited to, the execution of modified trust and investment management agreements by the independent fiduciary and FRTC.

You ask whether FRIMCO's waiver of the investment advisory fee, otherwise payable by the Plans to FRG in connection with the investment of plan assets in the Funds, complies with the requirements of paragraph (c) of section II of PTE 77-4.[3] Further, you ask whether paragraphs (d), (e) and (f) of section II of PTE 77-4 require written disclosure and approval of fees paid to parties unrelated to FRIMCO, or any affiliate, with respect to the investment of plan assets in the Funds. Finally, you ask whether PTE 77-4 provides relief for the purchase or sale of shares of the Funds subsequent to the approval by a Plan fiduciary, independent of and unrelated to FRTC, of a program for the purchase or sale of shares in the Funds, without prior approval of each such purchase or sale by the independent Plan fiduciary.

PTE 77-4 provides, in part, that:

> The restrictions of section 406 of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, shall not apply to the purchase or sale by an employee benefit plan of shares of an open-end investment company registered under the Investment Company Act of 1940, the investment adviser for which is also a fiduciary with respect to a plan (or an affiliate of such fiduciary) and is not an employer of employees covered by the plan (hereinafter referred to as "fiduciary/investment adviser"), provided that the following conditions are met . . . .

Paragraph (c) of section II of PTE 77-4 states that:

> [t]he Plan does not pay an investment advisory or similar fee with respect to the plan assets invested in such shares for the entire period of such investment. This condition does not preclude the payment of investment advisory fees by the investment company under the terms of its investment advisory agreement adopted in accordance with suction 15 of the Investment Company Act of 1940. This condition also does not preclude payment of an investment advisory fee by the plan based on total plan assets from which a credit has been subtracted representing the plan's pro rata share of investment advisory fees paid by the investment company.

The preamble to the proposed class exemption (41 FR 50516, November 16, 1976) explains that:

> the proposed exemption would not permit the payment of a "double" investment advisory or investment management fee by the plan with respect to those assets invested in the mutual fund shares (i.e., both the direct fee paid by the plan to its fiduciary with respect to the invested assets and the investment advisory fee paid by the mutual fund to such fiduciary as investment advisor for the fund).

In addition, paragraph (d) of section II of PTE 77-4 provides that:

> A second fiduciary with respect to the plan, who is independent of and unrelated to the fiduciary/investment adviser or any affiliate thereof, receives a current prospectus issued by the investment company, and full and detailed written disclosure of the investment advisory and other fees charged to or paid by the plan and the investment company, including the nature and extent of any differential between the rates of such fees, the reasons why the fiduciary/investment adviser may consider such purchases to be appropriate for the plan, and whether there are any limitations on the fiduciary/investment adviser with respect to which plan assets may be invested in shares of the investment company and, if so, the nature of such limitations.

Further, paragraph (e) of section II of PTE 77-4 states that:

> On the basis of the prospectus and disclosure referred to in paragraph (d), the second fiduciary

> approves such purchases consistent with the responsibilities, obligations, and duties imposed on fiduciaries by Part 4 of Title I of the Act. Such approval may be limited solely to the investment advisory and other fees paid by the mutual fund in relation to the fees paid by the plan and need not relate to any other aspects of such investment. In addition, such approval must be either (1) set forth in the plan documents or in the investment management agreement between the plan and the fiduciary/investment adviser, (2) indicated in writing prior to each purchase or sale, or (3) indicated in writing prior to the commencement of a specified purchase or sale program in the shares of such investment company.

In addition, paragraph (f) of section II of PTE 77-4 provides that:

> The second fiduciary referred to in paragraph (d), or any successor thereto is notified of any change in the rates of the fees referred to in paragraph (d) and approves in writing the continuation of such purchases or sales and the continued holding of any investment company shares acquired by the plan prior to such change and still held by the plan. Such approval may be limited solely to the investment advisory and other fees paid by the mutual fund in relation to the fees paid by the plan and need not relate to any other aspects of such investment.

It is the opinion of the Department that the arrangement described in your submissions for the payment of investment management fees by the Plans to FRTC and the waiver of investment advisory fees otherwise payable by the Plans to FRIMCO, or any affiliate, with respect to plan assets invested in the Funds will satisfy the conditions of paragraph (c) of section II of PTE 77-4.[4] With respect to your second request, the Department is of the view that the conditions of paragraphs (d), (e) and (f) of section II of PTE 77-4 do not apply to fees paid to parties unrelated to FRIMCO, or any affiliate, under the above described arrangement.[5] With respect to your last issue, the Department believes that PTE 77-4 provides relief for transactions in which FRTC causes a Plan to purchase or sell shares of the Funds subsequent to written approval by a Plan fiduciary, independent of and unrelated to FRTC, of a program for the purchase or sale of shares in the Funds, without the prior approval of each such purchase or sale by an independent fiduciary, provided all of the other conditions of the exemption are met.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. We note that pursuant to section 5 of ERISA Procedure 76-1 this advisory opinion relates solely to the arrangement described involving FRG.

Sincerely,

Ivan L. Strasfeld

Director

Office of Exemption Determinations

- Footnotes -

1. The applicant represents that FRIMCO is an investment adviser registered under section 203 of the Investment Advisers Act of 1940. Further, the applicant represents that FRIMCO is an investment adviser with respect to the Funds as defined in section 2(a)(20) of the Investment Company Act of 1940.
2. We assume, for purposes of this letter, that the fee disclosure includes disclosure of the investment management fees paid directly to FRIMCO by shareholders other than the Plans.
3. Although you have not requested an opinion regarding the retention of fees for Secondary Services, it is the Department's view that whether a particular service constitutes the provision of investment advisory services or is in fact an additional service depends on the facts and circumstances of each case. Accordingly, the Department is expressing no opinion regarding your characterization of the services for which you propose to collect fees as services other than investment advisory services.
4. The Department notes that PTE 77-4 would not be available for the purchase or sale of investment company shares if any of the secondary services for which FRIMCO and/or FRC receive compensation involved any function which would be considered to constitute the provision of investment advisory services.

   The Department further notes that at the time PTE 77-4 was granted, the use of a portion of the assets of a registered investment company to pay distribution expenses was not generally permitted by the

Securities and Exchange Commission. Accordingly, the payment of fees pursuant to a distribution plan adopted in accordance with Rule 12b-1 under the Investment Company Act ("12b-1 fees"), was not specifically considered by the Department as part of its determination to grant PTE 77-4. In any event, the Department does not believe that the payment of a 12b-1 fee by a fund to a plan fiduciary or its affiliate can be functionally distinguished in many instances from the payment of a commission by the plan in connection with the acquisition or sale of shares in a mutual fund. Therefore, the Department is unable to conclude that PTE 77-4 would be available for plan purchases and sales of mutual fund shares if a 12b-1 fee is paid to the fiduciary or its affiliate with regard to that portion of the fund's assets attributable to the plan's investment.

5. The fact that a transaction is the subject of an administrative exemption does not relieve a fiduciary from the general fiduciary responsibility provisions of section 404 of ERISA. In this regard, the Department emphasizes that it expects the plan fiduciary with investment management responsibility to consider the totality of fees to be paid by the plan directly, and/or indirectly through the mutual fund, prior to entering into the arrangement.

   Also, the Department is expressing no opinion herein on whether disclosure is required under PTE 77-4 where the fees paid to the sub-advisers are paid out of the investment advisory fees paid to the investment adviser with respect to plan assets invested in the fund.

Advisory Opinion 93-24A

Float Management

September 13, 1993

Summary
Provides guidance on float associated with demand deposits. Also covers certain factors regarding retail repurchase agreements.
Also see interpretive letter to American Bankers Association, immediately following this Advisory Opinion.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

September 13, 1993 AO 93-24A

ERISA SECTION:

406(b)(1)

406(b)(3)

Roger W. Thomas

Staff Attorney

Department of Financial Institutions

Fourth Floor, The John Sevier Building

500 Charlotte Avenue

Nashville, TN 37243-0705

Dear Mr. Thomas:

This is in response to your inquiry whether certain transactions engaged in by a Tennessee bank are consistent with the Employee Retirement Income Security Act of 1974 (ERISA). In particular, you call attention to an asserted "common industry practice" whereby banks acting as agents or trustees for employee benefit plans earn interest for their own accounts from the "float" when a benefit check is written to a participant until

the check is presented for payment.

You indicate that a company (Trust Company), which is chartered under Tennessee law as a non-depository bank limited to trust powers, acts as an agent or trustee for various employee benefit plans. It also offers various collective investment funds in which plans invest. A national bank (National Bank) located in Tennessee serves as custodian for some of these plans.

In connection with the administration of the plans, Trust Company maintains accounts at National Bank, including a "General Account" and a "Disbursement Account." When Trust Company is directed to liquidate pooled fund assets to pay benefits, unless it is specifically directed to wire the funds to the participant, it transfers the funds to the General Account and simultaneously issues a check payable to the participant from the Disbursement Account. When checks are presented for payment, funds are wired from the General to the Disbursement Account. In the interim, Trust Company earns income on such funds

for its own account, pursuant to a retail repurchase agreement with National Bank.

You question whether the payment of this income to Trust Company is a prohibited receipt by a fiduciary of consideration from a party dealing with the plan in connection with a transaction involving the assets of the plan under section 406(b)(3) of ERISA. You also express concern that the Trust Company may be violating ERISA by dealing with National Bank, given National Bank's relationship to the plans.

Trust Company, through its attorney, contends that once a check is written to a participant, corresponding amounts in the General Account cease to be plan assets. In support of this argument Trust Company relies upon the first example of the participant contribution regulation in 29 C.F.R. 2510.3-102, which addresses when amounts that an employer withholds from a participant's pay for contribution to a plan can reasonably be segregated from the employer's general assets, and thus become assets of the plan for certain purposes. These special rules concerning segregation of participant contributions from an employer's general assets, however, have no application to the question of whether a plan has an interest in an administrative account when plan assets are transferred to the account in support of an outstanding benefit check.[1]

Turning to an analysis of the issues presented, section 406(b)(1) of ERISA states that a fiduciary with respect to a plan shall not deal with the assets of the plan in his or her own interest or for his or her own account. Section 3(21)(A) of ERISA defines a fiduciary, in part, as one who exercises any discretionary authority with respect to the assets of a plan. As explained in 29 C .F.R. 2509.75-8, persons serving as plan trustees (and certain other plan officials) will be fiduciaries due to the very nature of their positions. Other persons will be fiduciaries to the extent that they perform any of the functions described in section 3(21)(A) of ERISA.

Accordingly, it is the view of the Department that, based on the facts described above, where a fiduciary (e.g. Trust Company) exercises discretion with regard to plan assets, its receipt of income from the "float" on benefit checks under a repurchase agreement with a national bank in connection with the investment of such plan assets would result in a transaction described in ERISA section 406(b)(1).[2]

Moreover, even if all income earned under the repurchase agreements were allocated to the plans, the repurchase agreements themselves may be prohibited where the national bank is a party in interest with respect to the plans. Section 406(a)(1)(A) and (B) of ERISA, in part, prohibit sales or extensions of credit between plans and parties in interest. The term "party in interest" is defined in section 3(14) of ERISA to include a person providing services to a plan. From the information provided, it appears that National Bank, as the custodian of plan assets for some of the plans, is a service provider to such plans.

As we understand it, repurchase agreements essentially involve debt transactions structured as sales of securities. Therefore, absent exemptive relief, it appears that the repurchase agreements in question would involve prohibited extensions of credit, as well as prohibited sales between National Bank and plans that it serves. The Department has issued an administrative exemption, Prohibited Transaction Exemption 81-8 (copy enclosed), which provides conditional relief for investments in repurchase agreements, by or on behalf of an employee benefit plan. Whether this class exemption would grant relief to the parties involved in the subject retail repurchase agreement cannot be determined from the information provided.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,

Robert J. Doyle

Director of Regulations and Interpretations

- Footnotes -

1. It is commonly understood that a check does not of itself operate as an assignment of any funds in the hands of the drawee bank available for its payment and the bank is not liable on the instrument until it accepts it. U.C.C. § 3-409(1). A bank which properly pays checks drawn on it extinguishes its liability to the depositor to the extent of the amount so paid, so that it may charge the depositor's account with the amount of such payment. 9 C.J.S. Banks and Banking § 353 (1938).
2. Although you asked if this arrangement would be prohibited under section 406(b)(3), due to the limited information provided we are unable to conclude that the arrangement described herein gives rise to a violation of this section. Specifically, we are unable to conclude that the bank knew, or should have known, the circumstances under which plan assets were invested pursuant to the repurchase agreements. Thus, we are restricting our analysis to the potential violation of section 406(b)(1).

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

AUG 11 1994

Ms. Judith A. McCormick

Federal Counsel

American Bankers Association

1120 Connecticut Avenue, N.W.

Washington, D.C. 20036

Dear Ms. McCormick:

Thank you for the invitation to respond to an editorial entitled "Special Analysis, Perspectives on the 'Float' Issue," which appeared in the American Bankers Association January 1994 edition of the Trust Letter. We appreciate this opportunity to clear up an apparent misunderstanding in the editorial regarding prohibited self-dealing by banks that serve as fiduciaries to employee benefit plans under the Employee Retirement Income Security Act of 1974 (ERISA).

The focus of the editorial is an ERISA advisory opinion, AO 93-24A (Sept. 13, 1993), which concluded that a bank trustee's exercise of discretion to earn income for its own account from the "float" attributable to outstanding benefit checks constitutes prohibited fiduciary self-dealing under ERISA. The editorial questions whether the analysis in AO 93-24A is limited to its facts -- which involved the use of accounts and repurchase agreements with a third-party national bank to earn income for the bank trustee during the period of the float -- or whether the opinion has broader implications for the procedures banks commonly utilize in issuing benefit checks. Although advisory opinions apply only to the specific factual situations that they describe, (ERISA Procedure 76-1, § 10, 41 Fed. Reg. 36281, 36283 (Aug. 27, 1976)), the essential analysis of AO 93-24A is not unique to its facts.

The editorial notes that, in contrast to the facts presented In AO 93-24A, banks commonly issue benefit checks drawn on a disbursement account within the same institution. The editorial points out that, as a technical matter depending upon the type of account used, the actual amounts in such disbursement accounts may no longer be considered plan assets. From this, the editorial concludes, in our view erroneously, that "[i]f these balances are no longer plan assets once transferred to such an account, then no prohibited transaction occurs." This conclusion misses the fundamental principle of AO 93-24A that, without regard to the status of the funds after they are placed in a disbursement or other account, a bank fiduciary's decision to handle plan assets in such a way as to benefit itself constitutes prohibited self-dealing.

We also take issue with the suggestion in the editorial that section 408(b)(6) of ERISA exempts such fiduciary self-dealing. That section affords conditional relief from the prohibitions on self-dealing for the providing of "ancillary" services by a bank to a plan for which it is a fiduciary if, among other requirements, the services are provided for no more than reasonable compensation. The legislative history of this section indicates that "in determining whether a plan pays more than reasonable compensation for its checking account services, the

interest available on an alternate use of the funds is to be considered." H.R. Conf. Rept. No. 93-1280, 93d Cong., 2d Sess. (1974) at 315. Given the widespread technological advances in cash management during the twenty years since ERISA was enacted, it is by now generally recognized that banks have the capability of investing daily all but small amounts of cash in trust-quality investment vehicles at competitive market rates. (See Board of Governors of the Federal Reserve System letter to Stephen R. Steinbrink, Deputy Comptroller, Office of Comptroller of the currency, dated May 17, 1991). Accordingly, Section 408(b)(6) does not provide relief for a bank trustee who maintains cash balanced in a zero-interest disbursing account within the same institution to the extent that it is reasonably possible to earn net returns for the plan on those monies. Nor would such an exercise of discretion that is intended to benefit the bank at the expense of the plan's interests comport with the requirements of section 404(a)(1)(A) of ERISA that fiduciaries act prudently and solely in the interest of participants and beneficiaries.

Of course, if a bank fiduciary has openly negotiated with an independent plan fiduciary to retain earnings on the float attributable to outstanding benefit checks as part of its overall compensation, then the bank's use of the float would not be self-dealing because the bank would not be exercising its fiduciary authority or control for its own benefit. Therefore, to avoid, problems, banks should, as part of their fee negotiations, provide full and fair disclosure regarding the use of float an outstanding benefit checks.

Again, thank you for opening a dialogue on this important matter. We hope that this exchange will help to clarify any misunderstanding concerning the "float" issue.

Sincerely,

Robert J. Doyle

Director of Regulations and Interpretations

Advisory Opinion/Individual Exemption 93-26A

Investment in Affiliated Mutual Funds by IRA and Keogh Accounts

September 9, 1993

Summary
Provides guidance on the application of PTE 77-4 to the purchase of affiliated mutual funds by IRA and Keogh (HR-10) accounts.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

September 9, 1993

Donald S. Kohla, Esq. AO 93-26A

King & Spalding

191 Peachtree Street

Atlanta, Georgia 30303-1763

Re: SunTrust Banks, Inc. (SunTrust)

Exemption Application No. D-9423

Dear Mr. Kohla:

This is in response to the above referenced application requesting an exemption from the prohibitions of section 406 of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from the sanctions resulting from the application of Section 4975 of the Internal Revenue Code of 1986 (the Code).

Your application sets forth the following facts and representations. SunTrust proposes to offer shares of the

STI Classic Funds (the Funds), a series of open-end investment companies registered under the Investment Company Act of 1940, to individual retirement accounts (IRAs) for which SunTrust acts as a trustee with investment management responsibility. Sun Bank Capital Management and Trustco Capital Management, affiliates of SunTrust, serve as investment advisers for the Funds and receive fees for their services from the Funds. You represent that SunTrust will not charge the IRAs any investment management fees for assets that are invested in the Funds.

At the conference regarding your exemption request on August 19, 1993, you stated that, as an alternative to obtaining an individual exemption for the proposed transactions, SunTrust would be willing to structure the arrangement to comply with Prohibited Transaction Exemption (PTE) 77-4 (42 FR 18732, April 8, 1977) if that exemption is available for IRAs.

Under Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) the authority to issue rulings under section 4975 of the Code has been transferred, with certain exceptions, to the Secretary of Labor. Therefore, the references in this letter to specific sections of ERISA refer also to corresponding sections of the Code.

PTE 77-4 provides that the restrictions of section 406 of the Act, and the taxes imposed by section 4975(a) and (b) of the Code, shall not apply to the purchase and sale by an employee benefit plan of shares of an open-end investment company registered under the Investment Company Act of 1940, the investment adviser for which is also a fiduciary with respect to the plan (or an affiliate of such fiduciary), and is not an employer of employees covered by the plan, provided certain conditions are met.

Although PTE 77-4 does not define the term "employee benefit plan", the Department of Labor (the Department) is of the view that the exemption is applicable not only to transactions involving employee benefit plans covered under Title I of ERISA, but also to transactions involving IRAs and HR-10 plans which are not covered by Title I of ERISA but which are subject to the provisions of section 4975 of the Code. We have conferred with representatives of the Internal Revenue Service and they concur in the view that plans described in code section 4975(e)(1) are included within the scope of PTE 77-4.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. This opinion relates only to the specific issue addressed herein. For example, the Department is not providing an opinion as to whether the particular arrangement described in your exemption application would satisfy the conditions imposed by PTE 77-4. Nor is the Department providing an opinion as to the definition of the term "employee benefit plan" in any exemption other than PTE 77-4.

if you have any further questions, please contact Mr. E. F. Williams, Department of Labor, (202) 219-8883.

Sincerely,

Ivan L. Strasfeld

Director

Office of Exemption Determinations

Advisory Opinion to OCC (94-41A)

Escheating

December 7, 1994

U.S. Department of Labor

Pension and Welfare Benefits Administration

Washington, DC 20210

December 7, 1994

Mr. Thomas R. Giltner 94-4IA

Cox & Smith Incorporated ERISA SECTION

112 East Pecan Street, Suite 2000 514(a)

San Antonio, Texas 78205

Dear Mr. Giltner:

This is in reply to your request for an advisory opinion regarding the applicability of Title I of the Employee Retirement Income Security Act of 1974 (ERISA). Specifically, you ask whether section 514(a) of Title I of ERISA preempts the application of the Texas Unclaimed Property Statutes (Tex. Prop. Code Ann. Title 6 (West 1985)), with the result that the State of Texas may not assume custody over unclaimed benefits of those participants in the Luby's Cafeterias, Inc. Employees Profit Sharing and Retirement Trust (the Plan) who cannot be located.

You advise that Luby's Cafeterias, Inc. (the Company) sponsors the Plan for its ible employees. You further adv ise that, in the normal operation of the Plane plan administrator has occasionally been unable to locate a parti cipor beneficiary entitled to a distribution of retirement benefits. You interpretion 7.10 of the plan document, which provides a procedure in the event a part ant or beneficiary fails to claim a distribution, to permit or requir e your curpractice in such circumstances, which you describe as follows. If a distribute ils to claim a distributi on under the plan, the amount of the unclaimedsbeansferred to an account styled "Terminated Employees' A ccount,"ch is an account segregated from the Plan's other bank accounts, but n account of the Plan . (l) The Plan maintains records to indicate the amoueach "lost" participant's or beneficiary's interest in the account. If a lost participant or beneficiary is later located, his or her benefits are paid from the Plan's main account, which is then reimbursed from the Terminated Employees' Account. If a lost participant or beneficiary is not located within four years, you represent that his or her share in the Terminated Employees' Account is then transferred to the Plan's main account. If the lost participant or beneficiary is located at any time after this transfer occurs, you represent that his or her benefits are reinstated and paid by the Plan.

(1) You represent that, when a distribution is for benefits valued at less than $3,500, the plan trustee mails a check to the last known address of the unlocated participant. If the check is not cashed after a reasonable period of time (presumably no more than a few months), the trustee cancels the check and transfers the same amount to the Terminated Employees' Account.

In your request, you further assert that Section 7.10 of the Plan, as interpreted above, fully complies with Treasury Regulation section 1.411(a)-4(b)(6), which provides:

(b) Special rules. For purposes of paragraph (a) of this section, a right is- not treated as forfeitable-

6) Lost beneficiary: escheat. In the case of a benefit which is payable, merely because the benefit is forfeitable on account of the inability to find the participant or beneficiary to whom payment is due, provided that the plan provides for reinstatement of the benefit if a claim is made by the participant or beneficiary for the forfeited benefit. In addition, a benefit which is lost by reason of escheat under applicable state law is not treated as a forfeiture.

You further advise that 72.101 of the Texas Unclaimed Property Statutes provides:

72.101. Personal Property Subject to Escheat

Personal property, other than traveler's checks, is presumed abandoned and subject to escheat if, for, longer than seven years:

(1) the existence and location of the owner of the property is unknown to the holder of the property;

(2) according to the knowledge and records of the holder of the property, a claim to the property has not been asserted or an act of ownership of the property has not been exercised; and

(3) a will of the owner of the property has not been recorded or probated in the county in which the property is located.

Section 514(a) of Title I of ERISA provides:

(a) Supersedure; effective date. Except as provided in subsection (b) of this section, the provisions of this title and title IV shall supersede any and all State laws insofar as they may now or hereafter relate to any employee benefit plan described in section 4(a) and not exempt under section 4(b).

Section 514(a) does conflict with Title I of ERISA, not merely preempt state laws that

ERISA, but broadly preempts all state laws related to employee benefit plans. The reasons for the broad preemption of state laws under ERISA were succinctly stated by Senator Javits, a major sponsor and floor manager of the bill that became ERISA, during its final consideration:

> Both House and Senate bills provided for preemption of State law but -- with one major exception appearing in the House Bill -- defined the perimeters of preemption in relation to the areas regulated by the bill. Such a formulation raised the possibility of endless litigation over the validity of State action that might impinge on Federal regulation, as well as opening the door to multiple and potentially conflicting State laws hastily contrived to deal with some particular aspect of private welfare or pension plans not clearly connected to the Federal scheme.
>
> Although the desirability of further regulation at either the State or Federal level -- undoubtedly warrants further attention, on balance, the emergence of a comprehensive and pervasive Federal

interest and the interests of uniformity with respect to interstate plans required -- but for certain exceptions -- the displacement of State action in the field of private employee benefit programs. (120 Cong. Rec. S15751 (daily ed. Aug 22, 1974)).

It is the view of the Department of Labor (the Department) that, if the above-quoted section of the Texas Unclaimed Property Statutes were applied to require the Plan to pay to the State amounts held in the Terminated Employees' Account, or in other accounts of the Plan, pursuant to the procedures described above, then such application of the section would be preempted under section 514(a) of ERISA. (2) Such an application of the State escheat law would directly affect the core functions of the Plan by reducing, through the escheat, the amount of plan assets held in trust for the benefit of all participants and beneficiaries of the Plan. (3) Moreover, because the statute at issue is not a law regulating insurance, banking or securities, it is not saved from preemption under section 514(b) (2). (4)

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,

Robert J. Doyle

Director of Regulations and Interpretations

> (2) In Opinion 78-32A (December 22, 1978), the Department concluded that a provision of the Illinois Uniform Disposition of Property Act was preempted as applied to employee benefit plans. In Opinion 79-30A (May 14, 1979) the Department reached the same conclusion with respect to a provision of California's Unclaimed Property Law that expressly referred to employee benefit trust dispositions. In Opinion 83-39A (July 29, 1983), the Department found that a section of the New York Abandoned Property Law, which addressed the escheat of "[u]nclaimed insurance proceeds other than life insurance," was saved from preemption under ERISA 514(b)(a)(A) as a law regulating insurance.
>
> (3) In our view, the decision of the United States Court of Appeals for the Second Circuit in Aetna Life Ins. v. gorges, 869 F.2d 142 (2d Cir. 1989), is clearly distinguishable. In that case, the court considered the application of a state escheat law to amounts held in reserve by an insurance company to cover benefit checks issued pursuant to an insurance contract with an employer to provide welfare benefits, which checks were never presented by the participant or beneficiary for payment. The court found that the application of the escheat law in those circumstances would have only an indirect economic and~ administrative impact on the plan that was too remote and tangential to trigger preemption.
>
> (4) We note that Treasury Regulation 1.411(a)-4(b)(6) provides that a benefit "lost by reason of escheat under applicable state law" will not be treated as an impermissible forfeiture under Internal Revenue Code 411(a). This regulation, however, provides no guidance as to whether a particular application of state escheat law is preempted under ERISA Section 514.

Advisory Opinion to OCC (94-OCC)

Collective Investment Fund Conversions to Mutual Funds

(Makes reference to PTE 77-4)

February 14, 1994

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, DC 20210

February 14, 1994

Mr. William Granovsky

National Bank Examiner

Compliance Management

Comptroller of the Currency

Administrator of National Banks

Washington, D.C. 20219

Re: Applicability of Prohibited Transaction Exemption (PTE) 77-4 to the Conversion of Bank Collective Investment Funds.

Dear Mr. Granovsky:

As a follow-up to our meeting on February 1, 1994, I thought it would be helpful if the Department formally provided its views regarding the applicability of Prohibited Transaction Exemption PTE 77-4 to the conversion of bank collective investment funds.

As you know, PTE 77-4 provides conditional relief from ERISA's prohibited transaction provisions for the purchase or sale by a plan of shares of an open-end investment company, the investment adviser for which is also a fiduciary with respect to the plan. Although PTE 77-4 does not specifically address in-kind exchanges, the Department is of the view that the transactions exempted by PTE 77-4 do not include the acquisition or sale of investment company shares for anything other than cash. We believe that if such transactions had been contemplated at the time that the exemption was granted, the exemption would contain additional safeguards designed to address the valuation and other' issues associated with in-kind exchanges. Therefore, the Department is unable to conclude that PTE 77-4 would be available for conversions of bank collective investment funds involving the exchange of securities held by the fund on behalf of plan investors for shares of the bank's affiliated investment company.

If you have any further questions please contact Eric Berger at (202) 219-8971.

Sincerely,

Ivan L. Strasfeld

Advisory Opinion to OCC (96-OCC)

Investments in Derivatives

March 21, 1996

U.S. Department of Labor

Assistant Secretary for

Pension and Welfare Benefits

Washington, D.C. 20210

March 21, 1996

Honorable Eugene A. Ludwig

Comptroller of the Currency

250 E Street, S.W.

Washington, D.C. 20219

Dear Mr. Ludwig,

At our last meeting we discussed the Department of Labor's views with respect to the utilization of derivatives in the management of a portfolio of assets of a pension plan which is subject to the Employee Retirement Income Security Act of 1974 (ERISA). This letter is to provide you with an update of our views in a format which may be of use to you and your staff.

ERISA governs private-sector sponsored employee welfare and pension benefit plans and provides a general framework within which plan fiduciaries are expected to conduct their investment activities. Under ERISA, a fiduciary includes anyone who exercises discretion in the administration of an employee benefit plan; has authority or control over the plan's assets; or renders investment advice for a fee with respect to any plan assets.[2] Thus, any entity, including an institution such as a bank, that meets this functional test with respect to an employee benefit plan sponsored by a private-sector employer, employee organization, or both, would be considered a fiduciary under ERISA.

ERISA establishes comprehensive standards to govern fiduciary conduct. Among other things, fiduciaries with respect to an employee benefit plan must discharge their duties with respect to a plan solely in the interest of the plan's participants and beneficiaries, and with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims.[3]

Investments in derivatives are subject to the fiduciary responsibility rules in the same manner as are any other plan investments. Thus, plan fiduciaries must determine that an investment in derivatives is, among other things, prudent and made solely in the interest of the plan's participants and beneficiaries. In determining whether to invest in a particular derivative, plan fiduciaries are required to engage in the same general procedures and undertake the same type of analysis that they would in making any other investment decision. This would include, but not be limited to, a consideration of how the investment fits within the plan's investment policy, what role the particular derivative plays in the plan's portfolio, and the plan's potential exposure to losses.

While derivatives may be a useful tool for managing a variety of risks and for broadening investment alternatives in a plan's portfolio, investments in certain derivatives, such as structured notes and collateralized mortgage obligations, may require a higher degree of sophistication and understanding on the part of plan fiduciaries than other investments. Characteristics of such derivatives may include extreme price volatility, a high degree of leverage, limited testing by markets, and difficulty in determining the market value of the derivative due to illiquid market conditions.

As with any investment made by a plan, plan fiduciaries with the authority for investing in derivatives are responsible for securing sufficient information to understand the investment prior to making the investment. For example, plan fiduciaries should secure from dealers and other sellers of derivatives, among other things, sufficient information to allow an independent analysis of the credit risk and market risk being undertaken by the plan in making the investment in the particular derivative. The market risks presented by the derivatives purchased by the plan should be understood and evaluated in terms of the effects that they will have on the relevant segments of the plan's portfolio as well as the portfolio's overall risk.

Plan fiduciaries have a duty to determine the appropriate methodology used to uate market risk and the inf ormation which must be collected to do so. Amher things, this would include, where appropriate, stress simulation modelsng the projected performance of the derivatives and of the plan's portfolio un various market conditions. Stress simulations are particularly important becausumptions which may be valid for normal ma rkets may not be valid in abnormal mas, resulting in significant losses. To the extent that there may be littl e pricinformation available with respect to some derivatives, reliable price arisons may be necessary. A fter entering into an investment, a plan fiduciary should be able to obtain timely information from the derivatives dealer regarding the plan's credit exposure and the current market value of its derivative positions, and, where

appropriate, should obtain such information from third parties to determine the current market value of the plan's derivative positions, with a frequency that is appropriate to the nature and extent of these positions.

If the plan is investing in a pooled fund which is managed by a party other than the plan fiduciary who has chosen the fund, then that plan fiduciary should obtain, among other things, sufficient information to determine the pooled fund's strategy with respect to use of derivatives in its portfolio, the extent of investment by the fund in derivatives, and such other information as would be appropriate under the circumstances.

As part of its evaluation of the investment, a fiduciary must analyze the operational risks being undertaken in making the investment. Among other things, the fiduciary should determine whether it possesses the requisite expertise, knowledge, and information to understand and analyze the nature of the risks and potential returns involved in a particular derivative investment. In particular, the fiduciary must determine whether the plan has adequate information and risk management systems in place given the nature, size and complexity of the plan's derivatives activity, and whether the plan fiduciary has personnel who are competent to manage these systems. If the investments are made by outside investment managers hired by the plan fiduciary, that fiduciary should consider whether the investment managers have such personnel and controls and whether the plan fiduciary has personnel who are competent to monitor the derivatives activities of the investment managers.

Plan fiduciaries have a duty to evaluate the legal risk related to the investment. This would include assuring proper documentation of the derivative transaction and, where the transaction is pursuant to a contract, assuring written documentation of the contract before entering into the contract.

Also, as with any other investment, plan fiduciaries have a duty to properly monitor their investments in derivatives to determine whether they are still appropriately fulfilling their role in the portfolio. The frequency and degree of the monitoring will, of course, depend on the nature of such investments and their role in the plan's portfolio.

We hope these comments have been helpful. However, if you should have any further questions or if we can provide any further assistance, please feel free to contact Morton Klevan at (202) 219-9044 or Louis Campagna at (202) 219-8883.

Sincerely,

Olana Berg

- Footnotes -

1. We refer to derivatives in this letter as financial instruments whose performance is derived in whole or in part from the performance of an underlying asset (such as a security or index of securities). Some examples of these financial instruments include futures, options, options on futures, forward contracts, swaps, structured notes and collateralized mortgage obligations.
2. See ERISA section 3(21).
3. See ERISA section 404(a).

Advisory Opinion 97-15A to Frost National Bank

Acceptance of Mutual Fund 12b-1 Fees; Letter to Frost National Bank; Discretionary and Non-Discretionary Accounts

May 22, 1997

Summary
Guidance on the purchase of mutual funds which pay 12b-1 fees to fiduciaries.

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, DC 20210

May 22 1997

Mark S. Miller 97-15A

Fulbright & Jaworski, LLP

1301 McKinney, Suite 5100

Houston, Texas 77010-3095

Dear Mr. Miller:

This is in response to your request for an advisory opinion regarding the prohibited transaction provisions of the Employee Retirement Income Security Act of 1974 (ERISA). In particular, you ask whether the payment of certain fees by a mutual fund in which an employee pension benefit plan has invested to a bank serving as the plan's trustee would violate sections 406(b)(1) and 406(b)(3) of ERISA.

You represent that Frost National Bank (Frost) serves as trustee to various employee pension benefit plans (the Plans). As trustee of the Plans, Frost's duties may include one or more of the following functions, pursuant to instructions from the Plan sponsor or participants: opening and maintaining individual participant accounts; receiving contributions from the Plan sponsor and crediting them to individual participant accounts; investing contributions in shares of a mutual fund and reinvesting dividends and other distributions; redeeming, transferring, or exchanging mutual fund shares; providing or maintaining various administrative forms in making distributions from the Plan to participants or beneficiaries; keeping custody of the Plan's assets; withholding amounts on Plan distributions; making sure all Plan loan payments are collected and properly credited; conducting Plan enrollment meetings; and preparing newsletters and videos relating to the administration of the Plan.

In connection with its Plan-related business, Frost has entered into arrangements with one or more distributors of, or investment advisors to, mutual fund families pursuant to which Frost will make the mutual fund families available for investment by the Plans. Frost will periodically review each such mutual fund family to determine whether to continue the arrangement, and will reserve the right to add or remove mutual fund families that it makes available to the Plans.

As part of Frost's arrangements with the mutual fund families, Frost may provide shareholder services to, and receive fees from, some of the Individual mutual funds in which Plan assets are invested. The shareholder services may include, e.g., providing mutual fund recordkeeping and accounting services in connection with the Plans' purchase or sale of shares, processing mutual fund sales and redemption transactions involving the Plans, and providing mutual fund enrollment material (including prospectuses) to Plan participants. The fees paid by the mutual funds to Frost will generally be based on a percentage of Plan assets invested in each mutual fund, and will be paid pursuant to either a distribution plan described in Securities and Exchange Commission (SEC) Rule 12b-1, 17 C.F.R. 270.12b-I (a 12b-1 plan), or a "subtransfer agency arrangement."[1]

You further represent that, with respect to some of the Plans, Frost will recommend to the Plan fiduciary the advisability of investing in particular mutual funds offered pursuant to Frost's arrangements with the mutual fund families. In addition, Frost will monitor the performance of the individual mutual funds selected by the Plan fiduciary and, as it deems appropriate, will make further recommendations regarding additional or substitute mutual funds for the investment of Plan assets.

With respect to other Plans, Frost will not make any recommendations concerning the selection of, or continued investment in, particular mutual funds. Rather, the responsible Plan fiduciary will independently select, from the mutual fund families made available by Frost, particular mutual funds for the investment of Plan assets, or for designation as investment alternatives offered to participants under the Plan.

In both instances, whether or not Frost makes specific investment recommendations, you represent that, before a Plan enters into the arrangement, the terms of Frost's fee arrangements with the mutual fund families will be fully disclosed to the Plans. In addition, Frost's trustee agreement with a Plan will be structured so that any 12b-1 or subtransfer agent fees received by Frost that are attributable to the Plan's investment in a mutual fund will be used to benefit the Plan. Pursuant to the particular agreement with each Plan, Frost will offset such fees, on a dollar-for-dollar basis, against the trustee fee that the Plan is obligated to pay Frost or against the recordkeeping fee that the Plan is obligated to pay to a third-party recordkeeper; or Frost will credit the Plan directly with the fees it receives based on the investment of Plan assets in the mutual fund.[2] The trustee agreement will provide that, to the extent that Frost receives fees from mutual funds in connection with the Plan's investments that are in excess of the fee that the Plan owes to Frost, the Plan will be entitled to the excess amount.

You request an opinion that Frost's receipt of fees from the mutual funds under the circumstances described would not constitute a violation of ERISA section 406(b)(1) or (b)(3).[3]

You have asked us to assume for the purpose of your request that the arrangements between Frost and the Plans satisfy the conditions of ERISA section 408(b)(2).[4]

Section 406(b)(1) of ERISA prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in his or her own interest or for his or her own account. Section 406(b)(3) prohibits a fiduciary with respect to a plan from receiving any consideration for his or her personal account from any party dealing with the plan in connection with a transaction involving the assets of the plan.[5]

Under section 3(21)(A) of ERISA, a person is a "fiduciary" with respect to a plan to the extent that the person (i) exercises any discretionary authority or control respecting management of the plan or any authority or control respecting management or disposition of its assets, (ii) renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan, or has any authority or responsibility to do so, or (iii) has any discretionary authority or responsibility in the administration of the plan.

Frost, as trustee, is a fiduciary with respect to the Plans under section 3(21)(A) of ERISA. See 29 C.F.R. 2509.75-8, D-3 (the position of trustee of a plan, by its very nature, requires the person who holds it to perform one or more of the functions described in ERISA section 3(21)(A))[6]

When the Trustee Advises

You have indicated that, with respect to some of the Plans, Frost will advise the Plan fiduciary regarding particular mutual funds in which to invest Plan assets.[7] It also appears from your submission that, under Frost's arrangements with various mutual fund families, Frost may receive fees from some of the mutual funds as a result of a Plan's investment in the mutual funds recommended by Frost. In the view of the Department, advising that plan assets be invested in mutual funds that pay additional fees to the advising fiduciary generally would violate the prohibitions of ERISA section 406(b)(1).

You represent, however, that before entering into an arrangement with a Plan, or recommending any particular mutual fund investments, Frost will disclose to the Plan fiduciary the extent to which it may receive fees from the mutual fund(s). Furthermore, you represent that the trustee agreement between Frost and the Plan will expressly provide that any fees received by Frost as a result of the Plan's investment in such a mutual fund will be used to pay all or a portion of the compensation that the Plan is obligated to pay to Frost, and that the Plan will be entitled to any such fees that exceed the Plan's liability to Frost.[8] To the extent the Plan's legal obligation to Frost is extinguished by the amount of the offset, it is the opinion of the Department that Frost would not be dealing with the assets of the Plan in its own interest or for its own account in violation of section 406(b)(1).

With respect to the prohibition of section 406(b)(3), Frost's contract with a Plan, as described above, will provide that Frost's receipt of fees from one or more mutual funds in connection with the Plan's investment in such funds will be used to reduce the Plan's obligation to Frost, will in no circumstances increase Frost's compensation, and thus will benefit the Plan rather than Frost. Accordingly, it is the opinion of the Department that in these circumstances Frost would not be deemed to receive such payments for its own personal account in violation of section 406(b)(3).

When the Trustee is Directed

With respect to Plans for which Frost does not provide any investment advice, it appears that the Plan fiduciary, and in some instances the Plan participants, will select the mutual funds in which to invest Plan assets from among those made available by Frost. Generally speaking, if a trustee acts pursuant to a direction in accordance with section 403(a)(1) or 404(c) of ERISA and does not exercise any authority or control to cause a plan to invest in a mutual fund that pays a fee to the trustee in connection with the plan's investment, the trustee would not be dealing with the assets of the plan for its own interest or for its own account in violation of section 406(b)(1).

Similarly, it is generally the view of the Department that if a trustee acts pursuant to a direction in accordance with section 403(a)(1) or 404(c) of ERISA and does not exercise any authority or control to cause a plan to invest in a mutual fund, the mere receipt by the trustee of a fee or other compensation from the mutual fund in connection with such investment would not in and of itself violate section 406(b)(3). Your submission indicates,

however, that Frost reserves the right to add or remove mutual fund families that it makes available to Plans. Under these circumstances, we are unable to conclude that Frost would not exercise any discretionary authority or control to cause the Plans to invest in mutual funds that pay a fee or other compensation to Frost.[9]

However, because Frost's trustee agreements with the Plans are structured so that any 12b-1 or subtransfer agent fees attributable to the Plans' investments in mutual funds are used to benefit the Plans, either as a dollar-for-dollar offset against the fees the Plans would be obligated to pay to Frost for its services or as amounts credited directly to the Plans, it is the view of the Department that Frost would not be dealing with the assets of the Plans in its own interest or for its own account, or receiving payments for its own personal account in violation of section 406(b)(1) or (b)(3).

Finally, it should be noted that ERISA's general standards of fiduciary conduct also would apply to the proposed arrangement. Under section 404(a)(1) of ERISA, the responsible Plan fiduciaries must act prudently and solely in the interest of the Plan participants and beneficiaries both in deciding whether to enter into, or continue, the above-described arrangement and trustee agreement with Frost, and in determining which investment options to utilize or make available to Plan participants or beneficiaries. In this regard, the responsible Plan fiduciaries must assure that the compensation paid directly or indirectly by the Plan to Frost is reasonable, taking into account the trustee services provided to the Plan as well as any other fees or compensation received by Frost in connection with the investment of Plan assets. In this connection, it is the view of the Department that the responsible Plan fiduciaries must obtain sufficient information regarding any fees or other compensation that Frost receives with respect to the Plan's investments in each mutual fund to make an informed decision whether Frost's compensation for services is no more than reasonable. The Plan fiduciaries also must periodically monitor the actions taken by Frost in the performance of its duties, to assure, among other things, that any fee offsets to which the Plan is entitled are correctly calculated and applied.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof regarding the effect of advisory opinions.

Sincerely,

Bette J. Briggs

Chief, Division of Fiduciary Interpretations .

Office of Regulations and Interpretations

- Footnotes -

1. A "subtransfer agency fee" is typically a fee paid for recordkeeping services provided to the mutual fund transfer agent with respect to bank customers.
2. We assume for purposes of this opinion that each Plan's governing documents provide that the Plan will pay costs and expenses for trustee services necessary to the operation and administration of the Plan.
3. For a discussion of related issues involving receipt of fees by a record-keeper offering a program of investment options and services to plans, see also Advisory Opinion 97-16A, May 22, 1997.
4. We offer no opinion herein as to whether such conditions have been satisfied; nor does this opinion address the application of any other provisions of ERISA.
5. Under Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Internal Revenue Code of 1986 (the Code) has been transferred, with certain exceptions not here relevant, to the Secretary of Labor, and the Secretary of the Treasury is bound by interpretations of the Secretary of Labor pursuant to such authority. Therefore, references in this letter to specific sections of ERISA should be read to refer also to the corresponding sections of the Code.
6. Section 403(a) of ERISA establishes that, in general, a trustee of a plan must have exclusive authority and discretion to manage and control the plan's assets. Under section 403(a)(1), when the plan expressly so provides, the trustee may be subject to the proper directions of a named fiduciary which are made in accordance with the terms of the plan and not contrary to ERISA. Nevertheless, a directed trustee has residual fiduciary responsibility for determining whether a given direction is proper and whether following the direction would result in a violation of ERISA. Accordingly, it is the view of the Department that a directed trustee necessarily will perform fiduciary functions.
7. We assume for the purposes of your request that Frost will provide investment advice within the meaning of ERISA section 3(21)(A)(ii) and 29 C.F.R. 2510.3-21(c)(1)(i) and (ii)(B) with respect to these Plans.

8. We express no opinion herein as to the propriety of such a pass-through of fees under Federal securities laws. Questions concerning the application of the Federal securities laws are within the jurisdiction of the SEC.
9. See, in this regard, the Department's position as expressed in the preamble to the final regulation regarding participant-directed individual account plans (ERISA section 404(c) plans), 57 Fed. Reg. 46906, 46924 n. 27 (Oct. 13, 1992):

   In this regard [a fiduciary is relieved of responsibility only for the direct and necessary consequences of a participant's exercise of control], the Department points out that the act of limiting or designating investment options which are intended to constitute all or part of the investment universe of an ERISA 404(c) plan is a fiduciary function which, whether achieved through fiduciary designation or express plan language, is not a direct or necessary result of any participant direction of such plan.

Advisory Opinion 97-16A to Aetna Life Insurance and Annuity Company

Acceptance of Mutual Fund 12b-1 Fees; Letter to Aetna Life Insurance and Annuity Company; Non-Discretionary Accounts

May 22, 1997

Summary
Guidance on the purchase of mutual funds which pay 12b-1 fees to Non-Discretionary Administrative and Record Keeping Service Providers

U.S. Department of Labor Pension and Welfare Benefits Administration

Washington, D.C. 20210

May 22 1997

Stephen M. Saxon 97-16A

Groom & Nordberg

1701 Pennsylvania Avenue, N.W.

Suite 1200

Washington, DC 20006

Dear Mr. Saxon:

This is in response to your request for an advisory opinion concerning the application of section 406(b)(3) of the Employee Retirement Income Security Act (ERISA) to the receipt of certain fees by the Aetna Life Insurance and Annuity Company (ALIAC), an indirect subsidiary of Aetna Insurance Company, Inc. (Aetna). In particular, you request an opinion that ALIAC's receipt of fees from mutual funds that are unrelated to Aetna for recordkeeping and other services in connection with investments by employee benefit plans in the unrelated funds does not violate section 406(b)(3) under the circumstances described in your request.

ALIAC is a life insurance company domiciled in Connecticut, as well as a registered broker-dealer and a registered investment adviser. You represent that ALIAC sponsors and manages the Aetna Mutual Funds 401(k) Program (the 401(k) Program), which offers sponsors (other than Aetna) of participant-directed defined contribution plans (Plans): a) a volume submitter plan document; b) recordkeeping and related administrative services through Aetna 401 Retirement Plan Services (ARPS), ALIAC's business unit; c) investment options selected by ALIAC consisting of no-load or low load mutual funds from various fund families that are unrelated to Aetna (Unrelated Funds), Aetna Series Funds (a series of mutual funds within a diversified open-ended investment company registered under the Investment Company Act of 1940 (ICA)), and group annuity contracts (GACS) issued by Aetna Life Insurance Company (ALIC), an affiliate of ALIAC;[1] and d) directed trustee or custodial services provided by a bank that is unrelated to Aetna (the Bank). You represent that

Unrelated Funds from three different mutual fund families are currently available and that additional families may be added in the future. You further represent that, in the future, Unrelated Funds may also pay fees to ALIAC for "marketing services."[2]

Plan fiduciaries who are independent of and unrelated to ALIAC, ALIC, and their affiliates are responsible for selecting the investment options to be offered to Plan participants from among the Unrelated Funds, Aetna Series Funds, and several options under the GACS. You further represent that neither ALIAC, ALIC, nor any other affiliate of Aetna (or any of its employees) provides investment advice or recommendations, within the meaning of ERISA section 3(21)(A)(ii), to Plan fiduciaries or participants regarding the advisability of either selecting any of the investment options for the Plans, or investing in any of the investment options that are available under the Plans.

