(2) would impose an undue burden on the issuer, having due regard to the public interest and the interests of investors.

(d) The Commission may, by rules or regulations upon its own motion, or by order on application by an interested person, exempt conditionally or unconditionally any person, registration statement, indenture, security or transaction, or any class or classes of persons, registration statements, indentures, securities, or transactions, from any one or more of the provisions of this title, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by this title. The Commission shall by rules and regulations determine the procedures under which an exemption under this subsection shall be granted, and may, in its sole discretion, decline to entertain any application for an order of exemption under this subsection.

(e) The Commission may from time to time by its rules and regulations, and subject to such terms and conditions as may be prescribed herein, add to the securities exempted as provided in this section any class of securities issued by a small business investment company under the Small Business Investment Act of 1958 if it finds, having regard to the purposes of that Act, that the enforcement of this Act with respect to such securities is not necessary in the public interest and for the protection of investors.

Section 305 Securities Required to be Registered Under Securities Act

(a) Subject to the provisions of section 304, a registration statement relating to a security shall include the following information and documents, as though such inclusion were required by the provisions of section 7 of the Securities Act of 1933 -

(1) such information and documents as the Commission may by rules and regulations prescribe in order to enable the Commission to determine whether any person designated to act as trustee under the indenture under which such security has been or is to be is eligible to act as such under subsection (a) of section 310; and

(2) an analysis of any provisions of such indenture with respect to -

(A) the definition of what shall constitute a default under such indenture, and the withholding of notice to the indenture security holders of any such default,

(B) the authentication and delivery of the indenture securities and the application of the proceeds thereof,

(C) the release or the release and substitution of any property subject to the lien of the indenture,

(D) the satisfaction and discharge of the indenture, and

(E) the evidence required to be furnished by the obligor upon the indenture securities to the trustee as to compliance with the conditions and covenants provided for in such indenture.

The information and documents required by paragraph (1) of this subsection with respect to the person designated to act as indenture trustee shall be contained in a separate part of such registration statement, which part shall be signed by such person. Such part of the registration statement shall be deemed to be a document filed pursuant to this title, and the provisions of sections 11, 12, 17, and 24 of the Securities Act of 1933 shall not apply to statements therein or omissions therefrom.

(b) (1) Except as may be permitted by paragraph (2) of this subsection, the Commission shall issue an order prior to the effective date of registration refusing to permit such a registration statement to become effective, if it finds that -

(A) the security to which such registration statement relates has not been or is not to be issued under an indenture; or

(B) any person designated as trustee under such indenture is not eligible to act as such under subsection (a) of section 310; but no such order shall be issued except after notice and opportunity for hearing within the periods and in the manner required with respect to refusal orders pursuant to section 8(b) of the Securities Act of 1933. If and when the Commission deems that the objections on which such order was based have been met, the Commission shall enter an order rescinding such refusal order, and the registration shall become effective at the time provided in section 8(a) of the Securities Act of 1933, or upon the date of such rescission, whichever shall be later.

(2) In the case of securities registered under the Securities Act of 1933, which securities are eligible to be issued, offered, or sold on a delayed basis by or on behalf of the registrant, the Commission shall not be required to issue an order pursuant to paragraph (1) of subsection (b) of section 305 for failure to designate a trustee eligible to act under subsection (a) of section 310 if, in accordance with such rules and regulations as may be prescribed by the Commission, the issuer of such securities files an application for the purpose of determining such trustee's eligibility under subsection (a) of section 310. The Commission shall issue an order prior to the effective date of such application refusing to permit the application to become effective, if it finds that any person designated as trustee under such indenture is not eligible to act as such under subsection (a) of section 310, but no order shall be issued except after notice and opportunity for hearing

within the periods and in the manner required with respect to refusal orders pursuant to section 8(b) of the Securities Act of 1933. If after notice and opportunity for hearing the Commission issues an order under this provision, the obligor shall within 5 calendar days appoint a trustee meeting the requirements of subsection (a) of section 310. No such appointment shall be effective and such refusal order shall be rescinded by the Commission until a person eligible to act as trustee under subsection (a) of section 310 has been appointed. If no order is issued, an application filed pursuant to this paragraph shall be effective the tenth day after filing thereof or such earlier date as the Commission may determine, having due regard to the adequacy of information provided therein, the public interest, and the protection of investors.

(c) A prospectus relating to any such security shall include to the extent the Commission may prescribe by rules and regulations as necessary and appropriate in the public interest or for the protection of investors, as though such inclusion were required by section 10 of the Securities Act of 1933, a written statement containing the analysis set forth in the registration statement, of any indenture provisions with respect to the matters specified in paragraph (2) of subsection (a) of this section, together with a supplementary analysis, prepared by the Commission, of such provisions and of the effect thereof, if, in the opinion of the Commission, the inclusion of such supplementary analysis is necessary or appropriate in the public interest or for the protection of investors, and the Commission so declares by order after notice and, if demanded by the issuer, opportunity for hearing thereon. Such order shall be entered prior to the effective date of registration, except that if opportunity for hearing thereon is demanded by the issuer such order shall be entered within a reasonable time after such opportunity for hearing.

(d) The provisions of sections 11, 12, 17, and 24 of the Securities Act of 1933, and the provisions of sections 323 and 325 of this title, shall not apply to statements in or omissions from any analysis required under the provisions of this section or section 306 or 307.

No. 253; 53 Stat. 1154), effective August 3, 1939; as amended by section 303 of title III of the Act of August 10, 1954 (Pub. L. No. 577; 68 Stat. 687), effective October 11, 1954; section 404 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2722), effective November 15, 1990]

Section 306 Securities Not Registered Under Securities Act

(a) In the case of any security which is not registered under the Securities Act of 1933 and to which this subsection is applicable notwithstanding the provisions of section 304, unless such security has been or is to be issued under an indenture and an application for qualification is effective as to such indenture, it shall be unlawful for any person, directly or indirectly -

(1) to make use of any means or instruments of transportation or communication in interstate commerce or of the mails to sell such security through the use or medium of any prospectus or otherwise; or

(2) to carry or cause to be carried through the mails or in interstate commerce, by any means or instruments of transportation, any such security for the purpose of sale or for delivery after sale.

(b) In case of any security which is not registered under the Securities Act of 1933, but which has been or is to be issued under an indenture as to which an application for qualification is effective, it shall be unlawful for any person, directly, or indirectly -

(1) to make use of any means or instruments of transportation or communication in interstate commerce or of the mails to carry or transmit any prospectus relating to any such security, unless such prospectus, to the

extent the Commission may prescribe by rules and regulations as necessary and appropriate in the public interest or for the protection of investors, includes or is accompanied by a written statement that contains the information specified in subsection (c) of section 305; or

(2) to carry or to cause to be carried through the mails or interstate commerce any such security for the purpose of sale or for delivery after sale, unless, to the extent the Commission may prescribe by rules and regulations as necessary or appropriate in the public interest or for the protection of investors, accompanied or preceded by a written statement that contains the information specified in subsection (c) of section 305.

(c) It shall be unlawful for any person, directly or indirectly, to make use of any means or instruments of transportation or communication in interstate commerce or of the mails to offer to sell through the use or medium of any prospectus or otherwise any security which is not registered under the Securities Act of 1933 and to which this subsection is applicable notwithstanding the provisions of section 304, unless such security has been or is to be issued under an indenture and an application for qualification has been filed as to such indenture, or while the application is the subject of a refusal order or stop order or (prior to qualification) any public proceeding or examination under section 307(c).

[Source: Section 306 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 306 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1155), effective August 3, 1939; as amended by section 304 of title III of the Act of August 10, 1954 (Pub. L. No. 577; 68 Stat. 687), effective October 9, 1954]

Section 307 Qualification of Indentures Covering Securities Not Required to be Registered

(a) In the case of any security which is not required to be registered under the Securities Act of 1933 and to which subsection (a) of section 306 is applicable notwithstanding the provisions of section 304, an application for qualification of the indenture under which such security has been or is to be issued shall be filed with the Commission by the issuer of such security. Each such application shall be in such form, and shall be signed in such manner, as the Commission may by rules and regulations prescribe as necessary or appropriate in the public interest or for the protection of investors. Each such application shall include the information and documents required by subsection (a) of section 305. The information and documents required by paragraph (1) of such subsection with respect to the person designated to act as indenture trustee shall be contained in a separate part of such application, which part shall be signed by such person. Each such application shall also include such of the other information and documents which would be required to be filed in order to register such indenture security under the Securities Act of 1933 as the Commission may by rules and regulations prescribe as necessary or appropriate in the public interest or for the protection of investors. An application may be withdrawn by the applicant at any time prior to the effective date thereof. Subject to the provisions of section 321, the information and documents contained in or filed with any application shall be made available to the public under such regulations as the Commission may prescribe, and copies thereof, photostatic or otherwise, shall be furnished to every applicant therefore at such reasonable charge as the Commission may prescribe.

(b) The filing with the Commission of an application, or of an amendment to an application, shall be deemed to have taken place upon the receipt thereof by the Commission, but, in the case of an application, only if it is accompanied or preceded by payment to the Commissioner of a filing fee in the amount of $100, such payment to be made in cash of by United States postal money order or certified or bank check, or in such other medium of payment as the Commission may authorize by rule and regulation.

(c) The provisions of section 8 of the Securities Act of 1933 and the provisions of subsection (b) of section 305 of this title shall apply with respect to every such application, as though such application were a registration statement filed pursuant to the provisions of such Act.

Section 308 Integration of Procedure With Securities Act and Other Acts

(a) The Commission, by such rules and regulations or orders as it deems necessary or appropriate in the public interest or for the protection of investors, shall authorize the filing of any information or documents required to be filed with the Commission under this title, or under the Securities Act of 1933, the Securities Exchange Act of 1934, or the Public Utility Holding Company Act of 1935, by incorporating by reference any information or documents on file with the Commission under this title or under any such Act.

(b) The Commission, by such rules and regulations or orders as it deems necessary or appropriate in the public interest or for the protection of investors, shall provide for the consolidation of applications, reports, and proceedings under this title with registration statements, applications, reports, and proceedings under the Securities Act of 1933, the Securities Exchange Act of 1934, or the Public Utility Holding Company Act of 1935.

Section 309 When Qualification Becomes Effective; Effect of Qualification

(a) The indenture under which a security has been or is to be issued shall be deemed to have been qualified under this title -

(1) when registration becomes effective as to such security; or

(2) when an application for the qualification of such indenture becomes effective, pursuant to section 307.

(b) After qualification has become effective as to the indenture under which a security has been or is to be issued, no stop order shall be issued pursuant to section 8(d) of the Securities Act of 1933, suspending the effectiveness of the registration statement relating to such security or of the application for qualification of such indenture, except on one or more of the grounds specified in section 8 of such Act, or the failure of the issuer to file an application as provided for by section 305(b)(2).

(c) The making, amendment, or rescission of a rule, regulation, or order under the provisions of this title (except to the extent authorized by subsection (a) of section 314 with respect to rules and regulations prescribed pursuant to such subsection) shall not affect the qualification, form, or interpretation of any indenture as to which qualification became effective prior to the making, amendment, or rescission of such rule, regulation, or order.

(d) No trustee under an indenture which has been qualified under this title shall be subject to any liability because of any failure of such indenture to comply with any of the provisions of this title, or any rule, regulation, or order thereunder.

(e) Nothing in this title shall be construed as empowering the Commission to conduct an investigation or other proceeding for the purpose of determining whether the provisions of an indenture which has been qualified under this title are being complied with, or to enforce such provisions.

No. 253; 53 Stat. 1157), effective August 3, 1939; as amended by section 405 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2723), effective

November 15, 1990]

Section 310 Eligibility and Disqualification of Trustee

(a) Persons Eligible for Appointment as Trustee

(1) There shall at all times be one or more trustees under every indenture qualified or to be qualified pursuant to this title, at least one of whom shall at all times be a corporation organized and doing business under the laws of the United States or of any State or Territory or of the District of Columbia or a corporation or other person permitted to act as trustee by the Commission (referred to in this title as the institutional trustee), which -

(A) is authorized under such laws to exercise corporate trust powers, and

(B) is subject to supervision or examination by Federal, State, Territorial, or District of Columbia authority.

The Commission may, pursuant to such rules and regulations as it may prescribe, or by order on application, permit a corporation or other person organized and doing business under the laws of a foreign government to act as sole trustee under an indenture qualified or to be qualified pursuant to this title, if such corporation or other person –

(A) is authorized under such laws to exercise corporate trust powers, and

(B) is subject to supervision or examination by authority of such foreign government or a political subdivision thereof substantially equivalent to supervision or examination applicable to United States institutional trustees.

In prescribing such rules and regulations or making such order, the Commission shall consider whether under such laws, a United States institutional trustee is eligible to act as sole trustee under an indenture relating to securities sold within the jurisdiction of such foreign government.

(2) Such institution* trustee shall have at all times a combined capital and surplus of a specified minimum amount, which shall not be less than $150,000. If such institutional trustee publishes reports of condition at least annually, pursuant to law or to the requirements of said supervising or examining authority, the indenture may provide that, for the purposes of this paragraph, the combined capital and surplus of such trustee shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published.

* So in statute. Should probably be "institutional."

(3) If the indenture to be qualified requires or permits the appointment of one or more co-trustees in addition to such institutional trustee, the rights, powers, duties, and obligations conferred or imposed upon the trustees or any of them shall be conferred or imposed upon and exercised or performed by such institutional trustee, or such institutional trustee and such co-trustees jointly, except to the extent that under any law of any jurisdiction in which any particular act or acts are to be performed, such institutional trustee shall be incompetent or unqualified to perform such act or acts, in which event such rights, powers, duties and obligations shall be exercised and performed by such co-trustees.

(4) In the case of certificates of interest or participation, the indenture trustee or trustees shall have the legal power to exercise all of the rights, powers, and privileges of a holder of the security or securities in which such certificates evidence an interest or participation.

(5) No obligor upon the indenture securities or person directly or indirectly controlling, controlled by, or under common control with such obligor shall serve as trustee upon such indenture securities.

(b) Disqualification of Trustee. If any indenture trustee has or shall acquire any conflicting interest as hereinafter defined -

(i) then, within 90 days after ascertaining that it has such conflicting interest, and if the default (as defined in the next sentence) to which such conflicting interest relates has not been cured or duly waived or otherwise eliminated before the end of such 90-day period, such trustee shall either eliminate such conflicting interest or, except as otherwise provided below in this subsection, resign, and the obligor upon the indenture securities shall take prompt steps to have a successor appointed in the manner provided in the indenture;

(ii) in the event that such trustee shall fail to comply with the provisions of clause (i) of this subsection, such trustee shall, within 10 days after the expiration of such 90-day period, transmit notice of such failure to the indenture security holders in the manner and to the extent provided in subsection (c) of section 313; and

(iii) subject to the provisions of subsection (e) of section 315, unless such trustee's duty to resign is stayed as provided below in this subsection, any security holder who has been a bona fide holder of indenture securities for at least six months may, on behalf of himself and all others similarly situated, petition any court of competent jurisdiction for the removal of such trustee, and the appointment of a successor, if such trustee fails, after written request thereof by such holder to comply with the provisions of clause (i) of this subsection.

For the purposes of this subsection, an indenture trustee shall be deemed to have a conflicting interest if the indenture securities are in default (as such term is defined in such indenture, but exclusive of any period of grace or requirement of notice) and -

(1) such trustee is trustee under another indenture under which any other securities, or certificates of interest or participation in any other securities, of an obligor upon the indenture securities are outstanding or is trustee for more than one outstanding series of securities, as hereafter defined, under a single indenture of an obligor, unless -

(A) the indenture securities are collateral trust notes under which the only collateral consists of securities issued under such other indenture,

(B) such other indenture is a collateral trust indenture under which the only collateral consists of indenture securities, or

(C) such obligor has no substantial unmortgaged assets and is engaged primarily in the business of owning, or of owning and developing and/or operating, real estate, and the indenture to be qualified and such other indenture are secured by wholly separate and distinct parcels of real estate:

Provided, That the indenture to be qualified shall automatically be deemed (unless it is expressly provided therein that such provision is excluded) to contain a provision excluding from the operation of this paragraph other series under such indenture, and any other indenture or indentures under which other securities, or certificates of interest or participation in other securities, of such an obligor are outstanding, if -

(i) the indenture to be qualified and any such

other indenture or indentures (and all series of securities issuable thereunder) are wholly unsecured and rank equally, and such other indenture or indentures (and such series) are specifically described in the indenture to be qualified or are thereafter qualified under this title, unless the Commission shall have found and declared by order pursuant to subsection (b) of section 305 or subsection (c) of section 307 that differences exist between the provisions of the indenture (or such series) to be qualified and the provisions of such other indenture or indentures (or such series) which are so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as such under one of such indentures, or

(ii) the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under the indenture to be qualified and such other indenture or under more than one outstanding series under a single indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as such under one of such indentures or with respect to such series;

(2) such trustee or any of its directors or executive officers is an underwriter for an obligor upon the indenture securities;

(3) such trustee directly or indirectly controls or is directly or indirectly controlled by or is under direct or indirect common control with an underwriter for an obligor upon the indenture securities;

(4) such trustee or any of its directors or executive officers is a director, officer, partner, employee, appointee, or representative of an obligor upon the indenture securities, or of an underwriter (other than the trustee itself) for such an obligor who is currently engaged in the business of underwriting, except that -

(A) one individual may be a director and/or an executive officer of the trustee and a director and/or an executive officer of such obligor, but may not be at the same time an executive officer of both the trustee and of such obligor,

(B) if and so long as the number of directors of the trustee in office is more than nine, one additional individual may be a director and/or an executive officer of the trustee and a director of such obligor, and

(C) such trustee may be designated by any such obligor or by any underwriter for any such obligor, to act in the capacity of transfer agent, registrar, custodian, paying agent, fiscal agent, escrow agent, or depositary, or in any other similar capacity, or, subject to the provisions of paragraph (1) of this subsection, to act as trustee, whether under an indenture or otherwise;

(5) 10 per centum or more of the voting securities of such trustee is beneficially owned either by an obligor upon the indenture securities or by

any director, partner or executive officer thereof, or 20 per centum or more of such voting securities is beneficially owned, collectively by any two or more of such persons; or 10 per centum or more of the voting securities of such trustee is beneficially owned either by an underwriter for any such obligor or by any director, partner, or executive officer thereof, or is beneficially owned, collectively, by any two or more such persons;

(6) such trustee is the beneficial owner of, or holds as collateral security for an obligation which is in default as hereinafter defined -

(A) 5 per centum or more of the voting securities, or 10 per centum or more of any other class of security, of an obligor upon the indenture securities, not including indentures securities and securities issued under any other indenture under which such trustee is also trustee, or

(B) 10 per centum or more of any class of security of an underwriter for any such obligor;

(7) such trustee is the beneficial owner of, or holds as collateral security for an obligation which is in default as hereafter defined, 5 per centum or more of the voting securities of any person who, to the knowledge of the trustee, owns 10 per centum or more of the voting securities of, or controls directly or indirectly or is under direct or indirect common control with, an obligor upon the indenture securities;

(8) such trustee is the beneficial owner of, or holds as collateral security for an obligation which is in default as hereinafter defined, 10 per centum or more of any class of security of any person who, to the knowledge of the trustee, owns 50 per centum or more of the voting securities of an obligor upon the indenture securities;

(9) such trustee owns, on the date of default upon the indenture securities (as such term is defined in such indenture but exclusive of any period of grace or requirement of notice) or any anniversary of such default while such default upon the indenture securities remains outstanding, in the capacity of executor, administrator, testamentary or inter vivos trustee, guardian, committee or conservator, or in any other similar capacity, an aggregate of 25 per centum or more of the voting securities, or of any class of security, of any person, the beneficial ownership of a specified percentage of which would have constituted a conflicting interest under paragraph (6), (7), or (8) of this subsection. As to any such securities of which the indenture trustee acquired ownership through becoming executor, administrator or testamentary trustee of an estate which include them, the provisions of the preceding sentence shall not apply for a period of not more than 2 years from the date of such acquisition, to the extent that such securities included in such estate do not exceed 25 per centum of such voting securities or 25 per centum of any such class of security. Promptly after the dates of any such default upon the indenture securities and annually in each succeeding year that the indenture securities remain in default the trustee shall make a check of its holding of such securities in any of the above-mentioned capacities as of such dates. If the obligor upon the indenture securities fails to make payment in full of principal or interest under such indenture when and as the same becomes due and payable, and such failure continues for 30 days thereafter, the trustee shall make a prompt check of its holdings of such securities in any of the above-mentioned capacities as of the date of the expiration of such 30-day period, and after such date, notwithstanding the foregoing provisions of this paragraph, all such securities so held by the trustee, with sole or joint control over such securities vested in it, shall be considered as though beneficially owned by such trustee, for the purposes of paragraphs (6), (7), and (8) of this subsection; or

(10) except under the circumstances described in paragraphs (1), (3), (4), (5)

or (6) of section 311(b) of this title, the trustee shall be or shall become a creditor of the obligor.

For purposes of paragraph (1) of this subsection, and of section 316(a) of this title, the term "series of securities" or "series" means a series, class or group of securities issuable under an indenture pursuant to whose terms holders of one such series may vote to direct the indenture trustee, or otherwise take action pursuant to a vote of such holders, separately from holders of another such series:

Provided, That "series of securities" or "series" shall not include any series of securities issuable under an indenture if all such series rank equally and are wholly unsecured.

The specification of percentages in paragraphs (5) to (9), inclusive, of this subsection shall not be construed as indicating that the ownership of such percentages of the securities of a person is or is not necessary or sufficient to constitute direct or indirect control for the purposes of paragraph (3) or (7) of this subsection.

For the purposes of paragraphs (6), (7), (8), and (9) of this subsection -

(A) the terms "security" and "securities" shall include only such securities as are generally known as corporate securities, but shall not include any note or other evidence of indebtedness issued to evidence an obligation to repay moneys lent to a person by one or more banks, trust companies, or banking firms, or any certificate of interest or participation in any such note or evidence of indebtedness;

(B) an obligation shall be deemed to be in default when a default in payment of principal shall have continued for thirty days or more, and shall not have been cured; and

(C) the indenture trustee shall not be deemed the owner or holder of -

(i) any security which it holds as collateral security (as trustee or otherwise) for any obligation which is not in default as above defined, or

(ii) any security which it holds as collateral security under the indenture to be qualified, irrespective of any default thereunder, or

(iii) any security which it holds as agent for collection, or as custodian, escrow agent or depositary, or in any similar representative capacity.

For the purposes of this subsection, the term "underwriter" when used with reference to an obligor upon the indenture securities means every person who, within one year prior to the time as of which the determination is made, was an underwriter of any security of such obligor outstanding at the time of the determination.

Except in the case of a default in the payment of the principal of or interest on any indenture security, or in the payment of any sinking or purchase fund installment, the indenture trustee shall not be required to resign as provided by this subsection if such trustee shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that -

(i) the default under the indenture may be cured or waived during a reasonable period and under the procedures described in such application, and

(ii) a stay of the trustee's duty to resign will not be inconsistent with the interests of holders of the indenture securities. The filing of such an application shall automatically stay the performance of the duty to resign until the Commission orders otherwise.

Any resignation of an indenture trustee shall become effective only upon the appointment

of a successor trustee and such successor's acceptance of such an appointment.

(c) Applicability of Section. The Public Utility Holding Company Act of 1935 shall not be held to establish or authorize the establishment of any standards regarding the eligibility and qualifications of any trustee or prospective trustee under an indenture to be qualified under this title, or regarding the provisions to be included in any such indenture with respect to the eligibility and qualifications of the trustee thereunder, other than those established by the provisions of this section.

No. 253; 53 Stat. 1157), effective August 3, 1939; as amended by sections 406, 407, and 408 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2723), effective November 15, 1990]

Section 311 Preferential Collection of Claims Against Obligor

(a) Subject to the provisions of subsection (b) of this section, if the indenture trustee shall be, or shall become, a creditor, directly or indirectly, secured or unsecured, of an obligor upon the indenture securities, within three months prior to a default as defined in the last paragraph of this subsection, or subsequent to such a default, then, unless and until such a default shall be cured, such trustee shall set apart and hold in a special account for the benefit of the trustee individually and the indenture security holders -

(1) an amount equal to any and all reductions in the amount due and owing upon any claim as such creditor in respect of principal or interest, effected after the beginning of such three months' period and valid as against such obligor and its other creditors, except any such reduction resulting from the receipt or disposition of any property described in paragraph (2) of this subsection, or from the exercise of any right of set-off which the trustee could have exercised if a petition in bankruptcy had been filed by or against such obligor upon the date of such default; and

(2) all property received in respect of any claim as such creditor, either as security therefore, or in satisfaction or composition thereof, or otherwise, after the beginning of such three months' period, or an amount equal to the proceeds of any such property, if disposed of, subject, however, to the rights, if any, of such obligor and its other creditors in such property or such proceeds.

Nothing herein contained shall affect the right of the indenture trustee -

(A) to retain for its own account -

(i) payments made on account of any such claim by any person (other than such obligor) who is liable thereon, and

(ii) the proceeds of the bona fide sale of any such claim by the trustee to a third person, and

(iii) distributions made in cash, securities, or other property in respect of claims filed against such obligor in bankruptcy or receivership or in proceedings for reorganization pursuant to the Bankruptcy Act or applicable State law;

(B) to realize, for its own account, upon any property held by it as security for any such claim, if such property was so held prior to the beginning of such three months' period;

(C) to realize, for its own account, but only to the extent of the claim hereinafter mentioned, upon any property held by it as security for any such claim, if such claim was created after the beginning of such three months' period and such property period was received as security therefor

simultaneously with the creation thereof, and if the trustee shall sustain the burden of proving that at the time such property was so received the trustee had no reasonable cause to believe that a default as defined in the last paragraph of this subsection would occur within three months; or

(D) to receive payment on any claim referred to in paragraph (B) or (C), against the release of any property held as security for such claim as provided in paragraph (B) or (C), as the case may be, to the extent of the fair value of such property.

For the purposes of paragraphs (B), (C), and (D), property substituted after the beginning of such three months' period for property held as security at the time of such substitution shall, to the extent of the fair value of the property released, have the same status as the property released, and, to the extent that any claim referred to in any of such paragraphs is created in renewal of or in substitution for or for the purpose of repaying or refunding any preexisting claim of the indenture trustee as such creditor, such claim shall have the same status as such preexisting claim.

If the trustee shall be required to account, the funds and property held in such special account and the proceeds thereof shall be apportioned between the trustee and the indenture security holders in such manner that the trustee and the indenture security holders realize, as a result of payments from such special account and payments of dividends on claims filed against such obligor in bankruptcy or receivership or in proceedings for reorganization pursuant to the Bankruptcy Act or applicable State law, the same percentage of their respective claims, figured before crediting to the claim of the trustee anything on account of the receipt by it from such obligor of the funds and property in such special account and before crediting to the respective claims of the trustee and the indenture security holders dividends on claims filed against such obligor in bankruptcy or receivership or in proceedings for reorganization pursuant to the Bankruptcy Act or applicable State law, but after crediting thereon receipts on account of the indebtedness represented by their respective claims from all sources other than from such dividends and from the funds and property so held in such special account. As used in this paragraph, with respect to any claim, the term "dividends" shall include any distribution with respect to such claim, in bankruptcy or receivership or in proceedings for reorganization pursuant to the Bankruptcy Act or applicable State law, whether such distribution is made in cash, securities, or other property, but shall not include any such distribution with respect to the secured portion, if any, of such claim. The court in which such bankruptcy, receivership, or proceeding for reorganization is pending shall have jurisdiction -

(i) to apportion between the indenture trustee and the indenture security holders, in accordance with the provisions of this paragraph, the funds and property held in such special account and the proceeds thereof, or

(ii) in lieu of such apportionment, in whole or in part, to give to the provisions of this paragraph due consideration in determining the fairness of the distributions to be made to the indenture trustee and the indenture security holders with respect to their respective claims, in which event it shall not be necessary to liquidate or to appraise the value of any securities or other property held in such special account or as security for any such claim, or to make a specific allocation of such distributions as between the secured and unsecured portions of such claims, or otherwise to apply the provisions of this paragraph as a mathematical formula.

Any indenture trustee who has resigned or been removed after the beginning of such three months' period shall be subject to the provisions of this subsection as though such resignation or removal had not occurred. Any indenture trustee who has resigned or been removed prior to the beginning of such three months' period shall be subject to the provisions of this subsection if and only if the following conditions exist -

(i) the receipt of property or reduction of claim which would have given rise to the obligation to account, if such indenture trustee had continued as trustee, occurred after the beginning of such three months' period; and

(ii) such receipt of property or reduction of claim occurred within three months after such resignation or removal.

As used in this subsection, the term "default" means any failure to make payment in full of principal or interest, when and as the same becomes due and payable, under any indenture which has been qualified under this title, and under which the indenture trustee is trustee and the person of whom the indenture trustee is directly or indirectly a creditor is an obligor; and the term "indenture security holder" means all holders of securities outstanding under any such indenture under which any such default exists. In any case commenced under the Bankruptcy Act of July 1, 1898, or any amendment thereto enacted prior to November 6, 1978, all references to periods of three months shall be deemed to be references to periods of four months.

(b) The indenture to be qualified shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to contain provisions excluding from the operation of subsection (a) of this section a creditor relationship arising from -

(1) the ownership or acquisition of securities issued under any indenture, or any security or securities having a maturity of one year or more at the time of acquisition by the indenture trustee;

(2) advances authorized by a receivership or bankruptcy court of competent jurisdiction, or by the indenture, for the purpose of preserving the property subject to the lien of the indenture or of discharging tax liens or other prior liens or encumbrances on the trust estate, if notice of such advance and of the circumstances surrounding the making thereof is given to the indenture security holders at the time and in the manner provided in the indenture;

(3) disbursements made in the ordinary course of business in the capacity of trustee under an indenture, transfer agent, registrar, custodian, paying agent, fiscal agent or depositary, or other similar capacity.

(4) an indebtedness created as a result of services rendered or premises rented; or an indebtedness created as a result of goods or securities sold in a cash transaction as defined in the indenture;

(5) the ownership of stock or of other securities of a corporation organized under the provisions of section 25(a) of the Federal Reserve Act, as amended, which is directly or indirectly a creditor of an obligor upon the indenture securities; or

(6) the acquisition, ownership, acceptance, or negotiation of any drafts, bills of exchange, acceptances, or obligations which fall within the classification of self-liquidating paper as defined in the indenture.

(c) In the exercise by the Commission of any jurisdiction under the Public Utility Holding Company Act of 1935 regarding the issue or sale, by any registered holding company or a subsidiary company thereof, of any security of such issuer or seller or of any other company to a person which is trustee under an indenture or indentures of such issuer or seller or other company, or of a subsidiary or associate company or affiliate of such issuer or seller or other company (whether or not such indenture or indentures are qualified or to be qualified under this title), the fact that such trustee will thereby become a creditor, directly or indirectly, of any of the foregoing shall not constitute a ground for the Commission taking adverse action with respect to any application or declaration, or limiting the scope of any rule or regulation which would otherwise permit such transaction to take effect; but in any case in which such trustee is trustee under an indenture of the company of which it will thereby become a creditor, or of any subsidiary company thereof, this subsection shall not prevent the Commission from requiring (if such requirement would be authorized under the provisions of the Public Utility Holding Company Act of 1935) that such trustee, as such, shall effectively and irrevocably agree in writing, for the benefit of the holders from time to time of the securities from time to time outstanding under such indenture, to be bound by the provisions of this section, subsection (c) of section 315, and, in case of default (as such term is defined in such indenture), subsection (d) of section 315, as fully as though such provisions were included in such indenture. For the

purposes of this subsection the terms "registered holding company", "subsidiary company", "associate company", and "affiliate" shall have the respective meanings assigned to such terms in section 2(a) of the Public Utility Holding Company Act of 1935.

[Codified to 15 USC 77kkk]

[Source: Section 311 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 311 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1161), effective August 3, 1939; as amended by section 409 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2728), effective November 15, 1990]

Section 312 Bondholders Lists

(a) Each obligor upon the indenture securities shall furnish or cause to be furnished to the institutional trustee thereunder at stated intervals of not more than six months, and at such other times as such trustee may request in writing, all information in the possession or control of such obligor, or of any of its paying agents, as to the names and addresses of the indenture security holders, and requiring such trustee to preserve, in as current a form as is reasonably practicable, all such information so furnished to it or received by it in the capacity of paying agent.

(b) Within five business days after the receipt by the institutional trustee of a written application by any three or more indenture holders stating that the applicants desire to communicate with other indenture security holders with respect to their rights under such indenture or under the indenture securities, and accompanied by a copy of the form of proxy or other communication which such applicants propose to transmit, and by reasonable proof that each such applicant has owned an indenture security for a period of at least six months preceding the date of such application, such institutional trustee shall, at its election, either -

(1) afford to such applicants access to all information so furnished to or received by such trustee; or

(2) inform such applicants as to the approximate number of indenture security holders according to the most recent information so furnished to or received by such trustee, and as to the approximate cost of mailing to such indenture security holders the form of proxy or other communication, if any, specified in such application.

If such trustee shall elect not to afford to such applicants access to such information, such trustee shall, upon the written request of such applicants, mail to all such indenture security holders copies of the form of proxy or other communication which is specified in such request, with reasonable promptness after a tender to such trustee of the material to be mailed and of payment, or provision for the payment, of the reasonable expenses of such mailing, unless within five days after such tender, such trustee shall mail to such applicants, and file with the Commission together with a copy of the material to be mailed, a written statement to the effect that, in the opinion of such trustee, such mailing would be contrary to the best interests of the indenture security holders or would be in violation of applicable law. Such written statement shall specify the basis of such opinion. After opportunity for hearing upon the objections specified in the written statement so filed , the Commission may, and if demanded by such trustee or by such applicants shall, enter an order either sustaining one or more of such objections or refusing to sustain any of them. If the Commission shall enter an order refusing to sustain any of such objections, or if, after the entry of an order sustaining one or more of such objections, the Commission shall find, after notice and opportunity for hearing, that all objections so sustained have been met, and shall enter an order so declaring, such trustee shall mail copies of such material to all such indenture security holders with reasonable promptness after the entry of such order and the renewal of such tender.

(c) The disclosure of any such information as to the names and addresses of the indenture security holders in accordance with the provisions of this section, regardless of the source from which such information was derived, shall not be deemed to be a violation of any

existing law, or of any law hereafter enacted which does not specifically refer to this section, nor shall such trustee be held accountable by reason of mailing any material pursuant to a request made under subsection (b) of this section.

No. 253; 53 Stat. 1164), effective August 3, 1939; as amended by section 410 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2728), effective November 15, 1990]

Section 313 Reports by Indenture Trustee

(a) The indenture trustee shall transmit to the indenture security holders as hereinafter provided, at stated intervals of not more than 12 months, a brief report with respect to any of the following events which may have occurred within the previous 12 months (but if no such event has occurred within such period no report need be transmitted):

(1) any change to its eligibility and its qualifications under section 310;

(2) the creation of or any material change to a relationship specified in paragraph (1) through (10) of section 310(b);

(3) the character and amount of any advances made by it, as indenture trustee, which remain unpaid on the date of such report, and for the reimbursement of which it claims or may claim a lien or charge, prior to that of the indenture securities, on the trust estate or on property or funds held or collected by it as such trustee, if such advances so remaining unpaid aggregate more than one-half of 1 per centum of the principal amount of the indenture securities outstanding on such date;

(4) the amount, interest rate, and maturity date of all other indebtedness owing to it in its individual capacity, on the date of such report, by the obligor upon the indenture securities, with a brief description of any property held as collateral security therefor, except an indebtedness based upon a creditor relationship arising in any manner described in paragraphs (2), (3), (4), or (6) of subsection (b) of section 311;

(5) any change to the property and funds physically in its possession as indenture trustee on the date of such report;

(6) any change to any release, or release and substitution, of property subject to the lien of the indenture (and the consideration therefor, if any) which it has not previously reported;

(7) any additional issue of indenture securities which it has not previously reported; and

(8) any action taken by it in the performance of its duties under the indenture which it has not previously reported and which in its opinion materially affects the indenture securities or the trust estate, except action in respect of a default, notice of which has been or is to be withheld by it in accordance with an indenture provision authorized by subsection (b) of section 315.

(b) The indenture trustee shall transmit to the indenture security holders as hereinafter provided, within the times hereinafter specified, a brief report with respect to -

(1) the release, or release and substitution, of property subject to the lien of the indenture (and the consideration therefor, if any) unless the fair value of such property, as set forth in the certificate or opinion required by paragraph (1) of subsection (d) of section 314, is less than 10 per centum of the principal amount of indenture securities outstanding at the time of such release, or such release and substitution, such report to be so transmitted

within 90 days after such time; and

(2) the character and amount of any advances made by it as such since the date of the last report transmitted pursuant to the provisions of subsection (a) (or if no such report has yet been so transmitted, since the date of execution of the indenture), for the reimbursement of which it claims or may claim a lien or charge, prior to that of the indenture securities, on the trust estate or on property or funds held or collected by it as such trustee, and which it has not previously reported pursuant to this paragraph, if such advances remaining unpaid at any time aggregate more than 10 per centum of the principal amount of indenture securities outstanding at such time, such report to be so transmitted within 90 days after such time.

(c) Reports pursuant to this section shall be transmitted by mail -

(1) to all registered holders of indenture securities, as the names and addresses of such holders appear upon the registration books of the obligor upon the indenture securities;

(2) to such holders of indenture securities as have, within the two years preceding such transmission, filed their names and addresses with the indenture trustee for that purpose; and

(3) except in the case of reports pursuant to subsection (b) of this section, to all holders of indenture securities whose names and addresses have been furnished to or received by the indenture trustee pursuant to section 312.

(d) A copy of each such report shall, at the time of such transmission to indenture security holders, be filed with each stock exchange upon which the indenture securities are listed, and also with the Commission.

[Codified to 15 USC 77mmm]

[Source: Section 313 of title III of the Act of May 27, 1933 (Pub L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 313 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1165), effective August 3, 1939; as amended by sections 411 and 412 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2729), effective November 15, 1990]

Section 314 Reports by Obligor; Evidence of Compliance With Indenture Provisions

(a) Periodic Reports. Each person who, as set forth in the registration statement or application, is or is to be an obligor upon the indenture securities covered thereby shall -

(1) file with the indenture trustee copies of the annual reports and of the information, documents, and other reports (or copies of such portions of any of the foregoing as the Commission may by rules and regulations prescribe) which such obligor is required to file with the Commission pursuant to section 13 or section 15(d) of the Securities Exchange Act of 1934; or, if the obligor is not required to file information, documents, or reports pursuant to either of such sections, then to file with the indenture trustee and the Commission, in accordance with rules and regulations prescribed by the Commission, such of the supplementary and periodic information, documents, and reports which may be required pursuant to section 13 of the Securities Exchange Act of 1934, in respect of a security listed and registered on a national securities exchange as may be prescribed in such rules and regulations;

(2) file with the indenture trustee and the Commission, in accordance with rules and regulations prescribed by the Commission, such additional information, documents, and reports with respect to compliance by such obligor with the conditions and covenants provided for in the indenture, as may be required by such rules and regulations, including, in the case of annual reports, if required by such rules and regulations, certificates or

opinions of independent public accountants, conforming to the requirements of subsection (e) of this section, as to compliance with conditions or covenants, compliance with which is subject to verification by accountants, but no such certificate or opinion shall be required as to any matter specified in clauses (A), (B), or (C) of paragraph (3) of subsection (c);

(3) transmit to the holders of the indenture securities upon which such person is an obligor, in the manner and to the extent provided in subsection (c) of section 313, such summaries of any information, documents, and reports required to be filed by such obligor pursuant to the provisions of paragraph (1) or (2) of this subsection as may be required by rules and regulations prescribed by the Commission; and

(4) furnish to the indenture trustee, not less often than annually, a brief certificate from the principal executive officer, principal financial officer or principal accounting officer as to his or her knowledge of such obligor's compliance with all conditions and covenants under the indenture. For purposes of this paragraph, such compliance shall be determined without regard to any period of grace or requirement of notice provided under the indenture.

The rules and regulations prescribed under this subsection shall be such as are necessary or appropriate in the public interest or for the protection of investors, having due regard to the types of indentures, and the nature of business of the class of obligors affected thereby, and the amount of indenture securities outstanding under such indentures, and, in the case of any such rules and regulations prescribed after the indentures to which they apply have been qualified under this title, the additional expense, if any, of complying with such rules and regulations. Such rules and regulations may be prescribed either before or after qualification becomes effective as to any such indenture.

(b) Evidence of Recording Indenture. If the indenture to be qualified is or is to be secured by the mortgage or pledge of property, the obligor upon the indenture securities shall furnish to the indenture trustee -

(1) promptly after the execution and delivery of the indenture, an opinion of counsel (who may be of counsel for such obligor) either stating that in the opinion of such counsel the indenture has been properly recorded and filed so as to make effective the lien intended to be created thereby, and reciting the details of such action, or stating that in the opinion of such counsel no such action is necessary to make such lien effective; and

(2) at least annually after the execution and delivery of the indenture, an opinion of counsel (who may be of counsel for such obligor) either stating that in the opinion of such counsel such action has been taken with respect to the recording, filing, rerecording, and refiling of the indenture as is necessary to maintain the lien of such indenture, and reciting the details of such action, or stating that in the opinion of such counsel no such action is necessary to maintain such lien.

(c) Evidence of Compliance With Conditions Precedent. The obligor upon the indenture securities shall furnish to the indenture trustee evidence of compliance with the conditions precedent, if any, provided for in the indenture (including any covenants compliance with which constitutes a condition precedent) which relate to the authentication and delivery of the indenture securities, to the release or the release and substitution of property subject to the lien of the indenture, to the satisfaction and discharge of the indenture, or to any other action to be taken by the indenture trustee at the request or upon the application of such obligor. Such evidence shall consist of the following:

(1) certificates or opinions made by officers of such obligor who are specified in the indenture, stating that such conditions precedent have been complied with;

(2) an opinion of counsel (who may be of counsel for such obligor) stating that in his opinion such conditions precedent have been complied with; and

(3) in the case of conditions precedent compliance with which is subject to verification by accountants (such as conditions with respect to the preservation of specified ratios, the amount of net quick assets, negative-pledge clauses, and other similar specific conditions), a certificate or opinion of an accountant, who, in the case of any such conditions precedent to the authentication and delivery of indenture securities, and not otherwise, shall be an independent public accountant selected or approved by the indenture trustee in the exercise of reasonable care, if the aggregate principal amount of such indenture securities and of other indenture securities authenticated and delivered since the commencement of the then current calendar year (other than those with respect to which a certificate or opinion of an accountant is not required or with respect to which a certificate or opinion of an independent public accountant has previously been furnished) is 10 per centum o r more of the aggregate amount of the indenture securities at the time outstanding; but no certificate or opinion need be made by any person other than an officer or employee of such obligor who is specified in the indenture, as to -

(A) dates or periods not covered by annual reports required to be filed by the obligor, in the case of conditions precedent which depend upon a state of facts as of a date or dates or for a period or periods different from that required to be covered by such annual reports, or

(B) the amount and value of property additions, except as provided in paragraph (3) of subsection (d), or (C) the adequacy of depreciation, maintenance, or repairs.

(d) Certificates of Fair Value. If the indenture to be qualified is or is to be secured by the mortgage or pledge of property or securities, the obligor upon the indenture securities shall furnish to the indenture trustee a certificate or opinion of an engineer, appraiser, or other expert as to the fair value -

(1) of any property or securities to be released from the lien of the indenture, which certificate or opinion shall state that in the opinion of the person making the same the proposed release will not impair the security under such indenture in contravention of the provisions thereof, and requiring further that such certificate or opinion shall be made by an independent engineer, appraiser, or other expert, if the fair value of such property or securities and of all other property or securities released since the commencement of the then current calendar year, as set forth in the certificates or opinions required by this paragraph, is 10 per centum or more of the aggregate principal amount of the indenture securities at the time outstanding; but such a certificate or opinion of an independent engineer, appraiser, or other expert shall not be required in the case of any release of property or securities, if the fair value thereof as set forth in the certificate or opinion required by this paragraph is less than $25,000 or less than 1 per centum of the aggregate principal amount of the indenture securities at the time outstanding;

(2) to such obligor of any securities (other than indenture securities and securities secured by a lien prior to the lien of the indenture upon property subject to the lien of the indenture), the deposit of which with the trustee is to be made the basis for the authentication and delivery of indenture securities, the withdrawal of cash constituting a part of the trust estate or the release of property or securities subject to the lien of the indenture, and requiring further that if the fair value to such obligor of such securities and of all other such securities made the basis of any such authentication and delivery, withdrawal, or release since the commencement of the then current calendar year, as set forth in the certificates or opinions required by this paragraph, is 10 per centum or more of the aggregate principal amount of the indenture securities at the time outstanding, such certificate or opinion shall be made

by an independent engineer, appraiser, or other expert and, in the case of the authentication and delivery of indenture securities, shall cover the fair value to such obligor of all other such securities so deposited since the commencement of the current calendar year as to which a certificate or opinion of an independent engineer, appraiser, or other expert has not previously been furnished; but such a certificate of an independent engineer, appraiser, or other expert shall not be required with respect to any securities so deposited, if the fair value thereof to such obligor as set forth in the certificate or opinion required by this paragraph is less than $25,000 or less than 1 per centum of the aggregate principal amount of the indenture securities at the time outstanding; and

(3) to such obligor of any property the subjection of which to the lien of the indenture is to be made the basis for the authentication and delivery of indenture securities, the withdrawal of cash constituting a part of the trust estate, or the release of property or securities subject to the lien of the indenture, and requiring further that if

(A) within six months prior to the date of acquisition thereof by such obligor, such property has been used or operated, by a person or persons other than such obligor, in a business similar to that in which it has been or is to be used or operated by such obligor, and

(B) the fair value to such obligor of such property as set forth in such certificate or opinion is not less than $25,000 and not less than 1 per centum of the aggregate principal amount of the indenture securities at the time outstanding, such certificate or opinion shall be made by an independent engineer, appraiser, or other expert and, in the case of the authentication and delivery of indenture securities, shall cover the fair value to the obligor of any property so used or operated which has been so subjected to the lien of the indenture since the commencement of the then current calendar year, and as to which a certificate or opinion of an independent engineer, appraiser, or other expert has not previously been furnished.

The indenture to be qualified shall automatically be deemed (unless it is expressly provided therein that such provision is excluded) to provide that any such certificate or opinion may be made by an officer or employee of the obligor upon the indenture securities who is duly authorized to make such certificate or opinion by the obligor from time to time, except in cases in which this subsection requires that such certificate or opinion be made by an independent person. In such cases, such certificate or opinion shall be made by an independent engineer, appraiser, or other expert selected or approved by the indenture trustee in the exercise of reasonable care.

(e) Recitals as to Basis of Certificate or Opinion. Each certificate or opinion with respect to compliance with a condition or covenant provided for in the indenture (other than certificates provided pursuant to subsection (a)(4) of this section) shall include -

(1) a statement that the person making such certificate or opinion has read such covenant or condition;

(2) a brief statement as to the nature and scope of the examination or investigation upon which the statements or opinions contained in such certificate or opinion are based;

(3) a statement that, in the opinion of such person, he has made such examination or investigation as is necessary to enable him to express an informed opinion as to whether or not such covenant or condition has been complied with; and

(4) a statement as to whether or not, in the opinion of such person, such condition or covenant has been complied with.

(f) Parties May Provide for Additional Evidence. Nothing in this section shall be construed either as requiring the inclusion in the indenture to be qualified of provisions that the obligor upon the indenture securities shall furnish to the indenture trustee any other evidence of compliance with the conditions and covenants provided for in the indenture than the evidence specified in this section, or as preventing the inclusion of such provisions in such indenture, if the parties so agree.

[Codified to 15 USC 77nnn]

[Source: Section 314 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 314 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1167), effective August 3, 1939; as amended by section 413 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2729), effective November 15, 1990]

Section 315 Duties and Responsibility of the Trustee

(a) Duties Prior to Default. The indenture to be qualified shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to provide that, prior to default (as such term is defined in such indenture) -

> (1) the indenture trustee shall not be liable except for the performance of such duties as are specifically set out in such indenture; and
>
> (2) the indenture trustee may conclusively rely, as to the truth of the statements and the correctness of the opinions expressed therein, in the absence of bad faith on the part of such trustee, upon certificates or opinions conforming to the requirements of the indenture;

but the indenture trustee shall examine the evidence furnished to it pursuant to section 314 to determine whether or not such evidence conforms to the requirements of the indenture.

(b) Notice of Defaults. The indenture trustee shall give to the indenture security holders, in the manner and the extent provided in subsection (c) of section 313, notice of all defaults known to the trustee, within ninety days after the occurrence thereof; Provided That such indenture shall automatically be deemed (unless it is expressly provided therein that such provision is excluded) to provide that, except in the case of default in the payment of the principal of or interest on any indenture security, or in the payment of any sinking or purchase fund installment, the trustee shall be protected in withholding such notice if and so long as the board of directors, the executive committee, or a trust committee of directors and/or responsible officers, of the trustee in good faith determine that the withholding of such notice is in the interests of the indenture security holders.

(c) Duties of the Trustee in Case of Default. The indenture trustee shall exercise in case of default (as such term is defined in such indenture) such of the rights and powers vested in it by such indenture, and to use the same degree of care and skill in their exercise, as a prudent man would exercise or use under the circumstances in the conduct of his own affairs.

(d) Responsibility of the Trustee. The indenture to be qualified shall not contain any provisions relieving the indenture trustee from liability for its own negligent action, its own negligent failure to act, or its own willful misconduct, except that -

> (1) such indenture shall automatically be deemed (unless it expressly provided therein that any such provision is excluded) to contain the provisions authorized by paragraphs (1) and (2) of subsection (a) of this section;
>
> (2) such indenture shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to contain provisions protecting the indenture trustee from liability for any error of judgment made in good faith by a responsible officer or officers of such trustee, unless it shall be proved that such trustee was negligent in ascertaining the pertinent facts;

and

(3) such indenture shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to contain provisions protecting the indenture trustee with respect to any action taken or omitted to be taken by it in good faith in accordance with the direction of the holders of not less than a majority in principal amount of the indenture securities at the time outstanding (determined as provided in subsection (a) of section 316) relating to the time, method, and place of conducting any proceeding for any remedy available to such trustee, or exercising any trust or power conferred upon such trustee, under such indenture.

(e) Undertaking for Costs. The indenture to be qualified shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to contain provisions to the effect that all parties thereto, including the indenture security holders, agree that the court may in its discretion require, in any suit for the enforcement of any right or remedy under such indenture, or in any suit against the trustee for any action taken or omitted by it as trustee, the filing by any party litigant in such suit of an undertaking to pay the costs of such suit, and that such court may in its discretion assess reasonable costs, including reasonable attorneys' fees, against any party litigant in such suit, having due regard to the merits and good faith of the claims or defenses made by such party litigant: Provided, That the provisions of this subsection shall not apply to any suit instituted by such trustee, to any suit instituted by any indenture security holder, or group of indenture security holders, holding in the aggregate more than 10 per centum in principal amount of the indenture securities outstanding, or to any suit instituted by any indenture security holder for the enforcement of the payment of the principal of or interest on any indenture security, on or after the respective due dates expressed in such indenture security.

[Source: Section 315 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933), as added by section 315 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1171), effective August 3, 1939; as amended by section 414 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2730), effective November 15, 1990]

Section 316 Direction and Waivers by Bondholders; Prohibition of Impairment of Holder's Right to Payment

(a) The indenture to be qualified -

(1) shall automatically be deemed (unless it is expressly provided therein that any such provision is excluded) to contain provisions authorizing the holders of not less than a majority in principal amount of the indenture securities or if expressly specified in such indenture, of any series of securities at the time outstanding -

(A) to direct the time, method, and place of conducting any proceeding for any remedy available to such trustee, or exercising any trust or power conferred upon such trustee, under such indenture, or

(B) on behalf of the holders of all such indenture securities, to consent to the waiver of any past default and its consequences; or

(2) may contain provisions authorizing the holders of not less than 75 per centum in principal amount of the indenture securities or if expressly specified in such indenture, of any series of securities at the time outstanding to consent on behalf of the holders of all such indenture securities to the postponement of any interest payment for a period not exceeding three years from its due date.

For the purposes of this subsection and paragraph (3) of subsection (d) of section 315, in determining whether the holders of the required principal amount of indenture securities have concurred in any such direction or consent, indenture securities owned by any obligor upon the indenture securities, or by any person directly or indirectly controlling or controlled by or under direct or indirect common control with any such obligor, shall be disregarded, except that for the purpose of determining whether the indenture trustee shall be protected in relying on any such direction or consent, only indenture securities which such trustee knows are so owned shall be so disregarded.

(b) Notwithstanding any other provision of the indenture to be qualified, the right of any holder of any indenture security to receive payment of the principal of and interest on such indenture security, on or after the respective due dates expressed in such indenture security, or to institute suit for the enforcement of any such payment on or after such respective dates, shall not be impaired or affected without the consent of such holder, except as to a postponement of an interest payment consented to as provided in paragraph (2) of subsection (a), and except that such indenture may contain provisions limiting or denying the right of any such holder to institute any such suit, if and to the extent that the institution or prosecution thereof or the entry of judgment therein would, under applicable law, result in the surrender, impairment, waiver, or loss of the lien of such indenture upon any property subject to such lien.

(c) The obligor upon any indenture qualified under this title may set a record date for purposes of determining the identity of indenture security holders entitled to vote or consent to any action by vote or consent authorized or permitted by subsection (a) of this section. Unless the indenture provides otherwise, such record date shall be the later of 30 days prior to the first solicitation of such consent or the date of the most recent list of holders furnished to the trustee pursuant to section 312 of this title prior to such solicitation.

[Source: Section 316 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933), as added by section 316 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1172), effective August 3, 1939; as amended by section 415 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2731), effective November 15, 1990]

Section 317 Special Powers of Trustee; Duties of Paying Agents

(a) The indenture trustee shall be authorized -

(1) in the case of a default in payment of the principal of any indenture security, when and as the same shall become due and payable, or in the case of a default in payment of the interest on any such security, when and as the same shall become due and payable and the continuance of such default for such period as may be prescribed in such indenture, to recover judgment, in its own name and as trustee of an express trust, against the obligor upon the indenture securities for the whole amount of such principal and interest remaining unpaid; and

(2) to file such proofs of claim and other papers or documents as may be necessary or advisable in order to have the claims of such trustee and of the indenture security holders allowed in any judicial proceedings relative to the obligor upon the indenture securities, its creditors, or its property.

(b) Each paying agent shall hold in trust for the benefit of the indenture security holders or the indenture trustee all sums held by such paying agent for the payment of the principal of or interest on the indenture securities, and shall give to such trustee notice of any default by an obligor upon the indenture securities in the making of any such payment.

title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2731), effective November 15, 1990]

Section 318 Effect of Prescribed Indenture Provisions

(a) if any provision of the indenture to be qualified limits, qualifies, or conflicts with the duties impose by operation of subsection (c) of this section, the imposed duties shall control.

(b) The indenture to be qualified may contain, in addition to provision specifically authorized under this title to be included therein, any other provisions the inclusion of which is not in contravention of any provision of this title.

(c) The provisions of sections 310 to and including 317 that impose duties on any person (including provisions automatically deemed included in an indenture unless the indenture provides that such provisions are excluded) are a part of and govern every qualified indenture, whether or not physically contained therein, shall be deemed retroactively to govern each indenture heretofore qualified, and prospectively to govern each indenture hereafter qualified under this title and shall be deemed retroactively to amend and supersede inconsistent provisions in each such indenture heretofore qualified. The foregoing provisions of this subsection shall not be deemed to effect the inclusion (by retroactive amendment or otherwise) in the text of any indenture heretofore qualified of any of the optional provisions contemplated by section 310(b)(1), 311(b), 314(d), 315(a), 315(b), 315(d), 315(e), or 316(a)(1).

[Source: Section 318 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 318 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1173), effective August 3, 1939; as amended by section 417 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2731), effective November 15, 1990]

Section 319 Rules, Regulations, and Orders

(a) The Commission shall have authority from time to time to make, issue, amend, and rescind such rules and regulations and such orders as it may deem necessary or appropriate in the public interest or for the protection of investors to carry out the provisions of this title, including rules and regulations defining accounting, technical, and trade terms used in this title. Among other things, the Commission shall have authority -

(1) by rules and regulations, to prescribe for the purposes of section 310(b) the method (to be fixed in indentures to be qualified under this title) of calculating percentages of voting securities and other securities;

(2) by the rules and regulations, to prescribe the definitions of the terms "cash transaction" and "self-liquidating paper" which shall be included in indentures to be qualified under this title, which definitions shall include such of the creditor relationships referred to in paragraphs (4) and (6) of subsection (b) of section 311 as to which the Commission determines that the application of subsection (a) of such section is not necessary in the public interest or for the protection of investors, having due regard for the purposes of such subsection; and

(3) for the purposes of this title, to prescribe the form or forms in which information required in any statement, application, report, or other document filed with the Commission shall be set forth.

For the purpose of its rules or regulations the Commission may classify persons, securities, indentures, and other matters within its jurisdiction and prescribe different requirements for different classes of persons, securities, indentures, or matters.

(b) Subject to the provisions of the Federal Register Act and regulations prescribed under the authority thereof, the rules and regulations of the Commission under this title shall be

effective upon publication in the manner which the Commission shall prescribe, or upon such later date as may be provided in such rules and regulations.

(c) No provision of this title imposing any liability shall apply to any act done or omitted in good faith in conformity with any rule, regulation, or order of the Commission, notwithstanding that such rule, regulation, or order may, after such act or omission, be amended or rescinded or be determined by judicial or other authority to be invalid for any reason.

[Source: Section 319 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 319 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1173), effective August 3, 1939]

Section 320 Hearings by Commission

Hearings may be public and may be held before the Commission, any member or members thereof, or any officer or officers of the Commission designated by it, and appropriate records thereof shall be kept.

[Codified to 15 USC 77ttt]

[Source: Section 320 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 320 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1174), effective August 3, 1939]

Section 321 Special Powers of the Commission

(a) For the purpose of any investigation or any other proceeding which, in the opinion of the Commission, is necessary and proper for the enforcement of this title, any member of the Commission, or any officer thereof designated by it, is empowered to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, contracts, agreements, or other records which the Commission deems relevant or material to the inquiry. Such attendance of witnesses and the production of any such books, papers, correspondence, memoranda, contracts, agreements, or other records may be required from any place in the United States or in any Territory at any designated place of investigation or hearing. In addition, the Commission shall have the powers with respect to investigations and hearings, and with respect to the enforcement of, and offenses and violations under, this title and rules and regulations and orders prescribed under the authority thereof, provided in sections 20, 22(b), and 22(c) of the Securities Act of 1933.

(b) The Treasury Department, the Comptroller of the Currency, the Board of Governors of the Federal Reserve system, the Federal Reserve Banks, and the Federal Deposit Insurance Corporation are hereby authorized, under such conditions as they may prescribe, to make available to the Commission such reports, records, or other information as they may have available with respect to trustees or prospective trustees under indentures qualified or to be qualified under this title, and to make through their examiners or other employees for the use of the Commission, examinations of such trustees or prospective trustees. Every such trustee or prospective trustee shall, as a condition precedent to qualification of such indenture, consent that reports of examinations by Federal, State, Territorial, or District authorities may be furnished by such authorities to the Commission upon request therefore.

Notwithstanding any provision of this title, no report, record, or other information made available to the Commission under this subsection, no report of an examination made under this subsection for the use of the Commission, no report of an examination made of any trustee or prospective trustee by any Federal, State, Territorial, or District authority having jurisdiction to examine or supervise such trustee, no report made by any such trustee or prospective trustee to any such authority, and no correspondence between any such authority and any such trustee or prospective trustee, shall be divulged or made known or available by the Commission or any member, officer, agent, or employee thereof, to any person other than a member, officer, agent, or employee of the Commission: Provided, That the Commission may make available to the Attorney General of the United

States, in confidence, any information obtained from such records, reports of examination, other reports, or correspondence , and deemed necessary by the Commission, or requested by him, for the purpose of enabling him to perform his duties under this title.

(c) Any investigation of a prospective trustee, or any proceeding or requirement for the purpose of obtaining information regarding a prospective trustee, under any provision of this title, shall be limited -

> (1) to determining whether such prospective trustee is qualified to act as trustee under the provisions of subsection (b) of section 310;
>
> (2) to requiring the inclusion in the registration statement or application of information with respect to the eligibility of such prospective trustee under paragraph (1) of subsection (a) of such section 310; and statement or application of the most recent published report of condition of such prospective trustee, as described in paragraph (2) of such subsection (a), or, if the indenture does not contain the provision with respect to combined capital and surplus authorized by the last sentence of paragraph (2) of subsection (a) of such section 310, to determining whether such prospective trustee is eligible to act as such under such paragraph (2).

(d) The provisions of section 4(b) of the Securities Exchange Act of 1934 shall be applicable with respect to the power of the Commission -

> (1) to appoint and fix the compensation of such employees as may be necessary for carrying out its functions under this title, and
>
> (2) to lease and allocate such real property as may be necessary for carrying out its functions under this title.

No. 253; 53 Stat. 1174), effective August 3, 1939; as amended by section 104(b) of title I of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2714), effective November 15, 1990]

Section 322 Court Review of Orders; Jurisdiction of Offenses and Suits

(a) Orders of the Commission under this title (including orders pursuant to the provisions of sections 305(b) and 307(c)) shall be subject to review in the same manner, upon the same conditions, and to the same extent, as provided in section 9 of the Securities Act of 1933, with respect to orders of the Commission under such Act.

(b) Jurisdiction of offenses and violations under, and jurisdiction and venue of suits and actions brought to enforce any liability or duty created by, this title, or any rules or regulations or orders prescribed under the authority thereof, shall be as provided in section 22(a) of the Securities Act of 1933.

[Codified to 15 USC 77vvv]

[Source: Section 322 of title III of the Act of May 27, 1933 (Pub. L. No. 22; 48 Stat. 74), effective May 27, 1933, as added by section 322 of title III of the Act of August 3, 1939 (Pub. L. No. 253; 53 Stat. 1175), effective August 3, 1939; as amended by section 418 of title IV of the Act of November 15, 1990 (Pub. L. No. 101-550; 104 Stat. 2732), effective November 15, 1990]

Section 323 Liability for Misleading Statements

(a) Any person who shall make or cause to be made any statement in any application, report, or document filed with the Commission pursuant to any provisions of this title, or any rule, regulation, or order thereunder, which statement was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, or who shall omit to state any material fact required to be stated therein or

necessary to make the statements therein not misleading, shall be liable to any person (not knowing that such statement was false or misleading or of such omission) who, in reliance upon such statement or omission, shall have purchased or sold a security issued under the indenture to which such application, report, or document relates, for damages caused by such reliance, unless the person sued shall prove that he acted in good faith and had no knowledge that such statement was false or misleading or of such omission. A person seeking to enforce such liability may sue at law or in equity in any court of competent jurisdiction. In any such suit the court may, in its discretion, require an undertaking for the payment of the costs of such suit and assess reasonable costs, including reasonable attorney's fees, against either party litigant, having due regard to the merits and good faith of the suit or defense. No action shall be maintained to enforce any liability created under this section unless brought within one year after the discovery of the facts constituting the cause of action and within three years after such cause of action accrued.

(b) The rights and remedies provided by this title shall be in addition to any and all other rights and remedies that may exist under the Securities Act of 1933, or the Securities Exchange Act of 1934, or the Public Utility Holding Company Act of 1935, or otherwise at law or in equity; but no person permitted to maintain a suit for damages under the provisions of this title shall recover, through satisfaction of judgment in one or more actions, a total amount in excess of his actual damages on account of the act complained of.

Section 324 Unlawful Representations

It shall be unlawful for any person in offering, selling, or issuing any security to represent or imply in any manner whatsoever that any action or failure to act by the Commission in the administration of this title means that the Commission has in any way passed upon the merits of, or given approval to, any trustee, indenture or security, or any transaction or transactions therein, or that any such action or failure to act with regard to any statement or report filed with or examined by the Commission pursuant to this title or any rule, regulation, or order thereunder, has the effect of a finding by the Commission that such statement or report is true and accurate on its face or that it is not false or misleading.

No. 253; 53 Stat. 1176), effective August 3, 1939; as amended by section 305 of title III of the Act of August 10, 1954 (Pub. L. No. 577; 68 Stat. 688), effective October 9, 1954]

Section 325 Penalties

Any person who willfully violates any provision of this title or any rule, regulation, or order thereunder, or any person who willfully, in any application, report, or document filed or required to be filed under the provisions of this title or any rule, regulation, or order thereunder, makes any untrue statement of a material fact or omits to state any material fact required to be stated therein or necessary to make the statements therein not misleading, shall upon conviction be fined not more than $10,000 or imprisoned not more than five years, or both.

No. 253; 53 Stat. 1177), effective August 3, 1939; as amended by section 27(d) of the Act of June 4, 1975 (Pub. L. No. 94-29; 89 Stat. 163), effective June 5, 1975]

Section 326 Effect on Existing Law

Except as otherwise expressly provided, nothing in this title shall affect -

(1) the jurisdiction of the Commission under the Securities Act of 1933, or the Securities Exchange Act of 1934, or the Public Utility Holding Company Act of 1935, over any person, security, or contract, or

(2) the rights, obligations, duties, or liabilities of any person under such Acts; nor shall anything in this title affect the jurisdiction of any other commission, board, agency, or officer of the United States or of any State or political subdivision of any State, over any person or security, insofar as such jurisdiction does not conflict with any provision of this title or any rule, regulation, or order thereunder.

SEC Rules Under Section 304 Of The Trust Indenture Act Of 1939

(17 CFR 260.4a-1 and -2)

Section 260.4a-1 Exempted securities under section 304(a)(8).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security which has been or is to be issued otherwise than under an indenture. The same issuer may not claim this exemption within a period of twelve consecutive months for more than $5,000,000 aggregate principal amount of any securities of the same issuer. [Codified to 17 CFR 260.4a-1] (Issued 12-31-81 at 46 FR 63256, Revised 8-13-92 at 57 FR 36501.)

Section 260.4a-2 Exempted securities under section 304(d).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security that has been issued or will be issued in accordance with the provisions of Regulation A (17 CFR 230.251 et seq.) under the Securities Act of 1933. [Codified to 17 CFR 260.4a-2] (Issued 8-13-92 at 57 FR 36501.)

Section 260.4a-3 Exempted securities under section 304(a)(9).

The provisions of the Trust Indenture Act of 1939 shall not apply to any security which has been or is to be issued under an indenture which limits the aggregate principal amount of securities at any time outstanding thereunder to $10,000,000 or less, but this exemption shall not be applied within a period of thirty-six consecutive months to more than $10,000,000 aggregate principal amount of securities of the

same issuer. [Codified to 17 CFR 260.4a-3, formerly 17 CFR 260.4a-2] (Issued 12-31-81 at 46 FR 63256, Revised 8-13-92 at 57 FR 36501.)

SEC Regulation A - Conditional Small Issues Exemption

Codified to 17 CFR 230.251

(Issued 8-13-92 at 57 FR 36468)

Section 230.251 Scope of Exemption.

A public offer or sale of securities that meets the following terms and conditions shall be exempt under section 3(b) from the registration requirements of the Securities Act of 1933 (the "Securities Act"):

(a) Issuer. The issuer of the securities:

(1) is an entity organized under the laws of the United States or Canada, or any State, Province, Territory or possession thereof, or the District of Columbia, with its principal place of business in the United States or Canada;

(2) is not subject to section 13 or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") (15 USC 78a et seq.) immediately before the offering;

(3) is not a development stage company that either has no specific business plan or purpose, or has indicated that its business plan is to merge with an unidentified company or companies;

(4) is not an investment company registered or required to be registered under the Investment Company Act of 1940 (15 USC 80a-1 et seq.);

(5) is not issuing fractional undivided interests in oil or gas rights as defined in oil or gas rights as defined in § 230.300, or a similar interest in other mineral rights; and

(6) is not disqualified because of § 230.262.

Regulation § 9.12 Self-Dealing and Conflicts of Interest

Codified to 12 CFR 9.12

Federal Register December 30, 1996 (61 FR 68543)

§ Section 9.12 Self-Dealing and Conflicts of Interest

(a) for fiduciary accounts

(1) In general. Unless authorized by applicable law, a national bank may not invest funds of a fiduciary account for which a national bank has investment discretion in the stock or obligations of, or in assets acquired from: the bank or any of its directors, officers, or employees; affiliates of the bank or any of their directors, officers, or employees; or individuals or organizations with whom there exists an interest that might affect the exercise of the best judgment of the bank.

(2) Additional securities investments. If retention of stock or obligations of the bank or its affiliates in a fiduciary account is consistent with applicable law, the bank may:

(i) Exercise rights to purchase additional stock (or securities convertible into additional stock) when offered pro rata to stockholders; and

(ii) Purchase fractional shares to complement fractional shares acquired through the exercise of rights or the receipt of a stock dividend resulting in fractional share holdings.

(b) Loans, sales, or other transfers from fiduciary accounts

(1) In general. A national bank may not lend, sell, or otherwise transfer assets of a fiduciary account for which a national bank has investment discretion to the bank or any of its directors, officers, or employees, or to affiliates of the bank or any of their directors, officers, or employees, or to individuals or organizations with whom there exists an interest that might affect the exercise of the best judgment of the bank, unless:

(i) The transaction is authorized by applicable law;

(ii) Legal counsel advises the bank in writing that the bank has incurred, in its fiduciary capacity, a contingent or potential liability, in which case the bank, upon the sale or transfer of assets, shall reimburse the fiduciary account in cash at the greater of book or market value of the assets;

(iii) As provided in §9.18(b)(8)(iii) for defaulted investments; or

(iv) Required in writing by the OCC.

(2) Loans of funds held as trustee. Notwithstanding paragraph (b)(1) of this section, a national bank may not lend to any of its directors, officers, or employees any funds held in trust, except with respect to employee benefit plans in accordance with the exemptions found in section 408 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1108).

(c) Loans to fiduciary accounts.

A national bank may make a loan to a fiduciary account and may hold a security interest in assets of the account if the transaction is fair to the account and is not prohibited by applicable law.

(d) Sales between fiduciary accounts.

A national bank may sell assets between any of its fiduciary accounts if the transaction is fair to both accounts and is not prohibited by applicable law.

(e) Loans between fiduciary accounts.

A national bank may make a loan between any of its fiduciary accounts if the transaction is fair to both accounts and is not prohibited by applicable law.

Regulation § 9.18 Collective Investment Funds

Codified to 12 CFR 9.18

Federal Register December 30, 1996 (61 FR 68543)

§ Section 9.18 Collective Investment Funds

(a) In general. Where consistent with applicable law, a national bank may invest assets that it holds as fiduciary in the following collective investment funds: [foot note 1]

(1) A fund maintained by the bank, or by one or more affiliated banks , [foot note 2] exclusively for the collective investment and reinvestment of money contributed to the fund by the bank, or by one or more affiliated banks, in its capacity as trustee, executor, administrator, guardian, or custodian under a uniform gifts to minors act.

(2) A fund consisting solely of assets of retirement, pension, profit sharing, stock bonus or other trusts that are exempt from Federal income tax.

(i) A national bank may invest assets of retirement, pension, profit sharing, stock bonus, or other trusts exempt from Federal income tax and that the bank holds in its capacity as trustee in a collective investment fund established under paragraph (a)(1) or (a)(2) of this section.

(ii) A national bank may invest assets of retirement, pension, profit sharing, stock bonus, or other employee benefit trusts exempt from Federal income tax and that the bank holds in any capacity (including agent), in a collective investment fund established under this paragraph (a)(2) if the fund itself qualifies for exemption from Federal income tax.

(b) Requirements. A national bank administering a collective investment fund authorized under paragraph (a) of this section shall comply with the following requirements:

(1) Written plan. The bank shall establish and maintain each collective investment fund in accordance with a written plan (Plan) approved by a resolution of the bank's board of directors or by a committee authorized by the board. The bank shall make a copy of the Plan available for public inspection at its main office during all banking hours, and shall provide a copy of the Plan to any person who requests it. The Plan must contain appropriate provisions, not inconsistent with this part, regarding the manner in which the bank will operate the fund, including provisions relating to:

(i) Investment powers and policies with respect to the fund;

(ii) Allocation of income, profits, and losses;

(iii) Fees and expenses that will be charged to the fund and to participating accounts;

(iv) Terms and conditions governing the admission and withdrawal of participating accounts;

(v) Audits of participating accounts;

(vi) Basis and method of valuing assets in the fund;

(vii) Expected frequency for income distribution to participating accounts;

(viii) Minimum frequency for valuation of fund assets;

(ix) Amount of time following a valuation date during which the valuation must be made;

(x) Bases upon which the bank may terminate the fund; and

(xi) Any other matters necessary to define clearly the rights of participating accounts.

(2) Fund management. A bank administering a collective investment fund shall have exclusive management thereof, except as a prudent person might delegate responsibilities to others . [foot note 3]

(3) Proportionate interests. Each participating account in a collective investment fund must have a proportionate interest in all the fund's assets.

(4) Valuation

(i) Frequency of valuation. A bank administering a collective investment fund shall determine the value of the fund's assets at least once every three months. However, in the case of a fund described in paragraph (a)(2) of this section that is invested primarily in real estate or other assets that are not readily marketable, the bank shall determine the value of the fund's assets at least once each year.

(ii) Method of valuation

(A) In general. Except as provided in paragraph (b)(4)(ii)(B) of this section, a bank shall value each fund asset at market value as of the date set for valuation, unless the bank cannot readily ascertain market value, in which case the bank shall use a fair value determined in good faith.

(B) Short-term investment funds. A bank may value a fund's assets on a cost, rather than market value, basis for purposes of admissions and withdrawals, if the Plan requires the bank to:

(1) Maintain a dollar-weighted average portfolio maturity of 90 days or less;

(2) Accrue on a straight-line basis the difference between the cost and anticipated principal receipt on maturity; and

(3) Hold the fund's assets until maturity under usual circumstances.

(5) Admission and withdrawal of accounts

(i) In general. A bank administering a collective investment fund shall admit an account to or withdraw an account from the fund only on the basis of the valuation described in paragraph (b)(4) of this section.

(ii) Prior request or notice. A bank administering a collective investment fund may admit an account to or withdraw an account from a collective investment fund only if the bank has approved a request for or a notice of intention of taking that action on or before the valuation date on which the admission or withdrawal is based. No requests or notices may be canceled or countermanded after the valuation date.

(iii) Prior notice period for withdrawals from funds with assets not readily marketable. A bank administering a collective investment fund described in paragraph (a)(2) of this section that is invested primarily in real estate or other assets that are not readily marketable, may require a prior notice period, not to exceed one year, for withdrawals.

(iv) Method of distributions. A bank administering a collective investment fund shall make distributions to accounts withdrawing from the fund in cash, ratably in kind, a combination of cash and ratably in kind, or in any other manner consistent with applicable law in the state in which the bank maintains the fund.

(v) Segregation of investments. If an investment is withdrawn in kind from a collective investment fund for the benefit of all participants in the fund at the time of the withdrawal but the investment is not distributed ratably in kind, the bank shall segregate and administer it for the benefit ratably of all participants in the collective investment fund at the time of withdrawal.

(6) Audits and financial reports

(i) Annual audit. At least once during each 12-month period, a bank administering a collective investment fund shall arrange for an audit of the collective investment fund by auditors responsible only to the board of directors of the bank. [foot note 4]

(ii) Financial report. At least once during each 12-month period, a bank administering a collective investment fund shall prepare a financial report of the fund based on the audit required by paragraph (b)(6)(i) of this section. The report must disclose the fund's fees and expenses in a manner consistent with applicable law in the state in which the bank maintains the fund. This report must contain a list of investments in the fund showing the cost and current market value of each investment, and a statement covering the period after the previous report showing the following (organized by type of investment):

(A) A summary of purchases (with costs);

(B) A summary of sales (with profit or loss and any other investment changes);

(C) Income and disbursements; and

(D) An appropriate notation of any investments in default.

(iii) Limitation on representations. A bank may include in the financial report a description of the fund's value on previous dates, as well as its income and disbursements during previous accounting periods. A bank may not publish in the financial report any predictions or representations as to future performance. In addition, with respect to funds described in paragraph (a)(1) of this section, a bank may not publish the performance of individual funds other than those administered by the bank or its affiliates.

(iv) Availability of the report. A bank administering a collective investment fund shall provide a copy of the financial report, or shall provide notice that a copy of the report is available upon request without charge, to each person who ordinarily would receive a regular periodic accounting with respect to each participating account. The bank may provide a copy of the financial report to prospective customers. In addition, the bank shall provide a copy of the report upon request to any person for a reasonable charge.

(7) Advertising restriction. A bank may not advertise or publicize any fund authorized under paragraph (a)(1) of this section, except in connection with the advertisement of the general fiduciary services of the bank.

(8) Self-dealing and conflicts of interest. A national bank administering a collective investment fund must comply with the following (in addition to § 9.12):

(i) Bank interests. A bank administering a collective investment fund may not have an interest in that fund other than in its fiduciary capacity. If, because of a creditor relationship or otherwise, the bank acquires an interest in a participating account, the participating account must be withdrawn on the next withdrawal date. However, a bank may invest assets that it holds as fiduciary for its own employees in a collective investment fund.

(ii) Loans to participating accounts. A bank administering a collective investment fund may not make any loan on the security of a participant's interest in the fund. An unsecured advance to a fiduciary account participating in the fund until the time of the next valuation date does not constitute the acquisition of an interest in a participating account by the bank.

(iii) Purchase of defaulted investments. A bank administering a collective investment fund may purchase for its own account any defaulted investment held by the fund (in lieu of segregating the investment in accordance with paragraph (b)(5)(v) of this section) if, in the judgment of the bank, the cost of segregating the investment is excessive in light of the market value of the investment. If a bank elects to purchase a defaulted investment, it shall do so at the greater of market value or the sum of cost and accrued unpaid interest.

(9) Management fees. A bank administering a collective investment fund may charge a reasonable fund management fee only if:

(i) The fee is permitted under applicable law (and complies with fee disclosure requirements, if any) in the state in which the bank maintains the fund; and

(ii) The amount of the fee does not exceed an amount commensurate with the value of legitimate services of tangible benefit to the participating fiduciary accounts that would not have been provided to the accounts were they not invested in the fund.

(10) Expenses. A bank administering a collective investment fund may charge reasonable expenses incurred in operating the collective investment fund, to the extent not prohibited by applicable law in the state in which the bank maintains the fund. However, a bank shall absorb the expenses of establishing or reorganizing a collective investment fund.

(11) Prohibition against certificates. A bank administering a collective investment fund may not issue any certificate or other document representing a direct or indirect interest in the

fund, except to provide a withdrawing account with an interest in a segregated investment.

(12) Good faith mistakes. The OCC will not deem a bank's mistake made in good faith and in the exercise of due care in connection with the administration of a collective investment fund to be a violation of this part if, promptly after the discovery of the mistake, the bank takes whatever action is practicable under the circumstances to remedy the mistake.

(c) Other collective investments. In addition to the collective investment funds authorized under paragraph (a) of this section, a national bank may collectively invest assets that it holds as fiduciary, to the extent not prohibited by applicable law, as follows:

(1) Single loans or obligations. In the following loans or obligations, if the bank's only interest in the loans or obligations is its capacity as fiduciary:

(i) A single real estate loan, a direct obligation of the United States, or an obligation fully guaranteed by the United States, or a single fixed amount security, obligation, or other property, either real, personal, or mixed, of a single issuer; or

(ii) A variable amount note of a borrower of prime credit, if the bank uses the note solely for investment of funds held in its fiduciary accounts.

(2) Mini-funds. In a fund maintained by the bank for the collective investment of cash balances received or held by a bank in its capacity as trustee, executor, administrator, guardian, or custodian under a uniform gifts to minors act, that the bank considers too small to be invested separately to advantage. The total assets in the fund must not exceed $1,000,000 and the number of participating accounts must not exceed 100.

(3) Trust funds of corporations and closely-related settlors. In any investment specifically authorized by the instrument creating the fiduciary account or a court order, in the case of trusts created by a corporation, including its affiliates and subsidiaries, or by several individual settlors who are closely related.

(4) Other authorized funds. In any collective investment authorized by applicable law, such as investments pursuant to a state pre-need funeral statute.

(5) Special exemption funds. In any other manner described by the bank in a written plan approved by the OCC. [foot note 5] In order to obtain a special exemption, a bank shall submit to the OCC a written plan that sets forth:

(i) The reason that the proposed fund requires a special exemption;

(ii) The provisions of the proposed fund that are inconsistent with paragraphs (a) and (b) of this section;

(iii) The provisions of paragraph (b) of this section for which the bank seeks an exemption; and

(iv) The manner in which the proposed fund addresses the rights and interests of participating accounts.

Footnotes

[1] In determining whether investing fiduciary assets in a collective investment fund is proper, the bank may consider the fund as a whole and, for example, shall not be prohibited from making that investment because any particular asset is non-income producing.

[2] A fund established pursuant to this paragraph (a)(1) that includes money contributed by entities that are affiliates under 12 U.S.C. 221a(b), but are not members of the same affiliated group, as defined at 26 U.S.C. 1504, may fail to qualify for tax-exempt status under the Internal Revenue Code. See 26 U.S.C. 584.

[3] If a fund, the assets of which consist solely of Individual Retirement Accounts, Keogh Accounts, or other employee benefit accounts that are exempt from taxation, is registered under the Investment Company

Act of 1940 (15 U.S.C. 80a-1 et seq.), the fund will not be deemed in violation of this paragraph (b)(2) as a result of its compliance with section 10(c) of the Investment Company Act of 1940 (15 U.S.C. 80a-10(c)).

[4] If a fund, the assets of which consist solely of Individual Retirement Accounts, Keogh Accounts, or other employee benefit accounts that are exempt from taxation, is registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.), the fund will not be deemed in violation of this paragraph (b)(6)(i) as a result of its compliance with section 10(c) of the Investment Company Act of 1940 (15 U.S.C. 80a-10(c)), if the bank has access to the audit reports of the fund.

[5] Any institution that must comply with this section in order to receive favorable tax treatment under 26 U.S.C. 584 (namely, any corporate fiduciary) may seek OCC approval of special exemption funds in accordance with this paragraph (c)(5).

Excerpts from OCC Bullein 97-22

Subject: Fiduciary Activities of National Banks

Pertaining to Revisions to Section 9.18

9.18 Collective investment funds

14) Do banks need to amend their collective investment fund plans?

Whether a bank needs to amend its collective investment fund plan document (plan) depends on the language in the plan. If the plan specifically states the requirements of the former regulation, such as the 10 percent limitations, the bank should continue operating the funds in compliance with the plan provisions unless the plan is amended. If the plan merely makes general reference to 12 CFR 9.18, amendment of the plan may not be necessary. However, a bank operating a short-term investment fund should amend its plans to reflect the new valuation provision in the revised regulation.

Collective investment fund plan amendments should be approved by the bank's board of directors or its designee. Expenses incurred in amending the plan are considered a cost of establishing or reorganizing a collective investment fund, and therefore may not be charged to the fund. The revised regulation eliminated the requirement that collective investment fund plans be filed with the OCC; consequently, there is no need to file plan amendments with the OCC.

15) If a bank delegates collective investment fund (CIF) investment responsibilities under the new prudent delegation standard, will the CIF lose its exemption from Federal securities laws (Section 3(a)(2) of the 1933 Act) and from Federal taxation (IRC 584, for common trust funds)?

It is the OCC's position that a bank may delegate CIF investment responsibilities if the delegation is prudent. The bank should conduct a due diligence review of the investment advisor prior to the delegation. The board of directors, or its designee, should approve the delegation and ensure an agreement setting forth duties and responsibilities is in place. In addition, the bank should closely monitor the performance of the investment adviser. We recommend that a bank review the securities law and tax implications of delegation with their attorney prior to any delegation of investment responsibility.

16) Why were the short term investment fund provisions changed?

The short-term investment fund provisions were amended to align them more closely with the Securities and Exchange Commission's Rule 2a-7, which governs money market mutual funds. For purposes of calculating the dollar-weighted average portfolio as required in 12 CFR 9.18(b)(4)(ii)(B), the bank should refer to the SEC definition used for Rule 2a-7.

17) What constitutes a summary of purchases and sales for purposes of the collective investment fund financial reports?

For purposes of the collective investment fund financial reports, acceptable reporting of "a summary of purchases (with costs)" would include the aggregating of purchases by investment type. Acceptable reporting of "a summary of sales (with profit or loss and any other investment changes)" would include the aggregating of sales by investment type, and would result in the netting of realized gains and losses. Examples of investment types include equity securities, convertible bonds, U.S. government and agency securities, corporate debt, and municipal securities.

Miscellaneous

18) What happens to the Fiduciary Precedents and Trust Interpretive Letters?

The fiduciary precedents and trust interpretive letters are interpretations of the former regulation. However, they still may have persuasive effect on interpretations of the new language. Additionally, in many instances, the precedents and interpretations have become industry practice or simply articulate sound fiduciary principles. The OCC is including these, where appropriate, in the narrative sections of the revised version of the *Comptroller's Handbook for Fiduciary Activitie*s, due out later this year.

Internal Revenue Service - Revenue Ruling 81-100

This revenue ruling dated March 30, 1981, restates and consolidates the positions stated under Rev. Rul. 56-267, 1956-1 C.B. 206 and Rev. Rul. 75-530, 1975-2 C.B. 146, under current law.

The revenue rulings concern the effect on the tax exempt status of trusts forming parts of qualified retirement plans and individual retirement accounts of an arrangement under which the individual trusts pool their assets in a group trust (usually created for the purpose of providing diversification of investments), where the group trust is declared to be part of the qualified plan or individual retirement account and the trust instruments creating both the participating and group trusts provide that amounts shall be transferred from one trust to the other at the direction of the trustee of the participating trust.

Section 501(a) of the Internal Revenue Code provides, in part, that a trust described in section 401(a) shall be exempt from income tax.

Section 401(a)(1) of the Code provides, in effect, that a trust or trusts created or organized in the United States and forming a part of a stock bonus, pension, or profit-sharing plan of an employer for the exclusive benefit of its employees or their beneficiaries shall be qualified under this section if contributions are made to the trust or trusts by such employer, or employees for the purpose of distributing to such employees or their beneficiaries the corpus and income of the fund accumulated in accordance with such plan.

By making contributions to a participating trust, which provides that from time to time amounts so contributed may be transferred to and from a specified group trust, the employer and any participating employees, in effect, make contributions to the group trust for purposes of section 401(a)(1).

Section 401(a)(2) of the Code provides that under each trust instrument it must be impossible, at any time prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the plan and the trust or trusts, for any part of the corpus or income to be used for, or disbursed to, purposes other than for the exclusive benefit of the employees or their beneficiaries.

Section 408(e)(1) of the Code provides for the exemption from taxation of individual retirement accounts which meet the requirements of section 408. Section 408(a)(5) provides that the assets of the trust (individual retirement account) may not be commingled with other property except in a common trust fund or common investment fund. With regard to section 408(a)(5), the Conference Committee stated that the conferees intend that the assets of qualified individual retirement accounts may be pooled with the assets of qualified section 401(a) trusts. The conferees intended that the group trust itself will be entitled to exemption from tax under the Code. See Conference Report No. 93-1280, 93rd Cong., 2nd Sess. 337 (1974), 1974-3 C.B. 415, 498.

Held, if the requirements below are satisfied, a group trust is exempt from taxation under section 501(a) of the Code with respect to its funds which equitably belong to participating trusts described in section 401(a) and is exempt from taxation under section 408(e) with respect to its funds which equitable belong to individual retirement accounts, which satisfy the requirements of section 408. Also, the status of individual trusts as qualified under section 401(a) or meeting the requirements of section 408 of the Code and exempt from tax under section 501(a) or 408(e), respectively, will not be affected by the pooling of their funds in a group trust if the following requirements are satisfied.

(1) The group trust is itself adopted as a part of each individual retirement account or employer's pension or profit-sharing plan.

(2) The group trust instrument expressly limits participation to individual retirement accounts which are exempt under section 408(e) of the Code and employer's pension and profit-sharing trusts which are exempt under section 501(a) of the Code by qualifying under section 401(a).

(3) The group trust instrument prohibits that part of its corpus or income which equitably belongs to any individual retirement account or employer's trust from being used for or diverted to any purposes other than for the exclusive benefit of the individual or the employees, respectively, or their beneficiaries who are entitled to benefits under such participating individual retirement account or employer's trust.

(4) The group trust instrument prohibits assignment by a participating individual retirement account or employer's trust of any part of its equity or interest in the group trust.

(5) The group trust is created or organized in the United States and is maintained at all times as a domestic trust in the United States.

Rev. Rul. 56-267 and Rev. Rul. 75-530 are superseded because the positions stated therein are restated under current law in this revenue ruling.

Internal Revenue Code Section 581

26 USC 581

Current through P.L. 104-18, approved 7-7-95

§ 581. Definition of bank

For purposes of sections 582 and 584, the term "bank" means a bank or trust company incorporated and doing business under the laws of the United States (including laws relating to the District of Columbia) or of any State, a substantial part of the business of which consists of receiving deposits and making loans and discounts, or of exercising fiduciary powers similar to those permitted to national banks under authority of the Comptroller of the Currency, and which is subject by law to supervision and examination by State or Federal authority having supervision over banking institutions. Such term also means a domestic building and loan association.

(Aug. 16, 1954, c. 736, 68A Stat. 202; Sept. 28, 1962, Pub.L. 87-722, s 5, 76 Stat. 670; Oct. 4, 1976, Pub.L. 94-455, Title XIX, s 1901(c) (5), 90 Stat. 1803.)

Historical and Statutory Notes

Amendments

1976 Amendment. Pub.L. 94-455 substituted "or of any State" for "of any State, or of any Territory" following "District of Columbia" and struck out "Territorial" following "examination by State".

1962 Amendment. Pub.L. 87-722 substituted "authority of the Comptroller of the Currency" for "section 11(k) of the Federal Reserve Act (38 Stat. 262; 12 U.S.C. 248(k))."

Notes of decisions

1. Law governing

Peculiarities in individual state laws are not controlling on the Court of Appeals in the interpretation of the provision of Revenue Act of 1936, § 104, defining a bank. Staunton Industrial Loan Corporation v. C.I.R., C.A.4, 1941, 120 F.2d 930.

2. Reception of deposits

An industrial loan corporation which engaged in receiving deposits termed "investments" and made loans and discounts was a "bank". Staunton Industrial Loan Corporation v. C.I.R., C.A.4, 1941, 120 F.2d 930.

A personal loan company was not a "bank" within the definition of the term "bank" contained

in the Revenue Code, nor within the statutes of Ohio distinguishing between banks and building and loan companies, when it engaged in the personal loan and finance business by receiving funds from others, including financial institutions, for which it issued certificates of deposit, even though such funds were an outstanding indebtedness of the organization to the holder of the certificates. City Loan & Sav. Co. v. U.S., D.C.Ohio 1959, 177 F.Supp. 843, affirmed 287 F.2d 612.

A bank which was chartered and supervised by the State of Indiana was a bank under this section. It was noted that at least 65% of deposits were from general public. The fact that only 2-4% of deposits were invested in loans and that all borrowers had some business relationship was understandable considering town's small population. On balance, it was decided that a substantial part of the institution's business was receiving deposits and making loans. Austin State Bank v. C.I.R., 1971, 57 T.C. 180.

3. Fiduciary powers

A Morris Plan Bank corporation classified by Connecticut state law as an industrial bank, which was not authorized to receive deposits but was authorized to sell certificates of indebtedness, and which did a substantial business in making loans and discounts, was as a "bank" and not a "corporation," even though payments to bank for certificates which were in fact "deposits" were designated as "investments," and that it did not exercise any fiduciary powers similar to those permitted to a national bank. Morris Plan Bank of New Haven v. Smith, C.A.Conn.1942, 125 F.2d 440.

Internal Revenue Code Section 584

26 USC 584

§ 584. Common trust funds

(a) Definitions . For purposes of this subtitle, the term "common trust fund" means a fund maintained by a bank --

(1) exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank in its capacity as a trustee, executor, administrator, or guardian; and

(2) in conformity with the rules and regulations, prevailing from time to time, of the Board of Governors of the Federal Reserve System or the Comptroller of the Currency pertaining to the collective investment of trust funds by national banks.

(b) Taxation of common trust funds . A common trust fund shall not be subject to taxation under this chapter and for purposes of this chapter shall not be considered a corporation.

(c) Income of participants in fund .

(1) Inclusions in taxable income. Each participant in the common trust fund in computing its taxable income shall include, whether or not distributed and whether or not distributable --

(A) as part of its gains and losses from sales or exchanges of capital assets held for not more than six months, its proportionate share of the gains and losses of the common trust fund from sales or exchanges of capital assets held for not more than six months;

(B) as part of its gains and losses from sales or exchanges of capital assets held for more than six months, its proportionate share of the gains and losses of the common trust fund from sales or exchanges of capital assets held for more than six months;

(C) its proportionate share of the ordinary taxable income or the ordinary net loss of the common trust fund, computed as provided in subsection (d).

(2) Dividends and partially tax exempt interest. The proportionate share of each participant in the amount of dividends to which section 116 applies, and in the amount of partially tax exempt interest on obligations described in section 35 or section 242, received by the common trust fund shall be considered for purposes of such sections as having been received by such participant. If the common trust fund elects under section 171 (relating to

amortizable bond premiums) to amortize the premium on such obligations, for purposes of the preceding sentence the proportionate share of the participant of such interest received by the common trust fund shall be his proportionate share of such interest (determined without regard to this sentence) reduced by so much of the deduction under section 171 as is attributable to such share.

(d) Computation of common trust fund income . The taxable income of a common trust fund shall be computed in the same manner and on the same basis as in the case of an individual, except that --

(1) there shall be segregated the gains and losses from sales or exchanges of capital assets;

(2) after excluding all items of gain and loss from sales or exchanges of capital assets, there shall be computed --

(A) an ordinary taxable income which shall consist of the excess of the gross income over deductions; or

(B) an ordinary net loss which shall consist of the excess of the deductions over the gross income;

(3) the deduction provided by section 170 (relating to charitable, etc., contributions and gifts) shall not be allowed; and

(4) the standard deduction provided in section 141 shall not be allowed.

(e) Admission and withdrawal . No gain or loss shall be realized by the common trust fund by the admission or withdrawal of a participant. The withdrawal of any participating interest by a participant shall be treated as a sale or exchange of such interest by the participant.

(f) Different taxable years of common trust fund participant . If the taxable year of the common trust fund is different from that of a participant, the inclusions with respect to the taxable income of the common trust fund, in computing the taxable income of the participant for its taxable year, shall be based upon the taxable income of the common trust fund for any taxable year of the common trust fund ending within or with the taxable year of the participant.

(g) Net operating loss deduction . The benefit of the deduction for net operating losses provided by section 172 shall not be allowed to a common trust fund, but shall be allowed to the participants in the common trust fund under regulations prescribed by the Secretary or his delegate.

Internal Revenue Code Section 584 [1996 Tax-Free Conversion Amendment]

26 USC 584

The "Small Business Job Protection Act of 1996" amended IRC Section 584 to permit the tax-free conversion of common trust funds into mutual funds. The text of the amendment follows:

SEC. 1805. Nonrecognition treatment for certain transfers by common trust funds to regulated investment companies.

(a) General rule- Section 584 (relating to common trust funds) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

(h) Nonrecognition treatment for certain transfers to regulated investment companies-

(1) In General- If--

(A) a common trust fund transfers substantially all of its assets to one or more regulated investment companies in exchange solely for stock in the company or companies to which such assets are so transferred, and

(B) such stock is distributed by such common trust fund to participants in such common trust fund in exchange solely for their interests in such common trust fund, no gain or loss shall be recognized by such common trust fund by reason of such transfer or distribution, and no gain or loss shall be recognized by any participant in such common trust fund by reason of such exchange.

(2) Basis Rules-

(A) Regulated Investment Company - The basis of any asset received by a regulated investment company in a transfer referred to in paragraph (1)(A) shall be the same as it would be in the hands of the common trust fund.

(B) Participants - The basis of the stock which is received in an exchange referred to in paragraph (1)(B) shall be the same as that of the property exchanged. If stock in more than one regulated investment company is received in such exchange, the basis determined under the preceding sentence shall be allocated among the stock in each such company on the basis of respective fair market values.

(3) Treatment of assumptions of liability-

(A) In General - In determining whether the transfer referred to in paragraph (1)(A) is in exchange solely for stock in one or more regulated investment companies, the assumption by any such company of a liability of the common trust fund, and the fact that any property transferred by the common trust fund is subject to a liability, shall be disregarded.

(B) Special rule where assumed liabilities exceed basis-

(i) In General - If, in any transfer referred to in paragraph (1)(A), the assumed liabilities exceed the aggregate adjusted bases (in the hands of the common trust fund) of the assets transferred to the regulated investment company or companies--

(I) notwithstanding paragraph (1), gain shall be recognized to the common trust fund on such transfer in an amount equal to such excess,

(II) the basis of the assets received by the regulated investment company or companies in such transfer shall be increased by the amount so recognized, and

(III) any adjustment to the basis of a participant's interest in the common trust fund as a result of the gain so recognized shall be treated as occurring immediately before the exchange referred to in paragraph (1)(B). If the transfer referred to in paragraph (1)(A) is to two or more regulated investment companies, the basis increase under subclause (II) shall be allocated among such companies on the basis of the respective fair market values of the assets received by each of such companies.

(ii) Assumed Liabilities - For purposes of clause (i), the term "assumed liabilities" means the aggregate of--

(I) any liability of the common trust fund assumed by any regulated investment company in connection with the transfer referred to in paragraph (1)(A), and

(II) any liability to which property so transferred is subject.

(4) Common trust fund must meet diversification rules -

This subsection shall not apply to any common trust fund which would not meet the requirements of section 368(a)(2)(F)(ii) if it were a corporation. For purposes of the preceding sentence, Government securities shall not be treated as securities of an issuer in applying the 25-percent and 50-percent test and such securities shall not be excluded for purposes of determining total assets under clause (iv) of section 368(a)(2)(F).

(b) Effective Date- The amendment made by subsection (a) shall apply to transfers after December 31, 1995.

April 28, 2003

RE: Collective Fund Limited to Funds Awaiting Investment or Distribution

Dear [ ] :

This is in response to your February 5, 2003 letter, and subsequent discussions with Joel Miller, concerning [ ] 's (the "Bank's") desire to pool the funds of individual fiduciary accounts and self-deposit **(1)** them collectively in a 12 C.F.R. § 9.18(a)(1) short-term investment fund ("STIF"). The STIF would consist exclusively of funds awaiting investment or distribution and would operate in accordance with all applicable provisions of 12 C.F.R. § 9.18. Based on your representations, and for the reasons set forth below, we conclude that the Bank may pool the individual fiduciary accounts and self-deposit them in the STIF.

Discussion

The Bank currently serves as trustee, executor, administrator, guardian, and in other fiduciary capacities for thousands of its trust customers. As fiduciary, the Bank receives and invests fiduciary cash and other assets and makes distributions to beneficiaries.

The Bank seeks to pool and self-deposit fiduciary funds awaiting investment or distribution and to manage them collectively through a STIF. The assets of the STIF will consist of short-term CDs of varying maturities, similar to assets of a money market fund, except that a portion (e.g., 10%) of the STIF assets may consist of checking or other "transaction" deposits that are needed to meet anticipated liquidity needs. The Bank believes collective investment will enable customers to receive higher yields on funds awaiting distribution or investment without materially increasing the administrative burden on the Bank. Each trust customer's account will reflect ownership of units in the STIF equivalent to the customer's proportionate share of the STIF net assets.

Analysis

National banks are generally authorized to pool fiduciary funds and invest them collectively, including investment through STIFs. **(2)** Investing these fiduciary funds in the bank's own deposits, however, raises conflict of interest issues for the STIF. Twelve C.F.R. § 9.18(b)(8) requires a national bank administering a STIF to comply with the conflict of interest requirements of 12 C.F.R. § 9.12, which provides as follows -

> *(a) Investments for fiduciary accounts.*
> (1) *In general.* ***Unless authorized by applicable law*** , a national bank may not invest funds of a fiduciary account for which a national bank has investment discretion in the stock or obligations of, or in assets acquired from: the bank or any of its directors, officers, or employees; affiliates of the bank or any of their directors, officers, or employees; or individuals or organizations with whom there exists an interest that might affect the exercise of the best judgment of the bank. (Emphasis added.)

Applicable law authorizes the Bank to invest the STIF in the Bank's own deposit obligations. Twelve C.F.R. § 9.2(b) defines applicable law to include, "any applicable Federal law governing [fiduciary] relationships." Federal law includes OCC regulations, 12 C.F.R. § 9.10(b), which read in part as follows -

> (b) *Self-deposits* - (1) *In general*. A national bank may deposit funds of a fiduciary account that are awaiting investment or distribution in the commercial, savings, or another department of the bank, ***unless prohibited by applicable law*** . (Emphasis added.)

Part 9 was restructured and streamlined in 1995. The regulatory history of Part 9 clearly shows that national banks have been permitted to self-deposit funds awaiting investment or distribution both before and after Part 9 was revised.

Before its revision, Part 9 dealt with self-deposits of trust funds in three sections. Twelve C.F.R. § 9.18(b)(8)(i) (1993) expressly permitted STIFs to self-deposit funds awaiting investment or distribution; 12 C.F.R. § 9.12(a) (1993) prohibited conflicts of interest such as self-deposits of fiduciary funds unless "lawfully authorized by the instrument creating the relationship, or by court order or by local law"; and 12 C.F.R. § 9.10(b) (1993) permitted self-deposit of funds awaiting investment or distribution "unless *prohibited* by the instrument creating the trust or by local law." OCC precedents (described below) made it clear that in addition to the specific authorization for STIFs to self-deposit under 12 C.F.R. § 9.18(b)(8)(i) (1993), STIFs were subject to the provisions of 12 C.F.R. § 9.12 and 12 C.F.R. § 9.10(b). *See* Trust Interpretation 218 (May 24, 1989) and Trust Interpretation 258 (April 10, 1991) *infra* .

In 1995 the OCC deleted the express authorization for self-deposits of STIF funds in 12 C.F.R. § 9.18(b)(8)(i), and instead inserted a cross reference to 12 C.F.R. § 9.12. *See* 61 *Fed. Reg* . 68543, at 68550 (Dec. 30, 1996). Adding the cross-reference to 12 C.F.R. § 9.12 effectively preserved the ability of STIFs to self-deposit subject to the same requirement under old Part 9 that they comply with 12 C.F.R. § 9.12 and 12 C.F.R. § 9.10(b).

The OCC issued two letters under old Part 9 confirming the ability of STIFs to self-deposit . In Trust Interpretation No. 218 (May 24, 1989), the OCC permitted a bank to self-deposit in a STIF provided that the STIF's investment objective was to, "provide a temporary investment for funds awaiting investment or distribution." The Interpretation also included the qualification that, "it must be permissible for all accounts participating in the STIF to maintain funds in deposits of the Bank, *see* 12 C.F.R. § 9.10(b) and 12 C.F.R. § 9.12," demonstrating that the ability of the STIF to self-deposit was subject to those two regulations. Interpretation No. 218 was clarified by Trust Interpretation No. 258 (April 10, 1991) which noted that under 12 C.F.R. § 9.12, the exception for self-deposits of trust funds applied only when "lawfully authorized by the instrument creating the relationship, or by court order or by local law." As described above, that standard contained in 12 C.F.R.§ 9.12 was changed in 1995 to permit self-deposits "if authorized by applicable law."

The Bank represents that applicable law in those states in which it does business and plans to self-deposit fiduciary funds does not prohibit such self-deposits. As a result, 12 C.F.R. § 9.10(b) provides the applicable authority required by 12 C.F.R. § 9.12 for the Bank to self-deposit fiduciary funds awaiting investment or distribution or to deposit such funds with affiliates, and this practice is not prohibited by applicable law.

Conclusion

Based on the foregoing, the Bank may self-deposit fiduciary assets awaiting investment or distribution collectively in a STIF administered by the Bank. The Bank confirms that it will comply with the requirements as to collateral for self-deposits imposed by 12 C.F.R. § 9.10 and with all other applicable requirements under Part 9.

Sincerely,
/s/ *Lisa Lintecum*

Re: Proposed Creation of the "[ ] Fund"

Dear [ ]:

This letter confirms our February 13, 2002 teleconference, and responds to your letter dated March 5, 2002, regarding the establishment by [ ] ("Bank"), as trustee, of the [ ] ("Fund"). You have inquired whether the OCC would object to an aspect of the Fund's operations under the OCC's rules governing collective investment funds at 12 C.F.R. § 9.18. Specifically, you have inquired whether the Bank, as trustee, may allow participant withdrawals from the Fund at the sole discretion of the Bank, or when a participant becomes ineligible to continue as a participant in the Fund. Based on your representations, and for the reasons described below, the OCC does not object to this aspect of the Fund's operations under the OCC's rules governing collective investment funds at 12 C.F.R. § 9.18.[1]

I. Proposal

The Bank seeks to establish the Fund for the collective investment of money contributed to the Fund by the Bank in its capacity as trustee of certain tax-exempt charitable trusts. The Bank is forming the Fund in order to enable several small trusts for which it serves as trustee to invest in private equity limited partnerships ("PELP"). However, the trusts cannot invest in the PELP directly because an appropriate private equity investment for these trusts would not satisfy the minimum investment requirement of the limited partnership. The Fund will pool the investments of several tax-exempt trusts that are "qualified purchasers," [2] allowing the Fund to satisfy the minimum requirement of the limited partnership.

Under the Bank's proposal, Fund participants will be unable to make discretionary withdrawals from the Fund. [3] Sections 6.2(a), (b), (c) and (e) of the Declaration of Trust provide:

(a) Unless otherwise limited hereunder, the decision on when to allow, the form of, and the timing of all Fund withdrawals shall be within the sole discretion of the Trustee;

(b) Participants will not have the right to withdraw from the Fund at any particular time or interval;

(c) At the time of the creation of a Fund, the Trustee does not anticipate allowing any withdrawals from the Fund prior to the termination and liquidation of the [private equity investments] of the Fund; and

(d) Upon the occurrence of an event that renders a participant ineligible to continue as a participant in the Fund, [4] within one year of such event the Trustee shall redeem such participant's units in the Fund, in kind, with a proportionate share of the [private equity investments] and the other assets of the Fund; subject, however, to any liens for incurred and unpaid capital contributions, debts, fees and expenses.

You represented during our February 13, 2002 teleconference that the Fund will be valued semi-annually on April 1 and October 1. The Bank will use the valuation reports provided by the PELP's general partner to determine the Fund's fair value. To comply with 12 C.F.R. § 9.18(b)(4)(ii), and as provided in § 5.3(f) of the Declaration of Trust, the Bank will determine whether the valuation provided by the PELP's general partner represents the fair value of the Fund's assets as of the date of the valuation.

II. Discussion

The OCC's regulation governing collective investment funds does not mandate the frequency of admissions and withdrawals from collective investment funds. The regulation requires that the written plan governing the administration of the collective investment fund include appropriate provisions related to the terms and conditions governing the admission and withdrawal of participating accounts. [5]

In addition, the regulation provides that admissions and withdrawals may only be "on the basis of the valuation described in paragraph (b)(4)." Section 9.18(b)(4), in turn, provides in part that,

> A bank administering a collective investment fund shall determine the value of the fund's assets at least once **every three months**. However, in the case of a fund described in paragraph (a)(2) of this section that is invested primarily in real estate or other assets that are not readily marketable, the bank shall determine the value of the fund's assets **at least once a year**. [6]

These provisions require that bank trustees use the valuation derived under section 9.18(b)(4) to determine the amount participants are entitled to when they are admitted to or withdraw from a fund. It does not mandate the frequency of admissions and withdrawals . [7] National banks and institutions that must comply with this regulation to receive favorable tax treatment should have valid reasons for limiting admissions and withdrawals, however. In addition, the admissions and withdrawal policies must be consistent with fiduciary duties.

In this case, the Bank does not anticipate allowing any withdrawals from the Fund prior to the termination and liquidation of the underlying trust investments because the Fund might fail to satisfy the minimum investment requirement of the PELP if the Fund permitted discretionary withdrawals from the Fund. In addition, you represent that the Bank will limit admissions to, and withdrawals from the Fund, because the Fund's private equity investments will be in limited partnerships that will be illiquid over their projected ten to fifteen year business cycles. Specifically, the limited partnership interests are not transferable without the permission of the General Partner. You have also represented that the amount of the investment that each participating trust will make in the Fund will not impair the liquidity of the participating trusts. The Fund is designed as, and will be used as, only one part of an overall investment strategy for the participating trusts.

Based on your representations and consistent with applicable law, the Bank may permit a participant to withdraw from the Fund solely at the Bank's discretion, or when a participant becomes ineligible to continue as a participant in the Fund. [8]

I trust this is responsive to your inquiry. Please do not hesitate to contact me if you have any questions.

Sincerely,

-signed-

Asa L. Chamberlayne
Counsel
Securities and Corporate
Practices Division

Footnotes

[1] We limit our no-objection to the Bank's proposal to allow participant withdrawals from the Fund at the sole discretion of the Bank, or when a participant becomes ineligible to continue as a participant in the Fund. We offer no views on whether other aspects of the Fund's operations comply with the provisions of 12 C.F.R. § 9.18 or with applicable fiduciary law.

[2] While the Investment Company Act of 1940 ("1940 Act") is not applicable to the Bank's proposal, the Bank represents that if the 1940 Act were applicable to the Bank's proposal, the tax-exempt trusts for which the Bank is trustee would meet the definition of "qualified purchasers" under § 2(a)(51) of the 1940 Act.

[3] The Bank represents that it will provide appropriate disclosures to the board of directors or the trustee(s) of the beneficiaries of each Fund participant with respect to the nature of the Fund's investments and capital calls, and that Fund participants will not have the right to withdraw from the Fund at any particular time or time interval.

[4] The Bank represents that the only way a participant would cease to be eligible to continue as a participant in the Fund would be if the Bank was removed, for cause, as trustee of the participating account.

[5] The regulation also provides that certain funds may require a prior notice period of up to one year for withdrawals. 12 C.F.R. § 9.18(b)(5)(iii).

[6] 12 C.F.R. § 9.18(b)(4)(i). Section 9.18(b)(4) also establishes the method of valuation. In general, bank trustees are required to value fund assets at market value as of the date set for valuation, unless the bank cannot readily ascertain market value, in which case the bank shall use a fair value determined in good faith. *See* 12 C.F.R. § 9.18(b)(4)(ii)(A). Different valuation methods apply to short term investment funds. *See* 12 C.F.R. § 9.18(b)(4)(ii)(B).

[7] OCC Trust Interpretive Letters interpreting the prior version of 12 C.F.R. § 9.18 concluded that admissions and withdrawals must occur as frequently as valuations. *See e.g.*, Trust Interpretive Letter #13 (February 14, 1986). Upon closer examination of the regulation, however, we have concluded that the regulation does not mandate the frequency of admissions and withdrawals. *See* Interpretive Letter #920 (December 6, 2001).

[8] *See* footnote 4, *supra.*

OCC Interpretive Letter #920, December 2001

12 C.F.R. 9.18

Comptroller of the Currency
Administrator of National Banks
Washington, DC 20219

December 6, 2001

Subject:**[ ]** Trust Company -- **[ ]**Fund

Dear [ ]:

This is in response to your request for an exemption under 12 C.F.R. § 9.18(c)(5) to permit annual admissions to and withdrawals from a collective investment fund established by **[ ]**Trust Company. For the reasons discussed below, we have concluded that annual admissions and withdrawals are permitted under 12 C.F.R. § 9.18 and, therefore an exemption from 12 C.F.R. § 9.18 is not required.

Proposal

[ ] ("Trust Company"), a **[ ]** trust company, seeks to establish a collective investment fund, **[ ]** ("CIF"), exclusively for the collective investment and reinvestment of money contributed to the fund by the Trust Company in its capacity as trustee of certain trusts. The Trust Company is forming the CIF in order to enable several small trusts for which it serves as trustee to invest in **[ ]** ("Limited Partnership"), a limited partnership formed by the Trust Company. Those trusts are not qualified to invest directly in the Limited Partnership because of their size.

The Limited Partnership invests in third party investment partnerships engaged in hedge fund investing. The Limited Partnership will receive cash flow from its partnership investments once a year. As a result, the Limited Partnership will only allow annual admissions and withdrawals. Because the Limited Partnership only permits annual admissions and withdrawals, the Trust Company has proposed that the CIF only allow annual admissions and withdrawals.

The CIF will be valued quarterly. The Trust Company will use the valuation reports provided to it from the third-party investment partnerships that constitute the underlying investments of the Limited Partnership to determine the fund's fair value. To comply with 12 C.F.R. § 9.18(b)(4)(ii), the Trust Company must determine that the valuation provided by the limited partnerships represents the fair value of the fund's assets as of the date of the valuation.

Discussion

The OCC's regulation governing collective investment funds does not mandate the frequency of admissions and withdrawals from collective investment funds. The regulation requires that the written plan governing the administration of the CIF include appropriate provisions related to the terms and conditions governing the admission and withdrawal of participating accounts . [1]

In addition, the regulation provides that admissions and withdrawals may only be "on the basis of the valuation described in paragraph (b)(4)." Section 9.18(b)(4), in turn, provides in part that,

> A bank administering a CIF shall determine the value of the fund's assets at least once **every three months**. However, in the case of a fund described in paragraph (a)(2) of this section that is invested primarily in real estate or other assets that are not readily marketable, the bank shall determine the value of the fund's assets **at least once a year**. [2]

These provisions require that bank trustees use the valuation derived under section 9.18(b)(4) to determine the amount participants are entitled to when they are admitted to or withdraw from a fund. It does not mandate the frequency of admissions and withdrawals. [3] National banks and institutions that must comply with this regulation to receive favorable tax treatment should have valid reasons for limiting admissions and withdrawals, however. In addition, the admissions and withdrawal policies must be consistent with fiduciary duties.

In this case, you have represented that the CIF will not have sufficient liquidity to permit admissions and withdrawals more than once a year because the CIF is invested in a Limited Partnership that only permits annual admissions and withdrawals. You also have represented that the amount of the investment that each participating trust will make in the CIF will not impair the liquidity of the participating trusts. The CIF is designed as, and will be used as, only one part of an overall investment strategy for the participating trusts.

Based on these representations and consistent with applicable law, the Trust Company may permit annual admissions and withdrawals from the CIF. The proposed schedule of admissions and withdrawals must be disclosed to fund participants in the CIF's written plan.

I trust this is responsive to your inquiry. Please do not hesitant to contact me if you have any questions.

Sincerely,

-signed-

[1] The regulation also provides that certain funds may require a prior notice period of up to one year for withdrawals. 12 C.F.R. § 9.18(b)(5)(iii).

[2] 12 C.F.R. § 9.18(b)(4)(i). Section 9.18(b)(4) also establishes the method of valuation. In general, bank trustees are required to value fund assets at market value as of the date set for valuation, unless the bank cannot readily ascertain market value, in which case the bank shall use a fair value determined in good faith. *See* 12 C.F.R. § 9.18(b)(4)(ii)(A). Different valuation methods apply to short term investment funds. *See* 12 C.F.R. § 9.18(b)(4)(ii)(B).

[3] OCC Trust Interpretive Letters interpreting the prior version of 12 C.F.R. § 9.18 concluded that admissions and withdrawals must occur as frequently as valuations. *See e.g.*, Trust Interpretive Letter #13 (February 14, 1986). Upon closer examination of the regulation, however, we have concluded that the regulation does not mandate the frequency of admissions and withdrawals.

Expense Recovery for Model-Driven Funds

OCC Interpretive Letter #919, December 2001

12 C.F.R. 9.18

Comptroller of the Currency
Administrator of National Banks
Washington, DC 20219

November 9, 2001

RE: Model-Driven Funds

Dear [ ]:

This is in response to your request for confirmation that the OCC permits model-driven funds, established pursuant to 12 C.F.R. § 9.18, to allocate costs to individual participants being admitted to or withdrawing from such funds in the same manner and to the same extent as section 9.18 index funds. Based on your representations and for the reasons set forth below, we conclude that model-driven funds, as defined below, may allocate costs to individual participants in the manner described below. [1]

Background

You represent a national bank that administers index funds and model-driven funds, established pursuant to 12 C.F.R. § 9.18. [2] The index funds are collective investment funds that seek to replicate the performance of a specified index, such as the Standard and Poor's 500 Index. Trading decisions are made according to a formula that tracks the rate of return of the index by replicating the entire portfolio of the index or by investing in a representative sample of that portfolio.

The model-driven funds are collective investment funds that seek to outperform a specified index or benchmark based on a pre-determined investment strategy. [3] In the model-driven funds, a computer model selects the identity and amount of securities contained in the funds. The model is based on prescribed objective criteria, using independent third party data that is not within the control of the fund manager.

Proposal

The Bank has proposed to charge or credit fund participants who are admitted to, or withdraw from its model-driven funds with the costs, expenses and related adjustments (collectively, the "Costs") involved in the acquisition of securities when the participants are admitted to the funds, and the disposition of securities upon the participants' withdrawal from the funds. [4] The Bank currently charges or credits fund participants who are admitted to, or withdraw from its index funds in this manner. With respect to domestic model-driven funds, these Costs would include:

> (1) commissions paid by the fund to broker/dealers on purchases or sales, as applicable, of portfolio investments relating to the participant's contribution or redemption, respectively;
>
> (2) Securities and Exchange Commission fees on sales of portfolio investments of U.S. listed and traded securities by the fund relating to the participant's redemption; and
>
> (3) the net difference (positive or negative) between:
>
>> (a) the market value of the portfolio investments purchased or sold by the funds, relating to the participant's contribution or redemption, on the date the fund's investments are valued for purposes of determining the number of units in the fund to be issued to or redeemed for the participant, and
>>
>> (b) the fund's execution price for such portfolio investments. [5]

The Bank has represented that it will inform all participants in the model-driven funds it manages that these Costs will be allocated to contributing and redeeming participants.

You contend on behalf of the Bank that allocating costs in this manner is appropriate for two reasons. First, you believe that allocating costs to individual participants entering or exiting the fund will be fair and equitable to all the participants in the fund. You believe that a procedure that did not allocate costs to a contributing or withdrawing participant could be unfair to other participants in the fund because these other participants would bear the expenses and charges attributable to the contributing or withdrawing participant.

Second, you note that the OCC has previously permitted section 9.18 index funds to charge brokerage fees and expenses to accounts that are purchasing or selling units of the index fund. You believe that model-driven funds should be treated in the same manner as index funds for purposes of allocating costs, given the similarities between these types of funds. You note that both index funds and model driven funds limit the discretion of fund managers, are based upon certain pre-specified formulae or algorithms, and are quantitative in nature.

For these reasons, you believe the OCC should permit model-driven funds, established pursuant to 12 C.F.R. § 9.18, to allocate costs to individual participants being admitted to or withdrawing from such funds in the same manner and to the same extent as section 9.18 index funds.

Discussion

Collective Investment Funds, established pursuant to 12 C.F.R. § 9.18, generally are not permitted to charge individual participants with the cost of entering or exiting a fund. [6] The OCC has determined, however, that funds with certain characteristics may charge individual participants the costs associated with being admitted to or withdrawing from a fund. In particular, the OCC has permitted a section 9.18 index fund to charge brokerage fees and expenses to accounts that are purchasing or selling units of the index fund provided that the fund document authorizes such charges. [7]

Model-driven funds, established pursuant to 12 C.F.R. § 9.18(a)(2), have characteristics similar to section 9.18 index funds. In particular, both index funds and model-driven funds do not involve any significant exercise of investment discretion by investment managers managing the funds. For example, an investment manager of an index fund makes investments according to a formula that tracks the rate of return, risk profile, or other characteristics of an independently maintained index by either replicating the entire portfolio of the index or by investing in a representative sample of such portfolio designed to match the projected risk/return profile of that index.

Similarly, an investment manager of a model-driven fund makes investments based upon a formula by which an "optimal" portfolio is created to implement a pre-determined investment strategy that is either based upon or measured by an independently maintained index of securities. A computer model must select the identity and the amount of the securities contained in a model-driven fund. Although managers may use their discretion to design the computer model, the model must be based on prescribed objective criteria using third party data, not within the control of the managers, to transform an independently maintained index. [8]

This limited management discretion helps ensure that all fund participants, including those entering or exiting a fund, will be treated fairly and equitably. For example, the Bank has committed that fund participants being admitted to or withdrawing from a fund will have the same access to and benefit from cross-trading opportunities and other low cost trading mechanisms as other fund participants. [9] For these reasons, we conclude that model-driven funds, as defined in this letter, should be permitted to allocate costs to individual participants being admitted to or withdrawing from such funds in the same manner and to the same extent as index funds. [10]

Model Validation and Testing

As noted above, trading decisions in model-driven funds are made by computer models, based on pre-determined investment strategies and prescribed objective criteria. These computer models are designed to systematically control risk and costs and achieve above benchmark returns. Computer models that are improperly validated or tested, however, may expose the bank to risks from erroneous model input or output or incorrect interpretation of model results. To mitigate those risks, the bank should ensure that its computer models are frequently verified, validated and reviewed. To ensure proper validation and testing, the bank should develop formal written policies and procedures consistent with the guidance provided in OCC Bulletin 2000-16 on Risk Modeling and Model Validation.

Conclusion

Model-driven funds, established pursuant to 12 C.F.R. § 9.18(a)(2), may allocate costs to individual participants being admitted to or withdrawing from such funds in the same manner and to the same extent as section 9.18 index funds, provided the fund document authorizes such charges. If you have any questions, please do not hesitate to contact me at (202) 874-5210.

Sincerely,

-signed-

Beth Kirby
Special Counsel
Securities and Corporate Practices

Footnotes

[1] You have represented that the proposed allocation, if properly disclosed, complies with applicable law, including the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), to the extent that the model-driven funds have assets of clients subject to ERISA. The OCC has not addressed and does not opine whether the proposed allocation complies with ERISA or applicable federal securities law and state law.

[2] Section 9.18 collective investment funds include funds maintained by the bank, exclusively for the collective investment or reinvestment of money contributed to the fund by

the bank, or one or more affiliated banks, in its capacity as trustee, executor, administrator, guardian, or custodian under a uniform gifts to minors act. 12 C.F.R. § 9.18(a)(1). Section 9.18 collective investment funds also include funds consisting solely of assets of retirement, pension, profit sharing stock bonus or other trusts that are exempt from Federal income tax. 12 C.F.R. § 9.18(a)(2).

[3] The index or benchmark must represent the investment performance of a specific segment of the public market for debt or equity securities. In addition, the index or benchmark must be established and maintained by an independent organization that is in the business of providing financial information or brokerage services to institutional clients, a publisher of financial news or information or a public stock exchange or association of securities dealers. The index or benchmark must be a standardized index of securities that is not specifically tailored for the use of the manager.

[4] The Bank has represented that trades would be effected in a prudent and expeditious manner. The Bank has committed that the fund would not engage in any "market timing" (i.e., the fund would not seek to "time" the transactions in anticipation of broad market movements).

[5] With respect to international model-driven funds investing in foreign securities, these Costs would include items (1) and (3) listed above, as well as the following: (1) transaction-related charges to convert, as applicable, the participant's contribution of U.S. dollars to the relevant foreign currencies or the proceeds on sales relating to the participant's redemption to U.S. dollars from the relevant foreign currencies, and any applicable stamp taxes or other types of transfer fees imposed by a foreign jurisdiction or a foreign exchange; and (2) bank custodian charges paid by the fund representing fees levied on a per-portfolio transaction basis relating to the participant's contribution or redemption, as applicable. In general, you state that the charges to contributing and redeeming participants are higher in foreign markets than in U.S. markets because the costs associated with purchases and sales of securities are higher in foreign markets.

[6] Section 9.18(b)(10) permits a bank that manages a collective investment fund to charge reasonable expenses (except expenses incurred in establishing or reorganizing a collective investment fund) to the fund as long as those expenses are permissible under state law and are fully disclosed to fund participants. 12 C.F.R. § 9.18(b)(10).

[7] OCC Fiduciary Precedent 9.5980, which interpreted the former Part 9, stated, among other things, that the OCC will not object to an index fund charging brokerage fees and expenses to accounts that are purchasing or selling units of an index fund provided the fund document authorizes such charges. *See* OCC Fiduciary Precedent 9.5980, *Comptroller's Handbook for Fiduciary Activities* (September 1990). *See also* OCC Trust Interpretive Letter No. 228 (August 8, 1989), where the OCC permitted an index fund to charge individual participants with brokerage expenses and certain trading or market gains or losses. Part 9, including 12 C.F.R. 9.18, was amended effective January 29, 1997. 61 *Fed. Reg.* 68,543 (1996). The fiduciary precedents and trust interpretive letters preceding the January 29, 1997 effective date of 12 C.F.R. Part 9 are interpretations of the former regulation. Those precedents and interpretations can still be persuasive in interpreting the language in the new Part 9, however. Furthermore, in many instances the precedents and interpretations have become industry practice or simply articulate sound fiduciary principles.

[8] Fund managers do not have discretion to override trading decisions made by the computer model. Fund managers may, however, verify the data the computer model is relying on and make adjustments to the model output to correct inaccuracies or outdated information. Fund managers may not make such adjustments for arbitrary reasons or to benefit the fund manager, its affiliates, of any party in which the manager or its affiliates have an interest. In addition, any adjustment must be made in compliance with written policies and procedures.

[9] Cross-trading refers to a practice where an investment manager offsets an order to buy a particular security with an order to sell a particular security between two or more accounts under its management without a broker acting as intermediary. The Department of Labor has granted the Bank exemptive authority to engage in cross-trading securities with regard

to its index funds and model-driven funds.

[10] The Department of Labor has recognized these similarities in its proposed class exemption for Model-Driven Funds and Index Funds under ERISA. The proposed class exemption would treat Model-Driven Funds and Index Funds identically for purposes of allowing certain cross-trades of securities under ERISA. The proposed class exemption is based on the limited management discretion associated with these types of funds. *See* 64 *Fed. Reg.* 70057, 70069 (December 15, 1999). The DOL has adopted this same approach for many years with respect to numerous individual prohibited transaction exemptions relating to cross-trading. *See, e.g.*, PTE 95-96, Mellon Bank, N.A., 60 *Fed. Reg.* 35,933 (July 12, 1995) ; PTE 94-47, Bank of America National Trust and Savings Association, 59 *Fed. Reg.* 32,021 (June 21, 1994); and PTE 94-43, Fidelity Management Trust Company, 59 *Fed. Reg.* 30,041 (June 10, 1994).

Applying Different Fund Management Fees Commensurate with Amount and Type of Participant Services Provided

OCC Interpretive Letter #829, May 1998

12 C.F.R. 9.18

Comptroller of the Currency
Administrator of National Banks
Washington, DC 20219

April 9, 1998

Dear [ ]:

This responds to your request on behalf of [ ], [*City, State*] (Bank), that the Office of the Comptroller of the Currency (OCC) express its views, consistent with the requirements of 12 C.F.R. Part 9, concerning the ability of a national bank to charge different fund management fees to participants in a collective investment fund (CIF) commensurate with the amount and types of services the bank provides to the CIF participants. Based on the representations you made on behalf of the Bank, and subject to the conditions below, we believe that a national bank may, in the manner described, charge CIF participants different fund management fees commensurate with the amount and types of services the bank provides to each participant, consistent with the requirements of 12 C.F.R. Part 9.

I. Background

The Bank is contemplating the establishment of a fluctuating net asset collective investment fund ( ) for employee benefit plans that would invest primarily in guaranteed investment contracts (GICs). **(1)** The GICs are issued primarily by insurance companies. Generally, the bank intends to maintain a 10% cash position in [ ].

At present, the Bank (together with its affiliate banks) offers to 401(k) employee benefit plans and certain other employee benefit plans, choices of different retirement programs designed to meet the investment and administrative needs of the plans. Plan sponsors initially choose a retirement program offered by the Bank, then select from the investment alternatives available under the program (usually no more than eight) those alternatives it will make available to plan participants as investment options under its plan. **(2)** The investment alternatives offered in this type of 401(k) product include certain mutual funds and [ ]. Before a sponsor decides to offer [ ] as an investment alternative to its plan participants, the Bank proposes to provide the plan sponsor with a Disclosure Statement describing how [ ] works and a

copy of the [ ] Declaration of Trust. The Bank also would provide the plan sponsor with information concerning the management fees applicable to its plan prior to the sponsor's decision whether to offer [ ] as an investment option.

Under the Bank's proposal, the management fee structure varies the fees charged to [ ] participants depending on the services they receive. For example, the Bank intends to charge a lower fee to plan participants investing in [ ] that contract directly with a third party for participant accounting or if the size of the plan allows for more cost-efficient

servicing. The Bank would charge a higher fee to plan participants who take advantage of the full range of services the Bank offers for managing and administering the [ ], including [ ]'s portion of participant accounting. The Bank's CIF presently has a single in-fund management fee. As a result, plans that would require fewer services or allow for more cost efficient services tend not to participate in the CIF. Indeed, if such plans invested in the CIF and were to pay for services they did not receive or to pay more than warranted for the plan's services they did receive, the Bank and the plan trustee(s) could potentially breach the fiduciary duty they owe to the plans and plan participants. Conversely, the Bank does not believe a waiver of the entire management fee is appropriate, because it provides all CIF participants some level of customary services, including investment management, and they should pay a reasonable fee for those services.

The Bank has proposed a management fee structure for [ ] so that plan participants (or their employers) pay only for those services participants receive and only those plan participants whose assets are actually invested in [ ] (or their employers) pay the management fees associated with [ ]. The proposed fees generally fall within one of the three following areas:

1. No Fee. The Bank would not charge a fund management fee where the employer

pays the Bank's fees in one of the following three situations:

(a) where a plan and its participants otherwise would pay either the base service

or full service fees but the employer decides instead to pay the appropriate fee

directly; **(3)**

(b) where a plan, rather than employing the Bank for administrative services,

instead opens a so-called "Invest Only" custody or investment advisory account

for the sole purpose of investing in [ ]. The employer would pay a graduated fee that varies inversely with the amount of assets invested in [ ]. The Bank would have no responsibilities with respect to participant accounts; and

(c) where certain existing customers (mainly Bank customers) previously

negotiated various plan level fees that the employer pays, these arrangements

would remain unchanged.

2. Base Fee. The Bank charges a base service management fee for certain general

management and administrative services. The Bank anticipates that, based on the CIF

fees it currently charges, the base service management fee will range from [#] to [#]

basis points. **(4)**

3. Full Fee. The Bank charges a full service management fee for the full range of

management and administrative services that a trustee usually and customarily renders

to a CIF. The Bank would charge that fee in exchange for providing all administrative

services to the plan and its participants' accounts. The Bank anticipates that, based on

the CIF fees it currently charges, a full service management fee will be approximately [#] basis points.

The Bank believes that this fee structure would provide national banks a tool to price fiduciary services competitively and allow it to offer [ ] as a viable and competitive product to other investment alternatives. The Bank believes that if it cannot offer multiple pricing flexibility, it cannot present a viable alternative to other, more attractive investment options, *e.g.*, where the sponsor of a 401(k) plan that qualifies for a lower expense ratio may select from a "menu" of more favorably priced investment options for plan participants (such as the purchase of institutional shares of a mutual fund).

The Bank would charge all CIF plans annual fees for trustee and custodian services. The annual fee would vary, depending upon other administrative services the Bank provides that are not directly related to investment services that the plans contract for, such as testing required under ERISA, filing the Form 5500, making contributions, issuing participant statements, and administering participant loans.

You represented on behalf of the Bank that each unit has a proportionate interest in [ ]'s assets. No unit would have any right, title, or interest in [ ] superior to, or different from, the right, title, or interest of any other [ ] unit. Due to the charging of fund management fees corresponding to the services the Bank would provide plan participants, unit values may vary. As the Bank deducts management fees at the [ ] fund level, the unit value of units held by plan participants who pay the full service fee will of necessity be lower than the unit value of units of plan participants subject only to the base service fee. Where a plan sponsor pays all fees directly, that plan's participants' units would have the largest per unit value since the Bank would not charge fees at the [ ] fund level.

Participants will always purchase [ ] units at their then fair market value. If one participant buys units subject to the full service fee and another participant purchases units subject only to the base service fee and each participant invests $1,000, both participants will receive units worth $1,000. The participant buying the full service fee units will receive more units, however, since units subject to a full service fee will have a lower fair market value, due to the larger fund management fee that the Bank periodically will deduct from those units. The value of the units will vary only to reflect the different fund management fees. You represent on behalf of the Bank that appropriate Bank systems and procedures will accurately account for, calculate, and report those value differences.

II. Discussion

As fiduciaries, national banks may invest funds held on behalf of retirement, pension, profit sharing, stock bonus or other trusts that are exempt from Federal income taxation under the Internal Revenue Code in CIFs.

(5) CIFs may invest in various assets, including GICs.

(6) GICs are individually negotiated investment contracts between insurance companies and investors that resemble debt instruments and provide for fixed returns over a period of time, typically less than ten years.

(7) The OCC previously has approved the use of CIFs for employee benefit accounts that invest primarily in GICs.

(8) OCC regulations govern the administration of CIFs by national bank trustees.
(9) National banks may charge fees for the management of CIFs consistent with the limitations in 12 C.F.R. §9.18(b)(9) (1997). The management fees national bank may charge for administering CIFs are subject to an overall "reasonableness" standard. Accordingly, national banks may charge management fees for CIFs that are reasonable
(10) , consistent with applicable state law requirements, and commensurate with the services the bank trustee is providing to the CIF.
(11) A bank must also disclose the management fees to be charged to a CIF and to participating accounts in the bank's written plan
(12) and at least annually in a manner consistent with applicable law in the state where the bank maintains the CIF.
(13) Part 9's reasonableness standard replaces a quantitative management fee limitation formerly applicable to CIF management fees.
(14) The quantitative management fee limitation permitted a national bank trustee to charge a CIF a management fee only if the fractional part of such fee proportionate to the interest of each participant would not exceed the total fees that the participant would be charged if the participant had not invested assets in the CIF.
(15) The OCC replaced the more restrictive quantitative management fee limitation with the reasonableness standard, in order to provide "updated operating standards for national bank fiduciary activities" and "sufficient protections for bank's fiduciary customers."
(16) Under the new standard, national banks may charge CIF management fees provided that the fees are reasonable under the particular facts and circumstances. OCC regulations do not address the ability of national banks to charge different fees to different classes of CIF participating accounts. The OCC determined under the former quantitative limitation that national banks may charge different management fees to different classes of participant accounts.
(17) In OCC Interpretive Letter No. 300,
(18) the OCC permitted a bank trustee to charge a reduced management fee to large dollar employee benefit CIF participants because the bank made available reduced fees for individually invested large dollar accounts.
(19) The fee concession conformed with the quantitative management fee restrictions then applicable under section 9.18(b)(12) because, while the bank charged different management fees to different classes of CIF participants, the total fees charged did not exceed the total fees the bank charged accounts receiving individual investment management. Similarly, Part 9 does not address the issue of whether national banks may accept management fees from other than CIF participants and plans as the Bank proposes under its no fee option, or how the reasonableness standard applies when a bank chooses to do so. The OCC concluded that a national bank may receive fees in a similar circumstance under the quantitative standard. In OCC Interpretive Letter No. 722
(20) , a national bank inquired about the permissibility of assessing management fees to CIF participants where the CIF simultaneously received fee payments from nonparticipants. The OCC concluded that a national bank CIF could receive both the participant and nonparticipant fee payments provided the bank concluded, based on a reasoned opinion of trust counsel, that applicable state law, the governing trust instrument, and the management fee restrictions contained in 12 C.F.R. § 9.18 permitted the fees. Provided the Bank's management fee structure, including the trustee/custodian fee, meets the reasonableness standard and the Bank complies with appropriate disclosure requirements, the Bank can proceed with its proposal. Although OCC has reviewed the ability of national banks to charge different classes of management fees and accept fees from other than the CIF participants and plans under the old quantitative test, those former precedents support the position that a national bank may also do so under the current reasonableness standard. Indeed, the Bank's ability to charge different management fees based on employer fee payments, previously negotiated fees, and services the Bank provides to participants, furthers the OCC's goal of updating the operating standards for national banks fiduciary activities, as envisioned by the OCC when drafting the new Part 9. In addition, allowing the Bank to offer CIF units incorporating the proposed fee structure will enable the Bank to offer an investment product that can effectively compete with other investment alternatives, including similarly structured mutual funds.
(21) Equally important, the Bank's proposed fee structure enables the Bank to establish one CIF that offers a variety of fee options as opposed to multiple CIFs that accomplish that same result, saving the Bank the expense associated with establishing and administering numerous CIFs. Therefore, consistent with the OCC's desire to provide sufficient

protections for Bank's fiduciary customers, the Bank may charge the proposed CIF management fees to CIF participants if, based on the relevant facts and supported by a well reasoned opinion of trust counsel, the Bank concludes that: (1) the fees are reasonable; (2) applicable law permits the fees (and the bank complies with fee disclosure requirements, if any) in the state where the Bank maintains the fund; (3) the amount of the fees do not exceed an amount commensurate with the value of legitimate services of tangible benefit to the participating fiduciary accounts that would not have been provided to accounts were they not invested in the fund; (4) the management fees to be charged to the fund and to participating accounts are disclosed in the Bank's written plan; and (5) the Bank discloses the management fees, along with other fees and expenses charged to the plan, at least annually in a manner consistent with applicable law in the state where the Bank maintains the CIF.Finally, 12 C.F.R. § 9.18(b)(3) requires that all participating accounts in a CIF have a proportionate interest in all of the CIF's assets. Under the Bank's proposal, the value of the [ ] units will vary depending, in part, on the services the Bank provides in connection with the units. Under the Bank's proposal, the Bank will subtract all fees from the value of a participant's [ ] units so that the unit value of units held by plan participants that incur the full service fees will be lower than the unit value of units subject to base service fees and no service fees, and the unit value of units subject to base service fees will be lower than the unit value of units subject to no service fees. The Bank will provide participants buying full service units with more units for the same dollar investment as participants buying base service units or no service fee units and participants buying base service units will receive more units than participants purchasing no service fee units. Under these circumstances, the Bank's increase in the number of units provided to purchasers of full service units over base service units and to purchasers of base service units over no fee units permits all unit purchasers to

retain a proportionate interest in [ ]'s assets. Despite the fact that the value of the units will vary due to the different fund management fees, each [ ] participant will have a proportionate interest in [ ]'s underlying assets as required under 12 C.F.R. §9.18(b)(3).

III. Conclusion

Based on the representations made by the Bank, the Bank may charge different management fees to FCCIF participants, commensurate with the amount and types of services it provides to the participants, where the fees meet the requirements of the reasonableness standard of 12C.F.R. § 9.18(b)(9) and each participant retains a proportionate interest in [ ]'s underlying assets as required by 12 C.F.R. § 9.18(b)(3).

I trust this letter responds to your inquiry. If you have any further questions, please contact Tena M. Alexander, a Senior Attorney with the Securities and Corporate Practices Division, at (202) 874-5210.

Sincerely,

/s/

Dean E. Miller

Senior Advisor for Fiduciary Activities

Footnotes

(1) One of the Bank's investment objectives will be to keep the [ ] units at a constant unit value to avoid administering fractional shares and for ease of transfer.

(2) Although any defined benefit or defined contribution plan may invest in [ ], the Bank anticipates that the primary source of growth for the [ ] will come from 401(k)defined benefit plans in which the sponsor may select [ ] as one of several investment alternatives available to participants under the plan and in which the investments are participant-directed.

(3) [ ] could rebate the payments. The Bank, however, believes that a rebate procedure would unnecessarily add to the administrative structure and expenses of [ ], and be cumbersome, costly, and confusing to participants.

(4) The Bank's fee proposal would allow both small and large plans to benefit. While some bond and equity mutual funds allow only the largest plans ($100 million or more) to

purchase their institutional shares, the Bank would allow plans to participate in [ ] regardless of size, similar to certain other GIC commingled funds and institutional money market mutual funds.

(9) *See* 12 C.F.R. § 9.18 (1997). Part 9, including 12 C.F.R. § 9.18, was amended effective January 29, 1997. 61 *Fed. Reg*. 68,543 (1996). The fiduciary precedents and trust interpretive letters preceding the January 29, 1997 effective date of 12 C.F.R. Part 9 are interpretations of the former regulation. Even so, those precedents and interpretations can still be persuasive in interpreting the language in the new Part 9. Furthermore, in many instances the precedents and interpretations have become industry practice or simply articulate sound fiduciary principles. *See* OCC Bulletin 97-22 (May 15, 1997).

(10) Banks may charge "management" fees for any services that assist the bank in fulfilling its management role. *See* Investment Securities Letter No. 48 (May 3, 1990) ,

reprinted in [1990-1991 Transfer Binder] Fed. Banking L. Rep. (CCH) ¶ 83,261. The reasonableness of a fee depends in part on the services obtained for the fee. *See* OCC

Interpretive Letter No. 722 (March 12, 1996), *reprinted in* [1995-1996 Transfer Binder] Fed.Banking L. Rep. (CCH) ¶ 81-031.

(11) The OCC's regulation on CIF management fees provides:

Management fees. A bank administering a collective investment fund may charge a reasonable fund management fee only if: (i) The fee is permitted under applicable law

(and complies with fee disclosure requirements, if any) in the state in which the bank maintains the fund; and (ii) The amount of the fee does not exceed an amount

commensurate with the value of legitimate services of tangible benefit to the participating fiduciary account that would not have been provided to the accounts were

they not invested in the fund. 12 C.F.R. § 9.18(b)(9)(i) and (ii) (1997).

(12) National banks are required to establish and maintain each CIF in accordance with a written plan approved by a resolution of the bank's board of directors or by a committee authorized by the bank's board of directors. 12 C.F.R. § 9.18(b)(1)(iii).

(13) 12 C.F.R. § 9.18(b)(6)(ii). Alternatively, if the Bank concludes that the proposed management fees do not conform with the overall reasonableness standard in Part 9, the Bank must request an exemption to Part 9 management fee requirements, by submitting to the OCC a written plan that identifies: (i) The reasons that the CIF requires a special exemption; (ii) The provisions of the proposed CIF that are inconsistent with 12 C.F.R. § 9.18; (iii) The provisions of 12 C.F.R. § 9.18 for which the bank seeks an exemption; and the manner in which the proposed CIF addresses the rights and interest of participating accounts; and (v) The manner in which the proposed fund addresses the rights and interests of the participating accounts. The OCC will grant the Bank an exemption if the written proposal is consistent with the Bank's fiduciary duties and with safe and sound banking practices.

(14) 12 C.F.R. § 9.18(b)(12) (1996).

(15) 12 C.F.R. § 9.18(b)(12) (1996).

SEC Interpretations and regulations dealing with collective investment funds (CIFs):

Recaps of various SEC positions

Revised as of March 1994

Exclusive Management

Investment Advisor, Unaffiliated . Bank proposes to contract with an outside investment advisor for two CIFs. The bank's investment and securities committee will meet biweekly to review the advisor's recommendations and ensure they are in compliance with the bank's investment policies. The Advisor may not effect transactions; the bank will select brokers and place investment orders. The committee will also monitor investments on at least a monthly basis. SEC responds that CIF exemptions under Section 3(a)(2) of the Securities Act of 1933, Section 3(a)(12) of the Securities Exchange Act of 1934 and Section 3(c)(11) of the Investment Company Act of 1940 will be available under such an arrangement. 2-12-88 No-Action Letter to Citytrust, Bridgeport, CT. Also note 1980 SEC Release 33-6188.

Permissible Participating Accounts

Funeral Trusts . CIF exemptions under Section 3(a)(2) of the Securities Act of 1933, Section 3(a)(12) of the Securities Exchange Act of 1934 and Section 3(c)(3) of the Investment Company Act of 1940 will be available if assets of funeral trusts are invested in CIF. 9-5-90 No-Action Letter to Fleet National Bank, Providence, RI.

Rabbi Trusts . CIF exemptions under Section 3(a)(2) of the Securities Act of 1933, Section 3(a)(12) of the Securities Exchange Act of 1934 and Section 3(c)(3) of the Investment Company Act of 1940 will *not* be available if assets of rabbi trusts are invested in CIF. 8-17-94 No-Action Letter to Boatmen's Trust Company, St. Louis, MO.

Investment in Other CIFs

Affiliates, Out-of-State . Trust accounts and CIFs of a Michigan bank may invest in CIFs operated by Illinois banks owned by the same multi-bank holding company without the loss of CIF exemptions under Section 3(a)(2) and Rule 132 of the Securities Act of 1933, Sections 3(a)(12) and (12)(G)(2)(H) and Rules 3a12-6 and 12h-1 of the Securities Exchange Act of 1934 and Sections 3(c)(3) and 3(c)(11) and Rule 3c-4 of the Investment Company Act of 1940. 7-25-89 No-Action Letter to Old Kent Financial Corporation, Grand Rapids, MI.

Sponsorship of CIFs

Non-insured Trust Companies . A non-insured trust company, unaffiliated with any insured bank or bank holding company, was chartered under the banking laws of a state. The SEC indicated that it may operate common trust funds without violating the registration requirements of federal securities laws. 4-20-89 No-Action Letter to Trust Company of Knoxville, Knoxville, TN. Board of Directors

-- Bank

Post Office Box --

--, --

Members of the Board:

It has come to our attention that Individual Retirement Accounts ("IRAs") are invested in interests in Collective Investment Funds ("CIF") which are described as publicly offered and administered by -- Bank ("Bank"). This practice appears to violate both the Securities Act of 1933 ("1933 Act") and the Investment Company Act of 1940 ("1940 Act") to the extent the CIFs are being publicly offered and interests in them are held by more than 100 investors.

A pooled securities fund in which interests are offered to the public as investments, is an investment company as defined in Section 3(a) of the 1940 Act and, absent an exclusion or exemption from registration, are subject to the registration and substantive requirements of the 1940 Act. Section 3(c) provides certain exclusions from this definition. These exclusions do not appear to be available, however, to a CIF when IRAs invest in the publicly offered interests of the CIF.

Specifically, while Section 3(c)(3) of the 1940 Act excludes bank common trust funds from the definition of an investment company, the Commission and its staff have interpreted this exclusion narrowly. The exclusion offered by Section 3(c) (3) has been interpreted as only applying to a common trust fund where a bank has received monies for bona fide fiduciary purposes and the fund is not offered to the public.[1] The staff has further stated that the Section 3(c)(3) exclusion is not available where a fund is operated as an investment service to IRA customers and not iii a manner incidental to the performance of its traditional trust activities.[2] [3]

Similarly, Section 3(c)(11) of the 1940 Act provides that a collective trust fund maintained by a bank consisting solely of the assets of employee benefit plan trusts qualified under Section 401 of the Internal Revenue Code and government plans is not an investment company. Because IRAs are not qualified under Section 401 of the Internal Revenue Code, however, and IRA assets are invested in the CIFs, the CIFs would not meet the requirements of Section 3(c)(11). In addition, based on the information provided to us, the interests in the CIFs were publicly offered. As a result, the CIFs also would not meet the conditions of Section 3(c)(1) of the 1940 Act, which excludes from the definition of investment company issuers that have less than 100 beneficial owners **and** which have not and are not making a public

offering of their securities. Thus, a publicly offered common trust fund which pools assets of IRAs, alone or with bona fide trust assets, would be subject to registration and regulation under the 1940 Act and interests in the fund would be subject to the registration provisions of the 1933 Act.

The Commission recently settled enforcement proceedings where IRA accounts invested in publicly offered common trust funds operated without registration of the funds or the interests therein.[4] In anticipation of an administrative proceeding charging the bank with willfully violating Sections 5(a) and (c) of the 1933 Act and Section 34(b) of the 1940 Act and causing violations by the common trust fund of Sections 7(a), 22(c), 22(e) and 24(b) of the 1940 Act and Rule 22c-1 thereunder, the bank consented to a Commission order requiring it to cease and desist from committing or causing any violation or future violations of such provisions of the 1933 Act and the 1940 Act and imposing other sanctions.

It is our understanding that you have been notified either to withdraw IRA assets from the CIFs that the Bank administers or register the CIFs, and the interests therein, under the 1933 and 1940 Acts. It is our further understanding that the Bank has terminated its CIF for IRAs. Please be advised that continuation or renewal of the IRA asset investment practices discussed in this letter will result in our taking appropriate regulatory action.

If you have any questions or concerns regarding this matter, please feel free to contact me at (202) 942-0540.

Sincerely,

Gene A. Gohlke

Associate Director

Securities and Exchange Commission

Washington, D.C. 20549

For immediate release 94-170

Administrative proceedings against the commercial bank and Marvin Abeene

Washington, D.C., December 7, 1994 -- The Securities and Exchange Commission today announced the institution of public administrative proceedings as to The Commercial Bank of Salem, Oregon ("Commercial") and Marvin C. Abeene, a senior vice-president at Commercial.

The Commission's Order finds that Commercial violated, or caused violations of, the registration provisions of the Securities Act of 1933 and the Investment Company Act of 1940 and the reporting, pricing and other provisions of the Investment Company Act in connection with its operation of a fund currently known as the "Common Trust Fund R of The Commercial Bank Combined Capital Trust (Individual Retirement Account Fund)" (the "IRA Fund"). The Order also finds that Abeene aided and abetted and caused these violations.

According to the Order, Commercial's Trust Department created the IRA Fund as an investment vehicle for customers seeking investment opportunities for their individual retirement accounts. The IRA Fund invests in stock, bonds and cash instruments. In late 1987, Commercial sought no-action relief from the staff of the Commission's Division of Investment Management regarding whether it could operate the IRA Fund without registering it and the interests therein pursuant to the Investment Company Act and the Securities Act. After being denied no-action relief, Commercial continued to operate the IRA Fund without registration under the federal securities laws and offered and sold interests in the IRA Fund to the public. In April 1993, Commercial filed an initial registration statement for the IRA Fund with the Commission. Abeene was the Commercial officer primarily responsible for overseeing the operation of the IRA Fund, including compliance with applicable regulations.

The Order finds that, in addition to failing to register the IRA Fund and the interests therein, Commercial offered and sold interests in the IRA-Fund to the public by means of materially misleading sales brochures and other materials. These materials were misleading because, among other things, they failed to disclose that investments in the IRA Fund were not subject to federal deposit insurance. Some of the investors in the IRA Fund were under the impression that their investments were federally insured because their accounts were with a bank. The Order also finds that commercial caused, and Abeene aided and abetted and caused, violations of the reporting, pricing and redemption provisions of the Investment Company Act.

The Order orders Commercial and Abeene to cease and desist from violating or causing violations of Sections 5(a) and (c) of the Securities Act and Sections 7(a), 22(c), 22(e), 24(b) and 34(b) of the Investment Company Act and Rule 22c-I thereunder. It also imposes a civil penalty on Commercial in the amount of $75,000 and suspends Abeene from association with any broker, dealer, municipal securities dealer, investment adviser or investment company for a period of six months. Pursuant to the Order, Commercial must retain an independent consultant to, among other things, conduct a review of the policies and procedures of Commercial with respect to its investment company operations, including the operation of the IRA Fund, and recommend policies and procedures, to be adopted by Commercial, designed to prevent and detect violations of the federal securities laws.

Commercial and Abeene, without admitting or denying the findings specified therein, have each consented to the entry of the Order and the above-referenced sanctions.

I.

The Commission deems it appropriate and in the public interest that proceedings be, and they hereby are, instituted pursuant to Section 8A of the Securities Act of 1933 ("Securities Act") and Sections 9(b) and 9(f) of the Investment Company Act of 1940 ("Investment Company Act") to determine whether The Commercial Bank ("Commercial" or "Bank") willfully violated Sections 5 (a) and (a) of the Securities Act and Section 34 (b) of the Investment Company Act and caused violations by the "Common Trust Fund R of The Commercial Bank Combined Capital Trust (Individual Retirement Account Fund)" (the "IRA Fund") of Sections 7(a), 22(c), 22(e) and 24(b) of the Investment Company Act and Rule 22c-I thereunder; and whether Marvin C. Abeene ("Abeene") willfully aided and abetted and caused Commercial's and the IRA Fund's violations.

II

In anticipation of the institution of these proceedings, Respondents Commercial and Abeene have each submitted an Offer of Settlement which the Commission has determined to accept. Solely for the purpose of these proceedings and any other proceedings brought by or on behalf of the Commission or to which the commission is a party, prior to a hearing pursuant to the Commission's Rules of Practice, 17 C.F.R. § 201.1 *et seq.*, Respondents Commercial and Abeene, without admitting or denying the findings set forth herein, except that Respondents admit the jurisdiction of the Commission over them and over the subject matter of these proceedings, each consent to the issuance of this Order Instituting Public Proceedings Pursuant to Section 8A of the Securities Act of 1933 and Sections 9(b) and 9(f) of the Investment Company Act of 1940, Making Findings, Imposing Remedial Sanctions and Ordering Respondents to Cease and Desist ("Order"), and to the entry of the findings and imposition of the sanctions set forth below.

III

On the basis of this Order and Respondents' Offers of Settlement, the Commission makes the following findings:

_Respondents

A. The Commercial Bank

Commercial is a bank chartered under the laws of the State of Oregon with its main office in Salem, Oregon. Commercial provides general banking and trust services primarily to residents of Oregon. Commercial has ten branches, all of which are located in Oregon. Commercial is the larger of two wholly owned subsidiaries of Commercial Bancorp, a bank holding company and an Oregon corporation whose common stock is registered with the commission pursuant to Section 12(g) of the Securities Exchange Act of 1934.

B. Marvin C. Abeene

Abeene, age 49, is a resident of Salem, Oregon. Abeene has served as Manager of Commercial's Trust Department from 1974 through the present and currently holds the title of senior vice-president of the Bank. The Trust Department consists of approximately twelve

employees. Abeene is the Commercial officer primarily responsible for the Bank's operation of the IRA Fund which purports to be a common trust fund.

IV. Statement of facts

A. Introduction

This matter involves violations, and aiding and abetting and causing violations, of the registration, reporting, pricing and other provisions of the federal securities laws by Commercial and Abeene. These violations occurred in connection with Commercial's operation of the IRA Fund.

In addition to traditional trust services such as estate planning, Commercial's Trust Department offers accounts under its management the opportunity to invest in several common trust funds under the rubric of the Combined Capital Trust.[1] Commercial's Trust Department created the IRA Fund as an investment vehicle for customers seeking investment, opportunities for their individual retirement accounts ("IRAs")[2] In many cases, these customers' employers had established corporate retirement plans which invested their monies in one of the Trust Department's common trust funds. Based on the performance of these corporate retirement funds, these customers were seeking similar investment results for their IRAs.

Around the time of the IRA Fund's inception, Commercial sought no-action relief from the staff of the Commission's Division of Investment Management regarding whether it could operate the IRA Fund without registering it and the interests therein pursuant to the Investment Company Act and the Securities Act. After being denied no-action relief, Commercial continued to operate the IRA Fund without registration under the federal securities laws and offered and sold interests in the IRA Fund to the public.[3] Abeene was the Commercial officer primarily responsible for the Bank's request for no-action relief and the subsequent process leading to the filing of the IRA Fund's initial registration statement with the Commission, all as more fully described below.

In addition to failing to register the IRA Fund and the interests therein, Commercial offered and sold interests in the IRA Fund to the public by means of materially misleading sales brochures and other materials. These materials were misleading because, among other things, they failed to disclose that investments in the IRA Fund were not subject to federal deposit insurance.

B. Commercial's Operation of the IRA Fund

1. The Request for No-Action Relief

On December 7, 1987, Commercial wrote to the Commission's staff seeking no-action relief in order to operate the IRA Fund without registration under the Securities Act and the Investment Company Act. Commercial's letter explained that it sought to rely upon the exemptions contained in Sections 3(a)(2) and 3(a)(11) of the Securities Act[4] and Section 3(c)(3) of the Investment Company Act.[5] The letter stated that the Bank was seeking to offer and sell interests in the IRA Fund to certain customers of the Trust Department who had IRAs funded by rollover distributions.

The staff of the Division of Investment Management wrote to Commercial on January 25, 1988, refusing to grant no-action relief. Commercial requested a reconsideration of the refusal and, on July 13, 1988, the staff affirmed its original response. On August 25, 1988, Commercial appealed the staff's decision. On January 11, 1989, the staff informed the Bank that the Commission had exercised its discretion to decline to review the staff's position and declined to issue an informal statement on the matter. See Commercial Bank (pub. avail. Feb. 24, 1988) (initial denial of no-action relief); Commercial-Bank (pub. avail. July 13, 1988) (Commercial Bank's appeal; staff's refusal to reconsider initial denial); and Commercial Bank Appeal (pub. avail. Jan. II, 1989) (Commission declined to review staff's position or to issue informal statement).

The staff's refusal to grant Commercial no action relief was based primarily on its position that the exemptions contained in Section 3(a)(2) of the Securities Act and Section 3(c)(3) of the Investment Company Act apply only to a common trust fund which is operated for the

administrative convenience of a bank in a manner incidental to the bank's traditional trust department activities and not where the fund is established as an investment vehicle for individual members of the public. The staff determined that commercial operated the IRA Fund primarily as an investment service to its IRA customers and not in a manner incidental to the performance of its traditional trust activities on behalf of Trust Department customers.[6] In addition, the staff determined that the exemptions are only available if the common trust fund holds funds from individual trust accounts created by customers for bona fide fiduciary purposes, and the staff concluded that this was not the case as to the IRA Fund.[7]

Despite the staff's refusal to grant no-action relief, Commercial continued to operate the IRA Fund on an unregistered basis from January 10, 1989 through October 1993.[8] During this period, the Bank took steps in preparation for registration of the IRA Fund.[9] On April 6, 1993, Commercial filed a Form N-IA registration statement with the Commission for registration of the IRA Fund and its securities under both the Investment Company Act and the Securities Act.

During the period in which the Bank has operated the IRA Fund, the profile of investors in the fund changed significantly. The initial investors in the IRA Fund consisted of individuals who already had either a personal trust account with the Trust Department, e.g., a living trust, or whose employers maintained a corporate retirement or pension account with the Trust Department. Sometime after 1987, and possibly as early as 1988, the Trust Department began to allow investments in the IRA Fund by individuals with no such prior relationship with the Trust Department. As of October 1993, at least twenty-five percent of the investors in the IRA Fund had no relationship with the Trust Department apart from their accounts in the IRA Fund.

1. Commercial's omissions in its Disclosure to Investors Regarding The IRA Fund

In sales brochures provided to prospective investors in the IRA Fund, the Bank did not disclose that an investment in the fund was not subject to federal deposit insurance. The Trust Department did not have a policy or practice of informing Trust Department customers that an investment in the IRA Fund was not federally insured.[10] Some of the sales brochures which contained performance information about the IRA Fund also omitted disclosure indicating that information regarding the IRA Fund's past performance was no indication of its future performance and that both the investment return and principal value of an investment in the fund may fluctuate.

3. Calculation of the IRA Fund's Net Asset Value

Commercial calculated the IRA Fund's net asset value ("NAV") on a monthly basis only. Because it was the Trust Department's procedure to calculate the IRA fund's NAV on a monthly basis, any purchases, redemptions or withdrawals by investors in the fund that were received by the fund on any day that the fund did not calculate its NAV would not have been priced with an appropriate NAV.

V. Legal Discussion

A. Commercial Caused and Abeene Aided and Abetted And Caused

Violations of Section 7(a) of the Investment Company Act

Section 7(a) of the Investment Company Act prohibits an investment company that has a board of directors[11] from offering or selling any security unless the investment company is registered under Section 8 of the Investment Company Act. The IRA Fund meets the definition of an investment company under both Section 3(a)(1) and Section 3(a)(3) of the Investment Company Act because: (1) it is and has been primarily engaged in the business of investing in securities; and (2) more than forty percent of its assets were and are invested in investment securities. *See* Sections 3(a)(1) and (3) of the Investment Company Act.

The IRA Fund does not qualify for the exclusion under Section 3(c)(3) of the Investment Company Act for "any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank in

its capacity as a trustee, executor, administrator, or guardian." This exclusion does not apply to the IRA Fund because Commercial offered the IRA Fund primarily as an investment service to its customers, and not in a manner incidental to the performance of its traditional trust activities on behalf of Trust Department customers. In addition, the change in the profile of the IRA Fund's investors supports the argument that, assuming *arguendo* that the operation of the IRA Fund was initially incidental to the trust services offered by the Trust Department to its customers, the fund, at some subsequent time, clearly became ineligible for the section 3(c)(3) exclusion.

Thus, because Commercial, through its Trust Department, sold interests in the IRA Fund to its customers between January 1987 through October 1993 while the IRA Fund was not registered as an investment company, Commercial caused violations of Section 7(a).

Abeene was the central figure in creating and then managing the IRA Fund on behalf of Commercial. He assumed responsibility for ensuring that the operation of the IRA Fund complied with the federal securities laws and knew that the Commission would require the fund and the interests therein be registered with the commission before interests therein could be offered or sold. As a result, Abeene willfully aided and abetted and caused violations of Section 7(a).

B. Commercial Violated Sections 5(a) and (c) of the Securities Act, and Abeene Aided and Abetted And Caused Commercial's Violations of Section 5 In Connection With Offers and Sales of Unregistered Interests in the IRA Fund

Section 5 of the Securities Act prohibits, among other things, the offer and sale of a security unless a registration statement is in effect for such security. See Sections 5(a) and (e) of the Securities Act. The interests in the IRA Fund offered to, and purchased by, Commercial's customers constitute "securities" as defined under Section 2(1) of the Securities Act. The interests in the IRA Fund do not qualify for the exemption under Section 3(a)(2) of the Securities Act because Commercial offered the IRA Fund primarily as an investment service to its customers.[12] Because the IRA Fund did not have a registration statement in effect, or filed with the Commission, between January 1987 through October 1993, Commercial willfully Violated Sections 5(a) and (c) of the Securities Act.

Abeene was responsible for Commercial's operation of the IRA Fund and the filing of the IRA Fund's initial registration statement in a timely manner. As a result of his conduct, Abeene willfully aided and abetted and caused Commercial's violations of Sections 5(a) and (c) of the Securities Act.

C. Commercial Violated Section 34(b) of the Investment Company Act, and Abeene Aided and Abetted and Caused Commercial's Violations, by Omitting

Certain Material Facts from the IRA Fund's Sales-Materials[13]

Section 34(b) of the Investment Company Act prohibits the making of any untrue statement of a material fact in, among other things, any document the keeping of which is required pursuant to Section 31(a) of the Act. Rule 31a-2(a)(3), promulgated under Section 31(a) of the Investment Company Act, requires registered investment companies to "[p]reserve for a period not less than 6 years from the end of the fiscal year last used . . . any advertisement, pamphlet, circular, form letter or other sales literature addressed to or intended for distribution to prospective investors." The "keeping" of documents required pursuant to Section 31(a) encompasses those documents, such as advertisements and other sales literature, which an investment company must "preserve" pursuant to Rule 31a-2(a)(3). Thus, Rule 31a-2(a)(3) of the Investment Company Act required Commercial to "Preserve" its sales brochures, and Section 34(b) of the Act applied to the sales brochures.

Commercial used certain sales brochures describing the IRA Fund in presentations to prospective investors. These materials, which qualify as sales literature under Rule 31a-2(a)(3), omitted to state that an investment in the IRA Fund was not federally insured. Commercial employees, under Abeene's supervision, did not necessarily correct this omission in oral presentations to certain prospective investors. Commercial did not have a practice of informing prospective investors in the IRA Fund that an investment in the fund was not federally insured. Some of the investors in the IRA Fund were under the impression that their investments were federally insured because their accounts were with a bank. Such information is material because an investor's decision whether or not to make a

particular investment will depend to a significant extent on the safety of the investment. In addition, certain sales materials used by Commercial disclosed historical investment results for the IRA Fund. The materials failed to include a legend disclosing that (1) this performance data represented past performance of the IRA Fund; (2) such investment returns and the principal value of an investment in the IRA Fund may vary; and (3) upon redemption, an investment may be worth more or less than the original cost of the investment. Commercial's failure to include these caveats in these sales materials resulted in a material omission. See Rule 482(a)(6) under the Securities Act; Rule 34b-I under the Investment Company Act. As a result, Commercial willfully violated section 34(b) of the Investment Company Act.

Abeene generally oversaw the drafting and production of the sales brochures which discussed the IRA Fund. He also reviewed several versions of the sales brochures before they were used in presentations with Trust Department customers. After the law firm suggested to Abeene that written disclosure as to lack of federal deposit insurance should be provided to Trust Department customers, Abeene failed to require that Trust Department employees provide such disclosure for investors in the IRA Fund until the fall of 1993. As a result, Abeene willfully aided and abetted and caused Commercial's violations of Section 34(b) of the Investment Company Act.

D. Commercial Caused and Abeene Aided and Abetted and Caused Violations of Section 24(b) of the Investment Company Act By Failing To File Certain Sales Materials

Section 24(b) of the Investment Company Act makes it unlawful for any registered open-end company, in connection with a public offering of any security of which such company is an issuer, to transmit, among other things, sales literature addressed to or intended for distribution to prospective investors unless the sales literature is filed with the Commission. The IRA Fund qualifies an "open-end company" and Commercial failed to file the sales literature with the commission which was transmitted by Commercial to prospective investors in the IRA Fund. For the reasons stated above, Commercial caused and Abeene willfully aided and abetted and caused violations of Section 24(h) of the Investment Company Act.

E. Commercial Caused and Abeene Aided and Abetted and Caused Violations of Sections 22(c) and 22(e) of the Investment Company Act and Rule 22c-I Promulgated Under Section 22(c) of the Act

Rule 22c-I(a) under the Investment Company Act requires a registered investment company to sell, redeem or repurchase the redeemable securities which it issues at a price based on the current net asset value of the security. The net asset value of the security generally must be computed no less frequently than once daily except on, among others, any day on which no security is tendered for redemption and on which no order to purchase or sell such security is received by the investment company.

Commercial calculated the IRA Fund's NAV on a monthly basis only. As a result, any purchases, redemptions or withdrawals by investors in the IRA Fund that were received by the fund on any day that the fund did not calculate its NAV would not have been priced with an appropriate NAV. As a result, Commercial caused and Abeene willfully aided and abetted and caused violations of Section 22(c) of the Investment company Act and Rule 22c-I thereunder.

Section 22(e) of the Investment company Act generally prohibits any registered investment company from suspending the right of redemption, or Postponing the date of payment or satisfaction upon redemption of any redeemable security for more than seven days after the tender of such security to the company. The Trust Department's practice for redemptions was as follows: if an investor in the IRA Fund sought to redeem his investment in the beginning or middle of the month, the valuation of the redemption would not occur until the end of that month, and the investor would not receive the redemption proceeds until after the valuation took place. Therefore, Commercial failed to satisfy redemption requests within seven days of investors' requests for redemption. As a result, commercial caused and Abeene willfully aided and abetted and caused violations of Section 22(e) of the Investment Company Act.

VI.Findings

Based on the foregoing, the Commission finds that:

A. Commercial willfully violated Sections 5(a) and (c) of the Securities Act and Section 34(b) of the Investment Company Act;

B. Abeene willfully aided and abetted and caused Commercial's violations of Sections 5(a) and (c) of the Securities Act and Section 34(b) of the Investment Company Act;

C. Commercial caused violations of Sections 7(a), 22(c), 22(e) and 24(b) of the Investment Company Act and Rule 22c-I thereunder; and

D. Abeene willfully aided and abetted and caused violations of Sections 7(a), 22(c), 22(e) and 24(b) of the Investment Company Act and Rule 22c-I thereunder.

VII. Order

In view of the foregoing, the Commission deems it appropriate and in the public interest to accept the Respondents' Offers of Settlement, and impose the sanctions specified therein.

Accordingly, the Commission ORDERS that:

A. Commercial cease and desist from committing or causing any violation, and from committing or causing any future violation, of Sections 5(a) and (c) of the Securities Act and Sections 7(a), 22(c), 22(e), 24(b) and 34(b) of the Investment Company Act and Rule 22c-I thereunder;

B. Commercial shall, within ten days of the issuance of this Order, pursuant to Section 9(d)(1) of the Investment Company Act, pay a civil money penalty in the amount of $75,000 to the United States Treasury. Such payment shall be (1) made by United States postal money order, certified check, bank cashier's cheek or bank money order; (2) made payable to the Securities and Exchange Commission; (3) hand-delivered to the Comptroller, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549; and (4) submitted under cover letter which identifies Commercial as a Respondent in these proceedings, the file number of these proceedings (3-_) and the Commission case number (HO-2816), a copy of which cover letter and form of payment shall be sent to Gary N. Sundick, Associate Director, Division of Enforcement, Securities and Exchange Commission, Mailstop 4-1, 450 Fifth Street, N.W., Washington, D.C. 20549; and

C. Commercial comply with its undertakings to:

1. retain; at Commercial's expense, an Independent Consultant ("Consultant"), not unacceptable to the Commission's staff, within 30 days of the date of this Order and for a period of time which Commercial and the Consultant reasonably agree to be necessary to, among other things: (1) conduct a comprehensive review of the policies and procedures of Commercial with respect to investment company operations, including, but not limited to, the operation of the IRA Fund since its inception, (2) recommend policies and procedures designed reasonably to prevent and detect violations of the federal securities laws, including, but not limited to, the violations alleged in this order, and (3) prepare a written report to Commercial's board of directors of its findings and recommendations. Such recommended policies and procedures shall include, but not be limited to, training programs, manuals and other measures reasonably designed to ensure that Commercial employees, officers and agents understand and are capable of performing their obligations and responsibilities with respect to investment company operations consistent with the requirements of the federal securities laws;

2. adopt and implement, by no later than 30 days after receipt of the report, such policies and procedures as recommended by the Consultant which Commercial reasonably determines do not constitute an undue burden on Commercial;

3. retain the Consultant (or another Independent Consultant not unacceptable to the Commission's staff) on or about the one year anniversary of the

Consultant's completion of its report, to conduct a review of Commercial's implementation of the policies and procedures recommended by the Consultant, to make additional recommendations as necessary and to prepare a written report to Commercial's board of directors of its findings and recommendations;

4. authorize the Consultant(s) to promptly provide copies of the written reports referenced above to the Commission's staff of the Divisions of Enforcement and of Investment Management and to discuss the findings therein with the Commission's staff;

5. authorize the Consultant(s) to promptly report to the Commission's staff: (1) any failure by Commercial to comply with this Order and (2) any violations of the federal securities laws by Commercial which the Consultant(s) may discover in the course of its engagement;

6. cooperate fully with the Consultant(s); and

7. retain a successor Consultant, not unacceptable to the Commission's staff, within 30 days, if the Consultant resigns or is otherwise unable to serve. All provisions in the Order that apply to the Consultant shall apply to any successor Consultant.

The Commission also Orders that:

A. Abeene cease and desist from committing or causing any violation, and from committing or causing any future violation, of Sections 5(a) and (c) of the Securities Act and Sections 7(a), 22(C), 22(e), 24(b) and 34(b) of the Investment Company Act and Rule 22c-I thereunder;

B. Effective on the second Monday following the date of this order, Abeene be, and hereby is, suspended from association with any broker, dealer, municipal securities dealer, investment adviser or investment company for a period of six months; and

C. Abeene shall deliver an affidavit of compliance to the Commission within ten days following his period of suspension stating that he has complied with the terms of the suspension.

By the commission.

Jonathan G. Katz

Secretary

1 Each of the common trust funds pools for collective investment monies contributed by its investors. For example, investments in the common trust funds are offered to Keogh accounts and corporate retirement plans.

2 The fund is a balanced fund consisting of investments in stocks, bonds and cash. The market value of the IRA Fund increased from approximately $846,000 as of December 31, 1987 to $12.6 million as of December 31, 1993. Currently, there are approximately 200 accounts in the IRA Fund.

Commercial is the principal underwriter for the IRA Fund as that term is defined in Section 2(a)(29) of the Investment Company Act.

3 In April 1993, Commercial filed with the Commission a registration statement, seeking to register the IRA Fund and the interests therein. As of the date of this order, the IRA Fund's registration is still pending.

4 Section 3(a)(2) exempts from the Securities Act:

[A)ny interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian....

Section 3(a)(11) exempts from the Securities Act any security sold wholly intrastate where an issue is sold

only to persons resident within a single State and where the issuer in a resident of such State.

5 Section 3(c)(3) of the Investment Company Act excludes from the definition of investment company "any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank in its capacity as a trustee, executor, administrator, or guardian."

6 Initial investors in the IRA Fund were attracted to the Trust Department because of its investment services. For example, in the sales brochures used in presentations to potential investors, the Trust Department emphasized the "professional investment management" being offered and the "consistently superior investment results" achieved by the Bank's other common trust funds and the investment adviser to those funds and to the IRA Fund.

7 In response to Commercial's request for reconsideration of the staff's position, the staff noted that bona fide fiduciary purposes include those situations in which a bank is providing traditional estate planning and other fiduciary services, but not primarily money management.

8 The IRA Fund ceased accepting new accounts for investment in the IRA Fund, as well as additional deposits to existing accounts, as of October 1, 1993 in response to the staff's inquiries into the unregistered operation of the IRA Fund.

9 Commercial engaged a law firm to assist it in the registration of the IRA Fund (the "law firm"). The law firm considered the availability of other exemptions under the federal securities laws and, in July 1989, without opining on the correctness of the Commission's staff position, advised Commercial that the Bank had no other alternative but to register the IRA Fund with the Commission.

In November 1992, approximately six months prior to the filing of the IRA Fund's initial registration Statement, the law firm communicated its concerns to Commercial that "there may have been an inadequate appreciation [on Commercial's part] of the serious risks involved in the continuing operation of the [IRA Fund] without registration."

10 During the time period relevant to this Order, the Trust Department never directed its employees to disclose to potential investors in the IRA Fund that their investments in the fund were not federally insured. The Trust Department did not direct its employees to provide such disclosure until the fall of 1993, despite explicit suggestions from the law firm that such disclosure would be required for the IRA Fund's sales brochures.

11 Commercial's Trust Committee constitutes the IRA Fund's board of directors for purposes of Section 7(a) of the Investment Company Act. The Trust Committee, among other things, decided to seek no-action relief on behalf of the IRA Fund, approved the decision to hire the IRA Fund's investment adviser, and determined to register the fund with the commission.

12 In addition, Section 3 (a) (11) of the Securities Act (the "intrastate exemption") is inapplicable to securities issued by registered investment companies by virtue of Section 24(d) of the Investment Company Act. As discussed below, because the IRA Fund should have been registered with the Commission, it cannot take advantage of the intrastate exemption.

13 Several of the provisions and rules of the Investment Company Act discussed in this Order proscribe conduct by registered investment companies. However, the fact that Commercial was unlawfully operating the IRA Fund on an unregistered basis does not insulate it from the requirements of the Investment Company Act which apply to registered investment companies. *See Krome v. Merrill Lynch & Co., Inc.*, 637 F. Supp. 910, 917 n.4 (S.D.N.Y. 1986), *vacated in part*, 110 F.R.D. 693 (S.D.N.Y. 1986) ("Failure to register...does not insulate a company from the other provisions of the [Investment company Act]. To hold otherwise would subject firms who do not register to less stringent regulation than those who do register.") (citing *In re Mownsend Corp. of America*, 42 S.E.C. 282, 316-17 (1964)); *Goldman v. McMahan, Brafman, Morgan & Co.*, (1987 Transfer Binder) Fed. Sec. L. Rep. (CCH) ¶ 93,354 (S.D.N.Y. 1987) (holding that Section 36(b) of the Investment Company Act applies to companies which should have been, but were not, registered under the Act).

RE: Banks Common Trust Funds

Dear Ms. Morris:

Santa Barbara Bank & Trust is a state chartered bank and trust company located in Santa Barbara, California. We presently are operating two common trust funds exclusively for our personal trust clients. We would like to be able to commingle funds held in employee benefit accounts, both qualified plans and IRA accounts, into these personal trust funds.

Our bank's legal counsel has checked with the California Financial Codes, the Comptroller's regulations, and the Internal Revenue regulations and has not been able to find any restrictions on using our current common trust funds for employee benefit accounts. Could you please let me know if the Securities and Exchange Commission would have any restrictions or problems with the Bank commingling personal trust and employee benefit trust accounts.

Your prompt attention to this question would be greatly appreciated.

Yours very truly,

Paulette Posch

Vice President

Employee Benefits Manager

SEC Letter

1940 Act / s 3(c)(3)

Paulette Posch, Vice President

Santa Barbara Bank & Trust

Trust Division

820 State St.

P.O. Box 2340

Santa Barbara, CA 93120-2340

Dear Ms. Posch:

Your letter of June 19, 1991, asks whether there are any restrictions under the federal securities laws on Santa Barbara Bank & Trust (the "Bank") commingling the assets of qualified employee benefit plan accounts and individual retirement accounts ("IRAs") with the assets of personal trust accounts in its common trust funds.

A pooled securities fund in which interests are offered to the public as investments is an investment company as defined in Section 3(a) of the Investment Company Act of 1940 ("1940 Act"). Section 3(c) provides certain exclusions from this definition.

Section 3(c)(3) excludes bank common trust funds from the 1940 Act.[1] The staff has interpreted this exclusion as applying only to a common trust fund, for moneys which a bank has received for bona fide fiduciary purposes, that is not offered to the public.[2] Such a common trust fund serves as an administrative convenience of the bank incidental to its traditional trust department activities.[3]

The Commission and its staff have stated that this exception is not available for common trust funds holding assets of IRAs.[4] Thus, a common trust fund which pools assets of IRAs, alone or with bona fide trust assets, would be subject to registration and regulation under the 1940 Act and interests in the fund would be subject to the registration provisions of the Securities Act of 1933 ("1933 Act"). A number of banks have organized funds consisting exclusively of IRA assets and have registered them under the 1940 Act.

The staff further takes the position that a common trust fund that commingles the assets of employee benefit plans meeting the requirements for qualification under Section 401 of the Internal Revenue Code with Section 3(c)(3) trust assets must register under the 1940 Act, and interests in that fund must be registered under the 1933 Act.[5] The staff does not believe that the Section 3(c)(3) exclusion extends to employee benefit plan funds held by a bank as trustee because a separate provision of the 1940 Act, Section 3(c)(11), already excludes certain employee benefit plans.[6]

Section 3(c)(11) provides that a collective trust fund maintained by a bank consisting solely of the assets of employee benefit plan trusts qualified under Section 401 of the Internal Revenue Code and government plans is not an investment company. Thus, the Bank could commingle its qualified plan trusts in a collective trust fund consisting solely of assets of such trusts without registering either the fund or interests in the fund.[7] However, since IRAs are qualified under Section 408 of the Internal Revenue Code, and not Section 401, the collective trust fund would not meet the requirements of Section 3(c)(11) if it included assets of IRAs and would, therefore, be required to register as an investment company.[8] Finally, the interests in such a fund must be registered under the 1933 Act.

I hope this information will be helpful to you. Please contact this Office if you have any additional questions or concerns.

Sincerely,

Richard F. Jackson

Attorney

Re: Request for No-Action Letter by Old Kent Financial Corporation Under the Following Statutes and Rules: Section 3(a)(2) of the Securities Act and Rule 132, Sections 3(a)(12) and 12(g)(2)(H) of the Exchange Act and Rules 3a12-6 and 12h-1(b), Sections 3(c)(3) and 3(c)(11) of the Investment Company Act and Rule 3c-4

Dear Sirs:

We are writing on behalf of Old Kent Bank and Trust Company ("Old Kent Bank"), a state banking corporation organized under the laws of and having its principal place of business in the state of Michigan, Old Kent Financial Corporation, a bank holding company incorporated under the laws of and having its principal place of business in the state of Michigan, and Unibanc Trust Company, a state banking corporation incorporated under the laws of and having its principal business in the state of Illinois.

Old Kent Financial Corporation is a bank holding company registered with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended. Old Kent Bank is a subsidiary of Old Kent Financial Corporation. Unibanc Trust Company and seven other banks having their principal place of business in Illinois, which are organized as national banking associations under the laws of the United States or state banking corporations under the laws of Illinois (the "Illinois Banks"), are also subsidiaries of Old Kent Financial Corporation. Old Kent Bank, Unibanc Trust Company, the Illinois banks, and Old Kent Financial Corporation are members of an "affiliated group," as that term is defined in § 1504(a) of the Internal Revenue Code of 1986, as amended (the "Code"). Old Kent Bank, Unibanc Trust Company, and the Illinois Banks (as well as any other affiliated banks hereafter acquired which maintain common and collective trust funds substantially in the manner described herein) are sometimes referred to collectively as "the Banks" in this letter.

Old Kent Financial Corporation's subsidiary banks operate a system of interbank common and collective trust funds for the collective investment and reinvestment of funds held in fiduciary capacities by the Banks. In reliance upon earlier letters from the Division of Corporate Finance and from the Division of Investment Management, several Old Kent Financial Corporation affiliate banks (listed on Exhibit A to the letter to Old Kent Financial Corporation, available February 29, 1988) are permitted to invest funds those banks hold in a fiduciary capacity into the common trust funds and collective trust funds maintained by Old Kent Bank.

Old Kent Financial Corporation would now like to allow Old Kent Bank to invest assets it holds in a fiduciary capacity into common and collective trust funds maintained by Unibanc Trust Company and the other Illinois Banks.

We hereby request your confirmation that the staff of the Division of Corporate Finance and the staff of the Division of Investment Management will not recommend that the Securities and Exchange Commission take any enforcement action if Old Kent Financial Corporation and its subsidiaries conduct the activities described below without effecting any registration under the Securities Act of 1933 (the "Securities Act"), the Securities Exchange Act of 1934 (the "Exchange Act"), and the Investment Company Act of 1940 (the "Investment Company Act").

Facts

The trust department of Old Kent Bank currently maintains certain common trust funds for the commingled investment of assets that Old Kent Bank holds in its capacity as trustee, executor, administrator, or guardian of personal fiduciary accounts, and certain collective investment funds for assets which Old Kent Bank holds in its capacity as trustee or agent for employee benefit trusts. The trust departments of Unibanc Trust Company and the other Illinois Banks also currently maintain certain common trust funds for the commingled investment of assets which Unibanc Trust Company and the Illinois Banks hold in their capacities as trustee, executor, administrator, or guardian of personal fiduciary accounts, and certain collective investment funds for assets which Unibanc Trust Company and the Illinois Banks hold in their capacities as trustee or agent for employee benefit trusts. Both types of funds are sometimes referred to generically as common trust funds or the "Funds."

In order to qualify for tax exemption under Section 584 of the Code, all of the common trust funds maintained by the Banks are maintained in conformity with the rules and regulations of the Comptroller of the Currency. All of the collective investment funds maintained by the Banks are operated either in conformity with the rules and regulations of the Comptroller of the Currency or in conformity with the conditions for tax exemption set forth in Section 401(a) of the Code and Rev.Rul. 81-100, 1981-1 C.B. 326 (superseding Rev.Rul. 56-267, 1956-1 C.B. 206 and Rev.Rul. 75-530, 1975-2 C.B. 146). Both the common trust and collective investment funds maintained by the Banks are in all cases maintained in conformity with a version of the Uniform Common Trust Fund Act, the Michigan Common Trust Fund Act, or the Illinois Common Trust Fund Act, as appropriate. The Banks exercise ultimate investment and management discretion over the respective common and collective trust funds they maintain.

Old Kent Financial Corporation wishes to expand its system of interbank common trust and collective investment funds in order to achieve certain operational efficiencies and economies of scale by eliminating the unnecessary duplication of common and collective trust funds having substantially identical investment characteristics, to assure the availability throughout the entire bank system of high quality investment management service, and to make available greater opportunities for diversification of trust assets and for participation in collective investment funds with specialized objectives.

Currently Unibanc Trust Company and the other Illinois Banks are able to invest assets which those Banks hold as trustee, executor, administrator, or guardian in common trust funds maintained by Old Kent Bank, and assets of employee benefit trusts which those Banks hold as trustee in collective trust funds maintained by Old Kent Bank. Any common or collective trust fund maintained by Unibanc Trust Company or another Illinois Bank can invest all or part of its assets in common and collective trust funds maintained by Old Kent Bank having compatible investment characteristics; subject, in each case, to the provisions of the governing trust or plan instruments and any applicable state laws. These investments are permitted in reliance on a letter from the Division of Corporation Finance and a letter from the Division of Investment Management to Old Kent Financial Corporation (available February 29, 1988), stating that neither division would recommend enforcement action under the Securities Act, the Exchange Act, or the Investment Company Act if such investments were allowed. In all cases, such investment transactions are undertaken in accordance with applicable state laws which permit such transactions.

Old Kent Financial Corporation would now like to permit personal fiduciary accounts for which Old Kent Bank serves as trustee, and common trust funds maintained by Old Kent, to participate in common trust funds maintained by Unibanc Trust Company. Old Kent Financial Corporation would also like to enable employee benefit trusts for which Old Kent Bank serves as Trustee, and collective trust funds maintained by Old Kent Bank, to participate in collective trust funds maintained by Unibanc Trust Company. It is possible that in the future Old Kent Financial Corporation will wish to permit similar participations by Old Kent Bank and Trust Company in common and collective trust funds maintained by the other Illinois Banks.

Each common trust fund in the interbank system would continue to be operated in compliance with substantially the same state and federal regulatory requirements as would apply if the Bank contributing funds thereto (the "contributing Bank") were the same entity as the bank maintaining the common or collective trust fund (the "maintaining Bank"). Michigan has adopted the Michigan Common Trust Funds Act, MCLA s 555.101, et seq., MSA s 23.1141, et seq. Illinois has adopted the Illinois Common Trust Fund Act, Ill.Rev.Stat. Ch.17, P 2101, et seq., S.H.A. Ch.17, P 2101, et seq. Funds maintained by Old Kent will continue to be operated in accordance with the Michigan Common Trust Funds Act, and funds maintained by Unibanc Trust Company and any other Illinois Banks that are Illinois state banks will continue to be operated in accordance with the Illinois Common Trust Fund Act. While there are minor variations between these two acts, they are substantially the same. Similarly, while we recognize that the

supervision and regulation of banks and trust departments varies somewhat in different states, we believe that the regulation of banks and trust companies by the states of Michigan and Illinois is closely comparable. In any event, the fiduciary duties owed to customers by Old Kent, Unibanc Trust Company, or any of the other Illinois Banks will remain the responsibility of the contributing Bank, and thus will be unaffected by the proposed interbank investments.

The rights of the beneficiaries of the contributing Bank's personal fiduciary accounts and the rights of the beneficiaries of the contributing Bank's employee benefit trusts investing in the maintaining Bank's common and collective trust funds, either directly or through the intermediary of the contributing Bank's own common and collective trust funds, would not be diminished by reason of such investment. The fees charged for services in the management of the interbank system would be no greater than those that would have been charged each participating personal fiduciary account and employee benefit trust had they been individually invested by the contributing Bank as trustee. The records maintained by the maintaining Bank and the contributing Bank would reflect the participation in each common and collective trust fund of all trusts and other accounts which participate in such fund, either directly or indirectly through intermediary Contributing Banks. The contributing Bank and the maintaining Bank would adhere to the various reporting requirements and percentage limitations on participations for the common and collective trust funds as required by the regulations of the Comptroller of the Currency.

