**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

This program is designed to prepare students for employment as nursing assistants.

The content includes but is not limited to interpersonal skills, medical terminology, legal and ethical responsibilities, safe and efficient work, gerontology, nutrition, pet-facilitated therapy, health and safety including Cardio-pulmonary Resuscitation (CPR) – heart saver level, and employability skills.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### **Program Structure**

This program is a planned sequence of instruction consisting of 2 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                         | Teacher Certification                              | Length   |
|-----|---------------|--------------------------------------|----------------------------------------------------|----------|
| A   | HSC0003       | Basic Healthcare Worker              | REG NURSE 7 G<br>LPN 7 G*                          | 90 hours |
| B   | HCP0121       | Nurse Aide and Orderly (Articulated) | PRAC NURSE @7 %7%G<br>(Must be a Registered Nurse) | 75 hours |

***\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator which must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.***

### **Regulated Programs**

Successful completion of this program from an approved school prepares the student for certification for employment as a Nursing Assistant, in accordance with Chapter 464.203, Florida Statutes (F.S.). To be approved, this program must be supervised by a registered nurse and follow the faculty qualifications set forth in 64B9-15.005(3)(a), F.A.C.

New programs must be approved by the Board of Nursing, Department of Health prior to enrolling students.

Those students who satisfactorily complete an approved course are eligible to apply to take the national nursing assistant examination being utilized in Florida, in accordance with Chapter 464.203, F.S. This program includes both Acute and Long Term Care.

**In accordance with 64B9-15.005(4)(c), F.A.C., students will perform nursing skills in the clinical and simulated laboratory settings under the supervision of a qualified instructor. The clinical instruction ratio for program instructor to student is 1 to 15 for students caring directly for residents or clients.**

**In accordance with 64B9-15.006(2), F.A.C., The standardized curriculum shall require a minimum of 80 hours of classroom and 40 hours clinical instruction. The clinical instruction shall include at least 20 hours of long term care clinical instruction in a licensed nursing home**

**In accordance with 64B9-15.006(3), F.A.C., Prior to any direct contact with a resident, a training program shall require that a student receive a minimum of 16 hours of classroom instruction in communication and interpersonal skills; infection control; safety/emergency procedures, including the Heimlich maneuver; promoting residents' independence; and respecting residents' rights.**

According to Section 400.211, F.S., persons who are enrolled in, or have completed, a state approved nursing assistant training program may be employed by a licensed nursing facility for a period of four months. However, the certification requirements must be met within four months of such initial employment.

## CommonFlorida's Career Technical Core — Career Ready Practices Readiness Skills for CTE Programs

~~Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.~~

- ~~1. Act as a responsible and contributing citizen and employee.~~
- ~~2. Apply appropriate academic and technical skills.~~
- ~~3. Attend to personal health and financial well-being.~~
- ~~4. Communicate clearly, effectively and with reason.~~
- ~~5. Consider the environmental, social and economic impacts of decisions.~~
- ~~6. Demonstrate creativity and innovation.~~
- ~~7. Employ valid and reliable research strategies.~~
- ~~8. Utilize critical thinking to make sense of problems and persevere in solving them.~~
- ~~9. Model integrity, ethical leadership and effective management.~~
- ~~10. Plan education and career path aligned to personal goals.~~
- ~~11. Use technology to enhance productivity.~~
- ~~12. Work productively in teams while using cultural/global competence.~~

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

01.01 Use reading skills.

01.02 Use writing skills.

01.03 Use mathematical strategies and procedures.

01.04 Use scientific principles and procedures.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use verbal and written communications specific to nurse assisting.
- 13.0 Demonstrate legal and ethical responsibilities specific to nurse assisting.
- 14.0 Perform physical comfort and safety functions specific to nurse assisting.
- 15.0 Provide personal patient care.
- 16.0 Perform patient care procedures.
- 17.0 Apply principles of nutrition.
- 18.0 Provide care for geriatric patients.
- 19.0 Apply the principles of infection control specific to nursing assisting.
- 20.0 Provide biological, psychological, and social support.
- 21.0 Perform supervised organizational functions, following the patient care plan.
- 22.0 Assist with restorative (rehabilitative) activities.