ARPS, ALIAC's business unit, will, pursuant to a plan services agreement, provide some **or** all of the following services to Plans:

1) one-time installation services, which may include assistance in preparation of Plan documents, participant communication materials, and government filings, and installation of Plan and participant level records into the ARPS recordkeeping systems;

2) basic non-discretionary administrative and recordkeeping services, e.g. (a) enrolling participants, (b) maintaining participant and Plan-level account records, (c) balancing and allocating contributions, loan repayments, and forfeitures among accounts, (d) processing distributions and withdrawals, (e) reconciling Plan and participant activity on a daily basis, (f) preparing periodic account activity statements for participants and Plan fiduciaries, (g) providing participant communication materials, (h) providing toll-free telephone access permitting participants to obtain current balance and investment information, change investment elections, and initiate loans, withdrawals and terminations, (i) performing certain tax qualification testing on a semi-annual basis, and (j) preparation of certain tax reporting forms;

3) recordkeeping and administrative support services for an employer stock fund, or for existing non-convertible GICs held by a Plan pending maturity (which are not associated with the GACS); and

4) optional services, e.g., (a) processing of participant loans, rollovers, lump sum and installment distributions, and qualified domestic relations orders, (b) additional tax qualification testing, (c) assistance in preparation of Plan-level government filings, and (d) recordkeeping and administrative support services for an employer stock fund and/or non-convertible GICS.

You represent that ARPS is not a "plan administrator" as defined in ERISA section 3(16)(A).

You indicate that the 401(k) Program service charges are fully disclosed in the marketing materials describing the 401(k) Program that are provided to Plan fiduciaries. Plans entering into the 401(k) Program pay ARPS a one-time charge for installation services, and annual charges for standard administrative and recordkeeping services, based on the number of participants.

Additional services are available on a fee-for-service basis, at the election of the Plan fiduciary. Either party may terminate the arrangement without penalty on 60 days written notice. ALIC receives fees for administration and management of the GACS, including the separate accounts maintained in connection with the GACS. ALIAC receives advisory and administrative fees for investment management and related services provided to the Aetna Series Funds, pursuant to agreements between the Aetna Series Funds and ALIAC, which you represent are standard in the mutual fund industry.[3]

ALIAC has entered into various contracts with the Unrelated Funds (or r advisers or distributors) pursuant to which shares issued by the Unrde Funds are purchased on behalf of Plans from the distributors of the Unrelat dnds or directly from the Unrelated Funds. Pursuant to these agreements, C receives from the Unrelated F unds (or their advisers or distributors) pa ts in consideration of (1) ARPS's provision of shareholder service cluding participant-level recordkeeping) and other administrative services onnection with Plan invest ments in the Unrelated Funds, and (2) reductions in Unrelated Funds' shareholder servicing and other administrative expenseg., transfer agency fees) made possible by ARPS's provision of suchvices. Thes e payments are based on a percentage of Plan assets invested in ea nrelated Fund through the 401(k) Prog ram, and are paid either as administrati xpenses by an Unrelated Fund (or by a servicing agent, advise r, or distributo om which the Unrelated Fund obtains its administrative services), or pursuant tritten plan described in Securities and Exchange Commission (SEC) Rule 12b-1 CFR 270.12b-1 (a 12b-1 Plan). The t otal administrative expenses paid by Unrelated Funds, including fees paid pursuant to 12b-1 Plans, are

described to shareholders in prospectus materials. ALIAC discloses its receipt of fees from the Unrelated Funds (or their investment managers or other affiliates) in marketing and other disclosure materials provided to Plan fiduciaries. In particular, ALIAC will provide existing and prospective Plan customers a statement disclosing that ALIAC receives, or may receive, fees from many, but not all, of the Unrelated Funds, their managers or other affiliates (described as a percentage of assets under management with the Unrelated Funds). The statement will enumerate the services that ALIAC provides to the mutual funds and the rate of fees paid. The statement will also provide a toll-free telephone number to request more detailed information concerning which funds pay fees and an estimate of how much ALIAC may receive or has received during a particular time period. ALIAC will update the disclosure whenever there is any material change.

ALIAC reserves the right to modify the agreement with the Plan, including the list of Unrelated Funds available for investment, by giving 60 days written notice to the Plan's named fiduciary. If ALIAC decides to delete or replace an Unrelated Fund, ALIAC will notify the fiduciary of each Plan affected by the change. This notice would generally be sent by first class mail or fax. The notice would: (1) explain the proposed modification to the Unrelated Funds menu; (2) fully disclose any resulting chances in the fees paid to ALIAC by the Plan, or by any other entity with respect to Plan assets invested in the affected Funds; (3) identify the effective date of the change; (4) explain the Plan fiduciary's right to reject the change or terminate the agreement; and (5) reiterate that, pursuant to the contract provisions agreed to by the Plan fiduciary, failure to object will be treated as consent to the proposed change.

In addition, ALIAC may, depending on the facts and circumstances, send the notice by certified mail, include additional information and notice of the proposed deletion or substitution in other mailings to the Plan fiduciary (e.g., in periodic newsletters, in materials provided to assist the Plan fiduciary in notifying participants of the change, or in an invoice), or follow up its notice of a Fund deletion or substitution by telephone or other contact with the Plan fiduciary. Any or all of these procedures might be taken with respect to a particular Plan or implemented for all Plans affected by a deletion or substitution of a Fund.

You represent that if a Plan fiduciary rejects the proposed deletion or substitution, ALIAC would not be authorized to make the proposed deletion or substitution effective with respect to that particular Plan. In such circumstances, upon written notice of termination, the Plan fiduciary is afforded an additional 60 days to convert the Plan to another service provider. You represent, however, that in most cases ALIAC would seek to avoid terminating the agreement and losing a customer by negotiating to address the concerns of a Plan fiduciary that has rejected a proposed modification to the Unrelated Funds menu.

You also represent that ALIAC may determine, based on the particular facts and circumstances, to provide more than the minimum 60 days notice of the proposed change, waive some or all of the agreement's 60-day period for notice of termination by a Plan, and/or, if administratively feasible, agree to continue to provide services to a particular Plan beyond the 60-day termination period without deleting or substituting any Unrelated Funds pending the Plan's conversion to a new service provider if additional time is required to complete a conversion. Any of these or other measures might be taken with respect to particular Plans, or implemented for all Plans affected by a deletion or substitution of an Unrelated Fund. You thus represent that a Plan fiduciary will have a reasonable period of time within which to convert to a new service provider.

You have requested an opinion that the receipt of fees by ALIAC from the Unrelated Funds would not violate ERISA section 406(b)(3). Section 406(b)(3) provides that:

A fiduciary with respect to a plan shall not receive any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan.

The Department has taken the position that if a fiduciary does not exercise any authority or control to cause a plan to invest in a mutual fund, the mere receipt by the fiduciary of a fee or other compensation from the mutual fund in connection with the plan's investment would not in and of itself violate section ERISA 406(b)(3) (See, Advisory Opinion 97-15A, May 22, 1997).

Whether the receipt of such fees by ALIAC involves violations of section 406(b)(3) turns first on whether ALIAC is a fiduciary with respect to the investing Plans. ALIAC receives fees from an Unrelated Fund for its own account that are based on a percentage of the Plan assets invested in the Unrelated Fund. Such fees are paid to ALIAC by the Unrelated Fund or a related party in connection with a transaction (the purchase and sale of securities issued by the Unrelated Fund) involving the assets of the Plans.

The circumstances under which ALIAC provides recordkeeping and administrative services to Plans, you believe, would not cause ALIAC to be considered a fiduciary. You seek assurance, however, that ALIAC will not be deemed to be a fiduciary with respect to a Plan merely because ALIC, an affiliate under common control with ALIAC, may be considered a fiduciary of the Plan by virtue of providing investment management

services for Plan assets invested in an ALIC separate account.

ERISA section 3(21)(A) provides that a person is a fiduciary with respect to a plan to the extent that he/she (i) exercises any discretionary authority or control respecting management of the plan or exercises any authority or control respecting management or disposition of its assets, (ii) renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan, or has any authority or responsibility to do so, or (iii) has any discretionary authority or responsibility in the administration of the plan. Section 3(21)(B) provides that neither an investment company registered under the ICA, nor its investment adviser or principal underwriter shall be deemed to be fiduciaries or parties in interest with respect to a plan solely by reason of the plan's investment in securities issued by the investment company, unless the plan covers employees of the investment company, investment adviser or principal underwriter.

Interpretive Bulletin 75-8 (IB 75-8, 29 C.F.R. 2509-75-8) provides additional guidance concerning what types of functions will make a person a fiduciary with respect to a plan. In particular, question-and-answer D-2 states that a person who performs purely ministerial functions, such as preparation of employee communications material, preparation of government reports, and preparation of reports concerning participants' benefits, among others, within a framework of policies, interpretations, rules, practices and procedures made by other persons is not a fiduciary because such person does not have or exercise any discretionary authority or control regarding the management of the plan or its assets.

Pursuant to these provisions, a determination of whether a person is a fiduciary with respect to a plan requires an analysis of the types of functions performed and actions taken by the person on behalf of the plan to determine whether particular functions or actions are fiduciary in nature and therefore subject to ERISA's fiduciary responsibility provisions. As a result, the question of whether ALIAC is a "fiduciary" within the meaning of section 3(21)(A) of ERISA is inherently factual and will depend on the particular actions or functions ALIAC performs on behalf of the Plans.

You represent that ALIAC is not a trustee or administrator of the Plans, and provides only non-discretionary administrative and recordkeeping services pursuant to detailed administrative guidelines described in the Plan services agreement. Based on this representation, it would appear that, in most respects, ALIAC would not be a fiduciary with respect to Plans that are a party to such service agreements. ALIAC, however, retains some authority over the investment options selected by the Plans under the 401(k) Program in that it may, in its discretion, delete or substitute Unrelated Funds. In such instances, you represent that, before implementing a change in Funds with respect to any given Plan, ALIAC will provide advance notice to the appropriate Plan fiduciary regarding the change, including any changes in the fees to be received by ALIAC. If the Plan is permitted to maintain its investments in a deleted or replaced Fund, the advance notice will disclose any increased charges attributable to the retention by the Plan of the deleted or replaced Fund. In connection with this notice, you represent that Plan fiduciaries are afforded up to120 days, or more, to reject the change and terminate ALIAC's services without penalty.

It is the view of the Department that a person would not be exercising discretionary authority or control over the management of a plan or its assets solely as a result of deleting or substituting a fund from a program of investment options and services offered to plans, provided that the appropriate plan fiduciary in fact makes the decision to accept or reject the change. In this regard, the fiduciary must be provided advance notice of the change, including any changes in the fees received, and afforded a reasonable period of time within which to decide whether to accept or reject the change and, in the event of a rejection, secure a new service provider. On the basis of your representations that ALIAC provides the appropriate Plan fiduciary advance notice of the deletion or substitution of Funds and a reasonable period of time following receipt of the notice (here, at least 120 days) within which to reject the change in Funds and secure a new service provider,[5] as described in your letter, it is the view of the Department that ALIAC would not become a fiduciary solely as a result of deleting or substituting an Unrelated Fund under such circumstances, provided that the actual decision to accept or reject the change in Funds is made by the Plan fiduciary.

You have assumed that ALIC, an affiliate under common control with ALIAC, is a fiduciary with respect to the Plans by virtue of exercising authority or control over Plan assets invested in separate accounts maintained by ALIC. There is nothing, however, in your submission to indicate that ALIAC is in a position to (or in fact does) exercise any authority or control over those assets. Accordingly it does not appear that ALIAC would be considered a fiduciary merely as a result of its affiliation with ALIC.

Finally, it should be noted that ERISA's general standards of fiduciary conduct also would apply to the proposed arrangement. Under section 404(a)(1) of ERISA, the responsible Plan fiduciaries must act prudently and solely in the interest of the Plan participants and beneficiaries both in deciding whether to enter into, or continue, the above-described arrangement with ALIAC, and in determining which investment options to utilize

or make available to Plan participants and beneficiaries. In this regard, the responsible Plan fiduciaries must assure that the compensation paid directly or indirectly by the Plan to ALIAC is reasonable, taking into account the services provided to the Plan as well as any other fees or compensation received by ALIAC in connection with the investment of Plan assets. The responsible Plan fiduciaries therefore must obtain sufficient information regarding any fees or other compensation that ALIAC receives with respect to the Plan's investments in each Unrelated Fund to make an informed decision whether ALIAC's compensation for services is no more than reasonable.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, this letter is issued subject to the provisions of the procedure, including section to relating to the effect of advisory opinions.

Sincerely,

Bette J. Briggs

Chief, Division of Fiduciary Interpretations

Office of Regulations and Interpretations

- Footnotes -

1. You represent that ALIC utilizes several separate accounts in connection with the GACS, and have assumed for purposes of the advisory opinion request that the assets of these separate accounts would be deemed to be plan assets pursuant to the Department's regulation at 29 CFR 2510.3-101.
2. The Department does not express any opinion concerning the effect, if any, of the receipt by ALIAC of fees for marketing services that may be added in the future.
3. In this letter the Department expresses no opinion regarding the fees paid by the Aetna Series Funds to ALIAC.
4. Under Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Internal Revenue Code of 1986 (the Code) has been transferred, with certain exceptions not here relevant, to the Secretary of Labor, and the Secretary of the Treasury is bound by interpretations of the Secretary of Labor pursuant to such authority. Therefore, references in this letter to specific sections of ERISA should be read to refer also to the corresponding sections of the Code.
5. What constitutes a "reasonable period" within which to terminate an arrangement and change service providers will depend on the particular facts and circumstances of each case. There may be situations in which a time period shorter than 120 days may constitute a "reasonable period."

Advisory Opinion (98-06A)

Investment of In-House Employee Benefit Plans into Proprietary Mutual Funds

July 30, 1998

Summary
Clarification of Applicability of PTE 97-4 and PTE 77-3 to Investment of In-House Bank Employee Benefit Plans into Proprietary Mutual Funds

U.S. Department of Labor

Washington, D.C. 20216

July 30, 1998

Mr. Donald J. Myers

Reed Smith Shaw & McClay LLP

1301 K Street, N.W.

Suite 1100 - East Tower

Washington, D.C. 20005-3317

Re: Federated Investors

Identification Number C-9171

Dear Mr. Myers:

This is in response to your request on behalf of Federated Investors ("Federated") for guidance concerning whether Prohibited Transaction Class Exemption 77-3, 42 Fed. Reg. 18734 (April 8, 1977) (PTE 77-3) provides relief for the investment by a bank's in-house plan in a mutual fund advised by the bank through an in-kind exchange of assets for mutual fund shares, assuming the conditions of the exemption have been satisfied.

You represent that Federated advises, administers and distributes its own mutual funds, and also administers, distributes and provides related services to funds that are advised by other financial institutions, including many banks. Federated has assisted its client banks in establishing "proprietary" mutual funds, *i.e.,* open-end investment companies registered under the Investment Company Act of 1940 as to which the bank serves as investment adviser. These funds often come to serve as the investment vehicles for in-house bank plans through the conversion or partial conversion of the collective investment funds (the "CIFs") maintained by the bank. Federated assists these banks in the conversion process, and may serve as administrator and distributor, as well as in other capacities (such as transfer agent and portfolio recordkeeper) with respect to the proprietary mutual funds.

You state that on the date of a CIF conversion, assets representing the interests of investing plans in the converting CIFs are transferred to the mutual funds, in exchange for which the plans receive shares of the mutual funds of equal value to the assets transferred. These assets are valued for purposes of the transfer in a consistent and objective manner as of the close of business on the day of the transfer in accordance with the valuation conditions of Rule 17a-7 under the Investment Company Act of 1940 at 17 C.F.R. section 270.17a-7. Rule 17a-7 was adopted by the Securities and Exchange Commission as an exemption to permit, among other things, direct portfolio transactions between funds using the same investment adviser subject to specific conditions. That rule, at subsection 270.17a-7(b), requires that each security be valued at its "independent current market price" and stipulates the methods for determining price based on independent sources, as follows:

> (1) If the security is a `reported security' as that term is defined in rule 11Aa3-1 under the Securities Exchange Act of 1934, the last sale price with respect to such security reported in the consolidated transaction reporting system ('consolidated system') or the average of the highest current independent bid and lowest current independent offer for such security (reported pursuant to rule 11Ac1-1 under the Securities Exchange Act of 1934) if there are no reported transactions in the consolidated system that day; or
>
> (2) If the security is not a reported security, and the principal market for such security is an exchange, then the last sale on such exchange or the average of the highest current independent bid and lowest current independent offer on such exchange if there are no reported transactions on such exchange that day; or
>
> (3) If the security is not a reported security and is quoted in the NASDAQ system, then the average of the highest current independent bid and lowest current independent offer reported on Level 1 of NASDAQ; or
>
> (4) For all other securities, the average of the highest current independent bid and lowest current independent offer determined on the basis of reasonable inquiry.

You also represent that all plans involved in these transactions, both the in-house plans of the bank and the outside client plans of the bank, are treated in the same manner in these transactions and on a basis no less favorable than such dealings would be with other shareholders of the mutual funds. No brokerage commissions or other transaction costs are charged to the CIFs, the investing plans or the mutual funds in the exchange transaction.

PTE 77-3 provides that the restrictions of sections 406 and 407(a) of the Employee Retirement Income Security Act of 1974 ("ERISA") and the taxes imposed by section 4975 (a) and (b) of the Internal Revenue

Code (the "Code"), by reason of section 4975(c)(1) of the Code, shall not apply to the acquisition or sale of shares of an open-end investment company registered under the Investment Company Act of 1940 by an employee benefit plan covering only employees of such investment company, employees of the investment adviser or principal underwriter for such investment company, or employees of any affiliated person of such investment adviser or principal underwriter; provided that the conditions of the class exemption are met. The term "acquisition" is not defined in PTE 77-3.

In support of your argument that PTE 77-3 extends to the in-kind exchange of assets for mutual fund shares, you note that the regulation at 29 C.F.R. 2550.407a-2(b) defines the term "acquisition" for purposes of section 407(a) of ERISA to include both an acquisition "by purchase" and "by the exchange of plan assets." You assert that by distinguishing a "purchase" from an "exchange," the regulation makes clear that, compared to a "purchase," an "acquisition" is a broader term that includes both cash "purchases" and in-kind "exchanges." In this regard, you argue that the meaning of the term "acquisition" in both the regulation and PTE 77-3 should be interpreted in a similar manner. However, the Department notes that the definition of the term "acquisition" in 29 CFR 2550.407a-2(b) does not control the meaning of that term in PTE 77-3, since the application of that definition is expressly limited to the implementation of section 407(a) of ERISA.

Nevertheless, it is the view of the Department of Labor (the "Department") that relief under PTE 77-3 is available not only for cash purchases of investment company shares, but also for transactions involving the exchange of securities held on behalf of a plan for shares of the investment company. In this regard, the Department notes that section (d) of PTE 77-3 requires that all other dealings between the plan and the investment company, the investment adviser or principal underwriter for the investment company, or any affiliated person of such investment adviser or principal underwriter, are on a basis no less favorable to the plan than such dealings are with other shareholders of the investment company. The Department further notes that Prohibited Transaction Exemption 97-41 (62 FR 42830, August 8, 1997) permits a plan to purchase shares of an open-end mutual fund, the investment adviser for which is a bank that also serves as a fiduciary of a non-affiliated client plan, in exchange for plan assets transferred in-kind to the fund from a collective investment fund maintained by the bank. To the extent that the transactions described in your request involve both the conversion of CIF assets owned by outside client plans, which is within the scope of PTE 97-41, and the conversion of CIF assets owned by in-house plans, which is not, the Department interprets section (d) of PTE 77-3 to require that the methodology used to value the assets of the in-house plan transferred to the mutual fund and to determine the number of shares of the mutual fund received by the in-house plan, be the same as is applicable to the conversion of outside client plan assets under PTE 97-41.

Moreover, section 406(b)(1) of ERISA prohibits a fiduciary from dealing with the plan's assets in his or her own interest or for his or her own account. In addition, section 406(b)(2) of ERISA prohibits a plan fiduciary from acting on behalf of a party whose interests are adverse to the interests of the plan or the plan's participants or beneficiaries. Accordingly, a plan fiduciary considering the in-kind acquisition of shares of a mutual fund advised by the bank in exchange for assets of the bank's in-house plan must ensure that the fiduciary's or the bank's interest in attracting and retaining investors in the mutual fund does not conflict with the interests of the plan or its participants and beneficiaries in the selection of appropriate investment vehicles.

In addition, it is the Department's view that the class exemption prescribed in PTE 77-3 would not provide relief for any prohibited transaction that may arise in connection with terminating a CIF, permitting certain plans to withdraw from a CIF that is not terminating, or transferring any plan assets held by a CIF. PTE 77-3 only provides relief for the acquisition of a proprietary mutual fund's shares by an in-house plan in exchange for assets that were transferred from a CIF.

The Department cautions that ERISA's general standards of fiduciary conduct would apply to the plan's acquisition of mutual fund shares in exchange for plan assets transferred in-kind to the mutual fund from a CIF maintained by the plan's sponsor. Section 404(a)(1)(B) of ERISA requires that a fiduciary discharge his or her duties with respect to a plan solely in the interest of the participants and beneficiaries and with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. Accordingly, the plan fiduciary must act "prudently" and "solely in the interest" of the plan's participants and beneficiaries with respect to the decision regarding the in-kind acquisition of mutual fund shares by the plan.

The Department further emphasizes that it expects a plan fiduciary, prior to entering into the transaction, to fully understand the mechanics of the transaction and to evaluate the risks associated with this type of investment, following disclosure of all relevant information pertaining to the transaction, including the valuation methodology applicable to the transferred securities and the mutual fund shares received in exchange. If the decision by the plan fiduciary to enter into the transaction is not "solely in the interest" of the plan's participants and beneficiaries, *e.g.*, if the decision is motivated by the intent to generate seed money that facilitates the

marketing of the mutual fund, then the plan fiduciary would be liable for any loss resulting from such breach of fiduciary responsibility, even if the acquisition of mutual fund shares was exempt by reason of PTE 77-3.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is issued subject to the provisions of the procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,

Ivan Strasfeld

Trust Examination Manual

January 25, 1999

Michael A. Lawson
Skadden, Arps, Slate, Meagher, & Flom, LLP
300 South Grand Avenue
Los Angeles, California 90071-3144
1999-03A
ERISA Sec. 406(b)

Dear Mr. Lawson:

This is in response to your request for an advisory opinion concerning the application of section 406(b) of the Employee Retirement Income Security Act of 1974 (ERISA) and section 4975(c)(1)(D), (E), and (F) of the Internal Revenue Code of 1986 (the Code).(1) In particular, you request guidance with respect to a plan fiduciary's decision to purchase on the secondary market, with plan assets, non-subordinated mortgage-backed pass-through certificates (Certificates) representing interests in a trust fund for which an affiliate of the fiduciary serves as a sub-servicer.(2)

You represent that BlackRock Financial Management, Inc. (BlackRock), is an investment advisor that is registered under the Investment Advisors Act of 1940 and is a wholly-owned second-tier subsidiary of PNC Bank, a national banking association (PNC). BlackRock has over $45 billion in assets under management, including assets of a number of employee benefit plans (Plans) subject to Title I of ERISA and/or section 4975 of the Internal Revenue Code of 1986 (the Code).

The Certificates represent interests in trust funds (Trusts), each of which consists of a segregated pool primarily of conventional, fixed-rate, multifamily or commercial mortgage loans (Mortgage Loans). A portion of the Mortgage Loans in each pool have been originated by PNC (PNC Loans). PNC also acts, pursuant to the pooling and servicing agreement that establishes each Trust, as a sub-servicer for the PNC Loans held in each Trust. The services provided by PNC typically include, among other things, notifying borrowers of amounts due on receivables, maintaining records of payments received, and instituting foreclosure or similar proceedings in the event of default with respect to the PNC Loans. Such services do not include any investment management or investment advisory services. As the subservicer of PNC Loans in a Trust, PNC receives a monthly fee in an amount equal to a fixed percentage of the outstanding principal balance of each Loan. This amount is collected from interest actually paid with respect to each Loan. In addition, under certain Trusts, PNC is entitled to retain certain ancillary fees that may be collected with respect to the Loan, including assumption fees, modification fees, insufficient funds fees and similar charges. You represent that PNC has no discretion with respect to the assets or management of the Trust. You further represent that neither PNC nor BlackRock is affiliated with any other entity that is a party to any of the Trusts, including the underwriter, master servicer, trustee, insurer, or obligor to or of the Trusts.

The sponsor of a Trust, through one or more underwriters or placement agents, makes an initial public or private offering of Certificates to investors. After the initial offering, Certificates are traded on the secondary market. The price of Certificates, both in the initial offering and in the secondary market, is affected by market forces, including investor demand, the pass-through interest rate on the Certificates in relation to the rate payable on investments of similar types and quality, expectations as to the effect on yield resulting from the prepayment of underlying mortgages, and expectations as to the likelihood of timely payment.(3)

The pass-through rate for holders of Certificates is equal to the interest rate on mortgages included in the Trust minus a specified servicing fee. You represent that all fees and other consideration payable by the Trust to PNC and other service providers to the Trust are determined and fixed as of the closing of the initial offering of the Certificates.

You state that BlackRock will cause Plans to purchase Certificates only on the secondary market.(4) You assert that any fees payable to PNC in accordance with the applicable pooling and servicing agreement between PNC and the Trust will be unaffected by BlackRock's causing Plans to purchase Certificates on the secondary market. Neither PNC nor BlackRock, you state, would have any interest in, or receive any additional consideration from, any source by reason of, or in connection with, such secondary market transactions.

You are seeking guidance that BlackRock would not violate ERISA section 406(b) by causing Plans over which it has fiduciary authority to purchase, on the secondary market, Certificates of Trusts containing PNC Loans merely because its affiliate, PNC, acts as sub- servicer for such Loans and receives compensation, pursuant to its subservicing agreements, from the Trusts for the provision of such services.

Section 406(b)(1) of ERISA prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in his own interest or for his own account. Section 406(b)(2) prohibits a fiduciary, in his individual or any other capacity, from acting in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries. Section 406(b)(3) prohibits a fiduciary from receiving any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan.

You have represented that PNC's compensation from the Trusts is determined and fixed as of the close of the initial offering of Certificates in each Trust and is not affected by whether or not BlackRock invests plan assets in the Certificates in the secondary market. Regulation section 29 C.F.R. 2550.408b-2(e)(2) states that a fiduciary does not engage in an act described in section 406(b)(1) of ERISA if the fiduciary does not use any of the authority, control, or responsibility that makes such person a fiduciary to cause a plan to pay additional fees for a service provided by such fiduciary or by a person in whom such fiduciary has an interest that may affect the exercise of such fiduciary's best judgment as a fiduciary. Similarly, it is the view of the Department that a fiduciary does not engage in an act described in section 406(b)(3) of ERISA if the fiduciary does not use any of its authority, control, or responsibility to cause a third party to pay to the fiduciary any compensation in connection with a transaction involving the assets of the plan.(5) Accordingly, it is the opinion of the Department that BlackRock would not violate section 406(b)(1) or (b)(3) of ERISA by causing Plans over which it has fiduciary authority to purchase Certificates of the Trusts on the secondary market merely because its affiliate, PNC, acts as a sub-servicer of the Trusts, as long as the compensation that BlackRock and PNC receives is not affected by such investment. Moreover, because PNC's relationship to the Trusts remains wholly unaffected by BlackRock's investment of Plan assets in the Certificates, such investment would not be considered to involve BlackRock's acting on behalf of PNC in violation of section 406(b)(2) of ERISA merely because of PNC's role as sub-servicer of the Trusts.(6)

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Susan G. Lahne
Acting Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

1. --

   Footnotes

   Under Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. Therefore, the references in this letter to specific sections of ERISA refer also to the corresponding sections of the Code.
2. You represent that, although BlackRock Financial Management, Inc., a plan fiduciary that is an affiliate of a sub-servicer of the issuing trust, is the entity that would cause a plan to purchase the Certificates, the purchase of such Certificates would otherwise conform to the conditions set forth in a series of individual prohibited transaction exemptions (PTEs) issued by the Department of Labor for plan investments in securities issued by trusts that hold multifamily and commercial mortgages (generally referred to as the Underwriter Exemptions). See, e.g., PTEs 97-5 (SouthTrust Securities, Inc. (62 FR 1926, January 14, 1997), 96-94 (First Chicago, NBD, 61 FR 68787, December 30, 1996), and 96-92 (BA Securities, Inc., 61 FR 66333, December 17, 1996). See also, class PTE 97-34 (62 FR 39021, July

21, 1997), which amended the individual PTEs involving such trusts, primarily to permit pre-funding of the tru sts, and making related changes.

3. In this connection, we note that the Underwriter Exemptions referred to in fn. 2, above, require that, at the time of acquisition by a plan, certificates must have received one of the three highest ratings available from one of four specified rating services.
4. Under the facts detailed in the Underwriter Exemptions, the underwriter of certificates normally attempts to make a market for securities (including certificates) for which it is the lead or co-managing underwriter. At times, an underwriter will facilitate sales by investors who purchase certificates if the underwriter has acted as agent or principal in the original private placement of the certificates and if such investors request the underwriter's assistance.
5. See, in this regard, Advisory Opinion 97-15A (May 22, 1997).
6. This opinion does not address, however, the question of whether, in actual operation, BlackRock's decisions to invest plan assets are designed to benefit PNC. For example, this opinion would not apply if BlackRock conditioned investment in any Certificate of a Trust on whether the Trust includes mortgages that are serviced by PNC.

1999-05A
ERISA Sec. 401(b)

Dear Ms. Rothenberg:

This is in response to your request on behalf of the Federal Agricultural Mortgage Corporation ("Farmer Mac") for an advisory opinion regarding the application of the "plan assets" regulation issued by the Department of Labor (the Department) under the Employee Retirement Income Security Act of 1974 ("ERISA") to certain mortgage pool certificates offered by Farmer Mac. Specifically, you request an advisory opinion that guaranteed mortgage-backed certificates issued by Farmer Mac are "guaranteed governmental mortgage pool certificates" within the meaning of 29 C.F.R. 2510.3-101(i)(2). You also request an advisory opinion as to whether certain parties performing various services with respect to the assets underlying the mortgage-backed certificates would be parties in interest under section 3(14) of ERISA or disqualified persons under section 4975(e)(2) of the Internal Revenue Code of 1986 (the Code) with respect to investing employee benefit plans. (1) In addition, you ask for an advisory opinion that the certificates would be deemed to meet a particular condition of a group of prohibited transaction exemptions ("the Underwriter Exemptions"),(2) granted to provide relief for the origination and operation of certain asset pool investment trusts, including guaranteed governmental mortgage pool certificate investment trusts, and for the acquisition, holding and disposition of asset backed pass-through certificates representing undivided interests in those trusts.

You represent that Farmer Mac is a federally chartered corporate instrumentality of the United States established in 1987 for the purpose of promoting a secondary market for agricultural mortgage loans, similar to the secondary markets in residential mortgage loans established by the Federal National Mortgage Association ("Fannie Mae") and Federal Home Loan Mortgage Corporation ("Freddie Mac").(3) The Board of Directors of Farmer Mac consists of fifteen members, five of whom are elected by holders of common stock of Farmer Mac that are banks, insurance companies, or other financial institutions or entities; five of whom are elected by holders of common stock of Farmer Mac that are Farm Credit System institutions; and five of whom, including the Chairman of the Board, are appointed by the President of the United States and confirmed by the Senate.

Farmer Mac is authorized under the Farm Credit Act to purchase several different types of agricultural and real estate mortgages, mortgage pass-through certificates and other mortgage- backed securities evidencing interests in or secured by agricultural real estate mortgages, and to resell them, primarily in the form of mortgage-backed certificates ("Certificates") representing undivided interests in pools of mortgages purchased by Farmer Mac.(4) You state that while Farmer Mac Certificates are not guaranteed directly by the United States, Farmer Mac guarantees the timely payment of principal and interest on such investments to all Certificate holders. Farmer Mac Certificates provide for periodic (monthly, quarterly, semi-annual or annual) payment of interest and the pass-through of principal based on collections with respect to the underlying mortgages.

You state further that Farmer Mac Certificates are offered from time to time in one or more series. Each series of Certificates represents, in the aggregate, the entire beneficial ownership interest in a segregated pool of mortgages held in a trust fund managed by Farmer Mac Securities Corporation ("Depositor"), a wholly-owned subsidiary of Farmer Mac. The Certificates are purchased from the Depositor by an underwriter or placement agent that offers the Certificates from time to time in public offerings registered under the Securities Act of

1933, and in private placements. The Certificates may be sold in negotiated transactions, at varying prices determined at the time of sale.

The trustee of the trust funds managed by the Depositor is currently U.S. Bank Trust National Association.(5) The assets of the trust funds consist of segregated pools of fixed rate or adjustable rate agricultural real estate mortgage loans (“Qualified Loans”); portions of loans that are guaranteed by the United States Secretary of Agriculture (“Guaranteed Portions”); mortgage pass-through certificates or other mortgage-backed securities evidencing interests in or secured by Qualified Loans or Guaranteed Portions; or any combination thereof (collectively, “Qualified Assets”).(6) Qualified Loans are secured by parcels of land, which may be improved by buildings or other structures permanently affixed to the parcels, that are used for the production of one or more agricultural commodities and consist of a minimum of five acres or are used in producing minimum annual receipts of at least $5,000; or by a mortgage on a principal residence that is a single-family moderately priced residential dwelling located in a rural area.(7)

You represent further that the sellers of Qualified Assets (“Sellers”) are banks and other financial institutions, including member institutions of the Farm Credit System and insurance companies. The Sellers may be the financial institutions that originally made the Qualified Loans (“Originators”) or they may be purchasers of the Qualified Loans from one or more Originators. Farmer Mac selects the Qualified Assets that it wishes to purchase from a Seller, after determining that the Qualified Assets meet Farmer Mac’s underwriting standards. The Depositor then purchases the Qualified Assets from the Seller, assigns the Qualified Assets transferred to it by the Seller to a segregated pool in a trust fund,(8) causes the trust fund to issue one or more series of Certificates, and receives the proceeds of the sale of the Certificates. Farmer Mac guarantees the timely payment of principal and interest on the Certificates upon their issuance by the Depositor. To assure its ability to fulfill its guarantee obligations, Farmer Mac is required to establish reserves upon issuance of a guarantee. Farmer Mac’s charter provides that, in the event that Farmer Mac’s own reserves and capital are insufficient to enable it to meet its guarantee obligations, the Treasury will purchase up to $1.5 billion of Farmer Mac’s obligations.(9)

You state that Farmer Mac acts as Master Servicer of the Qualified Loans in each loan pool and is ultimately responsible for the servicing of the Qualified Loans, though it has contracted with banks and other financial institutions (collectively, “Central Servicers”) to perform the servicing functions on its behalf, including the distribution of principal and interest payments on the Qualified Loans in each pool and the distribution of any yield maintenance charge (the amount payable by a borrower under a loan in connection with a principal prepayment or acceleration by the lender) to the Trust Fund, on behalf of the holders of Certificates.(10) Pursuant to the contracts, Central Servicers establish and maintain separate accounts on behalf of the Trust Fund for the collection of payments on Qualified Assets and foreclose upon or comparably convert the ownership of properties of any Qualified Loans that continue in default.(11) The Central Servicers are compensated for their services out of the interest payments received on each Qualified Loan and also retain certain late fees, servicing charges assessed against borrowers, and other fees. Central Servicers may subcontract their servicing functions with respect to the Qualified Loans to qualified agricultural mortgage servicers (“Field Servicers”), some of whom may be Sellers or Originators.

The Farm Credit Administration (FCA), acting through the Office of Secondary Market Oversight (OSMO), has general regulatory and enforcement authority over Farmer Mac, including the authority to promulgate rules and regulations governing the activities of Farmer Mac and to apply its general enforcement power to Farmer Mac and its activities. In accordance with its statutory mandate, Farmer Mac’s loan standards were submitted to Congress for approval before they were adopted in 1990. The Director of OMSO, who is selected by and reports to the FCA Board, is responsible for the examination of Farmer Mac and the general supervision of the safe and sound performance by Farmer Mac of the powers and duties vested in it by Title VIII of the Farm Credit Act of 1971, as amended.(12)

The Farm Credit Act requires the FCA to examine and audit Farmer Mac’s books and financial transactions and to perform an evaluation of the safety and soundness of Farmer Mac’s operations at least annually. Farmer Mac is required to file quarterly reports of condition with the FCA, as well as copies of all documents filed with the Securities Exchange Commission under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934. While the FCA is not required to approve the payment of dividends on Farmer Mac common stock, the Farm Credit Act provides that no dividend may be declared or paid unless the Farmer Mac Board determines that adequate provision has been made for the corporation’s reserve against guarantee losses and that no obligation issued by Farmer Mac to the Secretary of the Treasury remains outstanding.(13) Under its general regulatory and supervisory authority, the FCA regularly reviews new programs and activities of Farmer Mac involving the purchase, sale, servicing of, lending on the security of, or otherwise dealing in conventional agricultural mortgages. In addition, the Farm Credit Act requires the

Comptroller General of the United States to perform an annual review of the actuarial soundness and reasonableness of the guarantee fees established by Farmer Mac.

It is expected by the Board of Directors and management of Farmer Mac that the Depositor will not have any relationships to investing employee benefit plans, other than through their transactions with respect to the Certificates. However, you state that obligors with respect to Qualified Assets Collateralizing the Certificates ("Borrowers") may be related to sponsors of investing employee benefit plans. For example, a Borrower may also be the plan sponsor of an investing employee benefit plan. You state that it is also possible that a Central Servicer, Field Servicer, Seller, or trustee of a trust fund managed by the Depositor may be related to investing employee benefit plans and may therefore be a party in interest or fiduciary with respect to such plans.

The Department's plan asset regulation at 29 C.F.R. 2510.3-101 describes the circumstances under which the assets of an entity in which a plan invests will be considered to include assets of the plan for purposes of ERISA's reporting and disclosure and fiduciary responsibility provisions and the related prohibited transaction provisions of the Internal Revenue Code. Section 2510.3-101(i)(2) defines a "guaranteed governmental mortgage pool certificate" as "a certificate backed by, or evidencing an interest in, specified mortgages or participation interests therein and with respect to which interest and principal payable pursuant to the certificate are guaranteed by the United States or an agency or instrumentality thereof." The regulation specifically refers to mortgage pool certificates guaranteed by Ginnie Mae, Freddie Mac, or Fannie Mae,(14) but makes clear that the exception may also apply to similar governmental mortgage pool investments. As explained in the preamble to the final regulation, the regulation provides in section 2510.3-101(i)(l) that, when a plan invests in a guaranteed governmental mortgage pool, its assets include its investment, but do not, solely by reason of such investment, include any of the underlying mortgages. Thus, the sponsor or manager of a governmental mortgage pool would not be a fiduciary of a plan solely by reason of the plan's investment in the pool. The regulation specifically states that interests in Freddie Mac, Ginnie Mae and Fannie Mae are among the investments to which the regulation's general rule applies.(15) Accordingly, the term "guaranteed governmental mortgage pool certificate" in section 2510.3-101(i)(2) is not limited to securities of the three entities specifically listed, but encompasses any certificates backed by, or evidencing an interest in, specified mortgages or participation interests therein and with respect to which interest and principal payable pursuant to the certificate are guaranteed by the United States or an agency or instrumentality thereof.

It appears to the Department from your representations that, for purposes of the definition of plan assets, Farmer Mac was established and is operated in a manner substantially similar to that of Fannie Mae and Freddie Mac. Like those entities, Farmer Mac is a Federally chartered instrumentality of the United States that issues guarantees on pools of mortgage loans in order to increase the availability of mortgage credit. Although Farmer Mac Certificates are not guaranteed by the United States, in light of the significant Federal involvement in the management of the Farmer Mac, it is our view that investments in Certificates issued by Farmer Mac should be treated in the same way as investments in certificates issued by Fannie Mae and Freddie Mac. Based on your representations and in view of the foregoing, it is the view of the Department that the mortgage pool Certificates guaranteed and issued by Farmer Mac meet the definition of a "guaranteed governmental mortgage pool certificate," as defined in 29 C.F.R. 2510.3-101(i)(2).

The Department notes that ERISA's general standards of fiduciary liability apply to any investment by a plan covered by Title I, including an investment in a guaranteed governmental mortgage certificate as defined in 29 C.F.R. 2510.3-101(i)(2). Section 404(a)(1)(B) of ERISA requires that a fiduciary discharge his duties to a plan solely in the interests of the plan participants and beneficiaries, and with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent man would use in the conduct of an enterprise of like character and with like aims. Accordingly, the fiduciaries of an investing plan must act "prudently" and "solely in the interest" of the plan's participants and beneficiaries when deciding whether or not to invest in a Certificate.

You also requested an opinion as to whether trustees of a trust fund managed by the Depositor, Central Servicers, Field Servicers or Borrowers would be parties in interest under section 3(14) of ERISA or disqualified persons under section 4975(e)(2) of the Code. In this regard, we note that the mere investment of plan assets in the Certificates issued by Farmer Mac would not, by itself, make those entities parties in interest or disqualified persons, since it is our view that it is only the Certificates, and not the assets underlying the Certificates, that are plan assets. However, to the extent any of these entities have other relationships to the investing plans that are described in ERISA section 3(14) or Code section 4975(e)(2), such entities may be parties in interest or disqualified persons with respect to such plans.

Further, because it is our view that the Certificates are "guaranteed governmental mortgage certificates" within the meaning of that term as defined at 29 C.F.R. 2510.3-101(i)(2), transactions between these parties and a

Farmer Mac trust fund that relate only to the assets underlying the Certificates, and that do not involve the Certificates themselves, would not constitute prohibited transactions under sections 406 or 407 of ERISA or section 4975(c)(1) of the Code.

We are unable to provide you guidance on your final question regarding the Underwriter Exemptions. Specifically, you asked for an opinion that the Certificates are deemed to meet the condition that "the certificates acquired by the plan have received a rating at the time of such acquisition that is in one of the three highest generic rating categories from either Standard & Poor's Structured Rating Group, Moodys Investors Service, Inc., Duff & Phelps Credit Rating Co. or Fitch Investors Service, L.P." We do not have authority to deem that a transaction satisfies a condition set forth in an individual exemption. To the extent that the prohibited transactions provisions of ERISA or the Code are implicated by transactions involving the Certificates, we suggest that you discuss this matter with the Office of Exemption Determinations of this agency.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Section 10 of the Procedure describes the effect of advisory opinions.

Sincerely,
Susan G. Lahne
Acting Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

1. --

   Footnotes

   Under Presidential Reorganization Plan No. 4 of 1978, 43 Fed. Reg. 47713 (Oct. 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Code has been, with certain exceptions not here relevant, transferred to the Secretary of Labor, and the Secretary of the Treasury is bound by the interpretations of the Secretary of Labor pursuant to such authority.
2. Such exemptions include, for example, Banc One Capital Corporation, 60 Fed. Reg. 49011 (Sept. 21, 1995); ContiFinancial Services Corporation, 61 Fed. Reg. 3490 (Jan 31, 1996); and SouthTrust Securities, 62 Fed. Reg. 1926 (Jan. 14, 1997).
3. Farmer Mac was created by the Agricultural Credit Act of 1987 (12 U.S.C. §§ 2279aa et seq.), which amended the Farm Credit Act of 1971. The Farm Credit System Reform Act of 1996 (Pub. L. 104-105 (1996)) (the 1996 Act) amended the Farm Credit Act and expanded Farmer Mac's secondary market authority. Among other things, the 1996 Act authorized Farmer Mac to purchase and pool eligible loans to serve as collateral for securities guaranteed by Farmer Mac; eliminated a requirement to create a subordinated interest or reserve of at least 10% of the initial principal balance of pooled loans; and included requirements that Federal Reserve banks act as depositories for and fiscal agents of Farmer Mac and that Farmer Mac have access to the Federal Reserve System's book-entry system, thereby permitting Farmer Mac securities to be traded in the same manner as those issued by Fannie Mae, Freddie Mac and the Government National Mortgage Association ("Ginnie Mae"). The latter three entities are also sometimes referred to as FNMA, FHLMC, and GNMA, respectively.
4. Public offerings of Farmer Mac guaranteed mortgage-backed Certificates are required to be registered under the Securities Act of 1933.
5. Under the Farm Credit Act, Farmer Mac may select itself, or banks or other financial institutions not affiliated with Farmer Mac, to serve as trustee of a trust fund. While U.S. Bank Trust Corporation is currently the trustee of all the trust funds managed by the Depositor, it is possible that at some point different trusts might have different trustees.
6. The Trust Fund may also include a de minimus amount of real estate owned by the Trust Fund following a foreclosure and proceeds received by the Trust Fund with respect to Qualified Loans prior to such proceeds being distributed.
7. You represent that Farmer Mac does not currently secure Qualified Loans solely by mortgages on primary residences located in rural areas, but, under the Farm Credit Act, is permitted to do so.
8. The segregated pool may also contain Qualified Assets transferred to the Depositor by other Sellers.
9. The Farm Credit Act also permits Farmer Mac and its affiliates to issue debt obligations for the purpose of obtaining amounts for the re-purchase of any securities previously issued and guaranteed by Farmer Mac that represent interests in, or obligations backed by, pools of Qualified Loans; for the purchase of Qualified Loans; and for obtaining reasonable amounts for business operations, including adequate liquidity, subject to minimum capital requirements imposed by Farmer Mac's charter.
10. As Master Servicer, Farmer Mac has the right to purchase from the Trust Fund delinquent Qualified

Loans and property acquired by the Trust Fund upon foreclosure or comparable conversion of a Qualified Loan.

11. Central Servicers are selected by Farmer Mac based on their experience, general reputation and financial strength. Current Central Servicers are Lend Lease Business, Inc.; AgFirst Farm Credit Bank; and GMAC Commercial Mortgage Corporation.
12. 12 U.S.C. §§ 2279aa et seq.
13. “Guarantee losses” refer to payments by Farmer Mac of principal and interest on guaranteed securities in excess of the liquidation proceeds of the collateral securing the Qualified Loans in the pool that backs such securities.
14. Farmer Mac was created subsequent to the promulgation of both the Department’s 1982 final regulation on government mortgage pools (the 1982 Regulation), 47 Fed. Reg. 21241 (May 18, 1982), and the Department’s 1986 final regulation on the definition of plan assets. (See 29 CFR 2510.3-101, 51 Fed. Reg. 41262, 41278 (Nov. 13, 1986)). The 1986 final regulation on the definition of plan assets incorporated the guaranteed governmental mortgage pool exception established in the 1982 Regulation and redesignated it to appear at 29 C.F.R. 2510.3-101(i).
15. Preamble to the Final Regulation on Trust Requirement and Definition of Plan Assets--Governmental Mortgage Pools, 47 Fed. Reg. 21241 (May 18, 1982), at 21243-44.

September 29, 1999

Brian G. Belisle
Oppenheimer Wolff & Donnelly LLP
Plaza VII
45 South Seventh Street, Suite 3400
Minneapolis, Minnesota 55402-1609
1999-13A
ERISA Sec. 206(d)(3)

Dear Mr. Belisle:

This is in response to your request on behalf of the UAL Corporation (UAL) and United Air Lines, Inc. (United) for an advisory opinion. Specifically, you ask how a plan administrator should treat domestic relations orders the plan administrator has reason to believe are “sham” or “questionable” in nature.(1)

UAL is a holding company. Its major wholly-owned subsidiary is United. You represent that employees of United participate in three pension plans — an employee stock ownership plan (the ESOP); a 401(k) plan that is a profit sharing plan qualified under section 401(a) of the Code (the 401(k) Plan); and a defined benefit pension plan. The ESOP is a combination leveraged ESOP and non-leveraged stock bonus plan that is qualified under section 401(a) of the Code. Substantially all of the assets in the ESOP are invested in UAL stock.