Request for Commission Action

Based upon the foregoing facts, upon the prior no-action position taken by the Staff of the Commission regarding the ability of Illinois subsidiaries of Old Kent Financial Corporation to invest assets they hold and funds they maintain in a fiduciary capacity into the common and collective trust funds of Old Kent Bank, upon prior no-action positions taken by the Staff of the Commission concerning other companies, (in particular, First Wachovia Corporation (available May 18, 1988), United Virginia Bankshares, Inc. (available June 15, 1987), and SunTrust Banks, Inc. (available June 18, 1986)), and upon our analysis of the statutes, regulations, and policy considerations involved, we request that the staff of the Commission confirm our opinion that:

1. Participations in Unibanc Trust Company's common or collective trust funds may be issued to Old Kent Bank, as Trustee, without registration under the Securities Act of 1933 by virtue of the exemption provided by Section 3(a)(2) of such Act and Rule 132 thereunder;

2. Participations in Unibanc Trust Company's common or collective trust funds will be exempt from registration under the Securities Exchange Act of 1934 by virtue of the exemptions provided by Sections 3(a)(12) and 12(g)(2)(H) of such Act, and Rules 3a12-6 and 12h-1(b) thereunder; and

3. The common and collective trust funds of Unibanc Trust Company may exist and operate without registration under the Investment Company Act of 1940 by virtue of the exemptions provided by Sections 3(c)(3) and 3(c)(11) of such Act and Rule 3c-4 thereunder.

Copies of Old Kent Financial Corporation (available February 29, 1988), the prior letter in which the Staff of the Commission took a no-action position concerning interbank common and collective trust funds that Old Kent Financial Corporation sought to establish are enclosed with this letter.

Applicable Law

Section 3(a)(2) of the Securities Act exempts from registration any interest or participation in any common trust fund maintained by a bank for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian. That section also exempts any interest or participation in a collective trust fund maintained by a bank when such interest or participation is issued in connection with a stock bonus, pension, or profit sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code. Rule 132 of the General Rules and Regulations under the Securities Act defines common trust fund, as used in section 3(a)(2) of the Act, as including a common trust fund maintained by a bank which is a member of an affiliated group (as defined by section 1504(a) of the Code) which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of the affiliated group in the capacity of trustee, executor, administrator, or guardian. There are two conditions to this expanded definition: The common trust fund must be operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such a fund and any other contributing banks were the same entity; and the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator, or guardian must not be diminished by reason of the maintenance of such common trust fund by another bank member of the affiliated group.

Section 3(a)(12) of the Exchange Act includes in its definition of exempted security any interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian, and any interest or participation in a collective trust fund maintained by a bank which interest or participation is issued in connection with a stock bonus, pension, or profit sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954. Section 12(g)(2)(H) specifically exempts from the registration requirements of subsection (g) any interest or participation in collective trust funds maintained by a bank, which interest or participation is issued in connection with a stock bonus, pension, or profit sharing plan that meets the requirements for qualification under section 401 of the Code. Rule 12(h)-1(b) states that issuer shall be exempt from the provisions of 12(g) of the Act with respect to any interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of the monies contributed thereto by the bank in its capacity as a trustee, executor, administrator, or guardian. That Rule goes on to state that for its purposes, the term "common trust fund" includes a common trust fund which is a member of an affiliated group, as defined in section 1504(a) of the Code, and which is maintained exclusively for the investment and reinvestment of monies contributed thereto by one or more bank members of the affiliated group in the capacity of trustee, executor, administrator, or guardian. This definition assumes the same two conditions as does Rule 132 under the Securities Act.

Section 3(c)(3) of the Investment Company Act excludes from the definition of an "investment company" any common trust fund maintained by a bank exclusively for the collective investment and reinvestment of monies contributed thereto by the bank in its capacity as a trustee, executor, administrator, or guardian. Similarly, Section 3(c)(11) excludes from the definition of investment company any collective trust fund maintained by a bank consisting solely of the assets of employees stock bonus, pension, or profit sharing trusts which meet the requirements for qualification under Section 401 of the Code. Rule 3c-4 states that the term common trust fund, as used in Section 3(c)(3) of the Investment Company Act, includes a common trust fund maintained by a bank which is a member of an affiliated group and which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of the affiliated group, in the capacity of trustee, executor, administrator, or guardian. Again, the same two conditions are imposed: the common trust fund must be operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such fund and any other contributing banks were the same entity; and the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator, or guardian, must not be diminished by the reason of the maintenance of such common trust fund by another bank member of the affiliated group.

We note that, while the Commission has extended the exemptions from the registration requirements of the Securities Act, the Exchange Act, and the Investment Company Act by enacting the Rules cited above, the Commission has not specifically included in such Rules a reference to common trust funds maintained by out-of-state affiliates of a bank serving as trustee, executor, administrator, or guardian. However, we can find no reason why there should be any additional restrictions on an interstate common trust fund system operated as proposed by Old Kent Financial Corporation. In enacting these rules, the Commission noted that it would appear appropriate to view banks in an affiliated group as a single economic unit. Securities Act Release No. 5875, October 21, 1977. It seems appropriate, therefore, for the Commission to confirm that the above-cited statutes and Rules apply to interstate common and collective trust fund systems. With the amendments to the Bank Holding Company Act and state banking laws to allow interstate ownership of banks, there appears to be little policy concern against interstate banking affiliate operations, including common trust funds.

In SunTrust Banks, Inc., the staff of the Commission took a no-action position, finding that a regional bank holding company could implement a system of interbank common and collective trust funds for the collective investment and reinvestment of funds held in fiduciary capacities by subsidiary banks without registration under the Securities Act, the Exchange Act or the Investment Company Act, so long as the exceptions in Section 3(c)(3) and 3(c)(11) of the Investment Company Act were otherwise available to the common trust funds and collective trust funds maintained by the subsidiary banks. The staff emphasized that (a) all the SunTrust banks were members of an "affiliated group" as defined in the Code, (b) each fund would continue to be operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining the fund and the bank contributing assets thereto were the same entity, and (c) investment by a contributing bank in the maintaining bank's common trust fund would not diminish the rights of the beneficiaries of the contributing bank's personal fiduciary accounts.

Similarly, in United Virginia BankShares, Inc., the staff of the Commission took a no-action position. The staff stated that it would not recommend enforcement action based on counsel's opinion that participating in a maintaining Bank's common or collective trust funds, including funds of those banks that act as intermediaries, are exempt from registration under the Securities Act and the Exchange Act. Additionally, the staff said that it would not recommend any enforcement action under the Investment Company Act. The staff emphasized the same factors as it did in SunTrust Banks, Inc.

In First Wachovia Corporation, the staff again took a no-action position, stating that it would not recommend any enforcement action under the Securities Act, the Exchange Act or the Investment Company Act if a regional bank holding company implemented a system of interbank common and collective trust funds for the subsidiary banks of its two subsidiary bank holding companies. The staff again stressed the factors emphasized in SunTrust Banks, Inc., along with the fact that the subsidiary banks currently maintained the funds in question in their capacity as trustee, executor, administrator or guardian of personal fiduciary accounts, and in their capacity as trustee, co-trustee or managing agent of certain employee benefit trusts.

Like the facts presented in these prior no-action letters, the present situation justifies the issuance of a no-action letter. In particular, the following facts are true:

(i) Old Kent Bank, Unibanc Trust Company and the other Illinois Banks are members of an "affiliated group" as that term is defined in Section 1540(a) of the Code;

(ii) all funds maintained by the Banks would continue to be operated in compliance with substantially the same state and federal regulatory requirements as would apply if Old Kent Bank and the maintaining Bank were the same entity; and

(iii) investment by Old Kent Bank into a common trust fund maintained by Unibanc Trust Company or another Illinois Bank would not diminish the rights of the beneficiaries of Old Kent Bank's personal fiduciary accounts, nor would investment by Old Kent Bank into a collective trust fund maintained by Unibanc Trust Company or another Illinois Bank diminish the rights of the persons for whose benefit Old Kent Bank acts as agent or trustee.

As required by Securities Act Release No. 6269, seven copies of this letter are enclosed herewith. By sending this letter to the Division of Corporation Finance and to the Division of Investment Management simultaneously, we are requesting both divisions to confirm that they will not recommend that the Commission take any enforcement action if Old Kent Financial Corporation and its subsidiaries conduct the activities described herein.

Should you determine that you are unable to take the action requested in this letter, we request the opportunity to consult further with the staff prior to any written response to this letter. If you have any questions regarding the requested ruling or desire further information, please do not hesitate to call me, or, in my absence, M. Gayle Robinson of this firm, by telephone at (616) 459-6121.

Very truly yours,

Gordon R. Lewis

SEC Letter

(Cite as: 1989 WL 246145, (S.E.C.))

1933 Act / s 3(a)(2)

July 25, 1989

Publicly Available July 25, 1989

We would not recommend that the Commission take any enforcement action against Old Kent Bank and Trust Company ("Old Kent Bank"), Old Kent Financial Corporation, or Unibanc Trust Company ("Unibanc Trust"), under the Investment Company Act of 1940 ("1940 Act"), if assets held by Old Kent Bank or the common and collective trust funds maintained by Old Kent Bank are invested in the common and collective trust funds ("Funds") maintained by Unibanc Trust, without registration of the Funds under the 1940 Act. As we noted in our earlier response to Old Kent Financial Corporation (pub. avail. Feb. 29, 1988),[1] our position is based on the facts and representations in your letter, including that:

(1) Old Kent Bank and Unibanc Trust are members of an "affiliated group" as that term is defined in section 1504(a) of the Internal Revenue Code of 1986;

(2) Old Kent Bank and Unibanc Trust currently maintain their common and collective trust funds pursuant to the exceptions in section 3(c)(3) and section 3(c)(11), respectively, of the 1940 Act in their capacity as trustee, executor, administrator, or guardian of personal fiduciary accounts and in their capacity as trustee or agent for employee benefit trusts;

(3) all funds maintained by Old Kent Bank and Unibanc Trust would continue to be operated in compliance with the same state and federal regulatory requirements as would apply if Old Kent Bank maintained the funds it contributes to Unibanc Trust; and

(4) neither the rights of the beneficiaries of Old Kent Bank's personal fiduciary accounts nor the rights of the persons for whose benefit Old Kent Bank acts as agent or trustee would be diminished by reason of their investment in the Funds.

The Division of Corporation Finance has asked us to advise you that, based on the facts presented, that Division will not recommend any enforcement action to the Commission if Old Kent Financial Corporation, in reliance on your opinion that participations in Unibanc Trust Company's common or collective trust funds are exempt from registration under section 3(a)(2) and Rule 132 of the Securities Act of 1933 and from registration under section 3(a)(12) and 12(g)(2)(H) and Rule 3a12-6 and Rule 12h-1 of the Securities Exchange Act of 1934, permits funds maintained by Old Kent Bank to participate in Unibanc Trust Company's common and collective trust funds as proposed without registration of the interests in the funds under the 1933 Act or the 1934 Act.

Because these positions are based on the representations made to our Divisions it should be noted that any different facts or representations might require different conclusions. Moreover, this response only expresses the Divisions' positions on enforcement action and does not purport to express any legal conclusions on the questions presented.

Definitions concerning multi-bank common trust funds

Securities and Exchange Commission

Securities Act of 1933

Release No. 5896

Securities Exchange Act of 1934

Release No. 14363

Investment Company Act OF 1940

Release No. 10089

January 10, 1978

Summary: These rules have the effect, provided certain conditions are met, of treating common trust funds for several banks in the same affiliated group ("multi-bank common trust funds") in the same manner as traditional single bank common trust funds which are ordinarily exempt from regulation as investment companies, and from the registration and reporting requirements normally applicable to publicly held companies and other issuers of securities. Some state laws permit multi-bank common trust funds, which may operate as non-taxable entities. In the absence of these rules, multi-bank common trust funds might be treated differently under the federal securities laws from single bank common trust funds.

Common trust funds maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator, or guardian, and interests or participations therein, are exempted or excluded from provisions of the federal securities laws by section 3(a)(2) [15 USC 77c(a)(2)] of the Securities Act of 1933 [15 USC 77a et seq.) ("Securities Act"), section 3(a)(12) [15 USC 78c(a)(12)] and rule 12h-2 [17 CFR 240.12h-2] of the Securities Exchange Act of 1934 [15 USC 78a et seq.) (Exchange Act"), and section 3(c)(3) [15 USC 80a-3(c)(3)] of the Investment Company Act of 1940 [15 USC 80a-1 et seq.] ("Investment Company Act").

These provisions apply only to common trust funds for assets contributed by a bank in a bona fide fiduciary capacity and incidental to the bank's traditional trust department activities.

These rules define the term "common trust fund" to include multi-bank common trust funds, and thus have the effect of exempting them from the provisions of the Investment Company Act. Also, under these rules interests or participations therein would be exempt from the registration requirements in section 5 [15 USC 77e] of the Securities Act and section 12(g) of the Exchange Act [15 USC 781(g)], and be "exempted securities" under section 3(a)(12) of the Exchange Act.

Part 230 - General Rules and Regulations, Securities Act of 1933

230.132 Definition of "common trust fund" as used in section 3(a)(2) of the Act.

The term "common trust fund" as used in section 3(a)(2) of the Act [15 USC 77c(a)(2)] shall include a common trust fund which is maintained by a bank which is a member of an affiliated group, as defined in section 1504(a) of the Internal Revenue Code of 1954 (26 USC 1504(a)], and which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of such affiliated group in the capacity of trustee, executor, administrator, or guardian, provided that:

(a) the common trust fund is operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such fund and any other contributing banks were the same entity; and

(b) the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator, or guardian would not be diminished by reason of the maintenance of such common trust fund by another bank member of the affiliated group.

Codified to 15 USC 77s(a).

Part 240 - General rules and regulations, Securities Exchange Act of 1934

240.12h-2 Exemptions from registration under section 12(g) of the act.

* * *

(b) Any interest or participation in any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of monies contributed thereto by the bank in its capacity as a trustee, executor, administrator, or guardian. For purposes of this paragraph (b), the term "common trust fund" shall include a common trust fund which is maintained by a bank which is a member of an affiliated group, as defined in section 1504(a) of the Internal Revenue Code of 1954 [26 USC 1504(a)], and which is maintained exclusively for the investment and reinvestment of monies contributed thereto by one or more bank members of such affiliated group in the capacity of trustee, executor, administrator, or guardian, provided that:

> (1) the common trust fund is operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such fund and any other contributing banks were the same entity; and
>
> (2) the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator or guardian would not be diminished by reason of the maintenance of such common trust fund by another bank member of the affiliated group; and

* * *

240.3a12-6 Definition of "common trust fund" as used in section 3(a)(12) of the act.

The term "common trust fund" as used in section 3(a)(12) of the Act [15 USC 78c(a)(12)) shall include a common trust fund which is maintained by a bank which is a member of an affiliated group, as defined in section 1504(a) of the Internal Revenue Code of 1954 [26 USC 1504(a)], and which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of such affiliated group in the capacity of trustee, executor, administrator, or guardian, provided that:

(a) the common trust fund is operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such fund and any other contributing banks were the same entity; and

(b) the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator, or guardian would not be diminished by reason of the maintenance of such common trust fund by another bank member of the affiliated group.

Codified to 15 USC 78c(b).

Part 270 - Rules and Regulations, Investment Company Act of 1940

270.3c-4 Definition of "common trust fund" as used in section 3(c)(3) of the Act.

The term "common trust fund, as used in section 3(c)(3) of the Act [15 USC 80a-3(c)(3)] shall include a common trust fund which is maintained by a bank which is a member of an affiliated group, as defined in section 1504(a) of the Internal Revenue Code of 1954 [26 USC 1504(a)], and which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of such affiliated group in the capacity of trustee, executor, administrator, or guardian, provided that:

(a) the common trust fund is operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining such fund and any other contributing banks were the same entity; and

(b) the rights of persons for whose benefit a contributing bank acts as trustee, executor, administrator, or guardian would not be diminished by reason of the maintenance of such common trust fund by another bank member of the affiliated group.

Codified to 15 USC 80a-6(c), 8Oa-37(a).

Collective Investment Funds

SEC No-Action Letter

First Jersey National Bank

Publicly Available November 13, 1987

(Cite as: 1987 WL 108740 (S.E.C.))

Recap
"Mini-trusts" are not bona fide fiduciary accounts for purposes of federal securities laws, and so may not participate in a collective investment fund unless the CIF is registered with the SEC as a security and as a mutual fund.

Letter to SEC

Office of Chief Counsel

Division of Investment Management

Securities and Exchange Commission

450 Fifth Street, N.W.

Washington, D.C. 20519

Gentlemen:

We are writing on behalf of First Jersey National Bank (the "Bank"), a national banking association organized under the laws of the United States of America, to request that the staff of the Securities and Exchange Commission (the "Staff" and the "Commission") advise us that it will not recommend any action to the Commission if the Bank, through its Trust Department, maintains common trust funds without compliance with the registration requirements of Section 3(a)(2) of the Securities Act of 1933 (the "1933 Act"), Section 3(a)(12) of the Securities Exchange Act of 1934 (the "1934 Act") and Section 3(c)(3) of the Investment Company Act of 1940 (the "1940 Act") (collectively the "Acts").

I. Statement of Facts

The Bank is a national banking association located in New Jersey, which had total assets as of March 31, 1987 of 4.9 billion. The Bank is a qualified bank under the provisions of state law and is authorized to act in various fiduciary capacities, including administrator, executor and/or trustee under a decedent's Last Will and Testament, a trustee under an intervivos trust and as a guardian of an incompetent or a minor. The Bank presently administers assets exceeding 1.25 billion, including approximately 900 million for personal trust services and 350 million for employee benefit trust services. The assets administered in this capacity include approximately 525 trusts and estates ranging in size from $20,000 to $8,800,000.

In connection with the administration of its Trust Department, the Bank maintains three common trust funds. The first, which was established in 1965, is called The First Jersey National Bank Commingled Trust Fund For Employee Benefit Plans (the "Commingled Fund"). The Commingled Fund is used exclusively for the administration of employee benefit plan assets. The Commingled Fund has assets of approximately 145 million. At all times since the Commingled Fund was established and at the present time, the Commingled Fund was and is subject to all applicable New Jersey trust and banking laws, Comptroller of the Currency rules and regulations and is qualified as a common trust fund under Section 584 of the Internal Revenue Code of 1986.

Unlike the Commingled Fund, the other two common trust funds are not limited to use for employee benefit plans. Rather, The First Jersey National Bank Plan of Common Trust Equity Fund "I" (the "Equity Fund") and the First Jersey National Bank Plan of Common Trust Fixed Income Fund "I" (the "Fixed Income Fund") were established in 1985 for personal assets. The Equity Fund and Fixed Income Fund are designed so that the Bank can contribute to such Funds provided that the underlying trust or Last Will and Testament, as the case may be, allow for such an investment and the Bank is appropriately designated as a trustee, executor or guardian. The Equity Fund has assets of approximately 11.3 million and the Fixed Income Fund has assets of approximately 19.3 million. At all times since the Equity Fund and the Fixed Income Fund were established and at the present time, the Equity Fund and the Fixed Income Fund were and are subject to all applicable New Jersey trust and banking laws, Comptroller of the Currency rules and regulations and are qualified as common trust funds under Section 584 of the Internal Revenue Code of 1986.

Through its Trust Department, the Bank is proposing to continue and expand its existing common trust funds pursuant to the First Jersey National Bank Plan of Common Trust Funds (the "Common Trust Fund") (see attached). The Common Trust Fund will allow the Bank, while acting as a fiduciary, to contribute monies to the Common Trust Fund that it holds as trustee, executor, administrator or guardian. The Bank will at all times act as trustee of the Common Trust Fund. After the participant designates the type of common trust fund in which the underlying corpus is to be placed, the trustee shall have the

exclusive management and control of the common trust fund including the authority to invest and reinvest the principal and/or the undistributed income of the trust's or estate's assets in any such class or classes of property as the trustee determines are appropriate for the participation and in accordance with the common trust fund's investment powers.

The Common Trust Fund will be administered as part of and incidental to the Trust Department's regular trust activities. The Bank will not utilize any general advertising or solicitation for the Common Trust Fund and will continue to offer the Common Trust Fund as one of the many trust services provided by the Bank. The Common Trust Fund will be administered in compliance with all applicable trust and banking statutes, rules and regulations existing in New Jersey, regulations of the Comptroller of the Currency and the Internal Revenue Code of 1986, as amended, and regulations of the Internal Revenue Service.

Interests could be deposited into the Common Trust Fund in anyone of three (3) ways. First, the interests currently being administered in the Equity Fund and Fixed Income Fund would be transferred to the Common Trust Fund and such interests would continue to be administered in the equity fund and fixed income fund. As stated above, the Equity Fund and Fixed Income Fund were previously established and are currently administered to allow the Bank, when acting in the capacity of a trustee, executor or guardian, to invest in a common trust fund. This transfer of funds will in no way adversely affect the rights of persons who have an interest in the Equity Fund and the Fixed Income Fund. Further, all of the statutes, rules and regulations that are applicable to the Equity Fund and Fixed Income Fund are also applicable to the Common Trust Fund.

Once the transfer of interests to the Common Trust Fund is made, the Bank may contribute assets to the Common Trust Fund where the Bank has been designated as a trustee or co-trustee under the terms of a trust agreement prepared outside the Bank's auspices. Interests accepted by the Bank in this manner will continue to be incidental to the Bank's regular Trust Department activities.

Second, the Bank is proposing to utilize a Participating Trust Agreement (see attached) to provide clients of the Trust Department with a trust document under which assets are deposited with the Bank as a trustee with complete fiduciary authority including the right and obligation to invest all trust assets. The Participating Trust Agreement will be evaluated, accepted or rejected and administered by the Trust Department in the same manner and with the same degree of scrutiny as every other trust agreement in which the Bank is either a trustee or co-trustee. It is envisioned that the minimum interest that a grantor could invest would be $50,000 Dollars. As trustee, the Bank will have all of the fiduciary duties, responsibilities and liabilities as provided for under New Jersey statutes (N.J.S.A. 3B:14-1 et seq.; 3B:10-1 et seq.) and common law.

During the lifetime of the grantor, the Participating Trust Agreement provides the trustee with the ability to determine whether or not to make payments to or for the benefit of the grantor in instances in which the trustee deems it advisable for the care, maintenance and support of the grantor or when the grantor becomes disabled. In carrying out this provision, the Bank is subject to the standard of care imposed upon fiduciaries by the laws of the State of New Jersey. Additionally, the Participating Trust Agreement provides for the grantor to designate his spouse or his estate as a beneficiary of the trust upon the death of the grantor. In the instance in which the spouse is designated as a beneficiary, the trust could continue, as would the Bank's obligations as trustee, until the death of the spouse or upon the earlier termination of the trust by the spouse. Under certain circumstances, the Bank may allow the grantor to choose additional dispositive provisions that best meets the grantor's needs.

Other fiduciary responsibilities imposed on the trustee include the obligation to determine and settle any federal estate and gift tax liability imposed on the trust, which tax liability potentially increases at any time in which the trustee makes a discretionary payment. Furthermore, there is the obligation to render a statement to both grantor and beneficiary which shall serve as an accounting to properly inform such parties of activities within the trust account.

Third, the Bank would accept interests into the Common Trust Fund if the Bank is appointed as a conservator, a guardian for a minor or mental incompetent, as administrator or as an executor of the estate of a decedent. To serve in the capacity of a conservator, the Bank would need the consent of the conservatee and the appointment as such by the Superior Court of New Jersey upon a finding that a conservatee, by reason of advanced age, illness or physical infirmity, is unable to provide for himself or others dependent upon him for support. N.J.S.A. 3B:13A-1 et seq; N.J.Ct.R. 4:83-1 et seq. The court proceeding may be initiated by the conservatee or some other person in his behalf. A conservator has both formal and informal accounting requirements and may have to post a bond.

To serve in the capacity of a guardian for a minor, the Bank must be appointed by a court and act in a fiduciary manner with an obligation to preserve and manage the property and rights of a minor. N.J.S.A. 3B:12-1 et seq. To serve in the capacity of a guardian for a mental incompetent, the Bank must be appointed by the Superior Court of New Jersey following a declaration of incompetency by such court pursuant to New Jersey statutes and court rules. N.J.S.A. 3B:12-1 et seq.; N.J.Ct.R. 4:83-1 et seq.

To serve in the capacity of an executor, the Bank would have to be designated as such under a testator's will. As an executor, the Bank must act in a fiduciary manner as set forth by New Jersey statutes and common law.

II. Requested No-Action Position.

On the basis of the foregoing facts, we request that the Staff advise us that it will not recommend any action to the Commission if the Common Trust Fund is not registered under the 1940 Act and the interests in the Common Trust Fund are not registered under the 1933 Act and 1934 Act.

III. Discussion.

Subject to the concurrence of the Staff as requested herein, it is our belief that the continuation and expansion of the Common Trust Fund will not require registration under the 1940 Act by virtue of Section 3(c)(3) which excepts from the definition of investment company "any common trust fund or similar fund maintained by a bank exclusively for the collective investment and reinvestment of money contributed thereto by the bank in its capacity as trustee, executor, administrator or guardian ..." Similar exemptions from registration are available for interests in the Common Trust Fund under Section 3(a)(2) of the 1933 Act and Section 3(a)(12) of the 1934 Act.

In prior No-Action Letters, both the Division of Corporate Finance and Division of Investment Management have stressed that moneys contributed to a common trust fund must be received by a bank acting in a bona fide fiduciary capacity rather than serving as a mere vehicle for the general investment by the public. We believe that the interests in the Common Trust Fund will be received by the Bank while acting in a bona fide fiduciary capacity and will not be utilized by the public as a vehicle for investment.

In the case where interests are admitted into the Common Trust Fund from the existing Equity Fund and Fixed Income Fund, such a transfer is very similar to the transfers that were described in the Allied Trust Company No-Action Letter (available April 25, 1984) ("Allied") and Sun Trust Banks, Inc. No-Action Letter (available June 18, 1986) ("Sun Trust"). Allied and Sun Trust involved existing common trust funds with respect to which either Allied or Sun Trust, or their subsidiaries, maintained a common fund in which such entities held interests in their capacity as trustee, executor, administrator or guardian. In addition, in both cases the rights of the beneficiaries were not diminished by the transfer of existing trust assets, the fees charged were not increased by reason of such a transfer and the resulting common fund agreed to comply with the same statutes, rules and regulations of the particular state and of the Comptroller of the Currency and the Internal Revenue Service. The staff granted Allied's and Sun Trust's request for a no-action determination.

The transfer of interests from the Equity Fund and the Fixed Income Fund to the Common Trust Fund will involve all of the same characteristics found in Allied and Sun Trust. Prior to and after the transfer, the interests are and will be maintained by the Bank as a trustee, executor, administrator or guardian. The proposed transfer will not adversely affect the rights of any persons who have an interest in the Equity Fund or Fixed Income Fund; nor will the proposed transfer increase fees, vary the applicability or change the required compliance with any applicable statutes, rules and regulations. Not only are the investment characteristics virtually the same between the Equity Fund and Fixed Income Fund when compared to the Common Trust Fund, but all of the Bank's reporting obligations and virtually all of the mechanics involved in administering the trusts are the same.

In the case where interests are admitted into the Common Trust Fund by grantors utilizing the Participating Trust Agreement, the moneys will be received by the Bank while acting in a bona fide fiduciary capacity. The Bank will become a fiduciary subject to the duties, responsibilities and liabilities imposed by New Jersey statutes and common law. N.J.S.A. 3B:11-1 et seq. Since the Acts specifically use the term "trustee" and under New Jersey law the Bank would be acting as a trustee, we believe, absent a determination that the interests would be used by the public for general investment, that the clear language used in such Acts would exempt interests admitted to the Common Trust Fund in this manner.

As in the case of interests admitted into the Common Trust Fund from the existing Equity Fund and Fixed Income Fund, the interests admitted by virtue of a Participating Trust Agreement will not be used by the

public for general investment. The Participating Trust Agreement is substantially different than a general investment money market or mutual fund account. Under the investment agreements used for money market or mutual fund accounts, the investment manager does not trigger any of the duties, responsibilities or liabilities of a trustee. Rather, acting as an investment manager simply imposes the obligation to invest assets in accordance with the investment agreement, upon the death of the customer, to distribute the principal and proceeds of the assets to the customer's estate and to render a financial report to all the customers. A money market or mutual fund account is fully subject to the federal and state securities laws and most allow a relatively small dollar amount of approximately $1,000 or $2,500 dollars to open an account. Finally, the procedures used in executing a money market or mutual fund investment agreement and depositing and withdrawing from such an account are very informal and can even include instructions over the telephone.

In almost complete contrast, the Participating Trust Agreement appoints the Bank as a trustee, under state law, with complete fiduciary authority including the right and obligation to invest all trust assets. The duties, responsibilities and liabilities of the Bank, as trustee, are much more substantial and onerous than that of an investment manager of a money market or mutual fund account. For instance, the Bank, as trustee, has the responsibility for determining whether or not to make payments to or for the benefit of the grantor in instances in which the Bank deems it advisable for the care, maintenance and support of the grantor or when the grantor is deemed disabled. The investment manager for a money market or mutual fund account is not so responsible, but simply must follow the customer's instructions to either deposit or withdraw the deposited assets or portions thereof.

The Participating Trust Agreement allows the grantor to designate his spouse or his estate as a beneficiary of the trust upon the death of the grantor. In the instance in which the spouse is designated as a beneficiary, the trust could continue, as would the Bank's obligations as trustee, until the death of the spouse or upon the earlier termination of the trust by the spouse. Under certain circumstances, the Bank may allow the grantor to choose additional dispositive provisions. By allowing the grantor, in consultation with a representative of the Trust Department, to choose a dispositive provision which would encompass estate planning decisions and tax implications, the Bank is acting far beyond an investment manager who simply remits the balance of the account to the estate of the customer without the ability to consider any estate planning decisions and tax implications at the outset or conclusion of the customer-investment manager relationship.

Another contrast between the Participating Trust Agreement and a money market or mutual fund account is that the grantor may not receive the net income of the trust estate more frequently than once a month. This same restriction, relating to the ability to receive the net income of the trust estate, is also found for all interests admitted and distributions made to the Common Trust Fund. In most money market or mutual fund accounts, deposits and withdrawals can be made on a daily basis.

As a trustee, the Bank has certain other fiduciary duties that are not imposed on an investment manager. There is an obligation to render a statement to both grantor and beneficiary which shall serve as an accounting to properly inform such parties of activities within the trust account. In addition, upon the death of the grantor, the Bank has a clear obligation under state law to settle the tax obligations of the trust with a view toward the care and preservation of the corpus of the trust. In fact, under Section 6324 of the Internal Revenue Code of 1986, if the Bank does not act in such a fiduciary manner, the Bank can be held liable. An investment manager does not provide any accounting, but instead distributes a quarterly financial summary that is also used for general advertising purposes. Upon the death of a customer, there is no obligation, nor is there any possibility of liability, imposed on the investment manager except to remit the balance of the account to the customer's estate.

Lastly, the Participating Trust Agreement is designed for interests of at least $50,000 Dollars. While there may be extremely limited circumstances in which the Bank may accept an interest of less than $50,000, but never any less than $25,000, even $25,000 is substantially greater than the $1,000-$2,500 Dollar minimums being used by money market or mutual fund accounts. The greater minimum amount under the Participating Trust Agreement limits the availability of this fiduciary instrument to grantors with, not only greater financial wherewithal and presumably greater financial acumen, but also to grantors desiring a more individualized and personal relationship.

In the case where interests are admitted into the Common Trust Fund pursuant to an appointment of the Bank as a conservator, a guardian for a minor or mental incompetent, an administrator or a designation under a testator's Last Will and Testament as an executor, will clearly impose traditional fiduciary duties, responsibilities and liabilities on the Bank. In instances in which the Bank is acting as a conservator or guardian, there will be court supervision and scrutiny over such proceedings. Once again, since the Acts

specifically use the term "executor" and "guardian" and under New Jersey law the Bank would be acting as an executor or guardian, the clear language used in such acts would exempt interests admitted to the Common Trust Fund in this manner.

In the instance of the Bank acting as a conservator, the Staff has previously issued a no-action determination to Wells Fargo Bank National Assoc. (available January 15, 1978) ("Wells Fargo"). In Wells Fargo, the staff was asked to determine whether a bank acting as a conservator under California law would be exempt from registration under the Acts because of the similarity in fiduciary responsibility imposed on the bank between its role as a conservator and guardian. In granting the no-action determination, the Staff simply wrote that they would not recommend that the Commission take any action under the 1940 Act (the Division of Corporate Finance did not opine in Wells Fargo) provided that solicitation of clients for this service would not be by advertisements in the mass media. Rather, solicitation of clients would be accomplished only through brochures describing trust department services.

In instances when the Bank contributes interests to the Common Trust Fund while acting as a conservator, the Bank will be acting in an analogous manner to Wells Fargo. The Bank will be acting as a conservator under the applicable state law (New Jersey) and will be performing similar fiduciary responsibilities as a guardian would under New Jersey law. Also, the Bank will not utilize any advertising through the mass media. Therefore, while the Acts do not specifically list the term "conservator", the Staff should issue a no-action determination for interests admitted to the Common First Fund while the Bank is acting in the capacity of a conservator.

In addition to the interests admitted to the Common Trust Fund being exempt from registration under the 1933 Act and the 1934 Act, the Common Trust Fund's formation and operation by the Bank is also exempt from registration under the 1940 Act. Since the Common Trust fund is being maintained by the Bank exclusively for the collective investment and reinvestment of money contributed thereto by the Bank in its capacity as a trustee executor, administrator or guardian, registration under the 1940 Act is not required. The Bank will administer the Common Trust Fund in compliance with all applicable trust and banking statutes, rules and regulations existing in New Jersey, of the Comptroller of the Currency and the Internal Revenue Code. These rules and regulations include 12 C.F.R. 9.18 and the precedent and opinions of the Comptroller of the Currency issued thereunder. Concurrently with the submission of this no-action request, the Bank has submitted the Common Trust Fund to the Internal Revenue Service for a determination that the same is in compliance with Internal Revenue Code Section 584.

As previously written, the Bank will not solicit any participants to the Common Trust Fund through advertisements aimed at the mass media. Instead, any publicity about the Common Trust Fund and copies of the annual financial report shall be made solely in connection with the promotion of the fiduciary services of the Bank. Lastly, the Common Trust Fund will be maintained as incidental to the Trust Department's regular activities.

IV. Conclusion

As a result of the fact that the Bank will maintain the Common Trust Fund for the collective investment and reinvestment of money contributed thereto by the Bank in its capacity as trustee, executor, guardian or conservator, and based on the fact that the Common Trust Fund will not serve as a mere vehicle for the general investment by the public, we believe that the Common Trust Fund is exempt from registration under Section 3(c)(3) of the 1940 Act and the interests in the Common Trust Fund are exempt from Section 3(a)(2) of the 1933 Act and Section 3(a)(12) the 1934 Act.

Re: First Jersey National Bank

Incoming letter dated July 10, 1987

On the basis of the facts presented, and particularly noting that the Division of Investment Management has determined that it is unable to assure you that it would not recommend any enforcement action to the Commission if the Bank maintains the Funds as proposed in your letter without registering the Funds under the Investment Company Act of 1940, we are unable to advise you that this Division would not recommend enforcement action to the Commission should the Bank offer and maintain the Funds as described in your letter without registration of interests therein under the Securities Act of 1933 and the Securities Exchange Act of 1934.

The Division of Investment Management has asked us to inform you of their position as follows.

Your letter of July 10, 1987, requests our assurance that we would not recommend any enforcement action to the Commission under the Investment Company Act of 1940 ("1940") if the Bank implements the proposed expansion of its existing common trust funds (namely, the Equity Fund and the Fixed Income Fund; collectively, "Funds") without registering them under the 1940 Act. The proposal contemplates that the Bank will solicit participations in the Funds by offering to its customers its services as trustee under participating trust agreements ("mini-trusts") that are standardized and revocable and can be set up generally with a $50,000 minimum initial investment, except in limited cases where the Bank may accept a lesser amount not less than $25,000. The grantor designates which of the Funds his money should be invested in. Also, the grantor may withdraw any sum or sums from the principal as often as once a month and, with the Bank's consent, add to the principal from time to time. The grantor is entitled to a monthly distribution of the net income unless he shall have instructed the Bank otherwise. The Bank has discretionary authority to provide out of the principal for the grantor's support and, in the event of the grantor's illness or disability, for expenses related thereto. In the event of the grantor's death, the Bank, after payment of the obligations of the grantor's estate, must distribute the principal and accrued net income to the grantor's estate or spouse, as the grantor may designate. If the spouse is designated as beneficiary, the mini-trust could continue until the earlier of the spouse's death or the spouse's revocation of the trust.

You argue that investment of mini-trust moneys in the Funds should not make section 3(c)(3) of the 1940 Act[1] unavailable to the Funds because section 3(c)(3) specifically uses the term "trustee," the Bank would be acting as a "trustee" under New Jersey law, and you believe that the public will not use the mini-trusts for general investment in the Funds. Where, as in this case, a bank makes a public offer of mini-trusts the assets of which are to be invested in such of the bank's common trust funds as the grantors may designate, the offer could involve an offer of participations in the common trust funds for investment unless the grantors are likely to create and use the mini-trusts primarily to avail of the bank's fiduciary functions in addition to money management. This view is supported, among other things, by statements of the Federal Reserve Board ("Board") regarding the proper scope of activities of bank common trust funds, which formed the basis for the common trust fund exception under the 1940 Act. In May 1940, the Board stated

In amending Regulation F to permit the operation of Common Trust Funds, the Board intended that a Common Trust Fund should be used merely to aid in the administration of trusts by a trust institution through the commingled investment of funds of various trusts. While the operation of a Common Trust Fund might thus enable a trust institution to accept small trusts which it otherwise would be unwilling to handle, it was contemplated that trust guise or form should not be used to enable a trust institution to operate a Common Trust Fund as an investment trust attracting money seeking investment alone and to embark upon what would be in effect the sale of participations in a Common Trust Fund to the public as investments.... In determining whether a particular trust is created and used for "bona fide fiduciary purposes," it is necessary to consider, in the light of such intent and purposes, not only the terms of the trust instrument but also other facts and circumstances concerning the creation and use of the trust.[2]

Under the mini-trust, the grantor designates which of the Funds his money should be invested in, will receive the monthly net income thereof unless he instructs the Bank otherwise, and may add to, withdraw from, and revoke the mini-trust. Although the Bank also stands ready to provide, in addition to money management, such traditional fiduciary services as providing for the grantor's support from the trust corpus, paying for expenses related to the grantor's illness, disability, death, etc., and continuing the mini-trust for the benefit of the grantor's spouse at the spouse's option, we are unable to conclude that grantors

of the mini-trusts would create and use the mini-trusts primarily to avail of the Bank's fiduciary services.[3] Thus, we cannot conclude that the Bank's proposal would not involve an offer of participations in the Funds to the public as investments.[4] Accordingly, we cannot assure you that we would not recommend any enforcement action to the Commission under the 1940 Act if the Bank implements its proposal without registering the Funds under that Act.

Because these positions are based upon the representations made to the Division in your letter, it should be noted that any different facts or conditions might require different conclusions. Moreover, this letter merely expresses the Divisions' positions regarding enforcement action, and does not purport to express any legal conclusion with respect to the questions presented.

Sincerely,

Cecilia D. Blye

Letter to SEC

January 26, 1987

Office of the Chief Counsel

Division of Corporate Finance

Securities and Exchange Commission

450 Fifth Street

Washington, D.C. 20549

Dear Sirs:

We are writing on behalf of United Virginia Bankshares, Incorporated ("Bankshares"), a regional bank holding company incorporated under the law of Virginia and having its principal place of business in Richmond, Virginia. Bankshares's principal subsidiaries are United Virginia Bank ("UVB"), a banking corporation incorporated under the laws of and having its principal place of business in the state of Virginia, NS & T Bank, N.A. ("NS & T"), a national banking association having its principal place of business in the District of Columbia, and Bank of Bethesda ("Bethesda"), a banking corporation incorporated under the laws of and having its principal place of business in the state of Maryland (UVB, NS & T and Bethesda are sometimes hereinafter referred to as the "Banks"). Bankshares is a bank holding company registered with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended (the "Bank Holding Company Act"). All of the Banks and Bankshares are members of an "affiliated group" as that term is defined in Section 1504(a) of the Internal Revenue Code of 1986, as amended (the "Code").

Bankshares proposes to implement a system of interbank common and collective trust funds for the collective investment and reinvestment of funds held in fiduciary capacities by the Banks. We hereby request your confirmation that the staff of the Division of Corporate Finance will not recommend that the Securities and Exchange Commission take any enforcement action if Bankshares and its subsidiaries conduct the activities described below without effecting any registration under the Securities Act of 1933 (the "Securities Act"), the Securities Exchange Act of 1934 (the "Exchange Act") and the Investment Company Act of 1940 (the "Investment Company Act").

Facts:

The trust departments of certain of the Banks currently maintain certain common trust funds for the commingled investment of assets which such Banks hold in their capacity as trustee, executor, administrator or guardian of personal fiduciary accounts and certain collective investment funds for assets which such Banks hold in their capacity as trustee or agent for employee benefit trusts. Both types of funds are sometimes referred to generically as common trust funds. In order to qualify for tax exemption under Section 584 of the Code, all of the common trust funds maintained by the Banks, including those maintained by state Banks, are maintained in conformity with the rules and regulations of the Comptroller of the Currency. All of the collective investment funds maintained by the Banks are operated either in conformity with the rules and regulations of the Comptroller of the Currency or in conformity with the conditions for tax exemption set forth in Section 401(a) of the Code and Rev.Rul. 81-100, 1981-1 C.B. 326 (superseding Rev.Rul. 56-267, 1956-1 C.B. 206 and Rev.Rul. 75-530, 1975-2 C.B. 146). Both the common trust and collective investment funds are in all cases maintained in conformity with a version of the Uniform Common Trust Fund Act or a similar law in force in the respective state or jurisdiction of the Bank which maintains them. The Banks exercise ultimate investment and management discretion over the respective common and collective trust funds they maintain.

In order to achieve certain operational efficiencies and economies of scale, to assure the availability throughout the Bankshares bank system of high quality investment management service, and to make available greater opportunities for diversification of trust assets and for participation in collective investment funds with specialized objectives, Bankshares wishes to establish a system of interbank common trust and collective investment funds in which all the Banks could participate. Initially, employee benefit trusts for which certain Banks serve as trustee and collective investment funds maintained by those Banks will be permitted to participate in collective investment funds maintained by UVB, and personal fiduciary accounts for which certain Banks serve as trustee and common trust funds maintained by those Banks will be permitted to participate in common trust funds maintained by UVB. It is anticipated, however, that ultimately (1) any Bank would be able to invest assets which it holds in its capacity as trustee, executor, administrator or guardian in common trust funds maintained by other Banks and assets of employee benefit trusts which it holds as trustee in collective investment funds maintained by other Banks, and (2) any common or collective trust fund maintained by a Bank would be able to invest all or

part of its assets in common and collective trust funds maintained by other Banks having compatible investment characteristics, subject, in each case, to the provisions of the governing trust or plan instruments and any applicable state laws. In all cases, the proposed investment transactions would be undertaken in accordance with applicable state laws which permit such transactions.

Each common trust fund in the Bankshares interbank common trust fund system would continue to be operated in compliance with the same state and federal regulatory requirements as would apply if the Bank contributing funds thereto (the "contributing Bank") were the same entity as the Bank maintaining the common trust fund (the "maintaining Bank"). The rights of the beneficiaries of the contributing Bank's personal fiduciary accounts investing in the maintaining Bank's common trust funds, either directly or through the intermediary of the contributing Bank's own common trust funds, would not be diminished by reason of such investment. The fees charged for services in the management of the Bankshares interbank system would be no greater than those that would have been charged each participating personal fiduciary account had it been individually invested by the contributing Bank as trustee in the contributing Bank's common trust fund. The records maintained by the maintaining Bank and the contributing Bank would reflect the participation in each common trust fund of all trusts and other accounts which participate in such fund, either directly or indirectly through intermediary contributing Banks. The contributing Bank and the maintaining Bank would adhere to the various reporting requirements and percentage limitations on participations for the common trust funds as required by the regulations of the Comptroller of the Currency.

Request for Commission Action:

Based upon the foregoing facts, upon prior no-action positions taken by the staff of the Commission, in particular, Western Bancorporation (available May 22, 1980) and SunTrust Banks, Inc. (available June 18, 1986), copies of which are enclosed with this letter, and upon our analysis of the statutes, regulations and policy considerations involved, we request that the staff of the Commission confirm that:

(1) Participations in a maintaining Bank's common or collective trust funds, including funds of those Banks which act as intermediaries by investing in the common or collective trust funds of another Bank, may be issued without registration under the Securities Act by virtue of the exemption provided by Section 3(a)(2) of such Act and Rule 132 thereunder;

(2) Participations in a maintaining Bank's common or collective trust funds, including funds of those Banks which act as intermediaries by investing in the common or collective trust funds of another Bank, will be exempt from registration under the Securities Exchange Act by virtue of the exemptions provided by Sections 3(a)(12) and 12(g)(2)(H) of such Act and Rules 3a12-6 and 12h-1(b) thereunder; and

(3) The common and collective trust funds of a maintaining Bank, including funds of those Banks which act as intermediaries by investing in the common or collective trust funds of another Bank, may exist and operate without registration under the Investment Company Act by virtue of the exemptions provided by Sections 3(c)(3) and 3(c)(11) of such Act and Rule 3c-4 thereunder.

We note that, while the Commission has extended the exemptions from the registration requirements of the Securities Act, the Securities Exchange Act and the Investment Company Act by enacting the Rules cited above, the Commission has not specifically included in such Rules a reference to common trust funds maintained by out-of-state affiliates of a bank serving as trustee, executor, administrator or guardian. However, we can find no reason why there should be any additional restrictions on an interstate common trust fund system operated as proposed by Bankshares. In enacting these Rules, the Commission noted that it would appear appropriate to view banks in an affiliated group as a single economic unit. Securities Act Release No. 5875, October 21, 1977. It seems appropriate, therefore, for the Commission to confirm that the above cited statutes and Rules apply to interstate common and collective trust fund systems. With the amendments of the Bank Holding Company Act and state banking laws to allow interstate ownership of banks, there appears to be little policy concern against interstate banking affiliate operations, including common trust funds.

In Western Bancorporation, the staff of the Commission took a "no-action" position under the exemptions referred to above with respect to an interstate common trust fund system to be implemented and operated by a multi-state bank holding company. Western Bancorporation, which had been grandfathered out of compliance with Section 3(d) of the Bank Holding Company Act, had 22 subsidiary banks, operating in 11 states and consisting of a combination of national and state banks. As in the case of the Bankshares system, those subsidiary banks were governed by the requirements of various federal and state laws.

In SunTrust Banks, Inc., based on facts very similar to Bankshare's proposal, the staff of the Commission

took a "no-action" position, finding that a regional bank holding company could implement a system of interbank common and collective trust funds for the collective investment and reinvestment of funds held in fiduciary capacities by subsidiary banks so long as the exceptions in Sections 3(c)(3) and 3(c)(11) of the 1940 Act were otherwise available to the common trust funds and collective trust funds maintained by the subsidiary banks. The staff emphasized that (i) all the SunTrust banks were members of an "affiliated group" as defined in the Code, (ii) each fund would continue to be operated in compliance with the same state and federal regulatory requirements as would apply if the bank maintaining the fund and the bank contributing assets thereto were the same entity and (iii) investment by a contributing bank in the maintaining bank's common trust fund would not diminish the rights of the beneficiaries of the contributing bank's personal fiduciary accounts.

As required by Securities Act Release No. 6269, seven copies of this letter are enclosed herewith. By a separate letter, we have simultaneously requested that the Division of Investment Management confirm that it will not recommend that the Commission take any enforcement action if Bankshares or its subsidiaries conduct the activities described herein. A copy of that letter is enclosed as an attachment to each copy of this letter.

If you have any questions regarding the requested ruling or desire further information, please do not hesitate to call the undersigned at (804) 783-6419 or Robert L. Musick, Jr., at (804) 783-6414.

Sincerely yours,

R. Hart Lee

SEC Letter

1934 Act / s 12(g)(2)(H)

May 14, 1987

Publicly Available June 15, 1987

Re: United Virginia Bankshares, Inc.

Incoming letter dated January 26, 1987

On the basis of the facts presented, the Division of Corporation Finance will not recommend any enforcement action to the Commission if United Virginia Bankshares, Inc., in reliance upon your opinion as counsel that participations in a maintaining Bank's common or collective trust funds, including funds of those Banks that act as intermediaries by investing in the common or collective trust funds of another Bank, are exempt from registration under the Securities Act of 1933 ("Securities Act") by virtue of the exemptions provided by Section 3(a)(2) of the Act and Rule 132 thereunder, and also from registration under the Securities Exchange Act of 1934 ("Exchange Act") by virtue of the exemptions provided by Sections 3(a)(12) and 12(g)(2)(H) of that Act and Rules 3a12-6 and 12h-1(b) thereunder, implements and operates the common and collective trust funds as proposed without registration of interests therein under the Securities Act or the Exchange Act.

In addition, the Division of Investment Management has asked us to inform you that, on the basis of the facts and representations in your letter, and as long as the exceptions in Section 3(c)(3) and Section 3(c)(11) of the Investment Company Act of 1940 ("1940 Act") are otherwise available to the common trust funds and collective trust funds (collectively, "Funds") maintained by each subsidiary bank of Bankshares ("Bank"), that Division would not recommend any enforcement action to the Commission if, without registration of the Funds under the 1940 Act:

(1) a Bank contributes assets, which it holds in its capacity as trustee, executor, administrator or guardian, to common trust funds maintained by other Banks;

(2) a Bank invests assets, which it holds as trustee or agent of any employee's stock bonus, pension, or profit-sharing trust that meets the requirements for qualification under Section 401 ("Section 401 assets") of the Internal Revenue Code of 1986 ("Code") in collective trust funds maintained by other Banks for Section 401 assets held by them;

(3) any common trust fund maintained by a Bank invests all of part of its assets in common trust funds

maintained by other Banks having compatible investment characteristics subject to governing trust instruments and any applicable state laws; or

(4) any collective trust fund maintained by a Bank invests all or part of its assets in collective trust funds maintained by other Banks having compatible investment characteristics subject to governing trust or plan instruments and any applicable state laws.

The position of the Division of Investment Management is based on the facts presented in your letter and your oral representations to Elizabeth Tsai of the staff on February 11, 1987, including the following: (a) all the Banks are members of an "affiliated group" as that term is defined in Section 1504(a) of the Code; (b) the Funds would continue to be operated in compliance with the same state and federal regulatory requirements as would apply if the Bank maintaining the Funds ("maintaining Bank") and the Bank contributing assets thereto ("contributing Bank") were the same entity; and (c) investment by a contributing Bank in the maintaining Bank's common trust fund would not diminish the rights of the beneficiaries of the contributing Bank's personal fiduciary accounts, nor would investment by a contributing Bank in the maintaining Bank's collective trust fund diminish the rights of the persons for whose benefit the contributing Bank acts as agent or trustee.

Because these positions are based upon the representations made to the Division in your letter, it should be noted that any different facts or conditions might require a different conclusion or conclusions. Further, this response only expresses the Divisions' positions on enforcement action and does not purport to express any legal conclusion on the questions presented.

Sincerely,

William H. Carter Special Counsel

Division of Corporation Finance

Securities and Exchange Commission

500 North Capitol Street

Washington, D. C. 20549

Re: The National Bank of Fairfax Self-Employed Retirement Plan and Trust Agreement--Amended and Restated as of January 1, 1975

The National Bank of Fairfax

P. O. Box 278

Fairfax, Virginia 22030

Request for a "no-action letter" under Section 3(a)11 and 3(a)(2) of the Securities Act of 1933

Dear Sir:

The request herein for a "no-action letter" relates to Section 3(a)(11) of the Securities Act of 1933 (the "Act"), involving a security offered and sold only to persons resident within a single State, and to Section 3(a)(2) of the Act involving the establishment of separate trust accounts for retirement plans of self-employed individuals where the intrastate exemption of Section 3(a)(11) of the Act is not available.

The undersigned counsel for The National Bank of Fairfax, P. O. Box 278, Fairfax, Virginia 22030 (the "Bank") respectfully requests that the Division of Corporation Finance indicate that it will not recommend any action to the Commission if the Bank publicly offers for sale or sells participations in The National Bank of Fairfax Self-Employed Retirement Plan and Trust Agreement-- Amended and Restated as of January 1, 1975 (the "Plan"), in the manner set forth in the Plan. In support of this request, the following representations are made:

1. The National Bank of Fairfax is a national bank doing business in Fairfax, Virginia.

2. The Bank on December 12, 1975, adopted the Plan, and a copy thereof is attached hereto and incorporated herein by reference.

3. A copy of the Adoption Agreement relative to the Plan is attached hereto and incorporated hereby reference.

4. The Plan has been submitted to the Commissioner of Internal Revenue for approval but no determination letter has as of this date been issued by the Commissioner.

5. The Plan is restricted to self-employed individuals and their employees.

6. Under the Plan, the Bank is the Trustee (Section 1.21 of Plan).

7. The pertinent provisions of the Plan relative to who may become a Member thereof (as "Member" is defined in the Plan), from whom voluntary contributions shall be accepted, and to the establishment of separate trusts, are as follows:

"Section 2.6. Residence. No individual may become a Member who is not a bona fide resident of the Commonwealth of Virginia; provided, however, that a Hired Employee who is a non-resident but who is in the employ of an Employer who is a bona fide resident of Virginia may become a Member if he makes no contributions under the Plan. For this purpose, if the Employer is a partnership, such partnership shall be considered a bona fide resident of Virginia only if its principal place of business is in Virginia and all partners are bona fide residents of Virginia.

The restrictions of the foregoing provisions shall be inapplicable where the Employer has made an election pursuant to Section 10.5(a) to have his participation in the Plan segregated from the Trust Fund and held by the Trustee upon a separate trust. Such election shall be mandatory if the Employer is not a resident of Virginia, as defined above, at the time the Plan is adopted by the Employer.

If a sole proprietor or a partner (in case the Employer is a partnership) ceases to be a resident of the Commonwealth of Virginia (or if a partnership, the partnership shall remove its offices from within the Commonwealth of Virginia, or if the personal representative of a deceased sole proprietor or a member of the partnership, as the case may be, shall be or become a non-resident of Virginia) subsequent to the date on which the Plan is adopted by the Employer, the Employer shall forthwith give notice of such fact to the Trustee. Unless or until the Employer has given notice of his intention to transfer his participation in the Plan to a new Trustee pursuant to Section 7.4, effective as of the date that the Employer ceases to be a resident of Virginia, the Employer shall be deemed to have made the election pursuant to Section 10.5(a). Within a reasonable time after the Trustee receives notice that such Employer has ceased to be a resident of Virginia, the Trustee shall provide for the segregation of such Employer's participation in the Plan as a separate trust, pursuant to Section 10.5(a).

The Trustee shall not accept any contributions to the Plan by the Employer unless (1) such contribution or contributions are accompanied by a statement signed by the Employer acknowledging that the Employer is a resident of Virginia, as defined above, or (2) the Employer has made an election pursuant to Section 10.5(a). Further, the Trustee shall not accept any voluntary contributions to the Plan by any Member unless (1) such contribution or contributions are accompanied by a statement signed by such Member acknowledging that he is a resident of Virginia, as defined above, or (2) the Employer of such Member has made an election pursuant to Section 10.5(a)."

"Section 10.5(a) Separate Trusts. Notwithstanding the foregoing provisions of this Article with respect to the collective investment of the Trust Fund, the Employer may elect to have the contributions and assets allocable to the Plan of such Employer segregated from the Trust Fund and held by the Trustee upon a separate trust containing the same terms and conditions as the Plan. The Employer's Plan shall not be otherwise affected by such separation. Such election shall be made either in the Adoption Agreement or in writing in a form acceptable to the Trustee.

Section 10.5(b) Employer-Directed Investments. If the Employer has made the election specified in Section 10.5(a), then notwithstanding the foregoing provisions of this Article X, the Employer shall have the right to direct the investment of any or all of the funds constituting the Participating Interests of each of its Employees who are Members under the Plan, either by directing the Trustee with respect to investments (including reinvestments, disposals and exchanges) or by disapproving proposed investments by the Trustee (including reinvestments, disposals and exchanges). Any such direction by an Employer to the Trustee shall be in writing signed by the Employer and in a form acceptable to the Trustee. The Trustee shall comply with the investment directions of an Employer as promptly as possible; provided, however, that the Trustee may review each such investment direction and it may decline to follow any direction determined by it to be in violation of the terms of the Plan or the provisions of the Employee Retirement Income Security Act of 1974. The Trustee shall assume no liability and shall be fully protected in carrying out the directions of an Employer with respect to any such Employer- directed investments or disapproval of proposed investments. In the absence of any directions pursuant to the foregoing, the funds constituting the separate trust of the Employer shall be invested and reinvested as the Trustee, in its sole discretion, shall determine."

8. The pertinent provisions in the Adoption Agreement relative to who may become a Member of the Plan (as "Member" is defined in the Plan), from whom voluntary contributions shall be accepted, and to the establishment of separate trusts, are as follows:

Fifth

The Trustee shall not accept any contributions to the Plan by the Employer unless (1) such contribution or contributions are accompanied by a statement signed by the Employer acknowledging that the Employer is a resident of Virginia, as defined in the Plan, or (2) the Employer has made an election pursuant to Section (B) of Article Eighth below."

Sixth

Each Member (check one) ( ) shall ( ) shall not be entitled to make annual voluntary contributions of per cent (not to exceed 10) of such Member's Aggregate Compensation. In the case of Owner Employees, such Contributions shall not exceed $2,500 for each year of Service with the Employer. Each Member (check one) ( ) shall ( ) shall not be entitled to withdraw his voluntary contributions. The Trustee shall not accept any voluntary contributions to the Plan by any Member unless (1) such contribution or contributions are accompanied by a statement signed by such Member acknowledging that he is a resident of Virginia, or (2) the Employer of such Member has made an election pursuant to Section (B) of Article Eighth below."

Eighth

The Trustee hereby agrees to hold all contributions made to the Trust Fund by the Employer and his Employees as set forth above in trust in accordance with the terms of the Plan and Trust, and to distribute or pay out the same only as therein provided. (Check one):

(A) The Trustee shall allocate all such contributions % to the Common Stock Fund, % to the Fixed Income Fund, and % to the Insurance Fund established pursuant to the Trust. Changes in the allocation of contributions between the Common Stock Fund, the Fixed Income Fund, and the Insurance Fund shall be made by the Trustee only upon written request of the Employer and shall become effective as of the next Valuation Date following receipt of such notice from the Employer.

(B) In lieu of collective investment and pursuant to Section 10.5(a) of the Plan, the Employer elects to have the contributions and assets allocable to its Plan segregated from the Trust Fund and held by the Trustee upon a separate trust containing the same terms and conditions as the Plan. The election under this paragraph (B) shall be mandatory if the Employer is not a resident of Virginia, as defined in the Plan, at the time the Plan is adopted by the Employer."

9. The pertinent provision of the Plan relative to the Trustee terminating an Employer's interest in the Plan (as "Employer" is defined in the Plan), and to an Employer transferring his participation in the Plan to another Trustee is as follows:

"Section 7.2 Disqualified Plan. If at any time it shall be determined by the Internal Revenue Service that the Plan of any Employer fails to qualify under Sections 401 and 501(a) of the Internal Revenue Code, the Trustee, upon receiving notice of such disqualification, shall exercise its termination right under Section 7.4 below. The Plan of any Employer shall not be considered disqualified within the meaning of this Section merely because, pursuant to Section 401(e) of the Internal Revenue Code, the Plan is to be considered not qualified with respect to one or more particular Members."

4 "Section 7.3 Termination by Trustee. The Trustee, at any time, by written notice to any Employer may terminate that Employer's participation in the Plan effective as of a specified future Valuation Date. Upon such termination or upon revocation of the Plan pursuant to Section 6.4, every Employee of that Employer who is then a Member shall be entitled to receive his Participating Interest as provided in Section 7.1."

"Section 7.4 Transfer to New Trustee. An Employer, at any time, by written notice to the Trustee, in such form as is acceptable to the Trustee, and provided that transfer may be effected without adversely affecting the qualification of the Employer's participation in the Plan under Section 401 of the Internal Revenue Code of 1954, as amended (or corresponding provision of any subsequent Federal revenue law at the time in effect), may transfer his participation in the Plan to any other trustee eligible to act as trustee. As soon as practicable after the Valuation Date next following receipt of such notice, the Trustee shall transfer the assets of that part of the Trust Fund representing the Participating Interests of the Employees of that Employer on that Valuation Date, to the other trustee named in the notice. Upon such transfer, the Trustee shall have a right to have its accounts settled as provided in Section 10.9 of the Plan. When such assets All have been transferred and delivered to the other trustee and the relevant accounts of the Trustee have been settled as provided in Section 10.9 of the Plan, the Trustee shall be released and discharged from all further accountability of liability respecting such assets and shall not be responsible in any way for the further disposition of such assets or any part thereof."

10. The pertinent provisions of the Plan relative to the investment of the Trust Fund (as "Trust Fund" is defined in the Plan) are as follows:

"Article X--Investment of Trust Fund

Section 10.1 General. Subject to Section 10.5 below, the investment of the Trust Fund shall be made by the Trustee. All investments and reinvestments shall be made at such times and in such stocks, bonds, or other securities or property of any kind, including interest bearing savings accounts with its own banking department or with any other bank, which shall seem suitable and appropriate to the Trustee. The Trustee is specifically given the right to invest the assets of the Trust Fund in any common trust fund or funds operated by it. The Trustee shall not be confined to the class or type of investments prescribed by statute, by rule of court or otherwise, as legal investments for trustees or fiduciaries generally.

The assets of the Trust Fund shall be invested collectively for the accounts of all Members in the Plan; however, records shall be kept for each Member which shall reflect not only the contributions made on his behalf but also his pro rata share of the net income of the Trust Fund and of the net gains or losses thereof. The reflection of said items shall occur once each year upon the Valuation Date and shall be distributed among the accounts of the Members in the same ratio as the balance of each such account at the close of business on the last preceding Valuation Date bears to the aggregate of such balances at the close of business on such preceding Valuation Date."

"Section 10.2 Allocations. The Trustee is authorized: (a) Employer's Instructions. To allocate contributions pursuant to the Plan from each Employer and for his Employees to the Fixed Income Fund, and/or the Common Stock Fund, and/or the Insurance Fund, in accordance with the most recent instructions received by the Trustee from that Employer as to the allocation of such contributions.

(b) Fixed Income Fund. To invest and reinvest the Fixed Income Fund, without distinction between

principal and income, in shares of stock (preferred, preference or guaranteed) or other evidences of ownership, bonds, debentures, equipment or collateral trust certificates, notes or other evidences of indebtedness, unsecured or secured by mortgages on real or personal property wherever situated (including any part interest in a bond and mortgage or note and mortgage whether insured or uninsured) and any other property, or part interest in property, real or personal, foreign or domestic, the rate of return from which is fixed by the instruments evidencing the investments, without regard to any restriction placed upon fiduciaries by any present or future applicable law, administrative regulation, rule of court or court decision. The Trustee's determination as to whether or not an investment is one the rate of return from which is fixed by the instrument evidencing it shall be conclusive and binding upon all persons interested in the Fixed Income Fund; and it may retain any otherwise ineligible property received by way of dividend, exchange, conversion, liquidation or otherwise than by purchase for as long as the Trustee in its discretion deems desirable for advantageous realization thereon.

(c) Common Stock Fund. To invest and reinvest the Common Stock Fund, without distinction between principal and income, in shares of common stock or other evidences of ownership and any other property, or part interest in property, real or personal, foreign or domestic, the rate of return from which is not fixed by the instruments evidencing the investments, whether or not productive of income or consisting of wasting assets; and to the extent the Trustee in its discretion deems desirable, or pending selection and purchase of other suitable investments, or to provide for current cash requirements, in investments the rate of return from which is fixed by the instruments evidencing the investments; without regard to any restriction placed upon fiduciaries by any present of future applicable law, administrative regulation, rule of court or court decision.

(d) Insurance Fund. To invest and reinvest the Insurance Fund, without distinction between principal and income, by payment of premiums on individual endowment contracts without an element of life insurance, and annuity policies on the lives of Participants purchased from such insurance companies and in such forms and amounts as the Employer shall designate (or as the Trustee may select in the absence of such designation). Such contracts shall be restricted to forms approved for retirement plans qualified under Section 401 of the Internal Revenue Code of 1954, as amended. Any dividends payable under such contracts shall be applied to reduce premiums. In no event shall the life insurance issued on any one Member's life exceed the amount of ordinary life insurance which may be purchased with less than 50% of the aggregate of all contributions credited to such Member's account, provided, however, if a Member so elects and Employee contributions are permitted under the Plan, life insurance contracts may be purchased for the Member in excess of this limitation. The Trustee on behalf of the individual Participant's Participating Interest, shall be owner, applicant and beneficiary on each such contract which shall be allocated to the individual Participant's account. On termination of a Participant's participation other than by reason of death, the Trustee shall cause any such contract for such Participant to be endorsed as a paid-up policy in accordance with its terms and distributed to the former Participant (subject to the provisions of Article V). On death of a Participant while in the employ of an Employer, the Trustee shall assign any proceeds payable under any such contracts on the Participant's life to the Participant's Beneficiary as designated in accordance with Section 5.4."

11. In the opinion of the undersigned counsel for The National Bank of Fairfax, the public offer and sale by the Bank of participations in the Plan in the manner set forth in the Plan would not make the Section 3(a)(11) exemption of the Act unavailable, and, further, that the provisions of the Plan relative to the establishment of separate trusts in those cases where initially an Employer is not a resident of Virginia, or where a Member ceases to be a resident of Virginia, would not violate the provisions of Section 3(a)(2) of the Act, which Section 3(a)(2) does not exempt interests or participations in a single or collective trust fund maintained by a bank, by a pension or profit-sharing plan which covers employees some or all of whom are employees within the meaning of Section 401(c)(1) of the Internal Revenue Code of 1954.

On the basis of the foregoing, it is respectfully requested that the Division of Corporation Finance indicate, as expeditiously as is convenient to it, that it will not recommend any action to the Commission if the Bank publicly offers for sale or sells participations in the Plan, in the manner set forth in the Plan, without compliance with the registration requirements of the Securities Act of 1933, as amended.

Respectfully submitted,

Boothe, Prichard & Dudley

Re: The National Bank of Fairfax

Dear Mr. Scibelli:

This is in response to your letter dated October 15, 1976, concerning the establishment of the National Bank of Fairfax Self-Employed Retirement Plan & Trust (the "Plan") without compliance with the registration requirements of the Securities Act of 1933 (the "Act") in reliance upon the exemptions contained in Sections 3(a)(11) and 3(a)(2) of the Act.

You have requested our views with respect to the applicability of Section 3(a)(11) of the Act to the offer and sale of participations in the Plan only to persons resident within a single state. In Securities Act Release No. 33-5450, dated January 7, 1974, the Commission stated that the Staff would consider requests for "no-action" letters in reliance upon Section 3(a)(11) for transactions outside Rule 147, "only on an infrequent basis and in the most compelling circumstances." The Staff is of the opinion that the transaction proposed in your letter does not meet this requirement and, accordingly, we are not in a position to issue a no-action letter in this regard.

Furthermore, you request the Division's concurrence in your opinion that, in situations where the intrastate exemption of 3(a)(11) is unavailable, the Bank could rely upon the exemption provided by Section 3(a)(2) of the Act for the establishment of separate trust accounts.

The issue raised deals with the extent to which an exemption might be available under Section 3(a)(2) of the Act for interests and participations in H.R. 10 ("Keogh") Plans. The view of this Division is that the 1970 amendments to that Section, including the legislative history and the language of the statute, evidence a clear intent that no specific exemption was intended to be created for interests in H.R. 10 Plans. Accordingly, we are unable to concur in your opinion that the exemption provided by Section 3(a)(2) of the Act would be available to the Bank for the establishment of the separate interest accounts.

Please contact Mr. Thomas C. Lauerman of the Division of Investment Management (202-755-0217) if you have any questions regarding the Keogh Plan exception in Section 3(a)(2).

Sincerely,

Consuela M. Washington

SEC No-Action Letter

Citizens and Southern National Bank

Publicly Available October 26, 1981

Recap
Requires securities registration of *Intrastate* Keogh (H.R. 10) accounts if Keoghs are commingled with

Interstate Employee Benefit Plans.

Letter to SEC

This firm represents the Citizens and Southern National Bank, a national banking association having an office and place of business in Atlanta, Fulton County, Georgia, (hereinafter called "C&S"); the C&S Pooled Profit Sharing and Pension Trust (hereinafter called the "Pooled Trust") and the C&S Commingled Retirement Trust Fund, (hereinafter called the "H.R. 10 Trust"). C&S is the trustee for both the Pooled Trust and the H.R. 10 Trust, both of which serve as the collective investment vehicles of various pension or profit sharing plans which meet the requirements for qualification under section 401 of the Internal Revenue Code of 1954 (hereinafter called "Qualified Plans").

The Pooled Trust holds only funds of Qualified Plans which do not cover persons who are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954 (hereinafter called the "Code"). Assets contributed to Qualified Plans sponsored by both Georgia and foreign employers are so held. The Pooled Trust relies on section 3(a)(2) of the Securities Act of 1933, as amended (hereinafter called the "1933 Act"), for exemption form the registration provisions of the 1933 Act.

The H.R. 10 Trust holds only funds of Qualified Plans sponsored by sole proprietors and partnerships. All partnerships, sole proprietors, partners owning more than a 10% interest in the capital or profits of a partnership, and members of the plan making voluntary contributions to the H.R. 10 Trust are residents of Georgia. The H.R. 10 Trust relies on section 3(a)(11) of the 1933 Act for exemption from the registration provisions of the 1933 Act.

In order to increase operating efficiency, C&S desires to commingle the funds of the Pooled Trust and the H.R. 10 Trust (the resulting entity hereinafter called the "Commingled Trust"). No funds contributed to a Qualified Plan which covers persons who are employees within the meaning of the Code section 401(c)(1) will be accepted by the Commingled Trust from any non-resident of Georgia, in accordance with the current policy of the H.R. 10 Trust. In our opinion, such a Commingled Trust will be exempt from the registration provisions of the 1933 Act by virtue of the principles stated in Release No. 33-6281, 17 C.F.R. 281 6281 (January 15, 1981).

Discussion of Law

Until recently, the Securities and Exchange Commission (hereinafter called the "Commission") has taken the position that the commingling of the assets of a retirement trust otherwise exempt under section 3(a)(2) of the 1933 Act with an H.R. 10 retirement trust exempt under section 3(a)(11) of the 1933 Act would result in neither exemption being available for the resultant commingled trust and, therefore, registration under the 1933 Act being required. *Commercial National Bank in Shreveport*, Federal Securities Law Reporter Transfer Binder 71-72, Paragraph 78,384 (1971); Release No. 33-6185, 17 C.F.R. 231. 6188 (February 1, 1980) at III(B)(1)(c).

However, on January 15, 1981, in Release No. 33-6281 at II(B)(2), the Commission announced a change in its position. Release No. 33-6281 set out four reasons for the change:

> (1) "Read literally, this language [of section 3(a)(2) of the 1933 Act] does not preclude commingling of Keogh plan assets with corporate plan assets."
>
> (2) "[T]he legislative history of section 3(a)(2) suggests that a literal interpretation is not inappropriate in this regard."
>
> (3) "[T]here does not appear to be any substantial reason why commingling of the assets of corporate and Keogh plans should be prohibited."
>
> (4) "A number of insurance companies have been commingling corporate and Keogh funds anyway."

Accordingly, the Commission declared that "the availability of the section 3(a)(2) exemption no longer will be deemed by the staff to depend in part on whether the assets of Keogh plans are commingled with the assets of tax qualified corporate plans." The Commission noted, however, that interests or participations sold to plans not subject to the section 3(a)(2) exemption would still be subject to registration under the 1933 Act, absent some other exemption.

Under Release No. 33-6281, section 3(a)(2) of the 1933 Act will clearly exempt from registration the interests or participations in the proposed Commingled Trust which would otherwise be the interests or participations in the Pooled Trust. Release No. 33-6281 implies that interests or participations in the proposed Commingled Trust which would otherwise be the interests or participations in the H.R. 10 Trust will be exempt from registration as long as such interests or participations are offered or sold only to residents of Georgia in accordance with section 3(a)(11) of the 1933 Act. Indeed, if the portion of the Commingled Trust represented by the current H.R. 10 Trust loses its exemption under section 3(a)(11) of the 1933 Act merely by virtue of the commingling, the Commission's change of position announced in Release No. 33-6281 would be of very little practical significance. Thus, it is our opinion that in accordance with Release No. 33-6281, a Commingled Trust of the type described herein will not be subject to registration under the 1933 Act.

In view of the foregoing, we respectfully request your confirmation that the staff will not recommend any action to the Commission if C&S commingles the Pooled Trust and the H.R. 10 Trust and offers and sells interests or participations in the resultant Commingled Trust under the terms stated herein without registration under section 5 of the 1933 Act.

SEC Letter

1933 Act / s 3(a)(2); 3(a)(11)

1981

September 25, 1981

Publicly Available October 26, 1981

After consideration of the facts presented, we are unable to agree with your view that the Section 3(a)(11) exemption would be available for interests in the proposed Commingled Trust sold exclusively to H.R. 10 plans who are Georgia residents. The Section 3(a)(11) exemption is by its terms unavailable where an offering of securities is extended to non-residents of the state in which the issuer resides and conducts its business. In the case of the proposed Commingled Trust, a Georgia resident, interests therein would be issued not only to H.R. 10 plans resident in Georgia, but also to tax-qualified corporate plans sponsored by employers who are non-residents of Georgia. The offer and sale of interests to these nonresident plans would, in our view, render the Section 3(a)(11) exemption unavailable for the offer and sale of interests to resident H.R. 10 plans.

The Statements in Release 33-6281 which you believe support your view regarding the availability of the Section 3(a)(11) exemption for the H.R. 10 portion of the Commingled Trust were intended to indicate simply that the Section 3(a)(2) exemption for trust interests sold to tax-qualified corporate plans would not be lost merely because assets of H.R. 10 plans were commingled with the assets of the corporate plans. The statements reflected the longstanding views of many insurance companies that they could commingle corporate and H.R. 10 plan monies in the same fund and register only the H.R. 10 interests, while relying on the Section 3(a)(2) exemption for the corporate plan interests. The statements were not designed to convey the impression that it is possible in a single trust to rely on the Section 3(a)(2) exemption for interests sold to non-resident corporate plans and on the Section 3(a)(11) exemption for interests sold to resident H.R. 10 plans. We recognize, however, that the statements in the release regarding this issue are ambiguous and could therefore be misconstrued. Accordingly, this Division, as a matter of policy, will not recommend any enforcement action to the Commission with respect to past transactions by commingled trusts who in good faith have been selling interests to resident H.R. 10 plans in reliance upon their belief that the statements in the release permitted Section 3(a)(11) to be available for such sales at the same time that Section 3(a)(2) was available for sales to non-resident corporate plans. This no-action position will also apply for the reasonable time after publication of this letter necessary for the taking of corrective action to conform to the interpretation herein.

RE: Request for No Action Letter Regarding The Provident Bank

Section 3(a)(2) of the Securities Act of 1933

Section 3(a)(12) of the Securities Act of 1934

Section 3(c)(11) of the Investment Company Act of 1940

Gentlemen:

We are writing on behalf of The Provident Bank ("Provident"). Provident proposes to form a collective trust fund for the investment of funds held on behalf of employee benefit plans qualified under Section 401(a) of the Internal Revenue Code (the "Code") and exempt from tax under Section 501(a) of the Code, governmental plans under Section 414(d) of the Code and group trusts consisting entirely of assets of such plans.

We respectfully request a determination that the Staff will not recommend any enforcement action to the Commission if Provident maintains and operates the fund:

(i) without registering the interests in the fund under the Securities Act of 1933 (the "1933 Act"), in reliance upon the exemption provided by Section 3(a)(2);

(ii) without registering the interests in the fund under the Securities Exchange Act of 1934 (the "1934 Act"), in reliance upon the exemption provided by Section 3(a)(12) of such Act; and

(iii) without registering the fund as an investment company under the Investment Company Act of 1940 (the "1940 Act"), in reliance upon the exclusion set forth in Section 3(c)(11) of such Act.

I. Statement of Facts

A. General

Provident is an Ohio banking corporation authorized to engage in the banking business and to conduct trust activities. A substantial portion of Provident's business consists of receiving deposits and exercising fiduciary powers similar to those permitted to national banks under the authority of the Office of the Comptroller of the Currency ("OCC"). On December 31, 1989 it had total assets of approximately $2 billion and deposits of approximately $1.6 billion. Provident is a member of the Federal Reserve System and of the Federal Deposit Insurance Corporation.

Provident proposes to establish a collective trust fund to be known as the Provident Investment Contract Fund (the "Fund"). The Fund's assets would be invested primarily in guaranteed investment contracts ("GICs") issued by insurance companies and bank investment contracts ("BICs") issued by commercial banks and trust companies. GICs and BICs are contracts issued on a negotiated basis, guaranteed by the issuer, having specific terms governing yield, payment of interest, benefit and withdrawal rights and length of commitment, and are generally carried at book value. Under the Fund's plan of operation, the trustees of a qualified employee benefit plan or other prospective participant (the "Participating Trust") may elect to participate in the Fund by satisfying the eligibility criteria, by providing appropriate evidence of authority to invest in the Fund and by establishing a qualifying relationship with the Bank.

B. Participation in the Fund

Provident proposes to limit participation in the Fund to the following trusts:

> (i) retirement, pension, profit-sharing, stock bonus and other trusts forming a part of a plan or plans qualified under the provisions of Section 401(a) and exempt from federal income taxation under Sections 501(a) of the Code;
>
> (ii) trusts maintained in connection with a governmental plan within the meaning of Section 414(d) of the Code; and
>
> (iii) group trusts maintained by a bank the assets of which consist entirely of assets of trusts described in (i) or (ii) above.

Certain qualified plans are not eligible, however, such as a plan covering employees described by Section 401(c)(1) of the Code or a plan funded by an annuity contract described in Section 403(b) of the Code, except to the extent by rule or regulation of the SEC the participation of such plans would be permissible without requiring registration of the interests in the Fund under the 1933 Act or the 1934 Act or the registration of the Fund as an investment company under the 1940 Act. This provision is intended to permit H.R. 10 (Keogh) plans or Individual Retirement Accounts (IRAs) to participate at such time as the legal effects of including those types of plans become clearer, particularly the application of the 1940 Act.

Provident intends to limit investment in the Fund to plans satisfying the requirements of your March 18, 1977 letter re Guaranteed Investment Contracts, i.e. a plan may not participate unless it (a) covers at least fifteen persons, (b) has annual contributions of more than $10,000 or (c) is established by a corporate employer with a net worth of at least $100,000 on the last day of its prior fiscal year. Provident would also deliver to each prospective Participating Trust and include in any printed sales literature an offer by Provident to provide, upon request and without cost, financial statements and other material information about the issuer(s) of the GICs and BICs and would direct any advertising to employers that may adopt qualified plans or to the trustees of such plans and not to individual employees.

In addition, investment in the Fund would be permissible only if Provident serves in one of the following capacities:

> (i) Provident is a trustee of the Participating Trust;
>
> (ii) Provident is an investment manager, within the meaning of Section 3(38) of Employee Retirement Income Security Act of 1974, as amended ("ERISA"), with respect to all or a portion of the assets of such trust; or

(iii) Provident has been appointed by the trustees of the Participating Trust to render investment advice with respect to all or a portion of the assets of such trust.

The Fund would also prohibit Provident from participating in the Fund, directly or indirectly (e.g., by taking participations as security for a debt).

C. Investment Policy

The Fund would be invested in fixed income securities, primarily GICs and BICs, with staggered maturities to provide a predictable cash flow from interest income and contract maturities. The Fund could also invest in certificates of deposit issued by banks and savings and loan associations, obligations of the U.S. Treasury and U.S. agencies, commercial paper and similar corporate obligations, other short-term cash equivalent instruments and variable rate contracts to provide liquidity for monthly benefit withdrawals.

D. Administration

Provident will have sole authority to select the GICs and BICs into which the Fund's assets will be invested. Although Provident intends to solicit advice and recommendations from firms which are knowledgeable as to the available contracts, Provident will make the final decision as to specific contracts to be purchased. In making investment decisions, Provident will consider, among other factors, the quality of the various issuers, the effective yield after expenses, the period of the guaranteed interest and other terms of the contracts.

Provident intends to enter into a marketing agreement with The New York GIC Exchange, Inc. which among other things is engaged in the business of marketing GICs, and to employ NYGIC Capital, Inc., a registered investment advisor, as an investment advisor to the Fund. Provident would pay all of the fees and expenses incurred for these services, separately and not from the assets of the Fund. The investment advisor would make recommendations to Provident concerning the purchase and disposition of GICs for the Fund, but Provident would be free to accept or reject any recommendation without justification or explanation. The proposed investment advisor is not affiliated with Provident but Provident is not precluded from using an affiliate or from performing these services itself.

E. Valuation

The units would be valued by valuing each asset and liability in the Fund's portfolio at fair market value. Accordingly, the plan of operation for the Fund will specify valuation techniques which will result in a determination of fair market values.

F. Admissions and Withdrawals

Admissions and withdrawals from the Fund would be permitted only on a valuation date and would require advance notice to the Fund. Because of the long-term nature of the GICs in the Fund, withdrawals may require a waiting period. Provident proposes to allow for a waiting period of up to one year, while making a good faith effort to permit withdrawals sooner if possible. Interests in the Fund would be nonassignable.

G. Coordination with other Regulatory Requirements.

Provident presently maintains several common trust funds in compliance with the Ohio Revised Code and applicable regulations of the Internal Revenue Service and of the OCC. These common trust funds are utilized by Provident to administer funds held by it in applicable fiduciary roles incident to performing its trust services.

The Provident Investment Contract Fund will be established and administered in a similar manner as existing common trust funds, in accordance with the provisions of applicable state law and regulatory requirements.

One difference with existing common trust funds, however, is that Provident is not required to be a "trustee, executor, administrator or guardian" of each Participating Trust in the Fund. Provident may be an investment manager with respect to the Participating Trust, or appointed to render investment advice with respect to the plan assets.

Provident, as trustee of the Fund, has sought, but not yet received, a determination letter from the Internal Revenue Service to the effect that the Fund is a qualified trust under section 401(a) of the Code and is exempt from income tax under section 501(a) of the

Code, pursuant to the requirements detailed in Rev.Rul. 81-100, 1981-1 C.B. 326. For purposes of this letter, we assume that the Fund would so qualify.

Another difference with existing common trust funds relates to the application of OCC regulations. Unlike Section 584 of the Internal Revenue Code, RR 81-100 does not require compliance with OCC regulations as a condition of the tax exemption under Section 501(a) of the Code. Because Provident is a state bank, the OCC regulations do not apply to the Fund. Furthermore, it is our understanding that the OCC as a matter of policy will only review the collective investment funds of national banks. Because Provident is a state-chartered bank, we would in any event be unable to obtain assurance of compliance with these regulations.

Nonetheless, in accordance with the policy of the Federal Reserve Board, Provident intends as a matter of prudence to operate and maintain the Fund in accordance with OCC regulations. We believe that the Fund complies with the specific requirements of Part 9 of such regulations (Section 9.18) relating to collective investment of trust funds.

II. Discussion

A. General

Based upon the facts set forth above, it is our opinion that the proposed Fund and the interests or participations therein comply with statutory provisions which permit the operation of the Fund without registration of interests or participations under the 1933 Act and the 1934 Act and without the registration of the Fund as an investment company under the 1940 Act.

Section 3(a)(2) of the 1933 Act provides an exemption for the following securities:

> ... any interest or participation in a single trust fund, or in a collective trust fund maintained by a bank, ..., which interest, participation, or security is issued in connection with (A) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954, (B) an annuity plan which meets the requirements for the deduction of the employer's contributions under section 404(a)(2) of such Code, or (C) a governmental plan as defined in section 414(d) of such Code which has been established by an employer for the exclusive benefit of its employees or their beneficiaries for the purpose of distributing to such employees or their beneficiaries the corpus and income of the funds accumulated under such plan, if under such plan it is impossible, prior to the satisfaction of all liabilities with respect to such employees and their beneficiaries, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of such employees or their beneficiaries, other than any plan described in clause (A), (B), or (C) of this paragraph (i) the contributions under which are held in a single trust fund or in a separate account maintained by an insurance company ..., which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of such Code, or (iii) which is a plan, funded by an annuity contract described in section 403(b) of such Code.

Section 3(a)(12)(A)(iv) of the 1934 Act provides a similar exemption for the following securities:

> (iv) any interest or participation in a single trust fund, or a collective trust fund maintained by a bank, ..., which interest, participation, or security is issued in connection with a qualified plan as defined in subparagraph (C) of this paragraph; ....
> (C) For purposes of subparagraph (A)(iv) ..., the term "qualified plan" means (i) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954, (ii) an annuity plan which meets the requirements for the deduction of the employer's contribution under section 404(a)(2) of such Code, or (iii) a governmental plan as defined in section 414(d) of such Code which has been established by an employer for the exclusive benefit of its employees or their beneficiaries for the purpose of distributing to such employees or their beneficiaries the corpus and income of the funds accumulated under such plan, if under such plan it is impossible, prior to the

> satisfaction of all liabilities with respect to such employees and their beneficiaries, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of such employees or their beneficiaries, other than any plan described in clause (i), (ii), or (iii) of this subparagraph which (I) covers employees some or all of whom are employees within the meaning of section 401(c) of such Code or (II) is a plan funded by an annuity contract described in section 403(b) of such Code. See also Section 12(g)(2)(H) of the 1934 Act.

Section 3(c)(11) of the 1940 Act excludes from the definition of an investment company the following:

> (11) Any employee's stock bonus, pension, or profit-sharing trust which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1986; or any governmental plan described in section 3(a)(2)(C) of the Securities Act of 1933; or any collective trust fund maintained by a bank consisting solely of assets of such trusts or governmental plans, or both;

The plan of operation for the Fund explicitly restricts participation in the Fund to those trusts and plans permitted by the foregoing provisions of the 1933 Act, the 1934 Act and the 1940 Act.

B. Provident as "Bank"

Provident is a "bank" for the purposes of Section 3(a)(2) of the 1933 Act, Section 3(a)(6) of the 1934 Act and Section 3(c)(11) of the 1940 Act by reason of the definition of "bank" in Section 2(a)(5) of the 1940 Act, since it is a state-chartered bank, a substantial portion of the business of which consists of receiving deposits or exercising fiduciary powers similar to those permitted to national banks under the authority of the OCC, supervised by the Ohio Superintendent of Banks and the Federal Reserve Board and not operated for the purposes of evading the provisions of the 1940 Act.

C. "Maintained by a Bank" Requirement

The Fund will be "maintained" by Provident because Provident, as trustee of the Fund, will exercise "substantial investment responsibility." See, generally, Securities Act Release No. 33-6188, 38 F.R. 8962 (Part IV(A)(3)(a)) (February 1, 1980), Bank of America (December 8, 1971) and Sterling National Bank and Trust Company of New York (February 10, 1976). Section 3(c)(11) of the 1940 Act is interpreted similarly. See Bank of Delaware (November 15, 1972). The use of an investment advisor as contemplated by Provident is not inconsistent with exercising substantial investment responsibility. See Lincoln First Bank, N.A. (October 24, 1983). Provident will have full and complete authority to determine the specific securities purchased, retaining discretion to accept or reject the advice of any investment advisor and will have officers and appropriate staff to make such decisions. See Frank Russell Trust Company (July 11, 1980), Frank Russell Trust Company (September 2, 1982) and First Liberty Real Estate Fund (July 14, 1975).

A separate copy of this letter has been submitted to the Division of Investment Management for consideration of the 1940 Act issues. If you have any questions with regard to the foregoing, please contact the undersigned at (513)579-6595.

Attn: Ms. Laurie Green, Esq.

RE: Request for No Action Letter Regarding The Provident Bank

Section 3(a)(2) of the Securities Act of 1933

Section 3(a)(12) of the Securities Act of 1934

Section 3(c)(11) of the Investment Company Act of 1940

Dear Ms. Green:

Reference is made to our letter dated June 4, 1990 on behalf of The Provident Bank ("Provident") and to our subsequent telephone conversations concerning Provident's request. You have asked questions or requested clarification of our letter in four respects.

1. Participation in the Fund by Group Trusts

You have asked us to discuss further the aspect of participation in the Provident Investment Contract Fund (the "Fund") by "group trusts."

In Section I. B of our June 4, 1990 letter, we indicated that participation in the Fund was limited to trusts falling into one of three general categories. The third category is "group trusts maintained by a bank the assets of which consist entirely of assets of trusts described in [the first two categories]."

A group trust is a trust in which individual trusts have pooled their assets (often for diversifying their investments) where the group trust is declared to be part of the qualified plans of which it is comprised. Revenue Ruling 81-100, 81-13 I.R. B 32 describes the conditions under which a group trust may qualify for an exemption from taxation under Section 501(a) of the Internal Revenue Code (the "Code") and under which the tax qualification of its respective constituent trusts will not be affected by the pooling of their funds in a group trust.

The Provident Investment Contract Fund is an example of a group trust which qualifies under Rev.Rul. 81-100 and we have obtained a determination letter dated July 9, 1990 from the Internal Revenue Service to that effect. A group trust could be eligible to participate in the Fund only if it were maintained by a bank and only if its assets consisted entirely of assets of trusts which otherwise would be eligible to participate directly in the Fund, i.e., either (i) retirement, pension, profit-sharing, stock bonus and other trusts forming a part of a plan or plans qualified under the provisions of Section 401(a) and exempt from federal income taxation under Section 501(a) of the Code or (ii) trusts maintained in connection with a governmental plan within the meaning of Section 414(d) of the Code.

Participation in the Fund by a group trust meeting these conditions is substantively no different than participation by a qualified trust directly. Section 3(a)(2) of the 1933 Act provides an exception for "any interest or participation in ... a collective trust fund ... which interest, participation or security is issued in connection with (A) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under Section 401 of the Internal Revenue Code." Since a group trust qualifies under Section 401 of the Code, Section 3(a)(2) of the 1933 Act describes an exemption for participation in the Fund by a group trust meeting Provident's conditions.

The language in Section 3(a)(12)(A)(iv) of the 1934 Act is similar. The 1940 Act describes a similar exclusion from the definition of an investment company. Since the assets comprising the Fund will consist

solely of the type of assets described in Section 3(c)(11) of the 1940 Act (whether contributed directly from a qualified retirement plan, for example, or indirectly from a group trust comprised of assets of qualified plans), the Fund as a collective trust fund comprised of these assets is excluded from the definition of an investment company.

2. Application of the 1982 Frank Russell Letter

You have asked for clarification from us as to the relevance of the September 2, 1982 letter concerning the Frank Russell Trust Company cited by us at page 4 of our June 4 no-action letter request.

A part of the concept that a collective trust fund is "maintained by a bank" is that the bank exercises substantial investment responsibility. Where a bank proposes to retain the services of an investment advisor, a question may arise as to whether the nature of such services is inconsistent with the bank's continued exercise of investment responsibility.

In the Frank Russell Trust Company situation, the Trust Company proposed to use the consulting and advisory services of a third party, which would provide certain recommendations concerning the investments to be purchased and sold. However, the Trust Company retained final and complete authority to accept or reject such recommendations, reviewed and evaluated such recommendations independently, and represented that it had adequate staff to do so.

We have made similar representations on behalf of Provident in our letter of June 4 and therefore believe that the favorable position of the staff in the Frank Russell Trust Company situation supports our request in this respect.

3. Appointment of Provident to Render Investment Advice

You have requested clarification of our position on item (iii) appearing at page 3 of our June 4 letter, regarding the capacities in which Provident must serve vis-a-vis a prospective participant in order to make an investment in the Fund permissible.

Our letter states that investment in the Fund would be permissible only if Provident serves in one of three capacities: (i) Provident is a trustee of the Participating Trust; (ii) Provident is an investment manager with respect to the assets of such trust; or (iii) Provident has been appointed by the trustees of the Participating Trust to render investment advice with respect to all or a portion of the assets of such trust.

As we discussed, because of Ohio law concerning collective investment trusts, Provident has decided to delete the third qualifying relationship from the plan of operation of the Fund. Accordingly, Provident must be either a trustee or an investment manager in order to permit the prospective participant to invest in the Fund. Thus, it is now unnecessary to address your questions about this aspect of the Fund.

4. Application of Rule 180

You have asked us to clarify our request regarding the application of Rule 180 to the Fund.

We have not asked in our June 4 letter for the SEC to take a specific no-action position with respect to the application of Rule 180 to the Fund. However, the Fund does permit participation of certain types of plans (Keoghs) under the conditions described in Rule 180 and Provident reserves the right to permit participation on those terms. If this is inconsistent with our other requests or if you believe that the Rule 180 conditions could not be satisfied, we would appreciate the opportunity to discuss this further with you.

If you have any further questions with regard to the foregoing, please contact the undersigned at (513)579-6595.

Re: Request for No Action Letter Regarding The Provident Bank

Section 3(a)(2) of the Securities Act of 1933

Section 3(a)(12) of the Securities Act of 1934

Section 3(c)(11) of the Investment Company Act of 1940

Gentlemen:

This letter is to follow up my discussions with Cecelia Blye and Larry Stadulis concerning our no action letter request dated June 4, 1990 submitted on behalf of The Provident Bank.

We requested that the Staff take a "no action" position with respect to The Provident Investment Contract Fund. You have indicated that you would not be in a position to take a "no action" position because one of the eligible participants in the proposed fund could be a "group trust" maintained by a bank the assets of which consist entirely of assets of trusts described in paragraphs (i) and (ii), page 2, of our June 4, 1990 letter.

Provident has decided not to permit the "group trusts" described in our letter to participate in the fund. In these circumstances, we believe that Provident may maintain and operate the fund without registering the interests in the fund under the Securities Act of 1933, in reliance upon the exemption provided by Section 3(a)(2), without registering the interests in the fund under the Securities Act of 1934, in reliance upon the exemption provided by Section 3(a)(12), and without registering the fund as an investment company under the Investment Company Act of 1940, in reliance upon the exemption provided by Section 3(a)(11). Therefore, on behalf of Provident, we hereby request that the Staff advise us that it would not recommend to the Commission that it take any action if Provident, on the basis of our opinion, maintains and operates the fund without registration under the Acts set forth above in reliance upon the exemptions so cited.

We will appreciate your expedited consideration of this request given the length of time since the date of our original request.

Sincerely,

Timothy B. Matthews

Keating, Muething & Klekamp

SEC Letter

1934 Act / s 3(a)(12)

September 24, 1991

Publicly Available September 24, 1991

On the basis of the facts presented in your letters of June 4, 1990, September 26, 1990, and May 2, 1991, we would not recommend that the Commission take any enforcement action under the Investment Company Act of 1940 ("1940 Act") if The Provident Bank (the "Bank") establishes and operates the

Provident Investment Contract Fund (the "Fund") without registering the Fund under the 1940 Act in reliance upon the exclusion in Section 3(c)(11) of the 1940 Act. Our response is conditioned, among other things, upon the following: (1) your representation that although the Bank intends to solicit advice and recommendations from firms which are knowledgeable as to the available contracts, it will make the final decision as to specific contracts to be purchased and will have the sole authority to select the GICs and BICs in which the Fund's assets will be invested;[1] (2) the Bank's receipt of a letter from the Internal Revenue Service stating that the Fund is a Qualified Trust under Section 401(a) of the Internal Revenue Code of 1986, as amended;[2] and (3) the representation in your letter of May 2, 1991, that "group trusts" will not participate in the Fund.

The Division of Corporation Finance has asked us to advise you that, on the basis of the facts presented, that Division will not recommend any enforcement action to the Commission if the Bank, in reliance upon your opinion as counsel that the exemptions provided by Section 3(a)(2) of the Securities Act of 1933 and Section 12(g)(2)(H) of the Securities Exchange Act of 1934 are available, operates the described fund without compliance with the registration requirements of the 1933 and 1934 Acts. This position is based on the representations made in your letters, particularly your representation that the Bank will retain full investment authority for, and exclusive management of, the fund.

The Division of Market Regulation concurs in the position of the Divisions of Corporation Finance and Investment Management in reliance on your opinion of counsel and in particular your representations that The Provident Bank is a member of the Federal Deposit Insurance Corporation and the Federal Reserve System and that, in accordance with the policy of the Federal Reserve Board, Provident intends to operate and maintain the Fund in accordance with regulations of the Office of the Comptroller of the Currency.

Because these positions are based on the facts and representations made to the Divisions, you should note that any different facts or representations may require different conclusions. Moreover, this response only expresses the Division's positions on enforcement action and does not purport to express any legal conclusions on the questions presented.

Lawrence P. Stadulis

Attorney

Securities and Exchange Commission (S.E.C.)

Washington, D.C. 20549

Attention: Ms. Carol Peebles

Subject: The Idaho First National Bank

Gentlemen:

We are special counsel to The Idaho First National Bank ("Idaho First"), a national banking association which is a wholly owned subsidiary of Moore Financial Group Incorporated ("Moore"), a regional bank holding company. On behalf of Idaho First, we request that you advise us whether the staff of the Division of Investment Management will recommend any enforcement action to the Securities and Exchange Commission ("Commission") regarding the question set forth below.

Facts

Idaho First presently operates a collective investment fund ("Trust") maintained exclusively for assets of employee benefit plans qualified under section 401 of the Internal Revenue Code of 1986, as amended ("Code"). Presently, no funds of plans covering employees within the meaning of Code s 401(c)(1) are held in the Trust and, except as permitted pursuant to Rule 180 under the Securities Act of 1933 ("1933 Act"), no such funds will be permitted in the Trust.

Idaho First proposes to amend and restate the declaration of trust related to the Trust ("Amendment"). The Amendment will make the Trust a group trust pursuant to the provisions of 12 CFR 9.18(a)(2) and Revenue Ruling 81-100 and allow the participation or inclusion in the Trust of the moneys of certain plans or governmental units described in Code section 818(a)(6), as permitted by Code section 401(a)(24).

Code section 401(a)(24) provides that the tax-exempt status of a group trust will not be adversely affected merely because of the participation or inclusion in the trust of moneys of any plan or governmental unit described in Code section 818(a)(6). Code section 818(a)(6) includes

"(A) a governmental plan (within the meaning of Code section 414(d) or an eligible State deferred compensation plan (within the meaning of Code section 457(b)), or

"(B) the Government of the United States, the government of any State or political subdivision thereof, or by any agency or instrumentality of the foregoing, for use in satisfying an obligation of such government, political subdivision, or agency or instrumentality to provide a benefit under a plan described in subparagraph (A)."

Code section 414(d) defines a governmental plan as

> "a plan established and maintained for its employees by the Government of the United States, by the government of any State or political subdivision thereof, or by any agency or instrumentality of any of the foregoing. The term 'Governmental Plan' also includes any plan to which the Railroad Retirement Act of 1935 or 1937 applies and which is financed by contributions required under that Act and any plan of an international organization which is exempt from taxation by reason of the International Organizations Immunities Act (59 Stat. 669)."

Pursuant to the Amendment, the Trust proposes to receive moneys from any governmental plan (other than a Code section 457 state deferred compensation plan) whether or not the plan is qualified under Code section 401(a) and whether or not the assets of the plan are held in trust, as well as moneys from any federal, state, or local government or agency (a "governmental unit") held for use in satisfying an obligation of the government or agency to provide a retirement benefit under a governmental plan.

Before investing in the Trust, the administrator or trustee of each governmental plan or governmental unit will be required to represent in writing to Idaho First the following:

1. The plan is for the exclusive benefit of the government employer's employees or their beneficiaries;

2. The purpose of the plan is the distribution of corpus and income of funds, if any, accumulated under such plan to the employees or the employees' beneficiaries;

3. It is impossible under the plan for any part of the corpus or income of the plan to be used or diverted to any purpose other than the exclusive benefit of the employees or the employees' beneficiaries prior to the satisfaction of all the plan's liabilities to such employees and employees' beneficiaries;

4. The plan is not funded in part by an annuity contract described in Code section 403(b); and

5. If the plan purchases any securities issued by the government employer or any government entity controlling, controlled by, or under common control with the government employer in an amount in excess of contributions made by the government employer, the securities must be exempt from registration under the 1933 Act.

The approval of the Amendment by the Comptroller of the Currency and a favorable determination letter from the Internal Revenue Service with regard to the tax-exempt status of the Trust will be obtained.

Discussion

A discussion of the applicable provisions of the 1933 Act, the Securities Exchange Act of 1934 ("1934 Act"), and the Investment Company Act of 1940 ("1940 Act") follows.

1933 Act. The exemption from registration afforded by section 3(a)(2) of the 1933 Act applies to:

> "any interest or participation * * * in a collective trust fund maintained by a bank * * * which interest, participation, or security is issued in connection with (A) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954 * * * or (C) a governmental plan as defined in section 414(d) of such Code which has been established by an employer for the exclusive benefit of its employees or their beneficiaries for the purpose of distributing to such employees or their beneficiaries the corpus and income of the funds accumulated under such plan, if under such plan it is impossible, prior to the satisfaction of all liabilities with respect to such employees and their beneficiaries, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of such employees or their beneficiaries, other than any plan described in clause (A), (B), or (C) of this paragraph (i) the contributions under which are held in a single trust fund * * * and under which an amount in excess of the employer's contribution is allocated to the purchase of securities (other than interests or participations in the trust * * * itself) issued by the employer or any company directly or indirectly controlling, controlled by, or under common control with the employer, (ii) which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of such Code, or (iii) which is a plan funded by an annuity contract described in section 403(b) of such Code." (Emphasis added.)

1934 Act. The exemption from registration under section 3(a)(12)(A)(iv) of the 1934 Act applies to:

> "any interest or participation in a * * * collective trust fund maintained by a bank * * * which interest, participation, or security is issued in connection with a qualified plan as defined in subparagraph (C) of this paragraph * * *.
>
> "(C) For purposes of subparagraph (A)(iv) of this paragraph, the term "qualified plan" means (i) a stock bonus, pension, or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954 * * * or (iii) a governmental plan as defined in section 414(d) of such Code which has been established by an employer for the exclusive benefit of its employees or their beneficiaries for the purpose of distributing to such employees or their beneficiaries the corpus and income of the funds accumulated under such plan, if under such plan it is impossible, prior to the satisfaction of all liabilities with respect to such employees and their beneficiaries, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of such employees or their beneficiaries, other than any plan described

in clause (i), (ii), or (iii) of this subparagraph which (I) covers employees some or all of whom are employees within the meaning of section 401(c) of such Code, or (II) is a plan funded by an annuity contract described in section 403(b) of such Code."

1940 Act. Section 3(c)(11) of the 1940 Act provides an exemption from investment company status for:

"[a]ny employee's stock bonus, pension, or profit-sharing trust which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1986; or any governmental plan described in section 3(a)(2)(C) of the Securities Act of 1933; or any collective trust fund maintained by a bank consisting solely of assets of such trusts or governmental plans, or both * * *."

The exemptions afforded by section 3(a)(2) of the 1933 Act, section 3(a)(12) of the 1934 Act, and section 3(c)(11) of the 1940 Act would encompass the receipt of moneys by the Trust directly from governmental plans which are qualified under Code section 401 as well as certain nonqualified governmental plans.

However, two specific aspects of the Trust with respect to governmental plans require further discussion:

Governmental Units. Under the Amendment, the Trust will be permitted to receive moneys directly from governmental units as well as from governmental plans. The lead-in phrase to the exemptions under sections 3(a)(2) and 3(a)(12) states that the exemption is available for any interest or participation issued in connection with a governmental plan. Since the moneys are being invested in the Trust to satisfy an obligation of the governmental unit under a governmental plan, we believe interests or participations issued to governmental units in this situation are issued in connection with governmental plans and should likewise be exempt under sections 3(a)(2) and 3(a)(12).

The exemption under section 3(c)(11) of the 1940 Act does not specifically refer to trust funds containing assets of governmental units. However, under the Amendment, a governmental unit will be able to invest in the Trust only to satisfy an obligation to provide a benefit under a governmental plan. Thus, when the Trust receives money from a governmental unit, the money will in effect become part of the assets of a governmental plan. Accordingly, in our view the Trust is exempt under section 3(c)(11) because it is a collective trust fund maintained by a bank consisting solely of assets of qualified employee benefit trusts or governmental plans, or both.

Investment by a Governmental Plan in the Securities of the Government Employer. It is possible that contributions to a governmental plan may be invested both in the Trust and directly by the governmental plan itself in securities of the government employer ("Employer") or of another state, federal, or local government or agency, or instrumentality thereof. For example, a governmental plan for a particular county in a state might invest in the securities of such state and its other instrumentalities. Such investment could exceed the contributions made by the county to the governmental plan.

Section 3(a)(2) of the 1933 Act, unlike sections 3(a)(12) of the 1934 Act and 3(c)(11) of the 1940 Act, disallows the exemption provided by the section for any plan "the contributions under which are held in a single trust fund * * * for a single employer and under which an amount in excess of the employer's contribution is allocated to the purchase of securities (other than interests or participations in the trust * * * itself) issued by the employer or any company directly or indirectly controlling, controlled by, or under common control with the employer." (Emphasis added.)

This statutory language predated the addition of the governmental plan exemption under section 3(a)(2) and could be read to prohibit the purchase by a governmental plan of securities of which the Employer, or its controlled or commonly controlled entities, is the issuer if employee contributions under such plan are held in a single trust fund and such purchases exceed the Employer's contribution to the governmental plan. However, it does not seem likely that Congress intended the underlined language to apply to government entities because of its use of the word "company." A governmental entity is not ordinarily referred to as a "company."

In addition, in the event that all of the assets of a governmental plan are not committed to the Trust and the noncommitted assets are used by such plan to purchase securities of the Employer or its controlled or commonly controlled entities in excess of the amount contributed by the Employer, such a reading of s 3(a)(2) would seem not only to require the registration of interests in such governmental plan, but also interests in the Trust. Registration of the interests in the Trust would be required because the interests would be issued in connection with a governmental plan which does not fit within the exemption. We do not believe that the investment by the governmental plan of assets not committed to the Trust should affect the availability of the s 3(a)(2) exemption for interests in the Trust, because the investment of noncommitted funds is beyond the control of the Trust. Requiring registration of interests in the Trust

would not provide disclosure of investments outside the Trust.

Further, a governmental plan that invests in securities issued by the government employer or any government entity controlling, controlled by, or under common control with the government employer will be investing in securities that are exempt from registration under the 1933 Act. Congress could not have intended to require registration of plan interests based on the indirect acquisition of government securities with employee contributions (through a plan) where the securities could be offered and sold to employees directly without registration pursuant to section 3(a)(2) of the 1933 Act.

Conclusion

Based upon the foregoing facts, upon the no-action position taken by the staff in InterFirst Bank Dallas, N.A. (available April 4, 1983), and upon the analysis discussed above, it is our opinion that the interests in the Trust to be issued pursuant to the Amendment outlined above are exempt securities under section 3(a)(2) of the 1933 Act and under section 3(a)(12) of the 1934 Act and would not require the Trust to register as an investment company under the 1940 Act by virtue of the exemption afforded by section 3(c)(11) thereof.

Request

We request that you advise us whether the staff of the Division of Investment Management will recommend any enforcement action to the Commission if the Amendment as described herein is undertaken without compliance with the various registration requirements of the 1933 Act, the 1934 Act, and the 1940 Act.

Very truly yours,

Rebecca S. Wilson

Washington, D.C. 20549

Attention: Ms. Felicia Smith

Subject: The Idaho First National Bank

Gentlemen:

Pursuant to our telephone conversations of August 22, 1988, and September 8, 1988, and on behalf of The Idaho First National Bank, we submit the following information to supplement our no-action letter request dated July 25, 1988. Item 5 on page 3 of the July 25 letter should read as follows:

> 5. If the plan purchases any securities issued by the government employer or any other governmental entity controlling, controlled by, or under common control with the government employer in an amount in excess of contributions made by the government employer, the securities must be exempt from registration under the 1933 Act and must be municipal securities as defined in section 3(a)(29) of the Securities Exchange Act of 1934 ("1934 Act") (and thus would be exempted securities under section 3(a)(12)(A)(ii) of the 1934 Act).

Very truly yours,

Rebecca S. Wilson

SEC LETTER

ICA 1940 Act / s 3(c)(11)

October 11, 1988

Publicly Available October 11, 1988

We would not recommend that the Commission take any enforcement action under the Investment Company Act of 1940 if The Idaho First National Bank ("Company") implements the proposed amendment to the declaration of trust related to the collective trust fund ("Trust") without registration of the Trust, under the 1940 Act in reliance upon Section 3(c)(11) thereof. See Interfirst Bank Dallas (pub. avail. Jan. 11, 1983) and e.g. Wachovia Bank and Trust Company, N.A. (pub. avail. Nov. 21, 1983).

The Division of Corporation Finance has requested us to advise you that, based on the facts presented, but without necessarily concurring in your analysis, that Division will not recommend enforcement action to the Commission if the Company, in reliance on your opinion that interests in the Company's collective investment fund by any governmental plan or unit are exempt from registration under Section 3(a)(2) of the Securities Act of 1933 ("1933 Act") and Section 3(a)(12) of the Securities Exchange Act of 1934 ("1934 Act"), implements and operates the Trust as proposed without registration under the 1933 Act or the 1934 Act. In arriving at this position, we have noted particularly that (1) the Company will require certain representations from the administrator or trustee of each governmental plan or governmental unit from which it receives monies for investment; and (2) in the event that a governmental plan or governmental unit invests in securities of the employer or a related entity, such securities must be exempt from registration under the 1933 Act and the 1934 Act.

Because these positions are based on representations made in your letters, it should be noted that any different facts may require a different conclusion. Furthermore, this response only expresses the Divisions' positions on enforcement action and does not express any legal conclusion on the questions presented.

Re: Fidelity Management Trust Company Request for No-Action Letter under 1933 Act Section 3(a)(2), 1934 Act Section 3(a)(12) and 1940 Act Section 3(c)(11)

Dear Ms. Tsai:

This letter is intended to respond to the questions you raised during our recent telephone conversations with regard to our no-action request dated February 3, 1989 and, as you requested, to restate that request so that this letter could be reviewed as a request complete in itself.

On behalf of Fidelity Management Trust Company, an FDIC-insured Massachusetts chartered bank and trust company ("FMTC"), we respectfully request a determination that the Staff (the "Staff") of the Securities and Exchange Commission (the "Commission") will not recommend that the Commission take any enforcement action if the offering of the Fidelity Group Trust for Employee Benefit Plans (the "Trust") to deferred compensation plans maintained by state and local governmental units under Section 457 of the Internal Revenue Code of 1986, as amended (the "Code"), is undertaken without registration under the Securities Act of 1933 (the "1933 Act"), the Securities Exchange Act of 1934 (the "1934 Act") and the Investment Company Act of 1940 (the "1940 Act").

This request should be granted because it is consistent with both prior no-action positions of the Commission and the legislative history to the Acts and because no public policy interest would be served by requiring registration in this situation.

I. Statement of Facts

FMTC was organized in 1981 as a subsidiary of FMR Corp., a Massachusetts holding company. Despite its name, FMTC is not merely a trust company. Rather, FMTC is a bank engaged in a wide variety of banking activities, including the taking of deposits and the exercising of fiduciary powers similar to those permitted to national banks under the authority of the Comptroller of the Currency. These activities may be summarized as follows:

A. With respect to its depository activities, FMTC has accepted various types of deposits withdrawable by check, as well as time deposits and savings deposits. Deposits as of the end of each of the last 6 calendar years were as follows: 1983, $10,607; 1984, $21,347,590; 1985, $17,095,523; 1986, $14,496,551; 1987, $11,007,529; and 1988, $7,970,032. These depository activities represent 56% of FMTC's liabilities during such 6-year period. Furthermore, FMTC has been approved by the Federal Reserve System to participate in its automated clearing ("ACH") system, thereby enabling FMTC to wire funds, and to receive wired funds, through the Federal Reserve Bank of Boston.

B. FMTC invests the deposits it receives in a broad variety of investments and loans. The investments encompass money market instruments such as Treasury notes and commercial paper. The loans include consumer loans but not commercial loans. FMTC is also qualified to make student loans.

C. With respect to its fiduciary activities, FMTC acts, among other things, as (i) the trustee of over 100 large Code Section 401(a) pension and profit sharing plans maintained by non-affiliate corporate sponsors, (ii) the trustee or custodian of a variety of "prototype" or "prototype-like" Code Section 408 individual retirement accounts, Code Section 403(b) custodial accounts and Code Section 401(a) pension and profit sharing plans which are marketed through various affiliates of FMTC, the number of which accounts and plans exceed 1 million, and (iii) the investment manager for plan assets of approximately 50 large Code Section 401(a) pension and profit sharing plans (principally of the defined benefit type). FMTC's rapid growth in this area in recent years corresponds to the dramatic increase in retirement plan assets generally during this period.

D. FMTC acts as custodian to several registered investment companies. FMTC also operates a personal trust department, which serves as investment manager to wealthy individuals, foundations and educational institutions.

E. As indicated above, FMTC's fiduciary services fall into three categories. First, FMTC acts as the trustee or custodian for retirement accounts and plans. Second, FMTC acts as the investment manager under retirement plans. Third, FMTC acts as trustee of the Trust. The overwhelming majority of the total fees for fiduciary services are for services in the first two categories, that is, services other than services with

respect to the Trust. In fact, the average annual percentage of total fiduciary fees represented by fiduciary fees other than Trust fees during the last 6 calendar years is as follows; 1983, 81.9%; 1984, 80.7%; 1985, 71.6%; 1986, 84.7%; 1987, 86.9%; and 1988, 86.7%. Accordingly, the average annual percentage of total fiduciary fees represented by fiduciary fees other than Trust fees is greater than 80%. All of the fiduciary fees other than those for the Trust are for services similar to those permitted to national banks. These non-Trust fiduciary services do not involve any "pooling" of investments and therefore do not require exemption under 1933, 1934 or 1940 Acts.

F. FMTC's ability to continue to engage in this wide variety of banking activities has been legislatively preserved by the Competitive Equality Banking Act of 1987 ("CEBA"). CEBA allows FMTC to continue to engage in any activity it engaged in prior to March 5, 1987.

As a bank FMTC is regulated by the Commonwealth of Massachusetts, just like any other bank. As a bank whose deposits are insured by the FDIC, FMTC is similarly regulated, and subject to examination, by the FDIC. The Commonwealth of Massachusetts and FDIC have conducted joint examinations and have also conducted independent examinations of FMTC.

Most recently, the Commonwealth of Massachusetts conducted two separate examinations of FMTC this year; one examined the banking department of FMTC (exclusive of trust operations), and the second examined the EDP systems utilized by FMTC.

In addition to periodic examinations, FMTC files reports at least annually with both the FDIC and the Commonwealth. These reports include, among others, the following:

Commonwealth of Massachusetts

Call Reports

Statement of the Trust Department--Schedule H

Indebtedness of Directors and Officers

Indebtedness of Interests of Directors and Officers

Subsidiary Activities Report

Consolidated Report of Total Assets

Publication Form of Report of Condition

FDIC

Call Reports

Certified Statement of Assets (for assessments)

FMTC has established the Trust as a collective investment fund, consisting of a series of investment portfolios including equity and bond portfolios. The Trust, as most recently amended and restated, is presently maintained exclusively for pension, profit sharing, stock bonus or other employee benefit plans which either (i) are qualified plans within the meaning of Section 401 of the Code and for which there is maintained a trust fund which is tax exempt pursuant to Section 501(a) of the Code, or (ii) are governmental plans as defined in Section 414(d) of the Code which have been established by employers for the exclusive benefit of their employees or their beneficiaries.

Accordingly, FMTC does not and will not offer interests in the Trust to (i) individual retirement accounts as defined in Section 408(a) of the Code, (ii) plans funded by annuity contracts described in Section 403(b) of the Code, or (iii) non-governmental Section 457 plans. Furthermore, FMTC does not offer the Trust to plans covering self-employed individuals as defined in Section 401(c)(1) of the Code. The Trust qualifies as a "group trust" under Internal Revenue Service Revenue Ruling 81-100.

A "governmental plan" is defined in Section 414(d) of the Code to include a plan established and maintained for its employees by the government of the United States, by any state or political subdivision thereof, or by any agency or instrumentality of any of the foregoing.[1]

In connection with the offering of the Trust to any governmental Section 457 plan, FMTC will require the

administrator of such plan to represent in writing that: (1) the plan is for the exclusive benefit of its participants or their beneficiaries, (2) the purpose of the plan is the distribution of corpus and income of the funds, if any, accumulated under such plan to the plan's participants or their beneficiaries, (3) no part of the corpus or income of the plan shall be used or diverted to any purpose other than the exclusive benefit of its participants or their beneficiaries prior to the satisfaction of all the plan's liabilities to such participants and beneficiaries, except that, solely to the extent necessary to retain qualification under Section 457 of the Code, such assets shall remain subject to the claims of the general creditors of the plan sponsor, (4) the plan does not cover self-employed individuals as defined in Section 401(c)(1) of the Code, (5) the plan is not funded by an annuity contract described in Section 403(b) of the Code, and (6) no employee contributions under the plan will be invested by the plan in securities of the governmental employer sponsoring the plan or its commonly controlled entities.

II. Discussion

A. Statutory Authority

The exemption from registration afforded by Section 3(a)(2) of the 1933 Act applies to:

> "any interest or participation ... in a collective trust fund maintained by a bank ..., which interest, participation, or security is issued in connection with (A) a stock bonus, pension or profit-sharing plan which meets the requirements for qualification under Section 401 of the Internal Revenue Code of 1954, ... or (C) a governmental plan as defined in Section 414(d) of such Code which has been established by an employer for the exclusive benefit of its employees or their beneficiaries for the purpose of distributing to such employees or their beneficiaries the corpus and income of the funds accumulated under such plan, if under such plan it is impossible prior to the satisfaction of all liabilities with respect to such employees and their beneficiaries, for any part of the corpus or income to be used for, or diverted to, purposes other than the exclusive benefit of such employees or their beneficiaries, other than any plan described in clause (A) ... or (C) of this paragraph (i) the contributions under which are held in a single trust fund ... and under which an amount in excess of the employer's contribution is allocated to the purchase of securities (other than interests or participations in the trust ... itself) issued by the employer or any company directly or indirectly controlling, controlled by, or under common control with the employer, (ii) which covers employees some or all of whom are employees within the meaning of Section 401(c)(1) of such Code, or (iii) which is a plan funded by an annuity contract described in Section 403(b) of such Code."

Identical language, except for clause (i) above, makes such interests and participations an exempt security under Section 3(a)(12) of the 1934 Act. Section 3(c)(11) of the 1940 Act also provides an exemption from investment company status for "any employee's stock bonus, pension, or profit sharing trust which meets the requirements for qualification under Section 401 of the Internal Revenue Code of 1954 or which holds only assets of governmental plans described in Section 3(a)(2)(C) of the Securities Act of 1933; or any collective trust fund maintained by a bank consisting solely of assets of such trusts."

B. Applicability of Sections 3(a)(2), 3(a)(12) and 3(c)(11) to Section 457 Plans

In the no-action letter issued to Wells Fargo Bank, N.A. (available September 7, 1988), the Staff recognized, and it is the opinion of the undersigned, that Section 457 plans which are maintained by state or local governmental units qualify as governmental plans under Sections 3(a)(2), 3(a)(12) and 3(c)(11). See also the no-action letter issued to InterFirst Bank of Dallas (available April 4, 1983), which exempts certain other types of non-trusteed governmental plans. Moreover, as explained below, reference to the legislative history of Sections 3(a)(2), 3(a)(12) and 3(c)(11) indicates an intent to include Section 457 plans within the scope of the exemptions. Finally, no public policy interest would be served by requiring registration of interests offered to Section 457 plans in this situation.

1. Background

Governmental plans generally fall into three categories: those qualified under Section 401 of the Code; those qualified under Section 403 of the Code; and those qualified under Section 457 of the Code. In each case, the purpose of qualification is to avoid immediate taxation to employees of amounts deferred under the plans. Thus, if a governmental plan were to fail to qualify under Section 401, 403, or 457 of the Code, government employees would be subject to taxation on benefits as they vest under

the plan. See, Code Section 457(f).

The assets of plans qualified under Section 401(a) of the Code must be maintained in trust and must, among other things, satisfy the requirement of Section 401(a)(2) of the Code that it is impossible, prior to satisfaction of all liabilities to participants and beneficiaries, for assets to be used, or diverted to, purposes other than the exclusive benefit of participants and beneficiaries.

Section 403(a) plans are funded by insurance company annuity contracts; 403(b) plans are funded either by such annuity contracts or under custodial agreements that invest exclusively in mutual funds. Section 403(b) plans, which may be sponsored by a state or local government for certain of its educational employees, are specifically excluded from the exemptions provided by Section 3(a)(2) of the 1933 Act and 3(a)(12) of the 1934 Act. As a consequence, FMTC will not permit 403(b) plans to participate in the Trust.

Section 457 plans generally permit employees of state and local governments to defer a portion of their current compensation until separation from service and, as such, are the counterpart to Section 401(k) arrangements maintained by private employers. Among the requirements to qualify as a Section 457 plan, Section 457(b)(6) of the Code provides that the plan must be "unfunded," in that all assets of the plan must remain the property of the employer subject only to the claims of the employer's general creditors.[2]

> The legislative history of Section 457 states that "assets may not be segregated for [the] benefit [of participants] in any manner which would put an interest therein beyond the reach of the general creditors of the sponsoring entity." (Joint Committee on Taxation, General Explanation of the Revenue Act of 1978, p. 71.) This we believe, indicates the statute's intent only to insulate the deferral income and investment property of the Section 457 plan from access to, or receipt by, participants prior to their eligibility for benefits under the plan. The basis for this limitation is in the history of state and local government deferred compensation plans for employees. For years these plans had sought and obtained favorable rulings from the Internal Revenue Service allowing employees, under certain conditions, to postpone their tax liability on deferred compensation until actual receipt under the plan. The conditions necessary for this allowance were rooted in the "constructive receipt" of income doctrine which dictated that employees, in order to be considered as not having received current income under a deferred compensation plan, could not acquire a present interest "in either the amounts deferred or the assets used as the employer's funding medium." (Id. at 67 (footnote omitted)). In devising Section 457, Congress codified, in essence, this constructive receipt doctrine. This appears to be the sole aim of Section 457(b)(6).

Nonetheless, Treasury Regulation 1.457-2(j) expressly permits a participant to direct investment of assets of the plan attributable to his or her benefits, if the plan so provides. Consequently, assets under a Section 457 plan can be "dedicated" to provide benefits so long as they remain subject to the claims of the government's general creditors.

2. No-Action Positions

In the Wells Fargo letter, the Staff permitted the bank to rely on the Section 3(a)(2), 3(a)(12) and 3(c)(11) exemptions for its offerings of collective investment funds to Section 457 plans. The Staff thereby recognized that the unfunded status of such plans did not cause them to fail the "impossibility of diversion" requirements of Sections 3(a)(2) and 3(a)(12) merely because such plans were complying with applicable requirements for qualification under Section 457. We believe that the issues raised by the proposed offering by FMTC to Section 457 plans are identical to those raised in the Wells Fargo letter.[3]

3. Legislative History

As pointed out in the request for the Wells Fargo letter, the governmental plan

exemptions contained in Sections 3(a)(2) and 3(a)(12), along with a corresponding change to Section 3(c)(11) of the 1940 Act, were added by the Small Business Incentive Act of 1980 (the "1980 Amendments"). In support of the 1980 Amendments, the Securities Exchange Commission issued a Memorandum to the United States Senate which provides, in pertinent part, that:

> "Section 1 also adds government plans, as defined in Section 414(d) of the Internal Revenue Code, to the category of plans to which interests ... may be offered and sold without registration under the Securities Act ... Section 414(d) of the Internal Revenue code provides special tax treatment for state and local employee benefit plans, and was added to the Code in 1978 in recognition of the fact that it is often difficult if not impossible for such plans to meet all the qualification requirements of Section 401, particularly the antidiscrimination requirements of Section 401(a), because the states establishing such plans prescribe a shorter vesting period for elected and appointed officials than for other covered employees in recognition of the reality of political life. Section 1 of the Bill would make exemption from registration for bank and insurance company funding of public pension plans turn upon the plans' compliance with the substance of Section 401 as it is material to the operation of the securities laws, rather than on their compliance with all the technical requirements of that Section. Thus, it would provide an exemption from registration for bank and insurance company funding of Section 414(d) plans which have been established for the exclusive purpose of providing retirement benefits to employees or their beneficiaries and whose funds are segregated and cannot be diverted to other purposes. The two requirements contained in the amendment are based upon Section 401(a)(1) and Section 401(a)(2) respectively, which are two of the three central provisions of Section 401."[4]

Contrary to the above Memorandum, Section 414(d) was actually added to the Code by ERISA in 1974, and together with parallel provisions in Title 1 of ERISA, merely exempts governmental plans from certain of the requirements necessary for qualification under Section 401(a) of the Code. The amendment to the Code in 1978 that provided for special tax treatment for state and local government plans was the addition of Section 457.

Moreover, in his remarks before the Senate, Senator Sarbanes, the sponsor of the 1980 Amendments, stated that the purpose of the bill was to "exempt from registration bank and insurance company funding of certain public employee retirement plans without regard to their qualification under Section 401 of the IRS Code."[5]

Although the legislative history does not specifically reference Section 457 plans, it would seem anomalous to conclude that the 1980 Amendments were intended to cover only Section 401(a) governmental plans, since by virtue of enactment of ERISA in 1974, such plans should already have been covered under the existing provisions of Sections 3(a)(2), 3(a)(12) and 3(c)(11) that exempt securities listed in connection with Section 401(a) plans. The context of the Memorandum and Senator Sarbanes' remarks make sense only if the 1980 Amendments were intended to encompass Section 457 plans.

4. Policy Basis

There is no policy reason to exclude Section 457 plans from the Section 3(a)(2), 3(a)(12) and 3(c)(11) exemptions. In particular, the legislative history to Section 457 that permits segregation of plan assets and the Section 457 regulations that permit participant direction of plan investments provide a sufficient basis to satisfy the intent of the requirements of those assets by a government's creditors. Were the Staff to take the position that registration is required in this situation, it would obviously place Section 457 plan sponsors at a disadvantage as compared to both public and private employers that sponsor trusteed plans in terms of the investment options which may be offered to plan participants.

III. Requested Staff Position

Based upon the foregoing facts and analysis discussed above, it is our opinion that the interests in the Trust to be issued to Section 457 plans as described above are exempt securities under Section 3(a)(2) of the 1933 Act and under Section 3(a)(12) of the 1934 Act and would not require the Trust to register as an investment company under the 1940 Act by virtue of the exemption afforded by Section 3(c)(11) thereof. We would appreciate your advice that the Staff will not recommend to the Commission that any action be taken if FMTC proceeds with its proposed offering without compliance with the various registration requirements of the 1933, 1934 and 1940 Acts. If, however, the Staff contemplates recommending against a no-action position, we request that a conference be arranged to discuss these issues.

If you require additional information, please contact the undersigned at (617) 570-7924.

Very truly yours,

John M. Kimpel

1 Section 401(a)(24) of the Code provides that the tax-exempt status of a group trust will not be adversely affected merely because the trust accepts monies from a governmental plan or governmental unit as defined in Section 818(a)(6) of the Code. The legislative history under Section 401(a)(24) makes clear that this provision applies if the trust accepts monies (a) from a retirement plan of a state or local government, whether or not the plan is qualified under Section 401(a) of the Code and whether or not the assets are held in trust, or (b) directly from such state or local government, if such monies are intended for use in satisfying an obligation of such governmental unit to provide a retirement benefit under a governmental plan. See, Joint Committee on Taxation, General Explanation of the Tax Equity and Fiscal Responsibility Act of 1982, p. 339.

2 Code Section 457(b)(6) provides that:

"(A) all amounts of compensation deferred under the plan, (B) all property and rights purchased with such amounts, and (C) all income attributable to such amounts, property, or rights, shall remain (until made available to the participant or beneficiary) solely the property and rights of the employer (without being restricted to the provision of benefits under the plan) subject only to the claims of the employer's general creditors."

3 In addition, on previous occasions, the Commission has granted exemption from registration for interests issued to Section 457 plans in analogous circumstances. See, e.g., ICMA Retirement Trust (available February 7, 1983) (offering of interests in a trust for commingled investment of Section 457 plans exempt under Section 3(a)(2) of the 1933 Act and Section 2(b) of the 1940 Act as an "instrumentality" of the government); Equitable Life Assurance Society (available December 12, 1980) (offering of interests in a group annuity contract held in trust to Section 457 plans not subject to registration under the 1933 and 1940 Acts.)

4 126 Cong.Rec. S 27272-74 (cum. ed. Sept. 25, 1980). SEC Release 33-6281 (January 23, 1981) largely reiterates the legislative history to the 1980 Amendments.

5 126 Cong.Rec. S 27273 (cum. ed. Sept. 25, 1980).

SEC LETTER

1933 Act / s3(a)(2)

November 2, 1989

Publicly Available November 2, 1989

RESPONSE OF THE OFFICE OF CHIEF COUNSEL DIVISION OF INVESTMENT MANAGEMENT

We would not recommend that the Commission take any enforcement action under the Investment Company Act of 1940 ("1940 Act") if Fidelity Management Trust Company ("FMTC") relies upon your opinion as counsel that deferred compensation plans maintained by state and local governmental units under section 457 of the Internal Revenue Code of 1986, as amended ("Code") ("section 457 plans"), qualify as governmental plans under section 3(c)(11) of the 1940 Act,[1] and FMTC offers interests in the Fidelity Group Trust for Employee Benefit Plans ("Trust") to the section 457 plans without registering the

Trust under the 1940 Act.[2] This position is based on the facts and representations in your letter of September 26, 1989, particularly that:

(1) FMTC does not and will not offer the Trust to individual retirement accounts as defined in section 408(a) of the Code; and

(2) in connection with the offering of the Trust to any section 457 plan, FMTC will require the administrator of the plan to represent in writing that no part of the corpus or income of the plan shall be diverted to any purpose other than the exclusive benefit of its participants and beneficiaries, except that, solely to the extent necessary to retain qualification under section 457 of the Code, those assets shall remain subject to the claims of the general creditors of the plan sponsor.

The Division of Corporation Finance has asked us to inform you that, based on the facts presented, but without necessarily concurring in your analysis, that Division will not recommend any enforcement action to the Commission if FMTC, in reliance upon your opinion as counsel that the exemptions provided by section 3(a)(2) of the Securities Act of 1933 and section 3(a)(12) of the Securities Exchange Act of 1934 are available, offers interests in the Trust to section 457 plans without compliance with the registration provisions of these Acts. In reaching this position, that Division has noted particularly that FMTC will require certain described representations of the section 457 plan administrators. The Division of Market Regulation has advised us that they concur in this position.

Because the Divisions' position is based upon the representations made in your letter, it should be noted that any different facts or conditions might require different conclusions. Further, this letter expresses only the Divisions' position on enforcement action and does not express legal conclusions on the questions presented.

Elizabeth T. Tsai

Special Counsel

Securities and Exchange Commission (S.E.C.)

1 Section 3(c)(11), in part, excepts from the definition of an investment company, "Any employee's stock bonus, pension, or profit-sharing trusts which meet the requirements for qualification under section 401 of the [Code] or which holds only assets of governmental plans described in section 3(a)(2)(C) of the Securities Act of 1933; or any collective trust fund maintained by a bank consisting solely of assets of such trusts.

2 See Wells Fargo Bank, N.A. (pub. avail. Sept. 7, 1988); InterFirst Bank Dallas, N.A. (pub. avail. April 4, 1983) (Congress intended section 3(c)(11) of the 1940 Act to be available to a collective trust fund maintained by a bank consisting solely of assets of employee's stock bonus, pension, or profit-sharing trusts which meet the requirements for qualification under section 401 of the Code and assets of governmental plans). Re: No-Action Request: Securities Act of 1933, Section 3(a)(2); Securities Exchange Act of 1934, Section 3(a)(12); Investment Company Act of 1940, Section 3(c)(3).

Gentlemen:

On behalf of Northern Trust Corporation, a bank holding company whose principal banking subsidiary is The Northern Trust Company ("Northern"), [FN1] we hereby request your confirmation that you will not recommend that the Securities and Exchange Commission (the "Commission") take enforcement action against Northern in the event Northern, in its capacity as trustee of moneys received by Northern from common trust funds maintained by unaffiliated banks (individually, an "Originating Bank" and collectively, the "Originating Banks"), contributes such moneys to one or more of the common trust funds (the "Funds") maintained by Northern, in the manner described herein, without registering interests or participations in the Funds under the Securities Act of 1933 (the "1933 Act") or the Securities Exchange Act of 1934 (the "1934 Act"), and without registering the Funds as investment companies under the Investment Company Act of 1940 (the "1940 Act").

- FN1 Northern Trust Corporation, a Delaware corporation with its executive offices located in Chicago, Illinois, is a bank holding company registered with the Board of Governors of the Federal Reserve System under the Bank Holding Company Act of 1956, as amended. Except for directors' qualifying shares, Northern Trust Corporation owns all of the capital stock of Northern, a banking corporation organized under the laws of the State of Illinois and a member bank of the Federal Reserve System. As a state member bank, Northern is subject to the supervision and examination of the Board of Governors of the Federal Reserve System and the Illinois Commissioner of Banks and Trust Companies.

Northern currently maintains 27 Funds for the collective investment and reinvestment of moneys contributed thereto by Northern in its capacity as trustee, executor, administrator or guardian. The Funds invest in a broad array of financial instruments, and include actively-managed domestic and foreign equity and fixed income funds, passively-managed domestic and foreign equity index funds, and taxable and tax-exempt money-market funds. All of the Funds are maintained in accordance with the Comptroller of the Currency's (the "Comptroller") Regulation 9, 12 C.F.R. § 9.1 et seq. In addition, interests or participations in the Funds are exempt from registration under Sections 3(a)(2) and 3(a)(12), respectively, of the 1933 Act and the 1934 Act, and the Funds themselves are excepted from the definition of investment company under Section 3(c)(3) of the 1940 Act. Under the Declaration of Trust establishing

the Funds, Northern has exclusive management and control of each of the Funds in accordance with the investment objectives applicable thereto.

Like Northern, many Originating Banks maintain (or may wish to establish) common trust funds for the collective investment and reinvestment of moneys received by them for a bona fide fiduciary purpose. In managing the assets of these common trust funds, however, the Originating Banks may be unable--primarily because of the relatively small size of such funds--to utilize or implement the wide range of diversified, specialized investment strategies and techniques employed by Northern in the management of the Funds. Many Originating Banks have indicated an interest in expanding the range of investment strategies and techniques they may utilize for the benefit of their trust customers by establishing one or more trust accounts at Northern whereby an Originating Bank may direct Northern, as trustee for all or a portion of the assets of the Originating Bank's common trust fund or funds, to contribute such assets to one or more of the Funds maintained by Northern.

Prior to permitting an Originating Bank to establish such a trust account at Northern, Northern would obtain specific representations from the Originating Bank that (1) moneys received in trust (or some other fiduciary capacity) by the Originating Bank from its customers and contributed by the Originating Bank to its common trust fund were received by the Originating Bank for a bona fide fiduciary purpose, in accordance with long-standing interpretations that a bank common trust fund may not serve as a vehicle for general investment by the public (see, e.g., H.R.Rep. No. 1382, 91st Cong., 2d Sess. 43 (1970); (2) the Originating Bank has complied and will comply with all restrictions on the operation of its common trust funds contained in the Comptroller's Regulation 9, including the restrictions on advertising respecting common trust funds contained in 12 C.F.R. § 9.18(b)(5)(v); [FN2] and (3) the Originating Bank is not prohibited by local fiduciary law from investing its common trust funds in common trust funds maintained by another bank.

- FN2 Under Section 9.18(b)(5)(ii) of the Comptroller's Regulation 9, the trustee of a common trust fund is required to prepare, at least annually, a financial report relating to the fund that includes, among other things, a list of investments held by the fund showing the cost and current market value of each investment. In addition, under Section 9.18(b)(iv), the trustee is required to furnish the financial report to all participants in the common trust fund (or to notify participants of the availability of the report). While Section 9.18(b)(5)(iv) permits the trustee to furnish a copy of the financial report to prospective customers, it also provides, in conjunction with Section 9.18(b)(5)(v), that a bank may not advertise or publicize its common trust fund services except by way of noting the availability of the financial report in connection with the promotion of the bank's fiduciary services.

- Like the Originating Banks, Northern will comply with the restrictions on advertising contained in Regulation 9 in connection with the operation of the Funds. Northern has, however, obtained approval from the Comptroller to advertise the availability of its proposed services to Originating Banks by direct mailings to such Banks and through advertisements in publications with an intended audience of corporate fiduciaries. See letter dated July 16, 1987 from Dean E. Miller, Deputy Comptroller for Trust and Compliance, to J. Timothy Ritchie of the Northern (the "Comptroller's Letter"), a copy of which is attached hereto. (Enclosure)

Section 3(a)(2) of the 1933 Act, Section 3(a)(12) of the 1934 Act and Section 3(c)(3) of the 1940 Act

Section 3(a)(2) of the 1933 Act and Section 3(a)(12) of the 1934 Act (together with Rule 12h-1 thereunder) provide, in identical terms, registration exemptions from the respective Acts for interests or participations in a common trust fund, provided the fund is maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator or guardian. Section 3(c)(3) of the 1940 Act excepts from the definition of investment company any common trust fund maintained in such a manner and for such purposes. [FN3]

- FN3 It is evident that Sections 3(a)(2), 3(a)(12) and 3(c)(3) are to given identical interpretations. In adopting the Section 3(a)(2) exemption for common trust funds, for example, Congress noted that the exemption "is identical to the exemption for a 'common trust fund or similar fund' in Section 3(c)(3) of the Investment Company Act." S.Rep. No. 184, 91st Cong. 1st Sess. (1969), 27.

Thus, in order for an interest or participation in a common trust fund to be exempt from registration under the 1933 and 1934 Acts and for the common trust fund itself to be excepted from the definition of investment company under the 1940 Act, three criteria must be satisfied: (1) the entity maintaining the

common trust fund must be a statutorily defined "bank;" (2) the common trust fund must be "maintained" by the bank; and (3) the common trust fund must be maintained exclusively for the collective investment and reinvestment of assets contributed thereto by the bank in its capacity as trustee, executor, administrator or guardian.

We submit that Northern's proposal satisfies each of these three criteria. First, Northern is a "bank" for purposes of all three of the relevant sections. Under Section 3(a)(2) of the 1933 Act, the term "bank," in the context of a common trust fund, has the same meaning ascribed to that term in Section 2(a)(5) of the 1940 Act. Under that section, a "bank" is defined to include, among other things, a "member bank of the Federal Reserve System." Similarly, Section 3(a)(6) of the 1934 Act defines bank to include, among other things, a member bank of the Federal Reserve System. As noted above, Northern is a member bank of the Federal Reserve System.

Second, the Funds managed by Northern are funds "maintained" by Northern, since, as noted above, under the terms of the Declaration of Trust establishing and governing the Funds, Northern exercises "substantial investment responsibility" with respect to the Funds by virtue of its exclusive management and control of the Funds in accordance with the investment objectives applicable thereto. [FN4] Bank of Delaware, [72-73 Transfer Binder] Fed.Sec.L. (CCH) Rep. ¶ 79,292 (avail. January 7, 1973).

- FN4 In this connection, it is important to note that the various common trust funds managed by the Originating Banks will also be "maintained" by such Banks, notwithstanding the fact that such Banks may contribute all or a portion of the assets of such funds to trust accounts at Northern for the ultimate contribution by Northern of such assets to the Funds. The Comptroller's Letter opines that the "maintenance" requirement is met as long as the Originating Banks establish "directed" trusts at Northern whereby such Banks give specific directions to Northern as to the amount of moneys that are to be contributed to each of the Funds. Once such a direction is given and moneys are contributed by Northern to one or more of the Funds, Northern will then have complete discretion in managing such moneys in accordance with the investment objectives applicable to each Fund.

Third, the only moneys that Northern will contribute to the Funds are moneys that Northern has received in its capacity as trustee, executor, administrator or guardian. In Bank of Delaware, supra, the staff explained the meaning of this last requirement:

[s]ection 3(c)(3) of the Act excepts from the definition of investment company in Section 3(a) of the Act any common trust fund maintained by a bank exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank acting in one of its traditional fiduciary capacities and not as a vehicle for general investment by the public.

We believe that, under Bank of Delaware, Northern is entitled to rely on the registration exemptions provided by Section 3(a)(2) of the 1933 Act and Section 3(a)(12) of the 1934 Act, as well as the exception from the definition of investment company described in Section 3(c)(3) of the 1940 Act, in implementing its proposal to permit common trust funds maintained by Originating Banks to participate in Northern's Funds. First, as noted above, no Originating Bank will be permitted to contribute the moneys of any of its common trust funds to Funds maintained by Northern unless the Originating Bank first establishes a trust account at Northern with respect to such moneys. Thus, all of the moneys received from the Originating Banks to be contributed by Northern to the Funds will be contributed by Northern in a traditional fiduciary capacity, namely, as trustee for each of the trust accounts established by the Originating Banks. Further, Northern's Funds will not be used as a vehicle for general investment by the public because of all of the moneys contributed by Northern thereto--whether received in trust (or some other fiduciary capacity) by Northern from its trust customers, or by the Originating Banks from their trust customers--will in the first instance have been received by Northern or the Originating Banks, as the case may be, for a bona fide fiduciary purpose. See H.R.Rep. No. 1382, supra. Neither interests in the Funds maintained by Northern nor in the common trust funds maintained by the Originating Banks will be offered as "investments" to the general public.

We are aware of certain no-action letters in which the staff appears to have taken the position that in order for the common trust fund exemption to be available, the bank that contributes moneys to such fund must not only have received such moneys from customers in trust (or some other fiduciary capacity), but for a "bona fide fiduciary purpose" as well (i.e., for a purpose other than, or in addition to, that of money management). See, e.g., Howard Savings Bank, [79-80 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 82,320 (avail. August 13, 1979). Under a literal reading of these letters, Northern would be precluded from contributing moneys received from the various Originating Banks to one or more of Northern's Funds

if Northern is deemed to receive such moneys primarily for money management purposes, notwithstanding the fact that Northern received such moneys in trust. We believe, however, that the trusts to be established by the Originating Banks at Northern should be viewed as being established for a bona fide fiduciary purpose and not simply for purposes of money management. Moreover, we believe that even if Northern were viewed as acting primarily as a money manager with respect to moneys received by Northern from the Originating Banks, no regulatory purpose would be served by applying the "bona fide fiduciary purpose" test to such moneys since, as noted above, the test will be applied to moneys received by the Originating Banks and, consequently, Northern's proposal will not be used as a vehicle for general investment by the public. There is, in short, no regulatory justification for applying the "bona fide fiduciary purpose" test to Northern when it has already been applied to the Originating Banks.

A. Northern Should Be Viewed As Receiving Funds From the Originating Banks For A Bona Fide Fiduciary Purpose

One of the principal duties of a trustee is to insure adequate diversification of trust investments. See Restatement (Second) of Trusts, § 228. In furtherance of this duty, and in recognition of its inability to provide to its trust customers the wide range of common trust funds--and potential opportunities for diversification--provided by Northern, an Originating Bank might wish to turn to Northern to assist it in providing the highest possible degree of diversification. While an Originating Bank could turn to other sources to diversify its common trust fund portfolio, the Originating Bank may deem it more appropriate to entrust moneys to an entity that, like the Originating Bank itself, is charged with certain fiduciary responsibilities with respect to the management of these moneys. An Originating Bank, in short, might prefer to seek the services of a fiduciary in light of its own fiduciary obligations to its customers. By entrusting funds to Northern, the Originating Bank would not only be looking to Northern's money management expertise, but to the fiduciary framework within which Northern applies that expertise. [FN5]

- FN5 In this connection, it is important to note that the description of a permissible common trust fund contained in Regulation 9 is virtually identical to the descriptions contained in Sections 3(a)(2), 3(a)(12) and 3(c)(3), and that a common trust fund is permissible under Regulation 9 only if the funds contributed thereto were received for a bona fide fiduciary purpose. Investment Company Institute v. Camp, 401 U.S. 617 (1971). Consequently, in approving Northern's proposal, the Comptroller implicitly concluded either that the trust accounts to be established by the Originating Banks at Northern will be established for a bona fide fiduciary purpose, or that Northern's proposal is otherwise in harmony with the policies underlying the operation of a common trust fund. See the Comptroller's Letter.

B. Northern's Proposal Is Fully Consistent With the Policies Underlying the "Bona Fide Fiduciary Purpose" Letters

The requirement that a bank may only commingle moneys that it has received for a bona fide fiduciary purpose was designed, in our view, to insure that a common trust fund would not be used as a vehicle for general investment by the public, and was not intended to constitute a flat prohibition on arrangements that, though not literally meeting the requirement, pose no danger of being used as a general investment vehicle. Indeed, in InterFirst Corporation, [82- 83 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 77,324 (avail. November 24,1982) and Dauphin Deposit Bank & Trust Co., [83-84 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 77,547 (avail. October 1, 1983), the staff concluded that where the grantor of a trust appoints two banks as co-trustees, one of which is to exercise money management functions and the other of which is to exercise fiduciary functions other than, or in addition to, those incident to money management, the money managing co-trustee may, consistently with Section 3(c)(3), contribute the moneys it is managing to one or more of its common trust funds:

[the Section 3(c)(3) exception] applies only to those common trust funds which are operated in a manner incidental to a bank's traditional trust department activities under circumstances in which the trust whose assets would be contributed to the common trust funds are not offered to the public as vehicles for investment in the common trust funds ... A bank may not offer to the public standardized trusts which do not require of the bank any fiduciary functions other than those incident to money management with the intent of managing collectively the assets thereof in a fund not registered as an investment company. However, though a bank, as a co-trustee, may have only fiduciary functions incident to money management with respect to the assets of a trust, it may contribute assets of the trust to its common trust fund if the trust requires of the bank's co-trustee fiduciary functions other than, or in addition to, those incident to money management.

Dauphin, supra, at p. 78,766. As is the case in Dauphin--and in distinction wit h no-action letters such as

Howard Savings Bank--in Northern's proposal, neither Northern nor any Originating Bank will be offering to the public "standardized trusts" which do not require any fiduciary functions other than those incident to money management. Even if the trust accounts established by the Originating Banks at Northern were to be viewed as "standardized," they are clearly not being offered to the public. Further, while the customer of an Originating Bank will not literally appoint the Originating Bank and Northern as co-trustees--with the Originating Bank to perform fiduciary functions and Northern to provide money management services--the customer will name the Originating Bank as trustee, which will in turn effectively appoint Northern as co-trustee by establishing a trust account at Northern. Thus, even if we assume that Northern will act primarily as a money manager with respect to moneys received from the various originating Banks, [FN6] the end result of Northern's proposal is identical to t hat described in the proposals endorsed in InterFirst and Dauphin: one bank--Northern--will provide money management services (as well as fiduciary services incident thereto), while the Originating Bank will perform the more traditional fiduciary services vis-a-vis its customer. In neither scenario is there a danger that the common trust fund will be used as a vehicle for general investment by the public, since in both scenarios the only moneys that may be commingled are those that were received in the first instance from customers for a bona fide fiduciary purpose.

- FN6 As discussed above, however, we believe that Northern should be viewed as having received funds from the various Originating Banks for a bona fide fiduciary purpose.

In addition, we believe that Northern's proposal is closely analogous to a proposal approved by the staff in State Street Bank and Trust Co., [1987 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 78,434 (avail. May 26, 1987). In that letter, the staff indicated that it would not recommend any enforcement action if the assets of certain qualified stock bonus, pension and profit-sharing plans and governmental plans ("Qualified Plans") which were held in separate accounts of certain insurance companies were to be pooled in one or more collective trust funds maintained by an unaffiliated bank. The staff took this position notwithstanding the fact that the arrangements in question did not literally meet the requirements of Sections 3(a)(2) of the 1933 Act, Section 3(a)(12) of the 1934 Act and Section 3(c)(11) of the 1940 Act. Since the arrangements in question were consistent with the policies underlying these sections, the staff gave substance precedence over form, particularly in light of the facts that (1) the separate accounts were "sophisticated investors" that did require the protections afforded by the federal securities laws (as well as the fact the bank maintaining the collective trust fund in which the separate accounts would invest was subject to strict regulation by Federal and state banking authorities) and (2) to deny the exemptions would deny the Qualified Plans that comprised the separate accounts the opportunity and ability to diversify their investments by investing in investments such as the collective trust funds maintained by the bank. See also InterFirst Corporation (avail. November 9, 1984) and Frank Russell Trust Company (avail. September 2, 1982).

Similarly, the Originating Banks that retain Northern to manage the assets of the common trust funds maintained by the Originating Banks will be sophisticated investors with sufficient knowledge regarding investments for them to make decisions with respect to investing in Northern's Funds, and will not need the protection afforded by registration of interests in Northern's Funds.[FN7] In addition, to deny the Originating Banks the opportunity to invest funds held in their common trust funds in the Funds maintained by Northern would deny the Originating Banks--and, more importantly, their customers--the opportunity to take advantage of the diversification and other benefits provided by the Northern.

- FN7 Northern expects that each of the Originating Banks will be an "accredited investor" within the meaning of Rule 501(a) of Regulation D by virtue of being a "bank" within the meaning of Rule 501(a)(1) or otherwise falling within the definition of accredited investor (or will otherwise be the type of investor to whom a valid offering of securities may be made under Section 4(2) of the 1933 Act).

We are aware that under Rule 3c-4 under the 1940 Act (as well as Rule 132 under the 1933 Act and Rules 3a12-6 and 12h-1 under the 1934 Act) and various no-action letters (see, e.g., Sun Trust Banks, Inc. (avail. June 18, 1986)), banks that are members of an affiliated group may contribute assets they hold in a fiduciary capacity directly to a common trust fund maintained by another bank in that group. For the reasons set forth below, however, we believe that Rule 3c-4 should not be construed, by negative implication, to preclude multi-bank common trust funds involving unaffiliated banks.

Rule 3c-4 is a technical rule which was designed to enable multi-bank common trust funds to avail themselves of the favorable tax treatment provided by a 1976 amendment to Section 584 of the Internal Revenue Code (the "Amendment") and yet remain exempt from the registration requirements of the federal securities laws. The Amendment, which provides that banks that are members of an affiliated

group may contribute moneys they hold in a fiduciary capacity directly to a common trust fund maintained by another bank in that group, was enacted in response to a 1970 Internal Revenue Service Revenue Ruling that had concluded that if a bank does not act as fiduciary with respect to all the funds contributed to its common trust fund, but allows the common trust fund to accept as contributions moneys held by affiliated banks in their capacities as fiduciaries, the bank cannot be said to "maintain" its common trust fund. Revenue Ruling 70-302, 70 I.R.B. 140 (1970) (the "Ruling"). See Securities Act Release No. 5896, [77-78 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 81,409 (January 10, 1978) (the "Release"). The Service based its holding on the literal language of pre-Amendment Section 584, which defined a common trust fund as a fund maintained by a bank exclusively for the collective investment and reinvestment of moneys contributed thereto by the bank in its capacity as fiduciary. Rev.Rul. 70-302.

Presumably, the bank in Revenue Ruling 70-302 could have avoided the Service's holding by the simple expedient of requiring its affiliated banks to establish trust accounts at the bank, the assets of which accounts could then be contributed by the bank, as trustee, to its common trust fund. In situations where banks are members of an affiliated group, however, such a procedure apparently seemed unnecessary--and therefore unduly burdensome--to Congress, which moved to nullify the Ruling by enacting the Amendment. See S.Rep. No. 1183, 94th Cong., 2nd Sess. 2 (1976). Since favorable tax treatment had historically been provided to a common trust maintained by a bank in situations where various branches of the bank contributed funds directly to the bank's common trust fund, Congress could see no objection to allowing affiliated banks--which, by virtue of their common ownership, effectively comprise one economic unit--to contribute funds they hold in a fiduciary capacity directly to a common trust fund maintained by a bank in their affiliated group. Id.

As the Commission explained in adopting Rule 3c-4, the same literal language that precluded favorable tax treatment for a multi-bank common trust fund under pre-Amendment Section 584 also precluded the fund from taking advantage of the exemptions provided by the federal securities laws. Thus, the Commission moved to close the gap created by the Amendment by promulgating a rule which would effectively conform the federal securities laws to the Amendment:

Bank holding companies and representatives of the banking industry have recently indicated an interest in using "multi-bank common trust funds," i.e., common trust funds maintained by one constituent bank of a bank holding company for assets contributed thereto by the bank or by other constituent banks in the same holding company in their capacity as trustee, executor, administrator or guardian. Some state laws allow such common trust funds, and recent federal legislation permits such funds to be operated as non-taxable entities.

At present, common trust funds maintained by a bank exclusively for the collective investment and reinvestment of assets contributed thereto by such bank in its capacity as trustee, executor, administrator or guardian, and interests or participations therein, are exempted or excluded from the provisions of the federal securities laws ...

Because the present definition of "common trust fund" in the federal securities laws refers to a fund maintained by a "bank" for assets contributed to the fund by "such bank," it appears that, as presently drafted, the exclusionary and exemptive provisions of the federal securities laws would not be available if one bank in a bank holding company maintained a common trust fund which included assets contributed by other bank members in the same holding company.

Since Rule 3c-4 was designed simply to conform the federal securities laws to the Amendment, it is evident that the rule is inapposite to Northern's proposal. If Northern were asking the staff to permit unaffiliated banks, in their fiduciary capacities, to contribute moneys directly to Northern's Funds, Rule 3c-4 might arguably be construed to have a preclusive effect. [FN8] As described earlier, however, each Originating Bank will be required to establish a trust account at Northern (and to make the representations described in the second full paragraph on page 2 of this letter), and Northern will then contribute the assets of such accounts, in its capacity as trustee, to Northern's funds. Unlike the situation contemplated by Rule 3c-4, Northern will be in literal compliance with the exemptive provisions of the federal securities laws by virtue of contributing all moneys to the Funds in its capacity as trustee.

- FN8 On the other hand, if the tax laws were to be further amended to afford favorable tax treatment to a multi-bank common trust fund that receives moneys directly from unaffiliated banks in their fiduciary capacities, it would seem to follow that Rule 3c-4 should also be amended to permit such an arrangement. If the banks contributing such moneys received them for a bona fide fiduciary purpose, such an arrangement would be consistent with the policies underlying the common trust fund exemption.

Further, we believe that in situations where multi-bank common trust funds are not being used as vehicles for investment by the general public, it would be counterproductive--and contrary to the very policies underlying Rule 3c-4--to conclude that Rule 3c-4 is the sole avenue of relief for multi-bank funds. To so conclude would put small and medium-sized banks that wish to retain their independence at a competitive disadvantage vis-a-vis larger institutions. More importantly, such a conclusion would effectively penalize the customers of small and medium-sized banks, by prohibiting such banks from taking advantage of the diversification and other opportunities they might otherwise be in a position to afford their customers. [FN9]

- FN9 It is worth noting that in the release proposing Rule 3c-4, the Commission expressly recognized that Rule 3c-4 would have the salutary affect of "making a more diverse selection of investment alternatives available" to trust customers. 42 F.R. 56754, 56755 (October 28, 1977). To the extent that a multi-bank common trust fund is not being used as a vehicle for general investment by the public, Rule 3c-4 should not be interpreted or applied in a manner that would undercut the goal of investment diversification.

Conclusion

In conclusion, it is our opinion that Northern's proposal is fully consistent with the policies underlying the various common trust fund exemptions. The common trust funds maintained by the various Originating Banks will be composed of funds received by those banks for a bona fide fiduciary purpose, and, consequently, Northern's proposal will not be used as a vehicle for general investment by the public. We accordingly respectfully request that the staff concur in our opinion that Northern may engage in the proposed collective investment and reinvestment of moneys received in trust (or some other fiduciary capacity) by Northern--both from its customers and from the Originating Banks--without compliance with the registration provisions of either the 1933 or the 1934 Acts pursuant to Sections 3(a)(2) and 3(a)(12) thereof, respectively, and that the proposed activities will not require registration of Northern's common trust funds as investment companies under the 1940 Act, by virtue of Section 3(c)(3) thereof.

Please call the undersigned, Andrew M. Klein or Joseph H. Nesler of this firm if you have any questions or need additional information. If the staff does have questions or concerns regarding this letter, we would appreciate conferring with the staff before it issues its response.

Very truly yours,

Michael L. Meyer

Enclosure

July 16, 1987

Mr. J. Timothy Ritchie

The Northern Trust Company

Fifty South LaSalle Street

Chicago, Illinois 60675

Dear Mr. Ritchie:

This is in reply to your letter concerning allowing participation in the Bank's common trust funds by common trust funds administered by other nonaffiliated banks.

The Bank wishes to make available to the trust departments of other banks and trust companies the ability to invest some portion or all of common funds administered under 12 CFR § 9.18(a)(1) in one or more of the Bank's common trust funds administered under that section. Since it would be necessary for the Bank to be trustee with respect to assets invested in its common funds, the participating common trust fund agreement would permit the trustee of the fund to appoint the Bank as "investment trustee" under an "investment trust agreement." The Bank proposes that the investment trust agreement would permit the trustee of the participating common trust fund to establish investment guidelines regarding the manner in which assets will be invested, although the particular investment program would be determined by the Bank as investment trustee.

It is our opinion that it is the responsibility of a bank as trustee to evaluate the soundness of

management for any type of investment being considered as an asset in a fiduciary account. This includes reviewing the prudence and the appropriateness of a potential asset for a common trust fund. It is this investment analysis and decision-making process that is required by the exclusive management provision of 12 CFR § 9.18(b)(12). At all times, the investment responsibility for a common trust fund and its administration remains with the trustee of the fund and cannot be delegated.

A bank, as trustee of a common trust fund, may make the management decision to acquire units of a common trust fund trusteed by an unrelated institution. This would not be considered an undue delegation of investment responsibility under 12 CFR § 9.18(b)(12). The investing bank will continue to have the responsibility periodically to ascertain that the investment is suitable for the common trust fund and to determine that the investment continues to be of trust quality.

Under the proposed arrangement, the investment trustee would determine the investment program for the participating common trust fund. This we see to be a delegation of investment discretion even if the program is subject to investment guidelines of the trustee of the participating common trust fund. Rather than being an investment trustee the Bank should be appointed a "directed" trustee. As a directed trustee the Bank would be directed to purchase units of a specific common trust fund by the trustee of the participating common trust fund. Also, the trustee of the participating common trust fund would be delegating exclusive management if the directed trust agreement can not be terminated at anytime, in whole or in part, or there are restrictions or conditions imposed on withdrawing from the common trust funds. Such limitations on withdrawals would be perceived by us as restricting the investment management of the participating fund.

As stated above, the investing national bank will continue to have the responsibility periodically to ascertain that the investment is meeting the needs of the common trust fund, and to determine that the investment continues to be of trust quality. These determinations cannot be made unless the directed trustee provides sufficient information as to the investment composition of the common fund in a timely manner. We believe that 12 CFR § 9.18(b)(5)(ii) states the type of information that would be necessary in the usual case to make the determinations. Such information should be provided as frequently as the facts and circumstances warrant, but no less frequently than quarterly. The providing of the relevant information is one of the provisions that could be addressed in the instrument establishing the directed trust fund agreement.

The foregoing favorable opinion will no longer stand if:

1) An investing bank's common trust fund's tax exempt status is jeopardized by its participation; the Bank's common trust fund's tax exempt status is jeopardized; or

2) Either bank's common trust fund would be subject to the Investment Company Act of 1940, or required to be registered under the Securities Act of 1933 because of the arrangement.

In your letter you request our views on a series of matters which are incidental to the arrangement.

The first item concerns paragraph 9.6700 as stated on page E-12 in the Comptroller's Handbook for National Trust Examiners. You wish us to opine that if the terms of the common trust fund agreement authorizes the creation of an "investment trust" as described in your letter, and there is no specific prohibition under local law for such an arrangement, then the limitations imposed by the Comptroller's Handbook would be inapplicable. We do not concur with your recommended finding. Although it is our opinion that the arrangement is in compliance with 12 CFR § 9.18(b)(12), such a finding is not dispositive of the issue of an unauthorized delegation under local fiduciary law. If under local law a trustee would be found to have violated its fiduciary duty by placing the funds it received in trust with another trustee, then the proposed arrangement would be an unauthorized delegation of fiduciary responsibility. Under such situation the delegation issue may be adequately addressed if the governing instrument of each trust account investing in the participating common trust fund specifically authorized the arrangement. In any event, it remains our opinion that the arrangement should be found to be authorized under local law before it is entered into by a corporate trustee. Further, as to this, we would note the lack of a prohibition under local law to the specific arrangement would appear not to address the general issue of an improper delegation.

The next item is a waiver request concerning the limitation of 12 CFR § 9.18(b)(9)(i) and (ii). During telephone discussions of your ruling request you were in agreement that a waiver of 12 CFR § 9.18(b)(9)(i) would not be necessary at this time. It is highly unlikely that any one participating common trust fund would exceed 10 percent of the market value of any one of your common trust funds. A supervisory concern which is especially relevant here is the increased possibility that large concentrations will result in

the imposition of withdrawal restrictions.

We do concur with your recommendation that the 10 percent limitation of 12 CFR § 9.18(b)(9)(ii) be waived. It is our opinion that investment diversification will be met even if a participating common trust fund invests all of its funds in another common trust fund, since that common trust fund is diversified. We reach this result because of the provisions of 12 CFR § 9.18(b)(3) and (6), which establish that participants in a common trust fund have an interest in the investments of the fund, and are not, merely possessors of fund units.

The last item of 12 CFR § 9.18 for which you believe a waiver is appropriate is the prohibition of advertising or publicizing funds described in sub-paragraph (a)(1) found in (b)(5) of the Regulation. You informed us that the advertising or marketing of the arrangement would be primarily in the form of direct mailing. There is also a possibility that the availability of the arrangement would be publicized in publications with an intended audience of corporate fiduciaries. Since banks are considered sophisticated investors, the staff would recommend that the limited marketing of common trust funds in the form of direct mailings or publications intended for the banking industry be authorized under 12 CFR § 9.18(c)(5). However, at this time it is also our opinion that such marketing efforts should not make reference to the performance of funds other than those administered by the Bank.

There is one item that your comprehensive request did not address and that is the matter of compensation. We would expect that as a result of the arrangement the fees charged to a trust participating in the investing common trust fund would not exceed the amount allowable by 12 CFR § 9.18(b)(12). Also, all fees charged directly or indirectly to a participating trust should be disclosed fully in periodic statements issued to parties in interest to the trust.

We trust that this is fully responsive to your letter.

Sincerely,

Dean E. Miller

Deputy Comptroller for Trust and Compliance

SEC No-Action Letter

Northern Trust Corporation II

Publicly Available July 21, 1989

Recap
This letter follows-up on the SEC's decision in the first Northern Trust No-Action Letter. Investing in non-affiliated bank CIFs was deemed not permissible in this case, despite an earlier favorable opinion by the OCC. SEC did not concur with Northern Trust Corporation's position.

Letter to SEC

April 26, 1989

Thomas S. Harman
Chief Counsel
Division of Investment Management
Securities and Exchange Commission
450 Fifth Street, N.W.
Washington, D.C. 20549

Re: Staff Response, Dated March 1, 1989, to No-Action Request of The Northern Trust Company, Dated January 10, 1989 (as supplemented on February 10 and 22, 1989); Your File No. 132-3

Dear Mr. Harman:

On behalf of The Northern Trust Company ("Northern"), we hereby seek reconsideration of the staff's response (the "Response") to Northern's request for no-action regarding the availability of the common trust fund exception.

As is discussed in greater detail below, we believe reconsideration is merited here for three reasons. First, the Response cannot be reconciled with prior staff no-action letters that raise no objection to arrangements substantially identical to Northern's proposal. Second, Northern's proposal does not involve the use of a trust "guise" of the type proscribed by the Federal Reserve Board (the "Board") in the Board pronouncement cited in the Response-- i.e., Northern will not use the trust form in an effort to attract public investors to its common trust funds. As we attempted to make clear in Northern's initial request, the proposal does no more than make available to smaller banks the opportunity to convey to Northern, for contribution by Northern to its specialized common trust funds, moneys such banks have received for bona fide fiduciary purposes. The effect of the staff's denial of Northern's request is to place smaller banks that are not affiliated with larger institutions at a competitive disadvantage and--more importantly--to deny their fiduciary customers the benefit of common trust services afforded to customers of their larger competitors, in spite of the fact that there is no danger of the proposal being used as a vehicle for attracting investment moneys from the public. **[FN1]** Third, the Response assumes--incorrectly--that Northern intends to advertise its proposal to the full extent permitted by the Comptroller of the Currency (the "Comptroller") in its letter to Northern dated July 16, 1987. Northern, however, does not intend to advertise its proposed services in trade publications, and will direct any informational materials it may develop solely to the Originating Banks (as hereinafter defined) in a manner that does not involve any "general advertising or solicitation" (as that term is defined in Regulation D promulgated under the Securities Act of 1933 (the "1933 Act")).

FN1 Smaller banks that are affiliated with larger institutions are, of course, permitted by rule to contribute moneys they have received for bona fide fiduciary purposes directly to common trust funds maintained by their larger affiliates.

As stated in Northern's initial request, Northern, in its capacity as trustee of moneys received by it from common trust funds maintained by unaffiliated banks (individually, an "Originating Bank" and collectively, the "Originating Banks"), wishes to contribute such moneys to one or more of the common trust funds (the "Funds") maintained by Northern. Under Northern's proposal, an Originating Bank would be permitted to establish a trust account at Northern whereby the Originating Bank may direct Northern, as trustee for all or a portion of the assets of the Originating Bank's common trust fund or funds, to contribute such assets to one or more of the Funds maintained by Northern. Prior to permitting an Originating Bank to establish such a trust account at Northern, Northern would obtain specific representations from the Originating Bank that (1) moneys received in trust (or some other fiduciary capacity) by the Originating Bank from its customers and contributed by the Originating Bank to its common trust fund were received by the Originating Bank for bona fide fiduciary purposes, in accordance with long-standing interpretations that a bank common trust fund may not serve as a vehicle for general investment by the public (see, e.g., H.R.Rep. No. 1382, 91st Cong., 2d Sess. 43 (1970); (2) the Originating Bank has complied and will comply with all restrictions on the operation of its common trust funds contained in the Comptroller's Regulation 9, including the restrictions on advertising respecting common trust funds contained in 12 C.F.R. § 9.18(b)(5)(v); and (3) the Originating Bank is not prohibited by local fiduciary law from investing its common trust funds in common trust funds maintained by another bank.

The staff based its rejection of Northern's request for no-action on three premises:

1. "The exception provided by Section 3(c)(3) of the Investment Company Act of 1940 [the "1940 Act"] applies only to a common trust fund for moneys which a bank has received for bona fide fiduciary purposes" (Response at p. 1);

2. "It appears that Northern may be using a trust 'guise' to 'attract moneys seeking investment alone' in its Funds," in contravention of a Federal Reserve Board pronouncement regarding the availability of the common trust fund exception (Response at p. 2); and

3. Northern's perceived intention "to advertise the availability of its proposed services to Originating Banks by direct mailings to such Banks and through advertisements in publications with an intended audience of corporate fiduciaries" falls outside the exception provided by Section 3(c)(3) (Response at p. 2).

We do not believe that the staff's first premise can be reconciled with the position taken in InterFirst Corporation, [82-83 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 77,324 (avail. November 24, 1982) and Dauphin Deposit Bank & Trust Co., [83-84 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 77,547 (avail. October 1, 1983). In those letters--cited in Northern's no-action request but not discussed in the Response-- **[FN2]** the staff concluded that a bank may contribute moneys to its common trust fund notwithstanding that it received such moneys for money management purposes, as long as another bank performs bona fide fiduciary functions with respect to such moneys:

FN2 To our knowledge, the InterFirst and Dauphin letters have not been disaffirmed by the staff.

A bank may not offer to the public standardized trusts which do not require of the bank any fiduciary functions other than those incident to money management with the intent of managing collectively the assets thereof in a fund not registered as an investment company. However, though a bank, as a co-trustee, may have only fiduciary functions incident to money management with respect to the assets of a trust, it may contribute assets of the trust to its common trust fund if the trust requires of the bank's co-trustee fiduciary functions other than, or in addition to, those incident to money management.

Dauphin, supra, at p. 78,766. To be sure, the factual situation in InterFirst and Dauphin is facially different from that in Northern's proposal. In those letters, a bona fide trust customer appointed two banks as co-trustees, one to perform money management services (as well as fiduciary services incident thereto) and the other to perform fiduciary services other than those incident to money management. Nonetheless, the end result of Northern's proposal is identical to that described in the proposals endorsed in InterFirst and Dauphin: one bank, Northern, will provide money management services (as well as fiduciary services incident thereto), **[FN3]** while the Originating Banks will perform the more traditional fiduciary services vis-a-vis their customers. The only difference between Northern's proposal and the proposals endorsed in

InterFirst and Dauphin is that, in Northern's proposal, the customer will appoint the Originating Bank as trustee and the Originating Bank will then effectively appoint Northern as co-trustee, whereas in InterFirst and Dauphin, the customer appointed both the money managing trustee and the fiduciary trustee. In both Northern's proposal and the InterFirst/Dauphin proposals, however, the only moneys that may be commingled in a common trust fund are moneys that were received in the first instance by a bank for bona fide fiduciary purposes. For this reason, Northern's proposal should be accorded the same treatment that was accorded the proposals in InterFirst and Dauphin.

FN3 As noted in its initial request, however, Northern also believes that it will be receiving funds from the Originating Banks for a bona fide fiduciary purpose.

The principal point made in the InterFirst and Dauphin letters is that a determination regarding the availability of the common trust fund exception should not turn on whether one bank alone performs both money management and fiduciary services; rather, what matters is that "the trusts whose assets would be contributed to [Northern's] common trust funds [not be] offered to the public as vehicles for investment in [Northern's] common trust funds." Dauphin at p. 78,766. In the Response, however, the staff appears to have lost sight of this principle, and takes the position that, simply because Northern will receive moneys from the Originating Banks for money management purposes, Section 3(c)(3) will not be available--even though neither Northern nor the Originating Banks will be offering standardized investment trusts to the public, and even though the Originating Banks will in all cases be conveying to Northern moneys such banks received from their customers for bona fide fiduciary purposes. The staff, in other words, appears to have focused on the relationship between Northern and the Originating Banks, when--in keeping with InterFirst and Dauphin--the proper focus should be on the relationship of the Originating Banks with their customers.

The Response is also inconsistent with the position taken by the staff in State Street Bank and Trust Co., [1987 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 78,434 (avail. May 26, 1987) and Frank Russell Trust Company, [1982 Transfer Binder] Fed.Sec.L.Rep. (CCH) ¶ 77,247 (avail. September 2, 1982). In those letters, the staff raised no objection to arrangements under which insurance company separate accounts and bank collective trust funds (in each case consisting solely of the assets of qualified employee plans) invested their assets in the collective trust fund of an unaffiliated bank. The staff apparently concurred with counsel's contention that since the qualified plans could invest directly in the collective trust fund maintained by the unaffiliated bank under Section 3(a)(2) of the 1933 Act and Section 3(c)(11) of the 1940 Act, no objection could be seen to allowing them to invest indirectly in such collective trust fund by way of insurance company separate accounts or other collective trust funds. Similarly, under Northern's proposal, there can be no doubt that if the moneys received by the Originating Banks from their customers for bona fide fiduciary purposes were received instead directly by Northern for such purposes, Northern could legitimately contribute such moneys to its common trust funds. Thus, Northern should be permitted to contribute bona fide fiduciary moneys to its common trust funds in situations where such moneys are received indirectly by way of the Originating Banks.

The staff's second premise appears to be based on a misconstruction of the Federal Reserve Board's pronouncement concerning the proper use of trusts:

"... the trust guise or form should not be used to enable a trust institution to operate a common trust fund as an investment trust attracting money seeking investment alone and to embark upon what would be in effect the sale of participations in a common trust fund to the public as investments."

26 Fed.Reserve Bull. 393-394 (1940) (emphasis added). **[FN4]** The staff--apparently disregarding the language emphasized above--has concluded that "Northern may be using a trust guise to attract moneys seeking investment alone" in its common trust funds. Even if it can be said that Northern proposes to use the trust form to attract moneys from the Originating Banks, such an activity is fully consistent with the Board's pronouncement in the context of Northern's proposal. This is so because the pronouncement, when read in its entirety, makes the same point made in InterFirst and Dauphin: the focus should be on whether a trust arrangement is consistent with bona fide fiduciary purposes, or whether it is merely a sham to cover the sale of participations in common trust funds to the public as investments. In short, what is relevant is whether Northern is seeking to attract investment moneys from the public--something Northern manifestly does not propose to do.

FN4 As the staff itself acknowledges, in 1962, supervision over common trust funds passed from the Federal Reserve Board to the Comptroller of the Currency. As Northern noted in its request for no-action, the Comptroller has found Northern's proposal to be consistent with the description of a permissible common trust fund contained in Regulation 9, which

description is virtually identical to the description contained in Section 3(c)(3).

As noted in Northern's original request and as reiterated above, the only moneys that Originating Banks will be permitted to convey to Northern are moneys those banks receive from their customers for bona fide fiduciary purposes. Consequently, as a factual matter, Northern will not be attempting to reach the investing public. **[FN5]**

FN5 The numerous safeguards described on pages 1-2 of this letter were expressly designed to prohibit such a practice. The staff has not, to date, indicated to us that it considers these safeguards to be ineffective. Northern would, however, be willing to reconsider these (or establish additional) safeguards in light of any concerns the staff may have. In addition, as noted below, while Northern will provide informational materials with respect to its proposed services to the Originating Banks, such materials will not be distributed to the public.

With respect to the staff's third premise, while Northern has received permission from the Comptroller to advertise its proposed services in a manner somewhat broader than Regulation 9 contemplates, Northern does not intend to advertise such services in publications with an intended audience of corporate fiduciaries. In all cases, Northern will direct any informational materials it may develop solely to the Originating Banks in a manner that does not involve any "general advertising or solicitation" (as that term is defined in Regulation D promulgated under the 1933 Act). Northern would explicitly require that these materials not be redistributed by the Originating Banks to their customers or any other parties (except counsel, accountants, etc.). Upon the request of the staff, Northern will submit such materials to the staff for review prior to directing them to the Originating Banks. **[FN6]**

FN6 Under these circumstances, the staff's concerns regarding common trust fund advertising appear to us to be inapposite. The prohibition against common trust fund advertising--like the requirement that only moneys received for bona fide fiduciary purposes may be contributed to a common trust fund--was designed in large part to ensure that trusts will not be offered to the public as a vehicle for investment in common trust funds. Since Northern's informational materials will be directed solely to the Originating Banks for their internal use, there is no danger that such materials will be used to induce the public to invest either in the common trust funds maintained by the Originating Banks or in Northern's Funds.

In conclusion, when the relationship between the Originating Banks and their customers and the proposed relationship between the Originating Banks and Northern is viewed in proper perspective, it is evident that no legitimate regulatory purpose would be served if Northern were required to register its Funds in order to permit the common trust funds of Originating Banks to participate therein.

We hope that we have established sufficient grounds not only for seeking reconsideration of the staff's Response, but for obtaining a resolution of this issue that is favorable to Northern. We would, of course, be pleased to make any additional submission that the staff may deem appropriate. If the staff is unable to concur with the conclusions set forth herein, we would appreciate the opportunity to discuss these matters with the staff prior to the issuance of its response.

We are simultaneously transmitting seven copies of this letter to the Division of Corporation Finance, and we hereby request that that division also reconsider its position in this matter.

If the staff requires additional information or has any questions concerning this letter, the undersigned or Michael L. Meyer of this firm will be available at the staff's convenience.

Very truly yours,

Joseph H. Nesler

SEC Letter

1940 Act / s 3(C)(3)

July 21, 1989

Publicly Available July 21, 1989

In your letter of April 26, 1989, you ask us to reconsider our response **[FN1]** to your request, dated

January 20, 1989 and supplemented on Feb. 10 and 22, 1989, that no enforcement action be recommended to the Commission against Northern Trust Company ("Northern") if Northern receives moneys from common trust funds maintained by unaffiliated banks ("Originating Banks") and contributes such moneys to one or more of Northern's common trust funds ("Funds"), as described in your earlier letters, without registration of such Funds under the Investment Company Act of 1940 ("1940 Act"). After considering your request for reconsideration, we believe that our response to your initial request is correct. While we do not intend to restate here the analysis provided in our previous response, we will address the issues raised in your April 26, 1989 letter.

FN1 See Northern Trust Company (pub. avail. Mar. 1, 1989).

You state that the only difference between Northern's request and the requests of InterFirst Corporation (pub. avail. Nov. 24, 1982) ("InterFirst") and Dauphin Deposit Bank & Trust Co. (pub. avail. Oct. 1, 1983) ("Dauphin") is that, in Northern's proposal, the customer will appoint the Originating Bank as trustee and the Originating Bank will effectively appoint Northern as co- trustee, whereas in InterFirst and Dauphin, the customer appointed both the money managing trustee and the fiduciary trustee. We believe there are other differences which distinguish Northern from InterFirst and Dauphin.

InterFirst involved a bank holding company which owned 100% of the capital stock of 48 subsidiary banks and 56% of the capital stock of another bank subsidiary. Because the 56% owned subsidiary did not qualify as an "affiliate" as defined in section 1504(a) of the Internal Revenue Code, InterFirst could not avail itself of Rule 3c-4 under the 1940 Act. **[FN2]** Northern proposes to establish a multi-bank common trust fund comprised solely of unaffiliated banks whereas InterFirst proposed to establish a multi-bank common trust fund comprised of approximately 50 banks, only one of which did not meet the definition of affiliated under the Internal Revenue Code.

FN2 Rule 3c-4 defines the term "common trust fund" as used in Section 3(c)(3) of the 1940 Act to include a common trust fund which is maintained by a bank which is a member of an affiliated group, as defined in section 1504(a) of the Internal Revenue Code, and which is maintained exclusively for the collective investment and reinvestment of monies contributed thereto by one or more bank members of such affiliated group. See InterFirst Corporation (pub. avail. May 20, 1982).

Dauphin proposed to deposit certain assets for which it was either the trustee or co-trustee under a will, deed, or agreement into its common trust funds. The only eligible participants were charitable and other non-profit trusts and foundations which appointed Dauphin as either the trustee or co-trustee. In the response to Dauphin, the staff noted that Dauphin's common trust funds would be excepted under Section 3(c)(3) if the trust assets contributed to the funds required of Dauphin, as trustee, or of Dauphin's co- trustee, fiduciary functions other than those incident to money management. You argue that, in Northern's proposal, the customer will appoint the Originating Bank as trustee and the Originating Bank will then effectively appoint Northern as co-trustee. First, we do not believe that the staff has ever extended the analysis in Dauphin to permit "effective" appointment of a co-trustee. Second, we do not see how Dauphin's acting as a trustee or co- trustee of certain assets and contributing those assets to its common trust funds requires us, or even leads us, to conclude that Northern acting as an "effective" co-trustee should be permitted to contribute to its Funds assets of unaffiliated bank customers with whom it has no relationship. In any event, we believe the facts in Dauphin to be wholly inapposite to your situation.

You state that our response was inconsistent with the staff response in State Street Bank and Trust Co. (pub. avail. May 26, 1987) and Frank Russell Trust Company (pub. avail. Sept. 2, 1982). We cannot agree. The staff's response in both of those letters did not involve Section 3(c)(3), but rather Section 3(c)(11). These two provisions obviously involve materially different issues.

Lastly, with respect to Northern's proposed advertising of its common trust funds, we continue to believe that your proposal, as modified in your letter of April 26, 1989 **[FN3]** would cause the Funds to fall outside the exception in Section 3(c)(3). You state in footnote 6 of your April 26 letter that "since Northern's informational materials will be directed solely to the Originating Banks for their internal use, there is no danger that such materials will be used to induce the public to invest either in the common trust funds maintained by the Originating Banks or in Northern's Funds." However, we cannot reconcile this statement with a parenthetical in the text of your April 26 letter which states that Northern's advertising materials may be redistributed by an Originating Bank to "counsel, accountants, etc." Further, while you state that Northern will direct any informational materials to Originating Banks in a manner that does not involve any "general advertising or solicitation (as that term is defined in Regulation D under the 1933 Act)," the staff has, to our knowledge, never applied those standards to advertising issues under Section

3(c)(3).

> **FN3** You state that our response of March 1, 1989 incorrectly assumed that Northern would advertise its Funds to the full extent permitted by the Comptroller of the Currency, i.e. in publications with an intended audience of fiduciaries. We fail to see how we could have made any other assumption when your letter of January 10, 1989 stated that Northern would "comply with the restrictions on advertising contained in Regulation 9 [regulations of the Comptroller] in connection with the operation of the Funds," and "Northern has, however, obtained approval from the Comptroller to advertise the availability of its proposed services ... through advertisements in publications with an intended audience of corporate fiduciaries."

The Division of Corporation Finance has asked us to advise you that it continues to hold the views expressed in its letter of March 3, 1989.

17 CFR Section 230.180

Title 17

Chapter II

PART 230

Sec. 230.180 Exemption from registration of interests and participations issued in connection with certain H.R. 10 plans.

(a) Any interest or participation in a single trust fund or in a collective trust fund maintained by a bank, or any security arising out of a contract issued by an insurance company, issued to an employee benefit plan shall be exempt from the provisions of section 5 of the Act if the following terms and conditions are met:

(1) The plan covers employees, some or all of whom are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954, and is either: (i) A pension or profit-sharing plan which meets the requirements for qualification under section 401 of such Code, or (ii) an annuity plan which meets the requirements for the deduction of the employer's contribution under section 404(a)(2) of such Code;

(2) The plan covers only employees of a single employer or employees of interrelated partnerships; and

(3) The issuer of such interest, participation or security shall have reasonable grounds to believe and, after making reasonable inquiry, shall believe immediately prior to any issuance that:

(i) The employer is a law firm, accounting firm, investment banking firm, pension consulting firm or investment advisory firm that is engaged in furnishing services of a type that involve such knowledge and experience in financial and business matters that the employer is able to represent adequately its interests and those of its employees; or

(ii) In connection with the plan, the employer prior to adopting the plan obtains the advice of a person or entity that (A) is not a financial institution providing any funding vehicle for the plan, and is neither an affiliated person as defined in section 2(a)(3) of the Investment Company Act of 1940 of, nor a person who has a material business relationship with, a financial institution providing a funding vehicle for the plan; and (B) is, by virtue of knowledge and experience in financial and business matters, able to represent adequately the interests of the employer and its employees.

(b) Any interest or participation issued to a participant in either a pension or profit-sharing plan which meets the requirements for qualification under section 401 of the Internal Revenue Code of 1954 or an annuity plan which meets the requirements for the deduction of the employer's contribution under section 404(a)(2) of such Code, and which covers employees, some or all of whom are employees within the meaning of section 401(c)(1) of such Code, shall be exempt from the provisions of section 5 of the Act.

Merger Rules for Mutual Funds and CIFs

Recap
SEC Rule 17a-8, cited below, defines the merger requirements for registered mutual funds with other affiliated mutual funds or affiliated non-registered CIFs.

Section 270.17a-8 is revised (July 26, 2002) to read as follows:

§ 270.17a-8 Mergers of affiliated companies.

(a) Exemption of affiliated mergers. A Merger of a registered investment company (or a series thereof) and one or more other registered investment companies (or series thereof) or Eligible Unregistered Funds is exempt from sections 17(a)(1) and (2) of the Act (15 U.S.C. 80a-17(a)(1)-(2)) if:

(1) Surviving company. The Surviving Company is a registered investment company (or a series thereof).

(2) Board determinations. As to any registered investment company (or series thereof) participating in the Merger ("Merging Company"):

(i) The board of directors, including a majority of the directors who are not interested persons of the Merging Company or of any other company or series participating in the Merger, determines that:

(A) Participation in the Merger is in the best interests of the Merging Company; and

(B) The interests of the Merging Company's existing

shareholders will not be diluted as a result of the Merger.

(ii) The directors have requested and evaluated such information as may reasonably be necessary to their determinations in paragraph (a)(2)(i) of this section, and have considered and given appropriate weight to all pertinent factors.

Note to paragraph (a)(2)(i): For a discussion of factors that may be relevant to the determinations in paragraph (a)(2)(i) of this section, see Investment Company Act Release No. 25666, July 18, 2002.

(iii) The directors, in making the determination in paragraph (a)(2)(i)(B) of this section, have approved procedures for the valuation of assets to be conveyed by each Eligible Unregistered Fund participating in the Merger. The approved procedures provide for the preparation of a report by an Independent Evaluator, to be considered in assessing the value of any securities (or other assets) for which market quotations are not readily available, that sets forth the fair value of each such asset as of the date of the Merger.

(iv) The determinations required in paragraph (a)(2)(i) of this section and the bases thereof, including the factors considered by the directors pursuant to paragraph (a)(2)(ii) of this section, are recorded fully in the minute books of the Merging Company.

(3) Shareholder approval. Participation in the Merger is approved by the vote of a majority of the outstanding voting securities (as provided in section 2(a)(42) of the Act (15 U.S.C. 80a-2(a)(42))) of any Merging Company that is not a Surviving Company, unless -

(i) No policy of the Merging Company that under section 13 of the Act (15 U.S.C. 80a-13) could not be changed without a vote of a majority of its outstanding voting securities, is materially different from a policy of the Surviving Company;

(ii) No advisory contract between the Merging Company and any investment adviser thereof is materially different from an advisory contract between the Surviving Company and any investment adviser thereof, except for the identity of the investment companies as a party to the contract;

(iii) Directors of the Merging Company who are not interested persons of the Merging Company and who were elected by its shareholders, will comprise a majority of the directors of the Surviving Company who are not interested persons of the Surviving Company; and

(iv) Any distribution fees (as a percentage of the fund's average net assets) authorized to be paid by the Surviving Company pursuant to a plan adopted in accordance with § 270.12b-1 are no greater than the distribution fees (as a percentage of the fund's average net assets) authorized to be paid by the Merging Company pursuant to such a plan.

(4) Board composition; independent directors.

(i) A majority of the directors are not interested persons of the Merging Company and those directors select and nominate any other disinterested directors.

(ii) Any person who acts as legal counsel for the disinterested directors is an independent legal counsel.

(5) Merger records. Any Surviving Company preserves written records that describe the Merger and its terms for six years after the Merger (and for the first two years in an easily accessible place).