**Florida Department of Education  
Student Performance Standards**

**Program Title:**        **Nursing Assistant (Articulated)**  
**Career Certificate Program Number:**        **H170690**

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

| 13.0                                                                                                                               | Demonstrate legal and ethical responsibilities specific to nurse assisting. The student will be able to:                                 |
| 13.01                                                                                                                              | Discuss and demonstrate legal and ethical behavior within the nursing assistant scope of practice including role limitations in Florida. |
| 13.02                                                                                                                              | Describe the purpose of the chain of communication to resolve conflict.                                                                  |
| 13.03                                                                                                                              | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                 |
| 13.04                                                                                                                              | Demonstrate safe standards of patient care including prevention and quality of care                                                      |

|       |                                                                                                                                                                                                                                                   |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.05 | Exhibit behavior supporting and promoting patients' and/or residents' rights.                                                                                                                                                                     |
| 13.06 | Recognize potential for and prevention of medical errors.                                                                                                                                                                                         |
| 13.07 | Practice the proper procedures to follow regarding medical errors.                                                                                                                                                                                |
| 13.08 | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                                                                                                                          |
| 13.09 | Recognize and report signs of substance abuse.                                                                                                                                                                                                    |
| 13.10 | Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.                                                                                                                                                 |
| 13.11 | Recognize that a C.N.A. must self-report any crimes they've been involved in within 30 days of the offense in accordance with 456.0727(1)(w), F.S.                                                                                                |
| 13.12 | Define Omnibus Budget Reconciliation Act (OBRA).                                                                                                                                                                                                  |
| 13.13 | Define Minimum Data Set (MDS).                                                                                                                                                                                                                    |
| 14.0  | Perform physical comfort and safety functions specific to nurse assisting. The student will be able to:                                                                                                                                           |
| 14.01 | Implement appropriate regulatory and accrediting agency patient safety guidelines.                                                                                                                                                                |
| 14.02 | Maintain safe patient units, equipment, and a comfortable environment.                                                                                                                                                                            |
| 14.03 | Maintain service areas on the units including supplies and equipment.                                                                                                                                                                             |
| 14.04 | Observe, report, and record changes in the patient's behavior as needed, including mental awareness.                                                                                                                                              |
| 14.05 | Demonstrate adjustment of bed and side-rails according to facility policy.                                                                                                                                                                        |
| 14.06 | Demonstrate and assist patient to dangle.                                                                                                                                                                                                         |
| 14.07 | Demonstrate lifting, supporting and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures |
| 14.08 | Demonstrate the proper use of a gait/transfer belt in both transfer and ambulation.                                                                                                                                                               |
| 14.09 | Assist patient in ambulation, including the use of crutch, cane, or walker.                                                                                                                                                                       |
| 14.10 | Demonstrate the proper wheelchair safety techniques and assist patient as needed with use.                                                                                                                                                        |
| 14.11 | Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).                                                                                                                                           |
| 14.12 | Assist patient with care and use of prosthetic/orthotic devices.                                                                                                                                                                                  |
| 14.13 | Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.                                                                                                                         |

|       |                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------|
| 15.0  | Provide personal patient care. The student will be able to:                                                |
| 15.01 | Perform bed bath; observe and report changes in a patient including skin and level of consciousness.       |
| 15.02 | Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged bath. |
| 15.03 | Administer back rub with bath and as needed.                                                               |
| 15.04 | Assist patient with hair care utilizing sink, tub, shower, bed or shower cap.                              |
| 15.05 | Demonstrate the use of a safety and/or electric razor to shave the patient.                                |
| 15.06 | Demonstrate how to groom patient, including hair, skin, foot, hand and nail care.                          |
| 15.07 | Assist with and/or administer oral hygiene including denture care.                                         |
| 15.08 | Assist patient to dress.                                                                                   |
| 15.09 | Assist patient with toileting using various types of restorative and rehabilitative equipment.             |
| 15.10 | Assist patient with use of bedpan (standard and fracture)                                                  |
| 15.11 | Assist with bowel and bladder training.                                                                    |
| 15.12 | Assist and/ or provide perineal care.                                                                      |
| 15.13 | Empty, measure and record urinary output and/or drainage.                                                  |
| 15.14 | Demonstrate application and use of a leg bag, leg strap and dignity bag.                                   |
| 15.15 | Monitor and assist with the drainage of urostomy bags and colostomy bags.                                  |
| 15.16 | Assist patient with both donning and doffing prosthesis and brace.                                         |
| 15.17 | Assist patient with meals.                                                                                 |
| 15.18 | Describe the relationships of body systems when providing patient care.                                    |
| 15.19 | Recognize abnormal signs and symptoms of common diseases and conditions when providing patient care.       |
| 16.0  | Perform patient care procedures. The student will be able to:                                              |
| 16.01 | Demonstrate ability to accurately measure, record and report vital signs.                                  |
| 16.02 | Assist with the admission of a patient and/or resident.                                                    |