You represent that the named plan administrator of the ESOP is UAL. UAL has assigned many of its administrative duties under the ESOP, including the duty to establish procedures for determining whether a domestic relations order constitutes a “qualified domestic relations order” (QDRO), to an ESOP Committee consisting of employees of United. The ESOP Committee has delegated to United’s Pension Programs Department (Pension Programs) the responsibility of reviewing and determining whether a domestic relations order received by the ESOP Committee is a QDRO within the meaning of section 206(d)(3) of ERISA. Appeals of QDRO determinations are made to the ESOP Committee.

You further represent that the ESOP permits an alternate payee to request the immediate lump sum distribution of any benefits under the plan that are assigned pursuant to the terms of any domestic relations order that the ESOP Committee determines is a QDRO. The ESOP otherwise permits lump sum distributions only following a participant’s termination of employment (including by way of the participant’s death).

The named plan administrator of the 401(k) Plan is United. United has delegated the authority to control and manage the administration of the 401(k) Plan, including the duty to establish procedures for determining whether a domestic relations order constitutes a QDRO, to a Pension and Welfare Plans Administration Committee (PAWPAC) consisting of employees of United. PAWPAC in turn has delegated to Pension Programs the responsibility for reviewing and determining whether a domestic relations order applying to the 401(k) Plan is a QDRO. Appeals of a QDRO determination are made to PAWPAC. As with the ESOP, the 401(k) Plan permits the immediate distribution of benefits under the plan that are assigned pursuant to the terms of a QDRO. Although an alternate payee may thus receive an immediate lump sum distribution from the 401(k) Plan, participants or beneficiaries are entitled to distributions from the 401(k) plan only following termination of employment (including by way of the participant’s death) or upon financial hardship.

You represent that Pension Programs currently has under review 16 domestic relations orders concerning benefits under the ESOP and the 401(k) Plan that Pension Programs believes may be “questionable” or “sham” in nature.(2)

You detail the grounds for Pension Programs' suspicions as to the nature of these domestic relations orders as follows. Pension Programs received within a very short period of time five domestic relations orders from the same lawyer (two of the orders were mailed in the same envelope). Each order related to participants working in United's maintenance facility located in Indianapolis, Indiana. Each of the five orders identically provided for an assignment of 100 percent of the participant's benefit in the ESOP and the 401(k) Plan to an alternate payee. Each order made no provision for any assignment of these participants' benefits in United's defined benefit pension plan. In each of the orders, the alternate payee and participant were shown as having the same address. Despite its suspicions, Pension Programs determined that each of the five orders was qualified because they satisfied the requirements of section 206(d)(3) of ERISA. In Pension Programs' view, these orders differed from other domestic relations orders processed by Pension Programs in that they dealt only with the ESOP and the 401(k) Plan; they provided for assignment of 100 percent of the participant's benefit; and they showed the participant and alternate payee as having the same address.

After its determination that these five domestic relations orders were QDROs, Pension Programs received and reviewed 16 other orders that had unusual characteristics similar to those of the original five orders. These 16 orders similarly provided for a 100 percent assignment of benefits payable under the ESOP and/or the 401(k) Plan, made no mention of the defined benefit pension plan, and specified in most cases that the alternate payee and participant shared the same address. You represent that Pension Programs performed additional investigation in its review of these 16 domestic relations orders to determine whether they were qualified.(3) While these orders were pending review with Pension Programs, two participants from the Indiana facility called at different times to determine the status of the review of their orders. You indicate that, during those conversations, each participant asserted that his order was not one of the "fraudulent QDROs." You represent that these statements led Pension Programs to heighten its scrutiny of the 16 orders assigning 100 percent of the participant's right to the ESOP and 401(k) benefits.

You further represent that, after beginning its investigation of the 16 domestic relations orders in question, Pension Programs learned of a pamphlet entitled "Retirement Liberation Handbook" that was being distributed by at least one United employee in the Indianapolis, Indiana area.(4) The pamphlet advocated, as a method of acquiring a distribution of pension plan benefits before reaching retirement age, that participants and their spouses obtain a divorce for the sole purpose of securing a court order assigning pension plan benefits and then remarry. Such a sham divorce, according to the Liberation Handbook, would enable the participant to obtain direct control over the investment of the participant's pension benefit. The Liberation Handbook also suggested that single employees could go through a sham marriage and subsequent divorce, by paying an individual a percentage of the anticipated pension distribution as compensation for acting as spouse, or could instead quit employment in order to obtain a similar early distribution and later get rehired. The Handbook described in some detail how distributions from pension plans are handled for tax purposes and discussed various options for distributions and investments of the distributions.

After reviewing the Liberation Handbook, Pension Programs determined that all of the 16 orders in question, as well as the original five orders it had previously deemed qualified, had significant similarities to the specific format promoted by the Liberation Handbook. For example, two of the initial five orders requested that distribution be made to an inappropriate account named in the Liberation Handbook.

In addition, all of the orders identified by Pension Programs as questionable relate to the ESOP and 401(k) benefits of employees who, at the time of the order, resided in the Indianapolis area and were in related work groups, and all had a number of common characteristics not typically seen in Pension Programs' review of domestic relations orders. Included in these were rapid remarriage and continued use by the putative alternate payee of United's no-cost travel for spouses.

You represent that Pension Programs engaged local counsel in Indiana to determine whether and to what extent the questionable domestic relations orders might be valid under Indiana law. Indiana counsel opined that, if the orders had been obtained as promoted by the Liberation Handbook, (i) the participant and alternate payee would have committed perjury; (ii) the parties would be in contempt of court; (iii) the order would have been fraudulently obtained; and (iv) if the foregoing could be established to the satisfaction of a judge, the order likely would be vacated by the court.

You have asked for an advisory opinion as to whether, and if so when, a plan administrator may investigate or question a domestic relations order submitted for review to determine whether it is a valid "domestic relations order" under State law for purposes of section 206(d)(3)(B) of ERISA.

Section 206(d)(1) of ERISA generally requires pension plans covered by Title I of ERISA to provide that plan benefits may not be assigned or alienated. Section 206(d)(3)(A) of ERISA states that section 206(d)(1) applies

to an assignment or alienation of benefits pursuant to a “domestic relations order” unless the order is determined to be a “qualified domestic relations order” (QDRO). Section 206(d)(3)(A) further provides that pension plans must provide for payment of benefits in accordance with the applicable requirements of any QDRO.

Section 206(d)(3)(B) of ERISA defines the terms “qualified domestic relations order” and “domestic relations order” for purposes of section 206(d)(3) as follows:

(B) For purposes of [section 206(d)(3)] —

(i) the term “qualified domestic relations order” means a domestic relations order —

(I) which creates or recognizes the existence of an alternate payee’s right to, or assigns to an alternate payee the right to, receive all or a portion of the benefits payable with respect to a participant under a plan, and

(II) with respect to which the requirements of subparagraphs (C) and (D) are met, and

(ii) the term “domestic relations order” means any judgment, decree, or order (including approval of a property settlement agreement) which —

(I) relates to the provision of child support, alimony payments, or marital property rights to a spouse, former spouse, child, or other dependent of a participant, and

1. (II) is made pursuant to a State domestic relations law (including a community property law).

   Section 206(d)(3)(C) requires that in order for a domestic relations order to be qualified such order must clearly specify (i) the name and the last known mailing address (if any) of the participant and the name and mailing address of each alternate payee covered by the order; (ii) the amount or percentage of the participant’s benefits to be paid by the plan to each such alternate payee, or the manner in which such amount or percentage is to be determined; (iii) the number of payments or period to which such order applies; and (iv) each plan to which the order applies.

   Section 206(d)(3)(D) specifies that a domestic relations order is qualified only if such order does not require (i) the plan to provide any type of benefit, or any option, not otherwise provided by the plan; (ii) the plan to provide increased benefits (determined on the basis of actuarial value); and (iii) the payment of benefits to an alternate payee that are required to be paid to another alternate payee under another order previously determined to be a qualified domestic relations order.

   Section 206(d)(3)(G) of ERISA requires the plan administrator to determine the qualified status of domestic relations orders received by the plan and to administer distributions under such qualified orders, pursuant to reasonable procedures established by the plan. In administering QDROs, plan administrators must follow the plan’s reasonable procedures, as required under section 206(d)(3)(G), and must assure that the plan pays only reasonable expenses of administering the plan, as required by sections 403(c)(1) and 404(a)(1)(A) of ERISA. In this regard, plan fiduciaries must take appropriate steps to ensure that plan procedures are designed to be cost effective and to minimize expenses associated with the administration of domestic relations orders. See Advisory Opinion 94-32A (Aug. 4, 1994).

   When a pension plan receives an order requiring that all or a part of the benefits payable with respect to a participant be paid to an alternate payee, the plan administrator must determine that the judgment, decree or order is a “domestic relations order” within the meaning of section 206(d)(3)(B)(ii) of ERISA — i.e., that it relates to the provision of child support, alimony payments, or marital property rights to a spouse, former spouse, child or other dependent of the participant and that it is made pursuant to State domestic relations law by a State authority with jurisdiction over such matters. Additionally, the plan administrator must determine that the order is qualified under the requirements of section 206(d)(3) of ERISA. It is the view of the Department that the plan administrator is not required by section 206(d)(3) or any other provision of Title I to review the correctness of a determination by a competent State authority pursuant to State domestic relations law that the parties are entitled to a judgment of divorce. See Advisory Opinion 92-17A (Aug. 21, 1992). Nevertheless, a plan administrator who has received a document purporting to be a domestic relations order must carry out his or her responsibilities under section 206(d)(3) in a manner consistent with the general fiduciary duties in part 4 of title I of ERISA.

   For example, if the plan administrator has received evidence calling into question the validity of an

order relating to marital property rights under State domestic relations law, the plan administrator is not free to ignore that information. Information indicating that an order was fraudulently obtained calls into question whether the order was issued pursuant to State domestic relations law, and therefore whether the order is a "domestic relations order" under section 206(d)(3)(C). When made aware of such evidence, the administrator must take reasonable steps to determine its credibility. If the administrator determines that the evidence is credible, the administrator must decide how best to resolve the question of the validity of the order without inappropriately spending plan assets or inappropriately involving the plan in the State domestic relations proceeding. The appropriate course of action will depend on the actual facts and circumstances of the particular case and may vary depending on the fiduciary's exercise of discretion. However, in these circumstances, we note that appropriate action could include relaying the evidence of invalidity to the State court or agency that issued the order and informing the court or agency that its resolution of the matter may affect the administrator's determination of whether the order is a QDRO under ERISA.(5) The plan administrator's ultimate treatment of the order could then be guided by the State court or agency's response as to the validity of the order under State law. If, however, the administrator is unable to obtain a response from the court or agency within a reasonable time, the administrator may not independently determine that the order is not valid under State law and therefore is not a "domestic relations order" under section 206(d)(3)(C), but should rather proceed with the determination of whether the order is a QDRO.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976). Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Susan G. Lahne
Acting Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

You do not ask and we do not opine as to whether any of the individual domestic relations orders at issue is "qualified" pursuant to section 206(d)(3) of the Employee Retirement Income Security Act of 1974, as amended (ERISA) and section 414(p) of the Internal Revenue Code (Code).

2. Pension Programs processes between approximately 200 and 300 domestic relations orders per year for all of its qualified retirement plans.
3. You represent that United pays all expenses related to the administration of domestic relations orders and QDROs, including all of the investigative efforts relating to any questionable QDROs and all legal expenses. You state that no plan assets of either the ESOP or the 401(k) Plan have been used directly or indirectly to pay for the expenses of investigating the QDROs at issue here.
4. The Liberation Handbook apparently first appeared in the classified section of a local advertising exchange.
5. Appropriate action could take other forms, depending on the circumstances and the fiduciary's assessment of the relative costs and benefits, including actual intervention in or initiation of legal proceedings in State court.

P.O. Box 1606 Suite 1006
Pearl River, New York 10965-8606
2000-10A
ERISA Sec. 4975(c)(1)

Dear Mr. Janow:

This is in response to your request for an advisory opinion under section 4975 of the Internal Revenue Code (Code). Specifically, you ask whether allowing the owner of an IRA to direct the IRA to invest in a limited partnership, in which relatives and the IRA owner in his individual capacity are partners, will violate section 4975 of the Code.(1)

You represent that the Fetner Family Partnership is a New York general partnership that is an investment club (the Partnership), in which Mr. Adler, through a general partnership known as Esponda Associates (Esponda), and various relatives of Mr. Adler invest. Through his investment in Esponda, which is a pass-through partnership, Mr. Adler owns a 12.11 percent interest in the Partnership. Mr. Adler presently owns a 30.38 percent interest in Esponda. The only other partner in Esponda is David Geiger, who is unrelated to Mr. Adler. Esponda currently owns a 39.85 percent interest in the Partnership.

The other current partners of the Partnership are as follows: Steven Adler (Mr. Adler's son) — 5.25%; Jack Fetner (Mr. Adler's father-in-law) — 13.44%; Adam Nadel (Mr. Adler's son's brother-in-law); Fay Nadel (Mr. Adler's mother-in-law) — 25.55%; Andrea Raskin (Mr. Adler's daughter) — 5.33%; Lois Zoldon (Mr. Adler's sister-in-law) — 7.57%.

The Partnership's assets are managed by Bernard L. Madoff Investment Securities (Madoff), which is unrelated to Mr. Adler. Madoff requires entities to maintain a minimum capital account. You represent that the Partnership currently has an account with Madoff and has not received any notice that its does not meet minimum capital requirements for investment management by Madoff. The IRA's assets are not necessary for the Partnership to continue its account with Madoff.

You represent that Leonard Adler intends to open a self-directed individual retirement account (IRA) in the amount of approximately five hundred thousand ($500,000.00) dollars through Retirement Accounts, Inc. of Denver, Colorado. At the time Mr. Adler directs the IRA investment, the Partnership will become a limited Partnership. Mr. Adler will be the only general partner in the Partnership and will own 6.52%. Mr. Adler will not have any investment management functions with respect to the assets of the Partnership.

The limited partners and their percentage ownership interests will be as follows: Andrea Raskin — 1.35%; Steven Adler — 3.07%; Jack Fetner — 3.94%; Fay Nadel — 18.1%; Adam Nadel — 1.77%; Lois Zoldon — 5.55%; David Geiger — 20.31%; IRA of Leonard Adler — 39.38%. Messrs. Adler and Geiger will invest directly in the Partnership in the same percentages as they would have invested through Esponda, instead of investing through Esponda. Esponda will no longer invest in the Partnership.

You further represent that Mr. Adler believes that Madoff would effectively manage assets for the IRA, but that Mr. Adler's IRA does not meet the minimum capital requirements (currently $1 million) for investment management by Madoff. You represent, however, that Madoff will manage the IRA's assets if it invests with Madoff through the Partnership, even though the IRA by itself otherwise would not meet the minimum capital

requirements. You further represent that all of the assets of the Partnership are liquid marketable securities. You also represent that none of the funds contributed by the IRA is required to be used, or will be used, to liquidate or redeem any other partner's interest in the Partnership.

Finally, you represent that Mr. Adler does not and will not receive any compensation from the Partnership. He likewise will not receive any compensation as a result of the acquisition by the IRA of its limited partnership interest.

You ask whether the investment by the IRA in the Partnership will give rise to a prohibited transaction under section 4975 of the Code. Section 4975(e)(1) of the Code, in relevant part, defines the term "plan" to include an IRA, described in section 408(a) of the Code. Section 4975(e)(2) of the Code defines "disqualified person," in relevant part, to include a fiduciary, a relative, and a partnership, of which (or in which) 50 percent or more of the capital interest or profits interest of such partnership is owned directly or indirectly, or held by a fiduciary. Section 4975(e)(3) of the Code defines the term "fiduciary," in part, to include any person who exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control regarding management or disposition of its assets. In order for a prohibited transaction to occur under section 4975 of the Code, there must be a transaction involving a disqualified person with respect to a plan. Where none of the relationships described in section 4975(e)(2) of the Code are found to exist, an entity would not be a disqualified person with respect to a plan.

Section 4975(c)(1)(A) of the Code prohibits any direct or indirect sale or exchange or leasing, of any property between a plan and a disqualified person. Section 4975(c)(1)(D) of the Code prohibits any direct or indirect transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan. Section 4975(c)(1)(E) of the Code prohibits a fiduciary from dealing with the income or assets of a plan in his or her own interest or for his or her own account. Section 54.4975-6(a)(5) of the Pension Excise Tax Regulations characterizes transactions described in section 4975(c)(1)(E) as involving the use of authority by fiduciaries to cause plans to enter into transactions when those fiduciaries have interests which may affect the exercise of their best judgment as fiduciaries.

As a trustee with investment discretion over the assets of his IRA, Mr. Adler is a fiduciary, and therefore, a disqualified person under section 4975(e)(2) of the Code. Mr. Adler is also a disqualified person in his capacity as the general partner of the Partnership to the extent he exercises discretionary authority over the administration or management of the IRA assets invested in the Partnership. In addition, although Mr. Adler, his son and his daughter are disqualified persons, you represent that the investment transaction is between the Partnership itself and the IRA, and not with Mr. Adler and his family, except as fellow investors in the Partnership. Mr. Adler owns only 6.5 percent of the Partnership, and therefore the Partnership itself is not a disqualified person under section 4975(e)(2)(G) of the Code which defines a disqualified person to include a corporation, partnership or trust or estate of which 50 percent or more of the capital interest is owned directly or indirectly, or held by persons described as fiduciaries.

Based solely on the facts and representations contained in your submissions, it is the opinion of the Department that the IRA's purchase of an interest in the Partnership would not constitute a transaction described in section 4975(c)(1)(A) of the Code (prohibiting any direct or indirect sale or exchange or leasing of any property between a plan and a disqualified person).

Whether the proposed transaction would violate sections 4975(c)(1)(D) and (E) of the Code raises questions of a factual nature upon which the Department will not issue an opinion. A violation of section 4975(c)(1)(D) and (E) would occur if the transaction was part of an agreement, arrangement or understanding in which the fiduciary caused plan assets to be used in a manner designed to benefit such fiduciary (or any person which such fiduciary had an interest which would affect the exercise of his best judgment as a fiduciary).

In this regard, the Department notes Mr. Adler does not and will not receive any compensation from the Partnership and will not receive any compensation by virtue of the IRA's investment in the Partnership. However, the Department further notes that if an IRA fiduciary causes the IRA to enter into a transaction where, by the terms or nature of that transaction, a conflict of interest between the IRA and the fiduciary (or persons in which the fiduciary has an interest) exists or will arise in the future, that transaction would violate either 4975(c)(1)(D) or (E) of the Code. Moreover, the fiduciary must not rely upon and cannot be otherwise dependent upon the participation of the IRA in order for the fiduciary (or persons in which the fiduciary has an interest) to undertake or to continue his or her share of the investment. Furthermore, even if at its inception the transaction did not involve a violation, if a divergence of interests develops between the IRA and the fiduciary (or persons in which the fiduciary has an interest), the fiduciary must take steps to eliminate the conflict of interest in order to avoid engaging in a prohibited transaction. Nonetheless, a violation of section 4975(c)(1)(D)

or (E) will not occur merely because the fiduciary derives some incidental benefit from a transaction involving IRA assets.

Moreover, the Department notes that by virtue of the contemplated investment by the IRA in the Partnership, there will be significant investment in the Partnership by benefit plan investors. See 29 CFR § 2510.3-101(f). Accordingly, the Partnership will hold "plan assets" within the meaning of that term in the Department's regulations at 29 CFR § 2510.3-101. As a result, any person who exercises discretionary authority or control with respect to assets of the Partnership will be fiduciary of the IRA and subject to the restrictions of section 4975(c)(1) of the Code, except to the extent a statutory or administrative exemption applies.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976). Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

   Footnotes

   Under Presidential Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor and the Secretary of the Treasury is bound by the interpretations of the Secretary of Labor pursuant to such authority.

January 18, 2001

Mr. Carl J. Stoney, Jr.
Crosby, Heafey, Roach & May
Two Embarcadero Center, Suite 2000
San Francisco, California 94111-4106
2001-01A
ERISA Sec. 403 - 404

Dear Mr. Stoney:

This is in response to your recent correspondence in which you request confirmation of the continued viability of the Department of Labor's views expressed in Advisory Opinion 97-03A (January 23, 1997), discussing the application of the Employee Retirement Income Security Act (ERISA) to the payment of certain plan termination expenses by tax-qualified plans administered by the Insurance Commissioner of the State of California in its capacity as liquidator of the companies which sponsored the plans. Further, you request any other guidance that the department may be able to provide on the issue of permissible plan expenses. In this regard, you indicate that you represent the Conservation and Liquidation Office of the State of California Department of Insurance in connection with the termination of, and attendant distribution of assets from, tax-qualified retirement plans sponsored by now-insolvent insurance companies.

Since the issuance of Advisory Opinion 97-03A, questions have been raised concerning the extent to which an employee benefit plan may pay the costs attendant to maintaining tax- qualified status, without regard to the fact that tax qualification confers a benefit on the plan sponsor. The following is intended to clarify the views of the Department of Labor on this issue.

As discussed in Advisory Opinion 97-03A, a determination as to whether to pay a particular expense out of plan assets is a fiduciary act governed by ERISA's fiduciary responsibility provisions. ERISA provides that, subject to certain exceptions, the assets of an employee benefit plan shall never inure to the benefit of any employer and shall be held for the exclusive purpose of providing benefits to participants and beneficiaries and defraying reasonable expenses of administering the plan. In discharging their duties under ERISA, fiduciaries must act prudently and solely in the interest of the plan participants and beneficiaries, and in accordance with the documents and instruments governing the plan insofar as they are consistent with the provisions of ERISA. See ERISA sections 403(c)(1), 404(a)(1)(A), (B), and (D).

With regard to sections 403 and 404 of ERISA, we noted that, as a general rule, reasonable expenses of administering a plan include direct expenses properly and actually incurred in the performance of a fiduciary's duties to the plan. We also noted, however, that the department has long taken the position that there is a class of discretionary activities which relate to the formation, rather than the management, of plans, explaining that these so-called settlor functions include decisions relating to the establishment, design and termination of plans and, except in the context of multi-employer plans, generally are not fiduciary activities governed by ERISA. Expenses incurred in connection with the performance of settlor functions would not be reasonable expenses of a plan as they would be incurred for the benefit of the employer and would involve services for which an employer could reasonably be expected to bear the cost in the normal course of its business operations. However, reasonable expenses incurred in connection with the implementation of a settlor decision would generally be payable by the plan.

In Advisory Opinion 97-03A, the department expressed the view that the tax-qualified status of a plan confers benefits upon both the plan sponsor and the plan and, therefore, in the case of a plan that is intended to be tax-qualified and that otherwise permits expenses to be paid from plan assets, a portion of the expenses attendant to tax-qualification activities may be reasonable plan expenses. This view has been construed to

require an apportionment of all tax qualification- related expenses between the plan and plan sponsor. The department does not agree with this reading of the opinion. The opinion recognizes that, in the context of tax-qualification activities, fiduciaries must consider, consistent with the principles articulated in earlier letters,(1) whether the activities are settlor in nature for purposes of determining whether the expenses attendant thereto may be reasonable expenses of the plan. However, in making this determination, the department does not believe that a fiduciary must take into account the benefit a plan's tax-qualified status confers on the employer. Any such benefit, in the opinion of the department, should be viewed as an integral component of the incidental benefits that flow to plan sponsors generally by virtue of offering a plan.(2)

In the context of tax-qualification activities, it is the view of the department that the formation of a plan as a tax-qualified plan is a settlor activity for which a plan may not pay. Where a plan is intended to be a tax-qualified plan, however, implementation of this settlor decision may require plan fiduciaries to undertake activities relating to maintaining the plan's tax-qualified status for which a plan may pay reasonable expenses (i.e., reasonable in light of the services rendered). Implementation activities might include drafting plan amendments required by changes in the tax law, nondiscrimination testing, and requesting IRS determination letters. If, on the other hand, maintaining the plan's tax-qualified status involves analysis of options for amending the plan from which the plan sponsor makes a choice, the expenses incurred in analyzing the options would be settlor expenses.

The foregoing views are intended to clarify, rather than supersede, the views of the department set forth in Advisory Opinion 97-03A. We hope the information provided is of assistance to you.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976).

Sincerely,
Robert J. Doyle
Director of Regulations and Interpretations

   See letter to John N. Ernlenborn from Dennis M. Kass (March 13, 1986); letter to Kirk F. Maldonado from Elliot I. Daniel (March 2, 1987).
2. The Supreme Court has recognized that plan sponsors receive a number of incidental benefits by virtue of offering an employee benefit plan, such as attracting and retaining employees, providing increased compensation without increasing wages, and reducing the likelihood of lawsuits by encouraging employees who would otherwise be laid off to depart voluntarily. It is the view of the department that the mere receipt of such benefits by plan sponsors does not convert a settlor activity into a fiduciary activity or convert an otherwise permissible plan expense into a settlor expense. See Lockheed Corp. v. Spink, 517 U.S. 882 (1996); Hughes Aircraft Company v. Jacobson, 525 U.S. 432 (1999).

Guidance on Settlor v. Plan Expenses

In conjunction with investigations involving reviews of plan expenses, a number of questions have been raised concerning the extent to which plans may pay certain expenses that might be viewed as conferring a benefit on the plan sponsor. In this regard, the department has issued a number of letters which have attempted to lay out the fiduciary provisions, principles and considerations relevant to an analysis of this question.(1)

On This Page

- Hypothetical Fact Pattern Two
- Hypothetical Fact Pattern Three
- Hypothetical Fact Pattern Four
- Hypothetical Fact Pattern Five
- Hypothetical Fact Pattern Six

Nonetheless, it has been determined that further clarification and guidance will facilitate both compliance and enforcement efforts in this area.

In an effort to specifically address the most frequently raised questions, the Pension and Welfare Benefits Administration has developed a set of six hypothetical fact patterns in which various plan expense issues are both presented and addressed.(2)

Questions concerning this guidance may be addressed to:

Back To Top

Fact Pattern Number One

During 1997, ACD Inc. agreed to sell a business segment to EFG Inc., a friendly competitor. The closing date for the sale was January 1, 1998. As a result of this sale, 1,600 participants and $180 million (the amount of accrued benefits attributable to the transferring employees) were to be transferred from the ACD defined benefit plan to the EFG defined benefit plan on the sale closing date. In December 1997, the companies were forced, through no fault of the parties, to postpone the sale closing date until May 1, 1998. The following expenses were paid by the ACD plan as a result of the business segment sale:

- $80,000 for a plan design study
- $30,000 to amend the ACD Plan to provide for the spin-off
- $75,000 to compute the amount necessary to implement the transfer of plan assets from the ACD Plan to the EFG Plan and an additional $75,000 to re-compute the amount of the asset transfer due to the changed closing date
- $25,000 for negotiations with various unions related to the transfer of assets and participants

Which of the above expenses, if otherwise reasonable, may be paid by the ACD Plan?

Answer

The department has taken the position that there is a class of activities which relates to the formation, rather than the management, of plans. These activities, generally referred to as settlor functions, include decisions relating to the formation, design and termination of plans and, except in the context of multi-employer plans, generally are not activities subject to Title I of ERISA. Expenses incurred in connection with settlor functions would not be reasonable expenses of a plan. The department also has taken the position that, while expenses attendant to settlor activities do not constitute reasonable plan expenses, expenses incurred in connection with the implementation of settlor decisions may constitute reasonable expenses of the plan. See Letters to Carl J. Stoney, Jr. (2001, Advisory Opinion 01-01A); Samuel Israel (1997, Advisory Opinion 97-03A); Kirk

Maldonado (1987); and John Erlenborn (1986).

Applying the foregoing principles, the $80,000 for a plan design study clearly constitutes an expense for a settlor activity and, therefore, cannot be paid by the ACD Plan. The $30,000 to amend the ACD Plan to provide for the spin off should, in the view of the department, be treated as a settlor/plan design expense inasmuch as the plan fiduciary would have no implementation responsibilities under the plan until such time as the plan is actually amended.

The $75,000 expense incurred to determine the amount of plan assets to be transferred to the EFG Plan would be a permissible plan expense if the expense is attendant to implementing ACD's decision to spin off certain participants, rather than for assisting ACD in formulating the spin-off. The second $75,000 expense incurred to re-compute the amount of the asset transfer due to the changed closing date also may be a reasonable plan expense, where, for example, the delay in the closing date was through no fault of the sponsor and the plan was duly amended to accomplish the merger at the new closing date.

The $25,000 expense related to negotiations with various unions would be a settlor expense. The described union negotiations typically take place in advance of plan changes. Activities (such as union negotiations, benefit studies, actuarial analyses) that take place in advance of, or in preparation for, a plan change will almost always constitute settlor activities, the expenses for which would not constitute reasonable plan expenses.

Fact Pattern Number Two

MNOP Corp., a Georgia gold mining company with pharmaceutical operations in the Miami area, decided to reduce its staff after several years of poor mining results, falling gold prices, and failed marketing projects in the Miami area. After exploring several other staff reduction options, MNOP decided to initiate an early retirement window (window) in their defined benefit plan (plan) to induce older workers to retire. The plan paid the following expenses related to the window:

- $150,000 for a plan design study to determine the components of the window
- $80,000 for cost projections and to determine the impact of the window on MNOP's financial statements in accordance with FASB Statement No. 87 (Employer's Accounting for Pension)
- Following adoption of the early retirement window, $90,000 to compute potential benefits for those participants that would be eligible for the window
- $30,000 to communicate selected components of the window and the plan benefits under the window to encourage eligible participants to take advantage of the early retirement benefit offer
- $50,000 for benefit calculations for those opting to retire under the window
- $20,000 to communicate plan benefits to the participants that opted to retire under the window
- $10,000 for FASB Statement No. 88 (Employer's Accounting for Settlements and Curtailments of Defined Benefit Pension plans and for Termination of Benefits') calculations, as the window resulted in a plan curtailment

Which of the above expenses, if otherwise reasonable, may be paid by the plan?

Answer

The expenses incurred in hypothetical question 2 fall into three basic categories - plan design, benefit computation and communication expenses.

Plan design expenses clearly constitute settlor expenses and, therefore, are not payable by the plan. Typically, plan design expenses are incurred in advance of the adoption of the plan or a plan amendment. In the case at hand, the $150,000 for plan design study and the $80,000 for cost projections to determine financial impact of the plan change on the sponsor are settlor expenses and may not be paid by the plan. Similarly, the $10,000 for FASB Statement No. 88 expense relate to the plan sponsor's financial statements and are not payable by the plan.

Calculating the actual benefits to which a participant is entitled under the plan is an administrative function of the plan and, accordingly, reasonable expenses attendant to such calculations may be paid by the plan. Thus, the $50,000 expense for calculating the benefits of those opting for the retirement window may be a reasonable expense of the plan. In addition, the $90,000 paid to compute the potential benefits for all eligible employees may be a reasonable expense of the plan, if the fiduciary determines that such an expenditure is a prudent use of plan assets. Even though providing such information to all eligible employees might be viewed as furthering the objectives of the company, this benefit to the employer would not prevent the plan from incurring the expense.[3]

As suggested above, communicating plan information to participants and beneficiaries is an important plan activity and, therefore, expenses attendant to such communications will usually constitute permissible plan expenses, if the expenses are otherwise reasonable. In this regard, administrators and plan fiduciaries generally should be afforded substantial latitude in the method, form and style of their plan communications. Applying the foregoing, the $30,000 to communicate selected components of the window to all eligible participants and the $20,000 to communicate plan benefits to participants that opted for early retirement under the window may constitute reasonable expenses of the plan, even though, like the above benefit calculations, the communication to all eligible participants might be viewed as furthering the objective of the company to induce employees to opt for early retirement.

Back To Top

Fact Pattern Number Three

HIJ, Inc. is a major retailer in Boston, Chicago and San Francisco. During the last two years, it was determined that HIJ's defined benefit plan (plan) was amended to offer a participant loan program and an early retirement window for management employees. The plan is intended to be maintained as a tax-qualified plan. HIJ normally maximizes its tax-deductible contribution to the plan. Upon review of the Plan's financial records, it was determined that the following expenses were paid by the plan:

- $100,000 to amend the plan to establish an early retirement window for management employees and to obtain an IRS determination letter
- $50,000 to amend the plan to comply with tax law changes
- $25,000 to amend the plan to establish a participant loan program
- $20,000 for routine nondiscrimination testing to ensure compliance with the tax qualification requirements

Which of the above expenses, if otherwise reasonable, may be paid by the plan?

Answer

In Advisory Opinion 97-03A, the department expressed the view that the tax-qualified status of a plan confers benefits upon both the plan sponsor and the plan and, therefore, in the case of a plan that is intended to be tax-qualified and that otherwise permits expenses to be paid from plan assets, a portion of the expenses attendant to tax qualification activities may be reasonable plan expenses. The department further clarified its views on tax-qualification expenses in Advisory Opinion No. 01-01. In that opinion, the department expressed the view that a plan fiduciary is not required to take into account the benefits a plan's tax-qualified status confers on an employer in determining whether the expenses attendant to maintaining a plan's tax-qualified status constitute reasonable expenses of the plan. The department further noted that any such benefit should be viewed as an integral component of the incidental benefits that flow to plan sponsors generally by virtue of offering a plan.[(4)]

In the context of tax qualification activities, it is the view of the department that the design of a plan as a tax-qualified plan clearly involves settlor activities for which a plan may not pay. On the other hand, implementation of the settlor decision to maintain a tax-qualified plan would require plan fiduciaries to undertake activities relating to maintaining the plan's tax-qualified status for which a plan may pay reasonable expenses (i.e., reasonable in light of the services rendered). Implementation activities might include drafting plan amendments required to maintain tax-qualified status, nondiscrimination testing, requesting IRS determination letters.

Applying the above principles, the $50,000 to amend the plan to comply with tax law changes and the $20,000 for routine nondiscrimination testing may constitute reasonable expenses of the plan. The $25,000 to amend the plan to establish a participant loan program would be a plan design/settlor expense inasmuch as the plan fiduciaries have no implementation obligations under the plan until such time as the plan is amended. Subsequent to the plan amendment, however, expenses attendant to operating the established loan program would be implementation expenses with respect to which the plan may pay reasonable expenses.

The single charge of $100,000 includes expenses for plan design/settlor activities (i.e., amending the plan to establish an early retirement window) and implementation activities (i.e., obtaining an IRS determination letter). Inasmuch as fiduciaries may pay only reasonable expenses of administering the plan, the fiduciaries of the plan would be required to obtain from the service provider a determination of the specific expense(s) attributable to the fiduciaries' implementation responsibilities (i.e., obtaining an IRS determination letter) prior to payment by the plan.

Back To Top

Fact Pattern Number Four

The QRS Corp. is a world-wide shoe manufacturer with plants in the Cincinnati and Detroit areas. A review of the financial records of the QRS Corp. defined benefit plan (the plan) reflected the following expenses:

- $60,000 for consulting fees to analyze the company's options for compliance with Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA) and Small Business Jobs Protection Act of 1996 (SBJPA)
- $5,000 to amend the plan to comply with USERRA and SBJPA and $5,000 to obtain an IRS determination letter
- $50,000 in actuary fees to perform nondiscrimination testing due to a plan amendment increasing benefits as a result of union negotiations
- $5,000 to amend the plan to comply with the requirements of Title I of ERISA

Which of the above expenses, if any, may be paid by the plan?

Answer

The expenses presented in this hypothetical raise some of the same issues as those raised in hypothetical question 3 - the extent

to which expenses relating to maintenance of tax-qualification may constitute reasonable plan expenses. Applying the principles set forth in the answers to hypothetical question 3, the $5,000 expense to amend the plan, the $5,000 expense for a determination letter and the $50,000 for nondiscrimination testing may be necessary to maintain the plan's tax-qualified status and, therefore, may constitute reasonable plan expenses. The fact that the $50,000 discrimination testing was necessary because of a union-negotiated plan amendment does not affect the expense being treated as a permissible plan expense. On the other hand, if the $50,000 was incurred as part of the plan sponsor's negotiating with the union - in advance of adoption of the plan amendment giving rise to the testing - the expense, as discussed in the Answer to hypothetical question 1, would be viewed as a settlor, rather than plan, expense. The $60,000 for consulting fees to analyze the Company's options for compliance with USERRA and SBJPA would constitute plan design/settlor expenses that may not be paid by the plan.

Similar to a fiduciary's implementation responsibility with regard to maintaining the tax-qualified status of a plan, fiduciaries have an obligation to ensure that administration of their plan comports with the requirements of ERISA, as well as other applicable Federal laws. Accordingly, the $5,000 expense to amend the plan to comply with the requirements of Title I of ERISA would be a permissible plan expense, assuming that the amount is reasonable in light of the services rendered.

Fact Pattern Number Five

The public relations firm, TUV (the Firm), has offices in Philadelphia, Dallas, Los Angeles and New York. The Firm operates a defined benefit plan (plan). From 1993 to 1996, the plan, in addition to distributing a Summary Annual Report (SAR), distributed an individual benefit statement to each participant. The total preparation and distribution costs for the benefit statements were approximately $50,000 annually.

In 1996, the Firm decided it would be a good idea to make sure its employees were aware of all of the benefits provided by the Firm. Accordingly, for 1996 and subsequent years, the individual benefit information was incorporated in a twelve page booklet that included summary information about all the Firm's benefit plans (health, dental, vision), as well as one full page devoted to other Firm benefits (e.g., the physical fitness center, limousine services) and activities (e.g., annual picnic, Holiday party, etc). The booklets are prepared by the plan's actuarial consultant. The booklet costs approximately $125,000 to prepare and distribute annually.

What, if any, of these expenses may be paid by the plan?

Answer

The issues presented by this hypothetical involve the extent to which a plan can pay expenses related to the disclosure of plan information. Clearly, plans may pay those expenses attendant to compliance with ERISA's disclosure requirements (e.g., furnishing and distributing summary plan descriptions, summary annual reports and individual benefit statements provided in response to individual requests). As indicated in the Answer to hypothetical question 2, communicating plan information to participants and beneficiaries is an important plan activity. The department notes that there is nothing in Title I of ERISA that precludes a plan fiduciary from providing more information than that specifically required by statute. Whether or not a particular communication related expense should be incurred by a plan is a fiduciary decision governed by the fiduciary responsibility provisions of Title I of ERISA.

Accordingly, the $50,000 to produce and distribute individual benefit statements would be a permissible plan expense to the extent that the actual costs of preparation and distribution are reasonable. Similarly, a portion of the $125,000 for preparation and distribution of the benefit booklets may also be a permissible plan expense. Clearly, the plan sponsor should pay that portion (1/12) of the costs of the booklet that relates to non-plan matters (i.e., physical fitness center, limousine services, picnic, etc.). In addition, a plan may pay only those reasonable expenses relating to that plan, and therefore, each of the plans should pay their proportionate share of the expenses of the booklet. While plan administrators and fiduciaries should be given considerable deference with regard to their disclosure decisions, plan administrators should be able to explain their disclosure decisions and justify the costs attendant thereto.

Fact Pattern Number Six

The QT, P. C. (QT) is a law firm with satellite offices in most major U. S. cities. QT operates a defined benefit plan (plan). Until 1997, the plan was administered by a ten lawyer benefits committee. In 1997, the plan fiduciaries decided to out-source the administration. Following an in-depth search, the plan's fiduciaries selected Firm, Inc. and agreed to pay $1 million in start-up fees. The start-up fees were paid from the plan and were used to set up data bases and transfer data to Firm that was necessary to administer the plan. The new system operated by Firm provides plan participants with a significantly enhanced level of service than was previously provided by the staff of ten lawyers. Once the plan's administration was transferred to Firm, the plan paid all of Firm's administration fees.

To what extent may the expenses associated with outsourcing the plan's administration be paid by the plan?

Answer

Section 404(a)(1)(A) specifically contemplates the payment of reasonable expenses by an employee benefit plan. Where a plan sponsor has assumed responsibility for the payment of plan expenses and later prospectively shifts that responsibility to the

plan, the plan may pay those expenses to the extent reasonable and not otherwise precluded by the terms of the plan.[5]

To the extent that the services provided by Firm are necessary for the administration of the plan, the $1 million start-up fee and ongoing administrative fees may constitute reasonable expenses of the plan if they are reasonable with respect to the services provided, and not otherwise precluded by the plan.

Footnotes

1. See Letters to Carl J. Stoney, Jr. from Robert J. Doyle (Advisory Opinion 01-01A, January 18, 2001); Samuel Israel from Robert J. Doyle (Advisory Opinion 97-03A, January 23, 1997); Kirk Maldonado from Elliot I. Daniel (March 2, 1987); John Erlenborn from Dennis M. Kass (March 13, 1986).

2. The expense information set forth in the following hypotheticals are for illustrative purposes only and are not intended to reflect a determination by the department on the reasonableness of an expense.

3. The Supreme Court has recognized that plan sponsors receive a number of incidental benefits by virtue of offering an employee benefit plan, such as attracting and retaining employees, providing increased compensation without increasing wages, and reducing the likelihood of lawsuits by encouraging employees who would otherwise be laid off to depart voluntarily. The mere receipt of such benefits by plan sponsors does not convert a settlor activity into a fiduciary activity or convert an otherwise permissible plan expense into a settlor expense. See Lockheed Corp. v. Spink, 517 U.S. 882 (1996), Hughes Aircraft Company v. Jacobson, 525 U.S. 432 (1999).

4. See footnote 3.

5. The department has taken the position that where a plan document is silent as to the payment of reasonable administrative expenses, the plan may pay reasonable administrative expenses. Where a plan document provides that the employer will pay any such expenses, and if the employer has reserved the right to amend the plan document, ERISA would not prevent the employer from amending the plan to require, prospectively, that the relevant expenses be paid by the plan. The department believes that the prohibition against self- dealing in section 406(b)(1) precludes an employer from exercising fiduciary authority to use plan assets to pay for an amendment that would (retroactively) relieve the employer of an obligation to pay plan expenses. See Advisory Opinion 97-03A.

Trust Examination Manual

December 14, 2001

Mr. James M. Winn
Smith & Downey
1110 Vermont Ave., NW, Suite 400
Washington, DC 20005
2001-10A
ERISA Sec. 408(b)(2) & 408(b)(6)

Dear Mr. Winn:

This is in response to your letter requesting an advisory opinion under the Employee Retirement Income Security Act of 1974, as amended (ERISA). In particular, you request an opinion that the provision of trustee services by Laurel Trust Company (Laurel) to two defined benefit pension plans sponsored by Laurel (the Plans), and the payment by the Plans of Laurel's standard trustee fees would be exempt from ERISA's prohibited transaction provisions by reason of section 408(b)(6) of ERISA.(1)

Your letter contains the following representations. Laurel provided trustee services to the Plans and charged its customary trustee fees for such services. Laurel assumed that the provision of such services and the receipt of the fees was exempted from the prohibited transactions provisions of section 406 of ERISA by reason of section 408(b)(6). You represent that in 1996, the Department of Labor (the Department) determined that this arrangement constituted a violation of section 406 of ERISA and imposed on Laurel (then known as BT Management Trust Company) a civil penalty under section 502(l) of ERISA. Laurel petitioned the Department for a waiver or reduction of the civil penalty, which was denied. Laurel paid the civil penalty and ceased charging its customary fees to the Plans. Citing a 1993 IRS Field Service Advice Memorandum, which you believe takes a view contrary to that of the Department, you have requested that the Department reconsider its position with respect to section 408(b)(6) of ERISA.

Laurel contends that section 406 of ERISA does not prohibit the Plans from paying Laurel its customary trustee fees, which are the same fees paid by plans sponsored by parties unrelated to Laurel. You represent that such fees represent reasonable compensation for services, which plans are permitted to pay, even if those fees include a profit component. You recognize that ERISA section 406 would otherwise prohibit the payment of such fees, but claim that the statutory exemption provided by section 408(b)(6) permits the payment of the fees by the Plans to Laurel.

Section 406(a)(1)(C) and (D) of ERISA provides that a fiduciary with respect to a plan shall not cause the plan to engage in a transaction, if the fiduciary knows or should know that such transaction constitutes a direct or indirect furnishing of goods, services, or facilities between the plan and a party in interest or a transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 406(b)(1) of ERISA provides that a fiduciary with respect to a plan shall not deal with plan assets in his own interest or for his own account. Section 406(b)(2) of ERISA prohibits a fiduciary with respect to a plan from acting in any transaction involving the plan on behalf of a party, or represent a party, whose interests are adverse to the interests of the plan or of its participants and beneficiaries.

Section 408(b)(6) of ERISA provides that the prohibitions of section 406 shall not apply to the provision of any ancillary service by a bank or similar financial institution supervised by the United States or a State, if such bank or financial institution is a fiduciary of such plan, provided that certain conditions are satisfied.

You represent that Laurel, as a Pennsylvania state-chartered trust company, is a "bank or similar financial institution" that is supervised by a State. You further represent that the provision of services to and payment of fees by the Plans satisfies the other conditions of ERISA section 408(b)(6).

You claim that the Department has previously concluded that a plan's payment of fees that include a profit component is not "reasonable compensation," as that term is used in both section 408(b)(2) and 408(b)(6) of ERISA. You further claim that the Internal Revenue Service (IRS) has taken a contrary position with respect to section 4975(d)(6) of the Internal Revenue Code of 1986 (the Code), a parallel provision to ERISA section 408(b)(6), in a 1993 Field Service Advice Memorandum (Memorandum), a copy of which you included with your letter. Pursuant to section 102 of Reorganization Plan No. 4 of 1978 (see, footnote 1, above), all authority to issue regulations, rulings, interpretations, and exemptions under section 4975(d) of the Code, with exceptions not here relevant, was transferred to the Department. The Department, therefore, has sole authority and responsibility to interpret section 4975(d)(6) of the Code.

Section 408(b)(6) of ERISA (and by reference, section 4975(d)(6) of the Code, see, footnote 1, above) exempts from the prohibited transaction provisions of ERISA the provision of "ancillary" services to a plan by a fiduciary that is a bank or similar financial institution supervised by the United States or a State and the payment of no more than "reasonable compensation" by the plan. It is the opinion of the Department that trustee services are not ancillary services.

Trustee services are necessary and essential to the establishment, maintenance, and operation of a pension plan that is subject to ERISA. Section 403(a) of ERISA requires that, subject to several exceptions not relevant here, all assets of an employee benefit plan shall be held in trust by one or more trustees. The trustee or trustees shall have exclusive authority and discretion to manage and control the assets of the plan, except to the extent that the plan expressly provides that the trustee or trustees are subject to the direction of a named fiduciary who is not a trustee, in which case the trustees shall be subject to proper directions of such fiduciary which are made in accordance with the terms of the plan and which are not contrary to ERISA, or to the extent that authority to manage, acquire, or dispose of assets of the plan is delegated to one or more investment managers. In the Department's view a service is "ancillary" if it aids or is auxiliary to a primary or principal service. For instance, the Department has stated that the provision of "sweep services" by a trustee who is subject to direction from an independent investment manager for the investment of plan assets, may constitute an "ancillary service" within the meaning of section 408(b)(6).(2) Given the central role that the establishment of a trust and the naming of a trustee plays in the establishment, maintenance, and operation of an employee benefit plan, the Department concludes that trustee services cannot be "ancillary services" within the meaning of ERISA section 408(b)(6).

Section 408(b)(2) of ERISA exempts from the prohibitions of section 406(a) any contract or reasonable arrangement with a party in interest, including a fiduciary, for office space, or legal, accounting or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefore. Regulations issued by the Department clarify the terms "necessary service" (29 CFR §2550.408b-2(b)), "reasonable contract or arrangement" (29 CFR §2550.408b-2(c)) and "reasonable compensation" (29 CFR §2550.408b-2(d) and 2550.408c-2) as used in section 408(b)(2). As a general matter, whether the requirements of that section are met in each case involves questions which are inherently factual in nature. Pursuant to section 5.01 of ERISA Procedure 76-1, the Department ordinarily does not issue opinions on such matters. The Department has not concluded, however, that fees including a profit component necessarily exceed reasonable compensation.