(b) Definitions. For purposes of this section:

(1) Merger means the merger, consolidation, or purchase or sale of substantially all of the

assets between a registered investment company (or a series thereof) and another company;

(2) Eligible Unregistered Fund means:

(i) A collective trust fund, as described in section 3(c)(11) of the Act (15 U.S.C. 80a-3(c)(11));

(ii) A common trust fund or similar fund, as described in section 3(c)(3) of the Act (15 U.S.C. 80a-3(c)(3)); or

(iii) A separate account, as described in section 2(a)(37) of the Act (15 U.S.C. 80a-2(a)(37)), that is neither registered under section 8 of the Act, nor required to be so registered;

(3) IndependentEvaluator means a person who has expertise in the valuation of securities and other financial assets and who is not an interested person, as defined in section 2(a)(19) of the Act (15 U.S.C. 80a-2(a)(19)), of the Eligible Unregistered Fund or any affiliate thereof except the Merging Company; and

(4) Surviving Company means a company in which shareholders of a Merging Company will obtain an interest as a result of a Merger.

Re: Interpretive Issues Regarding New Rules

For Private Investment Companies Under

the Investment Company Act of 1940 (the

"Act")

Gentlemen:

This letter is submitted by the Subcommittee on Private Investment Entities (the "Subcommittee") of the Federal Regulation of Securities Committee (the "Committee"), Section of Business Law (the "Section") of the American Bar Association with respect to the provisions of the National Securities Markets Improvement Act of 1996 (the "1996 Act") relating to private investment companies and the final rules adopted by the Securities and Exchange Commission (the "Commission") to implement such provisions (Rel. No. 1C- 22597) (the "Rules").

We believe that the Rules have on an overall basis been effective and useful. In short, the experience with the Rules has been favorable. There are, however, certain issues which require interpretation or clarification. We have obtained from members of the Subcommittee and others a list of those issues and recommendations as to their resolution. We hope that this may be of assistance to the Staff. We request that the Staff issue interpretive guidance, in question and answer format or otherwise, which deals with these issues and others of which the Staff may be aware. [FN1]

FN1. A draft of this letter has been circulated for comment among members of the Subcommittee and certain other persons. This letter represents the consensus view of the members of the Subcommittee and others who have submitted comments. It does not necessarily reflect the views of all who have reviewed it nor does it reflect the view of the American Bar Association, the Section or the Committee.

A. Knowledgeable Employees

The issues that have arisen under the Rules frequently involve "knowledgeable employees." Rule 3c-5 permits "knowledgeable employees" of a private investment company and certain of its affiliates to acquire securities issued by the fund without being counted as beneficial owners for purposes of Section 3(c)(1) and without satisfying the qualified purchaser definition under Section 3(c)(7). Knowledgeable employees include executive officers, directors, trustees, general partners and advisory board members of the Section 3(c)(1) fund or Section 3(c)(7) fund (a "Covered Company") or an affiliated person of the Covered Company that manages the investment activities of the fund ("Affiliated Management Person") and other employees of the Covered Company or its Affiliated Management Person who, in connection with their regular functions or duties, participate in the investment activities of the fund or other investment companies managed by the fund's Affiliated Management Person, provided that such employee has been performing such functions or duties for the fund or its Affiliated Management Person or substantially similar functions or duties for another person for at least 12 months. Employees performing solely clerical, secretarial or administrative functions with regard to a fund are not deemed knowledgeable employees.

1. Issue: May certain marketing and investor relations professionals, research analysts, brokers and traders, attorneys, financial, compliance, operational and accounting officers of a Covered Company or an Affiliated Management Person who are non-executive employees of the Covered Company or Affiliated Management Person qualify as knowledgeable employees?

It is our understanding that the Staff does not view the requirement that employees "participate in the investment activities" of the fund as limiting the exception to portfolio managers or others who are directly involved, on a regular basis, with a fund's investment decision-making process. As a result of the information other employees may receive in the course of their regular functions or duties, the nature of their responsibilities for the fund and their evaluative abilities, certain other non-executive employees may be close enough to the investment decision-making function to be viewed as participants in that process. As a result, they may possess a sophisticated knowledge and understanding of the investment objectives, risks and operations of one or more funds and related investment companies offered by their employers. We believe, for example, that the definition of knowledgeable employees should be interpreted to include the following persons who meet such criteria: (i) marketing and investor relations professionals who must explain potential and actual portfolio investments of a fund and the investment decision-making process and strategy being followed to clients and prospective investors and who, from time to time, interface among the fund, the portfolio managers and the fund's clients; (ii) research analysts who investigate the potential investments for the fund; (iii) attorneys who, as part of their duties,

provide advice with respect to, or who participate in, the preparation of offering documents, and the negotiation of related agreements and who also are familiar with investment company management issues and respond to questions or give advice concerning ongoing fund investments, operations and compliance matters; (iv) brokers and traders of a broker-dealer related to the Covered Company or the Affiliated Management Person who are Series 7 registered; and (v) financial, compliance, operational and accounting officers of a fund who have management responsibilities for compliance, accounting and auditing functions of funds or their Management Affiliates. [FN2]

FN2. As noted below in the discussion relating to issue number 3, investment management firms are organized in different forms for a variety of business reasons so that employees of entities related to the Covered Company or an Affiliated Management Person (rather than employees of the Covered Company or an Affiliated Management Person) often perform certain of these functions. For example, a marketing professional may be a broker for a brokerage firm under common control with the Affiliated Management Person. We believe employees of related entities under common control should qualify as knowledgeable employees if they meet the functional criteria, regardless of whether they are technically employed by the Covered Company or the Affiliated Management Person.

2. Issue: May an employee who manages a fund that is not defined as an investment company under the Act pursuant to an exception other than Section 3(c)(1) or Section 3(c)(7) be eligible for knowledgeable employee status?

Under Rule 3c-5(a)(1), the term Affiliated Management Person means an affiliated person that manages the investment activities of a Section 3(c)(1) fund, a Section 3(c)(7) fund or an investment company. There does not appear to be any basis for distinguishing among a manager of a private investment company that is not defined as an investment company under Section 3(c)(1) or Section 3(c)(7) of the Act, a manager of a fund that is not defined as an investment company under another provision of the Act (e.g., commingled trusts excepted under Sections 3(c)(3) or 3(c)(11), or foreign or offshore investment companies excepted from registration under Section 6 of the Act) and a manager who manages only separately managed accounts (e.g., not a fund). They may each have the same investment objectives and responsibilities and perform similar functions and should be treated similarly. Non-executive employees (of the type described in our recommendation to issue number 1 above) of a fund not defined as an investment company under a provision of the Act other than Section 3(c)(1) or Section 3(c)(7) or a separately managed account should also be eligible for knowledgeable employee status.

3. Issue: Investment management complexes often establish, for various business reasons, a number of related entities that are involved in investment activities. May the definition of an "Affiliated Management Person" of a Covered Company include each affiliated entity of a Covered Person (regardless of corporate structure) that participates in the investment activities of the investment management company?

The definition of an "Affiliated Management Person" of a Covered Company should include each related entity of a Covered Person that participates in the investment activities of the investment management company. Such an interpretation would provide consistency in the treatment of employees, irrespective of whether the investment management firm chooses to carry on all of its investment advisory businesses through separate operating divisions of a single legal entity or by dividing such business among related entities. Section 209(d)(3) of the 1996 Act seems to contemplate such an interpretation as it refers to "knowledgeable employees of ... an affiliated person ... ", in a manner that may encompass brother-sister entities. Moreover, such an interpretation is completely consistent with the Staff's long-standing practice of not making significant regulatory distinctions depend on whether a single fund complex operates through multiple divisions or multiple controlled entities.

4. Issue: If a knowledgeable employee invests in a Section 3(c)(1) fund or Section 3(c)(7) fund (i) jointly with a spouse and/or other dependents or (ii) through a family company, trust or other similar estate planning vehicle for which the knowledgeable employee is responsible for investment decisions and the source of the funds invested is individual property or property held jointly with the spouse, will such investment be deemed to have

been made by the knowledgeable employee?

Section 2(a)(51)(A)(i) of the Act defines qualified purchaser as "any natural person (including any person who holds a joint, community property or other similar shared ownership interest in an issuer that is excepted under Section 3(c)(7) with that person's qualified purchaser spouse) who owns not less than $5,000,000 in investments." Rule 3c-5 permits knowledgeable employees to invest in a Section 3(c)(7) fund even though they do not meet the definition of qualified purchaser. We believe it would be consistent with the purposes of the Rules to permit a knowledgeable employee to invest in a Section 3(c)(7) fund with his or her spouse through a joint, community property or other similar shared ownership interest or through family-owned or estate planning entities when the knowledgeable employee, alone or with his or her spouse, is the source of the investment funds and the knowledgeable employee, alone or with his or her spouse, directs the investment.

Rule 3c-5 also permits knowledgeable employees to invest in a Section 3(c)(1) fund without being counted for purposes of Section 3(c)(1)'s 100-investor limit. Consistent with the approach described above, we believe that a knowledgeable employee should also be permitted to invest in a Section 3(c)(1) fund with his or her spouse or through family-owned or estate planning entities when the knowledgeable employee, alone or with his or her spouse, is the source of the investment funds and the knowledgeable employee, alone or with his or her spouse, directs the investment without being counted as a beneficial owner. This would also be consistent with the Commission's current view that securities of a Section 3(c)(1) fund jointly owned by both spouses should be considered to be owned by one beneficial owner. (See footnote 69 of Rel. No. IC-22597.)

Rule 3c-5(b)(1) requires that a person be a knowledgeable employee at the time such person acquires securities in the fund. This means, for example, that an investor who (i) acquired securities in a Section 3(c)(1) fund before the effective date of the 1996 Act provisions relating to private investment companies (the "Effective Date") and would have been considered a knowledgeable employee at the time of acquisition (but had been counted as a beneficial owner for purposes of the 100-person limitation because the knowledgeable employee exception did not yet exist) and (ii) was a knowledgeable employee on the Effective Date, should no longer count toward the 100-person limitation of Section 3(c)(1). Additionally, an investor who (iii) acquired securities before the Effective Date and would not have been considered a knowledgeable employee at the time of acquisition and (iv) was not a knowledgeable employee on the Effective Date, would continue to count toward the 100-person limitation. While these situations are straightforward in terms of their application, the following interpretive issues should be resolved.

5. Issue: Does an investor who acquired securities in a Section 3(c)(1) fund before the Effective Date count toward the 100-person limitation if he or she would have been considered a knowledgeable employee at the time of acquisition, but is not one on the Effective Date (due, for example, to termination of employment)?

The investor should no longer count toward the 100-person limitation because he or she was a knowledgeable employee at the time the securities were acquired. As provided in footnote 120 of Rel. No. IC-22597, such investor should not be counted simply because employment with the fund has terminated.

6. Issue: Does an investor who acquired securities in a Section 3(c)(1) fund before the Effective Date count toward the 100-person limitation if he or she would not have been deemed a knowledgeable employee at the time of acquisition but was a knowledgeable employee on the Effective Date?

The investor should not count toward the 100-person limitation because he or she was a knowledgeable employee at the time the Rules went into effect. The purpose of the Rules is to allow sponsors to raise additional capital without sacrificing investor protection, and there is no public interest served by counting an investor who on the Effective Date qualified as a knowledgeable employee.

7. Issue: If an investor who does not qualify as a knowledgeable employee invests in a

Section 3(c)(1) fund, may the fund cease to count such person as a beneficial owner once he or she satisfies the knowledgeable employee test?

At the time the investor qualifies as a knowledgeable employee, either because he or she becomes a general partner, director or executive officer of the Covered Company or because such person has been engaged in the investment activities of the Covered Company or another person for at least 12 months, he or she should no longer count toward the 100-person limitation. At such time, the standard is satisfied and the fund should be entitled to reevaluate such employee's status. This would not have any adverse impact on investor protection and would be consistent with the purpose of the Rules. If the fund were not entitled to reevaluate the employee's status, it could result in the employee-investor withdrawing from the fund and then reinvesting immediately so that such employee's securities are acquired at the time he or she was a knowledgeable employee. This does not seem to make sense and would create unnecessary burdens for the fund and the employees and overly emphasize form over substance.

8. Issue: May a knowledgeable employee invest in a Covered Company through an IRA, trust or other entity for which he or she is responsible for investment decisions and where the source of funds invested in the Covered Company was individual property or property held jointly with the knowledgeable employee's spouse (without being counted toward the fund's 100- person limit or without being a qualified purchaser)?

Under Rule 3c-5, a knowledgeable employee may invest in a private investment company without being counted as a beneficial owner for purposes of Section 3(c)(1) and without satisfying the qualified purchaser definition under Section 3(c)(7). Rule 3c-5 also allows certain transferees of a knowledgeable employee to acquire securities of (i) a Section 3(c)(1) fund without counting as a beneficial owner and (ii) a Section 3(c)(7) fund without the transferee satisfying the qualified purchaser or knowledgeable employee standard. It would be consistent with the purposes of the Rules to permit a knowledgeable employee to invest in such funds directly through an IRA, trust or other entity where he or she is the source of the investment funds and directs the investment. Moreover, because a spouse who is not a qualified purchaser may hold a joint interest in a Section 3(c)(7) fund with such person's qualified purchaser spouse, the knowledgeable employee should, consistent with Section 2(a)(51)(A)(i) of the Act, be able to invest in such funds directly through a trust or other entity that is jointly owned with such knowledgeable employee's spouse and/or other dependents.

B. Individual Retirement Accounts

1. Issue: If an existing Section 3(c)(1) fund elects to convert to a Section 3(c)(7) fund pursuant to Section 3(c)(7)(B) of the Act, may a grandfathered investor, who is not otherwise a qualified purchaser, and whose interest in a 3(c)(7) fund is, and was, prior to conversion, held in such investor's individual name, make additional investments in the fund (following its conversion to a 3(c)(7) fund) through his or her IRA or the self-directed account of a retirement plan?

A grandfathered investor is permitted to make additional investments in the grandfathered fund. (See footnote 82 of Rel. No. IC-22597.) So long as the IRA beneficiary and the grandfathered investor are the same, allowing the investor to make additional investments through such investor's IRA or the self-directed account of a retirement plan would be consistent with footnote 82 of the Release.

2. Issue: For purposes of determining whether or not an IRA or the self- directed account of a retirement plan is a qualified purchaser, may one look through the IRA or account to its creator?

If the IRA or account beneficiary is a qualified purchaser who, alone or with others, determines how the money will be invested, then the IRA or account should also be deemed a qualified purchaser.

C. Trusts

Under the definition of qualified purchaser in Section 2(a)(51)(A) of the Act, trusts may qualify under either clause (ii), (iii) or (iv). Each clause focuses on a different standard: clause (ii) focuses on the value of the trust's investments and its ownership; clause (iii) looks to the qualification of the settlor and each trustee of the trust; and clause (iv) focuses only on the value of the trust's investments. These differing standards raise a number of interpretive issues.

1. Issue: Under Section 2(a)(51)(A)(iii), at what time is the status of each settlor and trustee determined -- at the time of a particular investment or at the formation of the trust?

What is the effect on qualification if the settlor is deceased?

Section 3(c)(7)(A) of the Act excepts any issuer whose outstanding securities are owned exclusively by persons who "at the time of acquisition of such securities" are qualified purchasers. The relevant time, therefore, to test the status of each settlor and trustee of the trust should be at the time of a particular investment. The Staff should clarify that if, at the time of an investment, a settlor is deceased, then such settlor will not be considered for purposes of determining

whether the trust is a qualified purchaser. Instead, if the trustee authorized to make decisions with respect to the trust is a qualified purchaser, then the trust should be a qualified purchaser. If the Staff believes it is appropriate, it would be consistent with the statutory scheme to require that such a trust own not less than $5 million in investments in order to be a qualified purchaser.

2. Issue: Section 2(a)(51)(A)(iii) of the Act provides that a qualified purchaser includes any trust not covered by Section 2(a)(51)(A)(ii) of the Act and that was not formed for the specific purpose of acquiring the securities offered as to which "the trustee or other person authorized to make decisions with respect to the trust and each settlor or other person who has contributed assets to the trust" is a qualified purchaser. Is it sufficient if only the trustee actually making the investment decision to acquire the securities at issue is a qualified purchaser?

Under some trust agreements, there are trustees appointed with different authority (for example, a trustee may be appointed to have only administrative authority). It should not be necessary for a trustee who did not participate in a particular investment decision (and whose consent was not needed to make such investment) to be a qualified purchaser in order to qualify the trust.

3. Issue: If a trust that is not covered by Section 2(a)(51)(A)(ii) of the Act has less than $5,000,000 in investments and not all of the trustees authorized to make investment decisions or settlors of the trust are qualified purchasers, may the trust still be deemed a qualified purchaser if all of the trust's beneficiaries are qualified purchasers? Should the use of a trust format, as opposed to a family company format (where a look-through would clearly be permissible), dictate whether a look-through to the beneficiaries is possible?

Under Rule 2a51-3(b), a company may be deemed a qualified purchaser if each beneficial owner of its securities is a qualified purchaser. As Section 2(a)(8) of the Act defines "company" to include a trust, we believe this same look- through should be permitted to the beneficiaries of a trust.

4. Issue: Under Section 2(a)(51)(A)(ii) of the Act, a qualified purchaser includes any company that owns not less than $5 million in investments and is owned by two or more related persons. For a trust to be a qualified purchaser under this definition, it must therefore be owned by two or more related persons. Who is considered to "own" a trust?

If the beneficiaries of the trust were two or more of the related persons described in Section 2(a)(51)(A)(ii), and the trust owns not less than $5 million in investments, the trust should be deemed a qualified purchaser under that provision.

5. Issue: May a grandfathered investor, who is not otherwise a qualified purchaser (i) transfer his or her investment in the converted Section 3(c)(7) fund to an IRA, trust or other entity and (ii) make additional investments in the converted Section 3(c)(7) fund through the IRA, trust or other entity?

If the grandfathered investor is the settlor of the trust and the trustee who makes the particular investment decision, or the one who is the source of the investment funds and who, alone or with others, directs the investments, then such transfer and additional investments should be permitted.

D. Formed for the Specific Purpose

Under the 1996 Act, in order for a trust to be a qualified purchaser, it must not have been formed "for the specific purpose of acquiring the securities offered." Rule 2a51-3(a) applies this condition to all entities

that propose to become qualified purchasers unless each beneficial owner of an entity's securities is a qualified purchaser. This requirement limits the possibility that non-qualified investors could pool their investments in an entity that satisfied the qualified purchaser test. (See Rel. No. IC-22597 at 47.)

1. Issue: When is an entity deemed to be formed for the specific purpose of acquiring securities in a Section 3(c)(7) fund?

In the context of Section 3(c)(1), the Staff has indicated that if an entity is formed for the specific purpose of acquiring securities in a particular fund, the owners of that entity may be counted in determining the number of beneficial owners of that fund. In a series of no-action letters, the Staff conditioned relief to certain funds from such result on the representation, among other things, that the investing entity would not invest more than 40% of its committed capital in that particular Section 3(c)(1) fund. [FN3] In a 1996 no-action letter, the Staff noted that, because the 40% test is not a statutory requirement, it is not determinative of when the owners of an investing entity would need to be counted. [FN4] Rather, the determination that an entity is formed for the specific purpose under Section 3(c)(1) will depend upon an analysis of all of the surrounding facts and circumstances. It would be helpful if the Staff clarifies its position on "formed for the specific purpose" in the context of Section 3(c)(7) funds. Will the Staff's position, as stated in Cornish & Carey, apply?

FN3. See Risk Arbitrage Partners (1986), CMS Communications Fund L.P. (1987), Tyler Capital Fund, L.P./South Market Capital (1989), Handy Place Investment Partnership (1989) and Six Pack (1989).

FN4. See Cornish & Carey Commercial, Inc. (1996).

E. Involuntary Transfers

Under Rule 3c-6, beneficial ownership by any person who acquires securities of a Section 3(c)(1) fund from a person pursuant to an involuntary transfer (a gift, bequest or agreement relating to a legal separation or divorce) is deemed to be beneficial ownership by the person from whom such transfer was made. Securities of a Section 3(c)(7) fund that are owned by a person who received the securities from a qualified purchaser pursuant to an involuntary transfer are deemed to be owned by a qualified purchaser. In either type of fund, beneficial ownership by any person who acquires securities from a knowledgeable employee pursuant to an involuntary transfer is deemed to be beneficial ownership by a knowledgeable employee. Subsequent transfers by transferees that are in the form of a gift or bequest are also permitted without affecting the Section 3(c)(1) or Section 3(c)(7) exception.

1. Issue: Does the rule on involuntary transfers also include distributions from testamentary or inter vivos trusts or other entities?

So long as the decision to make the distribution is not made by the distributee, such distribution should be deemed an involuntary transfer permitted by Rule 3c-6.

2. Issue: May securities of a Section 3(c)(7) fund be transferred to a person by gift if the fund requires additional contributions of capital in the future and either (i) the transferor agrees to pay the additional contributions as they become due or are called by the fund and the fund agrees not to enforce the obligation to pay the additional contributions against the transferee or (ii) simultaneously with the gift, the transferor provides sufficient assets to the transferee to enable it to satisfy the additional contributions?

Investment funds frequently require their beneficial owners to make additional contributions of capital, either at specified intervals or as determined by the fund's general partner. We do not believe that the Staff intended that Rule 3c-6 be used to shift economic obligations to transferees who might not themselves be deemed qualified purchasers. If, however, a qualified purchaser makes a gift and agrees to pay additional contributions required by the fund (and the fund agrees to look solely to the transferor for payment), there would appear to be no policy reasons to disqualify such a transfer from the benefits of Rule 3c-6. The same result should follow if the qualified purchaser transferor provides sufficient assets to the transferee to satisfy the additional contributions.

3. Issue: May a company established by a qualified purchaser exclusively for the benefit of (or owned exclusively by) the qualified purchaser and his or her estate or donees receive securities of a Section 3(c)(7) fund by gift if the fund requires additional contributions of

capital in the future and the contributions are paid out of assets previously held by the company so long as such assets derived exclusively from the qualified purchaser?

Under Rule 3c-6(b)(3), a company established by a qualified purchaser exclusively for the benefit of (or owned exclusively by) the qualified purchaser and his or her estate or donees may receive securities of a Section 3(c)(7) fund and be deemed a qualified purchaser even if the company does not otherwise satisfy the definition of qualified purchaser set forth in Sections 2(a)(51)(A)(ii) through (iv) of the Act. If the fund in which the company receives securities requires additional contributions of capital in the future, then so long as the assets that will be used to satisfy such contributions have been previously provided by the qualified purchaser transferor, there is no policy reason why such transfer of securities should not be permitted under Rule 3c-6.

4. Issue: Should an interest owned by a company in a Section 3(c)(7) fund that is received by the holders of the company, either as a distribution or in dissolution of the company, be considered the equivalent of a gift to such holders so long as the company was not specifically formed for the purpose of making the investment in question?

If the company was a qualified purchaser when it made the investment in the Section 3(c)(7) fund and was not formed for the specific purpose of making that particular investment, the company should be able to distribute its interest in the fund to the holders of interests in the company either from time to time or upon dissolution of the company without the holders being required to be qualified purchasers. Such a distribution should be deemed an involuntary transfer permitted by Rule 3c-6.

F. Effect of Section 3(c)(7) Funds on Rule 144A Securities and DTC Procedures

Rule 2a51-1(g)(1) provides that, with two exceptions, if a person seeking to purchase a security of a Section 3(c)(7) fund is, or is reasonably believed to be by a Relying Person (a Section 3(c)(7) fund or a person acting on its behalf), a qualified institutional buyer ("QIB"), as defined under Rule 144A promulgated under the Securities Act of 1933, then such person will be deemed to be a qualified purchaser. Reasonable belief may be established by inquiry directed to a prospective investor or a subsequent transferee before such person acquires securities of the fund. In the Rule 144A trading market, however, it is not a Relying Person who makes the determination that a buyer of securities is a QIB; it is the seller of the securities. Therefore, in order to give effect to Rule 2a51-1(g)(1), it is necessary to establish a different mechanism than the reasonable belief of a Relying Person. We believe that, by analogy to the Rule 144A market, a mechanism that would allow a qualified purchaser that is a QIB to have a reasonable belief that a person to whom it wishes to transfer securities of a Section 3(c)(7) fund is a QIB (subject to the two exceptions included in the Rule), should be sufficient.

Such a mechanism could be established by reference to lists maintained by dealers who, in the case of Rule 144A securities, know that the buyer of the security must be a QIB because the CUSIP number has an "R". Dealers police themselves; they maintain a list of their customers which they believe are QIBs. This list would have to be slightly modified in the case of Section 3(c)(7) to take into account the different standards for dealers and trusts. The Commission has blessed these procedures as being in compliance with Rule 144A even though it is possible that such Rule 144A securities could potentially be held by non-QIBs. If these procedures are followed for qualified purchaser funds, the securities could be accepted into the DTC clearance system, thereby enhancing liquidity.

1. Issue: Would the Commission agree that a modified CUSIP number would be sufficient to comply with Section 3(c)(7) as in the case of Rule 144A?

If the CUSIP number in the case of Section 3(c)(7) securities contained a "QP" designation, a parallel procedure could be implemented. If the Commission orally concurs with the establishment of such a procedure, the relevant personnel in charge of the CUSIP system would need to be consulted to determine if such a change could be easily implemented, and who needs to request such a systems change. As an alternative, DTC acceptance of securities issued by Section 3(c)(7) funds might be confined to securities that were required to be traded in very large blocks, thus assuring the large size of the holders.

The foregoing issue is of increasing importance given the nature of the QIB market. A related issue is whether the Section 3(c)(7) fund may rely upon deemed representations

and warranties of transferees as to qualified purchaser status. This issue arises both in domestic and offshore transactions (where there are issuances outside and into the United States in foreign securities). Customarily there is no certification from the transferee, but the offering materials specify that there will be reliance on the deemed representations and warranties of transferees. The offering materials specify that only QIBs may acquire the securities either initially or on resale. There is generally a provision requiring immediate divestiture by any holder that is an ineligible purchaser. We recommend that, for purposes of determining qualified purchaser status, a Relying Person may establish reasonable belief for purposes of Rule 2a51-1(h) by the use of this mechanism inasmuch as the QIB market is limited to institutional buyers, most of whom would easily meet the $25 million in investments requirement under Section 2(a)(51)(A)(iv) and virtually all of whom can be identified from eligibility lists. It is doubtful that there are many institutions that are QIBs that are not also qualified purchasers. Given the nature of the institutional QIB market and the inclusion of procedures mandating divestiture by QIBs that are not qualified purchasers, we believe it would be appropriate for the Commission to clarify that the use of these or similar procedures would permit a Relying Person to meet the requirements of Rule 2a51-1(h), thereby promoting liquidity in the institutional QIB capital markets.

G. Timing of Qualified Purchaser Determination

Section 3(c)(7)(A) of the Act provides that the outstanding securities of a Section 3(c)(7) fund must be owned "exclusively by persons who, at the time of acquisition of such securities, are qualified purchasers." In Rel. No. IC-22597, the Commission stated that it believes this provision requires a new determination as to whether a person is a qualified purchaser each time the person acquires securities of a Section 3(c)(7) fund. The status of an investor as a qualified purchaser, however, does not need to be reaffirmed each time the investor makes additional capital contributions to a fund pursuant to a binding commitment that was made when the investor was determined to be a qualified purchaser.

1. Issue: Does the fund need to make a new determination of qualified purchaser status for an investor each time the investor elects to reinvest his or her earnings of the fund?

It should not be necessary to reaffirm qualified purchaser status when an investor reinvests earnings of the fund. Funds offer investors varying rights, including automatic reinvestment absent an annual earnings withdrawal decision. There is a distinction between reinvesting (or not withdrawing) earnings and making a new investment decision by contributing additional capital to a fund.

Such a finding would be consistent with Weiss, Global Ltd. Partnership (Nov. 1, 1990). In that letter, the Staff provided that, for purposes of the second 10% test under the prior language of Section 3(c)(1)(A), the crediting of partnership earnings to capital accounts should not be treated as an acquisition of securities. The letter stated that a new acquisition of securities should only be triggered by purchases of securities with "new money" (as distinguished from earnings generated by the issuer). While the Weiss, Global letter dealt with the language of Section 3(c)(1) that has been eliminated in the 1996 Act, we believe that its reasoning should also be applicable to the first (and now only) 10% test of Section 3(c)(1) and also to Section 3(c)(7).

H. Short-Term Paper/Section 3(c)(7)

1. Issue: May holders of short-term paper issued by a Section 3(c)(7) fund be excluded from having to meet the qualified purchaser standard in order to invest in that fund?

For purposes of identifying the number of beneficial holders of a Section 3(c)(1) fund, holders of short-term paper issued by the fund are expressly excluded, presumably because their interests in the fund are sufficiently risk- differentiated from equity or long-term debt holders that they should be viewed more as ordinary creditors than as investors in the fund. The same exclusion should apply when identifying the class of investors that must be qualified purchasers for purposes of Section 3(c)(7).

I. Jointly-Held Investments

In footnote 69 of Rel. No. IC-22597, the Commission departed from an earlier Staff position and, consistent with Rule 2a51-1(g)(2), stated that, for purposes of determining the number of beneficial owners of a Section 3(c)(1) fund, securities of a fund jointly owned by two spouses should be considered

to be owned by one beneficial owner. Previously, husbands and wives were counted as two beneficial owners.

1. Issue: If a husband and wife are separate limited partners in a Section 3(c)(1) fund, should they be counted as one or two beneficial owners?

If the limited partner interests are separately owned, then the husband and wife should be counted separately. If, however, the interest held by each spouse is jointly-owned property, then interests of the spouses should be considered to be owned by one beneficial owner.

2. Issue: If a husband and wife jointly own an entity (such as a limited partnership, a limited liability company or a trust) that invests in a Section 3(c)(1) fund, should that entity be counted as one beneficial owner even if the entity would be subject to a "look through" because it owned more than 10% of the voting securities of the Section 3(c)(1) fund or was formed for the purpose of investing in the particular Section 3(c)(1) fund?

So long as the interests in the entity are jointly owned, then the entity should count as one beneficial owner. This would be consistent with footnote 69 of Rel. No. IC-22597 and should apply regardless of whether the entity itself would be subject to a look-through.

J. Conversion to a Section 3(c)(7) Fund

1. Issue: If a Section 3(c)(1) fund that is a limited partnership converts its status to a fund that relies on the exclusion provided by Section 3(c)(7) and that fund subsequently converts from a limited partnership into a limited liability company (with appropriate limited partner consent as required under state law and the fund's limited partnership agreement), will the fund be allowed to continue to include persons who acquired interests in the limited partnership on or before September 1, 1996, even if such persons are not qualified purchasers?

We believe that such a fund should be allowed to continue to rely on Section 3(c)(7) even though it has changed its form from a limited partnership to a limited liability company; provided that the fund continues its business as previously conducted. Although this may be considered a technical change in the issuer, it is clearly a change of form and not of substance. The Commission has consistently treated the new legislation relating to Sections 3(c)(1) and 3(c)(7) with an approach that does not elevate form over substance.

If a fund that maintains its organization as a limited partnership is able to continue to rely on Section 3(c)(7), we do not believe that any policy is furthered by not allowing that fund to rely on Section 3(c)(7) simply because it changes its form from a limited partnership to a limited liability company. Because the business of the fund will continue as previously conducted, the members who invested in the fund prior to September 1, 1996, are not afforded any additional protection by prohibiting reliance on Section 3(c)(7); state law and the limited partnership agreement govern the appropriate consent of the limited partners to such a transaction.

Limited liability companies are becoming more popular as vehicles for private investment companies. Furthermore, the policy of the Federal Reserve Board with respect to private investment funds affiliated with bank holding companies favors the limited liability company format over the limited partnership format. Many private investment companies that have converted or expect to convert to Section 3(c)(7) status also need to convert to limited liability company status because of this Federal Reserve Board policy. [FN5] If the Commission does not agree with the analysis above, private investment companies affiliated with bank holding companies may be unfairly and inadvertently penalized.

FN5. Many of those funds are managed by firms that were recently acquired by bank holding companies.

We appreciate the opportunity to identify interpretive issues and make recommendations concerning the new Rules. Members of the Subcommittee are available to meet with the Staff of the Commission to review the interpretive issues and recommendations set forth herein.

Respectfully submitted,

Robert Todd Lang

Our Ref. No. 97-666

American Bar Association

Section of Business Law

File No. 132-3

Your letter of December 3, 1997 requests our views regarding a number of issues under Sections 3(c)(1), 3(c)(7) and 2(a)(51)(A) of the Investment Company Act of 1940 ("Investment Company Act"), and Rules 2a51-1, 2a51-3, 3c-5 and 3c-6 under that Act. Specifically, you ask that we respond to the questions set forth below. [FN1]

FN1. You have not asked, and this letter does not address, issues that your questions may raise under the other federal securities laws.

Background

The National Securities Markets Improvement Act of 1996 (the "1996 Act")

Your questions are prompted by the passage of the 1996 Act, which, among other things, contained a number of provisions that relate to the treatment of certain privately offered investment pools that are excluded from the definition of investment company under the Investment Company Act ("private investment companies"). First, the 1996 Act added Section 3(c)(7) to the Investment Company Act to exclude from the definition of investment company any issuer whose outstanding securities are owned by persons who, at the time of acquisition of the securities, are qualified purchasers, and which is not making and does not at that time propose to make a public offering of its securities ("Section 3(c)(7) Fund"). The exclusion provided by Section 3(c)(7) reflects Congress's recognition that financially sophisticated investors are in a position to appreciate the risks associated with certain investment pools and do not need the protections of the Investment Company Act. [FN2]

FN2. S. Rep. No. 293, 104th Cong., 2d Sess. 10 (1996) ("Senate Report") ("Generally, these investors can evaluate on their own behalf matters such as the level of a fund's management fees, governance provisions, transactions with affiliates, investment risk, leverage and redemption rights").

The 1996 Act added Section 2(a)(51) to the Investment Company Act to define the term "qualified purchaser" for purposes of Section 3(c)(7). That section generally defines a qualified purchaser to be: (i)

any natural person (including any person who holds a joint, community property, or other similar shared ownership interest in a Section 3(c)(7) Fund with that person's qualified purchaser spouse) who owns not less than $5 million in investments; (ii) any family-owned company [FN3] that owns not less than $5 million in investments; (iii) any trust that is not covered by clause (ii) and was not formed for the specific purpose of acquiring the securities, the trustee and settlor of which are qualified purchasers; and (iv) any person, acting for its own account or the accounts of other qualified purchasers, that owns and invests on a discretionary basis not less than $25 million in investments.

FN3. A family-owned company for purposes of this section is a company "that is owned directly or indirectly by or for 2 or more natural persons who are related as siblings or spouse (including former spouses), or direct lineal descendants by birth or adoption, spouses of such persons, the estates of such persons, or foundations, charitable organizations, or trusts established by or for the benefit of such persons."

The 1996 Act also amended Section 3(c)(1) of the Investment Company Act, which excludes from the definition of investment company any issuer whose outstanding securities (other than short-term paper) are owned by not more than 100 beneficial owners and which is not making and does not propose to make a public offering of its securities ("Section 3(c)(1) Fund"). The 1996 Act simplified the way in which the number of beneficial owners in a Section 3(c)(1) Fund is calculated for purposes of the 100-owner limit by no longer requiring the Fund to "look-through" certain companies (e.g., corporations, partnerships and other investors that are not natural persons) that hold its voting securities and count that company's security holders as beneficial owners of the Fund's securities. As amended, Section 3(c)(1) treats beneficial ownership by a company for purposes of the 100-owner limit as beneficial ownership by one person unless the company (i) owns 10 percent or more of the Section 3(c)(1) Fund's voting securities and (ii) is or, but for the exclusion provided by Section 3(c)(1) or Section 3(c)(7), would be an investment company (the "Look-Through Provision").

Finally, Section 3(c)(7) includes a provision that permits an existing Section 3(c)(1) Fund to convert into a Section 3(c)(7) Fund ("Grandfathered Fund"). Under this provision ("Grandfather Provision"), the outstanding securities of a Grandfathered Fund may be beneficially owned by as many as 100 persons that are not qualified purchasers ("grandfathered investors"), provided that these persons acquired the securities of the Grandfathered Fund on or before September 1, 1996, and certain other requirements, designed to protect the Section 3(c)(1) Fund's existing beneficial owners, are satisfied. [FN4]

FN4. Specifically, the Grandfather Provision requires the Grandfathered Fund, prior to conversion, to provide each beneficial owner of its securities with notice of the Fund's intention to become a Section 3(c)(7) Fund and a reasonable opportunity to redeem the owner's interest in the Fund.

With respect to the treatment of private investment companies, the 1996 Act also contained provisions (i) requiring an existing Section 3(c)(1) Fund that wishes to become a qualified purchaser to obtain the consent of certain beneficial owners of its securities and certain other persons; (ii) imposing the investment restrictions of Sections 12(d)(1)(A)(i) and (B)(i) of the Investment Company Act on all Section 3(c)(1) Funds and Section 3(c)(7) Funds, but only in connection with transactions involving securities issued by registered investment companies; and (iii) prohibiting a Section 3(c)(1) Fund from being integrated with a Section 3(c)(7) Fund for purposes of determining whether either Fund meets its exemption. Your letter does not request our views with respect to these provisions.

Commission Rulemaking

In April 1997, the Commission adopted several rules under the Investment Company Act to implement the provisions of the 1996 Act that relate to private investment companies. [FN5] Rule 2a51-1 defines the term "investments" for purposes of Section 2(a)(51) and clarifies how the value of a qualified purchaser's investments should be calculated. Rule 2a51-2 defines the term "beneficial owner" for purposes of the Grandfather Provision. [FN6] Rule 2a51-3 provides that (i) a company may not be deemed to be a qualified purchaser under Sections 2(a)(51)(A)(ii) and (iv) if it was formed for the specific purpose of acquiring the securities issued by a Section 3(c)(7) Fund unless each beneficial owner of the company's securities is a qualified purchaser, and (ii) a company may be deemed to be a qualified purchaser if each beneficial owner of the company's securities is a qualified purchaser.

FN5. Privately Offered Investment Companies, Investment Company Act Release No. 22597 (Apr. 3, 1997), 62 FR 17512 (Apr. 9, 1997) ("Adopting Release").

FN6. Similarly, the Commission adopted Rule 3c-1 to define the term "beneficial ownership" with respect to certain Section 3(c)(1) Funds, effectively permitting such Funds to rely on the pre-1996 provisions of Section 3(c)(1) rather than restructure their existing relationships with investors. None of your questions, however, relates to either Rule 3c-1 or Rule 2a51-2.

As directed by the 1996 Act, the Commission adopted two other rules that relate to private investment companies. Rule 3c-5 generally permits knowledgeable employees of a Section 3(c)(1) Fund, and a company owned exclusively by such knowledgeable employees, to acquire securities issued by the Fund without being counted as beneficial owners of the Fund for purposes of the Section 3(c)(1) 100-owner limit. The rule also permits knowledgeable employees of a Section 3(c)(7) Fund, and a company owned exclusively by such knowledgeable employees, to acquire securities issued by that Fund without being qualified purchasers. Rule 3c-5 was promulgated pursuant to Congress's directive that the Commission prescribe rules permitting knowledgeable employees of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund to own securities issued by the Fund without the Fund losing its exclusion under Sections 3(c)(1) or 3(c)(7). [FN7]

FN7. Section 209(d)(3) of the 1996 Act.

Rule 3c-6 generally addresses transfers of securities issued by private investment companies for estate planning purposes and in certain other circumstances. The rule provides that beneficial ownership by a person who acquired securities ("Transferee") issued by a Section 3(c)(1) Fund from a person other than the Section 3(c)(1) Fund will be deemed to be beneficial ownership by the person from whom the transfer was made ("Transferor"), provided that the Transferee is the estate of the Transferor, a Donee (as that term is defined in the rule), [FN8] or a company established by the Transferor exclusively for the benefit of (or owned exclusively by) the Transferor and/or a Donee or the estate of the Transferor. The rule also provides that the securities issued by a Section 3(c)(7) Fund that are owned by a Transferee who received them from a qualified purchaser other than the Section 3(c)(7) Fund, or a person deemed to be a qualified purchaser under this rule (also "Transferor"), will be deemed to be acquired by a qualified purchaser, regardless of whether the Transferee is a qualified purchaser, provided that the Transferee is the estate of the Transferor, a Donee, or a company established by the Transferor exclusively for the benefit of (or owned exclusively by) the Transferor and/or a Donee or the estate of the Transferor. Rule 3c-6 was issued under Sections 3(c)(1)(B) and 3(c)(7)(A), both of which provide the Commission with rulemaking authority with respect to the transfer of securities issued by a Section 3(c)(1) Fund or a Section 3(c)(7) Fund when the transfer is the result of a "legal separation, divorce, death or other involuntary event." [FN9]

FN8. See infra note 48.

FN9. Section 209(d)(1) of the 1996 Act directed the Commission to prescribe rules to implement the requirements of Section 3(c)(1)(B) no later than 1 year after the date of enactment of the 1996 Act. Although Section 3(c)(1)(B) was enacted in 1980, the Commission had not promulgated any rules implementing this section until it adopted Rule 3c-6. See also infra, text accompanying notes 56-58.

Questions and Answers [FN10]

FN10. The following questions are answered in the order in which they are asked.

A. Rule 3c-5: Knowledgeable Employees

Question 1: May certain marketing and investor relations professionals, research analysts, brokers and traders, attorneys, financial, compliance, operational and accounting officers of a Section 3(c)(1) Fund, a Section 3(c)(7) Fund or an Affiliated Management Person, who are non-executive employees of the Section 3(c)(1) Fund, the Section 3(c)(7) Fund, or Affiliated Management Person, qualify as knowledgeable employees?

Answer: Rule 3c-5 generally defines a "knowledgeable employee" of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund to include certain executives of the Fund or an Affiliated Management Person of the Fund, [FN11] and non-executive employees of the Fund or an Affiliated Management Person of the Fund (other than clerical, secretarial or administrative employees) who, in connection with their regular functions or duties, participate in the investment activities of the Fund, any other Section 3(c)(1) Fund or Section 3(c)(7) Fund, or investment company the investment activities of which are managed by the Affiliated Management Person, [FN12] provided that the employees have been performing these functions and duties for, or on behalf of, the Fund or the Affiliated

Management Person, or substantially similar functions or duties for, or on behalf of, another company for at least 12 months.

FN11. These persons include any executive officer, director, trustee, general partner, advisory board member, or person serving in a similar capacity, of the Section 3(c)(1), the Section 3(c)(7) Fund or an Affiliated Management Person of the Fund. See Rule 3c-5(a)(4)(i).

FN12. Rule 3c-5(a)(1) defines "Affiliated Management Person" as an affiliated person of the Fund, as defined in Section 2(a)(3) of the Investment Company Act, that manages the investment activities of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund. Section 2(a)(3) defines the term "affiliated person" to include "any person directly or indirectly controlling, controlled by, or under common control with" another person, and any investment adviser to an investment company. For purposes of determining whether a person is an Affiliated Management Person, Rule 3c-5(a)(1) provides that the term "investment company" in Section 2(a)(3) includes a Section 3(c)(1) Fund or a Section 3(c)(7) Fund. Thus, an investment adviser to a Section 3(c)(1) Fund or a Section 3(c)(7) Fund would be considered to be an affiliated person of the Fund for purposes of determining whether the adviser was an Affiliated Management Person of the Fund. See PPM America Special Investments CBO II, L.P. (pub. avail. Apr. 16, 1998) ("PPM Letter"). See also Adopting Release, supra note 5, at n.122 and accompanying text (Commission refers to the Affiliated Management Person as "an affiliated person of the fund that oversees the fund's investments.").

You argue that certain other non-executive employees may be close enough to the investment decision-making function to be viewed as participants in that process as a result of their evaluative abilities, the nature of their responsibilities, and the information that these employees may receive in the course of their regular functions or duties. You describe these employees as follows:

(i) marketing and investor relations professionals who must explain potential and actual portfolio investments of a fund and the investment decision-making process and strategy being followed to clients and prospective investors and who, from time to time, interface among the fund, the portfolio managers and the fund's clients; (ii) research analysts who investigate the potential investments for the fund; (iii) attorneys who, as part of their duties, provide advice with respect to, or who participate in, the preparation of offering documents, and the negotiation of related agreements and who also are familiar with investment company management issues and respond to questions or give advice concerning ongoing fund investments, operations and compliance matters; (iv) brokers and traders of a broker-dealer related to the [Section 3(c)(1) Fund/Section 3(c)(7) Fund] or the Affiliated Management Person who are Series 7 registered; and (v) financial, compliance, operational and accounting officers of a fund who have management responsibilities for compliance, accounting and auditing functions of funds or their Management Affiliates.

Rule 3c-5 is intended to cover non-executive employees only if they actively participate in the investment activities of the Fund, any other Section 3(c)(1) Fund or Section 3(c)(7) Fund, or any investment company the investment activities of which are managed by the Fund's Affiliated Management Person. The rule thus is clearly intended to encompass persons who actively participate in the management of a Fund's investments. [FN13] The rule is not intended to include employees who merely obtain information regarding the investment activities of these Funds. The Commission initially proposed that the definition of knowledgeable employee include persons who, in connection with their regular functions or duties, obtain information regarding the investment activities of the Fund or investment companies managed by the Affiliated Management Person, but did not include such persons in the final rule because of a concern that these persons may not have any investment experience. [FN14]

FN13. Adopting Release, supra note 5, at text following n.127.

FN14. Id., at text following n.123 ("One commenter suggested that including employees who 'obtain information' regarding the investment activities could include employees, such as compliance personnel, who may not have any investment experience. The Commission agrees, and the rule as adopted includes only employees who 'participate in' the investment activities of the fund or other investment companies managed by the fund's Management Affiliate.").

Whether an employee actively participates in the investment activities of a Fund is a factual determination that must be made on a case-by-case basis by the Fund. [FN15] Nevertheless, as a general matter, with the possible exception of some research analysts (e.g., a research analyst who researches all potential portfolio investments and provides recommendations to the portfolio manager), we believe that the types of employees described in your letter would not qualify as knowledgeable employees under Rule 3c-5.

FN15. Consequently, the staff generally will not entertain any requests as to our views with respect to whether a particular employee or type of employee meets this aspect of the knowledgeable employee definition.

Question 2: May an employee who manages a fund that is not defined as an investment company under the Investment Company Act pursuant to an exclusion other than Section 3(c)(1) or Section 3(c)(7) be eligible for knowledgeable employee status?

Answer: Rule 3c-5 is premised on the belief that certain persons, because of their financial knowledge and sophistication and their relationship with the Section 3(c)(1) Fund or the Section 3(c)(7) Fund, do not need the protection of the Investment Company Act. To ensure that a knowledgeable employee has the appropriate level of financial knowledge and sophistication, Rule 3c-5 generally requires that knowledgeable employees participate in the investment activities of a Section 3(c)(1) Fund, a Section 3(c)(7) Fund, or any investment company the investment activities of which are managed by the Fund's Affiliated Management Person. [FN16]

FN16. As noted above, this requirement does not apply to certain executives of the Fund or the Affiliated Management Person of the Fund. See supra note 11.

The staff recently took the position that a person who participates in the investment activities of a company that would be regulated under the Investment Company Act but for the exclusion provided by Section 3(c)(3) of the Investment Company Act or the exemption provided by Rule 3a-6 under that Act [FN17] is as likely to be financially knowledgeable and sophisticated as a person who participates in the investment activities of a Section 3(c)(1) Fund, a Section 3(c)(7) Fund, or an investment company. [FN18] Therefore, the staff stated that it would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act [FN19] if such a person is considered to be a knowledgeable employee under Rule 3c-5, notwithstanding the fact that the employee does not participate in the investment activities of a Section 3(c)(1) Fund, a Section 3(c)(7) Fund, or an investment company.

FN17. Section 3(c)(3) excludes banks, insurance companies, and certain other financial institutions from the definition of investment company. Rule 3a-6 exempts foreign banks and insurance companies.

FN18. PPM Letter, supra note 12.

FN19. Section 7 generally prohibits a domestic investment company from using U.S. jurisdictional means to offer or sell its securities unless the company is registered under Section 8 of the Investment Company Act.

In addition, the staff takes the position that it is likely that a person who participates in the investment activities of a company that would be regulated under the Investment Company Act but for the exclusion provided by Section 3(c)(11) of the Act or Section 3(c)(2) of the Act is just as financially sophisticated and knowledgeable as a person who manages a Section 3(c)(1) Fund, a Section 3(c)(7) Fund, or an investment company. Therefore, the staff would not recommend enforcement action under Section 7 if that person were considered to participate in the investment activities of an eligible entity under Rule 3c-5. [FN20]

FN20. Section 3(c)(11) generally excludes from the definition of investment company certain tax-qualified pension or profit-sharing plans, any collective trust fund maintained by a bank that consists solely of assets of these plans, or any insurance company separate account the assets of which are derived from contributions under certain tax-qualified plans. Section 3(c)(2) generally excludes certain underwriters, brokers and market intermediaries from the definition of investment company. Because Rule 3c-5 refers to persons who participate in the "investment activities of a ... company," our position with respect to Section 3(c)(2) companies is limited to

those persons who participate in the investment activities of the companies' proprietary accounts.

Finally, you suggest that persons who participate in the investment activities of "foreign or offshore investment companies" also should be eligible for knowledgeable employee status. We agree. An investment company formed under the laws of a jurisdiction other than the United States and not registered under the Investment Company Act would nevertheless still be considered to be an "investment company" under the Investment Company Act. Thus, any person who participates in the investment activities of such a company may be considered to be a knowledgeable employee under Rule 3c-5. [FN21]

FN21. You also suggest that any "manager who manages only separately managed accounts (e.g., not a fund)" should also be eligible for knowledgeable employee status. Whether such a person can be considered to be as financially sophisticated and knowledgeable as a person who manages a Section 3(c)(1) Fund, a Section 3(c)(7) Fund, or an investment company, would depend on the particular facts and circumstances. The staff generally will entertain requests as to whether a manager who manages only separately managed accounts could qualify, under a particular set of facts and circumstances, as a knowledgeable employee.

Question 3: May the definition of "Affiliated Management Person" of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund include each affiliated entity of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund (regardless of corporate structure) that participates in investment activities of the investment management company?

Answer: In promulgating Rule 3c-5, the Commission intended that knowledgeable employees be limited to persons whose employer managed the Section 3(c)(1) Fund or the Section 3(c)(7) Fund in which the persons wished to invest. This requirement was intended, in part, to ensure that knowledgeable employees have access to information about the management of the Section 3(c)(1) Fund or the Section 3(c)(7) Fund in which they wish to invest. [FN22] Rule 3c-5 therefore provides that an investment adviser to a Section 3(c)(1) Fund or a Section 3(c)(7) Fund would be considered to be an affiliated person of the Fund for purposes of determining whether the adviser was an Affiliated Management Person of the Fund.

FN22. See Adopting Release, supra note 5, at n.122 and accompanying text; PPM Letter, supra note 12.

The staff recently took the position that, in certain circumstances, a company that is under common control with the investment adviser to a Section 3(c)(7) Fund may be considered to be an Affiliated Management Person of the Fund because an employee of such an entity generally will have significant access to information about the Fund. [FN23] The staff's position was based particularly on the facts that the company and the Fund's investment adviser were indirect, wholly owned subsidiaries of the same ultimate parent and that the company managed the investment activities of a company that would be an investment company but for the exclusion under Section 3(c)(3). [FN24] Whether an affiliate of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund would be an Affiliated Management Person for purposes of determining whether its employees are knowledgeable employees generally would depend on the particular facts and circumstances.

FN23. See PPM Letter, supra note 12.

FN24. Id.

Question 4: If a knowledgeable employee invests in a Section 3(c)(1) Fund or a Section 3(c)(7) Fund (i) jointly with a spouse and/or other dependents or (ii) through a family company trust or similar estate planning vehicle for which the knowledgeable employee is responsible for investment decisions and the source of the funds invested is individual property or property held jointly with the spouse, will such investment be deemed to have been made by the knowledgeable employee?

Answer: (i) In the Adopting Release, the Commission stated that, for purposes of determining the number of beneficial owners of the voting securities of a Section 3(c)(1) Fund, securities issued by the Section 3(c)(1) Fund that are jointly owned by an investor and his or her spouse would be considered to be owned by one beneficial owner. [FN25] Thus, securities issued by a Section 3(c)(1) Fund that are jointly owned by a knowledgeable employee and his or her spouse would be

considered to be owned by one beneficial owner. On this basis, we would not count an investment that is jointly owned by a knowledgeable employee and his or her spouse towards the Fund's 100-owner limit because Rule 3c-5 permits a knowledgeable employee of a Section 3(c)(1) Fund to acquire securities of that Fund without being counted as a beneficial owner.

FN25. Adopting Release, supra note 5, at n.69.

Furthermore, we take the position that a knowledgeable employee and his or her spouse who is not a knowledgeable employee (or a qualified purchaser) may invest jointly in a Section 3(c)(7) Fund. Section 2(a)(51)(A)(i) includes as a qualified purchaser any natural person who owns $5 million in investments and that person's spouse if they invest jointly. Therefore, a spouse who is not a qualified purchaser can hold a joint interest in a Section 3(c)(7) Fund with his or her qualified purchaser spouse. [FN26] Although Section 2(a)(51)(A)(i) and Rule 3c-5 both pertain to persons who have the financial sophistication to understand and evaluate the risks associated with purchasing securities of an investment pool that is not regulated under the Investment Company Act, Rule 3c-5, unlike Section 2(a)(51)(A)(i), does not expressly permit a knowledgeable employee to invest in a Section 3(c)(7) Fund with his or her spouse who is not a knowledgeable employee (or qualified purchaser).

FN26. Id., at nn.67-68 and accompanying text.

We believe that it would be consistent with Congress's intent to apply the spousal joint interest position in Section 2(a)(51)(A)(i) to Rule 3c-5. Thus, we would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act if a knowledgeable employee and his or her spouse who is not a knowledgeable employee (or a qualified purchaser) invest jointly in a Section 3(c)(7) Fund.

Our positions, however, do not extend to joint interests held by knowledgeable employees and their dependents. The Commission's position with respect to determining the number of beneficial owners of securities issued by a Section 3(c)(1) Fund only pertains to securities jointly owned by both spouses. In addition, under Section 2(a)(51)(A)(i), dependents of a qualified purchaser who are not themselves qualified purchasers may not hold a joint interest in a Section 3(c)(7) Fund with the qualified purchaser.

(ii) We also believe that, consistent with the intent of Section 2(a)(51)(A)(iii) and Rule 3c-5, a family company trust or a similar estate planning vehicle, for which the knowledgeable employee is both responsible for investment decisions and the source of the funds invested, may be able to invest in securities issued by any Section 3(c)(1) Fund or any Section 3(c)(7) Fund in which the knowledgeable employee is eligible to invest individually. Furthermore, we believe that such an investment would be deemed to have been made by the knowledgeable employee.

Section 2(a)(51)(A)(iii) generally defines as a qualified purchaser any trust that is not covered by clause (ii), [FN27] was not formed for the specific purpose of acquiring the securities offered and whose the trustee and settlor are qualified purchasers. We believe that Congress required that both the trustee and the settlor of the trust be qualified purchasers because of its belief that both the person contributing assets to the trust, and the person authorized to make investment decisions with respect to those assets, should have the requisite financial sophistication to understand and evaluate the risks associated with purchasing securities of an investment pool that is not regulated under the Investment Company Act. [FN28] Rule 3c-5 is premised on the belief that certain persons, because of their financial knowledge and their relationship with a Section 3(c)(1) Fund or a Section 3(c)(7) Fund, have the financial sophistication to understand the risks associated with purchasing securities of that Fund.

FN27. We assume that the entity that you describe would not be a qualified purchaser under Section 2(a)(51)(A)(ii). Any family company that meets the definition of qualified purchaser in Section 2(a)(51)(A)(ii) also may purchase securities issued by a Section 3(c)(7) Fund, regardless of whether the person who manages the trust's investments or is the source of the trust's assets is a knowledgeable employee of the Fund or a qualified purchaser, provided that the requirements of that section are met.

FN28. See Meadowbrook Real Estate Fund (pub. avail. Aug. 26, 1998) ("Meadowbrook Letter").

We believe that it would be consistent with Congress's intent to permit a family company trust or

similar estate planning entity to invest in securities issued by a Section 3(c)(7) Fund if a knowledgeable employee of that Fund is responsible for the investment decisions and is the source of the funds invested. Therefore, we would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act if a family company trust or similar estate planning entity is treated as a knowledgeable employee of a Section 3(c)(7) Fund for purposes of investing in securities issued by that Fund, provided that a knowledgeable employee of the Fund is responsible for investment decisions and is the source of the funds invested. Similarly, given the intent of Rule 3c-5, we would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act if a family company trust or similar estate planning entity is treated as a knowledgeable employee of a Section 3(c)(1) Fund for purposes of investing in securities issued by that Fund, provided that a knowledgeable employee of the Fund is responsible for investment decisions and is the source of the funds invested.

As we discussed in our Answer to Question A.4.(i), we take the position that a knowledgeable employee of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund may invest jointly in that Fund with his or her spouse, and that such an investment would be deemed to have been made by the knowledgeable employee. Accordingly, our positions, discussed immediately above, with respect to a family company trust or similar estate planning entity being treated as a knowledgeable employee, would not be affected if the source of the funds invested is property that was jointly owned by the knowledgeable employee and his or her spouse.

Question 5: Does an investor who acquired securities issued by a Section 3(c)(1) Fund before the effective date of the 1996 Act count toward the 100- owner limit if he or she would have been considered a knowledgeable employee at the time of acquisition, but is not one on the effective date of the 1996 Act (due, for example, to termination of employment)?

Answer: No. Rule 3c-5(b)(1) states, in part, that for purposes of determining the number of beneficial owners of a Section 3(c)(1) Fund, there shall be excluded securities beneficially owned by a person who at the time that the securities were acquired was a knowledgeable employee of the Fund. This provision is based on the belief that persons who are financially knowledgeable and sophisticated with respect to a Section 3(c)(1) Fund at the time that they make decisions to purchase securities issued by that Fund should not be counted toward that section's 100-owner limit. We therefore believe that, if a person was a knowledgeable employee at the time that the securities were purchased, the person is not counted toward the 100-owner limit, regardless of whether the purchase occurred prior to the adoption of the rule or the person ceased to be a knowledgeable employee subsequent to the purchase.

Questions 6 and 7: Does an investor who acquired securities issued by a Section 3(c)(1) Fund before the effective date of the 1996 Act count toward the 100-owner limit if he or she would not have been deemed a knowledgeable employee at the time of acquisition but was a knowledgeable employee on the effective date? If an investor who does not qualify as a knowledgeable employee invests in a Section 3(c)(1) Fund, may the Fund cease to count such a person as a beneficial owner once he or she satisfies the knowledgeable employee test?

Answer: The staff has stated that Rule 3c-5 is premised on the requirements that a knowledgeable employee of a Section 3(c)(1) Fund be financially sophisticated and knowledgeable and have a business relationship with the Fund such that the employee would have access to information about the Fund. [FN29] We believe that it would be consistent with the rule to treat a person as having been a knowledgeable employee at the time of any investments in a Section 3(c)(1) Fund if that person subsequently became a knowledgeable employee of the Fund. We therefore would not recommend enforcement action to the Commission under Section 7 of the Investment Company Act if a person who became a knowledgeable employee of a Section 3(c)(1) Fund after purchasing securities issued by that Fund were treated as having been a knowledgeable employee of the Fund at the time of the prior purchases. [FN30]

FN29. See supra Answers to Questions A.1., A.2., and A.3.

FN30. Such a person would not be required to dispose of these securities (or be counted as beneficial owners for purposes of Section 3(c)(1)'s 100-owner limit) upon termination of employment. Adopting Release, supra note 5, at n.120.

Question 8: May a knowledgeable employee invest in a Section 3(c)(1) Fund or a Section 3(c)(7) Fund through an IRA, trust or other entity for which he or she is responsible for investment

decisions and where the source of funds invested in the securities issued by the Fund was individual property or property held jointly with the knowledgeable employee's spouse (without being counted toward the Fund's 100-owner limit or without being a qualified purchaser)?

Answer: When an entity that invests in securities issued by a Section 3(c)(1) Fund or a Section 3(c)(7) Fund is the "alter ego" of a knowledgeable employee (i.e., the entity is wholly owned by the employee, the employee makes all of the decisions with respect to the entity's investments, and the investments are for the benefit of the employee), we would consider the investment to have been made by the employee for purposes of Rule 3c-5. In accordance with our spousal joint interest position discussed in our Answer to Question A.4.(i)., we also would consider such an entity to be an alter ego of the knowledgeable employee notwithstanding the fact that the entity was jointly owned with the employee's spouse and the employee and his or her spouse were joint beneficiaries of the investments. Thus, a knowledgeable employee may invest in a Section 3(c)(1) Fund or a Section 3(c)(7) Fund through an IRA or any other entity which may be considered to be the alter ego of the employee. [FN31]

FN31. Cf. Adopting Release, supra note 5, at text following n.78 ("when an entity that holds investments is the 'alter ego' of a Prospective Qualified Purchaser (as in the case of an entity that is wholly-owned by a Prospective Qualified Purchaser who makes all the decisions with respect to such investments), it would be appropriate to attribute the investments held by such entity to the Prospective Qualified Purchaser.").

As we discussed in our Answer to Question A.4.(ii)., under some circumstances we would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act if an entity such as the one that you described in your question invested in securities issued by a Section 3(c)(1) Fund without the entity being counted toward the Fund's 100-owner limit. Similarly, we would not recommend that the Commission take any enforcement action under Section 7 of the Investment Company Act if such an entity invested in securities issued by a Section 3(c)(7) Fund even though the entity is not a qualified purchaser.

B. Individual Retirement Accounts

Question 1: If an existing Section 3(c)(1) Fund elects to convert to a Section 3(c)(7) Fund pursuant to the Grandfather Provision, may a grandfathered investor, who is not otherwise a qualified purchaser, and whose interest in a Section 3(c)(7) Fund is, and was, prior to conversion, held in such investor's individual name, make additional investments in the Fund (following its conversion to a Section 3(c)(7) Fund) through his or her IRA or the self- directed account of a retirement plan?

Answer: Yes. The Grandfather Provision was designed to enable a Section 3(c)(1) Fund that converts to a Section 3(c)(7) Fund to preserve its arrangements with its grandfathered investors. Furthermore, the Grandfather Provision does not prevent grandfathered investors from making additional investments in the Grandfathered Fund. [FN32] We take the position that, when an entity that invests in securities issued by a Grandfathered Fund is the alter ego of a grandfathered investor (i.e., the entity is wholly owned by the grandfathered investor, the grandfathered investor makes all the decisions with respect to such investments, and the investments are for the benefit of the grandfathered investor), we would consider the acquisition to have been made by the grandfathered investor. [FN33] Thus, a grandfathered investor may continue to purchase securities in the Grandfathered Fund through an entity, such as an IRA or a self-directed account of a retirement plan, that is the alter ego of the investor.

FN32. See id., at n.82.

FN33. See supra note 31.

Question 2: For purposes of determining whether or not an IRA or the self- directed account of a retirement plan is a qualified purchaser, may one look through the IRA or account to its creator?

Answer: When an entity, such as an IRA or self-directed account of a retirement plan, that acquires securities issued by a Section 3(c)(7) Fund is the alter ego of the investor, we would consider the acquisition to have been made by the investor. Thus, a qualified purchaser may invest in securities issued by a Section 3(c)(7) Fund through any IRA, self-directed account of a retirement plan, or other entity that is the investor's alter ego. [FN34]

FN34. See id.

C. Trusts

Question 1: Under Section 2(a)(51)(A)(iii), at what time is the status of each trustee and settlor determined -- at the time of a particular investment or at the formation of the trust? What is the effect on qualification if the settlor is dead?

Answer: Section 3(c)(7) is premised on Congress's belief that certain persons, at the time of making the investment decision, have the financial sophistication to understand and evaluate the risks associated with purchasing securities of an investment pool that is not regulated under the Act. [FN35] Accordingly, under Section 2(a)(51)(A)(iii), a trust is a qualified purchaser if, among other things, its trustee (or other person authorized to make decisions with respect to the trust) is a qualified purchaser under clauses (i), (ii), or (iv) of Section 2(a)(51)(A). Congress intended that the trustee (or other person authorized to make decisions with respect to the trust) have the requisite financial sophistication at the time that the decision to invest is made. The staff therefore has taken the position that the time to determine the qualified purchaser status of the trustee who is responsible for investing the assets of the trust, and thus is the person responsible for understanding and evaluating the risks associated with each investment decision, is when the trustee makes the decision to acquire securities issued by a Section 3(c)(7) Fund. [FN36]

FN35. See supra note 2 and accompanying text.

FN36. Meadowbrook Letter, supra note 28.

The staff also has taken the position that a settlor of a Section 2(a)(51)(A)(iii) trust must be a qualified purchaser at the time that the settlor contributed assets to the trust. [FN37] This position reflects Congress's intent that the person whose assets are at risk -- and not only the person making the investment decision -- should be able to appreciate the risks presented by an investment pool that is not subject to regulation under the Investment Company Act. It would be consistent with this intent to require that the settlor be a qualified purchaser (i.e., financially sophisticated) at the time that the settlor makes the decision to contribute assets [FN38] to the trust. [FN39]

FN37. To meet this requirement, the settlor would have to have been a qualified purchaser at least once when he or she contributed assets to the trust. Thus, a settlor who was a qualified purchaser at the time that he or she initially funded the trust, but was not a qualified purchaser when he or she made subsequent contributions, would still be considered a qualified purchaser for purposes of the settlor requirement. Similarly, a settlor who was not a qualified purchaser at the time that he or she initially funded the trust, but was a qualified purchaser when the settlor made other contributions, would meet the requirement. Id., at n.18 and accompanying text.

FN38. As we stated in the Meadowbrook Letter, however, we believe that there may be other situations in which a settlor would have, at the appropriate time, the requisite financial sophistication to appreciate the risks presented by a Section 3(c)(7) Fund, thereby satisfying the purpose of the settlor requirement. Id., at n.21. The staff, however, has not yet been presented with any of these situations.

FN39. We disagree with your analysis that a trust should be treated as a qualified purchaser under Section 2(a)(51)(A)(iii) solely because the settlor is deceased and the trustee is a qualified purchaser. By analogy, under Section 2(a)(51)(A)(iv), an investment manager who is a qualified purchaser -- even one who invests $25 million on a discretionary basis -- cannot invest a client's assets in a Section 3(c)(7) Fund unless the client also is a qualified purchaser. See Senate Report, supra note 2, at 10 ("An investment adviser managing private accounts would not be permitted to purchase interests in a qualified purchaser pool on behalf of a client unless that client is also a qualified purchaser.").

Question 2: Section 2(a)(51)(A)(iii) of the Investment Company Act provides that a qualified purchaser includes any trust not covered by Section 2(a)(51)(A)(ii) of that Act and that was not formed for the specific purpose of acquiring the securities offered as to which "the trustee or other person authorized to make decisions with respect to the trust" is a qualified purchaser. Is it sufficient if only the trustee actually making the investment decision to acquire the securities at issue is a qualified purchaser?

Answer: As discussed previously, Section 3(c)(7) is premised on Congress's belief that financially sophisticated persons are able to assess the risks of investing in Section 3(c)(7) Funds, and therefore these persons do not need the protections of the Act. [FN40] We believe that if the trust has more than one trustee, only the trustee who is responsible for making investment decisions with respect to the trust, and therefore will be responsible for assessing the risks associated with investing in Section 3(c)(7) Funds, must be a qualified purchaser.

FN40. See supra note 2 and accompanying text; see also supra Answer to Question C.1.

Question 3: If a trust that is not covered by Section 2(a)(51)(A)(ii) has less than $5 million in investments and not all of the trustees authorized to make investment decisions or settlors of the trust are qualified purchasers, may the trust still be deemed a qualified purchaser if all of the trust's beneficiaries are qualified purchasers? Should the use of a trust format, as opposed to a family company format (where a look-through would clearly be permissible), dictate whether a look-through to the beneficiaries is possible?

Answer: Under Rule 2a51-3(b), a company may be deemed to be a qualified purchaser if each beneficial owner of its securities is a qualified purchaser. You argue that, because Section 2(a)(8) of the Investment Company Act defines "company" to include a trust, Rule 2a51-3(b) should be interpreted to permit a trust to be deemed to be a qualified purchaser if all of its beneficiaries are qualified purchasers, even though none of the trust's settlors or trustees is a qualified purchaser.

We disagree. Under Section 2(a)(51)(A)(iii), a trust is a qualified purchaser if, among other things, its trustee (or other person authorized to make decisions with respect to the trust), and each settlor (or other person who has contributed assets to the trust), are qualified purchasers under clauses (i), (ii), or (iv) of Section 2(a)(51)(A). We believe that Congress required that both the trustee and the settlor of the trust be qualified purchasers because of its belief that both the person contributing assets to the trust, and the person authorized to make investment decisions with respect to those assets, should have the requisite financial sophistication to understand and evaluate the risks associated with purchasing securities of an investment pool that is not regulated under the Investment Company Act. [FN41] Your interpretation would permit a trust to invest in securities issued by a Section 3(c)(7) Fund, even though neither the person contributing assets to the trust nor the persons making investment decisions with respect to the trust's assets would be a qualified purchaser. We therefore believe that interpreting Rule 2a51-3(b) in the manner that you suggest would be inconsistent with Congress's intent in enacting Section 2(a)(51)(A)(iii). [FN42]

FN41. See Meadowbrook Letter, supra note 28.

FN42. Some trusts that are not qualified purchasers, however, may nevertheless invest in securities issued by a Section 3(c)(7) Fund. See, e.g., supra Answers to Questions A.4.(ii)., A.8., and B.1. See infra Answer to Question C.5.

Question 4: Under Section 2(a)(51)(A)(ii) of the Investment Company Act, a qualified purchaser includes any company that owns not less than $5 million in investments and is owned by two or more related persons. For a trust to be a qualified purchaser under this definition, it must therefore be owned by two or more related persons. Who is considered to "own" a trust?

Answer: Section 2(a)(51)(A)(ii) is intended to permit "certain family investment vehicles -- family trusts and other types of companies --" [FN43] that are formed to facilitate estate planning [FN44] to invest in Section 3(c)(7) Funds. According to the legislative history, Congress intended that any company with $5 million in investments and "that is owned by an extended family" be treated as a qualified purchaser. [FN45] Congress did not, however, specifically address what it intended by the use of the term "owned" in the context of trusts.

FN43. Senate Report, supra note 2, at 10.

FN44. See The Securities Investment Promotion Act of 1996: Hearing on S. 1815 before the Senate Committee on Banking, Housing and Urban Affairs, 104th Cong. 2d Sess. 41 (1996) (testimony of Arthur Levitt, Chairman, SEC).

FN45. Senate Report, supra note 2, at 10.

We believe that Congress intended that all economic interests in a company that relies on Section 2(a)(51)(A)(ii) be held exclusively by persons who satisfy the family relationship requirements of that section. [FN46] The staff recently took the position that beneficiaries of certain trusts may be considered to be the "owners" of those trusts for purposes of Section 2(a)(51)(A)(ii). This position was based on the representation that the beneficiaries are the only persons who hold economic interests in the trusts. [FN47]

FN46. In this regard, we believe that a trust generally would be able to rely on that section only if all present or future, vested or contingent, economic interest in its assets are held exclusively by eligible family members. Meadowbrook Letter, supra note 28.

FN47. Id. In this letter, counsel represented that, while the trustee receives fees for services rendered, such fees do not represent an economic interest comparable to an ownership interest in the company.

Question 5: May a grandfathered investor, who is not otherwise a qualified investor, (i) transfer his or her investment in the Grandfathered Fund to an IRA, trust, or other entity and (ii) make additional investments in the converted Section 3(c)(7) Fund through the IRA, trust or other entity?

Answer: (i) As discussed in our Answer to Question B.1., we take the position that when an entity that invests in securities issued by a Grandfathered Fund is the alter ego of a grandfathered investor, we would consider the investment to have been made by the grandfathered investor. Therefore, a grandfathered investor may transfer his or her investment in the Grandfathered Fund to any entity that is an alter ego of that investor, because the grandfathered investor effectively would be transferring the securities to himself or herself.

We also believe that it would be consistent with the intent of Rule 3c- 6 if, when persons who acquire securities issued by a Grandfathered Fund from a grandfathered investor, the securities are treated as being owned by the grandfathered investor, provided that the other requirements of Rule 3c-6 are met. [FN48] Rule 3c-6 provides that beneficial ownership of securities issued by a Section 3(c)(7) Fund that are acquired from a qualified purchaser are treated under certain circumstances as being owned by the qualified purchaser. Rule 3c-6 does not, however, address the transfer by a grandfathered investor of securities issued by a Grandfathered Fund. Therefore, we would not recommend enforcement action to the Commission under Section 7 of the Investment Company Act if a grandfathered investor transfers his or her investments in the Grandfathered Fund to any person or entity and the Transferee were not counted toward the 100-owner limit in the Grandfather Provision, [FN49] provided that the other requirements of Rule 3c-6 are satisfied.

FN48. Rule 3c-6 applies when a Transferor transfers securities to (i) the estate of the Transferor; (ii) a Donee; or (iii) a company established by the Transferor exclusively for the benefit of (or owned exclusively by) the Transferor and/or a Donee or the estate of the Transferor. The rule defines the term "Donee" as a person who acquires a security of a Section 3(c)(1) Fund or a Section 3(c)(7) Fund (or a security or other interest in a company established by the Transferor exclusively for the benefit of (or owned exclusively by) the Transferor and/or a Donee or the estate of the Transferor) as a gift or bequest or pursuant to an agreement relating to a legal separation or divorce.

FN49. As discussed in the Background section, the Grandfather Provision states that the outstanding securities of a Grandfathered Fund may be beneficially owned by as many as 100 persons that are not qualified purchasers, provided that these persons acquired the securities of the Grandfathered Fund on or before September 1, 1996. The requirement that persons who are not qualified purchasers must have acquired the securities on or before September 1, 1996 is intended to define the persons who may be grandfathered investors (i.e., those persons who held securities of the Section 3(c)(1) Fund prior to the enactment of the 1996 Act and who do not meet the definition of qualified purchaser). We interpret this requirement as not prohibiting a grandfathered investor from transferring his or her securities under certain conditions after the Section 3(c)(1) Fund has converted to a Section 3(c)(7) Fund.

(ii) As discussed in our Answer to Question B.1., a grandfathered investor may continue to

purchase securities in the Grandfathered Fund through an entity, such as an IRA, that is the alter ego of the investor. As a general matter, however, we believe that a grandfathered investor, who is making the investment decisions with respect to the assets of a trust or other entity that is not the alter ego of the investor, may not invest that entity's assets in the Grandfathered Fund unless the entity itself is a qualified purchaser. We believe that this type of transaction may be considered to be a new arrangement between the grandfathered investor and the Fund, which would be inconsistent with the intent of the Grandfather Provision. [FN50]

FN50. See supra Answer to Question B.1.

D. Section 2(a)(51)(A)(iii) and Rule 2a51-3: "Formed for the Specific Purpose"

Question: When is an entity deemed to be formed for the specific purpose of acquiring securities in a Section 3(c)(7) Fund?

Answer: Section 2(a)(51)(A)(iii) specifies that a trust that is a qualified purchaser under that section must not have been formed "for the specific purpose of acquiring the securities offered." Rule 2a51-3(a) makes that condition applicable to any prospective qualified purchaser seeking to rely on Section 2(a)(51)(A)(ii) or (iv) unless each beneficial owner of the prospective qualified purchaser's securities is a qualified purchaser. The rule limits the possibility that a company will form an entity for the specific purpose of making an investment in a Section 3(c)(7) Fund available to investors that themselves are not qualified purchasers. [FN51] This conduct also may raise issues under Section 48(a) of the Investment Company Act, which prohibits an entity from doing indirectly what it is prohibited from doing directly, and gives the Commission the authority to "look-through" a transaction if it is a sham or conduit formed or operated for no purpose other than circumventing the requirements of the Act. [FN52]

FN51. Adopting Release, supra note 5, at n.112 and accompanying text.

FN52. See Cornish & Carey (pub. avail. June 21, 1996).

You note that the staff has indicated that, if an entity is formed for the specific purpose of acquiring securities in a particular Section 3(c)(1) Fund, the owners of that entity may be counted in determining the number of beneficial owners of that Fund. You further note that the staff has taken the position that, in the Section 3(c)(1) context, the determination that an entity is formed for the specific purpose of investing in a Section 3(c)(1) Fund will depend upon an analysis of all of the surrounding facts and circumstances, and while the percentage of an entity's assets invested in the Section 3(c)(1) Fund is relevant, exceeding a specified percentage level, by itself, is not determinative. [FN53] You suggest that the staff apply this analysis in the context of entities investing in Section 3(c)(7) Funds.

FN53. Id.

We agree. The staff takes the position that any entity whose investors consist of non-qualified purchasers, that was formed or operated for the purpose of investing in a Section 3(c)(7) Fund, and that subsequently invests in such a Fund, may result in a violation of Section 48(a) and/or Section 7 of the Investment Company Act (because the entity would not be considered a qualified purchaser under Section 2(a)(51)(A) and thus the Fund could not rely on Section 3(c)(7)). [FN54] We agree that our analysis with respect to entities investing in a Section 3(c)(1) Fund also applies with respect to entities investing in a Section 3(c)(7) Fund. Thus, we believe that the determination that an entity is formed for the specific purpose of investing in a Section 3(c)(7) Fund will depend upon an analysis of all of the surrounding facts and circumstances, and while the percentage of an entity's assets invested in the Section 3(c)(7) Fund is relevant, exceeding a specified percentage level, by itself, is not determinative. Of course, any entity that is not formed for the purpose of investing in a Section 3(c)(7) Fund can invest in such a Fund only if the entity itself meets the definition of qualified purchaser under Section 2(a)(51)(A).

FN54. While Section 2(a)(51)(A)(iii) and Rule 2a51-3 only seek to prevent entities from being "formed" for the purpose of circumventing the Investment Company Act, Section 48 applies both to entities that are formed or operated for the purpose of circumventing the Act. Thus, while an entity that is operated for the specific purpose of acquiring securities in a Section 3(c)(7) Fund may nevertheless still be considered a qualified purchaser under Section 2(a)(51)(A), that entity and the Fund may be in violation of Section 48(a).

E. Rule 3c-6: Involuntary Transfers

Question 1: Does the rule on involuntary transfers also include distributions from testamentary or inter vivos trusts or other entities?

Answer: Rule 3c-6 generally pertains to the transfer of securities issued by a Section 3(c)(1) Fund or a Section 3(c)(7) Fund that occurs pursuant to a gift, bequest, or an agreement relating to a legal separation or divorce. The issue raised by your question is whether distributions from testamentary or inter vivos trusts would be considered to be gifts or bequests for purposes of Rule 3c-6. Whether a distribution from a testamentary or inter vivos trust is governed by the rule depends on the particular facts and circumstances.

Question 2: May securities of a Section 3(c)(7) Fund be transferred to a person by gift if the Fund requires additional contributions of capital in the future and either (i) the Transferor agrees to pay the additional contributions as they become due or are called by the Fund and the Fund agrees not to enforce the obligation to pay the additional contributions against the Transferee or (ii) simultaneously with the gift, the Transferor provides sufficient assets to the Transferee to enable it to satisfy the additional contributions?

Answer: (i) In the Adopting Release, the Commission noted that Rule 3c-6 would not apply if a person acquires the securities issued by a Section 3(c)(1) Fund for consideration, and that any person that pays consideration for these securities must be counted toward the 100-owner limit of the Section 3(c)(1) Fund. [FN55] Similarly, we believe that Rule 3c-6 would not apply if a person acquires the securities issued by a Section 3(c)(7) Fund for consideration, and thus any person that pays consideration for these securities must be a qualified purchaser, a knowledgeable employee, or a grandfathered investor. We also believe that any obligation to pay for any additional contributions of capital may be a form of consideration, and thus Rule 3c-6 may not apply if a Transferor transfers securities issued by a Section 3(c)(7) Fund to a Transferee, but the Transferee is obligated to pay additional contributions as they become due or are called by the Fund. We believe that the requirement that additional contributions be made to the Fund after the Transferor transfers securities to the Transferee would not prevent the Fund from relying on Rule 3c-6, however, if the Transferor agrees to pay the additional contributions as they become due or are called by the Fund and the Fund agrees not to enforce the obligation to pay the additional contributions against the Transferee.

FN55. See Adopting Release, supra note 5, at n.132.

(ii) As discussed in our Answer to Question E.2.(i)., we believe that any obligation to pay for any additional contributions of capital may be a form of consideration, and thus Rule 3c-6 may not apply if a Transferor transfers securities issued by a Section 3(c)(7) Fund to a Transferee and the Transferee is obligated to pay additional contributions as they become due or are called by the Fund. Therefore, as a general matter, Rule 3c-6 does not apply if the Transferee is under any obligation to pay additional contributions, even if the Transferor provides the Transferee with sufficient assets to pay those contributions.

Furthermore, Rule 3c-6 as a general matter does not apply if a Transferor transfers assets to a Transferee who is not a qualified purchaser with the intention that the Transferee use the assets to purchase securities issued by a Section 3(c)(7) Fund, even if the assets are a gift. Nonetheless, we believe that it may be consistent with Rule 3c-6, and we would not recommend any enforcement action to the Commission under Section 7 of the Investment Company Act, if a Transferor transferred sufficient assets to enable the Transferee to satisfy any future capital contributions, and the Transferee used the assets to purchase securities issued by the Fund, if there were appropriate procedures in place reasonably designed to ensure that the assets would in fact be available and be of a sufficient amount for the contributions to be paid, and the Transferee is not under any obligation to pay the contributions.

Question 3: May a company established by a qualified purchaser exclusively for the benefit of (or owned exclusively by) the qualified purchaser and his or her estate or donees receive securities of a Section 3(c)(7) Fund by gift if the Fund requires additional contributions of capital in the future and the contributions are paid out of assets previously held by the company so long as such assets derived exclusively from the qualified purchaser?

Answer: As we discussed in our Answer to Question E.2.(ii)., in accordance with the terms of Rule 3c-6, a Transferor may transfer securities issued by a Section 3(c)(7) Fund, together with sufficient

assets to enable the Transferee to satisfy future additional contributions required by the Fund, if there were appropriate procedures in place reasonably designed to ensure (i) that the assets would be used only to pay the contributions, and (ii) that the assets would in fact be available and be of a sufficient amount for the contributions to be paid. In addition, the Transferee may not be under any obligation to pay the contributions. Therefore, a Transferor may transfer by gift securities issued by a Section 3(c)(7) Fund to a company, such as the one that you describe in your question (and which is a permissible Transferee under Rule 3c- 6(b)(3)), and future capital contributions required by the Fund may be paid out of assets previously held by the company that were derived exclusively from the Transferor, provided that the company had in place the appropriate procedures, described above, and that the company was under no obligation to pay the contributions.

Question 4: Should an interest owned by a company in a Section 3(c)(7) Fund that is received by the holders of the company, either as a distribution or in dissolution of the company, be considered the equivalent of a gift to such holders so long as the company was not specifically formed for the purpose of making the investment in question?

Answer: Rule 3c-6 would not be available for a distribution or a dissolution by a company because none of the company's holders who would receive the securities would be "(1) the estate of the Transferor; (2) a Donee; or (3) a company established by the Transferor exclusively for the benefit or (or owned exclusively by) the Transferor [and/or a Donee or the estate of the Transferor]," as required by Rule 3c-6(b). [FN56] Section 3(c)(7)(A) provides, in part, however, that securities issued by a Section 3(c)(7) Fund that are owned by persons who received them from a qualified purchaser as a gift or bequest, or when the transfer was caused by legal separation, divorce, death, or other involuntary event, will be deemed to be owned by a qualified purchaser, subject to such rules as the Commission may prescribe. The Commission has stated that Rule 3c-6 does not necessarily provide an exclusive list of involuntary events for purposes of Section 3(c)(7). [FN57] Whether distributions or dissolutions by a company would be considered to be "involuntary events" for purposes of Section 3(c)(7)(A) would depend on the particular facts and circumstances. [FN58]

FN56. See supra note 48.

FN57. Adopting Release, supra note 5, at n.133.

FN58. Section 3(c)(1)(B), which was enacted in 1980, contains a similar provision with respect to the involuntary transfers of securities of a Section 3(c)(1) Fund. See supra note 9. The staff previously issued several letters regarding this section, and counsel seeking to determine whether a transfer of securities of a Section 3(c)(7) Fund would be considered involuntary for purposes of Section 3(c)(7)(A) may wish to review these letters. See, e.g., Trivest Special Situations Fund 1985 L.P. (July 13, 1989) (transfer of partnership interests to participants of a pension plan caused by the termination of the plan is not within the intent of Section 3(c)(1)(B) because the pension plan was voluntarily terminated when it was no longer economically advantageous to maintain it).

F. Effect of Section 3(c)(7) Funds on Rule 144A Securities

Question: Would the Commission agree that a modified CUSIP number would be sufficient to comply with Section 3(c)(7) as in the case of Rule 144A?

Answer: Section 3(c)(7) generally requires holders of securities issued by a Section 3(c)(7) Fund to be qualified purchasers. Rule 2a51-1(h) generally defines the term "qualified purchaser" to mean any person that meets the definition of qualified purchaser in Section 2(a)(51)(A) and the rules thereunder, or that the Section 3(c)(7) Fund or a person acting on its behalf (each a "Relying Person") reasonably believes meets the definition. Rule 2a51- 1(g)(1) generally provides that if a person seeking to purchase a security of a Section 3(c)(7) Fund is, or the Fund or other Relying Person reasonably believes is, a qualified institutional buyer as defined in Rule 144A ("QIB") under the Securities Act of 1933, [FN59] with the exception of self-directed employee benefit plans and certain dealers, that person is deemed to be a qualified purchaser ("QP-QIB").

FN59. Rule 144A sets forth a non-exclusive safe harbor from the registration requirements of Section 5 of the Securities Act for the resale of restricted securities to specified institutions by persons other than the issuer of such securities.

You argue that it should not be necessary under Rule 2a51-1(g)(1) for the Fund or other Relying

Person to form a reasonable belief that buyers are QP-QIBs. You state that, in the trading market for securities offered under Rule 144A ("144A Market"), it is the seller of the securities that determines that status of the purchaser, and not the issuer or other Relying Person. You therefore believe that the reasonable belief requirement should be deemed to have been satisfied if the seller of the securities has a reasonable belief that the purchaser is a QP-QIB on the basis of an established procedure for making this determination.

You further believe that one such procedure that would permit a seller to form the requisite reasonable belief would be the use of lists of securities maintained by dealers who participate in the 144A Market. You note that the CUSIP number of securities on these lists that can be purchased only by QIBs ("Rule 144A Securities") includes a special designation. You propose that a special designation be created for securities issued by Section 3(c)(7) Funds that would indicate that they can be purchased only by QP-QIBs. As an alternative, you propose that securities issued by Section 3(c)(7) Funds would be accepted for trading in the 144A Market only in large blocks, thus assuring the large size of the holders.

You also argue that, for purposes of Rule 2a51-1(h), a Section 3(c)(7) Fund should be able to form the requisite reasonable belief on the basis of deemed representations and warranties made by purchasers of the Fund's securities in the 144A Market that such purchasers are QP-QIBs and that any securities held by a purchaser who is not a QP-QIB must be divested. You state that the Fund's offering materials generally provide that there will be reliance on these representations and warranties. You argue that "most" participants in the 144A Market have at least $25 million under management and therefore would be qualified purchasers under Section 2(a)(51)(A)(iv), and that it is "doubtful" that there are many QIBs that are not also QP-QIBs.

We believe that a reasonable belief formed by a person other than the Fund or other Relying Person would satisfy neither the letter nor spirit of Rule 2a51-1. A Fund or other Relying Person may be able to develop procedures for resales in the 144A Market that, if followed, would be sufficient to form the requisite reasonable belief under Rule 2a51-1. [FN60] We generally believe that any procedures developed for resales in the 144A Market for purposes of Rule 2a51-1 must be designed to provide a means by which the Fund or other Relying Person can make a reasonable determination that all of the purchasers of the Fund's securities were qualified purchasers at the time that they acquired the securities. While we agree that the procedures you propose could be components of reasonable compliance procedures, whether a particular set of procedures would be sufficient for a Fund or other Relying Person to form the requisite reasonable belief depends on the facts and circumstances. [FN61] As a result, the staff, as a matter of policy, will not respond to requests to assess whether any particular set of procedures could form the basis of a reasonable belief under Rule 2a51-1.

> FN60. A Relying Person might include, for example, a participant of the Depository Trust Company, provided that the participant is acting on the Fund's behalf.
>
> FN61. The Division of Corporation Finance has advised us that the Division is not expressing any view on whether the procedures outlined in your letter satisfy the requirements of Rule 144A. Persons reselling securities in reliance on Rule 144A must reasonably believe that any offeree or purchaser is a QIB. Rule 144A provides non-exclusive methods for determining whether an offeree or purchaser is a QIB. The Division of Corporation Finance has given guidance in this area as well. See, e.g., Commscan (pub. avail. Feb. 3, 1999).

G. Timing of Qualified Purchaser Determination

Question: Does the Section 3(c)(7) Fund need to make a new determination of qualified purchaser status for an investor each time the investor elects to reinvest its earnings of the Fund?

Answer: No. Section 3(c)(7) excludes from the definition of investment company any issuer whose outstanding securities are owned by persons who, at the time of acquisition of the securities, are qualified purchasers, and which is not making or proposing to make a public offering of its securities. Consistent with prior staff interpretations of Section 3(c)(1), [FN62] the staff does not interpret Section 3(c)(7) as requiring the status of a person as a qualified purchaser to be reaffirmed in connection with the crediting of a Section 3(c)(7) Fund's earnings to an investor's account. Under some circumstances, however, a reinvestment of dividends may be considered to be a public offering of securities, which would preclude a fund from relying on Section 3(c)(7). [FN63]

FN62. Weiss Global Limited Partnership (pub. avail. Nov. 1, 1990)(staff took position that the acquisition of securities would not occur, for purposes of the pre-amended Look Through Provision of Section 3(c)(1), when a limited partner's partnership interests increased due to (i) the crediting of partnership earnings to capital accounts or the effect of their distribution to other limited partners, or (ii) redemptions of partnership interests by the partnership).

FN63. Section 3(c)(7)'s limitation on public offerings has been interpreted to permit offerings that comply with Section 4(2) of the Securities Act. See Adopting Release, supra note 5, at n.5. A reinvestment of earnings in securities may be considered to be a sale of securities for purposes of the Securities Act, and these securities may be subject to the registration provisions of that Act, absent an exemption from those provisions, such as that provided by Section 4(2). See, e.g., Securities Act Release No. 929 (Jul. 29, 1936), 11 FR 10957 (1936); Investment Company Act Release No. 6480 (May 10, 1971) 36 FR 9627 (May 1971).

H. Short-Term Paper

Question: May holders of short-term paper issued by a Section 3(c)(7) Fund be excluded from having to meet the qualified purchaser standard in order to invest in the Fund?

Answer: No. Unlike Section 3(c)(1), Section 3(c)(7) does not specifically exclude short-term paper holders from its requirements.

I. Jointly Held Investments

Question 1: If a husband and wife are separate limited partners of a Section 3(c)(1) Fund, should they be counted as one or two beneficial owners?

Answer: If the husband and wife each owns securities of a Section 3(c)(1) Fund in his or her own name, then the Fund should count the husband and wife as two beneficial owners. If the securities are jointly owned by the husband and wife, then they should be counted as one beneficial owner. [FN64]

FN64. Adopting Release, supra note 5, at n.69.

Question 2: If a husband and wife jointly own an entity that invests in a Section 3(c)(1) Fund, should that entity be counted as one beneficial owner even if the entity would be subject to a "look-through" because it owned more than 10% of the voting securities of the Section 3(c)(1) Fund or was formed for the purpose of investing in the Section 3(c)(1) Fund?

Answer: The entity would be counted as one beneficial owner if the entity's only shareholders are the husband and wife whose interests are jointly owned, regardless of whether the entity was formed for the specific purpose of investing in the Section 3(c)(1) Fund. [FN65]

FN65. Id.

J. Conversion to Section 3(c)(7) Fund

Question: If a Section 3(c)(1) Fund that is a limited partnership converts its status to a Section 3(c)(7) Fund, and that Fund subsequently converts from a limited partnership to a limited liability company (with appropriate partner consent as required by state law and the Fund's partnership agreement), will the Fund be able to continue to include its grandfathered investors?

Answer: A Section 3(c)(7) Fund that seeks to convert from a limited partnership to a limited liability company would be required to exchange the limited partnership interests held by its shareholders with securities issued by the limited liability company. If this exchange were deemed to be an "acquisition" for purposes of Section 3(c)(7), the grandfathered investors would have to be qualified purchasers in order to receive the new securities. We believe, however, that the receipt of new securities resulting from a change in legal form from a limited partnership to a limited liability company would not be such an acquisition, provided that (i) the change in legal form does not result in any material change in the interests of the grandfathered investors of the Fund, and (ii) the limited liability company will represent in all substantial respects the same business and enterprise as that of the limited partnership. Our position is consistent with our views with respect to the conditions under which a registered investment company may reorganize to change its legal form without the new entity either filing a new registration statement or registering its securities. [FN66]

END OF DOCUMENT

Regulation D under the Securities Act of 1933

[Summary of Regulation D - Rules Governing the Offer and Sale of Securities Without Registration Under the Securities Act of 1933]

(17 CFR 230.501 to 508)

Title 17

Chapter II

Part 230

Section 230.501(a) - Definition of "Accredited Investor"

(1) - Banks as defined in Section 3(a)(2) of the Act, acting individually or as a fiduciary

- Savings and Loan Associations defined in Section 3(a)(5)A) of the Act, acting individually or as a fiduciary

- Registered Brokers or Dealers registered under Section 15 of the Securities Exchange Act of 1934

- Insurance companies as defined in Section 2(13) of the Act

- Investment companies registered under the Investment Company Act of 1940

- Business development companies as defined in Section 2(a)(48) of the Investment Company Act of 1940

- Small Business Investment Company licensed by the U.S. Small Business Administration under Section 301(c)(d) of the Small Business Act of 1956

- Any state or local employee benefit plan having assets in excess of $5 million

- Any employee benefit plan subject to ERISA if the investment decision is made by a Plan Fiduciary which is a bank, savings and loan association, insurance company, or registered investment adviser

- An employee benefit plan whose assets exceed $5 million

- A self-directed employee benefit plan, whose investment decisions are made solely by "Accredited Investors"

(2) - A private business development company as defined in Section 202(a)(22) of the Investment Advisers Act of 1940

(3) - Any:

- Organization described in IRC Section 501(c)(3), (religious, charitable, educational, etc.)

- Corporation,
- Massachusetts or similar business trust,
- Partnership,

which has not been formed for the specific purpose of acquiring the securities offered, and which has assets in excess of $5 million

(4) - Any director, executive officer or general partner of the issuer of the securities being sold

(5) - Any individual whose net worth, *or*

whose joint net worth with that person's spouse,

exceeds $1 million at the time of purchase

(6) - Any individual whose income exceeded $200 thousand in each of the two previous years, *or*

whose joint income with that person's spouse exceeded $300 thousand in each of the two previous years, *and*

has a reasonable expectation of reaching the same income level in the current year

(7) - Any trust having assets in excess of $5 million, which was not formed for the specific purpose of acquiring the securities offered, whose purchase is directed by a sophisticated person as defined in Section 230.506(b)(2)(ii)

(8) - Any entity in which all the equity owners are "Accredited Investors"

Section 230.501(e) - Calculation of number of purchasers for purposes of Sections 230.505(b) and 230.506(b):

(1) - The following persons are **excluded** from the calculation of number of purchasers:

(i) Any relative of the purchaser having the same principal residence of the purchaser

(ii) Any trust or estate in which the purchaser or relative sharing the purchaser's principal residence have a combined beneficial interest of more than 50 percent

(iii) Any corporation in which the purchaser or relative sharing the purchaser's principal residence have a combined beneficial interest of more than 50 percent

(iv) Any "Accredited Investor"

(2) - A corporation, partnership or other entity shall be counted as one purchaser, however, if the entity was organized for the specific purpose of acquiring the securities offered and is not an "Accredited Investor", each beneficial owner of equity securities or equity interests in the entity shall be counted as a separate purchaser

(3) - Non-contributory employee benefit plans subject to ERISA shall be counted as one purchaser

Section 230.501(g) - The definition of the term "issuer" in Section 2(4) of the Act shall apply, except, in the case of a Federal Bankruptcy, the trustee or debtor in possession shall be considered the issuer.

Section 230.502 - General conditions in regard to offers and sales made under Regulation D

(a) Integration of all offers and sales within the past 6 months

(b) Information to be furnished to purchasers, other than to "Accredited Investors" or with respect to

offerings of $1 million or less under Section 230.504:

(i) if issuer is not subject to reporting requirements of Sections 13 or 15(d) of the Securities Exchange Act of 1934:

(A)Non-financial information

(B)Financial information on offerings of up to:

(1) $2 million + information required in Item 310 on Form S-B, 17 CFR Section 228.310 (small business disclosure requirements)

(2) $7.5 million + information required in Form SB-2, 17 CFR Section 228.310 (small business disclosure requirements)

(3) $7.5 million+Information as would be required for securities registration under Section 5 of the Act

(C)Foreign private issuers eligible to use Form 20-F under Section 249.220f (forms prescribed under the Securities Exchange Act of 1934)

(ii) if issuer is subject to reporting requirements of Sections 13 or 15(d) of the Securities Exchange Act of 1934:

(A) Issuer's annual report

(B) Issuer's Form 10-K

(C) Information required to filed under Sections 13(a), 14(a), 14(c), and 15(d) of the Securities Exchange Act of 1934

(D) Foreign private issuers may use information contained in its most recent filing of Form 20-F or Form F-1 under Section 239.31 (forms prescribed under the Securities Act of 1933)

(iii) exhibits to filed with the SEC as part of the registration statement, other than an annual report or Form 10-K report, need not be furnished "Non-Accredited Investors"

(iv) at a reasonable time prior to the sale to a "Non-Accredited Investor" under Sections 230.505 or 230.506, at the "Non-Accredited Investor's" written request, a brief description of material written information provided "Accredited Investors"

(v) at a reasonable time prior to the purchase of securities under Sections 230.505 and 230.506, information that is necessary to verify accuracy of information furnished under paragraphs (b)(i) and (ii) above

(vi) for business combinations or exchange offers, written information concerning terms for any purchasers which are materially different from those for all other security holders

(vii) information concerning the limitations on resale contained in paragraph (d) below

(c) Advertising restrictions: *except for securities sold under Section 230.504(b)(1)*, neither the issuer nor any person acting on its behalf shall offer or sell securities through general advertising

(d) Resale restrictions: *except for securities sold under Section 230.504(b)(1)*, securities sold under Regulation D cannot be resold without registration under the Act, or exemption therefrom

Section 230.503 - Filing of notice of sales with the SEC:

Issuers of securities under Sections 230.504, 230.505 or 230.506 are required to file a notice on Form D (17 CFR 239.500 - forms prescribed under the Securities Act of 1933) no later than 15 days after the first sale of securities

Section 230.504 - Exemption for offerings and sales of securities not exceeding $1 million

(a) Securities sold under this section by issuers which are not:

- subject to the reporting requirements of Sections 13 or 15(d) of the Securities Exchange Act of 1934,
- an investment company, are not subject to the registration requirements of Section 5 of the Act

(b) (1) The requirements for investors, issuers, and information dissemination under Sections 230.501 and 230.502 must be met

(2) The aggregate offering of securities under this section shall not exceed $1 million, less the aggregate for all securities sold within 12 months prior to the current offering of securities

Section 230.505 - Exemption for offerings and sales of securities not exceeding $5 million

(a) Securities sold under this section by issuers which are not investment companies, are not subject to the registration requirements of Section 5 of the Act

(b) (1) The requirements for investors, issuers, and information dissemination under Sections 230.501 and 230.502 must be met

(2) (i) The aggregate offering of securities under this section shall not exceed $5 million, less the aggregate for all securities sold within 12 months prior to the current offering of securities

(ii) There are no more than 35 purchasers of securities in any offering under this section

(iii) No exemption under this section will be available for securities of any issuer described in Section 230.262 of Regulation A

Section 230.506 - Exemption for offerings and sales of securities without regard to dollar amount of offering

(a) Securities sold under this section are not deemed public offerings under Section 4(2) of the Act

(b) (1) The requirements for investors, issuers, and information dissemination under Sections 230.501 and 230.502 must be met

(2) (i) There are no more than 35 purchasers of securities in any offering under this section

(ii) "Sophisticated Person" defined as having knowledge and experience in financial and business matters to permit an evaluation of the risks and merits of the prospective investment, either acting alone or with a purchaser representative

Section 230.507 - Exemptions under Sections 230.504, 230.505, and 230.506 are not available to issuers, their affiliates, or predecessors which have been subject to order or decree enjoining such person for failure to comply with Section 230.503

Section 230.508 - Insignificant deviations from any requirement of Regulation D does not result in the loss of exemption from Section 5 of the Act

Joint Release Office of the Comptroller of the Currency Board of Governors of the Federal Reserve System Federal Deposit Insurance Corporation Office of Thrift Supervision

January 5, 2004

Interagency Policy on Banks/Thrifts Providing Financial Support to Funds Advised by the Banking Organization or its Affiliates

Purpose and Scope

This interagency policy is issued jointly by the federal banking agencies, including the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), the Board of Governors of the Federal Reserve System (Board), and the Office of Thrift Supervision (OTS) (the agencies) to alert banking organizations, including their boards of directors and senior management, of the safety and soundness implications of and the legal impediments to a bank providing financial support to investment funds[1] advised by the bank, its subsidiaries, or affiliates. A banking organization's investment advisory services can pose material risks to the bank's liquidity, earnings, capital, and reputation, and can harm investors, if the associated risks are not effectively controlled. The agencies have concluded that recent market developments, including market volatility, the continued low interest rate environment, and operational and corporate governance weaknesses, warrant the issuance of this guidance.

Banks are under no statutory requirement to provide financial support to the funds they advise; however, circumstances may motivate banks to do so for reasons of reputation risk and liability mitigation. This type of support by banking organizations to funds they advise has included credit extensions, cash infusions, asset purchases, and acquisition of fund shares. In very limited circumstances, certain arrangements between banks and funds they advise have been expressly determined to be legally permissible and safe and sound when properly conducted and managed. However, the agencies are concerned about other occasions when emergency liquidity needs may prompt banks to support their advised funds in ways that raise prudential and legal concerns.

Federal laws and regulations place significant restrictions on transactions between banks and their advised funds. In particular, sections 23A and 23B of the Federal Reserve Act and the Board's Regulation W (12 CFR 223) place quantitative limits and collateral and market terms requirements on many transactions between a bank and certain of its advised funds. Additionally, the OCC's fiduciary activities regulation (12 CFR 9) may restrict transactions between a bank and its advised funds.[2]

Policy

To avoid engaging in unsafe and unsound banking practices, banks should adopt appropriate policies and procedures governing routine or emergency transactions with bank advised investment funds. Such policies and procedures should be designed to ensure that the bank will *not* (1) inappropriately place its resources and reputation at risk for the benefit of the funds' investors and creditors; (2) violate the limits and requirements contained in sections 23A and 23B of the Federal Reserve Act and Regulation W, other applicable legal requirements, or any special supervisory condition imposed by the agencies; or (3) create an expectation that the bank will prop up the advised fund. Further, the agencies expect banking organizations to maintain appropriate controls over investment advisory activities[3] that include:

- Establishing alternative sources of emergency support from the parent holding company, non-bank affiliates or external third parties prior to seeking support from the bank.
- Instituting effective policies and procedures for identifying potential circumstances triggering the need for financial support and the process for obtaining such support. In the limited instances that the bank provides financial support, the bank's procedures should include an oversight process that requires formal approval from the bank's board of directors, or an appropriate board designated committee, independent of the investment advisory function. The bank's audit committee also should review the transaction to ensure that appropriate policies and procedures were followed.
- Implementing an effective risk management system for controlling and monitoring risks posed to the bank by the organization's investment advisory activities. Risk controls should include establishing appropriate risk limits, liquidity planning, performance measurement systems, stress testing, compliance reviews, and management reporting to mitigate the need for significant bank support.
- Implementing policies and procedures that ensure that the bank is in compliance with existing disclosure and advertising requirements to clearly differentiate the investments in advised funds from obligations of the bank or insured deposits.
- Ensuring proper regulatory reporting of contingent liabilities arising out of its investment advisory activities in the banking organization's published financial statements in accordance with FAS 5, and fiduciary settlements, surcharges, and other losses arising out of its investment advisory activities in accordance with the instructions for completing Call Report Schedule RC-T - Fiduciary and Related Services.

Notification

Because of the potential risks posed by the provision of financial support to advised funds, bank management should notify and consult with its appropriate federal banking agency prior to (or immediately after, in the event of an emergency) the bank providing material financial support to its advised funds. The appropriate federal banking agency will closely scrutinize the circumstances surrounding the transaction and will address situations that raise supervisory concerns.

[1]Bank advised investment funds include mutual funds, alternative strategy funds, collective investment funds, and other funds where the bank, its subsidiaries, or affiliates is the investment adviser and receives a fee for its investment advice. For purposes of this guidance, "banks" includes banks and savings associations regulated by the federal banking or thrift agencies.

[2]Banks should be aware that other legal requirements may also restrict or prohibit transactions between a bank and its advised funds, including the Investment Company Act of 1940, the Investment Advisers Act of 1940, and the Employee Retirement Income Security Act of 1974 (ERISA).

[3]The agencies acknowledge the SEC's functional regulatory authority over the investment advisory activities of SEC registered investment advisers. However, the agencies remain responsible for evaluating the consolidated risk profiles of banking organizations, which may include assessing the risks posed to the bank from the activities and obligations of any subsidiary or affiliate.

Implications of the Growth of Hedge Funds

Staff Report to the
United States Securities and Exchange Commission

September 2003

This is a staff report to the Commission. The Commission has expressed no view regarding the analysis, findings or conclusions herein.

THE CHAIRMAN

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

September 29, 2003

Hedge funds, while representing a relatively small portion of the U.S. financial markets, have grown significantly in size and influence in recent years. In June 2002, the staff of the Commission's Division of Investment Management and Office of Compliance Inspections and Examinations undertook a fact-finding mission aimed at reviewing the operations and practices of hedge funds.

After last spring's two-day roundtable on the hedge fund industry, I asked the staff to summarize its findings in a report to the Commission. I also asked the staff to include recommendations about actions that, in the judgment of the staff, the Commission might consider when addressing issues that the staff raised in its report. The substance and the language of the report represent the views of the staff. They do not represent the views of the Commission or of any individual Commissioner.

I look forward to reviewing the staff's report and accompanying recommendations with my fellow Commissioners. The staff has raised important issues for the Commission's consideration. I anticipate that we will hear strong views both in support of and in opposition to the staff's recommendations. We intend to consider these comments carefully as we continue to deliberate the appropriate extent of Commission oversight of the hedge fund industry.

William H. Donaldson

ACKNOWLEDGEMENTS

The Division of Investment Management had the able assistance of many members of the Commission staff in its study of hedge funds and preparation of this Report, including, in particular, the staff of the Office of Compliance Inspections and Examinations. The study and preparation of the Report were conducted under the supervision of Paul F. Roye, Director of the Division of Investment Management. Much of the study's field work and document review was conducted under the supervision of Lori A. Richards, Director of the Office of Compliance Inspections and Examinations.

The study team from the Division of Investment Management included: Cynthia M. Fornelli, Deputy Director; Elizabeth G. Osterman, Assistant Chief Counsel (Team Leader); Evan Geldzahler, Special Counsel (Deputy Team Leader); Jennifer B. McHugh, Senior Advisor to the Division Director; Lily R. Chiu, Senior Counsel; Wendy F. Friedlander, Senior Counsel; Martin Kimel, Senior Counsel; Stephan N. Packs, Senior Counsel; and Rochelle Kauffman Plesset, Senior Counsel.

The study team from the Office of Compliance Inspections and Examinations included: Gene A. Gohlke, Associate Director for Investment Company/Investment Adviser Examinations and Oversight; Mavis Kelly, Branch Chief; Brian H. Snively, Staff Accountant; Karen A. Stevenson, Staff Accountant; Lesley M. Ward, Staff Accountant; Mary Ann Gadziala, Associate Director/Broker-Dealer Examinations and Oversight; and Christine M. Sibille, Senior Counsel.

Many other members of the Division of Investment Management contributed to the drafting or editing of various sections of the report, including: Robert E. Plaze, Associate Director; Barry D. Miller, Associate Director; Jennifer L. Sawin, Assistant Director; Michael A. Lainoff, Assistant Director; Brian D. Bullard, Chief Accountant; Paul B. Goldman, Assistant Director; Edward J. Rubenstein, Senior Special Counsel; Karen L. Goldstein, Advisor to the Division Director; James G. Basham, Special Counsel; John M. Ganley, Senior Counsel; Vivien Liu, Senior Counsel; Susan M. Olson, Senior Counsel; Hester M. Peirce, Senior Counsel; Eric S. Purple, Senior Counsel; Jacquelyn J. Rivas, Accountant; Ernest J. C'DeBaca, Attorney-Advisor; Catherine E. Marshall, Attorney-Advisor; and Robert L. Tuleya, Attorney-Advisor.

Many members of other Divisions and Offices also made significant contributions in drafting, reviewing and commenting on the report, including: Alan L. Beller, Director, Divison of Corporation Finance; Mauri L. Osheroff, Associate Director; Amy M. Starr, Senior Special Counsel; Brian V. Breheny, Office Chief; Gerald J. Laporte, Office Chief; Julia E. Griffith, Special Counsel; Nicholas P. Panos, Special Counsel; John J. Mahon, Attorney-Advisor; Annette L. Nazareth, Director, Division of Market Regulation; Robert L.D. Colby, Deputy Director; Elizabeth K. King, Associate Director; Theodore R. Lazo, Senior Special Counsel; Mark M. Attar, Special Counsel; Brian R. Baysinger, Special Counsel; Kevin Campion, Special Counsel; Christopher Slogan, Attorney-Advisor; Laurie M. Stegman, Senior Advisor to the Division Director, Division of Enforcement; Ethiopis Tafara, Director, Office of International Affairs; Bridgett M. Neill, Senior Policy Advisor; Elizabeth Jacobs, Assistant Director; Stan Marcel, Senior Counsel; Susan F. Wyderko, Director, Office of Investor Education and Assistance;

Lawrence E. Harris, Chief Economist; Jonathan S. Sokobin, Deputy Chief Economist; Lori S. Walsh, Financial Economist; Ira Wein, Financial Economist; Harvey B. Westbrook, Financial Economist; Barbara D. Waits, Financial Analyst; and Jill Felker, Senior Counsel, Office of the General Counsel.

Many other Commission staff members provided ideas, energy and input that significantly enhanced this Report. While their names are too numerous to list, their contributions are nonetheless greatly appreciated.

Appendix A -- Summary of the Commission's Previous Studies or Investigations of Hedge funds

EXECUTIVE SUMMARY

I. Background on Report of the Implications of the Growth of Hedge Funds

At the request of the Commission, the staff has conducted a study of hedge funds, including their investment advisers and other service providers and their investors. The Commission's decision to study the hedge fund industry was based, in large part, on the growth of hedge fund assets coupled with the Commission's lack of information about these investment pools. The hedge fund industry recently has experienced significant growth in both the number of hedge funds and the amount of assets under management. Based on current estimates, 6,000 to 7,000 hedge funds operate in the United States managing approximately $600 to $650 billion in assets. In the next five to ten years, hedge fund assets have been predicted to exceed $1 trillion.

The growth in hedge funds has been fueled primarily by the increased interest of institutional investors such as pension plans, endowments and foundations seeking to diversify their portfolios with investments in vehicles that feature absolute return strategies – flexible investment strategies which hedge fund advisers use to pursue positive returns in both declining and rising securities markets, while generally attempting to protect investment principal. In addition, funds of hedge funds ("FOHF"), which invest substantially all of their assets in other hedge funds, have also fueled this growth.

The study focused on a number of key areas of staff concern, including the recent increase in the number of hedge fund enforcement cases, the role that hedge funds play in our financial markets and the implications of the Commission's limited ability to obtain basic information about hedge funds. The staff also examined the emergence of registered FOHFs – FOHFs that register under the Investment Company Act of 1940 ("Investment Company Act") so that they may offer and sell their securities to a larger number of investors and FOHFs that register under the Investment Company Act and the Securities Act of 1933 ("Securities Act") so that they may offer and sell their securities in the public market. Finally, the staff reviewed hedge fund disclosure and marketing practices, valuation practices and conflicts of interest.

The study commenced with the staff's review of 65 hedge fund advisers (both registered and unregistered) managing approximately 650 different hedge funds with over $160 billion of assets. This phase of the study included a number of on-site visits to hedge fund advisers, which were selected to provide a representative cross-section of the industry. The staff also visited several broker-dealers offering prime brokerage services to hedge funds and conducted a separate series of on-site examinations focused on the operations of registered FOHFs. In addition, the staff met with hedge fund advisers, investors, regulators and industry observers willing to share information about hedge funds.

Complementing the study, the Commission held a Hedge Fund Roundtable on May 14 and 15, 2003, and invited a broad spectrum of the hedge fund industry and interested persons to participate in a discussion of hedge fund issues. At the close of the Roundtable, Chairman

William H. Donaldson requested that the staff provide the Commission with a report of its findings and recommendations resulting from the hedge fund study. In response, the Division of Investment Management, with the assistance of the Divisions of Corporation Finance, Enforcement and Market Regulation, and the Offices of Compliance Inspections and Examinations, Economic Analysis, International Affairs and Investor Education and Assistance, has prepared this Report. The Chairman also requested public comment on the issues discussed in the Roundtable. The Commission received approximately 80 comment letters in response and those letters have been considered in preparing this Report.

The Report outlines the staff's factual findings, identifies concerns and recommends that the Commission should consider certain regulatory and other measures to improve the current system of hedge fund regulation and oversight. The views expressed in this Report are those of the staff and do not necessarily reflect the views of the Commission or the individual Commissioners.

A. Characteristics of Hedge Funds

Although financial service providers, regulators and the media commonly refer to "hedge funds," the term has no precise legal or universally accepted definition. The term generally identifies an entity that holds a pool of securities and perhaps other assets that does not register its securities offerings under the Securities Act and which is not registered as an investment company under the Investment Company Act. Hedge funds are also characterized by their fee structure, which compensates the adviser based upon a percentage of the hedge fund's capital gains and capital appreciation. Hedge fund advisory personnel often invest significant amounts of their own money into the hedge funds that they manage. As discussed in the Report, although similar to hedge funds, there are other unregistered pools of investments, including venture capital funds, private equity funds and commodity pools that generally are not categorized as hedge funds.

The investment goals of hedge funds vary among funds, but many hedge funds seek to achieve a positive, absolute return rather than measuring their performance against a securities index or other benchmark. Hedge funds utilize a number of different investment styles and strategies and invest in a wide variety of financial instruments. Hedge funds invest in equity and fixed income securities, currencies, over-the-counter derivatives, futures contracts and other assets. Some hedge funds may take on substantial leverage, sell securities short and employ certain hedging and arbitrage strategies. Hedge funds typically engage one or more broker-dealers to provide a variety of services, including trade clearance and settlement, financing and custody services.

Hedge funds often provide markets and investors with substantial benefits. For example, based on our observations, many hedge funds take speculative, value-driven trading positions based on extensive research about the value of a security. These positions can enhance liquidity and contribute to market efficiency. In addition, hedge funds offer investors an important risk management tool by providing valuable portfolio diversification because hedge fund returns in many cases are not correlated to the broader debt and equity markets.

B. Hedge Fund Organization and Operations

Hedge funds are typically organized by professional investment advisers that manage a hedge fund's investments. Hedge funds distribute securities in private offerings, traditionally "marketing" their interests through word of mouth and the personal relationships with the hedge fund's advisory personnel. Broader marketing, including use of the Internet, has become more frequent in recent years. Hedge funds generally do not have limited time horizons, although a number of factors, including an inability to consistently achieve positive returns, often contribute to a relatively shorter life span than that of other investment vehicles. Hedge fund advisers typically receive, as compensation, a management fee based on the amount of hedge fund assets (commonly 1-2 percent), plus a share of the capital gains and capital appreciation (commonly 20 percent) or some other allocation based on the fund's investment performance. Hedge funds typically agree to repurchase their own interests from investors on a limited, periodic basis, such as quarterly, often following an initial "lock-up period" during which time investors are not permitted to liquidate their investments.

Because hedge funds are not registered investment companies, they generally are not required to meet prescribed disclosure requirements. Hedge fund advisers, however, typically provide potential hedge fund investors with a private placement memorandum that discloses information about the investment strategies the hedge fund is permitted to use and an overview of how the hedge fund operates. The private placement memorandum also generally provides the adviser with the maximum flexibility in selecting, shifting and modifying its strategies. In addition, the private placement memorandum often provides the hedge fund adviser with broad discretion in valuing the hedge fund's assets. Hedge fund investors generally receive some ongoing performance information, risk analyses and portfolio profiles from their hedge fund advisers. Although not required, most hedge funds retain an auditor to conduct an annual independent audit, which, if certified, is prepared using generally accepted accounting principles.

For tax and other considerations, some hedge fund advisers create one or more "offshore" hedge funds that are organized in a foreign jurisdiction, in addition to maintaining U.S.-based hedge funds. In many cases, an offshore hedge fund is managed using trading strategies that are substantially similar to those used to manage an onshore hedge fund managed by the same adviser. These hedge funds are offered and sold to certain U.S. investors as well as foreign investors.

C. Principal Exclusions and Exemptions for Hedge Funds and Their Investment Advisers

To avoid registration and substantive regulation under the Investment Company Act, hedge funds rely on one of two exclusions from the definition of investment company. The first exclusion is available to hedge funds that have 100 or fewer investors. The second exclusion applies to hedge funds that sell their interests only to highly sophisticated investors. To rely on either exclusion, the hedge fund must restrict its offerings so that they meet the requirements for non-public offerings.

Hedge funds do not register the offer and sale of their interests under the Securities Act. As such, hedge funds may not offer their securities publicly or engage in a public solicitation. Instead, hedge funds generally sell their interests in private offerings. To meet the most commonly used regulatory "safe harbor" for conducting private offerings, hedge funds may sell their interests to an unlimited number of "accredited investors." Accredited investors include individuals with a minimum annual income of $200,000 ($300,000 with spouse) or $1 million in net worth and most institutions with $5 million in assets. Hedge funds that seek to rely on the sophisticated investor exclusion from Investment Company Act registration may sell their interests only to "qualified purchasers," a standard with significantly higher financial requirements than those necessary for accredited investors. In practice, we understand that most hedge funds sell only to investors whose wealth exceeds that required to meet the standard established for accredited investor status.

Although some hedge fund advisers choose to register voluntarily, or are registered for another reason, most advisers to hedge funds do not register under the Investment Advisers Act of 1940 ("Advisers Act"). They often rely on the "*de minimis*" exemption from registration for investment advisers with 14 or fewer clients. Under Commission rules, each hedge fund counts as one client.

II. Concerns Relating to Hedge Fund Growth

As noted above, our study was, in large part, the result of the Commission's recognition that it lacks information about hedge fund advisers that are not registered under the Advisers Act and the hedge funds that they manage. Although this recognition is not new, the Commission's attention was focused again on the hedge fund industry as a result of the recent growth of the industry and the increase of investments in hedge funds by institutions. Although hedge fund investment advisers are subject to the antifraud provisions of the federal securities laws, they are not subject to any reporting or standardized disclosure requirements, nor are they subject to Commission examination. Consequently, the Commission has only indirect information about these entities and their trading practices and, we believe, is hampered in its ability to develop regulatory policy as hedge funds become more important participants in our financial markets. We are concerned about our inability to examine hedge fund advisers and evaluate the effect of the strategies used in managing hedge funds on our financial markets. We also are concerned about the lack of applicable regulatory measures necessary to ensure that material information to assist investors in making fully informed investment decisions is available.

The Commission's inability to examine hedge fund advisers has the direct effect of putting the Commission in a "wait and see" posture vis-à-vis fraud and other misconduct. The Commission typically is able to take action with respect to such fraud and other misconduct only after it receives relevant information from third parties (for example, investors or service providers), and frequently only after significant losses have occurred. In contrast, we believe that our examination program not only allows the Commission to identify misconduct by registered investment advisers earlier, but it also assists in identifying and possibly preventing certain misconduct from developing into fraud.

We also are concerned that some hedge fund investors may not always receive useful information about the investment adviser and its management of the fund. In addition, we believe that disclosure to some hedge fund investors could be improved to address conflicts of interests of hedge fund advisers.

One of our key concerns relates to the manner by which hedge fund advisers value hedge fund assets. The broad discretion that these advisers have to value assets and the lack of independent review over that activity gives rise to questions about whether some hedge funds' portfolio holdings are accurately valued. Our concern not only reflects our recognition of the incentives that may cause an adviser to inaccurately value hedge fund assets, but it also reflects our concern that registered funds that invest their assets in hedge funds may lack access to information that enables them to "fair value" their interests in hedge funds and therefore accurately calculate their net asset value.

In addition, we have observed various uses of the Internet by hedge fund advisers to communicate with investors. We are taking the opportunity in this Report to reiterate the Commission's statement that the analysis historically applied to determine whether an offering is part of a general solicitation or public offering has not changed in the context of offerings made through electronic sources. Separately, however, we recommend to the Commission that additional consideration be given to whether hedge funds that offer and sell their securities solely to "qualified purchasers," as defined under the Investment Company Act, should be subject to the limitation that such funds only make private offerings of their securities.

III. Staff Recommendations Relating to Hedge Fund Advisers, Funds of Hedge Funds and Hedge Funds

A. The Commission Should Consider Requiring Hedge Fund Advisers To Register as Investment Advisers under the Advisers Act, Taking into Account Whether the Benefits Outweigh the Burdens of Registration

The staff recommends that the Commission consider revising its rules under the Advisers Act to require hedge fund advisers to register as investment advisers. Amending the rules under the Advisers Act would require hedge fund advisers to "look through" any hedge funds under their management and count each investor in each hedge fund as a separate client of the adviser. In practical terms, this would result in the registration of most large hedge fund advisers. The staff further recommends that the Commission consider amending its rules to require that registered hedge fund advisers file with the Commission, and deliver to investors, a disclosure statement specifically designed for hedge fund investors.

Registration of hedge fund advisers would have several benefits. First, registered hedge fund advisers would become subject to the Commission's regular inspections and examinations program. Effective Commission oversight could lead to earlier detection of actual and potential misconduct, help to deter fraud and encourage a culture of compliance and controls. Second, the Commission would be authorized to collect basic and meaningful information about the activities of hedge fund advisers and hedge funds, which are becoming increasingly influential participants

in the U.S. financial markets. Third, Advisers Act registration would enable the Commission to require hedge fund advisers to disclose information about issues important to investors, such as conflicts arising from side-by-side management of hedge funds and other client accounts and hedge fund advisers' relationships with prime brokers. Fourth, registration of hedge fund advisers under the Advisers Act would effectively increase the minimum investment requirement for direct investments in certain hedge funds because registered advisers are generally prohibited from charging performance fees unless investors have $750,000 invested with the adviser or have a net worth of $1.5 million.

Importantly, Advisers Act registration would not impede the manner in which a hedge fund adviser invests or operates a hedge fund. Registration would not place restrictions on a hedge fund adviser's ability to trade securities, use leverage, sell securities short or enter into derivative transactions. Registration would also not require the disclosure of hedge fund proprietary trading strategies and portfolio positions, nor would it result in the public identification of the hedge fund's investors.

B. The Commission and its Staff Should Consider Addressing Certain Valuation, Suitability and Fee Disclosure Issues Relating to Registered FOHFs

The Commission should consider requiring, through rulemaking, that all registered investment companies that invest their assets in hedge funds, including registered FOHFs, have policies and procedures designed to ensure that funds and their boards value their interests in hedge funds in a manner consistent with the requirements of the Investment Company Act. To address concerns that registered FOHF investors do not understand the impact of multiple layers of fees, the Commission should adopt its proposed rulemaking to require all registered investment companies, including registered FOHFs, to disclose in their prospectus fee tables the estimated expenses of the company's underlying fund interests. To address concerns about registered FOHFs exposing investors to levels and types of risks that are not appropriate for those investors, the Commission should continue to encourage the examination staffs of the Commission and the NASD to be vigilant in identifying violations of broker-dealer suitability obligations with respect to the sale of all registered FOHFs.

C. The Commission Should Consider Permitting General Solicitation in Fund Offerings Limited to Qualified Purchasers

The staff recommends that the Commission consider eliminating the prohibition on general solicitation or advertising in offerings by hedge funds that rely on the exclusion from the definition of an investment company for hedge funds that permit investments only by highly sophisticated investors. Permitting pooled investment vehicles, including hedge funds, which limit their investors to this higher standard to engage in a general solicitation could facilitate capital formation, without raising significant investor protection concerns.

D. The Staffs of the Commission and the NASD Should Monitor Closely Capital Introduction Services Provided by Broker-Dealers

Commission and NASD examiners should continue to monitor prime brokers' capital introduction practices. In addition, the staff should consider whether broker-dealers' suitability and other regulatory obligations are being met in connection with the offering of hedge funds interests.

E. The Commission Should Encourage the Hedge Fund Industry To Embrace and Further Develop Best Practices

The Commission should encourage those involved in the hedge fund industry to embrace existing "best practices" and refine and improve these best practices to supplement current conflict management practices.

F. The Commission Should Continue Its Efforts To Improve Investor Education Regarding Hedge Funds

In light of the publicity surrounding hedge funds, as well as the advent of registered FOHFs, there is a greater need to promote investor education regarding hedge funds, their investment strategies and their operations. In addition to making investors aware of the potential for fraud in hedge funds, we are also concerned that many investors may not realize the correlation between risk and return – that higher risk inevitably accompanies potentially higher returns.

IV. The Commission Should Consider Issuing a Concept Release To Examine the Wider Use of Hedge Fund Investment Strategies in Registered Funds

Some commenters have asserted that retail investors could benefit from greater access to absolute return strategies and hedge fund investment techniques. The Commission should consider issuing a concept release requesting comment on this topic generally and focusing on issues such as whether: (1) current restrictions placed on registered funds' use of leverage and short selling should be relaxed; (2) an absolute return strategy, especially in connection with a performance fee tied to achieving an absolute return, has a positive effect on aligning the interests of hedge fund advisers and investors; and (3) additional investor education initiatives would be necessary to educate investors about absolute return strategies and risks.

Staff Report

I. Investigation by the Staff of the Commission

Over the past 35 years, the Commission and the staff have periodically conducted or participated in a number of studies about hedge funds.[1] While some of these studies were prompted by particular events, others were part of a program of Commission surveillance to review aspects of the securities markets. Previous studies often focused on the impact of hedge fund operations on the stability of the financial markets. These studies examined, among other things, trading and brokerage practices, including the use of short selling and leverage by hedge funds, the systemic risks posed by hedge funds and the exposure of banks and other counterparties to hedge funds and other highly-leveraged institutions.

The considerable growth of the hedge fund industry in recent years prompted the Commission to authorize the staff to examine hedge funds once again.[2] Although hedge funds remain a relatively small portion of the U.S. financial markets,[3] the rate of growth of hedge funds has been substantially greater than that of other sectors.[4] In addition, hedge funds have a growing role in our securities markets as large and frequent traders of securities.

---

1 See Appendix A for a chronological discussion of the Commission's major studies or investigations of hedge funds.

2 Consistent with previous hedge fund studies, the staff has no reliable data on the number of hedge funds in existence or the amount of hedge fund assets under management. Participants at the Commission's May 14-15, 2003 Hedge Fund Roundtable ("Roundtable") estimated that there are approximately 6,000 hedge funds currently operating in the United States, with approximately $600 billion in assets under management. Other estimates vary greatly. The Commission estimated in 1992, based on media reports, that there were approximately 400 hedge funds in existence. See Letter from Richard C. Breeden, Chairman, U.S. Securities and Exchange Commission, to Edward J. Markey, Chairman, Subcommittee on Telecommunications and Finance, Committee on Energy and Commerce, U.S. House of Representatives (June 12, 1992) ("Breeden Letter").

3 For example, the total market value of corporate equities in the U.S. stock market at the end of 2002 was $11.8 trillion. Federal Reserve Statistical Release Z.1, *Flow of Funds Accounts of the United States - Flows and Outstanding,* available at http://www.federalreserve.gov/releases/Z1/20030605/.

4 According to a Roundtable participant, hedge fund assets grew from $50 billion in 1993 to $592 billion in 2003, an increase of 1084 percent. Comment submitted by Roundtable Panelist Charles J. Gradante on behalf of the Hennessee Group LLC at 4-5 ("Hennessee Group Comment Letter"). By contrast, over the decade from December 1992 to December 2002, the number of mutual fund portfolios increased by 116 percent, from 3,824 to 8,256, and their assets increased by 289

As more fully discussed below, the concerns that prompted the Commission's current examination of hedge funds involve not simply the growth in the number of hedge funds and their assets under management, but more importantly, the causes and implications of that growth. They also reflect the Commission's interest in determining whether the recent increase in the number of hedge fund frauds is a result of this growth, and whether certain types of offenses are endemic to hedge funds. Finally, the Commission was concerned about the potential impact that the growth in hedge fund assets and activities may have on our financial markets.[5]

Our examination began in June 2002, and included reviews of both registered and unregistered investment advisers that manage hedge funds. The staff also had on-site discussions with a number of hedge fund advisers.[6] In addition, the staff met or spoke with a variety of experts in their respective fields to get their perspectives on the hedge fund industry. This group included legal and accounting experts, chief investment officers, risk managers, prime brokers, trade industry representatives, hedge fund consultants and representatives from foreign and domestic regulators.

In May 2003, the Commission hosted a Roundtable to provide a public forum for discussion and debate about the implications of hedge fund growth. The Roundtable brought together representatives from the hedge fund industry and other interested persons to discuss issues relating to hedge funds, and to offer their recommendations.[7] In addition, the Commission

---

percent from $1.6 trillion to $6.4 trillion. See The Investment Company Institute, *2003 Mutual Fund Fact Book: A Guide to Trends and Statistics in the Mutual Fund Industry* 63 (43rd ed. 2003). In that same period, assets of insurance companies increased by 110 percent (from $1.6 trillion to $3.3 trillion), assets of commercial banks grew by 100 percent (from $3.5 trillion to $7 trillion), and deposits of commercial banks increased by 79 percent (from $2.5 trillion to $4.5 trillion). See Federal Reserve Statistical Release Z.1, supra note 3; Federal Reserve Statistical Release H.8, *Assets and Liabilities of Commercial Banks in the United States*, available at http://www.federalreserve.gov/releases/Z1/20030605/; http://www.federalreserve.gov/releases/z1/current/data.htm.

5 The Commission recognized over 30 years ago that hedge fund trading raises special concerns with respect to their impact on the securities markets. See *35th Annual Report*, U.S. Securities and Exchange Commission 18 (1969) ("[b]ecause hedge funds are so strongly performance-oriented, they may have a greater impact on the securities markets than their asset size would indicate").

6 The staff selected hedge fund investment advisers based on their: (1) hedge fund assets under management; (2) number of hedge funds under management; (3) hedge fund investment objectives; (4) status and length of operations; (5) Commission registration status; and (6) additional advisory services provided.

7 A wide range of persons involved in the hedge fund industry participated in the Roundtable, including hedge fund advisers, consultants, service providers (such as prime brokers, auditors and

invited the public to submit written comments to the Commission relating to the growth and investor protection implications of hedge funds. The Commission received approximately 80 comment letters addressing these topics, which the staff considered in connection with the preparation of this Report.[8]

II. Legal Structure and Benefits of Hedge Funds

A. What is a Hedge Fund

Although there is no universally accepted definition of the term "hedge fund,"[9] the term generally is used to refer to an entity that holds a pool of securities and perhaps other assets, whose interests are not sold in a registered public offering and which is not registered as an investment company under the Investment Company Act. Alfred Winslow Jones is credited with establishing one of the first hedge funds as a private partnership in 1949. That hedge fund invested in equities and used leverage and short selling to "hedge" the portfolio's exposure to movements of the corporate equity markets.[10] Over time, hedge funds began to diversify their investment portfolios to include other financial instruments and engage in a wider variety of investment strategies. Today, in addition to trading equities, hedge funds may trade fixed income securities, convertible securities, currencies, exchange-traded futures, over-the-counter derivatives, futures contracts, commodity options and other non-securities investments. Furthermore, hedge funds today may or may not utilize the hedging and arbitrage strategies that

---

attorneys), investment bankers and hedge fund investors. Academics and foreign and U.S. regulators also participated in the Roundtable. A copy of the webcast and a transcript of the Roundtable discussions are available on the Commission's website. See http://www.connectlive.com/events/sechedgefunds/; http://www.sec.gov/spotlight/hedgefunds/hedge1trans.txt and http://www.sec.gov/spotlight/hedgefunds/hedge2trans.txt.

8 See *Notice of Roundtable Discussions; Request for Comment,* Advisers Act Release No. 2117 (Mar. 26, 2003). All comments received in response to the request are available from SEC public reference by calling (202) 942-8090, or by writing to: publicinfo@sec.gov. In addition, comments submitted by Roundtable panelists are available at http://www.sec.gov/spotlight/hedgefunds/hedge-parts.htm.

9 One Roundtable participant submitted a selection of definitions and descriptions of the term "hedge fund" that illustrates the diversity of views about that term. See Comment submitted by Roundtable Panelist David A. Vaughan.

10 Carol Loomis, *Hard Times Come to Hedge Funds* ("Loomis"), Fortune 100, 101 (Jan. 1970). One commenter suggested that the first hedge funds were merely implementing investment strategies first used by the proprietary trading desks of investment banks. See Hennessee Group Comment Letter, supra note 4, at 2.

hedge funds historically employed, and many engage in relatively traditional, long-only equity strategies.

B. Market Benefits of Hedge Funds

Hedge funds seek to achieve positive investment returns, often with less volatility than traditional asset classes such as stocks and bonds. Hedge funds engage in a wide variety of investment strategies, such as investing in distressed securities, illiquid securities, securities of companies in emerging markets and derivatives, as well as pursue arbitrage opportunities, such as those arising from possible mergers or acquisitions. They typically are managed by entrepreneurs who employ more complicated, flexible investment strategies than advisers at mutual funds, brokerage firms and bank trust departments.

Hedge funds can provide benefits to financial markets by contributing to market efficiency and enhancing liquidity. Many hedge fund advisers take speculative trading positions on behalf of their managed hedge funds based on extensive research about the true value or future value of a security. They may also use short-term trading strategies to exploit perceived mispricings of securities. Because securities markets are dynamic, the result of such trading is that market prices of securities will move toward their true value. Trading on behalf of hedge funds can thus bring price information to the securities markets, which can translate into market price efficiencies.[11] Hedge funds also provide liquidity to the capital markets by participating in the market.

Hedge funds play an important role in a financial system where various risks are distributed across a variety of innovative financial instruments. They often assume risks by serving as ready counterparties to entities that wish to hedge risk. For example, hedge funds are buyers and sellers of certain derivatives, such as securitized financial instruments, that provide a mechanism for banks and other creditors to un-bundle the risks involved in real economic activity. By actively participating in the secondary market for these instruments, hedge funds can help such entities to reduce or manage their own risks because a portion of the financial risks are shifted to investors in the form of these tradable financial instruments. By reallocating financial risk, this market activity provides the added benefit of lowering the financing costs

---

[11] "[M]any of the things which [hedge funds] do . . . tend to refine the pricing system in the United States and elsewhere. And it is that really exceptionally and increasingly sophisticated pricing system which is one of the reasons why the use of capital in this country is so efficient . . . there is an economic value here which we should not merely dismiss . . . I do think it is important to remember that [hedge funds] . . . , by what they do, they do make a contribution to this country." Testimony of Alan Greenspan, Chairman of the Board of Governors of the Federal Reserve, Before the House Committee on Banking and Financial Services (Oct. 1, 1998).

shouldered by other sectors of the economy. The absence of hedge funds from these markets could lead to fewer risk management choices and a higher cost of capital.

Hedge funds also can serve as an important risk management tool for investors by providing valuable portfolio diversification. Hedge fund investment strategies are typically designed to protect investment principal. Hedge funds frequently use financial instruments (e.g., derivatives) and techniques (e.g., short selling) to hedge against market risk and construct a conservative investment portfolio -- one designed to preserve wealth. In addition, hedge fund investment performance can exhibit low correlation to that of traditional investments in the equity and fixed-income markets.[12] Institutional investors have used hedge funds to diversify their investments based on this historic low correlation with overall market activity.

C. Pooled Investment Vehicles that Are Not Hedge Funds

Hedge funds are often compared to registered investment companies. In addition, unregistered investment pools, such as venture capital funds, private equity funds and commodity pools, are sometimes referred to as hedge funds. Although all of these investment vehicles are similar in that they accept investors' money and generally invest it on a collective basis,[13] they also have characteristics that distinguish them from hedge funds.

1. Registered Investment Companies

As a practical matter, hedge funds are similar to registered investment companies in a number of respects. Both are entities that issue securities to investors and hold pools of securities and perhaps other assets through which investors can obtain, among other things, investment diversification and professional asset management by an investment adviser who typically organizes the pool. Hedge funds and registered investment companies may invest in similar types of securities and may even share similar investment strategies.

Registered investment companies, however, also differ from hedge funds in a number of significant respects, including the extent to which they are regulated. Registered investment companies are registered with the Commission and are subject to the provisions of the Investment Company Act. Their securities offerings are almost always registered with the Commission and they are subject to the disclosure and reporting requirements of the federal

---

12 See, e.g., Mark J.P. Anson, *Handbook of Alternative Assets* 37-40 (2002) ("*Handbook of Alternative Assets*").

13 But for certain exclusions set forth in the Investment Company Act, all of these vehicles would meet the definition of investment company in Section 3(a) of the Investment Company Act. See infra Part III.A.1. and 2.

securities laws. Finally, investment advisers to registered investment companies are required to register with the Commission under the Advisers Act.

Registered investment companies, which register their securities offerings under the Securities Act, generally may offer and sell their securities to any investor,[14] including investors who are not financially sophisticated. Most registered investment companies have a board of directors, a majority of whom are independent of the investment companies' investment adviser.[15] The board is responsible for selecting and overseeing the activities of the company's investment adviser and other service providers and for generally overseeing the company's operations.

In addition, registered investment companies are subject to extensive operational restrictions designed to prevent the potential for abuse that exists when an investment adviser has control of the assets of other persons who do not actively oversee the management of those assets. For example, registered investment companies are subject to regulations concerning the computation of the fund's net asset value,[16] as well as regulations designed to protect against

---

[14] Recently, a number of hedge funds that invest all or substantially all of their assets in other hedge funds have begun registering under the Investment Company Act as closed-end investment companies, and many have also registered their securities offerings under the Securities Act. See infra Part IV.J. (discussing funds of hedge funds).

[15] See *Interpretive Matters Concerning Independent Directors of Investment Companies*, Investment Company Act Release No. 24083 text accompanying n. 4 (Oct. 14, 1999) ("Congress intended to place independent directors in the role of 'independent watchdogs,' who would furnish an independent check upon the management of funds and provide a means for the representation of shareholder interests in fund affairs.")(citations omitted).

[16] Under the Investment Company Act, a registered investment company must value its portfolio securities using market quotations or, if market quotations are not readily available, fair value as determined in good faith by the company's board of directors. See Section 2(a)(41) of the Investment Company Act and Rule 2a-4 thereunder. See also Accounting Series Release No. 118, Financial Reporting Codification (CCH) §404.03 (Dec. 23, 1970) ("ASR No. 118"); Accounting Series Release No. 113, Financial Reporting Codification (CCH) §404.04 (Oct. 21, 1969); Letters to Craig S. Tyle, General Counsel, Investment Company Institute, from Douglas Scheidt, Associate Director and Chief Counsel, Division of Investment Management (Dec. 8, 1999; Apr. 30, 2001). Most boards fulfill their obligations by approving and monitoring the implementation of valuation procedures and methodologies. Boards of registered investment companies are also required to continuously review the appropriateness of their valuation methodologies. See ASR No. 118.

conflicts of interest and limit leverage (and consequently certain trading strategies).[17] They also are subject to regulations requiring shareholder reports.[18]

2. *Private Equity Funds*

A private equity fund, like a hedge fund, is an unregistered investment vehicle in which investors pool money to invest in securities. Private equity funds concentrate their investments in unregistered (and typically illiquid) securities. Both private equity funds and domestic hedge funds are typically organized as limited partnerships.[19] Because these entities rely on an exemption from registration of the offer and sale of their securities, the managers/sponsors of both private equity funds and hedge funds solicit investors directly, or through a registered broker-dealer, rather than through general solicitation, general advertising or a public offering of the securities. The investors in private equity funds and hedge funds typically include high net worth individuals and families, pension funds, endowments, banks and insurance companies.[20] Like hedge funds, many private equity funds establish offshore "mirror" funds that are typically managed by the general partner of the companion U.S. fund and have similar investments.

Private equity funds, however, differ from hedge funds in a number of significant ways. Private equity investors typically commit to invest a certain amount of money with the fund over the life of the fund, and make their contributions in response to "capital calls" from the fund's general partner. Because private equity funds typically do not retain a pool of uninvested capital, their general partners make a capital call when they have identified or expect to identify a portfolio company in which the private equity fund will invest.[21] Private equity funds are long-

---

17 See Investment Company Act Sections 10(f); 17 (conflicts of interest) and 18 (leverage).

18 See Investment Company Act Section 30(e) and Rule 30e-1 thereunder.

19 See George W. Fenn, Nellie Lang and Stephen Prowse, *The Economics of the Private Equity Market,* Staff Study of the Board of Governors of the Federal Reserve System 41 (1995). Like domestic hedge funds, some private equity funds are organized as limited liability companies and, occasionally, corporations.

20 "[I]ndividuals and families account for less than 10 percent of the assets invested in private equity funds, pension funds account for about 30 percent, endowments account for about 20 percent, and banks and insurance companies account for about 40 percent." Secretary of the Treasury, Board of Governors of the Federal Reserve System, and Securities and Exchange Commission, *A Report to Congress in Accordance with § 356(c) of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001* n. 95 (Dec. 31, 2002) ("Patriot Act Report").

21 A hedge fund investor, by contrast, generally can decide when and how much to invest in the fund.

term investments, provide for liquidation at the end of the term specified in the fund's governing documents, and offer little, if any, opportunity for investors to redeem their investments.[22] A private equity fund, however, may distribute cash to its investors when it sells its portfolio investment, or it may distribute the securities of a portfolio company (assuming the portfolio company has complied with the registration requirements of the Securities Act in connection with the distribution) to its investors.

3. Venture Capital Funds

Venture capital funds are unregistered investment vehicles, which are structurally similar to hedge funds and attract similar types of investors.[23] Venture capital pools are generally organized, however, to invest in the start-up or early stages of a company.

Venture capital funds have the same features that distinguish private equity funds generally from hedge funds, such as mandatory capital contributions over the life of the fund and the long-term nature of the investment. In addition, unlike hedge fund advisers, general partners of venture capital funds often play an active role in the companies in which the funds invest, either by sitting on the board of directors or becoming involved in the day-to-day management of these companies. In contrast to a hedge fund, which may hold an investment in a portfolio security for an indefinite period based on market events and conditions, a venture capital fund typically seeks to liquidate its investment once the value of the company increases above the value of the investments.

4. Commodity Pools

Commodity pools are investment trusts, syndicates or similar enterprises that are operated for the purpose of trading commodity futures. The investment concentration in commodity futures distinguishes commodity pools from hedge funds and the other investment vehicles

---

[22] There is typically no formal secondary market for shares in a private equity fund, although there may be a small informal secondary market comprised of private equity funds that buy interests in other established private equity funds. In 1999, five private equity funds raised $1.6 billion for purchases of secondary interests in other private equity funds. See Patriot Act Report, supra note 20, at n. 99 (citation omitted). See also David M. Toll, *Private Equity Primer*, in *Galante's Venture Capital & Private Equity Directory*.

[23] See National Venture Capital Association, *2003 National Venture Capital Association Yearbook* 9 (2003). The National Venture Capital Association estimates that 1,798 venture capital funds were in existence in 2002, with $253 billion in capital under management. It also estimates that, in 2002, individuals and families accounted for approximately nine percent of the invested assets in venture capital funds; pension funds accounted for 42 percent; endowments accounted for 21 percent; and banks, insurance companies and corporations accounted for 28 percent. Id. at 10.

discussed above.[24] Commodity pool operators, which manage commodity pools, are subject to oversight by the Commodity Futures Trading Commission ("CFTC"). The CFTC has recently adopted rules which sharpen the distinction between hedge funds and commodity pools.[25]

D. Domestic and Offshore Hedge Funds

The corporate structure of a hedge fund depends primarily on whether the fund is organized under U.S. law ("domestic hedge fund") or under foreign law and located outside of the United States ("offshore hedge fund"). The investment adviser of a domestic hedge fund often operates a related offshore hedge fund, either as a separate hedge fund or often by employing a "master-feeder" structure that allows for the unified management of multiple pools of assets for investors in different taxable categories.[26]

1. Domestic Hedge Funds

Domestic hedge funds are usually organized as limited partnerships to accommodate investors that are subject to U.S. income taxation.[27] The fund's sponsor typically is the general partner and investment adviser. The sponsor also typically handles marketing and investor services. Domestic hedge funds typically maintain contractual relationships with one or more broker-dealers, which provide clearance and settlement and financing services and may provide a

---

[24] Commodity pools also differ from hedge funds, private equity funds and venture capital funds in that commodity pools frequently rely on Section 3(b)(1) of the Investment Company Act to exclude them from the definition of investment company. Section 3(b)(1) excludes from that definition any issuer that is directly or indirectly primarily engaged in a business other than investing or trading in securities.

[25] See infra Part III.E.1 (discussing the regulation of commodity pools).

[26] The master fund is usually organized as a corporation, such as an international business company, under non-U.S. law. It offers shares to one or more domestic feeder funds and one or more offshore corporate feeder funds, all of which share common investment strategies and objectives. See Gerald T. Lins ("Lins"), *Hedge Fund Organization*, in *Hedge Fund Strategies: A Global Outlook* 98, 100-101 (Brian R. Bruce, ed., 2002).

[27] Hedge funds may also take the form of limited liability companies ("LLCs") or business trusts. Limited partnerships, LLCs and business trusts are generally not separately taxed and, as a result, income is taxed only at the level of the individual investor. Each of the three forms also limits investor liability. LLCs offer the additional benefit of limited liability for fund advisers, but some states and foreign countries tax LLCs as corporations. See David A.Vaughan and Margaret A. Bancroft, *Structuring Issues for Hedge Funds*, in *The Capital Guide to Starting a Hedge Fund – A U.S. Perspective* 31, 32 (2001).

variety of incidental services.[28] A domestic hedge fund also may employ executing brokers, accountants, lawyers, custodians, administrators, placement agents, registrars and transfer agents. Domestic hedge funds typically do not have a board of directors or any oversight body analogous to the board of directors of a registered investment company.

2. *Offshore Hedge Funds*

Offshore hedge funds are typically organized as corporations in countries such as the Cayman Islands, British Virgin Islands, the Bahamas, Panama, the Netherlands Antilles or Bermuda. Offshore funds generally attract investment of U.S. tax-exempt entities, such as pension funds, charitable trusts, foundations and endowments, as well as non-U.S. residents. U.S. tax-exempt investors favor investments in offshore hedge funds because they may be subject to taxation if they invest in domestic limited partnership hedge funds.[29] Offshore hedge funds may be organized by foreign financial institutions or by U.S. financial institutions or their affiliates. Sales of interests in the United States in offshore hedge funds are subject to the registration and antifraud provisions of the federal securities laws.

Offshore hedge funds typically contract with an investment adviser, which may employ a U.S. entity to serve as subadviser.[30] An offshore hedge fund often has an independent fund administrator, also located offshore, that may assist the hedge fund's adviser to value securities and calculate the fund's net asset value, maintain fund records, process investor transactions, handle fund accounting and perform other services.[31] An offshore hedge fund sponsor typically appoints a board of directors to provide oversight activities for the fund. These funds, especially those formed more recently, may have directors who are independent of the investment adviser.

[28] See Roundtable Transcript, May 14 (statement of Richard Lindsey). See infra Part IV.E.2 (discussing the role of broker-dealers/prime brokers).

[29] Under U.S. income tax laws, a tax-exempt organization (such as an ERISA plan, a foundation or an endowment) engaging in an investment strategy that involves borrowing money is liable for a tax on "unrelated business taxable income" ("UBTI"), notwithstanding its tax-exempt status. The UBTI tax can be avoided by the tax-exempt entity by investing in non-U.S. corporate structures (i.e., offshore hedge funds). See http://www.greencompany.com/HedgeFunds/OffDocOffshore.shtml.

[30] Lins, supra note 26 at 100**.**

[31] According to one Roundtable participant, there is a "trend towards more independent administration for domestic [hedge] funds, which traditionally have handled administration through fund affiliates." Roundtable Transcript, May 14 (statement of William Keunen). See also Roundtable Transcript, May 14 (statement of Joel Press). See infra Part IV.E.3 (discussing the role of offshore administrators).

III. The Regulation of Hedge Funds and Their Advisers

A. Hedge Funds and the Investment Company Act of 1940

Most hedge funds have substantial investments in securities that would cause them to fall within the definition of investment company under the Investment Company Act.[32] Hedge funds, however, typically rely on one of two statutory exclusions from the definition of investment company, which enables them to avoid the regulatory provisions of that Act.

1. Section 3(c)(1)

Section 3(c)(1) of the Investment Company Act excludes from the definition of investment company any issuer whose outstanding securities (other than short-term paper) are beneficially owned by not more than 100 investors and which is not making and does not presently propose to make a public offering of its securities.[33] In general, ownership by a corporate investor is counted as one investor in testing compliance with the 100-investor limitation of Section 3(c)(1).[34] Section 3(c)(1) reflects Congress's view that privately placed

---

[32] Section 3(a)(1)(A) of the Investment Company Act defines an investment company as an issuer which is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting or trading in securities. Section 3(a)(1)(C) of that Act defines an investment company as an issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of its total assets (exclusive of government securities and cash items) on an unconsolidated basis. Many hedge funds meet both of these definitions.

[33] Notwithstanding the 100-investor limitation, a hedge fund that is incorporated offshore, but relies on Section 3(c)(1) in order to offer its securities privately to U.S. residents, may have more than 100 investors. The staff of the Division of Investment Management takes the position that an offshore hedge fund that relies on Section 3(c)(1) may exclude non-U.S. investors in determining whether it is in compliance with the 100-investor limitation of Section 3(c)(1). See *Touche, Remnant & Co.* (pub. avail. Aug. 27, 1984); *Investment Funds Institute of Canada* (pub. avail. Mar. 4, 1996) (staff states that it would not recommend enforcement action if an offshore hedge fund relying on Section 3(c)(1) exceeds the 100-investor limit because investors who purchased securities outside the United States have relocated to the United States). In practice, many offshore hedge funds relying on Section 3(c)(1) have more than 100 investors.

[34] If a corporate investor that is a registered investment company, or a company relying on Section 3(c)(1) or Section 3(c)(7), beneficially owns ten percent or more of the outstanding voting securities of the Section 3(c)(1) fund, the Section 3(c)(1) fund must "look-through" that corporate investor and count each of its investors as a beneficial owner of the Section 3(c)(1) fund for purposes of the 100-investor limitation. A hedge fund that relies on Section 3(c)(1) and that accepts investments from registered investment companies or entities relying on Section 3(c)(1)

investment companies owned by a limited number of investors do not rise to the level of federal interest under the Investment Company Act.[35]

Hedge funds relying on Section 3(c)(1) may not be making or proposing to make a public offering. As discussed further below, these hedge funds must comply with Section 4(2) of the Securities Act, and frequently do so by relying on the safe harbor available under Regulation D under that Act, as discussed below.[36] Consequently, hedge funds may offer their securities only to "accredited investors," and may not engage in any general solicitation or general advertising of their shares, as discussed below.

2. Section 3(c)(7)

Section 3(c)(7) of the Investment Company Act excludes from the definition of investment company any issuer whose outstanding securities are owned exclusively by persons who, at the time of acquisition of such securities, are "qualified purchasers,"[37] and which is not

---

or Section 3(c)(7), therefore, must ensure that those investors do not acquire more than ten percent of the hedge fund's outstanding voting securities so that the hedge fund may continue to rely on Section 3(c)(1).

[35] See *Investment Trusts and Investment Companies: Hearings on S. 3580 before a Subcomm. of the Senate Comm. on Banking and Currency,* 76th Cong., 3d Sess. 179 (1940).

[36] See infra Part III.B.2 (discussing Regulation D). The staff of the Division of Investment Management generally interprets the non-public offering requirement of Section 3(c)(1) consistently with the non-public offering exemptions under Section 4(2) of the Securities Act and the rules thereunder. See, e.g., *Santa Barbara Securities* (pub. avail. Apr. 8, 1983). See also *Lamp Technologies* (pub. avail. May 29, 1997; May 29, 1998) ("*Lamp*").

[37] Section 2(a)(51) of the Investment Company Act generally defines "qualified purchaser" to be: (1) any natural person who owns not less than $5 million in investments; (2) any family-owned company (as described in that section) that owns not less than $5 million in investments; (3) any other trust the trustee and settlor(s) of which are qualified purchasers that was not formed for the specific purpose of acquiring the securities of the Section 3(c)(7) fund; and (4) any person acting for its own account or the accounts of other qualified purchasers, that owns and invests on a discretionary basis not less than $25 million in investments. Rule 2a51-1 under the Investment Company Act defines the term "investments" for purposes of Section 2(a)(51), and details how the value of a qualified purchaser's investments should be calculated. Rule 2a51-3 under the Investment Company Act provides that any company may be deemed to be a qualified purchaser if each beneficial owner of the company's securities is a qualified purchaser. The staff of the Division of Investment Management takes the position that a hedge fund that is incorporated offshore but relies on Section 3(c)(7) to offer its securities privately in the United States is not subject to the qualified purchaser requirements with respect to its investors who are non-U.S. residents. See *Goodwin Proctor & Hoar* (pub. avail. Feb. 28, 1997).

making and does not at that time propose to make a public offering of its securities.[38] This exclusion reflects Congress's view that certain highly sophisticated investors do not need the protections of the Investment Company Act because those investors are in a position to appreciate the risks associated with pooled investment vehicles.[39]

A hedge fund relying on Section 3(c)(7) may accept an unlimited number of qualified purchasers for investment in the fund. As a practical matter, however, most funds relying on Section 3(c)(7) have no more than 499 investors in order to avoid the registration and reporting requirements of the Securities Exchange Act of 1934 ("Exchange Act").[40] In addition, unlike Section 3(c)(1), Section 3(c)(7) does not have a "look-through" provision in the event that a registered investment company or a private investment company owns ten percent or more of the Section 3(c)(7) fund's outstanding voting securities. A Section 3(c)(7) fund is only required to look through any company (investment company or otherwise) that invests in its shares to determine whether that company's investors are qualified purchasers if the company was "formed for the purpose" of investing in the Section 3(c)(7) fund.[41]

B. Hedge Funds and the Securities Act of 1933

One of the Securities Act's primary objectives is to provide full and fair disclosure in securities transactions. To accomplish this objective, Section 5 of the Securities Act mandates the registration with the Commission of public securities offerings and the delivery to purchasers of a prospectus containing specified categories of information about the issuer and the securities being offered, unless there is an available exemption from the registration requirements. Since limited partnership, LLC and other interests offered to investors in the case of a typical hedge fund fall within the definition of the term "securities" for purposes of the federal securities laws, the hedge funds must either register the offer and sale of the securities or rely on an exemption

---

[38] As with respect to a Section 3(c)(1) fund, the Commission has stated that the non-public offering requirement of Section 3(c)(7) should be interpreted consistently with the non-public offering exemptions under Section 4(2) of the Securities Act and the rules thereunder. *Privately Offered Investment Companies*, Investment Company Act Release No. 22597 n. 5 (Apr. 3, 1997). See supra note 36.

[39] S. Rep. No. 293, 104th Cong., 2d. Sess. 10 (1996) ("Generally, these investors can evaluate on their own behalf matters such as the level of a fund's management fees, governance provisions, transactions with affiliates, investment risk, leverage, and redemption rights.").

[40] See infra Part III.C.2 (discussing Exchange Act registration under Section 12).

[41] Rule 2a51-3 generally provides, in relevant part, that an entity may not be deemed to be a qualified purchaser if it was formed for the specific purpose of acquiring the securities offered by a Section 3(c)(7) fund unless each beneficial owner of an entity's securities is a qualified purchaser.

from registration. Offerings of hedge fund securities in the United States generally rely on the private offering exemption in Section 4(2) of the Securities Act or Rule 506 promulgated under that Section to avoid the registration and prospectus delivery requirements of Section 5.

1. *The Private Offering Exemption of the Securities Act*

Section 4(2) of the Securities Act exempts from the registration and prospectus delivery requirements of Section 5 any "transactions by an issuer not involving any public offering." The Section 4(2) exemption, commonly known as the "private offering" or "private placement" exemption, requires no notice or other filing or regulatory approval as a prerequisite for its availability.

The procedures appropriate to establish the availability of an exemption under Section 4(2) have evolved over time based upon judicial decisions, Commission interpretive guidance and shared experience. The Supreme Court in *Ralston Purina* stated that a private offering is an "offering to those who are shown to be able to fend for themselves" and that the availability of the exemption "turns on the knowledge of the offerees" and is limited to situations where the offerees have access to the kind of information afforded by registration under Section 5 of the Securities Act.[42]

2. *Regulation D*

a. *Rule 506*

Rule 506 of Regulation D under the Securities Act is a set of requirements promulgated by the Commission to govern private offerings. Although compliance with the Rule 506 requirements is not required to establish the availability of a private offering exemption, satisfaction of the conditions of the rule entitles an issuer to claim the Section 4(2) exemption. In this sense, Rule 506 establishes "safe harbor" criteria for the private offering exemption, but is not the exclusive means of establishing entitlement to the exemption. Because of a degree of uncertainty as to the availability of the Section 4(2) exemption, many hedge funds tailor their offering and sale procedures to the criteria specified in Rule 506.

b. *Offerings to "Accredited Investors"*

The safe harbor protection most often relied upon by hedge funds under Rule 506 exempts offerings that are made exclusively to "accredited investors."[43] Issuers are permitted

---

[42] SEC v. Ralston Purina Co., 346 U.S. 119, 125, 126-27 (1953).

[43] While Rule 506(b)(2)(i) limits the number of purchasers in a Rule 506 transaction to 35, this numerical limitation becomes irrelevant if the offering is made only to "accredited investors"

under these provisions to sell securities to an unlimited number of "accredited investors."[44] In addition, if the offering is made only to accredited investors, no specific information is required to be provided to prospective investors.

The term "accredited investors" is defined to include:

> Individuals who have a net worth, or joint worth with their spouse, above \$1,000,000, or have income above \$200,000 in the last two years (or joint income with their spouse above \$300,000) and a reasonable expectation of reaching the same income level in the year of investment; or are directors, officers or general partners of the hedge fund or its general partner; and
>
> Certain institutional investors, including: banks; savings and loan associations; registered brokers, dealers and investment companies; licensed small business investment companies; corporations, partnerships, limited liability companies and business trusts with more than \$5,000,000 in assets; and many, if not most, employee benefit plans and trusts with more than \$5,000,000 in assets.[45]

Although most of these thresholds were initially established in 1982, the Commission has modified the definition of accredited investor since then and has had the opportunity to reevaluate the thresholds.[46] Most recently, the Commission, in December 2001, proposed that the term "qualified purchaser" be defined under the Securities Act to mean "accredited investor" as defined in Rule 501(a) of Regulation D under the Securities Act.[47] At that time, the

---

because Rule 501(e)(1)(iv) provides that "accredited investors" are not counted for purposes of determining whether the issuer has exceeded the 35-purchaser limit.

[44] On its face, Rule 506 appears to permit offerings to hundreds of investors, as long as no more than 35 purchasers are not accredited investors. In the original proposing release for Regulation D, the Commission indicated that it was aware of this potential and issued this warning:

> The Commission cautions issuers . . . that depending on the actual circumstances, offerings made to such large numbers of purchasers may involve a violation of the prohibitions against general solicitation and general advertising.

Proposed Revisions of Certain Exemptions, Securities Act Release No. 6339 n. 30 (Aug. 7, 1981).

[45] See Rule 501 under the Securities Act.

[46] See *Defining the Term "Qualified Purchaser" Under the Securities Act of 1933*, Securities Act Release No. 8041 (Dec. 19, 2001) (history of accredited investor concept).

[47] Id.

Commission stated in the proposing release that the existing "accredited investor" standard struck the appropriate balance between investor protection and capital formation needs and did not propose changes to the definition.

c. General Solicitation and General Advertising

Offers and sales under Rule 506 cannot be made using any form of "general solicitation or general advertising." The current parameters of prohibited and permissible activities are set out in Rule 502(c) under the Securities Act, Commission staff no action letters, Commission releases and enforcement and private actions. The restrictions on general solicitation and general advertising in finding investors for private offerings mean that issuers and persons acting on their behalf cannot find investors through, among other things, advertisements, articles, notices or other communications published in a newspaper, magazine or similar media, cold mass mailings, broadcasts over television or radio, material contained on a web site available to the public or an e-mail message sent to a large number of previously unknown persons.[48] The restrictions also apply to any meeting or seminar where the participants have been invited by general solicitation or general advertising.

One central principle in the interpretations is that general solicitation is not present when there is a pre-existing, substantive relationship between an issuer or its broker-dealer, and the offeree. The relationship must be established at a time prior to the commencement of the private offering or, in the case of a hedge fund, 30 days before the investor can make an investment.[49] The existence of a pre-existing, substantive relationship is not the only way to avoid a general solicitation. The presence or absence of a general solicitation depends on the facts and circumstances of each particular case.

---

[48] See Rule 506 under the Securities Act; *SEC v. Inorganic Recycling Corp.*, Litigation Release No. 16322 (Sept. 30, 1999); *In the Matter of CGI Capital, Inc.*, Securities Act Release No. 7904 (Sept. 29, 2000); *In the Matter of Harry Harootunian and Professional Planning & Technologies, Inc. and In the Matter of Robert Testa*, Exchange Act Release No. 32981 (Sept. 29, 1993); *In the Matter of Kenman Corp.*, Exchange Act Release No. 21962 (Apr. 19, 1985); *In the Matter of PriorityAccess, Inc.*, Securities Act Release No. 8021 (Oct. 3, 2001); *Circle Creek Aquaculture V, L.P.* (pub. avail. Mar. 26, 1993); *H.B. Shaine & Co.* (pub. avail. May 1, 1987); *Ovation Cosmetics, Inc.* (pub. avail. Mar. 8, 1976); *Woodtrails-Seattle, Ltd.* (pub. avail. Aug. 9, 1982).

[49] Many of the interpretive letters that the staff of the Division of Corporation Finance has issued address the circumstances under which issuers and broker-dealers can establish the pre-existing substantive relationship without violating the restrictions on general solicitation and advertising. See, e.g., *Bateman Eichler, Hill Richards, Inc.* (pub. avail. Dec. 3, 1985); *E.F. Hutton Co.* (pub. avail. Dec. 3, 1985); *IPONET* (pub. avail. July 26, 1996) ("IPONET"); *Lamp,* supra note 36.

With respect to online private offerings under Regulation D, the Commission has stated that "[b]road use of the Internet for exempt securities offerings under Regulation D is problematic because of the requirement that these offerings not involve a general solicitation or advertising."[50] The Commission and staff, on numerous occasions, have made clear how the Internet can be used in private offerings of securities without running afoul of the prohibitions on general solicitation and general advertising.[51] The staff of the Division of Corporation Finance has granted no action relief where a broker-dealer, on behalf of other issuers, solicited, pre-qualified and made offers to potential investors via the Internet.[52] In a letter involving hedge funds, the staff of the Division of Corporation Finance determined that there was no general solicitation if investors were solicited, pre-qualified and able to access a password protected web site containing information on hedge funds to purchase hedge fund interests 30 days after the investor was qualified.[53]

d. Resale Restrictions

Hedge funds relying on Rule 506 must exercise reasonable care to assure that their investors are not investing with a view to distributing their interests in the fund to the public. Unrestricted resales of the interests can jeopardize the availability of Rule 506 protection even if the original sales qualify for the protection. Rule 506 provides safe harbor protection for issuers against the loss of Rule 506 protection because of resales.[54] The conditions for the safe harbor include "reasonable inquiry to determine if the purchaser is acquiring the securities for himself or for other persons" and "written disclosure . . . that the securities . . . cannot be resold unless they are registered under the [Securities] Act or unless an exemption from registration is available."[55]

[52] *IPONET*, supra note 49.

[53] *Lamp,* supra note 36. The staff of the Division of Corporation Finance also has addressed general solicitation issues in the context of other privately offered funds. See *Royce Exchange Fund, Quest Advisory Corp.* (pub. avail. Aug. 28, 1996).

[54] Rule 502 under the Securities Act is incorporated into Rule 506 under the Securities Act.

[55] Rule 502(d) under the Securities Act.

In addition, the safe harbor is conditioned upon the placement of a legend on the certificate or other document that evidences the securities.

These resale restrictions ordinarily do not present a problem for hedge funds. For a variety of business and legal reasons, the principals of hedge funds normally have no interest in encouraging resale of interests in their funds. In the usual case, therefore, transfers of the interests are prohibited without the written consent of the general partner or other manager, and there is limited liquidity of the interests through sales and redemptions by the hedge funds.

C. Hedge Funds and the Securities Exchange Act of 1934

1. Definition of "Broker" and "Dealer"

Some hedge funds may need to register with the Commission as dealers. Section 3(a)(5) of the Exchange Act generally defines a dealer as a person that is engaged in the business of buying and selling securities for its own account. The Commission historically has distinguished "dealers" from "traders." A trader is a person that buys and sells securities, either individually or in a trustee capacity, but not as part of a regular business. Entities that buy and sell securities for investment generally are considered traders, but not dealers. In contrast to dealers, which must register with the Commission in accordance with Section 15(b) of the Exchange Act, there is no registration requirement for traders.[56]

2. Exchange Act Registration Under Section 12

The Exchange Act contains registration and reporting provisions that may apply to hedge funds. Section 12 of the Exchange Act and the rules promulgated thereunder govern the registration of classes of equity securities traded on an exchange or meeting the holder of record and asset tests of Section 12(g) and related rules. Section 12(g) and Rule 12g-1 thereunder require that an issuer having 500 holders of record of a class of equity security (other than an exempted security) and assets in excess of $10 million at the end of its most recently ended fiscal year register the equity security under the Exchange Act. Registration of a class of equity security subjects domestic registrants to the periodic reporting requirements of Section 13, proxy requirements of Section 14 and insider reporting and short swing profit provisions of Section 16 of the Exchange Act. Although hedge fund interests fall within the definition of equity security

---

[56] See generally Testimony of Richard R. Lindsey, Director, Division of Market Regulation, U.S. Securities and Exchange Commission, *Concerning Hedge Fund Activities in the U.S. Financial Markets*, Before the House Committee on Banking and Financial Services (Oct. 1, 1998); Testimony of Arthur Levitt, Chairman, U.S. Securities and Exchange Commission, *Concerning Hedge Fund Activities in the U.S. Financial Markets*, Before the House Committee on Banking, Finance and Urban Affairs (Apr. 13, 1994). See also *Davenport Management, Inc*. (pub. avail. Apr. 13, 1993); *Louis Dreyfus Corp.* (pub. avail. July 23, 1987).

under the Exchange Act, most hedge funds seek to avoid Exchange Act registration by having fewer than 500 holders of record (which in the case of hedge funds are also generally the investors).

3. Beneficial Ownership Reporting under Sections 13 and 16 of the Exchange Act

The beneficial ownership reporting rules under Sections 13(d) and 13(g) of the Exchange Act generally require that any person who, after acquiring beneficial ownership of any equity securities registered under Section 12 of the Exchange Act, beneficially owns greater than five percent of the class of equity securities, file a beneficial ownership statement containing the information required by Schedule 13D or Schedule 13G.[57] Beneficial ownership is broadly defined by Rule 13d-3 under the Exchange Act to include the power to vote or dispose of any equity securities, or the power to direct the voting or disposition of those securities. Due to the power a hedge fund's adviser may exercise over the equity securities held by the fund, both the hedge fund and its adviser generally will be deemed to beneficially own any equity securities owned by the hedge fund.[58] In certain specified circumstances, the hedge fund and its advisers may file a short form Schedule 13G in lieu of filing a Schedule 13D.[59]

In addition to the amount of equity securities beneficially owned by the reporting person and the percentage of the subject class of equity securities this amount represents, Schedule 13D requires disclosure of certain other material information regarding the reporting person (e.g., identity and background) and the acquisition of the securities (e.g., source and amount of funds or other consideration used or to be used in making the purchase; the purpose of the acquisition; contracts, arrangements, understandings or other relationships between the reporting persons with respect to any securities of the issuer, etc.). The information required to be disclosed by Schedule 13G is more limited than the information required to be disclosed by Schedule 13D.[60] Once a hedge fund and its advisers are subject to the reporting obligations of Sections 13(d) or

---

57 See Rule 13d-1(a) under the Exchange Act.

58 See Example 11 from *Adoption of Beneficial Ownership Disclosure Requirements*, Exchange Act Release No. 13291 (Feb. 24, 1977) (power over discretionary accounts represents beneficial ownership of the shares held in those accounts).

59 See Rule 13d-1(b) under the Exchange Act.

60 For example, Schedule 13G does not require as much disclosure on the background of the reporting person, does not require any disclosure as to the source of the funds used in the transaction, and does not require a statement as to the purpose of the transaction (other than a certification that the purpose is not to change or influence control over the issuer). See Instructions to Schedule 13G.

13(g), previously filed beneficial ownership statements must be amended as a result of certain changes in the information disclosed.[61]

In addition, hedge fund advisers also may be subject to the quarterly reporting obligations of Section 13(f) of the Exchange Act, which apply to any "institutional investment manager" exercising investment discretion with respect to accounts having an aggregate fair market value of at least $100 million in equity securities. An "institutional investment manager" includes any person (other than a natural person) investing in or buying and selling securities for its own account, and any person exercising investment discretion with respect to the account of any other person.[62]

Section 16 applies to every person who is the beneficial owner of more than ten percent of any class of equity security registered under Section 12 of the Exchange Act and each officer and director of the issuer of the security (collectively, "reporting persons" or "insiders"). Upon becoming a reporting person, a person is required by Section 16(a) to file an initial report with the Commission disclosing the amount of his or her beneficial ownership of all equity securities of the issuer. Section 16(a) also requires reporting persons to keep this information current by reporting to the Commission changes in ownership of these equity securities, or the purchase or sale of security-based swap agreements involving these securities.[63] Hedge funds are also subject to the short swing profit provisions of Section 16(b) of the Exchange Act.

D. Hedge Fund Advisers and the Investment Advisers Act of 1940

Virtually all hedge fund advisers meet the definition of "investment adviser" under the Advisers Act.[64] Under the Advisers Act, investment advisers must register with the Commission and comply with the provisions of that Act and Commission rules. Registered investment advisers must keep current a Form ADV that is filed with the Commission and provide a

---

61 See Rule 13d-2 under the Exchange Act.

62 See Section 13(f)(5)(A) of the Exchange Act.

63 See Section 16(a)(3)(B) of the Exchange Act.

64 Section 202(a)(11) of the Advisers Act generally defines an investment adviser as "any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities." The Advisers Act contains certain limited exceptions from this definition for banks, certain professionals, including lawyers and accountants, broker-dealers, publishers and persons giving advice only about U.S. government securities.

disclosure statement that includes the information disclosed on Part II of Form ADV to clients.[65] These disclosures provide both the Commission and investors with current information about the adviser's business practices and disciplinary history, among other things. Registered advisers must maintain required books and records[66] and submit to periodic examinations by the Commission's staff. Advisers registered with the Commission also must comply with other requirements, including those relating to safeguarding client assets that are in the adviser's custody[67] and requiring that clients be told of an adviser's adverse financial condition.[68] Registered investment advisers must also inform clients of the adviser's proxy voting practices.[69] The Advisers Act also prohibits them from defrauding their clients.[70]

Many hedge fund advisers, however, avoid registering with the Commission by relying on the Advisers Act's *de minimis* exemption under Section 203(b) of that Act. That section excludes from registration investment advisers that have had fewer than 15 clients during the preceding 12 months, do not hold themselves out generally to the public as an investment adviser and are not an investment adviser to a registered investment company.[71] For purposes of Section 203(b), current Commission rules provide that investment advisers may count a "legal organization," such as a hedge fund, as a single client.[72] Thus, an adviser may manage up to 14 hedge funds before being required to register with the Commission as an investment adviser, so long as it satisfies the "no holding out" condition. Investment advisers that are exempt from registration nevertheless are subject to the antifraud provisions of the Advisers Act.

---

65 See Rule 204-3 under the Advisers Act.

66 See Rule 204-2 under the Advisers Act.

67 See Rule 206(4)-2 under the Advisers Act.

68 See Rule 206(4)-4 under the Advisers Act.

69 See Rule 206(4)-6 under the Advisers Act.

70 Section 206(1) of the Advisers Act prohibits investment advisers from employing "any device, scheme or artifice to defraud any client or prospective client." Section 206(2) of the Advisers Act prohibits and investment adviser from engaging "in any transaction, practice or course of business which operates as a fraud or deceit upon any client or prospective client."

71 Section 203(b)(3) of the Advisers Act.

72 Rule 203(b)(3)-1 under the Advisers Act provides that an adviser may count a legal organization as a single client if the legal organization receives investment advice based on its investment objectives rather than on the individual investment objectives of its owners.

Registered investment advisers are not required to indicate whether they manage hedge funds. They are also not required to state the amount of hedge fund assets under their management. A recent survey identifying the largest hedge fund firms accounts for slightly under half of the estimated $600 billion in U.S. hedge fund assets.[73] Approximately 52 percent of the domestic advisers in this survey, managing some $158 billion of hedge fund assets, are not registered with the Commission as investment advisers.[74] There is no comprehensive database or survey of the smaller firms managing the other half of U.S. hedge fund assets – approximately another $300 billion. We expect that relatively fewer of these smaller advisers would be registered with the Commission, and that the proportion of hedge fund advisers not registered with us industry-wide may be approximately two-thirds.[75]

A number of hedge fund advisers, however, do register as investment advisers under the Advisers Act. Some are required to register because they have 15 or more advisory clients, or they advise one or more registered investment companies, and therefore are ineligible for the *de minimis* exemption. Others have registered with the Commission voluntarily because their investors demand it or for competitive reasons.[76]

---

[73] See Institutional Investor, *The Hedge Fund 100* (June 2002) ("*The Hedge Fund 100*") (The survey lists 86 U.S.-based and U.S.-registered firms managing $298 billion in hedge fund assets. It also covered 14 internationally based firms managing approximately $42 billion in hedge fund assets.).

[74] Forty-eight percent of the domestic hedge fund advisers listed in *The Hedge Fund 100* are registered with the Commission and manage a total of $140 billion in hedge funds.

[75] This expectation is based on our assumption that smaller hedge fund advisers who are not named in *The Hedge Fund 100* are more likely to operate without registering with the Commission than larger hedge fund advisers. Larger hedge fund advisers are more likely to serve investors who demand registration, such as pension plans and many endowments, or to engage in other advisory activities such that the adviser is no longer eligible for the exception under Section 203(b)(3).

[76] Hennessee Group Comment Letter, supra note 4, at 14 ("Due to market forces predominantly driven by trust and ERISA fiduciaries, hedge funds are finding it necessary to become Registered Investment Advisers in order to attract capital from that market."); Roundtable Transcript, May 15 (statement of Sandra Manzke) (institutional investors are requiring that hedge fund advisers register). See also *U.S. Hedge Fund Regulations Might Help Industry in Long Run*, Reuters English News Service (May 24, 2002) ("We registered with the SEC because it was simply easier to say that we were registered. A few fraud cases have gotten attention and when someone writes a $10 million check, they want some assurances." (Quoting Jerry Paul of Quixote Capital Management LLC)).

E. Certain Other Regulatory Requirements

Depending upon their activities, in addition to complying with the federal securities laws, hedge funds and their advisers may have to comply with other laws including the Commodity Exchange Act ("CEA"), rules promulgated by the National Association of Securities Dealers ("NASD") and/or provisions of the Employment Retirement Income Security Act ("ERISA"). In addition, hedge funds may be subject to certain regulations promulgated by the Department of the Treasury, including rules relating to the prevention of money laundering. Moreover, hedge fund advisers are subject to certain state laws.

1. Regulation under the CEA

Generally, a hedge fund that engages in even a single commodity futures transaction will be deemed to be a "commodity pool" by the CFTC.[77] Similarly, the person that organizes and provides futures advice to such a hedge fund will typically fall within the statutory definitions of "Commodity Pool Operator" ("CPO") and "Commodity Trading Advisor" ("CTA"), respectively.[78] An adviser to a hedge fund that uses commodity futures typically acts as both a CPO and a CTA to that hedge fund. However, as noted below, most hedge fund advisers can now claim an exemption from registration as a CPO and CTA pursuant to exemptions that were recently adopted by the CFTC.

Once an adviser falls within the definition of CPO or CTA, it generally must register as such with the CFTC.[79] Registered CPOs and CTAs must comply with CFTC rules that impose disclosure, record keeping and periodic reporting requirements.[80] In addition, registered CPOs and CTAs must complete an annual self-audit and must submit to periodic audits conducted by

---

77 See CFTC Interpretive Letter 98-18 (Mar. 12, 1998).

78 See Section 1a(5) of the CEA (defining CPO); Section 1a(6)(A) of the CEA (defining CTA). A hedge fund adviser generally will not fall within the definition of CPO or CTA if it invests only in swaps, forward contracts or synthetic futures. These investments provide the same investment exposure as futures, but generally are not subject to regulation under the CEA.

79 See Section 4m(1) of the CEA. A person generally registers with the CFTC as a CPO or a CTA by filing a completed Form 7-R and certain supporting materials with the National Futures Association ("NFA"), the self-regulatory organization governing the commodities markets. 17 C.F.R. Section 3.10.

80 See Rules 4.21 through 4.26 under the CEA (rules applicable to CPOs), and Rules 4.31 through 4.36 under the CEA (rules applicable to CTAs).

the NFA.[81] All registered CPOs and CTAs are subject to the CEA's general antifraud rules,[82] as well as specific client protection, advertising and position reporting rules.[83]

As a result of recent CFTC rule adoptions, many hedge fund advisers can now qualify for exemptions from CPO and CTA registration. Regulations under the CEA provide an exemption from registration to CPOs operating pools that engage in limited commodity futures activities and sell interests solely to certain qualified individuals.[84] Regulations under the CEA also provide an exemption from registration to CPOs that operate pools that sell interests to certain highly sophisticated pool participants.[85] Investment advisers to hedge funds that operate in reliance upon Section 3(c)(1) or Section 3(c)(7) of the Investment Company Act may be able to rely upon one of these CFTC exemptions.[86] In addition, the CEA provides a *de minimis*

---

81 See Interpretive Notice, NFA Compliance Rule 2-9 (July 4, 2000). Audits conducted by the NFA are designed to determine whether a firm is maintaining records in accordance with applicable CFTC and NFA rules, and to ensure that the firm is being operated in a manner that protects investors in the commodity futures markets. Although the NFA's audits may include a review of non-commodities, the emphasis of these audits is on reviewing commodities futures issues. See, e.g., Roundtable Transcript, May 15 (statement of Jane Thorpe) (stating that the NFA conducts its audits using "a risk-based approach [and] is going to focus on those areas that obviously it has the most and we have the most interest in.").

82 See Section 4o of the CEA (general antifraud provision similar to Section 206(1) and Section 206(2) of the Advisers Act) and CFTC Rule 32.9 (prohibiting fraud in connection with commodity option transactions). See also Section 4b of the CEA (prohibiting fraudulent or misleading contracts) and CFTC Rule 4.15 (stating that Section 4o continues to apply to persons that are exempt from registration as a CTA or CPO).

83 See Rules 4.20 and 4.30 under the CEA (governing segregation of pool assets and prohibited CTA activities, respectively); Rule 4.41 under the CEA (governing advertising by CPOs, CTAs and the principals thereof); Rule 18.04 under the CEA (requiring traders who hold or control reportable positions in futures, or options on futures, to file a "Statement of Reporting Trader" on Form 40 with the CFTC upon receipt of a special call by the CFTC).

84 See CFTC Rule 4.13(a)(3) (exempting pools that privately place ownership interests to "accredited investors" as defined in Rule 501 of Regulation D of the Securities Act, and to certain other special groups of purchasers, provided that the pool, among other things, complies with certain limits on margin and notional value of the fund's commodity interests). This rule amendment took effect on August 8, 2003.

85 See CFTC Rule 4.13(a)(4) (exempting pools that privately place ownership interests to certain highly sophisticated persons, including natural persons that are "qualified purchasers," as defined in Section 2(a)(51) of the Investment Company Act). This rule was recently adopted by the CFTC and became effective on August 8, 2003.

86 Approximately 50 percent of the roughly 1,800 registered CPOs are eligible to deregister with the CFTC in reliance upon CFTC Rules 4.13(a)(3)-(4). See Roundtable Transcript, May 15

exemption from CTA registration that is similar to the Investment Advisers Act's *de minimis* exemption from investment adviser registration.[87] Consequently, hedge fund advisers that are exempt from registration as an investment adviser also are usually exempt from registration as a CTA.[88] Hedge fund advisers that meet the definition of CPO or CTA, but that are exempt from registration as such, are required to keep books and records, but are not subject to disclosure, periodic reporting or audit requirements that apply to a registered CPO or a registered CTA.[89]

2. *NASD Regulation*

a. *Suitability Determinations*

Broker-dealers that sell interests in hedge funds are subject to the requirements of NASD rules, which regulates sales practices of its members, including certain suitability matters. The NASD recently issued a Notice to Members to remind them of their obligations when selling hedge funds and funds of hedge funds.[90] The Notice to Members was issued in response to the NASD's recent review of its broker-dealer members when recommending an investment in

---

(statement of Jane Thorpe). As of May 2003, the CFTC had received 290 notices claiming the CFTC no action relief that was subsequently codified as CFTC Rule 4.13(a)(3). See id. It is difficult to ascertain whether these CPOs are new participants in the commodity markets or whether they are existing, registered CPOs that deregistered after claiming this relief.

[87] See Section 4m(1) of the CEA (providing exemption from registration for CTAs with 15 or fewer clients). See also CFTC Rule 4.14(a)(10) (counting certain business organizations as a single client for the purposes of the calculation required by Section 4m(1)). This rule amendment took effect on August 8, 2003.

[88] CPOs that are registered, or exempt from registration, as CPOs are specifically exempted from registration as CTAs. See CFTC Rules 4.14(a)(4) and 4.14(a)(5). As a result, only hedge fund advisers that are not CPOs, such as hedge fund sub-advisers, will typically need to rely upon the Section 4m(1) exemption.

[89] Certain CPOs and CTAs, although not exempt from registration, nevertheless enjoy relief from many of the requirements applicable to registered entities. See CFTC Rule 4.7 (exempting certain registered CPOs and CTAs from portions of the CEA's operational requirements). In order to obtain this relief, a CPO must sell interests in its commodity pool, and a CTA must provide advice, only to "qualified eligible persons," as defined in the rule (e.g., qualified purchasers, as defined by Section 2(a)(51) of the Investment Company Act), or individual accredited investors who meet a specific commodity portfolio requirement set forth in CFTC Rule 4.7(a)(1)(v).

[90] NASD Notice to Members 03-07, *NASD Reminds Members of Obligations When Selling Hedge Funds* (Feb. 2003).

hedge funds or FOHFs.[91] The NASD found that some broker-dealers may not be fulfilling their sales practice obligations under the NASD Rules, particularly when selling hedge funds and FOHFs to investors.

The Notice to Members reminded broker-dealers of their obligations in the following five areas:

- Promotion of Hedge Funds. Broker-dealers must balance sales material and oral presentations that promote hedge fund investing with disclosure of the risks and potential disadvantages that investing in these products may present.[92] Broker-dealers must give potential investors any prospectus or disclosure document, but providing such a document does not by itself satisfy the member's duty to provide balanced sales materials and oral presentations.

- Reasonable-Basis Suitability. A broker-dealer that recommends a hedge fund, directly or indirectly, must believe that the hedge fund is suitable for any investor. To satisfy this obligation broker-dealers must conduct due diligence regarding any hedge fund that they recommend to potential investors.[93]

- Customer-Specific Suitability. A broker-dealer must believe that its recommendation to invest in a hedge fund product is suitable for that particular investor. To reach this determination, a broker-dealer must, in accordance with NASD Rule 2310, examine the investor's financial status, tax status and investment objectives, as well as any other pertinent information.[94]

---

[91] The NASD censured and fined a broker-dealer for failing to disclose the risks associated with hedge funds when marketing them to investors. See infra note 262 (discussing disciplinary action taken against Altegris Investments, Inc.).

[92] The NASD specifically stated, among other things, that broker-dealers "may not claim that hedge funds offer superior professional management with more investment flexibility [and] protection against declining markets . . . unless these statements are fair, accurate, and without exaggeration." In addition, when disclosing the risks of hedge fund investing, the NASD stated that broker-dealers should specifically disclose (where applicable) that hedge funds can be illiquid, engage in leverage and other speculative practices, are not required to provide valuation information to investors, are not regulated like open-end investment companies, may raise complex tax issues and often charge high fees.

[93] This due diligence includes, but is not limited to, investigating the background of the hedge fund adviser, reviewing the offering memorandum and subscription agreements, examining references, and examining the relative performance of the fund.

[94] NASD Rule 2310.

Whether an investor is an accredited investor for purposes of Regulation D under the Securities Act does not, by itself, satisfy the NASD's suitability requirements.

- Internal Controls. A broker-dealer's internal controls, including those relating to compliance and supervision of associated persons, must ensure that the sale of hedge fund products comply with all NASD and Commission rules.

- Training. Broker-dealers must train all associated persons about the features, risks and suitability of hedge funds products before such persons may recommend investment in them.

b. NASD Hot Issues Rule

The NASD's Free-Riding and Withholding Interpretation, IM-2110-1, governs the allocation of so-called "hot issues."[95] IM-2110-1 does not directly restrict a hedge fund's ability to acquire shares of a hot issue. However, it does prohibit an investment adviser to a hedge fund from acquiring shares of a hot issue through a personal account. Hedge fund advisers often have significant interests in the funds that they manage and the investment adviser's interest in the hedge fund does not disqualify the fund itself from acquiring shares of a hot issue, provided that such acquisitions are part of the fund's "normal investment practice," and the notional *pro rata* amount of hot issues acquired by the investment adviser through the fund is "insubstantial and not disproportionate in amount as compared to sales to members of the public."[96]

---

95 NASD IM-2110-1 defines "hot issue" as a public offering that trades at a premium in the secondary market whenever such secondary market trading begins.

96 NASD IM-2110-1(b)(5). The NASD has filed a proposed rule change with the Commission that would amend the Interpretation in several respects. Under the proposal, all portfolio managers, including investment advisers to hedge funds, would be "restricted persons." An account in which a restricted person had a beneficial interest generally would be prohibited from purchasing hot issues. Thus, a hedge fund adviser would be prohibited from purchasing a hot issue through a personal account as well as for the account of the hedge fund because the beneficial interest in the hedge fund of even a single restricted person might disqualify the entire fund from purchasing hot issues. The NASD is proposing a *de minimis* exemption whereby a collective investment vehicle (such as a hedge fund) would be permitted to purchase shares of a hot issue, provided that the participation of restricted persons in the fund (the adviser, plus any other restricted persons) does not, among other things, exceed ten percent. *Notice of Filing of Amendment Nos. 3 and 4 to a Proposed Rule Change by the National Association of Securities Dealers, Inc. Regarding Restrictions on the Purchase and Sale of Initial Public Offerings of Equity Securities,* Exchange Act Release No. 46942 (Dec. 4, 2002). The Commission has received comments from the hedge

3. Regulation under ERISA

An investment adviser to a hedge fund is an ERISA plan fiduciary if it exercises discretionary authority over the management of "plan assets."[97] The assets of a hedge fund are deemed to be "plan assets" if an ERISA plan's investment in that hedge fund is "significant." An ERISA plan's investment is deemed to be significant if, immediately after the most recent acquisition of any equity interest in the hedge fund, more than 25 percent of the value of any class of equity interests in the hedge fund is held collectively by the employee benefit plan investors.[98] Many hedge fund advisers take measures to ensure that employee benefit plan investments in hedge funds do not exceed this 25 percent threshold in order to avoid being subject to regulation as an ERISA fiduciary.[99]

Some hedge fund advisers, however, accept regulation under ERISA because they view ERISA plans as attractive investors for the hedge funds they advise. As a result, they permit the investment of significant amounts of employee plan assets in the hedge funds. Before investing plan assets in such a hedge fund, however, the non-adviser ERISA plan fiduciary typically will require assurances from the hedge fund adviser that it will not be liable under ERISA for any misconduct on the part of the hedge fund adviser in managing the plan assets. Generally, a hedge fund adviser can shield ERISA plan fiduciaries from liability for its misconduct by registering as an investment adviser under the Advisers Act, and by qualifying as an "investment manager" under ERISA.[100]

---

fund industry strongly opposing this approach. It has not yet taken final action on the NASD's proposal.

97 See Section 3(21)(A) of ERISA. Once an investment adviser is deemed to be an ERISA fiduciary, it is subject to ERISA's provisions governing, among other things, prohibited transactions, fiduciary obligations and liability for the acts of co-fiduciaries.

98 See Rule 3-101 under ERISA.

99 The fund adviser will monitor the percentage of equity held by employee benefit plan investors on every purchase, redemption or transfer. Among other things, hedge funds may disclose in the private placement memorandum delivered to investors that they may deny a subscription, forcibly redeem shares owned by benefit plan investors or refuse to recognize transfers that would cause the fund to reach the 25 percent limitation.

100 An ERISA trustee generally will be insulated from co-trustee liability for actions taken by an "investment manager" that meets certain criteria established by the statute. See Section 405(d) of ERISA. In order to qualify as an "investment manager" for the purposes of ERISA, a hedge fund adviser generally must: (1) have the power to manage, acquire or dispose of plan assets; (2) be registered as an investment adviser under the Advisers Act; and (3) acknowledge in writing that it is a plan fiduciary. See Section 3(38) of ERISA. In lieu of being a federally registered

4. *Treasury Department Regulations*

a. *Treasury Securities Position Reports*

Pursuant to authority granted by the Exchange Act, the Treasury Department has adopted rules that govern the reporting of large positions in U.S. Treasury securities by persons who participate in the government securities market, including registered investment advisers and hedge funds.[101] Pursuant to these rules, the Treasury Department periodically provides notices of Treasury security issues for which large position information must be reported ("reportable position") and the applicable large position threshold for that issue.[102] Hedge funds that have a reportable position in a noticed government securities issue that is equal to or greater than the large position threshold must file a report with the Federal Reserve Bank of New York ("FRBNY") containing certain prescribed information relating to that issue of securities.[103] Hedge funds may also be required to make and keep certain records related to their large position reports.[104]

b. *Foreign Currency Position Reports*

The Treasury Department also requires weekly, monthly or quarterly reports from hedge fund advisers and other institutions (e.g., U.S. banks, brokers, dealers and registered investment company advisers) that hold more than a designated dollar equivalent threshold of foreign exchange contracts.[105] Specifically, hedge funds that had more than the equivalent of $50 billion

---

investment adviser, a person also generally may qualify as an "investment manager" under ERISA if it is a bank, insurance company or state registered investment adviser that files a copy of its Form ADV with the Secretary of Labor each time it updates that document. Id.

101 See Section 15C(f) of the Exchange Act (grant of rulemaking authority) and 17 C.F.R. pt. 420 (2003) (rules adopted pursuant to grant of authority).

102 See 17 C.F.R. § 420.3(a) (2003). To date, the Treasury has only issued test notices. See, e.g., *Government Securities Act Regulations: Large Position Rules*, 67 Fed. Reg. 77411 (Dec. 18, 2002) (stating "[s]ince the rules became effective in 1997, we have conducted annual calls for reports to test the accuracy and reliability of large position reporting systems."). The large position threshold is a dollar amount set by Treasury that is no less than $2 billion. See 17 C.F.R. § 420.2(d) (2003).

103 See 17 C.F.R. § 420.3 (2003).

104 See 17 C.F.R. § 420.4 (2003).

105 See 31 U.S.C. § 5315 (reports on foreign currency transactions); 31 C.F.R. § 128 (reporting of international capital and foreign currency transactions and positions). The value of the contracts

in foreign exchange contracts on the last business day of any calendar quarter during the previous year must file Form FC-1 on a weekly basis and Form FC-2 on a monthly basis with the FRBNY.[106] The foreign currency reporting provisions provide information on the nature and source of flows of mobile capital with respect to six "specified currencies" (i.e., U.S. dollars, Euros, Swiss francs, U.K. pounds, Japanese yen and Canadian dollars). The reports collect consolidated data of foreign exchange contracts and positions and include, among other things, all foreign exchange contracts involving specified currencies that are used for hedging. The reported data is not publicly disclosed in a manner that will reveal the information reported by any individual entity.[107]

c. Recent Anti-Money Laundering Regulations

Section 352 of the USA Patriot Act requires every "financial institution" to establish an anti-money laundering program that meets certain minimum requirements.[108] In connection with Section 352, the Treasury has proposed a rule that would require hedge funds, among other entities, to adopt anti-money laundering procedures.[109] In addition to adopting an anti-money

---

is calculated using the prevailing exchange rates at the end of each quarter. See, e.g., Treasury Foreign Currency Form FC-1, General Instructions Section B (Who Must Report).

[106] Hedge funds that have more than the equivalent of $5 billion in foreign exchange contracts on the last business day of any calendar quarter during the previous year and that do not file Form FC-2 must file Form FC-3 on a quarterly basis with the FRBNY.

[107] See 31 C.F.R. § 128.3 (permitting only the publishing or disclosure of aggregate data).

[108] See Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, Pub. L. No. 107-56 (Oct. 26, 2001) ("USA Patriot Act"). These requirements include: (1) the development of internal policies, procedures and controls; (2) the designation of a compliance officer; (3) an ongoing employee training program; and (4) an independent audit function to test the program.

[109] See *Financial Crimes Enforcement Network; Anti-Money Laundering Programs for Unregistered Investment Companies*, 67 Fed. Reg. 60617 (Sept. 26, 2002) ("Treasury Anti-Money Laundering Proposal"). The term "financial institution" includes "investment companies." The Treasury rule would define "investment company" to include entities operating in reliance on Sections 3(c)(1) and 3(c)(7) of the Investment Company Act, commodity pools and companies investing primarily in real estate or interests in real estate. These entities would be included in the definition of "investment company," provided that they: permit owners to redeem ownership interests within two years of purchase; have total assets, as of the most recently completed calendar quarter, of $1 million or more; and are organized under the laws of a state or the United States, are organized, operated or sponsored by a U.S. person or sell their ownership interests to U.S. persons. The rule excludes from its requirements family companies, employee benefit plans, employees' securities companies (as defined in Section 2(a)(13) of the Investment Company Act) or persons that are otherwise required to have anti-money laundering plans. Id.

laundering program, these entities would be required to provide a written notice to the Treasury within 90 days of becoming subject to the rule.[110]

5. *State Regulation*

a. *State Regulation of Hedge Funds*

Unlike the Investment Company Act, state securities laws do not regulate the operations of pooled investment vehicles such as investment companies or hedge funds. Although states do not regulate hedge funds directly, they may regulate them indirectly through the fund's investment adviser or by regulating the offer and sale of interests in the hedge fund. Because of federal preemption and the availability of exemptions from adviser registration, only some states exercise regulatory authority over some hedge fund advisers, and most do not regulate the offer and sale of interests in hedge funds.

b. *State Regulation of Offers and Sales of Hedge Fund Securities*

The adoption of the National Securities Markets Improvements Act of 1996 ("NSMIA")[111] also greatly reduced state regulation of offers and sales of hedge fund securities. Most hedge funds issue securities in offerings that are exempt from registration under the Securities Act in reliance upon Rule 506 of Regulation D, and are therefore deemed to be "covered securities" under Section 18 of the Securities Act.[112] Under Section 18, covered securities are exempt from state regulations that: (1) require the registration or qualification of securities or securities transactions; (2) impose any requirements related to disclosure documents used in an offering; or (3) impose any merit regulation of such offerings. The states, however,

---

[110] The form of the proposed notice would require the filing entity to provide identifying information, a statement of the assets held by the "investment company" at the end of the preceding fiscal year and a disclosure of the number of participants, interest holders or securities holders of the "investment companies." See id. If adopted, the form of notice filed by a hedge fund would be a partial source of information about that hedge fund.

[111] Pub. L. No. 104-290, 110 Stat. 3416 (1996) (codified in scattered sections of the United States Code).

[112] See Section 18(b)(4)(D) of the Securities Act.

retain their antifraud jurisdiction.[113] They may also impose notice filing requirements and notice filing fees.[114]

c. State Regulation of Hedge Fund Advisers

Hedge fund advisers registered with the Commission under the Advisers Act are not required to register with the state securities authorities and are exempt from most substantive provisions of state investment adviser laws. Moreover, hedge fund advisers not registered with the Commission may also be eligible for exemptions from state registration and regulatory requirements.[115] State exemptions can be found in a number of states where hedge fund advisers are concentrated, including California, Connecticut and New York.[116] As a result, it is not uncommon for a hedge fund adviser to be exempt from registration under both state and federal investment adviser laws.

A hedge fund adviser that is subject to state investment adviser laws is likely to face regulations similar to the Commission's, as state regulation of investment advisers is generally similar to the Advisers Act. Broadly speaking, the investment adviser must register with authorities and must provide certain disclosures to clients. The adviser is also subject to rules designed to protect investors and prevent fraud, and may be subject to periodic examination by regulators.[117]

---

[113] See Section 18(c)(1) of the Securities Act. See also, e.g., *In the Matter of James Pangione, Timothy Rassias, Hercules Capital Management, LLC, Hercules Hedgehog Fund, LP* No. E-2003-56 (Mass. Sec. Div. filed Aug. 13, 2003).

[114] See Section 18(c)(2) of the Securities Act.

[115] The preemption of state investment adviser laws applies only to those investment advisers that are registered with the Commission. Advisers that rely on an exemption from registration with the Commission may therefore be subject to state investment adviser laws. See Section 203A(b)(1) of the Advisers Act.

[116] See California Code of Regulations Title 10, Section 260.204.9; *Order Governing Certain Federally Exempt Investment Advisers*, Connecticut Department of Banking Order (Oct. 14, 1997) (each, in pertinent part, granting an exemption from state registration to any investment adviser that relies on the exemption from Commission registration in Section 203(b)(3) of the Advisers Act). See also NY Gen. Bus. Law Section 359-eee(a)(5) and Codes, Rules and Regulations of the State of New York Part 11.12(a) (respectively, providing an exclusion from the definition of adviser if an adviser has fewer than six clients, and counting limited partnerships, and other legal organizations, as single clients).

[117] Both the Commission and states retain antifraud jurisdiction to bring enforcement actions against all investment advisers, whether registered or not.

IV. Operations of Hedge Funds

A. Hedge Fund Investment Strategies

1. Overview

Hedge funds generally employ an absolute return approach to investing through which they seek to make money in a variety of market environments. Registered investment companies, in contrast, tend to favor a relative return approach. These funds attempt to duplicate or exceed the performance of a selected asset class or securities index.

Because an absolute return approach places a premium on flexibility (a successful bull market strategy is unlikely to produce positive returns during bear markets), many hedge funds tend to be opportunistic in seeking positive returns while avoiding loss of principal. The organizational documents of most hedge funds establish broad objectives and authorize multiple strategies in order to provide flexibility to take advantage of changing market conditions.[118]

Some hedge funds use traditional tools of fundamental or technical analysis to purchase or sell short individual stocks and bonds. Others take a directional view on a particular stock, bond or currency market. Still others engage in arbitrage in order to exploit perceived inefficiencies in the markets or to make money from particular expected events, such as mergers or bankruptcies. Certain hedge funds take large, concentrated positions in securities. Others invest across diverse asset classes and types of securities. When market conditions turn negative, many hedge funds sell short, utilize derivatives that increase in value as security values fall or take positions that are less dependent on the price movements of broad market averages. Many hedge funds use some or all of these strategies from time to time, based on their view of what strategy is most favored by current market conditions.[119] Finally, a number of hedge funds eschew all of these techniques and adopt traditional, long-only strategies similar to those used by most registered investment companies.

---

[118] See Roundtable Transcript, May 14 (statement of Robert Schulman) ("The hedge fund industry has avoided, in large measure, the catastrophic impacts of the market by having enough flexibility in the [private placement] document and using it to react to what you would call changing market conditions.").

The flexibility of some hedge fund advisers appears to be restricted only by the presence of investors who have invested in a hedge fund because of its use of a particular investment strategy and their expectation, communicated to the hedge fund adviser, that the fund will only invest in accordance with that strategy. See Alexander M. Ineichen, *Absolute Returns: The Risk and Opportunities of Hedge Fund Investing* 123 (2003) ("Ineichen").

[119] See *Hedge Funds: A Guide*, The Economist 82 (Oct. 3, 1998).

2. *Hedge Funds Strategies*

Hedge funds use a wide variety of investment styles and strategies.[120] Even among hedge funds that purport to use the same investment strategy or invest within the same asset class, there is a wide range of investment activities, performance and risk levels.[121] Because the investment activities of hedge funds are so diverse, the hedge funds assigned to a particular investment category are likely to exhibit less similarity than more traditional investment vehicles, such as registered investment companies.

Although classification systems vary, hedge funds may generally be classified according to broad style and strategy categories, including:

- **Market Trend (Directional/Tactical) Strategies**

(These strategies exploit broad market trends in equities, interest rates or commodity prices.)

– **Macro**: These funds may take positions in currencies (often unhedged) based on their opinion of various countries' macroeconomic fundamentals. For example, if a country's economic policies look inconsistent and its ability to sustain its exchange rate appears questionable, macro funds may take positions designed to profit from devaluation, usually by selling the currency short.

– **Long/Short**: (includes sector and market neutral/relative value funds): These funds try to exploit perceived anomalies in the prices of securities. For example, a hedge fund may buy bonds that it believes to be underpriced and sell short bonds that it believes to be overpriced. No matter what happens to overall interest rates, as long as the spread between the two narrows, the fund profits. Conversely, if spreads widen,

---

[120] One commenter classifies hedge fund investment strategies into more than 25 categories. Comment submitted by Roundtable Panelist John G. Gaine on behalf of the Managed Funds Association, at 2 (“Managed Funds Association Comment Letter”).

[121] See Roundtable Transcript, May 14 (statement of Michael Neus) (“When speaking about hedge funds [whether] the average hedge fund is less risky or more risky, I think that misses the point. It's not a monolithic institution. Hedge funds, by and large, are incredibly entrepreneurial; are constantly innovating and mutating.”).

gains can turn quickly into losses. Long/short equity is the most frequently used strategy among hedge funds.[122]

- **Event-Driven Strategies**

(These strategies attempt to exploit discrete events such as bankruptcies, mergers, and takeovers.)

– **Distressed Securities**: These funds may take long and/or short positions to attempt to profit from pricing anomalies among securities issued by companies going through bankruptcy or reorganization.

– **Risk/Merger Arbitrage**: These funds attempt to profit from pending merger transactions by, for example, taking a long position in the stock of the company to be acquired in a merger, leverage buyout or takeover and simultaneously taking a short position in the stock of the acquiring company.

- **Arbitrage Strategies**[123]

(These strategies, which exploit pricing discrepancies between closely related securities, are designed to be among the less risky hedge fund strategies. Arbitrage also may be a significant strategy component for funds in the event-driven and long/short categories.)

– **Convertible Arbitrage**: This strategy involves taking long positions in a company's convertible bonds, preferred stock, or warrants that are deemed to be undervalued while taking short positions in the company's common stock.

---

[122] The actual percentage varies according to different commenters, probably because commenters often define investment strategies differently. One commenter claimed that over 60 percent of hedge fund assets were managed using this strategy. Hennessee Group Comment Letter, supra note 4 at 3. Another commenter stated that, as of the third quarter of 2001, approximately 45 percent of hedge fund assets were managed using this strategy. Ineichen, supra note 118 at 42-43.

[123] Many arbitrage strategies contribute substantial benefits to the U.S. financial markets by exploiting mispricings and inefficiencies. These efforts often result in enhanced liquidity and improved market efficiency. As was recently demonstrated, however, some abusive strategies used by hedge fund advisers such as mutual fund "market timing" activities provide no benefits to the securities markets. See State of New York v. Canary Capital Partners, LLC, (N.Y. Sup. Ct., complaint filed Sept. 3, 2003), available at: http://www.oag.state.ny.us/press/2003/sep/canary_complaint.pdf ("Canary Capital Partners").

– **Fixed Income Arbitrage**: Hedge funds in this category seek to provide stable, positive returns by exploiting the relatively small pricing inefficiencies of fixed income instruments. For example, a newly issued ("on the run") 10-year Treasury bond may trade at a slightly higher price than a similar previously issued ("off-the-run") 10-year Treasury bond. A hedge fund may seek to profit from this disparity by purchasing off-the-run Treasuries and selling on-the-run Treasuries short.

– **Statistical Arbitrage**: Funds in this category attempt to profit from pricing inefficiencies identified through the use of mathematical models. Statistical arbitrage attempts to profit from the likelihood that prices will trend toward a historical norm.

3. Hedge Fund Investment Activities Compared to those of Registered Investment Companies

As discussed above, registered investment companies typically seek positive returns compared to the performance of a particular asset class or index ("benchmark"). Thus, in a declining market, a registered investment company may be considered successful even if it loses money, so long as the company outperforms its benchmark (i.e., its relative return is positive). In a rising market the registered investment company may be considered unsuccessful if the company, though profitable, underperforms the benchmark (i.e., its relative return is negative). In brief, in the relative return paradigm, downside risk means the risk of failing to perform as well as the benchmark. In contrast, a hedge fund that utilizes an absolute return strategy may be considered successful only if it is profitable in both rising and declining markets.[124] In the absolute return paradigm, downside risk means the risk of failing to make money.

Registered investment companies generally have less flexibility to change their investment objectives than do most hedge funds. As a result, these funds provide investors with greater certainty of the risks their advisers will take, but provide their advisers with a diminished ability to take alternative investment approaches when market conditions change. Most of the restrictions on registered investment companies are self imposed, and are designed to assure investors that the fund will be managed in a manner consistent with their expectations.[125]

---

[124] As discussed in Part IV.F. infra, compensation arrangements for hedge fund advisers are typically structured to reinforce the incentive to produce positive returns, irrespective of the direction of the market.

[125] The Investment Company Act does not require registered investment companies to restrict the flexibility of fund advisers. Section 13(a)(3) of the Investment Company Act requires registered investment companies to obtain the consent of their shareholders before deviating from their fundamental policies, including concentration in certain industries, but does not require registered investment companies to have policies restricting investments. Similarly, Section 13(a)(2) of the Investment Company Act requires registered investment companies to seek the approval of their

4. Leverage

a. Background

Leverage is an important component of many hedge fund investment strategies. Leverage can be defined in numerous ways. As a general matter, however, leverage, can be viewed as a means of potentially increasing an investment's value or return without increasing the amount invested. Although leverage historically was obtained primarily by purchasing securities with borrowed money, today futures, options and other derivative contracts may be a major source of leverage. The use of leverage may have a significant impact on investment results because, while it may enhance investment gains, it may also magnify investment losses. Leverage also may increase the risk caused by holding assets that are illiquid or whose full value cannot be realized in a quick sale.[126]

b. Use of Leverage by Hedge Funds

The degree to which a hedge fund uses leverage depends largely on its investment strategy. Macro funds and funds that attempt to capitalize on small inefficiencies in relative values (e.g., fixed income arbitrage and statistical arbitrage) are more likely to engage in leverage and to take more highly leveraged positions[127] than are hedge funds that use other investment strategies, such as investing in distressed securities situations.[128]

---

shareholders before they deviate from their policies regarding borrowing money, issuing senior securities, underwriting certain securities, purchasing or selling real estate or commodities or making loans, but does not preclude registered investment companies from having policies permitting all such activities to the extent permitted by law.

126 *Hedge Funds, Leverage, and the Lessons of Long-Term Capital Management - Report of The President's Working Group on Financial Markets* 5 (Apr. 1999) ("LTCM Report").

127 For example, according to hedge fund data consultants, approximately 89 percent of macro funds use leverage. Of those macro funds, 52 percent have leverage ratios greater than 2 to 1. (Here, a leverage ratio is defined as the ratio of total absolute dollars invested to total dollars of equity. A leverage ratio of greater than 2 to 1 is considered high; while a ratio of less than or equal to 2 to 1 is considered low.) This information is based on a sample of funds and may not be representative of all hedge funds. See Van Hedge Fund Advisors International, Inc., *Global Hedge Funds - Use of Leverage As of December 2002* (2003).

128 Slightly over half (52 percent) of hedge funds that employ a distressed securities strategy use leverage. Of hedge funds using distressed securities strategies that use leverage, only six percent have leverage ratios greater than 2 to 1. Id.

A hedge fund's limitation on its use of leverage is often dictated by any margin or collateral requirements imposed on lenders or on others (e.g., broker-dealers), and the willingness of lenders or other counterparties to provide it with credit. For example, a broker-dealer extending credit to a hedge fund in connection with a short sale would have to comply with Regulation T issued by the Board of Governors of the Federal Reserve System.[129] The hedge fund could also be required to provide additional "maintenance margin" for transactions in short sales under margin requirements imposed by self-regulatory organizations.[130]

c. Use of Leverage by Registered Investment Companies

Although registered investment companies may use leverage and sell short, their ability to use these tools is more limited than is the case with hedge funds. For example, the Investment Company Act generally allows open-end investment companies to leverage themselves only by borrowing from a bank, and provided that the borrowing is subject to 300 percent asset coverage.[131] Closed-end investment companies are subject to less restrictive limits.[132] The Commission and staff have applied the Investment Company Act provisions governing use of leverage to permit registered investment companies to engage in certain transactions involving leverage ("senior security transactions"), generally, however, only if the registered fund "covers" the transaction by setting aside liquid assets in an amount equal to the potential liability or exposure created by the transaction.[133] A registered investment company's board of directors has

---

[129] 12 C.F.R.§ 220.12. This could require the hedge fund to provide margin for a short sale of a "nonexempted security," such as a security registered on a national securities exchange, of 150 percent of the current market value of the security. 12 C.F.R.§ 220.12(c)(1).

[130] See NASD Rule 2520(c) and NYSE Rule 431(c). See also NASD Rule 2520(d) and NYSE Rule 431(d), which permit broker-dealers to institute higher short-sale margin requirements than those imposed by self-regulatory organizations rules.

[131] Section 18(f)(1) of the Investment Company Act. The Investment Company Act also allows registered investment companies to engage in certain private and temporary borrowings without 300 percent asset coverage, and from non-bank lenders. See Section 18(g) of the Investment Company Act.

[132] See Sections 18(a) - (e) of the Investment Company Act.

[133] See, e.g., *Securities Trading Practices of Registered Investment Companies*, Investment Company Act Release No. 10666 (Apr. 18, 1979) ("Release 10666") (discussing Section 18 regulation of reverse repurchase agreements, firm commitment agreements, standby agreements and other transactions having similar effects on the capital structure of an investment company). See also, e.g., *Dreyfus Strategic Investing & Dreyfus Strategic Income* (pub. avail. June 22, 1987) ("*Dreyfus*") (short selling transactions and certain derivatives transactions such as: purchasing and selling futures contracts; purchasing and selling options on specific securities, stock indexes,

certain responsibilities in connection with the company's use of leverage,[134] and information about the characteristics and risks of permitted leverage transactions must be disclosed to investors in fund prospectuses.[135]

5. Short Selling

a. Background

A short sale is the sale of a security that the seller does not own or a sale that is consummated by the delivery of a security borrowed by, or for the account of, the seller.[136] In order to deliver the security to the purchaser, the short seller borrows the security, typically from a broker-dealer or an institutional investor. The short seller later closes out the position by returning the security to the lender, typically by purchasing equivalent securities on the open market, or by using an equivalent security that it already owns. In general, short selling is

---

or interest rate futures contacts; and purchasing and selling forward contracts on currencies "involve potential leveraging.").

The requirement that registered investment companies set aside liquid assets to cover senior security transactions is also referred to as the "segregated account" obligation. The purpose of this requirement is to limit the amount of leverage in which a registered investment company may engage, and to ensure the availability of adequate funds to meet the obligations arising under the senior security transactions. See, e.g., Release 10666, as modified by *Dreyfus* and *Merrill Lynch Asset Management, L.P.* (pub. avail. July 2, 1996) ("*MLAM*"). This requirement applies in addition to any margin requirements, which apply to investment companies just as they do to hedge funds and other brokerage customers engaging in margin transactions. The assets set aside to cover the senior security transactions are considered frozen and unavailable for sale or any other purpose. See, e.g., Release 10666; *MLAM*.

[134] Specifically, the board must conclude that senior security transactions are consistent with the policies recited in its registration statement pursuant to Section 8(b) of the Investment Company Act, and must also make sure that the level of senior security transactions will not impair the investment company's ability: to meet current obligations; to honor requests for redemption (for open-end investment companies); and to manage properly the investment portfolio in a manner consistent with the investment company's stated investment objectives. See Release 10666, supra note 133.

[135] See Form N-1A , Items 4(b)(1) (requiring a description of the fund's principal investment strategies) and 4(c) (requiring a description of the principal risks of investing in the fund, including circumstances reasonably likely to affect adversely the fund's net asset value, yield or total return). See also Release 10666, supra note 133.

[136] See Rule 3b-3 under the Exchange Act.

utilized to profit from an expected downward price movement, to provide liquidity in response to unanticipated demand or to hedge the risk of a long position in the same or a related security.

Short selling can provide the market with important benefits, including market liquidity and pricing efficiency. Market liquidity is provided through short selling by market professionals, such as market makers (including specialists) and block positioners, who offset temporary imbalances in the supply and demand for securities. Short sales effected in the market by securities professionals add to the trading supply of stock available to purchasers and thus may reduce the risk that the price paid by investors is artificially high.

Short selling also can contribute to the pricing efficiency of the markets. Efficient markets require that prices fully reflect all buy and sell interest. When a short seller speculates on or hedges against a downward movement in a security, the transaction is a mirror image of the person's who purchases the security based upon speculation that the security's price will rise or in order to hedge against such an increase. The strategies primarily differ in the sequence of transactions. Market participants who believe a stock is overvalued may engage in short sales in an attempt to profit from a perceived divergence of prices from true economic values. Such short sellers add to stock pricing efficiency because their transactions inform the market of their evaluation of future stock price performance. This evaluation is reflected in the resulting market price of the security.[137]

Although short selling serves useful market purposes, it also may be used to manipulate stock prices. One example is the "bear raid" where an equity security is sold short in an effort to drive down the price of the security by creating an imbalance of sell-side interest.[138] Unrestricted short selling can also exacerbate a declining market in a security by eliminating bids and causing a further reduction in the price of a security by creating an appearance that the price is falling for fundamental reasons.

---

[137] Arbitrageurs also contribute to pricing efficiency by utilizing short sales to profit from price disparities between a stock and a related security, such as a convertible security or an option on that stock. For example, an arbitrageur may purchase a convertible security and sell the underlying stock short to profit from a current price differential between two economically similar positions.

[138] Many people blamed "bear raids" for the 1929 stock market crash and the market's prolonged inability to recover from the crash. See 7 Louis Loss and Joel Seligman, *Securities Regulation* 3203-04, n. 213 (3d ed. 1989).

b. Regulatory Restrictions on Short Selling

The Commission has traditionally held the belief that protections against abusive short selling are important for issuer and investor confidence, and has enacted prophylactic rules designed to curb manipulative behavior. Rule 10a-1 under the Exchange Act was adopted in 1938 after several years of considering the effects of short selling in a declining market.[139] The core requirement of Rule 10a-1 is commonly referred to as the "tick test." The tick test provides that, subject to certain exceptions, an exchange-listed security may only be sold short: (1) at a price above the immediately preceding reported price ("plus tick"); or (2) at the last sale price if it is higher than the last different reported price ("zero-plus tick"). Subsection (c) and (d) of Rule 10a-1 also require broker-dealers effecting sell orders for exchange-listed securities to mark such orders "long" or "short." The Commission has also approved a price test for certain Nasdaq securities.[140]

There are other requirements that apply to short selling. For example, the self-regulatory organizations ("SROs") have adopted rules generally requiring that, prior to effecting short sales, member firms must "locate" stock available for borrowing, so that the short seller may effect delivery to the purchaser.[141] In addition, short sale transactions are subject to margin requirements,[142] and may impact a broker-dealer's net capital.[143] Other securities market

---

[139] By adopting Rule 10a-1, the Commission sought to achieve three objectives: (1) allow relatively unrestricted short selling in an advancing market; (2) prevent short selling at successively lower prices, thus eliminating short selling as a tool for driving the market down; and (3) prevent short sellers from accelerating a declining market by exhausting all remaining bids at one price level, causing successively lower prices to be established by long sellers. See *Short Sales of Securities*, Exchange Act Release No. 13091 (Dec. 21, 1976).

[140] NASD Rule 3350 uses a "bid test" that prohibits NASD members from effecting short sales in NASDAQ National Market System Securities at or below the best bid when the best bid displayed is below the preceding best bid in a security.

[141] See, e.g., NASD Rule 3370; NYSE Rule 440C.

[142] See, e.g., Section 220.12(c)(1) of Regulation T of the Board of Governors of the Federal Reserve System, which requires margin for a short sale of a nonexempted equity security of 150 percent of the current market value of the security. An investor may be required to deposit additional "maintenance margin" for transactions in short sales under margin requirements imposed by SROs. See, e.g., NASD Rule 2520(c) and NYSE 431(c). Further, broker-dealers may institute higher short sale margin requirements than those imposed by self-regulatory organization rules. See, e.g., NASD Rule 2520(d); NYSE Rule 431(d).

[143] For example, a broker-dealer with a proprietary short position in an equity security may be required to deduct a percentage of the market value of the position when computing net capital under Exchange Act Rule 15c3-1. See Rule 15c3-1(c)(2)(vi)(J) under the Exchange Act. There may also be net capital implications for a broker-dealer executing short sale transactions for

participants, such as registered clearing agencies, may also establish requirements for firms engaging in short sale transactions.[144]

The SROs also have rules requiring members to report monthly aggregate short positions in all customer and proprietary accounts in securities listed on such exchanges or traded on NASDAQ.[145] This information is publicly available from a number of different sources, including Barrons, the Wall Street Journal and some financial websites.

c. Short Selling by Hedge Funds

Many hedge funds regularly engage in short selling as a major component of their investment strategy. For example, hedge funds may engage in long/short strategies that consist of buying higher-expected-return securities and selling short lower-expected-return securities. Hedge funds also may sell short in connection with arbitrage activities. A risk arbitrage position would consist of buying the target company securities coupled with simultaneous shorting of the securities of the acquiring company. Convertible arbitrage involves taking long positions in convertible securities while shorting the underlying securities, thereby taking advantage of a difference between the prices. Statistical arbitrage involves attempting to profit from pricing differentials between statistically related securities identified through the use of mathematical models.

The use of short selling by hedge funds has led to allegations that some hedge funds may be engaging in short selling as part of a manipulative scheme. Issuers have alleged that the hedge funds accumulated bearish positions in their stocks (i.e., sold securities short or purchased put options and credit-default swaps) and subsequently issued critical reports regarding the issuers in an attempt to drive down their security prices.[146]

---

customers. For example, a broker-dealer may be required to deduct the amount of cash required in a customer's account to meet maintenance margin requirements arising from the customer's short sale transactions. See Rule 15c3-1(c)(2)(xii) under the Exchange Act.

[144] There are capital and risk management standards established by the National Securities Clearing Corporation, which generally acts as the guarantor of trades between broker-dealers. See National Securities Clearing Corporation Rules of Procedures, Addendum K (effective Aug. 11, 2003).

[145] See, e.g., NASD Rule 3360; NYSE Rule 421.10.

[146] See, e.g., Randall Smith, *Regulators Review Complaints About Hedge Funds*, Wall Street Journal, (Jan. 22, 2003).

d. Short Selling by Registered Investment Companies

Registered investment companies have less flexibility than hedge funds to engage in short selling. While there are registered investment companies that actively sell short, registered investment companies are constrained by requirements of the Investment Company Act. Registered investment companies that sell short need to ensure that their prospectuses and other disclosure documents adequately inform shareholders about the risks associated with short selling.[147] Registered investment advisers and directors of registered investment companies should consider the consistency of such risks with the companies' disclosures and (for open-end investment companies) with the duty to have sufficient liquid assets to meet redemption requests in a timely manner.[148]

B. Nature of Hedge Fund Investors

Historically, hedge funds were sold primarily to high net worth individuals and families. Individual investors and families continue to represent a large portion of the hedge fund investor population today.[149] Much of the recent growth in the hedge fund industry, however, can be attributed to the investments of institutional investors.[150] Institutional investors such as pension

---

147 See Form N-1A, Items 4, 12. Registered investment companies are required to disclose their short sale activity in their financial statements that accompany their annual reports and semi-annual reports. For example, open- and closed-end investment companies must provide a Schedule of Securities Sold Short along with their financial statements, which schedule specifically lists the securities sold short during the relevant reporting period. See Regulation S-X, Rules 6-10 and 12-12A. In addition, all registered investment companies must disclose: (1) the amount held by others in connection with short sales in the asset section of the balance sheet; (2) the amount payable for securities sold short in the liability section of the balance sheet; and (3) the gain or loss on closed short positions in securities in the statement of operations. See Regulation S-X, Rules 6-04, 6-07.

148 See, e.g., Release 10666, supra note 133; *MLAM*, supra note 133.

149 According to one commenter, as of January 1, 2003, individuals and families invested $249 billion in hedge funds, representing approximately 42 percent of industry assets. Over the past several years, however, these investments, as a percentage of all hedge fund assets, have been declining. Hennessee Group Comment Letter, supra note 4 at 7-9.

150 See e.g., Roundtable Transcript, May 14 (statement of Robert Schulman) ("[T]he vast majority of . . . [the] growth [in the hedge fund industry] is coming institutionally. So although there's been a lot of talk about the retailization of the business . . . the reality is it is large commitments from big public plans . . . , like CALPERS and Texas Teachers, that is leading the way towards the growth in this asset.").

plans, endowments and foundations are increasingly considering investments in hedge funds, and those who are already investing are devoting a larger portion of their portfolios to these funds.[151] These institutional investors are shifting portions of their portfolios away from more traditional investments to investment vehicles employing absolute return strategies.[152] According to one commenter, the catalyst for this shift was the performance of these vehicles during the recent 3-year bear market.[153] These investors are also increasingly investing in FOHFs.[154]

C. Hedge Fund Marketing

Typically, hedge fund advisers market and distribute hedge funds to investors directly,[155] as compared to registered investment companies, which often are sold through broker-dealers.[156] Hedge funds rely heavily on investors' pre-existing relationships with the hedge fund's advisory personnel (either on a personal basis or through a prior advisory relationship) and existing investors' recommendations. In addition, some hedge fund advisers have staff dedicated to

---

According to one commenter, institutional investors in the aggregate invested $175 billion in hedge funds in 2002, compared to $53 billion four years earlier. Hennessee Group Comment Letter, supra note 4, at 14.

151 See, e.g., Chris Clair, *A Growing Role: Institutional Investors Jumping Big into the Hedge Fund Market,* Pensions and Investments 3 (Feb.18, 2002); Gregory Zuckerman, *Hedge Funds May Give Colleges Painful Lesson,* WSJ.com (Oct. 7, 2002); Andy Serwer, *Where the Money's Really Made*, Fortune 106 (Mar. 31, 2003).

152 Hedge funds are only one of the alternative investments that institutional investors are exploring as part of an overall diversification strategy. Other alternative investments include real estate, timberland and oil and gas. See *Foundations, Endowments Try Real Assets*, Fundfire (Aug. 25, 2003).

153 See Roundtable Transcript, May 14 (statement of Charles Gradante).

154 According to one commenter, as of January 1, 2003, FOHFs represented approximately 27 percent of hedge fund assets, compared to 20 percent the year before. Hennessee Group Comment Letter, supra note 4, at 8-9.

155 One commenter stated that, as of January 1, 2003, hedge funds raised approximately 88 percent of their capital as a result of in-house marketing efforts. Id., at 10. Close to half (43 percent) of this capital, however, came from the hedge fund's general partners and employees. Id.

156 Some hedge funds, however, use the services of a broker-dealer as a placement agent for their securities. Broker-dealers often may place hedge fund shares with wealthy clients through divisions of broker-dealers dedicated to providing services to "high net worth" customers. We note, however, that for most broker-dealers that sell hedge funds, these sales account for a minimum amount of total revenue.

marketing the fund, which may include identifying new investors, holding seminars for potential investors and assisting potential investors in understanding the products and completing the subscription documents.

Many hedge fund advisers also operate Internet websites through which they communicate with investors. As sponsors of securities offerings by hedge funds, the advisers are required to limit both the content of their websites and the persons who may access them in order to avoid general solicitation and general advertising concerns in connection with the hedge fund securities offering.[157] Many hedge fund advisers provide information about themselves, but typically do not mention to the general public that they manage hedge funds. Some hedge fund advisers follow the staff and the Commission's guidance on using password protected websites to communicate with existing investors and investors with whom they or persons acting on their behalf have substantive, pre-existing relationships.

Hedge fund advisers using the Internet and other medium of electronic communications are subject to the constraints of the exemptions from the applicable registration requirements that they are relying on in selling the hedge fund securities or engaging in advisory activities. Moreover, if advisers and hedge funds do not follow the Commission's guidance on the use of the Internet in engaging in private offerings, they run a risk of not being able to rely on an exemption from the registration requirements of the Securities and Investment Company Acts. Purchasers of securities sold in violation of these registration requirements have the right to rescind their purchase and obtain the amount of their investment plus interest.

In addition to obtaining marketing information directly from hedge fund advisers, prospective investors and financial professionals also may receive information about potential investment opportunities in hedge funds through third-party intermediaries. Many potential investors are introduced to hedge funds through capital introduction services that are provided by

---

[157] See supra Part III.B.2.c. (discussing permissible and prohibited solicitation activities in connection with securities offerings).

broker-dealers.[158] Also, many investors hire consultants to advise them about investing in hedge funds.[159] Hedge funds also hire consultants as "marketers" to introduce investors to the fund.[160]

D. Disclosure by Hedge Funds to Investors and Prospective Investors

Hedge fund advisers typically provide information to investors during an investor's initial due diligence review of the fund, although some, more proprietary, information may not be provided until after the investor has made a capital commitment to the fund, if at all. Most hedge funds provide written information to their investors in the form of a private offering memorandum or private placement memorandum ("PPM").[161] This reflects market practice and the expectations of the sophisticated investors who typically invest in hedge funds. It also reflects the realization of the sponsors and their attorneys that the exemptions from the registration and prospectus delivery provisions of Section 5 of the Securities Act available under Section 4(2) of the Securities Act and Rule 506 thereunder do not extend to the antifraud provisions of the federal securities laws. The disclosures furnished to investors serve as protection to the principals against liability under the antifraud provisions. Some of the information may be disclosed less formally in one-on-one conversations between investors and the hedge fund adviser.

Hedge fund advisers may also provide information to hedge fund investors in the form of letters, conference calls and financial statements. In addition, some hedge fund advisers may provide prospective investors with access to their prime brokers and other service providers, such

---

158 See infra Part IV.E.2. (discussing broker-dealers/prime brokers). According to one survey, capital introduction services sponsored by broker-dealers are the second most popular method by which investors are introduced to hedge fund advisers, following networking. Deutsche Bank, *Equity Prime Services Alternative Investment Survey Results Part 2: Inside the Mind of the Hedge Fund Investor* 22 (Mar. 2003) (the "Deutsche Bank Survey").

159 See infra Part IV.E.5. (discussing consultants and other finders). See also *Investors Jump Long-Only Ship for Hedge Funds*, Fundfire (Jan. 30, 2003); *Plans Seek Sound Advice on Hedge Funds,* Fundfire (May 29, 2002).

160 See infra Part IV.E.5. (discussing consultants and other finders).

161 Rule 506 does not require that issuers provide any specific written information to accredited investors. This reflects the Commission's view that accredited investors are sophisticated enough and have enough bargaining power to obtain any information they need from an issuer in making an investment decision. If the offering is extended to anyone who is not an accredited investor, the issuer must provide extensive written information to the investors who are not accredited. See Rule 502(b) under the Securities Act.

as administrators, both during the investor's initial due diligence of the hedge fund and subsequently.

Hedge fund investors must often spend significant resources, frequently hiring a consultant or a private investigation firm, to discover or verify information about the background and reputation of a hedge fund adviser.[162] In practice, even very large and sophisticated investors often have little leverage in setting terms of their investment and accessing information about hedge funds and their advisers.[163]

1. Private Placement Memoranda

As a matter of practice, hedge funds generally provide investors with a PPM before an investment is made. As with any other offering solely to accredited investors, there are no specific disclosure requirements that pertain to the PPM under Section 4(2) or Rule 506.[164] While we are not passing on the adequacy and content of PPM disclosure generally, we note that certain basic information about the hedge fund's adviser and the hedge fund is typically disclosed. The information disclosed in PPMs varies from adviser to adviser, however, and often is general in scope. PPMs generally discuss in broad terms the fund's investment strategies and practices. They also typically disclose that the hedge fund's investment adviser may invest fund assets in illiquid, difficult-to-value securities and that the adviser reserves the discretion to value

---

[162] Roundtable Transcript, May 14 (statement of Michael Neus) ("Whether they do it internally or whether they hire a consultant, they do more than kick the tires. They audit. Sometimes they audit results, they do background checks, they do a huge amount of legal work internally, as well as externally -- talking to other investors."); Roundtable Transcript, May 15 (statement of Sandra Manzke) ("[I]t's very difficult to get answers out of managers, and they hold all the keys right now. If you want to get into a good fund, and you ask some difficult questions, you may not get that answer. Sure, there is a lot of access, to get online and do background checks, and hire firms . . . . But that's expensive. And can the retail investor do it? No. Firms like ours, we spend a lot of money, we have a lot more people working for us now to uncover these types of situations.").

[163] Roundtable Transcript, May 15 (statement of Mark Anson) ("[t]he power remains with the hedge fund managers . . . .[T]here are far more attorneys out there representing hedge fund managers than representing investors in hedge funds. So when you get down to negotiating the nitty gritty, generally you're sitting across the table from a hedge fund manager who has better legal representation than you do as an investor. . . .The best hedge fund managers close their hedge funds. Or, if they open them for a small period of time, . . . it's basically a take it or leave it. 'You want into my fund? Here are the terms that you get.' The bargaining and leverage remains with the best hedge fund managers.").

[164] Hedge fund advisers that are registered investment advisers, however, are required to provide investors with a disclosure statement that includes information required under Part II of Form ADV. See supra Part III.D. (discussing hedge fund advisers and the Advisers Act). This may be satisfied by providing a copy of the PPM that includes the appropriate disclosure to an investor.

such securities as it believes appropriate under the circumstances.[165] The PPM also may disclose that the adviser may exercise its discretion to invest fund assets outside the stated strategy or strategies.

PPMs also generally discuss qualifications and procedures for a prospective investor to become a limited partner, as well as provide information about the hedge fund's operations.[166] For example, PPMs generally discuss fund expenses, allocations of gains and losses, tax aspects of investing in the fund and may incorporate the hedge fund's financial statements. PPMs disclose any lock-up period that new investors must observe, as well as laying out the specifics for when investors will be able to redeem some or all of their investments out of the hedge fund. PPMs also may name frequently used service providers to the fund.

PPMs may generally disclose potential conflicts of interest to investors, frequently under the heading of "risk factors." A hedge fund's PPM may note that the fund's valuation practices give rise to an inherent conflict of interest because the level of fees that the investment adviser earns is based on the value of the fund's portfolio holdings as determined by the fund's adviser. PPMs also may discuss potential conflicts arising from the adviser's "side-by-side management" of multiple accounts, including the hedge fund, private accounts, proprietary accounts and registered investment companies.[167] A hedge fund's PPM may also disclose the investment adviser's conflicts in allocating its time and certain investment opportunities among its clients. Some PPMs spell out allocation policies with respect to limited investment opportunities in great detail, while others may list, and only briefly discuss, the factors on which such allocations will be decided.

PPMs also often provide information concerning the use of affiliated services providers, including affiliated broker-dealers. Some PPMs also may note that the hedge fund may direct brokerage business to, and use other services of, firms that introduce investors to the fund. PPMs may disclose that the adviser may use soft dollars to pay for research and other services used by the adviser to benefit other accounts that it manages, and may further disclose that soft

---

165 See infra Part IV.B. (discussing concerns relating to valuation practices of hedge funds).

166 Alternatively, the information may be detailed in the fund's limited partnership and/or subscription agreement.

167 A registered investment adviser, including a registered adviser managing a hedge fund, is generally required to provide this disclosure. See infra Part VI.E. (discussing conflicts of interest).

dollar arrangements could give the adviser an incentive to place trades more actively than it might otherwise in order to generate additional credits with executing broker-dealers.[168]

2. *Limited Partnership Agreements*

Investors in a hedge fund structured as a limited partnership enter into a limited partnership agreement. These agreements specify the respective rights and responsibilities of the limited partners and the general partner (usually the investment adviser). For example, these documents frequently list any restrictions on the percentage of an investor's assets invested in the hedge fund that a hedge fund will repurchase at any one time.

3. *Transparency*

Hedge fund advisers may provide investors with a list of hedge fund securities positions and holdings (position transparency) or information about the risks associated with the hedge fund's market positions (risk transparency).[169] The information may be provided in full or in part and on a current or delayed basis.

Position transparency may help investors monitor whether a hedge fund adviser is following the fund's stated strategies. For example, an investor who receives a month-end aggregated position report by industry can see whether the hedge fund adviser is drifting away from earlier statements about the fund's industry concentrations.[170] Many hedge funds, however, decline to share specific position transparency citing, among other reasons, the need to keep such

---

[168] The Commission has defined soft dollar practices as arrangements under which an adviser obtains products or services other than execution of securities transactions from or through a broker-dealer in exchange for the direction by the adviser of client brokerage transactions to the broker-dealer. See *Disclosure by Investment Advisers Regarding Soft Dollar Practices,* Advisers Act Release No. 1469 (Feb. 14, 1995) (proposing amendments to Form ADV).

[169] There are divergent views as to the utility of position transparency. See, e.g., *Consultants Demand Hedge Fund Transparency*, Fundfire (Mar. 27, 2003). Many experts believe that position transparency is of little value to most investors because hedge fund advisers tend to engage in complex strategies beyond the understanding of those investors. See, e.g., Roundtable Transcript, May 14 (statement of George Hall) ("position level transparency is basically meaningless . . . to most investors.").

[170] In one survey, 75 percent of institutional investors named monitoring strategy drift as one of their primary reasons for requiring additional transparency and 57 percent of those polled said that monitoring sector concentration was important to them. Deutsche Bank Survey, supra note 158, at 15.

proprietary information confidential.[171] For example, many worry that such disclosure might permit other market participants to take advantage of short positions that the hedge fund might hold, to the detriment of the fund and its investors. Moreover, position transparency with respect to a hedge fund implementing a merger arbitrage strategy, for example, will reveal little about the risks involved because it reveals nothing about the likelihood of certain events occurring and it does not disclose what leverage, if any, the investment adviser is using.[172]

The financial press has reported increased investor interest in risk transparency, and has ascribed this trend primarily to institutional investor demand as hedge funds become a component of mainstream investing programs for pension plans, endowments, foundations and other non-private institutional investors.[173] Proponents of increased risk transparency assert that it provides a more meaningful measure of the risks associated with an ongoing hedge fund investment than position transparency.[174]

4. Periodic Reporting

Many hedge fund advisers provide periodic reports to their investors, although they are not specifically required under the federal securities laws.[175] The information in such reports varies widely among hedge fund advisers in terms of the types of information shared and the quality of the disclosure. Some hedge fund advisers report only the hedge fund's overall performance during the most recent period, while other reports disclose each individual

---

171 See Roundtable Transcript, May 15 (statement of Mark Anson) ("If there is a public disclosure of the hedge fund manager's trading positions, well, that may reveal that hedge fund manager's competitive advantage. And as an investor, that doesn't help me, that's just going to erode my returns.").

172 Roundtable Transcript, May 14 (statement of George Hall) ("[I]f you look at most of the well-known blowups and problems that have happened, . . .[position] transparency wouldn't have made investors get out of those investments.").

173 See Alison Bisbey Colter, *Hedge-Fund Investors Seek Detailed Data, Survey Finds*, Wall Street Journal (Apr. 1, 2003); *Hedge Funds Seen Upping Risk Transparency*, Fundfire (Mar. 10, 2003).

174 Leslie Rahl, *Hedge Fund Transparency: Unraveling the Complex and Controversial Debate* 31-32 (2003); Comment submitted by Price Meadows Inc. at 3.

175 Hedge fund advisers are not required to provide investors with semiannual or any other reports containing information about their investments under the federal securities laws. In contrast, a registered investment company is required to provide shareholders with semiannual reports containing, among other information, a balance sheet and income statement within 60 days after the close of the reporting period. These reports also typically include a discussion of management's explanation of the investment company's performance. See Section 30(e) of the Investment Company Act and Rule 30e-1 thereunder.

investor's performance. Periodic reports may include detailed information about the fund, its investments, including whether the adviser has diverged from the fund's primary investment strategies, its performance history and relevant market commentary. Hedge fund advisers also may provide investors with account statements reporting their capital account balances with these periodic reports.

5. Additional Sources of Hedge Fund Information

Hedge fund databases and indices are an additional source of information about hedge funds.[176] Hedge fund indices are statistical composites that measure and report value changes in hedge fund groupings based on information contained in various databases. Various commenters, however, have questioned the accuracy and utility of these sources of information.[177] Among the complaints is the concern that, because there is no known universe of hedge funds, it is impossible to determine if all hedge funds that meet the qualifications of a particular index or database are actually represented in that index or database. In addition, there is no requirement for hedge funds to report their performance, and those that do may choose to stop providing the information at any time.[178] Studies also suggest that databases reflect a survivorship bias in that they may include only hedge funds currently in operation, and may exclude funds that close down as a result of poor performance and for other reasons.[179] Finally, the accuracy of hedge fund performance data provided by hedge fund advisers cannot be verified because of the lack of independent oversight of a hedge fund adviser's valuation of a hedge fund's portfolio securities and the fact that hedge fund performance results are not required to be reported using a uniform or standardized performance measure.

Information about hedge funds is also available through third-party websites (i.e., websites sponsored by persons not connected to any hedge fund). Generally these websites provide in one central location descriptive and performance-related information about a number

---

176 Bloomberg posts the results of over 100 hedge fund indices. The data for the indices is compiled by several database repositories/consultants, including: Credit Suisse First Boston/Tremont Partners; Evaluation Associates Capital Markets; Lehman Brothers; Hedge Fund Research, Inc.; Hennessee Hedge Fund Group; and Standard & Poor's.

177 See, e.g., Comment submitted by Craig S. Tyle on behalf of the Investment Company Institute; Bing Liang, *Hedge Funds: The Living and the Dead*, 35 Journal of Financial and Quantitative Analysis 309 (Sept. 2000); Harry M. Kat, *10 Things That Investors Should Know About Hedge Funds*, The Journal of Wealth Management 72 (Spring 2003).

178 For example, a successful hedge fund that has reached its capacity limits may close the fund to new investors and stop reporting altogether.

179 See, e.g., Liang, supra note 177 at 309; Kat, supra note 177 at 72, 73.

of hedge funds. Subscribers who are pre-qualified as accredited investors may, for a fee, receive a password permitting them access to this information.[180]

Finally, some information about hedge funds can be obtained from institutional reporting services such as Bloomberg and from financial newsletters. In addition, consistent with the growth of hedge funds, members of the press and other forms of media actively cover the hedge fund industry.[181]

E. Hedge Fund Service Providers

1. Hedge Fund Investment Advisers

A hedge fund typically is sponsored, organized and managed by its investment adviser. Many hedge fund investment advisers were founded by former traders, analysts or portfolio managers who left investment banks, investment management firms and other large financial institutions to establish their own hedge funds. Many of these individuals were attracted by the entrepreneurial aspects of starting their own business and managing assets using investment strategies in which they may have a particular expertise.[182] They also often are lured to establish their firms by the potential compensation that can be earned by managing hedge funds.

A hedge fund's investment adviser usually is responsible for establishing the hedge fund and overseeing the preparation of the hedge fund's PPM and subscription agreement, as well as the applicable limited partnership or limited liability company agreements (for domestic funds).[183] The investment adviser negotiates the hedge fund's arrangements with various service

---

[180] See *Lamp*, supra note 36.

[181] As discussed below, some of these practices lead to questions regarding the sources of hedge fund information and more importantly, whether hedge fund advisory personnel that provide information through these sources or that respond to inquiries from the media are engaged in a general solicitation or in a general advertising for purposes of the federal securities laws. See infra Part VI.F. (discussing concerns relating to general solicitation).

[182] See Roundtable Transcript, May 14 (statement of Joel Press) ("It really is a business of people wanting to create their own culture, their own environment, . . . creating their way of earning dollars in a way that's unique to them, in their own strategy, their own people, their own compensation environment, and allowing them to exist in today's technology wherever they choose to set up their organization and just work and trade and do their research. It's a very unique entrepreneur.").

[183] If the fund is a limited partnership, the investment adviser typically serves as the fund's general partner. If the fund is a limited liability company, the investment adviser typically serves as the

providers, including broker-dealers providing prime brokerage services. The investment adviser also generally is responsible, at least in the early stages of the hedge fund's existence, for marketing and distributing the fund's securities to investors. Finally, the investment adviser often is responsible for investor relations, including providing periodic reports to investors about fund performance.

The nature and capabilities of hedge fund investment advisers vary greatly. Some hedge fund advisers are exceedingly sophisticated entities that manage billions of dollars in investment assets. These advisers employ multiple portfolio managers, analysts, brokers and compliance, risk management, legal and other operational personnel. These advisers also have the ability to install sophisticated systems and procedures to assist in complying with the advisers' fiduciary duties. At the opposite end of the spectrum are smaller, typically recently established investment advisers where one individual serves as marketer, portfolio manager, trader, operations officer and risk manager. Many of these types of advisers have few, if any, formal procedures.

2. Broker-Dealers/Prime Brokers

Full service broker-dealers frequently offer prime brokerage services, in addition to typical brokerage services, to hedge fund advisers. Prime brokerage is a system developed by full-service broker-dealers to facilitate the clearance and settlement of securities trades and to provide other services for substantial retail and institutional customers, including hedge funds.[184] Hedge fund advisers often select prime brokers by matching the hedge fund's strategies with the specific services and areas of expertise offered by one or more different full-service broker-dealers.[185] Among the key services that may be offered by broker-dealers are:

- Streamlined Trading. Prime brokers clear and settle hedge funds' trades executed by other broker-dealers ("executing brokers") upon instructions from hedge fund advisers.[186] The hedge fund maintains its funds and securities in an account with the

---

fund's managing member. Terrance J. O'Malley, *The Regulation of Hedge Fund Managers by the SEC* 2 (2003).

184 See Testimony of William H. Donaldson, Chairman, U.S. Securities and Exchange Commission, Before the House Financial Services Subcommittee on Capital Markets, Insurance and Government Sponsored Enterprises (May 22, 2003) ("Chairman Donaldson Testimony").

185 Less established hedge funds tend to have arrangements with a single prime broker, which is often the firm that assisted in the hedge fund's start-up. More established hedge funds and those with more complex investment strategies are more likely to use multiple prime brokers. Hedge fund advisers may also use multiple broker-dealers in order to ensure only limited exposure of their investment strategies and portfolio holdings to any one broker-dealer.

186 See *Prime Broker Committee* (pub. avail. Jan. 25, 1994).

prime broker. Transactions placed with executing brokers are effected through accounts with those brokers in the name of the prime broker for the benefit of the hedge fund. After executing a trade, the executing broker and the hedge fund adviser report the details to the prime broker, who clears the trade and provides custody of the securities.

- Securities Lending. Many hedge funds' investment strategies involve short selling. A broker-dealer's securities loan capability plays a critical role in this process. Prime brokers use their relationships in the banking and brokerage communities to locate and acquire securities to lend to their customers for short selling purposes. Hedge funds often choose prime brokers who have the largest inventories of securities available for loans, or those who are able, through relationships and market clout, to easily acquire the securities.

- Margin Lending. Broker-dealers maintain margin accounts and provide loans and other services in connection with facilitating transactions for their customers. Prime brokers are generally required to maintain collateral to secure margin loans to hedge funds as a result of regulatory requirements and internal limits on risk exposure, which are constantly monitored for changes.

- Capital Introduction. These services are designed to introduce hedge fund advisers to potential hedge fund investors. Prime brokers may sponsor seminars for consultants and institutional investors seeking exposure to hedge funds. Prime brokers may also set up one-on-one meetings and prepare marketing materials to introduce potential investors to hedge fund advisers.

- Hedge Fund Start-up Services. Broker-dealers may offer new hedge fund advisers with the means of operating a hedge fund through introductions or referrals to lawyers, accountants and other service providers. In addition to assisting these hedge fund advisers with back office support, the broker-dealer may provide the hedge fund adviser with office space.

- Customized Reporting. Some broker-dealers offer to provide hedge fund advisers with customized periodic reports, including: (1) reports that reflect end of day pricing of securities; (2) reports that provide risk management to investment advisers, such as value-at-risk, liquidity and stress testing; and (3) reports that allow fund advisers to provide investors with some limited transparency information.

- Research. Most broker-dealers offer to provide proprietary and third-party research and other soft dollar arrangements related to individual securities and particular market sectors of interest to the hedge fund's investment adviser.

- Valuation. Some broker-dealers may function as a source of prices for certain types of (or individual) securities.

- Technology. Some broker-dealers facilitate the start-up of new hedge funds by offering technology services, including reporting systems, software, trading systems, connections to ECNs, fixed connectivity and risk management systems. Other broker-dealer firms offer advice in these areas and may arrange for these services to be provided by a third-party.

- Operations Services. Broker-dealers may offer to provide persons seeking to start a hedge fund with: (1) advice regarding minimum and maximum amounts of investor subscriptions required to be raised and rates of returns expected by investors; (2) services such as the preparation of offering materials and reports to investors; (3) information on strategies to assist in obtaining investments; (4) advice as to appropriate investment alternatives for excess cash; and (5) referrals of requests for information from potential investors.

Compensation for prime brokers varies based on the nature of the services that they provide to their customers. While some broker-dealer firms have guidelines for fees, most will negotiate final fees on a case-by-case basis.[187] To determine fees, prime brokers evaluate each hedge fund adviser on an overall risk/return basis and on the business done at the broker-dealer firm. Prime brokers generate revenue on hedge fund business from commissions, spreads, administrative fees, ticket charges, stock loans and credit interest earned from providing position financing and arranging securities loans.[188] The prime broker will generally assess the package of services required by the hedge fund and suggest a price on that basis.

3. Offshore Administrators

Investment advisers of offshore hedge funds typically rely on offshore administrators to provide various types of operational support.[189] These administrators provide offshore hedge funds with a number of services, many of which were initially offered to assist offshore hedge

---

187 Fee arrangements for prime brokerage services generally take the form of undocumented, verbal agreements.

188 For example, prime brokers that finance margin transactions receive income based on the spread between the prime broker's cost of borrowing and the rate charged to the hedge fund for the loan. In short sale arrangements handled by the prime broker, the prime broker generally retains the spread between the interest earned on collateral (i.e., cash) posted by the borrower and the rebate paid to the borrower. In addition, prime brokers may receive income by charging a "ticket charge" for each transaction processed through the prime broker.

189 *Outsourcing the Administration of Alternative Investment and Hedge Funds* – Presentation by Dermot S.L. Butler to the Mastering Investments and Offshore Funds Conference in Dublin, Ireland (Nov. 28, 2001), available at www.customhousegroup.com/outsourcing.htm.

funds in addressing certain U.S. tax provisions.[190] Notwithstanding the repeal of these provisions, many offshore funds continue to maintain their relationships with offshore administrators as a matter of convenience and investor preference.

Hedge fund advisers contract with offshore administrators for specific services that the administrator will provide their offshore hedge funds.[191] Offshore administrators may assist a hedge fund adviser to set up an offshore hedge fund in accordance with applicable foreign laws and also may assist the fund in complying with such laws on an ongoing basis. Offshore administrators also may assist hedge fund advisers by organizing meetings of investors and directors. They also may provide accounting, record keeping and reporting services, as well as assist in calculating fees and accruals. Offshore administrators may provide offshore hedge fund advisers with some oversight of their activities, particularly with respect to hedge fund finances.[192]

One of the more important tasks an offshore administrator may provide to an offshore hedge fund adviser is to assist it in pricing the fund's portfolio securities. The scope of this service frequently depends on the nature of the agreement with the offshore administrator, as well as the investment strategies used by a particular fund and whether prices are easily obtainable for the securities in which the hedge fund invests. In some cases, the administrator will not provide independent prices of specific securities, but may generally defer to the valuations provided to it by the hedge fund adviser and calculate the offshore hedge fund's net asset value based on that information.[193]

Certain offshore jurisdictions regulate offshore hedge fund administrators operating within their borders. Such regulation may subject the administrators to licensing, auditing and record keeping requirements. For example, many offshore hedge funds are domiciled in The

---

[190] Prior to 1998, if an offshore hedge fund performed a set of specific services (called the "Ten Commandments") from offices outside of the United States, the IRS would not consider the fund to have its principal office in the United States, and generally would not subject the hedge fund to U.S. taxation. The Taxpayer Relief Act of 1997 eliminated the need for offshore hedge funds to comply with the Ten Commandments. Pub. L. No. 105-34, 111 Stat. 788 (1997).

[191] For a discussion of the range of possible services provided by an offshore third-party hedge fund administrator, see Roundtable Transcript, May 14 (statement of William Keunen).

[192] See *Ready to Take Advantage*, International Fund Services Review Dublin 40 (2001). See also Roundtable Transcript, May 14 (statement of William Keunen).

[193] Hedge fund PPMs typically state that the general partner/managing member has ultimate authority in the valuation of securities.

Bahamas, Bermuda, the British Virgin Islands and the Cayman Islands.[194] These jurisdictions generally apply certain laws regulating the operations and conduct of investment pools and investment pool administrators to hedge funds and hedge fund administrators. These laws generally require fund administrators to be licensed, and three of the four jurisdictions require licensed fund administrators to have their accounts audited by an auditor approved by the regulator.[195] With respect to record keeping, each of these jurisdictions also subjects licensed fund administrators to anti-money laundering provisions. These provisions set forth client identification and record keeping requirements in addition to obligations to report any suspicious activity with respect to the funds they administer to the relevant authority in that jurisdiction.[196]

4. Auditors

Unlike registered investment companies, there is no statutory or regulatory requirement that a hedge fund have its financial statements audited.[197] Whether a hedge fund undergoes an annual audit of its financial statements is a contractual matter between the hedge fund and its investors. The auditors of hedge funds that provide audited financial statements to their investors generally conduct independent audits of hedge funds pursuant to Generally Accepted Auditing Standards in the United States ("GAAS"),[198] and generally render an opinion on

---

194 See generally The Bahamas Mutual Funds Act, 1995 (June 2001 Revision); Bermuda Monetary Authority Act 1969; Bermuda Companies Act 1981, Part XIIA (Mutual Fund Companies); Bermuda Monetary Authority (Collective Investment Scheme Classification) Regulations 1998; British Virgin Islands Mutual Funds Act, 1996 (as amended 1997); and Cayman Islands Mutual Funds Law (2003 Revision).

195 We understand that the fourth jurisdiction, Bermuda, has legislation pending that would require such audits.

196 See generally Bermuda Proceeds of Crime (Money Laundering) Regulations Sections 4-6 (1998); British Virgin Islands Anti-Money Laundering Code of Practice (1999); Cayman Islands Proceeds of Criminal Conduct Law (Money Laundering Regulations) (2000); The Bahamas Financial Transactions Reporting Act (2001 Revision).

197 Generally, the federal securities laws effectively prohibit any issuer, including registered investment companies, from offering or selling its securities publicly unless the issuer has filed a registration statement with the Commission which is required to include the issuer's financial statements and an opinion from an independent accountant. This prohibition, however, does not apply to hedge funds because they do not publicly offer or sell their securities. See Sections 5 and 7 of the Securities Act.

198 GAAS is generally comprised of the professional standards established by the American Institute of Certified Public Accountants ("AICPA"), including the industry audit and accounting guides. See *Implementation of Section 10A of the Securities Exchange Act of 1934*, Exchange Act Release No. 38387 (Mar. 12, 1997) (citing AU Section 150.02, AICPA Codification of Statements on Auditing Standards).

whether a hedge fund's financial statements are materially consistent with Generally Accepted Accounting Principles in the United States ("GAAP")[199] Depending on its agreement with its investors, the investment adviser may forward the independent accountant's report and the hedge fund's financial statements to investors upon the completion of the audit.[200]

A domestic hedge fund's engagement of an independent accountant to audit its financial statements is normally the responsibility of the fund's investment adviser. The selection of an independent accountant by domestic hedge funds, because they are typically organized as limited partnerships, is not subject to ratification or approval by a board of directors or other representative body of the investors in the hedge fund.[201]

The qualifications of an independent accountant that may be used by a hedge fund are not as stringent as those used for registered investment companies. A hedge fund's independent accountant must comply with the general independence standards of the AICPA or of the individual State Boards of Accountancy where the independent accountant practices. In contrast, a registered investment company independent accountant must comply with the requirements of the Investment Company Act of 1940 and is required to follow certain regulations established under the Sarbanes-Oxley Act of 2002 and various Commission rules to ensure the independence

---

199 A minority of domestic hedge funds and many offshore hedge funds prepare financial statements on a different comprehensive basis of accounting (e.g., tax accounting standards, international accounting standards (IAS) or local country generally accepted accounting principles (foreign GAAP)). If the financial statements are prepared in accordance with another comprehensive basis of accounting instead of GAAP, an audit may still be conducted under GAAS.

200 There are no time constraints on delivering the hedge fund's audited financial statements to investors unless specifically stated in the PPM or partnership agreement. But see Rule 206(4)-2 of the Advisers Act (registered investment adviser with custody of client assets is required to provide all limited partners or beneficial owners of the hedge fund with audited financial statements within 120 days in certain circumstances). In contrast, registered investment companies must transmit to shareholders audited financial statements within 60 days of their fiscal year end. See Rule 30e-1(c) under the Investment Company Act.

201 The selection process used by domestic hedge funds contrasts with the selection of an independent accountant by a registered investment company. The Investment Company Act regulates both the selection process of the fund's accountant and the continuing oversight of a registered investment company's auditing processes by requiring an independent accountant to be approved by either a majority vote of the disinterested board members or the approval by the board's audit committee. See Section 32(a) of the Investment Company Act and Rule 32a-4 thereunder. There may be some oversight of the selection of the independent accountants by offshore hedge funds, because they are typically organized as corporations.

of auditors.[202] In addition, a hedge fund's independent accountant is not required to register with the Public Company Accounting Oversight Board ("PCAOB") unless if it also serves as the independent auditor for a public company.[203] A hedge fund's independent auditor is not otherwise required to register with PCAOB, nor are its audits with respect to private issuers subject to PCAOB examination. As a result, the audits of hedge fund financial statements will not be subject to the examination process of the PCAOB in its oversight of registered accounting firms.[204]

5. Consultants and Other Finders

Hedge fund consultants are generally third parties who perform services for hedge fund investors and the hedge funds. Consultants offer investors educational and due diligence services to assist them in navigating the complexities of hedge fund investing.[205] They also may provide hedge fund advisers with services, such as assisting those advisers to determine the eligibility of new investors. Many consultants manage their own proprietary hedge fund products for sale to investors.

Hedge fund consultants educate investors with respect to the type of information that should be sought in connection with any hedge fund investment.[206] They may assess the

---

[202] Sarbanes-Oxley Act of 2002, Pub. L. No. 107-204, 116 Stat. 745 (2002) ("Sarbanes-Oxley Act"). See also Article 2 of Regulation S-X (qualifications and reports of accountants).

[203] PCAOB has jurisdiction over entities that are issuers pursuant to Section 3(a)(8) of the Exchange Act. PCAOB oversees the audits of financial statements of such public companies through registration, standard setting, inspection and disciplinary programs. See Sarbanes-Oxley Act, Sections 102-105, 108.

[204] The independent audits of public companies, including registered investment companies, will be subject to PCAOB examination. PCAOB is in the process of establishing auditing, quality control and ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports. The implementation of these standards may indirectly benefit audits of hedge funds to the extent that PCAOB-registered firms also perform audits of hedge funds and draw on the standards applicable with respect to public companies.

[205] Hedge fund investors also frequently hire private investigator services to assist them in verifying the information provided by the investment adviser and its personnel. For example, these services may be called upon to verify a portfolio manager's educational or employment background as well as to confirm reported investment performance assertions. See Roundtable Transcript, May 15 (statement of Sandra Manzke), supra note 162.

[206] Most hedge fund investors perform extensive due diligence prior to making initial and subsequent investments. According to a survey of institutional investors, 60 percent of institutional investors take between two to six months to complete due diligence on a hedge fund. Deutsche Bank Survey, supra note 158, at 7.

suitability of a hedge fund investment in light of the investor's investment objectives and risk tolerance and may assist with asset allocation decisions.[207]

Consultants often provide investors with due diligence services relating to specific hedge fund investments, such as analyzing the hedge fund's offering and partnership documents, compiling historic return information and checking background information about the hedge fund adviser. Consultants may also make an assessment of the operational capabilities of a particular hedge fund by visiting the adviser. After an investment is made, consultants assist investors' monitoring of hedge fund investments and management through regular communications with the hedge fund adviser and tracking of the fund's performance against other funds that utilize the same investment strategy.

The intermediary role of hedge fund consultants may present certain conflicts of interest. A conflict of interest may exist when a hedge fund consultant provides an advisory service to investors, but also offers or recommends its own proprietary hedge fund products. A conflict of interest may also arise when the consultant essentially acts as a "marketer" for the hedge fund and receives a "rebate" or fee (e.g., a percentage of the hedge fund's management and performance fees) from the hedge fund.[208] This contrasts with other arrangements where the

---

207 See, e.g., Hennessee Group Comment Letter, supra note 4, at 18-19. Consultants who, for compensation, recommend specific hedge funds to investors generally are serving as investment advisers under Section 202(a)(11) of the Advisers Act. A consultant that merely engages in solicitation activities for a registered investment adviser is deemed to be an associated person of that investment adviser. See *Requirements Governing Payments of Cash Referral Fees by Investment Advisers*, Advisers Act Release No. 688 (July 12, 1979).

208 Generally, the obligation to disclose conflicts arises from the consultant's status as an investment adviser. Consultants that market hedge fund interests, however, may be acting as a broker and be required to register with the Commission as such under Section 15(b) of the Exchange Act. Section 3(a)(4) of the Exchange Act generally defines a "broker" as a person who is "engaged in the business of effecting transactions in securities for the account of others." "Regularity of participation" in securities transactions is primary indicia of being engaged in the business of effecting securities transactions. *SEC v. Kenton Capital, Ltd.*, 69 F. Supp. 2d 1, 12-13 (D.D.C. 1998). A person may be found to be acting as a broker if he participates in securities transactions "at key points in the chain of distribution." *Massachusetts Financial Services, Inc. v. Securities Investor Protection Corp.*, 411 F. Supp. 411, 415 (D. Mass.), aff'd, 545 F.2d 754 (1st Cir. 1976), cert. denied, 431 U.S. 904 (1977). Key factors indicating that a person may be acting as a broker -- and, thus would need to register with the Commission -- are solicitation of investors to purchase securities, involvement in negotiations between the issuer and the investor, and receipt of transaction-related compensation. See, e.g., *SEC v. Hansen*, [1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) 91,426 (S.D.N.Y. 1984). It is not necessary to prove scienter to establish a violation of Section 15(a)(1). *SEC v. National Executive Planners, Ltd.*,503 F. Supp. 1066, 1073 (M.D.N.C. 1980).

consultant receives a fee from the investor, in the form of either a retainer, or a flat or asset-based fee.[209]

F. Hedge Fund Advisory Fees

An investment adviser to a hedge fund generally receives compensation composed of an investment management fee and an incentive allocation.[210] The investment management fee is an asset-based fee that is similar to the advisory fee charged by advisers to registered investment companies and is designed to provide the investment adviser with current cash flow to maintain operations. The investment management fee is generally one to two percent of net assets.[211]

The incentive allocation is not a fee paid to the investment adviser, but instead, is an allocation of partnership earnings and profits to the general partner of the partnership. Unlike the management fee, the incentive allocation is usually calculated as a percentage of the hedge fund's net investment income, realized capital gains and unrealized capital appreciation. Incentive allocations for hedge funds tend to be 20 percent of realized and unrealized gains.[212]

---

[209] Hedge fund advisers that are registered investment advisers that have referral/solicitation arrangements with various consultants or broker-dealers are specifically required to disclose, among other things, the compensation that they pay to solicitors. See Rule 206(4)-3 under the Investment Advisers Act and Form ADV, Part II, Item 13. Any conflicts of interest surrounding the referral arrangement (e.g., when the solicitor is also an investor in the hedge fund) must also be disclosed.

[210] The nature of a hedge fund's fees and the tax implications are intertwined with the fund's domicile and organizational structure.

[211] According to Van Hedge Fund Advisers ("VHFA"), as of the first quarter of 2003, the median hedge fund had a management fee of one percent. VHFA tracks over 4,000 hedge funds. See Van Hedge Fund Advisors International, Inc., *Global Hedge Funds*, characteristics as of the first quarter of 2003 ("Global Hedge Funds Characteristics"). See also *Clinton Group Hikes Fees on Macro Fund*, Alternative Investment News (July 1, 2003) (noting that the fund increased its management fee to three percent).

[212] Section 205 of the Advisers Act and Rule 205-3 thereunder address the assessment of fees based upon a share of capital gains and capital appreciation. These provisions generally prohibit registered investment advisers from charging performance-based fees to most clients that are not "qualified clients," as defined in Rule 205-3. This prohibition does not apply to advisory relationships with hedge funds that rely on Section 3(c)(7). See Section 205(b)(4) of the Advisers Act.

Rule 205-3 generally defines a qualified client as one of the following: (1) a natural person or company that has $750,000 under the management of the adviser; or (2) a natural person or company whom the adviser believes has (a) a net worth of $1.5 million or (b) is a qualified

In comparison with the asset-based fees typically charged by registered investment companies, the incentive allocations, or performance fees typically charged by hedge fund advisers, are often perceived as creating incentives for investment advisers to take greater risks with client assets.[213]

Hedge fund advisers often agree to certain conditions that are designed to align the adviser's interests with those of the hedge fund investors. For example, investors often require the investment adviser to have a significant financial investment in the hedge fund. Investors rely on this requirement to serve a number of purposes, including curbing any temptation for the adviser to take undue risks.

The partnership agreement may also contain other provisions that protect investors from paying incentive allocations for poor performance, such as high water marks and hurdle rates. High water marks are thresholds that the investment adviser must achieve before an incentive allocation can be assessed.[214] Generally, a high water mark varies for each limited partner based on the maximum value of the limited partner's interest in the partnership since its initial investment in the fund. The investment adviser must generate investment returns beyond the "high water mark" before the investment adviser can assess an incentive allocation. In essence, the hedge fund's performance must surpass its previous high point before additional incentive allocations can be assessed. This prohibits an adviser from collecting an incentive allocation twice for the same performance.[215]

---

purchaser as defined in Section 2(a)(51)(A) of the Investment Company Act. Rule 205-3(b) requires a registered investment adviser intending to charge a hedge fund relying on Section 3(c)(1) a performance fee to look through the hedge fund to ensure that each of its equity owners is also a qualified client. See *Exemption to Allow Investment Advisers to Charge Fees Based Upon a Share of Capital Gains Upon or Capital Appreciation of a Client's Account,* Advisers Act Release No. 1731 at text accompanying nn.28-32 (July 15, 1998).

213 See H.R. Rep. No. 2639, 76th Cong., 3d Sess. 29 (1940). Performance fees have been characterized as "heads I win, tails you lose" arrangements in which the adviser had everything to gain if successful and little, if anything, to lose if not. S. Rep. No. 1775, 76th Cong., 3d Sess. 22 (1940). See also Investment Trusts and Investment Companies, H.R. Doc. No. 477, 76th Cong., 3d Sess. 30 (1939); *Exemption To Allow Registered Investment Advisers to Charge Fees Based Upon a Share of Capital Gains Upon or Capital Appreciation of a Client's Account.* Advisers Act Release No. 996 (Nov. 26, 1985); *Exemption To Allow Investment Advisers To Charge Fees Based Upon a Share of Capital Gains Upon or Capital Appreciation of a Client's Account*, Advisers Act Release No. 1682 (Nov. 13, 1997).

214 According to VHFA, of those funds with performance fee arrangements, 89 percent have a high water mark. See Global Hedge Funds Characteristics, supra note 211.

215 For example, assuming an initial investment of $10,000, a 20 percent performance fee, and a first year return of ten percent, the first year's performance fee would be $200: [($10,000 * 1.10 =

Hurdle rates are also used to guarantee that the hedge fund achieves a minimum investment performance before the fund's adviser may receive any incentive allocation.[216] A hurdle rate establishes a performance floor that the investment adviser must exceed in order to obtain the incentive allocation.[217]

Hedge funds that cannot consistently achieve positive performance are likely to exit the business. Because the incentive allocation provides the majority of an investment adviser's income from its hedge fund, failure to produce positive returns will prevent a hedge fund from collecting the performance fee. If an adviser's performance allocation is subject to a high water mark, the hedge fund must surpass its previous high point before a performance allocation is paid. The failure to produce positive returns has other effects beyond denying the fund's adviser of profits. These may include the departure of the fund's key employees, as well as the redemption of investments. Of course, these factors are key determinants into whether the hedge fund will survive.[218]

When hedge funds do close, certain liquidation issues may be present. Hedge fund management contracts typically have provisions designed to protect the adviser and the remaining limited partners in the event of liquidation. "Holdback provisions" permit hedge funds to withhold specified fractions of redeeming limited partner's capital. These provisions

---

$11,000) and ($11,000 - $10,000) * 0.20 = $200]. If the second year's return is -20 percent [$11,000 * 0.80 = $8,800], the adviser receives no performance fee since the $8,800 is less than the high water mark of $11,000. If in the third year the fund has a 30 percent return [$8,800 * 1.30 = $11,440], the adviser receives a performance fee of $88 [$11,440 - $11,000 = $440 * 0.20 = $88].

216 According to VHFA, of those funds with performance fee arrangements, 18 percent have a hurdle rate. See Global Hedge Funds Characteristics, supra note 211.

217 If a hedge fund investment adviser performance compensation plan is subject to a 10 percent hurdle rate provision, then the investment adviser must exceed a 10 percent return on the fund before an incentive allocation can be assessed. For example, assuming an initial investment of $10,000, a hurdle rate of ten percent, a 20 percent performance fee and first year actual fund performance of 25 percent, then the adviser would earn $300 in incentive allocation: [{10,000*(1.25-1.10)}*.20=300]. In other variations, a hurdle rate can be applied to all profits, but only after the net return has exceeded the hurdle rate (i.e., the investment return after consideration of the incentive allocation is greater than the hurdle rate).

218 The President's Working Group on Financial Markets report estimated that, based on a sample of 397 hedge funds from 1994 to 1998, the survival rate was less than 60 percent. LTCM Report, supra note 126, at A-4. VFHF reports that the median hedge fund age is only 5.5 years. See Global Hedge Funds Characteristics, supra note 211.

guard against the possibility that investors should have received less money than they received on the redemption dates.

G. Hedge Fund Valuation Practices

Hedge funds that invest in liquid securities normally value their portfolio securities using market values for those securities when available. Hedge fund advisers generally "fair value" portfolio securities when market prices for those securities are not readily available.[219] Some hedge fund advisers fair value their portfolio securities by reference to an accounting industry standard, which standard generally equates fair value to the price that the fund might reasonably expect to receive for a security or other asset upon its current sale.[220]

The key difference between the valuation of a registered investment company's portfolio securities and those of a hedge fund's portfolio securities, is that a hedge fund investment adviser generally has complete discretion with respect to the valuations used to price the fund's securities, whereas the board of directors of a registered investment company provides independent oversight of the adviser's valuation activities.[221] For example, some hedge funds may value the securities of non-publicly traded companies at cost and may not revalue them until a public trading market for the securities develops or the issuer engages in a subsequent round of equity financing.

Third parties also may assist hedge funds in the valuation process. Many hedge funds obtain pricing information from independent pricing services to either ascertain the market values or assist the investment adviser in establishing fair values of the securities. Prime brokers, as well as third-party administrators to offshore hedge funds, often perform fund valuation services as part of the package of services they provide to hedge funds.[222] Whether

---

[219] Illiquid securities, certain debt instruments and securities issued in private placements and other difficult-to-price securities are the types of securities a hedge fund would be expected to fair value.

[220] See Statement of Financial Accounting Standards No. 107, Financial Accounting Standards Bd. (1991); Statement of Financial Accounting Standards No. 115, Financial Accounting Standards Bd. (1993); and Statement of Financial Accounting Standards No 133, Financial Accounting Standards Bd. (1998).

[221] See supra note 16.

[222] See supra Part IV.E.2. (discussing role of broker-dealers/prime brokers) and Part IV.E.3. (discussing offshore administrators). Prime brokers and administrators may review the valuation of portfolio securities, provide independent prices and reconciliation of portfolios and calculate and report NAVs.

interposing a third-party into the fund's valuation process increases the accuracy of the reported NAV largely will depend on the relationship of the third party to the hedge fund adviser and on what responsibilities the third-party is required to perform under the service contract.[223] To assist in valuing particularly difficult securities, some hedge funds segregate these securities into "side pockets," and postpone including the value of those securities in the hedge fund's NAV calculation until the investment is liquidated.[224]

H. Audit Reports

When conducting an audit of a hedge fund in accordance with GAAS, auditors are required to follow the AICPA's Investment Company Audit and Accounting Guide. Similar to an audit of a registered investment company, the auditor designs a series of tests, based upon an assessment of the hedge fund's internal control environment, that verify the validity of the assets, liabilities, income, expenses and capital transactions of the hedge fund. In addition, this audit testing typically verifies the accuracy of partner capital balances, management and incentive fee calculations and of NAV calculations at intervals when significant contributions and withdrawals are permitted by the fund.

A hedge fund audit, however, is not required to be identical to an audit of a registered investment company.[225] Unlike an audit of a registered investment company, a hedge fund audit generally utilizes a substantive test approach and does not rely on a strong, established internal control system.[226] The audit testing typically includes a sample confirmation of assets and

---

[223] For example, the service contract may require a third party to simply transmit prices or check computations based on valuations provided by the hedge fund or its prime broker, without inquiry into the reasonableness of those prices.

[224] "Side pockets" protect investors against adverse timing of withdrawals. Since investment advisers tend to redeem more liquid assets first, as limited partners withdraw their money, the portion of the fund that is illiquid may increase significantly, leaving the remaining limited partners with an illiquid investment. The use of "side pocket" accounting effectively reduces the risk of illiquidity issues for limited partners that remain in the fund.

[225] The AICPA is in the process of revising its guidance to clarify the differences in accounting and auditing by registered investment companies and non-registered investment partnerships, such as hedge funds. See, e.g., AICPA Accounting Standards Executive Committee, Exposure Draft of a Proposed Statement of Position (SOP), *Reporting Financial Highlights and Schedule of Investments by Nonregistered Investment Partnerships: An Amendment to the Audit and Accounting Guide Audits of Investment Companies and AICPA Statement of Position 95-2*, *Financial Reporting by Nonpublic Investment Partnership* (July 15, 2003).

[226] A hedge fund auditor is not required to render a separate opinion on whether the internal control system contains any material weaknesses. See Form N-SAR, Item 77B.

liabilities with independent third-party service providers to the hedge fund. In addition, a hedge fund audit generally permits the use of sampling techniques (i.e., less than 100 percent) in audit areas where the statutory provisions or regulatory rules applicable to registered investment companies require 100 percent verification, such as with respect to the existence and valuation of portfolio securities.[227]

When conducting an audit of a hedge fund in accordance with GAAS, auditors are required to review a hedge fund's fair valuation procedures for consistency with the fund's PPM or partnership agreement, as applicable, to determine the reasonableness of the procedures.[228] Although the audit procedures with respect to valuation also are similar to those used for registered investment companies, a hedge fund audit provides less assurance about the valuation process for two reasons.[229] First, a hedge fund audit evaluates a valuation determination that is made by the hedge fund's investment adviser, who both makes investment decisions for the hedge fund and typically has ultimate discretion for assigning a value to its portfolio securities. This valuation process contrasts with the delegation of duties in the registered investment company context, where the investment company's board of directors establishes valuation procedures and provides independent review of valuation determinations. Second, hedge fund auditors perform sample valuation tests of the hedge fund's portfolio securities that are less comprehensive than the 100 percent verification standard applicable to registered investment companies.[230]

I. Risk Management

Hedge fund advisers are expected to achieve performance returns for investors by using strategies that are designed to assume or eliminate calculated risks consistent with the hedge fund's investment objective. The observation that some hedge funds are riskier than others

---

[227] See Section 30(g) of the Investment Company Act (100 percent custody verification) and Accounting Series Release No. 118, Financial Reporting Codification (CCH) Section 404.03 (Dec. 23, 1970) (100 percent verification of pricing).

[228] Hedge fund auditors typically conduct substantive tests on the application of the procedures in pricing portfolio securities to ensure that the process is being consistently applied.

[229] See infra Part VI.B. (discussing concerns about valuation of hedge fund portfolio securities).

[230] Many hedge funds obtain pricing information from pricing/valuation services such as Bloomberg, Reuters and FT Interactive Data to either ascertain market values or assist the investment adviser in establishing fair values. As with registered investment companies, auditors of hedge funds confirm the accuracy of market-priced security valuations with an independent third party by comparing the portfolio values obtained from a pricing service to the valuations used in a hedge fund's financial statements.

reflects the wide latitude hedge fund advisers have to operate their funds and the potential that exists for some hedge funds to suffer significant losses. An effective risk management system, therefore, is important to a hedge fund's operations.

The risk management systems used by hedge funds vary by firm. Larger and more seasoned hedge funds often establish an internal risk management structure using their own resources and personnel. It is common for less established hedge fund advisers that usually have fewer financial and personnel resources to outsource the risk management function to their prime brokers or to other service providers. Some of the less established hedge fund advisers have little or no risk management controls.

Generally, risk management is a monitoring function that quantifies and tracks the risks involved after investments are acquired. Effective risk management systems require hedge fund advisers to identify, measure, monitor and manage the various dimensions of risk. These processes generally differ by firm because they are based on the resources and investment strategies of the hedge fund adviser. The risks that are associated with hedge funds generally may be divided into three broad areas of concern: portfolio risks; the effect of leverage on portfolio risks; and operational risks. Portfolio risks may be further divided into market risk, liquidity risk and credit risk.

As a general industry standard, hedge fund advisers uniformly review information about positions, transactions, orders and margin to identify and monitor exposures at the individual portfolio level and on an aggregate basis for portfolios with the same adviser and/or using the same strategy. This information is then used to identify any excessive concentration of holdings in any one market and any concentration of holdings with potential converging correlations.

J. Funds of Hedge Funds

1. Background

A FOHF is a hedge fund that utilizes a multi-manager, multi-strategy approach by investing all, or a significant portion, of its assets in hedge funds.[231] Although FOHFs can invest in as many underlying hedge funds as they choose, they typically invest in 15 to 25 funds. Institutional investors often choose to invest in FOHFs, rather than in single-manager hedge funds, in order to diversify against the risks associated with a particular hedge fund adviser. One

---

[231] The Investment Company Act generally does not limit the investment in hedge funds by registered investment companies, including registered FOHFs. But see supra note 34 (look-through provision of Section 3(c)(1)) and supra note 41 (companies formed for the specific purpose of investing in a Section 3(c)(7) fund may not be a qualified purchaser).

article reports that during the first three quarters of 2002, the number of FOHFs grew from an estimated 510 to 675, an increase of 32 percent, and FOHF assets increased by 84 percent.[232]

Most FOHFs are not registered as investment companies under the Investment Company Act and privately place their securities generally with accredited investors or qualified purchasers. FOHFs employ a compensation structure similar to that of other hedge funds. FOHFs typically charge asset-based investment management fees that range from about one-half to two percent and a performance allocation that ranges up to 20 percent. These fees are levied in addition to the asset-based fees and performance allocations assessed by the underlying hedge funds.

2. Registered FOHFs

An increasing number of FOHFs are registering as investment companies with the Commission; as of early September 2003, 82 FOHFs had registered as closed-end investment companies under the Investment Company Act.[233] At the same time that a FOHF registers as an investment company under the Investment Company Act, it may also choose to register the offer and sale of its securities under the Securities Act ("Dual Registered FOHF"). Registration under the Securities Act allows a registered FOHF to, among other things publicly offer its securities. Dual Registered FOHFs must comply with the prospectus requirements of the Securities Act.

In contrast to Dual Registered FOHFs, registered FOHFs that do not register their offerings under the Securities Act must privately place their securities in reliance on an exemption from registration ("40 Act only Registered FOHF").[234] More than two-thirds of the 82 registered FOHFs are Dual Registered FOHFs.[235] Registered FOHFs collectively have

---

[232] Justin Dini, *The Fund of Hedge Fund,* Institutional Investor 50, 51 (Dec. 2002) (citing information from HFR, an organization that collects hedge fund data).

[233] In 1998, the first FOHF registered as an investment company under the Investment Company Act. See PW After Tax Equity Partners (SEC File No. 811-08803).

[234] See supra Part III.B.2 (discussing Regulation D).

[235] In October 2001, Oppenheimer Tremont Market Neutral Fund (SEC File No. 811-10537) and Oppenheimer Tremont Opportunity Fund (SEC File No. 811-10541) became the first FOHFs to register as investment companies under the Investment Company Act and to register the offering of their securities under the Securities Act.

approximately $3.7 billion of assets under management. Investment advisers to registered FOHFs must register under the Advisers Act.[236]

To date, all operating registered FOHFs have imposed a minimum initial investment requirement on their investors ranging from $25,000 up to $1 million.[237] With respect to eligibility standards, registered FOHFs, including Dual Registered FOHFs, have restricted sales to investors that, at a minimum, satisfy the accredited investor standard.[238] Registered FOHFs, however, may lower or eliminate the investment minimum at any time because this investment qualification is not required by law.[239]

Importantly, other net worth-related, eligibility criteria may apply to investors in a registered FOHF, depending, in large part, on whether the fund intends to charge a performance fee. If the investment adviser wishes to charge a performance fee to the registered FOHF, all of the fund's investors must satisfy the definition of a "qualified client" under the Investment Advisers Act.[240]

Investors in a registered FOHF are directly subject to the fees and expenses charged at the registered FOHF level. They are also indirectly subject to the fees and expenses charged by the underlying hedge funds in which the registered FOHF invests.[241] Typically, a registered FOHF pays its investment adviser an asset-based management fee, generally equal to one to two percent of assets under management and, again provided that the fund's investors are all qualified clients, a performance allocation based on the capital gains and capital appreciation of

---

[236] See Rule 203A-1 of the Advisers Act (requiring registration of advisers to registered investment companies).

[237] Notwithstanding the stated investment minimum, the offering documents of a registered FOHF (like those of hedge funds or unregistered FOHFs) may provide that the fund may reduce or waive the required minimum investment in limited circumstances, such as when the investor already is an existing client of the investment adviser with substantial assets under management, or when the investor is an officer or employee of the investment adviser.

[238] See supra Part III.B. (discussing accredited investor standard).

[239] But see infra note 250 (pending registration statement of FOHF that will offer and sell its securities without investor eligibility limitations).

[240] See supra note 212.

[241] The underlying hedge funds could also be FOHFs, which would further compound fees and affect the performance of an investor's investment in a registered FOHF.

the fund's portfolio.[242] The underlying hedge funds, in turn, pay similarly structured investment advisory fees to their investment advisers. In addition, operational expenses, including brokerage commissions, custody fees and transfer agent fees, may be incurred at both levels of a registered FOHF.

Registered FOHFs are structured as closed-end management investment companies. As a general matter, closed-end investment companies offer a fixed number of shares to investors during the initial offering period. Investors purchase registered FOHF shares either in the fund's initial offering or in any subsequent offerings.[243] Many registered FOHFs provide for subsequent offerings on a semi-annual or quarterly basis, but other registered FOHFs allow investors to purchase shares on a more frequent basis. The number and dates of any subsequent offerings are determined by the fund.

A registered FOHF uses the Form N-2 to register as a closed-end investment company under the Investment Company Act.[244] The prospectus portion of the registration statement discloses information about, among other things, the FOHF's investment objectives and strategies, risks, expenses and performance. Additional or more detailed information regarding the FOHF and its operations, such as: fund history and policies; officers, directors, and persons controlling the fund; advisory and other services; brokerage commissions; and tax and other matters are contained in the Statement of Additional Information portion of the registration statement.[245]

A 40 Act only Registered FOHF may commence offering and selling its shares immediately upon filing a registration statement with the Commission because such registration statements are deemed effective upon filing.[246] Because 40 Act only Registered FOHFs do not register their securities offerings under the Securities Act, the prospectus delivery requirements under the Securities Act do not apply. Accordingly, these funds typically provide a PPM to interested investors that may not necessarily provide all the information required to be included in the N-2 registration statement.

---

242 See supra note 212. See also supra Part IV.F. (discussing hedge fund advisory fees).

243 Unlike open-end registered investment companies, closed-end funds do not continuously offer to sell and redeem fund shares.

244 The Form N-2 is used by FOHFs that choose also to register their shares under the Securities Act.

245 Registration statements on Form N-2 are available to the public on the Commission's website.

246 See Section 8(a) of the Investment Company Act. The FOHF also would file a notice on Form D with the Commission no later than 15 days after the first sale of securities.

Under the Investment Company Act, shareholders in Dual Registered FOHFs and 40 Act only Registered FOHFs receive semiannual shareholder reports that are required to disclose, among other information, the fund's financial statements and portfolio holdings, during the relevant period.[247] Registered FOHFs may fulfill this disclosure obligation by listing the hedge funds in which the registered FOHF has invested, but they are not required to identify the securities in which the underlying hedge funds have invested.

3. Repurchases

Registered FOHFs generally provide limited liquidity to their shareholders by offering to repurchase their securities pursuant to tender offers structured to comply with Section 23(c)(2) of the Investment Company Act and Rule 13e-4 of the Exchange Act.[248] Many registered FOHFs provide for repurchases twice a year, but other registered FOHFs provide for repurchases on a quarterly or more frequent basis. The registered FOHF's adviser sets the terms of repurchase, which are disclosed to investors in the fund's offering documents.[249] Unlike most closed-end registered investment companies, shares of registered FOHFs have not been, to date, listed for trading in the United States on an exchange or NASDAQ.[250]

4. Content of Registered FOHF Disclosure.

Registered FOHFs provide in their registration statements on Form N-2 information that is required to be disclosed by all closed-end investment companies. In addition, they disclose information about the fund's unique strategies, operations and risks. Registration statements also provide information about the valuation of portfolio securities, certain risks involved in the investment and fees and expenses.

---

247 See Section 30(e) of the Investment Company Act and Rule 30e-1 thereunder.

248 Under Section 23(c)(2) of the Investment Company Act, registered closed-end investment companies may repurchase their shares in tender offers. Generally, Rule 13e-4 under the Exchange Act governs issuer tender offers and prohibits fraudulent, deceptive and manipulative acts by an issuer or an affiliate in connection with an issuer tender offer, and prescribes filing, timing, disclosure, anti-discrimination provisions and other requirements.

249 Registered FOHF prospectuses typically state that the fund "expects" to repurchase shares on a semi-annual, quarterly, or other basis. However, these funds do not qualify as "interval funds" for purposes of the Investment Company Act because they do not comply with all of the requirements of Rule 23c-3 under that Act. For example, registered FOHFs have not, to date, designated periodic repurchases as a fundamental policy.

250 One Dual Registered FOHF that seeks to list its shares on the New York Stock Exchange has filed a registration statement with the Commission. That registration statement is currently under review. See CINTRA Select Fund (SEC File Nos. 811-21165 and 333-96821).

- Valuation. Many registered FOHFs disclose that, prior to investing in a hedge fund, the registered FOHF's adviser conducts due diligence reviews of the valuation methodologies used by each potential hedge fund investment. Most registered FOHFs disclose that one of the factors that they rely on to value their interests in hedge funds is valuation information provided to them by the advisers to the underlying hedge funds. They also typically disclose that they generally lack access to the information that would be needed to confirm independently the accuracy of valuation information provided by the underlying hedge funds.

- Risks. Registered FOHFs typically disclose that only those investors who can tolerate a high degree of risk, e.g., the loss of all or a portion of the investment, should invest in such funds. Some registered FOHFs also disclose that a potential investor should consider various factors (such as the investor's net worth, income, age, risk tolerance and liquidity needs) before deciding whether the particular registered FOHF is a suitable investment.

- Fees and Expenses. The fact that investors pay fees and expenses at both the registered FOHF and underlying hedge fund level is disclosed prominently to investors, as are the types of fees charged at the hedge fund level. Registered FOHFs generally do not, however, disclose the actual or estimated amount of fees indirectly incurred by the FOHF through its investment in the underlying hedge funds.[251]

- Investment Strategies. Registered FOHFs typically disclose the various investment strategies that the underlying hedge funds may employ, including, in some cases, the impact of style shifts in underlying hedge funds on the registered FOHF's ability to achieve its stated investment objective.

V. Hedge Fund Enforcement Actions

A. Commission Actions

Although hedge funds are not registered under the Investment Company Act, they and their advisers (regardless of whether the advisers are registered under the Advisers Act) are subject to the antifraud provisions of the federal securities laws. In recent years, the Commission

---

[251] Form N-2 requires disclosure of the fees and expenses incurred by the registered FOHF, but does not encompass disclosure of fees and expenses incurred by the underlying hedge funds. See infra note 322.

has instituted a significant number of actions alleging hedge fund fraud.[252] Since 1999, the Commission has brought approximately 38 enforcement actions relating to hedge fund advisers and hedge funds, and, in the last few years, the Commission has seen a steady increase in actions. The Commission staff is currently investigating a number of additional matters involving possible fraud or other violations by hedge fund advisers and hedge funds.

There is no evidence indicating that hedge funds or their advisers engage disproportionately in fraudulent activity. However, the growth in the number of hedge fund fraud cases is likely attributable to a number of factors, including: the popularity of hedge fund investments and the large amounts of money they involve (and thus their attractiveness to perpetrators of fraud); the entrance to the industry of inexperienced, untested and, in some cases, unqualified individuals; and lack of adequate controls on the operations of some hedge fund advisers.

The fraud charged in Commission enforcement actions against hedge fund advisers has been similar to the types of fraud charged against other types of investment advisers. Examples include: misappropriation of assets;[253] misrepresentation of portfolio performance;[254] falsification of experience, credentials and past returns;[255] misleading disclosure regarding

---

[252] In most cases involving hedge funds, the Commission institutes enforcement actions against the hedge fund adviser and/or the adviser's principals.

[253] See, e.g., *SEC v. Jean Baptiste Jean Pierre, Gabriel Toks Pearse and Darius L. Lee*, Litigation Release No. 18216 (July 7, 2003); *SEC v. Peter W. Chabot, Chabot Investments, Inc. Sirens Investments, Inc., Sirens Synergy and the Synergy Fund, LLC*, Litigation Release No. 18214 (July 3, 2003); *SEC v. David M. Mobley, Sr.,* Litigation Release No. 18150 (May 20, 2003); *SEC v. Vestron Financial Corp.,* Litigation Release No. 18065 (Apr. 2, 2003); *SEC v. Hoover and Hoover Capital Management, Inc.*, Litigation Release No. 17981 (Feb. 11, 2003).

[254] See, e.g., *SEC v. Michael Lauer, Lancer Management Group, LLC, and Lancer Management Group II, LLC*, Litigation Release No. 18247 (July 23, 2003); *SEC v. Peter W. Chabot, Chabot Investments, Inc., Sirens Investments, Inc., Sirens Synergy and the Synergy Fund, LLC*, Litigation Release No. 18214 (July 3, 2003); *SEC v. David M. Mobley, Sr.,* Litigation Release No. 18150 (May 20, 2003); *In the Matter of Charles K. Seavey*, Advisers Act Release No. 2119 (Mar. 27, 2003); *SEC v. Hoover and Hoover Capital Management, Inc.,* Litigation Release No. 17981 (Feb. 11, 2003); *SEC v. Beacon Hill Asset Management LLC*, Litigation Release No. 17831 (Nov. 7, 2002); *SEC v. Edward Thomas Jung,* Litigation Release No. 17417 (Mar. 15, 2002); *SEC v. Jerry A. Womack*, Litigation Release No. 17293 (Jan. 2, 2002); *SEC v. Michael W. Berger, Manhattan Investment Fund, Ltd., Manhattan Capital Management Inc.*, Litigation Release No. 17193 (Oct. 16, 2001).

[255] See, e.g., *SEC v. Jean Baptiste Jean Pierre, Gabriel Toks Pearse and Darius L. Lee*, Litigation Release No. 18216 (July 7, 2003); *SEC v. Peter W. Chabot, Chabot Investments, Inc., Sirens Investments Inc., Sirens Synergy and the Synergy Fund, LLC*, Litigation Release No. 18214 (July 3, 2003); *SEC v. Vestron Financial Corp.*, Litigation Release No. 18065 (Apr. 2, 2003); *SEC v.*

claimed trading strategies;[256] and improper valuation of assets.[257] The overwhelming majority of the cases the Commission has instituted involve charges under each of the Securities Act, the Exchange Act and the Investment Advisers Act.

There are a number of observations that can be made regarding hedge fund enforcement actions brought since 1999. Nearly a third of the hedge fund cases brought in the last four years involved criminal charges. Another characteristic, which appears common to hedge fund cases, is the lengths to which the violators go to conceal their fraud. In almost half of the enforcement actions brought since 1999, the defendants or respondents created false documentation in an effort to hide their fraud. These documents included account statements and other types of reports to customers, confirmations and pricing sheets. The third characteristic that is perhaps more common to hedge fund cases than the typical investment adviser's case is the greater frequency of outright theft, or misappropriation, of investor funds that occurs. Finally, based on the Commission's recent cases, both registered and unregistered investment advisers have engaged in hedge fund fraud. We have also found the same individual operating both registered and unregistered investment advisers while engaging in hedge fund fraud.[258]

B. State and SRO Enforcement Activities

State attorneys general are using state antifraud statutes to pursue enforcement actions against hedge funds. For example, New York Attorney General Eliot Spitzer used a 1921 New York business statute, the Martin Act, in asserting fraudulent trading arrangements between a

House Asset Management, L.L.C., House Edge, L.P., Paul J. House, and Brandon R. Moore, Litigation Release No. 17583 (June 24, 2002); *In the Matter of the Application of Brian Prendergast*, Exchange Act Release No. 44632 (Aug. 1, 2001).

[256] See, e.g., *SEC v. Peter W. Chabot, Chabot Investments, Inc., Sirens Investments Inc., Sirens Synergy and the Synergy Fund, LLC*, Litigation Release No. 18214 (July 3, 2003); *SEC v. David M. Mobley, Sr.*, Litigation Release No. 18150 (May 20, 2003); *SEC v. Edward Thomas Jung,* Litigation Release No. 17417 (Mar. 15, 2002); *SEC v. Jerry A. Womack*, Litigation Release No. 17293 (Jan. 2, 2002); *In the Matter of the Application of Brian Prendergast*, Exchange Act Release No. 44632 (Aug. 1, 2001).

[257] See, e.g., *SEC v. Michael Lauer, Lancer Management Group, LLC, and Lancer Management Group II, LLC*, Litigation Release No. 18247 (July 23, 2003); *SEC v. Beacon Hill Asset Management LLC*, Litigation Release No. 17831 (Nov. 7, 2002); *SEC v. Michael L. Smirlock and LASER Advisers, Inc*, Litigation Release No. 17630 (July 24, 2002).

[258] *SEC v. Stevin R. Hoover and Hoover Capital Management, Inc.*, Litigation Release No. 17981 (Feb. 11, 2003).

hedge fund and four mutual fund companies.[259] Other state securities regulators are also investigating state securities law violations involving hedge funds.[260]

These state enforcement actions underscore the fact that the activities of hedge funds can have a material effect on both the securities markets and investors at large. The opaqueness of hedge funds, however, presents a significant obstacle in regulatory efforts to monitor hedge fund activities. For example, the fact that most hedge fund advisers are not registered with the Commission as investment advisers conceals not only the existence of advisers but also of hedge funds themselves. The states' efforts against hedge fund frauds assist the Commission in promoting fairness in the securities markets.

Self-regulatory organizations have also been active in instituting hedge fund related enforcement actions. The NASD recently censured and fined a firm for failing to disclose the risks associated with hedge funds when marketing them to investors, and for exaggerated and unwarranted statements made in sale literature.[261] The NASD also censured and fined the firm's

---

[259] See Canary Capital Partners, supra note 123. See also *Spitzer Alleges Mutual Funds Allowed Fraudulent Trading*, Wall Street Journal (Sept. 4, 2003)

[260] For example, the Illinois Secretary of State's Office has launched an investigation in connection with the New York Attorney General's investigation of hedge fund trading in mutual fund shares. See, e.g., *Illinois Probing Hedge Fund Samaritan*, Reuters English News Service (Sept. 10, 2003). In August, Massachusetts securities regulators filed three complaints against hedge funds and their advisers for a variety of state securities law violations. See *In the Matter of Rahul V. Singh*, No. E-2003-55 (Mass. Sec. Div. filed Aug. 13, 2003) (alleging sales of hedge fund interests to non-accredited investors); *In the Matter of Michael F. Payne, Futronix Trading, LTD*, No. E-2003-55 (Mass. Sec. Div. filed Aug. 13, 2003) (alleging use of misleading performance claims and sales to non-accredited investors); *In the Matter of James Pangione, Timothy Rassias, Hercules Capital Management, LLC, Hercules Hedgehog Fund, LP*, No. E-2003-56 (Mass. Sec. Div. filed Aug. 13, 2003) (alleging use of misleading statements on adviser qualifications and experience, investment strategy and risk levels); *In re Stonehouse*, No. E-2003-52 (Mass. Sec. Div. filed Sept. 22, 2003) (alleging, among other things, fraud in the offering of hedge fund securities).

[261] See NASD Notice to Members 03-07 (June 16, 2003) (announcing disciplinary action taken against Altegris Investments, Inc.); see also *In the Matter of the Application of Brian Prendergast*, Exchange Act Release No. 44632 (Aug. 1, 2001) (Commission sustaining NASD bar and censure of hedge fund co-adviser for, among other things, using materially misleading PPM and sales literature).

Chief Compliance Officer for failing to adequately supervise the firm's advertising practices in this area.[262]

VI. Concerns

We have identified below a number of significant concerns in connection with the growth of hedge funds.

A. Lack of Commission Regulatory Oversight

1. Inability to Detect Fraud and Other Misconduct at Early Stages

As noted above, in the last five years, the Commission has instituted 38 enforcement actions involving hedge fund fraud, involving significant losses to investors. The Commission typically identifies frauds and other misconduct involving hedge funds only after fund investors or service providers suspect fraudulent activity and contact the Commission. Thus, the Commission often finds itself instituting enforcement action against an unregistered hedge fund adviser only after significant losses have occurred.[263] In contrast, the Commission has an advantage in identifying the misconduct of registered investment advisers because they are subject to periodic examinations by Commission staff. When fraudulent or other unlawful activity does occur, examinations can lead to earlier discovery – often before significant losses have resulted. Further, the Commission uses the potential for a surprise examination and

---

262 See id. Specifically, the NASD found that between October 2002 and February 2003, Altegris distributed 26 different pieces of hedge fund sales literature to its customers. Each of these marketing pieces failed to include important disclosures regarding specific risks of investing in hedge funds and made unbalanced presentations about the particular hedge funds that failed to provide investors with a sound basis for evaluating whether to invest in these hedge fund products.

263 Roundtable Transcript, May 15 (statement of Stephen M. Cutler) ("[I]n the case of unregistered advisers, [the Commission's Enforcement Division is] not going to be the beneficiar[y] of an examination that is going to have identified a problem, brought it to our attention in the form of an enforcement referral. So a lot of what we end up seeing in the hedge fund area is after the train wreck has already happened. We will get a complaint from an investor that finds that he's been wiped out."); Roundtable Transcript, May 15 (statement of Mark Anson) ("[W]hile the antifraud provisions can deter fraud, they really can't prevent it. [W]here hedge fund managers don't disclose their losses immediately . . . once the fraud is uncovered, and the antifraud provisions kick in, and action can be taken, well, by that time, the losses have already occurred. And it's difficult for investors to get their money back."). See also Robert Lenzner and Michael Maiello, *The Money Vanishes*, Forbes 70 (Aug. 6, 2001) ("[I]f there is mischief [in unregulated hedge funds], the [Commission] will find out about it too late.").

deficiency letters to encourage a culture of compliance at regulated entities. We believe that the prospect of Commission examination serves as a deterrent to fraud and other misconduct.

2. *Lack of Meaningful Information about Hedge Funds and Hedge Fund Advisers*

The Commission has long been concerned about the lack of information available about hedge funds and their investment advisers.[264] Despite the growth of the hedge fund industry in the last decade, we do not have accurate information about how many hedge funds operate in the United States, their assets or who controls them.[265] Instead, we must rely on information provided by private organizations, the accuracy of which information remains unclear.[266]

---

[264] See Hugh F. Owens, *A Regulator Looks at Some Unregulated Investment Companies The Exotic Funds,* Address before the North American Securities Administrators Ass'n (Oct. 21, 1969) ("I am limited to relying on conventional wisdom because the Commission does not presently have sufficient information on which to base unqualified statements on the nature of hedge funds' investment techniques. . . . The lack of information on hedge funds is explained in part, of course, by the fact that we have no registration data to refer to because of claimed exemptions or exceptions by the funds from the registration requirements of the various federal securities laws."). See also Breeden Letter, supra note 2 (attaching staff memorandum stating that the Commission is unable to provide the House Subcommittee with statistics on the number of hedge funds, their managed assets, their investors, rates of return, leverage or investments in various classes of financial assets).

[265] For example, the Commission was unable to provide the Treasury Department with accurate information about the number of hedge funds for use in connection with its proposals to require hedge funds to adopt anti-money laundering programs. Treasury Anti-Money Laundering Proposal, see supra note 109. Because there is no government source of information to identify or locate hedge funds, the Treasury Department has proposed a rule under the USA Patriot Act that will require hedge funds, among others, to file a notice with the Department with certain information about their operations. Id. at p. 60622. See also supra Part III.E.4.c. (discussing Treasury Department Regulations). As noted, the proposed notice will only be a partial source of information about hedge funds and their advisers.

Chairman Donaldson Testimony, supra note 184 ("[T]here are no precise figures available regarding the number, size and assets of hedge funds. This is due, in part, to the fact that there is no industry-wide definition of hedge fund; in part, because those that track hedge fund data rely on self-reporting by hedge funds; and in part because hedge funds generally do not register with the SEC, so we cannot independently track the data."). See also *The President's Working Group Study on Hedge Funds: Hearing Before the House Comm. on Banking and Financial Services, 106th Cong.* 5 (1999) (statement of Representative John LaFalce, Member, House Comm. on Banking and Financial Services) ("The message of LTCM is. . . that we can no longer doubt that we have a new powerful kind of financial institution in our midst, the hedge fund, and that we

The nature of hedge fund investors is changing. Although we did not observe an existing retail market for hedge funds, the potential for that market is clearly at hand. Investment advisers already have proposed to offer registered FOHFs to retail investors without sophistication or other wealth requirements.[267] Moreover, the amount of retirement assets directly invested in hedge funds is growing.[268] In our view, the Commission is impeded in its ability to formulate public policy that appropriately protects the interests of the U.S. investing public unless it also has access to accurate and current information about hedge funds and their advisers.

Also, hedge funds are becoming a significant participant in our financial markets. We are concerned about the incomplete nature of information we are able to compile about the trading practices of hedge fund advisers on behalf of hedge funds. Hedge funds are active and important participants in our securities markets. Among other things, hedge fund advisers can invest hedge

---

know very little about them."); LTCM Report, supra note 126, at 1 ("[I]t is difficult to estimate precisely the size of the [hedge fund] industry . . . .").

[266] See Liang, supra note 177, at 310 (study of statistical inconsistencies in two major hedge fund databases, noting that "the reliability of hedge fund data is an open question critical to hedge fund research and the investment community"). See also William Fung and David A. Hsieh, *Measuring the Market Impact of Hedge Funds*, 7 Journal of Empirical Finance 1, 3 (2000) ("There are varying estimates of the size of the hedge fund industry."); and *Hedge-matics: How Many Funds Exist?*, Wall Street Journal C5 (May 22, 2003) ("Just how big is the hedge-fund industry? This simple question has been debated because the data on hedge funds are spotty.").

[267] See supra note 250.

[268] See, e.g., *US Pension Plan Looks to Hedge Funds,* Financial Times (London), Global Investing 21 (June 26, 2003) (Virginia retirement system plans to invest $1 billion in hedge funds); Michael P. Norton, *Changes to State Pension Sought; Hedge Funds Top Treasurer's Plan to Reduce Risks*, The Patriot Ledger (Quincy, MA), Business 24 (June 5, 2003) (proposal to invest up to five percent of pension fund assets in hedge funds); and *NYC Fund Eyes Maiden Hedge Fund of Funds Investment*, 4 Alternative Investment News 19 (June 1, 2003) (Manhattan & Bronx Surface Transit Operating Authority Retirement Fund considers investment in hedge funds). See also Chris Clair, *'Unprecedented Pressure': Public Plans Race to Embrace Hedge Funds; This Time They Are Leading, Not Following, Their Corporate Counterparts,* Pensions and Investments 2 (July 8, 2002); Susan L. fund assets in innovative, and sometimes aggressive, ways in order to effectuate their investment strategies.[269] The Commission's inability to examine unregistered investment advisers, however, inhibits its ability to familiarize itself with the types of trading and other investment activities taking place in hedge funds.

Moreover, because of the close relationships between hedge funds and broker-dealers, the failure of a large hedge fund could also impact those firms. Interactions between broker-dealers and hedge funds have long been a Commission concern and one that has been addressed in particular as part of the Commission's supervision of broker-dealers. Our concern is based both on the possible loss of customer assets held by broker-dealers, which the Commission has a mandate to protect in conjunction with the Securities Investors Protection Corporation, and the systemic risk implications for the broader financial system, should a large broker-dealer fail due to exposure to a hedge fund. The Commission may indirectly view certain limited aspects of hedge fund trading activities through its supervision of other market participants, i.e., broker-dealers, SROs, etc. These avenues, however, present a fragmented view of the overall trading activity of hedge funds.

B. Valuation of Hedge Fund Portfolio Securities

The lack of independent checks on a hedge fund adviser's valuation of a hedge fund's portfolio securities is among the most serious concerns we have identified in the course of our investigation of hedge funds. Hedge fund advisers have powerful incentives to achieve superior (and positive) performance. The requirement to achieve positive performance in order to receive a performance allocation (and to remain in business) is just one such incentive. The adviser's own investment in the hedge fund is another. Hedge fund advisers that perform well find it easier to retain investors and raise additional capital.

---

[269] Among the most common trading practices used by hedge fund advisers is short selling. The staff makes no recommendations to the Commission regarding short selling at this time, but notes that it is currently considering recommending that the Commission propose rule amendments that would modernize short sale regulation designed to target areas of abuse, including naked short selling. ("Naked" short selling generally refers to a sale of securities when the seller does not own the securities sold and makes no arrangements to borrow the securities in order to make delivery on the sale.) The amendments would also be designed to ease regulatory restrictions where they are unnecessary or inhibit beneficial short selling.

Business Week recently reported that trading of a single hedge fund adviser routinely accounts for "as much as 3% of the New York Stock Exchange's average daily trading, plus up to 1% of the NASDAQ's -- a total of at least 20 million shares a day." See Marcia Vickers, *The Most Powerful Trader on Wall Street You've Never Heard Of*, Business Week 66 (July 21, 2003).

A hedge fund adviser has broad discretion to value these securities; hedge funds need only value its portfolio securities in a manner consistent with the valuation policies and guidelines they disclose to their investors.[270] Moreover, even when hedge fund advisers use an outside service provider such as an administrator or pricing service to assist in valuing securities, advisers may exercise their discretion to override such prices.

The absence of any form of independent oversight over hedge fund pricing raises significant questions about the quality and fairness of the prices at which investors buy or redeem interests in some hedge funds. Because many hedge funds invest in highly illiquid securities, these concerns are heightened. In addition, smaller hedge fund advisers often lack the resources to establish and install adequate pricing systems. Moreover, the Commission lacks the authority to examine many hedge fund advisers' books and records or conduct on-site inspections of hedge fund adviser operations, which could reveal instances of mispricing.

C. Retailization

One of the primary objectives of the staff's investigation was to determine whether, as a result of the growth of hedge funds, or otherwise, significant numbers of less sophisticated investors were investing in hedge funds.

1. Direct Investment in Hedge Funds

Inflation, along with the sustained growth in wealth and income of the 1990s, has boosted a substantial number of investors past the "accredited investor" standard.[271] To date, however, the staff has not uncovered evidence of significant numbers of retail investors investing directly in hedge funds. A number of factors may account for this, including that most hedge funds maintain investment minimums that effectively limit the entry of minimally qualified investors into the funds.[272] Hedge fund sponsors also assert that they do not seek retail investors because such investors may not be suitable for the inherent risks that accompany some hedge funds and

---

[270] See supra Part IV.G. (discussing hedge fund valuation practices).

[271] See supra Part III.B.2. (discussing Regulation D).

[272] The investment minimum for hedge funds typically ranges from $50,000 to $10 million. The staff, however, found that hedge funds may waive these minimums for pre-qualified investors and that these minimums have dropped in recent years.

that the effort required to ensure such suitability often outweighs the benefit of any investments that they might make.[273]

Nevertheless, the increased number of retail investors qualifying as accredited investors raises our concern that hedge funds and broker-dealers might begin to seek out these investors as a new source of capital for hedge funds. We have observed that the minimum qualifications required to invest in some hedge funds has decreased as newer entrants into the alternative investments market compete for investors. We remain concerned that less sophisticated investors, even those meeting the accredited investor standard, may not possess the understanding or market power to engage a hedge fund adviser to provide the necessary information to make an informed investment decision.

2. *Registered Funds of Hedge Funds*

The staff's concerns about registered FOHFs mirror our concerns expressed in this Report about hedge funds generally. Our concerns are amplified, however, by the possibility that the retail public may be offered access to some of these investment opportunities without restriction in the future.

We are concerned about the reliability of registered FOHFs' calculations of net asset value ("NAV"). There are no readily available market prices for hedge fund securities. In addition, as discussed above, an adviser of a FOHF may find it difficult to independently verify the accuracy of the valuation provided by the underlying hedge funds because it does not have access to portfolio holdings of those hedge funds.[274] Despite disclosure that advisers to registered FOHFs will look to a variety of factors in valuing hedge fund securities, some advisers may still rely almost completely on a hedge fund adviser to provide it with the value of the hedge fund's securities.

The lack of hedge fund transparency presents other problems as well, including with respect to fees and expenses of the underlying hedge funds and evaluating overall investment diversification or risk exposures. Although a registered FOHF generally is required to disclose its fees and expenses in its registration statement, it is not required to disclose, and investors do not have specific information about, the fees and expenses of the hedge funds in which the

---

[273] See Roundtable Transcript, May 14 (statement of James R. Hedges) ("[I]t is my sense that the lion's share of the hedge fund industry is actually not interested in the retail investor. More hedge fund managers that I talk to than not have no interest whatsoever in selling their product in a retail channel. They like being privately placed to accredited or qualified purchasers. They like the freedom that that enables them to have. And they are not interested in getting into a different type of construct in order to target the retail investor.").

[274] See supra Part IV.G. (discussing hedge fund valuation practices).

FOHF invests. In addition, the lack of transparency limits the ability of the registered FOHF adviser to ascertain the diversification of the registered FOHF's portfolio. Consequently, a registered FOHF adviser following a particular strategy may invest in a number of hedge funds executing similar strategies. Each of the underlying hedge funds could be taking similar positions in its portfolio. The potential for this to occur is particularly a concern for registered FOHFs executing convertible or merger arbitrage strategies. The registered FOHF adviser may have no way of knowing if it is, in fact, making duplicate investments, and possibly magnifying its risk. Significantly, retail investors seeking diversification by investing in a Dual Registered FOHF are also unable to ascertain this information, and may take on more risk than desired as a part of their overall portfolio.

3. Pension Plan and Other Institutional Investment in Hedge Funds

Perhaps the greatest change in terms of indirect exposure of individual investments in hedge funds has been the frequency with which pension plans, universities, endowments, foundations and other charitable organizations are investing in hedge funds. Pension plans were among the earliest hedge fund investors.[275] The pace of these investments, however, has increased over the past few years.[276]

The staff is concerned that recent infusions of funds from public and private pension plans, universities, endowments, foundations and other charitable organizations into hedge funds may raise public policy considerations that heretofore have not been examined. These concerns do not relate to the ability or propriety of pension plan sponsors or trustees making investment decisions to place plan assets into hedge funds. Indeed, many trustees may believe that hedge fund investments are critical parts of a prudent investment strategy.

Instead, our immediate concern stems from the increasing presence of these investors in hedge funds over which neither the Commission nor any other regulatory authority exercises meaningful oversight. Although these institutions typically qualify as "accredited investors" or "qualified purchasers," these institutions, by investing in hedge funds, expose their participants or other beneficiaries to hedge funds. Thus, for example, a pension plan that experiences substantial losses as a result of hedge fund fraud may be unable to meet its obligations to pensioners. The collective indirect investment of the assets of less sophisticated individuals into vehicles that are managed by entities that are not examined by the Commission leaves open the

See also supra note 268.

possibility that the Commission will be unable to anticipate problems involving hedge funds that may invest on behalf of these institutions.

D. Disclosure

As discussed above, hedge funds are not subject to any minimum disclosure requirements.[277] Although hedge fund advisers generally provide investors with a PPM, and while we acknowledge that there are often a range of other communications between hedge fund advisers and hedge fund investors, we are concerned that investors may not always receive disclosure about certain fundamental information relating to the investment adviser and its management of a hedge fund. We are also concerned that investors may not receive information about material changes to an adviser's management of a hedge fund on an ongoing and regular basis.

E. Conflicts of Interests

An investment adviser must act solely in the best interests of its clients consistent with its fiduciary obligations owed to clients. Hedge fund advisers often have substantial conflicts of interest, both with the hedge fund and with other non-hedge fund investors. In recognition that certain conflicts may be unavoidable, an investment adviser may discharge its fiduciary obligation only by disclosing conflicts of interest to its client.[278] We are concerned, however, that disclosure currently being provided to some hedge fund investors could be improved to address the level of the conflict.

1. Side-by-Side Management of Client Accounts

Conflicts of interest between investment advisers and their clients are not new. As one commenter at the Hedge Fund Roundtable noted, "conflicts exist any time a manager has two clients."[279] Unique facts, however, including the nature of the fees paid, the interests of the

---

[277] See supra Part IV.D (discussing disclosure by hedge funds).

[278] See SEC v. Capital Gains Research Bureau, Inc., 375 U.S. 180, 191-92 (1963) ("Capital Gains") ("The Investment Advisers Act of 1940 thus reflects a congressional recognition 'of the delicate fiduciary nature of an investment advisory relationship,' as well as a Congressional intent to eliminate, or at least to expose, all conflicts of interest which might incline an investment adviser -- consciously or unconsciously -- to render advice which was not disinterested" (citations omitted)). Undisclosed, such conflicts may constitute fraud by an investment adviser.

[279] Roundtable Transcript, May 14 (statement of Richard Phillips). See also *Institutional Investor Study Report of the Securities and Exchange Commission*, H.R. Rep. 92-64, Vol. 2, pt. 2, at 348 (1971) (noting that advisers might give preferential treatment to accounts in which they have a

adviser and the nature of hedge fund investment strategies themselves, distinguish hedge funds from other pooled investment vehicles offered by investment advisers, and bring these conflicts into even sharper focus.

The relationship between a hedge fund and its investment adviser incorporates a number of significant incentives that have the potential to motivate an adviser to favor its hedge fund client over other clients. Performance fees, which often are 20 percent or more of the realized capital gains and capital appreciation of the hedge fund, are significantly higher than the asset-based fees paid on traditional accounts, including registered investment companies. In addition, many investment advisers have significant investments in hedge funds that they manage.[280] As a result, the investment adviser has additional incentives to favor the hedge fund client over other clients by allocating investment opportunities to the hedge fund.[281]

The very nature of the investment strategies used by hedge funds may put them at odds with other, more traditional investment products and thus, may raise additional conflicts of interest for the adviser. For example, an investment adviser that manages a mutual fund using a long-only strategy may, at the same time, manage a hedge fund using a different strategy. The investment adviser may determine that an equity security that the mutual fund holds long is appropriate for the hedge fund to sell short.[282] The short sale may have a negative effect on the price of the security and therefore also have a negative effect on the mutual fund's performance. Similarly, a model-driven statistical arbitrage fund may be engaging in short-term buying while

---

greater self-interest) and *Report of Special Study of Securities Markets of the Securities and Exchange Commission*, H.R. Doc. No. 95, pt. 1, at 373 (1963).

280 Hedge fund investors generally insist on hedge fund advisers and their principals investing a significant percentage of their net worth alongside the limited partners' investments to ensure that a hedge fund adviser's interests are aligned with theirs. See, e.g., Roundtable Transcript, May 14 (statement of David Swensen).

281 See *In the Matter of Nevis Capital Management, LLC, David R. Wilmerding, III and Jon C. Baker*, Advisers Act Release No. 2154 (July 31, 2003) (alleged unfair allocations of "hot issues" to two clients, including a hedge fund). See also *In the Matter of F.W. Thompson Co. and Frederick W. Thompson*, Advisers Act Release No. 1895 (Sept. 7, 2000) (undisclosed preferential allocation of hot issues to certain clients); and *In the Matter of McKenzie Walker Investment Management, Inc. and Richard C. McKenzie Jr.*, Advisers Act Release No. 1571 (July 16, 1996) (undisclosed favoritism of performance-fee paying clients).

282 For example, a registered investment company may have a focus on a particular industry or sector and must choose (and remain fully invested in) those securities that the adviser believes represent the best opportunities within that universe. Nonetheless, that adviser may simultaneously be quite bearish on the same industry and may choose to short sell certain representative securities, including those held long in the registered investment company.

the investment adviser is selling the same securities in another account that follows a different strategy. Both strategies may be used for legitimate business reasons, but the conflicting nature of the strategies may affect certain clients negatively.

2. *Relationships with Prime Brokers*

Services provided by prime brokers can be very important to a hedge fund's operations. The nature of the services provided by a prime broker to a hedge fund adviser varies, depending upon its stage of development, organization and structure and investment strategy. Notwithstanding the importance of these services to the hedge funds, we found that the quality of disclosure typically provided to hedge fund investors about advisers' relationships with their prime broker(s) is minimal. Hedge fund advisers rarely disclose the nature of the services that they receive from a prime broker, nor is there clear disclosure regarding how they compensate the prime broker for these services.

We are concerned that hedge fund advisers may not be disclosing that fees paid to prime brokers may include amounts for services that do not benefit investors. For example, the provision of, and payment for, capital introduction services to a hedge fund's adviser presents a conflict of interest in that the introduction of new investors to the hedge fund may occur because the adviser used (and used fund assets to pay for) certain of the prime broker's services.[283] The provision of office space to the hedge fund adviser as part of the package of services provided to the adviser and paid for by the hedge fund creates a similar conflict of interest.

There are other potential conflicts of interest that may raise disclosure issues. For example, accepting "seed capital" investments by prime brokers without disclosing the potential conflicts inherent in such arrangements may raise concerns. The acceptance of such capital may, for example, negate any flexibility that the hedge fund adviser would have to freely choose its prime broker, or negotiate more attractive fees. As another example, there may be a *quid pro quo* for the inclusion of a hedge fund on a prime broker's "preferred" list of hedge funds, or its inclusion in a proprietary fund of hedge funds, which would essentially wed the hedge fund to the prime broker. These conflicts of interest also raise a concern that a hedge fund may pay more than is usual for core services (such as fees relating to securities borrowing) provided by the prime broker, or may satisfy pre-determined minimum targets for services, such as margin or brokerage, that are established prior to the delivery of services.

---

[283] Broker-dealer firms typically do not charge separately for capital introduction services. Moreover, they assert that this service, like others, is provided "gratis" as an accommodation to the hedge fund. We are not persuaded that these services are free. Although they do not receive separate compensation, broker-dealers are compensated for such services, albeit indirectly, through the fees that they negotiate and receive for the entire package of services provided to the hedge fund.

F. Concerns about General Solicitation

We also have concerns about the proliferation of public information about hedge funds that has accompanied the growth of the hedge fund industry. We believe that questions exist whether some participants in the hedge fund industry may not be complying with the prohibition on general solicitation and general advertising in privately offering and selling the hedge fund securities. As discussed above, as a condition to the availability of the safe harbor of Rule 506, hedge funds may not engage in any form of general solicitation or general advertising in finding investors.[284] The hedge fund has the burden of proving the availability of the exemption from registration. If the hedge fund, its adviser or other persons acting on its behalf uses general solicitation or general advertising to sell the hedge fund interests, the hedge fund will not be able to rely on the safe harbor.

Current marketing practices by some hedge fund advisers raise questions as to whether the hedge fund is engaging in a general solicitation or general advertising. For example, information contained in newsletters, press articles and even institutional reporting services about a specific hedge fund raises concerns about whether the hedge fund is engaged in a general solicitation or general advertising if that information is provided by the hedge fund's adviser or at their behest.[285] The extensive use of the Internet by hedge fund advisers has exacerbated this concern. Given the public nature of the Internet, issues arise as to how to sufficiently target information to eligible investors without running afoul of the general solicitation or advertising prohibition.[286] Although the Commission has been clear in its interpretive releases about the ways in which the Internet can be used in private offerings, questions exist as to whether some hedge fund advisers and sponsors have not followed the Commission's and staff's guidance. In fact, the Commission, in its 2000 Interpretive Release on the Use of Electronic Media, recognized that parties are not following staff guidance on when web sites may constitute general

---

[284] See supra Part III.B. (discussing hedge funds and the Securities Act). See also Roundtable Transcript, May 14 (statement of Alan Beller) ("You can't put up a billboard on Times Square and say, 'We have a new hedge fund but please understand that unless you are an accredited investor, don't call.' ").

[285] The staff has found numerous media reports quoting hedge fund advisory personnel discussing the "rollout" of new hedge funds.

[286] See supra Part III.B. See also Roundtable Transcript, May 14 (statement of Alan Beller) ("Even targeted means of publicity to offer to persons to whom or with whom the adviser or the other intermediary seller does not have a pre-existing relationship can also raise general solicitation questions, especially as that targeting becomes less targeted, if you will. You send out an e-mail or make a website generally available and say, 'You can buy this but only if you are an accredited investor, and people with whom you don't have a preexisting relationship have access to that page, that itself can be problematic under our current rules.' ").

solicitation for particular offerings and again reminded market participants of the permissible types of activities.

Although the restrictions on general solicitation and general advertising apply only to activities that are used to offer and sell securities, for hedge fund advisers using the Internet, questions arise as to whether information about their services and their activities would be outside the scope of the restriction on general solicitation and general advertising. In addition to the implications of the use of the Internet for the hedge fund offering itself, the Commission has also made clear that if an unregistered adviser uses a publicly available web site to provide information about its services, it would not qualify for the exemption from registration in Section 203(b)(3) of the Advisers Act because it would be considered to be holding itself out generally to the public as an investment adviser.[287]

The use of the Internet by hedge fund advisers in marketing their products has sharpened the question as to whether, at least with respect to a certain category of sophisticated investors, the prohibition on general advertising and general solicitation continues to be necessary. While it may not be appropriate to revisit the limitations on general solicitation, including those resulting from the use of electronic media, in the context of private offerings generally or even hedge funds specifically, it may be worthwhile to consider the need for such limitations for funds whose owners are limited to investors that clearly meet a higher standard or may be presumed to be able to "fend for themselves" such as, for example, the "qualified purchaser" standard of Section 3(c)(7).

G. Concerns about Whether the Federal Securities Laws and Regulations Are Impairing the Investment Activities of Registered Investment Companies

The staff's investigation of hedge funds revealed the broad investment flexibility that most hedge fund advisers find necessary in order to effectuate their absolute return strategies. The staff believes that this flexibility may have contributed to hedge funds avoiding some of the losses sustained by investors in registered investment companies during the 2000-2002 bear market.[288] One investor advocate for individual investors who participated in the Roundtable

---

[287] *Use of Electronic Media by Broker-Dealers, Transfer Agents, and Investment Advisers for Delivery of Information; Additional Examples Under the Securities Act of 1933, Securities Exchange Act of 1934, and Investment Company Act of 1940*, Exchange Act Release No. 37182 (May 9, 1996).

[288] One Roundtable participant cited data that registered open-end investment companies lost approximately $1.4 trillion from 2000-2002. See Comment submitted by Roundtable Panelist Frederick C. "Rick" Lake.

expressed the view that these types of investment vehicles should be made available to a broader array of investors.[289]

A very small percentage of registered investment companies currently use certain hedge fund investment strategies, including long/short, market neutral and merger arbitrage. The registered investment companies that pursue such investment strategies represent, in our estimation, less than one half of one percent of the investment company industry's assets under management as of June 30, 2003.[290] It is unclear why so few registered investment companies pursue these types of strategies, although the restrictions placed on investment companies and investment advisers to such companies may be at least partially responsible.

VII. Recommendations

We recommend that the Commission consider making several changes to the regulatory framework relating to hedge funds and their investment advisers. We believe that these changes will address the concerns that we have identified above. The adoption of our recommendations would result in a shift in the federal securities laws' approach to the regulation of the hedge fund industry, but would add a greater level of investor protection to investors in hedge funds and FOHFs. It would also provide greater insight into this growing segment of the investment management industry without constraining the legitimate investment activities of hedge funds and their advisers.

Our recommendations are intended to address, on a going forward basis, existing and emerging issues that flow from the growth in the number of hedge funds and the assets under management at those funds. The adoption of our primary recommendation, that the Commission consider mandating federal registration of hedge fund investment advisers under the Advisers Act, would mean that hedge fund investors would receive important information regarding the funds and their advisers. We believe that these measures will also foster stronger compliance programs and provide the Commission with the ability to: identify important participants in the U.S. financial markets; examine the activities of investment advisers to assist in evaluating issues relating to market movements; and deter fraud and wrongdoing.

We have recommended changes to the regulatory framework with a view toward minimizing any impediments that these changes may have on the manner in which advisers

---

[289] See Roundtable Transcript, May 15 (statement of John Markese) (expressing the view that with registration and appropriate information, hedge fund-type products may be useful in assisting investors in diversifying their investment portfolios).

[290] According to the staff's estimate, companies with a market neutral or merger arbitrage investment style had approximately $2.1 billion under management at the end of June 2003.

manage hedge funds to achieve their investment goals. Indeed, in making these recommendations we recognize the beneficial role that hedge funds play in our financial markets. We also suggest that the hedge fund industry observe and continue to develop best practices guidelines that will result in better investor protection and healthier financial markets.

Finally, we ask the Commission to consider a number of recommendations that apply to registered investment companies. Some of these recommendations are designed to provide additional protections to investors in registered FOHFs. Other recommendations suggest that the Commission reconsider certain of the restrictions generally applicable to registered investment companies and their investment advisers. For example, we recommend that the Commission take steps to determine if hedge fund-type strategies can be made available to less sophisticated investors in a manner that both achieves investment goals and protects investors.

A. The Commission Should Consider Requiring Hedge Fund Advisers to Register as Investment Advisers under the Advisers Act, Taking into Account Whether the Benefits Outweigh the Burdens of Registration

We recommend that the Commission consider amending Rule 203(b)(3)-1 under the Advisers Act to require hedge fund advisers to "look through" any hedge funds that they manage and count each separate investor as a client.[291] By amending Rule 203(b)(3)-1 to redefine "client," the Commission would shift the regulatory emphasis away from counting the number of hedge funds advised by the investment adviser and refocus it so that it reflects a determination of whether an investment adviser is of a size to merit federal regulation. In our view, the result of the recommendation to amend Rule 203(b)(3)-1 would be consistent with the underlying purpose of Section 203(b)(3), which was designed to exempt advisers whose advisory business is so limited that it does not warrant federal attention.[292] We also recommend that the Commission

---

291 See supra Part III.D. (discussing hedge fund advisers and the Advisers Act).

292 There is no legislative history explaining the *de minimis* exception of Section 203(b)(3). That provision appears to reflect Congress's view that investment advisers with only a handful of clients that do not hold themselves out to the public are presumably "private" and therefore do not raise issues of federal interest and need not register. Yet an investment adviser that manages client assets through hedge funds could have thousands of clients. For example, one hedge fund that relies on Section 3(c)(7) of the Investment Company Act could have 499 investors, one short of the threshold number at which an issuer must register its securities and comply with certain reporting requirements of the Exchange Act. An adviser that managed 14 such hedge funds would then manage the assets of 6,986 clients. In addition, if any of those clients were also hedge funds that the adviser managed, the number of clients would increase by the number of investors in those hedge funds.

consider incorporating into any such amendment a threshold for Commission registration based upon the aggregate amount of assets managed by the hedge fund adviser.[293]

In the course of the staff's investigation of hedge funds, we frequently raised, with industry participants and others, the question of whether the Commission should require all hedge fund advisers to register as investment advisers. Some supported required registration as a means of obtaining needed oversight of the hedge fund industry and providing appropriate transparency[294] and background information about the adviser for investors,[295] without impeding the functioning of hedge funds.[296] Some felt that required registration would benefit a maturing hedge fund industry by helping reduce fraudulent activities that diminish all members' reputations. One thought that it would provide a basis for permitting greater retail participation in hedge funds.[297]

Many of those opposing required registration expressed a strong preference for leaving the hedge fund industry "unregulated." They argued that the incidence of fraud among hedge fund advisers is low, and that hedge funds are adequately supervised by prime brokers, auditors and lenders.[298] Some asserted that there would be no purpose in requiring registration, arguing that the types of clients investing in hedge funds are able to take steps to protect themselves without the assistance of the Commission.[299]

---

[293] Such a threshold would maintain the registration exemption for advisers to very small hedge funds whose investors are likely to have personal relationships with the hedge fund adviser. It would also be consistent with the approach taken by Congress when it amended the Advisers Act in NSMIA to divide oversight of advisers between the states (for advisers with less than $25 million in assets under management) and the Commission (for advisers with assets under management of $25 million or more). We note, however, that even with such a threshold, our recommendation would require most hedge fund advisers to register under the Advisers Act.

[294] Roundtable Transcript, May 15 (statement of Mark Anson).

[295] Roundtable Transcript, May 15 (statement of Sandra Manzke).

[296] Roundtable Transcript, May 14 (statement of Richard Phillips).

[297] Roundtable Transcript, May 15 (statement of John Markese).

[298] Roundtable Transcript, May 15 (statement of Paul Roth). See also, Managed Funds Association Comment Letter, supra note 120.

[299] Roundtable Transcript, May 15 (statement of Paul Roth). See also Gibson, *Is Hedge Fund Regulation Necessary?*, 73 Temple Law Review 713-14 (Summer 2000) (hedge fund investors' ability to privately assert rights under antifraud provisions of federal securities laws obviates need for SEC regulation). We note, however, that there are limited private rights of action under the

During the course of the staff's investigation of hedge funds, we also questioned whether mandating registration of investment advisers to hedge funds would impede the operations or investment activities of hedge fund advisers. No one identified any provision of the Advisers Act or Commission rules that, if applied to hedge fund advisers, would have this result.[300] Although industry participants had mixed reactions to mandatory registration of hedge fund advisers,[301] many hedge fund advisers register voluntarily. This belies any notion that

---

Advisers Act. Hedge fund investors would be unable to bring a private action against a hedge fund adviser for monetary relief based on violations of the Advisers Act antifraud provisions. Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11 (1979).

[300] Indeed, hedge fund lawyers indicated to us that the U.S. approach to excluding hedge fund advisers (or making registration optional, depending upon the other advisory activities of the adviser) appeared to be unique among countries with developed markets and regulatory systems, most of which regulate the activities of hedge fund advisers (and in some cases hedge funds themselves), or are in the process of changing their laws to add hedge funds and hedge fund advisers to the country's existing system of investment management regulation. See, e.g., Japanese Securities Investment Adviser Association website, *About the Industry in Japan* at http://jsiaa.mediagalaxy.ne.jp/komon_e/index.html; Securities and Futures Commission (Hong Kong), Securities and Futures Ordinance (Cap. 571, Sec. 114 and Sch. 5), at http://www.hksfc.org.hk/eng/bills/html/index/index0.html; Securities and Futures Commission (Hong Kong), Fund Managers Code of Conduct (April 2003), at http://www.hksfc.org.hk/eng/bills/html/index/index0.html. One author has suggested that the European approach to regulating hedge fund advisers has benefited the industry by establishing minimum standards of practice in which investors can have some confidence. Neil Wilson, *Why Regulation Can Be Good,* Absolute Return (Apr. 2003) (U.K. regulation of hedge fund advisers has not impeded growth, and encourages advisers to build professional operations before launching funds; many of the firms deterred by regulation probably should not be managing hedge funds).

[301] A few Roundtable panelists suggested that if the Commission requires mandatory registration for most hedge funds advisers, some of those advisers would move their operations to jurisdictions that did not have such a requirement. We believe that such concerns are unwarranted. A hedge fund adviser could not avoid application of the Advisers Act simply by moving its office to a non-U.S. location. In fact, an adviser moving offshore would be required to register if more than 14 U.S. investors owned interests in the hedge fund. See Rule 203(b)(3)-1(b)(5) under the Advisers Act. At least one hedge fund consultant has suggested that advisers foregoing U.S. investors is unlikely to occur. Ron Orol, *Firmly Rooted*, Daily Deal (July 14, 2003) (citing Arthur Bell of Arthur Bell & Associates as stating that U.S. investors would be "virtually impossible to replace.")

Several Roundtable panelists asserted that registration under the Advisers Act was unnecessary because hedge fund advisers are already registered with the CFTC as CPOs or CTAs and examined by the NFA. Roundtable Transcript, May 14 (statement of Anthony Artabane); Roundtable Transcript, May 15 (statements of Patrick McCarty and Armando Belly). As discussed above, however, the CFTC and the NFA necessarily focus their examinations more

registration of hedge fund advisers is detrimental to a hedge fund's legitimate investment activities.

Registration under the Advisers Act represents the least intrusive form of regulation available to address many of the concerns identified in this Report. Our recommendation that hedge fund advisers register with the Commission under the Advisers Act would not result in any changes with respect to those advisers' ability to effectuate their investment strategies. Registration would not place any restrictions on hedge fund advisers' ability to trade securities, use leverage, sell securities short or enter into derivatives transactions. Nor would registration under the Act require the disclosure of any proprietary trading strategy. In addition, registration would not result in hedge funds and hedge fund advisers being subject to any additional portfolio disclosure requirements.

Our recommendation would not result in hedge funds having to register the offerings of their interests with the Commission, nor would it require that they modify their organizational structures. Advisers would be able to maintain their existing lock-up and repurchase schedules. Adviser registration would not result in public disclosure of the identities of advisers' clients. Finally, registration would not restrict the amount of fees that hedge fund advisers may charge hedge funds, although an adviser to a hedge fund relying on Section 3(c)(1) of the Investment Company Act would be permitted to charge that fund a performance fee only if each of the investors in the fund are qualified clients under Rule 205-3 under the Advisers Act.[302]

1. *Benefits of Mandatory Registration*

a. *Registration of Hedge Fund Advisers Would Serve as a Deterrent to Fraud*

Our examination experience with registered investment advisers demonstrates that examinations can lead to earlier discovery of actual and potential misconduct and frequently reduces the possibility that such misconduct will occur.[303] Periodic examination of hedge fund advisers can be expected to have the same result. We concede, however, that Commission examinations cannot assure that frauds do not occur. Indeed, a number of our enforcement actions involving hedge fund frauds have been against hedge fund advisers that are registered

---

closely on futures trading. Moreover, the CFTC recently adopted rules that may permit most hedge fund advisers, including those currently able to avoid investment adviser registration, to avoid registering as CPOs or CTAs.

302 See supra note 212. Hedge fund advisers to funds relying on Section 3(c)(7) under the Investment Company Act would not be subject to any such limitation.

303 See supra Part VI.A. (discussing concerns about lack of Commission oversight).

with us.[304] Nevertheless, the prospect of Commission examination may discourage persons from using hedge funds to engage in fraud. Moreover, we believe that the lack of regulatory oversight of hedge funds may contribute to the belief on the part of hedge fund advisers that fraud will not be exposed.

b. Registration of Hedge Fund Advisers Would Provide the Commission with Examination Authority and Foster Strong Compliance Practices

Advisers, including hedge fund advisers, are fiduciaries that must avoid conflicts of interest with their clients, or fully disclose those conflicts.[305] To protect against the adverse consequences of these conflicts, hedge fund advisers should adopt a "culture of compliance," which involves making compliance considerations a part of an adviser's business plan.

Our investigation revealed that many unregistered hedge fund advisers already have adopted sound compliance practices, which would need little modification to address registration requirements. Those unregistered advisers, however, tended to be larger firms that have substantial reputational risk at stake. Several participants in the hedge fund industry with whom we met during the course of our investigation, however, expressed concern that newer industry participants had not adopted compliance controls adequate for the amount of assets under their control.

While some new entrants to the hedge fund industry brought with them – from their previous employment with a money management or brokerage firm – an understanding of their obligations to fund investors, other new entrants may have little such experience. Our examinations confirmed that in many cases controls at some hedge fund advisers are very informal. We believe that the prospect of a compliance examination by the Commission staff will result in the adoption of procedures and controls designed to fulfill the hedge fund adviser's fiduciary responsibilities to the hedge fund and its investors.[306]

Smirlock and LASER Advisers, Inc.*, Litigation Release No. 17630 (July 24, 2002); *In the Matter of William F. Branston*, Advisers Act Release No. 2040 (June 26, 2002); *In the Matter of Abraham and Sons Capital, Inc. and Brett G. Brubaker*, Advisers Act Release No. 1956 (July 31, 2001).

[305] Capital Gains, supra note 278, at 191, 194.

[306] See Neil Wilson, *Why Regulation Can Be Good,* Absolute Return (Apr. 2003) (U.K. regulation of hedge fund advisers establishes minimum standards of practice; the process of registration encourages advisers to build professional operations before launching a fund "rather than scrambling to put them together after launch.").

Earlier this year, the Commission proposed a new rule that, if adopted, would require all registered investment advisers to adopt written compliance procedures, review them at least annually and appoint a chief compliance officer.[307] Application of this rule to hedge fund advisers would, in our view, be particularly useful.

As registered investment advisers, hedge fund advisers would be required to make certain prescribed disclosures to the Commission and investors, including disclosure regarding the advisers' business practices and disciplinary history, and to maintain required books and records and safeguard client assets. The Commission could conduct periodic compliance examinations of these advisers and monitor whether they conduct their operations (as well as those of hedge funds that they manage) so as to avoid the concerns identified in this report. We anticipate that the prospect of a staff compliance examination will serve to support business decisions to allocate resources necessary to ensure the implementation of strong compliance controls and the satisfaction of hedge fund advisers' fiduciary responsibilities to their clients.

c. *Registration Would Provide the Commission with Important Information about a Segment of the U.S. Financial System that Is Growing in Significance*

Hedge fund adviser registration under the Advisers Act would permit the Commission to collect basic information about virtually all hedge fund advisers, including the number of hedge funds that they manage, the amount of assets of those hedge funds and the identity of persons controlling the hedge fund advisers.[308] This requirement also would enable the Commission to more comprehensively and effectively observe the trading activities of the funds managed by such advisers. Currently, the Commission generally has access to records of trading on behalf of hedge funds through the books and records maintained by the brokers that the hedge fund advisers use and the markets on which they trade. These records, however, are dispersed and it could be difficult to detect improper trading activities conducted by a particular hedge fund if such activities were effected through orders placed with multiple brokers and traded on multiple markets. The ability to directly examine the trading activities of hedge fund advisers would

---

[307] *Compliance Programs of Investment Companies and Investment Advisers*, Advisers Act Release No. 2107 (Feb. 5, 2003).

[308] Roundtable panelists suggested that it would be valuable for the Commission to gather information about hedge funds. Roundtable Transcript, May 15 (statement of Thomas Fedorek) ("[T]here's a real opportunity here for the SEC to be not just a cop but to be what it is, actually, to a large extent already, an information provider. [N]ot a day that goes by that I don't dial into one of the SEC's databases to get information to help me in the research that I do in my investigations."); Roundtable Transcript, May 15 (statement of Andrew Lo) (suggesting that the Commission is in a unique position to gather hedge fund data that are not generally and publicly available, and noting that an understanding of risks involved in hedge funds begins with data.).

provide a more complete picture of their trading activities and make it easier to detect improper or illegal trading practices.

Much of this information currently can be collected from hedge fund advisers that are registered with the Commission.[309] Using the Commission's existing authority under the Advisers Act to obtain information about hedge fund advisers is particularly appropriate because, as originally enacted, the Advisers Act was designed to be "a continuing census of the Nation's investment advisers."[310]

d. Mandatory Registration Would Effectively Raise the Standards for Direct Investments in Hedge Funds

Our investigation of hedge funds was driven, in part, by the Commission's concern that the growth in hedge funds was being fueled by the direct investments of less sophisticated investors in hedge funds. Although our investigation did not uncover significant direct investment in hedge funds by less sophisticated investors, we continue to believe that the rise in investor wealth and incomes could ultimately result in retail investors investing directly in hedge funds relying on Section 3(c)(1) of the Investment Company Act. A number of commenters expressed their views that this concern could be remedied by raising the wealth standards, primarily the accredited investor standard under Regulation D.[311] Registration of hedge fund advisers, however, would effectively address our concerns.

In general, the Advisers Act prohibits registered investment advisers from charging performance fees to hedge funds relying on Section 3(c)(1) of the Investment Company Act unless all of the fund's clients are "qualified clients."[312] The wealth standards for qualified

---

309 A registered adviser that is the general partner of a hedge fund must report that it advises a "pooled vehicle" in response to Item 5.D.4. of Part 1A of Form ADV, list each pooled vehicle on Schedule D (Section 7B) and disclose the amount of assets in the fund and the minimum amount of capital investment per investor.

310 H.R. Rep. No. 1760, 86th Cong., 2d Sess. 2 (1960).

311 See, e.g., Managed Funds Association Comment Letter, supra note 120 (proposing increases to the accredited investor thresholds to $2 million in net worth, $400,000 in annual income and $500,000 in annual income jointly with one's spouse); Comments submitted by the Ad Hoc Hedge Fund Committee of the Securities Industry Association (supporting suggestions to tighten the accredited investor standard built into Regulation D under the Securities Act of 1933); Comments submitted by David G. Tittsworth on behalf of the Investment Counsel Association of America (urging the Commission to consider revising the current definition of "accredited investor").

312 See Section 205(a)(1) of the Advisers Act and Rule 205-3(d)(1) thereunder. See supra note 212.

clients are appreciably higher than those for "accredited investors," requiring that the investor have $750,000 invested with that adviser, or generally have a net worth of $1.5 million.[313] Our recommendation also has the salutary effect of permitting the Commission to reevaluate any future concerns about the nature of hedge fund investors and address any such concerns through regulation under the Advisers Act.

2. *Concerns about Mandatory Registration*

We recognize that adviser registration will impose additional costs on hedge fund advisers that are not already registered with the Commission. Nevertheless, we believe that the benefits of adviser registration outlined in this Report outweigh the additional costs that would be imposed on unregistered hedge fund advisers.[314] There are three types of costs associated with registering: (1) electronic filing, which costs $1100 the first year and $550 each year thereafter; (2) recordkeeping systems meeting the requirements of the Advisers Act, which are typically provided by the hedge fund's prime broker and thus, in many cases, would involve no additional costs; and (3) ongoing costs related to regulatory compliance. Most of these latter costs are attributable to compliance with the Act's antifraud provisions to which unregistered advisers already are subject and thus should be incurred regardless of whether the adviser is registered under the Act. In connection with any rulemaking, the staff would prepare a more complete analysis of the costs and benefits of requiring hedge fund advisers to register under the Advisers Act.

We are also mindful that the Commission's resources available to examine advisers are limited. Thus, we recommend that any rule the Commission adopts requiring advisers to count clients by "looking through" the hedge fund limit the number of new registrants by distinguishing between hedge funds and other investment vehicles that do not register under the Investment Company Act in reliance on Sections 3(c)(1) or 3(c)(7). These other investment vehicles include venture capital funds, private equity funds and structured financing vehicles.[315]

---

[313] Our recommendation also is attentive to the Commission's interest in maintaining existing regulations that support its mission to assist small business development. See Chairman Donaldson Testimony, supra note 184. By leaving eligibility requirements for "accredited investors" under Regulation D unchanged, small businesses may continue to seek capital from historical sources.

[314] In addition, some advisers to hedge funds that are already registered with the Commission have indicated that the burdens of adviser registration do not impose significant additional costs on their operations. Further, many advisers of hedge funds that are not registered have indicated that they conform their operations to those of registered advisers.

[315] The President's Working Group cited the difficulty of limiting registration to advisers to hedge funds as one reason for not requiring hedge fund managers to register under the Advisers Act. LTCM Report, supra note 126, at B-16. In developing anti-money laundering rules under the USA Patriot Act, the Treasury Department was, however, able to craft such a limitation by

In addition, we recommend that the Commission consider its available resources when establishing the amount of assets under management threshold for registration with the Commission.

The Commission should carefully evaluate its resources and capabilities to seek to ensure that any rulemaking would not affect the efficacy of the Commission's examination program before taking action on our recommendations. Moreover, the Commission would have to devote the resources necessary to modify its existing investment adviser examination program so that it recognizes the unique nature of hedge fund advisers and identifies deficiencies and possible violations.[316] We also believe that our recommendations would require that additional resources be dedicated to the Division of Investment Management so that it may consider and evaluate regulatory policy regarding hedge fund investment advisers.

B. The Commission Should Consider Revising its Regulations Under the Advisers Act to Require Advisers to Provide a Brochure Specifically Designed for Hedge Funds

We recommend that the Commission consider revising its rules to require that hedge fund advisers file with the Commission, and deliver to investors, a disclosure statement tailored to meet the needs of hedge fund investors.[317] Disclosure could be in the form of a brochure and

---

proposing to apply its rule only to funds that offered certain redemption rights. See Treasury Anti-Money Laundering Proposal, supra note 265; see also supra Part III.E.4.c.

316 Requiring hedge fund advisers to register with the Commission would not impose any additional burdens on state securities authorities. Hedge fund advisers registered under state law would, upon registering with the Commission, be eligible to withdraw their state registrations. See Section 203A(b)(1) of the Advisers Act. The rulemaking that we recommend that the Commission consider may thus be expected to relieve some state regulators of their regulatory obligations with respect to some hedge fund advisers that are registered with state securities authorities. See supra Part III.E.5.c. (discussing state regulation of hedge fund advisers).

317 Investment advisers register with the Commission or state securities administrators on Form ADV. See http://www.sec.gov/divisions/investment/iard.shtml. Part I of Form ADV requires general disclosure about the adviser's business and certain disciplinary information. Part I of an adviser's Form ADV is available on the Commission's web site. Part II of Form ADV requires disclosure of certain information, including conflicts of interest, assets under management and whether the adviser manages any pooled assets. Part II of Form ADV (or a brochure incorporating the information required in Part II) must be delivered to clients and prospective clients under Rule 204-3 under the Advisers Act. Advisers to hedge funds must deliver their brochures to the hedge fund investors, rather than the hedge fund itself. *Electronic Filing by Investment Advisers; Proposed Amendments to Form ADV,* Advisers Act Release No. 1862 n.117 (Apr. 5, 2000). The Commission has under consideration a proposal to make Part II of Form ADV available on the Commission's website.

would prescribe minimum requirements for basic disclosure information provided to investors and prospective investors. The Commission could require, for example, disclosure about various conflicts of interest, what risk management measures the adviser performs,[318] how the adviser values securities held by hedge funds (and the extent to which that valuation will be determined independently) and what lock-up periods may apply to an investor's investment in hedge funds managed by the adviser. Although hedge fund investors may already receive some of the information in the fund's PPM, we would propose that the Commission require that this information be disclosed in the "hedge fund brochure" – the brochure having the added benefit of requiring the adviser to update its disclosures periodically and make that information available to investors on an ongoing basis.[319] Moreover, these disclosures could be useful to other clients of the adviser in identifying conflicts of interests on the part of the adviser.

The information contained in Form ADV would not, we recognize, give investors in hedge funds all the information that they may need or want. Because that form is designed to provide information about investment advisers, there would be limitations on information about specific hedge funds. In addition, Form ADV cannot provide investors with sufficient information to evaluate the character of the hedge fund adviser or its employees.[320] But Form

---

318 The Commission also could consider exploring the possibility of developing appropriate risk measures that hedge fund advisers could use to provide investors with ongoing risk information. Hedge fund advisers, institutional investors and knowledgeable groups such as the Investor Risk Committee of the International Association of Financial Engineers could be contacted to assist the Commission in developing risk measures that would be meaningful to, and meet the needs of, hedge fund investors.

We note that our recommendation would implement one of the recommendations in the LTCM Report, supra note 126, at 32-33. The Working Group recommended the enactment of legislation granting any necessary authority to require disclosure by hedge funds that were not registered with the CFTC as commodity pools. Legislation was introduced into Congress but was never enacted. Legislation would be unnecessary to effect the Working Group's recommendation once hedge fund advisers registered with the Commission.

319 See Roundtable Transcript of May 14 (statement of George Hall) (the private placement memorandum does not provide for ongoing information – ongoing information is provided more informally, "more outside of the documents").

320 Roundtable Transcript of May 14 (statement of David Swensen) ("[W]hat we really care about when we're making investment decisions is, first and foremost, the quality of the people, and there's no way that you can look at somebody's disclosure document and figure out if the people that you're invested with have the character, the intelligence, the integrity, the creativity, and market savvy that you want to have in a partner in this arena or any other investment arena, for that matter."); Roundtable Transcript of May 15 (statement of Pamela Parizek) ("While there is a great deal of information that's available in the public domain, . . . things like reputation and integrity [are] not generally going to be available and frequently we are called upon to get that type of information for many of our investors.").

ADV disclosure would, we believe, make the due diligence process in which many hedge fund investors engage substantially more efficient and provide investors with more current information about the operations of hedge fund advisers and the strategies, policies, management and operations of the hedge funds that they operate.

C. The Commission Should Consider Requiring Certain Registered Investment Companies to Follow Board Adopted Valuation Procedures

We recommend that the Commission consider rulemaking to address our concerns about how registered investment companies, including registered FOHFs, that invest their assets in hedge funds value their portfolio holdings. As noted above, the Investment Company Act requires boards of directors to fair value in good faith any securities for which there are no readily available market quotations. Best practices would suggest that all registered investment companies adopt procedures under which they may satisfy this requirement. Because of our heightened concerns relating to registered FOHFs, however, we recommend that the Commission consider a rule that would prohibit registered investment companies from investing in the securities of hedge funds unless their boards of directors have adopted procedures designed to ensure that the funds value those assets consistently with the requirements of Section 2(a)(41) of the Investment Company Act. In making this recommendation, however, we note that the requirement under Section 2(a)(41) that a board of directors determine, in good faith, the fair value of securities for which there is no readily available market quotation reflects Congress's recognition that a board of directors must exercise its best business judgment in valuing these types of securities. We do not recommend, therefore, that the Commission consider mandating the specific procedures that a fund must follow in valuing its assets.[321]

D. The Commission Should Consider Requiring Additional Disclosure to be Provided About Layered Fees of "Funds of Funds"

We recommend that the Commission consider adopting its recently proposed rule that would expressly require all registered investment companies, including registered FOHFs, that invest all or substantially all of their assets in hedge funds (collectively "funds of funds") to disclose in the fee table the estimated fees (both asset based and performance based) and expenses of the underlying funds.[322] The staff believes that disclosure of the expenses of both the fund in which an investor invests and the funds in which a fund of funds invests is important to provide meaningful information to investors.

---

[321] We believe that this recommendation could ultimately address our concerns about a registered FOHFs diversification and risk exposure. See supra Part VI.C.2. (discussing concerns relating to registered FOHFs).

[322] See *Fund of Funds Investments*, Investment Company Act Release (to be released).

We believe our recommendation is particularly germane to registered FOHFs. Neither the Investment Company Act nor the Advisers Act limits the amount of fees that may be charged by hedge fund advisers. Moreover, to the extent that performance fees may be charged at the hedge fund level, a registered FOHF investor may indirectly pay performance fees to some hedge fund advisers regardless of how poorly the investor's registered FOHF performed overall. Because an investor in a registered FOHF has access only to the fee disclosure in that fund's prospectus, the investor cannot accurately evaluate his or her investment goals and expectations against the costs of the investment, without additional disclosure that would be required under the recommended rule.

E. Regulators Should Continue to Monitor Whether Suitability Obligations Are Being Met

We do not recommend specific measures to be taken with respect to suitability determinations at this time. We believe that the staffs of the NASD and the Commission are carefully focusing their examinations of broker-dealers to, among other things, ensure that they are meeting their obligation to evaluate and disclose to investors the general suitability of hedge funds and FOHFs (both registered and not registered with the Commission), as well as their suitability for specific investors. Although we believe that the examination of broker-dealers has been effective in deterring abusive sales practices relating to these securities, we also urge the examination staffs of the NASD and Commission to continue to be vigilant in identifying any violations of broker-dealer suitability obligations.

F. The Commission Should Consider Permitting General Solicitation in Section 3(c)(7) Hedge Fund Offerings

We question whether the restrictions on general solicitation for private placement offerings of interests in funds relying on Section 3(c)(7) of the Investment Company Act should be retained. Unlike a Section 3(c)(1) fund, a Section 3(c)(7) fund can be sold to an unlimited number of investors, so long as they are "qualified purchasers." There seems to be little compelling policy justification for prohibiting general solicitation or general advertising in private placement offerings of Section 3(c)(7) funds that are sold only to qualified purchasers.[323]

---

[323] The Commission has requested comment in various rulemakings as to whether the restrictions on general solicitation should be relaxed as to certain types of offerings or certain types of investors. See, e.g., *The Regulation of Securities Offerings*, Securities Act Release No. 7606A (Nov. 13, 1998); *Securities Act Concepts and their Effects on Capital Formation*, Securities Act Release No. 7314 (July 25, 1996); *Exception for Certain California Limited Issues*, Securities Act Release No. 7285 (May 1, 1996); *Exemption for Certain California Limited Issues*, Securities Act Release No. 7185 (June 27, 1995). To date, the Commission has not adopted proposals to relax general solicitation or general advertising restrictions. The Commission and the staff have, however,

The staff would be reluctant to ease or eliminate the prohibition on general solicitation for hedge funds or other funds that use the accredited investor standard as their minimum investor criteria. We believe that such an arrangement could increase the level of risk of investment interest by less wealthy investors. On the other hand, permitting funds, including hedge funds, that limit their investors to a higher standard (e.g., "qualified purchasers") to engage in a general solicitation could facilitate capital formation without raising significant investor protection concerns.

G. Monitor Capital Introduction Services Provided by Prime Brokers

Prime brokers frequently provide certain investors with information about hedge funds. In particular, prime brokers who provide capital introduction services to hedge fund advisers often invite these investors to attend capital introduction conferences and seminars. Prime brokers have asserted that these "dating service" activities do not rise to the level of acting as a broker or investment adviser. We question whether this conclusion is accurate in all circumstances. Accordingly, we encourage examiners to be vigilant in examining capital introduction services to determine whether prime brokers are complying with all applicable regulatory requirements.

H. Encourage the Hedge Fund Industry to Embrace and Further Develop Best Practices

The Commission should encourage the hedge fund industry and others involved with the industry to embrace existing "best practices" and expand and develop additional best practice guidelines in areas that further investor protections and enhance the ability of hedge funds to manage their operations. Generally, best practice guidelines allow firms to benchmark their activities relative to their peers and can produce a self-regulatory solution to issues arising within an industry. At least three industry groups and associations have issued best practice recommendations for hedge fund advisers.[324]

---

recognized that a shorter time frame, 30 days, between the end of activities that may be considered general solicitation or general advertising and the commencement of an offering may be sufficient to eliminate a concern that investors in the subsequently commenced private offering were found by means of general solicitation or general advertising. See e.g., *Integration of Abandoned Offerings*, Securities Act Release No. 7943 (Jan. 26, 2001).

[324] See The Managed Funds Association, *2003 Sound Practices for Hedge Fund Managers* (Aug. 2003) ("MFA 2003 Sound Practices"); The Alternative Investment Management Association Ltd., *Guide to Sound Practices for European Hedge Fund Managers* (Aug. 30, 2002) ("AIMA Guide to Sound Practices"); and The International Association of Financial Engineers, Investor Risk Committee, *Hedge Fund Disclosure for Institutional Investors* (July 27, 2001).

Some best practice recommendations were developed in response to issues arising out of LTCM, and therefore focus largely on risk management techniques, addressing investor protection issues in the context of market, leverage, and operational risks. The Managed Funds Association recently revised its sound practices.[325] These sound practices include recommendations concerning the type of information that should be disclosed to a hedge fund's investors, such as the fund's investment objectives and strategies, performance information, and range of permissible investments as well as valuation policies and business continuity and disaster recovery. These recommendations also acknowledge that hedge fund operations may generally present conflicts of interest and that these conflicts, if material, should be appropriately disclosed. The Alternative Investment Management Association sound practices guide covers topics such as: creating and managing a hedge fund business; hedge fund structures and organizations; the investment process and portfolio risk management; portfolio administration and operation controls; as well as capital raising and investor relations. AIMA guidelines, for example, address among the most critical conflicts of interest confronted by investment advisers: side-by-side management of hedge funds and other clients. The AIMA guidelines emphasize that addressing side-by-side management issues in managing various portfolios should be an "overriding principle of business."[326]

The use of best practices can be an effective means of addressing issues that arise in the hedge fund industry. For example, based on its examination of major brokerage houses, the Commission staff discovered that many firms responded favorably to recommendations made in the President's Working Group on Financial Markets' report to address the risk management and transparency issues raised in LTCM. The Managed Funds Association has also indicated that the best practices it issued was "widely recognized by members of the hedge fund industry as a highly useful resource for hedge fund managers."[327] Best practices may thus be a useful tool to improve how firms address issues, such as conflicts of interest, beyond regulatory and legal mandates.

While we are encouraged by the best practice guidelines that currently exist, we believe that the industry should be encouraged to continue to refine and expand their scope, especially in light of evolving industry developments. For example, we believe that certain of these recommendations are general in nature and may be more meaningful if they provide specific policies and procedures that hedge fund advisers may follow or consider to improve their operations and to prevent conflicts from harming their clients.

---

[325] See MFA 2003 Sound Practices, supra note 324.

[326] See AIMA Guide to Sound Practices, supra note 324.

[327] See MFA 2003 Sound Practices, supra note 324 (referring to sound practices recommendations that the MFA previously issued in 2000).

I. Investor Education

As this Report notes, improvements in disclosure practices of hedge fund advisers is desirable to help investors make more informed investment decisions regarding hedge fund securities. Even if the Commission follows our recommendations, there may be practical limits on the extent to which investor education can assist retail investors to make informed decisions about hedge funds and FOHFs. It also may be that some investors overlook the correlation between risk and reward.

The Commission's website provides a partial list of questions that investors should ask, and most importantly, understand the answers to before making any investments in hedge funds or registered FOHFs. These issues run the gamut from understanding the costs associated with investing in hedge fund or registered FOHF securities, to understanding any limitations on an investor's ability to liquidate the investment to understanding how the lack of transparency affects the investor's personal investment needs (e.g., diversification). We recommend that the Commission continue to provide and enhance investor education relating to hedge funds and registered FOHFs.

In February 2003, in response to increasing publicity about hedge funds and registered FOHFs, the Commission developed a website advertising a simulated hedge fund, Guaranteed Returns Diversified, Inc. ("GRDI" for short, pronounced "greedy").[328] This website demonstrates how easy it is to be taken in by false statements and seeks to sensitize investors to their vulnerability. Although the Commission's website provides a link to the fake scam, many investors appear to be finding it by surfing the Internet looking for quick and easy hedge fund returns. Several hedge fund websites, and bulletin boards frequented by hedge fund investors, also steer investors to the site. Since the Commission launched the website on February 13, 2003, there have been over 80,000 hits on it.[329]

VIII. The Commission Should Consider Issuing a Concept Release for Examining Wider Use of Hedge Fund Investment Strategies in Registered Investment Companies

We recommend that the Commission consider issuing a Concept Release exploring the wider use of hedge fund-type/absolute return strategies. Many hedge funds use absolute return strategies that are designed to produce positive returns irrespective of the performance of other securities markets. These investments typically have lower correlations to the broader debt and equity markets and thus, may provide benefits to investors under a wider variety of market

---

[328] See http://www.growthventure.com/grdi.

[329] The agency has received telephone calls and a handful of e-mailed comments from investors who have visited the GRDI site. Nearly half of these calls and comments came from investors who, upon reading the website's description of unbelievably high returns, wished to invest.

conditions. The staff believes that these investments may have benefits that could assist other investors, including retail investors, in diversifying their overall portfolios. The staff is not recommending that hedge funds be made more readily available and does not believe that direct investment into hedge funds by retail investors is appropriate.[330] Instead, we believe it may be the case that retail investors interested in absolute return strategies should be able to pursue those investments through the registered investment company structure.

We recommend that the Commission consider issuing a Concept Release assessing the steps that should be taken to encourage the wider use of absolute return strategies in registered investment companies. This release would seek information including, but not limited to, the following: what, if any, statutory or regulatory changes would enable more effective deployment of absolute return strategies in registered investment companies; and what is the ability of retail investors to understand absolute return strategies.

A. Different Registered Investment Company Structures Provide Various Benefits and Challenges in the Deployment of Absolute Return Strategies

Several registered investment companies currently offered to the public utilize absolute return strategies. Although still quite small, this group appears to have grown markedly since 1997 when Congress repealed the "short-short" rule, a tax regulation that limited the amount of profits that an open-end investment company could derive from short-term trading or short selling. Many of the strategies currently being used in registered investment companies attempt to use offsetting long and short positions in an attempt to mitigate market risk and generate positive returns. Among the types of funds currently being offered are market neutral, long/short equity and even merger arbitrage investment strategies.[331] The growth of these funds suggests that the Investment Company Act presents manageable impediments to the retail offering of hedge fund (or hedge fund-like) investment funds.

Some of the registered investment companies using hedge fund strategies are organized as open-end management companies, and thus must make payment on redemption requests no

---

330 A few jurisdictions, such as Hong Kong, Singapore and Switzerland, permit individual hedge funds to be marketed and sold directly to retail investors. See *Hedge Funds and the FSA*, Financial Services Authority Discussion Paper No. 16, at 21-22 (Aug. 2002) at http://www.fsa.gov.uk/pubs/discussion/16.

331 Registered investment companies with market neutral, merger arbitrage and other absolute return strategies represent a very small niche of the approximately $6.8 trillion investment company industry. One estimate is that there are approximately 50 such registered investment companies with about $8 billion under management. See *Hedging Trims Some Fund Gains*, Wall Street Journal (Aug. 4, 2003).

more than seven days after receipt of those requests.[332] As a result, these funds are unable to impose "lock-ups" or notice requirements, both of which are common among hedge funds. Moreover, the need to manage cash flows as a result of purchases and redemptions (aggravated by market timers) may make the open-end management company structure less attractive or may negatively affect returns of the fund.[333] However, for those many hedge fund strategies involving investments in highly liquid securities, redemption requirements of the Investment Company Act do not present a significant obstacle.

Those advisers using strategies involving illiquid securities or who wish to avoid cash flow management obligations, may register their funds as closed-end investment companies. The closed-end investment company offers several significant advantages over the mutual fund structure in the utilization of absolute return strategies. Closed-end funds do not issue redeemable securities and are therefore not required to liquidate securities in order to meet redemption requests. This more stable asset base permits advisers to remain fully invested. Closed-end funds are also not required to hold any specified percentage of their assets in liquid securities and may engage in strategies that require large portions of illiquid securities as a percentage of their total assets.[334] Closed-end funds, of course, may offer less liquidity to their shareholders.[335] As discussed below, closed-end funds can engage in leveraging transactions

---

332 See Section 22(e) of the Investment Company Act (prohibiting registered investment companies issuing redeemable securities from suspending the right of redemption for more that seven days following tender of security).

333 Open-end funds may hold no more that 15 percent of their assets in illiquid securities. A security is considered "illiquid" if a fund is unable to promptly sell or dispose of the security in the ordinary course of business at its current value within seven days. See *Acquisition and Valuation of Certain Portfolio Instruments by Registered Investment Companies*, Investment Company Act Release No. 14983 (Mar. 21, 1986) (adopting amendments to Rule 2a-7). The Commission has historically recommended the 15 percent ceiling in order to maintain and enhance a registered investment company's liquidity. See *Revisions of Guidelines to Form N-1A*, Investment Company Act Release No. 18612 (Mar. 12, 1992). While the Guidelines were not republished when Form N-1A was amended in 1998, they continue to set forth the staff's views on issues not addressed in the 1998 amendments to Form N-1A. See *Registration Form Used by Open-End Management Investment Companies*, Investment Company Act Release No. 23064 (Mar. 13, 1998).

334 Because of the ability to hold illiquid securities, closed-end investment companies tend to specialize in less liquid bonds, foreign securities, small/microcap securities and securities issued by companies that are not publicly traded.

335 Most closed-end funds provide liquidity to their shareholders by listing their securities for trading on an exchange or on the over-the-counter markets. However, there is no requirement that closed-end fund shares be publicly traded and many funds provide their shareholders with liquidity solely through periodic purchases of their own shares or through tender offers.

beyond those of open-end investment companies. Unlike open-end investment companies, however, closed-end investment companies cannot engage in continuous offerings and often have difficulty raising additional assets.[336]

Closed-end investment companies that elect to operate as "interval" funds under Rule 23c-3 under the Investment Company Act may be well suited for use of absolute return strategies.[337] Interval funds are registered closed-end investment companies that adopt as a fundamental investment policy that they will engage in periodic repurchases of their own shares at net asset value.[338] There are few interval funds currently in operation.[339] One reason for the reluctance to use the interval fund structure may be the requirement that the fund maintain liquid assets equal to at least 100 percent of the amount of the mandatory repurchase offer. Complying with this provision may require selling securities in anticipation of the periodic repurchases. Interval funds also lack the same flexibility of other closed-end funds with respect to the use of leverage.[340]

We recommend that the Commission consider seeking comment through a Concept Release to learn the extent to which hedge fund investment strategies might be effectively deployed in the open-end investment company structure. The release should request comment on what measures could assist these companies in offering absolute return strategies consistent with the issuance of redeemable securities, including whether there should be flexibility with respect to the limitation on illiquid securities. The release should also seek comment on how closed-end investment companies could be made to be more conducive for the use of absolute return strategies. Similarly, the Concept Release should seek comment on what steps could be taken to increase the utility of Rule 23c-3 under the Investment Company Act, including whether raising the maximum permitted redemption amount above 25 percent would be helpful.

---

336 Section 23 of the Investment Company Act generally prohibits closed-end funds from issuing shares below NAV, and since closed-end fund shares often trade at discounts to NAV, the presence of a trading discount limits the issuance of additional shares to rights offerings, for practical purposes.

337 See *Repurchase Offers by Closed-End Management Investment Companies*, Investment Company Act Release No. 19399 (Apr. 7, 1993).

338 The periodic repurchase provisions are intended to allow closed-end investment companies to offer their investors a limited ability to resell shares—a benefit traditionally available only to shareholders of registered open-end investment companies. Id.

339 Commission records indicate that 43 investment companies or portfolios operate pursuant to Rule 23c-3 under the Investment Company Act.

340 Rule 23c-3 under the Investment Company Act requires that leveraged positions either mature or be callable in advance of the periodic repurchases.

B. Registered Investment Companies are Subject to Restrictions on Leverage and Short Selling that Hedge Funds Avoid

While hedge funds may no longer engage solely in strategies that involve hedging and leverage, the majority of hedge funds still use these techniques to varying degrees. The ability to borrow money to engage in securities transactions and to sell securities short are of critical importance to most hedge fund advisers.

Congress chose to *limit*, but not to *prohibit*, the ability of investment companies to engage in leverage.[341] Section 18 of the Investment Company Act addresses leverage concerns by limiting the ability of investment companies to borrow and incur indebtedness.[342] Under the Investment Company Act, securities and related transactions in which the registered investment company is a borrower, or that involve indebtedness on the part of the registered investment company, are generally known as "senior securities." Congress limited the ability of investment companies to engage in leverage by limiting their ability to issue "senior securities."[343] In

---

341 See, e.g., Mutual Fund Use of Derivatives, Letter from Arthur Levitt, Chairman of the SEC, to Hon. Edward J. Markey and Hon. Jack Fields, U.S. House of Representatives, attaching Division of Investment Management Memorandum, at n. 83 (Sept. 26, 1994) ("The legislative history of the Investment Company Act indicates that the Act was not intended to eliminate all leverage from fund investments.") See also id. at n. 82 ("The framers of the Investment Company Act specifically disavowed any attempt to prohibit speculative mutual fund investments."). The Commission has stated that "[l]everage exists when an investor achieves the right to a return on a capital base that exceeds the investment which he has personally contributed to the entity or instrument achieving a return." See Release 10666, supra note 133.

342 See, e.g., Sections 18(a) - (e) of the Investment Company Act (restrictions on closed-end investment companies); Section 18(f) of the Investment Company Act (restrictions on open-end investment companies); Section 18(g) of the Investment Company Act (definition of "senior security"); and Section 18(h) of the Investment Company Act (asset coverage formula).

343 Because securities issued by open-end investment company securities are redeemable, and securities issued by closed-end investment companies are not, Sections 18(a) and (f) of the Act limit the use of leverage by these different types of investment companies in different ways. A closed-end company may issue a senior security representing indebtedness if it maintains asset coverage of at least 300 percent. See Sections 18(a)(1)(A) and (h) of the Investment Company Act. A closed-end company may issue a senior security that is a stock, e.g., preferred stock, if it maintains asset coverage of at least 200 percent. See Section 18(a)(2)(A) of the Investment Company Act. The Investment Company Act generally limits a closed-end company to issuing one class of senior securities representing indebtedness and one class of senior stock, but the class of indebtedness or stock may be issued in one or more series. See Section 18(c) of the Investment Company Act. Under the Investment Company Act, open-end companies generally may not issue senior securities, except that they may borrow from banks provided that the borrowing is subject to 300 percent asset coverage. See Section 18(f) of the Investment Company Act. The Investment Company Act also permits open-end investment companies to engage in

practice, these restrictions limit the amount of leverage in which registered investment companies may engage. Hedge funds are not subject to these limitations.

The Investment Company Act does not prohibit a registered investment company from engaging in short selling.[344] Registered investment companies are permitted to short sell provided that they cover any open short positions by setting aside or "segregating" cash or other liquid securities.[345] Assets set aside to cover a short position are generally frozen and unavailable to the fund for any other purpose, including other short selling or leveraged transactions.[346] By taking these assets "out of circulation," the asset set-aside (segregation) requirement serves as a de facto limit on the amount of short selling in which an investment company may engage.[347] Nonetheless, even with these limits, registered investment companies still have the ability to engage in high levels of short selling.

The Concept Release should seek comment on whether the Investment Company Act's restrictions on the use of leverage and short selling are discouraging the use of absolute return strategies in registered investment companies, as well as impairing the ability of registered investment companies to effectively employ such strategies. The release should also consider whether certain types of derivatives may be useful to registered investment companies seeking to use absolute return strategies. The release should also invite comment on what additional steps,

---

certain private and temporary borrowings, from banks and non-banks, without 300 percent asset coverage, because such borrowings are not "senior securities." See Section 18(g) of the Investment Company Act.

344 According to Commission records, for the six-month period ended April 30, 2003, approximately 3,900 mutual funds, out of a universe of approximately 9,000 mutual funds, disclosed that they were authorized to short sell. During this period, 236 mutual funds engaged in short selling.

345 Registered investment companies must set aside or segregate an amount equal to the daily price of the shorted securities less any non-proceeds margin posted under applicable margin rules. See, e.g., Release 10666, supra note 133; *MLAM*, supra note 133; *Robertson Stephens Investment Trust* (pub. avail. Aug. 24, 1995); *Dreyfus*, supra note 133. Instead of setting aside assets, the staff has permitted a fund to cover its short positions by owning the security or holding a call option on the security with a strike price no higher than the price at which the security was sold. See id.

346 See, e.g., Release 10666, supra note 133.

347 All mutual funds, irrespective of whether they are engaging in short selling, must ensure their ability to satisfy their redemption requirements under Section 22(e) of the Investment Company Act. A fund's board of directors must ensure that short selling will not interfere with the fund's ability to: meet current obligations; honor requests for redemptions (in the case of a mutual fund); and manage properly its investment portfolio in a manner consistent with the fund's stated investment objectives, especially as short selling approaches high levels. Id.

including clarifying existing guidance, may be taken to enhance the ability of all registered investment companies to utilize these tools.

C. Alignment of the Investment Adviser's Interests with Investors

Hedge funds advisers argue that two factors are critical to aligning their interests with those of their investors. First, they assert that a properly configured performance fee arrangement providing compensation based on capital gains and capital appreciation provides a greater incentive for the adviser to produce absolute returns. The requirement that an absolute return be achieved before the performance fee is paid, in their view, insures diligence in managing the fund.[348]

Second, investment of the adviser's own assets alongside the investors' helps assure that the adviser acts responsibly.[349] Hedge fund investors rely on having the adviser's assets in the fund to serve as a curb on any adviser who may seek to engage in high-risk investment strategies. If the adviser stands to lose as much as the fund's investors by engaging in unduly risky investment activities, that adviser may be deterred from such activities.[350] Not surprisingly, a number of private placement memoranda include provisions requiring that the general partner disclose significant withdrawals from their capital account.

Performance fees based on capital gains and capital appreciation have an interesting history under the federal securities laws. [351] Congress originally limited the receipt of these types

---

[348] "Hedge fund managers seek out and exploit mispricings of securities using a variety of financial instruments. They produce superior performance, and they are not judged by their ability to track a passive benchmark. As a result, the compensation structure within the industry is based largely on performance." See Steven J. Brown et al., *Offshore Hedge Funds: Survival and Performance, 1989-95*, 72 Journal of Finance 91 (1999).

[349] Hedge fund investors also look to the adviser's own investment in the fund as a measure of prudence to ensure that the manger acts responsibly in others areas, e.g., brokerage fees, soft dollars, etc.

[350] The Commission has recognized that where advisers have their own substantial investment in certain accounts, it reduces their incentive to take undue risks. See, e.g., *Foster Management Company*, Advisers Act Release Nos. 646 (Nov. 1, 1978) and 651 (Nov. 28, 1978); *Weiss, Peck & Greer*, Advisers Act Release Nos. 623 (Mar. 28, 1978) and 625 (Apr. 25, 1978).

[351] Section 205(a) of the Advisers Act, in general, prohibits registered investment advisers from entering into a contract to provide investment advisory services that, among other things, "provides for compensation to the investment adviser on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of the client." See Section 205(a)(1) of the Investment Advisers Act. For a discussion of the history of performance fees in

of fees out of a concern that they encouraged managers to take inappropriate risks.[352] Notwithstanding this history, the Investment Advisers Act did not originally prohibit registered investment advisers from charging a performance fee to registered investment companies.[353] In 1970, however, Congress extended the performance fee prohibition to cover advisory contracts with registered investment companies in response to information demonstrating that performance fee arrangements that were included in such contracts were unfair to the registered investment companies' shareholders.[354]

The staff believes that it is appropriate to re-examine whether fee arrangements that are based on a share of the capital gains and capital appreciation may be appropriate for agreements between investment advisers and registered investment companies. The staff also believes that it is worth exploring whether encouraging investment advisers to invest in the funds that they manage may help to ensure responsible management of registered investment companies using absolute return strategies.[355]

D. Absolute Return Strategies May Challenge Traditional Investor Expectations

Perhaps the most formidable obstacle to further use of absolute return strategies may lie in whether investors can understand and feel comfortable with these products. Absolute return investment vehicles operate differently from traditional, long-only/relative return products. Thus, it would be useful for the Concept Release to explore some of these differences, as highlighted below.

---

investment advisory contracts, see *Protecting Investors: A Half Century of Investment Company Regulation*, Division of Investment Management 237-249 (May 1992) ("*Protecting Investors*").

352 H.R. Rep. No. 2639, 76th Cong., 2d Sess. 29 (1940).

353 The investment company industry persuaded Congress that performance fees closely linked the interests of investors and management and that the basis for management's compensation should not be specified by statute as long as the basis for such compensation was adequately disclosed to shareholders. See *Protecting Investors*, supra note 351, at 242.

354 More than two-thirds of the performance fees in existence at that time either permitted the registered investment company's adviser to earn a bonus for good performance without suffering a penalty for poor performance, or had fee arrangements in which the potential rewards were substantially greater than the potential penalties. See id., at 242.