With respect to the prohibitions in section 406(b), the regulation under section 408(b)(2) of ERISA (29 CFR §2550.408b-2(a)) states that section 408(b)(2) of ERISA does not contain an exemption for an act described in section 406(b) even if such act occurs in connection with a provision of services that is exempt under section 408(b)(2).

As explained in regulation 29 CFR §2550.408b-2(e)(1), the prohibitions of section 406(b) are imposed upon fiduciaries to deter them from exercising the authority, control, or responsibility that makes them fiduciaries when they have interests that may conflict with the interests of the plans for which they act. Thus, a fiduciary may not use the authority, control, or responsibility that makes him a fiduciary to cause a plan to pay an additional fee to such fiduciary, or to a person in which he has an interest that may affect the exercise of his best judgment as a fiduciary, to provide a service. However, regulation 29 CFR §2550.408b-2(e)(2) provides that a fiduciary does not engage in an act described in section 406(b)(1) of ERISA if the fiduciary does not use any of the authority, control, or responsibility that makes him a fiduciary to cause a plan to pay additional fees for a service furnished by such fiduciary or to pay a fee for a service furnished by a person in which the fiduciary has an interest that may affect the exercise of his judgment as a fiduciary. Furthermore, regulation section 2550.408b-2(e)(3) explains that if a fiduciary provides services to a plan without the receipt of compensation or other consideration other than the

reimbursement of direct expenses properly and actually incurred in the performance of such services, the provision of such services does not, in and of itself, constitute an act described in section 406(b) of ERISA. Regulation section 2550.408c-2(b)(3) provides that an expense is not a direct expense to the extent that it would have been sustained had the service not been provided or if it represents an allocable portion of overhead.

Accordingly, it is the opinion of the Department that if Laurel provides trustee services to the Plans and charges the Plans a fee that exceeds the direct expenses that Laurel incurs in the provision of trustee services to the Plans, it would engage in violations of ERISA section 406(b)(1) and (2), which would not be exempted by ERISA section 408(b)(2) or (6).

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

FDIC FEDERAL DEPOSIT INSURANCE CORPORATION

Trust Examination Manual

Advisory Opinion

June 7, 2002

Wallace M. Starke, Esq.
Troutman, Sanders, Mays & Valentine, L.L.P.
P.O. Box 1122
Richmond, VA 23218-1122
2002-04A
ERISA Sec. 408(e)

Dear Mr. Starke:

This is in response to your request for an advisory opinion regarding the application of section 408(e) of the Employee Retirement Income Security Act of 1974, as amended (ERISA) to certain transactions between a plan and various personal trusts and estates sharing a common trustee with the plan.

You represent that National Bankshares, Inc. (NBI) is a bank holding company which owns all the issued and outstanding stock of the National Bank of Blacksburg (the Bank). The Bank is a national banking association subject to the supervision of the Office of the Comptroller of the Currency (OCC).

You further represent that NBI acts as plan sponsor of the National Bankshares, Inc. Employee Stock Ownership Plan (the ESOP) and the Bank is a participating employer with respect to the ESOP. You state that the Bank serves as trustee of the ESOP and also serves as trustee of various inter vivos and executorial trusts and estates (referred to hereafter as personal trusts). You state that to the best of your knowledge, none of the personal trusts are ERISA plans, parties in interest with respect to the ESOP as defined in section 3(14) of ERISA, or disqualified persons within the meaning of section 4975(e) of the Internal Revenue Code (the Code).

You state that the ESOP is an employee stock ownership plan within the meaning of 4975(e)(7) of the Code and section 407(d)(6) of ERISA. It is intended to be qualified under section 401(a) of the Code and last received a favorable determination letter from the Internal Revenue Service to that effect on June 1, 1995. The ESOP, by its terms, is designed to invest primarily in the stock of NBI. NBI's outstanding stock consists of one class of common stock which is readily traded on the NASDAQ small cap market.

You request an advisory opinion regarding several transactions involving the purchase by the ESOP of NBI stock from several personal trusts for which the Bank also serves as trustee. No broker was used for the sales. You represent that the Bank as trustee for the ESOP initiated such purchases of NBI stock for the ESOP. You state that the Bank has an established procedure to obtain, prior to executing any acquisition of NBI stock by the ESOP from a personal trust, written consent from the primary beneficiary or any co-fiduciary of the personal trust to sell NBI stock owned by the personal trust to the ESOP.

You state that no commission was charged to the ESOP or the personal trusts in connection with the NBI stock purchases in question. The consideration paid by the ESOP for the NBI stock was cash equal to the bid price for such shares as quoted by the online service MSN Money Central, a price which was not more than the fair market value of such shares at the time of their purchase. The trustee did not receive any consideration for its personal account in connection with any of the NBI stock purchases in question.

You state that MSN Money Central is an online pricing service that obtains its stock quotes from Standard and Poor's ComStock, Inc., the same service used by a number of other pricing services. You state that there is a 15-minute delay when a stock quote is obtained from MSN Money Central, and that in each of the purchases

at issue the transaction was executed within 15 minutes of the time that a price quote was obtained. You state that effecting the trade at the bid price, rather than the asked price, benefitted the plan in that the bid price in most, if not all, cases is lower than the asked price.

A total of ten such transactions occurred between June of 2000 and April of 2001 representing a total of 7,646 shares of NBI stock and a total sale price of $163,301. During an examination by the OCC of the operations of the trust department of the Bank, the OCC examiner questioned whether these transactions were prohibited by ERISA and the Code.

You request the Department's view as to whether the described transactions are exempt from the prohibited transaction restrictions of ERISA and the Code by virtue of sections 408(e) of ERISA and 4975(d)(13) of the Code.

Section 406(a)(1)(A) and (D) of ERISA prohibit a fiduciary with respect to a plan from causing a plan to engage in a transaction if s/he knows or should know that such transaction constitutes a direct or indirect sale or exchange, or leasing of any property between a plan and a party in interest; or a transfer to, or use for the benefit of, a party in interest, of any assets of the plan. Section 3(14)(A) and (C) of ERISA define a party in interest with respect to a plan to include a fiduciary of the plan and an employer any of whose employees are covered by such plan.

Section 406(a)(1)(E) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction if s/he knows or should know that such transaction constitutes a direct or indirect acquisition, on behalf of the plan, of any employer security in violation of section 407(a). In addition section 406(a)(2) prohibits certain fiduciaries from permitting a plan to hold any employer security if s/he knows or should know that holding such security violates section 407(a).

Section 407(a) of ERISA provides, in part, that a plan may not acquire or hold any employer security which is not a qualifying employer security.

Section 406(b)(1) and (2) of ERISA prohibit a fiduciary with respect to a plan from dealing with the assets of a plan in his or her own interest or for his own account, or from acting in his or her individual or in any other capacity in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries. Section 406(b)(3) prohibits a fiduciary with respect to a plan from receiving any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of a plan.

However, section 408(e) of ERISA provides, in part, that sections 406(a) and 406(b)(1) and (2) shall not apply to the acquisition or sale by a plan of qualifying employer securities (as defined in section 407(d)(5)) if the following conditions are met: (1) the acquisition or sale is for adequate consideration; (2) no commission is charged with respect to the acquisition or sale; and (3) the plan is an eligible individual account plan (as defined in section 407(d)(3))… 2.

Section 407(d)(1) of ERISA defines the term employer security in part to mean a security issued by an employer of employees covered by the plan or by an affiliate of such employer. With respect to eligible individual account plans, section 407(d)(5) of ERISA defines the term qualifying employer security to include an employer security which is a stock.

Section 3(18) of ERISA defines the term adequate consideration to include, in the case of a security for which there is a generally recognized market and if the security is not traded on a national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934, a price not less favorable to the plan than the offering price for the security as established by the current bid and asked prices quoted by persons independent of the issuer and of any party in interest.

The term eligible individual account plan is defined under section 407(d)(3) as including employee stock ownership plans which explicitly provide for the acquisition and holding of qualifying employer securities.

Based on the representations described in your request, it is the opinion of the Department that the ESOP constitutes an eligible individual account plan inasmuch as the plan is an employee stock ownership plan within the meaning of 4975(e)(7) of the Code and 407(d)(6) of ERISA and is designed, by its terms, to invest primarily in the common stock of NBI.

You have represented that the transactions involve the purchase of NBI common stock by the ESOP. You

state that the ESOP is maintained for the benefit of the employees of NBI, the Bank, and any other NBI affiliate which adopts the ESOP as a participating employer. The Bank, as a wholly owned subsidiary of NBI, constitutes an affiliate of NBI on the basis of the facts you describe. Based on your representations, it is the Department's view that common stock of NBI will constitute qualifying employer securities with respect to the ESOP.

You represent that none of these trusts are parties in interest as defined under section 3(14). As a result, a violation of section 406(a) would not have occurred with respect to the transactions. You have also represented that the transactions involve the purchase of NBI common stock by the ESOP from several personal trusts for which the Bank also serves as the trustee. Such transactions would involve violations of section 406(b)(2).

Further, the Department has stated that to the extent that an investment manager exercises discretion over both sides of a transaction in a cross-trade transaction, there is potential for the investment manager to use its discretion to favor one account over another, for example, in the pricing or timing of the trade or in the decision to buy or sell securities for an ERISA account. Such acts could result in one or more violations of the fiduciary provisions of Title I of ERISA in addition to those described in section 406(b)(2).

Regulations issued by the Department clarify that section 408(e), by its terms, exempts certain transactions from the prohibitions of section 406(a) and 406(b)(1) and (2). Accordingly, it is the view of the Department that the acquisitions of NBI stock by the ESOP under the circumstances described would be exempt from the prohibitions of 406(a), and 406(b)(1) and (2) by virtue of section 408(e) provided that the transactions are for adequate consideration and that no commission is charged with respect to the transactions.

Whether the terms of section 408(e) have been met with respect to a transaction is an inherently factual question which may only be answered by the appropriate plan fiduciaries based on all of the relevant facts and circumstances. The Department generally will not opine as to whether a particular transaction is for adequate consideration. Rather, the Department believes that such determinations should be made by appropriate plan fiduciaries on the basis of all relevant facts and circumstances.

We would note, however, that the fact that a transaction is exempt under section 408(e) is not determinative of whether a fiduciary has met its fiduciary obligations under ERISA. Section 404(a)(1)(A) of ERISA requires plan fiduciaries to discharge their duties with respect to a plan solely in the interest of plan participants and beneficiaries and for the exclusive purpose of providing benefits to participants and beneficiaries and defraying the reasonable expenses of administering the plan. Section 404(a)(1)(B) requires plan fiduciaries to act with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character with like aims. Section 403(c)(1) provides that the assets of a plan shall never inure to the benefit of an employer and shall be held for the exclusive purposes of providing benefits to participants and beneficiaries and defraying reasonable expenses of administering the plan.

The general standards of fiduciary conduct contained in sections 404(a)(1) and 403(c) apply to the described purchases of NBI stock by the ESOP. Accordingly, fiduciaries of the ESOP must act prudently, solely in the interest of the plan's participants and beneficiaries, and for the exclusive purpose of providing benefits and defraying reasonable plan administrative costs when deciding whether to acquire NBI stock for the ESOP. Therefore, if plan fiduciaries failed to act in compliance with these general fiduciary standards in the acquisition of the NBI stock for the ESOP, they would be liable for losses resulting from such breaches of fiduciary responsibility regardless of whether the acquisition may be exempt from certain prohibited transaction restrictions by virtue of section 408(e).

If, under the facts and circumstances of any transaction, the Bank uses the authority which makes it a fiduciary with respect to the transaction to benefit personal trust clients at the expense of the ESOP, or otherwise fails to act solely in the interest of plan participants and beneficiaries in deciding to purchase NBI stock for the ESOP, violations of sections 404(a)(1) and 403(c) could occur.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (Aug. 27, 1976). Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna

Advisory Opinion

June 7, 2002

Melanie Franco Nussdorf, Esq.
Steptoe & Johnson LLP
1330 Connecticut Avenue, NW
Washington, DC 20036-1795
2002-05A
PTE 77-4

Dear Ms. Nussdorf:

This is in response to your request for an advisory opinion concerning Prohibited Transaction Exemption 77-4 (42 FR 18732, April 8, 1977) (PTE 77-4). Specifically, you request an opinion as to whether the prohibition on sales commission payments in PTE 77-4 would apply to commissions paid by a plan to an independent broker who executes the plan's purchase or sale of shares of open-end investment companies registered under the Investment Company Act of 1940 through a securities exchange.

As you know, PTE 77-4 provides an exemption from the restrictions of section 406 of the Employee Retirement Income Security Act (the Act), as amended, and the taxes imposed by section 4975(a) and (b) of the Internal Revenue Code of 1986, as amended (the Code), by reason of section 4975(c)(1) of the Code, for the purchase or sale by an employee benefit plan of shares of an open-end investment company registered under the Investment Company Act of 1940, where the investment adviser for the investment company is also a fiduciary with respect to the plan (or an affiliate of such fiduciary) and is not an employer of employees covered by the plan, provided certain conditions are met.

Section II(a) of PTE 77-4 provides that the plan must not pay a sales commission in connection with such purchase or sale.

You represent that your inquiry concerns an investment vehicle known as an Exchange Traded Fund or ETF which is similar to a mutual fund. You have explained that an ETF is legally classified as a registered open-end investment company. Like other open-end investment companies, an ETF issues shares representing an undivided interest in a managed portfolio of securities. Additionally, ETF shares are offered continuously and may be purchased and redeemed directly through the ETF on a daily basis, at the net asset value (NAV) per share, with or without a fixed transaction fee.

You represent that direct purchases and redemptions occur, however, only in large blocks (generally called creation units) and generally are effected through an in-kind tender of a specified basket of securities, and not cash. You note that this tends to reduce portfolio turnover and attendant transactional expenses by minimizing the liquidations and acquisitions of portfolio securities required with respect to purchases and redemptions in ETF shares.

You state that individual ETF shares trade on the exchanges at market prices, which may differ from NAV. Trades of ETF shares in the secondary market incur brokerage commissions, like common stocks.

You have requested an advisory opinion confirming that the sales commissions precluded under section II(a) of PTE 77-4 do not include commissions paid to brokers provided that: (1) the sale of shares of open-end investment companies registered under the Investment Company Act of 1940 are executed through a securities exchange; and (2) the brokers are unrelated to the investment company's principal underwriter or investment adviser (or their affiliates). You note that where the broker is not affiliated with the investment

adviser for the fund and the fund's principal underwriter, neither the adviser, the principal underwriter, nor any of their affiliates, derives any additional benefit from initiating a transaction which causes the broker to receive a commission.

ETFs did not exist in 1977 at the time PTE 77-4 was granted by the Department of Labor (the Department). At that time open-end investment company shares were purchased from the fund itself (or through a broker affiliated with the fund). The prohibition in PTE 77-4 on the payment of sales commissions by a plan was intended to avoid potential abuses that could arise if a mutual fund, its investment adviser or an affiliate thereof were to receive a commission or load in connection with the transaction. The Department explained in the preamble to the proposed class exemption relating to PTE 77-4 that the requirement that the plan not pay commissions would apply ...whether the transaction is between the plan and the mutual fund directly or is executed by the mutual fund's principal underwriter or transfer agent as an intermediary. (See 41 FR 50516, November 16, 1976). Each of these types of transactions would involve payment of a commission to someone associated with the mutual fund.

The Department's views regarding fees paid to parties with respect to transactions described in PTE 77-4 were also discussed in Advisory Opinion 93-13A, in which a company, serving as investment manager or trustee to employee benefit plans, proposed to invest the plans' assets in affiliated mutual funds. The Department stated that conditions (d), (e) and (f) of PTE 77-4, relating to required disclosures and approval by an independent fiduciary, would not apply to fees paid to parties unrelated to the mutual funds' adviser, or any affiliate, under the arrangement described in the advisory opinion.

As noted above, ETFs are a more recent development in the securities market and their trading procedures differ from those of traditional open-end investment companies. In this regard, creation units are traded directly with the fund in like-kind exchanges while individual shares are traded between investors on securities exchanges and result in brokerage commissions being paid to brokers who may or may not be related to the fund, investment adviser or any affiliates thereof.

Based on the above facts and representations, the Department is of the view that the term sales commission as used in section II(a) of PTE 77-4 does not include brokerage commissions paid to a broker in connection with purchases or sales of shares of registered open-end investment companies on an exchange if the broker is unaffiliated with the fund, its principal underwriter, investment adviser or any affiliate thereof.(1)

The Department cautions, however, that where a plan fiduciary, who is an investment adviser to a fund, causes the plan to pay commissions to a broker-dealer who is an affiliate of such adviser or of the fund, such commission payments would be separate prohibited transactions under section 406(b) of the Act for which no relief is available under PTE 77-4. Section 406(b) prohibits a plan fiduciary from dealing with the assets of the plan in his own interest or for his own account, acting in his individual or in any other capacity in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants and beneficiaries, or receiving any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. This opinion relates only to the specific issue addressed herein.

Sincerely,
Ivan L. Strasfeld
Director, Office of Exemption Determinations

Footnotes

The Department notes PTE 77-4 would not apply to the in-kind purchase or sale of ETF creation units by employee benefit plans.

Michael A. Crabtree, Esq.
Central Pension Fund of the International Union of
Operating Engineers and Participating Employers
4115 Chesapeake Street, NW
Washington, DC 20016-4665
2002-08A
ERISA Sec. 404(a) & 408(b)(2)

Dear Mr. Crabtree:

This is in response to your request for an advisory opinion on behalf of the Central Pension Fund of the International Union of Operating Engineers and Participating Employers (the “Fund”) concerning the application of the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Specifically, you have requested the views of the Department as to whether inclusion of certain indemnification and hold-harmless provisions in a plan’s service provider contract would violate the fiduciary provisions of ERISA.

You represent that an actuarial firm, in connection with discussions relating to the renewal of its contract to provide actuarial services to the Fund, advised that it was requiring all new engagement letters to contain, among other things, “limitation of liability” and “indemnification” provisions. These provisions, in effect, would require the Fund to agree not to recover from the actuarial firm an amount in excess of the greater of $250,000 or one year’s fee for any damage caused to the Fund “regardless of the cause of action,” and to indemnify and hold the actuarial firm harmless for any amount exceeding the same limits “from any third party claim or liability” arising from, or in connection with, the firm’s services to the Fund. The Fund’s insurer has informed the Fund that its fiduciary liability policy would not cover the Fund’s losses if the Fund suffered losses in excess of $250,000 as a result of the actuarial firm’s actions that were not recovered because of the proposed limitation of liability and indemnification provisions. The insurer explained that the policy is not designed to cover professional liability exposures normally associated with Actuarial Errors and Omissions coverage.

Although the Fund has decided not to retain the actuarial firm, opting instead for a firm that required no specific limitation of liability or indemnification provision, limitation of liability and indemnification provisions may be becoming increasingly popular with actuarial firms according to press and other reports. Given the current and future issues presented to fiduciaries with respect to the engagement of service providers with contractual limitations of liability or indemnification provisions, you have requested guidance from the Department concerning the permissibility of such provisions under ERISA.

Section 404(a)(1) of ERISA requires, among other things, that a fiduciary discharge his or her duties with respect to a plan solely in the interest of the participants and beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character with like aims. The prohibited transaction provisions state, in section 406(a)(1)(C) and (D) of ERISA, that a fiduciary with respect to an employee benefit plan shall not cause the plan to engage in a transaction if he or she knows or should know that such transaction constitutes a direct or indirect furnishing of services between the plan and a party in interest with respect to the plan, or transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 408(b)(2) of ERISA provides a statutory exemption from the prohibitions of section 406(a) for contracting or making reasonable arrangements with a party in interest, including a fiduciary, for office space, or legal, accounting, or other services necessary for the establishment or operation of the plan, if

no more than reasonable compensation is paid for such services.

With regard to the selection of service providers under ERISA, the Department has previously indicated that the responsible plan fiduciary must engage in an objective process designed to elicit information necessary to assess the qualifications of the provider, the quality of services offered, and the reasonableness of the fees charged in light of the services provided. In addition, such process should be designed to avoid self-dealing, conflicts of interest or other improper influence. What constitutes an appropriate method of selecting a service provider, however, will depend upon the particular facts and circumstances. Soliciting bids among service providers is a means by which a fiduciary can obtain the necessary information relevant to the decision-making process, including information about contractual provisions such as those identified in your letter relating to limitations of liability and indemnification.

The Department does not believe that, in and of themselves, most limitation of liability and indemnification provisions in a service provider contract are either per se imprudent under ERISA section 404(a)(1)(B) or per se unreasonable under ERISA section 408(b)(2). The Department believes, however, that provisions that purport to apply to fraud or willful misconduct by the service provider are void as against public policy and that it would not be prudent or reasonable to agree to such provisions. Other limitations of liability and indemnification provisions, applying to negligence and unintentional malpractice, may be consistent with sections 404(a)(1) and 408(b)(2) of ERISA when considered in connection with the reasonableness of the arrangement as a whole and the potential risks to participants and beneficiaries. At a minimum, compliance with these standards would require that a fiduciary assess the plan's ability to obtain comparable services at comparable costs either from service providers without having to agree to such provisions, or from service providers who have provisions that provide greater protection to the plan.

In the Department's view, compliance with ERISA's fiduciary provisions, including section 408(b)(2), also would require that a fiduciary assess the potential risk of loss and costs to the plan that might result from a service provider's act or omission subject to a proposed limitation of liability or indemnification provision. In making such an assessment, a fiduciary should consider the potential for, and outside limits of, such a loss, as well as any additional actions that may be available to the plan to minimize such a loss.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis Campagna

Advisory Opinion

December 18, 2002

Leonard A. Davis, Chief Counsel – Benefits
Sharon W. Vaino, Assistant Tax Counsel
Tax Department
Metropolitan Life Insurance Company
One MetLife Plaza
Long Island City, NY 11101-4015
2002-14A
29 CFR 2509.95-1

Dear Mr. Davis and Ms. Vaino:

This is in response to your request for guidance concerning the selection of annuity providers, pursuant to Interpretive Bulletin 95-1 (29 C.F.R. § 2509.95-1), in connection with distributions from defined contribution plans. Specifically, you have requested the Department to address the application of specific requirements of Interpretive Bulletin 95-1 to defined contribution plans.

Interpretive Bulletin 95-1 (the IB) provides guidance concerning the fiduciary standards under Part 4 of Title I of the Employee Retirement Income Security Act (ERISA) applicable to the selection of annuity providers for purposes of pension plan benefit distributions. In general, the IB makes clear that the selection of an annuity provider in connection with benefit distributions is a fiduciary act governed by the fiduciary standards of section 404(a)(1), including the duty to act prudently and solely in the interest of the plan's participants and beneficiaries. In this regard, the IB provides that plan fiduciaries must take steps calculated to obtain the safest annuity available, unless under the circumstances it would be in the interest of the participants and beneficiaries to do otherwise. The IB also provides that fiduciaries must conduct an objective, thorough and analytical search for purposes of identifying providers from which to purchase annuities and sets forth six factors that should be considered by fiduciaries in evaluating a provider's claims paying ability and creditworthiness. (§ 2509.95-1(c)). Further, the IB recognizes that there may be situations where it may be in the interest of participants and beneficiaries to purchase other than the safest available annuity, such as when an annuity is only marginally safer, but disproportionately more expensive than a competing annuity. However, the IB notes that increased costs or other considerations could never justify putting the benefits of participants and beneficiaries at risk by purchasing an unsafe annuity. (§ 2509.95-1(d)).

The following information is provided in response to the specific issues raised by your request.

The general fiduciary principles set forth in the IB with regard to the selection of annuity providers are equally applicable to defined benefit and defined contribution plans. Accordingly, the selection of annuity provider by the fiduciary of a defined contribution plan would be governed by section 404(a)(1) and, therefore, such fiduciary, in evaluating claims paying ability and creditworthiness of an annuity provider, should take into account the six factors set forth in § 2509.95-1(c).

With regard to factor six (§ 2509.95-1(c)(6)) relating to state guarantees, you requested a clarification as to the scope of a fiduciary's consideration. Factor six indicates that fiduciaries should consider "the availability of additional protection through state guaranty associations and the extent of their guarantees." For purposes of factor six, fiduciaries should determine whether the provider and annuity product are covered by state guarantees and the extent of those guarantees, in terms of amounts (e.g., percentage limits on guarantees) and individuals covered (e.g., residents, as opposed to non-residents, of a state). Such information should be available to the public and easily accessible through state guaranty associations and state insurance

departments. Of course, if there were facts known to the fiduciary calling into question the ability of a state association offering guarantees to meet its obligations under the guarantee, it would be incumbent on the fiduciary to weigh that information when selecting an annuity provider.

In evaluating the six factors, the IB indicates that, “[u]nless they possess the necessary expertise to evaluate such factors, fiduciaries would need to obtain the advice of a qualified, independent expert.” With regard to this provision, you express concern that fiduciaries should be able to make evaluations of annuity providers without becoming or hiring an expert in annuity matters. The standard set forth in the IB follows from the prudence standard of section 404(a)(1)(B). That section provides that a fiduciary shall discharge its duties “with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims.” (Emphasis supplied). Accordingly, in those instances where the fiduciary responsible for the selection of an annuity provider has, at the time of the selection, a sufficient level of expertise or knowledge to meaningfully evaluate the claims paying ability and creditworthiness of an annuity provider, including the factors set forth in the IB, the fiduciary would not be required to engage a qualified, independent expert to evaluate such factors. For purposes of the IB, “independent” means independent of the annuity provider.

With regard to paragraph (d) of § 2509.95-1, relating to costs and other considerations, you request confirmation that, in evaluating competing products, cost is an appropriate consideration for the fiduciary of a defined contribution plan when the participant receives an increased benefit as a result of reduced costs. It is the view of the Department that it is appropriate for the fiduciary of a defined contribution plan in selecting an annuity provider to take into account the costs and benefits to the participant or beneficiary of competing annuity products. Consistent with the IB, however, a lower cost cannot justify the purchase of an unsafe annuity even when the annuity would pay a higher benefit amount to the participant or beneficiary.

Lastly, you raise a question concerning the applicability of paragraph (e) of § 2509.95-1 to defined contribution plans. Paragraph (e) requires that special care be taken in reversion situations where fiduciaries selecting annuity providers have an interest in the sponsoring employer that may affect their judgment. In such situations, the IB advises that the fiduciary will need to obtain and follow independent expert advice calculated to identify those insurers with the highest claims-paying ability willing to write the business. In the absence of any possibility of funds reverting to a plan sponsor in connection with the termination of a defined contribution plan, it is the view of the Department that paragraph (e) would not apply to such plan.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis Campagna

Trust Examination Manual

Advisory Opinion 2003-02A

February 10, 2003

Lisa J. Bleier
Senior Counsel
Regulatory and Trust Affairs
American Bankers Association
1120 Connecticut Avenue, NW
Washington, DC 20036
2003-02A
ERISA Sec. 408(b)(2) and 408(b)(6)

Dear Ms. Bleier:

This is in response to your request, on behalf of the American Bankers Association, regarding the fiduciary responsibility provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Specifically, you have requested an opinion clarifying the application of sections 408(b)(2) and 408(b)(6) of ERISA to the provision of overdraft protection services, including any inherent extension of credit incident to such services, by banks, whether or not the bank or other financial institution or affiliate exercises investment discretion over plan assets.(1)

You represent that banks provide custodial or trust services to institutional clients, including employee benefit plans. A bank or its affiliate may also serve as investment manager for plans and other clients or as trustee and investment manager of collective funds in which plans invest. An essential part of bank custodial and trust services provided to clients, including employee benefit plans, is the orderly processing of the client's securities and other financial market transactions, generally based on the anticipated receipt of funds to cover such transactions. In this regard, you indicate that banks have established settlement policies and procedures to maximize the efficiency of the securities trading in institutional accounts.

You note that plan investment performance would suffer significantly if a bank held up settlements to ensure that every sale scheduled to settle (thus generating funds necessary to effectuate subsequent transactions) had in fact settled or that anticipated funds had indeed been received. You represent that, although most transactions settle on time, settlement problems may arise due to errors, unexpected delays by a counterparty or its agent, settlement failures by a counterparty or its custodian, broker failures or inefficient markets. In the event of such a failure, banks will generally settle plan transactions without contemporaneous assurance that the necessary funds have been credited, in the correct currency, to the plan's account. You represent that this overdraft protection is provided as part of a bank's and its sub-custodians' "standard operating systems and practices maintained routinely for all institutional customers." Overdraft protection is necessary to the custody service and is expected and demanded by plan and non-plan clients.

You explain that unlike a conventional loan between a plan and a bank, overdraft protection involves no agreement to lend a stated sum for a specified period of time. Events giving rise to an overdraft are generally inadvertent or outside the control of the bank or affiliate. A bank or an affiliate makes no specific discretionary decision to extend overdraft protection at the time of the settlement of a transaction and neither the plan nor its investment fiduciary makes a specific discretionary decision at that time to accept it. In fact, although the client is aware that overdraft protection is available, when needed, neither the client nor the bank is likely to be aware of the existence of any particular overdraft or its amount at the time that overdraft protection is actually provided. Banks recognize the extent to which overdrafts occur only in

retrospect upon reconciliation of client accounts. Further, you represent that banks have procedures in place to discourage overdrafts and prevent clients, including plans, from using the overdraft protection as an intentional line of credit.

Your letter contains the following general information about overdraft protection procedures. Overdraft protection procedures are designed to ensure that overdraft protection is consistent with sound banking practice under published positions of both the Office of the Comptroller of the Currency and the Federal Reserve Board.(2) According to your letter, bank procedures, as well as agreements with plan clients, ensure that the terms of overdraft protection are at least as favorable to plans as the terms generally available in arm's length transactions between unrelated parties. After an overdraft is determined, a bank promptly notifies the appropriate investment manager or other plan fiduciary to determine the course of action that the fiduciary will take to correct the overdraft. Notice may be provided by telephone, facsimile, e-mail, through a bank's secure Web site or by some alternative method directed by the plan. Banks generally impose an overdraft charge and intend that such charge function as a disincentive for the investment fiduciary to intentionally prolong an overdraft. The overdraft charge is based on an objective measure that varies depending upon factors such as the custody location or currency involved. The overdraft charge may be defined by reference to an identified published rate. The overdraft charge, according to your letter, does not exceed "reasonable compensation."

You represent that banks disclose and obtain the consent of plan clients to the provision of overdraft protection. Bank disclosures describe the overdraft protection service and identify the objective basis for the overdraft charge. Consent may be affirmative if the plan client signs a trust, custody, or other agreement describing the services. Alternatively, consent may be deemed given following disclosure of the services.

As a trustee or custodian, a bank is a party in interest with respect to each plan. ERISA section 3(14) defines “party in interest” to include, among others, a fiduciary or person who provides services to a plan. Absent an exemption, a bank’s provision of overdraft protection, as described herein, to plans would violate sections 406(a)(1)(C) and (D) of ERISA, which prohibit the provision of services by a party in interest to a plan and the transfer of assets from a plan to a party in interest. In addition, absent an exemption, any extension of credit between the bank and plan that may occur in connection with the overdraft protection would violate section 406(a)(1)(B) of ERISA. Moreover, if a bank uses any of the authority, control, or responsibility that makes the bank a fiduciary to cause a plan to pay to the bank an overdraft charge, the bank may violate sections 406(b)(1) and (2) of ERISA.

As discussed below, it is the view of the Department that the provision of overdraft protection services, including any inherent extensions of credit incident to such services, described in your letter would not constitute a prohibited transaction under section 406 to the extent that the bank providing such services complies with the requirements for relief under section 408(b)(2) or section 408(b)(6) of ERISA, as appropriate, and such provision of services is not otherwise part of an arrangement to secure credit unrelated to the settlement of securities or other financial market transactions.

Section 408(b)(2) provides a statutory exemption from the prohibitions of section 406(a) for contracting or making reasonable arrangements with a party in interest, including a fiduciary, for office space, or legal, accounting, or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefor. Regulations issued by the Department clarify the terms "necessary service" (29 C.F.R. §2550.408b-2(b)), "reasonable contract or arrangement" (29 C.F.R. §2550.408b-2(c)), and "reasonable compensation” (29 C.F.R. §§2550.408b-2(d) and 2550.408c-2) as used in section 408(b)(2). Thus, overdraft protection services, in the context described in your letter, appear to be necessary to ensure the orderly processing of plan securities and other financial market transactions and, therefore, would appear to be a “necessary service” for purposes of section 408(b)(2) and §2550.408b-2(b). Accordingly, such services would be covered by section 408(b)(2) to the extent such services are furnished under contracts or arrangements that are reasonable and no more than reasonable compensation is paid for such services within the meaning of §2550.408b-2. As explained in §2550.408b-2(a), section 408(b)(2) does not contain an exemption for an act described in ERISA section 406(b) (relating to conflicts of interest on the part of fiduciaries) even if such act occurs in connection with the provision of services that are exempt under section 408(b)(2).

Section 408(b)(6) of ERISA provides a statutory exemption from the prohibitions of section 406 for any ancillary services provided to a plan by a bank or similar financial institution supervised by the United States or a State, if such bank or financial institution is a fiduciary of such plan and certain conditions are satisfied. Section 2550.408b-6 further clarifies the application of section 408(b)(6). Such ancillary services

include services that do not meet the requirements of ERISA section 408(b)(2) because the provision of such services involves an act described in section 406(b)(1) or (b)(2) of ERISA.

The Department has indicated that a service is “ancillary” if it aids or is auxiliary to a primary or principal service. The Department has concluded that the provision of “sweep services” by a trustee who is subject to direction from an independent investment manager for the investment of plan assets may constitute an “ancillary service” within the meaning of section 408(b)(6).(3) The Department also has indicated that the question of what constitutes an “ancillary service” within the meaning of section 408(b)(6) depends on the expectations of the parties as evidenced by the terms of the underlying service agreement and applicable Federal banking law.(4)

With regard to the expectations of the parties, you represent that plan fiduciaries are fully informed about, and approve, the terms governing the provision of overdraft protection services in settling securities and other financial market transactions for the plan, including associated charges.(5) Additionally, you represent that disclosure documents make clear that charges attendant to overdrafts are in addition to and separate from fees charged for other services, such as trustee or investment management services, provided by the bank or an affiliate. Given the foregoing and the fact that overdraft protection services appear to be necessary to ensure the orderly processing of plan securities transactions and other financial market transactions, as well as a banking practice recognized and permitted by Federal banking authorities, it is the view of the Department that the overdraft protection services described in your letter would constitute an “ancillary service” and, therefore, may be exempt from the prohibitions of section 406 if the conditions of section 408(b)(6) are satisfied. Whether any given bank satisfies the conditions of section 408(b)(6) is an inherently factual determination on which the Department generally will not rule.

Section 2550.408b-6(b) requires that ancillary services described in section 408(b)(6) must be provided at not more than reasonable compensation; under adequate internal safeguards which assure that the provision of such service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority; and only to the extent such service is subject to specific guidelines issued by the bank or similar financial institution which meet the requirements of §2550.408b-6(c). To date, no regulations have been issued to set specific requirements for such guidelines. However, the Department has stated that the condition contained in section 408(b)(6)(B) requiring "specific guidelines" is satisfied (in the absence of such regulations) if the ancillary services are provided in accordance with the specific guidelines issued by the bank or similar financial institution, and adherence to the guidelines would reasonably preclude such bank or institution from providing the services in an excessive or unreasonable manner and in a manner that would be inconsistent with the best interests of the participants and beneficiaries (See 47 FR 14806, April 6, 1982).

In order to reasonably preclude providing services in an excessive or unreasonable manner or in a manner that would be inconsistent with the best interests of the participants and beneficiaries, it is the view of the Department that guidelines relating to overdraft protection services, at a minimum, would be required to include measures designed to ensure timely notice to the appropriate plan fiduciary of any overdraft and the imposition of charges with respect thereto, to monitor and limit the duration and usage of overdraft services, and to limit the ability of a fiduciary to utilize overdraft protection services as a routine means by which securities and other financial market transactions are settled. For example, a pattern or practice of routine use of overdraft protection for settlement of securities or other financial market transactions would evidence the providing of ancillary services in an excessive and unreasonable manner and in a manner inconsistent with the interests of participants and beneficiaries in violation of section 408(b)(6).

ERISA’s general standards of fiduciary conduct also apply to the overdraft protection services. Section 404 requires, among other things, a fiduciary to discharge his duties respecting a plan solely in the interest of the plan’s participants and beneficiaries and in a prudent fashion and for the exclusive purpose of providing benefits and defraying reasonable expenses of administering the plan. Further, except as provided in section 408, fiduciaries also have an obligation under section 406 not to engage in self-dealing or to cause the plan to engage in certain transactions, including a direct or indirect furnishing of goods, services or facilities between the plan and a party in interest. In this regard, banks or institutions which act as investment managers to plans and provide through their affiliates or otherwise overdraft services would need to assure adherence with the conditions and guidelines specified in section 408(b)(6) of ERISA in the performance of those services.

As with the selection of any service provider, a plan fiduciary must engage in an objective process designed to elicit information necessary to assess the qualifications of the provider, the quality of the

services offered, and the reasonableness of the fees charged in light of the services provided, including overdraft protection services. As with any compensation arrangement, plan fiduciaries should consider the circumstances under which services will be rendered and the charges for such services, the basis for such charges and the ability of the fiduciary to limit such charges.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is subject to the provisions of the procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

Under Reorganization Plan No. 4 of 1978, 43 FR 47713 (Oct. 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Internal Revenue Code (Code) has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. Therefore, the references in this letter to specific sections of ERISA also refer to the corresponding sections of the Code.

2. You represent that the Office of the Comptroller of the Currency recognizes that overdrafts in fiduciary accounts are permissible if they are temporary in nature, made only for proper purposes and appropriately accounted for in the records of the bank. The Federal Reserve Board takes a similar position, permitting overdrafts that are temporary, corrected as soon as possible, kept to a minimum and adequately secured. Both agencies permit the imposition of a fee with respect to the overdraft if the policy is permitted under local law. See e.g., Fed. Res. Interp. Ltr. No. 5-942.22, (March 16, 1993), available at 1993 WL 764576 (F.R.B.).
3. See Advisory Opinion No. 2001-10A, December 14, 2001.
4. See DOL information letter to Robert Plotkin, August 1, 1986.
5. What constitutes an approval by an appropriate plan fiduciary will depend on the facts and circumstances of each case. See Advisory Opinions Nos. 97-16A, May 22, 1997 and 2001-01A, January 18, 2001.

Advisory Opinion 2003-09A

June 25, 2003
2003-09A
ERISA Sec. 406(b)(1), 406(b)(3)

Gary W. Howell
Gardner, Carton & Douglas
191 North Wacker Drive, Suite 3700
Chicago, IL 60606

Dear Mr. Howell:

This is in response to your request for guidance under the Employee Retirement Income Security Act of 1974 (ERISA). In particular, you ask whether a trust company's receipt of 12b-1 and subtransfer fees from mutual funds, the investment advisers of which are affiliates of the trust company, for services in connection with investment by employee benefit plans in the mutual funds, would violate section 406(b)(1) and 406(b)(3) of ERISA when the decision to invest in such funds is made by an employee benefit plan fiduciary or participant who is independent of the trust company and its affiliates.

You write on behalf of ABN AMRO Trust Services Company (AATSC), a state-chartered trust company. You represent that AATSC is a wholly owned subsidiary of Alleghany Asset Management Company (Alleghany), which is a wholly owned subsidiary of ABN-AMRO North America Holding Company, a bank holding company (ABN-AMRO).(1)

Alleghany is also the parent organization of several institutional investment advisers (Advisers), including some that have entered into investment advisory contracts with mutual funds registered under the Investment Company Act of 1940. You refer to those mutual funds with which such Advisers have investment advisory contracts as 'Proprietary Funds.' All other mutual funds are referred to as 'Non-Proprietary Funds.'

You represent that AATSC provides directed trustee and 'non-fiduciary' services to participant-directed and other defined contribution pension plans (Client Plans) through 'bundled service' arrangements. You represent that these services (Plan Services) provided by AATSC through bundled service arrangements include, but are not limited to, custodial trustee services, participant level recordkeeping, participant communications and educational materials and programs, voice response system access to accounts for participants, plan documentation, including prototype plans, summary plan descriptions and annual reports, tax compliance assistance, administrative assistance in processing plan distributions and loans, and a facility for plan investment options.

In connection with the Client Plan-related business, AATSC has entered into shareholder service arrangements with distributors of, or investment advisers to, mutual fund families pursuant to which AATSC will make mutual fund families available for investment by Client Plans. Among the investment advisers with which AATSC enters into such arrangements are those Advisers with investment advisory contracts with Proprietary Funds.

You represent that neither AATSC, nor any other bundled service provider of which AATSC is aware, engages in arrangements where just Plan Services are provided. You represent that, because the true cost of Plan Services would exceed any amount that could be charged in the competitive bundled service market with regard to a Client Plan's engagement of AATSC as a bundled service provider, all bundled service arrangements between AATSC and a Client Plan are predicated on a Client Plan's offering of one

or more Proprietary Funds as an investment option.

You represent that disclosures with regard to Proprietary Funds will enable the fiduciaries of potential Client Plans to make an informed decision regarding whether to engage AATSC in a bundled service arrangement. Included in every proposal made by AATSC to a potential Client Plan are the following disclosures regarding each Proprietary Fund offered:

the total number of actively-managed mutual funds in the same category as the Proprietary Fund (based on fund classifications by Lipper, Morningstar, or some other generally recognized mutual fund analytical service);

the investment advisory fee, 12b-1 fee (if any) and other fees paid by the Proprietary Fund, as well as the aggregate fees paid by such Proprietary Fund; and

1. the same fee information described in (b) with respect to the highest-fee, lowest-fee, median-fee, and average-fee fund in the same category as the Proprietary Fund.

   You represent that participant-directed and other defined contribution pension plans become Client Plans through a process of presentation and negotiation. Typically, a plan sponsor, on behalf of a potential Client Plan, either directly, or through a third-party consultant, will ask AATSC to respond to a 'request for proposal' to provide a bundle of services for the plan, such as recordkeeping, directed trusteeship, participant investment education, participant loan and distribution processing and investment vehicles. You represent that a potential Client Plan will typically ask other bundled service providers also to respond to a request for proposal.

   Client Plan fiduciaries select the funds in which the Client Plans will invest. AATSC does not restrict the mutual funds that a Client Plan may utilize, beyond requiring, as a condition of engagement, that a Client Plan select at least one Proprietary Fund to offer as an investment option. AATSC will, if requested, provide a list of investment funds for the Client Plan to consider. The Client Plan fiduciaries are free to select funds other than those listed by AATSC. Your representations indicate that AATSC, under the terms of a bundled service arrangement, will not be able to assert any influence with respect to selection of other investment options in which Client Plans will invest or the particular Proprietary Fund in which the Client Plan elects to invest.

   Potential Client Plan fiduciaries are free to accept, reject or further negotiate a bundled service arrangement from AATSC. Based upon such flexibility on the part of a potential Client Plan with respect to negotiation of the terms surrounding engagement of AATSC to provide Plan Services, you represent that engagement of AATSC results from arm's length negotiations between a potential Client Plan and AATSC.

   You represent that a Client Plan's choice of investment vehicles affects the cost of engaging AATSC to provide Plan Services. AATSC estimates the amounts that a potential Client Plan would likely invest in Proprietary Funds based on the amount of the Client Plan's assets and the number of Proprietary Funds selected. This estimate affects the price at which AATSC offers to perform Plan Services. For example, if Client Plan fiduciaries may direct investment into three Proprietary Funds, Plan Services would cost less than if Client Plan fiduciaries may direct investment into two Proprietary Funds. Similarly, Client Plan fiduciaries that may direct investment into only one Proprietary Fund would be quoted a higher price for bundled services, because AATSC would expect to cover less of the cost of providing Plan Services from asset management revenue.

   As a directed trustee, AATSC takes direction from Client Plans regarding their selection of investment options. You assert that, because AATSC does not restrict the mutual funds that a potential Client Plan may utilize, the preparation and furnishing of a list offering an array of mutual fund choices does not constitute discretion to add or delete mutual fund families in which Client Plans may invest.

   You represent that if a Client Plan decides to remove a Proprietary Fund as an investment option, AATSC's total anticipated revenue from the Client Plan and Proprietary Fund would be affected, leaving less asset management revenue with which to provide Plan Services. In such a situation, you represent that AATSC would invite the Client Plan fiduciaries to consider one or more other Proprietary Funds to replace non-Proprietary Fund investment options. If the plan fiduciaries do not choose to offer another Proprietary Fund as an investment option, AATSC would continue to

provide Plan Services pursuant to the bundled services arrangement, but would evaluate such arrangement, as follows.

If AATSC determines that a bundled service arrangement is no longer profitable, AATSC can withdraw or make an offer to the Client Plan fiduciaries to renegotiate the fees for AATSC's provision of Plan Services. You represent that AATSC's bundled service arrangements generally include a provision whereby AATSC may propose a fee adjustment upon sixty days' written notice. In addition, either party can terminate a bundled service arrangement without cause, upon at least thirty days' advance written notice. Upon termination of a bundled service arrangement, funds are transferred on the effective date of appointment of a successor trustee.

You represent that AATSC has the systems and administrative capability to provide investment facilities to a Client Plan for any mutual fund that accepts investments from pension plans. You represent that the majority of mutual funds are traded by AATSC on the National Securities Clearing Corporation (NSCC) 'platform' for processing transactions in mutual funds. Mutual fund transactions processed through NSCC's 'Fund/SERV' service are made on its standard, highly automated platform that links approximately 2,000 key providers in the mutual fund industry, including AATSC. For those few funds utilized by Client Plans that do not participate in NSCC, generally because of their small size or low volume of trades, you represent that AATSC processes trades manually, in a manner consistent with industry practice.

You ask whether AATSC's receipt of 12b-1 and subtransfer agency fees from mutual funds, including those Proprietary Funds the investment advisers of which are affiliates of AATSC, for services in connection with investment by employee benefit plans in the mutual funds, would violate section 406(b)(1) and 406(b)(3) of ERISA when the decision to invest in such funds is made by an employee benefit plan fiduciary who is independent of AATSC and its affiliates.(2)

Section 3(14)(A) and (B) of ERISA provides that a party in interest means, as to an employee benefit plan, any fiduciary, including a trustee, of an employee benefit plan or a person providing services to a plan. ERISA section 3(21)(A) provides that a person is a fiduciary with respect to a plan to the extent that it (i) exercises any authority or control respecting management or disposition of its assets, (ii) renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan, or has any authority or responsibility to do so, or (iii) has any discretionary authority or responsibility in the administration of the plan. Accordingly, as directed trustee of Client Plans, AATSC will be a party in interest and a fiduciary.

Section 406(a)(1)(C) of ERISA proscribes the provision of services to a plan by a party in interest, including a fiduciary, and section 406(a)(1)(D) prohibits the use by or for the benefit of, a party in interest, of the assets of a plan. However, section 408(b)(2) of ERISA provides an exemption from the prohibitions of section 406(a) of ERISA for contracting or making reasonable arrangements with a party in interest, including a fiduciary, for office space, or legal, accounting, or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid.

29 CFR 2550.408b-2 provides, with respect to a reasonable contract or arrangement, that no contract or arrangement is reasonable within the meaning of section 408(b)(2) and 29 CFR 2550.408b-2(a)(2) if it does not permit termination by the plan without penalty to the plan on reasonably short notice under the circumstances to prevent the plan from becoming locked into an arrangement that has become disadvantageous. Your representations indicate that, pursuant to the Client Plan's arrangement with AATSC and consistent with 29 CFR 2550.408b-2(c), the Client Plan may terminate a bundled service arrangement without cause and without penalty, upon at least thirty days' advance written notice.(3)

Section 406(b)(1) of ERISA prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in its own interest or for its own account. Section 406(b)(3) of ERISA prohibits a fiduciary with respect to a plan from receiving any consideration for its own personal account from any party dealing with the plan in connection with a transaction involving the assets of the plan.