355 The Investment Company Act requires that the sponsors of registered investment companies make initial investments in those companies. See *Automation Shares*, 37 S.E.C. 771 (1957) (Section 14(a) of the Investment Company Act requires that seed capital be provided by "shareholders with a bona fide investment purpose without any present intention to dispose of the security.").

Registered investment companies generally engage in long-only/relative return strategies whose performance is highly correlated to specific benchmarks or indexes.[356] One benefit of relative-return strategies is the ease with which investors may compare their investment's performance with that of the relevant benchmark, as well as against similar funds using the same benchmark. These characteristics help shape many of the expectations that retail investors have today. For example, an investor in a long-only/relative return product will generally be able to assume that if the major equity markets are rising, the performance of the investment will rise as well. Index funds and exchange-traded funds, which are designed to replicate entire markets or segments of markets, further attune investors to performance results that track the broader markets.

In contrast, absolute return strategies generally seek to achieve a high level of return for their funds in a variety of market environments, rather than attempting to duplicate or exceed the performance of a particular benchmark or index. Absolute return strategies are designed to move independently of the underlying markets and thus, have lower correlations to the broader markets. During falling markets the performance of the fund should stay independent from that of broader market movements, thus providing some protection from those downward movements. In rising markets, however, it is not uncommon for funds employing absolute return strategies to lag behind more traditional, long-only investments.[357] Indeed, some proponents of hedge funds admit that during periods of strong equity performance, hedge fund performance may suffer.[358]

Broader use of absolute return strategies might also require investors to modify their expectations with respect to the investment flexibility accorded to investment advisers. Perhaps the most critical aspect of an adviser's ability to seek absolute returns is the often unfettered discretion to manage the fund in light of changing market conditions. Many hedge funds have broad investment objectives and are authorized to use multiple strategies in order to take advantage of changing market conditions.[359] In adverse markets, a hedge fund adviser will

---

[356] See supra Part IV.A. (discussion of hedge fund investment strategies).

[357] This is because the hedging portions of the portfolio will act as a drag on the long portions. One Roundtable participant explains that "[b]y definition, hedge funds are not going to outperform a broad index in a strongly rising market, like the one we saw in the second quarter [April-June 2003]." See Neil Martin, *Bull in the Hedges*, Barron's (July 28, 2003) (quoting Greg Newton).

[358] "Hedge funds under perform the stock market only when the latter is strong, that is, when the stock market yields a positive annual return." See *Absolute Returns*, supra note 118, at 105.

[359] See Roundtable Transcript, May 14 (statement of Robert Schulman) ("The hedge fund industry has avoided, in large measure, the catastrophic impacts of the market by having enough flexibility in the [private placement] document and using it to react to what you would call changing market conditions.").

generally have the flexibility to hedge against market declines, engage in short-selling or take positions that are less dependent on the price movements of broad market averages to make profits or limit losses.[360] Most traditional relative-return products, including registered investment companies, are either limited in their flexibility or forego engaging in these strategies.

More flexible investment mandates permit the adviser to manage the fund according to his or her best judgment. Poor choices, of course, are a continual possibility for absolute return advisers, as they are for all investment advisers. For example, if an absolute return adviser redeploys assets incorrectly, the performance of the fund may suffer. This may contrast with instances where an adviser with less flexibility must adhere to a particular investment mandate, which, in the end, prevents the adviser from exercising more discretion, and possibly, making a mistake.

The flexibility that absolute return advisers require often makes it more difficult for investors to categorize the precise nature of their investments. For example, investors in long-only/relative return strategies often associate their investment with the type of portfolio securities that their mutual fund or closed-end fund typically holds. Retail investors often rely on the structure and nature of the particular fund's investments to provide continuity to their portfolio. In contrast, absolute return investments may lack that continuity or assurance. In one sense, investors in funds utilizing absolute return strategies must rely more heavily, and may associate their investment more closely, with an adviser, rather than with a fund itself.[361]

The Concept Release should explore whether investor education would be helpful in connection with absolute return investments. The Concept Release should also examine whether any particular absolute return strategies raise especially difficult issues with respect to investor expectations. The Concept Release should explore whether more education is necessary to familiarize retail investors with the risks of engaging in short selling and leveraging transactions.[362] Moreover, the Concept Release should seek comment on what, if any, additional

---

[360] Because these strategies often necessitate a steady turnover in the nature and character of the underlying investments, investors should recognize that they may have little ongoing insight into how a hedge fund is invested. This may differ from traditional long-only relative return products that permit investors to remain focused on sectors or sub-sectors of the broader markets.

[361] "[T]he most interesting feature of hedge funds is that they are thought of as nearly pure 'bets' on manager skill." See Brown, supra note 348.

[362] The primary market risk from short selling is the fact that losses "can be infinite, depending on how high the stock price moves after the [short] sale." Comment submitted by Roundtable Panelist James Chanos.

disclosure is necessary to ensure that absolute return investments are fully understood by investors.[363]

---

[363] In the Concept Release, the Commission may also wish to explore whether there are other alternatives that will expand the accessibility of absolute return strategies to a broader group of suitable investors. It could explore, for example, whether certain hedge funds relying on Section 3(c)(7) of the Investment Company Act may be permitted to accept investors below the qualified purchaser standard, so long as that hedge fund provides fundamental Investment Company Act protections commensurate with the level of investors permitted to invest.

Summary of the Commission's Previous Studies or Investigations of Hedge Funds

In January 1969, the Commission commenced an investigative study of hedge funds in response to the rapid increase in the number of hedge funds and their assets under management. At that time, the Commission estimated that there were almost 200 hedge funds in existence with estimated total assets of $1.5 billion. The Commission's study, however, was not limited to unregistered funds. It also examined the activities of registered investment companies that engaged in hedge fund trading techniques such as leveraging and short selling. The Commission sent questionnaires to registered and unregistered funds in an effort to obtain basic background information, information about trading and brokerage practices, affiliations of hedge fund principals, borrowing practices and sources of credit.

Twenty three years later, the Commission, in collaboration with representatives of the Treasury Department and the Board of Governors of the Federal Reserve System ("Federal Reserve") issued a report focusing on abuses in the market for United States government securities (i.e., Treasury bills, notes and bonds) following admissions by Salomon Brothers Inc. of violations of Treasury auction rules.[1] The report did not make any legislative proposals with respect to hedge funds, but did recommend reforms for administrative and regulatory changes regarding Treasury auction participation, policies and enforcement as well as the means for detecting and combating short squeezes in the U.S. government securities market.[2]

---

[1] See *Joint Report on the Government Securities Market* (Jan. 1992) ("Joint Report").

[2] Id., at xiii-xv. The report also made related legislative recommendations. However, in an appendix discussing hedge funds, the report recognized the potential dangers of the use of leverage by hedge funds, stating:

> Events in the government securities market have shown that their capacity for leverage allows hedge funds to take large trading positions disproportionate to their capital base. Thus far, [hedge] fund managers have proved very adept at controlling their market risk, and their lending counterparties appear to consider them creditworthy. However, the sheer size of the positions taken by hedge funds raises concerns about systemic risk that these funds may introduce into the financial markets.

Appendix B to Joint Report.

In 1992, the Commission's Division of Investment Management looked at hedge funds in connection with its study of the Investment Company Act and recommended that the Commission propose a new private investment company exception for qualified purchasers.[3]

Later that year, in response to a Congressional inquiry, the Commission provided detailed information about both the nature and regulatory treatment of hedge funds to Congress.[4] That staff report focused on the systemic risk posed by hedge funds and analyzed how various provisions of the federal securities laws affect hedge funds. The staff made clear at that time that it had no direct source of information regarding hedge fund activities, and that a limited amount of information about hedge funds was publicly available.[5] The report concluded that the relevant regulatory issues did not involve the protection of hedge fund investors, but instead, the potential of hedge funds to affect the equity markets due to their size and active market presence. At that time, the Commission believed that its proposed large trader reporting system would enhance its ability to examine the activities of hedge funds in the event of large movements in the equity markets.[6]

---

3 See *Protecting Investors: A Half Century of Investment Company Regulation*, Division of Investment Management, May 1992, p. 103-105. The Division's recommendation was subsequently adopted as Section 3(c)(7) as part of the National Securities Markets Improvement Act of 1996. See *Privately Offered Investment Companies*, Investment Company Act Release No. 22597 (Apr. 3, 1997).

4 See Letter from Richard C. Breeden, Chairman, U.S. Securities and Exchange Commission, to Edward J. Markey, Chairman, Subcommittee on Telecommunications and Finance, Committee on Energy and Commerce, U.S. House of Representatives (June 12, 1992).

5 Press reports estimate that approximately 400 hedge funds existed at that time. With respect to the asset base of the hedge fund industry, the staff was able to identify publicly available information for only 17 hedge funds with approximately $13 billion in assets under management as of December 31, 1991.

6 The Commission's authority to implement the large trader reporting system is provided in Section 13(h) of the Exchange Act, which was added to the statute by the Market Reform Act of 1990 to remedy difficulties that the Commission encountered during its attempts to reconstruct and analyze trading activity following the stock market breaks of October 1987 and October 1989. The Commission, however, never adopted implementing regulations due, in part, to the availability of other mechanisms for monitoring stock market activity (e.g., the electronic blue sheet system). See also *Electronic Submission of Securities Trading Data by Exchange Members, Brokers and Dealers*, Exchange Act Release No. 42741 (May 2, 2000) (proposing rule 17a-25 under the Exchange Act and stating that public comments raised concerns that, among other things, the comprehensive system envisioned by Section 13(h) could prove difficult to implement and maintain, and most likely would not expedite trading reconstructions to the extent contemplated in 1990).

The President's Working Group on Financial Markets ("Working Group")[7] issued a report in April 1999 in the wake of the near-collapse of Long Term Capital Management ("LTCM").[8] The report examined hedge funds in general as well as LTCM, analyzed the public policy issues presented to the markets by leverage, risk and bankruptcy, and recommended a number of measures designed to constrain excessive leverage in the financial system.

The report focused on the risk management and transparency issues raised by LTCM as well as "highly leveraged institutions" in general. It also focused on the exposure of banks and others to the counterparty risks of highly leveraged entities such as hedge funds. The Working Group looked at such issues as these entities' use of leverage and whether that use was excessive, counterparty adherence to stated policies, margin and collateral requirements and how well risk models functioned. The Working Group also recommended in its report that no changes be made to the exemptions for hedge funds and hedge fund advisers under the Investment Company Act and the Advisers Act.[9] The report took the position that registration of hedge funds and their advisers at that time did not appear to be a useful method of monitoring hedge fund activity.

In addition to the examination of risk management and transparency issues by the Working Group, the Commission staff actively supported the work of the Multidisciplinary Working Group on Enhanced Disclosure ("MWGED"), which was established by the international regulatory and central banking community to assess the feasibility and utility of enhanced public disclosure by financial intermediaries (i.e., banks, securities firms, insurance companies and hedge funds). The MWGED issued a report in April 2001 that recommended that all regulated financial intermediaries move promptly to make routine, periodic disclosures of certain quantitative risk measurements to their shareholders, creditors and counterparties. It also recommended that hedge funds be encouraged to make such disclosures, when material, to their

---

7 The President's Working Group, which continues to examine market leverage and counterparty risks, includes representatives from the Commission, the Treasury Department, the Federal Reserve and the Commodity Futures Trading Commission.

8 See *Hedge Funds, Leverage, and the Lessons of Long-Term Capital Management - Report of The President's Working Group on Financial Markets* (Apr. 1999) ("LTCM Report"). LTCM was a prominent and successful hedge fund in the 1990s that was distinguished by its size, leverage and trading strategies (e.g., convergence trading and dynamic hedging). These characteristics made LTCM vulnerable to the market conditions that followed Russia's devaluation of the ruble, and caused it to suffer approximately $1.8 billion in losses in August 1998. At that time, LTCM's simple balance sheet leverage ratio had reportedly climbed to in excess of 25 to 1, and the hedge fund had difficulty meeting its margin call requirements. Because, among other things, many Wall Street firms were creditors and counterparties to LTCM, there was a general concern that the fund's collapse would have an impact on the financial markets, and the Federal Reserve intervened by facilitating a private-sector recapitalization of the fund.

9 See Appendix B to LTCM Report.

investors, creditors and counterparties. The MWGED's successor, the Joint Forum Working Group on Enhanced Disclosure ("JFWGED"), which the Commission chairs, also addresses issues of enhanced disclosure for financial intermediaries. The work of the JFWGED is ongoing, and the Commission believes that many in the hedge fund industry are considering the recommendations of these two groups and continuing to explore ways to improve some of their practices.[10]

---

[10] The Commission has also been involved in other reviews of market stability and counterparty risk issues posed by hedge funds in the wake of LTCM's near collapse conducted by foreign financial regulators. See, e.g., *Review of issues relating to Highly Leveraged Institutions (HLIs)*, Basel Committee on Banking Supervision and International Organization of Securities Commissions (Mar. 2001).

Appendix H- Glossary

Table of Contents

10b-10 SEC Rule requiring written confirmations for securities transactions. Equivalent to FDIC Part 344.

12b-1 SEC Rule permitting mutual funds to use a portion of the mutual fund's assets for promotional expenses. The fund must be specifically registered as 12b-1 fund and disclose the existence and amount of such charges against the fund.

13d SEC Rule requiring a filing by any person acquiring a direct or indirect 5% interest in a registered stock.

13f-1 SEC Rule requiring quarterly Form 13F reports by institutions holding more than $100 million in discretionary equities.

13g SEC Rule requiring an annual filing by persons holding a direct or indirect 5% interest in a registered stock for passive investment purposes.

17f-1 SEC Rule covering lost, stolen, counterfeit and missing securities certificates, and requiring banks and transfer agents to register with the Securities Information Center.

114 Form 114 was an old designation for the Statement of Principles of Trust Department Management.

156 SEC Rule governing mutual fund advertising and sales literature, and prohibiting false and misleading materials.

401(a) Plan A savings plan in which contributions are made in after tax dollars.

401(h) Account A separate account of a pension plan that, under Section 401(h) of the Internal Revenue Code, may be used to fund medical benefits for retirees and dependents.

401(h) Plan An employee benefit that provides, through a pension or annuity plan, for the payment of benefits for sickness, accident, hospitalization and medical expenses for retirees, their spouses and dependents, subject to certain restrictions.

401(k) Plan A defined contribution plan established by an employer which enables employees to make pretax contributions by salary reductions structured within the format of a cash or deferred plan.

403(b) Annuity An annuity that provides retirement income for employees of certain tax-exempt organizations or public schools. Also known as a tax-sheltered annuity.

403(b) Plan A defined contribution employee benefit plan established by certain tax-exempt organizations (such as charities) and public schools for their employees. Similar to a 401(k) plan.

457 Plan A deferred compensation plan for employees of state and local governments. Named after the governing section of the Internal Revenue Code, a portion of their income may be deferred and is not taxable until a distribution is made.

501(c)(9) Trust (1) Used by employers and jointly administered welfare funds to provide group employee benefits of the following types: medical, disability, term life insurance, severance compensation, vacation benefits, recreational facilities and unemployment compensation. These trusts are governed by

Section 501(c)(9) of the Internal Revenue Code. (2) A type of self-insured or self-funded plan that is a tax exempt trust. Under its terms, both employer and employee contributions are paid into the fund, with claims and expenses paid out of it. Excess funds are invested as reserves by the fund's trustees. In a tax-qualified fund, the employer's deductions are immediately deductible, the trust's investment income is tax exempt, and employee contributions are not currently taxed. See also VEBAs.

Abatement The reduction of a gift under a will because of insufficiency of assets to satisfy the gifts after the legal obligations of the estate (debts, taxes, charges, and claims) have been paid in full. The general rule is that all gifts of the same class shall abate proportionately, unless otherwise provided.

ACCELERATED DEATH BENEFIT (ADB) Provision in a life insurance policy that permits a terminally ill person get a percentage of the life insurance benefit from the life insurance company prior to death. See also Viatical Settlement.

Accounting (1) The record of an account showing the transactions therein. (2) The submission of such a record to the court or to the beneficiaries of a trust or estate by the fiduciary.

Active Trust A trust regarding which the trustee has some active duty to perform; opposed to bare, naked, or passive trust.

Actuary, Enrolled See Enrolled Actuary.

ADA Americans With Disabilities Act of 1990.

ADB See Accelerated Death Benefit.

Adequate Consideration (1) For a security with a generally recognized market value: (a) the price of the security on a national securities exchange, or (b) if not traded on a national securities exchange, a price not less favorable to the plan than the offering price for the security as established by current bid and asked prices quoted by persons independent of the issuer and of any party in interest; (2) for other assets, the fair market value of the asset as determined in good faith by a fiduciary.

Adjusted Gross Estate The value of an estate after all allowable deductions have reduced the gross estate, but before Federal estate taxes.

Ad Litem For the purpose of the suit.

Administrator An individual or a trust institution appointed by a court to settle the estate of a person who has died without leaving a valid will. If the individual appointed is a woman, she is known as an administratrix.

Administrator Ad Litem An administrator appointed by the court to supply a party to an action at law or in equity in which the decedent or his representative was, or is, a necessary party.

Administrator Cum Testamento Annexo (Administrator with the will annexed): An individual or a trust institution appointed by a court to settle the estate of a deceased person in accordance with the terms of his will when no executor has been named in the will or when the one named has failed to qualify.

Administrator Cum Testamento Annexo De Bonis Non (Administrator with the will annexed as to property not yet distributed): An individual or a trust institution appointed by a court to complete the settlement of the estate of a deceased person in accordance with the terms of his will when the executor or the administrator with the will annexed has failed to continue in office.

Administrator De Bonis Non (Administrator as to property not yet distributed): An individual or a trust institution appointed by a court to complete the settlement of the estate of a person who has died without leaving a valid will when the administrator originally appointed has failed to continue in office.

Administrator with the will annexed An individual or a trust institution appointed by a court to settle the estate of a deceased person in accordance with the terms of his will when no executor has been named in the will or when the one named has failed to qualify.

Administratrix See Administrator.

ADR See American Depository Receipt.

Advance See Overdraft.

Agency An account in which the title to the property constituting the agency does not pass to the trust institution but remains in the owner of the property, who is known as the principal, and in which the agent is charged with certain duties with respect to the property.

Agent A person who acts for another person by the latter's authority. The distinguishing characteristics of an agent are (1) that he acts on behalf and subject to the control of his principal, (2) that he does not have title to the property of his principal, and (3) that he owes the duty of obedience to his principal's orders.

Allocation (1) The crediting of a receipt in its entirety or the charging of a disbursement in its entirety to one account, as to the principal account or to the income account; to be distinguished from apportionment. (2) A process that determines the optimum distribution of funds among various types of assets that offer the highest probability of consistently achieving investment objectives within a given risk tolerance. The process often uses a computer model to aid in processing a myriad of data.

Allowance (1) The sum or sums awarded a fiduciary by a court as compensation for its services; to be distinguished from charge, commission, and fee. (2) See Widow's Allowance. (3) Waiver by a beneficiary or other interested party of certain actions performed by the fiduciary which might not conform with instrument terms, local statutes, prudent practices, etc.

Alpha A numerical investment measure sometimes used as a performance indicator or to aid in selection of securities. Alpha is the premium an investment would be expected to earn if the market rate of return were equal to the Treasury bill rate, e.g., a premium of zero for the market rate of return. A positive alpha indicates that you have earned on the average a premium above that expected for the level of market variability. A negative alpha indicates, on the average, a premium lower than that expected for the level of market variability. See also Beta.

AMBAC American Municipal Bond Assurance Corporation.

American Depository Receipts (ADR) American certificates issued by an approved New York bank or trust company against the original (foreign) shares with a European branch of the New York institution. These receipts facilitate the financing of foreign companies in the United States. As foreign shares are deposited abroad, the equivalent ADR's change hands, not the certificates. This eliminates the actual shipment of stock certificates between the U. S. and foreign countries.

American Option An option that can be exercised any time during an exercise period.

AmortizationWith respect to bonds purchased at a premium, the process by which a part of the income is set aside as received to reduce gradually the amount by which the cost of the bond exceeds its face value.

Ancillary Subordinate or auxiliary to something or someone else; used in such terms as ancillary administration, ancillary administrator, and ancillary guardian.

Annuity (1) A contract that provides an income for a specified period of time or for life; (2) the periodic payments provided under an annuity contract, (3) the specified monthly or periodic payment to a pensioner.

Annuity Certain A contract the provides an income for a specified number of years, regardless of life or death. If an annuitant dies, the beneficiary will receive payments for the remaining number of specified years. Also called period certain, term certain or dollar temporary annuity.

Annuity Contract A contract in which an insurance company unconditionally undertakes a legal obligation to provide specified pension benefits to specific individuals in return for a fixed fee or premium. An annuity contract is irrevocable and involves the transfer of significant risk from the employer to the insurance company. Also called allocated contracts.

Apportionment The division or distribution of a receipt or a disbursement of property between or among two or more accounts, as between principal and income; to be distinguished from allocation.

Approved List A list, statutory or otherwise, which contains the authorized investments that a fiduciary may acquire.

Arbitrage A technique employed to take advantage of price differences in separate markets. This is accomplished by purchasing in one market for immediate sale at a better price in another market. Such transactions may be executed in the same type or similar types of securities.

Assent Written agreement with or approval of actions of a fiduciary which have already taken place.

Assurance (1) A pledge or guaranty of performance or protection from loss. Generally, prohibited for banks to give such a surety or indemnification. (2) A Canadian and British term for insurance.

At-The-Money Option An option whose exercise price equals the spot price of the underlying instrument.

Attorney In Fact A person who, acting as agent, is given written authorization by another person to transact business for him out of court; to be distinguished from attorney at law. See also Power of Attorney.

Authentication Applied to bonds, the signing, by the trustee, of a certificate on a bond for the purpose of identifying it as being issued under a certain indenture, thus validating the bond.

Back End Load A sales charge due upon the sale, transfer or disposition of securities (usually mutual funds), partnership interests, annuities and life insurance.

Bankers Acceptance An irrevocable obligation of an issuing bank and the borrower whereby both are liable for payment. Used in domestic and international commerce to finance the shipment and storage of goods or to facilitate dollar exchanges with foreign banks. Bankers acceptances are issued in a wide variety of principal amounts. Maturities can be up to 180 days, but usually are for 30-60-90 days.

Bank Investment Certificate See BIC.

Basis In futures and forwards, the difference between a futures contract price for an item and the current spot price of the same item.

Basis Convergence In futures and forwards, the phenomenon where the market value of a futures contract approaches the spot price for the underlying item as the delivery date nears.

Basis Swap A variable-for-variable interest rate swap.

Beneficiary (1) The person for whose benefit a trust is created. (2) The person to whom the amount of an insurance policy or annuity is payable.

Bequeath To give personal property by will; to be distinguished from devise.

Bequest A gift of personal property by will; a legacy.

Best Execution The principal whereby a trust department has a duty to obtain the most favorable possible performance of securities purchases and sales. This is generally done through the selection of a broker for a particular transaction. Given the size and type of the transaction, its complexity and where it is traded, the most favorable mix of at least the following factors must be obtained: (1) most favorable price, (2) lowest commission or equivalent, (3) prompt and accurate execution of orders, (4) prompt and accurate confirmation of orders, (5) prompt and accurate delivery of securities or proceeds. A broker's special abilities, access to, or knowledge of a particular type of investment or transaction could also impact on best execution.

Beta A numerical investment measure sometimes used as a performance indicator or to aid in selection of securities. Beta measures market sensitivity: the extent to which a portfolio fluctuates with the market as represented by the S&P 500. Beta is calculated by measuring the sensitivity of a fund's portfolio to market patterns. It is a statistical estimate of the average change in a fund's rate of return corresponding to a one percent change in the market. An investment with a Beta of 1 matched the market; a beta of 1.1 indicates 10% better performance than the market in up markets, 10% worse in down markets. See also **Alpha**.

BIC A "BIC" is a bank investment certificate. This is a large certificate of deposit sold to institutional investors, such as employee benefit plans. There is a facts-and-circumstances test as to whether FDIC insurance covers the instrument; if so, the first $100,000 of the BIC is insured by FDIC, and pass-through deposit insurance coverage may also apply. A BIC is the deposit industry's equivalent of a "GIC". See

also "GIC", "Bullets", and "Windows".

Bid/Ask Spread – The difference between the quoted bid (broker will buys stock) and the quoted ask or offer (broker will sell a stock).

Bifurcation The separation of gains and losses on investment transactions involving foreign currencies. For instance, the amount of profit attributable to the increase in the price of a German stock on the Frankfurt DAX Stock Exchange, as opposed to the amount of profit attributable to the change in the Deutsche Mark versus the dollar. Important for provisions of IRS Code 988.

Blackout Period Any period of more than 3 consecutive business days during which the ability of not fewer than 50 percent of the participants or beneficiaries under all individual account plans maintained by the issuer to purchase, sell, or otherwise acquire or transfer an interest in any plan is temporarily suspended by the issuer or by a fiduciary of the plan.

Blue Sky Laws State securities laws that attempt to ensure that the terms of securities offerings are fair, just and equitable and meet minimum standards of quality. Generally, certain information must be filed with a state's securities regulator before the security can be offered for sale within the state.

Bond Anticipation Note Short-term notes sold in anticipation of a bond issue and retired with the proceeds from the sale of the bonds.

Bond Power A form of assignment executed by the owner of registered bonds which contains an irrevocable appointment of an attorney in fact to make the actual transfer on the books of the corporation.

Breach of Trust Violation of a duty of a trustee to a beneficiary.

Bullet A term used with BIC's and GIC's when a lump sum of money is invested at a fixed interest rate, and repaid at maturity. Interest may be compounded or paid out periodically.

Cafetaria Plan An approach to offering health benefits to employees where the employee may select which benefits, and how much coverage within a type of benefit, they elect to have. Such plans enable employees to tailor benefits coverage to their own situation. Some plans require a common core of benefits. Sometimes, employee contributions are permitted for additional coverage. Also known as Flexible Benefit Plans and Flexible Compensation.

Callable A bond issue, all of part of which may be redeemed ("called") by the issuer prior to maturity. Specific terms in the bond indenture ensure that the bonds may not be called prior to the call date(s). Call provisions in the indenture also set the price at which the bond may be called; to compensate for this privilege, a price above par is usually paid.

Call Option Option to buy shares of a certain stock within a given period of time at a specific price fixed in the contract.

Cap An option contract that protects the holder from a rise in interest rates or some other underlying index beyond a certain point.

Cash Balance Plansa defined benefit plan which defines benefits in terms of a stated "account balance," as opposed to a specific monthly benefit for life under traditional defined benefit pension plans. In this type of plan, employers credit a participant’s account each year with a "pay credit" (typically based on a percentage of compensation) plus an "interest credit" (either a fixed rate, or a rate which is linked to an index, such as the one year treasury bill rate). When a participant retires under a cash balance plan, he or she is entitled to the balance of his or her vested benefit (similar to a defined contribution plan), which may be taken as an annuity or in a lump sum. This is opposed to retirements under traditional defined benefit pension plans, where retirees are entitled to lifetime monthly annuities based upon years of service and pay.

Cash Equivalents Short-term investments held in lieu of cash and readily converted into cash within a short time-span (i.e. Certificates of Deposit, commercial paper, Treasury bills, etc.).

Cede and Company The name of the nominee partnership for securities held at Depository Trust Company, New York.

Cemetry Trust A trust which has as its purpose the upkeep of a grave, burial plot, or cemetery.

Cesop (Tax) Credit ESOP.

Cestui Que Trust (plural, cestuis que trust) A person for whose benefit a trust is created; a beneficiary.

Charge The price fixed or demanded by a trust institution for service; compensation which a trust institution has a legal right to fix (in the form of either a commission of a fee), in contrast to an allowance which is granted by a court. See also Allowance, Commission, and Fee.

Chesop Charity ESOP.

Chinese Wall A policy barrier between the trust department and the rest of the bank designed to stop the flow of non-public information for the purpose of preventing use by the trust department of any material inside information, which may come into the possession of other bank departments, in making investment decisions.

CIF See Collective Investment Fund.

Clifford Trust See Short-Term Trust.

Cliff Vesting Full (100%) vesting after ***x*** years of service. Benefits must be 100% vested after not more than 5 years of service, except in collectively bargained plans, where the maximum period is 10 years.

Closed End Mutual Fund A mutual fund which is limited in the number of shares outstanding. The shares are traded on a securities exchange or the over-the-counter market. The value is determined by bid and asked prices in the open market.

COBRA The Consolidated Budget Reconciliation Act of 1985.

CODA Cash or Deferred Arrangements. A term associated with certain employee benefit plans where the employee is given a choice of receiving an employer contribution in cash or having it deferred under a plan and/or the choice of making his or her own contribution to the plan from before-tax income. Most CODA's are either cash or deferred profit sharing plans or thrift and savings plans.

Codicil An amendment or supplement to a will executed with all the formalities of the will itself.

Collar An upper and lower limit on the coupon of a floating rate note. The issuer pays a premium for the collar.

Collateral Heir A person not in the direct line of the decedent from whom he inherits real property, as, for example, a nephew of the decedent who receives a share of his uncle's estate.

Collective Investment Fund A pooled fund, operated by a bank or trust company in conformity with Section 9.18 of OCC Regulation 9 or Revenue Ruling 81-100, for investment of the assets of separate trust accounts.

Commercial Paper Negotiable, short-term, unsecured promissory notes issued in bearer form on a discount or coupon basis by a corporation to raise working capital, for up to 270 days term. A direct obligation of the issuer, it is sold in multiples of $25,000 and is rated by Standard & Poor's (A-1, A-2, and A-3) and Moody's (Prime 1, Prime 2, and Prime 3). Interest is paid at maturity. Payment is required in Federal Funds on settlement date (usually at the buyer's option) and payment is required by Federal Funds on the maturity at the issuer's bank. The principal types are Prime Finance Paper issued by sales finance companies and certain large bank holding companies, Prime Industrial Paper issued by leading industrial companies, and Finance Paper of less-than-prime quality. For Prime Finance Paper, investors may specify both the issue and maturity dates. For Prime Industrial Paper, only those maturities listed on the market are available.

Commission A percentage of the principal or of the income or of both which a fiduciary receives as compensation for its services; to be distinguished from allowance, charge, and fee.

Committee for incompetent An individual or a trust institution appointed by a court to care for the property or the person (or both) of an incompetent; similar to a guardian, conservator, or curator.

Common Law The legal system prevailing in the English-speaking countries - that is, the United States of American and the British Commonwealth of Nations. It originated in England and its form of development was different from that of Roman (civil) law. Compare Civil Law.

Common Trust Fund A fund maintained by a bank or a trust company exclusively for the collective investment and reinvestment of money contributed to the fund by the bank or trust company in its capacity as trustee, executor, administrator, or guardian and in conformity with the rules and regulations of the Comptroller of the Currency pertaining to the collective investment of trust funds by national banks, as well as with the statutes and regulations (if any) of the several states.

Community Property Property in which a husband and wife have each an undivided one-half interest by reason of their marital status; recognized in all civil law countries and in certain states of the Southwest and Pacific Coast area of the United States.

Compliance Risk The risk that non compliance with laws and regulations can lead to financial loss and/or damage to the institution's reputation.

Compound Option One type of option contract. It is an option, such as a put on a call, a call on a put, a put on a put, or a call on a call.

Conservator (1) Generally, an individual or a trust institution appointed by a court to care for property. (2) Specifically, an individual or a trust institution appointed by a court to care for and manage the property of an incompetent person, in the same way as a guardian cares for an manages the property of a minor.

Contingent Liability (1) For FDIC Trust Examinations: an estimate by the examiner of the gross possible liability of the institution resulting from the purchase of nonconforming investments for trust accounts, unwarranted retention of nonconforming assets, self-dealing, questionable practices and procedures, or other acts of omission or commission which appear not to comply with the terms of governing trust instruments or provisions of law and on which an accounting may be subject to objection by appropriate parties. Until appropriate consents, waivers or releases of liability are obtained from interested parties or nonliability is determined by a court of competent jurisdiction, the liabilities are regarded as "contingent." (2) A liability which is dependent upon certain events occurring before it becomes an active liability.

Contractual Derivative These investment instruments represent a one-of-a-kind arrangement between two parties and include swaps, floors, collars, and swaptions. They are not standardized contracts nor do they trade on a regulated exchange. While they offer enticing return potential, some carry high degrees of both market risk and income risk. Because they are not standardized or exchange traded, they are subject to valuation risk (the potential for inaccurate pricing) and liquidity risk (the potential that it cannot be sold at a reasonable price). See also Derivatives.

Conversion (1) In law, wrongful appropriation to one's own use of the property of another. (2) In equity, the change of property from one form to that of another (as from real property to personal property, or the reverse) which is considered to have taken place even though no actual exchange has been effected.

Corporate Depositary A trust institution serving as the depositary of funds or other property. See also Depositary, and Depository.

Corporate Fiduciary A trust institution serving in a fiduciary capacity, such as executor, administrator, trustee, or guardian.

Corporate Trust A trust created by a corporation, typical of which is a trust to secure a bond issue.

Corpus (Body) The principal or capital of an estate, as distinguished from the income.

Counterparty A principal party to a transaction, other than an intermediary. When looked at from the buyer's viewpoint, the seller is the counterparty and vice versa.

Court Account Accounts which require court accountings and approval in their normal conduct. Probate, guardianship, conservatorship, and testamentary trust accounts are the most common.

Covered Call A type of stock option in which a trust account sells to a third party the right (the option) to purchase a specific stock (the call) at a specific price until a specific expiration date. Possession of the stock by the trust account (covered) is the final element for a covered call option. It is different from a naked call option, in which the trust account does not own the stock.

Covered Put A type of option on an instrument or commodity in which the writer has a short position.

Credit Risk Credit risk is the possibility of loss due to a counterparty's or an issuer's default or inability to meet contractual payment terms. Default exposes the holder of the instrument to the cost of replacing the instrument under present market conditions. The amount of credit risk equals the replacement cost (also known as current exposure) of an identical instrument. The replacement cost is established by assessing the instrument's current market value rather than its value at its inception.

Crown Loan Refers to an interest-free or below-market-rate term or demand loan, viewed by the IRS as a taxable gift to the borrower. Name stems from the *L. Crown* case at the U.S. Court of Appeals for the Seventh Circuit [84-1 USTC]. Current precedent is Supreme Court case involving E.C. Dickman [84-1 USTC]. Refer to Section 7872 of the Internal Revenue Code and also to Revenue Procedure 86-46 (8-26-85), IR 85-86, and Announcement 85-132.

Crummey Trust A type of unfunded insurance trust. The trust acts as owner of a life insurance policy. The trust receives the donor's cash payments on a periodic basis, from which the beneficiary of the trust has a specified period to make a cash withdrawal. If this is not done, the cash paid by the donor is used to pay the premiums due on the life insurance policy. The IRS has ruled that such an arrangement represents a gift of present value interest has been made by the donor. Since it is a gift of present value, the donor may contribute up to $10,000 ($20,000 if two donors, such has husband and wife contribute) per year in premium payments and enjoy the gift tax exclusion. When the donor dies, the life insurance policy in the trust is effectively removed from the donor's estate.

Curator An individual or a trust institution appointed by a court to care for the property of a minor or an incompetent person. In some states a curator is essentially the same as a temporary administrator or a temporary guardian.

Currency Coupon Swap A variation of a currency swap in which one party's interest payments are variable-rate. Essentially a combination of a currency swap and an interest rate swap.

Currency Swap A swap contract in which two counterparties agree to exchange principal and interest denominated in different currencies based on an agreed-upon currency exchange rate.

Cusip Acronym for Committee on Uniform Security Identification Procedures. Standardized numbering system begun in 1968 for identifying individual issues of equity and debt securities in the United States and Canada to facilitate compatible automated processing by multiple organizations (banks, brokers, etc.). Not all issues meet the criteria for issuance of a CUSIP number. System operated by the CUSIP Service Bureau, a part of the Standard and Poor's Corporation. See also FINS.

Custody Account An agency account concerning which the main duties of the custodian (agent) are to keep safe and preserve the property and to perform ministerial acts with respect to the property as directed by the principal. The agent has no investment or managerial responsibilities. To be distinguished from managing agency account and safekeeping account.

Cy-Pres Doctrine Cy-pres means "as nearly as may be." The doctrine, applied in English and Scots law and in some of the states of the United States, that, where a testator or settlor make a gift to or for a charitable object that cannot be carried out to the letter, the court will direct that the gift will be made as nearly as possible, in its judgment, in conformity with the intention of the donor.

Daily Settlement In futures and forwards, the process where futures participants are charged for their losses or credited for their gains at the end of each trading day.

Debenture A general debt obligation backed only by the integrity and net worth of the issuer. An obligation that is not secured by a specific lien on property, as an unsecured note of a corporation.

Deed - A written instrument, signed, sealed, and delivered according to applicable law, containing some transfer, bargain, or contract with respect to property. The common term for an instrument transferring the ownership of property.

Deed of Trust - A sealed instrument in writing duly executed and delivered, conveying or transferring property to a trustee. This is usually real property.

DefaultWith regard to a bond or promissory note, the failure to make a payment either of principal or interest as or when due.

Defective Trust A trust designed that income taxes are paid outside of the trust by the grantor. The most commonly used provision allows the grantor the power to substitute property he or she owns for equally valued trust property.

Defeasement A type of municipal debt financing which enables the issuing government entity to reduce the amount of interest it pays on existing outstanding bonds. As an example, an entity that has high-rate outstanding bonds issues new debt at a lower rate. The proceeds are used to buy Treasuries, which pay enough interest to pay the interest on the old outstanding bonds. The Treasuries can be sold when the old bonds reach their call date, providing a source of funds to retire the old debt. The net effect is the government entity pays less on a current basis.

Deferred Payment Swap A swap that requires payments to be made at a later date than the date at which the payments are determined.

Defined Benefit Plan A pension plan which guarantees the payment of a specified benefit at retirement age and provides annual contributions equal to an actuarially determined amount sufficient to produce the specified benefit.

Defined Contribution Plan A pension plan which provides for an individual account for each participant and for benefits based upon the amount contributed to the participant's account including any income, expenses, gains, or losses. See also Individual Account Plan, Money Purchase Plans, Profit Sharing Plans, Target Plans, and Employee Stock Ownership Plans (ESOP's).

DEFRA Deficit Reduction Act of 1984. One part of this act was the Tax Reform Act of 1984. Another part was the Spending Reduction Act of 1984.

Depletion The consumption or exhaustion of wasting property - such as, royalties, patent rights, mines, oil and gas wells, quarries, timberlands, and other things that are consumed or worn out in the sing.

Deposit Administration Contract A funding contract with an insurance company in which an unallocated account is kept for active participants. Annuities are purchased for employees when they retire.

Depositary One who receives a deposit of money, securities, instruments, or other property; to be distinguished from depository, which is the place of deposit.

Depository A place where something is deposited, such as a safe deposit vault. See Securities Depository.

Derivative A financial contract whose value is designed to track the return on stocks, bonds, currencies, or some other benchmark. Generally, derivatives fall into two broad categories: forward-type contracts and option-type contracts. They may be traded on exchanges or traded privately. See also Contractual Derivatives, Security-Based Derivatives, and Synthetic Derivatives.

Determination Letter A letter issued by the District office of the Internal Revenue Service which states whether a plan meets the qualification requirements under the Internal Revenue Code. Requesting an IRS Determination Letter is not an IRS requirement and is optional with the plan sponsor.

Devise A gift of real property by will; to be distinguished from bequest.

Devisee A person to whom a devise is given.

Direct Heir A person in the direct line of ascent or descent of the decedent; as, father, mother, son, daughter.

Directed Trust One under which a trustee has less then full managerial authority because another party or parties has the power to control some of the trustee's actions. Normally, this involves the investments of an employee benefit plan. Often, this direction is provided by an outside investment manager, a "named fiduciary", or the individual participant.

Disbursement Money paid out in discharge of a debt or an expense; to be distinguished from distribution.

Disqualified Person Term defined in Section 4975(e)(2) of the Internal Revenue Code that is roughly equivalent to ERISA's *party in interest*, but also includes highly-compensated employees. See Party in

Interest.

Distribution The apportionment of personal property (or its proceeds) among those entitled to receive the property according to the applicable statute of distribution or under the terms of the will or trust agreement; to be distinguished from disbursement.

DOL Department of Labor.

Domicile The place which a person regards as his permanent home and principal establishment; the place to which, whenever he is absent, he has the intention of returning. A person's domicile may or may not be the same as his residence at a given time. See also Residence.

Donor One who makes a gift.

DTC Depository Trust Company, New York City. A noninsured limited-purpose state chartered trust company which is a member of the Federal Reserve System. Securities certificates belonging to a variety of financial institutions (banks, trust companies, broker-dealers, mutual funds, etc.) are kept at DTC, with transfers between "depositors" accomplished by bookkeeping entry. This greatly reduces the volume of physical transfers which must be made within the securities industry.

DRP Dividend Reinvestment Plan.

Duration A numerical measure of the price change of a bond due to a change in its yield to maturity. Duration summarizes the various characteristics that cause bond prices to fluctuate in response to interest rate changes. The lower the duration number, the less change that can be expected in a bond's price.

Education IRA is not a retirement arrangement. It is a trust or custodial account established for the purpose of paying "qualified higher education expenses" of the designated beneficiary at an "eligible educational institution." Up to $500 per year can be contributed to an Education IRA. Contributions to the IRA are taxable. Investments grow tax free until distributed. If withdrawals are less than the beneficiary's "qualified higher education expenses," the withdrawals are tax free. Any portion of a withdrawal that is greater than the beneficiary's educational expenses is taxable to the beneficiary.

Eleemosynary Pertaining or devoted to legal charity; as an eleemosynary institution.

Embedded Derivatives Derivatives that are part of another financial instrument. For example, a callable bond consists of the bond and a call option. The call option is the embedded derivative.

Employee Benefit Security Administration This office was formerly known as the Pension and Welfare Benefits Administration, PWBA, and is a part of the U. S. Department of Labor.

Employee Benefit Plan A plan established or maintained by an employer or employee organization, or both, for the purpose of providing employees a certain benefit, such as pension profit-sharing, stock bonus, thrift medical, sickness, accident, or disability benefits.

Employee Stock Ownership Plan An employee benefit account in which employees may become stockholders of the employer. These plans are qualified under the Internal Revenue Code and are not subject to the 10% ERISA limits on holdings of employer stock. Typically, an employer's contributions to an ESOP are used to purchase existing or new shares of the employer's stock, thus providing a means for the employer to raise new capital while, at the same time, getting a tax deduction for the annual contributions. When such purchases are from insiders, the IRS has special requirements concerning the valuation of the stock's price. Often, ESOP's involve borrowing funds by the ESOP with which to purchase employer stock; such plans are termed "leveraged" ESOP's. When speaking of the trust account, ESOP's are sometimes called ESOT's: Employee Stock Ownership Trusts. See also CESOP, CHESOP, PAYSOP, and TRASOP.

En Ventre Sa Mere "In mother's womb" - a child conceived but not yet born.

Enrolled Actuary A person who performs actuarial services for an employee benefit plan which is subject to ERISA and who is enrolled with the federal Joint Board for Enrolling Actuaries. ERISA plans may use only Enrolled Actuaries to perform services for the plan.

ERISA An acronym for the Employee Retirement Income Security Act of 1974 which set up federal minimum standards for employee benefit plans, including standards regulating the conduct of plan

fiduciaries and trustees. The Act also established an insurance program designed to guarantee workers receipt of pension benefits if their defined benefit pension plan should terminate.

ERTA Economic Recovery Tax Act of 1981. Expanded IRA and Keogh plan availability. Covered specific areas of employee compensation, including incentive stock options, deductible voluntary employee contributions, tax credit ESOP's, and withdrawal provisions in savings/thrift plans.

Escheat The reversion of property to the state (in the United States) in case there are no devisees, legatees, heirs, or next of kin; originally applicable only to real property but now applicable to all kinds of property.

Escrow Money, securities, instruments, or other property or evidences of property deposited by two or more persons with a third person, to be delivered on a certain contingency or on the happening of a certain event. The subject matter of the transaction (the money, securities, instruments, or other property) is the escrow; the terms upon which it is deposited with the third person constitute the escrow agreement; and the third person is termed the escrow agent.

Escrow Agent See Escrow.

ESOP See Employee Stock Ownership Plan.

ESOT See Employee Stock Ownership Plan **(Trust)**.

Estate (1) The right, title, or interest which a person has in any property; to be distinguished from the property itself, which is the subject matter of the interest. (2) The property of a decedent.

Estate Tax A tax imposed on a decedent's estate as such and not on the distributive shares of the estate or on the right to receive the shares; to be distinguished from an inheritance tax.

Estimated Loss For FDIC Trust Examinations: an estimate by the examiner of the amount of loss which appears certain to be sustained by the institution as a result of its fiduciary activities.

ETI Acronym used by the Labor Department in ERISA Interpretive Bulletin (IB) 94-1 for Economically Targeted Investment. See Social Investing.

Eurobond A bond denominated in U.S. dollars (or another currency) and sold to investors outside the country whose currency is used. An example might be a bond denominated in German Deutsche Mark but issued by a Dutch company and sold to Swiss investors.

Eurodollar Certificate of Deposit A certificate of deposit issued by banks outside the U.S., primarily in Europe, with interest and principal paid in dollars. Such CDs usually have minimum denominations of $100,000 and short-term maturities of less than two years. Interest rates are usually pegged to LIBOR.

European Option An option that can only be exercised on the expiration date.

Event of Default The non-occurrence or non-performance of something called for in a bond indenture. Examples of events of default are: (1) nonpayment of interest, (2) nonpayment of principal, (3) failure to make payments into a sinking fund, (4) filing of bankruptcy or reorganization, (5) nonpayment of a prior lien obligation, (6) failure to perform any obligation called for in the indenture (such as provide financial statements, insurance, proof of tax payments, etc.).

Excess Benefit Plan A non-qualified plan maintained by an employer solely for the purpose of providing benefits for certain employees in excess of those which, because of Internal Revenue Code limitations on contributions and benefits, can be provided by the employer's qualified plan.

Exculpatory Provision A provision in a will or trust instrument relieving or attempting to relieve an executor or trustee from liability for breach of trust; sometimes called an immunity provision.

Executor An individual or a trust institution nominated in a will and appointed by a court to settle the estate of the testator. If a woman, she is an executrix.

Executor De Bonis Non The individual or corporation named in the will to take over and complete the settlement of an estate in those cases in which the original executor, for one reason or another, has failed or been unable to do so. Unless the testator himself names such a successor executor, the court appoints an administrator de bonis non.

Executrix See Executor.

Exercise Period The period of time during which an option may be exercised.

Expiration Date The last day an option can be exercised.

Express Trust A trust stated orally or in writing, with the terms of the trust definitely prescribed; to be distinguished from a resulting trust and a constructive trust.

Family Incentive Trust– Twist on an irrevocable family trust. Assets enter the trust in the normal fashion. However, there is specific language as to how funds may be taken out of the trust. The purpose of the trust is to provide an incentive for the beneficiary to lead a productive life. The trusts also contain a safety-net so a beneficiary will not become destitute. Examples of what distribution provisions include are (1) Matching earnings dollar for dollar, (2) Paying a parent for staying home with the children, (3) Paying an amount for completing a higher education, and (4) Starting a new business.

FAS Financial Accounting Standard. Authoritative accounting pronouncement on handling different specific accounting situations. Issued by FASB.

FAS 87 Statement issued by FASB covering employer accounting for pensions.

FAS 106 Statement issued by FASB requiring employers to record on their balance sheets the future financial liability they incur by promising health benefits to retirees.

FASB Financial Accounting Standards Board. Non-governmental authority for establishing accounting standards in the United States.

Fee (1) Fixed amount which a trust institution receives as compensation for its services; to be distinguished from allowance, charge, and commission. (2) An estate of inheritance in real property, sometimes referred to as an estate in fee or fee simple estate.

Fee Simple An estate of inheritance without limitation to any particular class of heirs and with no restrictions upon alienation; sometimes known as fee simple absolute; the largest interest or estate in real property a person may own.

Fiduciary An individual or a trust institution charged with the duty of acting for the benefit of another party as to matters coming within the scope of the relationship between them. The relationship between a guardian and his ward, an agent and his principal, an attorney and his client, one partner and another partner, a trustee and a beneficiary, each is an example of fiduciary relationship, See also ERISA Section 3(21)(A).

FINS Acronym for Financial Industry Number Standard. Standardized numbering system for identifying individual institutions (brokers, banks, transfer agents) in the securities industry in the United States and Canada to facilitate compatible automated processing in multiple organizations. FINS Numbers issued by Depository Trust Company, New York City. See also CUSIP.

Fiscal Agent (1) An agent for a corporation to handle specified matters relating to taxes in connection with an issue of bonds. (2) An agent for a national, state, or municipal government or government body to pay its bonds and coupons or to perform certain other duties related to financial matters.

Flexible Benefit Plan/Flexible Compensation See Cafeteria Plan.

Flexible Spending Accounts or Arrangements Employee benefit which gives employees a choice between taxable cash and nontaxable compensation in the form of payment or reimbursement of eligible, tax-favored benefits. FSAs can be funded through salary reduction, employer contributions, or a combination of the two. Employees can purchase additional benefits, pay health insurance deductibles, and copayments, or pay for child care benefits with FSAs.

Floater A floating rate instrument that pays interest at a rate that adjusts periodically, relative to a spread over a specific benchmark or index.

Floor An option contract that protects the holder against a decline in interest rates or some other underlying below a certain point.

Form Adv Form used to apply for registration as an investment advisor or to amend a registration. It

consists of two parts. Part I contains general and personal information about the applicant. Part II contains information relating to the nature of the applicant’s business, including basic operations, services offered, fees charged, types of clients advised, educational and business backgrounds of associates and other business activities of the applicant.

Forward Contract A cash market transaction in which two parties agree to the purchase and sale of a commodity at some future time under such conditions as the two agree. In contrast to futures contracts, the terms of forward contracts are not standardized. A forward contract is not transferable and usually can be cancelled only with the consent of the other party, which often must be obtained for consideration and under penalty. Forward contracts are not traded in federally designated contract markets.

Forward-Start Swaps An agreement that includes a deferred start date before the swaps' interest payments are exchanged.

Fourth Market The trading of securities directly from one institutional investor to another without the services of a brokerage firm.

Fractional Share BequestA bequest of property, often made in connection with the establishment of a marital deduction trust, that is expressed in terms of a proportion of the assets involved rather than in terms of a specific dollar amount.

Freddie Mac Trade name for the Federal Home Loan Mortgage Corporation.

Front-End Receipt Swaps Also known as off-market swaps. A swap in which one party receives an amount equal to the present value of a future fixed rate swap payment now rather than at the respective periodic payment dates.

Front Running A practice where an investment manager purchases securities for his/her own personal interest prior to an anticipated purchase of the same securities by the accounts for which he/she acts as investment manager.

Funded Insurance Trust An insurance trust in which, in addition to life insurance policies, cash and securities have been placed in trust to provide sufficient income for the payment of premiums and other charges on or assessments against the insurance policies.

Futures Contract A transferable agreement to make or take delivery of standardized minimum quality grades, during a specific month, under terms and conditions established by a federally designated contract market upon which trading is conducted.

General Account An undivided fund maintained by an insurance company that commingles plan assets with other assets of the insurance company for investment purposes. Funds held by an insurance company that are not maintained in a *separate* account are in its *general* account.

General Obligation (GO) Bond A type of municipal bond that is backed by the full faith, credit and taxing power of the issuer for payment of interest and principal. Its sale finances public improvements. It is repaid by taxes.

General Partner A person who usually is actively engaged in the trade or business of the partnership and has unlimited personal liability in the partnership.

General Partnership A form of business whose partners include only general partners. Profits, losses and deductions are passed through to the individual partners involved in the business.

Generally Accepted Accounting Principles(GAAP) Uniform minimum standards of and guidelines to financial accounting and reporting, which govern the form and content of financial statements. GAAP encompass principles necessary to define accepted accounting practice at a particular time and include detailed procedures as well as broad guidelines.

Generation-Skipping Tax A tax imposed on any testamentary generation-skipping transfer, with the intention that this tax be substantially equal to the transfer tax which would have been payable if the property had actually been transferred outright to each generation.

Generation-Skipping Trust Any trust having beneficiaries who belong to two or more generations younger than the grantor.

GIC A "GIC" is a guaranteed investment contract, normally offered by insurance companies. It is similar to a financial institution's certificate of deposit in that it provides a guaranteed rate of return over a specified period. GIC's are normally used by institutional investors, such as employee benefit plans. GIC's are dependent upon the financial soundness of the issuing insurance company for their repayment. See also "BIC", "SLIC", "Synthetic GIC", "Bullets", and "Windows".

Gift Causa Mortis A gift of personal property made by a person in expectation of death, completed by actual delivery of the property, and effective only if the donor dies; to be distinguished from gift inter vivos.

Gift Tax A tax imposed by the Federal Government since 1932 and by some states on transfers of property by gift during the donor's lifetime. Gifts, under this law, may include irrevocable living trusts.

Ginnie Mae Colloquial for Government National Mortgage Association.

Going Concern Value A valuation approach used by appraisers. It implies that a company is actively and profitably in business and, therefore, should be valued on that basis rather than on the liquidation of its assets.

Government National Mortgage Association (GNMA) A wholly-owned government corporation within the Department of Housing and Urban Development (HUD). Also known colloquially as Ginnie Mae.

Governmental Plan An employee benefit plan established or maintained by the employees of the U.S. government or any state or political subdivision thereof or by any agency or instrumentality of the foregoing.

Grantor A person who transfers property by deed or who grants property rights by means of a trust instrument or some other document. See also Settlor.

Grantor Trust For purposes of the income taxation of trusts and estates, a trust in which the grantor or a third party, because of certain rights to income or principal or certain power over the disposition of income and principal, is treated as the owner of the trust and taxed on the income thereof. Consequently, a grantor trust is not treated as a separate entity for income tax purposes.

GRIT Acronym for a grantor retained income trust, which is an irrevocable trust to which a residence is transferred for a term of years, with the grantor retaining the use of the residence for that term. At the end of the term, the residence becomes the property of the remainder beneficiary. The present value of the retained interest is not taxed for transfer tax purposes. The present value of the retained interest is the sum of: (1) the value of an income interest for the specified term, and (2) the present value of the contingent right to receive the value if the grantor dies during the specified term.

Guaranteed Investment Contract See "GIC"

Guardian An individual or a trust institution appointed by a court to care for the property or the person (or both) of a minor or an incompetent person. When the guardian's duties are limited to the property, he is known as a guardian of the property; when they are limited to the person, he is known as a guardian of the person; when they apply both to property and to the person, he is known merely as a guardian. In some states the term committee, conservator, curator, or tutor is used to designate one who performs substantially the same duties as those of a guardian.

Guardian Ad Litem A person appointed by a court to represent and defend a minor or an incompetent person in connection with court proceedings; sometimes called a special guardian.

Hard Dollars Goods or services purchased with cash are said to be purchased with "hard" dollars. Purchases made with brokerage commissions are said to be made with "soft" dollars.

Health Stock Ownership Plan (HSOP) Combination of an employee stock ownership plan (ESOP) and a 401(h) account. HSOPs allow the sponsor to provide for retiree medical benefits for its current employees without having to accrue such future liabilities currently for financial accounting purposes.

Hedging The temporary purchase and sale of a contract calling for future delivery of a specific quantity of a particular commodity at an agreed-upon price to offset a present (or anticipated) position in the cash market. An operation intended to protect against loss in another operation.

Heir A person who inherits real property; to be distinguished from next of kin and from distributee. An

heir of the body is an heir in the direct line of the decedent. A son, for example, is the heir of the body of his father or mother. See also Collateral Heir; Direct Heir; Next of Kin.

Hereditament Any kind of property that is capable of being inherited. If the property is visible and tangible, it is a corporeal hereditament; of it is not, it is an incorporeal hereditament -- for example, a right to rent or a promise to pay money.

HH Bonds Effective August 31, 2004. Series HH bonds are no longer offered. HH bonds issued prior to that date pay a fixed rate of interest based on market rates at the time of issuance. Interest is paid semi-annually and the bonds have a maturity of 20 years after date of issuance.

Highly Compensated Employee (HCE) Any employee who, during the current or preceding plan year: (1) owned more than 5% of the company; or (2) received more than $80,000 (indexed) in annual compensation, and was in the top 20% of employees ranked on the basis of annual compensation, under Section 414(q) of the IRC; or, (3) was an officer of the company earning more than the defined benefit limit under Section 415 of the IRC. Discrimination in favor of this group is prohibited. For 2005, highly compensated employees are those earning $95,000 or more.

Highly Compensated Individual For purposes of IRC § 105(h), (1) one of the five highest paid officers, (2) a 10% owner or (3) an employee who is among the highest 25% of all employees (other than the 10% owners who are not participants).

Highly Compensation Participant Under IRC § 125(e), an officer, a more-than-5% shareholder, a highly compensated employee, or a spouse or dependent of one of the former.

Holographic Will A will entirely in the handwriting of the testator.

Hours Worked Standard hours worked in a year is 2,080 (52 weeks x 40 hours per week).

HR 10 Plan See Keogh Plan.

HSOP See Health Stock Ownership Plan.

Hurdle Rate A minimum standard rate of return for acceptability as an investment.

Hybrid Pension Plan A qualified retirement plan that has characteristics typical of both defined benefit and defined contribution plans.

Immunization The design of a bond portfolio to achieve a target level of return in the face of changing reinvestment rates and price levels. It is the combining of short- and long-term bonds in the same portfolio to produce a predictable rate of return regardless of movements in interest rates.

Income The return from property, such as rent, interest, dividends, profits, and royalties; opposed to principal or capital.

Income Beneficiary The beneficiary of a trust who is entitled to receive the income from it.

Incorporeal Hereditament See Hereditament.

Indemnity Protection or exemption from loss or damage.

Indenture (1) A mutual agreement in writing between or among two or more parties whereof usually each party has a counterpart or duplicate; originally so called because the parts were indented by a notched cut or line so that the two parts could be fitted together. (2) A legal document prepared in connection with a bond issue describing the terms of the issue, such as a security, maturity date, interest rate, and remedies in case of default.

Index Amortizing Swaps Swaps that operate as basic swaps for an initial period, after which time the notional principal balance is amortized or extended based on a schedule linked to interest rate changes or some other index during the interim period.

Index Fund A collective investment fund or common trust fund which is composed of securities which are intended to duplicate the returns of a designated securities index, such as the Standard & Poor's 500 stock index. Not all of the securities which make up the designated index need to be in an index fund.

Individual Account Plan A defined contribution plan that allows participants to choose, from a broad

range of investment options, how their own accounts will be invested. See also Defined Contributions Plan and Money Purchase Plan.

Individual Retirement Account (IRA) A retirement savings program for individuals to which yearly tax deductible contributions up to a specified limit can be made. The amounts contributed are not taxed until withdrawal. Withdrawal is not permitted, without penalty, until the individual reaches age 59 1/2.

Infant A person not of legal age, which at common law was 21 years but which in some states has been changed by statue; the same as a minor.

Inheritance Tax A tax on the right to receive property by inheritance; to be distinguished from an estate tax.

Initial Margin In futures and forwards, the amount of cash that must be deposited with a broker when a futures position is initiated.

Initial Public Offering (IPO) The original sale of a company's securities to the public.

In-Kind Transfer - A distribution of property (e.g., stock, bond, partnership, etc.) from a trust or estate other than in cash. Noncash contributions to a trust or estate are also "in-kind" transfers.

Insurance Guaranty Fund A fund maintained by a state guaranty association which pay claims of insolvent insurance companies. The fund is financed by contributions from insurance companies.

Insurance Trust A trust composed partly or wholly of life insurance policy contracts.

Insured Pension Plans Retirement and other employee benefit plans the source of the benefits of which is life insurance paid for wholly or partially by the employer.

Inter-Account Transaction Transactions in which a trust department sells assets directly from one account to another, bypassing a non-affiliated third party broker. This form of transaction should be permissible under local law and the governing instrument, and it should be covered by written policy. Fiduciaries engaging in this type of activity place themselves in an onerous conflict of interest position. They must be capable of demonstrating to each party to the transaction that it simultaneously sold an asset at the highest fair market value, and purchased it at the lowest fair market value. Generally, management should be cautioned against engaging in these transactions.

Interest Assumption The expected rate of investment return on a plan's assets. It includes interest on debt securities, dividends on equity securities, rentals on real estate, and gains or losses on fund investments.

Interest Rate Futures A transferable agreement to make or take delivery of a fixed income security at a specific time, under terms and conditions established by the federally designated market upon which futures trading is conducted.

Interest Rate Risk One of the three types of investment risk. When interest rates rise, the market value of fixed income contracts (such as bonds) declines. Similarly, when interest rates decline, the market value of fixed income contracts increases. Interest rate risk is the risk associated with these fluctuations. See also Credit Risk and Market Risk.

Internal Revenue Code (IRC) This is the basic federal tax law.

Inter Vivos Between living persons.

Inter Vivos Trust A trust created during the settlor's lifetime; the same as a living trust; to be distinguished from trust under will or testamentary trust.

Intestacy The condition resulting from a person's dying without leaving a valid will.

Intestate (Adjective): (1) Without having made and left a valid will. (2) Not devised or bequeathed; not disposed of by will. (Noun): A person who dies intestate.

In The Money Option A call option whose exercise price is lower than the spot price of the underlying or a put option whose exercise price is greater than the spot price of the underlying instrument.

Intrinsic Value The value of an option were it to be exercised. Only in-the-money options have intrinsic

value.

Inverse Floater A floating rate instrument that adjusts inversely with changes in the benchmark index.

Investment Adviser A person who advises the public concerning the purchase or sale of securities. Such persons must generally register with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Effective May 12, 2001, there is no longer a unilateral exemption afforded to banks. However, banks will continue to be exempt provided that investment advisory services is only made available to individuals and those other than mutual funds. The category of other includes private equity issues and unregistered mutual funds.

Investment Advisor Agent An agency account in which the trust department provides investment recommendations on various types of assets, without actually having custody or safekeeping of those assets.

Investment Management Agent An agency account in which the trust department contracts to analyze and review the various assets, to make recommendations for changes in existing investments, and to make recommendations for new investments. The department also performs safekeeping and custodial functions for the assets of the account.

Investment Company Legal term for a mutual fund. The Investment Company Act of 1940 provides the framework for SEC regulatory authority over mutual fund operations.

Investment Powers The powers of a fiduciary regarding the investments in the account.

IO (Interest Only) The holder of this derivative instrument receives interest payments from a specific regular interest class or from a piece of the collateral. The holder receives no interest payments.

IPO See Initial Public Offering.

IRA See Individual Retirement Account.

IRC Internal Revenue Code. This is the basic federal tax law.

Irrevocable Trust A trust which by its terms (1) cannot be revoked by the settlor or (2) can be terminated by him only with the consent of someone who has an adverse interest in the trust -- that is, someone to whose interest it would be for the trust not to be terminated, such as a beneficiary; to be distinguished from a revocable trust with consented approval.

ISN A securities identification numbering system similar to CUSIP but used in some countries outside the United States.

Issue All persons who have descended from a common ancestor; a broader term than children.

Item A Registered Transfer Agent term defined in SEC Rule 17Ad-1(a)(1), as follows: (i) A certificate or certificates of the same issue of securities covered by one ticket (or, if there is no ticket, presented by one presentor) presented for transfer, or an instruction to a transfer agent which holds securities registered in the name of the presentor to transfer or to make available all or a portion of those securities; (ii) Each line on a "deposit shipment control list" or a "withdrawal shipment control list"; or (iii) In the case of an outside registrar, each certificate to be countersigned.

Joint and Several Liability Used when compensation for liability may be obtained from one or more parties either individually or jointly, whichever may be most advantageous. Example: Partners are responsible for their own and other partners' actions.

Joint and Survivor Annuity A contract that provides income periodically during the longer lifetime of two persons. The benefit amount may be adjusted to account for the extended life expectancy of the couple, and the benefit amount may decrease when one or the other dies. The contingent annuitant is usually the spouse.

Joint Tenancy The holding of property by two or more persons in such a manner that, upon the death of one joint owner, the survivor or survivors take the entire property; to be distinguished from tenancy in common and tenancy by the entirety.

Junk Bonds Bonds that are issued by organizations which often are encountering financial setbacks. A

junk bond may be issued as a low quality security, or its issuer may encounter setbacks so that a quality bond is reduced to junk level. They offer high interest and high risk. Assurance of interest and principal payments in the future is limited; repayment often depends on asset sales rather than the ongoing profitability of the business. Junk bonds are often issued in conjunction with takeovers, leveraged buyouts and restructurings.

KEOGH Plan A retirement plan for self-employed persons and their employees to which yearly tax deductible contributions up to a specified limit can be made, if the plan meets certain requirements of the Internal Revenue Code.

KSOP 401(k) Employee Stock Ownership Plan.

Laches Neglect to do a thing at the proper time; such as undue delay in asserting a right or asking for a privilege.

Land Trust An unincorporated association for holding real property by putting the title in one or more trustees for the benefit of the members whose interests are evidenced by land-trust certificates. In general terms, it is a trust created to effectuate a real estate ownership relationship in which the trustee holds legal and equitable title to the property subject to the provisions of a trust agreement setting out the rights of the beneficiaries whose interests in the trust are declared to be personal property.

Last Will and Testament A legally enforceable declaration of a person's wishes regarding matters to be attended to after his death and not operative until his death; usually but not always relating to property; revocable (or amendable by means of a codicil) up to the time of his death or loss of mental capacity to make a valid will. Originally, "will" related to real property; "testament", to personal property; but at the present time, "will" is equally applicable to real and personal property.

Legacy A gift of personal property by will; the same as a bequest. A person receiving such a gift is called a legatee.

Legal Common Trust Fund A common trust fund invested wholly in property that is legal for the investment of trust funds in the state in which the common trust is being administered. The term is employed most often in or with respect to common trust funds in states that have a statutory or court-approved list of authorized investments for trustees where the terms of the trust do not provide otherwise.

Legal Investment An investment that conforms to the requirements of the statutes. A term used principally with reference to investments by trustees and other fiduciaries and by savings banks; often abbreviated to "legals"; to be distinguished from an authorized investment.

Legal List A list of securities legal for fiduciary investments, as compiled and promulgated by a state agency (such as the state banking department) for the use and guidance of fiduciaries, lawyers, trustees, savings banks. Used infrequently now, as most states have adopted either the Prudent Man or Prudent Investor Rules.

Legatee See Legacy.

Letter of Attorney- A written instrument which evidences the authority of an agent who is known as an attorney-in-fact.

Letters of Administration A certificate of authority to settle a particular estate issued to an administrator by the appointing court; to be distinguished from letters testamentary.

Letters of Conservatorship A certificate of authority issued by the court to an individual or corporate fiduciary to serve as conservator of the property of a person; corresponds with letters of guardianship.

Letter Ruling A private ruling issued by the IRS in response to a request from a taxpayer about the tax consequences of a proposed or completed transaction. Private letter rulings are not considered to be precedents for use by taxpayers other than the one who requested the ruling, but they do give an indication of the current IRS attitude towards the transaction in question.

Letters Testamentary A certificate of authority to settle a particular estate issued by the appointing court to the executor named in the will; to be distinguished from letters of administration.

Leveraged Buyout The purchase of assets or stock of a privately owned company, a public company, or a subsidiary thereof, in which the acquirer uses a significant amount of debt and very little (or no)

capital. This is accomplished primarily by utilizing the purchased assets for collateral and the acquired earnings stream to amortize the debt.

Leveraged ESOP An employee stock ownership plan (ESOP) in which money is borrowed by the ESOP trust for the purpose of buying stock of the employer. The stock is normally held as security by the lender and is released for allocation to participant accounts as the loan is paid off.

LIBOR London InterBank Offered Rate (of interest).

Life Beneficiary The beneficiary of a trust usually for the term of his own life, but it may be for the life of some other person.

Life Estate Either an estate for the life of the life tenant alone or an estate for the life or lives of some other person or persons. If the estate is for the life of a person other than the life tenant, it is known as an estate pour autre vie.

Life Insurance Trust See Insurance Trust.

Life Interest The estate or interest that a person has in property that will endure only during his own or someone else's lifetime.

Limit Order – An order to buy or sell a stock but only at a specific price or better. It allows the individual initiating the trade to set a ceiling on the purchase price they are willing to pay and a floor on the sales price they are willing to accept.. However, because of the limits the trade is not always executed.

Listed Stock The stock of a company that is traded on a recognized securities exchange. The various stock exchanges have different standards for listings. The New York Stock Exchange, for instance, includes national interest in the company, at least 1 million shares publicly held by at least 2,000 round lot shareholders, $16 million in market value, more than $2.5 million pre-tax income in the most recent year, and $2 million in pre-tax income in each of the preceding two years.

Lives in Being Lives in existence at a given time. See Rule Against Perpetuities.

Living Trust A trust that becomes operative during the lifetime of the settlor; opposed to a trust under will. The same as an inter vivos trust.

Living Will A document that allows a person to state in advance his/her wishes regarding the use or removal of life-sustaining or death-delaying procedures in the event of illness or injury.

Load A sales charge paid when purchasing or selling mutual fund shares. A "front end" load is assessed when money is initially invested. A "back end" load is assessed when shares are sold or funds withdrawn, and may be levied as a percentage of the withdrawn amount or at a flat rate. Back end loads may also be known as a redemption or exit fee. Loads may also be charged when dividends are reinvested.

Lookback Option One type of an option contract which confers the retroactive right to buy a given financial instrument at its minimum price, or sell at its maximum price, during a specific "lookback" period.

Lump Sum Distribution With respect to pension plans, the distribution of an individual's benefits in the form of one payment rather than in equal installments over a specified period of time or the individual's lifetime. The Internal Revenue Code imposes certain requirements in order for the distribution to qualify for special tax treatment.

LUST Acronym for leaking underground storage tank. Covered by Recourse Conservation and Recovery Act (RCRA).

Maintenance Margin In futures and forwards, the level to which a margin account may fall before the holder of the contract is required to bring the balance back up to the initial margin level.

Managing Agency Accounts An agency account concerning which the agent has managerial duties and responsibilities appropriate to the kind of property and in conformity with the terms of the agency; to be distinguished from a safekeeping or custody account.

Marital Deduction The portion of a decedent's estate that may be given to the surviving wife or husband

without its becoming subject to the Federal estate tax levied against the decedent's estate; a term that came into general use under the Internal Revenue Act of 1954.

Market Order – An order to buy or sell shares at the prevailing market price. This type of order will always be complete. The individual initiating the purchase or sale has no control over the price, hence the name market.

MarketabilityThe degree of investment or speculative interest that underlies any security; the ease with which it can be sold. Synonymous with "saleability."

Market Maker A dealer that stands prepared to buy or sell at the bid and offer prices that it quotes. The market is maintained when the dealer continues to quote bids and offerings over a period of time. See also Specialist.

Market Risk One of three types of investment risk. Deals with the day-to-day fluctuations at which a security can be bought or sold. See also Interest Rate Risk and Credit Risk.

Massachusetts Rule A term frequently applied to a rule for the investment of trust funds enunciated by the Supreme Judicial Court of Massachusetts in 1830; now commonly referred to as the prudent man rule. See Prudent Man Rule.

Master-Feeder Mutual Fund A two-tiered mutual fund arrangement in which one or more mutual funds (the feeder funds) invest solely in the securities of another mutual fund (the master fund). Master-feeder funds are authorized, without prior SEC approval, under SEC Rule 18f-3. A multiple-class fund is different from a multiple-class mutual fund.

Master Plan A defined benefit or defined contribution employee benefit plan that has been prepared by a sponsoring organization and provides a single trust account in which all adopting employers must invest their plan contributions; the sponsoring organization must have the plan approved by the Internal Revenue Service. See also Prototype Plan.

Master Trust An arrangement designating the custodianship and accounting for all employee benefit assets of a corporation or a controlled group of corporations to a single trustee, facilitating uniform administration of the assets of multiple plans and multiple investment managers.

Material Information Anything of material fact that could affect an investor's decision to buy a certain security.

Matched Swap An interest rate swap in which an asset or liability of the counterparty has interest payment terms similar to those of the swap.

MBIA Municipal Bond Insurance Association.

MEWA A Multiple Employer Welfare Arrangement. A means whereby small employers can pool contributions to purchase health insurance at a lower cost. Suppliers of MEWA's may offer insurance-like products, but normally are not insurance companies. These suppliers generally are not subject to state insurance regulation or reserve requirements.

Mezzanine FinancingG Use of preferred stock or convertible subordinated debentures to finance a takeover. This type of financing expands the resulting company's equity capital instead of its debt.

MGIC Mortgage Guaranty Insurance Corporation.

Modern Portfolio Theory The theoretical constructs that enable investment managers to classify, estimate and control the sources of risk and return. In popular terms, the term is applied to modern investment and portfolio theory. Refer to Appendix C, Uniform Prudent Investor Act for additional discussion.

Money Market Instruments Fixed income securities that mature in less than one year. Also known as cash equivalents since their marketability and characteristics provide easy liquidity. Included are U.S. government securities, negotiable certificates of deposit, commercial paper, STIF accounts, bankers acceptances and mutual funds.

Money Purchase Plan The basic type of a defined contribution employee benefit plan. The employer or plan sponsor's contribution to the plan is specified for each employee in terms of a flat dollar amount

($100 per month of employment), or in terms of a percentage (10% of compensation), or on the basis of a point system. Unlike a profit sharing plan, forfeitures are not added to participants' accounts; they are used to reduce employer contributions. See also Individual Account Plan.

Mortgage Banker An organization that originates mortgages and then sells them to investors, usually retaining servicing rights. Income is derived from origination and servicing fees. Funding for the mortgages is usually from borrowings, which are paid off when the loan is sold.

Mortgage Pass-Through Securities A security consisting of a pool of residential mortgages, with monthly distribution of 100% of the interest and principal to the investor. There are both government (Freddie Mac and Ginnie Mae) and commercial versions of these instruments.

MPPAA Multiemployer Pension Plan Amendments Act of 1980

Multi-Employer Plan For purposes of ERISA, a pension plan maintained pursuant to one or more collective bargaining agreements to which more than one employer is required to contribute.

Multiple-Class Mutual Fund A mutual fund which has multiple classes of shares. Each class participates in the same portfolio of investments and is identical to other classes of shares except that each class has different sales charges and/or other expenses. In some cases, there may also be a difference in the services rendered to different classes of the fund. Multiple-class funds are authorized, without prior SEC approval, under SEC Rule 18f-3. A multiple-class fund is different from a master-feeder mutual fund.

Multiple Employer Welfare Arrangement (MEWA) See MEWA.

Municipal Bonds Debt issues of state and local governments, and their agencies. In general, interest paid on municipal bonds is exempt from federal income taxes and from state and local income taxes within the state of issue.

Negligence Failure, through omission or commission, to act as an ordinary, reasonable and prudent person would act. Consideration must be given to the particular situation, circumstances involved, and knowledge of the parties.

Next of Kin The person or persons in the nearest degree of blood relationship to the decedent. As the term is usually employed, those entitled by law to the personal property of a person who has died without leaving a valid will (such persons do not include the surviving spouse and wife except where specifically so provided by statute); to be distinguished from the heirs, who take the real property.

Nominee The partnership in whose name registered securities are held. This facilitates the making of "good" delivery of securities to brokers at the time of sale or exchange. Nominee names are usually registered with the American Society of Corporate Secretaries, to preclude the possibility of more than one nominee with the same name.

Non Compos Mentis (Not of sound mind): A term that includes all forms of mental unsoundness.

Nonlegal Investment An investment that does not conform to the requirements of the statutes; a term used principally with references to trust investments; to be distinguished from unauthorized investment.

Notional Principal Amount In an interest rate swap, the contractual amount on which interest payments are calculated.

Nuncupative Will An oral will made by a person on his deathbed or by one who is conscious of the possibility of meeting death in the near future -- as by a person in active military service. It is declared in the presence of at least two witnesses and later reduced to writing by someone other than the testator and offered for probate in the manner prescribed by statute.

OBRA Omnibus Budget Reconciliation Acts of 1986, 1987, 1988 and 1989. OBRA 1989 partially repealed the interest exclusion on ESOP loans, provided Labor Department civil money penalties for fiduciary violations, and created a tax penalty for overstatement of pension liabilities in determining deductibility.

OCC Office of the Comptroller of the Currency.

Off-Market Swaps See Front-end receipt swaps.

Open End Mutual Funds These funds issue shares to investors continuously and stand ready to repurchase them at any time based on Net Asset Value. Both load and no-load funds are included.

Operating (Transactional) Risk The possibility that inadequate internal controls or procedures, human error, system failure or fraud can cause loss.

Optimization The process of selecting a securities portfolio that minimizes risk for a given level of risk. An example would be an aim that a portfolio have no more than 5% of its value in a single stock and/or that the current yield be at least 4%. Optimization includes expected return, variances of expected return, and covariance of return with every other security under consideration.

Option A contract for which the buyer pays a fee in exchange for the right, but not the obligation, to buy or sell, a fixed amount of a given financial instrument at a set price within a specified time. Options are considered a type of "price insurance" because they protect buyers from adverse swings in the price of the underlying asset. The buyer can never lose more than the price paid for the option, but the seller's losses are potentially unlimited. See also Call Option, Compound Option, Lookback Option, and Put Option.

Optionee Buyer of the option. The person who received an option on property.

Optioner Seller of the option. The person who gives an option on his/her property.

Option Overriding A type of options management where an options manager writes options on stocks managed by another manager. The goal is to provide an incremental return to the equity portfolio without interfering with the equity manager.

Option Premiums The dollar amounts paid to the writer for the option. The amount is determine generally by supply and demand, duration of the contract and difference between the fluctuations, among various considerations.

Order Flow Practice whereby securities brokers agree to receive cash payments in exchange for routine customer orders to specific dealers for execution.

Ordinary Care Generally considered to be the prudent man standard, subject to the facts and circumstances of a particular case.

Out of the Money An option whose exercise price is above the stock's current price.

Overdraft- The amount by which a debit or charge against an account exceeds the balance of the trust account.

PAC (Planned Amortization Class) A type of derivative instrument with scheduled payments over a range of prepayment speeds (PAC bands or ranges).

Parol Evidence (Pronounced *payroll*) Legal proof based on oral statements; with regard to a document, any evidence extrinsic to the document itself.

Participant An employee or former employee who is (or may become) eligible to receive a benefit of any type from an employee benefit plan. Also includes eligible beneficiaries.

Party In Interest A person or other entity which has control or close affinity to an employee benefit plan; an "insider". Defined by Section 3(14) of ERISA to include fiduciaries, trustees, and custodians, the plan administrator, the plan sponsor (employer and/or union), those who control 50% or more of these insiders, 10% or more stockholders of these insiders. Also covered are the outside interests of such insiders. Certain relatives of insiders are also included. See also Disqualified Person.

Paying Agent An agent to receive funds from an obligor to pay maturing bonds and coupons, or from a corporation for the payment of dividends.

PAYSOP An ESOP eligible for tax credits based on employee payroll. PAYSOP's replaced TRASOP's in 1983. The tax credits were repealed by the Tax Reform Act of 1986. See also Employee Stock Ownership Plan.

PBGC See Pension Benefit Guaranty Corporation.

Pecuniary Bequest A bequest of property, often made in connection with the establishment of a marital deduction trust, that is expressed in terms of a specific dollar amount rather than in terms of a proportion of the assets involved.

Pennsylvania Rule A rule that requires credit of extraordinary dividends received in trust on the basis of the source of such dividends; to income if declared from earnings of the corporation during the life of the trust, and to principal if from earnings accumulated before commencement of the trust.

Pension Benefit Guaranty Corporation (PBGC) Congressionally-chartered corporation responsible for guaranteeing private defined benefit pension plans. Membership in PBGC is mandatory for all such plans. If a covered plan terminates, retirees and beneficiaries are entitled to the benefit calculated under the plan (subject to certain phase-in rules for new plans to preclude abuse), up to a maximum monthly benefit payment. The maximum monthly payment is based on the year a plan terminated and was set in 1974 at $750 per month, indexed for inflation. Plans terminating in 2004 have a maximum monthly benefit of $3,698 or $44,386 per year for those who have attained age 65. The guarantee is increased for those over 65 and decreased for those under 65.

Pension Trust A trust established by an employer (commonly a corporation) to provide benefits for incapacitated, retired, or superannuated employees, with or without contributions by the employees.

PEPPRA Public Employee Pension Plan Reporting and Accountability Act.

Per Capita (By the head): A term used in the distribution of property; distribution to persons as individuals (per capita) and not as members of a family (per stirpes). For example, "I give my estate in equal shares to my son A and to my grandsons C, D, and E (the sons of my deceased son B) per capita". C, D, and E take as individuals (not as the sons of B), each taking the same share as A, namely, one-fourth of the estate.

Performance-Based Fees Investment management fees that are related to investment results, not to the size of the assets managed. Also known as incentive fees.

Person An individual, partnership, joint venture, corporation, mutual company, joint stock company, trust, estate, unincorporated organization, association or employee organization.

Personal Property All property other than real property.

Personal Representative A general term applicable to both executor and administrator.

Personalty Personal property.

Per Stirpes (*By the branch*): A term used in the distribution of property; distribution to persons as members of a family (per stirpes) and not as individuals (per capita). Two or more children of the same parent take per stirpes when together they take what the parent, if living, would take. For example, "I give my estate to my son A and to my grandsons C, D, and E (the sons of my deceased son B). My grandsons are to take per stirpes." C, D, and E take as the sons of B (not as individuals), each receiving one-sixth of the estate (one-third of the one-half to which B would be entitled if living), while A receives one-half of the estate. Taking per stirpes is also known as taking by right of representation.

Pink Sheets Quotation lists of various over-the-counter securities published daily on pink paper by the National Quotation Bureau, Inc.

Plain Vanilla Interest Rate Swap A single-currency swap agreement in which one counterparty agrees to pay a fixed rate of interest to the other counterparty in exchange for a variable rate of interest on a fixed notional principal amount over a specified period of time.

Plan Administrator See Administrator.

Plan Sponsor See Sponsor.

Plan Year The 12-month period on which employee benefit records are kept. Normally a fiscal year, but may be a calendar year.

PO (Principal Only) The holder of this instrument receives principal payments only and does not receive any interest. POs are offered at substantial discounts to their original principal amounts.

Point (1) *Bonds*: A point means 1%. Since bonds are quoted based on $1,000 face value, it also means $10. A bond that has increased by 3 points has gone up $3% or $30. (2) *Stocks*: A point means $1. If XYZ stock goes up 3 points, it has increased $3 per share. (3) *Mortgages*: A point is 1% of the principal amount of the mortgage. For Truth in Lending/Regulation Z purposes, a point is considered part of the Finance Charge disclosure and is included when calculating the APR.

Potential Loss For FDIC Trust Examinations: the examiner's estimate of the portion of a contingent liability which may develop into a loss to the institution. The amount of the loss indicated is potential rather than definite and fixed, pending settlement of the accounts. Also see Contingent Liability.

Pour-Over A term referring to the transfer of property from an estate or trust to another estate or trust upon the happening of an event as provided in the instrument.

Power of Attorney A document, witnessed and acknowledged, authorizing the person named therein to act as his agent, called attorney-in-fact, for the person signing the document. If the attorney-in-fact is authorized to act for his principal in all matters, he has a general power of attorney; if he has authority to do only certain specified things, he has a **special power of attorney**. If the authority granted in the power of attorney survives the disability of the principal, the attorney in fact has a **durable power of attorney**. If the authority granted in the power of attorney commences in the future only upon the occurrence of a specific event or contingency, the power of attorney is known as a **springing power.** A power of attorney can be limited to property concerns or to health care matters. See also Bond Power; Letter of Attorney; Stock Power.

Power of Retention Power expressed or implied in will or trust agreement permitting the trustee to retain certain or all of the investments comprising the trust property at inception, even though they may not be of a type suitable for new investments made by the trustee.

Precatory Words Expressions in a will praying or requesting (but not directing) that a thing be done or not done.

Preemptive Right A right accorded present shareholders, before any new shareholders, to subscribe to new shares in a company at a stipulated price on or before a fixed date. See also Rights.

Principal (1) One who employs an agent to act for him. (2) One who is primarily liable on an obligation. (3) The property of an estate other than the income from the property; the same as capital.

Private Foundations In general, all charitable foundations except those deriving substantial support from the public. They fall into two categories; private operating foundations, those where substantially all of the assets and income are used to carry on its exempt function, e.g., a museum; or private nonoperating foundations, which include most family foundations.

Private Placement The sale of stocks, bonds, or other investments directly to an institutional investor, such as an insurance company or employee benefit plan. This precludes SEC registration requirements and may provide the purchases with (for debt issues) a higher interest rate and a customized maturity.

Probate (Verb): To present a will to the court for appointment of the executor or administrator c.t.a., which is the first step in the settlement of an estate.

Probate Court The court that has jurisdiction with respect to wills and intestacies and sometimes guardianships and adoptions; also called court of probate, surrogate's court, ordinary court, orphan's court, and prefect's court.

Profit Sharing Plan A defined contribution employee benefit plan established by an employer (usually a corporation) as a means of having the employees share in the profits of the enterprise.

Prototype Plan A standardized plan, approved and qualified as to its concept by the Internal Revenue Service, that is made available by banks, insurance companies and mutual funds for the use of employers. See also Master Plan.

Prudent Investor Rule The latest development in evaluating fiduciary prudence. The current (1992) model uniform act differs from the traditional Prudent Man Rule in that it indicates that: (1) no asset is automatically imprudent, but must be suitable to the needs of the beneficiaries, (2) the entire portfolio is viewed when evaluating the prudence of a fiduciary, and (3) certain actions can be delegated to other agents and fiduciaries. ERISA [§ 404(a)(1)(C)] generally follows the approach of the Prudent Investor

Rule. The Uniform Prudent Investor Rule is found in Appendix C. Caution: review state statutes before applying to discretionary nonERISA trust accounts.

Prudent Man Rule A rule originally stated in 1830 by the Supreme Judicial Court of Massachusetts in Harvard College v. Amory [9 Pick. (Mass.) 446], that, in investing, all that can be required of a trustee is that he conduct himself faithfully and exercise a sound discretion and observe how men of prudence, discretion, and intelligence manage their own affairs not in regard to speculation, but in regard to the permanent disposition of their funds considering the probable income as well as the probable safety of the capital to be invested. The current (1959) model uniform rule categorizes certain types of assets as automatically imprudent, looks at each investment separately in determining prudence, and prohibits the delegation of responsibilities. Most states have adopted the Rule as a part of state fiduciary law, usually with certain different specifics from state to state. The Prudent Man Rule is found in Appendix C

Purchase-Money Mortgage A mortgage given by a purchaser of real property to the seller in part payment of the purchase price.

Put Option Option to sell shares of a particular stock within a given period of time at a specific price fixed in the contract.

PWBA Pension and Welfare Benefits Administration, U.S. Department of Labor. This agency is now known as the Employee Benefit Security Administration, EBSA.

QDRO (*Pronounced "Cue-Dro"*) Qualified Domestic Relations Order. Court order which may be issued upon a divorce, specifying a spouse's share in certain employee benefit plans. IRA's, 401(k) plans, and defined benefit pension plans are often covered by QDRO's.

QERP Acronym for Qualified Employee Real Property. Involves the investment of ERISA plan assets in real property leased to the plan sponsor or an affiliate thereof. See ERISA § 407(d)(4).

QPAM Qualified Professional Asset Manager. Term used in ERISA Prohibited Transaction Class Exemption (PTE) 84-14 for a bank, thrift, insurance company or registered investment adviser which meets certain minimum capital, net worth, or total managed assets thresholds.

QTIP Qualified Terminable Interest Property Trust. A type of personal trust which allows assets to be transferred between spouses. The grantor directs income from the assets to his/her spouse for life, but has the poser to distribute the trust's assets upon the death of the spouse. Such trusts qualify for the unlimited marital deduction if the spouse should die first. A QTIP trust is often used to provide for the welfare of a spouse while keeping the assets out of the estate of another (such as a future marriage partner) if the grantor dies first.

Qualified Domestic Relations Order See QDRO.

Qualified Plan or Trust An employer's trust or plan that qualifies under the Internal Revenue Code of 1954 for the exclusive benefit of his employees or their beneficiaries in such manner and form as to entitle the payments made by the employer to the plan or trust to the deductions and income tax benefits as set forth in the Code.

Rabbi Trust A form of employee benefit in which an employer establishes a trust to provide non-qualified deferred compensation to certain key employees. The trust usually contains restrictions on revocation and is subject to claims of general creditors of the employer. Employer contributions are not taxable as income to the employee at the time of contribution. Any income earned prior to distribution to the employee is taxed to the employer. The term "*rabbi*" arose because the first trust of this type approved by the Internal Revenue Service involved a rabbi.

Rabbicular Trust A form of employee benefit which attempts to combine the rabbi trust with a secular trust. The plan originates as a rabbi trust and remains such as long as the sponsor company remains financially healthy. If certain defined situations arise, the rabbi trust becomes a secular trust. The covered employee then must pay any applicable tax, but is assured of receiving what is held in the trust, instead of being just another unsecured creditor.

REA Retirement Equity Act of 1984. Provided for greater pension equity for female workers and surviving spouses.

Real Estate Investment Trust See REIT.

Reciprocal Trust A trust created by one person in consideration of the creation by the beneficiary of a similar trust for him.

Record Date The date on which a shareholder must be listed in a company's shareholder records in order to receive a declared dividend or vote on company matters.

Registrar (1) In connection with stock, the agent which affixes its signature to each stock certificate issued, the object being the prevention of over-issuance. (2) In connection with bonds, the agent which maintains the records of who owns an issue of registered bonds, similar to a transfer agent.

Regulation 9 A regulation issued by the Comptroller of the Currency under authority of Section 1(j) of the Act of September 28, 1962 [76 Stat. 668, 12 USC 92a] relating to the conduct of fiduciary business by national banks. The full title of the regulation is Regulation 9 - Fiduciary Powers of National Banks and Collective Investment Funds. Section 9.18 of the regulation, dealing with collective investment funds, applies to collective investment funds operated by state-chartered banks through Section 584 of the Internal Revenue Code, which requires compliance with Regulation 9.

REIT Real Estate Investment Trust. A trust which operates somewhat like a mutual fund. REITs invest in real estate loans and/or equity interests in real estate. Ninety-five percent of its income must be paid out to shareholders if the REIT is to qualify for a tax exemption.

Remainder A future estate or interest in property which will become an estate or interest in possession upon the termination of the prior estate or interest created at the same time and by the same instrument. For example, A conveys Blackacre to B for life and upon B's death to C in fee simple. C's interest is a remainder. The term remainder over is sometimes used in such phrases as "To A for life, with remainder over to B," calling attention to the fact that there is a prior estate or interest. To be distinguished from reversion.

Remainderman A person or entity entitled to a future interest in a trust or estate. The rights to the property in the trust or estate are typically transferred after the interests of the prior beneficiary (such as the income beneficiary) have terminated.

REMIC Acronym for a real estate mortgage investment conduit. This is a pass-through type of investment vehicle created by the Tax Reform Act of 1986 to issue multi-class mortgage-backed securities. REMIC's may be organized as corporations, partnerships or trusts. Those meeting certain qualifications are not subject to double taxation. Interests in REMIC's may be senior or junior, regular (debt instruments) or residual (equity interests). REMIC's generally provide the issuer with more flexibility than a collateralized mortgage obligation (CMO), as they permit mortgage pools to be separated not only into maturity classes but also into risk classes. While CMO's usually have AAA ratings, REMIC's represent a range of risk levels.

Reportable Event Serious situations involving a private defined benefit employee benefit plan which require a notice to be filed with the PBGC. Events covered include loss of tax qualification, 80% or more drop in participation from the previous year, full or partial plan termination, inability to pay benefits, merger with another plan, bankruptcy of the plan sponsor, etc.

Representative (1) A general term designating either an executor or an administrator. (2) The person who acts or speaks for another under his authority.

Repurchase Agreement As applicable to trust departments, means a "loan" by a trust account to a financial institution or securities dealer. Normally, these loans are secured by U. S. Government or agency securities, bear a fixed rate, are payable at a fixed maturity, and may be subject to other terms. The regulatory agencies have generally taken the position that repurchase agreements with the fiduciary bank are a conflict of interest and self-dealing unless specifically authorized. Also sometimes called reverse repurchase agreements, repo, asset repo, RP, and buy back.

Reputation Risk The possibility that negative publicity will expose the institution to costly litigation, financial loss, or effect its ability to establish new relationships, or to continue existing relationships.

ResidenceThe place where one resides, whether temporarily or permanently. See also Domicile.

Residuary Trust A trust which is composed of the property of the testator, remaining in the estate after the payment of all taxes, debts, expenses, charges, and the satisfaction of all other gifts under the will.

Resulting Trust A trust which results in law from the acts of the parties, regardless of whether they

intend to create a trust, as when a person disposes of property under circumstances which raise an inference that he does not intend that the person taking or holding the property shall have the beneficial interest in it; to be distinguished from an express trust and a constructive trust.

Revenue Anticipation Note A debt obligation issued by a state or political subdivision to be repaid from the receipt of the anticipated revenue.

Revenue Bond A municipal bond payable, not from general tax collections, but from revenue generated by either the operation of a public facility or from a special source of revenue.

Reverse Repurchase Agreement An agreement in which Party A purchases an asset (financial instrument) from Party B and agrees to sell it back to Party B for a specified price at a specified date. See Repurchase Agreement.

Reverse Swap A swap that has terms opposite those of another swap, therefore effectively canceling the former swap.

Reversion The interest in an estate remaining in the grantor after a particular interest, less than the whole estate, has been granted by the owner to another person; to be distinguished from remainder. The reversion remains in the grantor; the remainder goes to some grantee.

Revocable Trust A trust which may be terminated by the settlor or by another person; opposed to an irrevocable trust.

RHO The rate at which the price of an option changes in response to a given move in interest rates.

Rights A privilege granted to existing shareholders of a corporation to purchase new shares of common stock at a discount from its market price. Rights are offered under terms of a Rights Offering. The right must be exercised within a short (30-60 day) timespan. Sometimes, rights are issued under state law that requires existing shareholders be given an opportunity to maintain their proportionate share of ownership. See Preemptive Rights.

Rollover The procedure of repeated investment of the proceeds of short-term securities upon maturity. See Tax-Free Rollover.

Roth IRA was introduced in 1998. Except for some special rules which apply only to Roth IRAs, these individual retirement accounts are subject to many of the same IRS rules as are traditional IRAs. Unlike traditional IRAs, contributions are taxable, but distributions are not taxed. Also, no distributions from Roth IRAs are ever required, and IRA owners may continue to contribute to the IRA after the age of 70 ½.

Routine A Registered Transfer Agent term defined in SEC Rule 17Ad-1(i), as follows: An item is "routine" if it does not:

(1) require requisitioning certificates of an issue for which the transfer agent, under the terms of its agency, does not maintain a supply of certificates;

(2) include a certificate as to which the transfer agent has received notice of a stop order, adverse claim, or any other restriction on transfer;

(3) require any additional certificates, documentation, instructions, assignments, guarantees, endorsements, explanations, or opinions of counsel before transfer may be effected;

(4) require review of supporting documentation other than assignments, endorsements or stock powers, certified corporate resolutions, signature, or other common and ordinary guarantees, or appropriate tax, or tax waivers;

(5) involve a transfer in connection with a reorganization, tender offer, exchange, redemption, or liquidation,

(6) include a warrant, right, or convertible security presented for transfer of record ownership within five business days before any day upon which exercise or conversion privileges lapse or change;

(7) include a warrant, right, or convertible security presented for exercise or conversion; or

(8) include a security of an issue which within the previous 15 business days was offered to the public, pursuant to a registration statement effective under the Securities Act of 1933, in an offering not of a continuing nature.

RPM Trust - Remainder Purchase Marital Trust, is a special type of trust for the benefit of the grantor's spouse that is designed to qualify for the gift tax marital deduction, but will not be subject to estate tax at the spouse's death. As a result, the trust property passes to the grantor's children completely free of gift and estate tax. This can be a replacement for a GRIT or a GRAT without their inherent drawbacks. Both RPM Income and RPM Annuity Trusts provide benefits.

Rule Against Perpetuties A rule of common law that makes void any estate or interest in property so limited that it will not take effect or vest within a period measured by a life or lives in being at the time of the creation of the estate plus 21 years and the period of gestation. In many states the rule has been modified by statute. Sometimes it is known as the rule against remoteness of vesting.

Safekeeping Account An agency account concerning which the duties of the agent are to receipt for, keep safe, and deliver the property in the account on demand of the principal or his order; to be distinguished from a custody account and a managing agency account.

Samurai Bond A bond issued in the United States but denominated in Japanese Yen.

SAR Summary Annual Report for ERISA employee benefit plans.

SARSEP Acronym for Salary Reduction Simplified Employee Pension, a type of defined contribution employee benefit plan first authorized in 1986. Sometimes referred to as an *elective deferral arrangement*. SARSEPs are available to employers with 25 or less employees, and at least 50% of eligible employees must participate in the plan. Employees contribute a percentage of their salary, thus reducing current income. SARSEPs could be adopted by employers through 12-31-96. Beginning 1-1-97, SARSEPs were replaced by SIMPLE Retirement Plans, and no more new SARSEPs could be started. SARSEPs adopted prior to 1997 can be continued, however, with additional contributions made to them.

Scalping Trading for small gains over a short period of time, usually within a day. In some cases, this may involve taking advantage of very narrow spreads in volatile markets.

Secular Trust A form of employee benefit plan that operates differently from a rabbi trust. In contrast to a rabbi trust, contributions to a secular trust are taxable to the participant, but participants also have a vested interest in plan assets. While the trust is taxable, the employee is ensured of receiving the funds entrusted to the trust should the plan sponsor fail. See also Rabbi Trust and Rabbicular Trust.

Security-Based Derivative These investment instruments are specially tailored from other securities, such as municipal, corporate, or U.S. Government agency bonds. While they offer enticing return potential, some carry high degrees of both market risk and income risk. They range from the highly predictable to the highly unpredictable. Examples of the highly unpredictable include inverse floaters, interest-only or principal-only STRIPS. Also called Synthetic Derivatives. See also Derivatives.

Securities Depository (Clearing Agency): A physical location or organization where securities certificates are deposited and transferred by bookkeeping entry.

Securities Lending A practice where owners of securities, either directly or indirectly, lend their securities to (primarily) brokerage firms for a fee. The borrower pledges either cash, securities or a letter of credit to protect the lender. Securities are borrowed by cover fails of deliveries or short sales, provide proper denominations, and enable brokerage firms to engage in arbitrage trading activities.

Sedol A securities identification numbering system similar to CUSIP but used in some countries outside the United States.

Self-Employed Retirement Plan See Keogh Plan.

Self-Settled Trust A trust which is funded from assets which came from the beneficiary.

SEP Simplified Employee Pension (plan). Basically, an IRA (SEP-IRA) established by an employer for the benefit of each covered employee. Both the employer and employees may contribute to the SEP-IRA. Employer contributions are excluded from an employee's income.

Separate Line of Business See SLOB.

SEPPAA Single Employer Pension Plan Amendments Act of 1986.

SERP Supplemental Executive Retirement Plan. A non-tax-qualified pension plan that permits an employer to offer greater benefits to its highly paid employees.

Settlement (1) The winding up and distribution of an estate by an executor or an administrator; to be distinguished from the administration of an estate by a trustee or a guardian. (2) A property arrangement, as between a husband and wife or a parent and child, frequently involving a trust.

Settlor A person who creates a trust, such as a living trust, to become operative during his lifetime; also called donor, grantor, and trustor. Compare Testator.

Short-Term Trust Also known as a Clifford Trust. An irrevocable trust running for a period of ten years or longer, in which the income is payable to a person other than the settlor, and established under the provisions of the Revenue Act of 1954. The income from a trust of this kind is taxable to the income beneficiary and not to the settlor. The agreement may provide that on the date fixed for the termination of the trust, or on the prior death of the income beneficiary, the assets of the trust shall be returned to the settlor. The Tax Reform Act of 1986 eliminated the 10-year or Clifford trusts exception from grantor-trust taxation rules. Income from 10 year and other grantor trusts is taxed to the grantor, not the beneficiary if the trust property will revert to the grantor or the grantor's spouse. It applies to transfers in trusts after March 1, 1986.

SICOVAM A securities identification numbering system similar to CUSIP but used in some countries outside the United States.

Simple Acronym for Savings Incentive Match Plan for Employees, a type of defined contribution employee benefit plan passed by Congress in 1996 and effective beginning January 1, 1997. SIMPLE plans may be used by employers with 100 or less employees at any time during a year with no other employer-sponsored retirement plan. SIMPLE plans may take the form of an IRA or a 401(k) plan.

Sinking Fund An accumulation of amounts set aside periodically by municipalities or corporations, which will be sufficient to satisfy a debt, such as a bond issue, at maturity. See also Amortization.

SIPC Securities Investor Protection Corporation. Congressionally-chartered corporation that protects investor funds at broker-dealers. In general, when a broker-dealer registers with the SEC, it automatically becomes a member of SIPC. SIPC covers an investor's account for an aggregate of $500,000 in cash and securities, with a maximum of $100,000 cash coverage.

SLIC A guaranteed investment contract issued by a savings and loan association or similar thrift institution. See also GIC.

SLOB IRS term for a "separate line of business," as used in determining compliance with minimum coverage and participation requirements for employee benefit plans. The concept permits businesses that are part of a controlled group to ignore affiliates when testing for nondiscrimination in retirement and dependent care plans.

Social Investing Socially-sensitive investments which, when compared to normal fiduciary-quality investments, are considered to either (1) have a greater social or moral quality, or (2) create employment opportunities for plan participants. Social investing attempts to achieve the same investment quality and rate of return as other investments. Criteria for social investing may be expressed in positive and/or negative terms. Positive qualities might include firms which are seen to be pollution-free, union or employee-friendly, U.S. (or locally) based, providing housing or medical services, food production, or producing safe and high-quality consumer products, etc. Negative qualities might be heavy users of energy or polluters; firms moving jobs overseas; alcohol, tobacco or weapons manufacturers, etc. At one time, a "standard" negative quality was a firm doing business in South Africa. Under some criteria, fossil and/or nuclear energy firms can be viewed either positively or negatively. See also ETIs.

Soft Dollars The purchase of research materials from brokerage firms and paid for by commissions (or part of the commissions) generated by securities transactions of trust accounts. Covered by Section 28(e)(1) of the Securities Exchange Act of 1934. Opposed to this is the purchase of materials by "hard dollars", which is when payment is made by the trust department itself, typically by issuing a check.

SPD Summary Plan Description for ERISA employee benefit plans.

SPTDM Statement of Principles of Trust Department Management.

Specialist A member of the New York Stock Exchange who has two functions: (1) Maintain an orderly market, insofar as possible, in the stocks for which he/she is registered as a specialist. This is done by buying or selling, for the specialist's own account, when there is a disparity between supply and demand. (2) Act as a broker's broker, to place "limit" orders that cannot be immediately executed by the broker. A limit order is one that says buy XYZ at $50, but it is now selling at $60; the specialist holds the broker's order until the price drops to $50. There are about 350 NYSE specialists. See also Market Maker.

Spendthrift Clause The provision in a will or trust instrument which limits the right of the beneficiary to dispose of his interest, as by assignment, and the right of his creditors to reach it, as by attachment.

Spillover Trust Type of trust which by its terms is merged with or added to another trust or estate upon the happening of a certain event. See Pour-Over.

SPIRA Spousal IRA.

Split Stock term. Division of a company's stock into a greater number of shares. In the case of a four-for-one split, four new shares are issued for each old share. The opposite of a split is a *reverse split*, where a company shrinks its stock base by issuing fewer shares for each existing share.

Sponsor The party that establishes and maintains an employee benefit plan. This is normally the employer or an employee organization (union).

Sprinkling Trusts Trusts in which the income or principal is distributed among the members of a designated class in amounts and proportions as may be determined in the discretion of the trustee. Also called spray trusts.

Step-up Swaps A swap that contains periodic increases (or step-ups) in the fixed-rate side of the swap combined with an embedded option that gives the fixed-rate payer the right to extend the swap to a predetermined maximum maturity.

STIF Acronym for a Short Term Investment Fund, a money-market collective investment fund.

Stock Bonus Plan A defined contributions employee benefit plan similar to a profit sharing plan, except that employer contributions are not necessarily dependent upon profits and benefits are in the form of employer stock.

Stock Option Right to purchase stock of employer, generally at a fixed price for a fixed period of time.

Stock Power A form of assignment executed by the owner of stock which contains an irrevocable appointment of an attorney in fact to make the actual transfer on the books of the corporation.

Stock Purchase Trust A trust under which a surviving stockholder of a close corporation may purchase the stock of a deceased stockholder; usually, but not necessarily, an insurance trust.

Stock Transfer Agent The agent of a corporation appointed for the purpose of effecting transfers of stock from one stockholder to another by the actual cancellation of the surrendered certificates and the issuance of new certificates in the name of the new stockholder. See also Transfer Agent.

Stop Order – An order to buy or sell a stock once it reaches a certain target price.

Stop-Limit Order – Instructs a broker to buy or sell once a stock hits the stop price but only at the limit price or better.

Strategic Risk The possibility that insufficient due diligence reviews or infrastructure preparations were made on the introduction of new products and services.

Street Name Shares of stock owned by a broker's customer but held in the name of the broker.

Sub-Chapter S Corporation An election available to a corporation to be treated as a partnership for income tax purposes. To be eligible to make the election, a corporation must meet certain requirements as to kind and number of shareholders, classes of stock, and sources of income.

Subordinated Debenture A debt obligation that has unsecured junior claims to interest and principal, which are subordinated to ordinary debentures or other debt of the issuing corporation.

Subrogation The substitution of one person for another with reference to a lawful claim or right and frequently referred to as the doctrine of substitution. It is a device adopted or invented by equity to compel the ultimate discharge of a debt or obligation by him who in good conscience should pay it.

Successor Trustee A trustee following the original or a prior trustee the appointment of whom is provided for in the trust instrument; to be distinguished from a substituted trustee.

Surcharge (Noun): An amount which the fiduciary is required by court decree to make good because of negligence or other failure of duty. The term is also used as a verb; as the court surcharged the trustee.

Surety An individual or a company that, at the request of another, usually called the principal, agrees to be responsible for the performance of some act in favor of a third person in the event that the principal fails to perform as agreed; as the surety on an administrator's or a guardian's bond.

Swap A forward-type contract in which two parties agree to exchange streams of payments over time according to a predetermined rule. In an **interest rate swap**, one party agrees to pay a fixed interest rate in exchange for receiving a floating interest rate from another party. An **equity index swap** may involve swapping the returns on two different stock market indices, or swapping the return on a stock index for a floating interest rate.

Swaption An option giving the holder the right, but not the obligation, to enter into or cancel a swap agreement at a future date.

Synthetic Derivative A type of security dependent on other securities. Includes inverse floaters and STRIPS. See Security-Based Derivatives.

Synthetic Forward An agreement to either (1) purchase a call and write a put at the same strike price and expiration date, or (2) purchase a put and write a call at the same strike price and expiration date.

Synthetic GIC A Guaranteed Investment Contract issued by other than an insurance company. See "GIC", "BIC", "SLIC".

TAB U.S. Treasury Tax Anticipation Bill. These bills generally mature a week after the corporate income tax dates and are acceptable at par on the tax date. See also Treasury Bills.

TAC (Targeted Amortization Class) A type of derivative that provides investors with a predefined payment schedule applicable to a single prepayment speed. Prepayments in excess of the predefined prepayment speed are allocated to companion, or support, classes and generally do not affect the TAC class. If prepayments fall below the predefined speed, however, the TAC will have slower principal repayment and its average life will extend.

TAMRA Technical and Miscellaneous Revenue Act of 1988.

Target Plan A type of employee benefit plan which combines elements of both defined contribution and defined benefit plans. Levels of contributions are established and a "target benefit" aimed for. An individual account is established for each participant. Actual benefits are based on the amount of the contributions, as affected by the individual's pro-rata share in the profits and losses of the investment portfolio.

Tax Free Rollover Provision whereby an individual receiving a lump sum distribution from a qualified pension or profit sharing plan can preserve the tax deferred status of these funds by a "rollover" into an IRA or another qualified plan if rolled over within sixty days of receipt.

Tax Reduction Act of 1975 Provided special investment tax incentives for establishment of ESOP's (initially known as TRASOP's and changed to tax credit ESOP's by the Technical Corrections Act of 1979). The Tax Reform Act of 1986 repealed these credits.

TEFRA Tax Equity and Fiscal Responsibility Act of 1982. Among other things, this Act provides that (1) municipal bond issues had to be registered, rather than bearer, as to ownership information and (2) changed Section 72 of the Internal Revenue Code as to loans to participants of employee benefit plans.

Tenancy By The Entirety Tenancy by a husband and wife in such a manner that, except in concert with the other, neither husband nor wife has a disposable interest in the property during the lifetime of the other. Upon the death of either, the property goes to the survivor. To be distinguished from joint tenancy and tenancy in common.

Tenancy In Common The holding of property by two or more persons in such a manner that each has an undivided interest which, upon his death, passes as such to his heirs or devisees and not to the survivor or survivors; the same as an estate in common; to be distinguished from joint tenancy and tenancy by the entirety.

Testamentary Trust A trust established by the terms of a will.

Testate (Adjective): Having made and left a valid will; opposed to intestate.

Testator A man who has made and left a valid will at his death. Compare Settlor. See also Trustor.

Testatrix A woman who has made and left a valid will at her death.

Tickler Any record established to serve as a reminder of action to be taken on a fixed future date. It is always arranged in the order dates on which such action is to be taken.

Time Value The difference between the total value of an option and the option's intrinsic value.

Top Hat Plan An unfunded plan maintained to provide deferred compensation for a select group of management or highly compensated employees.

Top Heavy Plan A plan that provides more than 60% of its aggregate accrued benefits or account balances to key employees. Such plans must meet certain additional qualification rules regarding vesting and contributions.

"Totten" Trust Trust created by deposit of one's own money in his own name as trustee for another. Title is vested in the record owner (trustee), who during his life holds it on a revocable trust for the named beneficiary. At the death of the depositor a presumption arises that an absolute trust was created as to the balance on hand at the death of the depositor.

Tracking Error For stock and bond index funds, the difference between index return and the actual return of the fund.

Tranches (1) Risk maturity or other classes into which a multi-class security, such as a collateralized mortgage obligation (CMO) or real estate mortgage investment conduit (REMIC) is split. (2) Subunits of a large ($10 - $30 million) Eurodollar certificate of deposit that are marketed to smaller investors in $10,000 denominations. These are represented by separate certificates, and have the same issue date, interest rate and maturity as the original instrument.

Transfer Agent A corporate agency account whose duties are to transfer stock from one owner to another. A transfer agent maintains records of shareholders, and issues stock certificates. Transfer agents which transfer stock of companies with, generally, 500 stockholders and $1 million in assets must register with either the SEC or its banking agency (as appropriate) under Section 17A of the Securities and Exchange Act of 1934. A transfer agent for bonds usually is known as a registrar. See also Stock-Transfer Agent.

TRASOP An employee benefit account dealing with employee stock ownership plans which meet certain qualifications under the Tax Reduction Acts of 1975 and 1976. These Acts encouraged the use of TRASOP's by allowing a special investment credit as an incentive for establishing such a plan. The Technical Corrections Act of 1979 provided for further such incentives. The tax credits were repealed by the Tax Reform Act of 1986. See also Employee Stock Ownership Plan.

Treasury Bills Short-term direct obligations of the U.S. Government. Often referred to as T-Bills. They are issued with maturities of three months, six months or one year, in denominations of $10,000 and up in multiples of $5,000. See also TABs.

Treasury Bonds Long-term direct obligations of the U.S. Government issued with maturities of five to 30 years, paying interest semiannually.

Treasury Notes Short- to intermediate-term direct obligations of the U.S. Government issued with

maturities of one to seven years, paying interest semiannually.

TRESOP Tax Reduction (Act) ESOP. See TRASOP.

Triple Witching The last trading hour on the third Friday of March, June, September and December when options and futures on stock indexes expire concurrently. Massive trades in index futures, options and underlying stocks by hedge strategists and arbitragers cause abnormal activity and volatility. See also Witching.

Trust A fiduciary relationship in which one person (the trustee) is the holder of the legal title to property (the trust property) subject to an equitable obligation (an obligation enforceable in a court of equity) to keep or use the property for the benefit of another person (the beneficiary).

Trust Agreement A written agreement between settlor and trustee setting forth the terms of a trust. See also Deed of Trust.

Trust Committee A committee of directors or officers or both of a trust institution charged with general or specific duties relating to its trust business.

Trustee An individual or a trust institution which holds the legal title to property for the benefit of someone else.

Trusteed Pension Plan A pension plan in which the corporation's contributions to the plan are placed in a trust for investment and reinvestment, as distinguished from a plan in which the benefits are secured by life insurance.

Trustor A person who creates a trust; a broad term which includes settlor and testator.

Trust Under Agreement A trust evidenced by an agreement between the settlor and the trustee.

Trust Under Deed A trust evidenced by a deed of conveyance, as distinguished from an agreement; originally confined to real property but not frequently applied to personal property as well.

Trust Under Will A trust created by a valid will, to become operative only on the death of the testator; opposed to a living trust and the same as testamentary trust.

Ultra Vires Term applied to acts of a corporation which exceed its corporate powers.

Undistributed Net Income (UNI) The amount by which the distributable net income for the year exceeds the sum of any amount of income for the year required to be distributed currently, any other amounts properly paid, credited, or required to be distributed for such year, and the amount of taxes properly allocable to the undistributed portion of the distributable net income.

Unfunded Insurance Trust An insurance trust in which the premiums on the policies are to be paid by the insured or by some third person and not by the trustee; to be distinguished from a funded insurance trust.

Unfunded Vested Pension Liability In a defined benefit pension plan, the difference between the actuarially-determined value of the vested (nonforfeitable) benefits under the plan, and the market value of the plan's assets.

Unfunded Prior Service Pension Liability In a defined benefit pension plan, the difference between the actuarially-determined value of the projected future benefit costs (both vested and manifested) and administrative expenses, as well as the unamortized portion of prior benefit costs, under the plan, and the market value of the plan's assets.

Unified Credit A dollar amount allocated to each taxpayer which can be applied against the gift tax, the estate tax and, under certain circumstances, the generation-skipping tax.

Uniform Gifts To Minors Act An act adopted by most states providing for a means of transferring property to a minor, wherein the designated custodian of the property has the legal right to act on behalf of the minor without the necessity of a guardianship.

Unit Investment Trust An investment vehicle registered with the SEC under the Investment Company Act of 1940 that purchases a fixed portfolio of securities. Units in the trust are sold to investors, who

receive a proportionate undivided interest in the principal and income of the portfolio. The portfolio of securities remains fixed until the securities mature or, unusually, are sold.

Unmatched Swap An interest rate swap that the counterparty has not paired with an asset or liability with interest payment terms similar to those of the swap.

Unwinding a Swap Terminating a swap agreement.

VAR Value at Risk. An alternative approach (supposedly more sophisticated and accurate) to stress tests for measuring the risk in certain securities activities, such as derivatives. A rudimentary probability analysis, VAR measures the potential for fluctuation in securities prices. VAR is designed to show probable risk, whereas stress tests show what is possible. In the U.S., VAR calculations are usually based on the daily RiskMetrics data issued by Morgan Guaranty Trust Company over Internet. The use of VAR to measure risk is endorsed by the Group of 30; the Basel Committee of international bank supervisors is leaning towards the use of VAR.

Variable Amount Note Note evidencing the amount the trust department lends to a borrower from cash held in various fiduciary accounts; the amount of the loan outstanding fluctuates depending on the amount of cash on hand.

VEBA Acronym for Voluntary Employees' Benefit Association. A tax exempt fund that pays death, health, accident or other benefits to plan participants, their dependents and/or beneficiaries. Generally covered under Section 501(c)(9) of the Internal Revenue Code.

Vest (Verb): To confer an immediate, fixed right of immediate or future possession and enjoyment of property.

Vesting As applied to pension and profit-sharing plans, vesting is a term that indicates the attainment by a participant of a benefit right, attributable to employer contributions, that is not contingent upon his continued employment. Vesting may be total and immediate, graduated over a period of years, or may occur on completion of stated service or participation requirements.

Viatical Settlement (From the Latin *viaticum*, for *provisions for a journey*.) The sale or transfer (settlement) of ownership rights to a life insurance policy prior to death by an insured individual with a terminal illness. The insured person receives a percentage of the life insurance policy's proceeds, with the amount paid is based on a number of factors, such as the life expectancy of the insured person, the amount payable on death, estimated future premiums, and any commissions or other costs. Purchasers may be brokers who sell interests in the life insurance policy's proceeds to investors, with the broker taking its own commission. Once the insurance policy is sold to a broker, the insured is not responsible for paying premiums on the policy. In a 6-8-95 letter to the Texas Department of Banking, the IRS stated that IRA accounts could not "lend" funds to a "viatical trust" for other than the IRA owner, as § 408(a)(3) of the Internal Revenue Code and § 1.408-2(b)(3) of IRS Regulations prohibit investment of IRA funds in insurance contracts. Beginning 1-1-97, funds received from viatical settlements are not taxable for federal income tax purposes if the insured has a life expectancy of less than 24 months or (under special conditions) is chronically ill. See also Accelerated Death Benefit (ADB).

Volatility The degree of price fluctuation for a given asset, rate, or index. Usually expressed as variance or standard deviation.

Voting Authority The power to vote a stock. A trustee may have sole, shared, or no authority to vote stock held in trust.

Vulture Fund A type of limited partnership that invests in depressed properties, usually real estate, aiming to make a profit when prices recover.

Waiver (1) The voluntary relinquishment of a right, privilege, or advantage. (2) The document by which the relinquishment is evidenced.

Warrant A securities certificate which carries the privilege of buying a certain number of shares of stock at a fixed price. They are sometimes attached to securities, at other times they are issued in connection with subscription privileges to holders of stock. See Right.

Wasting Assets Assets which are exhausted through use or lose their value through the passage of time, such as oil wells, mining claims, and patents.

Wearaway a device which may be offered to employees with long company service when traditional defined benefit pension plans are converted to defined benefit cash balance plans. Wearaway provides employees the option of receiving the greater of their frozen benefit under the previous pension plan formula, or their total benefit under the new cash balance formula.

Welfare Plans A term defined by Section 3(1) of ERISA as employee benefit plans which provide the following types of benefits: medical, surgical, hospital care or benefits, sickness, accident, disability, death or unemployment, or vacation benefits. Also includes apprenticeship or other training programs, day care centers, scholarship funds, prepaid legal services, and similar types of benefits other than pensions.

Will A legally enforceable declaration of a person's wishes in writing regarding matters to be attended to after his death and inoperative until his death. A will usually, but not always, relates to the testator's property, is revocable (or amendable by means of a codicil) up to the time of his death, and is applicable to the situation which exists at the time of his death.

Window A term used with BIC's and GIC's for a contract where periodic deposits may be made over an agreed-upon period, usually three months to a year.

Witching The final trading hour, usually on the third Friday of months other than March, June, September and December, when index futures or options expire. This may lead to abnormally high levels of stock trading and volatility. See also Triple Witching.

When Issued (WI) Short form of "when, as, and if issued." Refers to a transaction made conditionally because a security, while authorized, has not yet been issued. New issues of stocks and bonds, stocks that have split are traded on a when issued basis. Newspaper listings often indicate such issues by a "WI."

Whoops Nickname for the Washington Public Power Supply System. In the late 1970's and early 1980's, WHOOPS raised billions of dollars through municipal bonds to finance construction of five nuclear power plants. WHOOPS cancelled two of the plants and defaulted on the related bonds. It was the largest municipal bond default in history.

WPPDA Welfare and Pension Plans Disclosure Act, also known as the Landrum-Griffin Act. Pre-ERISA law now repealed and replaced by ERISA.

WRAP A wrap account is an account offered by a broker or investment dealer where the investor is charged an annual management fee for all services, usually based on the value of invested assets. Wrap fees are paid in lieu of commissions in such an account. Refer to Section 7, Subsection N.2, of the Trust Manual for a discussion of wrap accounts offered by a trust department.

Writer (short) The seller of an option (financial instrument).

Yankee Certificate of Deposit A certificate of deposit issued by the U.S. branch of a foreign bank.

Z Pac A derivatives term. Similar to a Z Tranche, but holders also receive principal if prepayments fall within a specified range.

Z Tranche A derivatives term for a tranche with a stated interest, but where the interest is not paid until certain other classes have been paid.

Appendix E — Employee Benefit Law

Interagency Referral Agreement for ERISA Violations

INTERAGENCY AGREEMENT

Procedures for Cooperation Between the Federal Financial Institution Regulatory Agencies and the Department of Labor in the Enforcement of the Employee Retirement Income Security Act of 1974

The Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, National Credit Union Administration, Office of the Comptroller of the Currency and Office of Thrift Supervision (the federal financial institution regulatory agencies) as part of their supervision of the institutions regulated by them, conduct examinations and perform other functions which occasionally disclose possible violations of the Employee Retirement Income Security Act of 1974 (ERISA). The Department of Labor (DOL) is charged with the administration, interpretation and enforcement of standards of conduct and responsibility of fiduciaries of employee benefit plans under ERISA.

Section 3004(b) of ERISA provides that the Secretary of Labor may utilize the facilities or services of any department, agency, or establishment of the United States, with the lawful consent of such department, agency, or establishment, and each department, agency or establishment of the United States is authorized and directed to cooperate with the Secretary of Labor and, to the extent permitted by law, to provide such information and facilities as the Secretary may request for his assistance in the performance of his functions under ERISA. This agreement is executed pursuant to that authority.

1. To the maximum extent consistent with law and dependent upon the availability of resources, the federal financial institution regulatory agencies shall provide written notification to the DOL of possible violations of ERISA of a significant nature, which are discovered in the course of their supervision of institutions subject to their respective jurisdiction.

2. A possible violation shall be considered significant when, in the view of the appropriate federal financial institution regulatory agency, it falls within the following circumstances:

a. Where the financial institution does not serve as plan administrator or plan sponsor, as those terms are defined in ERISA Section 3(16), possible violations of:

(1) Title I, Part 4, Section 404, relating to fiduciary duties (including transactions directed by named fiduciaries or qualified investment managers), except where the transaction amounts, individually or in combination with other questionable transactions, constitute less than $100,000;

(2) Title I, Part 4 Section 405, relating to liability for breach of co-fiduciary duties (including transactions directed by named fiduciaries or qualified investment managers), except where the transaction amounts, individually or in combination with other questionable transactions, constitute less than $100,000;

(3) Title I, Part 4, Sections 406 and 407(a), relating to prohibited transactions, except where the threat of loss to the plan participants is de minimis;

(4) Title I, Part 4, Section 411, relating to prohibition against certain persons holding certain positions;

(5) Title I, Part 4, Section 412, relating to the bonding requirements as applicable to the financial institution itself.

b. Where the financial institution, in respect to a plan, also serves as plan administrator or plan sponsor, the agencies shall provide written notification of possible violations of the ERISA sections enumerated in a. above and, in addition, shall provide written notification of possible violations of Title I, Part 1, of ERISA relating to reporting and disclosure.

3. The written notification to the DOL shall include the following:

a. The name of the financial institution.

b. The name of the plan.

c. A brief description of the nature of the possible violation, and any corrective action requested by the federal financial institution regulatory agency and/or initiated by the federal financial institution regulatory agency.

4. The DOL agrees that any information received from the federal financial institution regulatory agencies pursuant to this agreement shall, to the extent permissible by law, be held in strict confidence and may be used for investigative purposes only; and that no other use of such information shall be made without the express written authorization of the agency that supplied such information.

5. The written notification shall be sent to the Director of Enforcement, Employee Benefits Security Administration, U.S. Department of Labor, Washington, D.C. 20210.

Trust Examination Manual

Appendix E — Employee Benefit Law

Employee Retirement Income Security Act OF 1974

(Current through P.L. 103-219, approved 3-9-94)

Definitions (selected)

ERISA Section 3

(29 USC 1002)

For purposes of this subchapter:

1. The terms "employee welfare benefit plan" and "welfare plan" mean any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or by an employee organization, or by both, to the extent that such plan, fund, or program was established or is maintained for the purpose of providing for its participants or their beneficiaries, through the purchase of insurance or otherwise, (A) medical, surgical, or hospital care or benefits, or benefits in the event of sickness, accident, disability, death or unemployment, or vacation benefits, apprenticeship or other training programs, or day care centers, scholarship funds, or prepaid legal services, or (B) any benefit described in section 186(c) of this title (other than pensions on retirement or death, and insurance to provide such pensions).
2. (A)Except as provided in subparagraph (B), the terms "employee pension benefit plan" and "pension plan" mean any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or by an employee organization, or by both, to the extent that by its express terms or as a result of surrounding circumstances such plan, fund, or program -

   i. Provides retirement income to employees, or
   ii. Results in a deferral of income by employees for periods extending to the termination of covered employment or beyond, regardless of the method of calculating the contributions made to the plan, the method of calculating the benefits under the plan or the method of distributing benefits from the plan.

   (B) The Secretary may by regulation prescribe rules consistent with the standards and purposes of this chapter providing one or more exempt categories under which -

   i. Severance pay arrangements, and
   ii. Supplemental retirement income payments, under which the pension benefits of retirees or their beneficiaries are supplemented to take into account some portion or all of the increases in the cost of living (as determined by the Secretary of Labor) since retirement, shall, for purposes of this subchapter, be treated as welfare plans rather than pension plans. In the case of any arrangement or payment a principal effect of which is the evasion of the standards or purposes of this chapter applicable to pension plans, such arrangement or payment shall be treated as a pension plan.

3. The term "employee benefit plan" or "plan" means an employee welfare benefit plan or an employee pension benefit plan or a plan which is both an employee welfare benefit plan and an employee pension benefit plan.
4. The term "employee organization" means any labor union or any organization of any kind, or any

agency or employee representation committee, association, group, or plan, in which employees participate and which exists for the purpose, in whole or in part, of dealing with employers concerning an employee benefit plan, or other matters incidental to employment relationships; or any employees' beneficiary association organized for the purpose in whole or in part, of establishing such a plan.

5. The term "employer" means any person acting directly as an employer, or indirectly in the interest of an employer, in relation to an employee benefit plan; and includes a group or association of employers acting for an employer in such capacity.
6. The term "employee" means any individual employed by an employer.
7. The term "participant" means any employee or former employee of an employer, or any member or former member of an employee organization, who is or may become eligible to receive a benefit of any type from an employee benefit plan which covers employees of such employer or members of such organization, or whose beneficiaries may be eligible to receive any such benefit.
8. The term "beneficiary" means a person designated by a participant, or by the terms of an employee benefit plan, who is or may become entitled to a benefit thereunder.
9. The term "person" means an individual, partnership, joint venture, corporation, mutual company, joint-stock company, trust, estate, unincorporated organization, association, or employee organization.
10. The term "State" includes any State of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, and the Canal Zone. The term "United States" when used in the geographic sense means the States and the Outer Continental Shelf lands defined in the Outer Continental Shelf Lands Act (43 USC 1331-1343).
11. The term "commerce" means trade, traffic, commerce, transportation, or communication between any State and any place outside thereof.
12. The term "industry or activity affecting commerce" means any activity, business, or industry in commerce or in which a labor dispute would hinder or obstruct commerce or the free flow of commerce, and includes any activity or industry "affecting commerce" within the meaning of the Labor Management Relations Act, 1947 [29 USCA 141 et seq.] or the Railway Labor Act [45 USCA 151 et seq.]
13. The term "Secretary" means the Secretary of Labor.
14. The term "party in interest" means, as to an employee benefit plan -

    Editor's Note: Also see " Disqualified Person" definition, Internal Revenue Code § 4975(e)(2) .

    A. Any fiduciary (including, but not limited to, any administrator, officer, trustee, or custodian), counsel, or employee of such employee benefit plan;
    B. A person providing services to such plan;
    C. An employer any of whose employees are covered by such plan;
    D. An employee organization any of whose members are covered by such plan;
    E. An owner, direct or indirect, of 50 percent or more of -

        i. The combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of a corporation.
        ii. The capital interest or the profits interest of a partnership, or
        iii. The beneficial interest of a trust or unincorporated enterprise, which is an employer or an employee organization described in subparagraph (C) or (D);

    F. A relative (as defined in paragraph (15)) of any individual described in subparagraph (A), (B), (C), or (E);
    G. A corporation, partnership, or trust or estate of which (or in which) 50 percent or more of -

        i. The combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation,
        ii. The capital interest or profits interest of such partnership, or
        iii. The beneficial interest of such trust or estate, is owned directly or indirectly, or held by persons described in subparagraph (A), (B), (C), (D), or (E);

    H. An employee, officer, director (or an individual having powers or responsibilities similar to those of officers or directors), or a 10 percent or more shareholder directly or indirectly, of a person described in subparagraph (B), (C), (D), (E), or (G), or of the employee benefit plan; or
    I. A 10 percent or more (directly or indirectly in capital or profits) partner or joint venture of a person described in subparagraph (B), (C), (D), (E), or (G).

    The Secretary, after consultation and coordination with the Secretary of the Treasury, may by regulation prescribe a percentage lower than 50 percent for subparagraph (E) and (G) and lower

than 10 percent for subparagraph (H) or (I). The Secretary may prescribe regulations for determining the ownership (direct or indirect) of profits and beneficial interests, and the manner in which indirect stock holdings are taken into account. Any person who is a party in interest with respect to a plan to which a trust described in section 501(c)(22) of Title 26 is permitted to make payments under section 1403 of this title shall be treated as a party in interest with respect to such trust.

15. The term "relative" means a spouse, ancestor, lineal descendant, or spouse of a lineal descendant.

    Editor's Note: Also see "Family Member" definition, Internal Revenue Code § 4975(e)(6) .

16. (A) The term "administrator" means -

    i. The person specifically so designated by the terms of the instrument under which the plan is operated;
    ii. If an administrator is not so designated, the plan sponsor; or
    iii. In the case of a plan for which an administrator is not designated and a plan sponsor cannot be identified, such other person as the Secretary may by regulation prescribe.

    (B) The term "plan sponsor" means -

    i. The employer in the case of an employee benefit plan established or maintained by a single employer,
    ii. The employee organization in the case of a plan established or maintained by an employee organization, or
    iii. In the case of a plan established or maintained by two or more employers or jointly by one or more employers and one or more employee organizations, the association, committee, joint board of trustees, or other similar group of representatives of the parties who establish or maintain the plan.

17. The term "separate account" means an account established or maintained by an insurance company under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.
18. The term "adequate consideration" when used in part 4 of subtitle B of this subchapter means -

    A. In the case of a security for which there is a generally recognized market, either -

        i. The price of the security prevailing on a national securities exchange which is registered under section 78f of Title 15, or
        ii. If the security is not traded on such a national securities exchange, a price not less favorable to the plan than the offering price for the security as established by the current bid and asked prices quoted by persons independent of the issuer and of any party in interest; and

    B. In the case of an asset other than a security for which there is a generally recognized market, the fair market value of the asset as determined in good faith by the trustee or named fiduciary pursuant to the terms of the plan and in accordance with regulations promulgated by the Secretary.

19. The term "nonforfeitable" when used with respect to a pension benefit or right means a claim obtained by a participant or his beneficiary to that part of an immediate or deferred benefit under a pension plan which arises from the participant's service, which is unconditional, and which is legally enforceable against the plan. For purposes of this paragraph, a right to an accrued benefit derived from employer contributions shall not be treated as forfeitable merely because the plan contains a provision described in section 1053(a)(3) of this title.
20. The term "security" has the same meaning as such term has under section 77b(1) of Title 15.
21. (A) Except as otherwise provided in subparagraph (B), a person is a fiduciary with respect to a plan to the extent -

    Editor's Note: Also see "Fiduciary" definition, Internal Revenue Code § 4975(e)(3) .

    i. He exercises any discretionary authority or discretionary control respecting management

of such plan or exercises any authority or control respecting management or disposition of its assets,

ii. He renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or

iii. He has any discretionary authority or discretionary responsibility in the administration of such plan. Such term includes any person designated under section 1105(c)(1)(B) of this title.

(B) If any money or other property of an employee benefit plan is invested in securities issued by an investment company registered under the Investment Company Act of 1940 [15 USCA 80a-1 et seq.], such investment shall not by itself cause such investment company or such investment company's investment adviser or principal underwriter to be deemed to be a fiduciary or a party in interest as those terms are defined in this subchapter, except insofar as such investment company or its investment adviser or principal underwriter acts in connection with an employee benefit plan covering employees of the investment company, the investment adviser, or its principal underwriter. Nothing contained in this subparagraph shall limit the duties imposed on such investment company, investment adviser, or principal underwriter by any other law.

22. The term "normal retirement benefit" means the greater of the early retirement benefit under the plan, or the benefit under the plan commencing at normal retirement age. The normal retirement benefit shall be determined without regard to -
    A. Medical benefits, and
    B. Disability benefits not in excess of the qualified disability benefit.

    For purposes of this paragraph, a qualified disability benefit is a disability benefit provided by a plan which does not exceed the benefit which would be provided for the participant if he separated from the service at normal retirement age. For purposes of this paragraph, the early retirement benefit under a plan shall be determined without regard to any benefit under the plan which the Secretary of the Treasury finds to be a benefit described in section 1054(b)(1)(G) of this title.

23. The term "accrued benefit" means -

    A. In the case of a defined benefit plan, the individual's accrued benefit determined under the plan and, except as provided in section 1054(c)(3) of this title, expressed in the form of an annual benefit commencing at normal retirement age, or
    B. In the case of a plan which is an individual account plan, the balance of the individual's account.

    The accrued benefit of an employee shall not be less than the amount determined under section 1054(c)(2)(B) of this title with respect to the employee's accumulated contribution.

24. The term "normal retirement age" means the earlier of -

    A. The time a plan participant attains normal retirement age under the plan, or
    B. The later of -

        i. The time a plan participant attains age 65, or
        ii. The 5th anniversary of the time a plan participant commenced participation in the plan.

25. The term "vested liabilities" means the present value of the immediate or deferred benefits available at normal retirement age for participants and their beneficiaries which are nonforfeitable.
26. The term "current value" means fair market value where available and otherwise the fair value as determined in good faith by a trustee or a named fiduciary (as defined in section 1102(a)(2) of this title) pursuant to the terms of the plan and in accordance with regulations of the Secretary, assuming an orderly liquidation at the time of such determination.
27. The term "present value", with respect to a liability, means the value adjusted to reflect anticipated events. Such adjustments shall conform to such regulations as the Secretary of the Treasury may prescribe.
28. The term "normal service cost" or "normal cost" means the annual cost of future pension benefits and administrative expenses assigned, under an actuarial cost method, to years subsequent to a particular valuation date of a pension plan. The Secretary of the Treasury may prescribe regulations to carry out this paragraph.

29. The term "accrued liability" means the excess of the present value, as of a particular valuation date of a pension plan, of the projected future benefit costs and administrative expenses for all plan participants and beneficiaries over the present value of future contributions for the normal cost of all applicable plan participants and beneficiaries. The Secretary of the Treasury may prescribe regulations to carry out this paragraph.
30. The term "unfunded accrued liability" means the excess of the accrued liability, under an actuarial cost method which so provides, over the present value of the assets of a pension plan. The Secretary of the Treasury may prescribe regulations to carry out this paragraph.
31. The term "advance funding actuarial cost method" or "actuarial cost method" means a recognized actuarial technique utilized for establishing the amount and incidence of the annual actuarial cost of pension plan benefits and expenses. Acceptable actuarial cost methods shall include the accrued benefit cost method (unit credit method), the entry age normal cost method, the individual level premium cost method, the aggregate cost method, the attained age normal cost method, and the frozen initial liability cost method. The terminal funding cost method and the current funding (pay-as-you-go) cost method are not acceptable actuarial cost methods. The Secretary of the Treasury shall issue regulations to further define acceptable actuarial cost methods.
32. The term "governmental plan" means a plan established or maintained for its employees by the Government of the United States, by the government of any State or political subdivision thereof, or by any agency or instrumentality of any of the foregoing. The term "governmental plan" also includes any plan to which the Railroad Retirement Act of 1935 or 1937 [45 USCA 231 et seq.] applies, and which is financed by contributions required under that Act and any plan of an international organization which is exempt from taxation under the provisions of the International Organizations Immunities Act [22 USCA 288 et seq.].
33. (A) The term "church plan" means a plan established and maintained (to the extent required in clause (ii) of subparagraph (B)) for its employees (or their beneficiaries) by a church or by a convention or association of churches which is exempt from tax under section 501 of Title 26.

    (B) The term "church plan" does not include a plan -

    i. Which is established and maintained primarily for the benefit of employees (or their beneficiaries) of such church or convention or association of churches who are employed in connection with one or more unrelated trades or businesses (within the meaning of section 513 of Title 26), or
    ii. If less than substantially all of the individuals included in the plan are individuals described in subparagraph (A) or in clause (ii) of subparagraph (C) (or their beneficiaries).

    (C) For purposes of this paragraph -

    i. A plan established and maintained for its employees (or their beneficiaries) by a church or by a convention or association of churches includes a plan maintained by an organization, whether a civil law corporation or otherwise, the principal purpose or function of which is the administration or funding of a plan or program for the provision of retirement benefits or welfare benefits, or both, for the employees of a church or a convention or association of churches, if such organization is controlled by or associated with a church or a convention or association of churches.
    ii. The term employee of a church or a convention or association of churches includes -

        I. A duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry, regardless of the source of his compensation;
        II. An employee of an organization, whether a civil law corporation or otherwise, which is exempt from tax under section 501 of Title 26 and which is controlled by or associated with a church or a convention or association of churches; and
        III. An individual described in clause (v).

    iii. A church or a convention or association of churches which is exempt from tax under section 501 of Title 26 shall be deemed the employer of any individual included as an employee under clause (ii).
    iv. An organization, whether a civil law corporation or otherwise, is associated with a church or a convention or association of churches if it shares common religious bonds and convictions with that church or convention or association of churches.
    v. If an employee who is included in a church plan separates from the service of a church or a convention or association of churches or an organization, whether a civil law

corporation or otherwise, which is exempt from tax under section 501 of Title 26 and which is controlled by or associated with a church or a convention or association of churches, the church plan shall not fail to meet the requirements of this paragraph merely because the plan -

I. Retains the employee's accrued benefit or account for the payment of benefits to the employee or his beneficiaries pursuant to the terms of the plan; or
II. Receives contributions on the employee's behalf after the employee's separation from such service, but only for a period of 5 years after such separation, unless the employee is disabled (within the meaning of the disability provisions of the church plan or, if there are no such provisions in the church plan, within the meaning of section 72(m)(7) of Title 26) at the time of such separation from service.

(D) (i) If a plan established and maintained for its employees (or their beneficiaries) by a church or by a convention or association of churches which is exempt from tax under section 501 of Title 26 fails to meet one or more of the requirements of this paragraph and corrects its failure to meet such requirements within the correction period, the plan shall be deemed to meet the requirements of this paragraph for the year in which the correction was made and for all prior years.

ii. If a correction is not made within the correction period, the plan shall be deemed not to meet the requirements of this paragraph beginning with the date on which the earliest failure to meet one or more of such requirements occurred.
iii. For purposes of this subparagraph, the term "correction period" means -

I. The period ending 270 days after the date of mailing by the Secretary of the Treasury of a notice of default with respect to the plan's failure to meet one or more of the requirements of this paragraph; or
II. Any period set by a court of competent jurisdiction after a final determination that the plan fails to meet such requirements, or, if the court does not specify such period, any reasonable period determined by the Secretary of the Treasury on the basis of all the facts and circumstances, but in any event not less than 270 days after the determination has become final; or
III. Any additional period which the Secretary of the Treasury determines is reasonable or necessary for the correction of the default, whichever has the latest ending date.

34. The term "individual account plan" or "defined contribution plan" means a pension plan which provides for an individual account for each participant and for benefits based solely upon the amount contributed to the participant's account, and any income, expenses, gains and losses, and any forfeitures of accounts of other participants which may be allocated to such participant's account.
35. The term "defined benefit plan" means a pension plan other than an individual account plan; except that a pension plan which is not an individual account plan and which provides a benefit derived from employer contributions which is based partly on the balance of the separate account of a participant -

A. For the purposes of section 1052 of this title, shall be treated as an individual account plan, and
B. For the purposes of paragraph (23) of this section and section 1054 of this title, shall be treated as an individual account plan to the extent benefits are based upon the separate account of a participant and as a defined benefit plan with respect to the remaining portion of benefits under the plan.

36. The term "excess benefit plan" means a plan maintained by an employer solely for the purpose of providing benefits for certain employees in excess of the limitations on contributions and benefits imposed by section 415 of Title 26 on plans to which that section applies, without regard to whether the plan is funded. To the extent that a separable part of a plan (as determined by the Secretary of Labor) maintained by an employer is maintained for such purpose, that part shall be treated as a separate plan which is an excess benefit plan.
37. (A) The term "multiemployer plan" means a plan -

i. To which more than one employer is required to contribute,
ii. Which is maintained pursuant to one or more collective bargaining

agreements between one or more employee organizations and more than one employer, and
   iii. Which satisfies such other requirements as the Secretary may prescribe by regulation.

B. For purposes of this paragraph, all trades or businesses (whether or not incorporated) which are under common control within the meaning of section 1301(b)(1) of this title are considered a single employer.
C. Notwithstanding subparagraph (A), a plan is a multiemployer plan on and after its termination date if the plan was a multiemployer plan under this paragraph for the plan year preceding its termination date.
D. For purposes of this subchapter, notwithstanding the preceding provisions of this paragraph, for any plan year which began before September 26, 1980, the term "multiemployer plan" means a plan described in this paragraph (37) as in effect immediately before such date.
E. Within one year after September 26, 1980, a multiemployer plan may irrevocably elect, pursuant to procedures established by the corporation and subject to the provisions of sections 1453(b) and (c) of this title, that the plan shall not be treated as a multiemployer plan for all purposes under this chapter or Title 26 if for each of the last 3 plan years ending prior to the effective date of the Multiemployer Pension Plan Amendments Act of 1980 -
   i. The plan was not a multiemployer plan because the plan was not a plan described in subparagraph (A)(iii) of this paragraph and section 414(f)(1)(C) of Title 26 (as such provisions were in effect on the day before September 26, 1980); and
   ii. The plan had been identified as a plan that was not a multiemployer plan in substantially all its filings with the corporation, the Secretary of Labor and the Secretary of the Treasury.
F. (i) For purposes of this title a qualified football coaches plan -
      I. Shall be treated as a multiemployer plan to the extent not inconsistent with the purposes of this subparagraph; and
      II. Notwithstanding section 401(k)(4)(B) of Title 26, may include a qualified cash and deferred arrangement.

   ii. For purposes of this subparagraph, the term "qualified football coaches plan" means any defined contribution plan which is established and maintained by an organization -

      I. Which is described in section 501(c) of Title 26;
      II. The membership of which consists entirely of individuals who primarily coach football as full-time employees of 4-year colleges or universities described in section 170(b)(1)(A)(ii) of Title 26; and
      III. Which was in existence on September 18, 1986.

38. The term "investment manager" means any fiduciary (other than a trustee or named fiduciary, as defined in section 1102(a)(2) of this title) -

   A. Who has the power to manage, acquire, or dispose of any asset of a plan;
   B. Who is -

      i. Registered as an investment adviser under the Investment Advisers Act of 1940 [15 USCA 80b-1 et seq.];
      ii. Is a bank, as defined in that Act; or
      iii. Is an insurance company qualified to perform services described in subparagraph (A) under the laws of more than one State; and

   C. Has acknowledged in writing that he is a fiduciary with respect to the plan.

39. The terms "plan year" and "fiscal year of the plan" mean, with respect to a plan, the calendar, policy, or fiscal year on which the records of the plan are kept.
40. (A) The term "multiple employer welfare arrangement" means an employee welfare benefit plan, or any other arrangement (other than an employee welfare benefit plan), which is established or maintained for the purpose of offering or providing any benefit described in paragraph (1) to the employees of two or more employers (including one or more self-employed individuals), or to their beneficiaries, except that such term does not include any such plan or other arrangement which is established or maintained -

ii. Under or pursuant to one or more agreements which the Secretary finds to be collective bargaining agreements,
iii. By a rural electric cooperative, or
iv. By a rural telephone cooperative association.

B. For purposes of this paragraph -

i. Two or more trades or businesses, whether or not incorporated, shall be deemed a single employer if such trades or businesses are within the same control group,
ii. The term "control group" means a group of trades or businesses under common control,
iii. The determination of whether a trade or business is under "common control" with another trade or business shall be determined under regulations of the Secretary applying principles similar to the principles applied in determining whether employees of two or more trades or businesses are treated as employed by a single employer under section 1301(b) of this title, except that, for purposes of this paragraph, common control shall not be based on an interest of less than 25 percent,
iv. The term "rural electric cooperative" means -

I. Any organization which is exempt from tax under section 501(a) of Title 26 and which is engaged primarily in providing electric service on a mutual or cooperative basis, and
II. Any organization described in paragraph (4) or (6) of section 501(c) of Title 26 which is exempt from tax under section 501(a) of such Title 26 and at least 80 percent of the members of which are organizations described in subclause (I), and

v. The term "rural telephone cooperative association" means an organization described in paragraph (4) or (6) of section 501(c) of Title 26 which is exempt from tax under section 501(a) of such Title and at least 80 percent of the members of which are organizations engaged primarily in providing telephone service to rural areas of the United States on a mutual, cooperative, or other basis.

41. Single-employer plan. The term "single-employer plan" means an employee benefit plan other than a multiemployer plan.

1 The term "single employer plan" means a plan which is not a multiemployer plan.

Other Provisions Relating to Form and Payment of Benefits

[Excerpt] Pledging by Participant of Vested Interest - Prohibition

ERISA Section 206

(29 USC 1056)

In accordance with section 1056(d)(1)-(2) of this title:

* * *

(d) Assignment or alienation of plan benefits

1. Each pension plan shall provide that benefits provided under the plan may not be assigned or alienated.
2. For the purposes of paragraph (1) of this subsection, there shall not be taken into account any voluntary and revocable assignment of not to exceed 10 percent of any benefit payment, or of any irrevocable assignment or alienation of benefits executed before September 2, 1974. The

preceding sentence shall not apply to any assignment or alienation made for the purposes of defraying plan administration costs. For purposes of this paragraph a loan made to a participant or beneficiary shall not be treated as an assignment or alienation if such loan is secured by the participant's accrued nonforfeitable benefit and is exempt from the tax imposed by section 4975 of Title 26 (relating to tax on prohibited transactions) by reason of section 4975(d)(1) of Title 26.

Coverage

ERISA Section 401

(29 USC 1101)

a. **This part shall apply to any employee benefit plan described in section 4(a) (and not exempted under section 4(b)), other than:**

   1. A plan which is unfunded and is maintained by an employer primarily for the purpose of providing deferred compensation for a select group of management or highly compensated employees; or
   2. Any agreement described in section 736 of Title 26, which provides payments to a retired partner or deceased partner or a deceased partner's successor in interest.

b. **For purposes of this part:**

   1. In the case of a plan which invests in any security issued by an investment company registered under the Investment Company Act of 1940 [15 USCA 80a-1 et seq.], the assets of such plan shall be deemed to include such security but shall not, solely by reason of such investment, be deemed to include any assets of such investment company.
   2. In the case of a plan to which a guaranteed benefit policy is issued by an insurer, the assets of such plan shall be deemed to include such policy, but shall not, solely by reason of the issuance of such policy, be deemed to include any assets of such insurer. For purposes of this paragraph:

      A. The term "insurer" means an insurance company, insurance service, or insurance organization, qualified to do business in a State.
      B. The term "guaranteed benefit policy" means an insurance policy or contract to the extent that such policy or contact provides for benefits the amount of which is guaranteed by the insurer. Such term includes any surplus in a separate account, but excludes any other portion of a separate account.

Establishment of Plan

ERISA Section 402

(29 USC 1102)

a. **Named fiduciaries**

   1. Every employee benefit plan shall be established and maintained pursuant to a written instrument. Such instrument shall provide for one or more named fiduciaries who jointly or severally shall have authority to control and manage the operation and administration of the plan.
   2. For purposes of this subchapter, the term "named fiduciary" means a fiduciary who is named in the plan instrument, or who, pursuant to a procedure specified in the plan, is identified as a fiduciary -

      A. By a person who is an employer or employee organization with respect to the plan or
      B. By such an employer and such an employee organization acting jointly.

b. **Requisite features of plan. Every employee benefit plan shall -**

1. Provide a procedure for establishing and carrying out a funding policy and method consistent with the objectives of the plan and the requirements of this subchapter,
2. Describe any procedure under the plan for the allocation of responsibilities for the operation and administration of the plan (including any procedure described in section 1105(c)(1) of this title),
3. Provide a procedure for amending such plan, and for identifying the persons who have authority to amend the plan, and
4. Specify the basis on which payments are made to and from the plan.

c. **Optional features of plan. Any employee benefit plan may provide -**

    1. That any person or group of persons may serve in more than one fiduciary capacity with respect to the plan (including service both as trustee and administrator);
    2. That a named fiduciary, or a fiduciary designated by a named fiduciary pursuant to a plan procedure described in section 1105(c)(1) of this title, may employ one or more persons to render advice with regard to any responsibility such fiduciary has under the plan; or
    3. That a person who is a named fiduciary with respect to control or management of the assets of the plan may appoint an investment manager or managers to manage (including the power to acquire and dispose of) any assets of a plan.

Establishment of Trust

ERISA Section 403

(29 USC 1103)

a. **Benefit plan assets to be held in trust; authority of trustees.**

    Except as provided in subsection (b) of this section, all assets of an employee benefit plan shall be held in trust by one or more trustees. Such trustee or trustees shall be either named in the trust instrument or in the plan instrument described in section 1102(a) of this title or appointed by a person who is a named fiduciary, and upon acceptance of being named or appointed, the trustee or trustees shall have exclusive authority and discretion to manage and control the assets of the plan, except to the extent that -

    1. The plan expressly provides that the trustee or trustees are subject to the direction of a named fiduciary who is not a trustee, in which case the trustees shall be subject to proper directions of such fiduciary which are made in accordance with the terms of the plan and which are not contrary to this chapter, or
    2. Authority to manage, acquire, or dispose of assets of the plan is delegated to one or more investment managers pursuant to section 1102(c)(3) of this title.

b. **Exceptions. The requirements of subsection (a) of this section shall not apply -**

    1. To any assets of a plan which consist of insurance contracts or policies issued by an insurance company qualified to do business in a State;
    2. To any assets of such an insurance company or any assets of a plan which are held by such an insurance company;
    3. To a plan -

        A. Some or all of the participants of which are employees described in section 401(c)(1) of Title 26; or
        B. Which consists of one or more individual retirement accounts described in section 408 of Title 26; to the extent that such plan's assets are held in one or more custodial accounts which qualify under section 401(f) or 408(h) of Title 26, whichever is applicable.

    4. To a plan which the Secretary exempts from the requirement of subsection (a) of this section and which is not subject to any of the following provisions of this chapter -

        A. Part 2 of this subtitle,
        B. Part 3 of this subtitle, or

C. Subchapter III of this chapter; or

5. To a contract established and maintained under section 403(b) of Title 26 to the extent that the assets of the contract are held in one or more custodial accounts pursuant to section 403(b)(7) of Title 26.
6. Any plan, fund or program under which an employer, all of whose stock is directly or indirectly owned by employees, former employees or their beneficiaries, proposes through an unfunded arrangement to compensate retired employees for benefits which were forfeited by such employees under a pension plan maintained by a former employer prior to the date such pension plan became subject to this chapter.

c. Assets of plan not to inure to benefit of employer; allowable purposes of holding plan assets

1. Except as provided in paragraph (2), (3), or (4) or subsection (d) of this section, or under sections 1342 and 1344 of this title (relating to termination of insured plans), or under section 420 of Title 26 as in effect on January 1, 1995) the assets of a plan shall never inure to the benefit of any employer and shall be held for the exclusive purposes of providing benefits to participants in the plan and their beneficiaries and defraying reasonable expenses of administering the plan.
2. (A)In the case of a contribution, or a payment of withdrawal liability under part 1 of subtitle E of subchapter III of this chapter -

    i. If such contribution or payment is made by an employer to a plan (other than a multiemployer plan) by a mistake of fact, paragraph (1) shall not prohibit the return of such contribution to the employer within one year after the payment of the contribution, and
    ii. If such contribution or payment is made by an employer to a multiemployer plan by a mistake of fact or law (other than a mistake relating to whether the plan is described in section 401(a) of Title 26 or the trust which is part of such plan is exempt from taxation under section 501(a) of Title 26), paragraph (1) shall not prohibit the return of such contribution or payment to the employer within 6 months after the plan administrator determines that the contribution was made by such a mistake.

    B. If a contribution is conditioned on initial qualification of the plan under section 401 or 403(a) of Title 26, and if the plan receives an adverse determination with respect to its initial qualification, then paragraph (1) shall not prohibit the return of such contribution to the employer within one year after such determination, but only if the application for the determination is made by the time prescribed by law for filing the employer's return for the taxable year in which such plan was adopted, or such later date as the Secretary of the Treasury may prescribe.
    C. If a contribution is conditioned upon the deductibility of the contribution under section 404 of Title 26, then, to the extent the deduction is disallowed, paragraph (1) shall not prohibit the return to the employer of such contribution (to the extent disallowed) within one year after the disallowance of the deduction.

3. In the case of a withdrawal liability payment which has been determined to be an overpayment, paragraph (1) shall not prohibit the return of such payment to the employer within 6 months after the date of such determination.
4. Redesignated (3).

d. Termination of plan.

1. Upon termination of a pension plan to which section 1321 of this title does not apply at the time of termination and to which this part applies (other than a plan to which no employer contributions have been made) the assets of the plan shall be allocated in accordance with the provisions of section 1344 of this title, except as otherwise provided in regulations of the Secretary.
2. The assets of a welfare plan which terminates shall be distributed in accordance with the terms of

the plan, except as otherwise provided in regulations of the Secretary.

Fiduciary Duties

ERISA Section 404

(29 USC 1104)

a. Prudent man standard of care.

1. Subject to sections 1103(c) and (d), 1342, and 1344 of this title, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and -

    A. For the exclusive purpose of:

        i. Providing benefits to participants and their beneficiaries; and
        ii. Defraying reasonable expenses of administering the plan;

    B. With the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims;
    C. By diversifying the investments of the plan so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so; and
    D. In accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of this subchapter and subchapter III of this chapter.

2. In the case of an eligible individual account plan (as defined in section 1107(d)(3) of this title), the diversification requirement of paragraph (1)(C) and the prudence requirement (only to the extent that it requires diversification) of paragraph (1)(B) is not violated by acquisition or holding of qualifying employer real property or qualifying employer securities (as defined in section 1107(d)(4) and (5) of this title).

b. Indicia of ownership of assets outside jurisdiction of district courts.

Except as authorized by the Secretary by regulation, no fiduciary may maintain the indicia of ownership of any assets of a plan outside the jurisdiction of the district courts of the United States.

c. Control over assets by participant or beneficiary.

In the case of a pension plan which provides for individual accounts and permits a participant or beneficiary to exercise control over the assets in his account, if a participant or beneficiary exercises control over the assets in his account (as determined under regulations of the Secretary) -

1. Such participant or beneficiary shall not be deemed to be a fiduciary by reason of such exercise, and
2. No person who is otherwise a fiduciary shall be liable under this part for any loss, or by reason of any breach, which results from such participant's or beneficiary's exercise of control.

d. Plan terminations.

1. If, in connection with the termination of a pension plan which is a single-employer plan, there is an election to establish or maintain a qualified replacement plan, or to increase benefits, as provided under section 4980(d) of Title 26, a fiduciary shall discharge the fiduciary's duties under this subchapter and subchapter III of this chapter in accordance with the following requirements:

    A. In the case of a fiduciary of the terminated plan, any requirement -

        i. Under section 4980(d)(2)(B) of Title 26 with respect to the

transfer of assets from the terminated plan to a qualified replacement plan, and
    ii. Under section 4980(d)(2)(B)(ii) or 4980(d)(3) of Title 26 with respect to any increase in benefits under the terminated plan.

B. In the case of a fiduciary of a qualified replacement plan, any requirement -

    i. Under section 4980(d)(2)(A) of Title 26 with respect to participation in the qualified replacement plan of active participants in the terminated plan,
    ii. Under section 4980(d)(2)(B) of Title 26 with respect to the receipt of assets from the terminated plan, and
    iii. Under section 4980(d)(2)(C) of Title 26 with respect to the allocation of assets to participants of the qualified replacement plan.

2. For purposes of this subsection -

    A. Any term used in this subsection which is also used in section 4980(d) of Title 26 shall have the same meaning as when used in such section, and
    B. Any reference in this subsection to Title 26 shall be a reference to Title 26 as in effect immediately after the enactment of the Omnibus Budget Reconciliation Act of 1990.

Co-Fiduciary Liability

ERISA Section 405

(29 USC 1105)

a. Circumstances giving rise to liability

In addition to any liability which he may have under any other provision of this part, a fiduciary with respect to a plan shall be liable for a breach of fiduciary responsibility of another fiduciary with respect to the same plan in the following circumstances:

1. If he participates knowingly in, or knowingly undertakes to conceal, an act or omission of such other fiduciary, knowing such act or omission is a breach;
2. If, by his failure to comply with section 1104(a)(1) of this title in the administration of his specific responsibilities which give rise to his status as a fiduciary, he has enabled such other fiduciary to commit a breach; or
3. If he has knowledge of a breach by such other fiduciary, unless he makes reasonable efforts under the circumstances to remedy the breach.

b. Assets held by two or more trustees.

1. Except as otherwise provided in subsection (d) of this section and in section 1103(a)(1) and (2) of this title, if the assets of a plan are held by two or more trustees -

    A. Each shall use reasonable care to prevent a co-trustee from committing a breach; and
    B. They shall jointly manage and control the assets of the plan, except that nothing in this subparagraph (B) shall preclude any agreement, authorized by the trust instrument, allocating specific responsibilities, obligations, or duties among trustees, in which event a trustee to whom certain responsibilities, obligations, or duties have not been allocated shall not be liable by reason of this subparagraph (B) either individually or as a trustee for any loss resulting to the plan arising from the acts or omissions on the part of another trustee to whom such responsibilities, obligations, or duties have been allocated.

2. Nothing in this subsection shall limit any liability that a fiduciary may have under subsection (a) of this section or any other provision of this part.
3. (A)In the case of a plan the assets of which are held in more than one trust, a trustee shall not be liable under paragraph (1) except with respect to an act or omission of a trustee of a trust of which he is a trustee.

   (B) No trustee shall be liable under this subsection for following instructions referred to in section 1103(a)(1) of this title.

c. Allocation of fiduciary responsibility; designated persons to carry out fiduciary responsibilities

1. The instrument under which a plan is maintained may expressly provide for procedures (A) for allocating fiduciary responsibilities (other than trustee responsibilities) among named fiduciaries, and (B) for named fiduciaries to designate persons other than named fiduciaries to carry out fiduciary responsibilities (other than trustee responsibilities) under the plan.
2. If a plan expressly provides for a procedure described in paragraph (1), and pursuant to such procedure any fiduciary responsibility of a named fiduciary is allocated to any person, or a person is designated to carry out any such responsibility, then such named fiduciary shall not be liable for an act or omission of such person in carrying out such responsibility except to the extent that -

   A. The named fiduciary violated section 1104(a)(1) of this title -

      i. With respect to such allocation or designation,
      ii. With respect to the establishment or implementation of the procedure under paragraph (1), or
      iii. In continuing the allocation or designation; or

   B. The named fiduciary would otherwise be liable in accordance with subsection (a) of this section.

3. For purposes of this subsection, the term "trustee responsibility" means any responsibility provided in the plan's trust instrument (if any) to manage or control the assets of the plan, other than a power under the trust instrument of a named fiduciary to appoint an investment manager in accordance with section 1102(c)(3) of this title.

d. Investment managers.

1. If an investment manager or managers have been appointed under section 1102(c)(3) of this title, then, notwithstanding subsections (a)(2) and (3) and subsection (b) of this section, no trustee shall be liable for the acts or omissions of such investment manager or managers, or be under an obligation to invest or otherwise manage any asset of the plan which is subject to the management of such investment manager.
2. Nothing in this subsection shall relieve any trustee of any liability under this part for any act of such trustee.

Prohibited Transactions

ERISA Section 406

(29 USC 1106)

Editor's Note: Also see Prohibited Transaction provisions of Internal Revenue Code § 4975(c)(1) .

a. Transactions between plan and party in interest. Except as provided in section 1108 of this title:

1. A fiduciary with respect to a plan shall not cause the plan to engage in a transaction, if he knows or should know that such transaction constitutes a direct or indirect -

   A. Sale or exchange, or leasing, of any property between the plan and a party in interest;
   B. Lending of money or other extension of credit between the plan and a party

in interest;
C. Furnishing of goods, services, or facilities between the plan and a party in interest;
D. Transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan; or
E. Acquisition, on behalf of the plan, of any employer security or employer real property in violation of section 1107(a) of this title.

2. No fiduciary who has authority or discretion to control or manage the assets of a plan shall permit the plan to hold any employer security or employer real property if he knows or should know that holding such security or real property violates section 1107(a) of this title.

b. Transactions between plan and fiduciary. A fiduciary with respect to a plan shall not -

1. Deal with the assets of the plan in his own interest or for his own account,
2. In his individual or in any other capacity act in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries, or
3. Receive any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan.

c. **Transfer of real or personal property to plan by party in interest.**

A transfer of real or personal property by a party in interest to a plan shall be treated as a sale or exchange if the property is subject to a mortgage or similar lien which the plan assumes or if it is subject to a mortgage or similar lien which a party-in-interest placed on the property within the 10-year period ending on the date of the transfer.

10 Percent Limitation on Employer Securities and Employer Real Property

ERISA Section 407

(29 USC 1107)

a. Percentage limitation. Except as otherwise provided in this section and section 1114 of this title:

1. A plan may not acquire or hold -

   A. Any employer security which is not a qualifying employer security, or
   B. Any employer real property which is not qualifying employer real property.

Editor's Note: See DOL ERISA Regulation 2550.408e: Qualifying Employer Securities and Real Estate .

2. A plan may not acquire any qualifying employer security or qualifying employer real property, if immediately after such acquisition the aggregate fair market value of employer securities and employer real property held by the plan exceeds 10 percent of the fair market value of the assets of the plan.
3. (A) After December 31, 1984, a plan may not hold any qualifying employer securities or qualifying employer real property (or both) to the extent that the aggregate fair market value of such securities and property determined on December 31, 1984, exceeds 10 percent of the greater of -

   i. The fair market value of the assets of the plan, determined on December 31, 1984, or
   ii. The fair market value of the assets of the plan determined on January 1, 1975.

   (B) Subparagraph (A) of this paragraph shall not apply to any plan which on any date after December 31, 1974; and before January 1, 1985, did not hold employer securities or employer real property (or both) the aggregate fair market value of which determined on such date exceeded 10 percent of the greater of -

   i. The fair market value of the assets of the plan, determined on such date, or

ii. The fair market value of the assets of the plan determined on January 1, 1975.

4. (A) After December 31, 1979, a plan may not hold any employer securities or employer real property in excess of the amount specified in regulations under subparagraph (B). This subparagraph shall not apply to a plan after the earliest date after December 31, 1974, on which it complies with such regulations.

   (B) Not later than December 31, 1976, the Secretary shall prescribe regulations which shall have the effect of requiring that a plan divest itself of 50 percent of the holdings of employer securities and employer real property which the plan would be required to divest before January 1, 1985, under paragraph (2) or subsection (c) of this section (whichever is applicable).

b. Exception

1. Subsection (a) of this section shall not apply to any acquisition or holding of qualifying employer securities or qualifying employer real property by an eligible individual account plan.
2. Cross References.

   A. For exemption from diversification requirements for holding of qualifying employer securities and qualifying employer real property by eligible individual account plans, see section 1104(a)(2) of this title.
   B. For exemption from prohibited transactions for certain acquisitions of qualifying employer securities and qualifying employer real property which are not in violation of 10 percent limitation, see section 1108(e) of this title.
   C. For transitional rules respecting securities or real property subject to binding contracts in effect on June 30, 1974, see section 1114(c) of this title.

c. Election

1. A plan which makes the election, under paragraph (3) shall be treated as satisfying the requirement of subsection (a)(3) of this section if and only if employer securities held on any date after December 31, 1974 and before January 1, 1985 have a fair market value, determined as of December 31, 1974, not in excess of 10 percent of the lesser of -

   A. The fair market value of the assets of the plan determined on such date (disregarding any portion of the fair market value of employer securities which is attributable to appreciation of such securities after December 31, 1974) but not less than the fair market value of plan assets on January 1, 1975, or
   B. An amount equal to the sum of -

   i. The total amount of the contributions to the plan received after December 31, 1974, and prior to such date, plus
   ii. The fair market value of the assets of the plan, determined on January 1, 1975.

2. For purposes of this subsection, in the case of an employer security held by a plan after January 1, 1975, the ownership of which is derived from ownership of employer securities held by the plan on January 1, 1975, or from the exercise of rights derived from such ownership, the value of such security held after January 1, 1975, shall be based on the value as of January 1, 1975, of the security from which ownership was derived. The Secretary shall prescribe regulations to carry out this paragraph.
3. An election under this paragraph may not be made after December 31, 1975. Such an election shall be made in accordance with regulations prescribed by the Secretary, and shall be irrevocable. A plan may make an election under this paragraph only if on January 1, 1975, the plan holds no employer real property. After such election and before January 1, 1985 the plan may not acquire any employer real property.

d. Definitions.

For purposes of this section -

1. The term "employer security" means a security issued by an employer of employees covered by the plan, or by an affiliate of such employer. A contract to which section 1108(b)(5) of this title applies shall not be treated as a security for purposes of this section.
2. The term "employer real property" means real property (and related personal property) which is leased to an employer of employees covered by the plan, or to an affiliate of such employer. For purposes of determining the time at which a plan acquires employer real property for purposes of this section, such property shall be deemed to be acquired by the plan on the date on which the plan acquires the property or on the date on which the lease to the employer (or affiliate) is entered into, whichever is later.
3. (A) The term "eligible individual account plan" means an individual account plan which is-

   i. A profit-sharing, stock bonus, thrift, or savings plan;
   ii. An employee stock ownership plan; or
   iii. A money purchase plan which was in existence on September 2, 1974, and which on such date invested primarily in qualifying employer securities. Such term excludes an individual retirement account or annuity described in section 408 of Title 26.

   (B) Notwithstanding subparagraph (A), a plan shall be treated as an eligible individual account plan with respect to the acquisition or holding of qualifying employer real property or qualifying employer securities only if such plan explicitly provides for acquisition and holding of qualifying employer securities or qualifying employer real property (as the case may be). In the case of a plan in existence on September 2, 1974, this subparagraph shall not take effect until January 1, 1976.

   (C) The term "eligible individual account plan" does not include any individual account plan the benefits of which are taken into account in determining the benefits payable to a participant under any defined benefit plan.

4. The term "qualifying employer real property" means parcels of employer real property -

   A. If a substantial number of the parcels are dispersed geographically;
   B. If each parcel of real property and the improvements thereon are suitable (or adaptable without excessive cost) for more than one use;
   C. Even if all of such real property is leased to one lessee (which may be an employer, or an affiliate of an employer); and
   D. If the acquisition and retention of such property comply with the provisions of this part (other than section 1104(a)(1)(B) of this title to the extent it requires diversification, and sections 1104(a)(1)(C), 1106 of this title, and subsection (a) of this section).

5. The term "qualifying employer security" means an employer security which is -

   A. Stock,
   B. A marketable obligation (as defined in subsection (e)), or
   C. An interest in a publicly traded partnership (as defined in section 7704(b) of Title 26, but only if such partnership is an existing partnership as defined in section 10211(c)(2)(A) of the Revenue Act of 1987 (Public Law 100-203).

   After December 17, 1987, in the case of a plan other than an eligible individual account plan, an employer security described in subparagraph (A) or (C) shall be considered a qualifying employer security only if such employer security satisfies the requirements of subsection (f)(1) of this section.

6. The term "employee stock ownership plan" means an individual account plan -

   Editor's Note: Also see "ESOP" definition, Internal Revenue Code § 4975(e)(7) .

   A. Which is a stock bonus plan which is qualified, or a stock bonus plan and money purchase plan both of which are qualified, under section 401 of Title 26, and which is designed to invest primarily in qualifying employer securities, and
   B. Which meets such other requirements as the Secretary of the Treasury may prescribe by regulation.

7. A corporation is an affiliate of an employer if it is a member of any controlled group of corporations (as defined in section 1563(a) of Title 26, except that "applicable percentage" shall be substituted for "80 percent" wherever the latter percentage appears in such section) of which the employer who maintains the plan is a member. For purposes of the preceding sentence, the term "applicable percentage" means 50 percent, or such lower percentage as the Secretary may prescribe by regulation. A person other than a corporation shall be treated as an affiliate of an employer to the extent provided in regulations of the Secretary. An employer which is a person other than a corporation shall be treated as affiliated with another person to the extent provided by regulations of the Secretary. Regulations under this paragraph shall be prescribed only after consultation and coordination with the Secretary of the Treasury.
8. The Secretary may prescribe regulations specifying the extent to which conversions, splits, the exercise of rights, and similar transactions are not treated as acquisitions.
9. For purposes of this section, an arrangement which consists of a defined benefit plan and an individual account plan shall be treated as 1 plan if the benefits of such individual account plan are taken into account in determining the benefits payable under such defined benefit plan.

e. Marketable obligations. For purposes of subsection (d)(5) of this section, the term "marketable obligation" means a bond, debenture, note, or certificate, or other evidence of indebtedness (hereinafter in this subsection referred to as "obligation") if -

1. Such obligation is acquired -

   A. On the market, either -

      i. At the price of the obligation prevailing on a national securities exchange which is registered with the Securities and Exchange Commission, or
      ii. If the obligation is not traded on such a national securities exchange, at a price not less favorable to the plan than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer;

   B. From an underwriter, at a price -

      i. Not in excess of the public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, and
      ii. At which a substantial portion of the same issue is acquired by persons independent of the issuer; or

   C. Directly from the issuer, at a price not less favorable to the plan than the price paid currently for a substantial portion of the same issue by persons independent of the issuer;

2. Immediately following acquisition of such obligation -

   A. Not more than 25 percent of the aggregate amount of obligations issued in such issue and outstanding at the time of acquisition is held by the plan, and
   B. At least 50 percent of the aggregate amount referred to in subparagraph (A) is held by persons independent of the issuer; and

3. Immediately following acquisition of the obligation, not more than 25 percent of the assets of the plan is invested in obligations of the employer or an affiliate of the employer.

f. Maximum percentage of stock held by plan; time of holding or acquisition; necessity of legally binding contract

1. Stock satisfies the requirements of this paragraph if, immediately following the acquisition of such stock -

   A. No more than 25 percent of the aggregate amount of stock of the same class issued and outstanding at the time of acquisition is held by the plan,

and

B. At least 50 percent of the aggregate amount referred to in subparagraph (A) is held by persons independent of the issuer.

2. Until January 1, 1993, a plan shall not be treated as violating subsection (a) of this section solely by holding stock which fails to satisfy the requirements of paragraph (1) if such stock -

   A. Has been so held since December 17, 1987, or
   B. Was acquired after December 17, 1987, pursuant to a legally binding contract in effect on December 17, 1987, and has been so held at all times after the acquisition.

3. After December 17, 1987, no plan may acquire stock which does not satisfy the requirements of paragraph (1) unless the acquisition is made pursuant to a legally binding contract in effect on such date.

Statutory Exemption from Prohibited Transactions

ERISA Section 408

(29 USC 1108)

a. **Grant of exemptions.**
The Secretary shall establish an exemption procedure for purposes of this subsection. Pursuant to such procedure, he may grant a conditional or unconditional exemption of any fiduciary or transaction, or class of fiduciaries or transactions, from all or part of the restrictions imposed by sections 1106 and 1107(a) of this title. Action under this subsection may be taken only after consultation and coordination with the Secretary of the Treasury. An exemption granted under this section shall not relieve a fiduciary from any other applicable provision of this chapter. The Secretary may not grant an exemption under this subsection unless he finds that such exemption is -

   1. Administratively feasible,
   2. In the interest of the plan and of its participants and beneficiaries, and
   3. Protective of the rights of participants and beneficiaries of such plan.

   Editor's Note: See DOL Regulation 2570.30 through .52 , which replaced DOL ERISA Procedure 75-1.

Before granting an exemption under this subsection from section 1106(a) or 1107(a) of this title, the Secretary shall publish notice in the Federal Register of the pendency of the exemption, shall require that adequate notice be given to interested persons, and shall afford interested persons opportunity to present views. The Secretary may not grant an exemption under this subsection from section 1106(b) of this title unless he affords an opportunity for a hearing and makes a determination on the record with respect to the findings required by paragraphs (1), (2), and (3) of this subsection.

b. **Enumeration of transactions exempted from section 1106 prohibitions. The prohibitions provided in section 1106 of this title shall not apply to any of the following transactions:**

   1. Any loans made by the plan to parties in interest who are participants or beneficiaries of the plan if such loans -

   Editor's Note: Also see participant loan provisions of Internal Revenue Code § 4975(d)(1) and DOL Regulation 2550.408b-1 .

      A. Are available to all such participants and beneficiaries on a reasonably equivalent basis,
      B. Are not made available to highly compensated employees (within the meaning of section 414(q) of Title 26), in an amount greater than the amount made available to other employees,
      C. Are made in accordance with specific provisions regarding such loans set forth in the plan,

  D. Bear a reasonable rate of interest, and
  E. Are adequately secured.

2. Contracting or making reasonable arrangements with a party in interest for office space, or legal, accounting, or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefore.

   Editor's Note: Also see ancillary services provisions of Internal Revenue Code § 4975(d)(2) .

3. A loan to an employee stock ownership plan (as defined in section 1107(d)(6) of this title), if -

   Editor's Note: Also see ESOP loan provisions of Internal Revenue Code § 4975(d)(3) .

   A. Such loan is primarily for the benefit of participants and beneficiaries of the plan, and
   B. Such loan is at an interest rate which is not in excess of a reasonable rate.

   If the plan gives collateral to a party in interest for such loan, such collateral may consist only of qualifying employer securities (as defined in section 1107(d)(5) of this title).

4. The investment of all or part of a plan's assets in deposits which bear a reasonable interest rate in a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of such plan and if -

   Editor's Note: Also see deposit provisions of Internal Revenue Code § 4975(d)(4) .

   A. The plan covers only employees of such bank or other institution and employees of affiliates of such bank or other institution, or
   B. Such investment is expressly authorized by a provision of the plan or by a fiduciary (other than such bank or institution or affiliate thereof) who is expressly empowered by the plan to so instruct the trustee with respect to such investment.

5. Any contract for life insurance, health insurance, or annuities with one or more insurers which are qualified to do business in a State, if the plan pays no more than adequate consideration, and if each such insurer or insurers is -

   A. The employer maintaining the plan, or
   B. A party in interest which is wholly owned (directly or indirectly) by the employer maintaining the plan, or by any person which is a party in interest with respect to the plan, but only if the total premiums and annuity considerations written by such insurers for life insurance, health insurance, or annuities for all plans (and their employers) with respect to which such insurers are parties in interest (not including premiums or annuity considerations written by the employer maintaining the plan) do not exceed 5 percent of the total premiums and annuity considerations written for all lines of insurance in that year by such insurers (not including premiums or annuity considerations written by the employer maintaining the plan).

6. The providing of an ancillary service by a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of such plan, and if -

   Editor's Note: Also see bank ancillary services provisions of Internal Revenue Code § 4975(d)(6) .

   A. Such bank or similar financial institution has adopted adequate internal safeguards which assure that the providing of such ancillary service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority, and
   B. The extent to which such ancillary service is provided is subject to specific guidelines issued by such bank or similar financial institution (as determined by the Secretary after consultation with Federal and State supervisory authority), and adherence to such guidelines would reasonably

preclude such bank or similar financial institution from providing such ancillary service -

i. In an excessive or unreasonable manner, and
ii. In a manner that would be inconsistent with the best interests of participants and beneficiaries of employee benefit plans.

Such ancillary services shall not be provided at more than reasonable compensation.

7. The exercise of a privilege to convert securities, to the extent provided in regulations of the Secretary, but only if the plan receives no less than adequate consideration pursuant to such conversion.
8. Any transaction between a plan and -

i. A common or collective trust fund or pooled investment fund maintained by a party in interest which is a bank or trust company supervised by a State or Federal agency or
ii. A pooled investment fund of an insurance company qualified to do business in a State, if -

Editor's Note: Also see collective investment fund provisions of Internal Revenue Code § 4975(d)(8) .

A. The transaction is a sale or purchase of an interest in the fund,
B. The bank, trust company, or insurance company receives not more than reasonable compensation, and
C. Such transaction is expressly permitted by the instrument under which the plan is maintained, or by a fiduciary (other than the bank, trust company, or insurance company, or an affiliate thereof) who has authority to manage and control the assets of the plan.

9. The making by a fiduciary of a distribution of the assets of the plan in accordance with the terms of the plan if such assets are distributed in the same manner as provided under section 1344 of this title (relating to allocation of assets).
10. Any transaction required or permitted under part 1 of subtitle E of subchapter III of this chapter.
11. A merger of multiemployer plans, or the transfer of assets or liabilities between multiemployer plans, determined by the Pension Benefit Guaranty Corporation to meet the requirements of section 1411 of this title.
12. The sale by a plan to a party in interest on or after December 18, 1987, of any stock, if -

A. The requirements of paragraphs (1) and (2) of subsection (e) of this section are met with respect to such stock,
B. On the later of the date on which the stock was acquired by the plan, or January 1, 1975, such stock constituted a qualifying employer security (as defined in section 1107(d)(5) of this title as then in effect), and
C. Such stock does not constitute a qualifying employer security (as defined in section 1107(d)(5) of this title as in effect at the time of the sale).

13. Any transfer in a taxable year beginning before January 1, 2001, of excess pension assets from a defined benefit plan to a retiree health account in a qualified transfer permitted under section 420 of Title 26 (as in effect on January 1, 1996).

c. Fiduciary benefits and compensation not prohibited by section 1106. Nothing in section 1106 of this title shall be construed to prohibit any fiduciary from -

1. Receiving any benefit to which he may be entitled as a participant or beneficiary in the plan, so long as the benefit is computed and paid on a basis which is consistent with the terms of the plan as applied to all other participants and beneficiaries;
2. Receiving any reasonable compensation for services rendered, or for the reimbursement of expenses properly and actually incurred, in the performance of his duties with the plan; except that no person so serving who already receives full-time pay from an employer or an association of employers, whose employees are participants in the plan, or from an employee organization whose members are participants in such plan shall receive compensation from such plan, except for reimbursement of expenses properly and actually incurred; or

3. Serving as a fiduciary in addition to being an officer, employee, agent, or other representative of a party in interest.

d. Owner-employees; family members; shareholder employees. Section 1107(b) of this title and subsections (b), (c), and (e) of this section shall not apply to any transaction in which a plan, directly or indirectly -

1. Lends any part of the corpus or income of the plan to;
2. Pays any compensation for personal services rendered to the plan to; or
3. Acquires for the plan any property from or sells any property to; any person who is with respect to the plan an owner-employee (as defined in section 401(c)(3) of Title 26), a member of the family (as defined in section 267(c)(4) of Title 26) of any such owner-employee, or a corporation controlled by any such owner-employee through the ownership, directly or indirectly, of 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock of the corporation. For purposes of this subsection a shareholder employee (as defined in section 1379 of Title 26 as in effect on the day before the date of the enactment of the Subchapter § Revision Act of 1982) and a participant or beneficiary of an individual retirement account or individual retirement annuity described in section 408 of Title 26 or a retirement bond described in section 409 of Title 26 (as effective for obligations issued before January 1, 1984) and an employer or association of employers which establishes such an account or annuity under section 408(c) of Title 26 shall be deemed to be an owner-employee.

e. Acquisition or sale by plan of qualifying employer securities; acquisition, sale, or lease by plan of qualifying employer real property.

Sections 1106 and 1107 of this title shall not apply to the acquisition or sale by a plan of qualifying employer securities (as defined in section 1107(d)(5) of this title) or acquisition, sale or lease by a plan of qualifying employer real property (as defined in section 1107(d)(4) of this title) -

1. If such acquisition, sale, or lease is for adequate consideration (or in the case of a marketable obligation, at a price not less favorable to the plan than the price determined under section 1107(e)(1) of this title),
2. If no commission is charged with respect thereto, and
3. If -
   - A. The plan is an eligible individual account plan (as defined in section 1107(d)(3) of this title), or
   - B. In the case of an acquisition or lease of qualifying employer real property by a plan which is not an eligible individual account plan, or of an acquisition of qualifying employer securities by such a plan, the lease or acquisition is not prohibited by section 1107(a) of this title.

f. Applicability of statutory prohibitions to mergers or transfers. Section 1106(b)(2) of this title shall not apply to any merger or transfer described in subsection (b)(11) of this section.

Liability for Breach of Fiduciary Duty

ERISA Section 409

(29 USC 1109)

a. Any person who is a fiduciary with respect to a plan who breaches any of the responsibilities, obligations, or duties imposed upon fiduciaries by this subchapter shall be personally liable to make good to such plan any losses to the plan resulting from each such breach, and to restore to such plan any profits of such fiduciary which have been made through use of assets of the plan by the fiduciary, and shall be subject to such other equitable or remedial relief as the court may deem appropriate, including removal of such fiduciary. A fiduciary may also be removed for a violation of section 1111 of this title.
b. No fiduciary shall be liable with respect to a breach of fiduciary duty under this subchapter if such breach was committed before he became a fiduciary or after he ceased to be a fiduciary.

Exculpatory Provisions; Insurance

ERISA Section 410

(29 USC 1110)

a. Except as provided in sections 1105(b)(1) and 1105(d) of this title, any provision in an agreement or instrument which purports to relieve a fiduciary from responsibility or liability for any responsibility, obligation, or duty under this part shall be void as against public policy.
b. Nothing in this subpart shall preclude -
    1. A plan from purchasing insurance for its fiduciaries or for itself to cover liability or losses occurring by reason of the act or omission of a fiduciary, if such insurance permits recourse by the insurer against the fiduciary in the case of a breach of a fiduciary obligation by such fiduciary;
    2. A fiduciary from purchasing insurance to cover liability under this part from and for his own account; or
    3. An employer or an employee organization from purchasing insurance to cover potential liability of one or more persons who serve in a fiduciary capacity with regard to an employee benefit plan.

Prohibition Against Certain Persons Holding Certain Positions

ERISA Section 411

(29 USC 1111)

a. Conviction or imprisonment. No person who has been convicted of, or has been imprisoned as a result of his conviction of, robbery, bribery, extortion, embezzlement, fraud, grand larceny, burglary, arson, a felony violation of Federal or State law involving substances defined in section 802(6) of Title 21, murder, rape, kidnapping, perjury, assault with intent to kill, any crime described in section 80a-9(a)(1) of Title 15, a violation of any provision of this chapter, a violation of section 186 of this title, a violation of chapter 63 of Title 18, a violation of section 874, 1027, 1503, 1505, 1506, 1510, 1951, or 1954 of Title 18, a violation of the Labor-Management Reporting and Disclosure Act of 1959 (29 USC 401), any felony involving abuse or misuse of such person's position or employment in a labor organization or employee benefit plan to seek or obtain an illegal gain at the expense of the members of the labor organization or the beneficiaries of the employee benefit plan, or conspiracy to commit any such crimes or attempt to commit any such crimes, or a crime in which any of the foregoing crimes is an element, shall serve or be permitted to serve -
    1. As an administrator, fiduciary, officer, trustee, custodian, counsel, agent, employee, or representative in any capacity of any employee benefit plan,
    2. As a consultant or adviser to an employee benefit plan, including but not limited to any entity whose activities are in whole or substantial part devoted to providing goods or services to any employee benefit plan, or
    3. In any capacity that involves decision making authority or custody or control of the moneys, funds, assets, or property of any employee benefit plan, during or for the period of thirteen years after such conviction or after the end of such imprisonment, whichever is later, unless the sentencing court on the motion of the person convicted sets a lesser period of at least three years after such conviction or after the end of such imprisonment, whichever is later, or unless prior to the end of such period, in the case of a person so convicted or imprisoned -
        A. His citizenship rights, having been revoked as a result of such conviction, have been fully restored, or
        B. If the offense is a Federal offense, the sentencing judge or, if the offense is a State or local offense, the United States district court for the district in which the offense was committed, pursuant to sentencing guidelines and policy statements under section 994(a) of Title 28, determines that such person's service in any capacity referred to in paragraphs (1) through (3) would not be contrary to the purposes of this subchapter. Prior to making

any such determination the court shall hold a hearing and shall give notice to such proceeding by certified mail to the Secretary of Labor and to State, county, and Federal prosecuting officials in the jurisdiction or jurisdictions in which such person was convicted. The court's determination in any such proceeding shall be final. No person shall knowingly hire, retain, employ, or otherwise place any other person to serve in any capacity in violation of this subsection.

Notwithstanding the preceding provisions of this subsection, no corporation or partnership will be precluded from acting as an administrator, fiduciary, officer, trustee, custodian, counsel, agent, or employee of any employee benefit plan or as a consultant to any employee benefit plan without a notice, hearing, and determination by such court that such service would be inconsistent with the intention of this section.

b. Penalty. Any person who intentionally violates this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both.
c. Definitions. For the purpose of this section -

    1. A person shall be deemed to have been "convicted" and under the disability of "conviction" from the date of the judgment of the trial court, regardless of whether that judgment remains under appeal.
    2. The term "consultant" means any person who, for compensation, advises, or represents an employee benefit plan or who provides other assistance to such plan, concerning the establishment or operation of such plan.
    3. A period of parole or supervised release shall not be considered as part of a period of imprisonment.

d. Payment of salary into escrow. Whenever any person -

    1. By operation of this section, has been barred from office or other position in an employee benefit plan as a result of a conviction, and
    2. Has filed an appeal of that conviction,

any salary which would be otherwise due such person by virtue of such office or position, shall be placed in escrow by the individual or organization responsible for payment of such salary. Payment of such salary into escrow shall continue for the duration of the appeal or for the period of time during which such salary would be otherwise due, whichever period is shorter. Upon the final reversal of such person's conviction on appeal, the amounts in escrow shall be paid to such person. Upon the final sustaining of that person's conviction on appeal, the amounts in escrow shall be returned to the individual or organization responsible for payments of those amounts. Upon final reversal of such person's conviction, such person shall no longer be barred by this statute from assuming any position from which such person was previously barred.