With respect to the prohibitions in section 406(b), regulation 29 CFR 2550.408b-2(a) indicates that section 408(b)(2) of ERISA does not contain an exemption for an act described in section 406(b) of ERISA (relating to conflicts of interest on the part of fiduciaries) even if such act occurs in connection with a provision of services which is exempt under section 408(b)(2). As explained in

regulation 29 CFR 2550.408b-2(e)(1), if a fiduciary uses the authority, control, or responsibility which makes it a fiduciary to cause the plan to enter into a transaction involving the provision of services when such fiduciary has an interest in the transaction which may affect the exercise of its best judgment as a fiduciary, a transaction described in section 406(b)(1) would occur, and that transaction would be deemed to be a separate transaction from the transaction involving the provision of services and would not be exempted by section 408(b)(2). Conversely, the regulation explains that a fiduciary does not engage in an act described in section 406(b)(1) if the fiduciary does not use any of the authority, control, or responsibility which makes such person a fiduciary to cause a plan to pay additional fees for a service furnished by such fiduciary or to pay a fee for a service furnished by a person in which such fiduciary has an interest which may affect the exercise of such fiduciary's best judgment as a fiduciary.

You assert that principles previously expressed by the Department in Advisory Opinion 97-15A(4) would apply here. In Advisory Opinion 97-15A, the Department opined that if a trustee acts pursuant to a proper direction in accordance with sections 403(a)(1) or 404(c) of ERISA and does not exercise any authority or control to cause a plan to invest in a mutual fund that pays a fee to the trustee in connection with the plan's investment, then the trustee would not be dealing with assets of the plan for its own interest or for its own account in violation of section 406(b)(1) of ERISA and the trustee would not be receiving consideration for itself from a third party in connection with a transaction involving plan assets in violation of section 406(b)(3).

The arrangement about which you request the Department's guidance differs from the facts of Advisory Opinion 97-15A. In that letter, the trustee had reserved the right to add or remove mutual fund families that it made available to its client plans. The trustee also agreed to apply any fees it received from the mutual funds to the benefit of the plans. You represent that, once a Client Plan enters into a bundled service arrangement with AATSC, the Client Plan fiduciary possesses authority to make decisions regarding investment fund choices and any modifications to the menu of investment fund choices available for investment of plan assets.

In Advisory Opinion 97-16A,(5) the Department expressed the view that a person would not be exercising discretionary authority or control over the management of a plan or its assets solely as a result of deleting or substituting a fund from a program of investment options and services offered to plans, provided that the appropriate plan fiduciary in fact makes the decision to accept or reject the change. In this regard, the Department went on to opine that the plan fiduciary must be provided advance notice of the change, including disclosure of record-keeper fee information and must be afforded a reasonable amount of time in which to accept or reject the change. Such advance notice ensured that the fiduciary would maintain independence with respect to selection of investment options offered. Similar to the arrangement described in Advisory Opinion 97-16A, here a Client Plan sponsor or other fiduciary shall, independent of AATSC, maintain complete control with respect to the selection of funds in which the Client Plan will invest. AATSC itself has no role with respect to selection of investment options beyond requiring, as a condition of initial engagement of AATSC as a bundled service provider, that at least one Proprietary Fund is offered by a Client Plan for investment.

You represent that when a Client Plan engages AATSC to provide bundled services, a Client Plan fiduciary, independent of AATSC or its affiliates, will select the Client Plan's investment options. We note, however, that if, with respect to a particular Client Plan, AATSC provides 'investment advice' within the meaning of regulation 29 CFR 2510.3-21(c), AATSC would engage in a violation of section 406(b)(1) of ERISA in causing the Client Plan to invest in a Proprietary Fund (or any mutual fund that pays a fee to AATSC or its affiliates).

It is the view of the Department that AATSC's receipt of 12b-1 or subtransfer fees from mutual funds, including those Proprietary Funds the investment advisers of which are affiliates of AATSC, for services in connection with investment by employee benefit plans in the mutual funds, under the circumstances described above, would not violate section 406(b)(1) or 406(b)(3) of ERISA when the decision to invest in such funds is made by a fiduciary who is independent of AATSC and its affiliates, or by participants of such employee benefit plans.

Finally, it should be noted that ERISA's general standards of fiduciary conduct also would apply to the proposed arrangement. Section 403(c)(1) of ERISA provides that the assets of a plan shall never inure to the benefit of any employer and shall be held for the exclusive purposes of providing benefits to participants and beneficiaries and defraying reasonable expenses of administering the

plan. Under section 404(a)(1) of ERISA, the responsible plan fiduciaries must act prudently and solely in the interest of the plan participants and beneficiaries both in deciding whether to enter into, or continue, arrangements with AATSC and in determining the investment options in which to invest or make available to plan participants and beneficiaries in self-directed plans.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (Aug. 27, 1976). Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

In your initial submission, you wrote on behalf of The Chicago Trust Company (TCTC). Since the date of submission, TCTC has been renamed AATSC, effective January 1, 2002. This change is in name only and was effected without any legal change in the individual corporate status of TCTC. AATSC continues as a state-chartered trust company under the original charter and corporate status granted by the state to the former TCTC, and remains in the same legal relationship, by way of ownership, to Alleghany and ABN-AMRO.

2. Consistent with Prohibited Transaction Exemption 96-74, granted to TCTC, TCTC will never receive any 12b-1 or subtransfer agency fees from its Proprietary Funds in connection with the conversion of certain collective investment fund units into shares of Proprietary Funds. Furthermore, you represent that AATSC relies upon Prohibited Transaction Class Exemption 77-4 to cover situations where AATSC may serve as a fiduciary to a Client Plan with authority to select investments, including Proprietary Funds. In Advisory Opinions 93-12A and 93-13A, the Department expressed the view that it was unable to conclude that PTE 77-4 would be available for plan purchases and sales of mutual fund shares if a 12b-1 fee is paid to the fiduciary or its affiliate with regard to that portion of the mutual fund's assets attributable to the plan's investment.
3. The Department expresses no view as to whether the conditions contained in section 408(b)(2) of ERISA would be satisfied with respect to any arrangement between AATSC and a Client Plan.

Issued on May 22, 1997.

Issued on May 22, 1997.

Trust Examination Manual

Advisory Opinion 2003-11A

September 8, 2003
2003-11A
ERISA Sec. 404(c)

Stephen M. Saxon
Groom Law Group, Chartered
1701 Pennsylvania Ave., NW
Washington, DC 20006-5893

Dear Mr. Saxon:

This is in response to your request for guidance under the Employee Retirement Income Security Act of 1974 (ERISA). In particular, you ask whether a participant-directed individual account plan's delivery of a mutual fund Profile, as described below, to participants and beneficiaries immediately before or immediately after their investment in the mutual fund would satisfy regulations issued by the Department of Labor (Department) pursuant to section 404(c) of ERISA.

You represent that the Principal Financial Group (Principal) provides investment products and administrative services to tax-qualified defined contribution plans established pursuant to section 401(a) of the Internal Revenue Code of 1986 (the Code), including plans that permit employee elective deferrals under section 401(k) of the Code (401(k) plans). Many of these 401(k) plans permit participants to direct the investments of the amounts in their individual accounts. These 401(k) plans are typically designed and administered by Principal to comply with regulations issued by the Department pursuant to section 404(c) of ERISA (404(c) regulations).(1)

Section 404(c) of ERISA provides that, in the case of an individual account plan that permits participants or beneficiaries to exercise control over assets in their accounts, no person who is otherwise a fiduciary shall be liable under part 4 of Title I of ERISA for any loss, or by reason of any breach, which results from such participant's or beneficiary's exercise of control. The 404(c) regulations require, among other things, that a participant or beneficiary shall be provided or have the opportunity to obtain sufficient information to make informed decisions with regard to investment alternatives available under the plan.(2) In the case of an investment alternative subject to the registration requirements of the Securities Act of 1933 (Securities Act) such as a mutual fund, the 404(c) regulations provide that a participant or beneficiary shall be provided by the identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf), a copy of the most recent prospectus that was provided to the plan, either immediately before the participant's or beneficiary's initial investment in such investment alternative, or immediately following the participant's or beneficiary's initial investment.(3) The 404(c) regulations also provide that a participant or beneficiary shall be provided, either directly or upon request, the following information, which shall be based on the latest information available to the plan: copies of any prospectuses, financial statements and reports, and of any other materials relating to the investment alternatives available under the plan, to the extent such information is provided to the plan.(4)

Section 2(a)(10) of the Securities Act generally defines the term "prospectus" to include any notice, circular, advertisement, letter, or communication that offers any security for sale or confirms the sale of any security.(5) Section 10(a) of the Securities Act generally provides that a prospectus relating to a security (10(a) prospectus) shall contain much of the same information that is contained in the registration statement of the security.(6) Section 10(a) of the Securities Act specifies the information that a prospectus must contain and the information that a prospectus may omit.(7) Section 10(b) of the Securities Act

provides that the Securities and Exchange Commission (SEC) shall, by rules or regulations deemed necessary or appropriate in the public interest or for the protection of investors, permit the use of a summary document (10(b) prospectus) which omits in part or summarizes information provided in a 10(a) prospectus.

Under section 5(b)(1) of the Securities Act, a 10(b) prospectus may be provided to an investor in connection with an offer to sell a registered security.(8) Under section 5(b)(2) of the Securities Act, however, a 10(a) prospectus must be provided to an investor at or before any sale of a registered security.(9) Thus, under the federal securities laws, while a summary document under section 10(b) of the Securities Act may be delivered for purposes of an offer, a 10(a) prospectus would, in any event, also be required to be delivered in order to sell a registered security.

On March 13, 1998, the SEC adopted Rule 498 under the Securities Act (Securities Act Rule 498). Under Securities Act Rule 498, a summary prospectus, or a Profile, designed to comply with section 10(b) of the Securities Act, may be delivered to investors in connection with an offer to purchase or sell mutual fund shares.(10) Paragraph (b) of Securities Act Rule 498 provides that a Profile is intended to be a standardized summary of key information contained in a 10(a) prospectus. Securities Act Rule 498 requires a Profile to provide clear and concise information in a format designed to communicate information effectively, while avoiding excessive detail, technical or legal terms, and long sentences and paragraphs.(11) A Profile is specifically required to include, among other things: identifying information; an explanation that the Profile summarizes key information included in the prospectus; information regarding how investors can obtain the prospectus; investment objectives, strategies, and risks; fees and expenses; identities of investment advisers and managers; information regarding purchase and sale of shares; investment requirements; distributions and tax information; and other services available.

In adopting Securities Act Rule 498, the SEC stated its belief that investors in participant-directed defined contribution plans may find a Profile helpful in evaluating and comparing funds offered as investment alternatives in a plan.(12) Paragraph (d)(1) of Securities Act Rule 498 provides that, in a Profile intended for use with respect to a 401(k) plan, a mutual fund may modify or omit certain information which may not be relevant to participants and beneficiaries of a plan, such as information about requirements for purchasing and selling shares, fund distributions, tax consequences with regard to distributions, and other fund services that are not applicable to plan participants and beneficiaries. The SEC did not, however, authorize the use of the Profile for purposes of a sale under section 5(b)(2) of the Securities Act.

You represent that, because Principal's 401(k) plan clients typically design and administer their plans to comply with the 404(c) regulations, administrative services provided by Principal include assistance in meeting the disclosure and other requirements of the 404(c) regulations. With regard to mutual funds, Principal proposes to deliver Profiles of mutual funds, including its proprietary funds, to participants of 401(k) plans designed to comply with the 404(c) regulations. You represent that Principal believes that delivery of a mutual fund Profile to a participant of a 401(k) plan designed to comply with the 404(c) regulations will satisfy the requirement under the 404(c) regulations that a prospectus be delivered to each participant either immediately before or immediately after the participant's initial investment in the mutual fund.(13) You assert that automatic delivery of a Profile would permit plans to avoid the additional expense of automatically providing a lengthy 10(a) prospectus. In addition, you represent that, with regard to delivery of a 10(a) prospectus, Principal will send a 10(a) prospectus to any requesting participant or beneficiary within three days of receipt of such request.(14)

You assert that, consistent with the Department's reasoning in the preamble to the 404(c) regulations with regard to delivery of a prospectus, the delivery of a Profile, as a concise summary of a mutual fund's investment objectives, risk and return characteristics, and type and diversification of assets, will provide participants and beneficiaries with the information necessary for them to make informed investment decisions with respect to investment in mutual funds. You assert that the required delivery of a prospectus under section 404(c) is intended to ensure that participants and beneficiaries are provided with sufficient information in order to be able to make informed decisions with respect to investment alternatives under the plan. In this regard, you represent that a Profile conveys all the information about a mutual fund that the 404(c) regulations require to be delivered automatically to participants in connection with each designated investment option (i.e., the description of investment objectives, risk and return characteristics, type and diversification of assets, and identification of investment manager, required by 29 CFR section 2550.404c-1(b)(2)(i)(B)(1)(ii) and (iii)).

You specifically ask whether delivery of a Profile would satisfy a participant-directed individual account plan's obligation under the 404(c) regulations to deliver a copy of the most recent prospectus to plan

participants and beneficiaries immediately before or immediately after such individuals initially invest in mutual funds.

The Department has not defined the term “prospectus” in the 404(c) regulations, or elsewhere. In the preamble to the 404(c) regulations, the Department states that the prospectus delivery requirement is intended to ensure that, immediately before or immediately after a participant’s or beneficiary’s initial investment in an investment alternative, such as a mutual fund, that is required to deliver a prospectus to investors under the federal securities laws, participants and beneficiaries must be afforded the opportunity to review the prospectus in connection with an initial investment in such investment alternative.(15)

The Department takes no position with respect to the application of the federal securities laws to your question. However, it is the view of the Department that, under the 404(c) regulations, the term “prospectus” includes a Profile. The Department believes that the delivery of a Profile by an identified plan fiduciary or designee to plan participants or beneficiaries satisfies the requirements of the 404(c) regulations because it provides a clear summary of key information about a mutual fund that is useful to such participants and/or beneficiaries.

A Profile, designed to comply with section 10(b) of the Securities Act, provides participants with information of the sort that the Department intended a participant in a section 404(c) plan to receive both automatically and upon request with respect to a relevant investment. Moreover, if a participant wishes to obtain additional information, the cover page of the Profile shows how to obtain a 10(a) prospectus from the offeror.

Where the most recent prospectus in the plan’s possession is a Profile, then delivering the Profile to plan participants and beneficiaries, immediately before or immediately after such individuals’ initial investment in a mutual fund, would satisfy a participant-directed individual account plan’s prospectus delivery obligation under 29 CFR section 2550.404c-1(b)(2)(i)(B)(1)(viii). Where the most recent prospectus is a 10(a) prospectus, 29 CFR section 2550.404c-1(b)(2)(i)(B)(1)(viii) would require the delivery of a 10(a) prospectus.

Separately, under 29 CFR section 2550.404c-1(b)(2)(i)(B)(2), the identified plan fiduciary or designee must provide, either directly or upon request, copies of prospectuses (among other things) based on the latest information available to the plan. Where a participant requests a prospectus, and the most recent prospectus is a Profile, then providing the Profile will comply with this requirement. If, however, the participant specifically requests a 10(a) prospectus, the most recent 10(a) prospectus must be provided.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

2. 29 CFR 2550.404c-1(b)(2)(i)(B).
3. 29 CFR 2550.404c-1(b)(2)(i)(B)(1)(viii).
4. 29 CFR 2550.404c-1(b)(2)(i)(B)(2)(ii).
5. See 15 USC 77b(a)(10).
6. On March 13, 1998, the SEC adopted amendments to Form N-1A, the registration form used by mutual funds. Pursuant to the amendments, a mutual fund prospectus must provide investors with essential information about the mutual fund, including: risk/return summaries; investment strategies; mutual fund performance; management, organization, and capital structure; shareholder information; and distribution arrangements. A mutual fund prospectus should avoid: lengthy legal and technical discussions; a restatement of legal or regulatory requirements to which mutual funds generally are subject; and disproportionate emphasis on possible investments or activities of the mutual fund that are not a significant part of the mutual fund’s investment operations. In addition, a mutual fund prospectus may modify or omit certain items when mutual funds are investment options for 401(k) plans, including:

procedures for purchasing and redeeming mutual fund shares if such procedures are inapplicable; dividend and distribution policies if such policies are inapplicable; and tax consequences to shareholders with respect to buying, holding, exchanging, and selling mutual fund shares if such consequences are inapplicable. See Registration Form Used by Open-End Management Investment Companies, Securities Act Release No. 7512 (March 13, 1998).

7. See 15 USC 77j(a).
8. See 15 USC 77j(b).
9. See 15 USC 77e(b)
10. See New Disclosure Option for Open-End Management Investment Companies, Securities Act Release No. 7513 (March 13, 1998) (Securities Act Rule 498 Adopting Release). In adopting Securities Act Rule 498 which permits the use of a Profile, the SEC stated that the "profile of a fund will be a summary prospectus under section 10(b) of the Securities Act, but the fund's section 10(a) prospectus will remain the primary disclosure document under the federal securities laws." Securities Act Rule 498 Adopting Release. Accordingly, paragraph (c)(1)(v) of Securities Act Rule 498 requires that a Profile shall provide a toll-free (or collect) telephone number that investors can use to obtain the prospectus and a mutual fund may indicate, as applicable, that the prospectus and other information is available on the mutual fund's internet site or by e-mail request, or that the prospectus is available through a financial intermediary.
11. See 17 CFR 230.498.
12. Securities Act Rule 498 Adopting Release, text accompanying note 124.
13. See 29 CFR 2550.404c-1(b)(2)(i)(B)(1)(viii).
14. We note that the Instruction to Paragraph (c)(1)(v) of Securities Act Rule 498 provides that when a mutual fund (or financial intermediary through which shares of the mutual fund may be purchased or sold) receives a request for a 10(a) prospectus, the mutual fund (or financial intermediary) must send the 10(a) prospectus within three business days.

Jacob I. Friedman
Proskauer Rose LLP
1585 Broadway
New York, NY 10036-8299

Dear Messrs. Schmidt and Friedman:

This is in response to your request for an advisory opinion on behalf of Verizon Investment Management Corp. as to whether certain transactions between employee benefit plans sponsored by Verizon Communications, Inc. (Verizon) and a limited partnership in which those plans invest would constitute prohibited transactions under the Employee Retirement Income Security Act of 1974 (ERISA).

You represent that Verizon sponsors welfare benefit plans that qualify as voluntary employees' beneficiary associations (VEBAs) and defined benefit plans (DB Plans), collectively the Verizon Plans.(1) The Bell Atlantic Master Trust (Master Trust) holds the assets of the Verizon DB Plans. Mellon Bank, N.A. (Mellon) serves as the directed trustee of the Master Trust. Each VEBA is held in trust by Mellon.

Verizon Investment Management Corp. (VIMCO), a wholly-owned subsidiary of Verizon, serves as investment manager of the Verizon Plans. You represent that VIMCO is an in-house asset manager (INHAM) within the meaning of Part IV(a) of Prohibited Transaction Exemption 96-23 with respect to the Verizon Plans.

You represent that Verizon intends to create an investment vehicle for the Verizon Plans, employee benefit plans maintained and sponsored by third parties unrelated to Verizon or Mellon (Third Party Plans), and other institutional investors. To accomplish this, VIMCO, in concert with Mellon, would establish and operate a limited partnership, which is a collective investment vehicle (CIV) organized under the laws of Delaware.(2) The CIV will be managed by a joint venture between VIMCO and Mellon (Joint Venture).

You represent that Delaware law requires that, among other things, the CIV have one or more general partners and one or more limited partners. You represent that, pursuant to Delaware law, the general partner is not required to make contributions to the CIV nor acquire a partnership interest in the CIV. You further represent that the general partner will not make a contribution to, nor acquire a partnership interest in, the CIV unless required to do so pursuant to the law of jurisdictions, other than Delaware, in which the CIV may be doing business.(3) A wholly-owned subsidiary of VIMCO will be the general partner of the CIV. You represent that the Verizon Plans will contribute assets to the CIV and become limited partners of the CIV at the time the CIV is organized. You represent that Mellon will have no responsibility or authority with respect to the Verizon Plans' decisions to invest in the CIV. The Third Party Plans and other third party institutional investors will become limited partners at future dates upon contribution to the CIV.

Mellon or a third party will be the trustee for the Third Party Plans. The Third Party Plans will not have any relationship with VIMCO prior to making a contribution to the CIV. You represent that, assuming that state law requirements are fulfilled, the liability of each limited partner for the CIV's debts or obligations will be limited to the extent of the capital that the limited partner has contributed or has agreed to contribute to the CIV, undistributed profits and, under certain circumstances, the return of certain distributions from the CIV. You represent that the CIV will not be designated as a named fiduciary of, nor perform fiduciary functions for, the Verizon Plans or the Third Party Plans.

With respect to a Third Party Plan's participation in the CIV, an independent fiduciary (i.e., independent of VIMCO and Mellon) will make a determination whether to make initial or subsequent contributions into the CIV based upon detailed information provided by VIMCO concerning the available investment pools and other relevant information. The independent fiduciary must approve each Third Party Plan's program of purchases and redemptions of interests in the CIV.

Mellon will be the custodian of the assets of the CIV. You represent that Mellon, as trustee of the Master Trust, will hold at least fifty percent of the interests of the CIV, on behalf of the Verizon DB Plans, for the foreseeable future.

The CIV will be composed of multiple investment pools with varying investment risks. The Joint Venture will be the investment manager of the CIV, and as such, will direct the allocation of each limited partner's interests in the CIV among the various investment pools. The Joint Venture will enter into a contract with VIMCO under which VIMCO will discharge substantially all of the Joint Venture's investment management responsibilities with respect to the CIV. You further represent that each limited partner will have an undivided interest in the assets of each underlying investment pool in which it invests. The various investment pools will be either (i) invested in common investment funds or mutual funds, or (ii) managed by the Joint Venture or other investment advisers designated by the Joint Venture (Third Party Investment Advisers), which will act as investment managers and which are registered under the Investment Advisers Act of 1940 or which are banks or insurance companies.

You represent that the Joint Venture and the Third Party Investment Advisers will receive reasonable fees from the Third Party Plans and other institutional investors for their services. In addition, while the Third Party Investment Advisers will receive reasonable fees from the Verizon Plans for their services, the Joint Venture, VIMCO and Mellon will not receive any fees or other compensation (directly or indirectly) for investment management services to the Verizon Plans, but will be reimbursed for expenses directly and properly incurred for performing services for the Verizon Plans.

You have asked for an advisory opinion to the effect that, where fifty percent or more of the interests in the CIV are legally held by Mellon, as fiduciary for the benefit of the Verizon Plans, the CIV is not itself a party in interest with respect to the Verizon Plans invested in the CIV, and therefore, contributions to and distributions from the CIV would not constitute prohibited transactions under ERISA. You are specifically concerned that the CIV may be deemed a party in interest with respect to the Verizon Plans under section 3(14)(G) of ERISA because Mellon would hold more than fifty percent of the interests in the CIV on behalf of the Verizon Plans as trustee of those Plans.

Section 406(a)(1)(A) and (D) prohibits, in relevant part, the exchange of any property between a plan and party in interest and the transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 3(14)(G) of ERISA defines a party in interest to include a corporation, partnership or trust or estate of which (or in which) fifty percent or more of (i) the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation, (ii) the capital interest or profits interest of such partnership, or (iii) the beneficial interest of such trust or estate, is owned directly or indirectly, or held by, among others, a fiduciary of a plan. (Emphasis added.)

Mellon, as trustee of the Verizon Plans, is a fiduciary with respect to the Verizon Plans under section 3(21) of ERISA. The Verizon Plans' contributions to the CIV would be directed by VIMCO. The ownership interests in the CIV would be held by Mellon on behalf of the Verizon Plans. Similarly, distributions from the CIV to the Verizon Plans would be made to Mellon and held on behalf of the Verizon Plans.

Consistent with section 3(14) of ERISA, a plan's ownership of fifty percent or more of a partnership entity will not cause that partnership to become a party in interest with respect to that investing plan.(4) In our view, the application of section 3(14)(G) should not change that result merely because a plan's interests in a partnership are held by a fiduciary on behalf of the plan. Although Mellon would hold more than fifty percent of the value of the CIV interests, it would hold such interests on behalf of the Verizon Plans, not on

behalf of itself or a third party. As a result, it is the view of the Department that the CIV will not be a party in interest with respect to the Verizon Plans.(5) Therefore, transactions between the Verizon Plans and the CIV, including initial and subsequent contributions to the CIV by the Verizon Plans and distributions from the CIV to the Verizon Plans, would not be prohibited under section 406(a) of ERISA.

Section 406(b)(1) of ERISA prohibits a fiduciary from dealing with plan assets in his or her own interests or for his or her own account. ERISA section 406(b)(2) specifically prohibits fiduciaries in their individual or in any other capacity from acting in any transaction involving the plan on behalf of a party (or representing a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries. Accordingly, VIMCO and Mellon must ensure that they can act on behalf of the CIV without compromising their positions as fiduciaries of the Verizon Plans. Further, while the Department recognizes that determining whether violations of the prohibited transaction provisions of section 406(b) of ERISA would occur are inherently factual questions, it is the view of the Department that if, in operation, VIMCO's provision of investment management services to the Verizon Plans or Mellon's provision of trustee services to the Verizon Plans results in a divergence of interests between VIMCO and the Verizon Plans or Mellon and the Verizon Plans, violations of sections 406(b) of ERISA could occur.

The Department cautions that ERISA's general standards of fiduciary conduct would apply to the Verizon Plans' investment in the CIV. Section 404(a)(1) of ERISA requires, among other things, that a fiduciary discharge his or her duties with respect to a plan solely in the interest of the participants and beneficiaries, and with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character and with like aims. Accordingly, the appropriate plan fiduciaries must act "prudently" and "solely in the interests" of the plan participants and beneficiaries with respect to the decision to acquire or dispose of the Verizon Plans' interests in the CIV.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna

Footnotes

Under Reorganization Plan No. 4 of 1978, 43 Fed. Reg. 47713 (Oct. 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Internal Revenue Code (the Code) has been transferred to the Secretary of Labor, with certain exceptions not here relevant. The Secretary of the Treasury is bound by interpretations of the Secretary of Labor pursuant to such authority. Therefore, references in this letter to specific sections of ERISA should be read to refer also to the corresponding sections of the Code.

2. You represent that the CIV will be treated as a partnership for tax purposes pursuant to Treasury Regulation 26 CFR 301.7701-3(b).
3. You represent that if the general partner must make a contribution to, or acquire a partnership interest in, the CIV pursuant to state law requirements, the general partner's interest in the CIV will be limited to the extent necessary to comply with such requirements.
4. Under the plan assets regulation, 29 CFR 2510.3-101, the extent of a plan's equity ownership interest in an entity may cause that entity to be deemed to hold plan assets.
5. See Advisory Opinion 80-67A (Nov. 30, 1980).

Advisory Opinion 2004-02A
ERISA Sec. 206(d)(3)

Whether a domestic relations order that changes a prior assignment of benefits to an alternate payee to reduce the amount assigned to the alternate payee may be a qualified domestic relations order within the meaning of section 206(d)(3) of ERISA.

Terry-Lynne Lastovich
Dorsey & Whitney LLP
50 South Sixth Street, Suite 1500
Minneapolis, MN 55402-1498

Dear Ms. Lastovich:

This is in response to your request on behalf of Northwest Airlines, Inc. Retirement Plan for Pilot Employees (the Plan) for an advisory opinion under section 206(d) of Title I of the Employee Retirement Income Security Act of 1974 (ERISA). Specifically, you ask whether a domestic relations order that changes a prior assignment of benefits to an alternate payee to reduce the amount assigned to the alternate payee may be a "qualified domestic relations order" (QDRO) within the meaning of section 206(d)(3) of ERISA.

You represent that this question arises out of a divorce and property settlement involving a now-retired employee of Northwest Airlines, Inc. (the participant) and his former spouse (the alternate payee). The participant has earned a vested pension benefit under the Plan, which is a defined benefit pension plan. Northwest Airlines, Inc. (Northwest) sponsors and is the administrator of the Plan.

In 1997, while the participant was still actively employed, the Plan received a domestic relations order, dated April 3, 1997, that assigned to the alternate payee a percentage of the participant's pension benefits (the 1997 Order). The 1997 Order was issued by the District Court of the First Judicial District, Family Court Division, County of Dakota, State of Minnesota. In accordance with its procedures, the Plan reviewed the order, determined it to be a QDRO, and so informed both the participant and the alternate payee on August 27, 1997.

In November 2000, while the participant was still actively employed, the participant notified the Plan that both he and the alternate payee desired to modify the assignment reflected in the QDRO to reduce the portion of the participant's benefits that would be paid in the future to the alternate payee. The participant sought the Plan's advice on how to make such a change. The Plan advised the alternate payee and the participant that it would not consider an order that purported to reduce the assignment already made under a previously recognized QDRO to be permissible.

Nonetheless, on June 6, 2002, the participant submitted to the Plan a second domestic relations order, dated June 4, 2002 (the 2002 Order). The 2002 Order was also issued by the District Court of the First Judicial District, Family Division, County of Dakota, State of Minnesota. This order stated that the parties to the divorce were "in agreement" that the QDRO provisions of the 1997 Order should be altered and therefore ordered that those 1997 QDRO provisions were "deleted." The 2002 Order set forth new provisions for a different (and smaller) assignment to the alternate payee.

During the course of its review of the 2002 Order, the Plan expressed its doubts as to whether such a reduction in the amount assigned could be effected by a QDRO and requested both participant and alternate payee to provide "a written explanation of why this amended order should or should not be reviewed as a qualified domestic relations order." These parties declined to offer argument on this issue and continued to assert that the 2002 Order expressed their consensus on how the participant's benefits should be divided

between them.

In September 2002, before the Plan had issued a determination on the qualified status of the 2002 Order, the participant retired, and Northwest began paying benefits to both the participant and the alternate payee under the terms of the 1997 Order.

On November 15, 2002, the Plan sent a letter to the participant, setting forth its "decision" that the 2002 Order was not qualified, based upon its view that a subsequent order cannot reduce the benefits awarded to an alternate payee under a previous domestic relations order recognized by the Plan as a QDRO. This letter set forth the following additional determinations: (1) the 2002 Order is "provisionally" determined not to be a QDRO; (2) the 1997 Order continues in full force and effect; (3) the Plan has requested an advisory opinion from the Department of Labor (the Department) on whether an order that "takes away" benefits previously assigned to an alternate payee can be a QDRO; and (4) pending issuance of the advisory opinion, the Plan will continue to pay out benefits in accordance with the 1997 Order. The letter further advised the participant that, if the Department opined that the 2002 Order cannot be a QDRO, the Plan's determination would become "final." The letter further stated that if the Department opined that the 2002 Order could be a QDRO "even though it 'takes away' a benefit previously awarded" to the alternate payee, it would then seek reimbursement of any "overpayments" made to the alternate payee based on the 1997 Order. If the alternate payee did not return the "overpayments" the Plan would withhold future payments to the alternate payee until the "overpayments" were recovered.

This request for an advisory opinion ensued. In the context of these facts, you seek guidance on whether the 2002 Order, which purported to reduce the amount of the participant's benefits that are assigned to the alternate payee, could qualify as a QDRO within the meaning of section 206(d)(3) of ERISA.

Under section 206(d)(3) of ERISA, the plan administrator is the party to whom an initial determination of the qualified status of an order is entrusted. The Department generally does not provide advisory opinions addressing this question because making such a determination necessarily requires an interpretation of the specific provisions of a plan and application of those provisions to specific facts, including the nature and amount of a participant's pension benefits. Nonetheless, the Department believes it is appropriate to provide guidance under section 206(d)(3) on the narrow issue you have presented of whether a subsequent domestic relations order that alters or modifies a qualified domestic relations order involving the same participant and alternate payee may itself be qualified and therefore supercede the previous order. In providing this guidance, however, the Department takes no position on whether any particular order described in this letter is or is not a "qualified domestic relations order" within the meaning of section 206(d)(3) of ERISA.

Section 206(d)(1) of ERISA generally requires pension plans covered by Title I of ERISA to provide that plan benefits may not be assigned or alienated. Section 206(d)(3)(A) of ERISA states that section 206(d)(1) applies to any assignment or alienation of benefits made pursuant to a "domestic relations order," unless the order is determined to be a “qualified domestic relations order.” Section 206(d)(3)(A) further provides that pension plans must provide for the payment of benefits in accordance with the applicable requirements of any order that is determined to be a “qualified domestic relations order.” The grounds on which the plan administrator must judge the status of an order that purports to assign benefits are set forth in the specific subparagraphs of section 206(d)(3).

Subparagraph (B) of section 206(d)(3) of ERISA defines the terms "qualified domestic relations order" and "domestic relations order" for purposes of section 206(d)(3) as follows:

(B) For purposes of [section 206(d)(3)] —

(i) the term "qualified domestic relations order" means a domestic relations order —

(I) which creates or recognizes the existence of an alternate payee’s right to, or assigns to an alternate payee the right to, receive all or a portion of the benefits payable with respect to a participant under a plan, and

(II) with respect to which the requirements of subparagraphs (C) and (D) are met, and

(ii) the term "domestic relations order" means any judgment, decree, or order (including approval of a property settlement agreement) which —

(I) relates to the provision of child support, alimony payments, or marital property rights to a spouse, former spouse, child, or other dependent of a participant, and

(II) is made pursuant to a State domestic relations law (including a community property law).

Subparagraphs (C) and (D) of section 206(d)(3) of ERISA contain both positive and negative requirements for qualification of a domestic relations order. Subparagraph (C) specifies that, in order for a domestic relations order to be qualified, such order must clearly specify (i) the name and the last known mailing address (if any) of the participant and the name and mailing address of each alternate payee covered by the order; (ii) the amount or percentage of the participant's benefits to be paid by the plan to each such alternate payee, or the manner in which such amount or percentage is to be determined; (iii) the number of payments or period to which such order applies; and (iv) each plan to which the order applies.

Subparagraph (D) provides that an order cannot be qualified if it either (i) requires the plan to provide any type of benefit, or any option, not otherwise provided by the plan; (ii) requires the plan to provide increased benefits (determined on the basis of actuarial value); or (iii) requires the plan to pay benefits to an alternate payee that are required to be paid to another alternate payee under another order previously determined to be a qualified domestic relations order.

A plan administrator may determine that an order is not qualified only on the basis of the requirements set forth in section 206(d)(3) of ERISA. In our view, nothing in section 206(d)(3) suggests that a State court (or other appropriate State agency or instrumentality) may not alter or modify a previous domestic relations order involving the same participant and alternate payee, as long as the new domestic relations order itself meets the statutory requirements. Indeed, the purpose of section 206(d)(3) is to permit the division of marital property on divorce in accordance with the directions of the State authority with jurisdiction to achieve the appropriate disposition of property upon the dissolution of a marriage. Where a State authority reasserts jurisdiction over a marital dissolution and issues an order changing a previously established property allocation, it would appear contrary to this purpose to create additional requirements, beyond what is specified in section 206(d)(3) of ERISA, that would thwart the exercise of that authority. Accordingly, provided that a domestic relations order otherwise meets the requirements of section 206(d)(3) of ERISA, a plan administrator may not fail to qualify the domestic relations order merely because the order changes a prior assignment to the same alternate payee.(1) Thus, it is the Department's view that a plan administrator may determine, consistent with the requirements of section 206(d)(3), that a domestic relations order is qualified even if it would supersede or amend a pre-existing QDRO assigning the same participant's benefits to the same alternate payee.

The plan administrator in this case has made apparent its intention to seek repayments from, or to withhold future payments to, the alternate payee of amounts paid out in accordance with the 1997 Order. We do not believe that, under these facts, the plan administrator would have the authority to do so. As a general matter, a plan administrator making QDRO determinations has fiduciary duties applicable to the determination process. The administrator has a duty under section 206(d)(3)(G) of ERISA to determine whether a domestic relations order is a QDRO within a reasonable time after receipt and to promptly notify the participant and each alternate payee of the determination. The administrator has a duty under section 404(a)(1) of ERISA to act prudently and solely in the interests of the plan's participants and beneficiaries, and to follow the plan's QDRO procedures unless they conflict with the provisions of ERISA.

Because, in this case, the plan administrator had previously determined the 1997 Order to be a QDRO, the plan was required to make benefit payments in accordance with the 1997 Order. The plan administrator took no steps to preserve the amounts that would be affected by the 2002 Order during its consideration of that order's qualified status, but continued to make the payments required by the 1997 Order. Subparagraph (I) of section 206(d)(3) of ERISA provides that, if a plan fiduciary, acting in accordance with its fiduciary duties, treats a domestic relations order as being qualified, and pays out benefits in accordance with its determination and the 18-month segregation rules of subparagraph (H), the plan's obligations to the participant and any alternate payee are discharged with respect to such payments.(2) Accordingly, under these circumstances it is appropriate to treat the 2002 Order as prospective only. There does not appear to be grounds on which the plan could seek repayment from the alternate payee of the benefits paid out in accordance with the 1997 Order.(3)

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976). Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations

Office of Regulations and Interpretations

Footnotes

1. Section 206(d)(3)(D)(iii), which provides that a domestic relations order may be qualified only if it does not require the payment of benefits to an alternate payee that are required to be paid to another alternate payee under a pre-existing QDRO, does not apply here, where there is only one alternate payee.
2. Although § 206(d)(3)(H) requires an administrator to segregate amounts that would be payable to an alternate payee under an order for 18 months pending determination of the order's qualified status, that section does not require segregation of amounts that would be transferred from the alternate payee (per a previously recognized QDRO) to the participant. Nonetheless, the administrator may have been able, under these facts, to arrange a voluntary escrow of the amounts in question, since both the participant and the alternate payee apparently sought the change in assignment.
3. Nothing in this letter is intended to alter or have any effect on the federal tax consequences under the Internal Revenue Code (the Code) to the participant and alternative payee of distributions under either the 1997 Order or the 2002 Order.

1.

Trust Examination Manual

Advisory Opinion 2004-05A

May 24, 2004
2004-05A
ERISA Sec. 406(a)(1)(A),(D)
406(b)(1),(2)

Mr. William R. Charyk
Arent Fox Kintner Plotkin & Kahn, PLLC
1050 Connecticut Avenue, NW
Washington, DC 20036-5339

Dear Mr. Charyk:

This is in response to your request for guidance under section 406 of the Employee Retirement Income Security Act of 1974 (ERISA) and section 4975 of the Internal Revenue Code of 1986, as amended (the Code).(1) In particular, you ask whether the execution of a securities transaction between a plan and a party in interest with respect to such plan as defined in ERISA through an alternative trading system (ATS) maintained by Liquidnet, Inc. (Liquidnet) constitutes a prohibited transaction under section 406(a)(1)(A) and (D) of ERISA. In addition, you inquire whether the execution of a securities transaction through the Liquidnet ATS (the Liquidnet System) between a plan and a counterparty that is an affiliate of the fiduciary directing such trade on behalf of the plan also violates section 406(b) of ERISA.

You write on behalf of Liquidnet, a registered broker/dealer that maintains the Liquidnet System. The Liquidnet System is an "alternative trading system," as defined in Rule 300(a) of Regulation ATS under the Securities Exchange Act of 1934, as amended. You also represent that all of Liquidnet's approximately 200 subscribers are large institutional investors that individually manage, on average, approximately $31 billion of equity assets. You note that these subscribers, none of which are affiliated with Liquidnet, often act as named fiduciaries, investment managers, or provide other services to employee benefit plans.

You state that Liquidnet was created to facilitate the trading of "blocks" of equity securities. In this regard, since its inception in 2001, more than three billion shares of equity securities have been traded over the Liquidnet System pursuant to trade sizes that have averaged approximately 44,000 shares. You state that the total value of the shares traded through the Liquidnet System approximated $61 billion as of August 29, 2003.

You state that subscribers to Liquidnet may trade U.S., U.K., French, German, Netherlands, and Swiss equity securities through the Liquidnet System. In this regard, you state that the Liquidnet System: (1) interfaces with the order management systems of Liquidnet's subscribers; and (2) identifies, with respect to a particular security, each Liquidnet subscriber that has an interest in buying the security and each Liquidnet subscriber that contemporaneously has an interest in selling the security. You state that each Liquidnet subscriber indicates to the Liquidnet System its interest in buying or selling various securities. If one subscriber indicates to the Liquidnet System an interest in buying a certain security that a different subscriber has independently indicated to the Liquidnet System an interest in selling, the Liquidnet System notifies both subscribers that a transaction opportunity exists.(2) You note that the Liquidnet System does not disclose the identity of either subscriber to the other. The two subscribers may then negotiate; through their respective computer systems; both the price and the quantity of the security. Accordingly, you state that the Liquidnet System enables subscribers to engage in an anonymous, no obligation, one-on-one, real-time negotiation (a subscriber must terminate its current negotiation with another subscriber before engaging in a new negotiation with a different subscriber).

You state that multiple Liquidnet subscribers may have an interest in buying (or selling) a security that a different Liquidnet subscriber has an interest in selling (or buying). Where, for example, the Liquidnet System identifies that multiple subscribers have an interest in buying a security that a different subscriber has an interest in selling, the Liquidnet System provides the selling subscriber with an electronic listing of the anonymous subscribers interested in buying. You note that once a subscriber is provided with such a listing, the subscriber may thereafter negotiate with any or all of the subscribers on the list. You state that the Liquidnet System currently determines the order of a multiple subscriber listing by comparing the quantities they have posted to the quantity posted by the single contra-side subscriber. The subscriber posting a quantity that is nearest to the quantity posted by the single contra-side subscriber is placed first on the list. The remaining order is determined in the same fashion.(3) You state that the Liquidnet System's trading rules, which are distributed to all subscribers, contains a disclosure that describes how multiple potential negotiating subscribers will be ordered.

You represent that trades entered into pursuant to the Liquidnet System are executed on a “blind” basis. In this regard, you state that, during the entire execution and settlement processes, subscribers interact with each other pursuant to policies and rules designed to ensure anonymity. You represent that the Liquidnet System, never discloses the identity of a subscriber to any other. In addition, all physical transfers of equity securities and cash are made between an independent clearing firm, Bear, Stearns Securities Corp. and the buyer’s and seller’s respective custodians. Therefore, the identities of the parties to a trade will not be revealed to the parties during the clearing process.

You state that: given the number and type of Liquidnet subscribers; the large number of trades executed on Liquidnet on a daily basis; and the fact that such trades are executed and settled pursuant to rules, procedures and software designed to ensure anonymity; it is expected that the parties to a transaction engaged in through the Liquidnet System will not know, at any time, the identity of each other.(4) Accordingly, it is possible for a subscriber, in its capacity as a fiduciary with respect to a plan, to unknowingly buy/sell a security on behalf of the plan through the Liquidnet System from/to a Liquidnet subscriber that is a party in interest to the plan.

Further, you note that although a subscriber cannot execute a securities transaction with itself through the Liquidnet System (i.e., as both the buyer and seller), it is possible for a plan fiduciary to direct a trade through the Liquidnet System whereby the Liquidnet subscriber that is the counterparty to the plan is an affiliate of such fiduciary. You state that two affiliates may request that Liquidnet "block" negotiations between the two entities. However, you note that a Liquidnet subscriber may not be aware that an affiliate thereof is also a Liquidnet subscriber.

Section 3(14)(A) and (B) of ERISA defines the term “party in interest” as meaning, as to an employee benefit plan, any fiduciary (including, among others, a trustee) of an employee benefit plan; and a person providing services to such plan. ERISA section 3(21)(A) provides that a person is a fiduciary with respect to a plan to the extent that (i) he exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets, (ii) he renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan, or has any authority or responsibility to do so, or (iii) he has any discretionary authority or responsibility in the administration of such plan.

Section 406(a)(1)(A) of ERISA prohibits a fiduciary with respect to a plan from causing the plan to engage in a transaction if he or she knows or should know that the transaction constitutes a direct or indirect sale or exchange, or leasing, of any property between the plan and a party in interest. Section 406(a)(1)(D) of ERISA provides that a fiduciary with respect to a plan shall not cause the plan to engage in a transaction, if he or she knows or should know that such transaction constitutes a direct or indirect transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan. Section 406(b)(1) of ERISA provides that a fiduciary with respect to a plan shall not deal with the assets of the plan in his or her own interest or for his or her own account. Section 406(b)(2) provides that a fiduciary with respect to a plan shall not in his or her individual or in any other capacity act in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries.

With respect to purchases and sales of equity securities, we note that the Conference Report accompanying ERISA states that:

In general, it is expected that a transaction will not be a prohibited transaction (under either the labor or tax provisions) if the transaction is an ordinary “blind” purchase or sale of securities through an exchange

where neither buyer nor seller (nor the agent of either) knows the identity of the other party involved. In this case, there is no reason to impose a sanction on a fiduciary (or party-in-interest) merely because, by chance, the other party turns out to be a party-in-interest (or plan). H.R. Rep. 93-1280, 93rd Cong., 2d Sess., 307 (1974).

As you noted, Liquidnet matches purchase and sell orders from its clients and gives purchasers and sellers the opportunity to negotiate a trade based on price and volume. The number of subscribers and the trading procedures assure a party's anonymity, unless the party wishes to identify itself to the counter-party. In our view, transactions executed through Liquidnet's trading procedures for the execution of transactions, that are designed to permit anonymous negotiations without identifying the parties, function in a manner similar to the operation of an exchange. Accordingly, based on your representations, it is our further view that "blind" transactions executed pursuant to such procedures would not, in themselves, constitute prohibited transactions under section 406(a)(1)(A), 406(a)(1)(D), 406(b)(1) or 406(b)(2) of ERISA.

The Department notes, however, that a transaction effectuated through the Liquidnet System will not be considered "blind" if, prior to the execution of such transaction, the plan fiduciary responsible for the plan's engagement in the transaction knew, or had reason to know, the identity of the counterparty to such transaction. Given the ability of parties to a transaction to disclose their identities to each other, persons trading on behalf of employee benefit plans should be particularly careful to make sure the transaction is truly blind. Moreover, these determinations assume that such purchase and sale transactions did not arise in connection with any arrangement, agreement, or understanding designed to benefit the fiduciary (including an affiliate thereof) or any other party in interest to the plan.

In addition, with respect to the arrangement and transactions described above, ERISA's general standards of fiduciary conduct apply to: (i) the determination to buy or sell a particular equity security (and, in addition, the determination as to the appropriate purchase or sale price for such security); and (ii) the determination as to which trading system should be used to assist with the purchase or sale of equity securities.(5) In this regard, as noted above, section 404 of ERISA requires a fiduciary to discharge his duties respecting a plan solely in the interest of the plan's participants and beneficiaries. This section also requires that a plan fiduciary act prudently and for the exclusive purpose of: providing benefits to plan participants and their beneficiaries; and defraying reasonable expenses of administering the plan. Accordingly, plan fiduciaries that subscribe to Liquidnet must consider the costs associated with the use of alternative trading systems as well as the potential revenue returns, discounts, and other benefits that result from the continuing use of particular alternative trading systems over other similar services.

Further, prior to a plan fiduciary's decision to execute a securities transaction through Liquidnet, the plan fiduciary (as a subscriber or an affiliate of a subscriber) should determine whether any existing or potential conflicts of interest or prohibited transactions under ERISA would interfere with the proper exercise of any of the fiduciary's responsibilities under section 404 of ERISA, including the duty to act solely on behalf of the plan.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions. The opinion only relates to the specific issues raised by your request. For example, you have not asked and the Department is expressing no opinion with respect to the fees and other compensation received by persons engaging in transactions on the Liquidnet System on behalf of plans.

Sincerely,
Louis Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

Under Reorganization Plan No. 4 of 1978, 43 FR 47713 (5 U.S.C. App. 1 [1996]), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. The Secretary of the Treasury is bound by interpretations of the Secretary of Labor pursuant to such authority. Therefore, references in this letter to

specific sections of ERISA should be read to refer also to the corresponding sections of the Code.