Bonding of Fiduciaries

ERISA Section 412

(29 USC 1112)

a. Requisite bonding of plan officials. Every fiduciary of an employee benefit plan and every person who handles funds or other property of such a plan (hereafter in this section referred to as "plan official") shall be bonded as provided in this section; except that -

    1. Where such plan is one under which the only assets from which benefits are paid are the general assets of a union or of an employer, the administrator, officers, and employees of such plan shall be exempt from the bonding requirements of this section, and
    2. No bond shall be required of a fiduciary (or of any director, officer, or employee of such fiduciary) if such fiduciary -

        A. Is a corporation organized and doing business under the laws of the United States or of any State;and
        B. Is authorized under such laws to exercise trust powers or to conduct an

insurance business;and

C. Is subject to supervision or examination by Federal or State authority; and
D. Has at all times a combined capital and surplus in excess of such a minimum amount as may be established by regulations issued by the Secretary, which amount shall be at least $1,000,000. Paragraph (2) shall apply to a bank or other financial institution which is authorized to exercise trust powers and the deposits of which are not insured by the Federal Deposit Insurance Corporation, only if such bank or institution meets bonding or similar requirements under State law which the Secretary determines are at least equivalent to those imposed on banks by Federal law; or
E. Is registered as a broker or dealer under Section 15(b) of the Securities Exchange Act of 1934 if the broker or dealer is subject to the fidelity bond requirements of a self-regulatory organization.

The amount of such bond shall be fixed at the beginning of each fiscal year of the plan. Such amount shall be not less than 10 per centum of the amount of funds handled. In no case shall such bond be less than $1,000 nor more than $500,000, except in the case of a plan that holds employer securities, in which case the maximum amount of such bond shall be $1,000,000. The Secretary, however, after due notice and opportunity for hearing to all interested parties, and after consideration of the record, may prescribe an amount in excess of $500,000, subject to the 10 per centum limitation of the preceding sentence. For purposes of fixing the amount of such bond, the amount of funds handled shall be determined by the funds handled by the person, group, or class to be covered by such bond and by their predecessor or predecessors, if any, during the preceding reporting year, or if the plan has no preceding reporting year, the amount of funds to be handled during the current reporting year by such person, group, or class, estimated as provided in regulations of the Secretary. Such bond shall provide protection to the plan against loss by reason of acts of fraud or dishonesty on the part of the plan official, directly or through connivance with others. Any bond shall have as surety thereon a corporate surety company which is an acceptable surety on Federal bonds under authority granted by the Secretary of the Treasury pursuant to sections 9304-9308 of Title 31. Any bond shall be in a form or of a type approved by the Secretary, including individual bonds or schedule of blanket forms of bonds which cover a group or class.

b. Unlawful acts. It shall be unlawful for any plan official to whom subsection (a) of this section applies, to receive, handle, disburse, or otherwise exercise custody or control of any of the funds or other property of any employee benefit plan, without being bonded as required by subsection (a) of this section and it shall be unlawful for any plan official of such plan, or any other person having authority to direct the performance of such functions, to permit such functions, or any of them, to be performed by any plan official, with respect to whom the requirements of subsection (a) of this section have not been met.
c. Conflict of interest prohibited in procuring bonds. It shall be unlawful for any person to procure any bond required by subsection (a) of this section from any surety or other company or through any agent or broker in whose business operations such plan or any party in interest in such plan has any control or significant financial interest, direct or indirect.
d. Exclusiveness of statutory basis for bonding requirement for persons handling funds or other property of employee benefit plans.

Nothing in any other provision of law shall require any person, required to be bonded as provided in subsection (a) of this section because he handles funds or other property of an employee benefit plan, to be bonded insofar as the handling by such person of the funds or other property of such plan is concerned.

e. Regulations. The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section including exempting a plan from the requirements of this section where he finds that -

1. Other bonding arrangements or
2. The overall financial condition of the plan would be adequate to protect the interests of the beneficiaries and participants.

When, in the opinion of the Secretary, the administrator of a plan offers adequate evidence of the financial responsibility of the plan, or that other bonding arrangements would provide adequate protection of the beneficiaries and participants, he may exempt such plan from the requirements

of this section.

Limitation on Actions

ERISA SECTION 413

(29 USC 1113)

No action may be commenced under this subchapter with respect to a fiduciary's breach of any responsibility, duty, or obligation under this part, or with respect to a violation of this part, after the earlier of -

1. Six years after (A) the date of the last action which constituted a part of the breach or violation, or (B) in the case of an omission, the latest date on which the fiduciary could have cured the breach or violation, or
2. Three years after the earliest date on which the plaintiff had actual knowledge of the breach or violation;

except that in the case of fraud or concealment, such action may be commenced not later than six years after the date of discovery of such breach or violation.

Civil Enforcement

ERISA SECTION 502

(29 USC 1132)

* * *

(i) Administrative assessment of civil penalty. In the case of a transaction prohibited by section 406 (29 USC 1106) by a party in interest with respect to a plan to which this part applies, the Secretary may assess a civil penalty against such party in interest. The amount of such penalty may not exceed 10 percent of the amount involved in each such transaction (as defined in section 4975(f)(4) of the Internal Revenue Code, amended as of 1997) for each year or part thereof during which the prohibited transaction continues, except that, if the transaction is not corrected (in such manner as the Secretary shall prescribe in regulations which shall be consistent with section 4975(f)(5) of such Code within 90 days after notice from the Secretary (or such longer period as the Secretary may permit), such penalty may be in an amount not more than 100 percent of the amount involved. This subsection shall not apply to a transaction with respect to a plan described in section 4975(e)(1) of such Code.

* * *

(l) (1) Civil penalties on violations by fiduciaries. In the case of -

A. Any breach of fiduciary responsibility under (or any violation of) part 4 by a fiduciary, or
B. Any knowing participation in such breach or violation by any other person,

the Secretary shall assess a civil penalty against such fiduciary or other person in an amount equal to 20 percent of the applicable recovery amount.

(2) For purposes of paragraph (l), the term "applicable recovery amount" means any amount which is recovered from a fiduciary or other person with respect to a breach or violation described in paragraph (1) -

A. Pursuant to any settlement agreement with the Secretary, or
B. Ordered by a court to be paid by such fiduciary or other person to a plan or its participants and beneficiaries in a judicial proceeding instituted by the Secretary under subsection (a)(2) or (a)(5).

(3) The Secretary may, in the Secretary's sole discretion, waive or reduce the amount of the penalty under paragraph (l) if the Secretary determines in writing that -

A. The fiduciary or other person acted reasonably and in good faith, or
B. It is reasonable to expect that the fiduciary or other person will not be able to restore all losses to the plan without severe financial hardship unless such waiver or reduction is granted.

(4) The penalty imposed on a fiduciary or other person under this subsection with respect to any transaction shall be reduced by the amount of any penalty or tax imposed on such fiduciary or other person with respect to such transaction under subsection (i) of this section and section 4975 of the Internal Revenue Code of 1986.

Definitions ERISA Section 3

ERISA Section 3(14) **"Party in Interest"**	
The term "party in interest" means, as to an employee benefit plan -	
(A)	Any fiduciary (including, but not limited to, any administrator, officer, trustee, or custodian), counsel, or employee of such employee benefit plan;
(B)	A person providing services to such plan;
(C)	An employer any of whose employees are covered by such plan;
(D)	An employee organization any of whose members are covered by such plan;
(E)	An owner, direct or indirect, of 50% or more of -

	(i)	The combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of a corporation,
	(ii)	The capital interest or the profits interest of a partnership, or
	(iii)	The beneficial interest of a trust or unincorporated enterprise, which is the employer or an employee organization described in subparagraph (C) or (D);
(F)	A relative (as defined in paragraph (15)) of any individual described in subparagraph (A), (B), (C), or (E);	
(G)	A corporation, partnership, or trust or estate of which (or in which) 50% or more of -	
	(i)	The combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of a corporation,
	(ii)	The capital interest or the profits interest of a partnership, or
	(iii)	The beneficial interest of a such trust or estate, is owned directly or indirectly, or held by persons described in subparagraph (A), (B), (C) (D), or (E);
(H)	An employee, officer, director (or an individual having powers or responsibilities similar to those of officers or directors, or a 10% or more shareholder directly or indirectly, of a person described in subparagraph (B), (C), (D), (E), or (G), or of the employee benefit plan; or	
(I)	A 10% or more (directly or indirectly in capital or profits) partner or joint venture of a person described in subparagraph (B), (C), (D), (E) or (G). The Secretary, after consultation and coordination with the Secretary of the Treasury, may by regulation prescribe a percentage lower than 50%, for subparagraph (E) and (G) and lower than 10% for subparagraph (H) or (I). The Secretary may prescribe regulations for determining the ownership (direct or indirect) of profits and beneficial interests, and the manner in which indirect stock holdings are taken into account. Any person who is a party in interest with respect to a plan to which a trust described in Section 501(c)(22) of the Internal Revenue Code of 1954 is permitted to make payments under Section 4223 shall be treated as a party in interest with respect to such trust.	

A. Conference Report

See the discussion of the term "*party in interest*" at page 323 of the Congressional Conference Report.

B. Prohibited Transaction Class Exemptions (PTE)

1. [Plans] Two or more multi-employer plans or multiple employer plans are not parties in interest or disqualified persons with respect to each other merely because they are maintained by the same plan sponsors. However, a multi-employer plan or a multiple employer plan may be a party in interest or a disqualified person with respect to another multiemployer plan or multiple employer plan for other reasons (for example, one plan providing services to another). Final PTE 76-1; AO 77-47.

C. Advisory Opinions

1. [Affiliates] A corporation 50% or more of which is owned by a more than 50% shareholder of the employer maintaining the plan is a party in interest. *Proposed* PTE I-492.
2. [Banks] A savings and loan association is not a party in interest merely because plan assets are held on deposit. AO 77-11; AO 79-10.
3. [Broker-Dealers] Broker-dealers who execute securities transactions for plans are parties in interest. AO 76-76.
4. [Custodians] Custodians of plan assets are parties in interest. AO 76-76; PLR 7907091.
5. [Employer] Employers are parties in interest. WSB 77-14; PLR 7847034. Directors of an employer are parties in interest. WSB 77-14. An employer council is a party in interest because it acts on behalf of employers. AO 76-103.
6. [Employer] An employer of employees covered by the plan is a party in interest pursuant to ERISA Section 3(14)(C) even if it is merely an affiliate or subsidiary of the employer plan sponsor. Thus, absent a statutory or administrative exemption, the exchange of common stock for preferred stock and the cancellation of a note in connection therewith as a transaction

between the affiliate corporation and the plan would constitute a prohibited transaction under Section 406(a)(1)(A). AO 81-34A.

7. [Insurance Companies] Insurance companies are not parties in interest merely because they issue group insurance policies to plans. AO 76-36.
8. [Mergers & Acquisitions] A corporation proposes to acquire all of an unrelated third party's assets. In connection therewith, the, acquiring corporation will not assume, adopt or maintain the existing plan of the corporation to be acquired. The acquiring corporation desires to purchase or lease a building owned by the plan. Certain employees of the acquired corporation will become employees of the acquiring corporation. The term party in interest includes in Subsection (c) an employer any of whose employees are covered by the plan. However, the definition of an employer under Section 3(14)(C) must be viewed in light of the overall statutory framework of ERISA, including Section 3(5). That section provides in relevant part that the term "employer" means any person acting directly as an employer or indirectly in the interest of an employer in relation to an employee benefit plan. Since the acquiring corporation had no relationship with the plan in the past and will not assume, maintain or adopt the plan or its accompanying trust after the acquisition, that entity is not a Section 3(14)(C) "party in interest" to the plan upon its acquisition of substantially all of the plan sponsor's assets. Advisory Opinion 81-78A.
9. [Ownership] A person is not a 50% owner of a corporation or partnership under Section 3(14)(G) if such 50% ownership interest will not be acquired until sometime in the future. AO 75-147; AO 77-83.
10. [Partners] Section 3(14)(I) applies only to 10% partners in a party in interest, not 10% partners with a party in interest in a partnership that is not itself a party in interest. AO 75-147; AO 77-83.
11. [Relatives] Relatives are parties in interest. AO 75-137.
12. [Service Providers] Service providers are parties in interest even if they receive no compensation from the plan. WSB 78-17. However, a person who only provides services to the employer before the plan is established is not a party in interest. AO 76-65.
13. [Trustees] Trustees of a plan and employees of a trustee are parties in interest. AO 77-84.
14. [Unions] Unions are parties in interest. AO 76-91; WSB 78-25. Employees of a union are parties in interest. AO 76-91. However, the mere fact that union officers are also directors and employees of a corporation does not make such corporation a party in interest. AO 76-120.

D. Court Decisions

1. Trustees of a pension or welfare plan are parties in interest to the plan under Section 3(14)(A). Marshall v. Snyder, 430 F. Supp. 1224 (E.D.N.Y. 1977), aff'd in part, 572 F.2d 894 (2d Cir. 1978).
2. Trustees and fiduciaries of employee benefit plans are parties in interest within the meaning of ERISA Section 3(14)(A). Donovan v. Bryans, 566 F. Supp. 1258, 4 EBC 1772 (E.D.Pa. 1983). A party in interest as defined by ERISA Section 3(14) includes any fiduciary and any employer of employees covered by an employee benefit plan. Brock v. Gilliken, 677 F. Supp. 398, 9 EBC 1803 (E.D.N.Y. 1987).
3. In an action by terminated employee claiming applicability of retroactive amendment in employee stock ownership plan, under ERISA Section 3(14) a party in interest includes the employer and its officers, directors and major stockholders. Allen v. The Katz Agency, Inc. Employee Stock Ownership Plan, 677 F.2d 193, 3 EBC 1352 (2d Cir. 1982).
4. A construction company is deemed a party in interest under Section 3(14)(G) when its sole stock owner and president is the trustee of an employee benefit plan and the company receives loans from such plan. Brock v. Gilliken, 677 F. Supp. 398, 9 EBC 1803 (E.D.N.Y. 1987).
5. A law firm that receives excessive amounts of money in relationship to services rendered by the firm and benefits received by the members of the represented employee welfare plan is treated as a party in interest in an action alleging the trustees breached their fiduciary duties by overpaying the law firm. Benvenuto v. Schneider 678 F. Supp. 51, 9 EBC 1528 (E.D.N.Y. 1988).

Section 3(15) **"Relative"**
The term "relative" means a spouse, ancestor, lineal descendant, or spouse of a lineal descendant.

A. Conference Report

The Congressional Conference Report does not discuss the term "relative."

B. Advisory Opinions

1. The brother of a fiduciary is not a relative under Section 3(15) and, therefore, is not a party in interest under Section 3(14)(F). AO 77-05.

Section 3(18) **"Adequate Consideration"**
The term "adequate consideration" when used in part 4 of subtitle B means:
In the case of a security for which there is a generally recognized market, either
The price of the security prevailing on a national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934, or
If the security is not traded on such a national securities exchange, a price not less favorable to the plan than the offering price for the security as established by the current bid and asked prices quoted by persons independent of the issuer and of any party in interest; and
In the case of an asset other than a security for which there is a generally recognized market, the market value of the asset as determined in good faith by the trustee or named fiduciary, pursuant to the terms of the plan and in accordance with regulations promulgated by the Secretary [of Labor].

A. Conference Report

The Congressional Conference Report does not discuss the definition of the term "adequate consideration."

B. Regulations

DOL ERISA Regulation 2510.3-18(b) was proposed in 1988 but has not yet been adopted. It provided guidance on how thinly-traded securities should be valued.

C. Advisory Opinions

1. In the absence of regulations under Section 3(18), securities for which there is no generally recognized market should be valued by the trustees or other appropriate plan fiduciary by making a good faith determination of the fair market value of the securities, utilizing recognized methods of determining value. AO 75-141; AO 76-16.
2. If securities are publicly traded in the over-the-counter market and if there are current bid and asked prices quoted by persons independent of the issuer and of any party in interest, a plan may not purchase a controlling block of stock at a price greater than such current bid and asked prices. AO 76-52.
3. Reliance by a plan trustee on a ruling received from the IRS that a method of determining the fair market value of book value shares constitutes a reasonable method of determining fair market value for purposes of Treasury Regulation 1.421-7(e)(2) would be considered evidence that the trustee's determination of fair market value was made in good faith for purposes of Section 3(18)(B). AO 77-35.

D. Court Decisions

1. [ESOP - Stock Valuation] Where an ESOP purchases securities from a sponsoring company that does not have a generally recognized market, adequate consideration as defined in ERISA requires the trustee to exercise objective good faith by prudently using sound business principles of evaluation for the sole benefit of the employees' plan. Trustees who relied on appraisals that were 13 and 20 months old did not exercise good faith and sound business principles, and the amount paid for the securities purchased by the plan was more than adequate consideration. Donovan v. Cunningham, 716 F.2d 1455, 4 EBC 2329 (5th Cir. 1983).
2. Adequate consideration is the price for the stock quoted on the American Stock Exchange. The

fact that a sale of the stock over a longer period of time might have resulted in a higher return or that a premium might have been obtained for the sale of a large block need not be taken into account. Leonard v. Drug Fair, Inc., No. 78-1335, Fed. Sec. L. Rep. (CCH) 97,144 (D.D.C. 1979).

Section 3(21) "Fiduciary"	
Except as otherwise provided in subparagraph (B), a person is a fiduciary with respect to a plan to the extent	
(i)	He exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets,
(ii)	He renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or
(iii)	He has any discretionary authority or discretionary responsibility in the administration of such plan.
Such term includes any person designated under section 405(c)(1)(B).	

A. Conference Report

See the discussion of the term "fiduciary" at page 323 of the Congressional Conference Report.

B. Regulations

1. Refer to DOL Regulation 2510.3-21 and IRS Regulation 54.4975-9.
2. The regulation clarifies the applicability of the definition fiduciary to persons who provide investment advice to plans and to securities brokers and dealers who execute securities transactions for plans. DOL Regulation 2510.3-21(c)-(e).
3. A person is a fiduciary only to the extent of his or her fiduciary responsibilities to a plan. DOL Regulation 2510.3-21(c)(2), (d)(2).
4. As a general matter, a person (e.g., a securities broker) is not a fiduciary to a plan if he or she does not know, and has no reason to know, that he or she is acting for a plan. Preamble to DOL Regulation 2510.3-21(c)-(e).
5. A fee or other compensation, direct or indirect, for the rendering of investment advice to a plan, within the meaning of Section 3(21)(A)(ii), should be deemed to include all fees or other compensation incident to the transaction in which the investment advice to the plan has been rendered or will be rendered. This may include, for example, brokerage commissions, mutual fund sales commissions and insurance sales commissions. Preamble to DOL ERISA Regulation 2510.3-21(c)-(e).
6. Depending on the facts and circumstances, a sales presentation and recommendations made to a plan fiduciary by an insurance agent or broker, pension consultant or mutual fund principal underwriter in connection with insurance or annuity contracts or mutual funds may constitute investment advice under Section 3(21). Preamble to DOL ERISA Regulation 2510.3-21(c)-(e).
7. A person who exercises discretion in the administration of a plan by making final decisions on appeals from claim denials is a fiduciary to the plan under Section 3(21)(A)(iii) even if the plan documents fail to state do the person is a named fiduciary or merely a fiduciary. Preamble to DOL ERISA Regulation 2560.503-1 (Claims Procedure).

C. Interpretive Bulletins

1. [Trustees] A plan trustee and a plan administrator are plan fiduciaries because of the nature of their functions for a plan. IB 75-8, Question D-3.
2. People who perform purely ministerial functions for a plan within a framework of policies, interpretations, rules, practices and procedures made by others are not fiduciaries under Section 3(21). IB 75-8, Question D-2. This question contains examples of purely ministerial

functions.

3. An officer, director, or employee of an employer maintaining a plan will not be a fiduciary for the plan, unless he or she has or exercises any of the authority, responsibility or control described in Section 3(21)(A) or provides investment advice to the plan for a fee or other compensation. IB 75-8, Questions D-4 and D-5.
4. An attorney, accountant, actuary, or consultant for a plan who neither exercises nor has any of the responsibilities, authority or control described in Section 3(21)(A), and who does not provide investment advice to the plan for a fee or other compensation, is not a fiduciary to the plan under Section 3(21). IB 75-5, Question D-1.
5. A person who merely calculates the amount of benefits to which a participant is entitled in accordance with a formula contained in a plan document is not a fiduciary under Section 3(21). However, a person who has the final authority to authorize or disallow claims for benefits based on an interpretation of plan provisions relating to eligibility for benefits would be a fiduciary under Section 3(21). IB 75-8, Question D-3.

D. Prohibited Transaction Class Exemptions (PTE)

1. [Broker-Dealers] Where a broker-dealer acts as an investment adviser in recommending securities transactions and a second fiduciary decides whether each such transaction should be entered into, the broker-dealer may be a fiduciary by reason of providing investment advice within the meaning of ERISA Section 3(21)(A)(ii) and Code Section 4975(e)(3)(B). However, since he or she would not have the power to manage, acquire, or dispose of plan assets without the approval of the second fiduciary, he or she would not be an investment manager as that term is defined in ERISA Section 3(38). Final PTE C 78-10.
2. [Investment Advisor] A person may be a fiduciary by reason of being an investment adviser even if such person does not exercise investment discretion as that term is defined by the Securities and Exchange Commission under Section 3(a)(35) of the Securities Exchange Act of 1934. Final PTE C 78-10.

E. Advisory Opinions

1. The term "*investment discretion*" is defined in Section 3(a)(35) of the Securities Exchange Act of 1934. In general, a person who exercises investment discretion for a plan under that definition would also be a fiduciary with respect to the plan as defined in Section 3(21) of ERISA and Section 4975(e)(3) of the Code. A person also would also be a fiduciary as the result of rendering investment advice for compensation to a plan. *Proposed* Extension of Paragraph I(a) of PTE C 75-1.
2. [Banks] The mere fact that a plan invests in a savings account or certificate of deposit of a savings and loan association does not make the association a plan fiduciary. AO 77-11; AO 79-10.
3. [**Custodians**] A custodian of plan assets who has no discretionary authority or control over the management of the plan or the disposition of the assets, and who does not provide investment advice to the plan, is not a fiduciary under Section 3(21)(A). PLR 7907091.
4. [Insurance Companies] An insurance company maintaining a separate account in which a plan invests is a fiduciary to the plan. *Proposed* PTE C 78-19.
5. [Investments] A partnership in which a plan has invested does not become a plan fiduciary merely by reason of such investment. WSB 78-17.
6. [Plan Committee Members] The individuals serving on one investment committee of a plan with responsibility for managing plan assets and appointing investment managers for the plan are fiduciaries under Section 3(21)(A). AO 76-15.
7. [Trust Department Staff] A person who merely makes a report to plan fiduciaries on a plan's asset management staff and serves on a committee that advises Plan fiduciaries on plan investment policies and objectives will not be a plan fiduciary under Section 3(21)(A) or ERISA Regulations Section 2510.3-21. AO 77-68.
8. The advice and recommendations made to plans and plan fiduciaries by insurance agents and brokers, pension consultants and mutual fund principal underwriters (or their employees) regarding plan purchases of insurance contacts or annuities or mutual fund shares constitutes advice as to the value of securities or other property or recommendations as to the advisability of investing in, purchasing or selling securities or other property and could constitute investment advice so as to classify the persons who furnish such advice as fiduciaries if it is rendered under certain circumstances. *Proposed* PTE C 77-9; WSB 79-99.

F. Court Decisions

1. [General] The definition of fiduciary under ERISA Section 3(21) is to be broadly construed. Thus, fiduciary should be defined not only by reference to particular titles, such as trustee, but also by considering the authority that a particular person has or exercises over an employee benefit plan. Donovan v. Mercer, 747 F.2d 304, 5 EBC 2512 (5th Cir. 1984).
2. [General] ERISA fiduciary status is determined by focusing on the function performed by the individual rather than on the individual's title; an accounting firm was a fiduciary to the extent that it controlled whether or not contributions were returned to plan participants. Blan v. Marshall and Lasserman, 812 F.2d 810, 8 EBC 1495 (2d Cir. 1987).
3. [General] Because the terms of an employee benefit plan conferred authority on defendants to exercise discretion in the management of the plan and its assets, the defendants were fiduciaries as defined by ERISA Section 3(21). Donovan v. Bryans, 566 F. Supp. 1258, 4 EBC 1772 (E.D.Pa. 1983).
4. [General] ERISA permits the named plan fiduciary the option of delegating the responsibility of investing plan assets to a professional investment adviser who then might assume the ERISA fiduciary obligations to the plan, including the duties of care and loyalty. Lowen v. Tower Asset Management, Inc., 829 F.2d 1209, 8 EBC 2457 (2d Cir. 987).
5. [General] A fiduciary continues in his status as such absent any clear resignation or removal under permissible circumstances. Marshall v. Dekeyser, 485 F.Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
6. [General] ERISA Section 3(21)(A) limits the scope of both fiduciary status and responsibility; a person is a fiduciary with only for those aspects of the plan over which he or she exercises control or authority, and his or her fiduciary duty extends solely to those functions. Jury instructions should delineate the requisite control necessary to consider a person a fiduciary and warn jurors against drawing inferences of control or authority merely from a person's status, including status as a former employer, an officer, a principal shareholder or a director. Sommers Drug Stores Co. Employee Profit Sharing Trust v. Corrigan Enterprises, Inc., 793 F.2d 1456, 7 EBC 1782 (5th Cir. 1986), cert. denied, 479 U.S. 1089 (1987).
7. [General] Under ERISA Section 3(21), a person is a fiduciary to a plan to the extent that he or she has any discretionary authority or discretionary responsibility in the administration of such plan. A duty to report "difficulties" concerning borrowers interest payments includes authority, responsibility and discretion to determine what constitutes difficulties. One who is conferred such authority is a fiduciary as defined by ERISA Section 3(21). Davidson v. Cook, 567 F.Supp. 225, 4 EBC 1816 (E.D.Va. 1983), aff'd, 734 F.2d 10 (4th Cir. 1984).
8. [Attorneys] Attorneys who counsel a plan sponsor, members of a plan investment committee, and stockbrokers or dealers who recommend certain securities and then participate in the purchase or sale of the securities and receive a commission for their services, may be plan fiduciaries by reason of providing investment advice for a fee or other compensation. Eaves v. Penn, 587 F.2d 453 (10th Cir. 1978).
9. [Broker-Dealer] A stockbroker is a fiduciary as defined by ERISA when, without authorization, he invests the assets of an employee benefit plan in unsuitable, highly speculative securities and disregards the trustee's instructions to liquidate. Metzner v. D. H. Blair & Co., Inc., 663 F. Supp. 716, Fed. Sec. L. Rep. (CCH) 993,306, 8 EBC 2159 (S.D.N.Y. 1987).
10. [**Custodians**] A plan custodian can be a fiduciary, but only if the custodian possesses the requisite discretionary authority and discretionary control required by Section 3(21). The parenthetical language after "any fiduciary" in Section 3(14)(A) does not expand upon persons who are fiduciaries. A person is only a fiduciary under Section 3(14)(A) if such person is a fiduciary under Section 3(21). The Hibernia Bank v. International Brotherhood of Teamsters, Chauffeurs, Warehouseman and Helpers of America, 411 F.Supp. 478 (N.D.Cal. 1976).
11. [Insurance Agent] An insurance agent, who was solely responsible for formulating the specifications of an employee plan, represents himself as the administrator of the plan and subsequently gives investment advice regarding such plan, even though he was never formally appointed as plan administrator nor paid a fee for his services, is deemed a fiduciary as defined by Section 3(21)(A). Applying the agency theory of apparent authority, the insurance company, as the principal of the insurance agent, is designated a fiduciary as well. Miller v. Lay Trucking C&, Inc, 606 F. Supp 1326 (N.D.Ind. 1985).
12. [Insurance Companies] Congress did not want to make an insurance company that sells a standard annuity contract - one that provides "benefits the amount of which is guaranteed by the insurer" -- a fiduciary toward the contract's purchaser. However, where pension trustees did not buy an insurance contract with a fixed payment but turned over the assets of the pension plan to an insurance company to manage with full investment discretion, subject only to a modest income guarantee, that company was a fiduciary as defined in Section 3(21) of ERISA. Amato v.

Western Union International, Inc., 596 F. Supp. 963, 5 EBC 2718 (S.D.N.Y. 1984), aff'd in part and rev'd in part, 773 F.2d 1402 (2d Cir. 1985).

13. [Mergers & Acquisitions] An individual acted as a plan fiduciary when he recommended, designed, and implemented an amendment to a profit-sharing plan that changed the plan to an ESOP and required the plan to invest large sums of money in employer stock so as to enable the individual to acquire control of the employer. Eaves v. Penn, 587 F.2d 453 (10th Cir. 1978).
14. [Plan Administrator] By the very nature of his position, a plan administrator is a fiduciary to the plan. Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
15. [Plan Sponsor] Officers and directors of a plan sponsor are plan fiduciaries if they exercise control through the selection of the investment committee, administrative committee or plan officers or directors. Eaves v. Penn, 587 F.2d 453 (10th Cir. 1978); Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
16. [Plan Sponsor] An employer, whose only control over the management of the employee welfare plan is its authority to appoint, retain and remove the plan's administrator, is only a fiduciary for these acts and not for any others. Independent Association of Publishers' Employees, Inc. v. Dow Jones & Co., Inc., 671 F Supp. 1365 (S.D.N.Y. 1987).
17. [Plan Sponsor] An employer is a fiduciary to a plan only when and to the extent that it engages in activities governed by ERISA, including acing in the capacity of plan administrator. Amato v. Western Union International, Inc., 773 F.2d 1402, 6 EBC 2226 (2d Cir. 1985), cert. dismissed, 474 U.S. 1113 (1986). Contra Ashenbaugh v. Crucible, Inc., 854 F.2d 1516, 9 EBC 2560 (3d Cir. 1988).
18. [Plan Sponsor] An employer that is also a plan administrator of a plan has assumed two distinct statuses. ERISA's fiduciary duty attaches when the employer/administrator performs the function of a plan administrator but not when it acts in the capacity of an employer. When renegotiating a welfare benefit plan or benefits not vesting under ERISA the employer/administrator is acting in its employer capacity and, thus, can breach no ERISA fiduciary duty, because such fiduciary obligations do not attach to employer functions. United Independent Flight Officers, Inc. v. United Air Lines, Inc., 756 F.2d 1262, 6 EBC 1075, 6 EBC 1291, 118 L.R.R.M. (BNA) 2474,102 Lab. Cas. (CCH) 911,382 (7th Cir. 1985).
19. [Service Provider] Where a defendant provided claims processing services to a health and welfare fund using adjustment standards established jointly by the fund and the defendant and the fund made final determinations on any contested payments according to the adjustment standards, it was not established that the defendant exercised sufficient discretionary authority or control over the fund or its assets to make it a fiduciary within the meaning of Section 3(21)(A) of ERISA. Donovan v. Robbins, 558 F. Supp. 319 (N.D.Ill. 1983), aff'd, 703 F.2d 570 (7th Cir. 1983).
20. [Recordkeeping] A company was delegated by a bank trustee or custodian for self-directed IRA accounts the function of maintaining records and preparing appropriate reports required by Section 103 of ERISA. A company maintaining records necessary for the preparation of such reports is a plan fiduciary and must perform these functions with the degree of care set forth in Section 404(a)(1)(B). Redwood Bank v. QTA, Inc., No. C-79-1586, slip op. (N.D.Cal., Oct. 23, 1979).
21. [Trustees] The trustees of a pension or welfare plan are fiduciaries under Section 3(21)(A). Marshall v. Snyder, 430 F. Supp. 1224 (E.D.N.Y. 1977), aff'd in part, 572 F.2d 894 (2d Cir. 1978); Marshall v. Dekeyser 485 F. Suay (29, I EBC 1898 (W.D.Wis.1979).
22. [Trustees - Directed] Trustees who merely distribute plan assets upon direction from the plan's administrators in accordance with a court order and with no discretionary authority over the plan assets, do not exercise the required authority over a plan's assets that would impose fiduciary responsibilities. Richardson v. U.S. News & World Report, 623 F. Supp. 350 (D.D.C. 1985).
23. [Trustees - Directed] Even though a plan trustee has no authority for investment decisions, it cannot disavow itself a responsibility for such decisions, since it is still a fiduciary. However, under the allocation provisions of Section 405(c)(1), the trustee may, in fact, not be liable for such decisions. Leonard v. Drug Fair, Inc., No. 78-1335, Fed. Sec. L. Rep. (CCH) 997,144 (D.D.C. 1979).

Section 3(21)(B)

Investment Company (Mutual Fund) as Fiduciary

If any money or other property of an employee benefit plan is invested in securities issued by an investment company registered under the Investment Company Act of 1940, such investment shall not by itself cause such investment company or such investment company's investment adviser or principal underwriter to be deemed to be a fiduciary or a party in interest as those terms are defined in this title, except insofar as such investment company or its investment adviser or principal underwriter acts in connection with an employee benefit plan covering employees of the investment company, the investment adviser or its principal underwriter. Nothing contained in this subparagraph shall limit the duties imposed on such investment company, investment adviser, or principal underwriter by any other law.

A. Conference Report

See coverage of this provision on pages 296-297 of the Congressional Conference Report.

B. Interpretive Bulletins

1. The principles of Section 3(21)(B) are restated in IB 75-3, which also states that if an investment company, its investment adviser or its principal underwriter is a fiduciary or party in interest for a reason other than the investment in the securities of the investment company, such a person remains a fiduciary or party in interest regardless of Section 3(21)(B).

Section 3(38)

"Investment Manager"

The term "investment manager" means any fiduciary (other than a trustee or named fiduciary, as defined in section 402(a)(2)) -		
(A)	Who has the power to manage, acquire, or dispose of any asset of a plan;	
(B)	Who is -	
	(i)	Registered as an investment advisor under the Investment Advisers Act of 1940;
	(ii)	Is a bank, as defined in that Act; or
	(iii)	Is an insurance company qualified to perform services described in subparagraph (A) under the laws of more than one State; and
(C)	Has acknowledged in writing that he is a fiduciary with respect to the plan.	

A. Conference Report

Page 302 of the Congressional Conference Report discusses the term investment manager.

B. Interpretive Bulletins

1. A person who is not registered under the Investment Advisers Act of 1940 because of an exemption from registration under that act (and who is not a bank or an insurance company) may not be an investment manager. IB 75-5, Question FR-6.
2. A person cannot be an investment manager if his or her application for registration under the Investment Advisers Act is still pending. IB 75-5, Question FR-7.

C. Advisory Opinions

1. An entity is an investment manager as defined in Section 3(38) of ERISA if it meets the three tests set forth in the statute.
2. A person can be both a named fiduciary and an investment manager provided that, as named fiduciary, such person does not have the power on behalf of the plan to appoint himself or herself or monitor his or her own performance as investment manager. AO 77-69/70.
3. A person who is registered only as a broker-dealer under the Securities Exchange Act of 1934 cannot serve as an investment manager. AO 76-20.

D. **Court Decisions**

1. Where an investment management firm had broad powers to manage plan assets, was registered as an investment adviser under the Investment Advisers Act of 1940, and had explicitly acknowledged itself as a fiduciary to the plan in its employment contract, it is considered an investment manager as defined in ERISA, regardless of any oral modifications of the agreement. Lowen v. Tower Asset Management, Inc, 829 F.2d 1209, 8 EBC 2457 (2d Cir. 1987).
2. Where an investment management company was not registered as an independent adviser under the Investment Advisers Act of 1940, was not a bank or insurance company, and had not acknowledged itself in writing as a fiduciary to the plan, it is not considered an investment manager as defined in ERISA. The trustee of an ESOP may not claim a defense under ERISA Section 405(d)(1). Whitfield v. Cohen, 682 F.Supp. 188, 9 EBC 1739 (S.D.N.Y 1988).

Plans Covered

ERISA Section 4

Section 4	
Except as provided in subsection (b) and in sections 201, 301 and 401, this title shall apply to any employee benefit plan if it is established or maintained:	
(1)	By any employer engaged in commerce or in any industry or activity affecting commerce; or
(2)	By any employee organization or organizations representing employees engaged in commerce or in any industry or activity affecting commerce; or
(3)	By both.
The provisions of this title shall not apply to any employee benefit plan if -	
(1)	Such plan is a governmental plan (as defined in section 3(32));
(2)	Such plan is a church plan (as defined in section 3(33)) with respect to which no election has been made under section 410(d) of the Internal Revenue Code of 1954;
(3) (4) (5)	Such plan is maintained solely for the purpose of complying with applicable workmen's compensation or unemployment compensation or disability insurance laws; Such plan is maintained outside of the United States primarily for the benefit of persons substantially all of whom are nonresident aliens; or Such plan is an excess benefit plan (as defined in section 3(30)) and is unfunded.

A. **Conference Report**

These provisions are discussed on pages 255-256 of the Congressional Conference Report.

Fiduciary Duties

ERISA Section 404

Section 404(a)(1)
Subject to sections 403(c) and (d), 4042, and 4044, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and
For the exclusive purpose of:

Providing benefits to participants and their beneficiaries, and
Defraying reasonable expenses of administering the plan;
With the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims;
By diversifying the investments of the plan so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so; and
In accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of this subchapter or subchapter III of this chapter.

A. Conference Report

All the fiduciary responsibilities imposed by Section 404(a)(1) are discussed at pages 302-305 of the Congressional Conference Report.

B. Regulations

1. Plan assets are defined in DOL ERISA Regulation 2510.3-101.
2. Prudence is covered in DOL ERISA Regulation 2550.404a-1 on "Investment Duties" and the specific coverage of § 404(a)(1)(B), below.
3. See DOL ERISA Regulation 404c-1 , which exempts fiduciaries from certain ERISA liability if plans meet certain conditions and participants direct their own investments.

C. Interpretive Bulletins

1. Social Investments ("Economically Targeted Investments") (ETIs). Establishes DOL's position on permissibility of making investments which achieve a social goal in addition to a financial return. The IB indicates that ETIs are not prohibited by ERISA, and that their choice as an investment must follow DOL ERISA regulation 2550.404a-1 regarding Investment Duties, be prudent, not be a prohibited transaction, and not provide less return to a plan than a normal investment. IB 94-1.
2. Proxy Voting. Among the fiduciary responsibilities of an investment manager are those to vote proxies for stock owned by ERISA plans. IB 94-2.
3. Investment Policies. An investment policy designed to further the purposes of a plan and its funding policy is consistent with, but not required by, ERISA 404(a)(1)(A) and (B). IB 94-2.

D. Advisory Opinions

1. Pursuant to ERISA Procedure 76-1 and particularly Section 5.02(o), the Department of Labor ordinarily will not issue advisory opinions on ERISA Section 404(a). AO 80-13A.
2. Service by a bank as trustee of a plan that has a significant portion of its assets invested in employer securities, while the bank is also a substantial secured creditor of the employer, may constitute a violation of Section 404(a)(1) by the bank. AO 76-32.

E. Court Decisions

1. [Effective Date] Actions by fiduciaries occurring after 1974 are not insulated from ERISA coverage merely because the roots of such action can be traced to an event prior to the effective date of ERISA. Marshall v. Craft, 463 F. Supp. 493 (N.D.Ga. 1978); Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
2. [Exemption Applicability] Exemptions from the prohibited transaction restrictions have no effect on the basic fiduciary responsibility rules of Section 404(a)(1). Marshall v. Dekeyser, 485 F.Supp. 629, 1 EBC 1898 (W.D.Vas. 1979).
3. [Precedent] Section 404(a)(1) codifies the common law rule that a trustee owes individual loyalty to the beneficiaries. Although trustees should carefully consider all recommendations submitted by the parties who appointed them, trustees are bound to exercise their independent judgment when making decisions in the administration of the trust. Sheet Metal Workers' International Association v. Central Florida Sheetmetal Contractors Association, 234 NLRB (CCH) No. 162 (1978).
4. [Precedent] ERISA Section 404 essentially codified the strict fiduciary standards that trustees

under Section 302 of the Labor-Management Relations Act must meet. The legislative history of ERISA demonstrates that any employee benefit fund trustee is a fiduciary whose duty to the trust beneficiaries must overcome any loyalty to the interest of the plan that appointed him. N.L.R.B. v. Amax Coal Co., 453 U.S. 322,107 L.R.R.M. (BNA) 2769, 91 Lab. Cas. (CCH) Para 12,821, 2 EBC 1489 (1981).

5. [Bank Stock - Purchase/Retention/Sale of Fiduciary Bank/BHC Stock] The discretionary purchase, retention, or sale of the stock of the fiduciary bank is imprudent. DOL indicates that "*it burdens our imagination to envision a situation in which a trustee with investment discretion could make an objective decision, solely on the basis of the prudence standard, regarding the purchase or sale of its own stock."* [emphasis added] See 1980 letter from DOL to OCC. Also see AO 88-9 regarding self-directed IRA purchases and AO 88-28 covering self-directed IRA purchases on an initial public offering (IPO) from a mutual-to-stock thrift conversion, and AO 92-23 which permits non-discretionary purchase and retention of holding company stock.
6. [Exclusive Purpose] The statutory phrase, "*solely in the interest*" is, at least in part, a codification of the most fundamental duty traditionally owed by a trustee - the duty of loyalty. Accordingly, a fiduciary bears a heavy burden in justifying his conduct in situations where his interests or the interests of others come into conflict with those of plan beneficiaries. Marshall v. Snyder, 430 F. Supp. 1224 (S.D.N.Y. 1977), aff'd in part, rev'd in part, 572 F.2d 894 (2d Cir. 1978).
7. [Exclusive Purpose] A plan's administrator who is also an officer for the corporate employer, as a fiduciary has a duty to avoid putting himself in a position where he may be forced to compromise his duty of complete loyalty to the plan to act on the employer's behalf. Amato v. Western Union International, Inc., 773 F.2d 1402, 6 EBC 2226 (2d Cir. 1985), cert. dismissed, 474 U.S. 1113 (1986). Contra Ashenbaugh v. Crucible, Inc., 854 F.2d 1516, 9 EBC 2560 (3d Cir. 1988).
8. [Exclusive Purpose] ERISA Section 404(a)(1) and subsection (a) require a fiduciary to act solely in the interest of the participants and beneficiaries of a plan and for the exclusive purpose of paying plan benefits at a reasonable cost. One who, in his capacity as a trustee, attempts to prevent a trust from suing him for substantial damages cannot reasonably be said to do so solely for the interest or for the exclusive purpose of benefiting others. Iron Workers Local No. 272 v. Bowen, 624 F.2d 1255 (5th Cir. 1980).
9. [Exclusive Purpose] Preferential effect of trustees' decision alone does not constitute a violation of Section 404(a) of ERISA. Id.
10. [Exclusive Purpose] Where trustees resolve to extend plan coverage to themselves as trustees and participants in the plan and paid themselves benefits of the plan, such self-dealing conduct was improper and a violation of fiduciary duty under ERISA Section 404(a)(1)(A) and (D). Donovan v. Daugherty, 550 F.Supp. 390, 3 EBC 2079 (S.D.Ala. 1982).
11. [Exclusive Benefit] An employer that creates a retirement program that encourages early retirement, thereby reducing the workforce at overstaffed facilities, does not violate the exclusive purpose duty because of the consequential benefit of enhanced efficiency to the employer. Trenton v. Scott Paper Co., 832 F.2d 806, 45 Fair Empl. Prac. Case (BNA) 327, 45 Empl. Prac. Dec. (CCH) 137,744, 9 EBC 1075 (3d Cir. 1987), cert. denied, 108 S. Ct. 1576, 9 EBC 1968 (1988).
12. [Exclusive Benefit] A fiduciary who pays himself a sales commission from plan assets in the sale of plan property despite the lack of any obligation on the part of the plan to pay the commission violates Section 404(a)(1). Marshall v. Kelly, 465 F. Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
13. [Exclusive Benefit] Where the sale of ownership of the employer is likely to have an impact on the plan's ability to obtain payment on employer notes held by the plan, which, in turn, is likely to affect the plan's ability to pay benefits under the plan, the plan trustees' duties of loyalty and prudence require them to advise the participants of the full facts concerning the sale. Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wisc. 1979).
14. [Exclusive Purpose - Arbitrary & Capricious] Because the potential burden of *per se* personal liability for any violation of ERISA might deter capable persons from serving as trustees of benefit plans, Section 404 of ERISA does not establish a *per se* rule of fiduciary conduct and a trustee's decision to cancel past service credits will not be overturned unless it is arbitrary and capricious. Fentron Industries, Inc v. Shopmen Pension Fund, 674 F.2d 1300, 34 Fed. R. Serv.2d 281, 94 Lab. Cas. (CCH) Para 113,559, 3 EBC 1323 (9th Cir. 1982).
15. [Exclusive Purpose - Arbitrary & Capricious] In reviewing the propriety of trustees' action, the judicial standard is whether the trustees acted in an arbitrary and capricious manner or abused their discretion. Robinson v. Central States Pension Fund, 572 F.2d 1208 (8th Cir. 1978). To the same effect: see Robinson v. United Mine Workers, 449 F. Supp. 941 (D.D.C. 1978); Shaw v. Kruidenier, 620 F.2d 307 (8th Cir. 1980); Mosley v. The National Maritime Union Pension and Welfare Plan, 451 F. Supp. 226 (E.D.N.Y. 1978); Taylor v. Bakery and Confectionery Welfare Fund, 455 F. Supp. 816 (E.D.N.C. 1978); Peters v. Operating Engineers Pension Fund, No. CV

76-3747-FW, slip op. (D.C.Cal., April 14, 1979); Bayles v. Central States Pension Fund, 602 F.2d 97 (5th Cir. 1979); Vaughn v. Metal Lathers Local 46 Pension Fund, No. 78 Civ. 2170 (S.D.N.Y. June 14, 1979). To the contrary, see Winpisinger v. Aurora Corporation Illinois, 456 F. Supp. 559 (N.D. Ohio 1978) (standard for judicial review is whether trustees complied with their ERISA fiduciary responsibilities). See also Pierce v. NECA-IBEW Welfare Trust Fund, 488 F. Supp. 559 (E.D.Tenn. 1978), aff'd, 620 F.2d 589 (6th Cir.), cert. denied, 449 U.S. 1015 (1980).

16. [ESOP] While an ESOP fiduciary may be released from certain per se violations on investments in employer securities under the provisions of ERISA Sections 406 and 407, the structure of ERISA itself requires that in making an investment decision of whether or not a plan's assets should be invested in employer securities, an ESOP fiduciary, just as fiduciaries of other plans, is governed by the solely-in-the-interest and prudence tests of Sections 404(a)(1)(A) and (B). Eaves v. Penn, 587 F.2d 453 (10th Cir. 1978).
17. [ESOP] Trustee's failure to conform stock ownership plan to Treasury requirements applicable to ESOPs in effect at the time of plaintiff's termination was not a breach of fiduciary duty under Section 404(a)(1) of ERISA for which a beneficiary may sue when defendant's stock ownership plan never functioned as an ESOP within the meaning of ERISA regulations. Allen v. The Katz Agency, Inc. Employee Stock Ownership Plan, 677 F.2d 193, 3 EBC 1352 (2d Cir. 1982).
18. [Plan Management] Corporate shareholders and directors, who are also pension plan investment managers and custodians violated their fiduciary duties when they refused to attend meetings of the shareholders, board of directors and trustees, thereby preventing any action in favor of the plan while also opposing the sale of shares of preferred hospital stock to the plan. Schoenholtz v. Doniger, 628 F. Supp. 1420, 7 EBC 1501 (S. D. N. Y. 1986).
19. [Plan Management] An insurance company that possesses the ultimate responsibility to grant or deny claims is a fiduciary under ERISA and must comply with the fiduciary duties enumerated in Section 404. Wickman v. Northwestern National Life Insurance, 9 EBC 1482 (D. Mass. 1987).
20. [Plan Management] An operator of a corporation's pension plan, who is also controlling the corporation in receivership, does not violate any fiduciary duties by amending the plan, freezing the accrual of benefits, returning excess funds to the corporation, and terminating the plan in accordance with the state court's appointment order and ERISA. Chait v. Bernstein, 645 F. Supp. 1092, 8 EBC 1126 (D.N.J. 1986), aff'd, 835 F.2d 1017, 9 EBC 1257 (3d Cir. 1987).
21. [Contributions] Corporate president violated his fiduciary duties when he failed to forward employer contributions and employee contributions, although they were deducted from employee paychecks; failed to notify employees that contributions had not been forwarded; allocated the monies to corporate expenses; and assumed conflicting roles of fiduciary and an officer of a struggling corporation. PBGC v. Solmsen, 671 F. Supp. 938, 9 EBC 1391 (E.D.N.Y 1987).
22. [Loans] Where trustees did not hold the local's proposal for a "loan at arm's length and compare it to other available investments, but instead did their best to accommodate" the local's needs, they violated ERISA Section 404(a)(1)(A)(i). Davidson v. Cook, 567 F. Supp. 225, 4 EBC 1816 (E. D. Va. 1983).
23. [Loans] A trustee breaches its fiduciary obligations by (1) making loans of plan assets under terms more favorable to the debtor than the plan and then not collecting the balance due; (2) allowing loans of plan assets to a debtor with an unproven business record and unstable financial condition; (3) lending an unreasonably large portion of loan assets to one entity and then concealing the existence of such loans; and (4) failing to adhere to guidelines in plan requiring that loans be at a reasonable rate of interest with adequate collateral. Brock v. Gilliken, 677 F. Supp. 398, 9 EBC 1803 (E.D.N.C. 1987).
24. [Loans] A fiduciary who makes or renews loans of plan assets based on inadequate security and at a lower interest rate than contemporaneous loans to others, and who fails to pursue timely repayment of principal and interest and to enforce the security agreement violates Section 404(a)(1). Marshall v. Kelly, 465 F. Supp. 341, 1 EBC 1850 (W.D.Okla. 1978); Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
25. [Loans/Leases] Pension fund trustees do not breach their fiduciary duties when they approve the construction of an office building after seeking advice from three legal firms, professional engineers, architects, appraisers, contractors and, in addition, eliminate certain aspects or demand cheaper designs when the project appears over budget. Furthermore, a lease agreement with a union *that contains certain favorable terms for the union, while also benefiting the plan participants and beneficiaries*, does not make the transaction imprudent when the trustees' *decisions are calculated to benefit the fund members*. Donovan v. Walton, 609 F.Supp. 1221, 6 EBC 1677 (S.D.Fla. 1985), aff'd, Brock v. Walton 794 F.2d 586, 7 EBC 1769, reh'g denied, 802 F.2d 1399 (11th Cir. 1986).
26. [Mergers & Acquisitions] A corporation which, through its pension board, acts as a fiduciary for

the employee pension plan, does not breach its fiduciary duties when a purchase agreement selling a division of the company provides for the transfer of all assets, properly allocable under ERISA, to the trustees of the successor corporation's pension plan, provided the sale was not to avoid any unfunded pension obligations. United Steelworkers 2116 v. Cyclops Corp., 653 F. Supp. 574, 8 EBC 1194 (S.D.Ohio 1987), aff'd in part, vacated in part, 860 F.2d 189, 10 EBC 1345 (6th Cir. 1988).

27. [Mergers & Acquisitions] Pension plan fiduciary, who liquidated stock of one corporation to buy shares of another corporation to further his own corporate expansion goal without any effort to seek independent analysis to examine further investment opportunities, does not satisfy the prudent person test. Sandoval v. Simmons, 622 F.2d Supp. 1174, 6 EBC 2161 (C.D.Ill. 1985).
28. [Service in Dual Capacities: Lender and Plan Trustee] Prior to naming a bank as plan trustee, an ERISA plan had invested $796,000 in unsecured notes issued by Supreme Finance (Supreme), a used car finance company. During this time, the bank had extended a $3 million secured line of credit to Supreme. After being named trustee, the bank refused to renew its line of credit because of Supreme's financial difficulties. At the same time, the bank gave notice of resignation as trustee. Supreme subsequently filed for bankruptcy and the only assets remaining were applied to the bank's loan. The federal district court found, and was upheld on appeal, that:

    a. The bank's acceptance of the trusteeship did not violate ERISA because -

        1. nowhere does ERISA explicitly prohibit a trustee from holding positions of dual loyalties, and
        2. the act did not cause the plan's losses.

    b. The bank's decision not to renew Supreme's line of credit did not violate ERISA. The court noted that a fiduciary serving in both corporate and fiduciary capacities may make decisions in its own benefit without violating its fiduciary duty to the plan.

    (Friend v. Sanwa Bank California, CA 9, No. 92-55641, 9-13-94).

29. [Summary Plan Disclosure] ERISA Section 404(a)(1) imposes a duty to provide employees with a comprehensive explanation of the plan. However, it does not impose an affirmative duty to alert an individual participant as to the vesting requirements of the plan once that individual notifies fiduciaries that he was "thinking of retirement." Schlomchik v. Retirement Plan of Amalgamated Insurance Fund, 502 F. Supp. 240 (E.D.Pa. 1980), aff'd, 671 F.2d 496 (3d Cir. 1981).

Section 404(a)(1)(A)	
Subject to sections 403(c) and (d), 4042, and 4044, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and	
(A)	For the exclusive purpose of-
	Providing benefits to participants and their beneficiaries; and
	Defraying reasonable expenses of administering the plan.

A. Interpretive Bulletins

1. A vacation plan may pay all or any portion of the benefits to which a plan participant or beneficiary is entitled to a third party without violating Section 404(a)(1)(A) if (a) the plan documents expressly provide for such payments to third parties at the direction of a participant or beneficiary, (b) the participant or beneficiary directs in writing that the plan trustees pay a named third party all or a specified portion of the sum of money that would otherwise be paid to the participant or beneficiary, and (c) payment is made to the third party only when or after the money would otherwise be payable to the participant or beneficiary. IB 78-1.
2. Social Investments ("Economically Targeted Investments") (ETIs) Establishes DOL position on permissibility of making investments which achieve a social goal in addition to a financial return. Indicates that ETIs are not prohibited by ERISA, and that their choice as an investment must follow DOL ERISA regulation 2550.404a-1 regarding Investment Duties, be prudent, not be a prohibited transaction, and not provide less return to a plan than a normal investment. IB 94-1.

3. Proxy Voting. Among the fiduciary responsibilities of an investment manager are those to vote proxies for stock owned by ERISA plans. IB 94-2.
4. Investment Policies. An investment policy designed to further the purposes of a plan and its funding policy is consistent with, but not required by, ERISA 404(a)(1)(A) and (B). IB 94-2.

B. Advisory Opinions

1. Payments by a plan for services rendered by a person prohibited from being employed in any capacity by the plan may violate Section 404(a)(1)(A). AO 75-90.
2. If a participant or beneficiary in Plan A refuses to repay an erroneous overpayment of benefits to Plan A, the fiduciaries of Plan B, a related plan, would fail to be acting solely in the interests of the plan's participants and beneficiaries if they attempted to penalize the participant or beneficiary by delaying or reducing benefits under Plan B. AO 77-07.
3. A plan provision authorizing reimbursement of legal fees in the event of any legal action that may arise from the performance of a trustee's fiduciary duties is too broad and would be prohibited under Section 404(a)(1)(A). Where a fiduciary is found in a legal proceeding to have violated his fiduciary duties, reimbursement of legal fees by the plan would not be permitted. AO 78-29.

C. Court Decisions

1. [Provide Benefits] Dividing pension benefits, once they are being paid out, between a participant and his divorced spouse does not violate Section 404(a)(1)(A). Campa v. Campa, 89 Cal. App.3d 113C (1st Dist. 1979), appeal dismissed, Carpenters Pension Trust Fund for Northern California v. Campa, 444 U. S. 1028 (1980).
2. [Provide Benefits] The payment of rent on behalf of the widow of a former plan trustee constitutes a violation of Section 404(a)(1)(A) even though the payment was morally commendable and not made for the personal gain of plan fiduciaries. Marshall v. Cuevas, I EBC 1580 (D.P.R. 1979).
3. [Provide Benefits] Where a plan participant has nonforfeitable vested pension rights under the plan, the plan administrative committee's denial of those rights; based on a retroactive plan amendment adopted by the plan sponsor violated the administrative committee's fiduciary duty to pay benefits when due. Fox v. Abrams, No. CV 77-881-ALS, slip op. (C.D.Cal. 1978).
4. [Exclusive Purpose] Plan monies, even if they constitute surplus assets, must be applied for the exclusive purpose of plan participants and beneficiaries. Marshall v. Snyder, 430 IF. Supp. 1224 (S.D.N.Y. 1977), aff'd in part, rev'd in part, 572 F.2d 894 (2d Cir. 1978).
5. [Exclusive Purpose] Where a plan trustee fails to keep adequate records of the plan's financial obligations, questions of whether the plan owes money to the trustee should be resolved in favor of the plan. Marshall v. Kelly, 465 F. Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
6. [Exclusive Purpose] Lease by a plan of an aircraft unnecessary for plan operation violates Section 404(a)(1). Usery v. Wilson, 3-76-373 (E.D.Tenn. 1977) (consent order).
7. [Exclusive Purpose] Purchase by a multiemployer plan of individual automobile insurance policies for plan trustees and employees violates Section 404(a)(1)(A). Usery v. Wilson, 3-76-373 (E.D.Tenn. 1977) (consent order).
8. [Reasonable Expenses] Payments of in excess of $1 million over a two and one-half year period by a multiemployer plan to an individual for administrative services constitutes excessive compensation in violation of Section 404(a)(1)(A). Marshall v. Snyder, 430 F. Supp. 1224 (S.D.N.Y. 1977), aff'd in part, 572 F.2d 894 (2d Cir. 1978). To the same effect, see Marshall v. Knee, No. C-3-7793 (S.D.Ohio 1977) (complaint).
9. [Reasonable Expenses] A fiduciary who causes a plan to pay excessive amounts for the construction of a building on plan property violates Section 404(a)(1)(A). Marshall v. Kelly, 465 F. Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).

Section 404(a)(1)(B) **"Prudent Man Rule"**
Subject to sections 403(c) and (d), 4042, and 4044, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries **and** with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character with like aims.

A. Statute

Investments in collectibles are generally prohibited by Section 408(m) of the Internal Revenue Code and PTE 91-55.

B. Regulations

1. Refer to DOL ERISA Regulation 2550.404a-1.

    a. The regulation sets forth guidelines for plan fiduciaries for compliance with the prudence requirement in connection with their investment duties.
    b. As a general rule, a fiduciary, in connection with his or her investment duties, is required to give appropriate consideration to those facts and circumstances that, given the scope of such fiduciary's investment duties, the fiduciary knows or should know are relevant to the particular investment or investment course of action involved. This includes consideration of the role an investment is intended to play in the plan's investment portfolio for which the fiduciary has investment duties.
    c. The regulations also set forth a safe harbor rule. If a fiduciary complies with the safe harbor rule, the Labor Department will presume that the fiduciary has complied with the prudence requirement.

    The safe harbor rule requires a fiduciary in connection with any particular investment or investment course of action -

    a. To determine that the investment is reasonably designed as part of the portfolio (or the portion of the plan's portfolio) for which the fiduciary has investment duties) to further the purposes of the plan, taking into account the investment's risk of loss and opportunity for gain; and
    b. To consider the portfolio's (or portion of the portfolio's) -

        i. Diversification,
        ii. Liquidity and current return relative to plan cash flow, needs, and
        iii. Projected return relative to plan funding requirements.

2. For a definition of plan assets, see DOL ERISA Regulation 2510.3-101.
3. See DOL ERISA Regulation 404c-1, which exempts fiduciaries from certain ERISA liability, including the duty to monitor for prudence, if plans meet certain conditions and participants direct their own investments.

C. Interpretive Bulletins

1. A plan fiduciary responsible for appointing trustees or other plan fiduciaries should periodically review the performance of such trustees or other fiduciaries. The procedure for review may vary according to the circumstances. IB 75-8, Question FR-17.
2. Plan fiduciaries may rely on information and data supplied by non-fiduciaries in discharging their fiduciary duties. IB 75-8, Question FR-11.
3. Social Investments ("Economically Targeted Investments") (ETIs) Establishes DOL position on permissibility of making investments which achieve a social goal in addition to a financial return. Indicates that ETIs are not prohibited by ERISA, and that their choice as an investment must follow DOL ERISA regulation 2550.404a-1 regarding Investment Duties, be prudent, not be a prohibited transaction, and not provide less return to a plan than a normal investment. IB 94-1.
4. Proxy Voting. Among the fiduciary responsibilities of an investment manager are those to vote proxies for stock owned by ERISA plans. IB 94-2.
5. Investment Policies. An investment policy designed to further the purposes of a plan and its funding policy is consistent with, but not required by, ERISA 404(a)(1)(A) and (B). IB 94-2.

D. Advisory Opinions

1. [General] Section 404(a)(1)(B) does not absolutely prohibit any general type of investment. Whether an investment is prudent depends on the nature of the investment and the character and aims of the plan. AO 75-83.
2. [Bank Stock - Purchase/Retention/Sale of Fiduciary Bank/BHC Stock]: The discretionary

purchase, retention, or sale of the stock of the fiduciary bank is imprudent. DOL indicates that "*it burdens our imagination to envision a situation in which a trustee with investment discretion could make an objective decision, solely on the basis of the prudence standard, regarding the purchase or sale of its own stock."* [emphasis added] See 1980 letter from DOL to OCC. Also see AO 88-9 regarding self-directed IRA purchases and AO 88-28 covering self-directed IRA purchases on an initial public offering (IPO) from a mutual-to-stock thrift conversion, and AO 92-23 which permits non-discretionary purchase and retention of holding company stock.

3. [Mortgage Valuations] Plan fiduciaries will be acting prudently under Section 404(a)(1)(B) if they value plan assets consisting of real estate mortgage loans that the plan has no current intention of selling and that are not financially troubled at the remaining principal balance of the loan. Financially troubled loans should be valued on the basis of any guarantees, security or other factors that a prudent person would deem relevant. AO 77-78; AO 77-81.
4. [DOL Investigations] Where the Labor Department is already conducting an investigation of plan investments, the new investment managers for the plan will be acting prudently under Section 404(a)(1)(B) if they report any breaches of fiduciary duties by others of which they become aware to the plan trustees and to the Labor Department and make available to the Labor Department all information requested about past transactions. AO 77-60/61; AO 77-79/80.

E. Court Decisions

1. [General] ERISA's prudence test is not that of a prudent lay person but, rather, that of a prudent fiduciary with experience dealing with a similar enterprise. Marshall v. Snyder 430 F. Supp. 1224 (S.D.N.Y. 1977), aff'd in part, rev'd in part, 572 F.2d 894 (2d Cir. 1978).
2. [General] Plan trustees violate their fiduciary obligations if they act arbitrarily or capriciously in light of all of the surrounding circumstances. Reviewing courts are hesitant to second guess the trustees' decisions and will do so only if there is no reasonable justification for the decision. Stewart v. National Shopmen Pension Fund, 795 F.2d 1079, 7 EBC 1917 (D.C.Cir. 1986).
3. [General] Fiduciaries are not relieved of their fiduciary responsibilities by their lack of involvement in a particular transaction. By failing to monitor the conduct of other trustees, a trustee may violate Section 404(a)(1)(B) and be held liable under Section 405(a)(2). Marshall v. Dekeyser 485 F, Supp. 629, 1 EBC 1898 (W.D.Wisc. 1979).
4. [General] The prudent person standard found in Section 404 is violated if a trustee who lacks the requisite education, experience and skill to make investment decisions fails to consult independent counsel prior to the making of such decisions. Donovan v. Walton, 609 F. Supp. EM, 6 EBC 1677 (S.D.Fla. 1985), aff'd, Brock c Walton 794 F.2d 586, 7 EBC 1769, reh'g denied, 802 F.2d 1399 (11th Cir. 1986).
5. [Plan Management] Failure by trustees of a multiemployer plan to maintain full and complete minutes of trustees meetings constitutes a violation of Section 404(a)(1)(B). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
6. [Plan Management] Implicit in ERISA's standard for fiduciary responsibility set forth under Section 404 is fiduciaries' duty to take an initiative to cause reasonably available evidence to be developed and considered in the decision making process. An employer and underwriter breached the duly to develop such evidence by relying upon erroneous, incomplete and sometimes irrelevant information in denying claims and thereby rendered their decisions in an arbitrary and capricious manner. Rosen v. Hotel and Restaurant Employees Union, 637 F.2d 592, 106 L.R.R.M. (BNA) 2745, 90 Lab. Cas. (CCH) Para 912,612, 2 EBC 1054 (3d Cir.), cert. denied, 454 U.S. 898 (1981).
7. [Arbitrary/Capricious Actions] Pension fiduciaries breach fiduciary duty when they act arbitrarily and capriciously or act with improper discriminatory or bad faith motives. Chambless v. Masters, Mates and Pilots Pension Plan, 571 F. Supp. 1430 (S.D.N.Y. 1983).
8. [Arbitrary/Capricious Actions] Trustees violated the prudent man standard when they failed to adequately investigate the basis and justification for the payment of over $10 million to a claims processing company as fees for services over a two year period, notwithstanding the court's subsequent finding that the fees were reasonable. Brock v. Robbins 830 F.2d 640, 8 EBC 2489 (7th Cir. 1987).
9. [ESOP] While an ESOP fiduciary may be released from certain per se violations on investments in employer securities under the provisions of Sections 406 and 407 of ERISA, the structure of ERISA itself requires that in making an investment decision of whether or not a plan's assets should be invested in employer securities, an ESOP fiduciary, just as fiduciaries of other plans, is governed by the solely-in-the-interest and prudence tests of Sections 404(a)(1)(A) and (B). Eaves v. Penn, 587 F.2d 453 (10th Cir. 1978).
10. [ESOP] United Missouri Bank won a case where it continued to purchase a distressed company's

stock for an ESOP, relying on an independent appraiser's valuation. The 10th Circuit Court of Appeals ruled that the bank (1) followed "proper" directions from the ESOP administrator, (2) paid no more than "appropriate consideration" by relying on the appraisals, (3) retained the stock appropriately because it was restricted by the ESOP agreement and to do so "would have run counter to the intended purpose of [the] ESOP," and (4) maintained an effective Chinese Wall within the bank to prevent transmittal of material inside information from the commercial lending to the trust investment areas. Ershick v. United Missouri Bank of Kansas City, N.A., 948 F.2d 660 (10th Cir. 1991).

11. [ESOP] A Washington bank was found liable for following a similar procedure in Fink v. National Savings & Trust Co., 772 F.2d 951 (D.C. Cir. 1985). The court found the ERISA fiduciary duty of prudence overrides the provisions of plan, such as in ESOPs, which are designed to invest in employer stock.
12. [ESOP] Banc One Arizona settled for $19 million (plus a $1.15 million DOL penalty) involving the Kroy, Inc., ESOP covering 400 employees. Kroy eventually declared bankruptcy. Banc One continued purchasing stock until Kroy declared bankruptcy. Banc One was criticized for apparently paying too much for the stock. The primary issue of the case dealt with ERISA Section 3(18)(B) regarding "adequate consideration."
13. [ESOP] The Statewide Bancorp ESOP directed the Plan Committee (who were also directors) to invest "primarily" in Statewide stock. The Committee continued to purchase Statewide stock even as its stock price fell to less than 25 cents a share. Eventually, all remaining assets were placed in money market accounts. Statewide declared bankruptcy. The 3rd Circuit Court of Appeals found that the purchase of Statewide stock was *permissive*, not mandatory. The court held that two standards apply:

    - If the plan *requires* investment in employer securities, the trustee must comply unless "compliance would be impossible or illegal" or a court approves a deviation.

    - If investment language is *permissive*, "the fiduciary must still exercise care, skill, and caution in making decisions to acquire or retain the investment." In such permissive situations, the fiduciary is presumed to have complied with ERISA in purchasing employer securities unless the facts and circumstances would defeat or substantially impair the purposes of the trust. If trustees are also directors or officers of the employer, they must show that they acted impartially in investigating available investment alternatives - particularly if the employer is experiencing financial difficulty.

      The court evaluated the reasonableness of the trustees' actions under the standard set by the U.S. Supreme Court, in the Firestone Tire and Rubber Co. v. Bruch, 489 U.S. 101 (1989) case. Reasonableness is judged by whether:

        - the interpretation is consistent with the goals of the plan;
        - it renders any plan language meaningless or internally inconsistent;
        - it conflicts with the substantive or procedural requirements of ERISA law;
        - the provision has been interpreted consistently; and
        - the interpretation is contrary to the clear language of the plan.

        Moench v. Robertson, 62 F.3d 553 (3d Cir. 1995).

14. [Investments] Purchase of stock in a financially unstable corporation constitutes a violation of Section 404(a)(1)(B). Usery v. Wilson, et al, No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
15. [Loans] Evidence that mortgage loans were made at interest rates below the prevailing market rate is insufficient to establish a violation of the prudent investor rule established in ERISA Section 404(a)(1)(A) and (B) where pension fund trustees, in developing a plan participant mortgage loan program, consulted with experts, including accountants and mortgage brokers; examined and considered rates charged on traditional and nontraditional mortgage loans; examined the prospective borrower's employment background; required that the loan be adequately secured; and thereafter set highest rates that not only generated a higher rate of return than any other portfolio asset but exceeded the fund's actuarial and funding requirements. Brock v. Walton, 794 F.2d 586, 7 EBC 1769 (11th Cir.), reh'g denied, 802 F.2d 1399 (11th Cir. 1986) (en banc).

16. [Loans] Trustees making loans violated the prudence test under ERISA Section 404(a)(1)(B) by failing to properly appraise the proposed building, investigate the borrower's financial resources, evaluate the likely rental income to be derived from the building, take an assignment of rents, require sureties on the loan and require a principal repayment schedule. Davidson v. Cook, 567 F. Supp. 225, 4 EBC 1816 (E.D.Va. 1983), aff'd, 734 F.2d 10 (4th Cir.), cert. denied, 469 U.S. 899 (1984).
17. [Loans] Where independent investigation based on financial statements would have disclosed imprudence of making loans and where trustees failed to seek outside counsel when "under the circumstances then prevailing ... a prudent man acting in a like capacity and familiar with such matters" would have sought outside counsel, ERISA, Section 404(a)(1)(B) is violated. A trustee's duty to make an independent investigation includes the obligation of not relying on representations, predictions, and hopes of a borrower. Katsaros v. Cody, 503 F. Supp. 360, 4 EBC 1910 (E.D.N.Y 1983).
18. [Loans] Even assuming the real estate attorney for the pension fund was a fiduciary, the opening bid of $5 million where the property was allegedly worth less, was not a breach of fiduciary duty of care under Section 404 of ERISA when the bid was made in the context of a foreclosure sale, the final judgment against the debtor was $9,615,422.26, and an unrealistically low bid might have precluded a deficiency judgment. Furthermore, although attorney was not instructed to establish $100,000 bid increments, such action was not imprudent where he was instructed to continue bidding the price upwards to $7 million. Donovan v. Nellis, 528 F. Supp. 538, 33 Fed. Rul. Serv. 2d (Cahaghan) 1742, 2 EBC 2209 (N.D.Fla. 1980.
19. [Loans - Employer] Where plan trustees make loans to employers that lack any security and are at interest rates below those that an arm's length lender would accept under the circumstances the trustees have violated Section 404(a)(1)(B). Marshall v. Dekeyser; 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
20. [Mergers & Acquisitions] In a contest for corporate control where potential conflicts of interest between plan administrators and beneficiaries existed, administrators who did not conduct independent, "intensive and scrupulous" investigation of plan's investment options violated ERISA Section 404. Leigh v. Engle, 727 F.2d 113, 4 EBC 2702 (7th Cir. 1984).
21. [Mergers & Acquisitions] Trustees breached ERISA's exclusive purpose and prudent man rules Section 404(a)(1)(A) and (B), by agreeing to the sale of employer securities to the employer's pension plan as part of alleged attempt to maintain corporate control without conducting any investigation as to the proposed transaction. Dimond v. Retirement Plan, 582 F. Supp. 892, 4 EBC 1457 (W.D.Pa. 1983).
22. [Mergers & Acquisitions] Where sale of ownership of the employer is likely to have an impact on the plan's ability to obtain payment on employer notes held by the plan, which, in turn, is likely to affect the plan's ability to pay benefits under the plan, the plan trustees' duties of loyalty and prudence require them to advise the participants of the full facts concerning the sale. Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
23. [Payments, Excessive] Payment of an excessive amount of rent by a plan for the lease of an aircraft violates Section 404(a)(1)(B). Usery v. Wilson, et al., No. 3-76-373 (E. D.Tenn., June 6, 1977) (consent order).
24. [Payments, Excessive] Trustees of an employee welfare plan breached fiduciary duties when they improperly overpaid a law firm $292,800 for legal services rendered to members of the plan. Law firm that knowingly receives excessive payments from trustees of a plan is held accountable for the breaches committed by the trustees and jointly liable for be overpayment. Benvenuto v. Schneider, 678 F. Supp. 51, 9 EBC 1528 (E.D.N.Y. 1988).
25. [Recordkeeping] A company was delegated by a bank trustee or custodian for self-directed IRA accounts the function of maintaining records and preparing appropriate reports required by Section 103 of ERISA. A company maintaining records necessary for the preparation of such reports is a plan fiduciary and must perform these functions with the degree of care set forth in Section 404(a)(1)(B). Redwood Bank v. QTA, Inc., No. C-79-1586, slip op. (N.D.Cal., Oct. 23, 1979).
26. [Self-Dealing] Purchase of automobile insurance covering plan trustees and employees, but which does not protect the plan, constitutes a violation of Section 404(a)(1)(B). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).

Section 404(a)(1)(C)
Subject to sections 403(c) and (d), 4042, and 4044, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries **and** by diversifying

the investments of the plan so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so.

A. **Advisory Opinions**

1. [Deposits - Insured/Uninsured] The diversification requirement of Section 404(a)(1)(C) generally will not be violated if all plan assets in an individual account plan are invested in a federally insured savings account, so long as the account is fully insured. Where the account balance exceeds the amount covered by federal insurance, compliance with Section 404(a)(1)(C) is determined by whether the bank invests its assets in a diversified manner. AO 77-46.
2. [Collective Investment Funds] An investment by an ERISA plan in a single collective investment pool may be deemed to be a properly diversified investment if the pool is itself diversified. In this case, each of the investments of the collective trust is deemed to be an investment of the plan. AO 80-13A.
3. [Mutual funds/Annuities] A plan may invest all of its assets in insurance or annuity contracts (AO 75-79) or a mutual fund (AO 75-93) without violating Section 404(a)(1)(C) dealing with diversification.
4. [Real Estate] Where the assets of a plan consist largely of real estate mortgage loans, the new investment managers of the plan will not violate the diversification requirements of Section 404(a)(1)(C) if they follow a policy whereby decisions to retain or dispose of individual loans and properties will be made on the basis of economic and prudent management generally and not on a basis that requires diversification of plan assets in situations in which the principles of economic and prudent management would indicate that such loans and properties should be retained. AO 77-62/63.
5. [REIT] Proper diversification for plan assets invested in a real estate investment trust (REIT) is determined by considering the assets held by the REIT. AO 78-30.

B. **Court Decisions**

1. [General] Section 404 of ERISA requires that fiduciaries conduct their activities as would a prudent man under similar circumstances. While there is flexibility in the prudence standard, it is not a refuge for fiduciaries who are not equipped to evaluate a complex investment. Glass/Metal Association and Glaziers and Glass Workers Pension Plan, 507 F. Supp. 378, 2 EBC 1006 (D.Hawaii 1980).
2. [General] Where plan trustees, lacking prior lending experience, fail to follow the procedure that a prudent lender would utilize by failing to consider other real estate investment vehicles that offered greater opportunity for diversification, and by committing plan assets without adequate procedures for evaluation of a risk, the plan trustees violated their duty to act with care, skill, prudence and diligence as required under Section 404(a)(1)(B) of ERISA. Glass/Metal Association and Glaziers and Glass Workers Pension Plan, 507 F. Supp. 378, 2 EBC 1006 (D.Hawaii 1980).
3. [General] In contrast to traditional trust law, both Congress and the courts have recognized that the diversification requirement of ERISA Section 404(a)(1)(C) imposes a separate duty on plan fiduciaries to spread the risk of loss of the plan. Therefore, if consummated, a commitment of 23% of the pension plan's total assets to a single loan would subject a disproportionate amount of the pension trust's assets to the risk of a large loss and violate the diversification requirement. Glass/Metal Association and Glaziers and Glass Workers Pension Plan, 507 F. Supp. 378, 2 EBC 1006 (D.Hawaii 1980).
4. [Loans] A loan of 36% of plan assets to finance the expansion of a hotel and gambling casino violates Section 404(a)(1)(C). Marshall v. Teamsters Local 282 Pension Trust Fund, 458 F. Supp. 986 (E.D.N.Y. 1978).
5. [Loans - Employers] The investment of virtually all of a plan's assets in loans to employers, on its face, represents a complete failure to diversify the investments of the plan so as to minimize the risk of large losses required by Section 404(a)(1)(C). Once a plaintiff proves failure to diversify, the burden shifts to the defendant to demonstrate that nondiversification was prudent under the circumstances. Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
6. [Loans] Where trustees failed to collect what defendants owed the pension trust, renewed unfavorable loans and failed to diversity holdings, they violated Section 404(a)(1)(B) and (C). Donovan v. Schmoutey, 592 F. Supp. 1361 (D.Nev. 1984).
7. [Market Valuation] Pension plan service company that fails to revalue the market value of properties to determine a fair rental value to the lessee, the plan's sponsor, and also fails to advise trustees that the plan assets should be diversified and not concentrated in the buildings

leased to the plan's sponsor, breaches its fiduciary duties under ERISA. Brock v. Self, 632 F. Supp. 1509, 7 EBC 1512 (W. D. La. 1986).

Section 404(a)(1)(D)
Subject to sections 403(c) and (d), 4042, and 4044, a fiduciary shall discharge his duties with respect to a plan solely in the interest of the participants and beneficiaries and In accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of this subchapter or subchapter III of this chapter.

A. Interpretive Bulletins

1. A vacation plan may pay all or any portion of the benefits to which a plan participant or beneficiary is entitled to a different party without violating Section 404(a)(1)(D) if (a) the plan documents expressly provide for such payments to third parties at the direction of a participant or beneficiary, (b) the participant or beneficiary directs in writing that the plan trustees pay a named third party all or a specified portion of the sum of money that would otherwise be paid to the participant or beneficiary and (c) payment is made to the third party only when or after the money would otherwise be payable to the participant or beneficiary. IB 78-1.
2. Investment Policies. An investment policy designed to further the purposes of a plan and its funding policy is consistent with, but not required by, ERISA 404(a)(1)(A) and (B). If one exists, it is considered one of the "documents and instruments governing the plan", and must be followed. IB 94-2.

B. Advisory Opinions

1. Within the mandate of Section 404(a)(1)(D) is the rule that plan trustees and fiduciaries must administer the plan in accordance with clear and unambiguous provisions of the plan document and the law. The fact that policy reasons mandate a change in the plan provisions is relevant to a judicial review of the validity of the plan change, but such conditions are not relevant in the interpretation and implementation of such rule. Where, in this case, the plan's rules were clear and unambiguous and were upheld by the courts as valid, the trustees must enforce them as so written. AO 82-IA.
2. Whether the trustees can accept contributions from employers for certain specific individuals or classes thereof and/or make benefit payments to such individuals is a matter to be determined by the plan document. Section 404(a)(1)(D) requires that the plan be administered in accordance with the plan document to the extent that the plan document is in accordance with the law. AO 81-30A.

C. Court Decisions

1. A limitation in the plan instruments on the authority of the trustees to invest plan assets, which is not inconsistent with any provisions of ERISA, is binding on the trustees under Section 404(a)(1)(D). Marshall v. Teamsters Local 282 Pension Trust Fund, 458 F. Supp. 986 (E.D.N.Y. 1978).
2. Where plan document provided that administrative committee member having interest in transaction shall not participate in transaction and fiduciary acted contrary to plan terms, there was a violation of ERISA Section 404(a)(1)(D). Donovan v. Cunningham, 716 F.2d 1455, 4 EBC 2329 (5th Cir. 1983), cert. denied, 467 U.S. 1251 (1984).
3. Payment of compensation to plan trustees without express authorization in plan instruments violates Section 404(a)(1)(D). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
4. Payment of benefits to ineligible persons violates Section 404(a)(1)(D). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
5. A trustee's failure to declare his own forfeiture of benefits under a plan by reason of his violation of a 'bad boy' clause does not constitute a breach of fiduciary duty. Fremont v. McGraw-Edison Company, 460 F. Supp. 599 (N.D.Ill. 1978), aff'd in part, rev'd in part, 606 F.2d 752 (7th Cir. 1979), cert. denied, 445 U.S. 951 (1980).
6. Dividing pension benefits, once they are being paid out, between a participant and his divorced spouse does not violate Section 404(a)(1)(D). Campa v. Campa, 89 Cal. App.3d 113C (1st Dist. 1979), appeal dismissed, Carpenters Pension Trust Fund for Northern California v. Campa, 444

U. S. 1028 (1980).

Section 404(a)(2)
In the case of an eligible individual account plan (as defined in Section 407(d)(3)), the diversification requirement of paragraph (1)(C) and the prudence requirement (only to the extent that it requires diversification) of paragraph (1)(B) is not violated by acquisition or holding of qualifying employer real property or qualifying employer securities (as defined in Section 407(d)(4) and (5)).

A. Conference Report

This provision is discussed on page 317 of the Congressional Conference Report.

B. Advisory Opinions

1. The purchase of employer securities by a profit-sharing plan is covered by Section 404(a)(2). AO 75-89; WSB 79-86 (thrift plan).

Section 404(b)
Except as authorized by the Secretary by regulation, no fiduciary may maintain the indicia of ownership of any assets of a plan outside the jurisdiction of the district courts of the United States.

A. Conference Report

Page 306 of the Congressional Conference Report explains this provision.

B. Regulations

Refer to DOL ERISA Regulation 2550.404b-1.

1. Plan assets may be held by persons located outside the United States if the assets are foreign securities and (a) the plan fiduciary, empowered to authorize such holding is a United States regulated bank, insurance company or investment adviser, has its principal place of business in the United States and meets certain minimum financial conditions; or (b) the securities are in the possession of a United States bank, a registered broker or dealer; or an SEC-designated "satisfactory control location" and certain other conditions are met. DOL ERISA Regulation 2550.404b-1.
2. An ADR (American depository receipt) that enables a person to demand delivery of a foreign security constitutes the "indicia of ownership" of the foreign security for purposes of Section 404(b). Preamble to DOL ERISA Regulation 2550.404b-1.
3. The indicia of ownership of any plan assets (e.g., foreign securities, United States securities, etc.) attributable to contributions made on behalf of plan participants who are Canadian citizens or residents may be maintained in Canada if required by Canadian tax or other laws. DOL ERISA Regulation 2550.404b-1.

C. Advisory Opinions

1. Section 404(b) does not prohibit the investment of plan assets in enterprises located outside the United States provided that the indicia of ownership (e.g., stock certificates) of such assets is maintained in the U.S. (or in accordance with DOL ERISA Regulation 2550.404b-1). AO 75-80.

Section 404(c)
In the case of a pension plan which provides for individual accounts and permits a participant or beneficiary to exercise control over assets in his account, if a participant

or beneficiary exercises control over the assets in the account (as determined under regulations of the Secretary) -	
(1)	Such participant or beneficiary shall not be deemed to be a fiduciary by reasons of such exercise, and
(2)	No person who is otherwise a fiduciary shall be liable under this part for any loss, or by reason of any breach, which results from such participant's, or beneficiary's exercise of control.

A. Conference Report

This provision is explained on pages 305-306 of the Congressional Conference Report.

B. Regulations

See DOL ERISA Regulation 404c-1, which exempts fiduciaries from certain ERISA liability if plans meet certain conditions and participants direct their own investments.

C. Advisory Opinions

1. Section 404(c) does not exempt transactions covered by Section 404(c) from all provisions of ERISA; it only exempts fiduciaries from liability regarding such transactions and the participant or beneficiary from being a fiduciary by reason of exercising control under Section 404(c). AO 75-81.
2. The fact that transactions might be exempted from the provisions of Section 406 by reason of Section 404(c) does not affect the application of Section 4975 of the Code. PLR 7821122.
3. [Individual Account] A person who is a plan fiduciary and who also exercises control over assets in his or her own individual account will not be treated as a fiduciary with respect to such exercise of control. AO 75-24.

D. Court Decisions

1. [Fiduciary Liability for Self-Directed Plan Investments] A 401(k) plan offered GICs as one of several investment vehicles for plan participants, who directed their own investments. GICs were issued, in part, by Executive Life Insurance. The trustees relied on ratings of rating services. When Executive Life encountered financial difficulties and was eventually downgraded by the rating services, the plan notified participants that GIC investments were not guaranteed from loss. Unisys negotiated more liberal waiting periods for transfers from the GIC fund to other investment vehicles, but was restricted on what it could tell participants. As a result, it did not tell participants of Executive Life's problems. Unisys did; however, pay for the replacement of an annuity issued to its Chairman by Executive Life with an annuity from another insurer. Executive Life was declared insolvent by state insurance regulators in 1991. Plan participants sued the fiduciaries for breach of fiduciary responsibilities under ERISA Section 404(a). The Unisys trustees' defense was that they were protected from fiduciary responsibility by ERISA Section 404(c).

   The courts ruled that (1) the duty of prudent inquiry may have been breached by total reliance on insurance rating services, (2) plan fiduciaries did not release material information to plan participants, (3) the participants' control over their investments may release the fiduciaries from investment liability, and (4) the case was remanded back to the District Court so plan participants may pursue their claims [3rd Circuit Court of Appeals, *In Re Unisys Savings Plan Litigation (Meinhardt v. Unisys Corp.)*, 74 F.3d 420 (3d. Cir. 1996)].

Co-Fiduciary Liability

ERISA Section 405

Section 405(a)

In addition to any liability which he may have under any other provision of this part, a fiduciary with respect to a plan shall be liable for a breach of fiduciary responsibility of another fiduciary with respect to the same plan in the following circumstances:	
(1)	If he participates knowingly in, or knowingly undertakes to conceal, an act or omission of such other fiduciary, knowing such act or omission is a breach;
(2)	If, by his failure to comply with section 404(a)(1) in the administration of his specific responsibilities which give rise to his status as a fiduciary, he has enabled such other fiduciary to commit a breach; or
(3)	If he had knowledge of a breach by such other fiduciary, unless he makes reasonable efforts under the circumstances to remedy the breach.

A. Conference Report

Pages 299-300 of the Congressional Conference Report discuss co-fiduciary liability provisions.

B. Interpretive Bulletins

1. A plan fiduciary who knows of a breach committed by another fiduciary must take steps to remedy the breach, such as instituting a lawsuit, notifying the Department of Labor or publicizing the breach. Mere resignation by the fiduciary as a protest against the breach is not sufficient. IB 75-5, Question FR-10.
2. Even though a fiduciary has only limited functions to perform (e.g., because the fiduciaries have properly allocated functions among themselves or delegated them to others), the fiduciary can become liable for breaches in other areas by other plan fiduciaries under Section 405(a). IB 75-8, Questions FR-13, FR-14 and FR-16.
3. Where the Labor Department is already conducting an investigation of plan investments, the new investment managers for the plan will not be acting in violation of Section 405(a) if they report any breaches of fiduciary duties by others of which they become aware to the plan trustees and to the Labor Department and make available to the Labor Department all information requested about past transactions. AO 77-60/61; AO 77-79/80.

C. Court Decisions

1. [General] A fiduciary is liable under ERISA Section 405(a)(1) if he participates knowingly in, or knowingly undertakes to conceal, a co-fiduciary's breach of duty. Davidson v. Cook, 567 F. Supp. 225, 4 EBC 1816 (E.D.Va. 1983), aff'd, 734 F.2d 10 (4th Cir.), cert. denied, 469 U.S. 899 (1984).
2. [General] ERISA Section 405 does not impose vicarious liability; actual knowledge is required. The fiduciary must know the other person is a fiduciary to the plan, must know that he participated in the act that constituted a breach, and must know that it was a breach. Donovan v. Cunningham, 716 F.2d 1455, 4 EBC 2329 (5th Cir. 1983), cert. denied, 467 U.S. 1251 (1984).
3. [General] Under Section 405 of ERISA a fiduciary is liable for a co-fiduciary's breach of fiduciary duties if he knowingly participates and/or conceals such breach; furthermore, a fiduciary is required to make reasonable efforts to remedy a known breach by another fiduciary. Davidson v. Cook, 567 F. Supp. 225, 4 EBC 1816 (E.D. Va. 1983), aff'd, 734 F.2d 10 (4th Cir.), cert. denied, 469 U.S. 899 (1984).
4. [General] Co-fiduciaries each have responsibility for the actions of the others and will be found liable for the others' breach of fiduciary duty if such co-fiduciary participates knowingly in a breach or if, by his failure to comply with Section 404 of ERISA, he enables another fiduciary to commit a breach. LeFebre v. Westinghouse Electrical Corp., 549 F. Supp. 1021, 3 EBC 2353, as amended by 3 EBC 2359 (D.Md. 1982), rev'd, 747 F.2d 197 (4th Cir. 1984).
5. [General] Relying on the advice or information of a co-trustee alone may subject a trustee to liability. Katsaros v. Cody, 568 F. Supp. 360, 4 EBC 1910 (E.D.N.Y. 1983).
6. [Omission vs. Commission] Fiduciaries are not relieved of their fiduciary responsibilities by their lack of involvement in a particular transaction. By failing to monitor the conduct of other trustees, a trustee may violate Section 404(a)(1)(B) and be held liable under Section 405(a)(2). Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
7. [Successor Trustees] New trustees of a plan are not required to investigate how prudently prior trustees had negotiated a contract. If the contract terms are found reasonable and no other facts indicate the contrary, new trustees are not liable if prior trustees committed a breach of their fiduciary duties by acting imprudently. Brock v. Robbins, 830 F.2d 640, 8 EBC 2489 (7th Cir.

1987).

8. [Successor Trustees] A successor trustee has a duty to liquidate prior improper investment upon assuming his responsibilities. Marshall v. Craft 463 F. Supp. 493 (N.D.Ga. 1978). See also Morrissey v. Curran, 567 F.2d 546 (2d Cir. 1977).
9. [Resignation Not a Cure] Resignation by a fiduciary is not sufficient to discharge the fiduciary's duty under Section 405(a)(3) to make reasonable efforts to remedy the breach of another fiduciary. Marshall v. Dekeyser, 485 F. Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).

Section 405(b)		
(1)	Except as otherwise provided in subsection (d) and in section 403(a)(1) and (2), if the assets of a plan are held by two or more trustees -	
	(A)	Each shall use reasonable care to prevent a co-trustee from committing a breach; and
	(B)	They shall jointly manage and control the assets of the plan, except that nothing in this subparagraph (B) shall preclude any agreement authorized by the trust instrument, allocating specific responsibilities, obligations, or duties among trustees, in which event a trustee to whom certain responsibilities, obligations, or duties have not been allocated shall not be liable by reason of this subparagraph (B) either individually or as a trustee for any loss resulting to the plan arising from the acts or omissions on the part of another trustee to whom such responsibilities, obligations, or duties have been allocated.
(2)	Nothing in this subsection shall limit any liability that a fiduciary may have under subsection (a) or any other provision of this part.	
(3)	(A)	In the case of a plan the assets of which are held in more than one trust, a trustee shall not be liable under paragraph (1) except with respect to an act or omission of a trustee of a trust of which he is a trustee.
	(B)	No trustee shall be liable under this subsection for following instructions referred to in Section 403(a)(1).

A. Conference Report

The allocation of trustee duties are discussed on pages 300-301 of the Congressional Conference Report.

B. Interpretive Bulletins

1. A plan fiduciary who knows of a breach committed by another fiduciary must take reasonable steps to remedy the breach, such as instituting a lawsuit, notifying the Department of Labor, or publicizing the breach. Mere resignation by the fiduciary as a protest against the breach is not sufficient. IB 75-5, Question FR-10.

Section 405(c)		
(1)	The instrument under which a plan is maintained may expressly provide for procedures -	
	(A)	For allocating fiduciary responsibilities (other than trustee responsibilities) among manned fiduciaries, and
	(B)	For named fiduciaries to designate persons other than named fiduciaries to carry out fiduciary responsibilities (other than trustee responsibilities) under the plan.
(2)	If a plan expressly provides for a procedure described in paragraph (1), and pursuant to such procedure any fiduciary responsibility of a named fiduciary is allocated to any person, or a person is designated to carry out any such responsibility, then such named fiduciary shall not be liable for an act or omission of such person in carrying out such responsibility except to the extent that -	
	(A)	The named fiduciary violated section 404(a)(1) -

		(i)	With respect to such allocation or designation,
		(ii)	With respect to the establishment or implementation of the procedure under paragraph (1), or
		(iii)	In continuing the allocation or designation; or
	(B)	The named fiduciary would otherwise be liable in accordance with subsection (a).	
(3)	For purposes of this subsection, the term "trustee responsibility" means any responsibility provided in the plan's trust instrument (if any) to manage or control the assets of the plan, other than a power under the trust instrument of a named fiduciary to appoint an investment manager in accordance with Section 402(c)(3).		

A. Conference Report

General fiduciary duty allocation provisions are covered on page 302 of the Congressional Conference Report.

B. Interpretive Bulletins

1. [Allocation] Fiduciary responsibilities not involving management or control of plan assets may be allocated among named fiduciaries and may be delegated by named fiduciaries to others if the plan instruments so provide. IB 75-8, Question FR-12.
2. [Allocation] If directors of an employer are the named fiduciaries of the plan, their liability can be limited by the procedures established in the plan instruments for allocating fiduciary responsibilities among named fiduciaries or for designating others to carry out fiduciary responsibilities. IB 75-8, Question D-4.
3. [Allocation] Even if named fiduciaries allocate responsibilities or designate others to perform these functions, they are still liable for breaches in the establishment and implementation of the allocation or designation procedure. IB 75-8, Questions FR-13 and FR-14.
4. [Delegation] Named fiduciaries cannot delegate authority or discretion to manage or control plan assets to anyone other than an investment manager as defined in Section 3(38). IB 75-8, Question FR-15.

C. Advisory Opinions

1. A named fiduciary with the duty to appoint, remove and monitor a plan's investment managers is not responsible for the day-to-day management of plan assets by the investment managers but must be prudent in appointing the investment managers and in continuing to retain them. AO 77-69/70.

D. Court Decisions

1. [Allocation] Fiduciaries are only liable for imprudent investment decisions made by an investment manager, who has been designated as such by the fiduciaries, if the fiduciaries fail to monitor adequately the performance of the investment manager. Brock v. Berman, 673 F. Supp. 634, 8 EBC 1689 (D.Mass. 1987).
2. [Allocation] Even though a plan trustee has no authority for investment decisions, it cannot disavow itself of responsibility for such decisions, since it is still a fiduciary. However, under the allocation provisions of Section 405(c)(1), the trustee may, in fact, not be liable for such decisions. Leonard v. Drug Fair, Inc., No. 78-1335, Fed. Sec. L. Rep. (CCH) Para 97,144 (D.D.C. 1979).
3. [Recordkeeping] A company was delegated by a bank trustee or custodian for self-directed IRA accounts the function of maintaining records and preparing appropriate reports required by Section 103 of ERISA. A company maintaining records necessary for the preparation of such reports is a plan fiduciary and must perform these functions with the degree of care set forth in Section 404(a)(1)(B). Redwood Bank v. QTA, Inc., No. C-79-1586, slip op. (N.D.Cal., Oct. 23, 1979).

Section 405(d)

(1)	If an investment manager or managers have been appointed under section 402(c)(3), then, notwithstanding subsections (a)(2) and (3) and subsection (b), no trustee shall be liable for the acts or omissions of such investment manager or managers, or be under an obligation to invest or otherwise manage any assets of the plan which is subject to the management of such investment manager.
(2)	Nothing in this subsection shall relieve any trustee of any liability under this part for any act of such trustee.

A. Conference Report

Investment manager appointment provisions are covered on pages -301-302 of the Congressional Conference Report.

B. Regulations

See the DOL plan assets ERISA Regulation 2510.3-101.

Prohibited Transactions **ERISA Sections 406, 407, 408, 414**
Section 406(a)(1)
Except as provided in Section 408 [which contains the exemptions from the prohibited transactions restrictions]:
A fiduciary with respect to a plan shall not cause the plan to engage in a transaction, if he knows or should know that such transaction constitutes a direct or indirect -
Sale or exchange, or leasing, of any property, between the plan and a party in interest;
Lending of money or other extension of credit between the plan and a party in interest;
Furnishing of goods, services or facilities between the plan and a party in interest;
Transfer to, or use by or for the benefit of, a party in interest, of any assets of the plan; or
Acquisition, on behalf of the plan, of any employer security or employer real property in violation of section 407(a) which contains the 10% limitation on the acquisition and holding of qualified employer securities and real property.

A. Statute

Investments in collectibles are generally prohibited by Section 408(m) of the Internal Revenue Code and PTE 91-55 .

B. Conference Report

These prohibited transaction provisions are discussed on pages 306-309 and 316-320 of the Congressional Conference Report.

C. Regulations

DOL ERISA Regulation 2510.3-101 defines plan assets.

D. Prohibited Transaction Class Exemptions (PTE)

1. [Broker] The provision of brokerage services to IRAs and to Keogh plans to which Title I of ERISA is inapplicable is not subject to the prohibited transaction provisions of Title I of ERISA. However, such IRAs and Keogh plans remain subject to the prohibited transaction provisions of Title I of ERISA. Final PTE C 79-1.
2. [Coins and Collectibles] PTE 91-55 permits IRA accounts to invest in *American Eagle* gold coins.
3. [Broker] Securities broker-dealers regularly provide research, information and advice concerning

securities and also effect agency transactions for the purchase or sale of securities in the ordinary course of their business as broker-dealers, and the provision of a combination of such services by a fiduciary with regard to employee benefit plans would constitute prohibited transactions under ERISA and the Code. *Proposed* Extension of Paragraph 1(a) of PTE C 75-1; Final PTE C 78-10.

4. [Foreign Exchange] A bank fiduciary may use its own services (or those of an affiliate) to invest, on a non-discretionary basis, in foreign currencies and foreign currency options, subject to a number of conditions. See PTE 94-20 .
5. [Loan by Union Plan to Provide Projects for Union Employers] A loan by a multiemployer plan or a multiple employer plan to an owner of real property who is not a party in interest or a disqualified person to such plan where the loan is for the purpose of enabling such property owner to make construction improvements on such property, and the property owner contracts with an employer participating in the plan to make such construction improvements, is not a prohibited transaction under Section 406(a) of ERISA and Section 4975(c)(1)(A) - (D) of the Code. However, such a loan may give rise to a prohibited transaction if, for example, the loan is made in the context of an arrangement where a specific participating employer is to furnish a portion of the construction, and such employer has a controlling influence over the plan's decision to make the loan. Final PTE C 76-1.
6. [Office Space] In some instances, a multiemployer plan or a multiple employer plan will secure office space and administrative services jointly with a participating employee organization, employer or employer association, or with another multiemployer plan or multiple employer plan that is a party in interest or disqualified person to the plan and will share the costs of securing such office space or administrative services on a pro-rata basis based on each party's use of such space or services. Such joint use of office space or administrative services does not constitute a prohibited transaction. However, if a multiemployer plan or a multiple employer plan independently secures for its own use office space or administrative services and furnishes part of such office space or administrative services to a party in interest or disqualified person, such transactions are prohibited transactions. Final PTE C 76-1.
7. [Securities Lending] A securities lending service, pursuant to which a bank-trustee will lend securities of plans for which it serves as trustee to broker-dealers for an additional fee from the plan, may contravene Section 406(b). AO 79-11. But also see PTE 82-63 .
8. [Securities Lending] Payment to a party in interest of any commission, finder's fee or other compensation for services in connection with the effecting of a loan of securities by the plan to a broker-dealer, bank or other person would be a prohibited transaction. *Proposed* PTE I D-762. But also see PTE 82-63 .

E. Interpretive Bulletins

1. [Plan Assets] In general, the investment by a plan in securities of a corporation will not be considered to be an investment in the underlying assets of the corporation. The assets of the corporation are not plan assets so subsequent transactions between a party in interest and the corporation will not be prohibited. This general proposition is consistent with Section 401(b)(1). However, this does not mean that such an investment may not sometimes constitute an indirect prohibited transaction. For example, if a plan invests in a corporation pursuant to an arrangement whereunder it is expected that the corporation will engage in a transaction with a party in interest, such arrangement will be a prohibited transaction. IB 75-2 (This IB contains several examples).
2. [Contributions, In-Kind] Contributions of non-cash ("in-kind") assets to a defined benefit plan is a prohibited transaction. In-kind contributions to a defined contributions or welfare benefit plan may be a prohibited transaction, depending on the facts and circumstances and provisions of the plan. The basic determinant is whether the in-kind contributions represents an attempt to lessen a present or future obligation to make cash contributions to a plan. IB 94-3 .
3. [Bonding of Fiduciaries] The purchase of a bond required under Section 412 is not a prohibited transaction. IB 75-5, FR-9.
4. [Payment of Benefits] The mere payment of money to which a participant or beneficiary is entitled, at the direction of the participant or beneficiary, to a party in interest does not contravene Section 406(a)(1)(D). IB 78-1.

F. Advisory Opinions

1. [Alienation of Benefits] Because Section 406 prohibits both direct and indirect transactions, a trustee to whom the limitation on compensation in Section 408(c)(2) applies could not assign his rights to compensation for services rendered to a plan to a party in interest, such as an

employer. Therefore, the trustee could not submit a request for compensation to the fund designating his employer as payee on checks issued. WSB 79-92.

2. [Alienation of Vested Benefits] Withholding of benefits from a plan participant and transfer of those benefits to a party in interest in satisfaction of a debt owed by the participant to that party in interest is a prohibited transaction. AO 76-99.
3. [Appointment] The appointment of a bank that is a creditor of the entity maintaining the plan as trustee of the plan assets is not a prohibited transaction. WSB 77-14.
4. [Appointment] The appointment of a party in interest as trustee, and the transfer of plan assets to the trustee pursuant to such appointment, does not constitute a prohibited transaction under Section 406(a)(1)(D) and does not contravene Sections 406(b)(1) or 406(b)(3). WSB 77-14.
5. [Bank Servicer] The owner of a trust company that acts as a fiduciary to employee benefit plans that renders certain services for the trust company, but not for the plans, is not subject to the prohibitions of Section 406(a), since the services would not be a transaction between the plan and a party in interest. AO 82-55A.
6. [Bank Stock - Purchase/Retention/Sale of Fiduciary Bank/BHC Stock]

    - *General Discretionary Rule* - An ERISA plan may not invest in the stock of a fiduciary bank if the bank has discretion over the transaction. The discretionary retention of such stock would also be prohibited. Non-discretionary purchases, sales, retentions are permitted. See 1980 letter from DOL to OCC .

    - *General Non-Discretionary Rule* - An ERISA plan may invest in the stock of a fiduciary bank or its bank holding company if the bank has no discretion over the investment. AO 92-23A .

    - *Self-Directed Purchases* - Permits self-directed accounts to purchase stock (including treasury stock) of the fiduciary bank or its holding company. AO 88-9 .

    - *Mutual Conversions - Initial Public Offerings* - Permits self-directed accounts to purchase stock of the fiduciary bank (or its holding company) in an initial public offering (IPO) or on conversion of a mutual institution to a stock institution. AO 88-28 .

7. [Bonds - Rights] The sale or assignment of rights to debentures by a trust to a party in interest is a prohibited transaction. AO 76-72.
8. [Collective Funds] The investment of plan assets in a commingled fund (for example, a qualified group trust) maintained by a bank trustee causes the assets of such commingled fund to be treated as assets of the plan. Consequently, a purchase or bolding of a master note (i.e, a nonnegotiable obligation issued by a finance company, the principal amount of which fluctuates on a daily basis depending on how much money the fund desires to loan the issuer) by the commingled fund in which the plan has an interest from a subsidiary of the corporation maintaining the plan constitutes a loan from the plan to the subsidiary in violation of Section 406(a)(1)(B) of ERISA and Section 4975(c)(1)(B) of the Code. PLR 7913114; PLR 7913116; *Proposed* PTE C 784.
9. [Collective Funds] The mere transfer of assets between a qualified group trust (CIF) and plans invested therein, and the corresponding increase or decrease in qualified group trust units credited to the plans, are intra plan transactions so long as the group trust is a qualified trust under Section 401(a) of the Code and the transfers are within the terms of the plan. Accordingly, such transactions do not fall within the restrictions of Section 406 of ERISA or Section 4975(c)(1) of the Code. PLR 7913116.
10. [Collective Funds - Conversion to Mutual Funds] The conversion of an ERISA collective investment fund would be a prohibited transaction in violation of Section 406. PTE 77-4 would *not* provide relief for such a conversion. See the 1994 letter from DOL to OCC .
11. [Compensation] The receipt of compensation by a fiduciary from a plan is a prohibited transaction if the fiduciary is already receiving full-time compensation from the employer maintaining the plan. AO 78-08.
12. [Contributions - In-Kind] The contribution to the plan by the employer of a condominium owned by the owner, in lieu of making its contribution to the defined benefit plan, in accordance with the requirements for properly funding the plan, constitutes a prohibited sale or exchange of property between the plan and a party in interest pursuant to Section 406(a)(1)(A).

    Section 406 provides that a transfer of real or personal property by a party in interest to a plan shall be treated as a sale or exchange if the property is subject to a mortgage or a lien that the plan assumes or it is subject to a mortgage or similar lien that a party in interest placed on the

property within the ten year period ending on the date of the transfer. The transfer of an option to purchase a condominium by a party in interest to the plan followed by the exercise of the option by the plan may also constitute a violation of Section 406(a)(1)(A) . AO 81-69A.

13. [Deposits] The investment of plan assets in credit union share accounts, at the direction of the plan participants and beneficiaries, is not a prohibited transaction. AO 76-38.
14. [Deposits] The investment of the assets of a noncollectively bargained multiple employer plan covering employees of banks, in savings accounts and certificates of deposit of banks that are contributing employers, constitutes a prohibited transaction under Section 406(a) and may also be prohibited under Section 406(b)(1) and (2), because members of the administrative board of the plan, which directs plan investments, are officers and employees of contributing employer/banks.

    However, Section 408(b)(4) provides an exemption from Sections 406(a), 406(b)(1), and 406(b)(2) for the investment of plan assets in the deposits of certificates of deposit of a bank that is a plan fiduciary or party in interest, if the requirements of DOL ERISA Regulations Section 2550.408b-4 are met. **One requirement of the regulation is that, for investments made after November 1, 1977, the plan specify the name(s) of the banks in which deposits may be made. The specifications may be made in the plan by amendment retroactive to November 1, 1977.** AO 79-25.

15. [Estates] The purchase of real property from the estate of the sole shareholder of a corporation contributing to a plan is not a prohibited transaction even though one of the executors of the estate formerly was a plan trustee. AO 76-420.
16. [Fees - Own-Bank Plan] A bank is not prohibited from serving as trustee for a plan maintained for the bank's employees *where it receives no compensation from the plan for its trustee services* [Emphasis added]. AO 79-49 .
17. [Fees] The reimbursement of, or payment to, fiduciaries of expenses properly and actually incurred in settlement of pending or threatened litigation by a plan, pursuant to indemnification provisions that do not contravene ERISA, is not a prohibited transaction. AO 77-66/67.
18. [Investment Advisor] The provision of investment advisory, services by a corporation to a plan is not a prohibited transaction even though the corporation also provides such services to other clients who may be parties in interest to the plan. AO 77-44.
19. [Investment Advisor] To the extent that a party renders investment performance measurement services to a plan, providing no more than quantitative measurement and ranking of a plan's investment portfolio and/or management performance based upon objective, reasonable and relevant criteria that are uniformly applied, such service would not constitute the rendering of investment advice. However, where the service provider adopts, applies or modifies performance or portfolio indices in such a way that a plan is furnished with a format for decision making that is designed to influence the plan's continued participation in a particular investment program, the service would constitute investment advice. AO 94-03.
20. [Leases - Sponsor] The leasing by a plan of improved real property to the employer maintaining the plan is a prohibited transaction pursuant to Sections 406(a)(1)(A), (C), (D) and (E) of ERISA and Sections 4975(c)(a)(1),(C) and (D) of the Code. In addition, since any property leased to an employer is "employer real property," as defined in Section 407(d)(2) of ERISA, if such property is not "qualifying employer real property" within the meaning of Section 407(d)(4) of ERISA, the holding of such property by the plan is a prohibited transaction pursuant to Sections 406(a)(2) and 407(a)(1) of ERISA. Also, to the extent that the employer may be a fiduciary to the plan, as defined in Section 3(21)(A) of ERISA and Section 4975(e)(3) of the Code, the lease arrangement may be a prohibited transaction pursuant to Section 406(b)(1) and (2) of ERISA and Section 4975(c)(1)(E) of the Code. *Proposed* PTE F 192.
21. [Loans - Common Borrower] If a loan is made by a plan to a person in order to encourage that person to do business with the employer, the transaction would be prohibited under Sections 406(a)(1)(D) and 406(b). WSB 79-63.
22. [Loan by Construction Union Plan to Provide Employment for Union Members] Because it will not opine on factual circumstances, the Department will not opine on construction industry trustees' direction to their investment manager to invest a specified amount of plan assets in construction mortgages within the jurisdiction of the union whose members are plan participants. The Department states, however, that it would not be inconsistent with the requirements of Sections 403(c) and 404 for plan fiduciaries to select an investment course of action that reflects non-economic factors so long as application of such factors follows the primary consideration of a broad range of investment opportunities that are economically equally advantageous.

Arrangements whereby funds of plans are invested by the fiduciary in transactions that indirectly create employment opportunities and compensation for employee services necessarily require an examination to determine if an indirect use of plan assets for the benefit of a party in interest is involved. AO 85-36A .

23. [Loan by Union Plan to Provide Projects for Union Employers] If a multiemployer plan acquires unimproved real property and arranges for the construction of building structures on such property for the purpose of providing office space for the plan with building contractors and subcontractors some or all of whose employees are participants or beneficiaries of the plan, the arrangement between the plan and such building contractors and subcontractors would constitute prohibited transactions. *Proposed* PTE I 76-2.
24. [Loans - Sponsor] Where a plan has a loan outstanding to X Corp. and the employer with respect to the plan acquires a majority or controlling interest in X Corp., the loan would become a prohibited, indirect extension of credit to the employer, in addition to being a direct prohibited extension of credit to X Corp. However, if the loan transaction is contemplated before the acquisition, the loan would not be a prohibited transaction. AO 79-37.
25. [Loan Guarantee] A guarantee by a party in interest of a loan by a plan to a third party constitutes an extension of credit between the plan and the party in interest. If such loan was made pursuant to a binding contract in effect on July 1, 1974, it may be exempt under Section 414(c)(1), even if the loan constitutes a nonqualifying security under Section 407. See DOL ERISA Regulation Section 2550.407a-1(b) .
26. [Mutual Fund Conversion from Collective Investment Fund] The conversion of an ERISA collective investment fund would be a prohibited transaction in violation of Section 406. PTE 77-4 would *not* provide relief for such a conversion. See 1994 letter from DOL to OCC .
27. [Pooled Fund - Seed Money] The transfer by an insurance company of seed money invested by it in separate investment accounts back to the general account of the insurance company would not be treated as assets of a plan that have invested in the separate accounts and, therefore, the insurance company's redemption of its participation units in the separate accounts does not constitute a violation of the provisions of Sections 404(a)(1)(A) and (D). AO 83-38A.
28. [Sale of Assets to Insider] The sale of certain parcels of real property by a profit-sharing plan to the majority shareholder of the employer maintaining the plan and to a corporation 50% or more of which is owned by such majority shareholder would constitute prohibited transactions pursuant to Section 406(a)(1)(A) and (D) of ERISA and Section 4975(c)(1)(A) and (D) of the Code. In addition, if the majority shareholder has the power to appoint and remove the plan trustee, such sales may be prohibited transactions under Section 406(b)(1) and (2) of ERISA and Section 4975(c)(1)(E) of the Code. *Proposed* PTE I 492.
29. [Stock - Sponsor] The purchase of common stock of the employer maintaining the plan by the employer from the plan is a prohibited transaction (AO 79-23), even if the purchase is made pursuant to a public tender offer (AO 77-48.)
30. [Sweep] Scan and sweep services by a bank for plans for which it provides fiduciary services and for which it is paid a separate fee would be exempt from any of the prohibitions of Section 406(a) if the conditions of Section 408(b)(2) are met. The question of what constitutes a reasonable service, a reasonable contract or arrangement, and reasonable compensation is inherently factual in nature, and not subject to opinion.

    A Section 408(b) violation would be involved if the bank, as fiduciary, exercised its authority, control or responsibility that makes it a fiduciary to cause the plan to enter into a transaction involving the provision of services when such fiduciary has an interest in the transaction that may affect the exercise of its judgment as a fiduciary. Therefore, to the extent the bank would direct the utilization of the scan and sweep services and receive any fee therefore, there would be a *per se* violation of Section 408(b). However, if the bank does not exercise such authority, but the decision is made by the plan sponsor, no violation would exist. AO 88-02A.

G. Court Decisions

1. [General] ERISA Section 406, which prohibits fiduciaries from causing a plan to engage in certain specified transactions, evinced the Congressional desire to prevent transactions that offer a high potential for loss of plan assets and for insider abuse; and to prevent a trustee from being put in a position where he has dual loyalties. McDougall v. Donovan 552 F.Supp. 1206, 3 EBC 2385 (N.D.Ill. 1982).
2. [General] The question of whether ERISA has been violated does not depend on whether any harm results from the transaction. Congress was concerned in ERISA to prevent transactions that offered a high potential for loss of plan assets or for insider abuse. The fact that a prohibited loan is or may be ultimately repaid does not render the loan lawful. Marshall v. Kelly, F.Supp.

341, 1 EBC 1850 (W.D.Okla. 1978); Cutaiar v. Marshall, 590 F.2d 523 (3d Cir. 1979); Marshall v. Dekeyser, 485 F.Supp. 629, 1, EBC 1898 (W.D.Wis. 1979).

3. [General] ERISA Section 406(a) prohibits a fiduciary from causing a plan to enter into transactions with parties whom "he knows or should have known" are parties in interest to the plan. A fiduciary must act with prudence in investigating whether a party-in-interest relationship exists. In the case of a significant transaction, generally for the fiduciary to be prudent he must make a thorough investigation of the other party's relationship to the plan to determine if he is a party in interest. In the case of a normal and insubstantial day-to-day transaction, it may be sufficient to check the identity of the other party against a roster of parties in interest that is periodically updated. Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
4. [General] Congress did not intend to exclude from prohibitions under Section 406 transactions that have independent business purposes, just as it did not exclude transactions that are fair under some independent measure. Congressional intent to eliminate all transactions, with even the potential to bias the independent judgment of plan fiduciaries, must be followed. McDougall v. Donovan 552 F.Supp. 1206, 3 EBC 2385 (N.D.Ill. 1982).
5. [General] Section 406 of ERISA does not create a per se prohibition against plan fiduciaries with dual loyalties acting on behalf of the plan. Donovan v. Bierwirth, 538 F.Supp. 463, 2 EBC 2145 (E.D.N.Y. 1981).
6. [Effective Date] Actions by fiduciaries occurring after 1974 are not insulated from ERISA coverage merely because their roots can be traced to an event prior to the effective date of ERISA. Marshall v. Craft, 463 F.Supp. 493 (N.D.Ga. 1978).
7. [Compensation] The critical analysis under Section 406, regarding a transaction with a party in interest that is exempted under Section 408, is whether the party in interest receives more than reasonable compensation. Brock v. Robbins 830 F.2d 640, 8 EBC 2489 (7th Cir. 1987).
8. [Compensation] The payment by a multiemployer plan of rent for an aircraft leased from a party in interest in an amount in excess of the value received by the multiemployer plan in utilizing the aircraft allegedly constitutes a prohibited transaction under Section 406(a)(1)(D). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
9. [ESOP] Under Section 406(a)(1)(B), one transaction normally prohibited is the lending of money or other extension of credit between the plan and a party in interest; however, loans to employee stock ownership plans are exempt from such prohibitions. Allen v. Katz Agency, Inc. Employee Stock Ownership Plan, 677 F.2d 193, 3 EBC 1352 (2d Cir. 1982).
10. [Ignorance] Where trustees did not inspect complete agreement as drafted by counsel, and thus were not aware that part of the plan would result in the use of plan assets to benefit a party in interest, they violated ERISA Section 406(a)(1). Dimond v. Retirement Plan, 582 F. Supp. 892, 4 EBC 1457 (W.D. Pa. 1983).
11. [Leases] The lease of an airplane by a multiemployer plan from a party in interest allegedly constitutes a prohibited transaction under Section 406(a)(1)(A). Usery v. Wilson, et al, No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
12. [Loans] Fiduciaries cannot act as both borrowers and lenders as these are parties whose interests are adverse; fiduciaries acting on both sides of a loan transaction cannot negotiate the best terms for either party. Davidson v. Cook, 567 F.Supp. 225, 4 EBC 1816 (E.D.Va. 1983), aff'd, 734 F.2d 10 (4th Cir.), cert. denied, 469 U.S. 899 (1984).
13. [Loans to Plan Sponsor] An employer's borrowing of money from the fund violates the prohibition under ERISA Section 406 regarding the lending of money between a plan and a party in interest. Dependahl v. Falstaff Brewing Corp., 491 F.Supp. 1188, 30 Fed. Rul. Serv.2d(Callahan) 564 (E.D.Miss. 1980), aff'd in part, rev'd in part, 653 F.2d 1208 (8th Cir.), cert.
14. [Loans] The phrase "reasonable rate of interest" within the meaning of ERISA Section 406(a)(1)(B) does not equate to the term "prevailing or market rate of interest." Thus, if the other requirements of Section 406(a)(1) are met, a pension fund may charge interest rates lower than the prevailing rate on mortgage loans made to plan participants. Evidence that a pension fund had charged a lower interest rate was insufficient to establish that the loans did not "bear a reasonable rate of interest" and were accordingly not exempted from the prohibition of ERISA Section 406(a) against making loans to plan participants. Brock v. Walton, 794 F.2d 586,7 EBC 1769 (11th Cir.), reh'g denied, 802 F.2d 1399 (11th Cir. 1986) (en banc).
15. [Loans] A loan of money by a multiemployer plan to a party in interest allegedly constitutes a prohibited transaction under Section 406(a)(1)(B). Usery v. Wilson, et al, No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
16. [Loans] Dissolving the improper party-in-interest relationship prior to the execution of a loan did not preclude the transaction from being violative of ERISA Section 406 when the loan agreement already existed at the time of divestiture. M&R Investment Co., Inc. v. Fitzsimmons, 685 F.2d 283, 3 EBC 1835 (9th Cir. 1982).

17. [Loans] A loan by a multiemployer plan to a party in interest for the purpose of enabling the party in interest to remove preexisting liens on an aircraft that the party in interest wished to acquire free of encumbrances allegedly constitutes a prohibited transaction under Section 406(a)(1)(D). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).
18. [Loans] Profit-sharing plan trustees violated ERISA's prohibited transactions provisions by maintaining pre-ERISA loans to employer-sponsor and to one of the trustees after law's effective date, where one loan was made without security with an oral promise to repay, since loans' terms were not at least as favorable to the plan as arm's length transaction would have been. Donovan v. Bryans, 566 F. Supp. 1258, 4 EBC 1816 (E.D.Pa. 1983).
19. [Mergers & Acquisitions] Fiduciaries of a trust, containing assets of corporate employee pension benefits plan, violated ERISA's prohibited transactions in Section 406 when they used the assets to finance another corporation's obligation under an acquisition agreement requiring the purchase of shares of stock held by the trust in another corporation. Sandoval v. Simmons 622 F.Supp. 1174, 6 EBC 2161 (D.C. Ill. 1985).
20. [Mergers & Acquisitions] ERISA Section 406(a)(1)(D) and (b)(1) should be read broadly as a gloss on the duty of loyalty required by Section 404 in light of the Congressional concern with protection of plan beneficiaries and should be read to cover action of trustee who buys shares in target corporation in order to assist either target's management or raider in its quest for corporate control or a control premium. Leigh v. Engle, 727 F.2d 113, 4 EBC 2702 (7th Cir. 1984).
21. [Provide Benefits] The payment of rent on behalf of the widow of a former plan trustee is a prohibited transaction under Section 406(a)(1)(D) even though the payment was morally commendable and was not made for the personal gain of plan fiduciaries. Marshall v. Cuevas, 1 EBC 1580 (D.P.R. 1979).
22. [Successor Trustee] ERISA limits a fiduciary's liability for breach of duty to those breaches committed during his tenure; however, under Section 406 of ERISA a successor trustee has a duty to dispose of prior investments violative of ERISA upon assuming his responsibilities. McDougall v. Donovan 552 F.Supp. 1206, 3 EBC 2385 (N.D.Ill. 1982).
23. [Unions] As Section 406 of ERISA seeks to protect against influences exerted by all parties in interest, Congress intended to prohibit dealings between a plan and any union whose members are among the beneficiaries of the plan. McDougall v. Donovan 552 F.Supp. 1206, 3 EBC 2385 (N.D.Ill. 1982).

Section 406(a)(2)
Except as provided in Section 408 [which contains the exemptions from the prohibited transaction restrictions]:
No fiduciary who has authority or discretion to control or manage the assets of a plan shall permit the plan to hold any employer security or real property if he knows or should know that holding such security or real property violates section 407(a) which contains the 10% limitation on the acquisition and holding of qualifying employer securities and real property.

A. Conference Report

The prohibited transaction provisions are discussed on pages 306-309 and 316-320 of the Congressional Conference Report.

Section 406(b)(1)	
A fiduciary with respect to a plan shall not -	
(1)	Deal with the assets of the plan in his own interest or for his own account,

A. Conference Report

This prohibition is covered on page 309 of the Congressional Conference Report.

B. Regulations

No regulations have been issued yet. However, the regulations under Section 408(b)(2) amplify

this prohibition .

1. This prohibition is imposed to deter fiduciaries from exercising the authority, control or responsibility that makes such persons fiduciaries when they have interests that may conflict with the interests of the plans for which they act. ERISA Regulation 2550.408b-2(e)(1).
2. A fiduciary does not engage in an act described in Section 406(b)(1) if the fiduciary does not use any of the authority, control or responsibility that makes such person a fiduciary to cause the plan to pay additional fees for a service furnished by such fiduciary or by a person in which such fiduciary has an interest that may affect the exercise of such fiduciary's best judgment as a fiduciary. DOL ERISA Regulation 2550.408b-2(e)(2).
3. The regulation cited above contains several important examples. DOL ERISA Regulation 2550.408b-2(f). Some of the examples, however, only deal with Section 406(b)(1) and not with Sections 406(b)(2) and 406(b)(3). Therefore, even if an example indicates that there is no Section 406(b)(1) prohibition, there may be a Section 406(b)(2) or (3) prohibition.
4. For a definition of plan assets, see DOL ERISA Regulation 2510.3-101.

C. **Advisory Opinions**

1. [General] A fiduciary does not engage in a violation of Section 406(b)(1) unless he uses his fiduciary authority to benefit himself or a related party. WSB 79-20; PLR 7826047; PLR 7826048; PLR 7826049; *Proposed* PTE I 492; *Proposed* Extension of Paragraph 1(a) of PTE C 75-1.
2. [General - Discretion Required] A fiduciary to a plan, by reason of rendering investment advice for a fee or other compensation, shall not be deemed to be a fiduciary regarding any plan assets to which such person does not have discretionary authority, discretionary control or discretionary responsibility, does not exercise any authority or control and does not render investment advice for a fee or other compensation. Thus, a sale of assets by the corporate trustee and investment manager, but of assets not under the control of that fiduciary, does not involve a possible prohibited transaction under Section 406(b). Also, where a factual analysis confirms that at the time of a transaction, the plan, as seller, and the purchaser had no party-in-interest relationship to one another, the sale cannot constitute a violation of Section 406(a)(1)(A) through (D). AO 81-20A.
3. [General] If a fiduciary uses the authority, control and responsibility that makes him a fiduciary to cause the plan to enter a transaction involving the provision of services when such fiduciary has an interest in the transaction that may affect the exercise of his best judgment as a fiduciary, a transaction described in Section 406(b) would occur. That transaction would be deemed to be a separate transaction from the transaction involving the provision of services and would not be exempted under Section 408(b)(2). Also, questions of what constitutes a necessary service, a reasonable contract or arrangement, and reasonable compensation are inherently factual in nature and will not be the subject of advisory opinions.

   Where a firm is an investment manager to individual employee benefit plans, the initial appointment of that firm as investment manager of a master trust and/or trustees of the master trust by independent plan fiduciaries would not cause the investment manager or trustees to violate Section 406(b)(1) or (2) as long as those persons exercise none of the authority, control or responsibility that makes them fiduciaries to cause the plan to make such appointments.

   - [Collective Investment Funds] Also, Section 406(a)(1) does not apply to any transaction between a plan and a common or collective trust fund maintained by a bank or trust company supervised by a state or a federal agency if (a) the transaction is a sale or purchase of an interest in the fund, (b) the bank or trust company receives no more than reasonable compensation, and (c) the transaction is expressly permitted by the instrument under which the plan is maintained or by a fiduciary who has authority to manage and control the assets of the plan.

   - [Deposits] Section 408(b)(4) provides that the prohibitions of Section 406 shall not apply to the investment of all or a part of plan assets and deposits that bear a reasonable rate of interest in a bank or similar financial institution supervised by the United States of America or by a state if such bank or other institution is a fiduciary of the plan and if (a) the plan covers only employees of such bank or other institution or affiliates of such bank or institution or (b) such investment is expressly authorized by a provision of the plan or by a fiduciary who is expressly empowered by the plan to so instruct the trustee

regarding such an investment.

- [Loan to Provide Employment for Union Members] Finally, the Department of Labor, on its own, notes that one of the collective funds that was the subject of the request for opinion is designated as the union construction fund. The Department indicates that a decision to make an investment may not be influenced, for example, by a desire to stimulate the construction industry and generate employment unless the investment, when judged solely on the basis of the economic value to the plan, would be equal to or superior to alternate investments available to the fund. AO 82-51A.

4. [General] The inquiry concerning whether a fiduciary has violated ERISA Section 406(b)(1) is not limited to the initial decision by the plan regarding retention of the fiduciary to provide additional services. At all times, such fiduciary may make no decision on behalf of the plan (or in any way use his authority or control) to cause the plan to make a decision which would have the effect of personally benefiting himself or any other person in which such fiduciary has an interest.

   However, the potential for a prohibited act of self-dealing in violation of ERISA Section 406(b)(1) may be prospectively avoided through the careful application, in effect as well as in form, of Example (7) of ERISA Regulations Section 2550.408(b)-2(f) (for example, the trustee must physically absent himself from all consideration of the matter and cannot any of his authority or control to influence the plan's decision.) WSB 79-20.

5. [Bank Board Membership] Where an individual is a fiduciary to a plan and where the individual serves as a member of the board of directors of a bank that also serves as a fiduciary to the plan, decisions made by the bank's board of directors regarding plan investments do not necessarily constitute Section 406(b) violations by the individual/director if he absents himself from any arrangements, agreements or understanding; removes himself from all board consideration of these decisions; and does not otherwise exercise any authority, control or responsibility with regard thereto. Provided, however, that if the board itself has an interest in the transaction that could alter or affect its judgment, this would constitute a per se violation under Section 406(b). AO 86-11A.
6. [Bank Custodian - Board Membership] The investment of plan assets in securities of the bank that is custodian, at the direction of a trustee who is also a director of the bank, may be a prohibited transaction under Section 406(b)(1). AO 76-76.
7. [Bank Holding Company Affiliate Use] The appointment of a second tier subsidiary and/or a division of a corporation to perform a fiduciary or nonfiduciary service for a plan, for which the second tier subsidiary or division acts as a fiduciary, would not constitute an act of self-dealing by the fiduciary provided that the appointment is made by a fiduciary who is independent of and unrelated to the parent-subsidiary group. PLR 7826047.
8. [Bank Holding Company Affiliate Use] A second tier subsidiary, acting in its capacity as plan trustee, retained a division of the parent of the first tier subsidiary to provide it with investment advice and related advisory services to the trust for which it was acting as trustee. The services performed by the division were clearly within the existing responsibilities of the second tier subsidiary. The second tier subsidiary did not delegate any of its responsibilities as trustee because it remained fully responsible for managing the plan's investments. The fees charged by the second tier subsidiary included payment for investment advice as well as for custodial services. The second tier subsidiary's fee was not affected by reason of its retaining the division. Rather, at its own expense, the second tier subsidiary compensated the division for the services rendered to it. The second tier subsidiary did not engage in an act of self-dealing under Code Section 4975(c)(1)(E) when it appointed the division to provide investment advice. PLR 7826048.
9. [Brokerage Services] If a plan fiduciary effects securities transactions on behalf of the plan and performs functions incidental to the effecting of such transactions, such transactions would be prohibited by ERISA and the Code unless, under the particular facts and circumstances surrounding the transactions, they do not constitute acts of self-dealing under ERISA Section 406(b)(1) and Code Section 4975(c)(1)(E). *Proposed* Extension of Paragraph 1(a) of PTE C 75-1.
10. [Collective Investment Funds] Also refer to General Advisory Opinions above for AO 82-51A.
11. [Collective Investment Funds] It is a violation of Section 406(b) when a company maintaining a pension advisory and consulting service, dealing in establishing investment objectives, evaluation, recommending managers, and monitoring performance, makes recommendations with regard to investments in collective trust funds to which said party has a fiduciary role, if the recommendations are a primary basis for plan investments. AO 84-04A.

12. [Commissions] This advisory opinion involved transactions by a licensed stock brokerage firm, which was the plan sponsor and involved mutual fund investments made by the plan. The documentation between the plan sponsor and the plan provided that the sponsor would agree to receive and hold all commissions as agent for the trustee on behalf of the plan and to pay the commissions to the plan within 30 days after receipt thereof.

    The Department of Labor ruled that the receipt of brokerage commissions by a plan fiduciary from a transaction involving assets held by the fiduciary as agent for the plan would not constitute a violation of ERISA if the fiduciary had no right, title or interest in the proceeds passed to the fiduciary, the commissions were returned to the plan in the ordinary course of business, and the fiduciary does not benefit in any manner from the holding of the money. AO 81-90A.

13. [Compensation] The receipt of compensation by a fiduciary from a plan is a prohibited transaction if the fiduciary is already receiving full-time compensation from the employer maintaining the plan. AO 78-08.
14. [Compensation] The appointment by a plan trustee of his secretary as plan administrator may violate Section 406(b)(1). Plan fiduciaries are prohibited from dealing with plan assets in their own interest or for their own account. If the compensation paid by the plan for administrative services, in fact, serves to compensate the trustee's secretary for the time spent in the performance of her secretarial duties, a violation of Section 406(b)(1) might occur. AO 77-84.
15. [Deposits] Also refer to General Advisory Opinions above for AO 82-51A.
16. [Deposits] The investment of the assets of a plan covering employees of banks, in savings accounts and certificates of deposit of banks that are contributing employers, constitutes a prohibited transaction under Section 406(a) and may also be prohibited under Section 406(b)(1) and (2) because members of the administrative board of the plan, which directs plan investments, are officers and employees of contributing employer/banks.

    However, Section 408(b)(4) provides an exemption from Sections 406(a), 406(b)(1) and 406(b)(2) for the investment of plan assets in the deposits or certificates of deposit of a bank that is a plan fiduciary or party in interest, if the requirements of ERISA Regulations Section 2550.408b-4 are met. **One requirement of the regulation is that, for investments made after November 1, 1977, the plan specify the name(s) of the banks in which deposits may be made. The specifications may be made to the plan by amendment retroactive to November 1, 1977**. AO 79-25.

17. [Fees, Incentive] Payment of an incentive fee pursuant to appropriate contractual relationship between an investment manager (fiduciary) and the plan would not, in and of itself, violate Section 406(b)(1). The amount of compensation that the manager earns depends solely on the changes in value of the securities in the individual accounts and, therefore, the manager would not be exercising any of its fiduciary authority or control to cause the plan to pay an additional fee.

    Moreover, it does not appear that the manager would be acting on behalf of or representing a person whose interests are adverse to the plan merely because it enters into an incentive fee arrangement. However, the Department notes that incentive fee arrangements could, under certain facts and circumstances, violate both Sections 406(a) and 406(b), as well as Section 404(a). Thus, the plan fiduciary must act prudently in deciding to enter into an incentive compensation arrangement with an investment manager, as well as the negotiation of the specific formula under which the compensation will be paid. The Department's position is that the fiduciary, prior to a decision to enter into an incentive compensation arrangement, must fully understand the compensation formula and the risks associated with this manner of compensation and have all relevant information pertaining thereto available to it. Further, the plan fiduciary must be capable of periodically monitoring the actions taken by the manager in the performance of its investment duties. AO 86-20A; accord AO 86-21A.

18. [Float] The ancillary services exemptions (§ 408(b)(2) and 408(b)(6)) do not include the float earned by the fiduciary bank from a demand deposit account to the extent that it is reasonably possible to earn a return on such funds. Retention of float would be permissible if it was a part of the bank's overall compensation from the plan and if the bank had made appropriate disclosures regarding the use of float. Failure to comply would result in a violation of ERISA Section 406(b)(1). AO 93-24A.
19. [Leases to Sponsor] The leasing by a plan of improved real property to the employer maintaining

the plan is a prohibited transaction pursuant to ERISA Section 406(a)(1)(A), (C), (D) and (E) and Code Section 4975(c)(1)(A), (C) and (D). In addition, since any property leased to an employer is employer real property as defined in ERISA Section 407(d)(2), if such property is not qualifying employer real property within the meaning of ERISA Section 407(d)(4), the holding of such property by the plan is a prohibited transaction pursuant to ERISA Sections 406(a)(2) and 407(a)(1). Also, to the extent that the employer may be a fiduciary to the plan as defined in ERISA Section 3(21)(A) and Code Section 4975(e)(3), the lease arrangement may be a prohibited transaction pursuant to ERISA Section 406(b)(1) and (2) and Code Section 4975(c)(1)(E). *Proposed* PTE I 192.

20. [Loan by Construction Union Plan to Provide Employment for Union Members] Also refer to General Advisory Opinions above for AO 82-51A.
21. [Loans] If a loan is made by a plan to a person in order to encourage that person to do business with the employer, the transaction would be prohibited under Section 406(a)(1)(D) and 406(b). WSB 79-63.
22. [Sale to Insider] The sale of certain parcels of real property by a profit-sharing plan to the majority shareholder of the employer maintaining the plan and to a corporation 50% or more of which is owned by such majority shareholder would constitute prohibited transactions pursuant to Section 406(a)(1)(A) and (D) of ERISA and Section 4975(c)(1)(A) and (D) of the Code. In addition, if the majority shareholder has the power to appoint and remove the plan trustee, such sales may be prohibited transactions under Section 406(b)(1) and (2) of ERISA and Section 4975(c)(1)(E) of the Code. *Proposed* PTE I 492.
23. [Stock - Exchanges] An exchange of securities held by a stock bonus plan in connection with a reorganization is not a prohibited transaction. WSB 78-29.

D. Court Decisions

1. [General] ERISA Section 406(b) codifies the principle that ERISA fiduciaries owe the plan, its participants and its beneficiaries a duty of loyalty and cautions fiduciaries that they must either avoid certain types of transactions or not serve as fiduciaries. Section 406 is violated if fiduciaries invest plan assets in companies in which any fiduciary owns an equity interest or from which any fiduciary receives compensation for the investment. Lowen v. Tower Asset Management, Inc., 829 F.2d 1209, 8 EBC 2457 (2d Cir. 1987).
2. [General] Based on Congressional concern about protection of plan beneficiaries, ERISA Sections 406(a)(1)(D) and (b)(1) should be read broadly as a gloss on the duty of loyalty required by Section 404 and should be read to cover action of trustee who buys shares in target corporation in order to assist either target's management or raider in its quest for corporate control or a control premium. Leigh v. Engle, 727 F.2d 113, 4 EBC 2702 (7th Cir. 1984).
3. [Compensation] The prohibition against fiduciaries acting in conflict of interest situations is violated where trustees authorize, for each other, monthly payment from plan's assets as compensation for their services as trustees while they are receiving full-time pay from participating employers or union and further authorize plans to make contributions on their behalf so as to make each other eligible for receipts of benefits from the plans. Donovan v. Daugherty, 550 F.Supp. 390, 3 EBC 2079 (S. D. Ala. 1982).
4. [Loans] Two trustees of a multiemployer plan who owned a large interest in a corporation and who caused the plan to make a loan commitment to the corporation so that the corporation could remove liens on an aircraft the corporation wished to acquire free of encumbrances allegedly violated Section 406(b)(1). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order). See also Marshall v. Dekeyser, 485 F.Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).

Section 406(b)(2)	
A fiduciary with respect to a plan shall not -	
(2)	In his individual or in any other capacity act in any transaction involving the plan on behalf of a party (or represent a party) whose interests are adverse to the interests of the plan or the interests of its participants or beneficiaries, . . .

A. Conference Report

Page 309 of the Congressional Conference Report covers the above provision.

B. Regulations

No regulations have been issued yet. However, the regulations under Section 408(b)(2) and two prohibited transaction class exemptions amplify this prohibition.

1. This prohibition is imposed to deter fiduciaries from exercising the authority, control or responsibility that makes such persons fiduciaries when they have interests that may conflict with the interests of the plans for which they act. ERISA Regulation § 2550.408b-2(e)(1).
2. A fiduciary may not use the authority, control or responsibility that makes such a person a fiduciary to cause the plan to pay an additional fee to such fiduciary (or to a person in which such person has an interest that may affect the exercise of such fiduciary's best judgment as a fiduciary). DOL ERISA Regulation 2550.408b-2(e)(1).
3. The regulation cited above contains several important examples. DOL ERISA Regulation 2550.408b-2(f); however, not all of the examples deal with Section 406(b)(2).
4. The preambles to PTE C 76-1 and PTE 77-10 amplify the interrelationships between this prohibition and the other prohibitions.

C. Interpretive Bulletins

1. If a fiduciary, in addition to his duties for the plan, serves in a decision making capacity with another party, the mere fact that such fiduciary effects payments to such party of money to which a participant is entitled at the direction of the participant and in accordance with specific plan provisions does not contravene Section 406(b)(2). IB 78-1.

D. Advisory Opinions

1. [Bank Stock] The investment of plan assets in a bank of which a fiduciary is a director may be a prohibited transaction under Section 406(b)(2). AO 76-62.
2. [Bank Stock - Purchase/Retention/Sale of Fiduciary Bank/BHC Stock]

   General Discretionary Rule - An ERISA plan may not invest in the stock of a fiduciary bank if the bank has discretion over the transaction. The discretionary retention of such stock would also be prohibited. Non-discretionary purchases, sales, and retentions are permitted.

   DOL notes the duty of undivided loyalty owed under § 406(b) , but the conflict of interest which may occur if a sale of bank stock would be in the best interests of a plan, but such a sale (or the news of such a sale) might lower the price of the bank's stock.

   See 1980 letter from DOL to OCC .

3. [Custodians] The interests of the bank that performs the services of custodial agent for the plan and is a plan fiduciary are or could be deemed to be adverse to the interests of the plan. AO 76-76.
4. [Deposits] Investment of the assets of a noncollectively bargained multiple employer plan covering employees of banks, in savings accounts and certificates of deposit of banks that are contributing employers, constitutes a prohibited transaction under Section 406(a) and may also be prohibited under Section 406(b)(1) and (2) because members of the administrative board of the plan, which directs plan investments, are officers and employees of contributing employer banks.

   However, Section 408(b)(4) provides an exemption from Sections 406(a), 406(b)(1) and 406(b)(2) for the investment of plan assets in the deposits or certificates of deposit of a bank that is a plan fiduciary or party in interest if the requirements of ERISA Regulations Section 2550.408b-4 are met. **One requirement of the regulation is that, for investments made after November 1, 1977, the plan specify the name(s) of the banks in which deposits may be made. The specifications may be made to the plan by amendment retroactive to November 1, 1977.** AO 79-25.

5. [Investment Manager Appointment] The involvement of a plan fiduciary in the appointment of a corporation of which such fiduciary is a director as an investment manager of the plan's assets may be a prohibited transaction under Section 406(b)(2). AO 76-15.
6. [Investment Management] The provision of investment management services by the plan manager to a fund would be exempt from Section 406(a) if the conditions of Section 408(b)(2) are met. The question of what constitutes a necessary service, a reasonable contract or arrangement, or reasonable compensation is factual in nature and not subject to advisory

opinions.

Further, the mere selection of the manager to provide investment management services to a plan where the payment of compensation for such services is to be made by the plan sponsor receiving such services would not constitute a per se violation of Section 406(b)(1), but such violation could occur in the course of the committee's deliberations to invest in the fund and the concomitant retention of the plan manager. Accordingly, a ruling that the arrangement is exempt from Section 406(b)(1) cannot be made.

Generally, a fiduciary's decision to retain an affiliate service provider whose fees will be paid by the plan sponsor will not involve an adversity of interest as contemplated by Section 406(b)(2) of the act. If, for example, a fiduciary of the plan, in negotiating a service contract on behalf of the plan, also acts on behalf of a person and causes that person to benefit from such a decision at the expense of any kind to the plan, the decision to retain the service provider would result in a violation of Section 406(b)(2). Accordingly, the decision to retain the manager to service the plan investments in the fund would not, in itself, constitute a violation of Section 406(b)(2); but because it is inherently factual in nature, no opinions can be rendered thereon. AO 83-44A.

7. [Leases to Sponsor] The leasing by a plan of improved real estate to the employer maintaining the plan is a prohibited transaction pursuant to ERISA Section 406(a)(1)(A), (C), (D) and (E) and Code Section 4975(c)(1)(A), (C) and (D). In addition, since any property leased to an employer is employer real property as defined in ERISA Section 407(d)(2), if such property is not qualifying employer real property within the meaning of ERISA Section 407(d)(4), the holding of such property by the plan is a prohibited transaction pursuant to ERISA Sections 406(a)(2) and 407(a)(1). Also, to the extent that the employer may be a fiduciary to the plan as defined in ERISA Section 3(21)(A) and Code Section 4975(e)(3), the lease arrangement may be a prohibited transaction pursuant to ERISA Section 406(b)(1) and (2) and Code Section 4975(c)(1)(E). *Proposed* PTE I 192.
8. [Sale to Insider of Sponsor] The sale of certain parcels of real property by a profit-sharing plan to the majority shareholder of the employer maintaining the plan and to a corporation 50% or more of which is owned by such majority shareholder would constitute prohibited transactions pursuant to ERISA Section 406(a)(1)(A) and (D) and Code Section 4975(c)(1)(A) and (D). In addition, if the majority shareholder has the power to appoint and remove the plan trustee, such sales may be prohibited transactions under ERISA Section 406(b)(1) and (2) and Code Section 4975(c)(1)(E). *Proposed* PTE I 492.

E. Court Decisions

1. [General] ERISA Section 406(b)(2) is to be read as requiring a transaction between the plan and a party having an adverse interest for the prohibition to apply. Donovan v. Bierwirth, 680 F.2d 263, 3 EBC 1417 (2d Cir.), cert. denied, 459 U.S. 1069 (1982).
2. [General] ERISA Section 406(b)(2) prohibits representation of parties who are adverse in the technical sense. A transaction does not have to exhibit fiduciary misconduct, reflecting harm to the beneficiaries, before ERISA Section 406(b)(2) is violated. When identical trustees of two plans whose participants and beneficiaries are not identical effect a loan between the plans without a statutory or administrative exemption, a per se violation of ERISA exists. ERISA Section 406(b) contains a blanket prohibition of certain transactions, no matter how fair. Cutaiar v. Marshall, 590 F.2d 523 (3d Cir. 1979).
3. [Loans] A party who is a borrower from a plan or who is claiming payment from a plan will, by definition, have interests adverse to the interests of the plan. Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978); Marshall v. Dekeyser, 485 F.Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).
4. [Loans] An employer trustee of a Taft-Hartley plan, who was also the director of the employer association, did not violate Section 406(b)(2) by either:

    a. advising employers not to make contributions to the plan and to resist audits by the plan, or
    b. bringing suit to block the plan's collection procedures that the trustee believed to be unauthorized.

    The court noted that under Section 408(c)(3), a plan trustee can also serve as the director of an employer association and perform all of the duties required of a person holding each of these positions. The

court also indicated that, where a trustee acts pursuant to Section 405(a)(3) to remedy a breach of fiduciary duty that such trustee believes to have been committed by another plan fiduciary, the trustee is not acting in violation of Section 406(b)(2) regardless of the trustee's motivation. Curren v. Freitag, 432 F.Supp. 668 (S.D.Ill. 1977). See also N.L.R.B. v. Construction and General Laborers Union Local 110, 577 F.2d 16 (8th Cir. 1978), cert. denied, 439 U.S. 1070 (1979) (union trustee and secretary-treasurer of union).

5. [Loans] The trustees of a multiemployer plan who agreed to cause the plan to: (a) pay rent to a corporation for the joint lease of an airplane (with a union) at a time when the plan held two notes from such corporation that were in default, or (b) make a loan commitment to the corporation so that the corporation could remove liens on an airplane it wished to acquire free of encumbrances, allegedly violated Section 406(b)(2). Usery v. Wilson, et al., No. 3-76-373 (E.D.Tenn., June 6, 1977) (consent order).

Section 406(b)(3)
A fiduciary with respect to a plan shall not -
Receive any consideration for his own personal account from any party dealing with such plan in connection with a transaction involving the assets of the plan.

A. Conference Report

The above section is explained on page 309 of the Congressional Conference Report.

B. Regulations

No regulations have been issued yet. However, the regulations under Section 408(b)(2) amplify this prohibition.

1. This prohibition is imposed to deter fiduciaries from exercising the authority, control or responsibility that makes such persons fiduciaries when they have interests that may conflict with the interests of the plans for which they act. DOL ERISA Regulation 2550.408b-2(e)(1).
2. A fiduciary may not use the authority, control or responsibility that makes such a person a fiduciary to cause the plan to enter into a transaction involving plan assets whereby such fiduciary (or a person in which such fiduciary has an interest that may affect the exercise of such fiduciary best judgment as a fiduciary) will receive consideration from a third party in connection with such transaction. DOL ERISA Regulation 2550.408b-2(f).
3. The regulation cited above contains several important examples. DOL ERISA Regulation 2550.408b-2(f); however, not all of the examples deal with Section 406(b)(3).
4. For a definition of plan assets, see DOL ERISA Regulation 2510.3-101 .

C. Advisory Opinions

1. [Compensation] The receipt of compensation by a fiduciary from a plan is a prohibited transaction if the fiduciary is already receiving full-time compensation from the employer maintaining the plan. AO 78-08.
2. [Estate Legacy] A violation of Section 406(b)(3) would not generally occur from the mere receipt of a distribution from an estate by a plan fiduciary as beneficiary of the estate in a transaction separate and apart from the plan's acquisition of qualifying employer securities from that estate. Under such circumstances, the distribution would not appear to be in connection with the transaction involving plan assets. AO 87-04A.
3. [Mutual Funds] No Section 406(b)(2) or (3) violations arise, per se, because fiduciaries to certain employee benefit plans are also sponsors of and advisers to certain mutual funds and the employee benefit plans purchase shares therein so long as these fiduciaries exercise none of the authority, control, or responsibility of the plans with regard to causing the plans to purchase units in the mutual funds. AO 82-31A.

D. Court Decisions

1. Fiduciary charged with violation of Section 406(b)(3) prohibiting receipt of consideration for fiduciary's own personal account from any party dealing with plan either must prove by a preponderance of evidence that the transaction in question fell within an exception, or must prove by clear and convincing evidence that compensation received was for services other than transactions involving plan assets. Lowen v. Tower Asset Management, Inc., 829 F.2d 1209, 8 EBC 2457 (2d Cir. 1987).
2. If charged with a violation of Section 406(b)(3) the fiduciary bears the burden of proving that the questionable transaction fell within a Section 408 or regulatory exemption to Section 406(b)(3) or that compensation was for services other than the questionable transaction. For purposes of deciding a motion for summary judgment, if the transaction at issue is not exempted from the prohibitions of Section 406, the evidence before the court must be sufficient to permit a jury to conclude, by clear and convincing evidence, that the compensation received by a fiduciary was not "in connection with" the questionable investment of plan assets. Lowen v. Tower Asset Management, Inc., 829 F.2d 1209, 8 EBC 2457 (2d Cir. 1987).

Section 406(c)
A transfer of real or personal property by a party in interest to a plan shall be treated as a sale or exchange if the property is subject to a mortgage or similar lien which the plan assumes or if it is subject to a mortgage or similar lien which a party-in-interest placed on the property within the 10-year ending on the date of the transfer.

A. **Conference Report**

This provision is explained on page 308 of the Congressional Conference Report.

10 Percent Limitation on employer securities and employer real property **ERISA Section 407**	
Section 407(a)(1)	
Except as otherwise provided in this section and section 414, a plan may not acquire, or hold:	
(A)	Any employer security which is not a qualifying employer security, or
(B)	Any employer real property which is not qualifying employer real property.

A. Conference Report

Pages 316-320 of the Congressional Conference Report explains the employer security and real property provisions.

B. **Regulations**

1. Refer to DOL ERISA Regulation 2550.407a-1. A plan may hold or acquire only employer securities that are qualifying employer securities and employer real property that is qualifying employer real property. A plan may not hold employer securities and employer real property that are not qualifying employer securities and qualifying employer real property except in certain circumstances.
2. See DOL ERISA Regulation 404c-1 , covering participant-directed plans (such as 401(k) and 403(b)), which contains authorization for investments in employer securities (404c-1(b)(2)(B)(1)(vii)), and special conditions when offering them as an "investment alternative" (see 404c-1(d)(2)(ii)(E)(4)(vii), (viii) and (ix), as well as general 404c-1 requirements). In general, fiduciaries are exempted from certain ERISA fiduciary responsibility liability if plans meet certain conditions and participants direct their own investments.
3. Also refer to IRS Regulation 54.4975-12, which defines the term "Qualifying Employer Security".

C. **Advisory Opinions**

1. [Concentrations] The only language of ERISA that specifically limits the percentage amount of a particular asset that a plan may hold is found in Section 407, and this limitation refers to the holding or acquisition of qualifying employer securities or real property. Other than Section 407, the amount or percentage of plan assets that may be placed in a particular investment vehicle is governed by the general standards of fiduciary responsibility. AO 76-74.
2. [Limited Partnerships] Units in a limited partnership are not qualifying employer securities within the definition of ERISA Section 407(d)(5). The continued holding of such units may be a prohibited transaction under ERISA Sections 406(a)(2) and 407(a)(1). *Proposed* PTE I 038.
3. [Property - Leased] The leasing by a plan of improved real property to the employer maintaining the plan is a prohibited transaction pursuant to ERISA Section 406(a)(1)(A), (C), (D) and (E) and Code Section 4975(c)(1)(A), (C) and (D). In addition, since any property leased to an employer is "employer real property" as defined in ERISA Section 407(d)(2), if such property is not "qualifying employer real property" within the meaning of ERISA Section 407(d)(4), the holding of such property by the plan is a prohibited transaction pursuant to ERISA Sections 406(a)(2) and 407(a)(1). Also, to the extent that the employer may be a fiduciary to the plan as defined in ERISA Section 3(21)(A) and Code Section 4975(e)(3), the lease arrangement may be a prohibited transaction pursuant to ERISA Section 406(b)(1) and (2) and Code Section 4975(c)(1)(E). *Proposed* PTE I 192.
4. [Stock] Stock of the parent in a controlled group corporation held by an employee benefit plan sponsored and maintained by a wholly owned subsidiary constitutes employer qualified securities under Section 407. AO 84-36A.

Section 407(a)(2)
Except as otherwise provided in this section and section 414, a plan may not acquire any qualifying employer security or qualifying employer real property, if immediately after such acquisition the aggregate fair market value of employer securities and employer real property held by the plan exceeds 10% of the fair market value of the assets of the plan.

A. Conference Report

Pages 316-320 of the Congressional Conference Report explains this employer security and real property provision.

B. Advisory Opinions

1. [Stock Exchanges] The exchange of stock between the employer maintaining the plan and the plan pursuant to a re-incorporation of the employer in another state is not an acquisition of employer stock by the plan. AO 75-100.
2. [Warrants] The acquisition of an employer's common stock by a plan through the exercise of warrants constitutes an acquisition by a plan of qualifying employer securities within the meaning of ERISA Section 407(a)(2). PLR 791005.

Section 407(a)(3)
Except as otherwise provided in this section and section 414:
After December 31, 1984, a plan may not hold any qualifying employer securities or qualifying employer real property (or both) to the extent that the aggregate fair market value of such securities and property determined on December 31, 1984 exceeds 10% or the greater of:
The fair market value of the assets of the plan, determined on December 31, 1984, or
The fair market value of the assets of the plan determined on January 1, 1975.
Subparagraph (A) of this paragraph shall not apply to any plan that on any date after December 31, 1974, and before January 1, 1985, did not hold employer securities or employer real property (or both) the aggregate fair market value of which determined on such date exceeded 10% of the greater of -
The fair market value of the assets of the plan, determined on such date, or

The fair market value of the assets of the plan determined on January 1, 1975.

A. Conference Report

Pages 316-320 of the Congressional Conference Report explains the employer security and real property provisions.

B. Advisory Opinions

1. A plan will meet the requirements of Section 407(a)(3)(B) if it falls below the 10% limitation on any day prior to December 31, 1984. AO 79-27.

C. Court Decisions

1. Where a trustee invests less than 10% of a pension plan's assets complying with ERISA Section 407(a)(3), a trustee is not relieved of other fiduciary duties contained in ERISA. Donovan v. Bierwirth, 680 F.2d 263, 3 EBC 1417 (2d Cir.), cert. denied, 459 U.S. 1069 (1982).

Section 407(a)(4)	
Except as otherwise provided in this section and section 414:	
(A)	After December 31, 1979, a plan may not hold any employer securities or employer real property in excess of the amount specified in regulations under subparagraph (B). This subparagraph shall not apply to a plan after the earliest date after December 31, 1974, on which it complies with such regulations.
(B)	Not later than December 31, 1976, the Secretary shall prescribe regulations which shall have the effect of requiring that a plan divest itself of 50% of the holdings of employer securities and employer real property which the plan would be required to divest before January 1, 1985, under paragraph (2) or subsection (c) (whichever is applicable).

A. Conference Report

Pages 316-320 of the Congressional Conference Report explain the employer security and real property provisions.

B. Advisory Opinions

1. [Bonds] A plan's holding of debentures issued by an employer may constitute a loan or extension of credit to the employer, which, if the conditions of Section 414(c)(1) are met, would be exempt until June 30, 1984 from the restrictions of Section 407(a). WSB 79-69.

Section 407(b)		
(1)	Subsection (a) of this section shall not apply to any acquisition or holding of qualifying employer securities or qualifying employer real property by an eligible individual account.	
(2)	Cross References. -	
	(A)	For exemption from diversification requirements for holding of qualifying employer securities and qualifying employer real property by eligible individual account plans, see section 404(a)(2).
	(B)	For exemption from prohibited transactions for certain acquisitions of qualifying employer securities and qualifying employer real property which are not in violation of the 10% limitation, see section 408(e).
	(C)	For transitional rules respecting securities or real property subject to binding contracts in effect on June 30, 1974, see section 414(c).

A. Conference Report

Pages 316-320 of the Congressional Conference Report explains the above employer security and real property provision.

Section 407(c)		
(1)	A plan which makes the election under paragraph (3) shall be treated as satisfying the requirements of section 407(a)(3) if -- and only if -- employer securities held on any date after December 31, 1974 and before January 1, 1985 have a fair market value, determined as of December 31, 1974, not in excess of 10% of the lesser of	
	(A)	The fair market value of the assets of the plan determined on such date (disregarding any portion of the fair market value of employer securities which is attributable to appreciation of such securities after December 31, 1974 but not less than the fair market value of plan assets on January 1, 1975), or
	(B)	An amount equal to the sum of (i) the total amount of the contributions to the plan received after December 31, 1974, and prior to such date, plus (ii) the fair market value of the assets of the plan, determined on January 1, 1975.
(2)	For purposes of this subsection, in the case of an employer security held by a plan after January 1, 1975, the ownership of which is derived from ownership of employer securities held by the plan on January 1, 1975, or from the exercise of rights derived from such ownership, the value of such security held after January 1, 1975, shall be based on the value as of January 1, 1975, of the security from which ownership was derived. The Secretary shall prescribe regulations to carry out this paragraph.	
(3)	An election under this paragraph may not be made after December 31, 1975. Such an election shall be made in accordance with regulations prescribed by the Secretary, and shall be irrevocable. A plan may make an election under this paragraph only if on January 1, 1975, the plan holds no employer real property. After such election and before January 1, 1985, the plan may not acquire any employer real property.	

A. **Conference Report**

Pages 316-320 of the Congressional Conference Report explain the employer security and real property provisions.

Section 407(d)(1)
For purposes of this section -
The term "employer security" means a security issued by an employer of employees covered by the plan, or by an affiliate of such employer. A contract to which section 408(b)(5) applies shall not be treated as a security for purposes of this section.

A. Conference Report

Pages 316-320 of the Congressional Conference Report explain the definition of the term employer security.

B. **Advisory Opinions**

1. [Bonds] Rights to certain debentures may be employer securities. AO 76-72.
2. [Loan Guarantees] The guarantee by an employer of loans made by the plan to a third party constitutes an employer, under Section 407(d)(1) but not a qualifying employer security under Sections 407(d)(5) and 407(e). WSB 79-51.

Section 407(d)(2)
For purposes of this section -

The term "employer real property" means real property (and related personal property) which is leased to an employer of employees covered by the plan, or to an affiliate of such employer. For purposes of determining the time at which a plan acquires employer real property, for purposes of this section, such property shall be deemed to be acquired by the plan on the date on which the plan acquires the property or the date on which the lease to the employer (or affiliate) is entered into, whichever is later.

A. Conference Report

Pages 316-320 of the Congressional Conference Report explain the definition of the term employer real property.

Section 407(d)(3)	
For purposes of this section -	
(A)	The term "eligible individual account plan" means an individual account plan which is (i) a profit-sharing, stock bonus, thrift or savings plan; (ii) an employee stock ownership plan; or (iii) a money purchase plan which was in existence on the date of enactment of this Act and which on such date invested primarily in qualifying employer securities. Such term excludes an individual retirement account or annuity described in section 408 of the Internal Revenue Code of 1954.
(B)	Notwithstanding subparagraph (A) a plan shall be treated as an eligible individual account plan with respect to the acquisition or holding of qualifying employer real property or qualifying employer securities only if such plan explicitly provides for acquisition and holding of qualifying employer securities or qualifying employer real property (as the case may be). In the case of a plan in existence on the date of enactment of this Act, this subparagraph shall not take effect until January 1, 1976.

A. Conference Report

The term eligible individual account plan is covered at pages 316-320 of the Congressional Conference Report.

B. Advisory Opinions

1. [ESOPs] Section 407(b)(1) provides that the limitations on the acquisition and retention of qualifying employer securities and qualifying employer real property as contained in Section 407(a) do not apply to eligible individual account plans. Section 407(d)(3) defines the term eligible individual account plan to include an individual account plan that is an ESOP and that expressly provides for the acquisition and holding of employer securities. AO 81-67A.
2. An individual account plan is not an *eligible* individual account plan unless it explicitly provides for the acquisition and holding of qualifying employer securities or qualifying employer real property. AO 78-25; WSB 79-86.
3. [Profit Sharing Plans] Where a plan is a profit-sharing plan and, therefore, meets the requirements of Section 407(d)(3)(A), it would constitute an eligible individual account plan for purposes of Section 407(d)(3) in connection with the sale of employer stock held by the plan, even though the plan does not expressly provide for the acquisition and holding of employer securities as required by Section 407(d)(3)(B). WSB 79-88.

C. Court Decisions

1. [Governing Documents] For purposes of determining whether a plan provides for the purchase of employer securities, both the plan and the trust agreement can be looked to as plan documents. Leonard v. Drug Fair, Inc., Fed. Sec. L. Rep. (CCH) 997,144 (D.D.C. 1979).
2. [Defined Contribution Plan] Where the board of directors amended a pension plan to allow up to 50% of the plan's assets to be used to purchase the employer's securities, the plan will not violate ERISA Section 407 if the plan is within the definition of an eligible individual account plan. District 65, U.A. W. v. Harper & Row Publishers, Inc., 576 F.Supp. 1468, 4 EBC 2586, F&L S&L L. Rep. (CCH) 999,608 (S.D.N.Y. 1983).
3. [ESOPs] If a pension plan that allows up to 50% of the plan's assets to be used to purchase the

employer's securities is an ESOP, the plan must conform to Code Section 401 in order to be an eligible individual account plan under ERISA Section 407(a). District 65, U.A. W. v. Harper & Row Publishers, Inc., 576 F.Supp. 1468, 4 EBC 2586, F&L S&L L. Rep. (CCH) 999,608 (S.D.N.Y. 1983).
4. [Bonds] In order for the purchase of debt securities by an eligible individual account plan to be exempt from the Section 407 limitations, the plan must specifically provide for the holding of marketable obligations of the type involved. Marshall v. Dekeyser, 485 F.Supp. 629, 1 EBC 1898 (W.D.Wis. 1979).

Section 407(d)(3)(C)
The term "eligible individual account plan" does not include any individual account plan the benefits of which are taken into account in determining the benefits pursuant to a participant under any defined benefit plan.

Section 407(d)(4)	
For purposes of this section -	
The term "qualifying employer real property" means parcels of employer real property-	
(A)	if a substantial number of the parcels are dispersed geographically;
(B)	if each parcel of real property and the improvements thereon are suitable (or adaptable without excessive cost) for more than one use;
(C)	even if all such real property, is leased to one lessee (which may be an employer, or an affiliate of an employer); and
(D)	if the acquisition and retention of such property comply with the provisions of this part (other than section 404(a)(1)(B) to the extent it requires diversification, and sections 404(c)(1)(C), 406 and 407(a) of this section).

A. Conference Report

Pages 316-320 of the Congressional Conference Report explain the definition of the term qualifying employer real property.

B. Advisory Opinions

1. To meet the substantial number requirement of Section 407(d)(4)(A), there must be more than one parcel. AO 84-20A.
2. A single parcel of real property cannot be qualifying employer real property. Qualifying employer real property means parcels (plural) of employer real property. AO 76-14; AO 76-132; AO 77-16; *Proposed* PTE I 192, PLR 7847043.
3. Whether a substantial number of parcels of employer real property are geographically dispersed so as to provide protection for a plan in the event of adverse economic conditions in any one area, and whether such parcels are suitable or adaptable without excessive cost for more than one use are both questions that are inherently factual in nature and will not be the subject of advisory opinions. AO 84-20A.
4. Employer real property, is qualifying employer real property where there are six parcels of real property located in four different states; no two parcels are closer than 80 miles apart; five of the six parcels contain simple one-story structures and the machinery located therein could be removed at minimal costs without affecting the structure; and the sixth parcel contains a building with offices and open space for laboratories and machinery. AO 75-11.
5. The definition of the term qualifying employer real property requires a determination regarding whether a particular acquisition or retention of employer real property complies with ERISA Section 404. The Department of Labor will not issue an advisory opinion under Section 407(d)(4)(D) as to whether particular employer real property is qualifying employer real property. The Department will; however, issue advisory opinions regarding the other substantive conditions of Section 407(d)(4). AO 77-01.
6. The geographical dispersion requirement is satisfied where three parcels of property contain

three restaurants that serve and draw from different fast food markets. AO 77-01.

Section 407(d)(5)
For purposes of this section -
The term "qualifying employer security" means an employer security which is (1) stock; (2) a marketable obligation (as defined in section (e)), or (3) an interest in a publicly traded partnership (as defined in section 7704(b) of the IRC of 1986), but only if such partnership is an existing partnership as defined in section 10211(c)(2)(A) of the Revenue Act of 1987 (Public Law 100-203). After December 17, 1987, in the case of a plan other than an eligible individual account plan, stock shall be considered a qualifying employer security only if such stock satisfies the requirements of subsection (f)(1).

A. Conference Report

Pages 316-320 of the Congressional Conference Report explain the definition of the term qualifying employer security.

B. Regulations

DOL ERISA Regulation 2550.407d-5 merely restates the statutory provisions.

C. Advisory Opinions

1. [Affiliate] A plan owns 100% of the stock of a corporation, but employees of that corporation do not participate in the plan. The stock of the corporation is not qualifying employer securities under Section 407(d)(5), since it has not been issued by an employer or an affiliate of an employer. AO 79-27.
2. [Affiliate] In general, where the employees of two or more employers [whether or not affiliated within the meaning of Section 407(d)(7)] are covered by a single plan, the securities issued by each employer or by an affiliate thereof, as defined in Section 407(d)(7), would ordinarily constitute qualifying employer securities within the meaning of Section 407(d)(5) if the applicable requirements under that section are satisfied. Accordingly, if the plan is, in fact, a single plan and continues to be maintained as one plan by both employers for their respective employees, the common stocks of each and both employers would constitute qualifying employer securities for purposes of applying the provisions of Sections 404(a)(2) and 407. AO 81-5A.
3. [Affiliate Stock] The common stock of a wholly owned subsidiary would be a qualifying employer security because it is a stock issued by an affiliate of an employer of employees covered by the plan. If the subsidiary has such employees, it would be stock issued by an employer of employees covered by the plan. If the subsidiary has employees covered by the plan, the subsidiary's stock will continue to be a qualifying employer security after the plan owns all of such stock. WSB 78-31. See also AO 77-30; WSB 78-26; WSB 79-86.
4. [Convertible Bonds] Debentures issued by an employer that are convertible into stock do not constitute stock for Purposes of Section 407(d)(5). AO 79-45.
5. [Loan Guarantees] The guarantee by an employer of loans made by the plan to a third party constitutes an employer security under Section 407(d)(1) but not a qualifying employer security under Sections 407(d)(5) and 407(e). WSB 79-51.
6. [Rights] Rights to certain debentures are not qualifying employer securities because they are neither stock nor marketable obligations. AO 76-72.
7. [Stock] Book value shares are qualifying employer securities. AO 77-35.
8. [Stock - Preferred] Preferred stock issued by an affiliate of an employer whose employees are covered by a plan is a qualifying employer security. AO 75-89.

Section 407(d)(6)	
For purposes of this section -	
The term "employee stock ownership plan" means an individual account plan -	
(A)	Which is a stock bonus plan which is qualified, or a stock bonus plan and money

	purchase plan both of which are qualified, under section 401 of the Internal Revenue Code of 1954, and which is designed to invest primarily in qualifying employer securities, and
(B)	Which meets such other requirements as the Secretary of the Treasury may prescribe by regulation.

A. Conference Report

The term ESOP is covered at pages 316-320 of the Congressional Conference Report.

B. Regulations

Refer to DOL ERISA Regulation 2550.407d-6. These regulations contain several requirements relating to ESOPs.

An ESOP must also meet such other requirements as the Secretary of the Treasury may prescribe by regulation under Section 4975(e)(7) of the Internal Revenue Code.

C. Advisory Opinions

1. [ESOPs] Where a plan is organized and established as an employee stock ownership plan for the purpose of investing primarily in qualifying employer securities but where under the circumstances it would not be prudent or otherwise beneficial to plan participants for the ESOP to invest a large percentage of its assets in qualifying employer securities, even though plan documents generally provide for such investments. In that situation the potential liability for breach of fiduciary duty makes a fiduciary's decision to disregard a plan provision difficult. A plan provision that requires a plan to invest more than 50% of is assets in qualifying employer securities would normally be deemed to satisfy the requirement of Section 407(d)(6) that a plan must satisfy the primary requirement with regard to its primary investment objectives and vehicle. AO 83-6A.

D. Court Decisions

1. [ESOPs] Where a pension plan purchased common stock without voting rights, the plan can still qualify as an ESOP under ERISA Section 407(d)(6), since Code Section 401 does not require stock to have voting rights for tax qualified plans. However, the ESOP must obtain voting power equal to or in excess of the amount of voting power held in said stock by the employer. Schoenholtz v. Doniger 657 F.Supp. 899, 8 EBC 2031 (S.D.N.Y. 1987).

Section 407(d)(7)
For purposes of this section -
A corporation is an affiliate of an employer if it is a member of any controlled group of corporations (as defined in section 1563(a) of the Internal Revenue Code of 1954, except that "applicable percentage" shall be substituted for "80%" whenever the latter percentage appears in such section) of which the employer who maintains the plan is a member. For purposes of the preceding sentence, the term "applicable percentage" means 50%, or such lower percentage as the Secretary may prescribe by regulation. A person other than a corporation shall be treated as an affiliate of an employer to the extent provided in regulations of the Secretary. An employer which is a person other than a corporation shall be treated as affiliated with another person to the extent provided by regulations of the Secretary. Regulations under this paragraph shall be prescribed only after consultation and coordination with the Secretary of the Treasury.

A. Conference Report

"Affiliate" is discussed on pages 316-320 of the Congressional Conference Report.

B. Advisory Opinions

1. A corporation must be an affiliate prior to the sale of its securities for its securities to be either

employer securities or qualifying employer securities. AO 77-18.

2. [Affiliate] Where an employer owns 62% of the outstanding stock of a corporation, such corporation is an "affiliate" of the employer under Section 407(d)(7). AO 79-23.
3. [Affiliate] A plan owns 100% of the stock of a corporation, but employees of that corporation do not participate in the plan. The stock of the corporation is not qualifying employer securities under Section 407(d)(5), since it has not been issued by an employer or an affiliate of an employer. AO 79-27.
4. For the exemption provided by Section 408(e) to apply to any sale, the property being sold must be either qualifying employer securities or qualifying employer real property at the time such securities or property, are sold by the plan. If a corporation is not a member of a controlled group prior to the consummation of a sale, the corporation's securities will not be securities of an affiliate prior to the sale. AO 77-18.

Section 407(d)(8)
For purposes of this section -
The Secretary may prescribe regulations specifying the extent to which conversions, splits, the exercise of rights, and similar transactions are not treated as acquisitions.

A. Conference Report

The above provision is covered at pages 316-320 of the Congressional Conference Report.

Section 407(d)(9)
For purposes of this section, an arrangement which consists of a defined benefit plan and an individual account plan shall be treated as one plan if the benefits of such individual account plan are taken into account in determining the benefits payable under such defined benefit plan.

Section 407(e)		
For purposes of subsection (d)(5), the term "marketable obligation" means a bond, debenture, note, or certificate, or other evidence of indebtedness (hereinafter in this subsection referred to as "obligation") if -		
(1)	Such obligation is acquired -	
	(A)	On the market, either
		At the price of the obligation prevailing on a national securities exchange which is registered with the Securities and Exchange Commission, or
		If the obligation is not traded on such a national securities exchange, at a price not less favorable to the plan than the offering price for the obligation as established by current bid and asked prices quoted by persons independent of the issuer;
	(B)	From an underwriter, at a price
		Not in excess of the public offering price for the obligation as set forth in a prospectus or offering circular filed with the Securities and Exchange Commission, and
		At which a substantial portion of the same issue is acquired by persons independent of the issuer; or
	(C)	Directly from the issuer, at a price not less favorable to the plan than the price paid currently for a substantial portion of the same issue by persons independent of the issuer;
(2)	Immediately following acquisition of such obligation -	

	(A)	Not more than 25% of the aggregate amount of obligations issued in such issue and outstanding at the time of acquisition is held by the plan, and
	(B)	At least 50% of the aggregate amount referred to in subparagraph (A) is held by persons independent of the issuer; and
(3)	Immediately following acquisition of the obligation, not more than 25% of the assets of the plan is invested in obligations of the employer or an affiliate of the employer.	

A. Conference Report

These employer security provisions are discussed at pages 316-320 the Congressional Conference Report.

B. Regulations

No regulations have been issued under Section 407(e), but regulations have been issued under Section 407(d)(5). ERISA Regulation 2550.407d-5.

C. Advisory Opinions

1. ["Independence"] A relative of an officer of the issuer is not "independent of the issuer." WSB 77-13; AO 78-25.
2. ["Independence"] A private foundation that was created by and may receive contributions from the issuer is not "independent of the issuer." AO 78-25.
3. [Loan Guarantees] The guarantee by an employer of loans made by the plan to a third party constitutes an employer security under Section 407(d)(1), but not a qualifying employer security under Sections 407(d)(5) and 407(e). WSB 79-51.
4. ["Marketable"] Debentures issued by a subsidiary of an employer constitute marketable obligations where they are purchased at the closing price on the New York Stock Exchange on the date of purchase, where they represent only 1.14% of the aggregate amount of debentures outstanding, where 50% of such aggregate amount is held by persons independent of the employer, and where the value of the debentures represents 22% of plan assets. AO 79-39.
5. [Mergers & Acquisitions] A trust will not be considered to have acquired certain debentures if, prior to the corporate merger pursuant to which the trust would have received the debentures, the trust sells or irrevocably assigns the rights to the debentures that it would have received in the merger. AO 76-72.
6. [Notes] A promissory note issued by an employer to a plan in lieu of a cash contribution to the plan will not constitute a marketable obligation if a substantial portion of the same issue of rates is not acquired by persons independent of the issuer for purposes of Section 407(e)(1) contemporaneously with the acquisition by the plan. PLR 7939009.

Section 407(f)		
Stock satisfies the requirements of this subsection if immediately following the acquisition of such stock -		
(1)	(A)	No more than 25% of the aggregate amount of stock of the same class issued and outstanding at the time of acquisition is held by the plan, and
	(B)	At least 50% of the aggregate amount referred to in subparagraph (A) is held by persons independent of the issuer.
(2)	Until January 1, 1993, a plan shall not be treated as violating subsection (A) solely by holding stock which fails to satisfy the requirements of paragraph (1) if such stock -	
	(A)	Has been held since December 17, 1987, or
	(B)	Was acquired after December 17, 1987 pursuant to a legally binding contract in effect on December 17, 1987, and has been so held at all times after the acquisition.
(3)	After December 17, 1987, no plan may acquire stock which does not satisfy the requirements of paragraph (1) unless the acquisition is made pursuant to a legally binding contract in effect on such date.	

Exemptions from prohibited transactions

ERISA Section 408

Section 408(a)

Exemption Procedures

The Secretary shall establish an exemption procedure for purposes of this subsection. Pursuant to such procedure, he may grant a conditional or unconditional exemption of any fiduciary or transaction, or class of fiduciaries or transactions, from all or part of the restrictions imposed by Sections 406 and 407(a). Action under this subsection shall be taken only after consultation and coordination with the Secretary of the Treasury. An exemption granted under this section shall not relieve a fiduciary from any other applicable provision of this Act. The Secretary may not grant an exemption under this subsection unless he finds that such exemption is -

Administratively feasible,

In the interests of the plan and of its participants and beneficiaries, and

Protective of the rights of participants and beneficiaries of such plan. Before granting an exemption under this subsection from section 406(a) or section 407(a), the Secretary shall publish notice in the Federal Register of the pendency of the exemption, shall require that adequate notice be given to interested persons, and shall afford interested persons an opportunity to present views. The Secretary may not grant an exemption under this subsection from section 406(b) unless he affords an opportunity for a hearing and makes a determination on the record with respect to the findings required by paragraphs (1), (2) and (3) of this subsection.

A. **Conference Report.**

The above exemption procedure is discussed on pages 309-311 of the Congressional Conference Report.

B. **Regulations.**

See DOL ERISA Regulation 2570.30 through .52 . The regulation covers who may file for an exemption, where applications must be filed, the information to be included with an application, rights and procedures to a conference, publication and notification of interested persons, and the effect of an exemption. See also Revenue Procedure 75-26.

C. **Prohibited Transaction Class Exemptions (PTE)**

1. [Annuities] PTE C 77-8 covers the transfer of individual life insurance and annuity contracts *from* plans to a plan participant, the relative of a participant, the participant's employer or another plan. PTE C 77-7 covers transfers of the same assets *to* plans from plan participants or employers.
2. [Brokerage Services] PTE 79-1 granted an exemption for securities transactions for employee benefit plans by broker-dealers who serve as fiduciaries to the plans.
3. [Brokerage Services] In PTE 78-10, an exemption was granted for provision of securities by broker-dealers to plans for which they are fiduciaries.
4. [Brokerage Services] Exemption is granted for the execution of certain securities transactions in PTE 86-128 .
5. [Collective Investment Funds] An exemption was granted for transactions between bank collective investment funds and parties in interest. PTE 80-51 (restated to PTE 91-38).
6. [Court-Authorized Transactions] PTE C 79-15 covers certain transactions authorized or required by judicial order or judicially approved settlement decree.
7. [Court-Directed Transactions] An exemption was granted for transactions authorized or permitted

by a court. PTE 79-15.

8. [Customer Notes] A class exemption is granted for the purchase of customer notes of a party-in-interest employer by an employee benefit plan in PTE 85-68.
9. [Debt Retirement] PTE 80-83 provided an exemption for employee plans' purchase of securities used to retire indebtedness owed to parties in interest .
10. [Interest-Free Loans] PTE 80-26 granted an exemption for certain interest free loans, such as overdrafts, between employee benefit plans and parties in interest .
11. [Mortgages] An exemption was granted for employee benefit plans to provide mortgage financing to purchasers of certain residential construction in PTE 82-87 .
12. [Mortgage Pools] PTE 81-7 exempted certain transactions between employee benefit plans and parties in interest involving mortgage pool investment trusts.
13. [Mutual Funds] PTE 77-4 covers the purchase and sale by a plan of mutual fund shares when a fiduciary to the plan is also the investment adviser for the mutual fund. Also see 1994 DOL letter to OCC.
14. [Mutual Funds - Closed-End] In PTE 79-13, an exemption was granted for acquisitions of shares in closed-end investment companies by employee benefit plans.
15. [Mutual Funds - Own] PTE 77-3 covers the purchase and sale of in-house mutual fund shares by an employee benefit plan covering employees of the mutual fund, its investment adviser or principal underwriter, or an affiliate thereof.
16. [Mutual Funds - Own Closed-End] PTE 79-13 covers the acquisition and sale of shares of certain registered closed end investment companies by plans that cover employees of the company, its investment adviser or an affiliate thereof.
17. [Office Space] PTE 77-10 grants an exemption for sharing and leasing of office space and administrative goods by multiple employer plans.
18. [Overdrafts] PTE 80-26 granted an exemption for certain interest free loans, such as overdrafts, between employee benefit plans and parties in interest.
19. [QPAM] PTE 84-14 covers certain prohibited transactions involving plans whose assets are managed by a qualified professional asset manager (QPAM).
20. [Repurchase Agreements] PTE 81-8 deals with the exemption granted for certain short-term investments (including repurchase agreements) by employee benefit plans.
21. [Securities Lending] PTE 81-6 granted an exemption for the lending of securities by employee benefit plans to broker-dealers and banks that are parties in interest to the plan.
22. [Securities Lending - Fees] An exemption was granted for the provision of securities lending services by a fiduciary to an employee benefit plan in PTE 82-63.
23. [Short-Term Investments] PTE 81-8 deals with the exemption granted for certain short-term investments (including repurchase agreements) by employee benefit plans.
24. PTE 77-9 covers six classes of transactions involving insurance agents and brokers, pension consultants, insurance companies, investment companies, investment company principal underwriters, and employee benefit plans:

    - The fourth class covers the purchase with plan assets of an insurance or annuity contract from an insurance company.

    - The fifth and sixth classes of transactions cover the purchase with plan assets of insurance or annuity contracts or securities issued by an investment company in situations where the insurance company, investment company, or investment company principal underwriter is a fiduciary or service provider to the plan solely by reason of sponsorship of a master or prototype plan.

25. Exemptions from prohibitions respecting certain transactions in which multiemployer and multiple employer plans are involved. PTE 76-1 and PTE 77-10. These exemptions cover three classes of transactions: (1) delinquent employer contributions; (2) construction loans; and (3) office space, administrative services and goods.
26. Exemptions from prohibitions respecting certain classes of transactions involving employee benefit plans and certain broker-dealers, reporting dealers and banks. PTE 75-1, PTE 78-10, and PTE 79-1. These exemptions cover five classes of transactions: (1) agency transactions and services, (2) principal transactions, (3) under writings, (4) market making, and (5) extensions of credit.

D. Advisory Opinions

1. [Bonding of Fiduciaries] The bonding provisions of ERISA are contained in Section 412. It is unlawful under Section 412(c) for any Person to procure a required bond through an agent in

whose business operation a party in interest has any control or significant financial interest. ERISA's exemption provisions regarding bonding are contained in Section 412(e). Accordingly, it is concluded that Sections 408 and 414(c)(4) are not applicable to transactions that are unlawful under Section 412(c). AO 76-92.

2. [Relatives] An agent or broker who is a cousin of a plan fiduciary may receive commissions as agent or broker on the sale of insurance to the plan. WSB 79-104.

E. Court Decisions

1. Even though the terms of a transaction may be fair to the plan, if it constitutes a prohibited transaction under Section 406, the transaction constitutes a per se violation of ERISA without a Section 408 exemption. Approval of the transaction by a Taft-Hartley umpire is not sufficient. Cutaiar v. Marshall, 590 F.2d 523 (3d Cir. 1979).

Section 408(b)(1) **Loans to Plan Participants**
The prohibitions provided in Section 406 shall not apply to any of the following transactions:
Any loans made by the plan to parties in interest who are participants or beneficiaries of the plan if such loans:
Are available to all such participants and beneficiaries on a reasonably equivalent basis,
Are not made available to highly compensated employees (within the meaning of Section 414(q) of Title 26) in an amount greater than the amount made available to other employees,
Are made in accordance with specific provisions regarding such loans set forth in the plan,
Bear a reasonable rate of interest, and
Are adequately secured.

A. Conference Report

Participant loans are discussed on pages 311-316 of the Congressional Conference Report.

B. Statutes

Also refer to Section 72(p) of the Internal Revenue Code, which imposes additional restrictions on loans to plan participants .

C. Regulations

1. Refer to DOL ERISA Regulation 2550.408b-1 .
2. If plan makes more than 25 participant loans in a calendar year, it will be need to make the APR and Finance Charge (and other) disclosures required by the Truth in Lending Act and Federal Reserve Regulation Z. Refer to:

    a. Footnote 3 of Regulation Z, concerning who meets the test of being a *Creditor* under Section 226.2(a)(17) of the Regulation; and
    b. The Federal Reserve Board Official Staff Commentary on Regulation Z explanation of how *Creditor* applies to -

        - Individual trust accounts instead of the Trust Department as a whole [Item 7], and

        - "Employee savings plans" (401(k) and 403(b)-type plans) [Item 8].

D. Advisory Opinions

1. A transaction exempted by Section 408(b) from the prohibitions of Section 406(a) is not

exempted for that portion of the transaction which may constitute a violation of Section 406(b). AO 83-45A.

2. The analysis of a program of investment by an employee benefit plan in residential mortgage loans that may be available to the plan's participants involves consideration of three distinct questions:

   a. Whether the program is prudent within the meaning of Section 404(a)(1)(B),
   b. Whether the loans within such a program are prudent within the meaning of that section, and
   c. Where a loan is to be made to a plan participant, whether the rate of interest charged on the loan is available within the meaning of Section 408(b)(1).

   [Note that the Department of Labor in December 1987 issued regulations under Section 408(b)(1) defining "reasonable rate of interest" consistent with prior decisions under Section 404(a)(2)(B), for example, endorsing the market or prevailing rate of interest.] AO 81-12A.

3. [ESOPs] Section 408(d) makes Section 408(b)(1) unavailable for transactions that involve a loan of any part of the income or corpus of a plan to a shareholder-employee as defined in Code Section 1379(d) of the employer maintaining the plan. The applicability of Section 408(b)(1) depends, among other things, on whether the proposed recipient is such a shareholder-employee. The trustees of the plan are responsible for determining whether the provisions of Section 408(b)(1), or any other section of ERISA, are applicable to the plan. AO 75-105.
4. A transaction that constituted a prohibited transaction but that was subject to a statutory exemption under Section 408(b) when the transaction was entered into may, in the future, become prohibited while the transaction continues because of changes in the relationship, causing the loss of the statutory exemption protection for the transaction. Thus, a loan between a plan and a party in interest may be entitled to relief under Section 408(b)(1) when the loan was made. However, if the party in interest later becomes an owner-employee for purposes of Section 408(d), then the loan is a prohibited transaction for which no relief is available under Section 408(b)(1). AO 84-44A.

E. Court Decisions

1. If other participants are required to provide greater security for their loans from a plan than the participant was required to provide, the loans to the participant are not made on a reasonably equivalent basis to loans to other participants as required by ERISA Section 408(b)(1)(A). Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
2. If a loan from a plan to a participant exceeds the total of all loans to all other participants, the loan does not meet the criteria of ERISA Section 408(b)(1)(B). Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
3. A loan in an amount that exceeds the limits set forth in the plan document does not satisfy ERISA Section 408(b)(1)(C). Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
4. A participant's vested interest in a plan may not constitute adequate security for a loan from the plan under Section 408(b)(1)(E). Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).

Section 408(b)(2) **Ancillary Services**
The prohibitions provided in Section 406 shall not apply to any of the following transactions:
Contracting or making reasonable arrangements with a party in interest for office space, or legal, accounting or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefore.

A. Conference Report

General ancillary services are covered on pages 311-316 of the Congressional Conference Report.

B. Regulations

Refer to DOL ERISA Regulation 2550.408b-2 .

1. Section 408(b)(2) does not contain an exemption from acts described in Section 406(b)(1) through (3). Such acts are separate transactions not described in Section 408(b)(2). DOL ERISA Regulation 2550.408b-2(a).
2. A service is necessary for the establishment or operation of a plan if the service is appropriate and helpful to the plan obtaining the service in carrying out the purposes for which the plan is established and maintained. DOL ERISA Regulation 2550.408b-2(b).
3. No contract or arrangement is reasonable if it does not permit termination by the plan without penalty to the plan on reasonably short notice under the circumstances to prevent the plan from becoming locked into an arrangement that has become disadvantageous. DOL ERISA Regulation 2550.408b-2(c).
4. The prohibitions of Section 406(b) supplement the other provisions of Section 406(a) by imposing on parties in interest who are fiduciaries a duty of undivided loyalty to the plans for which they act. The prohibitions are imposed upon fiduciaries to deter them from exercising the authority, control or responsibility that makes such persons fiduciaries when they have interests that may conflict with the interest of the plans for which they act. A fiduciary may not use the authority, control or responsibility that makes such person a fiduciary to cause a plan to pay an additional fee to a person in which such fiduciary has an interest that may affect the exercise of such fiduciary's best judgment as a fiduciary to provide a service. DOL ERISA Regulation 2550.408b-2(e).
5. The regulations cited above contain several important examples. DOL ERISA Regulation 2550.408b-2(f). Some of the examples, however, only deal with Section 406(b)(1) and not with Sections 406(b)(2) and 406(b)(3).
6. The provision of services by a multiemployer plan to a party in interest is the subject of PTE C 76-1 and PTE C 77-10.