2. Accordingly, you state that Liquidnet does not "solicit" subscriber interest with respect to the buying or selling of securities (i.e., once a subscriber notifies Liquidnet that it has an interest in buying or selling a security, the Liquidnet System does not thereafter broadcast that interest to all of the other Liquidnet subscribers).
3. You state that in the future, the percentage of successful negotiations attributable to each respective subscriber may also affect the ordering of a multiple subscriber list.
4. You note, however, that subscribers using the system to negotiate a securities transaction may "chat" with each other. In this regard, you state that although the Liquidnet System does not disclose the identities of negotiating subscribers to each other, two such subscribers may electronically correspond to each other, without restriction as to content, through the Liquidnet System as part of the negotiation. You note that this type of correspondence is reviewed and retained by Liquidnet.
5. Whether, in light of all the facts and circumstances, a purchase or sale of securities or the use of a particular service provider satisfies the fiduciary responsibility provisions of ERISA is an inherently factual question as to which the Department generally will not opine. See section 5.01 of ERISA Procedure 76-1, 41 Fed. Reg. 36281 (Aug. 27, 1976).

Trust Examination Manual

Advisory Opinion 2004-07A

July 1, 2004
2004-07A
ERISA Sec. 412

William A. Mrozowski
President and Chief Executive Officer
First Commonwealth Trust Company
614 Philadelphia Street
Indiana, PA 15701-0400

Dear Mr. Mrozowski:

This is in response to your request for an advisory opinion regarding the application of section 412 of Title I of the Employee Retirement Income Security Act of 1974 (ERISA). Specifically, you ask whether the First Commonwealth Trust Company (FCTC) is exempt from ERISA's fidelity bonding requirement pursuant to the statutory exemption in section 412(a)(2) of ERISA with respect to plans for which FCTC acts in a fiduciary capacity. You also ask whether FCTC would be covered by the regulatory exemption in 29 C.F.R. §§ 2580.412-27 and 412-28 applicable to certain banking institutions and trust companies subject to federal regulation.

The correspondence and materials you forwarded contain the following facts and representations. FCTC is a corporation that has operated as a trust company in the State of Pennsylvania since 1991, and it is authorized to exercise trust powers under a non-deposit trust bank charter from Pennsylvania. Although FCTC is not itself a member of the Federal Reserve System, it is a wholly owned subsidiary of First Commonwealth Financial Corporation ("First Commonwealth"), a bank holding company. Further, an affiliate of FCTC, another wholly owned subsidiary of First Commonwealth, is a state-chartered member bank of the Federal Reserve System. First Commonwealth is subject to supervision and examination by the Federal Reserve System pursuant to the Bank Holding Company Act. You represent that FCTC is subject to examination and supervision by Pennsylvania banking regulators under state law and by the Federal Reserve System pursuant to section 5 of the Bank Holding Company Act, 12 U.S.C. § 1844, which provides the Federal Reserve System with the authority to supervise and examine subsidiaries of bank holding companies.(1) You represent that the Federal Reserve Bank of Cleveland in fact periodically examines FCTC. You further represent that FCTC has over $1 million in capital and surplus, and has fidelity bonding coverage that would satisfy the bonding coverage required for First Commonwealth under federal banking law.

Section 412 of ERISA, subject to certain exceptions, requires that every fiduciary of an employee benefit plan and every person who handles funds or other property of such a plan shall be covered by a fidelity bond that meets the requirements of section 412 of ERISA and the Department of Labor's implementing regulations. Section 412(a)(2) provides, in relevant part, that no bond shall be required of a fiduciary (or of any director, officer, or employee of such fiduciary) if such fiduciary – (A) is a corporation organized and doing business under the laws of the United States or of any State; (B) is authorized under such laws to exercise trust powers or to conduct an insurance business; (C) is subject to supervision or examination by Federal or State authority; and (D) has at all times a combined capital and surplus in excess of such a minimum amount as may be established by regulations issued by the Secretary, which amount shall be at least $1,000,000.(2)

Section 412(a)(2) of ERISA further provides that the exemption for such fiduciaries shall apply to a bank or

other financial institution which is authorized to exercise trust powers and the deposits of which are not insured by the Federal Deposit Insurance Corporation (FDIC), "only if such bank or institution meets bonding or similar requirements under State law which the Secretary [of Labor] determines are at least equivalent to those imposed on banks by Federal law." The Secretary has not made any determinations as to whether any state bonding or similar requirements are at least equivalent to those imposed on banks by federal law. The statutory exemption in section 412(a)(2) thus is not available to any bank or other financial institution authorized to exercise trust powers that has deposits that are not insured by the FDIC. It is the view of the Department, however, that banks and other financial institutions that have no deposits, such as FCTC, are not subject to this additional condition. Accordingly, based on your representations that FCTC satisfies all of the other conditions in section 412(a)(2), FCTC would satisfy the conditions for the exemption in section 412(a)(2) of ERISA with respect to the ERISA-covered plans for which FCTC acts in a fiduciary capacity.

The Department has also promulgated regulations under section 412 of ERISA. The regulation at 29 C.F.R. § 2550.412-1 provides, in relevant part, that any plan official, as defined in section 412(a), shall be deemed to be in compliance with the bonding requirements of ERISA if he or she is exempt from such bonding requirements under an exemption in Part 2580 of Title 29 of the Code of Federal Regulations.(3) The regulations at 29 C.F.R. §§ 2580.412-27 and 412-28 provide "banking institutions and trust companies subject to regulation and examination by the Comptroller of the Currency or the Board of Governors of the Federal Reserve System, or the Federal Deposit Insurance Corporation" with an "exemption from the bonding requirements" in sections 412(a) and (b) of ERISA.(4)

In the view of the Department, the authority of the Federal Reserve System over FCTC as a subsidiary of a bank holding company pursuant to the Bank Holding Company Act constitutes regulation and examination by the Board of Governors of the Federal Reserve System within the meaning of 29 C.F.R. §§ 2580.412-27 and 412-28.(5) Accordingly, based on the facts and representations you supplied, it is the opinion of the Department that FCTC would also be exempt under 29 C.F.R. §§ 2580.412-27 and 412-28 from being bonded under Title I in connection with its handling of plan funds or other property of ERISA-covered welfare and pension plans.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976), and, accordingly, is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
John J. Canary
Chief, Division of Coverage, Reporting and Disclosure
Office of Regulations and Interpretations

Footnotes

12 U.S.C. § 1844(c) provides in relevant part: "(1) Reports (A) In general – The Board, from time to time, may require a bank holding company and any subsidiary of such company to submit reports under oath to keep the Board informed as to – (i) its financial condition, systems for monitoring and controlling financial and operating risks, and transactions with depository institution subsidiaries of the bank holding company; and (ii) compliance by the company or subsidiary with applicable provisions of this chapter or any other Federal law that the Board has specific jurisdiction to enforce against such company or subsidiary. . . . (2) Examinations (A) Examination authority for bank holding companies and subsidiaries – Subject to subparagraph (B), the Board may make examinations of each bank holding company and each subsidiary of such holding company in order – (i) to inform the Board of the nature of the operations and financial condition of the holding company and such subsidiaries; (ii) to inform the Board of – (I) the financial and operational risks within the holding company system that may pose a threat to the safety and soundness of any depository institution subsidiary of such holding company; and (II) the systems for monitoring and controlling such risks; and (iii) to monitor compliance with the provisions of this chapter or any other Federal law that the Board has specific jurisdiction to enforce against such company or subsidiary and those governing transactions and relationships between any depository institution subsidiary and its affiliates."

2. In the absence of regulations setting higher capital and surplus requirements under section 412(a)(2) of ERISA, the requisite amount to be eligible for the exemption is the $1,000,000 minimum provided in the statute.

3. 29 C.F.R. §2550.412-1, pending issuance of permanent bonding regulations implementing section 412 of ERISA, incorporates by reference most of the bonding regulations issued under the predecessor statute, the Welfare and Pension Plans Disclosure Act (the WPPDA) and makes them applicable to plan officials under ERISA.
4. Sections 2580.412-27 and 412-28 provide an exemption from the "bonding requirements" in section 412(a) and (b) of ERISA, but not from the section 412(b) prohibition on any plan official, or any other person having the authority to direct the receipt, handling, disbursement, or other exercise of custody or control of any of the funds or other property of any employee benefit plan, from directing that such functions be performed by any plan official with respect to whom the requirements of subsection 412(a) have not been met.
5. You represent that FCTC is neither a registered investment advisor nor a broker-dealer that would be a "functionally regulated subsidiary" of a bank holding company within the meaning of the Bank Holding Company Act. We express no opinion in this letter regarding the applicability of the bonding exemption in 29 C.F.R. §§ 2580.412-27 and 412-28 to entities that are "functionally regulated subsidiaries" within the meaning of the Bank Holding Company Act.

Trust Examination Manual

Advisory Opinion 2004-09A

December 22, 2004
2004-09A
Code Sec. 4975(c)

Thomas G. Schendt, Esq.
Alston & Bird LLP
601 Pennsylvania Avenue, N.W.
North Building, 10th Floor
Washington, DC 20004-2601

Dear Mr. Schendt:

This is in response to your request for an advisory opinion from the U.S. Department of Labor (the Department) concerning the application of the prohibited transaction provisions under section 4975(c) of the Internal Revenue Code of 1986, as amended (the Code), to certain contributions to health savings accounts (HSAs), as described below.(1)

You represent that your client, an insurer (the Company) and its affiliates, offers various health benefit plans in the individual market, including high deductible health plans (HDHPs), as that term is defined in section 223(c)(2) of the Code. In addition, the Company either offers HSAs, as defined in section 223(d) of the Code, to individuals covered by HDHPs issued by the Company, or enters into a contractual arrangement with a specified bank that will offer HSAs to such individuals, as described below.

Your letter contains the following facts and representations.

Factual Scenario I

Under Factual Scenario I, only persons insured under HDHPs issued by the Company in the individual market are able to establish HSAs with the Company. However, a person does not have to establish an HSA with the Company to participate in an individual HDHP with the Company. If a person establishes an HSA with the Company, the Company will serve as both the trustee or custodian and the record-keeper of the HSA. The Company does not provide HSA custodial services in the employer group market.

To encourage participation in the Company's HSA program, the Company will offer an incentive to a person who establishes an HSA with the Company when he or she first enters into an individual HDHP with the Company. This incentive will be in the form of a $100 cash credit by the Company, as trustee or custodian, directly to the individual's HSA. This credit to the HSA will be automatic. The account holder will not be required to make any contribution to his or her HSA to receive the credit to his or her HSA. The credit is dependent on the establishment of an HSA with the Company. The account holder will not be able to divert the money to himself or herself before it is credited to the HSA.

If the person does not establish an HSA with the Company, he or she will not receive any incentive from the Company under this incentive program. Thus, for example, the individual will not receive any incentive from the Company in the form of a credit to an HSA not provided by the Company or in the form of money paid to him or her outside of the HSA. The credit to the account holder's HSA with the Company will be subject to the statutory requirements for HSAs set forth in section 223 of the Code, and the tax treatment of any distributions from the HSA attributable to this credit will be governed by the provisions of section 223(f) of the Code.

With respect to each HSA established with the Company pursuant to this incentive program, the Company represents that any arrangement for services by the Company to the HSA (e.g., as trustee or custodian and/or record-keeper of the HSA) will meet the requirements of section 4975(d)(2) of the Code and the Treasury's regulations at 26 CFR §54.4975-6.

The Company represents that the premiums payable under the HDHP will not vary based on the individual's choice of HSA custodian or trustee. Thus, the individual's insurance premiums will not be higher or lower as a result of his or her decision to establish an HSA either with the Company or with some other custodian or trustee. The Company also represents that any administrative fees the Company may charge the account holder with respect to his or her HSA will not change (i.e., will not increase or decrease) as a result of the credit to his or her HSA.

The Company states that although the duration of this incentive program has not been determined, it envisions that the incentive program could be used at various times for specified periods of time. The Company also anticipates that the amount of the incentive could change from time to time. However, for purposes of this request, the Company represents that the amount of the incentive will not exceed $100 per person.

Factual Scenario II

Under Factual Scenario II, the Company and its affiliates offer various health benefit plans in the group market, including HDHPs as defined under the Code.

The Company enters into a contractual relationship with a specified bank (the Bank) to provide HSAs for individuals covered by HDHPs issued by the Company. However, an individual does not have to establish an HSA with the Bank to participate in a group HDHP issued by the Company. The Bank serves as the trustee or custodian and the record-keeper of those HSAs and receives remuneration from the Company for its services in that regard. The Company also enters into a contractual relationship with a specified entity (the Vendor) to provide various services in relation to these HSAs, for which the Company compensates the Vendor. Neither the Bank nor the Vendor is a member of the Company's controlled group under sections 414(b), (c) and (m) of the Code.

To encourage the establishment of HSAs with the Bank in connection with group HDHPs issued by the Company, the Bank will offer an incentive to a person who establishes an HSA with the Bank when the Company first covers such person under a group HDHP. This incentive will be in the form of a $100 cash credit from the Bank directly to the individual's HSA. This credit to the HSA will be automatic. The account holder will not be required to make any contribution to his or her HSA to receive the credit to his or her HSA. The credit will be dependent on the establishment of an HSA with the Bank. The account holder will not be able to divert the money to himself or herself before it is credited to the HSA.

If the person does not establish an HSA with the Bank, he or she will not receive any incentive from the Bank under this incentive program. For example, the individual will not receive any incentive from the Company or the Bank in the form of a credit to an HSA not provided by the Bank or in the form of money paid to him or her outside of his or her HSA. The credit to the account holder's HSA with the Bank will be subject to the statutory requirements for HSAs set forth in section 223 of the Code, and the tax treatment of any distributions from the HSA attributable to this credit will be governed by the provisions of section 223(f) of the Code.

With respect to the HSAs established with the Bank pursuant to this incentive program, the Company, the Bank and the Vendor intend that any arrangements for services by the Bank or the Vendor to the HSA (e.g., as the trustee or custodian and/or record-keeper of the HSA) will meet the requirements of section 4975(d)(2) of the Code and the Treasury's regulations at 26 CFR §54.4975-6.(2)

The Company represents that the premiums charged for the individual's coverage under the group HDHP will not vary based on the individual's choice of HSA custodian or trustee. Thus, the premiums charged by the Company for the individual's coverage under the group HDHP will not be higher or lower as a result of his or her decision to establish an HSA either with the Bank or with some other custodian or trustee. In addition, any administrative fees the Bank or the Vendor may charge the account holder with respect to his or her HSA will not change (i.e., will not increase or decrease) as a result of this credit to his or her HSA.

The Company states that although the duration of this incentive program has not been determined, it

envisions that the incentive program could be used at various times for specified periods of time. The Company also anticipates that the amount of the incentive could change from time to time. However, for purposes of this request, the Company represents that the amount of the incentive will not exceed $100 per person.

Advisory Opinions Requested

With respect to Factual Scenario I, you have requested an advisory opinion that the credit to an account holder's HSA will not constitute a prohibited transaction under section 4975(c) of the Code for either the account holder or the Company.

In addition, with respect to Factual Scenario II, you have requested an advisory opinion that the credit to an account holder's HSA will not constitute a prohibited transaction under section 4975(c) of the Code or section 406 of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Prohibited Transactions under the Internal Revenue Code

Section 4975(e)(1)(E) of the Code defines the term "plan" to include "…a health savings account described in section 223(d)" of the Code.

A "prohibited transaction" under section 4975(c)(1) of the Code includes, among other things, any direct or indirect:

(A) sale or exchange, or leasing, of any property between a plan and a disqualified person;

(C) furnishing of goods, services, or facilities between a plan and a disqualified person;

(D) transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan;

(E) act by a disqualified person who is a fiduciary whereby he deals with the income or assets of a plan in his own interest or for his own account; or

(F) receipt of any consideration for his own personal account by any disqualified person who is a fiduciary from any party dealing with the plan in connection with a transaction involving the income or assets of the plan.

A "disqualified person" is defined under section 4975(e)(2) of the Code, in pertinent part, to include a person who is a fiduciary or a person providing services to the plan.

Analysis of Factual Scenarios I and II

Under Factual Scenario I, the Company will be a trustee or custodian of the HSA. As such, the Company would be a disqualified person with respect to the HSA.

Under Factual Scenario II, the Bank will be a trustee or custodian of the HSA. As such, the Bank is a disqualified person with respect to the HSA. However, as we understand the facts, the Company would not be a disqualified person with respect to the HSA. In both scenarios, the account holder is a fiduciary and disqualified person with respect to the HSA.

Under both Factual Scenarios, the $100 credit proposed by either the Company or the Bank, respectively, would be a cash contribution to the account holder's HSA. The Department notes that in accordance with IRS Notice 2004-50, Q&A 28, wherein it states that "any person . . . may make contributions to an HSA on behalf of an eligible individual," Code section 223 does not prohibit the Company or the Bank from making such contributions to its customers' HSAs. A cash contribution to a plan is not generally a sale or exchange of property prohibited by section 4975(c)(1)(A) of the Code. Additionally, the cash contribution would not be a transfer of an asset of a plan for the benefit of a disqualified person or an act of self-dealing by either the Company or the Bank under section 4975(c)(1)(D) or (E) of the Code involving the assets of a plan. Therefore, neither the Company's nor the Bank's contribution of a cash credit to the account holder's HSA, as described herein, would be a prohibited transaction under section 4975(c)(1) of the Code.(3)

Similarly, the HSA's receipt of the Company's or the Bank's contribution of a cash credit, under the facts

described above, would not be an act of self-dealing on the part of the account holder nor a receipt by the account holder in his or her individual capacity of any consideration from a party dealing with the HSA in connection with a transaction involving assets of the HSA. Even though the Company or the Bank, respectively, would make the contribution as an incentive to encourage the account holder's participation in the Company's or the Bank's HSA program, the contribution goes to the HSA and not to the account holder.(4) Therefore, the receipt by the HSA of such cash contributions would not be a prohibited transaction under section 4975(c)(1) of the Code.(5)

Since the Company is not a disqualified person with respect the HSA under Factual Scenario II, the Bank's contribution of the credit to the account holder's HSA would not be a prohibited transaction under section 4975(c) of the Code with respect to the Company.

Finally, with respect to the contribution of any cash credits by the Bank to an account holder's HSA under the facts described above, the same analysis and conclusions would apply, for purposes of the prohibited transaction provisions contained in section 406(a) and (b) of ERISA, to an HSA that would be an "employee benefit plan" covered under Title I of ERISA(6) under the principles discussed in the Department's Field Assistance Bulletin (FAB) 2004-01 (April 7, 2004). Further, in such instances, the fiduciary responsibility provisions of Title I would apply to the selection of service providers to the HSA.

In discussing whether, and under what circumstances, HSAs established in connection with employment-based group health plans would be subject to the provisions of Title I of ERISA, FAB 2004-01 states that generally such HSAs would not constitute an "employee welfare benefit plan" as defined under section 3(1) of ERISA, if employer involvement with the HSA is limited. Specifically, HSAs meeting the conditions of the safe harbor for group or group-type insurance programs at 29 CFR §2510.3-1(j)(1)-(4) are not considered employee welfare benefit plans within the meaning of section 3(1) of ERISA. However, a finding that an HSA established by an employee is not covered by ERISA does not affect whether an HDHP sponsored by the employer is itself a group health plan subject to Title I. In fact, FAB 2004-01 states that unless otherwise exempt from Title I (e.g., governmental plans, church plans), employer-sponsored HDHPs will be "employee welfare benefit plans" within the meaning of section 3(1) of ERISA and, thus, subject to the fiduciary responsibility provisions of Title I.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (Aug. 27, 1976). The letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

Under Reorganization Plan No. 4 of 1978, 43 Fed. Reg. 47713 (Oct. 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. See 5 USC App. at 214 (2000 ed.).

2. The Company is not requesting, and the Department is not providing, an opinion as to whether any arrangement for services by the Company, the Bank or the Vendor to an HSA will satisfy the requirements necessary for relief under section 4975(d)(2) of the Code and the regulations relating thereto. In this regard, the Department ordinarily does not issue advisory opinions on questions that are inherently factual in nature.
3. With respect to contributions or transfers of property to a plan that are considered to be an "exchange," see Adv. Op. 81-69A (July 28, 1981) and the Department's Interpretative Bulletin at 29 CFR 2509.94-3, relating to in-kind contributions to employee benefit plans.
4. This distinguishes the arrangement from others that have been found to involve prohibited transactions. See Adv. Op. 89-12A (July 14, 1989)(personal receipt of "free checking" account services by a customer from a bank in connection with the investment of assets of the customer's individual retirement account (IRA) in the bank's financial products would constitute a violation of section 4975(c)(1) of the Code.) See also PTE 93-33, 58 Fed. Reg. 31053 (May 28, 1993) (exempting certain arrangements benefiting an IRA account holder).
5. This advisory opinion does not address payments to the individual account of any person who is a

disqualified person for reasons other than as the account holder of an HSA.

6. Section 3(3) of ERISA defines the term “employee benefit plan” or “plan” as an employee welfare benefit plan (see section 3(1) of ERISA) or an employee pension benefit plan (see section 3(2) of ERISA) or a plan which is both an employee welfare benefit plan and an employee pension benefit plan.

Trust Examination Manual

Advisory Opinion 2005-04A

March 25, 2005
2005-04A
ERISA Sec. 406(b)

Ms. Norma M. Sharara
Buchanan Ingersoll, PC
1776 K Street, NW, Suite 800
Washington, DC 20006-2365

Dear Ms. Sharara:

This is in response to your request for guidance under the Employee Retirement Income Security Act of 1974 (ERISA). In particular, you request an advisory opinion that the proposed investment of assets of an employee retirement plan (the Plan) in a mutual fund (the Fund) will not constitute a per se prohibited transaction under section 406 of ERISA.(1) The Plan is sponsored by a foundation (the Foundation) and the Fund is a registered open-ended investment company that is advised and distributed by an investment advisor (the Advisor).

You represent that the Foundation is a tax-exempt organization described in Code section 501(c)(3). The Foundation was organized under Ohio law as a non-profit corporation, and its principal place of business is currently located in New York City. The Foundation has functioned as a private foundation whose principal purpose is to support other operating charitable organizations. It is exempt from federal income taxation and has been classified by the Internal Revenue Service (IRS) as a private foundation under Code section 509. As of December 31, 2002, the Foundation had approximately $305,000,000 in assets. The Foundation, in keeping with the wishes of its founder is time-limited, and expects to disburse substantially all of its assets by 2010.

Because the Foundation expects to bring its operations to a close by 2010, the level of grant-making will accelerate significantly in the coming years. Prior to 2002, the Foundation did not have any paid staff. The Foundation hired nine individuals in 2002 essentially to prepare for and carry out the increased grant-making activities that the Foundation expects to occur between 2002 and 2010 as the Foundation winds down its activities and operations. The Plan was established in 2002 on behalf of these nine employees.

The Foundation is governed by a three-person board of trustees (the Board), none of whom are currently employees of the Foundation or participants in the Plan. One trustee also serves as the chief executive officer of the Foundation, and will soon become an employee of the Foundation. Another trustee serves as a vice-president of the Foundation.

The Plan is a defined contribution plan covering nine participants and is intended to qualify under Code section 401(a). As of December 31, 2002, the Plan had net assets of $163,652. Investment decisions for the plan are made by the Foundation. The Foundation is also the plan administrator and named fiduciary of the Plan. The Board, as the decision-maker for the Foundation, carries out the Foundation's fiduciary responsibilities on behalf of the Plan. The Board also serves as the Plan's trustee, in which capacity it is subject to direction by the Foundation. The Board has determined to allocate the Plan's investments equally between equity and interest-bearing securities.

The Fund invests primarily in common stocks and is managed using a "value" strategy. The Fund has consistently outperformed its benchmark, the S&P 500 Index, over the last 10 years. A trustee and

member of the Board is the President and Chief Executive Officer of the Advisor. He also holds a 22.9% ownership interest in the Advisor. Neither the Foundation nor any of the other trustees holds any ownership interest in, or has any other relationship with, the Advisor. The Board proposes to invest up to 25% of the Plan's assets in the Fund. The remaining allocation to equity securities will be invested in other mutual funds that are unrelated to the Advisor. The Board has determined that this allocation would be consistent with the Plan's investment policy.

This trustee is also one of three Advisor portfolio managers charged with day-to-day management of the Fund's assets. The Fund pays the Advisor an annual investment advisory fee of 1% of the Fund's net asset value, reduced by certain expenses that the Advisor reimburses to the Fund. The Fund's independent Board of Directors is responsible for approving the investment advisory agreement between the Fund and the Advisor. The Fund imposes no sales charges, exchange fees, or redemption fees.

You represent that the trustee's compensation for his services on behalf of the Advisor is not affected by the total amount of assets under management by the Fund. As of December 31, 2002, the Fund held net assets of approximately $3.9 billion.

You request an opinion that the Plan's investment of up to 25% of its assets in the Fund will not result in a prohibited transaction under section 406 of ERISA.

Section 3(21) of ERISA provides that a person is a fiduciary with respect to a plan to the extent he exercises any discretionary authority or control respecting the management of the plan or the management or disposition of the assets of the plan. A plan's administrator and named fiduciary by virtue of having those positions, must have or exercise discretionary authority or control respecting the management of the plan or the management or disposition of its assets.(2) The Foundation is the Plan's administrator and named fiduciary. The Board exercises the Foundation's fiduciary responsibilities on behalf of the plan. Accordingly, all trustees and members of the Board are fiduciaries with respect to the Plan.

Section 406(b)(1) of ERISA prohibits a fiduciary from dealing with the assets of the plan in his own interest or for his own account. Section 406(b)(2) of ERISA prohibits a fiduciary with respect to a plan from acting in any transaction involving the plan on behalf of a party, or represent a party, whose interests are adverse to the interests of the plan or of its participants and beneficiaries.

The Department has explained in regulation 29 CFR §2550.408b-2(e) that the prohibitions of section 406(b) are imposed upon fiduciaries to deter them from exercising the authority, control, or responsibility that makes them fiduciaries when they have interests that may conflict with the interests of the plans for which they act. Thus, a fiduciary may not use the authority, control, or responsibility that makes him a fiduciary to cause a plan to pay an additional fee to such fiduciary, or to a person in which he has an interest that may affect the exercise of his best judgment as a fiduciary, to provide a service. However, regulation 29 CFR §2550.408b-2(e)(2) provides that a fiduciary does not engage in an act described in section 406(b)(1) of ERISA if the fiduciary does not use any of the authority, control, or responsibility that makes him a fiduciary to cause a plan to pay additional fees for a service furnished by such fiduciary or to pay a fee for a service furnished by a person in which the fiduciary has an interest that may affect the exercise of his judgment as a fiduciary.

One member of the Board and trustee of the Plan is a significant owner and the President and Chief Executive Officer of the Advisor, the investment advisor for the Fund. In addition, he is one of the portfolio managers of the Fund, involved in the day-to-day operation of the Fund. It is the opinion of the Department that based on these factors, taken together, this trustee has an interest in the Fund that may affect his best judgment as a fiduciary of the Plan regarding the decision whether to invest Plan assets in the Fund. Accordingly, if that trustee uses any of the authority, control, or responsibility that makes him a fiduciary to cause the Plan to invest in the Fund, the trustee will engage in a violation of section 406(b)(1) and 406(b)(2).

The Department has stated in other situations involving a fiduciary who has this type of conflict of interest that the fiduciary can avoid engaging in a transaction described in section 406(b)(1) and 406(b)(2) of ERISA by removing himself from all consideration of the transaction in question, and not exercising any of the authority, control, or discretion that makes him a fiduciary to cause the plan to enter into the transaction, as long as there is no arrangement, agreement, or understanding regarding the proposed transaction.(3) We note, however, that if a fiduciary has or obtains material information, including information regarding plan investments, that would be necessary in order for other plan fiduciaries to make

an appropriate and prudent decision with respect to the purchase, holding, or disposition of a particular investment, we believe the fiduciary's duties under section 404 of ERISA would require informing the deciding fiduciaries of that information.(4)

ERISA's general standards of fiduciary conduct also would apply to the proposed investment. Under section 404(a)(1), the responsible Plan fiduciaries must act prudently and solely in the interest of the Plan participants and beneficiaries in deciding whether to make an investment of Plan assets in the Fund.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 (41 Fed. Reg. 36281, August 27, 1976). Accordingly, this letter is issued subject to the provisions of the procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

Under Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), the authority of the Secretary of the Treasury to issue rulings under section 4975 of the Internal Revenue Code (the Code) has been transferred, with certain exceptions not here relevant, to the Secretary of Labor. Therefore, the references in this letter to specific sections of ERISA should be taken as referring also to the corresponding sections of the Code.

3. See, Advisory Opinion 99-09A (May 21, 1999) and Advisory Opinion 79-72A (October 10, 1979)
4. We offer no opinion on the impact that insider-trading rules under the Federal securities laws may have on the dissemination of such information to other fiduciaries. Such rules are under the jurisdiction of the Securities and Exchange Commission.

Trust Examination Manual

Advisory Opinion 2005-09A

May 11, 2005
2005-09A
ERISA Sec. 408(b)(8)

Donald J. Myers, Esq.
Reed Smith LLP
1301 K Street, NW, Suite 1100 East Tower
Washington, DC 20005-3373

Dear Mr. Myers:

This is in response to your request for an advisory opinion on behalf of Vanguard Fiduciary Trust Company (Vanguard) concerning the application of section 408(b)(8) of the Employee Retirement Income Security Act of 1974, as amended (ERISA), and the parallel provisions under section 4975(d)(8) of the Internal Revenue Code of 1986, as amended (the Code),(1) to an in-kind investment in a bank collective investment fund, as made under the circumstances described herein.

Background

You represent that Vanguard is a trust company, based in Valley Forge, Pennsylvania, that is organized under the laws applicable to such entities under the Pennsylvania Banking Code. Vanguard is supervised by the Pennsylvania Department of Banking. Vanguard is a wholly-owned subsidiary of The Vanguard Group, Inc. (Vanguard Group).

The Vanguard Group manages assets through registered open-end investment companies, pursuant to the Investment Company Act of 1940 (i.e., mutual funds). Vanguard manages assets held in collective trust funds for employee benefit plans covered by ERISA. You state that many Vanguard Group mutual funds and Vanguard trust funds serve as investment options for participant-directed individual account plans, organized to comply with section 401(k) of the Code ("401(k) plans"), and as investments for other qualified retirement plans.

Vanguard structures stable value investment options, designed to allow investors to receive current interest income and preserve principal amounts, for many 401(k) plans either using a commingled trust, or as a separately managed account for a particular plan. You state that over 900 plans use the commingled trust structure, and approximately 40 are using the stable value separate account structure (referred to collectively herein as "stable value portfolios").

The commingled trust structure uses a collective investment vehicle, the VRST Master Trust. Plans do not hold interests directly in the VRST Master Trust, but instead invest in one of seven "feeder" trusts – the Retirement Savings Trusts – that invest all of their assets in the VRST Master Trust. Investment management fees are imposed at the "feeder" trust level.

The commingled trusts used by Vanguard take the form of collective investment funds intended to qualify as group trusts, pursuant to Revenue Ruling 81-100, 1981-1 C.B. 326, and Revenue Ruling 2004-67, 2004-28 I.R.B., that are tax exempt under section 401 and 501(a) of the Code. Vanguard serves as trustee for such commingled trusts.

Plans pay fees to Vanguard only at the level of the stable value investment portfolio in which the plan directly invests. This is the level of the separately managed account or, with respect to the VRST Master

Trust, the "feeder" trust level.

Vanguard's stable value portfolios (i.e., the commingled trusts or the separately managed accounts) currently invest in, among other things, a series of fixed-income commingled trusts, the Vanguard Targeted Return Trusts (the TRTs). The TRTs were established quarterly on a rolling basis, each with a 5-year term, and managed to a constantly decreasing duration to provide liquidity at the end of the 5-year term. At any one time, there would be 20 TRTs in existence with durations ranging from one quarter of a year to 5 years. Each quarter, one TRT would expire and a new one would be created. The stable value portfolios managed by Vanguard, including the VRST Master Trust, have invested in the various TRTs based on their available cash, other investments and liquidity needs. The VRST Master Trust holds the majority of the assets of each TRT.

You state that Vanguard created the TRTs as stable value portfolios with high-quality fixed income securities with fixed maturity dates. These securities were then backed by "wrap" contracts with insurance companies or banks to provide for certain disbursements to be made at the "book" value of the assets, rather than the market value. This structure is commonly referred to as a "synthetic" guaranteed investment contract arrangement.

You represent that for various reasons related to investment management strategies and cost efficiencies, Vanguard has begun to phase out the TRT program. As the existing TRTs mature, they are being replaced by investments in two commingled trusts of comparable aggregate duration – the Vanguard Intermediate-Term Bond Trust (ITBT), and the Vanguard Short-Term Bond Trust (STBT). These trusts (collectively, the Bond Trusts), like the TRTs, invest principally in high-quality fixed-income securities.

As a means of transitioning to the new investment management structure, and more quickly realizing the efficiencies and other benefits of managing assets through the Bond Trusts rather than the existing TRTs, Vanguard would like to transfer the assets of the TRTs in-kind to the Bond Trusts as soon as possible, and then terminate the TRTs.

Specifically, TRT securities would be allocated to the Bond Trusts based on the TRTs' average durations. Each TRT would receive in return interests in the applicable Bond Trust – i.e., the STBT or ITBT – that are equal in value to the value of the securities it transferred to the respective Bond Trust. The same business day, the TRT would distribute those Bond Trust interests to each stable value portfolio that holds interests in the TRT, in proportion to the portfolio's TRT interests, and then terminate. At the end of the business day, each stable value portfolio would hold Bond Trust interests equal in value to its former TRT interests.

The principal advantage of liquidating the TRTs through in-kind exchanges of securities for interests in the Bond Trusts, as opposed to liquidations for cash on the open market, would be to avoid transaction costs. The total transaction cost estimates are in the range of $5.4 million as existing TRTs have securities with an estimated market value of approximately $3.4 billion. In addition, Vanguard seeks to avoid the possibility of the Bond Trusts not acquiring the same securities on the open market that are sold by the TRTs.

You represent that the trust documents for the TRTs and the Bond Trusts provide the necessary authority for Vanguard to cause the TRTs to make an in-kind investment in the Bond Trusts. You state that the TRTs, by their terms, permit investment in a collective investment fund maintained by the trustee of the TRTs (i.e., Vanguard), where the fund invests principally in securities of the type in which the TRT is permitted to invest. Specifically, Article 6.1(a) of each TRT gives the trustee the authority, in its sole discretion, "to invest and reinvest the Trust in such investments and other property, without restrictions to investments authorized for fiduciaries, as the Trustee determines in accordance with the Trust's investment objective as set forth in Article 1.2 …, including, without limitation, (i) any other collective investment trust maintained by the Trustee…"

Your represent further that the trust documents for the Bond Trusts permit investment by any common, collective or commingled trust fund or group trust that consists solely of the assets of pension, profit-sharing and other qualified plans, and/or other types of retirement plans or vehicles holding retirement plan assets. Under Article 1.02 of the STBT and Article 2.2 of the ITBT, an investment in units of the respective Trust may be made in the form of cash, or in the form of other property acceptable to the trustee.

For purposes of the in-kind investments by the TRTs in the Bond Trusts, you state that the assets being transferred would be valued in a consistent manner by both the investing and receiving trusts, using independent pricing sources.

Specifically, for valuing fixed-income securities, Vanguard uses the same pricing services for both the TRTs and the Bond Trusts. Where none of the pricing services used makes a value available for a particular security, or where there has been a significant change in value of the security from the previous price used (i.e., greater than 1%), Vanguard will obtain quotations from three (3) different independent brokers, and will use the lowest of the three available quotes. You state that pricing services and broker quotations are not used for short-term instruments maturing within 60 days. Thus, pursuant to the trust document's valuation provisions, these instruments would be valued at cost (plus or minus any amortized discount or premium). All valuations would be made as of 3:00 p.m. Eastern Time on the valuation date.

Vanguard serves as trustee of both the TRTs and the Bond Trusts – all of which, as bank collective investment funds, are deemed to hold "plan assets" subject to ERISA pursuant to the Department's regulations (see 29 CFR §2510.3-101(h)(1)(ii)). For this reason, you state that Vanguard would find itself acting in a discretionary role on both sides of any transaction between the TRTs and the Bond Trusts. Thus, the in-kind investment by the TRTs in the Bond Trusts could be viewed as a sale by the TRTs of their securities to the Bond Trusts, with Vanguard, in its capacity as trustee, acting in the role of both the buyer and the seller.

Advisory Opinion Requested

You request an opinion as to whether a purchase of interests in a collective investment fund through an in-kind investment of securities would be exempt from the prohibited transaction provisions of section 406 of ERISA by reason of the statutory exemption contained in section 408(b)(8) of ERISA.

Relevant Provisions of ERISA and Analysis

Section 406(a)(1) of ERISA provides, in part, that a fiduciary with respect to a plan shall not cause the plan to engage in certain direct or indirect transactions with a party in interest, including sales or exchanges of property between the plan and a party in interest (section 406(a)(1)(A)), and transfers to or use by or for the benefit of a party in interest of any assets of the plan (section 406(a)(1)(D)).

Section 406(b)(1) of ERISA prohibits a fiduciary with respect to a plan from dealing with the assets of the plan in his or her own interest or for his or her own account. Section 406(b)(2) of ERISA provides that a fiduciary shall not in his or her individual or in any other capacity act in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries.

Section 3(21) of ERISA defines a "fiduciary" of a plan to include a person who exercises any discretionary authority or control respecting management or disposition of its assets; or who renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of the plan, or has any authority or responsibility to do so.

Section 3(14) of ERISA defines the term "party in interest" to include a fiduciary and a person providing services to a plan.

The Department's regulation at 29 CFR §2510.3-101 defines what are considered to be "plan assets" when a plan invests in another entity. The regulation provides, at 29 CFR §2510.3-101(h)(1)(ii), that when a plan acquires an interest in a common or collective trust fund of a bank, its assets include its investment as well as an undivided interest in each of the fund's underlying assets.

As you have acknowledged, Vanguard is a fiduciary under section 3(21) of ERISA with respect to ERISA-covered plans for which it serves as trustee. Pursuant to the Department's regulations defining "plan assets" (as noted above), Vanguard is also a fiduciary for ERISA-covered plans that invest in the TRTs, either through separately managed accounts or commingled trusts, by reason of its discretionary authority and control over such assets. You indicate that Vanguard receives investment management fees from plans that invest in such accounts or trusts invested in the TRTs, at either the separate account or "feeder" trust level, as applicable.

Therefore, unless an exemption applies, you are concerned that Vanguard would violate sections 406(a)(1)(A), 406(a)(1)(D), 406(b)(1), and 406(b)(2) of ERISA if, as a fiduciary of ERISA-covered plans, it caused "plan assets" invested in the TRTs to be invested in the Bond Trusts.

Section 408(b)(8) of ERISA exempts, in pertinent part, any transaction between a plan and a common or collective trust fund maintained by a party in interest which is a bank or trust company supervised by a state or federal agency, if the following conditions are met:

the transaction is a sale or purchase of an interest in the fund,

the bank or trust company receives not more than reasonable compensation, and

1. such transaction is expressly permitted by the instrument under which the plan is maintained, or by a fiduciary (other than the bank or trust company or an affiliate) who has authority to manage and control the assets of the plan.

   You represent that the TRTs and Bond Trusts are collective trust funds maintained by Vanguard, a trust company supervised by the Pennsylvania Department of Banking. The transactions at issue would be purchases of interests in the Bond Trusts, and would be authorized by the applicable trust documents relating to each TRT and Bond Trust. Vanguard would not be paid any separate fees by the Bond Trusts for the assets invested therein by the TRTs. You state that Vanguard's existing fee arrangements with plans would remain unaffected by the proposed transactions and it would not receive more than reasonable compensation as a result of the transactions.

   With respect to the conditions of ERISA section 408(b)(8), although the statutory provisions do not define the term "reasonable compensation" for purposes of the exemption, the ERISA Conference Committee Report (as issued by Congress in 1974) provides that:

   "[t]o be allowed, no more than reasonable compensation may be paid by the plan in the purchase (or sale) and no more than reasonable compensation may be paid by the plan for investment management by the pooled fund."

   [See H.R. Rep. No. 93-1280, 93rd Cong., 2nd Sess., at 316 (1974)]

   Thus, Congress anticipated that the term "reasonable compensation" would apply to the purchase or sale of an interest in a collective investment fund by a plan and to amounts to be paid by the plan for investment management of such assets.

   In addition, with respect to covered transactions, the ERISA Conference Committee Report does not appear to distinguish cash from in-kind assets, nor does it specify a particular form of investment, with regard to any purchase or sale of interests or units in a common or collective investment trust fund, or pooled investment fund, maintained by a party in interest which is a bank or trust company. Furthermore, at the end of the relevant section discussing the provisions of ERISA section 408(b)(8), Congress expressed the view that, under the general fiduciary rules of ERISA, a bank "…cannot use pooled funds as a place to dump unwanted investments which were initially made on its own (or another's behalf)." Id.

   In this regard, by noting the possibility of a bank placing investments it previously had made into a collective investment fund, Congress appears to have anticipated in-kind investments being made into such a fund as a "purchase" covered by the statutory exemption.

   Accordingly, it is the opinion of the Department that the statutory exemption provided under section 408(b)(8) of ERISA would permit an in-kind exchange of securities owned by a plan or fund holding "plan assets" for units or interests in a collective investment fund maintained by a bank or trust company, provided that the conditions necessary for relief as stated therein are met.(2) However, please note that the issue of whether all of the conditions of section 408(b)(8) will be met is a factual determination upon which the Department cannot opine. Therefore, the appropriate plan fiduciaries, including Vanguard, must determine, based on the particular facts and circumstances, whether the conditions of section 408(b)(8) will be met for the proposed in-kind exchanges.

   In particular, the Department notes that the exemption provided in section 408(b)(8) is available for the proposed in-kind exchanges only if the valuation method used by Vanguard in connection with each transaction results in a plan paying no more than reasonable compensation for its investment. In our view, a plan would pay more than reasonable compensation in any in-kind exchange in which the value of assets transferred to a fund would be more than the value of the fund units or interests the plan received.

Therefore, the Department cautions Vanguard to ensure that appropriate procedures and safeguards are in place to guarantee uniform pricing of both the relevant "plan assets" in each TRT to be transferred to each Bond Trust and the Bond Trust's units to be received by each plan's stable value portfolio investment. As described herein, such investments would include the Retirement Savings Trusts that are "feeder" trusts for the VRST Master Trust, as managed by Vanguard on the date of the transactions.

Finally, the Department is providing no opinion herein as to Vanguard's current or future stable value investment strategies, or courses of action to implement to such strategies (including methods for saving transaction costs or avoiding market impact).

Section 404(a)(1) of ERISA provides, in pertinent part, that fiduciaries shall discharge their duties with respect to a plan with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. Among other things, a fiduciary must give appropriate consideration to those facts and circumstances that, given the scope of such fiduciary's investment duties, the fiduciary knows or should know are relevant to the particular investment or investment course of action involved, including the role the investment or investment course of action plays in that portion of the plan's investment portfolio with respect to which the fiduciary has investment duties.(3)

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976). Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

Under Reorganization Plan No. 4 of 1978, effective December 31, 1978 [5 USC App. at 214 (2000 ed.)], the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor and the Secretary of the Treasury is bound by interpretations of the Secretary of Labor pursuant to such authority. Therefore, references in this letter to specific sections of ERISA should be read to refer also to the corresponding sections of the Code.

2. See Adv. Op. 96-15A (Aug. 7, 1996), wherein the Department took the position that section 408(b)(8) of ERISA provides relief from sections 406(a)(1)(A), 406(a)(1)(D), 406(b)(1) and 406(b)(2) for the purchase or sale by a bank or trust company, as fiduciary of ERISA-covered plans, of interests in a collective fund so long as the conditions of the statutory exemption are met, including that the transaction be expressly permitted by the plan or an authorized independent fiduciary.
3. The Department notes that regulation §2550.404a-1 defines appropriate considerations for an investment course of action by fiduciaries in such matters.

Advisory Opinion 2006-01A
ERISA Sec. 29 CFR 2509.75-2

Whether a lease by a company (LLC) 49% owned by an IRA to a company (S) which is a disqualified person with respect to that IRA is a prohibited transaction where the manager of the LLC is an officer of S. Whether 29 CFR 2509.75-2 makes the transaction an indirect prohibited transaction and whether it makes the transaction a violation of the Internal Revenue Code's exclusive benefit rule.

January 6, 2006
Debra C. Buchanan, Esq.
Guidant Legal Group, PLLC
225 Commerce Street, Suite 450
Tacoma, WA 98402

Dear Ms. Buchanan,

This is in response to your request for an advisory opinion as to whether the following proposed transaction would be prohibited under section 4975 of the Internal Revenue Code (the "Code"), 26 U.S.C. § 4975.(1)

You represent that Salon Services and Supplies, Inc. is a Washington state "S" Corporation ("S Company") which is 68% owned by Miles and Sydney Berry, a marital community (M). The other 32% is owned by a third-party, George Learned ("G"). Miles Berry (Berry) proposes to create a limited liability corporation ("LLC") that will purchase land, build a warehouse and lease the property to S Company. The investors in the LLC would be Berry's individual retirement account ("IRA") (49%), Robert Payne's ("R") IRA (31%) and G (20%). R is the comptroller of S Company. R and G will manage the LLC. You represent that S Company is a disqualified person with respect to Berry's IRA under section 4975(e)(2) of the Code. You represent that R and G are independent of Berry. You also represent that the LLC does not contain plan assets because it is a "real estate operating company" (REOC) as defined by 29 C.F.R. § 2510.3-101(e).

You state that an independent qualified commercial real estate appraiser has appraised the rental value of the lease and has found that the terms of the lease are not less favorable to the LLC and its IRA investors than those obtainable in an arm's length transaction between unrelated parties. Finally, the custodian for Berry's and R's IRAs has reviewed the LLC operating agreement and has approved the investment for those two self-directed IRAs.

Section 4975(c)(1)(A) of the Code prohibits any direct or indirect sale, exchange or leasing of any property between a plan and a "disqualified person." Section 4975(c)(1)(D) of the Code prohibits any direct or indirect transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan. A "disqualified person" is defined under section 4975(e)(2)(A) of the Code to include a person who is a fiduciary. Code section 4975(e)(3) defines the term "fiduciary" to include, in pertinent part, any person who exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets. Section 4975(c)(1)(E) prohibits a fiduciary from dealing with the income or assets of a plan in the fiduciary's own interest or for his or her own account. Section 4975(e)(1)(B) of the Code defines the term "plan" to include an individual retirement account described in Code section 408(a).

We first address the proposed lease as it relates to Berry's IRA. Berry is a fiduciary to his own IRA because he exercises authority or control over its assets and management. 26 U.S.C. § 4975(e)(3). As a fiduciary, Berry is a disqualified person under section 4975(e)(2)(A) of the Code. You represent that S Company is a disqualified

person under section 4975(e)(2) of the Code. R, the comptroller of S Company, is a disqualified person with respect to Berry's IRA under section 4975(e)(2)(H) as an officer of S Company. R, as an employee of S Company, a company 68% owned by M, cannot be considered independent of Berry.

Based upon your representations, it is the opinion of the Department that a lease of property between the LLC and S Company would be a prohibited transaction under Code section 4975, at least as to Berry's IRA. The lease constitutes a prohibited transaction regardless of whether the LLC qualifies as a REOC under the Department's plan assets regulation. 29 C.F.R. § 2510.3-101.

The Department's regulation at 29 C.F.R. § 2509.75-2(a) (Interpretative Bulletin 75-2), explains that a transaction between a party in interest under ERISA(2) (or disqualified person under the Code, in this case S Company) and a corporation in which a plan has invested (i.e., the LLC) does not generally give rise to a prohibited transaction. However, in some cases it can give rise to a prohibited transaction. Regulation section 2509.75-2(c) and Department opinions interpreting it have made clear that a prohibited transaction occurs when a plan invests in a corporation as part of an arrangement or understanding under which it is expected that the corporation will engage in a transaction with a party in interest (or disqualified person).(3)

According to your representations, it appears that Berry's IRA will invest in the LLC under an arrangement or understanding that anticipates that the LLC will engage in a lease with S Company, a disqualified person. Therefore, the lease would amount to a transaction between Berry's IRA and S Company that Code section 4975(c)(1)(A) and (D) prohibits. Additionally, the proposed lease, if consummated, may also constitute a violation by Berry, a fiduciary, of Code section 4975(c)(1)(D) and (E).

Finally, we note the express emphasis in 29 C.F.R. § 2509.75-2(c) that the Department considers "a fiduciary who makes or retains an investment in a corporation or partnership for the purpose of avoiding the application of the fiduciary responsibility provisions of the Act to be in contravention of the provisions of section 404(a) of the Act."

Thus, the proposed lease, which would violate section 4975(c)(1) of the Code, would also have to be referred to the Internal Revenue Service for a determination as to whether it would consider the transaction a violation of the exclusive benefit rule of section 401(a)(2) of the Code, which is the Code's analogue to the fiduciary responsibility provisions of section 404(a) of ERISA.

Because we have concluded that the proposed lease would constitute a prohibited transaction with respect to Berry's IRA, the issue of whether the Code prohibits the lease as it relates to R's IRA is moot, and does not need to be addressed.

This letter constitutes an advisory opinion under ERISA Procedure 76-1, 41 Fed. Reg. 36281 (1976). Accordingly, this letter is issued subject to the provisions of that procedure, including section 10 thereof, relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

1. Under Reorganization Plan No. 4 of 1978, effective December 31, 1978 [5 U.S.C. App. at 214 (2000 ed.)], the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code was transferred, with certain exceptions not here relevant, to the Secretary of Labor. As a result, citations to section 406 of the Employee Retirement Income Security Act (ERISA), 29 U.S.C. § 1001 et seq. and applicable regulations also refer to the parallel citations of section 4975 of the Code.
2. Section 3(14) of ERISA defines the term "party in interest" for purposes of Title I of ERISA, including the prohibited transaction provisions of ERISA section 406.
3. See 29 C.F.R. § 2509.75-2(c); Opinion No. 75-103 (Oct. 22, 1975); 1978 WL 170764 (June 13, 1978). Further, prior to the promulgation of the Department's plan assets regulation, 29 C.F.R. § 2510.3-101, the Department had issued Interpretive Bulletin 75-2 which discusses certain prohibited transactions under section 406 of ERISA or section 4975 or the Code. As indicated in the preamble to the plan assets regulation, part of Interpretive Bulletin 75-2 was revised to coordinate it with the final regulation (51 Fed. Reg. 41278). The remainder of the Interpretive Bulletin 75-2, published at 29 C.F.R. § 2509.75-2(c), remains in force and was not affected by the plan assets regulation. Regulation section 2509.75-2(c) sets forth that a transaction between a party in interest and a corporation in which a plan has invested may constitute a prohibited transaction under certain circumstances. Such transactions

are prohibited regardless of whether or not they meet the plan assets regulation.

Advisory Opinion 2006-06A
PTE 77-3

Whether the prohibition on the payment of sales commissions in PTE 77-3 applies to the payment of 12b-1 Fees by a proprietary mutual fund to an unrelated broker.

July 26, 2006
Mr. F. Jefferson Bragdon
Williams Coulson
15th Floor
Two Chatham Center
Pittsburgh, PA 15219

Re: Company A 401(k) and Profit Sharing Plan (the Plan)

Identification Number C-09259

Dear Mr. Bragdon:

This is in response to your request for an advisory opinion concerning Prohibited Transaction Exemption (PTE) 77-3 (42 FR 18734, April 8, 1977).(1) Specifically, you request an opinion on whether the prohibition on the payment of sales commissions in PTE 77-3 applies to the payment of distribution-related expenses (12b-1 Fees) by a proprietary mutual fund (the Mutual Fund) to an unrelated broker. In particular, the distributor of the Mutual Fund would pay the unrelated broker from Mutual Fund assets received by the distributor under a Rule 12b-1 plan of distribution (the 12b-1 Plan).(2) The distributor would retain no portion of the 12b-1 Fees. Due to your uncertainty about the application of PTE 77-3, you requested that we not identify the relevant parties.

You describe the facts as follows. Company A is the sponsor of the Plan. Company A is an investment adviser to the Z Family of Mutual Funds (the Funds), and one of four employers of employees covered by the Plan. The other employers are Company B, the distributor and principal underwriter of the Funds; Company C, another investment adviser of the Funds; and Company D, which provides other services to the Funds.

The Plan is a defined contribution plan with a section 401(k) cash or deferred feature permitting employee pre-tax deferrals, which allows participants to direct the investment of their accounts among the Funds. The Plan was established by Company A, effective January 1, 1994. The Plan covers only employees of Companies A, B, C, and D (the Companies). The Plan is intended to comply with section 404(c) of the Employee Retirement Income Security Act of 1974 (the Act or ERISA). As of June 30, 2005, the Plan had total assets of approximately $7 million. As of September 9, 2005, the Plan had 260 participants. The trustee of the Plan is Individual G, a senior executive officer of the Companies.

From the inception of the Plan to September 2005, you explain that participants have directed the investment of their accounts among the Funds. Beginning in 1999, you indicate that some of the Funds, in which participants invested their accounts, adopted 12b-1 Plans in accordance with Rule 12b-1 under the Investment Company Act of 1940 (the ’40 Act), 17 CFR §240.12b-1. You further explain that the 12b-1 Plans permit 0.25 percent of the Funds’ assets to be used by Company B to pay 12b-1 Fees to promote the sale of shares of the Funds. No 12b-1 Fees have been paid by Company B in connection with the acquisition or sale of shares of the Funds by the Plan.

You state that Company A has entered into an agreement (the Agreement) with Company E, an unrelated party to the Funds and the Companies, to provide administration services for the Plan. In connection therewith, Company A will (a) adopt the approved prototype plan of Company E, (b) appoint Bank F as successor

trustee, and (c) transfer the assets of the Plan to Bank F in cash. After the transfer of the Plan assets, you explain that participants will direct the investment of their account balances among investment alternatives consisting of mutual funds that are offered by parties unrelated to the Funds and the Companies, whose net asset values are listed daily in financial and other news publications.

To accommodate a number of participants that want to continue to direct the investment of their account balances in the Funds after the transfer, you state that the Agreement with Company E provides for a self-directed brokerage account (the Self-Directed Brokerage Account) established with Company H, that will permit participants to direct the investment of their account balances in the Funds. The Self-Directed Brokerage Accounts will be available to all participants on an equal basis. A Plan participant that uses the Self-Directed Brokerage Account option will pay a $75 annual fee to the Plan recordkeeper.

You represent that Company B will pay a 12b-1 Fee to Company H, the broker, with respect to amounts invested in the Funds by Plan participants and that Company B will not retain any portion of such fee. You explain that Company H provides brokerage services to the Plan participants and that it is unrelated to the Funds, the Companies, Individual G, and Bank F. You also state that Company H is not a fiduciary, as defined in section 3(21) of the Act, with respect to the Plan, because it does not exercise any discretionary authority or control with respect to management of the Plan or exercise any authority or control with respect to management or disposition of assets of the Plan, and does not render investment advice with respect to any property of the Plan. You further represent that no fiduciary of the Plan, or affiliate of any fiduciary, will benefit from any part of the 12b-1 Fee.

You represent that the Plan's investment in the Funds has met and will continue to meet the conditions stated in PTE 77-3. Therefore, you explain that the only issue with respect to the continued availability of PTE 77-3 is the possibility that the payment of 12b-1 Fees to Company H may not be permissible under PTE 77-3.

PTE 77-3 provides relief from the restrictions of sections 406 and 407(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code (the Code), by reason of section 4975(c)(1) of the Code, with respect to the acquisition or sale of shares of an open-end investment company registered under the '40 Act by an employee benefit plan covering only employees of such investment company, employees of the investment adviser or principal underwriter for such investment company, or employees of any affiliated person of such investment adviser or principal underwriter; provided that the conditions of the class exemption are met. Among its requirements, section (c) of PTE 77-3 provides that the plan must not pay a sales commission in connection with such acquisition or sale.

As you have noted, the Department's concern with respect to 12b-1 Fees was expressed in ERISA Advisory Opinion 93-12A (April 27, 1993) in the context of a transaction otherwise covered by PTE 77-4 (42 FR 18732, April 8, 1977). PTE 77-4 permits the purchase or sale by a plan of shares of a registered open-end investment company where an investment adviser to the mutual fund is also a fiduciary with respect to the plan. In ERISA Advisory Opinion 93-12A, a company serving as investment manager or trustee to employee benefit plans invested plan assets in affiliated mutual funds. The company credited the plan for investment advisory fees that the company received from the mutual fund, but did not credit the plan for fees that it received for secondary services provided to that fund. The Department stated that PTE 77-4 would be available if the secondary services were not investment advisory services and the conditions of this class exemption were otherwise met.

The Department also noted in ERISA Advisory Opinion 93-12A that at the time PTE 77-4 was granted, the use of a portion of the assets of a registered investment company to pay distribution-related expenses was not generally permitted by the Securities and Exchange Commission. Accordingly, the Department stated that the payment of 12b-1 Fees was not specifically considered as part of its determination to grant PTE 77-4. In any event, the Department was of the view that the payment of a 12b-1 Fee by a mutual fund to a plan fiduciary or its affiliate could not be "functionally distinguished" in many instances from the payment of a commission by the plan in connection with the acquisition or sale of shares in a mutual fund. Therefore, the Department was unable to conclude that PTE 77-4 would be available for plan purchases and sales of mutual fund shares if a 12b-1 Fee was paid to the fiduciary or its affiliate with regard to that portion of the fund's assets attributable to the plan's investment.

In ERISA Advisory Opinion 2002-05A (June 7, 2002) involving "exchange-traded funds," the Department expressed the view that the term "sales commission," as used in section II(a) of PTE 77-4, would not include brokerage commissions paid to a broker in connection with purchases or sales of shares of registered open-end investment companies listed on an exchange if the broker is unaffiliated with the fund, its principal underwriter, investment adviser or any affiliate thereof.

Similarly in the case under consideration, the broker (Company H) is unaffiliated with the Mutual Fund, its principal underwriter/distributor (Company B), any investment advisers (Companies A and C) or any affiliate thereof (Company D), and any other fiduciary of the Plan (Bank F and Company E). In addition, neither the Companies nor their affiliates would receive any part of the 12b-1 Fees, nor would any fiduciary with respect to the Plan or affiliate of such fiduciary receive such fees. Finally, no commissions would be paid from the Plan participants' accounts other than 12b-1 Fees out of Fund assets. Accordingly, it is the Department's view that the term "sales commission," as used in section (c) of PTE 77-3, would not include 12b-1 Fees that are paid to Company H, by Company B, from Mutual Fund assets, where Company H is an unrelated party and Company B keeps no part of the 12b-1 Fees.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. This opinion relates only to the specific issue addressed herein and is consistent with ERISA Advisory Opinion 2002-05A.

Sincerely,
Ivan L. Strasfeld
Director, Office of Exemption Determinations

Footnotes

1. The Department received your submission as a request for an administrative exemption. However, due to the nature of the issue involved, the Department has decided, with your concurrence, to process this submission as an advisory opinion request.
2. Although you have also requested information concerning excise taxes and the correction of inadvertent prohibited transactions related to the 12b-1 Fees, this opinion letter does not address these issues. The Department believes that the appropriate forum to resolve these matters is the Internal Revenue Service.

Advisory Opinion 2006-08A
ERISA Sec. 404(a)

Whether a fiduciary of a defined benefit plan may, consistent with the requirements of section 404 of ERISA, consider the liability obligations of the plan and the risks associated with such liability obligations in determining a prudent investment strategy for the plan.

October 3, 2006
Donald J. Myers, Esq.
Reed Smith LLP
1301 K Street, N.W.
Suite 1100-East Tower
Washington, D.C. 20005-3373

Dear Mr. Myers:

This is in response to your request for an advisory opinion on behalf of JPMorgan Chase Bank, N.A. (JPMorgan) regarding the application of the fiduciary responsibility provisions of Title I of the Employee Retirement Income Security Act of 1974, as amended (ERISA). Specifically you have inquired whether a fiduciary of a defined benefit plan may, consistent with the requirements of section 404 of ERISA, consider the liability obligations of the plan and the risks associated with such liability obligations in determining a prudent investment strategy for the plan.

You represent that JPMorgan, as a plan fiduciary, proposes to “risk manage” the assets of defined benefit plans by better matching the risks of a plan’s investment portfolio assets with the risks associated with its benefit liabilities, with a goal toward reducing the likelihood that liabilities will rise at a time when the assets decline. Defined benefit plan liabilities are determined by a number of factors, most significantly the demography of the participant population (participants’ number of years of service and/or expected length of time for payment of retirement benefits) and the interest rates used to calculate the present value of the plan’s obligations for funding and accounting purposes.

According to your letter, these liabilities most closely correlate with fixed-income assets, so that one approach for risk managing assets would be to invest directly in a portfolio of fixed-income securities with a duration of the plan’s benefit obligations. However, you note that there may be aspects of a plan’s obligations that correlate more closely with other types of investments, and it may not be possible to match liabilities precisely with fixed-income securities due to limitations in the fixed-income market. As a result, you indicate that a variety of approaches may be used in practice, depending on the facts and circumstances of the particular plan.

In developing an asset allocation that better matches the risk and duration characteristics of a plan’s benefit liabilities, you explain that the focus of JPMorgan’s services would be on reducing the risk of underfunding to the plan and its participants and beneficiaries by reducing volatility in funding levels. In this regard, you note that there may be incidental benefits to the plan sponsor from maintaining more consistent funding levels, such as reduced volatility on the sponsor’s financial statements and reduced minimum contribution obligations. However, you also note that the principal benefit of decreased volatility would be the reduced need for the plan to rely on the plan sponsor to meet its funding obligations, protecting the plan participants and beneficiaries in the event of the sponsor’s insolvency.

Taking into account the foregoing, you have requested the views of the Department on whether a fiduciary of a defined benefit plan may, consistent with the requirements of section 404 of ERISA, consider the liability obligations of the plan and the risks associated with such liability obligations in determining a prudent investment strategy for the plan.

Sections 403(c) and 404(a)(1)(A) of ERISA require plan fiduciaries to discharge their duties with respect to a plan solely in the interest of plan participants and beneficiaries and for the exclusive purpose of providing benefits to participants and beneficiaries and defraying the reasonable expenses of administering the plan. Section 404(a)(1)(B) of ERISA requires plan fiduciaries to act with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character with like aims. These fiduciary standards apply to the selection and monitoring of plan investments, including plan investments made pursuant to a particular investment strategy. The frequency and degree of monitoring, will, of course, depend on the nature of such investments and their role in the plan's portfolio.

The general standards of fiduciary conduct contained in sections 404(a)(1) apply to any investment by a plan covered by Title I, including investments made pursuant to the described risk management investment strategy. Accordingly, fiduciaries of the plan must act prudently, solely in the interest of the plan's participants and beneficiaries, and for the exclusive purpose of providing benefits and defraying reasonable plan administrative costs when deciding whether to invest in a particular investment or use a particular investment strategy.

With regard to investing plan assets, the Department has issued a regulation, at 29 CFR 2550.404a-1, interpreting the prudence requirements of ERISA as they apply to the investment duties of fiduciaries of employee benefit plans. The regulation provides that the prudence requirements of section 404(a)(1)(B) are satisfied if (1) the fiduciary making an investment or engaging in an investment course of action has given appropriate consideration to those facts and circumstances that, given the scope of the fiduciary's investment duties, the fiduciary knows or should know are relevant, and (2) the fiduciary acts accordingly. This includes giving appropriate consideration to the role that the investment or investment course of action plays with respect to that portion of the plan's investment portfolio within the scope of the fiduciary's responsibility.

The regulation further specifies the facts and circumstances that must be given appropriate consideration to include, but not be limited to, (A) a determination by the fiduciary that the particular investment or investment course of action is reasonably designed, as part of the portfolio (or, where applicable, that portion of the plan portfolio with respect to which the fiduciary has investment duties) to further the purposes of the plan, taking into consideration the risk of loss and the opportunity for gain (or other return) associated with the investment or investment course of action and (B) consideration of the following factors as they relate to such portion of the portfolio: (i) the composition of the portfolio with regard to diversification; (ii) the liquidity and current return of the portfolio relative to the anticipated cash flow requirement of the plan; and (iii) the projected return of the portfolio relative to the funding objectives of the plan.

Within the framework of ERISA's prudence, exclusive purpose and diversification requirements, the Department believes that plan fiduciaries have broad discretion in defining investment strategies appropriate to their plans. In this regard, the Department does not believe that there is anything in the statute or the regulations that would limit a plan fiduciary's ability to take into account the risks associated with benefit liabilities or how those risks relate to the portfolio management in designing an investment strategy.

For these reasons, a fiduciary would not, in the view of the Department, violate their duties under sections 403 and 404 solely because the fiduciary implements an investment strategy for a plan that takes into account the liability obligations of the plan and the risks associated with such liabilities and results in reduced volatility in the plan's funding requirements. Whether any particular investment strategy is prudent with respect to a particular plan will depend on all the facts and circumstances involved.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, it is issued subject to the provisions of that procedure, including section 10 thereof relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations

Advisory Opinion 2006-09A
IRC Section 4975 (c)(1)(A) & (B)

This advisory opinion concludes that a self-directed IRA's investment in notes of a corporation, a majority of whose stock is owned by the son-in-law of the IRA owner, would be a prohibited transaction under the Internal Revenue Code.

December 19, 2006
Edward A. Appelt
24 Winslow Drive
Pittsburg, PA 15229

Dear Mr. Appelt:

This is in response to your request for an advisory opinion under section 4975 of the Internal Revenue Code (Code). Specifically, you ask whether allowing the owner of an individual retirement account (IRA) to direct the IRA to invest in notes being offered by a corporation, in which a relative of the IRA owner is the majority owner and stockholder, would give rise to a prohibited transaction under Code section 4975.(1)

You represent that as the owner of an IRA for which you have retained investment discretion, you would like to direct the investment of these IRA funds into notes (Notes) that are being offered by STARR Life Sciences Corporation (STARR). STARR is currently owned by the founders of the Company who are: Eric (your son-in-law) - 87.5%; Erika (an unrelated party) - 7.5%; and Dr. Strolh (an unrelated party) - 5.0%.

You represent that these Notes are being offered and sold exclusively to persons who qualify as "accredited investors" under rule 501(a) of Regulation D promulgated under the Securities Act of 1933. You represent that you qualify as an accredited investor.

You ask whether the IRA's investment in the Notes would give rise to a prohibited transaction under section 4975 of the Code. Section 4975(c)(1)(A) and (B) of the Code defines a prohibited transaction to include any direct or indirect sale or exchange of property and lending of money or other extension of credit between a plan and a disqualified person.

Section 4975(e)(1) of the Code defines, in relevant part, the term "plan" to include an IRA described in Code section 408(a). Section 4975(e)(3) of the Code defines the term "fiduciary," in relevant part, to include any person who exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets. Because you retain investment discretion over the IRA, you are a fiduciary. Section 4975(e)(2) of the Code defines "disqualified person," in relevant part, to include a fiduciary and certain members of the family of a fiduciary. Consequently, you are also classified as a disqualified person under Code section 4975(e)(2)(A). Sections 4975(e)(2)(F) and 4975(e)(6) of the Code state, in relevant part, that the family of a fiduciary shall include his spouse, ancestor, lineal descendant, and any spouse of a lineal descendant. Consequently, your son-in-law is also classified as a disqualified person because he is a member of the family of a fiduciary.

The IRA's purchase of the Notes would be a transaction between STARR and the IRA. Code section 4975(e)(2)(G)(i) defines "disqualified person," in relevant part, to include a corporation of which (or in which) 50 percent or more of the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation is owned indirectly by a fiduciary.

In determining indirect stockholdings, Code section 4975(e)(4) requires that for purposes of Code section 4975(e)(2)(G)(i), indirect stockholdings include those which would be taken into account under Code section 267(c), except that members of a family of a fiduciary are members within the meaning of Code section 4975(e)(6). The application of this rule attributes to you the majority stockholdings of your son-in-law.

Consequently, STARR is also classified as a disqualified person.

The IRA is a plan and STARR is a disqualified person. Based on the facts and representations in your submissions, it is the opinion of the Department of Labor that the IRA's purchase of the Notes from STARR at your direction would be a transaction described in section 4975(c)(1)(A) and (B) of the Code which prohibit a direct or indirect sale or exchange of property and lending of money or other extension of credit between a plan and a disqualified person.

This letter constitutes an advisory opinion under ERISA Procedure 76-1. Accordingly, this letter is issued subject to the provisions of such procedure, including section 10 relating to the effect of advisory opinions.

Sincerely,
Louis J. Campagna
Chief, Division of Fiduciary Interpretations
Office of Regulations and Interpretations

Footnotes

1. Under Presidential Reorganization Plan No. 4 of 1978, effective December 31, 1978, the authority of the Secretary of the Treasury to issue interpretations regarding section 4975 of the Code has been transferred, with certain exceptions not here relevant, to the Secretary of Labor and the Secretary of the Treasury is bound by the interpretations of the Secretary of Labor pursuant to such authority.

FDIC FEDERAL DEPOSIT INSURANCE CORPORATION

Advisory Opinion 2007-01A
PTE 84-14

Whether transactions between a broker-dealer and a separate account managed by a QPAM under a 401(k) plan fail to satisfy section I(a) of PTE 84-14 where plan participants investing in such account receive investment allocation advice from a subsidiary of the broker-dealer.

January 22, 2007
Melanie Franco Nussdorf, Esq.
Steptoe & Johnson LLP
1330 Connecticut Ave NW
Washington DC 20036

Dear Ms. Nussdorf:

This is in response to your request for guidance concerning the application of section I(a) of Prohibited Transaction Exemption (PTE) 84-14 (49 FR 9494, March 13, 1984, as corrected at 50 FR 41430, October 10, 1985, as amended at 70 FR 49305, August 23, 2005).(1) PTE 84-14 permits certain transactions between a party in interest with respect to an employee benefit plan and an investment fund (as defined in section V(b) of PTE 84-14) in which the plan has an interest and which is managed by a qualified professional asset manager (QPAM), if the conditions of the exemption are satisfied.

You write on behalf of an investment banking, securities and investment management firm (Firm A). You represent that Firm A is a broker-dealer which is a frequent counterparty to plans and vehicles that hold plan assets. A subsidiary of Firm A (Subsidiary B) provides investment advice for a fee to participants in self-directed individual account plans.

You request our views on a scenario under which a participant-directed individual account plan offers a separate account that is managed by a QPAM as one of its investment options. The QPAM is not related to either Firm A or Subsidiary B. You represent that Subsidiary B's services to the plan are limited to advising participants with respect to allocation of their investments in the plan. Subsidiary B does not have authority or control over any participant accounts and does not participate in the selection or oversight by the plan sponsor of investment options available under the plan. The plan sponsor (or a named fiduciary unrelated to Firm A and Subsidiary B) would possess and exercise the authority to appoint and terminate the QPAM for the plan. Neither Firm A nor Subsidiary B would participate in the negotiation of the terms of the management agreement with the QPAM. You note that, under certain circumstances, a fiduciary who provides investment advice to a plan for a fee may exert so much influence over the plan sponsor (or named fiduciary) so as to have effectively "exercised" authority or control over the operation of the plan or its assets. You ask, however, that the Department assume, for purposes of this opinion, the absence of such influence, control or authority over the plan sponsor (or named fiduciary).

You have requested guidance as to whether transactions between Firm A and the investment fund managed by the QPAM as an option under the plan would fail to satisfy the condition in section I(a) of the exemption if plan participants investing in such fund receive investment allocation recommendations from Subsidiary B. You state that, since the plan sponsor (or named fiduciary) of each plan, as opposed to Firm A or Subsidiary B, is the party that possesses and exercises the power to select the investment vehicles that may be managed by a QPAM, and since plan participants, as opposed to Firm A or Subsidiary B, have the power to select investment options under the plan in which to invest, such transactions should fall within the relief provided by PTE 84-14.

Section I(a) of PTE 84-14 provides that, at the time of the transaction, the party in interest, or its affiliate (as

defined in section V(c)), does not have the authority to appoint or terminate the QPAM as a manager of the plan assets involved in the transaction, or negotiate on behalf of the plan the terms of the management agreement with the QPAM (including renewals or modifications thereof) with respect to the plan assets involved in the transaction.

Section V(c) of the exemption defines an affiliate of a person as:

[a]ny person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person,

[a]ny corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, 10 percent or more partner ... or highly compensated employee as defined in section 4975(e)(2)(H) of the Code (but only if the employer of such employee is the plan sponsor), and

[a]ny director of the person or any employee of the person who is a highly compensated employee, as defined in section 4975(e)(2)(H) of the Code, or who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets involved in the transaction. A named fiduciary (within the meaning of section 402(a)(2) of ERISA) of a plan with respect to the plan assets involved in the transaction and an employer any of whose employees are covered by the plan will also be considered affiliates with respect to each other for purposes of section I(a) if such an employer or an affiliate of such employer has the authority, alone or shared with others, to appoint or terminate the named fiduciary or otherwise negotiate the terms of the named fiduciary's employment agreement.

It is the Department's view that, based upon the circumstances you have described, neither Firm A nor Subsidiary B has the authority to appoint or terminate the QPAM as a manager of plan assets involved in the transaction, or to negotiate the terms of the QPAM's management agreement. The fact that Subsidiary B provides investment advice for a fee to participants in a plan who invest in a separate account under the plan managed by such QPAM would not cause a transaction between the separate account and Firm A to fail section I(a) of the QPAM class exemption solely by reason of the provision of such participant advice.

The Department notes that Part I of PTE 84-14 provides no relief for transactions described in section 406(b) of ERISA. If Subsidiary B is a fiduciary by virtue of rendering investment advice within the meaning of 29 CFR 2510.3-21(c), the provision of such investment advice involving self-dealing will subject the fiduciary adviser to liability under section 406(b) of ERISA. Thus, for example, a violation of section 406(b) would occur if Subsidiary B advised plan participants to invest in a QPAM-managed fund pursuant to an arrangement or understanding with the QPAM which would result in a benefit being conferred upon Firm A or Subsidiary B as a result of such investment.

This letter constitutes an advisory opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of advisory opinions. This opinion relates only to the specific issue addressed herein.

Sincerely,
Ivan L. Strasfeld
Director , Office of Exemption Determinations

Dear Ms. Nussdorf:

This is in response to your request for guidance concerning Prohibited Transaction Exemption (PTE) 84-14 (49 FR 9494, March 13, 1984, as corrected, 50 FR 41430, October 10, 1985, and as amended, 70 FR 49305, August 23, 2005). Your request concerns the proper application of section I(a) of PTE 84-14 to certain pooled investment funds that are deemed to hold plan assets within the meaning of 29 CFR 2510.3-101(f)(the Plan Asset Regulation).

You write on behalf of The Goldman Sachs Group, Inc. (Goldman Sachs), a provider of global investment banking, asset management and other financial services. Goldman Sachs seeks the Department's opinion concerning the application of section I(a) of PTE 84-14 in instances where a pooled investment fund (the First Fund) that is deemed to hold plan assets under the Plan Asset Regulation invests in another pooled investment fund (the Second Fund) that also is deemed under the Plan Asset Regulation to hold plan assets. Specifically, you request guidance as to whether, under section I(a), the Second Fund is required to look through to (and thus count separately) the assets of any plan invested in the First Fund.

PTE 84-14 generally provides relief from the prohibited transaction restrictions of section 406(a)(1)(A)-(D) for transactions between a plan and a party in interest provided that the plan is invested in an investment fund managed by a qualified professional asset manager (QPAM). Section I(a) of PTE 84-14 requires that, at the time of the transaction, the party in interest or its affiliate does not have the authority to either appoint or terminate the QPAM as manager of the plan assets involved in the transaction, or negotiate on behalf of the plan the terms of the QPAM's management agreement with respect to the plan assets involved in the transaction. Section I(a) contains an exception to this requirement in the case of two or more unrelated plans invested in an investment fund in instances where the assets of a plan, when combined with assets of other plans established or maintained by the same employer or employee organization, and managed in the same investment fund represent less than 10% of the assets of the investment fund.

As noted above, you have asked for clarification of this requirement in the situation in which the First Fund invests in the Second Fund. You provide the following example:

> Assume that Plan X is a 50% investor in the First Fund and also a 4% investor in the Second Fund. The First Fund purchases a 30% interest in the Second Fund. The underlying assets of both Funds contain plans assets.

You have offered your view that, consistent with the language of section I(a), the manager of the Second Fund need not inquire concerning the presence of plan investors in the First Fund, nor aggregate a plan's interest in the First Fund with its direct investment in the Second Fund for the purpose of determining if the plan holds 10% or more of the assets of the Second Fund. In the example you have provided, the manager would only count Plan X's direct 4% investment in the Second Fund and not the indirect interest held by Plan X as a result of its investment in the First Fund.

You have asked the Department to assume, for purposes of your request, that the two investment funds are not managed by the same manager or an affiliate. Under these circumstances, it is the Department's view that the 10 percent exception contained in section 1(a) of PTE 84-14 does not require the consideration by a QPAM of the ownership interests of any plan investors in an investment fund which is investing in a second fund managed by such QPAM.

The Department cautions, however, that, Part I of PTE 84-14, does not provide any relief from the prohibitions of section 406(b). In addition, section I(c) of the exemption provides, in part, that the transaction not be part of an agreement, arrangement, or understanding designed to benefit a party in interest. Thus, for example, if the investment manager of the First Fund invested in the Second Fund pursuant to an agreement or understanding that the manager of the Second Fund would engage in transactions that benefit the manager of the First Fund or its affiliate, the QPAM exemption would not be available for those transactions. In addition, the investment of plan assets by the First Fund in the Second Fund would violate 406(b) of ERISA.

This letter constitutes an Advisory Opinion under ERISA Procedure 76-1 and is issued subject to the provisions of that procedure, including section 10, relating to the effect of Advisory Opinions. This opinion relates only to the specific issue addressed herein.

Sincerely,

Ivan L. Strasfeld

Director of Regulations and Interpretations

Subject: ESOP Refinancing Transactions

Issue

What are the obligations of a fiduciary under sections 404(a) and 408(b)(3) of ERISA in connection with the refinancing of an exempt ESOP loan?

Background

An ESOP is a defined contribution pension plan designed to invest primarily in stock of the sponsoring employer or an affiliate. A leveraged ESOP is an ESOP that finances its purchase of such stock through securities acquisition debt obtained from, or guaranteed by, the sponsoring employer. A leveraged ESOP, operated in accordance with applicable regulations, holds the shares purchased with the proceeds of such a loan in a "suspense account," and releases them from the suspense account as the loan is repaid according to a set formula that is expressed in terms of number of shares.(1) This release formula requires that in a given year, the number of shares released from the suspense account will be determined by multiplying the number of shares in the suspense account by a fraction. The numerator of that fraction is the amount of principal and interest paid for the year, and the denominator is the sum of the numerator plus the amount of principal and interest to be paid for all future years on the loan.(2) After the shares of stock are released from the suspense account, they are allocated to participants' accounts.

Loan repayment schedules typically are designed to provide for the release of stock from the ESOP suspense account consistent with a specific projected level of benefits or participant contributions. Loan repayment schedules, therefore, are often formulated based on projections as to the future value of shares, the number of participants and, if relevant, levels of participant contributions over the term of the loan. Accordingly, where there are significant deviations from the projections – such as significant increases in the value of the stock held in the ESOP suspense account or significant decreases in the number of participating employees – the release of stock in accordance with original loan terms will result in a level of benefits greater than originally intended by the plan sponsor. Refinancing of the underlying loans is a means by which some plan sponsors have sought to bring future allocations closer to the amounts they originally intended. In general, an ESOP refinancing involves entering into a new loan that extends the repayment schedule and, therefore, the period over which stock will be allocated from the suspense account to individual participants. Typically, the ESOP uses the loan proceeds to retire the original loan and release suspense account shares to the accounts of the participants only as the new, extended, loan is repaid. While all of the shares acquired in the original stock purchase are ultimately released under the extended terms of the new loan, fewer shares are released from the suspense account during the period of the original underlying loan and fewer shares are allocated to participants' accounts during that same period.

Analysis

Section 404(a)(1)(A) of ERISA requires, among other things, that a fiduciary of a plan discharge its duties with respect to the plan solely in the interest of the plan's participants and beneficiaries and for the

exclusive purpose of providing benefits to participants and their beneficiaries and defraying reasonable expenses of administering the plan. Section 404(a)(1)(B) requires that a fiduciary of a plan discharge its duties with respect to the plan solely in the interest of the participants and beneficiaries and with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims. Section 403(c)(1) requires, in part, and subject to certain exceptions, that the assets of a plan shall never inure to the benefit of any employer and shall be held for the exclusive purpose of providing benefits to participants and beneficiaries and defraying reasonable expenses of administering the plan.

Section 406(a)(1)(B) provides, in pertinent part, that a fiduciary with respect to a plan shall not cause the plan to engage in a transaction, if he or she knows or should know that such transaction constitutes a direct or indirect "lending of money or other extension of credit between the plan and a party in interest." ERISA section 3(14) defines a "party in interest" to include an employer. Section 408(b)(3) provides that a loan to an ESOP is exempt from section 406 (except section 406(b)(3)(3)) if such loan is "primarily for the benefit of participants and beneficiaries of the plan, and . . . such loan is at an interest rate which is not in excess of a reasonable rate." It is the view of the Department that the requirements of section 408(b)(3) apply to the refinancing of an ESOP loan, as well as to the original loan. Accordingly, an ESOP fiduciary, in order to avoid engaging in a prohibited transaction, must take steps to ensure that a refinancing transaction comports with the requirements of section 408(b)(3) and 29 C.F.R. § 2550.408b-3.

§ 2550.408b-3(c) addresses the application of the "primary benefit" requirement of section 408(b)(3). In applying the "primary benefit" requirement, paragraph (c)(1) of § 2550.408b-3 provides, among other things, that a fiduciary must consider "[a]ll the surrounding circumstances, including those described in paragraphs (c)(2) and (3) of this section."(4) Paragraph (c)(2) of that section provides that "[a]t the time that a loan is made, the interest rate for the loan and the price of securities to be acquired with the loan proceeds should not be such that plan assets might be drained off." Paragraph (c)(3) of that section provides that "[t]he terms of a loan, whether or not between independent parties, must, at the time the loan is made, be at least as favorable to the ESOP as the terms of a comparable loan resulting from arm's-length negotiations between independent parties." The preamble to the final regulation explains that the tests encompassed in paragraphs (c)(2) and (3) of § 2550.408b-3 were added to the regulation to illustrate how a determination can be made with respect to whether a transaction meets the primary benefit requirement.(5) The regulation additionally states that the Department will give "special scrutiny" to ESOP loans and that fiduciaries have an obligation to ensure that such loans are "truly arranged primarily in the interest of participants and beneficiaries." 29 C.F.R. § 2550.408b-3(b)(2).

Whether a fiduciary acts in accordance with its responsibilities under sections 404(a)(1)(A) and (B) and 403(c) of ERISA, and whether a particular loan satisfies the requirements of section 408(b)(3) of ERISA, are inherently factual determinations that must be made by the appropriate plan fiduciary based on all relevant facts and circumstances. In determining whether a refinancing is consistent with the fiduciary provisions of Title I of ERISA, the burden is on the fiduciary to establish compliance. However, we note that certain procedures and factors considered by a fiduciary may be appropriate in determining whether to cause an ESOP to engage in a refinancing.

Conclusion

At a minimum, in determining whether to cause an ESOP to engage in a refinancing, a fiduciary must make a careful assessment of the costs and benefits conferred upon the ESOP and the likely consequences of a failure to refinance, and ensure that the transaction is "arranged primarily in the interest of participants and beneficiaries." 29 C.F.R. § 2550.408b-3(b)(2). It is the view of the Department that, consistent with the obligation to consider "all the surrounding circumstances" pursuant to § 2550.408b-3(c)(1), an ESOP fiduciary must, in considering any refinancing of an ESOP loan that results in an extension of the period over which stock will be allocated to participant accounts, assess the extent to which the refinancing is consistent with the documents and instruments governing the plan, including loan and related agreements.(6) An ESOP fiduciary, in our view, also should assess the extent to which such an extension is consistent with the reasonable expectations of the plan's participants and beneficiaries, as might be determined by reference to the plan's summary plan description or other disclosures describing the funding and benefits of the plan.

Although a refinancing may also benefit the employer (for example, by reducing the employer's cost of providing future pension benefits), the fiduciary must act with undivided loyalty to the participants and beneficiaries of the plan if it is to satisfy the requirements of sections 404(a)(1)(A) and 408(b)(3) of ERISA. The "primary benefit" test set forth in section 408(b)(3) of ERISA and the regulations thereunder require

the fiduciary to focus on the benefits of the refinancing transaction to the plan's participants and beneficiaries. Accordingly, a refinancing would satisfy the primary benefit test if the fiduciary reasonably concludes that the transaction is advantageous to the plan's participants and beneficiaries after a careful assessment of the costs and benefits of the transaction, and if the terms related to the refinancing are at least as favorable as the terms that would have resulted from an arm's-length negotiation between independent parties.

Often, employers offer a number of inducements for the plan to engage in the refinancing which could support a fiduciary's conclusion that the transaction is primarily for the benefit of participants and beneficiaries, such as a commitment that shares held in the suspense account will not be applied to repayment of the outstanding portion of the refinanced loan if the ESOP is terminated (often referred to as "event protection"); additional diversification rights for participants; an increase in the amount of the employer's matching contribution; the payment of a "dividend make-whole" to compensate participants and beneficiaries for the increased use of dividends for loan repayment; and other such inducements. Whether some or all of such inducements are sufficient to satisfy the primary benefit test is highly dependent on the particular facts and circumstances surrounding the transaction.

One circumstance of particular importance is whether the sponsoring employer has made an enforceable commitment to make all of the contributions necessary to retire the loan. In such a case, the ESOP may have an unqualified right to receive contributions and to release stock in accordance with the original amortization schedule. As a result, the negative consequences to the ESOP of rejecting a proposed refinancing could be minimal, and the economic value transferred to a sponsoring employer may be substantial, unless the ESOP receives substantial additional consideration for entering into the transaction.

Further, we note that the fiduciary has a duty of impartiality to all of the plan's participants, and may appropriately balance the interests of different classes of participants in evaluating a proposed refinancing, including the potentially varying interests of present and future participants. See Varity Corp. v. Howe, 516 U.S. 489, 514 (1996); Restatement (Second) of Trusts § 183. In our view, however, the fiduciary cannot satisfy the duty of impartiality solely by considering the asserted benefits of the refinancing to future participants (e.g., more generous benefits in later years than the employer would otherwise provide), but must also consider the interests of current participants and beneficiaries. Although a refinancing does not remove shares from the ESOP, those current participants who terminate employment before the full repayment of a refinanced loan may receive fewer shares of stock than they would have received absent the refinancing, and current participants who remain employed by the sponsor must work more years to receive the same number of shares that they would have received absent the refinancing. Accordingly, a fiduciary cannot reasonably assess the costs and benefits conferred upon an ESOP without giving due consideration to the interests of current participants.

With respect to the obligations of an ESOP fiduciary under section 404(a)(1), it is the view of the Department that satisfaction of the "primary benefit" requirement of section 408(b)(3) and the regulation with respect to the refinancing of an ESOP loan also typically would serve to satisfy a fiduciary's obligations to act prudently and solely in the interest of plan participants and beneficiaries under section 404(a)(1). Conversely, a failure to satisfy the "primary benefit" requirement of section 408(b)(3) would also result in a violation of section 404(a)(1).

Any questions concerning this matter may be directed to Louis Campagna or Fred Wong, Division of Fiduciary Interpretations at 202.693.8510.

Footnotes

1. 29 C.F.R. § 2550.408b-3(h); 26 C.F.R. § 54.4975-11(c).
2. 29 C.F.R. § 2550.408b-3(h)(1). Also note that § 2550.408b-3(h)(2) permits a release formula that is determined solely with reference to principal payments.
3. In adopting § 2550.408b-3, the Department expressed its view that the only prohibited transactions to which the exemption under section 408(b)(3) does not apply are those arising under section 406(b)(3), relating to the receipt by a fiduciary of any consideration for his own personal account from a party dealing with the plan. 42 Fed. Reg. 44384 (September 2, 1977).
4. Paragraph (c) of § 2550.408b-3 also provides that no loan will satisfy the primary benefit requirement unless it also satisfies the requirements of paragraphs (d) [relating to use of loan proceeds], (e) [relating to liability and collateral for an ESOP loan] and (f) [relating to defaults].
5. 42 Fed. Reg. 44384 (September 2, 1977).
6. For purposes of this discussion, it is assumed that there are no provisions in documents or

instruments governing the plan, including loan and related agreements, that specifically preclude the refinancing of an ESOP loan.

Director of Regulations and Interpretations

Subject: Plan Amendments Made by Multiemployer Plan Trustees

Issue

Were the trustees of two related multiemployer plans subject to ERISA's fiduciary standards when they amended the plans' trust agreement?

Background

Employer Association X and Labor Union Y established a defined benefit plan (DB plan) in 1955 and, in 1987, a defined contribution plan (DC Plan). Employer contributions to Fund Z fund both plans. Although some DC Plan participants also participate in the DB plan, most do not. In 1989, the DB plan was frozen. No new employees became participants of the DB plan and the existing participants accrued no further benefits. At that time, the trustees believed that the DB plan needed no further contributions. All future contributions were allocated to the DC Plan.

By 1999, the DB plan's funding situation had apparently changed. That year, Employer Association X and Labor Union Y amended the trust agreement to allocate employer contributions to the DB plan in an amount equivalent to the forfeitures in the DC Plan. The collective bargaining agreement under which the plans are maintained only sets a formula for employer contributions to Fund Z; the trust agreement specifies the allocation of contributions among the plans. The trust agreement provides that either Employer Association X and Labor Union Y, or Fund Z's board of trustees may make amendments.

The 1999 reallocation did not prove sufficient to make the DB Plan solvent. In 2002, the trustees voted to amend the trust agreement, this time diverting an additional 20% of the employer contributions to the DB plan. The amendment resolution states that the trustees were acting "in their Settlor capacity."

Analysis

Section 3(21) of ERISA defines a fiduciary as one who has or exercises discretionary authority or control in the administration or management of an employee benefit plan or its assets. Part 4 of Title I of ERISA establishes the standards pursuant to which any fiduciary is to act, including the duty to act solely in the interests of the participants and beneficiaries of the plan, to be prudent in carrying out her responsibilities, and to avoid engaging in prohibited transactions. Section 3(16) of ERISA, in relevant part, defines the term "plan sponsor" of a plan established or maintained jointly by one or more employers and one or more employee organizations, as the joint board trustees who establish or maintain the plan.

In analyzing the extent to which assets of an employee benefit plan may properly be applied toward the payment of certain expenses, the Department has distinguished between activities that are "settlor" in nature (i.e., activities that relate to the establishment, design, and termination of plans) and activities that are fiduciary in nature (i.e., activities involving management of the plan). As indicated in various pronouncements, expenses

incurred in connection with the performance of settlor functions would not be reasonable plan expenses as they would be incurred for the benefit of the employer and would involve services for which an employer could reasonably be expected to bear the cost in the normal course of its business or operations.(1) In applying these distinctions, the Department has generally recognized that certain activities that would be settlor activities in the context of a single employer plan might be fiduciary activities in the context of a multiemployer plan.(2) This view was consistent with earlier case law, such as NLRB v. Amax Coal Co., 453 U.S. 322 (1981) which held that employer appointed trustees of a multiemployer plan do not represent the interests of the contributing employers, but act as fiduciaries of the plan. 453 U.S. at 331-334. More recent Supreme Court pronouncements on settlor functions, however, have led several courts to conclude that multiemployer plan trustees may act in a settlor capacity without regard to ERISA's fiduciary standards.(3)

For example, the Third Circuit Court of Appeals, in Walling v. Brady(4) and the Sixth Circuit Court of Appeals, in Gard v. Blankenburg,(5) have taken the position that boards of trustees may act as settlors when they amend plans, and that such amendments are not subject to ERISA's fiduciary responsibility provisions. As the Third Circuit noted in the Walling case, the Supreme Court, in both Lockheed Corp. v. Spink and Wright Corp. v. Schoonejongen,(6) recognized that the use of the term "plan sponsor" is significant. Under ERISA section 3(16), the sponsor of a multiemployer plan is the joint board of trustees that is directed, pursuant to a collective bargaining agreement, to establish one or more employee benefit plans. While the Walling court noted that, notwithstanding Lockheed, there may be situations in which single employer and multiemployer plans should be treated differently, they opined that under the facts of that case, involving the amendment of a multiemployer plan, ERISA's fiduciary rules did not apply.

The facts in Walling are very similar to those in the present case. In Walling, the board of trustees of a multiemployer defined benefit pension plan and group health plan amended the health plan (pursuant to authority granted under the collective bargaining agreement and the plan document) to require that participants pay $100 per month in order to receive benefits and amended the pension plan (also pursuant to authority granted under the collective bargaining agreement and the plan document) to provide an additional $100 benefit to those participants who were also participants in the health plan. The court in Walling, in concluding that the trustees' amendment of the pension plan fell outside of the scope of ERISA's fiduciary responsibility provisions, noted that imposing fiduciary duties on a sponsor's decision to amend a plan, whether the employer in the case of a single-employer plan, or the trustees in the case of a multiemployer plan, would divide the sponsor's loyalties and make amendment of a plan impossible.

In Advisory Opinion 80-8A,(7) we considered the issue of whether trustees who allocate employer contributions to related multiemployer plans established and maintained under the same collective bargaining agreements engage in a fiduciary act in making such allocations. In that opinion, we concluded that where allocations are made pursuant to a fixed formula established in the collective bargaining agreement, which formula is binding on the trustees, the trustees are not, solely by reason of such allocation, engaged in an act described in section 406(b)(2). However, the opinion noted that if the trustees exercise discretion in determining how to allocate employer contributions among the related plans, the trustees were engaging in a transaction involving the plans to which contributions were allocated, or withheld, and that such transactions could violate section 406(b)(2) since the plans may have competing interests as to the fixed pool of money. We note, however, that the opinion expressly reserved the question of whether the trustees would be engaged in a fiduciary violation where the collective bargaining agreement gives the trustees the authority to make prospective changes in the formula under which contributions are allocated among related plans.

In the case at hand, the collective bargaining agreements vested broad authority in the trustees to act establish the Fund, as well as the DB Plan and the DC Plan. The trustees also had the authority to amend the Fund and the plans. Pursuant to this authority, the trustees have amended the trust agreement and the plans to provide for the allocation of a portion of the employer contributions to the DB Plan, based on a fixed formula contained in the trust agreement. Once the amendment was properly adopted, the formula became binding on the trustees.

Conclusion

In our view, where relevant documents (e.g., collective bargaining agreements, trust documents, and plan documents) contemplate that the board of trustees of a multi-employer plan will act as fiduciaries in carrying out activities which would otherwise be settlor in nature, such activities would be governed by the fiduciary provisions of ERISA. In our view, such designation by the plan would result in the board of trustees exercising discretion as fiduciaries in the management or administration of a plan or its assets when undertaking the activities. However, where, as here, the relevant plan documents are silent, then the activities of the board of trustees which are settlor in nature generally will be viewed as carried out by the board of trustees in a settlor capacity, and such activities would not be fiduciary activities subject to Title I of ERISA. Accordingly, it is the

view of this Office that the Trustees of the Fund did not violate their fiduciary duties under ERISA in amending the Fund, the DB Plan, and the DC Plan to provide for an allocation of employer contributions to the DB Plan.

It is also the view of this Office that, consistent with the plan expense guidance discussed above, it would not be appropriate for a multiemployer plan to pay for expenses attendant to activities that a multiemployer plan trustee carries out in a settlor capacity.