C. Prohibited Transaction Class Exemptions (PTE)

1. [Bank - Securities Lending] A securities lending service offered by a bank fiduciary to plans would not be exempt under Section 408(b)(2) because the compensation arrangement, which was based on a percentage of the value of the securities loan, might involve self-dealing. AO 79-11. However, see PTE 81-6 and PTE 82-63 .
2. [Brokerage Services] A broker-dealer who provides investment advice to a plan and is therefore a fiduciary may, under certain circumstances, be able to effect brokerage transactions to a plan provided that he obtains prior authorization from another plan fiduciary before effecting any such transaction. Final PTE C 78-10.
3. [Brokerage Services at Cost or Free] Broker-dealers may perform brokerage services for plans that they sponsor when such services are undertaken to recapture commissions, when such services are provided in accordance with the provisions of Section 408(b)(2), or when such services are performed at no charge to a plan. Final PTE C 79-1.
4. [Indirect Expenses] Under ERISA Section 408(b)(2) and Code Section 4975(d)(2), a fiduciary may perform services for a plan and be reimbursed for certain direct expenses incurred in connection with those services. However, the allocation of overhead costs to the plan may not be covered by this exemption. Final PTE C 79-1.
5. [Office Space] The furnishing of office space or administrative services to a plan by a participating employee organization, employer or employee association, or by another multiemployer plan or multiple employer plan that is a party in interest or disqualified person to the plan, will generally be exempt from the prohibited transaction provisions if the conditions of ERISA Section 408(b)(2) and Code Section 4975(d)(2) are met. Final PTE C 76-1.

D. Advisory Opinions

1. [General] The Department will not rule on what constitutes a "necessary" service, a "reasonable" contract or arrangement, or what constitutes "reasonable" compensation since each issue is inherently factual in nature. Further, although Section 408(b)(2) generally permits the performance of multiple services for the same plan, it does not exempt an act of self-dealing by a fiduciary under the provisions of Section 406(b)(1). AO 82-26A.
2. [Administrative Services] A law firm may provide both legal and administrative services to a plan if the arrangement for all such services meets all of the requirements of Section 408(b)(2) and (c)(2) and Regulations Sections 2550.408b-2 and 2550.408c-2 and does not contravene the

requirements of Section 406(b). WSB 78-18.

3. [Administrative Services] A welfare plan may retain a participating union to provide administrative services to the plan for a fee if those plan trustees who are officers of the union physically absent themselves from all consideration of the matter and do not use any of their authority or control to influence the plan's decision to hire the union). See Example 7 of DOL ERISA Regulation 2550.408b-2(f). WSB 79-41.
4. [Bank - Own-Bank Trustee] A bank is not prohibited from serving as trustee for a plan maintained for the bank's employees *where it receives no compensation from the plan for its trustee services* (Emphasis added). AO 79-49 .
5. [Bank - Brokerage Service] The provision of brokerage services by a bank to employee benefit plans maintained by it for which the bank also serves as custodian and/or investment manager would be exempt from the prohibitions of Section 406(a) if the conditions of Section 408(b)(2) are met. Whether the conditions are met in each case involves questions that are inherently factual in nature and on which the Department of Labor will issue no rulings. AO 85-15; accord AO 85-16.
6. [Bank - CIF Investment Manager] The provision of investment management services by a wholly owned bank subsidiary would be exempt from the prohibitions of Section 406(a)(1) of ERISA in connection with the maintenance of a common or collective trust fund if the conditions of Section 408(b)(2) are specifically met. AO 82-22A.
7. [Bank - CIF Investment Manager] The supplying of investment management and advisory services by a registered advisor/investment manager to a common trust fund of a bank, both of which are part of a single controlled group, would be exempt from the prohibitions of Section 406(a) if the conditions of Section 408(b)(2) are met. The exemption granted by Section 408(b)(2) is limited to Section 406(a) prohibited transactions and does not cover the situations described in Section 406(b). Thus, a decision with regard to the manager's retention by the common trust fiduciaries could constitute a violation of Section 406(b). Further, compensation paid by a service provider to its employees may be a properly reimbursable expense under Regulations Section 2550.408c-2(b)(3) if the expense would not, in fact, have been sustained had the services not been provided and if it can be properly allocated to the particular services provided. What constitutes a direct expense in a particular case; however, is a factual matter to be resolved, taking into account the relevant facts and circumstances, and will not be the subject of an advisory opinion. AO 83-20A.
8. [Bank - CIF/STIF] The provision of trustee services by a bank to employee benefit plans and the investment of plan funds in the bank's commingled short term investment fund would be exempt from the prohibitions of Section 406(a) if the conditions of Sections 408(b)(2) and 408(b)(8) are met. Also, the mere selection of the bank to provide trustee services to the plans would not in itself constitute a violation of Section 406(b)(1). However, self-dealing in violation of Section 406(b)(1) could occur in the case of a committee's deliberations regarding the retention of the bank as trustee, and no opinion can be rendered on that potential circumstance. AO 82-62A.
9. [Bank - Loan Participations] Under Section 408(b)(2), a bank trustee for a plan may also provide services to a plan under a loan participation agreement, even if the plan can terminate such services only by selling its participation. WSB 79-48.
10. [Brokerage/Investment Management at No Cost] A brokerage firm which proposes to provide investment management and brokerage services to employee benefit plans, *to be paid for directly by the plan sponsor*, would be exempt from the prohibitions of Section 406(a)(1) if the conditions contained in Section 408(b)(2) are met (Emphasis added). AO 82-26A.
11. [Custodian] Under the facts of the request, where a brokerage firm acts as custodian of custodial accounts established under a prototype plan for self-employed persons (a Keogh plan) or a simplified employee pension plan (SEP) but possesses no discretionary authority over the investments over the accounts nor any other aspect of the business administration of the custodial accounts, the firm would not be treated as a trustee for purposes of PTE 79-4. AO 82-12A.
12. [Direct Expenses] Where the employer plan sponsor provides administrative services to the plan for charges based upon its actual cost for labor and material in connection therewith, the provision of administrative services would be exempt from the prohibitions of Section 406(a), assuming that, in fact and in operation, the plan service provider has met the conditions of Section 408(b)(2). In addition, it is the Department's view that compensation paid to a service provider to its employees may be a properly reimbursable expense under DOL ERISA Regulation 2550.408c-2(b)(3) if the expense would not have been sustained had the services not been provided, if it can be properly allocated to the particular services provided and the expense does not represent an allocable portion of overhead cost. AO 82-01A.

13. [Float] The ancillary services exemptions (including 408(b)(6)) do not include the float earned by the fiduciary bank from a demand deposit account to the extent that it is reasonably possible to earn a return on such funds. Retention of float would be permissible if it was a part of the bank's overall compensation from the plan and if the bank had made appropriate disclosures regarding the use of float. Failure to comply would result in a violation of ERISA Section 406(b)(1). AO 93-24A .
14. [Related Expenses] A plan may reimburse its attorney for expenses incurred in attending an educational seminar if, under the facts and circumstances, attendance at such seminar was deemed to be relevant to the needs of the plan. WSB 79-85.
15. The provision of services, including construction or repair services, to an apprenticeship plan by a contributing employer or the leasing of office space by an apprenticeship plan from a contributing employer are covered by the statutory exemption under ERISA Section 408(b)(2). *Proposed* PTE C 78-5. AO 79-72.

E. Court Decisions

1. [Written Contract Required] The Section 408(b)(2) exemption is only available where there is a contract or arrangement for services. Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
2. [Partial Exemption Only] ERISA Section 408(b)(2) provides no exemption from the provisions of ERISA Section 406(b). Although the language of ERISA Section 408(b)(2) appears to provide an exemption from all of the prohibitions of Section 406, the court concluded, based on the legislative history of Section 408(b)(2), that it should not be construed to provide an exemption from the prohibitions of ERISA Section 406(b). The decision explicitly supports ERISA Regulations Section 2550.408b-2(a) and (e) . Marshall v. Kelly, 465 F.Supp. 341, 1 EBC 1850 (W.D.Okla. 1978).
3. [Reasonable Compensation] Transactions between trustees of a pension, health and welfare fund and a claims processing company for the rendering of services necessary for the operation of the plan are exempted under Section 408 unless the company receives more than reasonable compensation. Brock v. Robbins 830 F.2d 64, 8 EBC 2489 (7th Cir. 1987).

Section 408(b)(3) **Loans to ESOPs**
The prohibitions provided in Section 406 shall not apply to any of the following transactions:
A loan to an employee stock ownership plan (as defined in section 407(d)(6)), if -
Such loan is primarily for the benefit of participants and beneficiaries of the plan, and
Such loan is at an interest rate which is not in excess of a reasonable rate.
If the plan gives collateral to a party in interest for such loan, such collateral may consist only of qualifying employer securities (as defined in Section 407(d)(5)).

A. Conference Report

ESOP loans are covered in pages 311-316 of the Congressional Conference Report.

B. Regulations

Regulations have been issued under Section 408(b)(3). See DOL ERISA Regulation 2550.408b-3.

1. Section 408(b)(3) provides an exemption from the prohibited transaction provisions of Sections 406(a), 406(b)(1), and 406(b)(2). Section 408(b)(3) does not provide an exemption from the prohibitions of Section 406(b)(3). DOL ERISA Regulation 2550.408b-3(b)(1).
2. The exemption under Section 408(b)(3) includes within its scope certain transactions in which the potential for self-dealing by fiduciaries exists and in which the interests of fiduciaries may conflict with the interests of beneficiaries. To guard against these potential abuses, the Department of

Labor will subject these transactions to special scrutiny to ensure that they are primarily for the benefit of participants and beneficiaries. DOL ERISA Regulation 2550.408b-3(b)(2).

3. These regulations contain several requirements relating to these loans. See also Treasury Department Regulation 54.4975-7(b).

Section 408(b)(4) **Deposits With Fiduciary Banks and Thrifts**
The prohibitions provided in Section 406 shall not apply to any of the following transactions:
The investment of all or part of a plan's assets in deposits which bear a reasonable interest rate in a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of such plan and if -
The plan covers only employees of such bank or other institution, and employees of affiliates of such bank or other institution, or
Such investment is expressly authorized by a provision of the plan or by a fiduciary (other than such bank or such institution or affiliate thereof) who is expressly empowered by the plan to so instruct the trustees with respect to such investment.

A. Conference Report

Deposits with fiduciaries are discussed on pages 311-316 of the Congressional Conference Report.

B. Regulations

Refer to DOL ERISA Regulation 2550.408b-4.

1. Section 408(b)(4) provides an exemption from Section 406(b)(1) and 406(b)(2), as well as Section 406(a)(1) because Section 408(b)(4) contemplates a bank or similar financial institution causing a plan for which it acts as a fiduciary to invest plan assets in its own deposits or certificates of deposit, if the requirements of Section 408(b)(4) are met. However, it does not provide an exemption from Section 406(b)(3). The receipt of such consideration is a separate transaction not described in the statutory exemption. DOL ERISA Regulation 2550.408b-4(a).
2. Such investment may be made if the investment is expressly authorized by a provision of the plan or trust agreement or if the investment is expressly authorized (or made) by a fiduciary of the plan who has authority to make such investments and who has no interest in the transaction that may affect the exercise of such authorizing fiduciary's best judgment as a fiduciary so as to cause such authorization to constitute an act described in Section 406(b). DOL ERISA Regulation 2550.408b-4.
3. If the requirements of Section 408(b)(4) are met, a defined benefit plan maintained by a bank employer may invest in certificates of deposit issued by the bank in excess of the 10% limitation of Section 407(a) of ERISA. AO 79-76.

C. Advisory Opinions

1. [Banks] The investment of plan assets of a noncollectively bargained multiple employer plan covering employees of banks, in savings accounts and certificates of deposit of banks that are contributing employers, constitutes a prohibited transaction under Section 406(a) and may also be prohibited under Section 406(b)(1) and (2) because members of the administrative board of the plan, which directs plan investments, are officers and employees of contributing employer/banks.

   However, Section 408(b)(4) provides an exemption from Sections 406(a), 406(b)(1) and 406(b)(2) for the investment of plan assets in the deposits or certificates of deposit of a bank that is a plan fiduciary or party in interest, if the requirements of DOL ERISA Regulation 2550.408b-4 are met. **One requirement of the regulation is that, for investments made after November 1, 1977, the plan specify the name(s) of the bank(s) in which deposits may be made. The**

specifications may be made in the plan by amendment retroactive to November 1, 1977. AO 79-25.

2. [Naming of Depository] A prototype plan used by a bank contained authorization "to invest in any type of deposit of the Trustee." The prototype plan defined the Trustee as the person who executed an adoption agreement. The bank adopted the prototype by executing an adoption agreement. A question arose as to whether such an indirect designation of the fiduciary bank was satisfactory.

   In response to an FDIC telephone inquiry, the DOL Office of (ERISA) Regulations and Interpretations staff indicated informally that the arrangement was deemed to comply with Section 408(b)(4) of the Act, DOL ERISA Regulation 2550.408b-4, and AO 79-25. The DOL staff indicated DOL would take a rather liberal view of the various documentation that would constitute the plan document(s). [10-27-94.]

3. [Substantial Penalty] The payment by an employee benefit plan to an issuer bank of a penalty upon the early redemption of certificates of deposit is subject to the exemption set forth in Section 408(b)(4) to the extent the exemption was available to the certificates of deposit. AO 81-42A.
4. [Non-bank Bank] A company engaged in the business of issuing face amount certificates for sale to employee benefit plans, among others, is a bank or similar financial institution within the meaning of Section 408(b)(4) based upon the facts set forth in the ruling request. AO 83-18A.
5. [Non-bank Bank] An industrial loan company may qualify as a bank or similar financial institution for purposes of meeting the conditions of Section 408(b)(4), exempting transactions from the prohibitions of Section 406. Thus, investment of assets of employee benefit plans in the industrial loan entity's saving instruments would be permitted under Section 408(b)(4). AO 82-64A.
6. [Deposits - Insured/Uninsured] The diversification requirement of Section 404(a)(1)(C) generally will not be violated if all plan assets in an individual account plan are invested in a federally insured savings account, so long as the account is fully insured. Where the account balance exceeds the amount covered by federal insurance, compliance with Section 404(a)(1)(C) is determined by whether the bank invests its assets in a diversified manner. AO 77-46.

Section 408(b)(5) **Insurance Company Fiduciaries**
The prohibitions provided in Section 406 shall not apply to any of the following transactions:
Any contract for life insurance, health insurance, or annuities with one or more insurers which are qualified to do business in a State, if the plan pays no more than adequate consideration, and if each such insurer or insurers is -
The employer maintaining the plan, or
A party in interest which is wholly owned (directly or indirectly) by the employer maintaining the plan, or by any person which is a party in interest with respect to the plan, but only if the total premiums and annuity considerations written by such insurers for life insurance, health insurance or annuities for all plans (and their employers) with respect to which such insurers are parties in interest (not including premiums or annuity considerations written by the employer maintaining the plan) do not exceed 5% of the total premiums and annuity considerations written for all lines of insurance in that year by such insurers (not including premiums or annuity considerations written by the employer maintaining the plan).

A. Conference Report

The Congressional Conference Report explains this statutory exemption at pages 311-316.

B. Advisory Opinions

1. [Pooled Fund Use] Where the assets of an insurance company's own plan are maintained in a single customer separate account pursuant to a group annuity contract, the transfer of such assets in kind to a pooled separate account maintained by the company in return for the acquisition of units in such pooled account by the plan, together with a change in the contract to permit plan investment in the pooled account, is exempt under Section 408(b)(5). AO 79-79.
2. Stop-loss policies of insurance are deemed to be included in the term "life insurance, health insurance and annuity contracts" as that term is used in PTE C 79-41 in connection with sale of stop-loss insurance by an affiliate of a bank holding company to plan sponsor by the holding company for its employees or employees of its affiliates. AO 83-19A.

<table>
<tr><th colspan="2">Section 408(b)(6)

Ancillary Services by Depository Fiduciaries</th></tr>
<tr><td colspan="2">The prohibitions provided in section 406 shall not apply to any of the following transactions:</td></tr>
<tr><td colspan="2">the providing of any ancillary service by a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of such plan, and if:</td></tr>
<tr><td>(A)</td><td>Such bank or similar financial institution has adopted adequate internal safeguards which assure that the providing of such ancillary service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority, and</td></tr>
<tr><td>(B)</td><td>The extent to which such ancillary service is provided is subject to specific guidelines issued by such bank or similar financial institution (as determined by the Secretary after consultation with Federal and State supervisory authority), and adherence to such guidelines would reasonably preclude such bank or similar financial institution from providing such ancillary service -</td></tr>
<tr><td></td><td>In an excessive or unreasonable manner, and</td></tr>
<tr><td></td><td>In a manner that would be inconsistent with the best interests of participants and beneficiaries of employee benefit plans.</td></tr>
<tr><td colspan="2">Such ancillary services shall not be provided at more than reasonable compensation.</td></tr>
</table>

A. Conference Report

Bank ancillary services are discussed on pages 311-316 of the Congressional Conference Report.

B. Regulations

Regulations have been issued under Section 408(b)(6). DOL ERISA Regulation 2550.408b-6.

1. The Section 408(b)(6) exemption exempts ancillary services that do not meet the requirements of Section 408(b)(2) because the provision of such services involves self-dealing described in Section 406(b)(1) by the fiduciary bank or similar financial institution or a conflict of interest described in Section 406(b)(2). Section 408(b)(6) provides an exemption from Sections 406(b)(1) and (2) because Section 408(b)(6) contemplates the provision of such ancillary services without the approval of a second fiduciary. DOL ERISA Regulation 2550.408b-6(a).
2. Plan assets held by a fiduciary bank that are reasonably expected to be needed to satisfy current plan expenses may be placed by the bank in a non-interest bearing checking account in the bank if the conditions of this regulation are met notwithstanding the provisions of Section 408(b)(4), which required the payment of a reasonable rate of interest on bank deposits. DOL ERISA Regulation 2550-408b-4(a) .
3. Section 408(b)(6) does not provide an exemption for the receipt of compensation described in Section 406(b)(3). The receipt of such consideration is a separate transaction not described in Section 408(b)(6). DOL ERISA Regulation 2550.408b-4(a) .

C. Prohibited Transaction Class Exemptions (PTE)

1. [Securities Lending] Securities lending is an authorized ancillary service which may be offered by

a bank to an ERISA plan. PTE 81-6 permits securities lending and PTE 82-63 permits the bank to receive a fee for providing such services .

D. Advisory Opinions

1. [Bank Loan to Plan] Section 408(b)(6) does not provide an exemption for a loan to a plan by a bank trustee, even if authorized by the plan instruments, in order to aid the plan in paying the purchase price for an asset being purchased by the plan at the direction of the plan's administrative committee. AO 79-73.

Section 408(b)(7) **Conversion of Securities**
The prohibitions provided in section 406 shall not apply to any of the following transactions:
The exercise of a privilege to convert securities, to the extent provided in regulations of the Secretary, but only if the plan receives no less than adequate consideration pursuant to such conversion.

A. Conference Report

The Congressional Conference Report explains this statutory exemption at pages 311-316.

Section 408(b)(8) **Collective Investment Funds**	
The prohibitions provided in Section 406 shall not apply to any of the following transactions:	
Any transaction between a plan and -	
A common or collective trust fund or pooled investment fund maintained by a party in interest which is a bank or trust company supervised by a State or Federal agency or	
A pooled investment fund of an insurance company qualified to do business in a State, if:	
(A)	The transaction is a sale or purchase of an interest in the fund;
(B)	The bank, trust company, or insurance company receives not more than reasonable compensation; and
(C)	Such transaction is expressly permitted by the instrument under which the plan is maintained, or by a fiduciary (other than the bank, trust company, or insurance company, or an affiliate thereof) who has authority to manage and control the assets of the plan.

A. Conference Report

The use of a fiduciary's collective investment funds is covered in pages 311-316 of the Congressional Conference Report.

B. Advisory Opinions

1. [Annual Reports to Plan Administrators] CIFs are required to provide an annual report, covering certain material, to plan administrators of participating ERISA plans. See DOL ERISA Regulation 2520.103-5.
2. [CIF Investments in Another CIF] Fund-to-fund investments by affiliates of a multibank holding company, by bank pooled funds in corresponding pooled funds of other affiliates of the holding company, and fund-to-fund investments by a pooled fund of the controlled group in another pooled fund of the controlled group are transactions involving the sale or purchase of all interest

in a fund by an employee benefit plan and would be exempt from the prohibitions of Section 406(a)(1) if the conditions of Section 408(b)(8) are met. AO 82-41A.
3. [Trust Company CIFs] A wholly owned subsidiary corporation of an investment manager established as a trust company and subject to the supervision and examination by the superintendent of banks in the state of its domicile shall be deemed to constitute a bank for purposes of PTE C 80-51, and its common or collective trust fund may be utilized for investment by employee benefit plans managed by the parent-investment manager so long as the conditions of Section 408(b)(8) are satisfied. AO 83-12.

Section 408(b)(9) **Distributions of Plan Assets**
The prohibitions provided in section 406 shall not apply to any of the following transactions:
The making by a fiduciary of a distribution of the assets of the plan in accordance with the terms of the plan if such assets are distributed in the same manner as provided under section 4044 of this Act (relating to allocation of assets).

A. Conference Report

The Congressional Conference Report explains this statutory exemption at pages 311-316.

Section 408(b)(10) and (11)
The prohibitions provided in section 406 shall not apply to any of the following transactions:
Any transaction required or permitted under part 1 of subtitle E of title IV.
A merger of multiemployer plans, or the transfer of assets or liabilities between multiemployer plans, determined by the Pension Benefit Guaranty Corporation to meet the requirements of section 4231.

Section 408(c)(1)
Nothing in section 406 shall be construed to prohibit any fiduciary from receiving any benefit to which he may be entitled as a participant or a beneficiary in the plan, so long as the benefit is computed and paid on a basis which is consistent with the terms of the plan as applied to all other participants and beneficiaries.

A. Conference Report

The Congressional Conference Report does not explain Section 408(c)(1).

B. Court Decisions

1. Profit-sharing plan trustees improperly refused to pay benefits to a former executive on the ground that it would breach his fiduciary duties to receive plan benefits, as he was still a plan trustee when the request was made, since Section 408(c) permits a fiduciary to receive benefits to which he may be entitled as a plan participant so long as benefits are computed and paid in the same manner as they are for other participants. Kann v. Keystone Resources, Inc. Profit Sharing Plan, 575 F.Supp. 1084, 5 EBC 1233 (W.D. Pa. 1983).
2. Where, as a result of termination of employment, an employee is vested in only a portion of his account balance under a profit-sharing plan, the remaining portion being reallocated under the terms of the plan to other accounts of other participants, the fact that participants who are also plan fiduciaries benefited from such reallocation does not constitute self-dealing by virtue of ERISA Section 408(c)(1). Shaw v. Kruidenier, 470 F.Supp. 1375 (S.D.Iowa 1979), aff'd, 620 F.2d 207 (8th Cir. 1980).

Section 408(c)(2)

Fiduciary Fees and Expenses

Nothing in section 406 shall be construed to prohibit any fiduciary from receiving any reasonable compensation for services rendered, or for the reimbursement of expenses properly and actually incurred, in the performance of his duties with the plan; except that no person so serving who already receives full-time pay from an employer or an association of employers, whose employees are participants in the plan, or from an employee organization whose members are participants in such plan shall receive compensation from such plan, except for reimbursement of expenses properly and actually incurred.

A. Conference Report

The Congressional Conference Report does not explain this interpretation.

B. Regulations

Regulations have been issued under Section 408(c)(2). DOL ERISA Regulation 2550.408c-2.

1. Section 408(b)(2) refers to the payment of reasonable compensation by a plan to a party in interest for services rendered to the plan. Section 408(c)(2) clarifies what constitutes reasonable compensation for such services. DOL ERISA Regulation 2550.408c-2(a).
2. Generally, whether compensation is reasonable under Sections 408(b)(2) and 408(c)(2) depends on the particular facts and circumstances of each case. DOL ERISA Regulation 2550.408c-2(b)(1).
3. The term "reasonable compensation" does not include any compensation to a fiduciary who is already receiving full-time pay from an employer or association of employers or from an employer organization, except for the reimbursement of direct expenses properly and actually incurred and not otherwise reimbursed. These restrictions do not apply to a party in interest who is not a fiduciary. DOL ERISA Regulation 2550.408c-2(b)(2).
4. An expense is not a direct expense to the extent it would have been sustained had the service not been provided or if it represents an applicable portion of overhead costs. DOL ERISA Regulation 2550.408c-2(b)(3).
5. The term "reasonable compensation", as applied to a fiduciary or an employee of a plan, includes an advance to such a fiduciary or employee by the plan to cover direct expenses to be properly and actually incurred by such person in the performance of such person's duties with the plan if certain conditions are satisfied. DOL ERISA Regulation 2550.408c-2(b)(4).

C. Interpretive Bulletins

IB 75-6, relating to Section 408(c)(2), has been superseded by the regulation cited above.

D. Advisory Opinions

1. [General] Section 408(c)(2) was inserted in ERISA as an exemption from the Section 406 prohibited transaction rules to enable certain services to be provided to a plan. The clause in Section 408(c)(2) relating to full-time employee receiving solely reimbursement for expenses is a limitation within an exemption from Section 406. AO 75-21.
2. [General] A fiduciary who receives full-time pay from an employer association acting on behalf of a group of employers as a sponsor of an employee benefit plan where employees of the contributing employers are participants in this plan would be precluded under Section 408(b)(2) from receiving compensation from the plan for his services as a trustee. This is consistent with the legislative history of Section 408(c)(2) wherein Congress expressed an intent to prevent double payment when the sponsoring association, which is supported solely by the contributing employers, already pays the trustee full-time pay. AO 85-19A.
3. [Form of Compensation] Section 408(c)(2) and the regulations thereunder do not proscribe the payment of compensation to fiduciaries in a form other than cash (e.g, purchase of life insurance), provided the amount of total compensation paid in all forms is reasonable. WSB 78-

34.
4. [Compensation] The manner in which a union, an employer, and an employer association characterize the payments that they make to trustees is not dispositive of the issue of whether those payments constitute full-time pay. WSB 78-36.
5. [Compensation] When two union trustees are full-time paid union officers, no compensation is permissible under Section 408(c)(2). AO 76-57.
6. [Compensation] The receipt of compensation by a fiduciary from a plan is a prohibited transaction if the fiduciary is already receiving full-time compensation from the employer maintaining the plan. AO 78-08.
7. [Compensation] A trustee or fiduciary who is paid by his employer on an hourly basis and who loses wages for time spent in connection with his plan duties will not be deemed to be receiving full-time pay from his employer during those periods of time that he is performing his duties as plan trustee or fiduciary; and he may, therefore, receive compensation from the plan for services rendered in the performance of his duties with the plan. AO 76-03; WSB 79-92; WSB 79-97
8. [Compensation - Owner] A management representative/trustee who is the owner of a business that is an employer whose employees are participants in the plan may not receive compensation from the plan for services rendered in the performance of his duties with the plan. The trustee's regular full-time pay or compensation will not be diminished for his time spent on plan duties. AO 76-03; WSB 79-92; WSB 79-97.
9. [Indemnification of Trustee] Reimbursement or payment by the fund, pursuant to certain indemnification provisions, of expenses properly and actually incurred (including reimbursement or payment of expenses properly and actually incurred in settlement of pending or threatened litigation) is not a prohibited transaction under Section 406(a)(1)(B) or (D) to the extent the reimbursement or payment does not exceed amounts allowed under Section 408(c)(2). AO 77-66/67.
10. [Expenses] Section 408(c)(2) expressly does not preclude reimbursement for expenses properly and actually incurred by any plan fiduciary. AO 75-145.
11. [Legal Expenses] Reimbursement of a legal defense expenses of Taft-Hartley plan trustees is permitted under certain circumstances. However, a plan provision authorizing reimbursement of legal fees in the event of *any* legal action that may arise from the performance of a trustee's fiduciary duties is too broad and would be prohibited under Section 408(c)(2). Where a fiduciary is found in legal proceedings to have violated his fiduciary duties, reimbursement of legal fees by the plan would not be permitted (Emphasis added). AO 78-29.

E. Court Decisions

1. [Legal Expenses] Absent any finding of breach of fiduciary duty, the reimbursement of litigation expenses incurred by a fiduciary defending against allegations of breach of fiduciary duty is not prohibited by Section 410(a) and, by virtue of Section 408(c)(2), is not a prohibited transaction. Central States Pension Fund v. American National Bank & Trust Co. of Chicago, No. 77 C 4335, slip op. (N.D.Ill., Oct. 26, 1979).
2. [Commissions] The investment of plan assets in companies in exchange for commissions, equity, or other compensation does not qualify as a Section 408 exempted transaction and, as such, is prohibited by Section 406. Lowen v. Tower Asset Management, Inc., 829 F.2d 1209, 8 EBC 2457 (2d Cir. 1987).
3. [Commissions] The payment of a sales commission to a fiduciary on the sale of plan real property is not exempt under Section 408(c)(2) as the fiduciary received full-time pay from the employer. If the commission is characterized as compensation for "extraordinary services", it is not exempt under Section 408(c)(2), since that section exempts only compensation for the performance of fiduciary duties. Marshall v. Kelly, 465 F.Supp. 341, 1EBC 1850 (W.D.Okla. 1978).

Section 408(c)(3)
Nothing in Section 406 shall be construed to prohibit any fiduciary from serving as a fiduciary in addition to being an officer, employee, agent, or other representative of a party in interest.

A. Conference Report

The Congressional Conference Report does not explain this interpretation.

B. Advisory Opinions

1. [General] Section 408(c)(3) has no bearing on the applicability of the fiduciary duties set forth in Section 404(a)(1). The Section also does not deal with possible prohibited transactions that might occur under Section 406(b), depending on the factual situation, when a fiduciary is a director of an investment manager of the plan's assets. AO 76-15.
2. [Own-Bank Plans] A bank is not prohibited from serving as trustee for a plan maintained for the bank's employees *where it receives no compensation from the plan for its trustee services* [Emphasis added]. AO 79-49 .
3. [Bank Director] An individual who is a fiduciary of an employee benefit plan because he has authority to appointment the investment manager is not subject to liability under Section 406 merely because he continues to serve as the director of a trust company that has been appointed as an investment manager to manage assets of such plan. AO 76-15.
4. [Director] A person serving as a director of a fiduciary or a service provider is a representative of a party in interest. As such, he will not be subject to liability under Section 406 merely because he serves as a trustee of a plan while at the same time serving as a director of a bank service provider. AO 77-45.

C. Court Decisions

1. The appointment of an officer or employee of the plan sponsor as plan trustee is not improper merely because of the trustee's relationship to the sponsor. Blackmar v. Lichtenstein, 468 F.Supp. 370 (E.D.Mo.), aff'd, 603 F.2d 1306, 1 EBC 1679 (8th Cir. 1979).

Section 408(d)
Section 407(b) and subsections (b), (c) and (e) of this section shall not apply to any transaction in which a plan directly or indirectly -
Lends any part of the corpus or income of the plan to;
Pays any compensation for personal services rendered to the plan to; or
Acquires for the plan any property from or sells any property to;
any person who is with respect to the plan an owner-employee (as defined in section 401(c)(3) of the Internal Revenue Code of 1954), a member of the family (as defined in section 267(c)(4) of such Code) of my such owner-employee, or a corporation controlled by any such owner-employee through the ownership, directly or indirectly, of 50% or more of the combined voting power of all classes of stock entitled to vote or 50% or more of the total value of shares of all classes of stock of the corporation. For purposes of this subsection a shareholder employee (as defined in section 1379 of the Internal Revenue Code of 1954 as in effect on the day before the date of the enactment of the Subchapter S Revision Act of 1982) and a participant or beneficiary of an individual retirement annuity, or an individual retirement bond (as defined in section 408 or section 409 of the Internal Revenue Code of 1954) and an employer or association of employers which establishes such an account or annuity under section 408(c) of such Code shall be deemed to be an owner-employee.

A. Conference Report

The Congressional Conference Report does not explain this exception to the scope of the exemptions.

B. Advisory Opinions

1. Section 408(d) makes Section 408(b) unavailable for transactions between a plan and a shareholder-employee (as defined in Section 1379(d) of the Internal Revenue Code of 1954) of the plan. The trustees of the plan are, of course, responsible for determining whether the provisions of Section 408(b), or any other section of ERISA, are applicable to the plan. AO 75-105.

Section 408(e)

<table>
<tr><th colspan="2">Sections 406 and 407 shall not apply to the acquisition or sale by a plan of qualifying employer securities (as defined in section 407(d)(5)) or acquisition, sale, or lease by a plan of qualifying employer real property (as defined in section 407(d)(4)) -</th></tr>
<tr><td colspan="2">If such acquisition, sale, or lease is for adequate consideration (or in the case of a marketable obligation, at a price not less favorable to the plan than the price determined under section 407(e)(1)),</td></tr>
<tr><td colspan="2">If no commission is charged with respect thereto, and</td></tr>
<tr><td colspan="2">If -</td></tr>
<tr><td>(A)</td><td>The plan is an eligible individual account plan (as defined in section 407(d)(3)), or</td></tr>
<tr><td>(B)</td><td>In the case of an acquisition or lease of qualifying employer real property by a plan which is not an eligible individual account plan, or of an acquisition of qualifying employer securities by such a plan, the lease or acquisition is not prohibited by section 407(a).</td></tr>
</table>

A. Conference Report

The Congressional Conference Report explains this employer security and real property exemption at pages 316-320.

B. Regulations

See DOL ERISA Regulation 2550.408e .

C. Advisory Opinions

1. [General] For the exemption provided by Section 408(e) to apply to any sale, the property being sold must be either qualifying employer securities or qualifying employer real property *at the time such securities or property are sold by the plan*. If a corporation is not a member of a controlled group prior to the consummation of a sale, the corporation's securities will not be securities of an affiliate prior to the sale (Emphasis added). AO 77-18.
2. [Employer Real Estate] Section 408(e) is not applicable where the property is not "*qualifying* employer real property" (Emphasis added). AO 76-14.
3. [Individual Account Plan] An exchange of employer common stock by an eligible individual account plan for stock of a new parent company is covered by Section 408(e). AO 78-22.
4. [Individual Account Plan] The exemption provided in Section 408(e) is available to an eligible individual account plan only if the conditions set forth in that section are met. AO 79-13 and AO 79-23. The exemption is not affected by the exercise of control by a participant or beneficiary over the assets in his individual account. AO 75-89.
5. [Employer Securities] The prohibited transaction restrictions of Section 406 of ERISA do not apply to a company's repurchase of its stock from its employee benefit plan, provided that the three conditions of Section 408(e) are met. However, the Department will not opine as to whether a particular transaction is for adequate compensation. AO 81-46A.
6. [Employer Securities] The acquisition by the plan of preferred stock of the plan sponsor in payment of a debt owned by the plan sponsor corporation to the plan, and the further acquisition by the plan of the plan sponsor's preferred stock in exchange for the plan sponsor's common stock held by the plan, constitute acquisitions within the meaning of Section 408(e). AO 81-33A.
7. [Valuation - Employer Securities] ERISA Section 3(18) defines the term "*adequate consideration*", in the case of a security for which there is no generally recognized market, as the fair value of the security determined in good faith by the trustee or named fiduciary to a plan pursuant to the terms of the plan and in accordance with regulations promulgated by the Department of Labor. The Department of Labor has not yet issued such regulations and does not, at the present time, contemplate making advance determinations as to adequate consideration in the case of individual purchases and sales of stock. Guidelines to be issued will be general guidelines in the form of regulations under Section 3(18). In view of the fact that no regulations have been issued under Section 3(18), the plan advisory committee should make a good faith determination of the fair market value of the common stock of the employer maintaining the plan, utilizing recognized methods of determining the value of stock of closely held corporations. AO 75-141.
8. [Valuation - Employer Securities] In view of the fact that no regulations have been issued under Section 3(18), the trustee should make a good faith determination of the fair market value of the

book value shares, utilizing recognized methods of determining the value of such shares. The ruling received by the trustee from the Internal Revenue Service as to where the method of determining fair market value of the book value shares was a reasonable one for purposes of Section 1.421-7(e)(2) of the Income Tax Regulations would be considered as evidence that the trustee determining of fair market value was made in good faith. AO 77-35.

Section 408(f)
Section 406(b)(2) shall not apply to any merger or transfer described in subsection (b)(11).

Exculpatory Provisions; Insurance **ERISA Section 410**

Section 410(a) **Exculpatory Provisions**
Except as provided in sections 405(b)(1) and 405(d), any provision in an agreement or instrument which purports to relieve a fiduciary from responsibility or liability for any responsibility, obligation, or duty under this part shall be void as against public policy.

A. Conference Report

The Congressional Conference Report discusses the exculpatory provision prohibition .

B. Interpretive Bulletins

1. Indemnification agreements are not prohibited if the fiduciary who may be indemnified under the agreement remains responsible and liable for his acts or omissions with the indemnifying party merely satisfying the fiduciary liability. For example, an employer or union may agree to indemnity a plan fiduciary under Section 410(a). Also, a fiduciary can agree to indemnity his employees who perform fiduciary functions for a plan. However, a plan cannot agree to indemnify a fiduciary for a breach of fiduciary duty. IB 75-4.

C. Advisory Opinions

1. [Exculpatory Clauses] An exculpatory clause that appears in a plan instrument is void even if the plan is not amended to remove the clause. AO 75-122.
2. [Exculpatory Clauses] Any provision in a plan instrument purporting to relieve the trustees of the duty to collect contributions is void under Section 410(a). AO 78-28.
3. [Indemnification] Indemnification by a multiemployer plan of an investment manager's defense costs and settlement payment is permitted in a lawsuit alleging a breach of fiduciary duty by the investment manager, provided that (1) no court decision was rendered that the investment manager had breached his fiduciary duties; (2) the defense costs indemnified did not exceed a reasonable amount and (3) an opinion is obtained from independent legal counsel that the acts in question did not involve a breach of fiduciary duty by the investment manager. AO 77-66/67.
4. [Indemnification] An advance or reimbursement by a plan of expenses incurred by a plan fiduciary in defending a lawsuit alleging a breach of fiduciary duty is not a prohibited transaction, provided (1) no reimbursement is made or any advances repaid if a court rules that a breach has occurred; and (2) the advance or reimbursement is for expenses properly and actually incurred (see DOL ERISA Regulation 2550.408c-2). AO 77-66/67.
5. [Indemnification] Reimbursement of the legal defense expenses of Taft-Hartley plan trustees is permitted under certain circumstances. However, a plan provision authorizing reimbursement of legal fees in the event of *any* legal action that may arise from the performance of a trustee's fiduciary duties is too broad and would be prohibited under Section 410(a). Where a fiduciary is found in a legal proceeding to have violated his fiduciary duties, reimbursement of legal fees by the plan would not be permitted. AO 78-29.

D. Court Decisions

1. Absent any finding of breach of fiduciary duty, the reimbursement of litigation expenses incurred by a fiduciary in defending against allegations of breach of fiduciary duty is not prohibited by Section 410(a) and, by virtue of Section 408(c)(2), is not a prohibited transaction. Central States Pension Fund v. American National Bank & Trust Co. of Chicago, No. 77 C 4335, slip op. (N.D.Ill., Oct. 26, 1979).
2. Where a pension plan contains a provision to indemnify members of the board of directors, plan administrative committee, trustee and any other person to whom fiduciary responsibility was allocated from liability for a breach of fiduciary duty, except for liabilities and claims arising from willful misconduct, the indemnity agreement is void under ERISA Section 410(a). Donovan v. Cunningham, 541 F.Supp. 276, 3 EBC 1641 (S.D.Tex. 1982), aff'd in part, rev'd in part, 716 F.2d 1455, 4 EBC 2329 (5th Cir. 1983), cert. denied, 467 U.S. 1251 (1984).
3. A successor trustee cannot be exonerated by the provisions of a trust agreement from his duty to liquidate prior improper investments upon assuming his responsibilities. Marshall v. Craft, 463 F.Supp. 493 (N.D.Ga. 1978).
4. Even though a plan trustee has no authority for investment decisions, it cannot disavow itself of a responsibility for such decision since it is still a fiduciary. However, under the allocation provisions of Section 405(c)(1) the trustee may not, in fact, be liable for such decisions. Leonard v. Drug Fair, Inc., Fed. Sec. L. Rep. (CCH) Para 97,144 (D.D.C. 1979).
5. Where a pension plan was challenged under ERISA Section 410(a) because the summary plan descriptions contained disclaimers, the widow of a deceased employee could not maintain a private action since she was not a beneficiary as defined in ERISA. Trembly v. Marshall, 502 F.Supp. 29, 2 EBC 2500 (D.D.C. 1980).

Section 410(b) **Insurance**
Nothing in this subpart shall preclude -
A plan from purchasing insurance for its fiduciaries or for itself to cover liability or losses occurring by reason of the act or omission of a fiduciary, if such insurance permits recourse by the insurer against the fiduciary in the case of a breach of a fiduciary obligation by such fiduciary;
A fiduciary from purchasing insurance to cover liability under this part from and for his own account; or
An employer or an employee organization from purchasing insurance to cover potential liability of one or more persons who serve in a fiduciary capacity with regard to an employee benefit plan.

A. Conference Report

The Congressional Conference Report discusses the fiduciary insurance provisions of Section 410(b) at pages 320-321.

B. Regulations

No regulations have been issued interpreting Section 410(b). However, in a news release issued on March 4, 1975, the Department of Labor stated that fiduciary insurance purchased by a plan that provides for recourse by the insurer against the fiduciary but that also permits the fiduciary to pay an additional premium to obtain coverage against the insurer's recourse is not prohibited under Section 410(b).

C. Advisory Opinions

1. Section 410(b) does not require plans to maintain fiduciary insurance. AO 76-03.

Bonding of Fiduciaries **ERISA Section 412**

Section 412

(a)	Every fiduciary of an employee benefit plan and every person who handles funds or other property of such plan (hereinafter in this section referred to as "plan official") shall be bonded as provided in this section; except that-			
	(1)	Where such plan is one under which the only assets from which benefits are paid are the general assets of a union or of an employer, the administrator, officers, and employees of such plan shall be exempt from the bonding requirements of this section, and		
	(2)	No bond shall be required of a fiduciary (or of any director, officer, or employee of such fiduciary) if such fiduciary -		
		(A)	Is a corporation organized and doing business under the laws of the United States or any State;	
		(B)	Is authorized under such laws to exercise trust powers or to conduct an insurance business;	
		(C)	Is subject to supervision or examination by Federal or State authority; and	
		(D)	Has at all times a combined capital and surplus in excess of such a minimum amount as may be established by regulations issued by the Secretary, which amount shall be at least $1,000,000. Paragraph (2) shall apply to a bank or other financial institution which is authorized to exercise trust powers and the deposits of which are not insured by the Federal Deposit Insurance Corporation, only if such bank or institution meets bonding or similar requirements under State law which the Secretary determines are at least equivalent to those imposed on banks by Federal law. The amount of such bond shall be fixed at the beginning of each fiscal year of the plan. Such amount shall not be less than 10 per centum of the amount of funds handled. In no case shall such bond be less than $1,000 nor more than $500,000, except that the Secretary, after due notice and opportunity for hearing to all interested parties, and after consideration of the record, may prescribe an amount in excess of $500,000, subject to the 10 per centum limitation of the preceding sentence.	
			For purposes of fixing the amount of such bond, the amount of funds handled shall be determined by the funds handled by the person, group, or class to be covered by such bond and by their predecessor or predecessors, if any, during the preceding reporting year, or if the plan has no preceding reporting year, the amount of funds to be handled during the current reporting year by such person, group, or class, estimated as provided in regulations of the Secretary. Such bond shall provide protection to the plan against loss by reason of acts of fraud or dishonesty on the part of be plan official, directly or through connivance with others. Any bond shall have as surety thereon a corporate surety company which is an acceptable surety on Federal bonds under authority granted by the Secretary of the Treasury pursuant to sections 9304-9308 of title 31. Any bond shall be in a form or of a type approved by the Secretary, including individual bonds or schedule of blanket forms of bonds which cover a group or class.	
(b)	It shall be unlawful for any plan official to whom subsection (a) applies, to receive, handle, disburse, or otherwise exercise custody of any of the funds or other property of any employees benefit plan, without being bonded as required by subsection (a) and it shall be unlawful for any plan official of such plan, or any other person having authority to direct the performance of such functions, to permit such functions, or any, of them, to be performed by any plan official, with respect to whom the requirements of subsection (a) have not been met.			
(c)	It shall be unlawful for any person to procure any bond required by subsection (a) from any surety or other company or through any agent or broker in whose business			

	operations such plan or any party in interest in such plan has any control or significant financial interest, direct or indirect.
(d)	Nothing in any other provision of law, shall make any person, required to be bonded as provided in subsection (a) because he handles funds or other property of an employee benefit plan, to be bonded insofar as the handling by such person of the funds or other property of such plan is concerned.
(e)	The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this section including exempting a plan from the requirements of this section where he finds that (1) other bonding arrangements or (2) the overall financial condition of the plan would be adequate to protect the interests of the beneficiaries and participants. When, in the opinion of the Secretary, the administrator of a plan offers adequate evidence of the financial responsibility of the plan, or that other bonding arrangements would provide adequate protection of the beneficiaries and participants, he may exempt such plan from the requirements of this section.

A. Conference Report

The Congressional Conference Report discusses the bonding requirements of ERISA.

B. Regulations

1. The temporary regulations generally incorporated by reference the bonding regulations issued under Section 13 of the Welfare and Pension Plans Disclosure Act (WPPDA). ERISA Regs. 2550.412-1. WPPDA Regulation Section 464 (29 C.F.R. 464).
2. Section 464.5 of the WPPDA regulations provides that the term "funds or other property" [see ERISA 412(a)] includes all property that is to be used by a plan as a source for paying benefits; however, it does not include, among other things, fixed assets used in the operation of a plan (e.g., a building used as office space by a plan).
3. Section 464.6 of the WPPDA regulations provides that in the case of multiemployer plans, employer contributions become plan funds when they are actually received by the plan.
4. Section 464.7 of the WPPDA regulations indicates the following regarding persons who handle funds or other property:

   a. Generally, a person handles plan funds or other property, when he has a relationship to funds or property that can rise to risk of loss through fraud or dishonesty. DOL WPPDA Regulation 464.7(a)(1).
   b. However, a person is not deemed to be handling where the risk of loss is negligible (e.g., where the person is handling checks, securities or title papers that he cannot negotiate). DOL WPPDA Regulation 464.7(a)(2).
   c. The power to withdraw funds from a bank account generally constitutes handling, regardless of whether the power is authorized. DOL WPPDA Regulation 464.7(b)(2).
   d. Having the authority to transfer ownership of plan assets to others constitutes handling. DOL WPPDA Regulation 464.7(b)(3).
   e. Persons who disburse plan funds or sign plan checks are handling plan funds. DOL WPPDA Regulation 464.7(b)(4).
   f. In the case of fully insured plans, there is generally no handling of plan funds or other assets, unless benefit payments, dividends, etc., are paid to the plan by the insurance company. DOL WPPDA Regulation 464.7(b)(7).

C. Interpretive Bulletins

1. A person who provides investment advice to a plan but does not handle plan funds or other property is not required to be bonded under Section 412. IB 75-5, Question FR-8.
2. A plan can purchase a bond covering plan officials, but the bond must be solely for the protection of the plan. IB 75-5, Question FR-9.
3. Even though a person is not a plan fiduciary, he may be subject to the bonding requirements of Section 412 if he handles plan funds or other property. IB 75-8, Question D-2.

D. Advisory Opinions

1. The Labor Department cannot postpone the applicability of the bonding requirements to any plan. AO 75-120.

2. There is no provision in Section 412 exempting plans with a minimum number of participants from the bonding requirements. AO 75-117.
3. Section 412(a) requires coverage only against fraud or dishonesty; it does not require errors and omissions coverage. AO 75-124.
4. A plan official is not required to be bonded unless he handles funds or other property. Handling occurs whenever the duties or activities of a plan official are such that there is a risk that such funds or other property could be lost in the event of fraud or dishonesty on the part of such person, acting either alone or in collusion with others. The authorization of disbursements may constitute handling, depending on the facts in a particular case. The factors that are considered include the closeness and continuity of supervision; who is, in fact, charged with or actually exercises final responsibility for determining whether specific disbursements or benefit claims are bona fide, regular and made in accordance with the applicable trust instrument or other documents; and who has the final responsibility for determining the propriety of any specific expenditure. AO 77-84.
5. An impartial chairman of a joint board of trustees who is only given full trustee voting authority to resolve disputes between trustees is handling plan funds or other property. AO 75-119.
6. Plan assets deposited in a savings account are not required to be bonded under Section 412. AO 77-11 and AO 79-10.
7. A person who (a) receives insurance policies from the plan trustees or participants for transmissions to the insurance company and (b) handles premium checks made out to the insurance carrier or receives checks made out to the plan trustees from the insurance company (but has no authority to negotiate these checks) is not handling plan funds or other property. AO 76-47.
8. The sale of a group insurance policy to an employer to fund a plan does not alone make the insurance company a party in interest to the plan. Therefore, the insurance company is not prohibited under Section 12(c) from selling a bond to the plan. AO 76-36.
9. The administrator of a plan cannot sell a bond to the plan under Section 412(c). The exemptions provided in Sections 408 and 414(c) apply only to prohibited transactions, not to the bonding restrictions. AO 76-92.

E. Court Decisions

1. A fiduciary who is not bonded is legally disqualified from serving as a fiduciary. Lane v. Marshall, Civ. A. No. 79-0868 (N.D.Cal., April 28,1979).
2. Posting of government obligations in lieu of corporate surety bond does not fulfill ERISA Section 412 bonding requirement. Musso v. Baker, 834 F.2d 78, 9 EBC 1145 (3d Cir. 1987), cert. denied, 101 L.Ed.2d 884, 1988 U.S. LEXIS 2840, 108 S.Ct. 2846, 56 U.S.L.W. 3864, 9 EBC 2304 (U.S. 1988) (where fund trustees deposited fund-owned federal government obligations).

Trust Examination Manual

Appendix E — Employee Benefit Law

Internal Revenue Code

Section 72(p)

26 USC 72(p)

Participant Loans Treated as Distributions

As Amended through 1988 (P.L. 100-647)

1. Treatment as Distributions. -- For purposes of this section -

   A. Loans. -- If during any taxable year a participant or beneficiary receives (directly or indirectly) any amount as a loan from a qualified employer plan, such amount shall be treated as having been received by such individual as a distribution under such plan.

   B. Assignments or pledges. -- If during any taxable year a participant or beneficiary assigns (or agrees to assign) or pledges (or agrees to pledge) any portion of his interest in a qualified employer plan, such portion shall be treated as having been received by such individual as a loan from such plan.

2. Exception of certain loans. --

   A. General rule. -- Paragraph (1) shall not apply to any loan to the extent that such loan (when added to the outstanding balance of all other loans from such plan whether made on, before, or after August 13, 1982), does not exceed the lesser of --

      i. $50,000, reduced by the excess (if any) of

         I. The highest outstanding balance of loans from the plan during the 1-year period ending on the day before the date on which such loan was made, over

         II. The outstanding balance of loans from the plan on the date which such loan was more, or

      ii. The greater of --

         I. One-half of the present value of the nonforfeitable accrued benefit of the employee under the plan, or

         II. $10,000.

      For purposes of clause (ii) the present value of the nonforfeitable accrued benefit shall be determined without regard to any accumulated deductible employee contributions (as defined in subsection (O)(5)(b)).

   B. Requirement that loan be repayable within 5 years. --

      i. In general. -- Subparagraph (A) shall not apply to any loan unless such loan, by its terms, is required to be repaid within 5 years.

      ii. Exception for home loans. -- Clause (i) shall not apply to any loan used to acquire any dwelling unit which within a reasonable time is to be used (determined at the time the loan is made) as a principal residence of the participant.

C. Requirement of level amortization. -- Except as provided in regulations, this paragraph shall not apply to any loan unless substantially level amortization of such loan (with payments not less frequently than quarterly) is required over the term of the loan.
D. Related employers and related plans. -- For purposes of this paragraph

   i. The rules of subsections (b), (c), and (m) of section 414 shall apply, and
   ii. All plans of an employer (determined after the application of such subsections) shall be treated as 1 plan.

3. Denial of interest deductions in certain cases. --

   A. In general. No deduction otherwise allowable under this chapter shall be allowed under this chapter for any interest paid or accrued on any loan to which paragraph (1) does not apply by reason of paragraph (2) during the period described in subparagraph (B).
   B. Period to which subparagraph (A) applies. --For purposes of subparagraph (A), the period described in this subparagraph is the period--

      i. On or after the 1st day on which the individual to whom the loan is made is a key employee (as defined in section 416(i)), or
      ii. Such loan is secured by amounts attributable to elective deferrals described in subparagraph (A) or (C) of section 402(g)(3). made to a key employee (as defined in section 416(i), or

4. Qualified employer plan, etc. For purposes of this subsection

   A. Qualified employer plan -

      i. In general. - The term "qualified employer plan" means -

         I. A plan described in section 401(a) which includes a trust exempt from tax under section 501(a).
         II. A annuity plan described in section 403(a), and
         III. A plan under which amounts are contributed by an individual's employer for an annuity contract described in section 403(b).

      ii. Special rules. - The term "qualified employer plan" -

         I. Shall include any plan which was (or was determined to be) a qualified employer plan or a government plan, but
         II. Shall not include a plan described in subsection (e)(7).

   B. Government plan. The term "government plan" means any plan, whether or not qualified, established and maintained for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing.

5. Special rules for loans, etc., from certain contracts. For purposes of this subsection, any amount received as a loan under a contract purchased under a qualified employer plan (and any assignment or pledge with respect to such a contract) shall be treated as a loan under such employer plan.

Internal Revenue Code

Section 72(p)-1

26 USC 72(p)-1

Participant Loans Treated as Distributions – IRS Guidelines

Section 72(p) was added by section 236 of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 324), and amended by the Technical Corrections Act of 1982 (96 Stat. 2365), the Deficit Reduction Act of 1984 (98 Stat. 494), the Tax Reform Act of 1986 (100 Stat. 2085), and the Technical and Miscellaneous Revenue Act of 1988 (102 Stat. 3342).

Section 72(p)-1 was added on July 31, 2000 [Federal Register Volume 65, Number 147].

Statutory effective date: Section 72(p) applies to assignments, pledges, and loans made after

August 13, 1982.

Regulatory effective date: Section 72(p)-1 applies to assignments, pledges, and loans made on or after January 1, 2002.

Refer to response to question # 22 (a) through (c)(2) below for applicability dates.

Sec. 1.72(p)-1 Loans treated as distributions.

The questions and answers in this section provide guidance under section 72(p) pertaining to loans from qualified employer plans (including government plans and tax-sheltered annuities and employer plans that were formerly qualified). The examples included in the questions and answers in this section are based on the assumption that a bona fide loan is made to a participant from a qualified defined contribution plan pursuant to an enforceable agreement (in accordance with paragraph (b) of Q&A-3 of this section), with adequate security and with an interest rate and repayment terms that are commercially reasonable. (The particular interest rate used, which is solely for illustration, is 8.75 percent compounded annually.) In addition, unless the contrary is specified, it is assumed in the examples that the amount of the loan does not exceed 50 percent of the participant's nonforfeitable account balance, the participant has no other outstanding loan (and had no prior loan) from the plan or any other plan maintained by the participant's employer or any other person required to be aggregated with the employer under section 414(b), (c) or (m), and the loan is not excluded from section 72(p) as a loan made in the ordinary course of an investment program as described in Q&A-18 of this section. The regulations and examples in this section do not provide guidance on whether a loan from a plan would result in a prohibited transaction under section 4975 of the Internal Revenue Code or on whether a loan from a plan covered by Title I of the Employee Retirement Income Security Act of 1974 (88 Stat. 829) (ERISA) would be consistent with the fiduciary standards of ERISA or would result in a prohibited transaction under section 406 of ERISA. The questions and answers are as follows:

Q-1: In general, what does section 72(p) provide with respect to loans from a qualified employer plan?

A-1: (a) Loans. Under section 72(p), an amount received by a participant or beneficiary as a loan from a qualified employer plan is treated as having been received as a distribution from the plan (a deemed distribution), unless the loan satisfies the requirements of Q&A-3 of this section. For purposes of section 72(p) and this section, a loan made from a contract that has been purchased under a qualified employer plan (including a contract that has been distributed to the participant or beneficiary) is considered a loan made under a qualified employer plan.

(b) Pledges and assignments. Under section 72(p), if a participant or beneficiary assigns or pledges (or agrees to assign or pledge) any portion of his or her interest in a qualified employer plan as security for a loan, the portion of the individual's interest assigned or pledged (or subject to an agreement to assign or pledge) is treated as a loan from the plan to the individual, with the result that such portion is subject to the deemed distribution rule described in paragraph (a) of this Q&A-1. For purposes of section 72(p) and this section, any assignment or pledge of (or agreement to assign or to pledge) any portion of a participant's or beneficiary's interest in a contract that has been purchased under a qualified employer plan (including a contract that has been distributed to the participant or beneficiary) is considered an assignment or pledge of (or agreement to assign or pledge) an interest in a qualified employer plan. However, if all or a portion of a participant's or beneficiary's interest in a qualified employer plan is pledged or assigned as security for a loan from the plan to the participant or the beneficiary, only the amount of the loan received by the participant or the beneficiary, not the amount pledged or assigned, is treated as a loan.

Q-2: What is a qualified employer plan for purposes of section 72(p)?

A-2: For purposes of section 72(p) and this section, a qualified employer plan means--

(a) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a);

(b) An annuity plan described in section 403(a);

(c) A plan under which amounts are contributed by an individual's employer for an annuity contract described in section 403(b);

(d) Any plan, whether or not qualified, established and maintained for its employees by the

United States, by a State or political subdivision thereof, or by an agency or instrumentality of the United States, a State or a political subdivision of a State; or

(e) Any plan which was (or was determined to be) described in paragraph (a), (b), (c), or (d) of this Q&A-2.

Q-3: What requirements must be satisfied in order for a loan to a participant or beneficiary from a qualified employer plan not to be a deemed distribution?

A-3: (a) In general. A loan to a participant or beneficiary from a qualified employer plan will not be a deemed distribution to the participant or beneficiary if the loan satisfies the repayment term requirement of section 72(p)(2)(B), the level amortization requirement of section 72(p)(2)(C), and the enforceable agreement requirement of paragraph (b) of this Q&A-3, but only to the extent the loan satisfies the amount limitations of section 72(p)(2)(A).

(b) Enforceable agreement requirement. A loan does not satisfy the requirements of this paragraph unless the loan is evidenced by a legally enforceable agreement (which may include more than one document) and the terms of the agreement demonstrate compliance with the requirements of section 72(p)(2) and this section. Thus, the agreement must specify the amount and date of the loan and the repayment schedule. The agreement does not have to be signed if the agreement is enforceable under applicable law without being signed. The agreement must be set forth either--

(1) In a written paper document;

(2) In an electronic medium that is reasonably accessible to the participant or the beneficiary and that is provided under a system that satisfies the following requirements:

(i) The system must be reasonably designed to preclude any individual other than the participant or the beneficiary from requesting a loan.

(ii) The system must provide the participant or the beneficiary with a reasonable opportunity to review and to confirm, modify, or rescind the terms of the loan before the loan is made.

(iii) The system must provide the participant or the beneficiary, within a reasonable time after the loan is made, a confirmation of the loan terms either through a written paper document or through an electronic medium that is reasonably accessible to the participant or the beneficiary and that is provided under a system that is reasonably designed to provide the confirmation in a manner no less understandable to the participant or beneficiary than a written document and, under which, at the time the confirmation is provided, the participant or the beneficiary is advised that he or she may request and receive a written paper document at no charge, and, upon request, that document is provided to the participant or beneficiary at no charge; or

(3) In such other form as may be approved by the Commissioner.

Q-4: If a loan from a qualified employer plan to a participant or beneficiary fails to satisfy the requirements of Q&A-3 of this section, when does a deemed distribution occur?

A-4: (a) Deemed distribution. For purposes of section 72, a deemed distribution occurs at the first time that the requirements of Q&A-3 of this section are not satisfied, in form or in operation. This may occur at the time the loan is made or at a later date. If the terms of the loan do not require repayments that satisfy the repayment term requirement of section 72(p)(2)(B) or the level amortization requirement of section 72(p)(2)(C), or the loan is not evidenced by an enforceable agreement satisfying the requirements of paragraph (b) of Q&A-3 of this section, the entire amount of the loan is a deemed distribution under section 72(p) at the time the loan is made. If the loan satisfies the requirements of Q&A-3 of this section except that the amount loaned exceeds the limitations of section 72(p)(2)(A), the amount of the loan in excess of the applicable limitation is a deemed distribution under section 72(p) at the time the loan is made. If the loan initially satisfies the requirements of

section 72(p)(2)(A), (B) and (C) and the enforceable agreement requirement of paragraph (b) of Q&A-3 of this section, but payments are not made in accordance with the terms applicable to the loan, a deemed distribution occurs as a result of the failure to make such payments. See Q&A-10 of this section regarding when such a deemed distribution occurs and the amount thereof and Q&A-11 of this section regarding the tax treatment of a deemed distribution.

(b) Examples. The following examples illustrate the rules in paragraph (a) of this Q&A-4 and are based upon the assumptions described in the introductory text of this section:

Example 1. (i) A participant has a nonforfeitable account balance of $200,000 and receives $70,000 as a loan repayable in level quarterly installments over five years.

(ii) Under section 72(p), the participant has a deemed distribution of $20,000 (the excess of $70,000 over $50,000) at the time of the loan, because the loan exceeds the $50,000 limit in section 72(p)(2)(A)(i). The remaining $50,000 is not a deemed distribution.

Example 2. (i) A participant with a nonforfeitable account balance of $30,000 borrows $20,000 as a loan repayable in level monthly installments over five years.

(ii) Because the amount of the loan is $5,000 more than 50% of the participant's nonforfeitable account balance, the participant has a deemed distribution of $5,000 at the time of the loan. The remaining $15,000 is not a deemed distribution. (Note also that, if the loan is secured solely by the participant's account balance, the loan may be a prohibited transaction under section 4975 because the loan may not satisfy 29 CFR 2550.408b-1(f)(2).)

Example 3. (i) The nonforfeitable account balance of a participant is $100,000 and a $50,000 loan is made to the participant repayable in level quarterly installments over seven years. The loan is not eligible for the section 72(p)(2)(B)(ii) exception for loans used to acquire certain dwelling units.

(ii) Because the repayment period exceeds the maximum five-year period in section 72(p)(2)(B)(i), the participant has a deemed distribution of $50,000 at the time the loan is made.

Example 4. (i) On August 1, 2002, a participant has a nonforfeitable account balance of $45,000 and borrows $20,000 from a plan to be repaid over five years in level monthly installments due at the end of each month. After making monthly payments through July 2003, the participant fails to make any of the payments due thereafter.

(ii) As a result of the failure to satisfy the requirement that the loan be repaid in level monthly installments, the participant has a deemed distribution. See paragraph (c) of Q&A-10 of this section regarding when such a deemed distribution occurs and the amount thereof.

Q-5: What is a principal residence for purposes of the exception in section 72(p)(2)(B)(ii) from the requirement that a loan be repaid in five years?

A-5: Section 72(p)(2)(B)(ii) provides that the requirement in section 72(p)(2)(B)(i) that a plan loan be repaid within five years does not apply to a loan used to acquire a dwelling unit which will within a reasonable time be used as the principal residence of the participant (a principal residence plan loan). For this purpose, a principal residence has the same meaning as a principal residence under section 121.

Q-6: In order to satisfy the requirements for a principal residence plan loan, is a loan required to be secured by the dwelling unit that will within a reasonable time be used as the principal residence of the participant?

A-6: A loan is not required to be secured by the dwelling unit that will within a reasonable time be used as the participant's principal residence in order to satisfy the requirements for a principal residence plan loan.

Q-7: What tracing rules apply in determining whether a loan qualifies as a principal residence plan loan?

A-7: The tracing rules established under section 163(h)(3)(B) apply in determining whether a loan is treated as for the acquisition of a principal residence in order to qualify as a principal residence plan loan.

Q-8: Can a refinancing qualify as a principal residence plan loan?

A-8: (a) Refinancings. In general, no, a refinancing cannot qualify as a principal residence plan loan. However,

a loan from a qualified employer plan used to repay a loan from a third party will qualify as a principal residence plan loan if the plan loan qualifies as a principal residence plan loan without regard to the loan from the third party.

(b) Example. The following example illustrates the rules in paragraph (a) of this Q&A-8 and is based upon the assumptions described in the introductory text of this section:

Example. (i) On July 1, 2003, a participant requests a $50,000 plan loan to be repaid in level monthly installments over 15 years. On August 1, 2003, the participant acquires a principal residence and pays a portion of the purchase price with a $50,000 bank loan. On September 1, 2003, the plan loans $50,000 to the participant, which the participant uses to pay the bank loan.

(ii) Because the plan loan satisfies the requirements to qualify as a principal residence plan loan (taking into account the tracing rules of section 163(h)(3)(B)), the plan loan qualifies for the exception in section 72(p)(2)(B)(ii).

Q-9: Does the level amortization requirement of section 72(p)(2)(C) apply when a participant is on a leave of absence without pay?

A-9: (a) Leave of absence. The level amortization requirement of section 72(p)(2)(C)does not apply for a period, not longer than one year (or such longer period as may apply under section 414(u)), that a participant is on a bona fide leave of absence, either without pay from the employer or at a rate of pay (after income and employment tax withholding) that is less than the amount of the installment payments required under the terms of the loan. However, the loan (including interest that accrues during the leave of absence) must be repaid by the latest date permitted under section 72(p)(2)(B) (e.g., the suspension of payments cannot extend the term of the loan beyond 5 years, in the case of a loan that is not a principal residence plan loan) and the amount of the installments due after the leave ends (or, if earlier, after the first year of the leave or such longer period as may apply under section 414(u)) must not be less than the amount required under the terms of the original loan.

(b) Military service. See section 414(u)(4) for special rules relating to military service.

(c) Example. The following example illustrates the rules of paragraph (a) of this Q&A-9 and is based upon the assumptions described in the introductory text of this section:

Example. (i) On July 1, 2002, a participant with a nonforfeitable account balance of $80,000 borrows $40,000 to be repaid in level monthly installments of $825 each over 5 years. The loan is not a principal residence plan loan. The participant makes 9 monthly payments and commences an unpaid leave of absence that lasts for 12 months. Thereafter, the participant resumes active employment and resumes making repayments on the loan until the loan is repaid in full (including interest that accrued during the leave of absence). The amount of each monthly installment is increased to $1,130 in order to repay the loan by June 30, 2007.

(ii) Because the loan satisfies the requirements of section 72(p)(2), the participant does not have a deemed distribution. Alternatively, section 72(p)(2) would be satisfied if the participant continued the monthly installments of $825 after resuming active employment and on June 30, 2007 repaid the full balance remaining due.

Q-10: If a participant fails to make the installment payments required under the terms of a loan that satisfied the requirements of Q&A-3 of this section when made, when does a deemed distribution occur and what is the amount of the deemed distribution?

A-10: (a) Timing of deemed distribution. Failure to make any installment payment when due in accordance with the terms of the loan violates section 72(p)(2)(C) and, accordingly, results in a deemed distribution at the time of such failure. However, the plan administrator may allow a cure period and section 72(p)(2)(C) will not be considered to have been violated if the installment payment is made not later than the end of the cure period, which period cannot continue beyond the last day of the calendar quarter following the calendar quarter in which the required installment payment was due.

(b) Amount of deemed distribution. If a loan satisfies Q&A-3 of this section when made, but there is a failure to pay the installment payments required under the terms of the loan (taking into account any cure period allowed under paragraph (a) of this Q&A-10), then the amount of the deemed distribution equals the entire outstanding balance of the loan (including accrued interest) at the time of such failure.

(c) Example. The following example illustrates the rules in paragraphs (a) and (b) of this Q&A-10 and is based upon the assumptions described in the introductory text of this section:

Example. (i) On August 1, 2002, a participant has a nonforfeitable account balance of $45,000 and borrows $20,000 from a plan to be repaid over 5 years in level monthly installments due at the end of each month. After making all monthly payments due through July 31, 2003, the participant fails to make the payment due on August 31, 2003 or any other monthly payments due thereafter. The plan administrator allows a three-month cure period.

(ii) As a result of the failure to satisfy the requirement that the loan be repaid in level installments pursuant to section 72(p)(2)(C), the participant has a deemed distribution on November 30, 2003, which is the last day of the three-month cure period for the August 31, 2003 installment. The amount of the deemed distribution is $17,157, which is the outstanding balance on the loan at November 30, 2003. Alternatively, if the plan administrator had allowed a cure period through the end of the next calendar quarter, there would be a deemed distribution on December 31, 2003 equal to $17,282, which is the outstanding balance of the loan at December 31, 2003.

Q-11: Does section 72 apply to a deemed distribution as if it were an actual distribution?

A-11: (a) Tax basis. If the employee's account includes after-tax contributions or other investment in the contract under section 72(e), section 72 applies to a deemed distribution as if it were an actual distribution, with the result that all or a portion of the deemed distribution may not be taxable.

(b) Section 72(t) and (m). Section 72(t) (which imposes a 10 percent tax on certain early distributions) and section 72(m)(5) (which imposes a separate 10 percent tax on certain amounts received by a 5-percent owner) apply to a deemed distribution under section 72(p) in the same manner as if the deemed distribution were an actual distribution.

Q-12: Is a deemed distribution under section 72(p) treated as an actual distribution for purposes of the qualification requirements of section 401, the distribution provisions of section 402, the distribution restrictions of section 401(k)(2)(B) or 403(b)(11), or the vesting requirements of Sec. 1.411(a)-7(d)(5) (which affects the application of a graded vesting schedule in cases involving a prior distribution)?

A-12: No; thus, for example, if a participant in a money purchase plan who is an active employee has a deemed distribution under section 72(p), the plan will not be considered to have made an in-service distribution to the participant in violation of the qualification requirements applicable to money purchase plans. Similarly, the deemed distribution is not eligible to be rolled over to an eligible retirement plan and is not considered an impermissible distribution of an amount attributable to elective contributions in a section 401(k) plan. See also Sec. 1.402(c)-2, Q&A-4(d) and Sec. 1.401(k)-1(d)(6)(ii).

Q-13: How does a reduction (offset) of an account balance in order to repay a plan loan differ from a deemed distribution?

A-13: (a) Difference between deemed distribution and plan loan offset amount.

(1) Loans to a participant from a qualified employer plan can give rise to two types of taxable distributions-

(i) A deemed distribution pursuant to section 72(p); and

(ii) A distribution of an offset amount.

(2) As described in Q&A-4 of this section, a deemed distribution occurs when the requirements of Q&A-3 of this section are not satisfied, either when the loan is made or at a later time. A deemed distribution is treated as a distribution to the participant or beneficiary only for certain tax purposes and is not a distribution of the accrued benefit. A distribution of a plan loan offset amount (as defined in Sec. 1.402(c)-2, Q&A-9(b)) occurs when, under the terms governing a plan loan, the accrued benefit of the participant or beneficiary is reduced (offset) in order to repay the loan (including the enforcement of the plan's security interest in the accrued benefit). A distribution of a plan loan offset amount could occur in a variety of circumstances, such as where the terms governing the plan loan require that, in the event of the participant's request for a distribution, a loan be repaid

immediately or treated as in default.

(b) Plan loan offset. In the event of a plan loan offset, the amount of the account balance that is offset against the loan is an actual distribution for purposes of the Internal Revenue Code, not a deemed distribution under section 72(p). Accordingly, a plan may be prohibited from making such an offset under the provisions of section 401(a), 401(k)(2)(B) or 403(b)(11) prohibiting or limiting distributions to an active employee. See Sec. 1.402(c)-2, Q&A-9(c), Example 6. See also Q&A-19 of this section for rules regarding the treatment of a loan after a deemed distribution.

Q-14: How is the amount includible in income as a result of a deemed distribution under section 72(p) required to be reported?

A-14: The amount includible in income as a result of a deemed distribution under section 72(p) is required to be reported on Form 1099-R (or any other form prescribed by the Commissioner).

Q-15: What withholding rules apply to plan loans?

A-15: To the extent that a loan, when made, is a deemed distribution or an account balance is reduced (offset) to repay a loan, the amount includible in income is subject to withholding. If a deemed distribution of a loan or a loan repayment by benefit offset results in income at a date after the date the loan is made, withholding is required only if a transfer of cash or property (excluding employer securities) is made to the participant or beneficiary from the plan at the same time. See Secs. 35.3405-1, f-4, and 31.3405(c)-1, Q&A-9 and Q&A-11, of this chapter for further guidance on withholding rules.

Q-16: If a loan fails to satisfy the requirements of Q&A-3 of this section and is a prohibited transaction under section 4975, is the deemed distribution of the loan under section 72(p) a correction of the prohibited transaction?

A-16: No, a deemed distribution is not a correction of a prohibited transaction under section 4975. See Secs. 141.4975-13 and 53.4941(e)-1(c)(1) of this chapter for guidance concerning correction of a prohibited transaction.

Q-17: What are the income tax consequences if an amount is transferred from a qualified employer plan to a participant or beneficiary as a loan, but there is an express or tacit understanding that the loan will not be repaid?

A-17: If there is an express or tacit understanding that the loan will not be repaid or, for any reason, the transaction does not create a debtor-creditor relationship or is otherwise not a bona fide loan, then the amount transferred is treated as an actual distribution from the plan for purposes of the Internal Revenue Code, and is not treated as a loan or as a deemed distribution under section 72(p).

Q-18: If a qualified employer plan maintains a program to invest in residential mortgages, are loans made pursuant to the investment program subject to section 72(p)?

A-18: (a) Residential mortgage loans made by a plan in the ordinary course of an investment program are not subject to section 72(p) if the property acquired with the loans is the primary security for such loans and the amount loaned does not exceed the fair market value of the property. An investment program exists only if the plan has established, in advance of a specific investment under the program, that a certain percentage or amount of plan assets will be invested in residential mortgages available to persons purchasing the property who satisfy commercially customary financial criteria. A loan will not be considered as made under an investment program if--

(1) Any of the loans made under the program matures upon a participant's termination from employment;

(2) Any of the loans made under the program is an earmarked asset of a participant's or beneficiary's individual account in the plan; or

(3) The loans made under the program are made available only to participants or beneficiaries in the plan.

(b) Paragraph (a)(3) of this Q&A-18 shall not apply to a plan which, on December 20, 1995, and at all times thereafter, has had in effect a loan program under which, but for paragraph (a)(3) of this Q&A-18, the loans comply with the conditions of paragraph (a) of this Q&A-18 to constitute residential mortgage loans in the ordinary course of an investment program.

(c) No loan that benefits an officer, director, or owner of the employer maintaining the plan, or their beneficiaries, will be treated as made under an investment program.

(d) This section does not provide guidance on whether a residential mortgage loan made under a plan's investment program would result in a prohibited transaction under section 4975, or on whether such a loan made by a plan covered by Title I of ERISA would be consistent with the fiduciary standards of ERISA or would result in a prohibited transaction under section 406 of ERISA. See 29 CFR 2550.408b-1.

Q-19: If there is a deemed distribution under section 72(p), is the interest that accrues thereafter on the amount of the deemed distribution an indirect loan for income tax purposes?

A-19: (a) General rule. Except as provided in paragraph (b) of this Q&A-19, a deemed distribution of a loan is treated as a distribution for purposes of section 72. Therefore, a loan that is deemed to be distributed under section 72(p)ceases to be an outstanding loan for purposes of section 72, and the interest that accrues thereafter under the plan on the amount deemed distributed is disregarded in applying section 72 to the participant or beneficiary. Even though interest continues to accrue on the outstanding loan (and is taken into account for purposes of determining the tax treatment of any subsequent loan in accordance with paragraph (b) of this Q&A-19), this additional interest is not treated as an additional loan (and, thus, does not result in an additional deemed distribution) for purposes of section 72(p). However, a loan that is deemed distributed under section 72(p) is not considered distributed for all purposes of the Internal Revenue Code. See Q&A-11 through Q&A-16 of this section.

(b) Exception for purposes of applying section 72(p)(2)(A) to a subsequent loan. In the case of a loan that is deemed distributed under section 72(p) and that has not been repaid (such as by a plan loan offset), the unpaid amount of such loan, including accrued interest, is considered outstanding for purposes of applying section 72(p)(2)(A) to determine the maximum amount of any subsequent loan to the participant or beneficiary.

Q-20: May a participant refinance an outstanding loan or have more than one loan outstanding from a plan?

A-20: [Reserved]

Q-21: Is a participant's tax basis under the plan increased if the participant repays the loan after a deemed distribution?

A-21: (a) Repayments after deemed distribution. Yes, if the participant or beneficiary repays the loan after a deemed distribution of the loan under section 72(p), then, for purposes of section 72(e), the participant's or beneficiary's investment in the contract (tax basis) under the plan increases by the amount of the cash repayments that the participant or beneficiary makes on the loan after the deemed distribution. However, loan repayments are not treated as after-tax contributions for other purposes, including sections 401(m) and 415(c)(2)(B).

(b) Example. The following example illustrates the rules in paragraph (a) of this Q&A-21 and is based on the assumptions described in the introductory text of this section:

Example. (i) A participant receives a $20,000 loan on January 1, 2003, to be repaid in 20 quarterly installments of $1,245 each. On December 31, 2003, the outstanding loan balance ($19,179) is deemed distributed as a result of a failure to make quarterly installment payments that were due on September 30, 2003 and December 31, 2003. On June 30, 2004, the participant repays $5,147 (which is the sum of the three installment payments that were due on September 30, 2003, December 31, 2003, and March 31, 2004, with interest thereon to June 30, 2004, plus the installment payment due on June 30, 2004). Thereafter, the participant resumes making the installment payments of $1,245 from September 30, 2004 through December 31, 2007. The loan repayments made after December 31, 2003 through December 31, 2007 total $22,577.

(ii) Because the participant repaid $22,577 after the deemed distribution that occurred on December 31, 2003, the participant has investment in the contract (tax basis) equal to $22,577 (14 payments of $1,245 each plus a single payment of $5,147) as of December 31, 2007.

Q-22: When is the effective date of section 72(p) and the regulations in this section?

A-22: (a) Statutory effective date. Section 72(p) generally applies to assignments, pledges, and loans made after August 13, 1982.

(b) Regulatory effective date. This section applies to assignments, pledges, and loans made on or after January 1, 2002.

(c) Loans made before the regulatory effective date--(1) General rule. A plan is permitted to apply Q&A-19 and Q&A-21 of this section to a loan made before the regulatory effective date in paragraph (b) of this Q&A-22 (and after the statutory effective date in paragraph (a) of this Q&A-22) if there has not been any deemed distribution of the loan before the transition date or if the conditions of paragraph (c)(2) of this Q&A-22 are satisfied with respect to the loan.

(2) Consistency transition rule for certain loans deemed distributed before the regulatory effective date.

(i) The rules in this paragraph (c)(2) of this Q&A-22 apply to a loan made before the regulatory effective date in paragraph (b) of this Q&A-22 (and after the statutory effective date in paragraph (a) of this Q&A-22) if there has been any deemed distribution of the loan before the transition date.

(ii) The plan is permitted to apply Q&A-19 and Q&A-21 of this section to the loan beginning on any January 1, but only if the plan reported, in Box 1 of Form 1099-R, for a taxable year no later than the latest taxable year that would be permitted under this section (if this section had been in effect for all loans made after the statutory effective date in paragraph (a) of this Q&A-22), a gross distribution of an amount at least equal to the initial default amount. For purposes of this section, the initial default amount is the amount that would be reported as a gross distribution under Q&A-4 and Q&A-10 of this section and the transition date is the January 1 on which a plan begins applying Q&A-19 and Q&A-21 of this section to a loan.

(iii) If a plan applies Q&A-19 and Q&A-21 of this section to such a loan, then the plan, in its reporting and withholding on or after the transition date, must not attribute investment in the contract (tax basis) to the participant or beneficiary based upon the initial default amount.

(iv) This paragraph (c)(2)(iv) of this Q&A-22 applies if—

(A) The plan attributed investment in the contract (tax basis) to the participant or beneficiary based on the deemed distribution of the loan;

(B) The plan subsequently made an actual distribution to the participant or beneficiary before the transition date; and

(C) Immediately before the transition date, the initial default amount (or, if less, the amount of the investment in the contract so attributed) exceeds the participant's or beneficiary's investment in the contract (tax basis). If this paragraph (c)(2)(iv) of this Q&A-22 applies, the plan must treat the excess (the loan transition amount) as a loan amount that remains outstanding and must include the excess in the participant's or beneficiary's income at the time of the first actual distribution made on or after the transition date.

(3) Examples. The rules in paragraph (c)(2) of this Q&A-22 are illustrated by the following examples, which are based on the assumptions described in the introductory text of this section (and, except as specifically provided in the examples, also assume that no distributions are made to the participant and that the participant has no investment in the contract with respect to the plan). Example 1, Example 2, and Example 4 of this paragraph (c)(3) of this Q&A-22 illustrate the

application of the rules in paragraph (c)(2) of this Q&A-22 to a plan that, before the transition date, did not treat interest accruing after the initial deemed distribution as resulting in additional deemed distributions under section 72(p). Example 3 of this paragraph (c)(3) of this Q&A-22 illustrates the application of the rules in paragraph (c)(2) of this Q&A-22 to a plan that, before the transition date, treated interest accruing after the initial deemed distribution as resulting in additional deemed distributions under section 72(p). The examples are as follows:

Example 1. (i) In 1998, when a participant's account balance under a plan is $50,000, the participant receives a loan from the plan. The participant makes the required repayments until 1999 when there is a deemed distribution of $20,000 as a result of a failure to repay the loan. For 1999, as a result of the deemed distribution, the plan reports, in Box 1 of Form 1099-R, a gross distribution of $20,000 (which is the initial default amount in accordance with paragraph (c)(2)(ii) of this Q&A-22) and, in Box 2 of Form 1099-R, a taxable amount of $20,000. The plan then records an increase in the participant's tax basis for the same amount ($20,000). Thereafter, the plan disregards, for purposes of section 72, the interest that accrues on the loan after the 1999 deemed distribution. Thus, as of December 31, 2001, the total taxable amount reported by the plan as a result of the deemed distribution is $20,000 and the plan's records show that the participant's tax basis is the same amount ($20,000). As of January 1, 2002, the plan decides to apply Q&A-19 of this section to the loan. Accordingly, it reduces the participant's tax basis by the initial default amount of $20,000, so that the participant's remaining tax basis in the plan is zero. Thereafter, the amount of the outstanding loan is not treated as part of the account balance for purposes of section 72. The participant attains age 59\1/2\ in the year 2003 and receives a distribution of the full account balance under the plan consisting of $60,000 in cash and the loan receivable. At that time, the plan's records reflect an offset of the loan amount against the loan receivable in the participant's account and a distribution of $60,000 in cash.

(ii) For the year 2003, the plan must report a gross distribution of $60,000 in Box 1 of Form 1099-R and a taxable amount of $60,000 in Box 2 of Form 1099-R.

Example 2. (i) The facts are the same as in Example 1, except that in 1999, immediately prior to the deemed distribution, the participant's account balance under the plan totals $50,000 and the participant's tax basis is $10,000. For 1999, the plan reports, in Box 1 of Form 1099-R, a gross distribution of $20,000 (which is the initial default amount in accordance with paragraph (c)(2)(ii) of this Q&A-22) and reports, in Box 2 of Form 1099-R, a taxable amount of $16,000 (the $20,000 deemed distribution minus $4,000 of tax basis ($10,000 times ($20,000/$50,000)) allocated to the deemed distribution). The plan then records an increase in tax basis equal to the $20,000 deemed distribution, so that the participant's remaining tax basis as of December 31, 1999, totals $26,000 ($10,000 minus $4,000 plus $20,000). Thereafter, the plan disregards, for purposes of section 72, the interest that accrues on the loan after the 1999 deemed distribution. Thus, as of December 31, 2001, the total taxable amount reported by the plan as a result of the deemed distribution is $16,000 and the plan's records show that the participant's tax basis is $26,000. As of January 1, 2002, the plan decides to apply Q&A-19 of this section to the loan. Accordingly, it reduces the participant's tax basis by the initial default amount of $20,000, so that the participant's remaining tax basis in the plan is $6,000. Thereafter, the amount of the outstanding loan is not treated as part of the account balance for purposes of section 72. The participant attains age 59\1/2\ in the year 2003 and receives a distribution of the full account balance under the plan consisting of $60,000 in cash and the loan receivable. At that time, the plan's records reflect an offset of the loan amount against the loan receivable in the participant's account and a distribution of $60,000 in cash.

(ii) For the year 2003, the plan must report a gross distribution of $60,000 in Box 1 of Form 1099-R and a taxable amount of $54,000 in Box 2 of Form 1099-R.

Example 3. (i) In 1993, when a participant's account balance in a plan is $100,000, the participant receives a loan of $50,000 from the plan. The participant makes the required loan repayments until 1995 when there is a deemed distribution of $28,919 as a result of a failure to repay the loan. For 1995, as a result of the deemed distribution, the plan reports, in Box 1 of Form 1099-R, a gross distribution of $28,919 (which is the initial default amount in accordance with paragraph (c)(2)(ii) of this Q&A-22) and, in Box 2 of Form 1099-R, a taxable amount of $28,919. For 1995, the plan also records an increase in the participant's tax basis for the same amount ($28,919). Each year thereafter through 2001, the plan reports a gross distribution equal to the interest accruing that year on the loan balance, reports a taxable amount equal to the interest accruing that year on the loan balance reduced by the participant's tax basis allocated to the gross distribution, and records a net increase in the participant's tax basis equal to that taxable amount. As of December 31, 2001, the taxable amount reported by the plan as a

result of the loan totals $44,329 and the plan's records for purposes of section 72 show that the participant's tax basis totals the same amount ($44,329). As of January 1, 2002, the plan decides to apply Q&A-19 of this section. Accordingly, it reduces the participant's tax basis by the initial default amount of $28,919, so that the participant's remaining tax basis in the plan is $15,410 ($44,329 minus $28,919). Thereafter, the amount of the outstanding loan is not treated as part of the account balance for purposes of section 72. The participant attains age 59\1/2\ in the year 2003 and receives a distribution of the full account balance under the plan consisting of $180,000 in cash and the loan receivable equal to the $28,919 outstanding loan amount in 1995 plus interest accrued thereafter to the payment date in 2003. At that time, the plan's records reflect an offset of the loan amount against the loan receivable in the participant's account and a distribution of $180,000 in cash.

(ii) For the year 2003, the plan must report a gross distribution of $180,000 in Box 1 of Form 1099-R and a taxable amount of $164,590 in Box 2 of Form 1099-R ($180,000 minus the remaining tax basis of $15,410).

Example 4. (i) The facts are the same as in Example 1, except that in 2000, after the deemed distribution, the participant receives a $10,000 hardship distribution. At the time of the hardship distribution, the participant's account balance under the plan totals $50,000. For 2000, the plan reports, in Box 1 of Form 1099-R, a gross distribution of $10,000 and, in Box 2 of Form 1099-R, a taxable amount of $6,000 (the $10,000 actual distribution minus $4,000 of tax basis ($10,000 times ($20,000/$50,000)) allocated to this actual distribution). The plan then records a decrease in tax basis equal to $4,000, so that the participant's remaining tax basis as of December 31, 2000, totals $16,000 ($20,000 minus $4,000). After 1999, the plan disregards, for purposes of section 72, the interest that accrues on the loan after the 1999 deemed distribution. Thus, as of December 31, 2001, the total taxable amount reported by the plan as a result of the deemed distribution plus the 2000 actual distribution is $26,000 and the plan's records show that the participant's tax basis is $16,000. As of January 1, 2002, the plan decides to apply Q&A-19 of this section to the loan. Accordingly, it reduces the participant's tax basis by the initial default amount of $20,000, so that the participant's remaining tax basis in the plan is reduced from $16,000 to zero. However, because the $20,000 initial default amount exceeds $16,000, the plan records a loan transition amount of $4,000 ($20,000 minus $16,000). Thereafter, the amount of the outstanding loan, other than the $4,000 loan transition amount, is not treated as part of the account balance for purposes of section 72. The participant attains age 59\1/2\ in the year 2003 and receives a distribution of the full account balance under the plan consisting of $60,000 in cash and the loan receivable. At that time, the plan's records reflect an offset of the loan amount against the loan receivable in the participant's account and a distribution of $60,000 in cash.

(ii) In accordance with paragraph (c)(2)(iv) of this Q&A-22, the plan must report in Box 1 of Form 1099-R a gross distribution of $64,000 and in Box 2 of Form 1099-R a taxable amount for the participant for the year 2003 equal to $64,000 (the sum of the $60,000 paid in the year 2003 plus $4,000 as the loan transition amount).

Internal Revenue Code

Section 408(h)

26 USC 408(h)

Custodial Accounts

For purposes of this section, a custodial account shall be treated as a trust if the assets of such account are held by a bank (as defined in subsection (n)) or another person who demonstrates, to the satisfaction of the Secretary, that the manner in which he will administer the account will be consistent with the requirements of this section, and if the custodial account would, except for the fact that it is not a trust, constitute an individual retirement account described in subsection (a). For purposes of this title, in the case of a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account shall be treated as the trustee thereof.

Internal Revenue Code

Section 408(m)

26 USC 408(m)

Investments in Collectibles Treated as Distributions

As Amended through 1988 (P.L. 100-647)

> Editor's Note: Also see PTE 91-55, which permits IRA accounts to hold US *American Eagle* gold coins.

- In general. The acquisition by an individual retirement account or by an individually-directed account under a plan described in section 401(a) of any collectible shall be treated (for purposes of this section and section 402) as a distribution from such account in an amount equal to the cost to such account of such collectible.
- Collectible defined. For purposes of this subsection, the term "collectible" means --

  A. Any work of art,
  B. Any rug or antique,
  C. Any metal or gem,
  D. Any stamp or coin,
  E. Any alcoholic beverage, or
  F. Any other tangible personal property specified by the Secretary for purposes of this subsection.

- Exception for Certain Coins. In the case of an individual retirement account, paragraph (2) shall not apply to any gold coin described in paragraph (7), (8), (9), or (10) of Section 5112(A) of Title 31 or any silver coin described in Section 5112(e) of Title 31.

Internal Revenue Code

Section 408(q)

26 USC 408(q)

Deemed Individual Retirement Accounts

(q) Deemed IRAs under qualified employer plans

(1) General rule
If -

> (A) a qualified employer plan elects to allow employees to make voluntary employee contributions to a separate account or annuity established under the plan, and
>
> (B) under the terms of the qualified employer plan, such account or annuity meets the applicable requirements of this section or section 408A for an individual retirement account or annuity, then such account or annuity shall be treated for purposes of this title in the same manner as an individual retirement plan and not as a qualified employer plan (and contributions to such account or annuity as contributions to an individual retirement plan and not to the qualified employer plan). For purposes of subparagraph (B), the requirements of subsection (a)(5) shall not apply.

(2) Special rules for qualified employer plans
For purposes of this title, a qualified employer plan shall not fail to meet any requirement of this title solely by reason of establishing and maintaining a program described in paragraph (1).

(3) Definitions
For purposes of this subsection -
(A) Qualified employer plan
The term "qualified employer plan" has the meaning given such term by section 72(p)(4); except such term shall not include a government plan which is not a qualified plan unless the plan is an eligible deferred compensation plan (as defined in section 457(b)).
(B) Voluntary employee contribution
The term "voluntary employee contribution" means any contribution (other than a mandatory contribution within the meaning of section 411(c)(2)(C)) -
(i) which is made by an individual as an employee under a qualified employer plan which allows employees to elect to make contributions described in paragraph (1), and
(ii) with respect to which the individual has designated the contribution as a contribution to which this subsection applies.

Internal Revenue Code

Section 409(e)

26 USC 409(e)

Qualifications for Tax Credit ESOPs – Voting Rights

As Amended through 1997 (P.L. 105-34)

(e) Voting rights

1. In general

   A plan meets the requirements of this subsection if it meets the requirements of paragraph (2) or (3), whichever is applicable.

2. Requirements where employer has a registration-type class of securities

   If the employer has a registration-type class of securities, the plan meets the requirements of this paragraph only if each participant or beneficiary in the plan is entitled to direct the plan as to the manner in which securities of the employer which are entitled to vote and are allocated to the account of such participant or beneficiary are to be voted.

3. Requirement for other employers

   If the employer does not have a registration-type class of securities, the plan meets the requirements of this paragraph only if each participant or beneficiary in the plan is entitled to direct the plan as to the manner in which voting rights under securities of the employer which are allocated to the account of such participant or beneficiary are to be exercised with respect to any corporate matter which involves the voting of such shares with respect to the approval or disapproval of any corporate merger or consolidation, recapitalization, reclassification, liquidation, dissolution, sale of substantially all assets of a trade or business, or such similar transaction as the Secretary may prescribe in regulations.

4. Registration-type class of securities defined

   For purposes of this subsection, the term, "registration-type class of securities" means -

   A. a class of securities required to be registered under section 12 of the Securities Exchange Act of 1934, and
   B. a class of securities which would be required to be so registered except for the exemption from registration provided in subsection (g)(2)(H) of such section 12.

5. 1 vote per participant
   A plan meets the requirements of paragraph (3) with respect to an issue if -
   A. the plan permits each participant 1 vote with respect to such issue, and
   B. the trustee votes the shares held by the plan in the proportion determined after application of subparagraph (A).

Internal Revenue Code

Section 417

26 USC 417

Special Rules for Survivor Annuity Requirements

Section. 417. Definitions and special rules for purposes of minimum survivor annuity requirements

(a) Election to waive qualified joint and survivor annuity or qualified preretirement survivor annuity

(1) In general

A plan meets the requirements of section 401(a)(11) only if –

(A) under the plan, each participant -

(i) may elect at any time during the applicable election period to waive the qualified joint and survivor annuity form of benefit or the qualified preretirement survivor annuity form of benefit (or both), and
(ii) may revoke any such election at any time during the applicable election period, and

(B) the plan meets the requirements of paragraphs (2), (3), and (4) of this subsection.

(2) Spouse must consent to election

Each plan shall provide that an election under paragraph (1)(A)(i) shall not take effect unless -

(A) (i) the spouse of the participant consents in writing to such election, (ii) such election designates a beneficiary (or a form of benefits) which may not be changed without spousal consent (or the consent of the spouse expressly permits designations by the participant without any requirement of further consent by the spouse), and (iii) the spouse's consent acknowledges the effect of such election and is witnessed by a plan representative or a notary public, or

(B) it is established to the satisfaction of a plan representative that the consent required under subparagraph (A) may not be obtained because there is no spouse, because the spouse cannot be located, or because of such other circumstances as the Secretary may by regulations prescribe.

Any consent by a spouse (or establishment that the consent of a spouse may not be obtained) under the preceding sentence shall be effective only with respect to such spouse.

(3) Plan to provide written explanations

(A) Explanation of joint and survivor annuity
Each plan shall provide to each participant, within a reasonable period of time before the annuity starting date (and consistent with such regulations as the Secretary may prescribe), a written explanation of -

(i) the terms and conditions of the qualified joint and survivor annuity,
(ii) the participant's right to make, and the effect of, an election under paragraph (1) to waive the joint and survivor annuity form of benefit,
(iii) the rights of the participant's spouse under paragraph (2), and
(iv) the right to make, and the effect of, a revocation of an election under paragraph (1).

(B) Explanation of qualified preretirement survivor annuity

(i) In general
Each plan shall provide to each participant, within the applicable period with respect to such participant (and consistent with such regulations as the Secretary may prescribe), a written explanation with respect to the qualified preretirement survivor annuity comparable to

that required under subparagraph (A).
(ii) Applicable period
For purposes of clause (i), the term "applicable period" means, with respect to a participant, whichever of the following periods ends last:

(I) The period beginning with the first day of the plan year in which the participant attains age 32 and ending with the close of the plan year preceding the plan year in which the participant attains age 35.
(II) A reasonable period after the individual becomes a participant.
(III) A reasonable period ending after paragraph (5) ceases to apply to the participant.
(IV) A reasonable period ending after section 401(a)(11) applies to the participant.

In the case of a participant who separates from service before attaining age 35, the applicable period shall be a reasonable period after separation.

(4) Requirement of spousal consent for using plan assets as security for loans

Each plan shall provide that, if section 401(a)(11) applies to a participant when part or all of the participant's accrued benefit is to be used as security for a loan, no portion of the participant's accrued benefit may be used as security for such loan unless -

(A) the spouse of the participant (if any) consents in writing to such use during the 90-day period ending on the date on which the loan is to be so secured, and
(B) requirements comparable to the requirements of paragraph (2) are met with respect to such consent.

(5) Special rules where plan fully subsidizes costs

(A) In general
The requirements of this subsection shall not apply with respect to the qualified joint and survivor annuity form of benefit or the qualified preretirement survivor annuity form of benefit, as the case may be, if such benefit may not be waived (or another beneficiary selected) and if the plan fully subsidizes the costs of such benefit.
(B) Definition
For purposes of subparagraph (A), a plan fully subsidizes the costs of a benefit if under the plan the failure to waive such benefit by a participant would not result in a decrease in any plan benefits with respect to such participant and would not result in increased contributions from such participant.

(6) Applicable election period defined

For purposes of this subsection, the term "applicable election period" means -

(A) in the case of an election to waive the qualified joint and survivor annuity form of benefit, the 90-day period ending on the annuity starting date, or
(B) in the case of an election to waive the qualified preretirement survivor annuity, the period which begins on the first day of the plan year in which the participant attains age 35 and ends on the date of the participant's death.

In the case of a participant who is separated from service, the applicable election period under subparagraph (B) with respect to benefits accrued before the date of such separation from service shall not begin later than such date.

(7) Special rules relating to time for written explanation

Notwithstanding any other provision of this subsection -

(A) Explanation may be provided after annuity starting date

(i) In general
A plan may provide the written explanation described in paragraph (3)(A) after the annuity starting date. In any case to which this subparagraph applies, the applicable election period under paragraph (6) shall not end before the 30th day after the date on which such explanation is provided.
(ii) Regulatory authority
The Secretary may by regulations limit the application of clause (i), except that such regulations may not limit the period of time by which the annuity starting date precedes the provision of the written explanation other than by providing that the annuity starting date may not be earlier than termination of employment.

(B) Waiver of 30-day period
A plan may permit a participant to elect (with any applicable spousal consent) to waive any requirement that the written explanation be provided at least 30 days before the annuity starting date (or to waive the 30-day requirement under subparagraph (A)) if the distribution commences more than 7 days after such explanation is provided.

(b) Definition of qualified joint and survivor annuity

For purposes of this section and section 401(a)(11), the term "qualified joint and survivor annuity" means an annuity -

(1) for the life of the participant with a survivor annuity for the life of the spouse which is not less than 50 percent of (and is not greater than 100 percent of) the amount of the annuity which is payable during the joint lives of the participant and the spouse, and
(2) which is the actuarial equivalent of a single annuity for the life of the participant.

Such term also includes any annuity in a form having the effect of an annuity described in the preceding sentence.

(c) Definition of qualified preretirement survivor annuity

For purposes of this section and section 401(a)(11) -

(1) In general
Except as provided in paragraph (2), the term "qualified preretirement survivor annuity" means a survivor annuity for the life of the surviving spouse of the participant if -

(A) the payments to the surviving spouse under such annuity are not less than the amounts which would be payable as a survivor annuity under the qualified joint and survivor annuity under the plan (or the actuarial equivalent thereof) if -

(i) in the case of a participant who dies after the date on which the participant attained the earliest retirement

age, such participant had retired with an immediate qualified joint and survivor annuity on the day before the participant's date of death, or
(ii) in the case of a participant who dies on or before the date on which the participant would have attained the earliest retirement age, such participant had -

(I) separated from service on the date of death,
(II) survived to the earliest retirement age,
(III) retired with an immediate qualified joint and survivor annuity at the earliest retirement age, and
(IV) died on the day after the day on which such participant would have attained the earliest retirement age, and

(B) under the plan, the earliest period for which the surviving spouse may receive a payment under such annuity is not later than the month in which the participant would have attained the earliest retirement age under the plan.

In the case of an individual who separated from service before the date of such individual's death, subparagraph (A)(ii)(I) shall not apply.

(2) Special rule for defined contribution plans
In the case of any defined contribution plan or participant described in clause (ii) or (iii) of section 401(a)(11)(B), the term ''qualified preretirement survivor annuity'' means an annuity for the life of the surviving spouse the actuarial equivalent of which is not less than 50 percent of the portion of the account balance of the participant (as of the date of death) to which the participant had a nonforfeitable right (within the meaning of section 411(a)).

(3) Security interests taken into account
For purposes of paragraphs (1) and (2), any security interest held by the plan by reason of a loan outstanding to the participant shall be taken into account in determining the amount of the qualified preretirement survivor annuity.

(d) Survivor annuities need not be provided if participant and spouse married less than 1 year

(1) In general
Except as provided in paragraph (2), a plan shall not be treated as failing to meet the requirements of section 401(a)(11) merely because the plan provides that a qualified joint and survivor annuity (or a qualified preretirement survivor annuity) will not be provided unless the participant and spouse had been married throughout the 1-year period ending on the earlier of -

(A) the participant's annuity starting date, or
(B) the date of the participant's death.

(2) Treatment of certain marriages within 1 year of annuity starting date for purposes of qualified joint and survivor annuities
For purposes of paragraph (1), if -

(A) a participant marries within 1 year before the annuity starting date, and
(B) the participant and the participant's spouse in such marriage have been married for at least a 1-year period ending on or before the date of the participant's death, such participant and such spouse shall be treated as having been married throughout the 1-year period ending on the participant's annuity starting date.

(e) Restrictions on cash-outs

(1) Plan may require distribution if present value not in excess of dollar limit
A plan may provide that the present value of a qualified joint and survivor annuity or a qualified preretirement survivor annuity will be immediately distributed if such value does not exceed the dollar limit under section 411(a)(11)(A). No distribution may be made under the preceding sentence after the annuity starting date unless the participant and the spouse of the participant (or where the participant has died, the surviving spouse) consents in writing to such distribution.

(2) Plan may distribute benefit in excess of dollar limit only with consent If -

(A) the present value of the qualified joint and survivor annuity or the qualified preretirement survivor annuity exceeds the dollar limit under section 411(a)(11)(A), and
(B) the participant and the spouse of the participant (or where the participant has died, the surviving spouse) consent in writing to the distribution, the plan may immediately distribute the present value of such annuity.

(3) Determination of present value

(A) In general

(i) Present value
Except as provided in subparagraph (B), for purposes of paragraphs (1) and (2), the present value shall not be less than the present value calculated by using the applicable mortality table and the applicable interest rate.
(ii) Definitions
For purposes of clause (i) -

(I) Applicable mortality table
The term "applicable mortality table" means the table prescribed by the Secretary. Such table shall be based on the prevailing commissioners' standard table (described in section 807(d)(5)(A)) used to determine reserves for group annuity contracts issued on the date as of which present value is being determined (without regard to any other subparagraph of section 807(d)(5)).
(II) Applicable interest rate
The term "applicable interest rate" means the annual rate of interest on 30-year Treasury securities for the month before the date of distribution or such other time as the Secretary may by regulations prescribe.

(B) Exception
In the case of a distribution from a plan that was adopted and in effect before the date of the enactment of the Retirement Protection Act of 1994, the present value of any distribution made before the earlier of -

(i) the later of the date a plan amendment applying subparagraph (A) is adopted or made effective, or
(ii) the first day of the first plan year beginning after December 31, 1999, shall be calculated, for purposes of paragraphs (1) and (2), using the interest rate

determined under the regulations of the Pension Benefit Guaranty Corporation for determining the present value of a lump sum distribution on plan termination that were in effect on September 1, 1993, and using the provisions of the plan as in effect on the day before such date of enactment; but only if such provisions of the plan met the requirements of section 417(e)(3) as in effect on the day before such date of enactment.

(f) Other definitions and special rules

For purposes of this section and section 401(a)(11) -

(1) Vested participant
The term "vested participant" means any participant who has a nonforfeitable right (within the meaning of section 411(a)) to any portion of such participant's accrued benefit.
(2) Annuity starting date

(A) In general
The term "annuity starting date" means -

(i) the first day of the first period for which an amount is payable as an annuity, or
(ii) in the case of a benefit not payable in the form of an annuity, the first day on which all events have occurred which entitle the participant to such benefit.

(B) Special rule for disability benefits
For purposes of subparagraph (A), the first day of the first period for which a benefit is to be received by reason of disability shall be treated as the annuity starting date only if such benefit is not an auxiliary benefit.

(3) Earliest retirement age
The term "earliest retirement age" means the earliest date on which, under the plan, the participant could elect to receive retirement benefits.

(4) Plan may take into account increased costs
A plan may take into account in any equitable manner (as determined by the Secretary) any increased costs resulting from providing a qualified joint or survivor annuity or a qualified preretirement survivor annuity.

(5) Distributions by reason of security interests
If the use of any participant's accrued benefit (or any portion thereof) as security for a loan meets the requirements of subsection (a)(4), nothing in this section or section 411(a)(11) shall prevent any distribution required by reason of a failure to comply with the terms of such loan.

(6) Requirements for certain spousal consents
No consent of a spouse shall be effective for purposes of subsection (e)(1) or (e)(2) (as the case may be) unless requirements comparable to the requirements for spousal consent to an election under subsection (a)(1)(A) are met.

(7) Consultation with the Secretary of Labor
In prescribing regulations under this section and section 401(a)(11), the Secretary shall consult with the Secretary of Labor.

Internal Revenue Code

Section 4975

26 USC 4975

Tax on Prohibited Transactions

As Amended through July 22, 1998 (P.L. 105-206)

(a) Initial taxes on disqualified person

There is hereby imposed a tax on each prohibited transaction.
The rate of tax shall be equal to 15 percent of the amount involved with respect to the prohibited transaction for each year (or part thereof) in the taxable period. The tax imposed by this subsection shall be paid by any disqualified person who participates in the prohibited transaction (other than a fiduciary acting only as such).

(b) Additional taxes on disqualified person

In any case in which an initial tax is imposed by subsection (a) on a prohibited transaction and the transaction is not corrected within the taxable period, there is hereby imposed a tax equal to 100 percent of the amount involved. The tax imposed by this subsection shall be paid by any disqualified person who participated in the prohibited transaction (other than a fiduciary acting only as such).

(c) Prohibited transaction

(1) General rule

For purposes of this section, the term "prohibited transaction" means any direct or indirect -

(A) sale or exchange, or leasing, of any property between a plan and a disqualified person;

(B) lending of money or other extension of credit between a plan and a disqualified person;

(C) furnishing of goods, services, or facilities between a plan and a disqualified person;

(D) transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a plan;

(E) act by a disqualified person who is a fiduciary whereby he deals with the income or assets of a plan in his own interests or for his own account; or

(F) receipt of any consideration for his own personal account by any disqualified person who is a fiduciary from any party dealing with the plan in connection with a transaction involving the income or assets of the plan.

(2) Special exemption

The Secretary shall establish an exemption procedure for purposes of this subsection. Pursuant to such procedure, he may grant a conditional or unconditional exemption of any disqualified person or transaction, orders of disqualified persons or transactions, from all or part of the restrictions imposed by paragraph (1) of this subsection. Action under this subparagraph may be taken only after consultation and coordination with the Secretary of Labor. The Secretary may not grant an exemption under this paragraph unless he finds that such exemption is –

(A) administratively feasible,

(B) in the interests of the plan and of its participants and beneficiaries, and

(C) protective of the rights of participants and beneficiaries of the plan.
Before granting an exemption under this paragraph, the Secretary shall require adequate notice to be given to interested persons and shall publish notice in the Federal Register of the pendency of such exemption and shall afford interested persons an opportunity to present views. No exemption may be granted under this paragraph with respect to a transaction described in subparagraph (E) or (F) of paragraph (1) unless the Secretary affords an opportunity for a hearing and makes a determination on the record with respect to the findings required under subparagraphs (A), (B), and (C) of this paragraph, except that in lieu of such hearing the Secretary may accept any record made by the Secretary of Labor with respect to an application for exemption under section 408(a) of title I of the Employee Retirement Income Security Act of 1974.

(3) Special rule for individual retirement accounts

An individual for whose benefit an individual retirement account is established and his beneficiaries shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if, with respect to such transaction, the account ceases to be an individual retirement account by reason of the application of section 408(e)(2)(A) or if section 408(e)(4) applies to such account.

(4) Special rule for medical savings accounts

An individual for whose benefit a medical savings account (within the meaning of section 220(d)) is established shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if section 220(e)(2) applies to such transaction.

(5) Special rule for education individual retirement accounts

An individual for whose benefit an education individual retirement account is established and any contributor to such account shall be exempt from the tax imposed by this section with respect to any transaction concerning such account (which would otherwise be taxable under this section) if section 530(d) applies with respect to such transaction.

(d) Exemptions
Except as provided in subsection (f)(6), the prohibitions provided in subsection (c) shall not apply to -

(1) any loan made by the plan to a disqualified person who is a participant or beneficiary of the plan if such loan -

(A) is available to all such participants or beneficiaries on a reasonably equivalent basis,

(B) is not made available to highly compensated employees (within the meaning of section 414(q)) in an amount greater than the amount made available to other employees,

(C) is made in accordance with specific provisions regarding such loans set forth in the plan,

(D) bears a reasonable rate of interest, and

(E) is adequately secured;

(2) any contract, or reasonable arrangement, made with a disqualified person for office space, or

legal, accounting, or other services necessary for the establishment or operation of the plan, if no more than reasonable compensation is paid therefore;

(3) any loan to an leveraged employee stock ownership plan (as defined in subsection (e)(7)), if-

(A) such loan is primarily for the benefit of participants and beneficiaries of the plan, and

(B) such loan is at a reasonable rate of interest, and any collateral which is given to a disqualified person by the plan consists only of qualifying employer securities (as defined in subsection (e)(8));

(4) the investment of all or part of a plan's assets in deposits which bear a reasonable interest rate in a bank or similar financial institution supervised by the United States or a State, if such bank or other institution is a fiduciary of such plan and if -

(A) the plan covers only employees of such bank or other institution and employees of affiliates of such bank or other institution, or

(B) such investment is expressly authorized by a provision of the plan or by a fiduciary (other than such bank or institution or affiliates thereof) who is expressly empowered by the plan to so instruct the trustee with respect to such investment;

(5) any contract for life insurance, health insurance, or annuities with one or more insurers which are qualified to do business in a State if the plan pays no more than adequate consideration, and if each such insurer or insurers is -

(A) he employer maintaining the plan, or

(B) a disqualified person which is wholly owned (directly or indirectly) by the employer establishing the plan, or by any person which is a disqualified person with respect to the plan, but only if the total premiums and annuity considerations written by such insurers for life insurance, health insurance, or annuities for all plans (and their employers) with respect to which such insurers are disqualified persons (not including premiums or annuity considerations written by the employer maintaining the plan) do not exceed 5 percent of the total premiums and annuity considerations written for all lines of insurance in that year by such insurers (not including premiums or annuity considerations written by the employer maintaining the plan);

(6) the provision of any ancillary service by a bank or similar financial institution supervised by the United States or a State, if such service is provided at not more than reasonable compensation, if such bank or other institution is a fiduciary of such plan, and if -

(A) such bank or similar financial institution has adopted adequate internal safeguards which assure that the provision of such ancillary service is consistent with sound banking and financial practice, as determined by Federal or State supervisory authority, and

(B) the extent to which such ancillary service is provided is subject to specific guidelines issued by such bank or similar financial institution (as determined by the Secretary after consultation with Federal and State supervisory authority), and under such guidelines the bank or similar financial institution does not provide such ancillary service -

(i) in an excessive or unreasonable manner, and

(ii) in a manner that would be inconsistent with the best interests of participants and beneficiaries of employee benefit plans;

(7) the exercise of a privilege to convert securities, to the extent provided in regulations of the Secretary but only if the plan receives no less than adequate consideration pursuant to such conversion;

(8) any transaction between a plan and a common or collective trust fund or pooled investment fund maintained by a disqualified person which is a bank or trust company supervised by a State or Federal agency or between a plan and a pooled investment fund of an insurance company qualified to do business in a State if –

(A) the transaction is a sale or purchase of an interest in the fund,

(B) the bank, trust company, or insurance company receives not more than a reasonable compensation, and

(C) such transaction is expressly permitted by the instrument under which the plan is maintained, or by a fiduciary (other than the bank, trust company, or insurance company, or an affiliate thereof) who has authority to manage and control the assets of the plan;

(9) receipt by a disqualified person of any benefit to which he may be entitled as a participant or beneficiary in the plan, so long as the benefit is computed and paid on a basis which is consistent with the terms of the plan as applied to all other participants and beneficiaries; (10) receipt by a disqualified person of any reasonable compensation for services rendered, or for the reimbursement of expenses properly and actually incurred, in the performance of his duties with the plan, but no person so serving who already receives full-time pay from an employer or an association of employers, whose employees are participants in the plan or from an employee organization whose members are participants in such plan shall receive compensation from such fund, except for reimbursement of expenses properly and actually incurred;

(10) service by a disqualified person as a fiduciary in addition to being an officer, employee, agent, or other representative of a disqualified person;

(11) the making by a fiduciary of a distribution of the assets of the trust in accordance with the terms of the plan if such assets are distributed in the same manner as provided under section 4044 of title IV of the Employee Retirement Income Security Act of 1974 (relating to allocation of assets);

(12) any transaction which is exempt from section 406 of such Act by reason of section 408(e) of such Act (or which would be so exempt if such section 406 applied to such transaction) or which is exempt from section 406 of such Act by reason of section 408(b)(12) of such Act;

(13) any transaction required or permitted under part 1 of subtitle E of title IV or section 4223 of the Employee Retirement Income Security Act of 1974, but this paragraph shall not apply with respect to the application of subsection (c)(1) (E) or (F); or

(14) a merger of multiemployer plans, or the transfer of assets or liabilities between multiemployer plans, determined by the Pension Benefit Guaranty Corporation to meet the requirements of section 4231 of such Act, but this paragraph shall not apply with respect to the application of subsection (c)(1) (E) or (F).

(e) Definitions

(1) Plan

For purposes of this section, the term "plan" means -

(A) a trust described in section 401(a) which forms a part of a plan, or a plan described in section 403(a), which trust or plan is exempt from tax under section 501(a),

(B) an individual retirement account described in section 408(a),

(C) an individual retirement annuity described in section 408(b),

(D) a medical savings account described in section 220(d),

(E) an education individual retirement account described in section 530, or

(F) a trust, plan, account, or annuity which, at any time, has been determined by the Secretary to be described in any preceding subparagraph of this paragraph.

(2) Disqualified person

For purposes of this section, the term "disqualified person" means a person who is -

(A) a fiduciary;

(B) a person providing services to the plan;

(C) an employer any of whose employees are covered by the plan;

(D) an employee organization any of whose members are covered by the plan;

(E) an owner, direct or indirect, of 50 percent or more of -

(i) he combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of a corporation,

(ii) the capital interest or the profits interest of a partnership, or

(iii) the beneficial interest of a trust or unincorporated enterprise, which is an employer or an employee organization described in subparagraph (C) or (D);

(F) a member of the family (as defined in paragraph (6)) of any individual described in subparagraph (A), (B), (C), or (E);

(G) a corporation, partnership, or trust or estate of which (or in which) 50 percent or more of -

(i) the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation,

(ii) the capital interest or profits interest of such partnership, or

(iii) the beneficial interest of such trust or estate, is owned directly or indirectly, or held by persons described in subparagraph (A), (B), (C), (D), or (E);

(H) an officer, director (or an individual having powers or responsibilities similar to those of officers or directors), a 10 percent or more shareholder, or a highly compensated employee (earning 10 percent or more of the yearly wages of an employer) of a person described in subparagraph (C), (D), (E), or (G); or

(I) a 10 percent or more (in capital or profits) partner or joint venture of a person described in subparagraph (C), (D), (E), or (G).

The Secretary, after consultation and coordination with the Secretary of Labor or his delegate, may by regulation prescribe a percentage lower than 50 percent for subparagraphs (E) and (G) and lower than 10 percent for subparagraphs (H) and (I).

(3) Fiduciary

For purposes of this section, the term "fiduciary" means any person who -

(A) exercises any discretionary authority or discretionary control respecting management of such plan or exercises any authority or control respecting management or disposition of its assets,

(B) renders investment advice for a fee or other compensation, direct or indirect, with respect to any moneys or other property of such plan, or has any authority or responsibility to do so, or

(C) has any discretionary authority or discretionary responsibility in the administration of such plan. Such term includes any person designated under section 405(c)(1)(B) of the Employee Retirement Income Security Act of 1974.

(4) Stockholdings
For purposes of paragraphs (2)(E)(i) and (G)(i) there shall be taken into account indirect stockholdings which would be taken into account under section 267(c), except that, for purposes of this paragraph, section 267(c)(4) shall be treated as providing that the members of the family of an individual are the members within the meaning of paragraph (6).

(5) Partnerships; trusts
For purposes of paragraphs (2)(E)(ii) and (iii), (G)(ii) and (iii), and (I) the ownership of profits or beneficial interests shall be determined in accordance with the rules for constructive ownership of stock provided in section 267(c) (other than paragraph (3) thereof), except that section 267(c)(4) shall be treated as providing that the members of the family of an individual are the members within the meaning of paragraph (6).

(6) Member of family
For purposes of paragraph (2)(F), the family of any individual shall include his spouse, ancestor, lineal descendant, and any spouse of a lineal descendant.

(7) Employee stock ownership plan
The term "employee stock ownership plan" means a defined contribution plan -

(A) which is a stock bonus plan which is qualified, or a stock bonus and a money purchase plan both of which are qualified under section 401(a), and which are designed to invest primarily in qualifying employer securities; and

(B) which is otherwise defined in regulations prescribed by the Secretary.

A plan shall not be treated as an employee stock ownership plan unless it meets the requirements of section 409(h), section 409(o), and, if applicable, section 409(n) and section 664(g) and, if the employer has a registration-type class of securities (as defined in section 409(e)(4)), it meets the requirements of section 409(e).

(8) Qualifying employer security
The term "qualifying employer security" means any employer security within the meaning of section 409(l). If any moneys or other property of a plan are invested in shares of an investment company registered under the Investment Company Act of 1940, the investment shall not cause that investment company or that investment company's investment adviser or principal underwriter to be treated as a fiduciary or a disqualified person for purposes of this section, except when an investment company or its investment adviser or principal underwriter acts in connection with a plan covering employees of the investment company, its investment adviser, or its principal underwriter.

(9) Section made applicable to withdrawal liability payment funds
For purposes of this section -

(A) In general

The term "plan" includes a trust described in section 501(c)(22).

(B) Disqualified person In the case of any trust to which this section applies by reason of subparagraph (A), the term "disqualified person" includes any person who is a disqualified person with respect to any plan to which such trust is permitted to make payments under section 4223 of the Employee Retirement Income Security Act of 1974.

(f) Other definitions and special rules
For purposes of this section -

(1) Joint and several liability

If more than one person is liable under subsection (a) or (b) with respect to any one prohibited transaction, all such persons shall be jointly and severally liable under such subsection with respect to such transaction.

(2) Taxable period

The term "taxable period" means, with respect to any prohibited transaction, the period beginning with the date on which the prohibited transaction occurs and ending on the earliest of -

(A) the date of mailing a notice of deficiency with respect to the tax imposed by subsection (a) under section 6212,

(B) the date on which the tax imposed by subsection (a) is assessed, or

(C) the date on which correction of the prohibited transaction is completed.

(3) Sale or exchange; encumbered property

A transfer or real or personal property by a disqualified person to a plan shall be treated as a sale or exchange if the property is subject to a mortgage or similar lien which the plan assumes or if it is subject to a mortgage or similar lien which a disqualified person placed on the property within the 10-year period ending on the date of the transfer.

(4) Amount involved

The term "amount involved" means, with respect to a prohibited transaction, the greater of the amount of money and the fair market value of the other property given or the amount of money and the fair market value of the other property received; except that, in the case of services described in paragraphs (2) and (10) of subsection (d) the amount involved shall be only the excess compensation. For purposes of the preceding sentence, the fair market value -

(A) in the case of the tax imposed by subsection (a), shall be determined as of the date on which the prohibited transaction occurs; and

(B) in the case of the tax imposed by subsection (b), shall be the highest fair market value during the taxable period.

(5) Correction

The terms "correction" and "correct" mean, with respect to a prohibited transaction, undoing the transaction to the extent possible, but in any case placing the plan in a financial position not worse than that in which it would be if the disqualified person were acting under the highest fiduciary standards.

(6) Exemptions not to apply to certain transactions

(A) In general

In the case of a trust described in section 401(a) which is part of a plan providing contributions or benefits for employees some or all of whom are owner-employees (as defined in section 401(c)(3)), the exemptions provided by subsection (d) (other than paragraphs (9) and (12)) shall not apply to a transaction in which the plan directly or indirectly -

(i) lends any part of the corpus or income of the plan to,

(ii) pays any compensation for personal services rendered to the plan to, or

(iii) acquires for the plan any property from, or sells any property to, any such owner-employee, a member of the family (as defined in section 267(c)(4)) of any such owner-employee, or any corporation in which any such owner-employee owns, directly or indirectly, 50 percent or more of the total combined voting power of all classes of stock entitled to vote or 50 percent or more of the total value of shares of all classes of stock of the corporation.

(B) Special rules for shareholder-employees, etc.

(i) In general

For purposes of subparagraph (A), the following shall be treated as owner-

employees:

(I) A shareholder-employee.

(II) A participant or beneficiary of an individual retirement plan (as defined in section 7701(a)(37)).

(III) An employer or association of employees which establishes such an individual retirement plan under section 408(c).

(ii) Exception for certain transactions involving shareholder-employees

Subparagraph (A)(iii) shall not apply to a transaction which consists of a sale of employer securities to an employee stock ownership plan (as defined in subsection (e)(7)) by a shareholder-employee, a member of the family (as defined in section 267(c)(4)) of such shareholder-employee, or a corporation in which such a shareholder-employee owns stock representing a 50 percent or greater interest described in subparagraph (A).

(C) Shareholder-employee

For purposes of subparagraph (B), the term "shareholder-employee" means an employee or officer of an S corporation who owns (or is considered as owning within the meaning of section 318(a)(1)) more than 5 percent of the outstanding stock of the corporation on any day during the taxable year of such corporation.

(g) Application of section
This section shall not apply -

(1) in the case of a plan to which a guaranteed benefit policy (as defined in section 401(b)(2)(B) of the Employee Retirement Income Security Act of 1974) is issued, to any assets of the insurance company, insurance service, or insurance organization merely because of its issuance of such policy;

(2) to a governmental plan (within the meaning of section 414(d)); or

(3) to a church plan (within the meaning of section 414(e)) with respect to which the election provided by section 410(d) has not been made.

In the case of a plan which invests in any security issued by an investment company registered under the Investment Company Act of 1940, the assets of such plan shall be deemed to include such security but shall not, by reason of such investment, be deemed to include any assets of such company.

(h) Notification of Secretary of Labor
Before sending a notice of deficiency with respect to the tax imposed by subsection (a) or (b), the Secretary shall notify the Secretary of Labor and provide him a reasonable opportunity to obtain a correction of the prohibited transaction or to comment on the imposition of such tax.

(i) Cross reference

For provisions concerning coordination procedures between Secretary of Labor and Secretary of the Treasury with respect to application of tax imposed by this section and for authority to waive imposition of the tax imposed by subsection (b), see section 3003 of the Employee Retirement Income Security Act of 1974.

Trust Examination Manual

Appendix E — Employee Benefit Law

ESOP Requirements

Originally issued September 2, 1977 (42 FR 44393)

As revised through January 9, 1979 (44 FR 1978)

a. In general -

1. Type of plan. To be an "ESOP" (employee stock ownership plan), a plan described in section 4975(e)(7)(A) must meet the requirements of this section. See section 4975(e)(7)(B).
2. Designation as ESOP. To be an ESOP, a plan must be formally designated as such in the plan document.
3. Continuing loan provisions under plan -

    i. Creation of protections and rights. The terms of an ESOP must formally provide participants with certain protections and rights with respect to plan assets acquired with the proceeds of an exempt loan. These protections and rights are those referred to in the third sentence of 54.4975-7(b)(4), relating to put, call, or other options and to buy-sell or similar arrangements, and in 54.4975-7(b)(10), (11), and (12), relating to put options.

    ii. "Nonterminable" protections and rights. The terms of an ESOP must also formally provide that these protections and rights are nonterminable. Thus, if a plan holds or has distributed securities acquired with the proceeds of an exempt loan and either the loan is repaid or the plan ceases to be an ESOP, these protections and rights must continue to exist under the terms of the plan. However, the protections and rights will not fail to be nonterminable merely because they are not exercisable under 54.4975-7(b)(11) and (12)(ii). For example, if, after a plan ceases to be an ESOP, securities acquired with the proceeds of an exempt loan cease to be publicly traded, the 15-month period prescribed by 54.4975-7(b)(11) includes the time when the securities are publicly traded.

    iii. No incorporation by reference of protections and rights. The formal requirements of paragraph (a)(3)(i) and (ii) of this section must be set forth in the plan. Mere reference to the third sentence of 54.4975-7(b)(4) and to the provisions of 54.4975-7(b)(10), (11), and (12) is not sufficient.

    iv. Certain remedial amendments. Notwithstanding the limits under paragraph (a)(4) and (10) of this section on the retroactive effect of plan amendments, a remedial plan amendment adopted before December 31, 1979, to meet the requirements of paragraph (a)(3)(i) and (ii) of this section is retroactively effective as of the later of the date on which the plan was designated as an ESOP or November 1, 1977.

4. Retroactive amendment. A plan meets the requirements of this section as of the date that it is designated as an ESOP if it is amended retroactively to meet, and in fact does meet, such requirements at any of the following times:

    i. 12 months after the date on which the plan is designated as an ESOP;

    ii. 90 days after a determination letter is issued with respect to the qualification of the plan as an ESOP under this section, but only if the determination is requested by the time in paragraph (a)(4)(i) of this section; or

    iii. A later date approved by the district director.

5. Addition to other plan. An ESOP may form a portion of a plan the balance of which includes a

qualified pension, profit-sharing, or stock bonus plan which is not an ESOP. A reference to an ESOP includes an ESOP that forms a portion of another plan.

6. Conversion of existing plan to an ESOP. If an existing pension, profit-sharing, or stock bonus plan is converted into an ESOP, the requirements of section 404 of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 877), relating to fiduciary duties, and section 401(a) of the Code, relating to requirements for plans established for the exclusive benefit of employees, apply to such conversion. A conversion may constitute a termination of an existing plan. For definition of a termination, see the regulations under section 411(d)(3) of the Code and section 4041(f) of ERISA.
7. Certain arrangements barred -
    i. Buy-sell agreements. An arrangement involving an ESOP that creates a put option must not provide for the issuance of put options other than as provided under 54.4975-7 (b)(10), (11), and (12). Also, an ESOP must not otherwise obligate itself to acquire securities from a particular security holder at an indefinite time determined upon the happening of an event such as the death of the holder.
    ii. Integrated plans. A plan designated as an ESOP after November 1, 1977, must not be integrated directly or indirectly with contributions or benefits under Title II of the Social Security Act or any other State or Federal law. ESOPs established and integrated before such date may remain integrated. However, such plans must not be amended to increase the integration level or the integration percentage. Such plans may in operation continue to increase the level of integration if under the plan such increase is limited by reference to a criterion existing apart from the plan.
8. Effect of certain ESOP Provisions on section 401(a) status -
    i. Exempt loan requirements. An ESOP will not fail to meet the requirements of section 401(a)(2) merely because it gives plan assets as collateral for an exempt loan under 54.4975-7(b)(5) or uses plan assets under 54.4975-7(b)(6) to repay an exempt loan in the event of default.
    ii. Individual annual contribution limitation. An ESOP will not fail to meet the requirements of section 401(a)(16) merely because annual additions under section 415(c) are calculated with respect to employer contributions used to repay an exempt loan rather than with respect to securities allocated to participants.
    iii. Income pass-through. An ESOP will not fail to meet the requirements of section 401(a) merely because it provides for the current payment of income under paragraph (f)(3) of this section.
9. Transitional rules for ESOPs established before November 1, 1977. A plan established before November 1, 1977, that otherwise satisfies the provisions of this section constitutes an ESOP if it is amended by December 31, 1977, to comply from November 1, 1977, with this section even though before November 1, 1977, the plan did not satisfy paragraphs (c) and (d)(2), (4), and (5) of this section.
10. Additional transitional rules. Notwithstanding paragraph (a)(9) of this section, a plan established before November 1, 1977, that otherwise satisfies the provisions of this section constitutes an ESOP if by December 31, 1977, it is amended to comply from November 1, 1977, with this section even though before such date the plan did not satisfy the following provisions of this section:
    i. Paragraph (a)(3) and (8)(iii);
    ii. The last sentence of paragraph (d)(3), and
    iii. Paragraph (f)(3). [Amended by T. D. 7571 on November 16, 1978, 43 FR 53718.]

b. Plan designed to invest primarily in qualifying employer securities. A plan constitutes an ESOP only if the plan specifically states that it is designed to invest primarily in qualifying employer securities. Thus, a stock bonus plan or a money purchase pension plan constituting an ESOP may invest part of its assets in other than qualifying employer securities. Such plan will be treated the same as other stock bonus plans or money purchase pension plans qualified under section 401(a) with respect to those investments.
c. Suspense Account. All assets acquired by an ESOP with the proceeds of an exempt loan under section 4975(d)(3) must be added to and maintained in a suspense account. They are to be withdrawn from the suspense account by applying 54.4975-7(b)(8) and (15) as if all securities in the suspense

account were encumbered. Such assets acquired before November 1, 1977, must be withdrawn by applying 54.4975-7(b)(8) or the provision of the loan that controls release from encumbrance. Assets in such suspense accounts are assets of the ESOP. Thus, for example, such assets are subject to section 401(a)(2).

d. Allocations to accounts of participants -

1. In general. Except as provided in this section, amounts contributed to an ESOP must be allocated as provided under 1.401-1(b)(ii) and (iii) of this chapter, and securities acquired by an ESOP must be accounted for as provided under 1.402(a)-1(b)(2)(ii) of this chapter.
2. Assets withdrawn from suspense account. As of the end of each plan year, the ESOP must consistently allocate to the participants' accounts non-monetary units representing participants' interests in assets withdrawn from the suspense account.
3. Income. Income with respect to securities acquired with the proceeds of an exempt loan must be allocated as income of the plan except to the extent that the ESOP provides for the use of income from such securities to repay the loan. Certain income may be distributed currently under paragraph (f)(3) of this section.
4. Forfeitures. If a portion of a participant's account is forfeited, qualifying employer securities allocated under paragraph (d)(2) of this section must be forfeited only after other assets. If interests in more than one class of qualifying employer securities have been allocated to the participant's account, the participant must be treated as forfeiting the same proportion of each such class.
5. Valuation. For purposes of 54.4975-7(b)(9) and (12) and this section, valuations must be made in good faith and based on all relevant factors for determining the fair market value of securities. In the case of a transaction between a plan and a disqualified person, value must be determined as of the date of the transaction. For all other purposes under this subparagraph (5), value must be determined as of the most recent valuation date under the plan. An independent appraisal will not in itself be a good faith determination of value in the case of a transaction between a plan and a disqualified person. However, in other cases, a determination of fair market value based on at least an annual appraisal independently arrived at by a person who customarily makes such appraisals and who is independent of any party to a transaction under 54.4975-7(b)(9) and (12) will be deemed to be a good faith determination of value. [Amended by T.D. 7571 on November 16, 1978, 43 FR 53718.]

e. Multiple plans -

1. General rule. An ESOP may not be considered together with another plan for purposes of applying section 401(a)(4) and (5) or section 410(b) unless-

    i. The ESOP and such other plan exist on November 1, 1977; or
    ii. Paragraph (e)(2) of this section is satisfied.

2. Special rule for combined ESOPs. Two or more ESOPs, one or more of which does not exist on November 1, 1977, may be considered together for purposes of applying section 401(a)(4) and (5) or section 410(b) only if the proportion of qualifying employer securities to total plan assets is substantially the same for each ESOP and-

    i. The qualifying employer securities held by all ESOPs are all of the same class; or
    ii. The ratios of each class held to all such securities held is substantially the same for each plan.

3. Amended coverage, contribution, or benefit structure. For purposes of paragraph (e)(1)(i) of this section, if the coverage, contribution, or benefit structure of a plan that exists on November 1, 1977, is amended after that date, as of the effective date of the amendment, the plan is no longer considered to be a plan that exists on November 1, 1977. [Amended by T.D. 7571 on November 16, 1978, 43 FR 53718.]

f. Distribution -

1. In general. Except as provided in paragraph (f)(2) and (3) of this section, with respect to distributions, a portion of an ESOP consisting of a stock bonus plan or a money purchase pension plan is not to be distinguished from other such plans under section 401(a). Thus, for example, benefits distributable from the portion of an ESOP consisting of a stock bonus plan are distributable only in stock of the employer. Also, benefits distributable from the money-purchase portion of the ESOP may be, but are not required to be, distributable in qualifying employer

securities.

2. Exempt loan proceeds. If securities acquired with the proceeds of an exempt loan available for distribution consist of more than one class, a distributee must receive substantially the same proportion of each such class. However, as indicated in paragraph (f)(1) of this section, benefits distributable from the portion of an ESOP consisting of a stock bonus plan are distributable only in stock of the employer.
3. Income. Income paid with respect to qualifying employer securities acquired by an ESOP in taxable years beginning after December 31, 1974, may be distributed at any time after receipt by the plan to participants on whose behalf such securities have been allocated. However, under an ESOP that is a stock bonus plan, income held by the plan for a 2-year period or longer must be distributed under the general rules described in paragraph (f)(1) of this section. (See the last sentence of section 803(h), Tax Reform Act of 1976.) [Reg 54.4975-11 added by T. D. 7506 on August 30, 1977; amended by T. D. 7571 on November 16, 1978, 43 FR 53718.]

Internal Revenue Service

Regulation 54.4975-12

26 C.F.R. 54.4975-12

Qualifying Employer Security Defined

Originally Issued September 2, 1977 (42 FR 44394)

a. In general. For purposes of section 4975(e)(8) and this section, the term "qualifying employer security" means an employer security which is -

    1. Stock or otherwise an equity security, or
    2. A bond, debenture, note, or certificate or other evidence of indebtedness which is described in paragraphs (1), (2), and (3) of section 503(e).

b. Special rule. In determining whether a bond, debenture, note, or certificate or other evidence of indebtedness is described in paragraphs (1), (2), and (3) of section 503(e), any organization described in section 401(a) shall be treated as an organization subject to the provisions of section 503. [Reg. 54.4975-12 added August 30, 1977, by T. D. 7506.]

Department of Labor

Pension and Welfare Benefits Administration Regulation

Regulation 2510.3-101

29 C.F.R. 2510.3-101.

"Plan Assets" Defined

Originally issued November 13, 1986 (51 FR 41280)

Subsection (e) amended for a technical correction December 31, 1986 (51 FR 47226)

a. In General.

    1. This section describes what constitute assets of a plan with respect to a plan's investment in another entity for purposes of Subtitle A, and Parts 1 and 4 of Subtitle 3, of Title I of the Act and section 4975 of the Internal Revenue Code. Paragraph (a)(2) contains a general rule relating to plan investments. Paragraphs (b) through (f) define certain terms that are used in the application of the general rule. Paragraph (g) describes how the rules in this section are to be applied when a plan owns property jointly with others or where it acquires an equity interest whose value relates solely to identified assets of an issuer. Paragraph (h) contains special rules relating to particular kinds of plan investments. Paragraph (i) describes the assets that a plan acquires when it purchases certain guaranteed mortgage certificates. Paragraph (j) contains examples illustrating the operation of this section. The effective date of this section is set forth in paragraph (k).
    2. Generally, when a plan invests in another entity, the plan's assets include its investment, but do not, solely by reason of such investment, include any of the underlying assets of the entity.

However, in the case of a plan's investment in an equity interest of an entity that is neither a publicly-offered security nor a security issued by an investment company registered under the Investment Company Act of 1940 its assets include both the equity interest and an undivided interest in each of the underlying assets of the entity, unless it is established that -

i. the entity is an operating company, or
ii. equity participation in the entity by benefit plan investors is not significant.

Therefore, any person who exercises authority or control respecting the management or disposition of such underlying assets, and any person who provides investment advice with respect to such assets for a fee (direct or indirect), is a fiduciary of the investing plan.

b. "Equity Interests" and "Publicly-Offered Securities".

1. The term "equity interest" means any interest in an entity other than an instrument that is treated as indebtedness under applicable local law and which has no substantial equity features. A profits interest in a partnership, an undivided ownership interest in property and a beneficial interest in a trust are equity interests.
2. A "publicly-offered security" is a security that is freely transferable, part of a class of securities that is widely held and either

   i. Part of a class of securities registered under section 12(b) or 12(g) of the Securities Exchange Act of 1934, or
   ii. Sold to the plan as part of an offering of securities to the public pursuant to an effective registration statement under the Securities Act of 1933 and the class of securities of which such security is a part is registered under the Securities Exchange Act of 1934 within 120 days (or such later time as may be allowed by the Securities and Exchange Commission) after the end of the fiscal year of the issuer during which the offering of such securities to the public occurred.

3. For purposes of paragraph (b)(2), a class of securities is "widely-held" only if it is a class of securities that is owned by 100 or more investors independent of the issuer and of one another. A class of securities will not fail to be widely-held solely because subsequent to the initial offering the number of independent investors falls below 100 as a result of events beyond the control of the issuer.
4. For purposes of paragraph (b)(2), whether a security is "freely transferable" is a factual question to be determined on the basis of all relevant facts and circumstances. If a security is part of an offering in which the minimum investment is $10,000 or less, however, the following factors ordinarily will not, alone or in combination, affect a finding that such securities are freely transferable -

   i. Any requirement that not less than a minimum number of shares or units of such security be transferred or assigned by any investor, provided that such requirement does not prevent transfer of all of the then remaining shares or units held by an investor;
   ii. Any prohibition against transfer or assignment of such security or rights in respect thereof to an ineligible or unsuitable investor;
   iii. Any restriction on, or prohibition against, any transfer or assignment which would either result in a termination or reclassification of the entity for federal or state tax purposes or which would violate any state or federal statute, regulation, court order, judicial degree, or rule of law;
   iv. Any requirement that reasonable transfer or administrative fees be paid in connection with a transfer or assignment;
   v. Any requirement that advance notice of a transfer or assignment be given to the entity and any requirement regarding execution of documentation evidencing such transfer or assignment (including documentation setting forth representations from either or both of the transferor or transferee as to compliance with any restriction or requirement described in this paragraph (b)(4) or requiring compliance with the entity's governing instruments);
   vi. Any restriction on substitution of an assignee as a limited partner of a partnership, including a general partner consent requirement, provided that the economic benefits of ownership of the assignor may be transferred or assigned without regard to such restriction or consent (other than compliance with any other

restriction described in this paragraph (b)(4));

vii. Any administrative procedure which establishes an effective date, or an event, such as the completion of the offering, prior to which a transfer or assignment will not be effective; and

viii. Any limitation or restriction on transfer or assignment which is not created or imposed by the issuer or any person acting for or on behalf of such issuer.

c. "Operating Company".

1. An "operating company" is not an entity that is primarily engaged, directly or through a majority owned subsidiary or subsidiaries, in the production or sale of a product or service other than the investment of capital. The term "operating company" includes an entity which is not described in the preceding sentence, but which is a "venture capital operating company" described in paragraph (d) or a "real estate operating company" described in paragraph (e).

[Editorial Note: There is no subsection (c)(2).]

d. "Venture Capital Operating Company".

1. An entity is a "venture capital operating company" for the period beginning on an initial valuation date described in paragraph (d)(5)(i) and ending on the last day of the first "annual valuation period" described in paragraph (d)(5)(ii) (in the case of an entity that is not a venture capital operating company immediately before the determination) or for the 12-month period following the expiration of an "annual valuation period" described in paragraph (d)(5)(ii) (in the case of an entity that is a venture capital operating company immediately before the determination) if -

    i. On such initial valuation date, or at any time within such annual valuation period, at least 50 percent of its assets (other than short-term investments pending long-term commitment or distribution to investors), valued at cost, are invested in venture capital investments described in paragraph (d)(3)(i) or derivative investments described in paragraph (d)(4); and

    ii. During such 12-month period (or during the period beginning on the initial valuation date and ending on the last day of the first annual valuation period), the entity, in the ordinary course of its business, actually exercises management rights of the kind described in paragraph (d)(3)(ii) with respect to one or more of the operating companies in which it invests.

2. (i)A venture capital operating company described in paragraph (d)(1) shall continue to be treated as a venture capital operating company during the "distribution period" described in paragraph (d)(2)(ii). An entity shall not be treated as a venture capital operating company at any time after the end of the distribution period.

    ii. The "distribution period" referred to in paragraph (d)(2)(i) begins on a date established by a venture capital operating company that occurs after the first date on which the venture capital operating company has distributed to investors the proceeds of at least 50 percent of the highest amount of its investments (other than short-term investments made pending long-term commitment or distribution to investors) outstanding at any time from the date it commenced business (determined on the basis of the cost of such investments) and ends on the earlier of -

        A. The date on which the company makes a "new portfolio investment", or

        B. The expiration of 10 years from the beginning of the distribution period.

    iii. For purposes of paragraph (d)(2)(ii)(A), a "new portfolio investment" is an investment other than -

        A. An investment in an entity in which the venture capital operating company had an outstanding venture capital investment at the beginning of the distribution period which has continued to be outstanding at all times during the distribution period, or

        B. A short-term investment pending long-term commitment or

distribution to investors.

3. (i) For purposes of this paragraph (d) a "venture capital investment" is an investment in a operating company (other than a venture capital operating company) as to which the investor has or obtains management rights.

    ii. The term "management rights" means contractual rights directly between the investor and an operating company to substantially participate in, or substantially influence the conduct of, the management of the operating company.

4. (I) An investment is a "derivative investment" for purposes of this paragraph (d) if it is -

        A. A venture capital investment as to which the investor's management rights have ceased in connection with a public offering of securities of the operating company to which the investment relates, or
        B. An investment that is acquired by a venture capital operating company in the ordinary course of its business in exchange for an existing venture capital investment in connection with:

            1. A public offering of securities of the operating company to which the existing venture capital investment relates, or
            2. A merger or reorganization of the operating company to which the existing venture capital investment relates, provided that such merger or reorganization is made for independent business reasons unrelated to extinguishing management rights.

    ii. An investment ceases to be a derivative investment on the later of:

        A. 10 years from the date of the acquisition of the original venture capital investment to which the derivative investment relates, or
        B. 30 months from the date on which the investment becomes a derivative investment.

5. For purposes of this paragraph (d) and paragraph (e) -

    i. An "initial valuation date" is the later of -

        A. Any date designated by the company within the 12-month period ending with the effective date of this section, or
        B. The first date on which an entity makes an investment that is not a short-term investment of funds pending long-term commitment.

    ii. An "annual valuation period" is a pre-established annual period, not exceeding 90 days in duration, which begins no later than the anniversary of an entity's initial valuation date. An annual valuation period, once established may not be changed except for good cause unrelated to a determination under this paragraph (d) or paragraph (e).

e. "Real Estate Operating Company". An entity is a "real estate operating company" for the period beginning on an initial valuation date described in paragraph (d)(5)(i) and ending on the last day of the first "annual valuation period" described in paragraph (d)(5)(ii) (in the case of an entity that is not a real estate operating company immediately before the determination) or for the 12-month period following the expiration of an annual valuation period described in paragraph (d)(5)(ii) (in the case of an entity that is a real estate operating company immediately before the determination) if:

    1. On such initial valuation date, or on any date within such annual valuation period, at least 50 percent of its assets, valued at cost (other than short-term investments pending long-term commitment or distribution to investors), are invested in real estate which is managed or developed and with respect to which such entity has the right to substantially participate directly in the management or development activities; and
    2. During such 12-month period (or during the period beginning on the initial valuation date and ending on the last day of the first annual valuation period) such entity in the ordinary course of its

business is engaged directly in real estate management or development activities.

f. Participation by Benefit Plan Investors.

1. Equity participation in an entity by benefit plan investors is "significant" on any date if, immediately after the most recent acquisition of any equity interest in the entity, 25 percent or more of the value of any class of equity interests in the entity is held by benefit plan investors (as defined in paragraph (f)(2)). For purposes of determinations pursuant to this paragraph (f), the value of any equity interests held by a person (other than a benefit plan investor) who has discretionary authority or control with respect to the assets of the entity or any person who provides investment advice for a fee (direct or indirect) with respect to such assets, or any affiliate of such a person, shall be disregarded.
2. A "benefit plan investor" is any of the following -

   i. Any employee benefit plan (as defined in section 3(3) of the Act), whether or not it is subject to the provisions of Title I of the Act,
   ii. Any plan described in section 4975(e)(1) of the Internal Rev. Code,
   iii. Any entity whose underlying assets include plan assets by reason of a plan's investment in the entity.

3. An "affiliate" of a person includes any person, directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person. For purposes of this paragraph (f)(3), "control", with respect to a person other than an individual, means the power to exercise a controlling influence over the management or policies of such person.

g. Joint Ownership. For purposes of this section, where a plan jointly owns property with others, or where the value of a plan's equity interest in an entity relates solely to identified property of the entity, such property shall be treated as the sole property of a separate entity.
h. Specific Rules Relating to Plan Investment. Notwithstanding any other provision of this section-

1. Except where the entity is an investment company registered under the Investment Company Act of 1940, when a plan acquires or holds an interest in any of the following entities its assets include its investment and an undivided interest in each of the underlying assets of the entity:

   i. A group trust which is exempt from taxation under section 501(a) of the Internal Revenue Code pursuant to the principles of Rev. Rul. 81-100, 1981-1 C.B. 326,
   ii. A common or collective trust fund of a bank,
   iii. A separate account of an insurance company, other than a separate account that is maintained solely in connection with fixed contractual obligations of the insurance company under which the amounts payable, or credited, to the plan and to any participant or beneficiary of the plan (including an annuitant) are not affected in any manner by the investment performance of the separate account.

2. When a plan acquires or holds an interest in any entity (other than an insurance company licensed to do business in a State) which is established or maintained for the purpose of offering or providing any benefit described in section 3(1) or section 3(2) of the Act to participants or beneficiaries of the investing plan, its assets will include its investment and an undivided interest in the underlying assets of that entity.
3. When a plan or a related group of plans owns all of the outstanding equity interests (other than director's qualifying shares) in an entity, its assets include those equity interests and all of the underlying assets of the entity. This paragraph (h)(3) does not apply, however, where all of the outstanding equity interests in an entity are qualifying employer securities described in section 407(d)(5) of the Act, owned by one or more eligible individual account plan(s) (as defined in section 407(d)(3) of the Act) maintained by the same employer, provided that substantially all of the participants in the plan(s) are, or have been, employed by the issuer of such securities or by members of a group of affiliated corporations (as determined under section 407(d)(7) of the Act) of which the issuer is a member.
4. For purposes of paragraph (h)(3), a "related group" of employee benefit plans consists of every group of two or more employee benefit plans

   i. Each of which receives 10 percent or more of its aggregate contributions from the same employer or from members of the same controlled group of corporations (as determined under section 1563(a) of the Internal Revenue Code, without regard to section 1563(a)(4) thereof); or

ii. Each of which is either maintained by, or maintained pursuant to a collective bargaining agreement negotiated by, the same employee organization or affiliated employee organizations. For purposes of this paragraph, an "affiliate" of an employee organization means any person controlling, controlled by, or under common control with such organization, and includes any organization chartered by the same parent body, or governed by the same constitution and bylaws, or having the relation of parent and subordinate.

i. Governmental Mortgage Pools.

1. Where a plan acquires a guaranteed governmental mortgage pool certificate, as defined in paragraph (i)(2), the plan's assets include the certificate and all of its rights with respect to such certificate under applicable law, but do not, solely by reason of the plan's holding of such certificate, include any of the mortgages underlying such certificate.
2. A "guaranteed governmental mortgage pool certificate" is a certificate backed by, or evidencing an interest in, specified mortgages or participation interests therein and with respect to which interest and principal payable pursuant to the certificate is guaranteed by the United States or an agency or instrumentality thereof. The term "guaranteed governmental mortgage pool certificate" includes a mortgage pool certificate with respect to which interest and principal payable pursuant to the certificate is guaranteed by:

i. The Government National Mortgage Association;
ii. The Federal Home Loan Mortgage Corporation; or
iii. The Federal National Mortgage Association.

j. Examples. [NOTE: Subsection (j) of the regulation is omitted.]
k. Effective Date and Transitional Rules.

1. In general, this section is effective for purposes of identifying the assets of a plan or after March 13, 1987. Except as a defense, this section shall not apply to investments in an entity in existence on March 13, 1987, if no plan subject to Title I of the Act or plan described in section 4975(e)(1) of the Code (other than a plan described in section 4975(g)(2) or 4975(g)(3)) acquires an interest in the entity from an issuer or underwriter at any time on or after March 13, 1987 except pursuant to a contract binding on the plan in effect on March 13, 1987 with an issuer or underwriter to acquire an interest in the entity.
2. Notwithstanding paragraph (k)(1), this section shall not, except as a defense, apply to a real estate entity described in section 11018(a) of Pub. L. 99-272.

Department of Labor

Regulation 2520.103-5

29 C.F.R. 2520.103-5

Transmittal and certification of information to plan administrator

for annual reporting purposes

(Collective Investment Fund Reporting to Plan Administrators)

Originally issued September 10, 1978 (43 FR 10140)

a. General. In accordance with section 103(a)(2) of the Act, an insurance carrier or other organization which provides benefits under the plan or holds plan assets, a bank or similar institution which holds plan assets, or a plan sponsor, shall transmit and certify such information as needed by the administrator to file the annual report under section 104(a)(1)(A) of the Act and 2520.104a-5 or 2520.104a-6:

1. Within 9 months after the close of the plan year which begins in 1975 or September 30, 1976, whichever is later, and
2. Within 120 days after the close of any plan year which begins after December 31, 1975.

b. Application. This requirement applies with respect to -

1. An insurance carrier or other organization which:

i. Provides from its general asset accounting funds for the payment of benefits under a plan, or
ii. Holds assets of a plan in a separate account;

2. A bank, trust company, or similar institution which holds assets of a plan in a common or collective trust, separate trust, or custodial account; and
3. A plan sponsor as defined in section 3(16)(B) of the Act.

c. Contents. The information required to be provided to the administrator shall include -

1. In the case of an insurance carrier or other organization which -

i. Provides funds from its general asset account for the payment of benefits under a plan, upon request of the plan administrator, such information as is contained within the ordinary business records of the insurance carrier or other organization and is needed by the plan administrator to comply with the requirements of section 104(a)(1)(A) of the Act and 2520.104a-5 or 2520.104a-6;
ii. Holds assets of a plan in a pooled separate account which is exempted from certain reporting requirements under 2520.103-4, a copy of the annual statement of assets and liabilities of the separate account for the fiscal year of such account that ends with or within the plan year for which the annual report is made, and a statement of the value of the plan's units of participation in the separate account;
iii. Holds assets of a plan in a separate account which is not exempted from certain reporting requirements under 2520.103-4, a listing of all transactions of the separate account and, upon request of the plan administrator, such information as is contained within the ordinary business records of the insurance carrier and is needed by the plan administrator to comply with the requirements of section 104(a)(1)(A) of the Act and 2520.104a-5 or 2520.104a-6.

2. In the case of a bank, trust company, or similar institution holding assets of a plan -

i. In a common or collective trust which is exempted from certain reporting requirements under 2520.103-3, a copy of the annual statement of assets and liabilities of the common or collective trust for the fiscal year of such trust that ends with or within the plan year for which the annual report is made, and a statement of the value of the plan's units of participation in the common or collective trust.
ii. In a trust which is not exempted from certain reporting requirements under 2520.103-3, a listing of all transactions of the separate trust and, upon request of the plan administrator, such information as is contained within the ordinary business records of the bank, trust company, or similar institution and is needed by the plan administrator to comply with the requirements of section 104(a)(1)(A) of the Act and 2520.104a-5.
iii. In a custodial account, upon request of the plan administrator, such information as is contained within the ordinary business records of the bank, trust company, or similar institution and is needed by the plan administrator to comply with the requirements of section 104(a)(1)(A) of the Act and 2520.104a-5 or 2520.104a-6.

3. In the case of a plan sponsor, a listing of all transactions directly or indirectly involving plan assets engaged in by the plan sponsor and such information as is needed by the plan administrator to comply with the requirements of section 104(a)(1)(A) of the Act and 2520.104a-5 or 2520.104a-6.

d. Certification.

1. An insurance carrier or other organization a bank, trust company, or similar institution, or plan sponsor, as described in paragraph (b) of this section, shall certify to the accuracy and completeness of the information described in paragraph (c) of this section by a written declaration which is signed by a person authorized to represent the insurance carrier, bank, or plan sponsor. Such certification will serve as a written assurance of the truth of the facts stated therein.
2. Example of Certification. The XYZ Bank (Insurance Carrier) hereby certifies that the foregoing statement furnished pursuant to 20 C.F.R. 2520.103-5(c) is complete and accurate.

Department of Labor

Regulation 2550.404a-1

C.F.R. 2550.404a-1

Investment Duties (Prudence Regulation)

Originally issued June 26, 1979 (44 FR 37225)

The technical corrections of 4-4-78 and the amendment of 3-1-89

contained no changes to this regulation.

Recap
Defines and explains the application of the Prudent Man Rule in ERISA Section 404(a)(1)(B).
The Preamble to the Final Regulation is included to assist examiners in interpreting and applying this Rule.

Editor's Note: Also refer to Interpretive Bulletin 94-1, dealing with the prudence of social ("economically targeted" or ETI) investments. Also see DOL ERISA Regulation 404c-1, which exempts fiduciaries from certain ERISA liability if plans meet certain conditions and participants direct their own investments.

Agency: Department of Labor.

Action: Final regulation.

Summary: This document contains a final regulation relating to the investment duties of a fiduciary of an employee benefit plan under the Employee Retirement Income Security Act of 1974 (the Act). The regulation is relevant to the investment of assets of employee benefit plans for which fiduciaries have investment duties, and, therefore, it affects participants, beneficiaries and fiduciaries of all such plans.

Effective Date: July 23, 1979.

Final Regulation

a. In General. Section 404(a)(1)(B) of the Employee Retirement Income Security Act of 1974 (the Act) provides, in part, that a fiduciary shall discharge his duties with respect to a plan with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims.
b. Investment Duties.

    1. With regard to an investment or investment course of action taken by a fiduciary of an employee benefit plan pursuant to his investment duties, the requirements of Section 404(a)(1)(B) of the Act set forth in subsection (a) of this section are satisfied if the fiduciary (A) has given appropriate consideration to those facts and circumstances that, given the scope of such fiduciary's investment duties, the fiduciary knows or should know are relevant to the particular investment or investment course of action involved, including the role the investment or investment course of action plays in that portion of the plan's investment portfolio with respect to which the fiduciary has investment duties; and (B) has acted accordingly.
    2. For purpose of paragraph (1) of this subsection, "appropriate consideration" shall include, but is not necessarily limited to:

        A. A determination by the fiduciary that the particular investment course of action is reasonably designed, as part of the portfolio (or, where applicable, that portion of the plan portfolio with respect to which the fiduciary has investment duties), to further the purposes of the plan, taking into consideration the risk of loss and the opportunity for gain (or other return) associated with the investment or investment

course of action, and
B. Consideration of the following factors as they relate to such portion of the portfolio:

i. The composition of the portfolio with regard to diversification;
ii. The liquidity and current rates of return of the portfolio relative to the anticipated cash flow requirements of the plan, and
iii. The projected return of the portfolio relative to the funding objectives of the plan.

3. An investment manager appointed, pursuant to the provisions of Section 402(c)(3) of the Act, to manage all or part of the assets of a plan, may, for purposes of compliance with the provisions of paragraphs (1) and (2) of this subsection, rely on, and act upon the basis of, information pertaining to the plan provided by or at the direction of the appointing fiduciary, if -

A. Such information is provided for the stated purpose of assisting the manager in the performance of his investment duties, and
B. The manager does not know and has no reason to know that the information is incorrect.

c. Definitions.

For purposes of this section:

1. The term "*investment duties*" means any duties imposed upon, or assumed or undertaken by, a person in connection with the investment of plan assets which make or will make such person a fiduciary of an employee benefit plan or which are performed by such person as a fiduciary of an employee benefit plan as defined in Section 3(21)(A)(i) or (ii) of the Act.
2. The term "*investment course of action*" means any series or program of investments or actions related to a fiduciary's performance of his investment duties.
3. The term "*plan*" means an employee benefit plan to which Title I of the Act applies.

Explanatory Preamble

For further information contact: Paul R. Antsen, Office of Fiduciary Standards, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216, (202) 522-8971, or Gregor B. McCurdy, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, D.C. 20216. (202) 523-9141.

Supplemantary information: On April 25, 1978, notice was published in the Federal Register (43 FR 17480)[1] that the Department had under consideration a proposal to adopt a regulation, 29 C.F.R. 2550.404a-1, under section 404(a)(1)(B) of the Act, relating to the investment duties of a fiduciary of an employee benefit plan. Section 404(a)(1)(B) of the Act provides, in part, that a fiduciary shall discharge his duties with respect to an employee benefit plan with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent man acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims (the "Prudence" rule).[2]

Public comments were received, in response to the proposal, that generally supported the tentative views of the Department reflected therein, although many suggestions for specific revisions were offered. A few comments opposed the adoption of the proposed or of any, regulation concerning these matters. Among the reasons given in opposition to the adoption of the proposed regulation were: (1) that the courts, rather than the Department, should determine how the "prudence" rule is to be interpreted, (2) that the Department's views regarding the requirements of the "Prudence" rule, as reflected in the proposed regulation, are incorrect, (3) that it is impractical to attempt to define "prudence" by regulation; and (4) that the proposal did not accomplish its stated objectives. The Department has considered the comments opposing adoption of the regulation, but has not been persuaded that the interpretation of the requirements of the "prudence" rule set forth below is incorrect. It believes, moreover, that adoption of a regulation concerning the investment duties of fiduciaries under the "prudence" rule is appropriate because such a regulation would provide guidance for many plan fiduciaries in an important area of their responsibilities under the Act.

Counsel for one group of interested persons, while supporting the proposed regulation in principle, asked that they be given an opportunity to express their views at a public hearing on the proposed regulation. They also

suggested that the regulation should, in any event, be republished to give interested persons additional opportunity for comment. The Department has considered these requests, but has determined that neither a public hearing nor republication of a proposed regulation is necessary or appropriate.

Accordingly, after consideration of all the written comments received, the Department has determined to adopt the proposed regulation as modified and set forth below.

Discussion of the regulation

The legislative history of the Act indicates that the common law of trusts, which forms the basis for and is federalized and codified in part 4 of Title I of the Act, should, nevertheless, not be mechanically applied to employee benefit plans.[3] The "prudence" rule in the Act sets forth a standard built upon, but that should and does depart from, traditional trust law in certain respects.

The Department is of the opinion that (1) generally, the relative riskiness of a specific investment or investment course of action does not render such investment or investment course of action either *per se* prudent or *per se* imprudent, and (2) the prudence of an investment decision should not be judged without regard to the role that the proposed investment or investment course of action plays with the overall plan portfolio. Thus, although securities Issued by a small or new company may be a riskier investment than securities issued by a "blue chip" company, the investment in the former company may be entirely proper under the Act's prudence" rule.

Accordingly, paragraph (b)(1) of the regulation, as adopted, provides generally that, with respect to an investment or investment course of action taken pursuant to a fiduciary's investment duties, the requirements of the "prudence" rule have been satisfied if the fiduciary has acted in a manner consistent with appropriate consideration of the facts and circumstances that the fiduciary knows or should know are relevant, including the role that the investment or investment course of action plays in that portion of the plan's investment portfolio with respect to which the fiduciary has investment duties. Paragraph (b), as adopted, has been modified in response to certain comments received on the regulation as originally proposed.

As a general observation, the comments received by the Department indicated that many commentators were uncertain of the scope of the proposed regulation. In particular, some commentators appear to have viewed the various factors and conditions set forth in the proposal as a statement of requirements that must necessarily be met in order to satisfy the requirements of the "Prudence" rule. In this regard, it should be noted that the regulation reflects the views of the Department as to a manner of satisfying the requirements of the "prudence" rule, and does not purport to impose any additional requirements or constraints upon plan fiduciaries. It should also be noted that the Department does not view compliance with the provisions of the regulation as necessarily constituting the exclusive method for satisfying the requirements of the "prudence" rule. Rather, the regulation is in the nature of a "safe harbor" provision; it is the opinion of the Department that fiduciaries who comply with the provisions of the regulation will have satisfied the requirements of the "prudence" rule, but no opinion is expressed in the regulation as to the status of activities undertaken or performed that do not so comply.

With regard to more particular matters, a number of comments suggested that one condition of the proposal - that a fiduciary give appropriate consideration to "all" relevant facts and circumstance - could be read as establishing an impossible standard, especially for fiduciaries of small plans, because (1) no fiduciary has unlimited resources to develop all the information that one might deem to be relevant to a particular investment decision, and (2) no fiduciary can be expected to consider all the relevant facts and circumstances, whether or not of material significance.

Because section 404(a)(1)(B) of the Act provides that it is the fiduciary's duties with respect to the plan which must be discharged in accordance with the "prudence" rule, it appears to the Department that the scope of those duties will determine, in part, the factors which should be considered by a plan fiduciary in a given case. The nature of those duties will, of course, depend on the facts and circumstances of the case, including the nature of the arrangement between the fiduciary and the plan. For that reason, the regulation, as adopted, does not distinguish among classes of fiduciaries with respect to what particular duties may be involved. The Department recognizes, however, that a fiduciary should be required neither to expend unreasonable effort in discharging his duties. nor to consider matters outside the scope of those duties. Accordingly, the regulation has been modified to provide that consideration be given to those facts and circumstances which take into account the scope of his investment duties, the fiduciary knows or should know are relevant to the particular investment decision involved. The scope of the fiduciary's inquiry in this respect, therefore, is limited to those facts and circumstances that a prudent person having similar duties and familiar with such matters would consider relevant.

Several commentators asserted that the regulation, in recognition of the Act's provisions permitting delegation of investment duties to, and allocation among, several fiduciaries, should permit a fiduciary who is responsible for the management of plan assets to rely on information supplied by appropriate other plan fiduciaries, and to act in accordance with policies and instructions supplied by those persons in making decisions on the investment of plan assets. Those comments, generally, addressed the situation where several investment managers are involved in managing the assets of a plan, each being responsible for a portion of the plan's investment portfolio.[4] Under those circumstances, it would not, in the view of the commentators, be appropriate to require a fiduciary who is responsible for only a portion of the plan's portfolio to take into consideration facts and circumstances relating to the balance of the portfolio in making an investment decision. The Department agrees, in part, with those comments. Accordingly, paragraph (b)(1) of the regulation as adopted also provides that such a fiduciary need give appropriate consideration to the role the proposed investment or investment course of action plays in that portion only, of the plan's investment portfolio, with respect to which the fiduciary has investment duties.

However, the Department cannot state that, under the foregoing circumstances, a fiduciary is entitled blindly to rely upon instructions or policies established by other plan fiduciaries. Similarly, the regulation does not provide, as requested by one commentator, that the assets of a pooled investment fund may be invested in accordance with its published investment objectives and policies without requiring that consideration be given to the particular needs of any individual plan that has an interest in the fund. It would appear that where authority to manage part (or all) of the assets of a plan has been delegated to one or more investment managers pursuant to section 402(c)(3) of the Act, the primary responsibility for determining that the delegation is appropriate rests with the named fiduciary or fiduciaries effecting the delegation. Nevertheless, the Department considers that each such manager's investment duties, under section 404(a)(1)(B) of the Act, includes (among other things) a duty not to act in accordance with a delegation of plan investment duties to the extent that the manager either knows or should know that the delegation involves a breach of fiduciary responsibility.[5] Once the manager has considered factors otherwise necessary to assure himself that the delegation of investment authority and related specific instructions are appropriate, he may, in exercising such authority and carrying out such instructions, rely upon information provided to him in accordance with the provisions of new paragraph (b)(3) of the regulation. That paragraph provides that an investment manager responsible for the management of all or part of a plan's assets pursuant to an appointment described in section 402(c)(3) of the Act may, for purposes o f complying with the provisions of the regulation, rely upon certain information supplied to him by or at the direction of the appointing fiduciary, provided that the manager neither knows or should know that the information is incorrect.

Paragraph (b)(1) of the proposed regulation also been revised in order to make clear that the fiduciary's acts do not satisfy the "prudence" rule solely because the fiduciary had previously given consideration to relevant facts and circumstances. Some comments questioned whether, under the regulation as originally proposed, a fiduciary might be deemed to be "immunized" once he had given such consideration, not withstanding the nature of his subsequent acts. The regulation, as adopted, provides that it is the "investment" or "investment course of action" in question that will satisfy the requirements of the prudence rule if the criteria set forth in the regulation are met.

Paragraph (b)(2) of the regulation sets forth factors that are to be included, to the extent applicable, in an evaluation of an investment or investment course of action if a fiduciary wishes to rely on the provisions of the regulation. They are: (1) the composition of the portfolio with regard to diversification; (2) the liquidity and current return of the portfolio relative to the anticipated cash flow requirements of the plan; and (3) the projected return of the portfolio relative to the objectives of the plan. These factors are adopted substantially as proposed, except that the first factor has been revised, in response to questions raised by some of the comments, to make clear that the word "diversification" is to be given its customary meaning as a mechanism for reducing the risk of large losses; that factor, as originally proposed, referred to "diversification of risk." The second factor has also been modified in order to make clear that its principal subject matter is all anticipated cash requirements of the plan, and not solely those arising by reason of payment of benefits. A fourth factor set forth in the proposal which related to the "volatility" of the portfolio, has been eliminated as a factor specifically to be considered because, although paragraph (b)(2) as adopted sets forth factors which must be considered in all cases in order to comply with the provisions of the regulation[6], the reference to volatility may be read, according to some comments, as suggesting that only certain portfolio management techniques are appropriate. Moreover, as discussed more fully below, the subject of risk and opportunity for gain - which subsumes consideration of "volatility" in some respects - is now addressed in subparagraph (A) of paragraph (b)(2). A former fifth factor, which read "the prevailing and projected economic conditions of the entities in which the plan has invested and proposes to invest," is also deal t with in that subparagraph.

Several commentators suggested that inclusion of that fifth factor in the regulation would be contrary to the

intent of the proposal because it focuses attention on the individual investment, rather than on the aggregate plan portfolio. Others objected to its inclusion on the ground that it is antithetical to the theory of operation of certain "passive" investment media (such as "index" funds) that acquire portfolios designed to match the performance of various investment indices and that, accordingly, have little or no discretion in altering the composition of their portfolios.[7]

The regulation, however, is not intended to suggest either that any relevant or material attributes of a contemplated investment may properly be ignored or disregarded, or that a particular plan investment should be deemed to be prudent solely by reason of the propriety of the aggregate risk/return characteristics of the plan's portfolio. Rather, it is the Department's view that an investment reasonably designed - as a part of the portfolio - to further the purposes of the plan, and that is made upon appropriate consideration of the surrounding facts and circumstances, should not be deemed to be imprudent merely because the investment, standing alone, would have, for example, a relatively high degree of risk. The Department also believes that appropriate consideration of an investment to further the purposes of the plan must include consideration of the characteristics of the investment itself. Accordingly, paragraph (b)(2) of the regulation provides that, for purposes of paragraph (b)(1), "appropriate consideration" shall include a determination by the fiduciary that the particular investment or investment course of action is reasonably designed, as part of the portfolio for which the fiduciary is responsible, to further the purposes of the plan, taking into account the risk of loss and the opportunity for gain (or other return) associated with the investment or investment course of action.[8]

In the case of "passive" investment funds, referred to above, it would seem that, to the extent the fund manager is managing plan assets,[9] the investments made by the fund, as well as the plan's investment in the fund, must meet the requirements of the "prudence" rule. However, to the extent that an index fund, including the screen or filter process described above at note 7, is reasonably designed to fulfill the fund manager's fiduciary obligations with respect to a plan whose assets are managed therein, such manager, acting in accordance with the fund's objective and its filter or screen process, generally would be in compliance with the provisions of the "prudence" rule, as described in the regulation, with respect to that plan.

The terms "investment duties" and "investment course of action" are defined in paragraphs (c)(1) and (2) of the regulation. No comments were received regarding these definitions, and they have been adopted substantially in the form proposed. New paragraph (c)(3) has been added, defining the term "plan" to mean an employee benefit plan to which Title I of the Act applies.

Discussion of certain other comments

Counsel for one group of commentators characterized the factors set forth in paragraph (b)(2) as relating solely to the "investment merit" of a particular investment or investment course of action. Because, in the view of those commentators, the prudence of the acquisition or retention of a contract Issued by an insurance company may involve factors besides "investment merit", they suggested that the regulation should contain a separate provision that would set forth two factors to be considered by a fiduciary, in evaluating the prudence of the acquisition or retention of such a contract: the risks assumed, and the services provided, by the insurance company. The Department is unable to concur with the commentators' view that the regulation as proposed dealt only with matters of "investment merit" as narrowly perceived in the comment. The Department agrees that such factors as the risk to be assumed and the services to be provided under a contract are pertinent to any investment decision involving such contract. The regulation as adopted specifically provides that, in order to come within the scope of the regulation, a fiduciary shall consider the facts and circumstances the fiduciary knows or should know are relevant to the investment decision, and that the factors set forth in paragraph (b)(2) are not intended to be exclusive. Accordingly, the Department believes that it is unnecessary to set forth additional factors with respect to insurance contracts or other specific types of investment.

Two commentators suggested that the Department clarify that the adoption of the regulation would not result in fiduciaries being required to invest in expensive systems or analyses to make investment decisions. Under the "prudence" rule, the standard to which a fiduciary is held in the proper discharge of his investment duties is defined, in part, by what a prudent person acting in a like capacity and familiar with such matters would do. Thus, for example, it would not seem necessary for a fiduciary of a plan with assets of $50,000 to employ, in all respects, the same investment management techniques as would a fiduciary of a plan with assets of $50,000,000.

Numerous comments were received with respect to the factors set forth in paragraph (b)(2). Several persons requested that the Department clarify or define terms such as "diversification of risk". "risk," "volatility" and "liquidity." For example, some persons asked what specific measurements of volatility, risk and liquidity should be utilized by fiduciaries in making investment decisions for a plan. The Department believes that, in view of

the modifications (discussed above) made in the regulation as adopted, it is neither necessary nor appropriate for the regulation to contain such definitions. Several commentators asserted that certain specific types of investments such as, for example, investment in small or recently formed companies, or nonincome producing investments that are not securities (such as, for example, certain precious metals and objects of art) have not been viewed with favor, traditionally, as trust investments. Those comments urged that the regulation specify the extent to which such investments are permissible under the "prudence" rule. Other commentators made reference to the traditional principle that trust investments should be income producing, and suggested that the appropriate measure of investment "return" should be defined to mean 'total return" - that is, an aggregate return computed without regard to whether a contributing factor thereto consists of income or capital items. Although the Department considers that defining "return" would be beyond the appropriate scope of this regulation, it believes that the "prudence" rule does not require that every plan investment produce current income under all circumstances. As indicated above and in the preamble to the proposed regulation, the Department believes that the universe of investments permissible under the "prudence" rule is not necessarily limited to those permitted at common law.

However, the Department does not consider it appropriate to include in the regulation any list of investments, classes of investment, or investment techniques that might be permissible under the "prudence" rule. No such list could be complete; moreover, the Department does not intend to create or suggest a "legal list" of investments for plan fiduciaries.

The preamble to the proposed regulation stated (as does this preamble) that the risk level of an investment does not alone make the investment *per se* prudent or *per se* imprudent. Comments were received which asserted that such proposition is inappropriate and would promote irresponsibility on the part of plan fiduciaries. Other commentators not only agreed with the proposition, but also suggested that it should be incorporated in the regulation. The Department believes that both of these concerns are addressed by the modifications, discussed above, made to paragraph (b)(2) of the regulation as adopted.

The Department has determined that this regulation is not a "significant regulation" as defined in the Department's guidelines (44 FR 5570, January 26, 1979) implementing Executive Order 12044.

Statutory Authority

The regulation set forth below is adopted pursuant to the authority contained in section 505 of the Act (Pub. L. 93-406, 88 Stat. 894 (29 USC 1135)). Although the regulation is an "interpretative rule" within the meaning of 5 USC 553(d), the effective date of the regulation is July 23, 1979, consistent with the statement of the Department, in connection with the regulation as proposed. that such regulation would be effective 30 days after its adoption.

Final Regulation

Accordingly, Part 2550 of Chapter XXV of Title 29 of the Code of Federal) Regulations is amended by inserting in the appropriate place to read 2550.404a-1.

Signed at Washington, D.C, this 20th day of June 1979.

Ian D. Lanoff, Administrator

Pension and Welfare Benefit Programs

Labor-Management Services Administration

United States Department of Labor

- Footnotes -

1. See also 43 FR 27208 (June 23, 1978), in which notice was given of an extension of the original comment period.
2. The regulation pertains only to the investment duties of a fiduciary of an employee benefit plan. Section 404(a)(1)(B) of the Act, however, requires that a fiduciary discharge all of his duties in accordance with the "prudence" rule.
3. It should also be noted that although the proposed regulation made reference to an additional requirement of section 404(a)(1) - that the fiduciary discharge his duties solely in the interest of plan participants and beneficiaries - that reference has been deleted from the regulation as adopted. This was done to avoid suggesting that satisfaction of the "prudence" rule with respect

to an investment or investment course of action necessarily implies satisfaction of that additional requirement.
4. See, e.g., H.R. Rep. No. 1280, 93d Cong., 2d Sess. 302 (1974).
5. See sections 403(a)(2) and 402(c)(3) of the Act.
6. Further, section 405(a) of the Act provides, in part, that a plan fiduciary shall be liable for a breach of fiduciary liability of another fiduciary with respect to the same plan if, among other things, he has knowledge of such a breach and does not make reasonable efforts to remedy it, or he has enabled such other fiduciary to commit a breach by his failure to comply with the requirements of section 404(a)(1) of the Act in the administration of his specific responsibilities which give rise to his status as a fiduciary.
7. Paragraph (b)(2) of the regulation, as proposed, stated that the factors which should be considered may include those listed. In order to reduce uncertainty, reflected in the comments, regarding the application of the regulation, and in view of the fact that the regulation is in the nature of a "safe harbor" provision, paragraph (b)(2) has been restructured so as to indicate the factors which should under all circumstances be considered by any fiduciary who wishes to rely on the provisions of the rule.
8. It should be noted that index funds typically include a screen or filter process by which portfolio investments for any such fund may be changed to reflect significant adverse financial developments affecting any potential or existing portfolio company, notwithstanding the continued inclusion of the company in the index against which the fund is measured.
9. The term "risk" is used here in its ordinary sense, and refers to any and all types of risk applicable to a particular investment or investment course of action.
10. See, e.g., section 401(b) of the Act.

Indicia of Ownership

Originally issued October 4, 1977 (42 FR 54124)

Amended January 6, 1981 (46 FR 1267)

ERISA 404(b) requires that plan assets be maintained within the jurisdiction of US District Courts. With the advent of international investments, this is often impractical. This regulation provides a means to keep investments at certain types of non-US custodians. A special provision deals with Canada.

a. No fiduciary may maintain the indicia of ownership of any assets of a plan outside the jurisdiction of the district courts of the United States, unless:

    1. Such assets are:

        i. Securities issued by a person, as defined in section 3(9) of the Employee Retirement Income Security Act of 1974 (Act) (other than an individual), which is not organized under the laws of the United States or a State and does not have its principal place of business within the United States,
        ii. Securities issued by a government other than the government of the United States or of a State, or any political subdivision, agency or instrumentality of such a government,
        iii. Securities issued by a person, as defined in section 3(9) of the Act (other than an individual), the principal trading market for which securities is outside the jurisdiction of the district courts of the United States, or
        iv. Currency issued by a government other than the government of the United States if such currency is maintained outside the jurisdiction of the district courts of the United States solely as an incident to the purchase, sale or maintenance of securities described in paragraph (a)(1) of this section; and

    2. (i) Such assets are under the management and control of a fiduciary which is a corporation or partnership organized under the laws of the United States or a State, which

fiduciary has its principal place of business within the United States and which is -

A. A bank as defined in section 202(a)(2) of the Investment Advisors Act of 1940 that has, as of the last day of its most recent fiscal year, equity capital in excess of $1,000,000;
B. An insurance company which is qualified under the laws of more than one State to manage, acquire, or dispose of any asset of a plan, which company has, as of the last day of its most recent fiscal year, net worth in excess of $1,000,000 and which is subject to supervision and examination by the State authority having supervision over insurance companies; or
C. An investment adviser registered under the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, total client assets under its management and control in excess $50,000,000 and either

    1. Shareholders' or partners' equity in excess of $750,000 or
    2. All of its obligations and liabilities assumed or guaranteed by a person described in paragraph (a)(2)(i)(A), (B), or (C)(1) or (a)(2)(ii)(A)(2) of this section; or

ii. Such indicia or ownership are either:

A. In the physical possession of, or, as a result of normal business operations, are in transit to the physical possession of, a person which is organized under the laws of the United States or a State, which person has its principal place of business in the United States and which is -

    1. A bank as defined in section 202(a)(2) of the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, equity capital in excess of $1,000,000;
    2. A broker of dealer registered under the Securities Exchange Act of 1934 that has, as of the last day of its most recent fiscal year, net worth in excess of $750,000; or
    3. A broker or dealer registered under the Securities Exchange Act of 1934 that has all of its obligations and liabilities assumed or guaranteed by a person described in paragraph (a)(2)(i)(A), (B), or (C)(1) or (a)(2)(ii)(A)(2) of this section; or

B. Maintained by a broker or dealer, described in paragraph (a)(2)(ii)(A)(2) or (3) of this section, in the custody of an entity designated by the Securities and Exchange Commission as a "satisfactory control location" with respect to such broker or dealer pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934 provided that:

    1. Such entity holds the indicia of ownership as agent for the broker or dealer, and
    2. Such broker or dealer is liable to the plan to the same extent it would be if it retained the physical possession of the indicia of ownership pursuant to paragraph (a)(2)(ii)(A) of this section.

C. Maintained by a bank described in paragraph (a)(2)(ii)(A)(1), in the custody of an entity that is a foreign securities depository, foreign clearing agency which acts as a securities depository, or foreign bank which entity is supervised or regulated by a government agency or regulatory authority in the foreign jurisdiction having

authority over such depositories, clearing agencies or banks, provided that:

1. The foreign entity holds the indicia of ownership as agent for the bank;
2. The bank is liable to the plan to the same extent it would be if it retained the physical possession of the indicia of ownership within the U.S.
3. The indicia of ownership are not subject to any right, charge, security interest, lien or claim of any kind in favor of the foreign entity except for their safe custody or administration;
4. Beneficial ownership of the assets represented by the indicia of ownership is freely transferable without the payment of money or value other than for safe custody or administration; and
5. Upon request by the plan fiduciary who is responsible for the selection and retention of the bank, the bank identifies to such fiduciary the name, address and principal place of business of the foreign entity which acts as custodian for the plan pursuant to this paragraph (a)(2)(ii)(C), and the name and address of the governmental agency or other regulatory authority that supervises or regulates that foreign entity.

b. Notwithstanding any requirement of paragraph (a) of this section, a fiduciary, with respect to a plan may maintain in Canada the indicia of ownership of plan assets which are attributable to a contribution made on behalf of a plan participant who is a citizen or resident of Canada, if such indicia of ownership must remain in Canada in order for the plan to qualify for and maintain tax exempt status under the laws of Canada or to comply with other applicable laws of Canada or any Province of Canada.
c. For purposes of this regulation:

1. The term "management and control" means the power to direct the acquisition or disposition through purchase, sale, pledging, or other means; and
2. The term "depository" means any company, or agency or instrumentality of government, that acts as a custodian of securities in connection with a system for the central handling of securities whereby all securities of a particular class or series or any issuer deposited within the system are treated as fungible and may be transferred, loaned, or pledged by bookkeeping entry without physical delivery of securities certificates.

Regulation 2550.404c-1

29 C.F.R. 2550.404c-1.

ERISA Section 404(c) Plans

Originally issued October 4, 1977 (42 FR 54124)

Amended January 26, 1981 (46 FR 1267)

a. In General.

1. Section 404(c) of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) provides that if a pension plan that provides for individual accounts permits a participant or beneficiary to exercise control over assets in his account and that participant or beneficiary in fact exercises control over assets in his account, then the participant or beneficiary shall not be deemed to be a fiduciary by reason of his exercise of control and no person who is otherwise a fiduciary shall be liable for any loss, or by reason of any breach, which results from such exercise of control. This section describes the kinds of plans that are "ERISA section 404(c) plans," the circumstances in which a participant or beneficiary is considered to have exercised independent control over the assets in his account as contemplated by section 404(c), and the consequences of a participant's or beneficiary's exercise of control.

2. The standards set forth in this section are applicable solely for the purpose of determining whether a plan is an ERISA section 404(c) plan and whether a particular transaction engaged in by a participant or beneficiary of such plan is afforded relief by section 404(c). Such standards, therefore, are not intended to be applied in determining whether, or to what extent, a plan which does not meet the requirements for an ERISA section 404(c) plan or a fiduciary with respect to such a plan satisfies the fiduciary responsibility or other provisions of title I of the Act.

b. ERISA section 404(c) plans -

1. In general. An "ERISA section 404(c) plan" is an individual account plan described in section 3(34) of the Act that:

    i. Provides an opportunity for a participant or beneficiary to exercise control over assets in his individual account (see paragraph (b)(2) of this section); and
    ii. Provides a participant or beneficiary an opportunity to choose, from a broad range of investment alternatives, the manner in which some or all of the assets in his account are invested (see paragraph (b)(3) of this section).

2. Opportunity to exercise control.

    i. A plan provides a participant or beneficiary an opportunity to exercise control over assets in his account only if -

        A. Under the terms of the plan, the participant or beneficiary has a reasonable opportunity to give investment instructions (in writing or otherwise, with opportunity to obtain written confirmation of such instructions) to an identified plan fiduciary who is obligated to comply with such instructions except as otherwise provided in paragraph (b)(2)(ii)(B) and (d)(2)(ii) of this section; and
        B. The participant or beneficiary is provided or has the opportunity to obtain sufficient information to make informed decisions with regard to investment alternatives available under the plan, and incidents of ownership appurtenant to such investments. For purposes of this subparagraph, a participant or beneficiary will not be considered to have sufficient investment information unless -

            1. The participant or beneficiary is provided by an identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf):

                i. An explanation that the plan is intended to constitute a plan described in section 404(c) of the Employee Retirement Income Security Act, and title 29 of the Code of Federal Regulations Section 2550.440c-1, and that the fiduciaries of the plan may be relieved of liability for any losses which are the direct and necessary result of investment instructions given by such participant or beneficiary;
                ii. A description of the investment alternatives available under the plan and, with respect to each designated investment alternative, a general description of the investment objectives and risk and return characteristics of each such alternative, including information relating to the type and diversification of assets comprising the portfolio of the designated investment alternative;
                iii. Identification of any designated

investment managers;

iv. An explanation of the circumstances under which participants and beneficiaries may give investment instructions and explanation of any specified limitations on such instructions under the terms of the plan, including any restrictions on transfer to or from a designated investment alternative and any restrictions on the exercise of voting, tender and similar rights appurtenant to a participant's or beneficiary's investment in an investment alternative;

v. A description of any transaction fees and expenses which affect the participant's or beneficiary's account balance in connection with purchases or sales of interests in investment alternatives (e.g., commissions, sales load, deferred sales charges, redemption or exchange fees);

vi. The name, address, and phone number of the plan fiduciary (and, if applicable, the person or persons designated by the plan fiduciary to act on his behalf) responsible for providing the information described in paragraph (b)(2)(i)(B)(2) upon request of a participant or beneficiary and a description of the information described in paragraph (b)(2)(i)(B)(2) which may be obtained on request;

vii. In the case of plans which offer an investment alternative which is designed to permit a participant or beneficiary to directly or indirectly acquire or sell any employer security (employer security alternative), a description of the procedures established to provide for the confidentiality of information relating to the purchase, holding and sale of employer securities, and the exercise of voting, tender and similar rights, by participants and beneficiaries, and the name, address and phone number of the plan fiduciary, responsible for monitoring compliance with the procedures (see paragraphs (d)(2)(ii)(E)(4)(vii), (viii) and (ix) of this section); and

viii. In the case of an investment alternative which is subject to the Securities Act of 1933, and in which the participant or beneficiary has no assets invested, immediately following the participant's or beneficiary's initial investment, a copy of the most recent prospectus provided to the plan. This condition will be deemed satisfied if the participant or beneficiary has been provided with a copy of such most recent prospectus immediately prior to the participant's or beneficiary's initial investment in such alternative;

ix. Subsequent to an investment in a

investment alternative, any materials provided to the plan relating to the exercise of voting, tender or similar rights which are incidental to the holding in the account of the participant or beneficiary of an ownership interest in such alternative to the extent that such rights are passed through to participants and beneficiaries under the terms of the plan, as well as a description of or reference to plan provisions relating to the exercise of voting, tender or similar rights.