Any questions concerning this matter may be directed to Louis Campagna or David Lurie, Division of Fiduciary Interpretations at 202.693.8510.

Department of Labor - Employee Benefits Security Administration

Field Assistance Bulletin 2002-3

November 5, 2002

Memorandum for: Virginia C. Smith
Director of Enforcement, Regional Directors

From: Robert J. Doyle
Director of Regulations and Interpretations

Subject: Disclosure and other Obligations Relating to "Float"

Issue

What does a fiduciary need to consider in evaluating the reasonableness of an agreement under which the service provider will be retaining "float" and what information is a service provider required to disclose to plan fiduciaries with respect to such arrangements in order to avoid engaging in a prohibited transaction?

Background

A number of financial services providers, such as banks and trust companies, acting as non-discretionary directed trustees or custodians maintain general or "omnibus" accounts to facilitate the transactions of employee benefit plans. The service provider may retain earnings ("float") resulting from the anticipated short-term investment of funds held in such accounts. Typically, these accounts hold contributions and other assets pending investment directions from plan fiduciaries. In addition, fiduciaries transfer funds to a general account of the financial institution in connection with issuance of a check to make a plan distribution or other disbursement. Funds are then held in the account earning interest until checks are presented for payment.

In Advisory Opinion 93-24A, the Department expressed the view that a trustee's exercise of discretion to earn income for its own account from the float attributable to outstanding benefit checks constitutes prohibited fiduciary self-dealing under section 406(b)(1) of ERISA. Advisory Opinion 93-24A dealt with a situation where there was no disclosure of the float to employee benefit plan customers. In a subsequent information letter to the American Bankers Association (August 11, 1994), the Department indicated that " . . . if a bank fiduciary has openly negotiated with an independent plan fiduciary to retain float attributable to outstanding benefit checks as part of its overall compensation, then the bank's use of the float would not be self-dealing because the bank would not be exercising its fiduciary authority or control for its own benefit. Therefore, to avoid problems, banks should, as part of their fee negotiations, provide full and fair disclosure regarding the use of float on outstanding benefit checks." (Emphasis supplied).

In general, the concepts of open negotiation and full and fair disclosure, as used in the 1994 letter, are intended to ensure that service providers provide sufficient information concerning such arrangements so that plan fiduciaries can make informed assessments concerning the prudence of the arrangements. Further, those concepts are intended to ensure that the amount of the service provider's compensation is determined and approved by a fiduciary independent of the service provider so that prohibited self-dealing is avoided.(1) Since the issuance of the letter, Field offices have found, as part of their investigations, a variety of methods by which plan fiduciaries are informed of, and or approve, the practice of plan service providers retaining float as part of their overall compensation. Typically, a service agreement will provide that, in addition to other specifically identified or scheduled fees, the service provider may also receive compensation in the form of earnings on funds awaiting investment or reinvestment or funds pending distribution. According to the investigations, however, there is little or no disclosure of specific information regarding compensation earned in the form of float.

Further guidance, therefore, has been requested concerning the obligations of plan fiduciaries and service providers regarding float arrangements and disclosures.

Analysis

Obligations of Plan Fiduciary - In selecting a service provider, plan fiduciaries must, consistent with the requirements of section 404(a), act prudently and solely in the interest of the plan's participants and beneficiaries and for the exclusive purpose of providing benefits and defraying reasonable expenses of administering the plan. Except as provided in section 408, plan fiduciaries also have an obligation under section 406(a) not to cause the plan to engage in certain transactions, including a direct or indirect furnishing of goods, services or facilities between the plan and a party in interest. Section 408(b)(2) exempts from the prohibitions of section 406(a) any contract or reasonable arrangement with a party in interest, including a fiduciary, for office space, or legal, accounting or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefor.(2) In carrying out these responsibilities, the Department has indicated that a plan fiduciary must engage in an objective process designed to elicit information necessary to assess the qualifications of the provider, the quality of services offered, and the reasonableness of the fees charged in light of the services provided. In addition, such process should be designed to avoid self-dealing, conflicts of interest or other improper influence.

In circumstances where a service provider may receive compensation in the form of float, we believe the selection and monitoring process engaged in by the responsible fiduciary should include:

A review of comparable providers and service arrangements (e.g., quality and costs) to determine whether such providers may credit float to the provider's own account, rather than the plan.

A review of the circumstances under which float may be earned by the service provider. For example, in the case of float on cash awaiting investment, fiduciaries should ensure that their service agreements include time limits within which the provider will implement investment instructions following receipt of cash from the plan. Fiduciaries also should understand that delays in the plan providing investment instruction or delays in implementing investment direction by the service provider would result in increased compensation in the form of float. In the case of float on funds awaiting disbursement, fiduciaries should ensure that their service agreements specify the time at which assets are transferred from the plan to the general account (e.g., the date the check is requested, the date the check is written, or the date the check is mailed). Inasmuch as timing of mailing or distribution of a check may also affect the amount of float, service agreements should provide, if relevant, an indication as to when checks are mailed following a direction to distribute funds. Fiduciaries also should understand that float will be earned on such disbursements until checks are presented for payment by the payee, the timing of which is beyond the control of the plan and service provider. In this regard, fiduciaries should review periodic statements or reports of distribution checks to determine the extent to which checks tend to remain outstanding for unusually long periods of time (e.g., 90 or more days).

A review of sufficient information to enable the plan fiduciary to evaluate the float as part of the total compensation to be paid for the services to be rendered under the agreement. In this regard, fiduciaries should request and review the rates the provider generally expects to earn. For example, the provider might indicate that earnings on uncashed checks are generally at money market interest rates. Given the uncertainties with respect to both actual interest rates and the length of the periods during which any given funds may be pending investment or pending disbursement, it is anticipated that any projections by the fiduciary will result in only a rough approximation of the potential float. However, the information on which the approximation is based (e.g., basis for earnings rates and agreement terms relating to maximum periods within which funds will be invested following investment direction, timing of transfers of cash from the plan to the provider's general account following direction to distribute funds, period for mailing checks, extent to which experience shows that distribution checks remain outstanding for unusually long periods of time, etc.) and the approximation itself, will enable a fiduciary both to compare service provider float practices and assess the extent to which float is a significant component of the overall compensation arrangement.

Additionally, a plan fiduciary must periodically monitor compliance by the service provider with the terms of the agreement and the reasonableness of compensation under the agreement in order to ensure continuation of the agreement meets the requirements of sections 404(a)(1), 406 and 408(b)(2).

Obligations of Service Providers - The primary issue for service providers with float arrangements is whether the provider has disclosed to its employee benefit plan customers sufficient information concerning the administration of its accounts holding float so that the customer can reasonably approve the arrangement based on an understanding of the service provider's compensation. Moreover, the arrangement must not permit the service provider to affect the amount of its compensation in violation of section 406(b)(1) (e.g., by

giving the service provider broad discretion over the duration of the float). For example, even where a service provider discloses in its service agreement that additional compensation may be paid to the service provider as a result of float, a prohibited transaction may nonetheless result to the extent that the service provider exercises discretionary authority or control sufficient to cause a plan to pay additional fees to the provider. As noted in Advisory Opinion 93-24A, a fiduciary's decision to handle plan assets in such a way as to benefit itself constitutes prohibited self-dealing, without regard to the status of the funds after they are placed in a disbursement or other account.

It is the view of this Office that, in connection with a service agreement pursuant to which the service provider may be retaining float as part of its compensation, the service provider can avoid self-dealing with respect to such earnings by taking the following steps:

Disclose the specific circumstances under which float will be earned and retained.

In the case of float on contributions pending investment direction, establish, disclose and adhere to specific time frames within which cash pending investment direction will be invested following direction from the plan fiduciary, as well as any exceptions that might apply.

In the case of float on distributions, disclose when the float period commences (e.g., the date check is requested, the date the check is written, the date the check is mailed) and ends (the date on which the check is presented for payment). Also disclose, and adhere to, time frames for mailing and any other administrative practices that might affect the duration of the float period.

Disclose the rate of the float or the specific manner in which such rate will be determined. For example, earnings on cash pending investment and earnings on uncashed checks are generally at a money market interest rate.

We note that the disclosure of and adherence to the foregoing by service providers will not only reduce the likelihood of prohibited self-dealing, but also will assist plan fiduciaries in discharging their obligations under sections 404(a)(1), 406 and 408(b)(2).

Conclusion

Float should be regarded by plan fiduciaries and service providers as part of the service provider's compensation for services to the plan. As such, the plan fiduciary must have an adequate understanding of how the service provider will earn float, and how it contributes to the service provider's compensation. The service provider must make disclosures sufficient to permit the fiduciary to make an informed decision regarding the proposed float arrangement. In addition, to avoid having the arrangement give rise to self-dealing violations of section 406(b), both parties must avoid giving the service provider discretion to affect the amount of compensation it receives from float.

Questions concerning this matter may be directed to Louis Campagna or Fred Wong, Division of Fiduciary Interpretations at 202.693.8510.

Footnotes

1. What constitutes an approval by an appropriate plan fiduciary will depend on the facts and circumstances of each case. See Advisory Opinion Nos. 97-16A and 2001-02A.
2. As interpreted by the Department, section 408(b)(2) exempts from the prohibitions of section 406(a) payment by a plan to a party in interest, including a fiduciary, for any service (or combination of services) if (1) such service is necessary for the establishment or operation of the plan; (2) such service is furnished under a contract or arrangement which is reasonable; (3) no more than reasonable compensation is paid for such service. However, section 408(b)(2) does not provide an exemption for an act described in section 406(b) of ERISA, even if such act occurs in connection with a provision of services that is exempt under section 408(b)(2). See 29 C.F.R. § 2550.408b-2.

Department of Labor - Employee Benefits Security Administration

Field Assistance Bulletin 2003-1

April 15, 2003

Memorandum for: Virginia C. Smith
Director of Enforcement, Regional Directors

From: Robert J. Doyle
Director of Regulations and Interpretations

Subject: Participant Loans to Corporate Directors and Officers

Issue

May a plan administrator deny participant loans to directors and executive officers of the sponsoring employer of the plan on the basis that such loans may violate Section 13(k) of the Securities Exchange Act of 1934 without contravening the requirement of section 408(b)(1) of ERISA that loans be made available to all participants on a reasonably equivalent basis?

Law And Analysis

Section 402 of the Sarbanes-Oxley Act of 2002 added a new subsection (k) to Section 13 of the Securities Exchange Act of 1934 (the “1934 Act”). Section 13(k) makes it unlawful for any issuer (as defined in Section 2(a)(7) of the Sarbanes-Oxley Act of 2002)(1), directly or indirectly, including through any subsidiary, to extend or maintain credit, to arrange for the extension of credit, or to modify or renew an extension of credit maintained by the issuer on the date of enactment,(2) in the form of a personal loan to or for any director or executive officer (or equivalent thereof). The Department of Labor does not have interpretative authority with respect to the 1934 Act.

Section 404 of ERISA requires, among other things, that fiduciaries of employee benefit plans discharge their duties prudently and solely in the interest of the plan’s participants and beneficiaries. Section 404(a)(1)(D) requires that fiduciaries discharge their duties in accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of title I of ERISA. Section 406(a)(1)(B) prohibits a fiduciary from causing an employee benefit plan to engage in a loan between the plan and a party in interest. Parties in interest include employees, officers and directors of an employer sponsoring the plan.

Section 408(b)(1) exempts from the prohibited transactions provisions of section 406 the making of a loan by an employee benefit plan to a party in interest who is a participant or beneficiary of the plan, provided that certain conditions are satisfied. Among other things, section 408(b)(1)(A) and the Department’s regulations issued thereunder, at 29 CFR § 2550.408b-1, provide that such loans must be made available to all participants and beneficiaries of the plan on a reasonably equivalent basis.

Section 514(d) of ERISA provides that nothing in Title I of ERISA shall be construed to alter, amend, modify, invalidate, impair, or supersede any other Federal law.

We understand that ERISA practitioners have raised the question of whether section 13(k) of the 1934 Act prohibits directors and executive officers of an employer from taking loans from employee pension benefit plans. It has long been the view of the Department that fiduciaries are responsible for administering their plans to assure compliance with both ERISA and other applicable Federal laws, in recognition of the fact that such other Federal laws are not preempted by ERISA.

In our view, a decision to disallow a participant loan based on a reasonable question concerning the legality of the loan would not be a failure to provide loans to all participants on a reasonably equivalent basis and would not affect the plan's compliance with section 408(b)(1) or 29 C.F.R. § 2550.408b-1.

Conclusion

It is the view of this Office that, in view of the uncertainty concerning the scope of section 13(k) of the 1934 Act, plan fiduciaries of public companies may deny participant loans to officers and directors (or the equivalent thereof) without violating the requirements of section 404(a)(1) or the requirement of section 408(b)(1)(A) and the regulation issued thereunder that loans be available to all participants and beneficiaries on a reasonably equivalent basis. In stating this view, the Department takes no position on the application of section 13(k) of the 1934 Act to participant loans.

Any questions concerning this matter may be directed to Louis Campagna or David Lurie, Division of Fiduciary Interpretations, 202.693.8510.

Footnotes

1. Section 2(a)(7) of the Sarbanes-Oxley Act of 2002 defines “issuer” as “an issuer (as defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)), the securities of which are registered under section 12 of the Act (15 U.S.C. 78l), or that is required to file reports under section 15(d) (15 U.S.C. 78o(d)), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn.”

Memorandum for: Virginia C. Smith
Director of Enforcement, Regional Directors

From: Robert J. Doyle
Director of Regulations and Interpretations

Subject: Application of Participant Contribution Requirements to Multiemployer Defined Contribution Pension Plans

Issue

In the context of a multiemployer defined contribution pension plan, to what extent may collective bargaining, employer participation and similar agreements be taken into account in determining when participant contributions can reasonably be segregated from the general assets of participating employers?

Background

In 1996, the Department adopted final rules defining when amounts that a participant pays to, or has withheld by, an employer for contribution to an employee benefit plan are "plan assets" for purposes of Title I of ERISA. These rules are set forth at 29 CFR § 2510.3-102 ("Definition of plan assets – participant contributions"). In general, the rules provide that the assets of a plan include amounts that a participant or beneficiary pays to, or amounts that a participant has withheld from his wages by an employer, for contribution to the plan as of the earliest date on which such contributions can reasonably be segregated from the employer's general assets. (1) With respect to pension plans, the rules also provide that in no event shall such date be later than the 15th business day of the month following the month in which the amounts were received by the employer (in the case of amounts paid to the employers) or in which the amounts would otherwise have been payable to the participant (in the case of amounts withheld by the employer from a participant's wages).(2)

On the basis of information obtained by, and furnished to, the Department, many multiemployer defined contribution pension plans establish through collective bargaining, employer participation and similar agreements, the form, manner and timing of amounts for contributions to employee benefit plans, including participant contributions to defined contribution pension plans. Frequently, such agreements provide for contributions to be remitted to the plan at specific times, without regard to when any given participating employer might be able to mechanically segregate monies from its general assets. Such practices, therefore, have raised questions concerning the extent to which multiemployer defined contribution pension plan trustees and participating employers must disregard the terms of collective bargaining and employer participation agreements in order to ensure compliance with the terms of the plan assets - participant contribution regulation. Determining when participant contributions to a multiemployer, defined contribution plan become plan assets is critical to understanding the fiduciary obligations of plan trustees and participating employers in handling participant contributions.(3)

Analysis

In adopting changes to the plan assets – participant contribution rules in 1996, the Department recognized that plan sponsors and fiduciaries must weigh the costs and benefits, as well as risks presented to participants, of processes established for the transmittal and receipt of participant contributions.(4) In this regard, many commenters on the proposed rules, while acknowledging that participant contributions could be segregated

quickly and frequently into a trust established to temporarily hold such contributions until they could be reconciled, represented that the costs of establishing and administering such a trust would be considerable, outweighing any additional benefits to participants.(5) Taking such comments into consideration, the Department indicated that, while the final rule significantly reduces the maximum period during which participant contributions may be treated as other than plan assets, the final rule "accommodates employers who are unable reasonably to segregate participant contributions from their general assets more frequently than in what appears to be a fairly standard monthly processing cycle for participant contributions to pension plans."(6)

With regard to multiemployer plans specifically, several commenters on the proposed rules argued that, given the unique nature of such plans, multiemployer plans with participant contributions should either be exempt from the plan asset – participant contribution rules altogether or exempt from the maximum period within which contributions must be made. While the Department did not adopt either of these suggestions, the Department did determine that "the maximum time period for pension plans in the final rule was sufficient to accommodate multiemployer plans." The Department also recognized that transmission of participant contributions may be controlled by pre-existing collective bargaining agreements and, therefore, postponed the application of the final rule's new maximum period (within which participant contributions must be transmitted to a plan) for collectively bargained pension plans.(7)

It is the view of this Office that the provisions of the participant contribution regulation apply in the same way to multiemployer plans that the provisions apply to single employer plans. That is, participant contributions deducted by or paid to an employer become plan assets as soon as they can reasonably be segregated from the employer's general assets. As is the case with single employer plans, if a multiemployer plan maintains a reasonable process for the expeditious and cost-effective receipt of contributions, this process may be taken into account in determining when participant contributions can reasonably be segregated from the employer's general assets. To the extent that a collective bargaining agreement, for example, describes such a process, then the collective bargaining agreement should be considered in determining when participant contributions become plan assets.

To be reasonable, a plan's process for receiving participant contributions should take into account how quickly the participating employers can reasonably segregate and forward contributions. The plan fiduciaries should also consider how costly to the plan a more expeditious process would be. These costs should be balanced against any additional income and security the plan and plan participants would realize from a faster system.

No matter how reasonable a pension plan's process, however, participants contributions become plan assets no later than the 15th business day of the month following the month in which the amounts were received by the employer (in the case of amounts paid to the employers) or in which the amounts would otherwise have been payable to the participant (in the case of amounts withheld by the employer from a participant's wages). Thus neither a collective bargaining agreement, nor any other agreement between the plan and an employer, can justify a failure to comply with the maximum periods in the regulation.

Conclusion

In determining when participant contributions can reasonably be segregated from the general assets of any given contributing employer to a multiemployer defined contribution plan, it is the view of this Office that the time frames established in collective bargaining, employer participation and similar agreements must be taken into account to the extent such agreements represent the considered judgment of the plan's trustees that such time frames reflect the appropriate balancing of the costs of transmitting, receiving and processing such contributions relative to the protections provided to participants and beneficiaries, provided that any such time frames do not extend beyond the maximum period prescribed in § 2510.3-102(b). As with other fiduciary duties, plan trustees must make such determinations prudently and solely in the interest of plans' participants and beneficiaries.(8)

Questions concerning the information contained in this Bulletin may be directed to Louis Campagna or David Lurie, at 202.693.8510.

Footnotes

1. See paragraph (a) of § 2510.3-102.
2. See paragraph (b) of § 2510.3-102. Also note that paragraph (d) of § 2510.3-102 describes the circumstances under which the maximum time period may be extended.
3. The obligation of a fiduciary to collect participant contributions from an employer is similar to the obligations of a fiduciary to collect contributions payable by an employer on its own behalf. In this respect, the Department has indicated that if a multiple employer trustee does not establish and

implement collection procedures which are reasonable, diligent and systematic, it may be found to be engaging in prohibited transactions for failing to collect delinquent contributions. See section 406(a)(1)(B). Cf. Central States Pension Fund v. Central Transport, Inc., 472 U.S. 559, 574 (1985) where the Court interpreted 406(a)(1)(B) as creating a requirement that the plan trustee assure full and prompt collection of all contributions owed to the plan.

5. See 61 Fed. Reg. at 41222.
6. See 61 Fed. Reg. at 41223.
7. See 61 Fed. Reg. at 41228.
8. The mere fact that plan settlors via collective bargaining establish specific dates for the transmittal of participant contributions does not relieve plan trustees from their fiduciary responsibility to determine that the established time frames reflect the appropriate balancing of costs and protections. If the trustees determine that time frames established in collective bargaining agreements fail to reflect the appropriate balance and, therefore, would result in an unreasonable delay in transmittal of participant contributions, the trustees must take steps to collect participant contributions from employers consistent with their fiduciary obligations.

Director of Regulations and Interpretations

Subject: Allocation of Expenses in a Defined Contribution Plan

Issue

What rules apply to how expenses are allocated among plan participants in a defined contribution pension plan?

Background

A number of questions have been raised in the course of investigations and otherwise concerning the propriety of certain expense allocation practices in defined contribution plans. This memorandum is intended to respond to the various requests for guidance from the National and Regional Offices on these issues.(1)

The two principal issues raised with respect to the allocation of plan expenses in defined contribution plans involve the extent to which plan expenses are required to be allocated on a pro rata, rather than per capita, basis and the extent to which plan expenses may properly be charged to an individual participant, rather than plan participants as a whole. For purposes of discussing these issues, we assume first that the expenses at issue are proper plan expenses(2) and second that, with respect to the plan as a whole, the amount of the expenses at issue are reasonable with respect to the services to which they relate.

Analysis

ERISA contains no provisions specifically addressing how plan expenses may be allocated among participants and beneficiaries. The Act and implementing regulations, however, do address certain instances in which a plan may impose charges on particular participants and beneficiaries. For example, section 104(b)(4) provides that the plan administrator may impose a reasonable charge to cover the cost of furnishing copies of plan documents and instruments upon request of a participant or beneficiary.(3) Also, section 602 permits group health plans, subject to certain conditions, to require the payment of 102% of the applicable premium for any period of continuation coverage elected by an eligible participant or beneficiary. Further, the Department's regulations under sections 404(c) and 408(b)(1) provide that reasonable expenses associated with a participant's exercise of an option under the plan to direct investments or to take a participant loan may be separately charged to the account of the individual participant.(4) By contrast, regulations may limit the ability of a plan to charge a particular participant or beneficiary by requiring that information be furnished free of charge upon request of a participant or beneficiary.(5)

Section 404(a)(1) generally provides, in relevant part, that fiduciaries shall discharge their duties with respect to a plan "solely in the interest of the participants and beneficiaries," prudently (404(a)(1)(B)), and "in accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of [Title I] . . . " (404(a)(1)(D)). Plan fiduciaries, therefore, would be required to implement allocation of expense provisions set forth in the plan, unless such provisions otherwise violate Title I.

Accordingly, plan sponsors and fiduciaries have considerable discretion in determining, as a matter of plan design or a matter of plan administration, how plan expenses will be allocated among participants and beneficiaries.

Allocating Expenses Among All Participants - Pro rata v. Per capita

In analyzing formulas for allocating expenses among all plan participants, the starting point is a review of the instruments governing the plan. Inasmuch as ERISA does not specifically address the allocation of expenses in defined contribution plans, a plan sponsor, as noted above, has considerable discretion in determining the method of expense allocation. Where the method of allocating expenses is determined by the plan sponsor (i.e., set forth in the plan documents), fiduciaries, consistent with section 404(a)(1)(D), will be required to follow the prescribed method of allocation. The fiduciary's obligation in this regard does not change merely because the allocation method favors a class (or classes) of participants. When set forth in plan documents, the method of allocating expenses, in effect, becomes part of defining the benefit entitlements under the plan.(6)

When the plan documents are silent or ambiguous on this issue, fiduciaries must select the method or methods for allocating plan expenses. A plan fiduciary must be prudent in the selection of the method of allocation. Prudence in such instances would, at a minimum, require a process by which the fiduciary weighs the competing interests of various classes of the plan's participants and the effects of various allocation methods on those interests. In addition to a deliberative process, a fiduciary's decision must satisfy the "solely in the interest of participants" standard. In this regard, a method of allocating expenses would not fail to be "solely in the interest of participants" merely because the selected method disfavors one class of participants, provided that a rational basis exists for the selected method.(7) On the other hand, if a method of allocation has no reasonable relationship to the services furnished or available to an individual account, a case might be made that the fiduciary breached his fiduciary duties to act prudently and "solely in the interest of participants" in selecting the allocation method. Further, in the case where the fiduciary is also a plan participant, the selection of the method of allocation may raise issues under the prohibited transaction provisions of section 406 of ERISA where the benefit to the fiduciary is more than merely incidental.(8) For example, if in anticipation of the plan fiduciary's own divorce, the fiduciary who is also a plan participant decides to change the allocation of expenses related to a determination of whether a domestic relations order constitutes a "qualified" order from the account incurring the expense to the plan as a whole, such change in allocation by the fiduciary could constitute an act of self-dealing under section 406 of ERISA.

While a pro rata method of allocating expenses among individual accounts (i.e., allocations made on the basis of assets in the individual account) would appear in most cases to be an equitable method of allocation of expenses among participants, it is not the only permissible method. A per capita method of allocating expenses among individual accounts (i.e., expenses charged equally to each account, without regard to assets in the individual account) may also provide a reasonable method of allocating certain fixed administrative expenses of the plan, such as recordkeeping, legal, auditing, annual reporting, claims processing and similar administrative expenses. On the other hand, where fees or charges to the plan are determined on the basis of account balances, such as investment management fees, a per capita method of allocating such expenses among all participants would appear arbitrary. With regard to services which provide investment advice to individual participants, a fiduciary may be able to justify the allocation of such expenses on either a pro rata or per capita basis and without regard to actual utilization of the services by particular individual accounts. Investment advice services might also be charged on a utilization basis, as discussed below, whereby the expense will be allocated to an individual account solely on the basis of a participant's utilization of the service.

Allocating Expenses to an Individual v. General Plan Expense

In contrast to the preceding discussion, which focused on methods of allocating plan expenses among all participants, the following discussion focuses on the extent to which an expense may be allocated (or charged) solely to a particular participant's individual account, rather than allocated among the accounts of all participants (e.g., on a pro rata or per capita basis). The Department provided some guidance on this issue in Advisory Opinion No. 94-32A. In analyzing the extent to which a plan may charge a participant (or alternate payee) for a determination as to whether a domestic relations order constitutes a "qualified" order, the Department concluded in AO 94-32A that imposing the costs of a QDRO determination solely on the participant (or alternate payee) seeking the QDRO, rather than the plan as a whole, would violate ERISA.

Since the issuance of AO 94-32A, the Department has had an opportunity to review the Act and the opinion in the context of a broader array of plan expense allocation issues raised in the course of investigations. On the basis of this review, the Department has determined that neither the analyses or conclusions set forth in that opinion are legally compelled by the language of the statute. Except for the few instances in which ERISA

specifically addresses the imposition of expenses on individual participants, the statute places few constraints on how expenses are allocated among plan participants. In this regard, the same principles applicable to determining the method of allocating expenses among all participants, as discussed above, apply to determining the permissibility of allocating specific expenses to the account of an individual participant, rather than the plan as a whole (i.e., among all participants).(9)

Examples of Specific Plan Expenses

Hardship Withdrawals. Some plans may provide for the allocation of administrative expenses attendant to hardship withdrawal distributions to the participant who seeks the withdrawal. ERISA does not specifically preclude the allocation of reasonable expenses attendant to hardship withdrawals to the account of the participant or beneficiary seeking the withdrawal.

Calculation of Benefits Payable under Different Plan Distribution Options. Some defined contribution plans may charge participants for a calculation of the benefits payable under the different distribution options available under the plan (e.g., joint and survivor annuity, lump sum, single life annuity, etc.). ERISA does not specifically preclude the allocation of reasonable expenses attendant to the calculation of benefits payable under different distribution options available under the plan to the account of the participant or beneficiary seeking the information.

Benefit Distributions. Some plans provide for the imposition of benefit distribution charges on the participant to whom the distribution is being made. These charges may be assessed for benefit distributions paid on a periodic basis (e.g., monthly check writing expenses). ERISA does not specifically preclude the allocation of reasonable expenses attendant to the distribution of benefits to the account of the participant or beneficiary seeking the distribution.

Accounts of Separated Vested Participants. Some plans, with respect to which the plan sponsor generally pays the administrative expenses of the plan, provide for the assessment of administrative expenses against participants who have separated from employment. In general, it is permissible to charge the reasonable expenses of administering a plan to the individual accounts of the plan’s participants and beneficiaries. Nothing in Title I of ERISA limits the ability of a plan sponsor to pay only certain plan expenses or only expenses on behalf of certain plan participants. In the latter case, such payments by a plan sponsor on behalf of certain plan participants are equivalent to the plan sponsor providing an increased benefit to those employees on whose behalf the expenses are paid. Therefore, plans may charge vested separated participant accounts the account’s share (e.g., pro rata or per capita) of reasonable plan expenses, without regard to whether the accounts of active participants are charged such expenses and without regard to whether the vested separated participant was afforded the option of withdrawing the funds from his or her account or the option to roll the funds over to another plan or individual retirement account.

Qualified Domestic Relations Orders (QDROs) and Qualified Medical Child Support Order (QMCSOs) Determinations. ERISA does not, in our view, preclude the allocation of reasonable expenses attendant to QDRO or QMCSO determinations to the account of the participant or beneficiary seeking the determination. (10)

It should be noted that, pursuant to 29 CFR § 2520.102-3(l), plans are required to include in the Summary Plan Description a summary of any provisions that may result in the imposition of a fee or charge on a participant or beneficiary, or the individual account thereof, the payment of which is a condition to the receipt of benefits under the plan. In addition, § 2520.102-3(l) provides that Summary Plan Descriptions must include a statement identifying the circumstances that may result in the “ . . . offset, [or] reduction . . . of any benefits that a participant or beneficiary might otherwise reasonably expect the plan to provide on the basis of the description of benefits . . .” These requirements are intended to ensure that participants and beneficiaries are apprised of fees and charges that may affect their benefit entitlements.

Questions concerning the information contained in this Bulletin may be directed to the Division of Fiduciary Interpretations, Office of Regulations and Interpretations, 202.693.8510.

Footnotes

1. The views set forth herein relate solely to the application of Title I of ERISA. We express no view as to whether any particular allocation of expenses might violate the Internal Revenue Code or any other Federal statute.
2. See Advisory Opinion No. 2001-01A and related hypotheticals for discussion of the principles applicable to distinguishing settlor from plan expenses.
3. See § 29 CFR 2520.104b-30. See also § 2520.104-4(b)(2)(ii).

4. See § 2550.404c-1(b)(2)(ii)(A) and 54 FR 30520, 30522 (July 20, 1989)(preamble to 29 CFR § 2550.408b-1).
5. See §§ 2520.104-46(b)(1)(i)(C), 2520.104b-1(c)(1)(iii) and (iv), 2520.104b-30.
6. If a plan is intended to be a tax qualified plan, the fiduciary would have a duty to assure that the allocation method does not negatively affect the tax qualified status of the plan.
7. In reviewing the propriety of such fiduciary actions, the judicial standard is whether the fiduciary acted in an arbitrary or capricious manner. In meeting this standard, the fiduciary has a duty of impartiality to all the plan's participants and may appropriately balance the interests of different classes of participants in evaluating a proposed method of expense allocation. See Varity Corp. v. Howe, 516 U.S. 489, 514 (1996); Restatement (Second) of Trusts §183.

Trust Examination Manual

Department of Labor - Employee Benefits Security Administration

Field Assistance Bulletin 2004-1

April 7, 2004

Memorandum for: Virginia C. Smith
Director of Enforcement, Regional Directors

From: Robert J. Doyle
Director of Regulations and Interpretations

Subject: Health Saving Accounts

Issue

Whether Health Savings Accounts established in connection with employment-based group health plans constitute "employee welfare benefit plans" for purposes of Title I of ERISA?

Background

Section 3(1) of the Employee Retirement Income Security Act of 1974 (ERISA) defines the term "employee welfare benefit plan" in relevant part to mean "any plan, fund, or program . . . established or maintained by an employer . . . to the extent that such plan, fund, or program was established or is maintained for the purpose of providing for its participants or their beneficiaries, through the purchase of insurance or otherwise, (A) medical, surgical, or hospital care or benefits, or benefits in the event of sickness . . . ."

Section 1201 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Pub. L. No. 108-173 (the Medicare Modernization Act), added section 223 to the Internal Revenue Code (Code) to permit eligible individuals to establish Health Savings Accounts (HSAs).(1) In general, HSAs are established to receive tax-favored contributions by or on behalf of eligible individuals, and amounts in an HSA may be accumulated over the years or distributed on a tax-free basis to pay or reimburse "qualified medical expenses." In order to establish an HSA, an eligible individual, among other conditions, must be covered under a High Deductible Health Plan (HDHP).(2) Contributions to an HSA established by an eligible individual who is an employee may be made by the employee, the employee's employer or both in a given year.(3) Amounts in an HSA may be rolled over to another HSA.(4) If an employer makes contributions to HSAs, the employer must make available a comparable contribution on behalf of all eligible employees with comparable coverage during the same period.(5) However, employers that make contributions to an employee's HSA are not responsible for determining whether HSAs are used for qualified medical expenses or for investing or managing amounts contributed to an employee's HSA.(6)

It is our understanding that a number of employers that currently sponsor ERISA-covered group health plans may wish to add an HDHP option and offer programs designed to enable employees to establish HSAs to pay for medical expenses not covered by the HDHP. Questions have been raised about whether, and under what circumstances, HSAs established in connection with employment-based programs would constitute "employee welfare benefit plans" within the meaning of section 3(1) of ERISA.

Analysis

Congress, in enacting the Medicare Modernization Act, recognized that HSAs would be established in conjunction with employment-based health plans and specifically provided for employer contributions. However, neither the Medicare Modernization Act nor section 223 of the Code specifically address the application of Title I of ERISA to HSAs. Based on our review of Title I, and taking into account the provisions of

the Code as amended by the Medicare Modernization Act, we believe that HSAs generally will not constitute employee welfare benefit plans established or maintained by an employer where employer involvement with the HSA is limited, whether or not the employee's HDHP is sponsored by an employer or obtained as individual coverage.

Specifically, HSAs meeting the conditions of the safe harbor for group or group-type insurance programs at 29 C.F.R. § 2510.3-1(j)(1)-(4) would not be employee welfare benefit plans within the meaning of section 3(1) of ERISA.(7) Moreover, although contributions or payment of group insurance premiums by an employer would be a significant consideration in determining whether a group or group-type insurance arrangement is an employee welfare benefit plan under section 3(1), such contributions or payments are not necessarily significant in analyzing the status of HSAs under ERISA. As noted above, HSAs are personal health care savings vehicles rather than a form of group health insurance. For example, funds deposited in an HSA generally may not be used to pay health insurance premiums,(8) and the beneficiaries of the account have sole control and are exclusively responsible for expending the funds in compliance with the requirements of the Code. Because of these differences, we regard court precedent on the significance of employer contributions to group or group-type insurance arrangements as inapposite to HSAs. In the group health insurance context, the employer, whether by choosing an insurance policy or creating a self-funded program, typically establishes the type of benefits provided, the conditions for their receipt, and the manner in which claims will be adjudicated. In the context of HSAs, however, the employer may be doing little more than contributing funds to an account controlled solely by the employee.

Accordingly, we would not find that employer contributions to HSAs give rise to an ERISA-covered plan where the establishment of the HSAs is completely voluntary on the part of the employees and the employer does not: (i) limit the ability of eligible individuals to move their funds to another HSA beyond restrictions imposed by the Code; (ii) impose conditions on utilization of HSA funds beyond those permitted under the Code; (iii) make or influence the investment decisions with respect to funds contributed to an HSA; (iv) represent that the HSAs are an employee welfare benefit plan established or maintained by the employer; or (v) receive any payment or compensation in connection with an HSA.

The mere fact that an employer imposes terms and conditions on contributions that would be required to satisfy tax requirements under the Code or limits the forwarding of contributions through its payroll system to a single HSA provider (or permits only a limited number of HSA providers to advertise or market their HSA products in the workplace) would not affect the above conclusions regarding HSAs funded with employer or employee contributions, unless the employer or the HSA provider restricts the ability of the employee to move funds to another HSA beyond those restrictions imposed by the Code.

Conclusion

HSAs generally will not constitute "employee welfare benefit plans" for purposes of the provisions of Title I of ERISA. Employer contributions to the HSA of an eligible individual will not result in Title I coverage where, as discussed above, employer involvement with the HSA is limited. Finding that an HSA established by an employee is not covered by ERISA does not, however, affect whether an HDHP sponsored by the employer is itself a group health plan subject to Title I. In fact, unless otherwise exempt from Title I (e.g., governmental plans, church plans) employer-sponsored HDHPs will be employee welfare benefit plans within the meaning of ERISA section 3(1) subject to Title I.

Questions concerning this matter may be directed to Suzanne Adelman, Division of Coverage, Reporting and Disclosure at 202.693.8523.

Footnotes

1. The U.S. Department of the Treasury and the Internal Revenue Service (IRS), which have interpretive and regulatory authority over HSAs under section 223 of the Code, issued general guidance concerning HSAs on December 22, 2003, in I.R.S. Notice 2004-2, and issued additional guidance on March 30, 2004, in I.R.S. Notice 2004-23, I.R.S. Notice 2004-25, Revenue Ruling 2004-38, and Revenue Procedure 2004-22. The Treasury/IRS guidance is available on the Internet at www.treas.gov/offices/public-affairs/hsa.

3. Id. Q&A No. 11.
4. Id. Q&A No. 23.
5. Id. Q&A No. 32.
6. Id. Q&A No. 30.
7. Regulation section 2510.3-1(j) excludes from Title I coverage certain group or group-type insurance

programs. In general, such programs are excluded from coverage where there are no employer contributions, employee participation is voluntary, the employer does not endorse the program, and the employer receives no consideration in connection with the program, other than reasonable compensation for administrative services actually rendered in connection with payroll deductions. See also 29 C.F.R. § 2509.99-1 relating to payroll deduction IRAs.

8. Although the Medicare Modernization Act excludes health insurance from the qualified medical expenses that may be paid from an HSA, there are exceptions for the payment of COBRA premiums, certain insurance for individuals over 65, long-term care insurance premiums and health insurance during periods of unemployment. Code section 223(d)(2).

Director of Regulations and Interpretations

Subject: Fiduciary Duties and Missing Participants in Terminated Defined Contribution Plans

Issue

What does a plan fiduciary need to do in order to fulfill its fiduciary obligations under ERISA with respect to: (1) locating a missing participant of a terminated defined contribution plan; and (2) distributing an account balance when efforts to communicate with a missing participant fail to secure a distribution election?

Background

All plan assets must be distributed as soon as administratively feasible after the date of a plan termination in order to effectively complete a plan termination under Internal Revenue Code requirements.(1) Prior to any distribution, the Code requires a plan administrator to contact all participants for affirmative directions regarding distribution of their account balances.(2) This notice requirement extends to all participants, regardless of their length of service or the size of their account balances, because all participants vest in their account balances upon termination of the plan.(3)

In the context of terminated defined contribution plans, some participants may be unresponsive to written notices from plan administrators asking for direction regarding the distribution of their account balances: these participants are commonly referred to as missing participants.(4) As a result of participants' unresponsiveness, plan administrators often are unable to effectively wind–up the plans' financial affairs and are confronted with an array of issues related to their duties under the fiduciary responsibility provisions of ERISA to search for missing participants and distribute their benefits.

The Department has previously issued guidance to fiduciaries of terminated defined contribution plans on the handling of certain missing participant issues. However, Field Offices have, in the course of their investigations, found that plan fiduciaries use a variety of methods in searching for missing participants and distributing account balances when a search proves unsuccessful. Additional guidance, therefore, has been requested concerning the obligations of plan fiduciaries that are confronted with missing participant issues in terminated defined contribution plans.(5)

Analysis

Consistent with the requirements of section 404(a) of ERISA, a fiduciary must act prudently and solely in the interest of the plan's participants and beneficiaries and for the exclusive purpose of providing benefits and defraying reasonable expenses of administering the plan. Also, under section 404(a)(1)(D) of ERISA, fiduciaries are required to act in accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of Title I and IV. Section 402(b)(4) of ERISA provides that every employee benefit plan shall specify the basis on which payments are made to and from the plan. Section 403(a) of ERISA generally requires that the assets of a plan be held in trust by a trustee. In the case of plan terminations, fiduciaries must also ensure that the allocation of any previously

unallocated funds is made in accordance with the provisions of section 403(d) of ERISA.

Under Title I of ERISA, the decision to terminate a plan is generally viewed as a “settlor” decision rather than a fiduciary decision relating to the administration of the plan. However, the steps taken to implement this decision, including steps to locate missing participants, are governed by the fiduciary responsibility provisions of ERISA.(6) Further, in our view, while the distribution of the entire benefit to which a participant is entitled ends his or her status as a plan participant and the distributed assets cease to be plan assets under ERISA, a plan fiduciary’s choice of a distribution option is a fiduciary decision subject to the general fiduciary responsibility provisions of ERISA.(7)

It is our view that a plan fiduciary must take certain steps in an effort to locate a missing participant or beneficiary before the plan fiduciary determines that the participant cannot be found and distributes his or her benefits in accordance with this Bulletin. These steps are identified below under the heading “Search Methods.” It also is our view that, in determining any additional steps that may be appropriate with regard to a particular participant, a plan fiduciary must consider the size of the participant’s account balance and the expenses involved in attempting to locate the missing participant. Accordingly, the specific steps that a plan fiduciary takes to locate a missing participant may vary depending on the facts and circumstances. This consideration of additional steps is discussed below under the heading “Other Search Options.” Reasonable expenses attendant to locating a missing participant may be charged to a participant’s account, provided that the amount of the expenses allocated to the participant’s account is reasonable and the method of allocation is consistent with the terms of the plan and the plan fiduciary’s duties under ERISA.(8) Whatever decisions are made in connection with locating of missing participants or the distribution of assets on their behalf, plan fiduciaries must be able to demonstrate compliance with ERISA’s fiduciary standards.

Search Methods

In the context of a defined contribution plan termination, one of the most important functions of the plan’s fiduciaries is to notify participants of the termination and of the plan’s intention to distribute benefits. In most instances, routine methods of delivering notice to participants, such as first class mail or electronic notification, will be adequate. In the event that such methods fail to obtain from the participant the information necessary for the distribution, or the plan fiduciary has reason to believe that a participant has failed to inform the plan of a change in address, plan fiduciaries need to take other steps to locate the participant or a beneficiary. In our view, some search methods involve such nominal expense and such potential for effectiveness that a plan fiduciary must always use them, regardless of the size of the participant’s account balance. A plan fiduciary cannot distribute a missing participant’s benefits in accordance with the distribution options discussed below unless each of these methods proves ineffective in locating the missing participant. However, a plan fiduciary is not obligated to take each of these steps if one or more of them are successful in locating the missing participant. These methods are:

Use Certified Mail. Certified mail can be used to easily ascertain, at little cost, whether the participant can be located in order to distribute benefits.

Check Related Plan Records. While the records of the terminated plan may not have current address information, it is possible that the employer or another plan of the employer, such as a group health plan, may have more up-to-date information with respect to a given participant or beneficiary. For this reason, plan fiduciaries of the terminated plan must ask both the employer and administrator(s) of related plans to search their records for a more current address for the missing participant. If there are privacy concerns, the plan fiduciary that is engaged in the search can request the employer or other plan fiduciary to contact or forward a letter on behalf of the terminated plan to the participant or beneficiary, requesting the participant or beneficiary to contact the plan fiduciary.

Check With Designated Plan Beneficiary. In connection with a search of the terminated plan’s records or the records of related plans, plan fiduciaries must attempt to identify and contact any individual that the missing participant has designated as a beneficiary (e.g., spouse, children, etc.) for updated information concerning the location of the missing participant. Again, if there are privacy concerns, the plan fiduciary can request the designated beneficiary to contact or forward a letter on behalf of the terminated plan to the participant, requesting the participant or beneficiary to contact the plan fiduciary.

Use A Letter-Forwarding Service. Both the Internal Revenue Service (IRS) and the Social Security Administration (SSA) offer letter-forwarding services. Plan fiduciaries must choose one service and use it in attempting to locate a missing participant or beneficiary. The IRS has published guidelines under which it will forward letters for third parties for certain “humane purposes,” including a qualified plan administrator’s attempt to locate and pay a benefit to a plan participant.(9) The SSA’s letter forwarding service may be used for similar

purposes, and is described on the SSA's Web site.(10) It is our understanding that to use either the IRS or SSA program, the plan fiduciary/requestor must submit a written request for letter forwarding to the agency, and must provide the missing participant's social security number or certain other identifying information. Both the IRS and SSA will search their records for the most recent address of the missing participant and will forward a letter from the plan fiduciary/requestor to the missing participant if appropriate. In using these letter-forwarding services to notify a missing participant that he or she is entitled to a benefit, the plan fiduciary's letter should provide contact information for claiming the benefit. This notice may also suggest a date by which the participant must respond, as neither the IRS nor the SSA will notify the plan fiduciary as to whether the participant was located.

Other Search Options

In addition to using the search methods discussed above, a plan fiduciary should consider the use of Internet search tools, commercial locator services, and credit reporting agencies to locate a missing participant. Depending on the facts and circumstances concerning a particular missing participant, it may be prudent for the plan fiduciary to use one or more of these other search options. If the cost of using these services will be charged to the missing participant's account, plan fiduciaries will need to consider the size of the participant's account balance in relation to the cost of the services when deciding whether the use of such services is appropriate.

Distribution Options

There will be circumstances when, despite their use of the search methods described above, plan fiduciaries will be unable to locate participants or otherwise obtain directions concerning the distribution of their benefits from terminated defined contribution plans. In these circumstances, plan fiduciaries will nonetheless have to consider distribution options in order to effectuate the termination of the plan.(11) We have set forth below the fiduciary considerations that are relevant to the various options available to plan fiduciaries in the context of missing participants of terminated defined contribution plans.

Individual Retirement Plan Rollovers - In our view, plan fiduciaries must always consider distributing missing participant benefits into individual retirement plans (i.e., an individual retirement account or annuity).(12) Establishing an individual retirement plan is the preferred distribution option because it is more likely to preserve assets for retirement purposes than any of the other identified options.

Distribution to an individual retirement plan preserves retirement assets because it results in a deferral of income tax consequences for missing participants. A distribution that qualifies as an eligible rollover distribution(13) from a qualified plan, which is handled by a trustee to trustee transfer into an individual retirement plan, will not be subject to immediate income taxation, the 20 percent mandatory income tax withholding requirement, or the 10 percent additional tax for premature distributions that may be required based on the participant's age and related facts.(14)

As we have noted in other contexts, the choice of an individual retirement plan also raises fiduciary issues as to the particular choice of an individual retirement plan trustee, custodian or issuer as well as the selection of an initial individual retirement plan investment to receive the distribution.(15) By regulation, the Department established a safe harbor for plan fiduciaries to satisfy their fiduciary responsibility under section 404(a) of ERISA when selecting individual retirement plan providers and initial investments in connection with the rollover of certain mandatory distributions to individual retirement plans.(16) In general, this regulation applies to distributions of $5,000 or less for separating participants who leave an employer's workforce without making an election to either receive a taxable cash distribution or directly roll over assets into an individual retirement plan or another qualified plan.

In our view, the circumstances giving rise to relief under this safe harbor regulation are similar to those confronting fiduciaries of terminated defined contribution plans. Therefore, in the context of making distributions from terminated defined contribution plans on behalf of participants who are determined to be missing or otherwise fail to elect a method of distribution in connection with the termination, fiduciaries who choose investment products that are designed to preserve principal should, as an enforcement matter, be treated as satisfying their fiduciary duties in connection with such distributions, when the fiduciary complies with the relevant requirements of the automatic rollover safe harbor regulation, without regard to the amount involved in the rollover distribution.(17)

Alternative Arrangements - If a plan fiduciary is unable to locate an individual retirement plan provider that is willing to accept a rollover distribution on behalf of a missing participant, plan fiduciaries may consider either establishing an interest-bearing federally insured bank account in the name of a missing participant or transferring missing participants' account balances to state unclaimed property funds. In this regard, fiduciaries

should be aware that transferring a participant's benefits to either a bank account or state unclaimed property fund will subject the deposited amounts to income taxation, mandatory income tax withholding and a possible additional tax for premature distributions. Moreover, interest accrued would also be subject to income taxation. Plan fiduciaries should not use 100% income tax withholding as a means to distribute plan benefits to missing participants.