2. The participants or beneficiary is provided by the identified plan fiduciary (or a person or persons designated by the plan fiduciary to act on his behalf), either directly or upon request, the following information, which shall be based on the latest information available to the plan:

   i. A description of the annual operating expenses of each designated investment alternative (e.g., investment management fees, administrative fees, transaction costs) which reduce the rate of return to participants and beneficiaries, and the aggregate amount of such expenses expressed as a percentage of average net assets of the designated investment alternative;
   ii. Copies of any prospectuses, financial statements and reports, and of any other materials relating to the investment alternatives available under the plan, to the extent such information is provided to the plan;
   iii. A list of the assets comprising the portfolio of each designated investment alternative which constitute plan assets within the meaning of 29 C.F.R. 2510.3-101, the value of each such asset (or the proportion of the investment alternative which it comprises), and, with respect to each such asset which is a fixed rate investment contract issued by a bank, savings and loan association or insurance company, the name of the issuer of the contract, the term of the contract and the rate of return on the contract;
   iv. Information concerning the value of shares or units in designated investment alternatives available to participants and beneficiaries under the plan, as well as the past and current investment performance of such alternatives, determined net of expenses, on a reasonable and consistent basis; and
   v. Information concerning the value of shares or units in designated investment alternatives held in the accounts of the

participant or beneficiary.

ii. A plan does not fail to provide an opportunity for a participant or beneficiary to exercise control over his individual account merely because it -

A. Imposes charges for reasonable expenses. A plan may charge participants' and beneficiaries' accounts for the reasonable expenses of carrying out investment instructions, provided that procedures are established under the plan to periodically inform such participants and beneficiaries of actual expenses incurred with respect to their respective individual accounts;
B. Permits a fiduciary to decline to implement investment instructions by participants and beneficiaries. A fiduciary may decline to implement participant and beneficiary instructions which are described at paragraph (d)(2)(ii) of this section, as well as instructions specified in the plan, including instructions -

1. Which would result in a prohibited transaction described in ERISA section 406 or section 4975 of the Internal Revenue Code, and
2. Which would generate income that would be taxable to the plan;

C. Imposes reasonable restrictions on frequency of investment instructions. A plan may impose reasonable restrictions on the frequency with which participants and beneficiaries may give investment instructions. In no event however, is such a restriction reasonable unless, with respect to each investment alternative made available by the plan, it permits participants and beneficiaries to give investment instructions with a frequency which is appropriate in light of the market volatility to which the investment alternative may reasonably be expected to be subject, provided that -

1. At least three of the investment alternatives made available pursuant to the requirements of paragraph (b)(3)(i)(B) of this section, which constitute a broad range of investment alternatives, permit participants and beneficiaries to give investment instructions no less frequently than once within any three month period; and
2. (i) At least one of the investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(1) of this section permits participants and beneficiaries to give investment instructions with regard to transfers into the investment alternative as frequently as participants and beneficiaries are permitted to give investment instructions with respect to any investment alternative made available by the plan which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period; or

i. With respect to each investment alternative which permits participants and beneficiaries to give investment instructions more frequently than once within any three month period, participants and beneficiaries are permitted to direct their investments from such alternative into an income producing, low risk, liquid fund, subfund, or account as frequently as their are permitted to give investment instructions with respect to each such alternative

and, with respect to such fund, subfund or account, participants and beneficiaries are permitted to direct investments from the fund, subfund or account to an investment alternative meeting the requirements of paragraph (b)(2)(ii)(C)(1) as frequently as they are permitted to give investment instructions with respect to that investment alternative; and

3. With respect to transfers from an investment alternative which is designed to permit a participant or beneficiary to directly or indirectly acquire or sell any employer security (employer security alternative) either:

    i. All of the investment alternatives meeting the requirements of paragraph (b)(2)(ii)(C)(1) of this section must permit participants and beneficiaries to give investment instructions with regard to transfers into each of the investment alternatives as frequently as participants and beneficiaries are permitted to give investment instructions with respect to the employer security alternative; or
    ii. Participants and beneficiaries are permitted to direct their investments from each employer security alternative into an income producing, low risk, liquid, fund, subfund, or account as frequently as they are permitted to give investment instructions with respect to such employer security alternative and, with respect to such fund, subfund, or account, participants and beneficiaries are permitted to direct investments from the fund, subfund or account to each investment alternative meeting the requirements of paragraph (b)(2)(ii)(C)(1) as frequently as they are permitted to give investment instructions with respect to each such investment alternative.
    iii. Paragraph (c) of this section describes the circumstances under which a participant or beneficiary will be considered to have exercised independent control with respect to a particular transaction.

3. Broad range of investment alternatives.

    i. A plan offers a broad range of investment alternatives only if the available investment alternatives are sufficient to provide the participant or beneficiary with a reasonable opportunity to:

        A. Materially affect the potential return on amounts in his individual account with respect to which he is permitted to exercise control and the degree of risk to which such amounts are subject;
        B. Choose from at least three investment alternatives:

            1. Each of which is diversified;
            2. Each of which has materially different risk and return characteristics;

3. Which in the aggregate enable the participant or beneficiary by choosing among them to achieve a portfolio with aggregate risk and return characteristics at any point within the range normally appropriate for the participant or beneficiary; and
4. Each of which when combined with investments in the other alternatives tends to minimize through diversification the overall risk of a participant's or beneficiary's portfolio;

C. Diversify the investment of that portion of his individual account with respect to which he in permitted to exercise control so as to minimize the risk of large losses, taking into account the nature of the plan and the size of participants' or beneficiaries' accounts. In determining whether a plan provides the participant or beneficiary with a reasonable opportunity to diversify his investments, the nature of the investment alternatives offered by the plan and the size of the portion of the individual's account over which he is permitted to exercise control must be considered. Where such portion of the account of any participant or beneficiary is so limited in size that the opportunity to invest in look-through investment vehicles is the only prudent means to assure an opportunity to achieve appropriate diversification, a plan may satisfy the requirements of this paragraph only by offering look-through investment vehicles.

ii. Diversification and look-through investment vehicles. Where look-through investment vehicles are available as investment alternatives to participants and beneficiaries, the underlying investments of the look-through investment shall be considered in determining whether the plan satisfies the requirements of subparagraphs (b)(3)(i)(B) and (b)(3()i)(C).

c. Exercise of control.

1. In general. -

i. Sections 404(c)(1) and 404(c)(2) of the Act and paragraphs (a) and (d) of this section apply only with respect to a transaction where a participant or beneficiary has exercised independent control in fact with respect to the investment of assets in his individual account under an ERISA section 404(c) plan.
ii. For purposes of sections 404(c)(1) and 4040(c)(2) [sic] of the Act and paragraphs (a) and (d) of this section, a participant or beneficiary will be deemed to have exercised control with respect to the exercise of voting, tender and similar rights appurtenant to the participant's or beneficiary's ownership interest in an investment alternative, provided that the participant's or beneficiary's investment in the investment alternative was itself the result of an exercise of control, the participant or beneficiary was provided a reasonable opportunity to give instruction with respect to such incidents of ownership, including the provision of the information described in paragraph (b)(2)(i)(B)(1)(ix) of this section, and the participant or beneficiary has not failed to exercise control by reason of the circumstances described in Paragraph (c)(2) with respect to such incidents of ownership.

2. Independent control. Whether a participant or beneficiary has exercised independent control in fact with respect to a transaction depends on the facts and circumstances of the particular case. However, a participant's or beneficiary's exercise of control is not independent in fact if:

i. The participant or beneficiary is subjected to improper influence by a plan fiduciary or the plan sponsor with respect to the transaction;
ii. A plan fiduciary has concealed material non-public facts regarding the investment from the participant or beneficiary, unless the disclosure of such information by the plan fiduciary to the participant or beneficiary would violate any provision of federal law or any provision of state law which in not preempted by the Act; or
iii. The participant or beneficiary is legally incompetent and the responsible plan

fiduciary accepts the instructions of the participant or beneficiary knowing him to be legally incompetent.

3. Transactions involving a fiduciary. In the case of a sale, exchange or leasing of property (other than a transaction described in paragraph (d)(2)(ii)(E) of this section) between an ERISA section 404(c) plan and a plan fiduciary or an affiliate of such a fiduciary, or a loan to a plan fiduciary or an affiliate of such a fiduciary, the participant or beneficiary will not be deemed to have exercised independent control unless the transaction is fair and reasonable to him. For purposes of this paragraph (c)(3), a transaction will be deemed to be fair and reasonable to a participant or beneficiary if he pays no more than, or receives no less than, adequate consideration (as defined in section 3(18) of the Act) in connection with the transaction.
4. No obligation to advise. A fiduciary has no obligation under part 4 of Title I of this Act to provide investment advice to a participant or beneficiary under an ERISA section 404(c) plan.

d. Effect of independent exercise of control.

1. Participant or beneficiary not a fiduciary. If a participant or beneficiary of an ERISA section 404(c) plan exercises independent control over assets in his individual account in the manner described in paragraph (c), then such participant or beneficiary is not a fiduciary of the plan by reason of such exercise of control.
2. Limitation on liability of plan fiduciaries -

    i. If a participant or beneficiary of an ERISA section 404(c) plan exercises independent control over assets in his individual account in the manner described in paragraph (c), then no other person who is a fiduciary with respect to such plan shall be liable for any loss, or with respect to any breach of part 4 of Title I of the Act that is the direct and necessary result of that participant's or beneficiary's exercise of control.
    ii. Paragraph (d)(2)(i) does not apply with respect to any instruction, which if implemented -

        A. Would not be in accordance with the documents and instruments governing the plan insofar as such documents and instruments are consistent with the provisions of Title I of ERISA;
        B. Would cause a fiduciary to maintain the indicia of ownership of any assets of the plan outside the jurisdiction of the district courts of the United States other than as permitted by section 404(b) of the Act and 29 C.F.R. 2550.404b-1;
        C. Would jeopardize the plan's tax qualified status under the Internal Revenue Code;
        D. Could result in a loss in excess of a participant's or beneficiary's account balance; or
        E. Would result in a direct or indirect:

            1. Sale, exchange or lease of property between a plan sponsor or any affiliate of the sponsor and the plan except for the acquisition or disposition of any interest in a fund, subfund or portfolio managed by a plan sponsor or an affiliate of the sponsor, or the purchase or sale of any qualifying employer security (as defined in section 407(d)(5) of the Act) which meets the conditions of section 408(e) of ERISA and section (d)(2))(ii)(E)(4) below;
            2. Loan to a plan sponsor or any affiliate of the sponsor;
            3. Acquisition or sale of any employer real property (as defined in section 407(d)(2) of the Act); or
            4. Acquisition or sale of any employer security except to the extent that:

                i. Such securities are qualifying employer securities (as defined in section 407(d)(5) of the Act);
                ii. Such securities are stock or an equity

interest in a publicly traded partnership (as defined in section 7704(b) of the Internal Revenue Code of 1986), but only if such partnership is an existing partnership as defined in section 10211(c)(2)(A) of the Revenue Act of 1987 (Public Law 100-203);

iii. Such securities are publicly traded on a national exchange or other generally recognized market;
iv. Such securities are traded with sufficient frequency and in sufficient volume to assure that participant and beneficiary directions to buy or sell the security may be acted upon promptly and efficiently;
v. Information provided to shareholders of such securities is provided to participants and beneficiaries with accounts holding such securities;
vi. Voting, tender and similar rights with respect to such securities are passed through to participants and beneficiaries with accounts holding such securities;
vii. Information relating to the purchase, holding, and sale of securities, and the, exercise of voting, tender, and similar rights with respect to such securities by participants and beneficiaries, is maintained in accordance with procedures which are designed to safeguard the confidentiality of such information, except to the extent necessary to comply with Federal laws or state laws not preempted by the Act;
viii. The plan designates a fiduciary who is responsible for ensuring that: The procedures required under subparagraph (d)(2)(ii)(E)(4)(vii) are sufficient to safeguard the confidentiality of the information described in that subparagraph, such procedures are being followed, and the independent fiduciary required by subparagraph (d)(2)(ii)(E)(4)(ix) is appointed; and
ix. An independent fiduciary is appointed to carry out activities relating to any situations which the fiduciary designated by the plan for purposes of subparagraph (d)(2)(ii)(E)(4)(viii) determines involve a potential for undue employer influence upon participants and beneficiaries, with regard to the direct or indirect exercise of shareholder rights. For purposes of this subparagraph, a fiduciary is not independent if the fiduciary is affiliated with any sponsor of the plan.

iii. The individual investment decisions of an investment manager who is designated directly by a participant or beneficiary or who manages a look-through investment vehicle in which a participant or beneficiary has invested are not direct and necessary results of the designation of the investment manager or of investment in

the look-through investment vehicle. However, this paragraph (d)(2)(iii) shall not be construed to result in liability under section 405 of ERISA with respect to a fiduciary (other than the investment manager) who would otherwise be relieved of liability by reason of section 404(c)(2) of the Act and paragraph (d) of this section.

3. Prohibited Transactions. The relief provided by section 404(c) of the Act and this section applies only to the provisions of part 4 of title I of the Act. Therefore, nothing in this section relieves a disqualified person from the taxes imposed by sections 4975(a) and (b) of the Internal Revenue Code with respect to the transactions prohibited by section 4975(c)(1) of the Code.

e. Definitions. For purposes of this section:

1. *Look-through investment vehicle* means:

   i. An investment company described in section 3(a) of the Investment Company Act of 1940, or a series investment company described in section 18(f) of the 1940 Act or any of the segregated portfolios of such company;
   ii. A common or collective trust fund or a pooled investment fund maintained by a bank or similar institution, a deposit in a bank or similar institution, or a fixed rate investment contract of a bank or similar institution;
   iii. A pooled separate account or a fixed rate investment contract of an insurance company qualified to do business in a State; or
   iv. Any entity whose assets include plan assets by reason of a plan's investment in the entity;

2. *Adequate consideration* has the meaning given it in section 3(18) of the Act and in any regulations under this title;
3. An *affiliate* of a person includes the following:

   i. Any person directly or indirectly controlling, controlled by, or under common control with the person;
   ii. Any officer, director, partner, or employee, an employee of an affiliated employer, relative (as defined in section 3(15) of ERISA), brother, sister, or spouse of a brother or sister, of the person; and
   iii. Any corporation or partnership of which the person is an officer director or partner.

   For purposes of this paragraph (e)(3), the term "*control*" means, with respect to a person other than an individual, the power to exercise a controlling influence over the management or policies of such person.

4. A *designated investment alternative* is a specific investment identified by a plan fiduciary as an available investment alternative under the plan.

f. Examples. The provisions of this section are illustrated by the following examples. Examples (5) through (11) assume that the participant has exercised independent control with respect to his individual account under an ERISA section 404(c) plan described in paragraph (b) and has not directed a transaction described in paragraph (d)(2)(ii).

1. Plan A is an individual account plan described in section 3(34) of the Act. The plan states that a plan participant or beneficiary may direct the plan administrator to invest any portion of his individual account in a particular diversified equity fund managed by an entity which is not affiliated with the plan sponsor, or any other asset administratively feasible for the plan to hold. However, the plan provides that the plan administrator will not implement certain listed instructions for which plan fiduciaries would not be relieved of liability under section 404(c) (see paragraph (d)(2)(ii)).

   Plan participants and beneficiaries are permitted to give investment instructions during the first week of each month with respect to the equity fund and at any time with respect to other investments. The plan provides for the pass-through of voting, tender and similar rights incidental to the holding in the account of a participant or beneficiary of an ownership interest in the equity fund or any other investment alternative available under the plan.

   - The plan administrator of plan A provides each participant and

beneficiary with the information described in subparagraphs (i), (ii), (iii), (iv), (v), (vi) and (vii) of paragraph (b)(2)(i)(B)(1) upon their entry into the plan, and provides updated information in the event of any material change in the information provided.

- Immediately following an investment by a participant or beneficiary in the equity fund, the plan administrator provides a copy of the most recent prospectus received from the fund to the investing participant or beneficiary.
- Immediately following any investment by a participant or beneficiary in any other investment alternative which is subject to the Securities Act of 1933, the plan administrator provides the participant or beneficiary with the most recent prospectus received from that investment alternative (see paragraph (b)(2)(1)(B)(i)(viii)).
- Finally, subsequent to any investment by a participant or beneficiary, the plan administrator forwards to the investing participant or beneficiary any materials provided to the plan relating to the exercise of voting, tender or similar rights attendant to ownership of an interest in such investment (see paragraph (b)(2)(1)(B)(i)(ix)).
- Upon request, the plan administrator provides each participant or beneficiary with copies of any prospectuses, financial statements and reports, and any other materials relating to the investment alternatives available under the plan which are received by the plan (see paragraph (b)(2)(i)(B)(2)(ii)).
- Also upon request, the plan administrator provides each participant and beneficiary with the other information required by paragraph (b)(2)(i)(B)(2) with respect to the equity fund, which is a designated investment alternative, including information concerning the latest available value of the participant's or beneficiary's interest in the equity fund (see paragraph (b)(2)(i)(B)(2)(v)).

Plan A meets the requirements of paragraphs (b)(2)(i)(B)(1) and (2) of this section regarding the provision of investment information.

Note: The regulation imposes no additional obligation on the administrator to furnish or make available materials relating to the companies in which the equity fund invests (e.g., prospectuses, proxies, etc.).

2. Plan C is an individual account plan described in section 3(34) of the Act under which participants and beneficiaries may choose among three investment alternatives which otherwise meet the requirements of paragraph (b) of this section. The plan permits investment instruction with respect to each investment alternative only on the first 10 days of each calendar quarter, i.e., January 1-10, April 1-10, July 1-10 and October 1-10. Plan C satisfies the condition of paragraph (b)(2)(ii)(C)(1) that instruction be permitted not less frequently than once within any three month period, since there is not any three month period during which control could not be exercised.
3. Assume the same facts as in paragraph (f)(2), except that investment instruction may only be given on January 1, April 1, July 1 and October 1. Plan C is not an ERISA section 404(c) plan because it does not satisfy the condition of paragraph (b)(2)(ii)(C)(1) that instruction be permitted not less frequently than once within any three month period. Under these facts, there is a three month period, e.g., January 2 through April 1, during which control could not be exercised by participants and beneficiaries.
4. Plan D is an individual account plan described in section 3(34) of the Act under which participants and beneficiaries may choose among three diversified investment alternatives which constitute a broad range of investment alternatives. The plan also permits investment instruction with respect to an employer securities alternative but provides that a participant or beneficiary can invest no more than 25% of his account balance in this alternative. This restriction does not affect the availability of relief under section 404(c) inasmuch as it does not relate to the three diversified investment alternatives and, therefore, does not cause the plan to fail to provide an

opportunity to choose from a broad range of investment alternatives.

5. A participant, P, independently exercises control over assets in his individual account plan by directing a plan fiduciary, F, to invest 100% of his account balance in a single stock. P is not a fiduciary with respect to the plan by reason of his exercise of control and F will not be liable for any losses that necessarily result from P's investment instruction.
6. Assume the same facts as in paragraph (f)(5), except that P directs F to purchase the stock from B, who is a party in interest with respect to the plan. Neither P nor F has engaged in a transaction prohibited under section 406 of the Act: P because he is not a fiduciary with respect to the plan by reason of his exercise of control and F because he is not liable for any breach of part 4 of Title I that is the direct and necessary consequence of P's exercise of control. However, a prohibited transaction under section 4975(c) of the Internal Revenue Code may have occurred, and, in the absence of an exemption, tax liability may be imposed pursuant to sections 495(a) and (b) of the Code.
7. Assume the same facts as in paragraph (f)(5), except that P does not specify that the stock be purchased from B, and F chooses to purchase the stock from B. In the absence of an exemption, F has engaged in a prohibited transaction described in 406(a) of ERISA because the decision to purchase the stock from B is not a direct or necessary result of P's exercise or control.
8. Pursuant to the terms of the plan, plan fiduciary F designates three reputable investment managers whom participants may appoint to manage assets in their individual accounts. Participant P selects M, one of the designated managers, to manage the assets in his account. M prudently manages P's account for 6 months after which he incurs losses in managing the account through his imprudence. M has engaged in a breach of fiduciary duty because M's imprudent management of P's account is not a direct or necessary result of P's exercise of control (the choice of M as manager). F has no fiduciary liability for M's imprudence because he has no affirmative duty to advise P (see paragraph (c)(4)) and because F is relieved of co-fiduciary liability by reason of section 404(c)(2) (see paragraph (d)(2)(iii)). F does have a duty to monitor M's performance to determine the suitability of continuing M as an investment manager, however, and M's imprudence would be a factor which F must consider in periodically reevaluating its decision to designate M.
9. Participant P instructs plan fiduciary F to appoint G as his investment manager pursuant to the terms of the plan which provide P total discretion in choosing an investment manager. Through G's imprudence, G incurs losses in managing P's account. G has engaged in a breach of fiduciary duty because G's imprudent management of P's account is not a direct or necessary result of P's exercise of control (the choice of G as manager). Plan fiduciary F has no fiduciary liability for G's imprudence because F has no obligation to advise P (see paragraph (c)(4)) and because F is relieved of co-fiduciary liability for G's actions by reason of section 402(c)(2) (see paragraph (d)(2)(iii)). In addition, F also has no duty to determine the suitability of G as an investment manager because the plan does not designate G as an investment manager.
10. Participant P directs a plan fiduciary, F, a bank, to invest all of the assets in his individual account in a collective trust fund managed by F that is designed to be invested solely in a diversified portfolio of common stocks. Due to economic conditions, the value of the common stocks in the bank collective trust fund declines while the value of publicly-offered fixed income obligations remains relatively stable. F is not liable for any losses incurred by P solely because his individual account was not diversified to include fixed income obligations. Such losses are the direct result of P's exercise of control; moreover, under paragraph (c)(4) of this section F has no obligation to advise P regarding his investment decisions.
11. the same facts as in paragraph (f)(10) except that F, in managing the co ve trust fund, inves ts the assets of the fund solely in a few highly speculative stocks. F is liable for losses resulting from its imprudent investment in the speculative stocks and for its failure to diversify the assets of the account. This conduct involves a separate breach of F's fiduciary duty that is not a direct or necessary result of P's exercise of control (see paragraph (d)(2)(iii)).

g. Effective date.

1. In general. Except as provided in paragraph (g)(2), this section is effective with respect to transactions occurring on or after the first day of the second plan year beginning on or after October 13, 1992.
2. This section is effective with respect to transactions occurring under a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before October 13, 1992 after the later of the date determined under paragraph (g)(1) or the date on which the last collective bargaining agreement terminates. For

purposes of this paragraph (g)(2), any extension or renegotiation of a collective bargaining agreement which is ratified on or after October 13, 1992 is to be disregarded in determining the date on which the agreement terminates.

3. Transactions occurring before the date determined under subparagraph (g)(1) or (2) of this section, as applicable, are governed by section 404(c) of, the Act without regard to the regulation.

Department of Labor

Delinquent Filer Voluntary Compliance Program

April 27, 1995 (60 FR 20874)

Recap
Permits delinquent plan administrators to comply with annual reporting obligations under Title I of the ERISA with reduced civil penalties.

Agency: Department of Labor, Employee Benefits Security Administration

Action: Grant of Class Exemption

Effective Date: March 28, 2002

Program

Section 1--Delinquent Filer Voluntary Compliance (DFVC) Program

The DFVC Program is intended to afford eligible plan administrators (described in Section 2 of this Notice) the opportunity to avoid the assessment of civil penalties otherwise applicable to administrators who fail to file timely annual reports for plan years beginning on or after January 1, 1988. Eligible administrators may avail themselves of the DFVC Program by complying with the filing requirements and paying the civil penalties specified in Section 3 or Section 4, as appropriate, of this Notice.

Section 2--Scope, Eligibility and Effective Date

.01 Scope. The DFVC Program described in this Notice provides relief from assessment of civil penalties otherwise applicable to plan administrators who fail or refuse to file timely annual reports. Relief under this Program does not extend to penalties that may be assessed for annual reports that are determined by the Department to be incomplete or otherwise deficient.

.02 Eligibility. The DFVC Program is available only to a plan administrator that complies with the requirements of Section 3 or Section 4, as appropriate, of this Notice prior to the date on which the administrator is notified in writing by the Department of a failure to file a timely annual report under Title I of ERISA.

.03 Effective date. The DFVC Program described herein shall be effective March 28, 2002. The Department intends that this DFVC Program to be of indefinite duration; however, the Program may be modified from time to time or terminated in the sole discretion of the Department upon publication of notice in the Federal Register.

Section 3--Plan Administrators Filing Annual Reports

.01 General. A plan administrator electing to file a late annual report (Form 5500 Series Annual Return/Report) under this DFVC Program must comply with the requirements of this Section 3.

.02 Filing a Complete Annual Report.

(a) The plan administrator must file a complete Form 5500 Series Annual Return/Report, including all required schedules and attachments, for each plan year for which the plan

administrator is seeking relief under the Program. This filing shall be sent to PWBA at the appropriate EFAST address listed in the instructions for the most current Form 5500 Annual Return/Report, or electronically in accordance with the EFAST electronic filing requirements. See the EFAST Internet site at www.efast.dol.gov to view forms and instructions.

Note: Do not forward the applicable penalty amount described in Section 3.03 to the EFAST addresses listed above.

(b) For purposes of subparagraph (a), the plan administrator shall file either: (1) The Form 5500 Series Annual Return/Report form (but not a Form 5500-R) issued for each plan year for which the relief is sought, or (2) the most current Form 5500 Annual Return/Report form issued (and, if necessary, indicate in the appropriate space on the first page of the Form 5500 the plan year for which the annual return/report is being filed). Forms may be obtained from the IRS by calling 1-800-TAX-FORM (1-800-829-3676). Forms for certain pre-1999 plan years also are available through the Internet sites for PWBA and the Internal Revenue Service (IRS) (www.dol.gov/dol/pwba, www.irs.gov). For further information on EFAST filing requirements, see the EFAST Internet site (www.efast.dol.gov) and the instructions for the most current Form 5500.

.03 Payment of Applicable Penalty Amount.

(a) The plan administrator shall pay the applicable penalty amount by submitting to the DFVC Program the information described in subparagraph (b) along with a check made payable to the ``U.S. Department of Labor'' for the applicable penalty amount determined in accordance with subparagraph (c). This separate submission shall be made by mail to: DFVC Program, PWBA, P.O. Box 530292, Atlanta, GA 30353-0292. The annual returns/reports for multiple plans may not be included in a single DFVC Program submission. A separate submission to the DFVC Program (including a separate check for the applicable penalty amount) must be made for each plan.

Note: Personal or private delivery service cannot be made to this address.

(b)

(1) The administrator shall submit to the DFVC Program, with the applicable penalty amount, a paper copy of the Form 5500 Annual Return/Report filed as described in paragraph .02(a), without schedules and attachments. In the event that the plan administrator files as described in paragraph .02(a) using a 1998 or prior plan year form, a paper copy of only the first page of the Form 5500 or Form 5500-C, as applicable, should be submitted to the DFVC Program.

(2) In the case of a plan sponsored by a Code section 501(c)(3) organization described in paragraph .03(c)(4), the administrator shall clearly note ``501(c)(3) Plan'' in the upper-right hand corner of the first page of the Form 5500 Annual Return/Report submitted to the DFVC Program (in Atlanta, Georgia). This notation should not be included on the annual report filed with PWBA pursuant to paragraph .02 (in Lawrence, Kansas) because it may interfere with the proper processing of the required report.

(c) The applicable penalty amount shall be determined as follows:

(1) In the case of a plan with fewer than 100 participants at the beginning of the plan year (or a plan that would be treated as such a plan under the ``80-120'' participant rule described in 29 CFR 2520.103-1(d) for the subject plan year) (hereinafter ``small plan''), the applicable penalty amount is $10 per day for each day the annual report is filed after the date on which the annual report was due (without regard to any extensions), not to exceed the greater of: $750 per annual report or, in the case of a DFVC submission relating to more than one delinquent annual report filing for the plan, $1,500 per plan.

(2) In the case of a plan with 100 or more participants at the beginning of the plan year (other than a plan that is eligible to use and uses the ``80-120'' participant rule) (hereinafter ``large plan''), the applicable penalty amount is $10 per day for each day the annual report is filed after the date on which the annual report was due (without regard to any extensions), not to exceed the greater of: $2,000 per annual report or, in the case of a DFVC submission relating to more than one delinquent annual report filing for the plan, $4,000 per plan.

(3) In the case of a DFVC submission relating to more than one delinquent annual report filing for a plan, the applicable penalty amount shall be determined by reference to paragraph (c)(2) if for any plan year for which the submission is made the plan was a ``large plan.''

(4) In the case of a plan administrator filing an annual report for a ``small plan'' that is sponsored by a Code section 501(c)(3) organization (including a Code section 403(b) plan), the applicable penalty amount is $10 per day for each day the annual report is filed after the date on which the annual report was due (without regard to any extensions), not to exceed $750 per DFVC submission, including DFVC submissions that relate to more than one delinquent annual report filing for the plan. This paragraph (c)(4) shall not apply if, as of the date the plan files pursuant to this DFVC Program, there is a delinquent or late annual report due for a plan year for which the plan was a ``large plan.'' See paragraph .03(b)(2) for special instructions pertaining to small plans sponsored by Code section 501(c)(3) organizations.

.04 Liability for Applicability Amount.

The plan administrator is personally liable for the payment of civil penalties assessed under section 502(c)(2) of ERISA, therefore, civil penalties, including amounts paid under this DFVC Program, shall not be paid from the assets of an employee benefit plan.

Section 4--Plan Administrators Filing Notices for Apprenticeship and Training Plans and Statements for ``Top Hat'' Plans

.01 General. Administrators of apprenticeship and training plans, described in 29 CFR 2520.104-22, and administrators of pension plans for a select group of management or highly compensated employees, described in 29 CFR 2520.104-23(a) (``top hat plans''), who elect to file the applicable notice and statement described in sections 2520.104-22 and 2520.104-23, respectively, as a condition of relief from the annual reporting requirements may, in lieu of filing any past due annual report and paying otherwise applicable civil penalties, comply with the requirements of this Section 4. Administrators who have complied with the requirements of this Section 4 shall be considered as having elected compliance with the exemption(s) and/or alternative method of compliance prescribed in Secs. 2520.104-22, or 2520.104-23, as appropriate, for all subsequent plan years.

.02 Filing Applicable Notice or Statement with the U.S. Department of Labor.

The plan administrator must prepare and file a notice or statement meeting the requirements of Secs. 2520.104-22, or 2520.104-23, as appropriate.

The apprenticeship and training plan notice described in Sec. 2520.104-22 shall be sent by mail or by private delivery service to: Apprenticeship and Training Plan Exemption, Pension and Welfare Benefits Administration, Room N-1513, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

The ``top hat'' plan statement described in Sec. 2520.104-23 shall be sent by mail or by private delivery service to: Top Hat Plan Exemption, Pension and Welfare Benefits Administration, Room N-1513, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Note: A plan sponsor maintaining more than one ``top hat'' plan is not required to file a separate statement for each such plan. See Sec. 2520.104-23(b).

.03 Payment of Applicable Penalty Amount.

(a) The plan administrator shall pay the applicable penalty amount by submitting to the DFVC Program the information described in subparagraph (b) along with a check made payable to the ``U.S. Department of Labor'' for the applicable penalty amount determined in accordance with subparagraph (c). This submission shall be made by mail to: DFVC Program, PWBA, P.O. Box 530292, Atlanta, GA 30353-0292.

Note: Personal or private delivery service cannot be made to this address.

(b) The administrator shall submit to the DFVC Program with the applicable penalty amount the most current Form 5500 Annual Return/Report (without schedules and attachments). For

purposes of this requirement, the plan administrators must complete Form 5500 line items 1a-1b, 2a-2c, 3a-3c, and use plan number 888 for all ``top hat'' plans and plan number 999 for all apprenticeship and training plans. In the case of plan sponsors maintaining more than one ``top hat'' plan and plan sponsors maintaining more than one apprenticeship and training plan described in Sec. 2520.104-22, the plan administrator shall clearly identify each such plan on the Form 5500 filed with the Department of Labor or on an attachment thereto. The plan administrator also must sign and date the Form 5500.

(c) The applicable penalty amount is $750 for each DFVC submission, without regard to the number of plans maintained by the same plan sponsor for which notices and statements are filed pursuant to Section 4 and without regard to the number of plan participants covered under such plan or plans.

.04 Liability for Applicability Amount.

The plan administrator is personally liable for the payment of civil penalties assessed under section 502(c)(2) of ERISA, therefore, civil penalties, including amounts paid under this DFVC Program, shall not be paid from the assets of an employee benefit plan.

Section 5--Waiver of Right to Notice, Abatement of Assessment and Plan Status

.01 Payment of a penalty under the terms of this DFVC Program constitutes, with regard to the filings submitted under the Program, a waiver of an administrator's right both to receive notices of intent to assess a penalty under Sec. 2560.502c-2 from the Department and to contest the Department's assessment of the penalty amount.

.02 Although this Notice does not provide relief from late filing penalties under the Code, the Internal Revenue Service (IRS) has provided the Department with the following information. The Code and the regulations thereunder require information to be filed on the Form 5500 Series Annual Return/Report and provide the IRS with authority to

impose or assess penalties for failing to timely file. The IRS has agreed to provide certain penalty relief under the Code for delinquent Form 5500 Annual Returns/Reports filed for Title I plans where the conditions of this DFVC Program have been satisfied. See IRS Notice 2002-23.

.03 Although this Notice does not provide relief from late filing penalties under Title IV of ERISA, the Pension Benefit Guaranty Corporation (PBGC) has provided the Department with the following information. Title IV of ERISA and the regulations thereunder require information to be filed on the Form 5500 Series Annual Return/Report and provide the PBGC with authority to assess penalties against a plan administrator under ERISA Sec. 4071 for late filing of the Form 5500 Series Annual Return/Report. The PBGC has agreed that it will not assess a penalty against a plan administrator under ERISA Sec. 4071 for late filing of a Form 5500 Series Annual Return/Report filed for a Title I plan where the conditions of this DFVC Program have been satisfied.

.04 Acceptance by the Department of a filing and penalty payment made pursuant to this DFVC Program does not represent a determinationby the Department of Labor as to the status of the arrangement as a plan, the particular type of plan under Title I or ERISA, the status of the plan sponsor under the Code, or a determination by the Department of Labor that the provisions of Secs. 2520.104-22 or 2520.104-23 have been satisfied.

Signed at Washington, DC, this 25th day of March, 2002.

Ann L. Combs,

Assistant Secretary, Pension and Welfare Benefits Administration, U.S. Department of Labor.

29 CFR Part 2550

Default Investment Alternatives Under Participant Directed Individual Account Plans; Final Rule

DEPARTMENT OF LABOR

Employee Benefits Security Administration

29 CFR Part 2550

RIN 1210–AB10

Default Investment Alternatives Under Participant Directed Individual Account Plans

AGENCY: Employee Benefits Security Administration.

ACTION: Final rule.

SUMMARY: This document contains a final regulation that implements recent amendments to title I of the Employee Retirement Income Security Act of 1974 (ERISA) enacted as part of the Pension Protection Act of 2006, Public Law 109–280, under which a participant in a participant directed individual account pension plan will be deemed to have exercised control over assets in his or her account if, in the absence of investment directions from the participant, the plan invests in a qualified default investment alternative. A fiduciary of a plan that complies with this final regulation will not be liable for any loss, or by reason of any breach, that occurs as a result of such investments. This regulation describes the types of investments that qualify as default investment alternatives under section 404(c)(5) of ERISA. Plan fiduciaries remain responsible for the prudent selection and monitoring of the qualified default investment alternative. The regulation conditions relief upon advance notice to participants and beneficiaries describing the circumstances under which contributions or other assets will be invested on their behalf in a qualified default investment alternative, the investment objectives of the qualified default investment alternative, and the right of participants and beneficiaries to direct investments out of the qualified default investment alternative. This regulation will affect plan sponsors and fiduciaries of participant directed individual account plans, the participants and beneficiaries in such plans, and the service providers to such plans.

DATES: This final rule is effective on December 24, 2007.

FOR FURTHER INFORMATION CONTACT: Lisa M. Alexander, Kristen L. Zarenko, or Katherine D. Lewis, Office of Regulations and Interpretations, Employee Benefits Security Administration, (202) 693–8500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

A. Background

With the enactment of the Pension Protection Act of 2006 (Pension Protection Act), section 404(c) of ERISA was amended to provide relief afforded by section 404(c)(1) to fiduciaries that invest participant assets in certain types of default investment alternatives in the absence of participant investment direction. Specifically, section 624(a) of the Pension Protection Act added a new section 404(c)(5) to ERISA. Section 404(c)(5)(A) of ERISA provides that, for purposes of section 404(c)(1) of ERISA, a participant in an individual account plan shall be treated as exercising control over the assets in the account with respect to the amount of contributions and earnings which, in the absence of an investment election by the participant, are invested by the plan in accordance with regulations prescribed by the Secretary of Labor. Section 624(a) of the Pension Protection Act directed that such regulations provide guidance on the appropriateness of designating default investments that include a mix of asset classes consistent with capital preservation or long-term capital appreciation, or a blend of both. In the Department's view, this statutory language provides the stated relief to fiduciaries of any participant directed individual account plan that complies with its terms and with those of the Department's regulation under section 404(c)(5) of ERISA. The relief afforded by section 404(c)(5), therefore, is not contingent on a plan being an ''ERISA 404(c) plan'' or otherwise meeting the requirements of the Department's regulations at § 2550.404c–1. The amendments made by section 624 of the Pension Protection Act apply to plan years beginning after December 31, 2006.

On September 27, 2006, the Department, exercising its authority under section 505 of ERISA and consistent with section 624 of the Pension Protection Act, published a notice of proposed rulemaking in the **Federal Register** (71 FR 56806) that, upon adoption, would implement the provisions of ERISA section 404(c)(5). The notice included an invitation to interested persons to comment on the proposal. In response to this invitation, the Department received over 120 written comments from a variety of parties, including plan sponsors and fiduciaries, plan service providers, financial institutions, and employee benefit plan industry representatives. Submissions are available for review under Public Comments on the Laws & Regulations page of the Department's Employee Benefits Security Administration Web site at *http://www.dol.gov/ebsa*.

Set forth below is an overview of the final regulation, along with a discussion of the public comments received on the proposal.

B. Overview of Final Rule

Scope of the Fiduciary Relief

Paragraph (a)(1) of § 2550.404c–5, like the proposal, generally describes the scope of the regulation and the fiduciary relief afforded by ERISA section 404(c)(5), under which a participant who does not give investment directions will be treated as exercising control over his or her account with respect to assets that the plan invests in a qualified default investment alternative. Paragraph (a)(2) of § 2550.404c–5, also like the proposal, makes clear that the standards set forth in the regulation apply solely for purposes of determining whether a fiduciary meets the requirements of the regulation. These standards are not intended to be the exclusive means by which a fiduciary might satisfy his or her responsibilities under ERISA with respect to the investment of assets on behalf of a participant or beneficiary in an individual account plan who fails to give investment directions. As recognized by the Department in the preamble to the proposal, investments in money market funds, stable value products and other capital preservation investment vehicles may be prudent for some participants or beneficiaries even though such investments themselves may not generally constitute qualified default investment alternatives for purposes of the regulation. The Department further notes that such investments, while not themselves qualified default investment alternatives for purposes of investments made following the effective date of this regulation, may nonetheless constitute part of the investment portfolio of a qualified default investment alternative.

Paragraph (b) of § 2550.404c–5 defines the scope of the fiduciary relief provided. Paragraph (b)(1) of the proposal provided that, subject to certain exceptions, a fiduciary of an individual account plan that permits participants and beneficiaries to direct the investment of assets in their accounts and that meets the conditions of the regulation, as set forth in paragraph (c) of § 2550.404c–5, shall not be liable for any loss, or by reason of any breach under part 4 of title I of ERISA, that is the direct and necessary result of investing all or part of a

participant's or beneficiary's account in a qualified default investment alternative, or of investment decisions made by the entity described in paragraph (e)(3) in connection with the management of a qualified default investment alternative. The Department has revised paragraph (b)(1) of the final regulation to clarify that a fiduciary of an individual account plan that permits participants and beneficiaries to direct the investment of assets in their accounts and that meets the conditions of the regulation, as set forth in paragraph (c) of § 2550.404c–5, shall not be liable for any loss under part 4 of title I, or by reason of any breach, that is the direct and necessary result of investing all or part of a participant's or beneficiary's account in any qualified default investment alternative within the meaning of paragraph (e), or of investment decisions made by the entity described in paragraph (e)(3) in connection with the management of a qualified default investment alternative. The phrase ''any qualified default investment alternative'' in the final regulation is intended to make clear that a fiduciary will be afforded relief without regard to which type of qualified default investment alternative the fiduciary selects, provided that the fiduciary prudently selects the particular product, portfolio or service, and meets the other conditions of the regulation.

Some commenters asked whether the relief provided by the final regulation covers a plan fiduciary's decision regarding which of the qualified default investment alternatives will be available to a plan's participants and beneficiaries who fail to direct their investments. As long as a plan fiduciary selects any of the qualified default investment alternatives, and otherwise complies with the conditions of the rule, the plan fiduciary will obtain the fiduciary relief described in the rule. The Department believes that each of these qualified default investment alternatives is appropriate for participants and beneficiaries who fail to provide investment direction; accordingly, the rule does not require a plan fiduciary to undertake an evaluation as to which of the qualified default investment alternatives provided for in the regulation is the most prudent for a participant or the plan. However, the plan fiduciary must prudently select and monitor an investment fund, model portfolio, or investment management service within any category of qualified default investment alternatives in accordance with ERISA's general fiduciary rules. For example, a plan fiduciary that chooses an investment management service that is intended to comply with paragraph (e)(4)(iii) of the final regulation must undertake a careful evaluation to prudently select among different investment management services.

Application of General Fiduciary Standards

The scope of fiduciary relief provided by this regulation is the same as that extended to plan fiduciaries under ERISA section 404(c)(1)(B) in connection with carrying out investment directions of plan participants and beneficiaries in an ''ERISA section 404(c) plan'' as described in 29 CFR 2550.404c–1(a), although it is not necessary for a plan to be an ERISA section 404(c) plan in order for the fiduciary to obtain the relief accorded by this regulation. As with section 404(c)(1) of the Act and the regulation issued thereunder (29 CFR 2550.404c–1), the final regulation does not provide relief from the general fiduciary rules applicable to the selection and monitoring of a particular qualified default investment alternative or from any liability that results from a failure to satisfy these duties, including liability for any resulting losses. See paragraph (b)(2) of § 2550.404c–5.

Several commenters asked the Department to provide additional guidance concerning the general fiduciary obligations of these plan fiduciaries in selecting a qualified default investment alternative. The selection of a particular qualified default investment alternative (i.e. a specific product, portfolio or service) is a fiduciary act and, therefore, ERISA obligates fiduciaries to act prudently and solely in the interest of the plan's participants and beneficiaries. A fiduciary must engage in an objective, thorough, and analytical process that involves consideration of the quality of competing providers and investment products, as appropriate. As with other investment alternatives made available under the plan, fiduciaries must carefully consider investment fees and expenses when choosing a qualified default investment alternative. See paragraph (b)(2) of § 2550.404c–5.

Paragraph (b)(3) of the final regulation has been modified to reflect changes to paragraph (e)(3)(i) regarding persons responsible for the management of a qualified default investment alternative's assets. Paragraph (b)(3) of § 2550.404c–5 makes clear that nothing in the regulation relieves any such fiduciaries from their general fiduciary duties or from any liability that results from a failure to satisfy these duties, including liability for any resulting losses. As proposed, paragraph (b)(3) was limited to investment managers. The final regulation, at paragraph (e)(3)(i) of § 2550.404c–5, broadens the category of persons who can manage the assets of a qualified default investment alternative, thereby requiring a conforming change to paragraph (b)(3). The changes to paragraph (e)(3)(i) are discussed in detail below.

Finally, the regulation also provides no relief from the prohibited transaction provisions of section 406 of ERISA or from any liability that results from a violation of those provisions, including liability for any resulting losses. Therefore, plan fiduciaries must avoid self-dealing, conflicts of interest, and other improper influences when selecting a qualified default investment alternative. See paragraph (b)(4) of § 2550.404c–5.

Application of Final Rule to Circumstances Other Than Automatic Enrollment

Several commenters requested clarification on the extent to which the fiduciary relief provided by the final regulation will be available to plan fiduciaries for assets that are invested in a qualified default investment alternative on behalf of participants and beneficiaries in circumstances other than automatic enrollment. Consistent with the views expressed concerning the scope of the relief provided by the proposed regulation, it is the view of the Department that nothing in the final regulation limits the application of the fiduciary relief to investments made only on behalf of participants who are automatically enrolled in their plan. Like the proposal, the final regulation applies to situations beyond automatic enrollment. Examples of such situations include: The failure of a participant or beneficiary to provide investment direction following the elimination of an investment alternative or a change in service provider, the failure of a participant or beneficiary to provide investment instruction following a rollover from another plan, and any other failure of a participant to provide investment instruction. Whenever a participant or beneficiary has the opportunity to direct the investment of assets in his or her account, but does not direct the investment of such assets, plan fiduciaries may avail themselves of the relief provided by this final regulation, so long as all of its conditions have been satisfied.

Conditions for the Fiduciary Relief

Like the proposal, the final regulation contains six conditions for relief. These

conditions are set forth in paragraph (c) of the regulation.

The first condition of the final regulation, consistent with the Department's proposal, requires that assets invested on behalf of participants or beneficiaries under the final regulation be invested in a ''qualified default investment alternative.'' See § 2550.404c–5(c)(1). This condition is unchanged from the proposal.

The second condition also is unchanged from the proposal. The participant or beneficiary on whose behalf assets are being invested in a qualified default investment alternative must have had the opportunity to direct the investment of assets in his or her account but did not direct the investment of the assets. See § 2550.404c–5(c)(2). In other words, no relief is available when a participant or beneficiary has provided affirmative investment direction concerning the assets invested on the participant's or beneficiary's behalf.

The third condition continues to require that participants or beneficiaries receive information concerning the investments that may be made on their behalf. As in the proposal, the final regulation requires both an initial notice and an annual notice. The proposed regulation required an initial notice within a reasonable period of time of at least 30 days in advance of the first investment. A number of commenters explained that requiring 30 days' advance notice would preclude plans with immediate eligibility and automatic enrollment from withholding of contributions as of the first pay period. Commenters argued that plan sponsors should not be discouraged from enrolling employees in their plan on the earliest possible date.

The Department agrees that plan sponsors should not be discouraged from enrolling employees on the earliest possible date. To address this issue, the Department has modified the advance notice requirements that appeared in the proposed regulation. For purposes of the initial notification requirement, the final regulation, at paragraph (c)(3)(i), provides that the notice must be provided (A) at least 30 days in advance of the date of plan eligibility, or at least 30 days in advance of any first investment in a qualified default investment alternative on behalf of a participant or beneficiary described in paragraph (c)(2), or (B) on or before the date of plan eligibility, provided the participant has the opportunity to make a permissible withdrawal (as determined under section 414(w) of the Internal Revenue Code of 1986 (Code)).

With regard to the foregoing, the Department notes that, unlike the proposal, the final regulation measures the time period for the 30-day advance notice requirement from the date of plan eligibility to better coordinate the notice requirements with the Code provisions governing permissible withdrawals. The Department also notes that if a fiduciary fails to comply with the final regulation for a participant's first elective contribution because a notice is not provided at least 30 days in advance of plan eligibility, the fiduciary may obtain relief for later contributions with respect to which the 30-day advance notice requirement is satisfied.

In addition, while retaining the general 30-day advance notice requirement, the final regulation also permits notice ''on or before'' the date of plan eligibility if the participant is permitted to make a permissible withdrawal in accordance with 414(w) of the Code. In this regard, the Department believes that if participants are not going to be afforded the option of withdrawing their contributions without additional tax, such participants should be given notice sufficiently in advance of the contribution to enable them to opt out of plan participation.

The Department notes that the phrase in paragraph (c)(3)(i)—''or at least 30 days in advance of any first investment in a qualified default investment alternative''—is intended to accommodate circumstances other than elective contributions. For example, although fiduciary relief would not be available with respect to a fiduciary's investment of a participant or beneficiary's rollover amount from another plan into a qualified default investment alternative if the 30-day advance notice requirement is not satisfied, relief may be available when a fiduciary invests the rollover amount into a qualified default investment alternative after satisfying the notice requirement in paragraph (c)(3)(i)(A) as well as the regulation's other conditions.

Finally, the phrase—''in advance of the date of plan eligibility * * * or any first investment in a qualified default investment alternative''—is not intended to foreclose availability of relief to fiduciaries that, prior to the adoption of the final regulation, invested assets on behalf of participants and beneficiaries in a default investment alternative that would constitute a ''qualified default investment alternative'' under the regulation. In such cases, the phrase—''in advance of the date of plan eligibility * * * or any first investment''—should be read to mean the first investment with respect to which relief under the final regulation is intended to apply after the effective date of the regulation.

The timing of the annual notice requirement contained in the final regulation has not changed from the proposal. Notice must be provided within a reasonable period of time of at least 30 days in advance of each subsequent plan year. See § 2550.404c–5(c)(3)(ii). One commenter requested that the Department eliminate the annual notice requirement. The Department retained the annual notice requirement because the Pension Protection Act specifically amended ERISA to require an annual notice. Further, the Department believes that it is important to provide regular and ongoing notice to participants and beneficiaries whose assets are invested in a qualified default investment alternative to ensure that they are in a position to make informed decisions concerning their participation in their employer's plan. Several commenters supported the furnishing of an annual reminder to participants and beneficiaries that their assets have been invested in a qualified default investment alternative and that participants and beneficiaries may direct their contributions into other investment alternatives available under the plan.

Paragraph (c)(3), as proposed, provided that the required disclosures could be included in a summary plan description, summary of material modification or other notice meeting the requirements of paragraph (d), which described the content required in the notice. Some commenters expressed concern that permitting the notice requirement to be satisfied though a plan's summary plan description or summary of material modification may result in participants overlooking or ignoring information relating to their participation and the investment of contributions on their behalf. The Department is persuaded that, given the potential length and complexity of summary plan descriptions and summaries of material modifications, the furnishing of the required disclosures through a separate notice will reduce the likelihood of a participant or beneficiary missing or ignoring information about his or her plan participation and the investment of the assets in his or her account in a qualified default investment alternative. Accordingly, the final regulation, at paragraph (c)(3), has been modified to eliminate references to providing notice through a summary plan description or

summary of material modifications. The Department notes that the notice requirements of ERISA section 404(c)(5)(B) and this regulation, and the notice requirements of sections 401(k)(13)(E) and 414(w)(4) of the Code, as amended by the Pension Protection Act, are similar. Accordingly, while the final regulation provides for disclosure through a separate notice, the Department anticipates that the notice requirements of this final regulation and the notice requirements of sections 401(k)(13)(E) and 414(w)(4) of the Code could be satisfied in a single disclosure document. Further, the Department notes that nothing in the regulation should be construed to preclude the distribution of the initial or annual notices with other materials being furnished to participants and beneficiaries. In this regard, the Department recognizes that there may be cost savings that result from distributing multiple disclosures simultaneously and, to the extent that distribution costs may be charged to the accounts of individual participants and beneficiaries, efforts to minimize such costs should be encouraged.

The fourth condition of the proposed regulation required that, under the terms of the plan, any material provided to the plan relating to a participant's or beneficiary's investment in a qualified default investment alternative (e.g., account statements, prospectuses, proxy voting material) would be provided to the participant or beneficiary. See proposed regulation § 2550.404c–5(c)(4). Several commenters asked the Department to clarify whether the phrase ''under the terms of the plan'' would require plan amendments to explicitly incorporate the proposed rule's disclosure provision. Commenters suggested that paragraph (c)(4) of the proposal could be read to require that the disclosure provisions be described in the formal plan document, and the commenters suggested that it is unclear what documents would suffice to meet this condition. The phrase ''under the terms of the plan'' was merely intended to ensure that plans provide for the required pass-through of information. Taking into account both the fact that a pass-through of information is a specific condition of the regulation and the comments on this provision, the Department has concluded that the phrase is confusing and not necessary. Accordingly, the phrase ''under the terms of the plan'' has been removed from paragraph (c)(4) of the final regulation. See § 2550.404c–5(c)(4).

Commenters also requested clarification as to the material intended to be included in the reference to ''material provided to the plan'' in paragraph (c)(4). Specifically, commenters inquired whether material provided to the plan includes information within the custody of a plan service provider or the fiduciary responsible for selecting a qualified default investment alternative, and whether ''material provided to the plan'' includes aggregate, plan-level information received by the plan. Commenters also asked for clarification regarding the manner in which information shall be ''provided to the participant or beneficiary'' in paragraph (c)(4) of the proposed regulation. A number of commenters suggested that the final regulation permit disclosure of information upon request; others recommended that the disclosure requirement should be satisfied by including a statement in the notice required by paragraph (c)(3) of the proposed regulation that provides direction to a participant or beneficiary regarding where he or she can find information about the qualified default investment alternatives. Other commenters asked whether plans could make materials available to a participant or beneficiary instead of affirmatively providing materials to them.

Other commenters suggested that a participant or beneficiary on whose behalf assets are invested in a qualified default investment alternative should not be required to be furnished more material than is required to be furnished to those individuals who direct their investments. In this regard, commenters recommended that the Department apply the same standard set forth in the section 404(c) regulation for the pass-through of information to both participants who fail to direct their investments and participants who elect to direct their investments.

The Department believes that participants who fail to direct their investments should be furnished no less information than is required to be passed through to participants who elect to direct their investments under the plan. The Department also believes there is little, if any, basis for requiring defaulted participants to be furnished more information than is required to be passed through to other participants. For this reason, the Department has adopted the recommendation of those commenters that the pass-through disclosure requirements applicable to section 404(c) plans be applied to the pass-through of information under the final regulation. The Department, therefore, has modified paragraph (c)(4) to provide that a fiduciary shall qualify for the relief described in paragraph (b)(1) of the final regulation if a fiduciary provides material to participants and beneficiaries as set forth in paragraphs (b)(2)(i)(B)(1)(viii) and (ix), and paragraph (b)(2)(i)(B)(2) of the 404(c) regulation, relating to a participant's or beneficiary's investment in a qualified default investment alternative. The Department notes that, as part of a separate regulatory initiative, it is reviewing the disclosure requirements applicable to participants and beneficiaries in participant-directed individual account plans and that, to the extent that the pass-through disclosure requirements contained in § 2550.404c–1 are amended, the language of paragraph (c)(4), as modified, will ensure such amendments automatically extend to § 2550.404c–5. The Department notes, in responding to one commenter's request for clarification, that the plan's obligation to pass through information to participants or beneficiaries would be considered satisfied if the required information is furnished directly to the participant or beneficiary by the provider of the investment alternative or other third-party.

The fifth condition of the proposal required that any participant or beneficiary on whose behalf assets are invested in a qualified default investment alternative be afforded the opportunity, consistent with the terms of the plan (but in no event less frequently than once within any three month period), to transfer, in whole or in part, such assets to any other investment alternative available under the plan without financial penalty. See proposed regulation § 2550.404c–5(c)(5). This provision was intended to ensure that participants and beneficiaries on whose behalf assets are invested in a qualified default investment alternative have the same opportunity as other plan participants and beneficiaries to direct the investment of their assets, and that neither the plan nor the qualified default investment alternative impose financial penalties that would restrict the rights of participants and beneficiaries to direct their assets to other investment alternatives available under the plan. This provision was not intended to confer greater rights on participants or beneficiaries whose accounts the plan invests in qualified default investment alternatives than are otherwise available under the plan. Thus, if a plan provides participants and beneficiaries the right to direct investments on a quarterly basis, those participants and beneficiaries with investments in a qualified default investment alternative need only be afforded the opportunity to direct their

investments on a quarterly basis. Similarly, if a plan permits daily investment direction, participants and beneficiaries with investments in a qualified default investment alternative must be permitted to direct their investments on a daily basis.

The Department received many comments requesting clarification on this requirement, most often concerning what the Department considers to be a financial penalty. Commenters asked whether investment-level fees and restrictions, as opposed to fees or other restrictions that are imposed by the plan or the plan sponsor, would be considered impermissible restrictions or ''financial penalties.'' Commenters explained that fees and limitations that are part of the investment product are beyond the control of the plan sponsor and should not be considered financial penalties for purposes of the final regulation. The comment letters provided many examples of investment-level fees or restrictions that commenters believed should not be considered punitive, including redemption fees, back-end sales loads, reinvestment timing restrictions, market value adjustments, equity ''wash'' restrictions, and surrender charges.

In response to these and other comments, the Department has modified and restructured paragraph (c)(5) of the final regulation to provide more clarity with respect to limitations that may or may not be imposed on participants and beneficiaries who are defaulted into a qualified default investment alternative. As modified and restructured, paragraph (c)(5) of the final regulation includes three conditions applicable to a defaulted participant's or beneficiary's ability to move assets out of a qualified default investment alternative.

The first condition, as in the proposal, is intended to ensure that defaulted participants and beneficiaries have the same rights as other participants and beneficiaries under the plan regarding the frequency with which they may direct an investment out of a qualified default investment alternative. In this regard, paragraph (c)(5)(i) provides that any participant or beneficiary on whose behalf assets are invested in a qualified default investment alternative must be able to transfer, in whole or in part, such assets to any other investment alternative available under the plan with a frequency consistent with that afforded participants and beneficiaries who elect to invest in the qualified default investment alternative, but not less frequently than once within any three month period. The Department received no substantive comments on this provision and it is being adopted unchanged from the proposal.

The second and third conditions, at paragraphs (c)(5)(ii) and (iii), relate to limitations (i.e., restrictions, fees, etc.) other than those relating to the frequency with which participants may direct their investment out of a qualified default investment alternative, which are addressed in paragraph (c)(5)(i). Unlike the proposal, which limited the imposition of financial penalties for the period of a defaulted participant's or beneficiary's investment, the regulation, as modified, precludes the imposition of any restrictions, fees or expenses (other than investment management and similar types of fees and expenses) during the first 90 days of a defaulted participant's or beneficiary's investment in the qualified default investment alternative. At the end of the 90-day period, defaulted participants and beneficiaries may be subject to the restrictions, fees or expenses that are otherwise applicable to participants and beneficiaries under the plan who elected to invest in that qualified default investment alternative. While the condition on restrictions, fees and expenses is limited to 90 days, the condition, as explained below, is broad in its application, thereby providing defaulted participants and beneficiaries an opportunity to redirect or withdraw their contributions. Also, the Department believes that restrictions or fees on qualified default investment alternatives are more likely to be waived if this period is shortened to 90 days. The 90-day period is defined by reference to the participant's first elective contribution as determined under section 414(w)(2)(B) of the Code, thereby enabling participants, if their plan permits, to make a permissible withdrawal without being subject to the 10 percent additional tax under section 72(t) of the Code.

Specifically, paragraph (c)(5)(ii) of the regulation provides that any transfer or permissible withdrawal described in paragraph (c)(5) resulting from a participant's or beneficiary's election to make such a transfer or withdrawal during the 90-day period beginning on the date of the participant's first elective contribution as determined under section 414(w)(2)(B) of the Code, or other first investment in a qualified default investment alternative on behalf of a participant or beneficiary described in paragraph (c)(2), shall not be subject to any restrictions, fees or expenses (except those fees and expenses that are charged on an ongoing basis for the investment itself, such as investment management and similar fees, and are not imposed, or do not vary, based on a participant's or beneficiary's decision to withdraw, sell or transfer assets out of the investment alternative). Accordingly, no restriction, fee, or expense may be imposed on any transfer or permissible withdrawal of assets, whether assessed by the plan, the plan sponsor, or as part of an underlying investment product or portfolio, and regardless of whether or not the restriction, fee, or expense is considered to be a ''penalty.'' This provision, therefore, would prevent the imposition of any surrender charge, liquidation or exchange fee, or redemption fee. It also would prohibit any market value adjustment or ''round-trip'' restriction on the ability of the participant or beneficiary to reinvest within a defined period of time. As long as the participant's or beneficiary's election is made within the applicable 90-day period, no such charges may be imposed even if, due to administrative or other delays, the actual transfer or withdrawal does not take place until after the 90-day period.

Paragraph (c)(5)(ii)(B) makes clear that the limitations of paragraph (c)(5)(ii)(A) do not apply to fees and expenses that are charged on an ongoing basis for the operation of the investment itself, such as investment management fees, distribution and/or service fees (''12b–1'' fees), and administrative-type fees (legal, accounting, transfer agent expenses, etc.), and are not imposed, or do not vary, based on a participant's or beneficiary's decision to withdraw, sell or transfer assets out of the investment alternative. In response to a request for a clarification, the Department further notes that to the extent that a participant or beneficiary loses the right to elect an annuity as a result of a transfer out of a qualified default investment alternative with an annuity feature, such loss would not constitute an impermissible restriction for purposes of paragraph (c)(5)(ii) inasmuch as the annuity feature is a component of the investment alternative itself.

Paragraph (c)(5)(iii) of the final regulation provides that, following the end of the 90-day period described in paragraph (c)(5)(ii)(A), any transfer or permissible withdrawal described in paragraph (c)(5) shall not be subject to any restrictions, fees or expenses not otherwise applicable to a participant or beneficiary who elected to invest in that qualified default investment alternative. This provision is intended to ensure that defaulted participants and beneficiaries are not subject to restrictions, fees or penalties that would serve to create a greater disincentive for defaulted participants and beneficiaries, than for other participants and

beneficiaries under the plan, to withdraw or transfer assets from a qualified default investment alternative.

The Department notes that the final rule does not otherwise address or provide relief with respect to the direction of investments out of a qualified default investment alternative into another investment alternative available under the plan. See generally section 404(c)(1) of ERISA and 29 CFR 2550.404c–1.

The last condition of paragraph (c) of the regulation adopts, without modification from the proposal, the requirement that plans offer participants and beneficiaries the opportunity to invest in a ''broad range of investment alternatives'' within the meaning of 29 CFR 2550.404c–1(b)(3).[1] See § 2550.404c–5(c)(6). The Department believes that participants and beneficiaries should be afforded a sufficient range of investment alternatives to achieve a diversified portfolio with aggregate risk and return characteristics at any point within the range normally appropriate for the pension plan participant or beneficiary. The Department believes that the application of the ''broad range of investment alternatives'' standard of the section 404(c) regulation accomplishes this objective. The Department received no substantive objections to this provision and, as indicated, is adopting the provision without change.

Notices

As discussed above, relief under the final regulation is conditioned on furnishing participants and beneficiaries advance notification concerning the default investment provisions of their plan. See § 2550.404c–5(c)(3). The specific information required to be contained in the notice is set forth in paragraph (d) of the regulation.

As proposed, paragraph (d) of § 2550.404c–5 required that the notice to participants and beneficiaries be written in a manner calculated to be understood by the average plan participant and contain the following information: (1) A description of the circumstances under which assets in the individual account of a participant or beneficiary may be invested on behalf of the participant and beneficiary in a qualified default investment alternative; (2) a description of the qualified default investment alternative, including a description of the investment objectives, risk and return characteristics (if applicable), and fees and expenses attendant to the investment alternative; (3) a description of the right of the participants and beneficiaries on whose behalf assets are invested in a qualified default investment alternative to direct the investment of those assets to any other investment alternative under the plan, including a description of any applicable restrictions, fees, or expenses in connection with such transfer; and (4) an explanation of where the participants and beneficiaries can obtain investment information concerning the other investment alternatives available under the plan.

A few commenters suggested expanding the content of the notice to include procedures for electing other investment options, a description of the right to request additional information, a description of any right to obtain investment advice (if available), a description of fees associated with the qualified default investment alternatives, information about other investment options under the plan, etc. While the Department did not adopt all of the changes suggested by the commenters, the Department has modified the notice content requirements to broaden the required disclosures. As modified, the Department intends that the furnishing of a notice in accordance with the timing and content requirements of this regulation will not only satisfy the notice requirements of section 404(c)(5)(B) of ERISA but also the notice requirements under the preemption provisions of ERISA section 514 applicable to an ''automatic contribution arrangement,'' within the meaning of ERISA section 514(e)(2).

ERISA section 404(c)(5)(B)(i)(I) provides for the furnishing of a notice explaining ''the employee's right under the plan to designate how contributions and earnings will be invested and explaining how, in the absence of any investment election by the participant, such contributions and earnings will be invested.'' ERISA section 514(e)(1) provides for the preemption of State laws that would directly or indirectly prohibit or restrict the inclusion in any plan of an automatic contribution arrangement. Section 514(e)(3) provides that a plan administrator of an automatic contribution arrangement shall provide a notice describing the rights and obligations of participants under the arrangement and such notice shall include ''an explanation of the participant's right under the arrangement not to have elective contributions made on the participant's behalf (or to elect to have such contributions made at a different percentage)'' and an explanation of ''how contributions made under the arrangement will be invested in the absence of any investment election by the participant.''

In addition to broadening the required disclosures, the Department revised the disclosures relating to restrictions, fees and expenses to conform the notice requirements to the changes in paragraph (c)(5) relating to restrictions, fees or expenses. As modified, paragraph (d) of the final regulation provides that the notices required by paragraph (c)(3) shall include: (1) A description of the circumstances under which assets in the individual account of a participant or beneficiary may be invested on behalf of the participant or beneficiary in a qualified default investment alternative; and, if applicable, an explanation of the circumstances under which elective contributions will be made on behalf of a participant, the percentage of such contribution, and the right of the participant to elect not to have such contributions made on his or her behalf (or to elect to have such contributions made at a different percentage); (2) an explanation of the right of participants and beneficiaries to direct the investment of assets in their individual accounts; (3) a description of the qualified default investment alternative, including a description of the investment objectives, risk and return characteristics (if applicable), and fees and expenses attendant to the investment alternative; (4) a description of the right of the participants and beneficiaries on whose behalf assets are invested in a qualified default investment alternative to direct the investment of those assets to any other investment alternative under the plan, including a description of any applicable restrictions, fees or expenses in connection with such transfer; and (5) an explanation of where the participants and beneficiaries can obtain investment information concerning the other investment alternatives available under the plan.

Other commenters suggested that the Department provide a model notice.

[1] 29 CFR 2550.404c–1(b)(3) provides that ''[a] plan offers a broad range of investment alternatives only if the available investment alternatives are sufficient to provide the participant or beneficiary with a reasonable opportunity to: (A) Materially affect the potential return on amounts in his individual account with respect to which he is permitted to exercise control and the degree of risk to which such amounts are subject; (B) Choose from at least three investment alternatives: (1) each of which is diversified; (2) each of which has materially different risk and return characteristics; (3) which in the aggregate enable the participant or beneficiary by choosing among them to achieve a portfolio with aggregate risk and return characteristics at any point within the range normally appropriate for the participant or beneficiary; and (4) each of which when combined with investments in the other alternatives tends to minimize through diversification the overall risk of a participant's or beneficiary's portfolio; * * *''

Because applicable plan provisions and qualified default investment alternatives may vary considerably from plan to plan, the Department believes it would be difficult to provide model language that is general enough to accommodate different plans and different investment products and portfolios and that would allow sufficient flexibility to plan sponsors. Accordingly, the final regulation does not include model language for plan sponsors. However, the Department will explore this concept in the future in coordination with the Department of Treasury concerning the similar notice requirements contained in sections 401(k)(13)(E) and 414(w) of the Code.

Commenters also requested guidance concerning the extent to which the final regulation's notice requirements could be satisfied by electronic distribution. The Department currently is reviewing its rules relating to the use of electronic media for disclosures under title I of ERISA. In the absence of guidance to the contrary, it is the view of the Department that plans that wish to use electronic means by which to satisfy their notice requirements may rely on either guidance issued by the Department of Labor at 29 CFR 2520.104b–1(c) or the guidance issued by the Department of the Treasury and Internal Revenue Service at 26 CFR 1.401(a)–21 relating to the use of electronic media.

Qualified Default Investment Alternatives

Under the final regulation, as in the proposal, relief from fiduciary liability is provided with respect to only those assets invested on behalf of a participant or beneficiary in a ''qualified default investment alternative.'' See § 2550.404c–5(c)(1). Paragraph (e) of § 2550.404c–5 sets forth four requirements for a ''qualified default investment alternative.''

The first requirement, at paragraph (e)(1), addresses investments in employer securities. As indicated in the preamble to the proposal, while the Department does not believe it is appropriate for a qualified default investment alternative to encourage investments in employer securities, the Department also recognizes that an absolute prohibition against holding or investing in employer securities may be unnecessarily limiting and complicated. Accordingly, the proposal, in addition to establishing a general prohibition against qualified default investment alternatives holding or permitting acquisition of employer securities, provided two exceptions to the rule. While, as discussed below, the Department did receive comments generally requesting different or expanded exceptions to the general prohibition, the Department has determined it appropriate to adopt paragraph (e)(1) without modification from the proposal.

The two exceptions to the general prohibition are set forth in paragraph (e)(1)(ii). The first exception applies to employer securities held or acquired by an investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a–1, *et seq.*, or a similar pooled investment vehicle (e.g., a common or collective trust fund or pooled investment fund) regulated and subject to periodic examination by a State or Federal agency and with respect to which investment in such securities is made in accordance with the stated investment objectives of the investment vehicle and independent of the plan sponsor or an affiliate thereof.

Several commenters suggested that the exception to investments in employer securities should extend to circumstances when the plan sponsor delegates investment responsibilities to an ERISA section 3(38) investment manager and with respect to which the plan sponsor has no discretion regarding the acquisition or holding of employer securities. The Department did not adopt this suggestion because in such instances the investment manager may be following the investment policies established by the plan sponsor, and, while the plan sponsor may not be directly exercising discretion with respect to the acquisition or holding of employer securities, the plan sponsor might indirectly be influencing such decision through an investment policy that requires the investment manager to acquire or hold various amounts of employer securities. In the Department's view, limiting the exception to regulated financial institutions avoids this type of problem.

Another commenter suggested that the Department limit qualified default investment alternatives to a 10% investment in employer securities. The Department did not adopt this suggestion because it believes that a percentage limit test would effectively require that a plan sponsor or other fiduciary monitor on a daily, if not more frequent, basis the specific holdings of the qualified default investment alternative and fluctuations in the value of the assets in the qualified default investment alternative to determine compliance with a percentage limit. Such a test would, in the Department's view, result in considerable uncertainty as to whether at any given time the intended designated qualified default investment alternative actually met the requirements of the regulation. The Department believes that the approach it has taken to limiting employer securities provides both flexibility and certainty.

The second exception is for employer securities acquired as a matching contribution from the employer/plan sponsor or at the direction of the participant or beneficiary. This exception is intended to make clear that an investment management service will not be precluded from serving as a qualified default investment alternative under § 2550.404c–5(e)(4)(iii) merely because the account of a participant or beneficiary holds employer securities acquired as matching contributions from the employer/plan sponsor, or acquired as a result of prior direction by the participant or beneficiary; however, an investment management service will be considered to be serving as a qualified default investment alternative only with respect to assets of a participant's or beneficiary's account over which the investment management service has authority to exercise discretion.

In the case of employer securities acquired as matching contributions that are subject to a restriction on transferability, relief would not be available with respect to such securities until the investment management service has an unrestricted right to transfer the securities. Although an investment management service would be responsible for determining whether and to what extent the account should continue to hold investments in employer securities, the investment management service could not, except as part of an investment company or similar pooled investment vehicle, exercise its discretion to acquire additional employer securities on behalf of an individual account without violating § 2550.404c–5(e)(1).

In the case of prior direction by a participant or beneficiary, if the participant or beneficiary provided investment direction with respect to employer securities, but failed to provide investment direction following an event, such as a change in investment alternatives, and the terms of the plan provide that in such circumstances the account's assets are invested in a qualified default investment alternative, the final regulation continues to permit an investment management service to hold and manage those employer securities in the absence of participant or beneficiary direction. Although the investment management service may not acquire additional employer securities using participant

contributions, the investment management service may reduce the amount of employer securities held by the account of the participant or beneficiary.

One commenter suggested that the exception be extended to qualified default investment alternatives other than the investment management service described in paragraph (e)(4)(iii). An employer securities match can only constitute part of a qualified default investment alternative if the fiduciary selects an investment management service as the qualified default investment alternative, because only in the investment management service context is the responsible fiduciary undertaking the duty to evaluate the appropriate exposure to employer securities for a particular participant or beneficiary and undertaking the obligation to sell employer securities until the participant's or beneficiary's account reflects that appropriate exposure. Accordingly, the Department declines to adopt the commenter's suggestion to expand the second employer securities exception to other qualified default investment alternatives. The Department further notes that this regulation does not provide relief for the acquisition of employer securities by an investment service.

The second requirement, at paragraph (e)(2), is intended to ensure that the qualified default investment alternative itself does not impose any restrictions, fees or expenses inconsistent with the requirements of paragraph (c)(5) of § 2550.404c–5. While the provision has been redrafted for clarity, it is substantively the same as in the proposal and, therefore, is being adopted without substantive change.

The third requirement, at paragraph (e)(3), addresses the management of a qualified default investment option. As proposed, the regulation required that a qualified default investment alternative be either managed by an investment manager, as defined in section 3(38) of the Act, or an investment company registered under the Investment Company Act of 1940. Several commenters suggested that requiring a qualified default investment alternative to be managed by an investment manager, or to be an investment company, is too restrictive.

A number of commenters noted that section 3(38) of ERISA excludes from the definition of the term ''investment manager'' named fiduciaries, as defined in section 402(a)(2) of ERISA [2] and trustees.[3] With regard to named fiduciaries, commenters pointed out that a number of employers serve as named fiduciaries and manage their plan investments in-house, resulting in reduced administrative and investment management costs. Commenters also noted that implementation of the requirement as proposed would eliminate the ability of plan sponsors who are named fiduciaries to directly manage a qualified default investment alternative, use asset allocation models, develop asset allocations themselves, or engage investment consultants (who may or may not be fiduciaries) to assist in the development of asset allocations. Other commenters, however, suggested that the final regulation retain the requirement that only investment managers within the meaning of section 3(38) of ERISA or registered investment companies be permitted to manage qualified default investment alternatives. Commenters suggested that investment management decisions should be made by investment professionals who are investment managers within the meaning of section 3(38) of ERISA; they asserted that requiring a 3(38) manager is safer and more prudent than other alternatives, and such requirement is administratively feasible.

With regard to permitting plan sponsors to manage a qualified default investment alternative, the Department is persuaded that a plan sponsor's willingness to serve as a named fiduciary responsible for the management of the plan's investment options in conjunction with the potential cost savings to plan participants that can result from such management, is a sufficient basis to expand the regulation to permit plan sponsors that are named fiduciaries to manage a qualified default investment alternative. This modification is reflected in paragraph (e)(3)(i)(C).

A number of commenters also indicated that, under the proposal, investment consultants engaged by plan sponsors would have to assume fiduciary responsibility for asset allocations in order to obtain relief under the proposal. These commenters suggested that requiring an investment consultant to assume fiduciary responsibility for asset allocation would increase costs for the provision of such consulting services, and that these costs inevitably would be passed along to participants. Commenters also asserted that the use of asset allocation models is well-established and is often an effective way to lower costs and to provide a clean structure and process for the formation, selection and monitoring of all elements of a prudent default investment alternative. The commenters also noted that many plan sponsors develop generic asset allocations and select particular funds, tailored to a particular plan, with the input of an investment consultant who may be an investment adviser under the Investment Advisers Act of 1940. With regard to these comments, the Department continues to believe that when plan fiduciaries are relieved of liability for underlying investment management/asset allocation decisions, those responsible for the investment management/asset allocation decisions must be fiduciaries and those fiduciaries must acknowledge their fiduciary responsibility and liability under the ERISA. The Department notes, however, that plan sponsors who serve as named fiduciaries of a qualified default investment alternative may, to the extent they consider it prudent, engage investment consultants, utilize asset allocation models (computer-based or otherwise), etc. to carry out their investment management/asset allocation responsibilities. Accordingly, the Department does not believe the regulation in this regard should to any significant degree alter the availability or cost of such services.

With regard to the exclusion of trustees from the ''investment manager'' definition, commenters suggested that the final regulation make clear that bank trustees of collective investment funds are permitted to manage a qualified default investment alternative. In this regard, commenters noted that the definition of ''investment managers'' recognizes that banks and other

[2] Section 402(a)(2) of ERISA provides that the term ''named fiduciary'' means a fiduciary who is named in the plan instrument, or who, pursuant to a procedure specified in the plan, is identified as a fiduciary by a person who is an employer or employee organization with respect to the plan, or by such an employer and such an employee organization acting jointly.

[3] Section 3(38) defines the term ''investment manager'' to mean any fiduciary (other than a trustee or named fiduciary, as defined in section 402(a)(2))—(A) who has the power to manage, acquire, or dispose of any asset of a plan; (B) who (i) is registered as an investment adviser under the Investment Advisers Act of 1940 [15 U.S.C. 80b–1 *et seq.*]; (ii) is not registered as an investment adviser under such Act by reason of paragraph (1) of section 203A(a) of such Act [15 U.S.C. 80b–3a(a)], is registered as an investment adviser under the laws of the State (referred to in such paragraph (1)) in which it maintains its principal office and place of business, and, at the time the fiduciary last filed the registration form most recently filed by the fiduciary with such State in order to maintain the fiduciary's registration under the laws of such State, also filed a copy of such form with the Secretary; (iii) is a bank, as defined in that Act; or (iv) is an insurance company qualified to perform services described in subparagraph (A) under the laws of more than one State; and (C) has acknowledged in writing that he is a fiduciary with respect to the plan.

institutions can be investment managers, citing ERISA section 3(38)(B)(ii) and (iii), and should not be foreclosed from managing a qualified default investment alternative solely on the basis that the institution might otherwise serve as a trustee. These commenters noted that, similar to investment managers, banks as trustees of collective funds have fiduciary responsibility and liability under ERISA with respect to the funds they maintain. The Department is persuaded that an entity that meets the requirements of section 3(38)(A), (B) and (C) should not be precluded from assuming fiduciary responsibility and liability for the underlying investment management/asset allocation decisions of a qualified default investment alternative solely because that entity serves in a trustee capacity for the plan.[4] The Department has modified the final regulation accordingly. This modification is reflected in paragraph (e)(3)(i)(B).

In response to a request from one commenter, the Department confirms that the provisions of the regulation do not preclude a qualified default investment alternative from having more than one fiduciary (e.g., investment manager) responsible for the investment management/asset allocation decisions of the investment alternative, as would be the case in an arrangement utilizing a ''fund of funds'' approach to designing a qualified default investment alternative.

As with the proposal, the regulation permits a qualified default investment alternative to be an investment company registered under the Investment Company Act of 1940. See paragraph (e)(3)(ii) of § 2550.404c–5.

In addition to the foregoing, paragraph (e)(3) has been expanded to include certain capital preservation products and funds described in paragraph (e)(4)(iv) and (v) of § 2550.404c–5. These products and funds are discussed below.

The last requirement for a qualified default investment alternative conditions relief on the use of specified types of investment fund products, model portfolios or services. See § 2550.404c–5(e)(4). In the proposal, the Department identified three categories of investment alternatives that it determined appropriate for achieving meaningful retirement savings over the long-term for those participants and beneficiaries who, for one reason or another, do not elect to direct the investment of their pension plan assets. After careful consideration of all the comments concerning the nature and type of the investment alternatives that should be included as qualified default investment alternatives under the regulation, the Department, as discussed below, has decided to retain the three proposed categories of investment alternatives, essentially unchanged from the proposal, as the type of alternatives appropriate for default investments under the regulation. However, in recognition of the fact that some plan sponsors may find it desirable to reduce investment risks for all or part of their workforce following employees' initial enrollment in the plan, the Department has added a limited capital preservation option that would constitute a qualified default investment alternative under the regulation for purposes of contributions made on behalf of a participant for a 120-day period following the date of the participant's first elective contribution. See paragraph (e)(4)(iv). In addition, the Department has modified the regulation to include a ''grandfather''-like provision pursuant to which stable value products and funds will constitute a qualified default investment alternative under the regulation for purposes of investments made prior to the effective date of the regulation. See paragraph (e)(4)(v).

As noted above, the three categories of investment alternatives set forth in the proposal are being adopted essentially unchanged from the proposal. One organizational change appearing in the final regulation involves the inclusion of diversification language in each of three categories, rather than as a separate requirement of general applicability as in the proposal (see paragraph (e)(4) of proposed regulation § 2550.404c–5). This change accommodates the addition of the capital preservation investment alternatives mentioned above that may not, given the nature of the investment, satisfy a diversification standard.

Some commenters expressed concern that the Department's approach to defining qualified default investment alternatives takes into account only products currently available in the marketplace and that the defining of qualified default investment alternatives should be based on more general criteria. These commenters emphasized that the regulation should not stifle creativity in the development of the next generation of retirement products. While the Department does provide examples of products, portfolios and services that would fall within the framework of the various definitions of products, portfolios and services set forth in the regulation, these examples are provided solely for the purpose of providing the benefits community with guidance as to what might be included within the defined categories and are not intended in any way to limit the application of the definitions to such vehicles. The Department believes that, on the basis of the information it has at this time and the comments on the proposal generally, the approach it is taking to defining qualified default investment alternatives for purposes of the regulation is sufficiently flexible to accommodate future innovations and developments in retirement products.

A number of commenters requested clarification concerning application of the regulation to possible qualified default investment alternatives that are offered through variable annuity contracts. Commenters explained that variable annuity contracts typically permit participants to invest in a variety of investments through one or more separate accounts (or sub-accounts within the separate account) that would qualify as qualified default investment alternatives under the regulation. Commenters also requested confirmation that the availability of annuity purchase rights, death benefit guarantees, investment guarantees or other features common to variable annuity contracts would not themselves affect the status of a variable annuity contract that otherwise met the requirements for a qualified default investment alternative. Consistent with providing flexibility and encouraging innovation in the development and offering of retirement products, model portfolios or services, the Department intends that the definition of ''qualified default investment alternative'' be construed to include products and portfolios offered through variable annuity and similar contracts, as well as through common and collective trust funds or other pooled investment funds, where the qualified default investment alternative satisfies all of the conditions of the regulation. For purposes of identifying the entity responsible for the management of the qualified default investment alternative in such arrangements pursuant to paragraph (e)(3) of § 2550.404c–5, it is the view of the Department that such a determination is made by reference to the entity (e.g., separate account, sub-account, or similar entity) that is responsible for carrying out the day-to-day investment management/asset allocation responsibilities. Finally, with regard to such products and portfolios,

[4] This position is consistent with the Department's long-held view that the parenthetical language of section 3(38) was merely intended to indicate that in order for a person to be an investment manager for a plan, that person must be more than a mere trustee or named fiduciary. See Advisory Opinion No. 77–69/70A

it is the view of the Department that the availability of annuity purchase rights, death benefit guarantees, investment guarantees or other features common to variable annuity contracts will not themselves affect the status of a fund, product or portfolio as a qualified default investment alternative when the conditions of the regulation are satisfied. A new paragraph (e)(4)(vi) was added to the regulation to clarify these principles.

A number of commenters submitted questions or comments concerning the specific investment alternatives described in the regulation.

The first investment alternative set forth in the regulation, at paragraph (e)(4)(i), is an investment fund, product or model portfolio that applies generally accepted investment theories, is diversified so as to minimize the risk of large losses, and is designed to provide varying degrees of long-term appreciation and capital preservation through a mix of equity and fixed income exposures based on the participant's age, target retirement date (such as normal retirement age under the plan) or life expectancy. Consistent with the proposal, the description provides that such products and portfolios change their asset allocation and associated risk levels over time with the objective of becoming more conservative (i.e., decreasing risk of losses) with increasing age. Also like the proposal, the description makes clear that asset allocation decisions for eligible products and portfolios are not required to take into account risk tolerances, investments or other preferences of an individual participant. An example of such a fund or portfolio may be a ''life-cycle'' or ''targeted-retirement-date'' fund or account.

The reference to ''an investment fund product or model portfolio'' is intended to make clear that this alternative might be a ''stand alone'' product or a ''fund of funds'' comprised of various investment options otherwise available under the plan for participant investments. As noted in the proposal, the Department believes that, in the context of a fund of funds portfolio, it is likely that money market, stable value and similarly performing capital preservation vehicles will play a role in comprising the mix of equity and fixed-income exposures.

Several commenters asked the Department to clarify whether a plan fiduciary must, or may, consider demographic or other factors in addition to a participant's age or target retirement date when selecting an investment product intended to satisfy the first category of qualified default investment alternatives. For example, commenters suggested that a plan fiduciary may wish to take into account an employer-provided defined benefit plan or an employer stock contribution when selecting the plan's default investment product. Although the final regulation does not preclude consideration of factors other than a participant's age or target retirement date in these circumstances, the regulation is clear that such considerations are neither required nor necessary as a condition to a fiduciary obtaining relief under the regulation. The Department intended to provide plan fiduciaries with certainty that they have complied with the requirements of the regulation; accordingly, as long as a plan fiduciary satisfies its general obligations under ERISA when selecting any qualified default investment alternative, the fiduciary will not lose the relief provided by the regulation if he or she selects a product, portfolio or service described in the regulation.

One commenter requested clarification concerning the status of ''lifestyle'' funds. ''Lifestyle'' funds were defined as being similar to ''lifecycle'' funds, except that the allocation in a given lifestyle fund does not change over time to become more conservative. That is, the investment manager of a lifestyle fund invests the fund's assets to achieve a predetermined level of risk, such as ''conservative,'' ''moderate,'' or ''aggressive.'' While it does not appear that a lifestyle fund, as defined by the commenter, would by itself satisfy the requirements for a product or portfolio within the meaning of paragraph (e)(4)(i), such a fund could, in the Department's view, constitute part of a qualified default investment alternative within the meaning of paragraph (e)(4)(i). Similarly, nothing in the final regulation precludes an investment manager from allocating a portion of a participant's assets to such a fund as part of a qualified default investment alternative within the meaning of paragraph (e)(4)(iii). It is also possible that a lifestyle fund, as defined by the commenter, might be able to constitute an investment within the meaning of paragraph (e)(4)(ii), an example of which is a ''balanced'' fund.

With respect to the language requiring that the investment fund, product or model portfolio provide varying degrees of long-term appreciation and capital preservation through ''a mix of equity and fixed income exposures,'' one commenter inquired whether the Department intended to exclude funds that had no fixed income exposure, which, according to the commenter, might be appropriate for young individuals many years away from retirement. While the Department believes that such an investment option may be appropriate for individuals actively electing to direct their own investments, the Department believes that when an investment is a default investment, the investment should provide for some level of capital preservation through fixed income investments. Accordingly, the final regulation, like the proposal, continues to require that the qualified default investment alternatives, defined in paragraph (e)(4)(i), (ii) and (iii), be designed to provide degrees of long-term appreciation and capital preservation through a mix of equity and fixed income exposures.

The second investment alternative set forth in the regulation, at paragraph (e)(4)(ii), is an investment fund product or model portfolio that applies generally accepted investment theories, is diversified so as to minimize the risk of large losses, and is designed to provide long-term appreciation and capital preservation through a mix of equity and fixed income exposures consistent with a target level of risk appropriate for participants of the plan as a whole. For purposes of this alternative, asset allocation decisions for such products and portfolios are not required to take into account the age of an individual participant, but rather focus on the participant population as a whole. An example of such a fund or portfolio may be a ''balanced'' fund. As with the preceding alternative, the reference to ''an investment fund product or model portfolio'' is intended to make clear that this alternative might be a ''stand alone'' product or a ''fund of funds'' comprised of various investment options otherwise available under the plan for participant investments. In the context of a fund of funds portfolio, it is likely that money market, stable value and similarly performing capital preservation vehicles will play a role in comprising the mix of equity and fixed-income exposures for this alternative.

Although commenters generally supported inclusion of a balanced investment option as a qualified default investment alternative, a number of commenters had questions or expressed concern regarding the requirement that the investment alternative define its investment objectives by reference to ''a target level of risk appropriate for participants of the plan as a whole.'' Commenters indicated that having to take into account the ''participants of the plan as a whole'' would result in uncertainty as to whether the plan sponsor properly matched the chosen fund to its participant population. In

addition, commenters asserted that the on-going monitoring necessary for the plan fiduciary to ensure the continued appropriateness of the match would likely result in unnecessary burdens and costs. One commenter explained that balanced funds as a group hold approximately 60–65% percent of their portfolios in equity investments,[5] and that the typical balanced fund would be somewhat more conservatively invested than most targeted-retirement-date funds; hence, the commenter argued that balanced funds are an appropriate default for all workers. The commenter further noted that periodic monitoring, while adding unnecessary costs, will likely never produce an impetus for changing to a different balanced fund option. After careful consideration of the comments, the Department has decided to retain the requirement that, for purposes of paragraph (e)(4)(ii), the selected qualified default investment alternative reflect ''a target level of risk appropriate for participants of the plan as a whole.'' The Department recognizes that, to the extent that a particular investment fund product or model portfolio does not itself consider or adjust its balance of fixed income and equity exposures to take into account a target level of risk appropriate for the participants of the plan as a whole, plan fiduciaries will retain that responsibility. The Department believes that, as a practical matter, this responsibility would be discharged by the fiduciary in connection with the prudent selection and monitoring of the investment fund product.[6] Specifically, fiduciaries would take into account the diversification of the portfolio, the liquidity and current return of the portfolio relative to the anticipated cash flow requirements of the plan, the projected return of the portfolio relative to funding objectives of the plan, and the fees and expenses attendant to the investment.[7]

Unlike the first alternative, which focuses on the age, target retirement date (such as normal retirement age under the plan) or life expectancy of an individual participant, the second alternative requires a fiduciary to take into account the demographics of the plan's participants, and would be similar to the considerations a fiduciary would take into account in managing an individual account plan that does not provide for participant direction. A number of commenters asked the Department to clarify the demographic factors that should be considered by the fiduciary. The Department understands that the only information a plan fiduciary may know about its participant population is age. Thus, when determining a target level of risk appropriate for participants of a plan as a whole, a plan fiduciary is required to consider the age of the participant population. However, a plan fiduciary is not foreclosed from considering other factors relevant to the participant population, if the fiduciary so chooses.

The third alternative set forth in the regulation, at paragraph (e)(4)(iii), is an investment management service with respect to which an investment manager allocates the assets of a participant's individual account to achieve varying degrees of long-term appreciation and capital preservation through a mix of equity and fixed income exposures, offered through investment alternatives available under the plan, based on the participant's age, target retirement date (such as normal retirement age under the plan) or life expectancy.[8] Such portfolios change their asset allocation and associated risk levels over time with the objective of becoming more conservative (i.e., decreasing risk of losses) with increasing age. Similar to the first two alternatives, these portfolios must be structured in accordance with generally accepted investment theories and diversified so as to minimize the risk of large losses. The final regulation also clarifies that, as with the other alternatives described in the regulation, asset allocation decisions are not required to take into account risk tolerances, other investments or other preferences of an individual participant. An example of such a service may be a ''managed account.''

One commenter requested clarification that, with regard to a participant's account holding employer securities with restrictions on transferability, the investment management service could serve as qualified default investment alternative for purposes of all other assets in the participant's account with respect to which the managed account has investment discretion. As discussed earlier, the mere fact that the account of a participant or beneficiary holds employer securities acquired as matching contributions from the employer/plan sponsor, or acquired as a result of prior direction by the participant or beneficiary, will not preclude an investment management service from serving as a qualified default investment alternative. However, an investment management service will be considered to be serving as a qualified default investment alternative only with respect to the assets of a participant's or beneficiary's account over which the investment management service has authority to exercise discretion. If the investment management service does not have the authority to exercise discretion over investments in employer securities, the investment management service will not be a qualified default investment alternative with respect to those securities. See discussion of paragraph (e)(1)(ii) of § 2550.404c–5, above.

Another commenter expressed concern that requiring the manager of a managed account qualified default investment alternative to be an investment manager may prevent plan sponsors from using existing managed account programs, such as that addressed in Advisory Opinion 2001–09A (the ''SunAmerica Opinion''). The Department believes these concerns are addressed by the modifications to paragraph (e)(3)(i)(C), pursuant to which plan sponsors who are named fiduciaries may manage qualified default investment alternatives.

Many commenters expressed concern that the Department did not include capital preservation, in particular stable value, products as qualified default investment alternatives on a stand alone basis. These commenters pointed out that stable value funds are utilized by a large number of plans as default investment funds. These funds are often chosen by plan sponsors because they provide: Safety of principal; bond-like returns without the volatility associated with bonds; stability and steady growth of principal and earned income; and benefit-responsive liquidity, so that plan participants may transact at ''book value.'' Commenters supporting stable value funds argued that stable value funds are superior to money market

[8] Although investment management services are included within the scope of relief, the Department notes that relief similar to that provided by this regulation is available to plan fiduciaries under the statute. Specifically, section 402(c)(3) of ERISA provides that ''a person who is a named fiduciary with respect to control or management of the assets of the plan may appoint an investment manager or managers to manage (including the power to acquire and dispose of) any assets of a plan.'' Section 405(d)(1) of ERISA provides that ''[i]f an investment manager or managers have been appointed under section 402(c)(3), then * * * no trustee shall be liable for the acts or omissions of such investment manager or managers, or be under an obligation to invest or otherwise manage any asset of the plan which is subject to the management of such investment manager.'' The Department included investment management services within the scope of fiduciary relief in order to avoid any ambiguity concerning the scope of relief available to plan fiduciaries in the context of participant directed individual account plans.

funds and other cash-equivalent products because stable value investments earn higher rates of return than money market funds and other cash-equivalent products. A number of these commenters also suggested that stable value funds are appropriate for plans with different demographics, including, for example, plans that cover younger, higher turnover employees who are likely to elect lump sum payments, or plans that cover older, near-retirement employees.

Commenters in support of the inclusion of stable value products also indicated that stable value funds have relatively low costs compared to life-cycle, targeted-retirement-date and balanced funds, particularly those that use a ''fund of funds'' structure. These commenters expressed the view that, because stable value returns are comparable to intermediate corporate bond returns, the premium, if any, of equity investments over stable value investments has been overstated. Many of the commenters argued that the exclusion of stable value funds would unduly discourage plan sponsors from using stable value funds as a default option, to the detriment of plan participants. These commenters argued that limiting default investment alternative choices discourages plans from implementing automatic enrollment. In addition, some commenters suggest that if participants whose account balances are invested in qualified default investment alternatives react negatively to volatile equity performance by opting out of plan participation when losses occur, the regulation may ultimately decrease retirement savings, and the potential gains expected from funds with higher historical long-term performance records will not materialize. Some of the comments supporting the inclusion of capital preservation products also argued that the Congress, in referencing ''a mix of asset classes consistent with capital preservation or long-term capital appreciation, or a blend of both'' in section 624 of the Pension Protection Act, intended the Department to include capital preservation products as a separate stand alone qualified default investment alternative.

The Department also received comments in support of its determination that capital preservation products, such as money market funds, stable value funds and similarly performing investment vehicles, should not themselves constitute qualified default investment alternatives under the regulation.

After careful consideration of the comments addressing this issue and assessment of related economic impacts, the Department has determined, except as otherwise discussed below, not to include capital preservation products, such as money market or stable value funds, as a separate long-term investment option under the regulation. As a short-term investment, money market or stable value funds may not, in the Department's view, significantly affect retirement savings. The Department recognizes, however, that such investments can, and in many instances will, play an important role as a component of a diversified portfolio that constitutes a qualified default investment alternative. It is the view of the Department that investments made on behalf of defaulted participants ought to and often will be long-term investments and that investment of defaulted participants' contributions and earnings in money market and stable value funds will not over the long-term produce rates of return as favorable as those generated by products, portfolios and services included as qualified default investment alternatives, thereby decreasing the likelihood that participants invested in capital preservation products will have adequate retirement savings.

The Department also is concerned that including capital preservation and stable value products as a qualified default investment alternative for future contributions on behalf of defaulted participants may impede, or even reverse, the current trend away from the use of such products as default investments. The Department understands that, because account balances invested in capital preservation products are unlikely to show a nominal loss, a number of employers, if given a choice between capital preservation products and more diversified investment options, may be more likely to opt for capital preservation products because they are perceived as presenting less litigation risk for employers. If so, inclusion of a capital preservation option without limitation may increase utilization of capital preservation products as default investments and, thereby, increase the number of participants likely to have inadequate retirement savings, as compared with savings that would be generated through investments in the established qualified default investment alternatives.

Lastly, the Department is concerned that inclusion of a capital preservation product as a qualified default investment alternative, without limitation, may be perceived by participants and beneficiaries as an endorsement by the government, by virtue of its inclusion in the regulation, or as an endorsement by the employer, by virtue of its selection as the qualified default investment alternative, as an appropriate investment for long-term retirement savings. Although the Department recognizes that such perceptions on the part of some participants and beneficiaries might be addressed with investment education and investment advice, the Department nonetheless is concerned that, overall, the potentially adverse effect on long-term retirement savings may be significant.

In light of these concerns, the Department, as indicated above, has not included a capital preservation investment alternative as a long-term stand alone investment option for future contributions under the final regulation. The Department, however, has added two exceptions to the regulation that accommodate limited investments in capital preservation products as qualified default investment alternatives. The first exception is at paragraph (e)(4)(iv). In general, this exception treats investments in capital preservation products or funds as an investment in a qualified default investment alternative for a 120-day period following a participant's first elective contribution (as determined under section 414(w)(2)(B) of the Code).

Specifically, paragraph (e)(4)(iv)(A) recognizes, subject to the limitations of paragraph (e)(4)(iv)(B), as a qualified default investment alternative an investment product that is designed to preserve principal and provide a reasonable rate of return, whether or not guaranteed, consistent with liquidity. The product description and applicable standards are similar to the standards adopted for purposes of automatic rollovers of mandatory distributions at 29 CFR 2550.404a–2. The Department believes it is appropriate to include capital preservation products as a limited-duration qualified default investment alternative to afford plan sponsors the flexibility of utilizing a near risk-free investment alternative for the investment of contributions during the period of time when employees are most likely to opt out of plan participation. The use of capital preservation products in these circumstances will enable plan sponsors to return contributed amounts to participants who opt out without concern about loss of principal. In this regard, the limitation set forth in paragraph (e)(4)(iv)(B) provides that capital preservation products described in paragraph (e)(4)(iv)(A) shall, with respect to any given participant, be treated as a qualified default investment

alternative for a 120-day period following the participant's first elective contribution (as determined under section 414(w)(2)(B) of the Code). At the end of the 120-day period, capital preservation products would cease to be a qualified default investment alternative with respect to any assets of the participant that continue to be invested in such products. In order to avail itself of the relief afforded by the regulation, the plan fiduciary must redirect the participant's investment in the capital preservation product to another qualified default investment alternative prior to the end of the 120-day period. As previously stated, such alternative may include an appropriate capital preservation component in the context of a diversified portfolio.

The 120-day time frame is intended to provide plans that allow an employee to elect to make a permissible withdrawal, consistent with section 414(w) of the Code, a reasonable amount of time following the end of the 90-day period provided in section 414(w)(2)(B) (i.e., the period during which employees may elect to make a permissible withdrawal) to effectuate a transfer of a participant's assets to another qualified default investment alternative.

The second exception relating to capital preservation products and funds is at paragraph (e)(4)(v). This exception, unlike the first, is intended to be limited to stable value products and funds with respect to which plan sponsors are typically limited by the terms of the investment contracts from unilaterally reinvesting assets on behalf of participants who fail to give investment direction without triggering a surrender charge or other fees that could directly and adversely affect participant account balances. Under the exception, stable value products and funds will be treated as a qualified default investment alternative solely for purposes of investments in such products or funds made prior to the effective date of this regulation. The Department believes that this ''grandfather''-type provision accommodates the concerns of commenters regarding the utilization of stable value products and funds by plan sponsors as their default investment option in the absence of guidance concerning fiduciary responsibilities attendant to default investments generally, guidance like that provided by this regulation. At the same time, by limiting the exception to pre-effective date contributions, plan sponsors are encouraged to assess whether and under what circumstances they wish to avail themselves of the relief provided under the regulation by utilizing a qualified default investment alternative that extends to participant contributions made after the effective date of this regulation. It is important to note, however, that, as indicated in the regulation itself, the standards applicable to qualified default investment alternatives set forth in the regulation are not intended to be the exclusive means by which a fiduciary might satisfy his or her responsibilities under the Act with respect to the investment of assets in the individual account of a participant or beneficiary. Accordingly, fiduciaries may, without regard to this regulation, conclude that a stable value product or fund is an appropriate default investment for their employees and use such product or fund for contributions on behalf of defaulted employees after the effective date of this regulation.

It also is important to note with regard to both of the exceptions discussed above that the relief afforded by the regulation for investments in the covered products or funds on behalf of defaulted participants is contingent on compliance with all the requirements of the regulation.

Finally, the Department disagrees with commenters' assertion that the Department's decision not to include capital preservation products as a qualified default investment alternative is inconsistent with Congressional intent. The Department believes that Congress, in enacting section 624 of the Pension Protection Act, provided the Department broad discretion in framing a regulation that would permit the Department to include or exclude capital preservation products as a separate qualified default investment alternative. The Department also notes that, pursuant to section 505 of ERISA, the Secretary may prescribe such regulations as are necessary or appropriate to carry out the provisions title I of ERISA.

C. Miscellaneous Issues

Transition Issues

A number of commenters raised issues concerning the status of existing default investments and transfers to default investments that would meet the requirements of the regulation. Specifically, commenters requested guidance on what steps should be taken to ensure that a plan's current default investments, which also meet the requirements of the regulation, will be treated as qualified default investment alternatives after the effective date of the regulation. Other commenters requested guidance on what steps should be taken when a plan is moving from default investments that do not meet the requirements of the regulation to qualified default investment alternatives. In both scenarios, commenters noted that plans often will not have the records necessary to distinguish participants who were defaulted into a default investment from those who affirmatively elected to invest in that investment. Some commenters requested retroactive relief for investments that would not otherwise constitute qualified default investment alternatives because a plan's determination to transfer assets out of such investments could trigger a market value adjustment or similar withdrawal penalty.

To ensure that an existing or a new default investment constitutes a qualified default investment alternative with respect to both existing assets and new contributions of participants or beneficiaries, plan fiduciaries must comply with the notice requirements of the regulation. It is the view of the Department that any participant or beneficiary, following receipt of a notice in accordance with the requirements of this regulation, may be treated as failing to give investment direction for purposes of paragraph (c)(2) of § 2550.404c–5, without regard to whether the participant or beneficiary was defaulted into or elected to invest in the original default investment vehicle of the plan. Under such circumstances, and assuming all other conditions of the regulation are satisfied, fiduciaries would obtain relief with respect to investments on behalf of those participants and beneficiaries in existing or new default investments that constitute qualified default investment alternatives.

Several commenters requested guidance on the effective date of the regulation. While section 404(c)(5) of ERISA is effective for plan years beginning after December 31, 2006, relief under section 404(c)(5) is conditioned on, among other things, the investment of a participant's contributions and earnings ''in accordance with regulations issued by the Secretary.'' See section 404(c)(5)(A). Accordingly, relief under section 404(c)(5) is conditioned on compliance with the provisions of this final regulation, which provide relief only for investments on behalf of participants and beneficiaries who were furnished a notice in accordance with paragraphs (c)(3) and (d) of § 2550.404c–5 and who did not give investment directions to the plan after the effective date of the regulation. Although the regulation only provides relief for investments in qualified default investment alternatives when participants and beneficiaries do

not give investment directions after the effective date of the regulation, compliance with the notice requirements may be achieved by providing notice in accordance with the regulation before its effective date.

With regard to the possible assessment of market value adjustments or similar withdrawal penalties that may result from a fiduciary's decision to move assets to a qualified default investment alternative, the Department reminds fiduciaries that such decisions must be made in compliance with ERISA's prudence and exclusive purpose requirements. These decisions cannot be based solely on a fiduciary's desire to take advantage of the limited liability afforded by this regulation, without regard to the financial consequences to the plan's participants and beneficiaries. In this regard, the Department notes that the final regulation does not change the status of an otherwise prudent default investment into an imprudent default investment. The Department has attempted to make clear in both the preamble and the operative language of the final regulation that the standards set forth therein are not intended to be the exclusive means by which fiduciaries might satisfy their responsibilities under the Act with respect to the investment of assets on behalf of participants and beneficiaries who do not give investment directions.

Further, as discussed above under Qualified Default Investment Alternatives, the Department modified the regulation to provide relief for investments made in stable value products or funds prior to the effective date of the regulation. This modification is intended to assist plan fiduciaries who may be limited by the terms of investment contracts for such products or funds from unilaterally reinvesting assets on behalf of participants who fail to direct their investments.

One commenter requested that the Department make clear that once a participant or beneficiary directs any portion of his or her account balance, the participant or beneficiary is considered to have directed the investment of the entire account. The Department agrees that investment direction by a participant or beneficiary with respect to a portion of his or her account balance may be treated as a decision to retain the remainder of the account balance as currently invested, thus permitting the responsible fiduciary to consider the entire account balance as directed by the participant or beneficiary.

A number of commenters requested that the Department clarify the interrelationship between ERISA section 404(c)(4)(A)—the ''mapping'' provisions—and section 404(c)(5) and this regulation. The most obvious difference between the two sections is the circumstances under which relief is available. The relief provided by section 404(c)(4) is limited to circumstances when a plan undertakes a ''qualified change in investment options'' within the meaning of section 404(c)(4)(B). In contrast, section 404(c)(5) and this regulation can apply to changes in investment options and to the selection of initial plan investments when participants or beneficiaries do not give investment directions. Section 404(c)(4) applies only when the investment option from which assets are being transferred was chosen by the participant or beneficiary (see section 404(c)(4)(C)(iii)). Section 404(c)(5), unlike 404(c)(4), can apply to the selection of an investment alternative by the plan fiduciary in the absence of any affirmative direction by the participant or beneficiary. While the fiduciary relief afforded by section 404(c)(4) and section 404(c)(5) is similar, relief under section 404(c)(4) requires that new investments be reasonably similar to the investments of the participant or beneficiary immediately before the change, whereas relief under section 404(c)(5) requires investment to be made in qualified default investment alternatives. In the context of changing investment options under the plan, ERISA sections 404(c)(4) and 404(c)(5) provide fiduciaries flexibility in implementing such changes.

Preemption

Section 902 of the Pension Protection Act added a new section 514(e)(1) to ERISA providing that, notwithstanding any other provision of section 514, title I of ERISA shall supersede any State law that would directly or indirectly prohibit or restrict the inclusion in any plan of an automatic contribution arrangement. Section 902 further added section 514(e)(2) to ERISA defining the term ''automatic contribution arrangement'' as an arrangement under which a participant: May elect to have the plan sponsor make payments as contributions under the plan on behalf of the participant, or to the participant directly in cash; is treated as having elected to have the plan sponsor make such contributions in an amount equal to a uniform percentage of compensation provided under the plan until the participant specifically elects not to have such contributions made (or specifically elects to have such contributions made at a different percentage); and under which such contributions are invested in accordance with regulations prescribed by the Secretary of Labor under section 404(c)(5) of ERISA. In the preamble to the proposed regulation, the Department specifically invited comment on whether, and to what extent, regulations would be helpful in addressing the preemption provision of section 514(e).

In response to the Department's invitation, commenters indicated that, while the application of the preemption provisions should be clarified, they did not believe it was necessary at this time for the Department to prescribe regulations establishing minimum standards for automatic contribution arrangements. Commenters also argued that ERISA preemption should extend to all prudent investments under an automatic contribution arrangement, not just those determined to be qualified default investment alternatives under the Department's regulation. In addition, commenters argued that preemption should not depend on compliance with all the requirements of the regulation under section 404(c)(5), noting that section 514(e) has an independent notice requirement. See section 514(e)(3).

In an effort to clarify the application of the preemption provisions of section 514(e), the final regulation includes a new paragraph (f). As set forth in the regulation, section 514(e) broadly preempts any State law that would restrict the use of an automatic contribution arrangement. After reviewing the text and purpose of section 514(e), the Department concluded that Congress intended to supersede the application of such laws to any pension plan that provides for an automatic contribution arrangement, regardless of whether such plan includes an automatic contribution arrangement as defined in the regulation. This conclusion is reflected in paragraph (f)(2) of the final regulation.

With the enactment of section 514(e), Congress intended to occupy the field with respect to automatic contribution arrangements.[9] Thus, section 514(e) of ERISA does not merely supersede State laws ''insofar'' as any particular plan complies with this final regulation, but rather generally supersedes any law ''which would directly or indirectly

[9] This interpretation of section 514(e) is consistent with the Technical Explanation of H.R. 4, the ''Pension Protection Act of 2006,'' as Passed by the House on July 28, 2006, and as Considered by the Senate on August 3, 2006, a document prepared by the staff of the Joint Committee on Taxation. That document states, on page 230: ''The State preemption rules under the bill are not limited to arrangements that meet the requirements of a qualified enrollment feature.''

prohibit or restrict the inclusion in any plan of an automatic contribution arrangement.'' This language stands in marked contrast to the familiar language of section 514(a) of ERISA, which supersedes State laws only ''insofar'' as they satisfy the ''relates to'' standard set forth in that section.[10]

Additionally, Congress gave the Department discretion in section 514(e)(1) to determine whether and to what extent preemption should be conditioned on plan compliance with minimum standards, stating that ''[t]he Secretary may prescribe regulations which would establish minimum standards that such an arrangement would be required to satisfy in order for this subsection [on preemption] to apply in the case of such arrangement.'' Pursuant to this grant of discretionary authority, the Department has concluded, at this time, that it should not tie preemption to minimum standards for default investments. The Department, therefore, specifically provides in paragraph (f)(4) that nothing in the final regulation precludes a pension plan from including an automatic contribution arrangement that does not meet the conditions of paragraph (a) through (e) of the regulation. While relief under ERISA section 404(c)(5) is available only to plans that comply with the regulation, the Department has determined that it would be inappropriate to discourage plan fiduciaries from selecting default investments that are not identified in the regulation. State laws that hinder the use of any other default investments would be inconsistent with this determination, and with the discretionary authority Congress vested in the Department over the scope of ERISA preemption.

Finally, in an effort to eliminate the need for multiple notices by plan administrators of automatic contribution arrangements, paragraph (f)(3) of the final regulation specifically provides that the administrator of an automatic contribution arrangement within the meaning of paragraph (f)(1) shall be considered to have satisfied the notice requirements of section 514(e)(3) if notices are furnished in accordance with paragraphs (c)(3) and (d) of the regulation. Accordingly, satisfaction of the notice requirements under section 404(c)(5) and this regulation also will serve to satisfy the separate notice requirements set forth in section 514(e)(3) for automatic contribution arrangements.

Enforcement

Section 902 of the Pension Protection Act amended section 502(c)(4) of ERISA to provide that the Secretary of Labor may assess a civil penalty against any person for each violation of section 514(e)(3) of ERISA. Implementing regulations will be developed in a separate rulemaking.

D. Effective Date

This final regulation will be effective 60 days after the date of its publication in the **Federal Register**.

E. Regulatory Impact Analysis

Summary

This regulation is expected to have two major economic consequences. Default investments will be directed more toward higher-return portfolios, boosting average investment returns, and automatic enrollment provisions will become more common, boosting participation. Both of these effects will increase average retirement savings, especially among workers who are younger, have lower earnings and/or more frequent job changes. A substantial number of individuals will enjoy significant increases in retirement income, while a few may experience decreases if the introduction of automatic enrollment slows their saving or if their default investment returns are particularly poor. The magnitude of these effects will be large in absolute terms and proportionately large for many directly affected individuals.

The regulation's effects will be cumulative and gradual, and their magnitude will depend on plan sponsor and participant choices. The Department has developed low- and high-impact estimates to illustrate a range of potential long-term effects.

By 2034 the regulation (together with the automatic enrollment provisions of the Pension Protection Act) is predicted to increase aggregate annual 401(k) plan contributions by between 2.6 percent and 5.1 percent, or by $5.7 billion to $11.3 billion (expressed in 2006 dollars). It is predicted to increase aggregate account balances by between 2.8 percent and 5.4 percent, or by $70 billion to $134 billion. Between 83 percent and 77 percent of net new 401(k) accumulations will be preserved for retirement rather than cashed out early.

Low-impact estimates indicate that the regulation will increase pension income by $1.3 billion per year on aggregate for 1.6 million individuals age 65 and older in 2034, but decrease it by $0.3 billion per year for 0.6 million. High-impact estimates suggest that pension income will increase by $2.5 billion for 2.5 million and fall by $0.6 billion for 0.9 million. Impacts on retirement income will be larger farther in the future, reflecting the fact that automatic enrollment and default investing disproportionately affect young workers.

A substantial portion of the increase in retirement savings will be attributable directly to the movement of default investments away from stand-alone, fixed income capital preservation vehicles and toward qualified default investment alternatives that provide for capital appreciation as well as capital preservation. The majority of the increase, however, will be attributable to the proliferation of automatic enrollment.

The Department believes that the net increase in retirement savings will translate into a net improvement in welfare. There is substantial risk that savings will fall short relative to many workers' retirement income expectations, especially in light of increasing health costs and stresses on defined benefit pension plans and the Social Security program. The regulation will help reduce that risk. An increase in retirement savings additionally is likely to promote investment and long-term economic productivity and growth. The Department therefore concludes that the benefits of this regulation will justify its costs.

Executive Order 12866

Under Executive Order 12866, the Department must determine whether a regulatory action is ''significant'' and therefore subject to the requirements of the Executive Order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of the Executive Order defines a ''significant regulatory action'' as an action that is likely to result in a rule (1) having an annual effect on the economy of $100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal

[10] Section 514(a) of ERISA provides, in pertinent part, that ''the provisions of this title and title IV shall supersede any and all State laws *insofar* as they may now or hereafter relate to any employee benefit plan * * *.'' Emphasis added.

mandates, the President's priorities, or the principles set forth in the Executive Order. This action is significant under section 3(f)(1) because it is likely to have an annual effect on the economy of $100 million or more. Accordingly, the Department has undertaken, as described below, an analysis of the costs and benefits of the regulation. The Department believes that the regulation's benefits justify its costs.

Regulatory Flexibility Act

The Department certified that the proposed regulation, if adopted, would not have a significant economic impact on a substantial number of small entities. 71 FR 56806, 56815 (Sept. 27, 2006). In explaining the basis for this certification, the Department noted that 10 to 20 percent of small participant directed defined contribution plans (28,000 to 56,000 plans) might adopt automatic enrollment programs as a result of the regulation. Consequently, some of the employers sponsoring such plans may have to make additional matching contributions (up to $100 million to $300 million annually). The Department expects that the amount of such additional contributions to small plans would be proportionately similar to those to large plans. The Department did not expect the proposed regulation to have any adverse consequences for small plans or their sponsors because all the factors at issue, including the payment of matching contributions, the adoption of automatic enrollment programs, and compliance with the regulation are voluntary on the part of the plan sponsor.

The Department received one comment regarding the proposed regulation's potential effect on small entities. The commenter believes that certain types of mutual funds that would be qualified default investment alternatives under paragraph (e)(4)(i) (e.g., life-cycle or target-retirement date funds) sometimes invest in other types of mutual funds. According to the commenter, the investment advisers for the life-cycle or target-retirement-date funds may have an incentive to skew the fund's allocation toward sub funds that generate higher fees than to funds that would be most appropriate for the age or expected retirement date of the affected participants. The commenter stated that fiduciaries of small plans wishing to use the safe harbor would need to expend disproportionately more resources than large plan fiduciaries in making sure that the asset allocations (and thus, the corresponding fee structures) are not tainted by conflicts of interest. Specifically, the commenter was concerned that unlike larger plans which could conduct analyses of the neutrality of asset allocations in-house, small plans would have to expend resources on using outside consultants to conduct such analyses or face potential liability for a failure to do so. The commenter mentioned that some funds are willing to indemnify fiduciaries of large plans from any liability associated with choosing such funds. The commenter suggested that the Department add measures to mitigate the likelihood of conflicts, such as requiring that such funds allocate assets pursuant to independent algorithms and require equal treatment for small plan fiduciaries with regard to indemnification.

Plan fiduciaries must take into account potential conflicts of interest and the reasonableness of fees in choosing and monitoring any investment option for a plan, whether covered under the safe harbor or not. This obligation flows from the fiduciary duties of prudence and loyalty to the participants set out in ERISA section 404(a)(1). The regulation imposes no new requirements for selecting qualified default investment alternatives. For large or small plans, the duty to evaluate a plan investment option exists regardless of whether the plan includes an automatic enrollment feature or whether the fiduciary is seeking to comply with this regulation. Thus, the Department continues to believe that this regulation would not have a significant effect on a substantial number of small entities.

The Department considered the commenter's suggestions. Adopting them, however, could limit plans' choices or increase the cost of qualified default investment alternatives. The regulation does not prevent plan fiduciaries from taking features such as independent algorithms into account in choosing qualified default investment alternatives. If it determines that a widespread need for such assistance exists, the Department may consider providing guidance for small plans regarding prudent selection of qualified default investment alternatives.

The Department has also considered the changes made in this document from the proposed regulation. These changes, including the modified notice requirement, allowing trustees and certain plan sponsors to manage qualified default investment alternatives, and the addition of a temporary qualified default investment alternative are discussed more fully earlier in this document. They do not affect the Department's determination regarding the regulation's impact on small entities. Therefore, the Department recertifies its earlier conclusion that this regulation will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)), the proposed regulation solicited comments on the information collections included in the proposed regulation. The Department also submitted an information collection request (ICR) to OMB in accordance with 44 U.S.C. 3507(d), contemporaneously with the publication of the proposed regulation, for OMB's review.[11] Although no public comments were received that specifically addressed the paperwork burden analysis of the information collections, the comments that were submitted, and which are described earlier in this preamble, contained information relevant to the costs and administrative burdens attendant to the proposals. The Department took into account such public comments in connection with making changes to the proposal, analyzing the economic impact of the proposals, and developing the revised paperwork burden analysis summarized below.

In connection with publication of this final rule, the Department has submitted an ICR to OMB for its request of a new collection. The public is advised that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The Department intends to publish a notice announcing OMB's decision upon review of the Department's ICR.

A copy of the ICR may be obtained by contacting the PRA addressee shown below or at *http://www.RegInfo.gov.* PRA ADDRESSEE: Gerald B. Lindrew, Office of Policy and Research, U.S. Department of Labor, Employee Benefits Security Administration, 200 Constitution Avenue, NW., Room N–5718, Washington, DC 20210. Telephone: (202) 693–8410; Fax: (202) 219–4745. These are not toll-free numbers.

The regulation provides certain specified relief from fiduciary liability for fiduciaries who make investment decisions on behalf of participants and beneficiaries in individual account

[11] On Nov. 20, 2006, OMB issued a notice (ICR Reference No. 200608–1210–003) that it would not approve the Department's request for approval of the information collection provisions until after consideration of public comment on the proposed regulation and promulgation of a final rule, describing any changes.

pension plans that provide for participant direction of investments when such participants and beneficiaries fail to direct the investment of their account assets. The regulation describes conditions under which a participant or beneficiary who fails to provide investment direction will be treated as having exercised control over assets in his or her account under an individual account plan as provided in section 404(c)(5)(A) of ERISA. The regulation requires that the assets of non-directing participants or beneficiaries be invested in one of the qualified default investment alternatives described in the regulation and that certain other specified conditions be met.

The regulation imposes two separate disclosure requirements to participants and beneficiaries that are conditions to the relief created by the final regulation, as follows: (1) The plan must provide an initial notice containing specified information to any individual whose assets may be invested in a qualified default investment alternative generally at least 30 days prior to the date of plan eligibility (or on or before the date of plan eligibility if the participant is permitted to make a withdrawal under Code section 414(w)) and thereafter annually at least 30 days before the beginning of each plan year; and (2) the plan must provide certain materials that it receives relating to participants' and beneficiaries' investments in a qualified default investment alternative. The ''pass-through'' materials that must be provided are those specified in the Department's regulation under ERISA section 404(c) at 29 CFR 2550.404c–1(b)(2)(i)(B)(1)(viii) and (ix) and 29 CFR 404c–1(b)(2)(i)(B)(2). The information collection provisions of this regulation are intended to ensure that participants and beneficiaries who are provided the opportunity to direct the investment of their account balances, but who do not do so, are adequately informed about the plan's provisions for default investment and about investments made on their behalf under the plan's default provisions.

The estimates of respondents and responses on which the Department's burden analysis is based are derived primarily from the Form 5500 Series filings for the 2004 plan year, which are the most recent reliable data available to the Department.[12] The burden for the preparation and distribution of the disclosures is treated as an hour burden. Additional cost burden derives solely from materials and postage. It is assumed that electronic means of communication will be used in 38 percent of the responses pertaining to the initial and annual notices and that such communications will make use of existing systems. Accordingly, no cost has been attributed to the electronic distribution of information.

Annual Notice—29 CFR 2550.404c–5(c)(3). The regulation requires that notice be provided initially, before any portion of a participant's or beneficiary's account balance is invested in a qualified default investment alternative, and annually thereafter. The notice generally must describe: (1) The circumstances under which assets in the individual account of a participant or beneficiary may be invested on behalf of the participant or beneficiary in a qualified default investment alternative; and, if applicable, an explanation of the circumstances under which elective contributions will be made on behalf of a participant, the percentage of such contributions, and the right of the participant to elect not to have such contributions made on the participant's behalf (or to elect to have such contributions made at a different percentage); (2) the right of participants and beneficiaries to direct the investment of assets in their accounts; (3) the qualified default investment alternative, including its investment objectives, risk and return characteristics (if applicable), and fees and expenses; (4) the participants' and beneficiaries' right to direct the investment of the assets to any other investment alternative offered under the plan, including a description of any applicable restrictions, fees or expenses in connection with such a transfer; and (5) where participants and beneficiaries can obtain information about the other investment alternatives available under the plan.

The Department estimates that 424,000[13] participant directed individual account pension plans will prepare and distribute notices to 62,544,000 eligible workers, participants and beneficiaries in the first year in which this regulation becomes applicable. Preparation of the notice in the first year is estimated to require one-half hour of legal professional time for each plan, for a total aggregate estimate of 212,000 burden hours. For the 62 percent of participants and beneficiaries who will receive the notice by mail (38,777,000 individuals), distribution of the notice is estimated to require an additional 310,000 hours of clerical time, based on an estimate of one-half minute of clerical time per notice. No additional burden hours are attributed to the distribution of the notice to the remaining 38 percent of participants and beneficiaries who will receive this notice electronically (23,767,000 individuals). The total annual burden hours estimated for the notice in the first year, therefore, are 522,000. The equivalent cost for this burden hour estimate is $30,232,000 (legal professional time is valued at $106 per hour, and clerical time is valued at $25 per hour).[14]

In addition to burden hours, the Department has estimated annual costs attributable to the notice for the first year, based on materials and postage, at $19,776,000. This comprises the material cost for a two-page notice ($.10 per notice) to 38,777,000 participants and beneficiaries (62 percent of 62,544000 participants and beneficiaries), which equals $3,878,000, plus postage at $0.41 per mailing, which equals $15,899,000. Total annual costs for the notice in the first year are therefore estimated at $19,776,000.

In years subsequent to the first year of applicability, the Department estimates that notices will be prepared only by newly established participant directed individual account pension plans and plans that change their choice of qualified default investment alternative. For purposes of burden analysis, the Department has assumed that one-third (1/3) of all participant directed individual account plans (141,000 plans) will prepare and distribute new or updated notices to all participants and beneficiaries, requiring 24 minutes of legal professional time per notice. The preparation of these notices in each subsequent year is estimated to require 57,000 hours. However, the number of participants receiving notices stays the same. As in the calculation for the initial year, distribution to the 62 percent of participants and beneficiaries who will receive the notice by mail (38,777,000 individuals) will require 310,000 hours and $19,776,000 additional materials and postage cost. (As for the first year, the Department has assumed that electronic distribution of the notice in subsequent years will not add any significant additional paperwork burden.)

Based on those assumptions, the Department estimates that the total

[12] The Department does not anticipate an increase in the number of Form 5500 filings merely due to the changes to the Form 5500 for 2007 to 2009.

[13] All numbers used in this paperwork burden estimate have been rounded to the nearest thousand.

[14] EBSA estimates based on the Bureau of Labor Statistics, National Occupational Employment Survey (May 2005) and the Bureau of Labor Statistics, Employment Cost Index (Sept. 2006).

burden hours for notices under this regulation in each year after the first year of applicability will fall to 367,000 hours. The equivalent cost of such an hour burden (using the same assumptions as for the first year) is $13,749,000. The total cost burden estimated for subsequent years for the notice will remain at $19,776,000.

Pass-through Material—29 CFR 2550.404c–5(c)(4). Under the regulation, the fiduciary shall qualify for the relief described in paragraph (b)(1) of the final regulation if a fiduciary provides material to participants and beneficiaries as set forth in paragraphs (b)(2)(i)(B)(1)(viii) and (ix), and paragraph (b)(2)(i)(B)(2) of the 404(c) regulation. In addition, plans must be prepared to provide certain information on request and must therefore maintain such information in updated form in order to comply. The paperwork burden for the pass-through disclosure requirements calculated here does not include pass-through disclosure burden for section 404(c) plans, as these disclosures for section 404(c) plans were considered in the renewal to OMB Control No. 1210–0090.[15]

The regulation imposes this requirement only with respect to participants and beneficiaries who have an investment in a qualified default investment alternative that was made by default. In conformity with the assumptions underlying the other economic analyses in this preamble, the Department has assumed that, at any given time, 5.3 percent of participants and beneficiaries in participant directed individual account pension plans (3,794,000 individuals) will have default investments. Of these, 1,072,000 individuals are invested in participant directed individual account pension plans that are not section 404(c) plans. For purposes of this burden analysis, the Department has also assumed that plans will receive materials that must be passed through the participants and beneficiaries on a quarterly basis. This assumption takes into account that many, although not all, plans will receive quarterly financial statements and prospectuses, and that plans will also receive other pass-through materials on occasion. These two factors result in an estimate of 4,286,000 responses (distributions of pass-through materials) per year. Duplication and packaging of the pass-through material is estimated to require 1.5 minutes of clerical time per distribution, for an annual hour burden estimate of 107,000 hours of clerical time. The equivalent cost of this hour burden is estimated at $2,679,000. Additional cost burden for the pass-through of material is estimated to include paper cost (40 pages of material yearly per participant or beneficiary) and postage ($.58 per mailing) at $4,629,000 annually for 4 distributions per participant or beneficiary with a default investment.

Plans also need to maintain information in order to provide certain information on request. This preparation is estimated to require one hour of clerical time for each of the 162,000 newly affected plans, for a total of 162,000 burden hours. The Department assumes that, on average, plans will make one disclosure upon request every year and that it takes one-half minute of clerical time per disclosure to send out the materials, requiring about 4,000 hours of clerical time. In total, the preparation and sending of information upon request requires 166,000 burden hours with equivalent costs of $4,145,000. Additional cost burden for the material is estimated to include paper cost (20 pages of material yearly per information request) and postage ($0.89 per mailing) at $306,000.[16]

In total, the Department estimates that providing pass-through disclosures to non-directing participants and beneficiaries under this regulation will require annual burden hours of approximately 273,000 hours (with equivalent costs of $6,824,000) and total costs of $4,935,000.

These paperwork burden estimates are summarized as follows:

Type of Review: New collection.

Agency: Employee Benefits Security Administration, Department of Labor.

Title: Default Investment Alternatives under Participant Directed Individual Account Plans.

OMB Number: 1210–AB10.

Affected Public: Business or other for-profit; not-for-profit institutions.

Respondents: 424,000.

Responses: 66,991,000.

Frequency of Response: Annually; occasionally.

Estimated Total Annual Burden Hours: 795,000 (first year).

Estimated Total Annual Burden Cost: $24,711,000 (first year).

Congressional Review Act

This notice of final rulemaking is subject to the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*) and therefore has been transmitted to the Congress and the Comptroller General for review.

Unfunded Mandates Reform Act

Pursuant to the provisions of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), this rule does not include any Federal mandate that may result in expenditures by State, local, or tribal governments, or the private sector, that may impose an annual burden of $100 million or more, adjusted for inflation.

Economic Impacts

By 2034 the regulation (together with the automatic enrollment provisions of the Pension Protection Act) is predicted to increase aggregate account balances by between 2.8 percent and 5.4 percent, or by $70 billion to $134 billion.

Investment Mix

A large but declining proportion[17] of 401(k) plans currently direct default investments exclusively to fixed income capital preservation vehicles such as money market or stable value funds. By reducing risks attendant to fiduciary responsibility and liability, this regulation is expected to encourage more plans to direct default investments to vehicles that include a mix of equity and fixed income instruments and thereby provide the potential for capital appreciation as well as capital preservation.

As a result of this regulation, it is estimated that in 2034, 401(k) plan investments in qualified default investment alternative-type vehicles (expressed in 2006 dollars) will increase by between $65 billion and $116 billion. The portion of this estimated increase that is attributable directly to the redirection of default investments is between $18 billion and $24 billion. The rest is attributable to increased contributions, which are discussed below.[18]

[15] See 71 FR 64564 (Nov. 2, 2006). The paperwork burden as calculated for section 404(c) plans assumes that plans send pass-through disclosures to all participants and beneficiaries in section 404(c) plans, not only to the ones that are actively directing their investments.

[16] The burden arising from these disclosure requirements will be the same in subsequent years.

[17] Various surveys estimate the proportion at 40 percent (Profit Sharing/401(k) Council of America, 49th Annual Survey of Profit Sharing and 401(k) Plans (2006) at 39), 41 percent (Deloitte Consulting, Annual 401(k) Benchmarking Survey, 2005/2006 Edition (2006) at 7), and 21 percent (Vanguard, How America Saves 2006 (Sept. 2006) at 26). Surveys also reveal a trend away from capital preservation defaults toward investment vehicles like those included as qualified default investment alternatives for future contributions under this regulation.

[18] These estimates pertain only to default investments made on behalf of defaulted participants under automatic enrollment programs. The default investment regulation is not so limited. Therefore, these estimates are likely to omit some of the redirection of default investments that will occur under the regulation.

Investment Performance

Historically, over long time horizons, diversified portfolios that include equities have tended to deliver higher returns than those consisting only of lower risk debt instruments.[19] It therefore is widely believed to be advantageous to invest retirement savings in diversified portfolios that include equity.[20]

As noted above, this regulation is expected to encourage the redirection of default investments from stand-alone, low-risk capital preservation instruments to diversified portfolios that include equities. This in turn is expected to improve investment results for a large majority of affected individuals, increasing aggregate account balances by an estimated $5 billion to $7 billion in 2034.

In deriving these estimates, in response to public and peer reviewer comments, the Department refined its assumptions regarding investment performance relative to those relied on in its estimates of the proposed regulation's effects. This is explained further below under headings ''Basis of Estimates'' and ''Peer Review.''

Automatic Enrollment

Automatic enrollment programs are growing in popularity. These programs covered only about 5 percent of workers eligible for 401(k) plans in 2002,[21] but the number may now be as high as 24 percent[22] and could reach 35 percent in the near future, absent this final rule.[23]

The Department expects and intends that this regulation, together with the automatic enrollment provisions of the Pension Protection Act, will promote wider implementation of automatic enrollment programs. The regulation will help alleviate fiduciary concerns that might otherwise discourage implementation of automatic enrollment programs. It will also make it possible for plan sponsors to take advantage of Pension Protection Act provisions that waive certain Internal Revenue Code bars against discrimination in favor of highly compensated employees and that preempt state laws unfriendly to automatic enrollment programs. As a result of the regulation, in the near future automatic enrollment programs may cover 50 percent to 65 percent of 401(k)-eligible workers rather than 35 percent.[24]

Participation

Analyses of automatic enrollment programs demonstrate that such programs increase participation. The increase is most pronounced among employees whose participation rates otherwise tend to be lowest, namely lower-paid, younger and shorter-tenure employees.[25] Automatic enrollment programs increase many such employees' contribution rates from zero to the default rate, often supplemented by some employer matching contributions. These additional contributions tend to come early in the employees' careers and therefore can add disproportionately to retirement income as investment returns accumulate over a long period. However, there is also evidence that automatic enrollment programs can have the effect of lowering contribution rates for some employees below the level that they would have elected absent automatic enrollment. Current surveys indicate that the default contribution rates are typically set at 3 percent of salary.[26] Some employees who might otherwise have actively enrolled in a plan (either at first eligibility or later) and elected a higher contribution rate may instead permit themselves to be enrolled at the default rate. [27]

Plans implementing automatic enrollment programs may increase their participation rates on average from approximately 70 percent to perhaps 90 percent. Consequently, the Department estimates that this regulation will increase overall 401(k) participation rates from 73 percent to between 77 percent and 80 percent.[28] Aggregate annual contributions in 2034 are expected to grow on net by between $5.7 billion and $11.3 billion (expressed in 2006 dollars). These and related estimates are summarized in Table 1 below.

[19] See, e.g., Ibbotson Associates, Stocks, Bonds, Bills and Inflation, 2006 Yearbook (2006).

[20] See, e.g., U.S. Securities and Exchange Commission, Beginners' Guide to Asset Allocation, Diversification, and Rebalancing (May 2007), at *http://www.sec.gov/investor/pubs/assetallocation.htm*; and Stephen P. Utkus, Selecting a Default Fund for a Defined Contribution Plan, Vanguard Center for Retirement Research, Volume 14 (June 2005) at 6.

[21] U.S. Bureau of Labor Statistics, National Compensation Survey: Employee Benefits in Private Industry in the United States, 2002–2003, Bulletin 2573 (Jan. 2005).

[22] EBSA estimate. The proportion of plans in various size classes that provide automatic enrollment was taken from Profit Sharing/401(k) Council of America, 49th Annual Survey of Profit Sharing and 401(k) Plans (2006) at 38. EBSA took a weighted average of these proportions, reflecting the distribution of 401(k) participants across the plan size classes, as estimated by EBSA based on annual reports filed by plans with EBSA.

[23] The incidence of automatic enrollment appears to be growing. According to one series of surveys automatic enrollment spread from 8.4 percent of plans in 2003 to 16.9 percent in 2005 (Profit Sharing/401(k) Council of America, 49th Annual Survey of Profit Sharing and 401(k) Plans (2006) at 38). Another found that automatic enrollment spread from 15 percent of plans in 2003 to 23 percent in 2005 with an additional 29 percent considering it for the future (Deloitte Consulting, 2003 Annual 401(k) Benchmarking Survey (2004) at 25 and Deloitte Consulting, Annual 401(k) Benchmarking Survey 2005/2006 Edition (2006) at 7). According to yet another, it grew from 14 percent in 2003 to 24 percent in 2006, with 23 percent of the remainder ''very likely'' and 25 percent ''somewhat likely'' to begin automatic enrollment within the year (Hewitt Associates LLC, Survey Findings: Trends and Experiences in 401(k) Plans, 2005 (2005) at 13, and Hewitt Associates LLC, Survey Findings: Hot Topics in Retirement, 2006 (2006) at 3).

[24] The Department believes these figures reasonably illustrate a range of possible outcomes. The Department is confident that the regulation will increase the incidence of automatic enrollment. According to one survey, among plans that currently are somewhat or very unlikely to offer automatic enrollment in the future, 36 percent cite the need for the Department to identify appropriate default investments, 33 percent cite the need for preemption of unfriendly state laws, and 30 percent cite the need for relief from nondiscrimination requirements (Hewitt Associates LLC, Survey Findings: Hot Topics in Retirement, 2006 (2006) at 5).

[25] According to the Department's low- and high-impact estimates (respectively), under the regulation, active (non-defaulted) participants will number between 32 million and 33 million in 2034. Their ages will average between 44.2 and 44.1 years, and their pay will average between 160 percent and 158 percent of average earnings calculated by the Social Security Administration. Defaulted participants will number between 4.2 million and 5.4 million. In contrast to active participants, their ages will average between 34.0 and 34.1 years, and their pay will average between 109 percent and 108 percent of average pay in Social Security covered employment.

[26] It is possible that in the future more plans will provide for higher or escalating default contribution rates. The Pension Protection Act waives certain bars against discrimination in favor of highly compensated employees for 401(k) plans with automatic enrollment that satisfy certain conditions. One such condition generally provides that a participant's default contribution rate must escalate to at least 6 percent not later than his fourth year of participation.

[27] See, e.g., James J. Choi, David Laibson, Brigette C. Madrian and Andrew Metrick, Saving for Retirement on the Path of Least Resistance (updated draft analysis, July 19, 2004) at 56–57, Figures 2A–2D; and James J. Choi, David Laibson and Brigitte C. Madrian, Plan Design and 401(k) Savings Outcomes (written for the National Tax Journal Forum on Pensions, June 2004) at 11.

[28] These numbers are rounded to the nearest percentage point.

Table 1: Estimated Effect of Regulation on 401(k) Participation and Contributions in 2034
(Dollar amounts expressed in billions of 2006 dollars)

	Low Impact	High Impact
Percentage point increase in participation rate of 401(k)-eligible employees	4%	8%
Added annual contributions	$8.9	$17.4
Discouraged annual contributions	$3.2	$6.0
Net additional contributions	$5.7	$11.3
Increase in aggregate account balances	$70	$134

Preservation

New employee contributions attributable to automatic enrollment will be attributable disproportionately to younger, lower-paid, shorter-tenure workers.

Some such workers, who absent automatic enrollment would have delayed participation, will begin contributing earlier and thereby accumulate larger balances. The investment of these contributions in qualified default investment alternatives, rather than in capital preservation vehicles, will further enlarge account balances on average. Larger balances are more likely to be preserved for retirement. Therefore it is possible that the regulation will increase the proportion of 401(k) accounts that are preserved.[29]

On the other hand, other such workers may accumulate only small accounts before leaving their jobs. Historically, younger, lower-paid workers with small accounts have tended disproportionately to cash out their accounts upon job change rather than preserve them in tax-deferred retirement accounts. It is therefore also possible that, by encouraging automatic enrollment, the proportion (but not the total amount) of 401(k) accounts preserved for retirement could decrease.

The Department estimates that these effects will nearly offset one another. Workers will leave an estimated 4.3 million 401(k)-eligible jobs in 2033. As a result of this regulation (together with the automatic enrollment provisions of the Pension Protection Act), the number leaving with positive account balances will grow from 2.30 million to between 2.45 million and 2.61 million. The proportion of those leaving with positive accounts that preserve their accounts for retirement will fall slightly from 61.0 percent to between 60.4 percent and 59.7 percent, and the proportion of the account balances preserved will fall from 85.9 percent to between 85.8 percent and 85.4 percent. The regulation's marginal effect on the preservation of account balances can be illustrated by comparing estimated net increases in account-holding job leavers and their account balances with estimated net increases in preserved accounts. The proportion of net new job leavers with account balances that preserve their accounts is estimated to be approximately 50 percent, while the proportion of net new job-leaver accounts that is preserved is estimated to be 83 percent to 77 percent.

Retirement Income

Low-impact estimates suggest that the regulation will increase pension income by $1.3 billion per year on aggregate for 1.6 million individuals age 65 and older in 2034 (expressed in 2006 dollars), but decrease it by $0.3 billion per year for 0.6 million. High-impact estimates suggest that average annual pension income will increase by $2.5 billion for 2.5 million and fall by $0.6 million for 0.9 million. These estimates are summarized in Table 2 below. Impacts on retirement income will be larger farther in the future, reflecting the fact that automatic enrollment and default investing disproportionately affect young workers.

[29] There will be other, smaller effects. Because larger accounts are more likely to be preserved, any effect of the regulation on account balances may also affect the preservation rate. As noted below, while automatic enrollment increases contributions for many workers, it may decrease them for a few. Likewise, while movement from capital preservation investments to qualified default investment alternatives will boost investment returns for many, it may reduce returns for a few. All of these effects in turn affect account balances and preservation rates. The Department's estimates account for all of these effects.

Table 2: Effect of Regulation on Annual Pension Income of Individuals Age 65+ in 2034 (Expressed in 2006 Dollars)

Career Pay Quartile	Number with Gains (000s)	Aggregate Gain ($Millions)	Number with Losses (000s)	Aggregate Loss ($Millions)
Low Impact				
All	1,594	$1,330	589	$328
Q1	285	$111	100	$18
Q2	390	$226	142	$52
Q3	434	$343	164	$84
Q4	485	$650	183	$174
High Impact				
All	2,541	$2,465	856	$637
Q1	457	$206	145	$41
Q2	635	$451	206	$97
Q3	686	$611	240	$163
Q4	763	$1,198	265	$336

The regulation is estimated to have distributional consequences, narrowing somewhat the distribution of pension income across earnings groups. Among all individuals age 65 or older in 2034, for example, those in the lowest lifetime earnings quartile would receive just 5 percent of pension income absent the regulation, but they will receive 9 percent of net gains from the regulation. The amount they gain will exceed the amount lost by a factor of five or six (see Table 3 below).

Table 3: Distributional Effect of Regulation on Annual Pension Income of Individuals Age 65+ in 2034 (Expressed in 2006 Dollars)

Career Pay Quartile	Low Impact				High Impact			
	Pension Income Shares		Gain/Loss Ratios		Pension Income Shares		Gain/Loss Ratios	
	Base-line	Net Gain	#	$	Base-line	Net Gain	#	$
Q1	5%	9%	2.8	6.1	5%	9%	3.2	5.1
Q2	12%	17%	2.8	4.3	12%	19%	3.1	4.6
Q3	23%	26%	2.6	4.1	23%	24%	2.9	3.7
Q4	60%	48%	2.7	3.7	60%	47%	2.9	3.6

Administrative Cost

Plan sponsors may incur some administrative costs in order to meet the conditions of the regulation. The Department generally expects such costs to be low. Any changes to plan provisions or procedures necessary to satisfy the regulation's conditions are likely to be no more extensive than those associated with changes that plans implement from time to time in the normal course of business. The boundaries of the regulation are sufficiently broad to encompass a wide range of readily available and competitively priced investment products and services. It is likely that a large majority of participant directed plans already offer one or more investment options that would fall within the safe harbor. Costs attendant to the regulation's notice provisions can be mitigated by furnishing the notices together with other plan disclosures and/or through the use of electronic media. The requirement to pass through certain investment materials to participants and beneficiaries is the same as that already applicable to participant directed individual account plans operating in accordance with ERISA section 404(c). The Department's estimates of these costs are presented above under the heading Paperwork Reduction Act.

The regulation may indirectly prompt some plan sponsors to shoulder additional benefit costs. For example, it is expected that the regulation, by promoting the adoption of automatic enrollment programs, will have the indirect effect of increasing aggregate employer matching contributions in 2034 by between $1.7 billion and $3.4

billion (expressed in 2006 dollars). Adverse consequences are not expected because the adoption of automatic enrollment programs and the provision of matching contributions generally are at the discretion of the plan sponsor. Reliance on the regulation and, therefore, compliance with its provisions are also voluntary on the part of the plan sponsor.

Cost-Benefit Assessment

The Department believes that, by increasing average retirement income, the regulation will improve overall social welfare. There is mounting concern that many Americans have been preparing inadequately for retirement. Most workers are on track to have more retirement wealth than most current retirees, and recent declines in reported savings rates may not be cause for alarm in light of offsetting capital gains. Nonetheless, savings may fall short relative to workers' retirement income expectations, especially in light of increasing health costs and stresses on defined benefit pension plans and the Social Security program.[30] Because of these real risks, the Department believes that policies that increase retirement savings can increase welfare by helping workers secure retirement living standards that meet their expectations.

The regulation may also have macroeconomic consequences, which are likely to be small but positive. An increase in retirement savings is likely to promote investment and long-term economic productivity and growth. The increase in retirement savings will be very small relative to overall market capitalization. Therefore macroeconomic benefits are likely to be small. Based on the foregoing analysis and estimates, the Department believes that the benefits of this regulation will justify its costs.

Basis of Estimates

The Department estimated the effect of the regulation on 401(k) plan participation, contributions, account balances, investment mix, and early cash outs, and its effect on pension incomes in retirement, using a microsimulation model of lifetime pension accumulations known as PENSIM.[31] To produce the low and high impact estimates presented here, PENSIM was parameterized and applied as follows.

First, automatic enrollment was assigned randomly to 401(k) plan eligible employees to achieve incidences of 35 percent (baseline), 50 percent (low impact) and 65 percent. Next, participation and default participation rates were adjusted to reflect available research findings on these rates at various tenures in the presence and absence of automatic enrollment programs.[32] The default contribution rate was assumed to be 3 percent, which surveys indicate is the most common rate currently in use.[33]

Defaulted participants were assumed to invest their contributions as follows:[34] in the baseline estimates, either in a money market fund [35] (50 percent) or a qualified default investment alternative (50 percent); in the low- and high-impact estimates of the regulation's effects, all entirely to a qualified default investment alternative.[36] Active contributors were assumed to invest their contributions either in a qualified default investment alternative (75 percent), a U.S. Treasury bond fund (15 percent), or an even mix of the two (10 percent). Some employer contributions were assumed to be invested in company stock. Price inflation and real returns were estimated stochastically. Mean price inflation was assumed to be 2.8 percent, and mean real returns to money market funds, Treasury bond funds, and equity funds, respectively, were assumed to be 1.3 percent, 2.9 percent, and 4.9 percent. Deducted respectively from

[30] See generally U.S. Council of Economic Advisors, Economic Report of the President, February 2006 (2006).

[31] PENSIM was developed for the Department by the Policy Simulation Group as a tool for examining the macroeconomic and distributional implications of private pension trends and policies. Detailed information on PENSIM is available at *http://www.polsim.com/PENSIM.html.* Examples of PENSIM applications include comparisons of retirement income prospects for different generations contained in U.S. Government Accountability Office, Retirement Income: Intergenerational Comparisons of Wealth and Future Income, GAO–03–429 (Apr. 2003), and comparisons of pension income produced by traditional defined benefit pension plans and cash balance pension plans contained in U.S. Government Accountability Office, Pension Plans: Information on Cash Balance Pension Plans, GAO–06–42 (Oct. 2006).

[32] These findings were drawn from James J. Choi, David Laibson and Brigitte C. Madrian, Plan Design and 401(k) Savings Outcomes (written for the National Tax Journal Forum on Pensions, June 2004). The overall participation rate under automatic enrollment was adjusted upward to 90 percent.

[33] See e.g., Vanguard, How America Saves 2006 (Sept. 2006) at 26, Deloitte Consulting, Annual 401(k) Benchmarking Survey, 2005/2006 Edition (2006) at 7; Hewitt Associates LLC, Survey Findings: Trends and Experiences in 401(k) Plans, 2005 (2005) at 16; and Profit Sharing/401(k) Council of America, 49th Annual Survey of Profit Sharing and 401(k) Plans (2006) at 38.

[34] These estimates assume complete correspondence between automatic enrollment in 401(k) plans and default investing. Participants contributing by automatic enrollment are assumed to invest in the plan's default investment, while those who actively elect to contribute or who are in plans without elective contributions are assumed to actively invest. In practice neither of these assumptions will hold all of the time. Some participants who are automatically enrolled may nonetheless actively direct their investments. Some active contributors or participants in plans without elective contributions may choose to invest in the plan's default investment '' and this regulation may affect the incidence of such default investing. The Department did not attempt to estimate the extent or effect of default investing not associated with automatic enrollment.

[35] Some comments on the proposed regulation suggested that money market funds may not accurately represent the range of capital preservation instruments that might serve as default investments. In particular, according to some comments, stable value funds, relative to money market funds, offer higher returns with similarly low risk. The Department's estimates of the effects of the proposed regulation did not reflect this possibility. The Department agrees that stable value funds, if they perform as projected by their proponents, would outperform money market funds and thereby narrow (but not eliminate) the gains in average account balances and retirement income estimated to result from the shift toward qualified default investment alternatives. However, the Department believes that this possibility should be assessed with caution. Economic theory suggests that if financial markets are efficient, financial instruments with similar risk characteristics will provide similar returns. It therefore seems likely that there are important differences between money market and stable value funds beyond any difference in average returns. The Department understands that stable value products may come with a variety of features that may sometimes erode actual returns in response, for example, to certain plan sponsor actions that have the effect of shifting participant account allocations away from such products. Such stable value product features may sometimes dissuade plans or participants from making investment changes that they otherwise would, thereby imposing opportunity costs. The Department also understands that stable value products may expose investors to the credit risk of the fund vendor in ways that money market funds do not. This credit risk may be sensitive to changes in interest rates. In light of these considerations the Department continues to believe that, for purposes of assessing the impact of this regulation, money market funds reasonably represent available near risk-free investment instruments.

Nonetheless, in an effort to fully consider the potential implications of representations made in the comments, the Department tested the sensitivity of its low-impact estimates to representations regarding the investment performance of stable value products and assuming stable value products would be a substantial part of qualified default investments in the future. The sensitivity test puts aside the above considerations, and replaces money market fund performance with stylized stable value performance that is 200 basis points higher and equally variable. Under this test scenario, the regulation would increase aggregate account balances in 2034 by $68 billion (for comparison the Department's primary estimate is $70 billion), of which $3 billion (compared with $5 billon) is attributable to the shift of default investments from near risk-free instruments to qualified default investment alternatives. Among individuals age 65 and older in 2034, the number gaining retirement income would exceed the number losing by a ratio of 2.2 to 1 (compared with 2.7 to 1) and the aggregate amount gained would exceed that lost by a ratio of 3.8 to 1 (compared with 4.1 to 1).

[36] The qualified default investment alternative is represented by a portfolio resembling a life cycle fund, with 100 percent minus the participant's age in equity and the remainder in U.S. Treasury bonds.

these returns were assumed fees of 45, 45 and 75 basis points.

To estimate the effects of the regulation, the Department compared the baseline estimates to the low- and high-impact estimates.

For a more detailed explanation of the basis of these estimates, see Martin R. Holmer, ''PENSIM Analysis of Impact of Final Regulation on Defined— Contribution Default Investments'' (Policy Simulation Group, February 12, 2007). For additional estimation results, see Holmer, ''EBSA Automatic Enrollment RIA: Final Estimates'' (Policy Simulation Group, February 7, 2007). Both are available as part of the public docket associated with this regulation. Additional information on the Department's use of PENSIM in connection with this regulation is provided below, under the heading ''Peer Review.''

Sensitivity Tests

As noted above, the Department anticipates that this regulation (together with the automatic enrollment provisions of the Pension Protection Act) will have two major, beneficial economic consequences. Default investments will be directed toward higher-return instruments boosting average account performance, and automatic enrollment provisions will become more common boosting participation. In reaching its conclusion that the regulation will increase retirement income and improve social welfare, the Department took into account the potential sensitivity of its estimates to important economic and behavioral variables.

One variable involves the future incidence of automatic enrollment programs. As noted above the Department assessed this variable by comparing both low- and high-impact estimates with a common baseline. This variable affects the magnitude but not the net positive direction of the regulation's estimated effects.

The specific characteristics of future automatic enrollment programs constitute additional variables. For example, will new automatic enrollment programs cover only new employees, or existing non-participating employees as well? [37] The Department's estimates reflect automatic enrollment of new employees only. If plan sponsors automatically enroll existing employees the regulation's effects will be larger than estimated, especially in the near term. What default contribution rates will prevail? [38] The Department's primary estimates assume a uniform 3 percent default contribution rate. Higher contribution rates would increase the size of default participants' contributions, but might also discourage some from participating. To illustrate these potential effects the Department produced two alternative low-impact estimates substituting a 4.5-percent default contribution rate. One estimate assumed that the impact of automatic enrollment on participation was undiminished by the higher default contribution rate, the other that it was diminished by half. These were compared with the primary baseline estimate. Where the Department's primary low-impact estimate placed the increase in aggregate account balances in 2034 at $70 billion, the first alternative placed it at $123 billion, the second at $40 billion.

Additional variables concern what other changes plan sponsors might make to their plans. Plan sponsors implementing qualified default investment alternatives may make other changes to investment options or undertake new efforts to inform or influence participants' investment decisions. Plan sponsors that maintain or begin automatic enrollment programs may change other provisions of their plans, such as matching contribution formulas, eligibility or vesting provisions, loan programs, or distribution policies. Changes such as these could either augment or offset the effects of this regulation.

The investment advice and automatic enrollment provisions of the Pension Protection Act will promote activities and plan designs that are likely to augment the regulation's positive effects on retirement savings. Those provisions will help make investment advice available to more participants and will promote automatic enrollment programs with escalating default contribution rates, generous employer matching contributions and short vesting periods.

Default participants may make other changes in their savings behavior. Default participation might foster financial literacy or a taste for saving, which could augment the regulation's effect. Alternatively, default participants might offset their default savings by reducing other savings or taking on debt. In particular, they may be less likely than active participants to preserve their accounts for retirement when leaving a job.[39] To assess the implications of this possibility the Department produced alternative baseline and low-impact estimates, which assume that participants who leave their jobs while in default status never preserve their accounts. (Default participants who become active participants before leaving their jobs are assumed to preserve their accounts at the same rate as other active participants.) The alternative estimates represent a worst case outer bound. As noted above, comparing its primary baseline and low-impact estimates, the Department found that in 2033, 50 percent of net new job leavers with account balances preserve 83 percent of all net new job-leaver account balances. Comparing the respective alternative estimates, the Department found that the corresponding figures are 25 percent and 72 percent. Based on the Department's primary baseline and low-impact estimates, the regulation is expected to reduce the proportion of account holding job leavers that preserve their accounts from 61.0 percent to 60.4 percent and the proportion of their accounts that is preserved from 85.9 percent to 85.8 percent. Based on the alternative estimates, the corresponding reductions are from 56.9 percent to 54.7 percent and from 85.3 percent to 84.9 percent. Both the primary and alternative estimates strongly suggest that most new retirement saving resulting from this regulation (together with the automatic enrollment provisions of the Pension

[37] According to one survey, 24 percent of employers with automatic enrollment programs extended initial automatic enrollment beyond new hires to include the entire eligible population (Deloitte Consulting, Annual 401(k) Benchmarking Survey, 2005/2006 Edition (2006) at 8).

[38] According to one survey, 14 percent of plans with automatic enrollment provided for escalating default contributions in 2005, up from 7 percent in 2004 (Profit Sharing/401(k) Council of America, 49th Annual Survey of Profit Sharing and 401(k) Plans (2006) at 39). According to another, among the 24 percent of surveyed employers offering automatic enrollment in 2006, 17 percent planned to introduce escalating default contributions and 6 percent intended to increase the default contribution rate; none planned to lower it (Hewitt Associates LLC, Survey Findings: Hot Topics in Retirement, 2006 (2006) at 4).

[39] A number of factors may diminish this possibility. First, participants who contribute and invest by default may also tend to handle account distribution opportunities by default. Laws governing plans' default distribution provisions provide for the preservation of all but the smallest accounts. Absent participant direction to the contrary, accounts of $5,000 or more must remain in the plan, and smaller accounts of $1,000 or more must either remain in the plan or be rolled directly into an IRA. Second, some 401(k) plan sponsors reserve eligibility and automatic enrollment for employees who complete a specified period of service, such as one year. It is possible that sponsors with higher-turnover work forces and/or those offering automatic enrollment are or will be more likely to provide for such waiting periods for eligibility, perhaps in order to avoid the expense of churning very small accounts. Third, it is possible that the small fraction of employees who decline automatic enrollment (perhaps 10 percent) may be largely the same ones who would decline to preserve their accounts. In that case, participants added by automatic enrollment might be more likely to preserve them.

Protection Act) will be preserved for retirement. While one effect of the regulation will be to create many very small and short-lived accounts that participants never actively manage and may be unlikely to preserve, the Department expects that the larger effect will be to spur new, early default contributions by participants who later actively manage their accounts and are likely to preserve them.

The regulation may encourage active (in addition to default) investments in qualified default investment alternatives—a phenomenon sometimes referred to as an endorsement effect. If so, the impact of the regulation on asset allocation, and the attendant net positive effect on account balances and retirement income, will be amplified.[40]

Because the regulation's effects will be cumulative and gradual, they will be fully realized only in the very long run, generally when workers beginning careers today have long since retired. This long time horizon introduces additional, longer-term variables, but most of these implicate less the regulation's effects than the baseline. For example, future investment results may vary.[41] Other variables, which the Department did not attempt to quantify, include future career patterns and compensation levels and mixes.

Peer Review

OMB's ''Final Information Quality Bulletin for Peer Review'' (the Bulletin) establishes that important scientific information shall be peer reviewed by qualified specialists before it is disseminated by the Federal government. Collectively, the PENSIM model, the data and methods underlying it, the surveys and literature used to parameterize it, and the Department's interpretation of these and application of them to estimate the effects of this regulation and the proposed regulation constitute a ''highly influential scientific assessment'' under the Bulletin. Pursuant to the Bulletin, the Department therefore subjected this assessment to peer review. All materials associated with that review, including the Department's full response to the peer review, are available to the public as part of the docket associated with this regulation.[42]

The analysis presented here has been refined in several ways in response to the peer review.

The review questioned whether default participants would cash out their accounts rather than preserve them for retirement. The Department's primary estimates assume that default accounts will be cashed out or preserved at the same rates as other similarly-sized accounts.[43] The results, as reported above, suggest that balances attributable to new default contributions will be nearly as likely as other balances to be preserved. It is possible, however, that default participants will be less likely to preserve their accounts than active participants with similar-sized accounts. The Department therefore prepared alternative estimates that account for this possibility. The results appear under the heading ''Sensitivity Testing'' above.

The review questioned whether lower-paid workers might be more risk averse and might therefore be susceptible to welfare losses if their default investments are redirected from capital preservation vehicles to qualified default investment alternatives. In response the Department more closely examined the regulation's impact on lower-paid workers, finding disproportionate gains in pension income, as described above. These gains may help offset any welfare losses due to sub-optimal risk exposure. In addition, the Department believes the required notice to participants regarding default investments will facilitate the ability of workers to easily choose to actively change their risk exposure if the qualified default investment alternatives do not meet their risk preferences.

The reviews questioned the Department's assumptions regarding investment returns, saying they exaggerated the equity premium, neglected fees, and neglected variation in inflation and returns to debt instruments. In response the Department has moderated its assumption regarding the equity premium,[44] accounted for fees, and incorporated stochastic variation in inflation and debt returns.

Alternatives Considered

Capital Preservation Products

In defining the types of investment products, portfolios or services that may be used as a long-term qualified default investment alternative, the Department, after careful consideration of the many comments supporting capital preservation products, and assessment of related economic impacts, determined not to include capital

---

[40] There is some evidence to suggest that qualified default investment alternatives, once established as plan defaults, may claim a disproportionate share of active investments as well. There is some evidence that participants may gravitate toward investment options that appear to be endorsed by their employers, such as by responding to employers' directing of matching contributions into company stock by investing more participant-directed funds in company stock as well (see, *e.g.*, Jeffrey R. Brown, Nellie Liang and Scott Weisbenner, Individual Account Investment Options and Portfolio Choice: Behavioral Lessons from 401(k) Plans, (Sept. 2006) at 18). This paper summarizes some prior evidence and provides some new evidence of this effect, but also raises the possibility that this effect may be attributable instead to other factors. Participants have been found to exhibit inertia in their investment choices, being slow to rebalance or to respond to changes in the investment options offered to them (see, *e.g.*, Olivia S. Mitchell, Gary R. Mottola, Stephen P. Utkus, and Takeshi Yamaguchi, The Inattentive Participant: Portfolio Trading Behavior in 401(k) Plans, Pension Research Council Working Paper 2006–5 (2006) at 16, which finds a lack of rebalancing; see also Jeffrey R. Brown and Scott Weisbenner, Individual Account Investment Options and Portfolio Choice: Behavioral Lessons from 401(k) Plans (Dec. 2004) at 23, 37, Tables 8a, 8b, which finds inertia in participant response to the addition of new funds). Most on point, some early experience with automatic enrollment programs suggests that a previously available investment alternative, once established as a default in an automatic enrollment program, may attract an increased proportion of actively directed participant accounts (see, e.g, John Beshears, James J. Choi, David Laibson and Brigitte C. Madrian, The Importance of Default Options for Retirement Savings Outcomes: Evidence from the United States, National Bureau of Economic Research Working Paper 12009 (Jan. 2006), which provides some evidence of such an endorsement effect; see also Fidelity Investments, Building Futures Volume VII: How Workplace Savings are Shaping the Future of Retirement, (2006) at 124–138, for data on the concentration of participant accounts in default investment alternatives). To assess the potential implications of an endorsement effect for the impact of this regulation, the Department carried out a sensitivity test of its low-impact estimates of the regulation's effects. Where the Department's primary estimates take into account the default investment of defaulted participants' accounts only (no endorsement effect), the sensitivity test additionally assumes that 20 percent of actively directed accounts in plans with automatic enrollment will be directed to default investment alternatives (20 percent endorsement effect). Compared with the primary estimates, the sensitivity test indicates that regulation will increase aggregate account balances in 2034, expressed in 2006 dollars, by $87 billion (rather than $70 billion), of which $26 billion (rather than $5 billion) will be directly attributable to the allocation of more assets to qualified default investment alternatives (the rest will be attributable to growth in automatic enrollment).

[41] The Department's estimates illustrate some of this as variation in results across individuals.

[42] Please see *http://www.dol.gov/ebsa/regs/peerreview.html.*

[43] The Department's estimate of the effect of the proposed regulation assigned uniform cash out probabilities (derived from an industry survey) to accounts within certain arbitrary size categories. For example, all accounts smaller than approximately $11,000 (expressed at 2005 levels) were assigned the same cash out probability. This may have understated the propensity to cash out very small accounts. The Department has since refined its estimation of cash out probabilities. These probabilities are now estimated as a continuous function of account size, based on household survey data.

[44] In its estimates of the effects of the proposed regulation the Department had assumed a real average equity return of 6.5 percent, which was consistent with long-term historical performance. The estimates presented here assume a real average return of 4.9 percent, which is more in line with recent performance and commenters' expectations of the future.

preservation products, such as money market or stable value funds, as a stand-alone long-term investment option for contributions made after the effective date of this regulation. However, the Department believes that such investments can play an important role as a component of a qualified default investment alternative. Further, it is important to note that the exclusion of such funds as a qualified default investment alternative does not preclude their use as a default investment option—fiduciaries are free to adopt default investments they deem to be prudent without availing themselves of the fiduciary relief afforded by this regulation.

Including such instruments for future contributions might have yielded some benefits if, for example, their inclusion would encourage more plan sponsors to implement automatic enrollment programs or fewer workers to opt out of them. The Department believes such cases would be rare, however. First, a decreasing proportion of plans already are designating such instruments as default investments.[45] Second, workers concerned that a default investment provides more risk than they prefer need not refuse or terminate[46] participation in response, but instead need only direct their contributions into a different investment option otherwise available in the plan.

Including such instruments might benefit some affected short-tenure participants who cash out and spend their accounts during downturns in equity prices. Historically, though, equity returns are positive more often then they are negative, so this potential benefit is likely to be outweighed by the opportunity cost to affected short-tenure participants who cash out during upturns.[47] Moreover, the Department believes that this regulation should be calibrated to foster preservation of retirement accounts rather than to accommodate cashouts, consistent with other provisions of law, such as the mandatory withholding and additional tax provisions applicable to premature distributions.

Some comments on the proposed regulation expressed concern that qualified default investment alternatives would expose risk averse participants to excessive investment risk, and on that basis urged the Department to include stand-alone capital preservation instruments as qualified default investment alternatives. The Department is not persuaded by this argument, however, for three reasons. First, the regulation's primary goal is to promote default investments that enhance retirement saving, not to align default investments with individuals' levels of risk tolerance.[48] Second, the Department nonetheless believes that the qualified default investment alternatives included in the regulation can satisfy most affected individuals' risk preferences.[49] Finally, participants who find default investments too risky can opt out of them without opting out of plan participation entirely.

Some comments cautioned that the exclusion of stand-alone capital preservation products from the definition of qualified default investment alternatives would prompt a large, rapid movement of money across asset classes, with negative consequences for financial markets. In particular according to these comments, movement out of stable value products might repress those products' future interest crediting rates and thereby harm investors who continue to hold them. The Department believes, however, that movement away from stable value products and therefore any negative impact on forward crediting rates will be modest, as only a relatively small portion of current assets in stable value products appears to be attributable to defaulted participants.[50] Additionally,

---

[45] According to one survey, in 2006, 17 percent of sponsors with automatic enrollment programs were likely to change their default from such instruments to qualified default investment alternative-type instruments, while just 4 percent were likely to do the opposite (Hewitt Associates LLC, Survey Findings: Hot Topics in Retirement 2006 (2006) at 4). According to another, between 1999 and 2005 the proportion designating such instruments as defaults decreased from 69 percent to 56 percent, while the proportion designating qualified default investment alternative-type instruments as defaults increased from 28 percent to 39 percent (Hewitt Associates LLC, Survey Findings: Trends and Experiences in 401(k) Plans 2005, (2005) at 15).

[46] Might a risk-averse participant, enrolled and invested by default, terminate participation in response to news that their account had suffered principal losses? Perhaps not. The same inertia that leads some participants to enroll and invest by default might also prevent them from terminating participation. The Department also observes that an early principal loss usually will not translate into a decline in the account balance reported in a quarterly statement, since quarterly contributions are likely to more than offset such losses during at least the first few years of participation.

[47] Such potential benefits would additionally be offset by reduced average returns to default investors who do not cash out early. As noted above, the Department estimates that most default contributions will be preserved for retirement. As discussed above, even the subset of short term workers who cash out their accounts will experience an overall aggregate increase in wealth from this regulation. Thus, the concern for fostering preservation of retirement accounts is not being weighed against aggregate losses to this subset of workers, but is instead being weighed against the added volatility their accounts might experience. In weighing these interests, the Department kept in mind that short term employees concerned about this volatility are always free to choose a different investment option.

[48] In theory individuals can optimize their investment mix over time to match their personal taste for risk and return. The regulation's provisions that establish participants' right to direct their investments out of qualified default alternatives give participants the opportunity to so do. But in practice investors sometimes do not optimize their investment alternatives. Some may lack clear, fixed and rational preferences for risk and return. Some investors' tastes for risky assets may be distorted by imperfect information, or by irrational and ineffectual behavioral phenomena such as naive diversification (a tendency to divide assets equally across available options), sub-optimal excessive concentration in company stock, market timing, mental accounting and framing, and reliance on peer examples (see, *e.g.*, Richard H. Thaler and Shlomo Benartzi, The Behavioral Economics of Retirement Savings Behavior, AARP Public Policy Institute white paper #2007–02 (Jan. 2007) at 6–16), or inertia. This regulation promotes default investments that can enhance such investors' retirement savings prospects.

[49] One commenter on the proposed regulation called the Department's attention to a study of optimal investment mixes for investors with different levels of risk aversion. The study employed techniques known as stochastic dominance analysis of asset class performance and multi-period investor utility optimization, explaining that these techniques are in some ways superior to alternatives such as mean-variance analysis of asset class performance and single-period utility optimization. The commenter criticized the Department's use of the latter, potentially inferior techniques to assess the question of what mix of asset classes best matches investors' tastes. But in fact the Department did not assess this question, focusing instead on how different asset class mixes affect retirement savings accumulations. Interestingly the study, which utilized stable value product performance data supplied by the industry, concluded that for most investors most of the time, the optimal portfolio will include a mix of equity and stable value products rather than stable value products alone. This suggests to the Department that the qualified default investment alternatives included in this regulation encompass most investors' levels of risk tolerance. The Department also notes that most 401(k) plan participants who actively direct their investments include equity in their portfolios (see, *e.g.*, Sarah Holden and Jack VanDerhei, 401(k) Plan Asset Allocation, Account Balances, and Loan Activity in 2005, EBRI Issue Brief No. 296 (Aug. 2006) at 9, Figure 8; see also Fidelity Investments, Building Futures Volume VII: How Workplace Savings are Shaping the Future of Retirement (2006) at 128, Figure 130).

[50] There are several reasons to believe that asset allocation will not shift very abruptly, and that stable value products will continue to claim a large share of 401(k) plan assets. First, while this regulation generally does not extend fiduciary relief to default investments that consist solely of stable value products, it does not foreclose qualified default investment alternatives from including such products, and leaves intact general fiduciary provisions that may otherwise permit default investments that consist solely of such products. A significant number of plans currently utilize stable value products as their default investment option, reflecting determinations by a significant number of plan fiduciaries that stand-alone stable value products are a prudent investment for defaulted participants. Nothing in this regulation is intended to suggest or require that a plan fiduciary change an otherwise prudent selection of a stable value product for a plan's default investment option. The Department therefore anticipates that some plans will continue to direct all or a portion of default investments to stable value products. Second, the

according to these comments, movement out of stable value products might alter short-term conditions in the markets for debt securities that underlie such products. Decreased demand for stable value products might then repress the price of underlying debt instruments and increased demand for qualified default investment alternatives might drive up equity prices. The Department believes any such effects would be gradual and negligible.[51]

If included as a qualified default investment alternative and thereby promoted as a default investment, stand-alone capital preservation products' generally inferior long-term investment returns would almost certainly erode the regulation's beneficial effect on retirement income. The Department estimates that including capital preservation instruments as a stand-alone qualified default investment alternative would reduce aggregate account balances in 2034 by between $5 billion and $7 billion (expressed in 2006 dollars).[52] This negative effect will be larger if there is an endorsement effect ($26 billion under the low-impact estimate)—that is, if the instruments status as a qualified default investment alternative encourages active (in addition to default) investments in them.[53]

Finally, the Department believes it is desirable for a default investment vehicle to be diversified across asset classes, rather than to include only a single asset class. Such diversification can improve a portfolio's risk and return efficiency.

In summary, in weighing the merits of potential qualified default investment alternatives, the Department sought primarily to promote default investments that enhance retirement savings. The Department considered market trends, generally accepted investment theories, mainstream financial planning practices, and actual investor behavior, as well as the estimated effect of qualified default investment alternatives on retirement savings. All of these criteria suggest that it is desirable to invest retirement savings in vehicles that provide for the possibility of capital appreciation in addition to capital preservation.

Accordingly, the Department did not include stand-alone capital preservation instruments among the qualified default investment alternatives under the regulation. However, the Department has modified the regulation to include a ''grandfather''-like provision pursuant to which stable value products and funds will constitute a qualified default investment alternative under the regulation for purposes of investments made prior to the effective date of the regulation.

Balanced Defaults

The Department also considered whether to include as a qualified default investment alternative an investment fund product or model portfolio that establishes a uniform mix of equity and fixed income exposures for all affected participants. Such a product or model portfolio must be appropriate for participants of the plan as a whole but cannot be separately calibrated for each participant or for particular classes of participants. Therefore, while its risk level may be appropriate for all affected participants it is unlikely to be optimal for all. However, such a product or model portfolio may also have relative advantages. Compared with the other potential qualified default investment alternatives such a product or portfolio may be simpler, less expensive and easier to explain and understand. These advantages sometimes may outweigh the potential advantage of more customized risk levels. And the inclusion of such products or model portfolios might help heighten competition in the market and thereby enhance product quality and affordability across all qualified default investment alternatives. Accordingly, the Department has included such instruments as qualified default investment alternatives under this regulation.

Federalism Statement

Executive Order 13132 (August 4, 1998) outlines fundamental principles of federalism and requires Federal agencies to adhere to specific criteria in the formulation and implementation of policies that have a substantial direct effect on the States, the relationship between the national government and the States, or on the distributive power and responsibilities among the various levels of government. As noted above, section 902(f) of the Pension Protection Act adds a new provision to ERISA (section 514(e)) providing that notwithstanding any other provision of section 514, Title I of ERISA supersedes State laws that would directly or indirectly prohibit or restrict the inclusion of an automatic contribution arrangement in any plan. In the preamble to the notice of proposed rulemaking published on September 27, 2006, the Department specifically discussed the preemption provision enacted in the Pension Protection Act and requested comments on whether, and to what extent, addressing this provision in the regulations would be helpful. Although no States provided comments on the proposed regulation, other commenters requested that the Department use the regulation to clarify the application of the statutory preemption provision. As noted elsewhere in this preamble, paragraph (f) of the final regulation addresses those comments. In accordance with section 4 of the E.O. 13132, the Department of Labor has construed the preemptive effect of ERISA section 514(e) at the minimum level necessary to achieve the objectives of the statute.

Department expects that stable value products will continue to be offered as an investment option by many participant-directed plans and selected by many participants. It is expected that participants will invest only a small fraction of assets by default, and will actively direct a large majority of assets. The Department's low- and high-impact estimates respectively suggest that between 1.2 percent and 1.5 percent of 401(k) plan assets will be invested by default in 2034. Viewed another way, absent this regulation, the Department estimates that just $10 billion would be invested by default in capital preservation vehicles in 2034 (expressed in 2006 dollars). This compares with approximately $400 billion of 401(k) assets invested in stable value products today. Third, there will be some offsetting effect, deriving from the increase in actively invested account balances expected to result from this regulation. The Department estimates that the regulation, by promoting automatic enrollment and higher average investment performance, will increase aggregate actively invested account balances in 2034 by between $59 billion and $114 billion (expressed in 2006 dollars), or between 2.4 percent and 4.6 percent, while aggregate default invested account balances will grow by just $11 billion to $20 billion. Stable value products will capture some share of the increase in actively invested account balances. Fourth, the extent to which some plans do move money out of stable value products may be additionally moderated by stable value product features that have the effect of discouraging large movements and by associated fiduciary considerations. Plan fiduciaries, in determining whether, how and under what circumstances a change should be made in the plan's default investment option, must assess, among other things, the potential economic consequences of such a change to participants' investments in such options. Finally, because this regulation includes a ''grandfather''-like provision applicable to certain stable value products, it provides no direct incentive for plan fiduciaries to reallocate account balances heretofore invested by default in such products.

[51] As noted above, the Department expects that asset allocation will not shift very abruptly, and that stable value products will continue to claim a large share of 401(k) assets. In addition, while stable value products comprise a substantial fraction of all 401(k) assets (perhaps as much as 20 percent), their underlying portfolios hold only a small fraction (generally between 0.5 percent and 2 percent) of all debt and of major debt categories such as mortgages, corporate bonds and treasury and agency issues. These estimates are based on stable value product data provided by the Stable Value Industry Association and the U.S. Federal Reserve Board of Governors' Flow of Funds Accounts.

[52] This assumes that, as under the baseline, 50 percent of default contributions will be directed to capital preservation products and 50 percent to (other) qualified default investment alternatives.

[53] For this calculation, the Department assumes a 20 percent endorsement effect.

In any event, the Department does not view the final rule, as distinct from the statute, as having a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power among the various levels of government. The statute preempts State laws and the regulation merely clarifies application of the statutory provision in a way that is consistent with the plain language and the legislative history. State wage withholding restrictions will not be affected except as they apply to automatic contribution arrangements of ERISA-covered plans. Moreover, the regulation imposes no compliance costs on State or local governments. As a result, the Department concludes that the final regulation does not have federalism implications.

List of Subjects in 29 CFR Part 2550

Employee benefit plans, Exemptions, Fiduciaries, Investments, Pensions, Prohibited transactions, Real estate, Securities, Surety bonds, Trusts and trustees.

■ For the reasons set forth in the preamble, the Department amends Subchapter F, Part 2550 of Title 29 of the Code of Federal Regulations as follows:

SUBCHAPTER F—FIDUCIARY RESPONSIBILITY UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

PART 2550—RULES AND REGULATIONS FOR FIDUCIARY RESPONSIBILITY

■ 1. The authority citation for part 2550 is revised to read as follows:

Authority: 29 U.S.C. 1135; sec. 657, Pub. L. 107–16, 115 Stat. 38; and Secretary of Labor's Order No. 1–2003, 68 FR 5374 (Feb. 3, 2003). Sec. 2550.401b–1 also issued under sec. 102, Reorganization Plan No. 4 of 1978, 43 FR 47713 (Oct. 17, 1978), 3 CFR, 1978 Comp. 332, effective Dec. 31, 1978, 44 FR 1065 (Jan. 3, 1978), 3 CFR, 1978 Comp. 332. Sec. 2550.401c–1 also issued under 29 U.S.C. 1101. Sections 2550.404c–1 and 2550.404c–5 also issued under 29 U.S.C. 1104. Sec. 2550.407c–3 also issued under 29 U.S.C. 1107. Sec. 2550.408b–1 also issued under 29 U.S.C. 1108(b)(1) and sec. 102, Reorganization Plan No. 4 of 1978, 3 CFR, 1978 Comp. p. 332, effective Dec. 31, 1978, 44 FR 1065 (Jan. 3, 1978), and 3 CFR, 1978 Comp. 332. Sec. 2550.412–1 also issued under 29 U.S.C. 1112.

■ 2. Add § 2550.404c–5 to read as follows:

§ 2550.404c–5 Fiduciary relief for investments in qualified default investment alternatives.

(a) *In general.* (1) This section implements the fiduciary relief provided under section 404(c)(5) of the Employee Retirement Income Security Act of 1974, as amended (ERISA or the Act), 29 U.S.C. 1001 et seq., under which a participant or beneficiary in an individual account plan will be treated as exercising control over the assets in his or her account for purposes of ERISA section 404(c)(1) with respect to the amount of contributions and earnings that, in the absence of an investment election by the participant, are invested by the plan in accordance with this regulation. If a participant or beneficiary is treated as exercising control over the assets in his or her account in accordance with ERISA section 404(c)(1) no person who is otherwise a fiduciary shall be liable under part 4 of title I of ERISA for any loss or by reason of any breach which results from such participant's or beneficiary's exercise of control. Except as specifically provided in paragraph (c)(6) of this section, a plan need not meet the requirements for an ERISA section 404(c) plan under 29 CFR 2550.404c–1 in order for a plan fiduciary to obtain the relief under this section.

(2) The standards set forth in this section apply solely for purposes of determining whether a fiduciary meets the requirements of this regulation. Such standards are not intended to be the exclusive means by which a fiduciary might satisfy his or her responsibilities under the Act with respect to the investment of assets in the individual account of a participant or beneficiary.

(b) *Fiduciary relief.* (1) Except as provided in paragraphs (b)(2), (3), and (4) of this section, a fiduciary of an individual account plan that permits participants or beneficiaries to direct the investment of assets in their accounts and that meets the conditions of paragraph (c) of this section shall not be liable for any loss, or by reason of any breach under part 4 of title I of ERISA, that is the direct and necessary result of (i) investing all or part of a participant's or beneficiary's account in any qualified default investment alternative within the meaning of paragraph (e) of this section, or (ii) investment decisions made by the entity described in paragraph (e)(3) of this section in connection with the management of a qualified default investment alternative.

(2) Nothing in this section shall relieve a fiduciary from his or her duties under part 4 of title I of ERISA to prudently select and monitor any qualified default investment alternative under the plan or from any liability that results from a failure to satisfy these duties, including liability for any resulting losses.

(3) Nothing in this section shall relieve any fiduciary described in paragraph (e)(3)(i) of this section from its fiduciary duties under part 4 of title I of ERISA or from any liability that results from a failure to satisfy these duties, including liability for any resulting losses.

(4) Nothing in this section shall provide relief from the prohibited transaction provisions of section 406 of ERISA, or from any liability that results from a violation of those provisions, including liability for any resulting losses.

(c) *Conditions.* With respect to the investment of assets in the individual account of a participant or beneficiary, a fiduciary shall qualify for the relief described in paragraph (b)(1) of this section if:

(1) Assets are invested in a qualified default investment alternative within the meaning of paragraph (e) of this section;

(2) The participant or beneficiary on whose behalf the investment is made had the opportunity to direct the investment of the assets in his or her account but did not direct the investment of the assets;

(3) The participant or beneficiary on whose behalf an investment in a qualified default investment alternative may be made is furnished a notice that meets the requirements of paragraph (d) of this section:

(i) (A) At least 30 days in advance of the date of plan eligibility, or at least 30 days in advance of the date of any first investment in a qualified default investment alternative on behalf of a participant or beneficiary described in paragraph (c)(2) of this section; or

(B) On or before the date of plan eligibility provided the participant has the opportunity to make a permissible withdrawal (as determined under section 414(w) of the Internal Revenue Code of 1986, as amended (Code)); and

(ii) Within a reasonable period of time of at least 30 days in advance of each subsequent plan year;

(4) A fiduciary provides to a participant or beneficiary the material set forth in 29 CFR 2550.404c-1(b)(2)(i)(B)(1)(viii) and (ix) and 29 CFR 404c-1(b)(2)(i)(B)(2) relating to a participant's or beneficiary's investment in a qualified default investment alternative;

(5)(i) Any participant or beneficiary on whose behalf assets are invested in

a qualified default investment alternative may transfer, in whole or in part, such assets to any other investment alternative available under the plan with a frequency consistent with that afforded to a participant or beneficiary who elected to invest in the qualified default investment alternative, but not less frequently than once within any three month period;

(ii)(A) Except as provided in paragraph (c)(5)(ii)(B) of this section, any transfer described in paragraph (c)(5)(i), or any permissible withdrawal as determined under section 414(w)(2) of the Code, by a participant or beneficiary of assets invested in a qualified default investment alternative, in whole or in part, resulting from the participant's or beneficiary's election to make such a transfer or withdrawal during the 90-day period beginning on the date of the participant's first elective contribution as determined under section 414(w)(2)(B) of the Code, or other first investment in a qualified default investment alternative on behalf of a participant or beneficiary described in paragraph (c)(2) of this section, shall not be subject to any restrictions, fees or expenses (including surrender charges, liquidation or exchange fees, redemption fees and similar expenses charged in connection with the liquidation of, or transfer from, the investment);

(B) Paragraph (c)(5)(ii)(A) of this section shall not apply to fees and expenses that are charged on an ongoing basis for the operation of the investment itself (such as investment management fees, distribution and/or service fees, ''12b–1'' fees, or legal, accounting, transfer agent and similar administrative expenses), and are not imposed, or do not vary, based on a participant's or beneficiary's decision to withdraw, sell or transfer assets out of the qualified default investment alternative; and

(iii) Following the end of the 90-day period described in paragraph (c)(5)(ii)(A) of this section, any transfer or permissible withdrawal described in this paragraph (c)(5) of this section shall not be subject to any restrictions, fees or expenses not otherwise applicable to a participant or beneficiary who elected to invest in that qualified default investment alternative; and

(6) The plan offers a ''broad range of investment alternatives'' within the meaning of 29 CFR 2550.404c–1(b)(3).

(d) *Notice.* The notice required by paragraph (c)(3) of this section shall be written in a manner calculated to be understood by the average plan participant and shall contain the following:

(1) A description of the circumstances under which assets in the individual account of a participant or beneficiary may be invested on behalf of the participant or beneficiary in a qualified default investment alternative; and, if applicable, an explanation of the circumstances under which elective contributions will be made on behalf of a participant, the percentage of such contributions, and the right of the participant to elect not to have such contributions made on the participant's behalf (or to elect to have such contributions made at a different percentage);

(2) An explanation of the right of participants and beneficiaries to direct the investment of assets in their individual accounts;

(3) A description of the qualified default investment alternative, including a description of the investment objectives, risk and return characteristics (if applicable), and fees and expenses attendant to the investment alternative;

(4) A description of the right of the participants and beneficiaries on whose behalf assets are invested in a qualified default investment alternative to direct the investment of those assets to any other investment alternative under the plan, including a description of any applicable restrictions, fees or expenses in connection with such transfer; and

(5) An explanation of where the participants and beneficiaries can obtain investment information concerning the other investment alternatives available under the plan.

(e) *Qualified default investment alternative.* For purposes of this section, a qualified default investment alternative means an investment alternative available to participants and beneficiaries that:

(1)(i) Does not hold or permit the acquisition of employer securities, except as provided in paragraph (ii).

(ii) Paragraph (e)(1)(i) of this section shall not apply to: (A) Employer securities held or acquired by an investment company registered under the Investment Company Act of 1940 or a similar pooled investment vehicle regulated and subject to periodic examination by a State or Federal agency and with respect to which investment in such securities is made in accordance with the stated investment objectives of the investment vehicle and independent of the plan sponsor or an affiliate thereof; or (B) with respect to a qualified default investment alternative described in paragraph (e)(4)(iii) of this section, employer securities acquired as a matching contribution from the employer/plan sponsor, or employer securities acquired prior to management by the investment management service to the extent the investment management service has discretionary authority over the disposition of such employer securities;

(2) Satisfies the requirements of paragraph (c)(5) of this section regarding the ability of a participant or beneficiary to transfer, in whole or in part, his or her investment from the qualified default investment alternative to any other investment alternative available under the plan;

(3) Is:

(i) Managed by: (A) an investment manager, within the meaning of section 3(38) of the Act; (B) a trustee of the plan that meets the requirements of section 3(38)(A), (B) and (C) of the Act; or (C) the plan sponsor who is a named fiduciary, within the meaning of section 402(a)(2) of the Act;

(ii) An investment company registered under the Investment Company Act of 1940; or

(iii) An investment product or fund described in paragraph (e)(4)(iv) or (v) of this section; and

(4) Constitutes one of the following:

(i) An investment fund product or model portfolio that applies generally accepted investment theories, is diversified so as to minimize the risk of large losses and that is designed to provide varying degrees of long-term appreciation and capital preservation through a mix of equity and fixed income exposures based on the participant's age, target retirement date (such as normal retirement age under the plan) or life expectancy. Such products and portfolios change their asset allocations and associated risk levels over time with the objective of becoming more conservative (i.e., decreasing risk of losses) with increasing age. For purposes of this paragraph (e)(4)(i), asset allocation decisions for such products and portfolios are not required to take into account risk tolerances, investments or other preferences of an individual participant. An example of such a fund or portfolio may be a ''life-cycle'' or ''targeted-retirement-date'' fund or account.

(ii) An investment fund product or model portfolio that applies generally accepted investment theories, is diversified so as to minimize the risk of large losses and that is designed to provide long-term appreciation and capital preservation through a mix of equity and fixed income exposures consistent with a target level of risk appropriate for participants of the plan as a whole. For purposes of this paragraph (e)(4)(ii), asset allocation

decisions for such products and portfolios are not required to take into account the age, risk tolerances, investments or other preferences of an individual participant. An example of such a fund or portfolio may be a ''balanced'' fund.

(iii) An investment management service with respect to which a fiduciary, within the meaning of paragraph (e)(3)(i) of this section, applying generally accepted investment theories, allocates the assets of a participant's individual account to achieve varying degrees of long-term appreciation and capital preservation through a mix of equity and fixed income exposures, offered through investment alternatives available under the plan, based on the participant's age, target retirement date (such as normal retirement age under the plan) or life expectancy. Such portfolios are diversified so as to minimize the risk of large losses and change their asset allocations and associated risk levels for an individual account over time with the objective of becoming more conservative (i.e., decreasing risk of losses) with increasing age. For purposes of this paragraph (e)(4)(iii), asset allocation decisions are not required to take into account risk tolerances, investments or other preferences of an individual participant. An example of such a service may be a ''managed account.''

(iv)(A) Subject to paragraph (e)(4)(iv)(B) of this section, an investment product or fund designed to preserve principal and provide a reasonable rate of return, whether or not such return is guaranteed, consistent with liquidity. Such investment product shall for purposes of this paragraph (e)(4)(iv):

(*1*) Seek to maintain, over the term of the investment, the dollar value that is equal to the amount invested in the product; and

(*2*) Be offered by a State or federally regulated financial institution.

(B) An investment product described in this paragraph (e)(4)(iv) shall constitute a qualified default investment alternative for purposes of paragraph (e) of this section for not more than 120 days after the date of the participant's first elective contribution (as determined under section 414(w)(2)(B) of the Code).

(v)(A) Subject to paragraph (e)(4)(v)(B) of this section, an investment product or fund designed to guarantee principal and a rate of return generally consistent with that earned on intermediate investment grade bonds, while providing liquidity for withdrawals by participants and beneficiaries, including transfers to other investment alternatives. Such investment product or fund shall, for purposes of this paragraph (e)(4)(v), meet the following requirements:

(*1*) There are no fees or surrender charges imposed in connection with withdrawals initiated by a participant or beneficiary; and

(*2*) Principal and rates of return are guaranteed by a State or federally regulated financial institution.

(B) An investment product or fund described in this paragraph (e)(4)(v) shall constitute a qualified default investment alternative for purposes of paragraph (e) of this section solely for purposes of assets invested in such product or fund before December 24, 2007.

(vi) An investment fund product or model portfolio that otherwise meets the requirements of this section shall not fail to constitute a product or portfolio for purposes of paragraph (e)(4)(i) or (ii) of this section solely because the product or portfolio is offered through variable annuity or similar contracts or through common or collective trust funds or pooled investment funds and without regard to whether such contracts or funds provide annuity purchase rights, investment guarantees, death benefit guarantees or other features ancillary to the investment fund product or model portfolio.

(f) *Preemption of State laws.* (1) Section 514(e)(1) of the Act provides that title I of the Act supersedes any State law that would directly or indirectly prohibit or restrict the inclusion in any plan of an automatic contribution arrangement. For purposes of section 514(e) of the Act and this paragraph (f), an automatic contribution arrangement is an arrangement (or the provisions of a plan) under which:

(i) A participant may elect to have the plan sponsor make payments as contributions under the plan on his or her behalf or receive such payments directly in cash;

(ii) A participant is treated as having elected to have the plan sponsor make such contributions in an amount equal to a uniform percentage of compensation provided under the plan until the participant specifically elects not to have such contributions made (or specifically elects to have such contributions made at a different percentage); and

(iii) Contributions are invested in accordance with paragraphs (a) through (e) of this section.

(2) A State law that would directly or indirectly prohibit or restrict the inclusion in any pension plan of an automatic contribution arrangement is superseded as to any pension plan, regardless of whether such plan includes an automatic contribution arrangement as defined in paragraph (f)(1) of this section.