|       |                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------|
| 16.03 | Assist with the admission, transfer, and discharge of a patient and/or resident.                      |
| 16.04 | Maintain patient-belongings list.                                                                     |
| 16.05 | Make unoccupied/occupied bed.                                                                         |
| 16.06 | Provide passive range-of-motion exercises.                                                            |
| 16.07 | Apply anti-embolic hose and sequential compression devices.                                           |
| 16.08 | Understand and demonstrate proper collection of routine, timed urine and clean catch urine specimens. |
| 16.09 | Record fluid intake and output (I&O).                                                                 |
| 16.10 | Observe, record, and report patient's emesis.                                                         |
| 16.11 | Monitor and provide urinary catheter care and drainage systems.                                       |
| 16.12 | Assist with ostomy care including emptying or changing ostomy bags that do not adhere to the skin.    |
| 16.13 | Collect stool specimen.                                                                               |
| 16.14 | Assist with the collection of a sputum specimen.                                                      |
| 16.15 | Assist the nurse with care of the patient with complex medical needs.                                 |
| 16.16 | Assist patient to apply binders.                                                                      |
| 16.17 | Care for patient in skin and skeletal traction.                                                       |
| 16.18 | Assist with pre-operative and post-operative patient care.                                            |
| 16.19 | Reinforce dressings under the supervision of the RN/LPN.                                              |
| 16.20 | Obtain and record an apical pulse.                                                                    |
| 16.21 | Provide cast care and/or pin care.                                                                    |
| 16.22 | Provide care for eyeglasses, artificial eyes, and contact lens.                                       |
| 17.0  | Apply principles of nutrition. – The student will be able to:                                         |
| 17.01 | Identify nutrients and food groups.                                                                   |
| 17.02 | Develop a basic food plan.                                                                            |

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.03 | Describe special diets.                                                                                                                                       |
| 17.04 | Check patient's diet tray for accuracy.                                                                                                                       |
| 17.05 | Monitor and document Nutritional Intake.                                                                                                                      |
| 17.06 | Identify and implement regional, cultural and religious food guidelines/preferences.                                                                          |
| 17.07 | Demonstrate knowledge of the need for thickened liquids and fluid consistency.                                                                                |
| 17.08 | Identify methods of maintaining fluid balance including encouraging and restricting fluids.                                                                   |
| 18.0  | Provide care for geriatric patients. The student will be able to:                                                                                             |
| 18.01 | Identify and assist with methods and procedures to prevent pressure ulcers.                                                                                   |
| 18.02 | Identify and assist with methods to prevent falls in the elderly.                                                                                             |
| 18.03 | Identify and assist with safety principles as related to the elderly.                                                                                         |
| 18.04 | Describe general characteristics, particular needs, and age related changes of the elderly.                                                                   |
| 18.05 | Identify attitudes and living habits that promote positive mental and physical health for the elderly.                                                        |
| 18.06 | Distinguish between fact and fallacy about the aging process.                                                                                                 |
| 18.07 | Apply reality orientation techniques and validation therapy unless it is contraindicated by the patient diagnosis.                                            |
| 18.08 | Recognize and respond appropriately to symptoms of common diseases, including dementia, depression/suicide and Alzheimers.                                    |
| 18.09 | Provide and involve patients in diversional activities.                                                                                                       |
| 18.10 | Identify common alterations in elderly patient behavior.                                                                                                      |
| 18.11 | Provide care for patients with special needs (e.g., impaired hearing, impaired vision, immobility, impaired body functions, cognitively impaired (dementia)). |
| 18.12 | Demonstrate awareness of common behaviors in drug use and abuse in the elderly.                                                                               |
| 18.13 | Report concerns to the nurse and appropriate authorities related to drug use and abuse in the elderly patient.                                                |
| 18.14 | Identify the need for community resources and services available to the elderly and their caregiver.                                                          |
| 18.15 | Identify components of the grief process.                                                                                                                     |
| 18.16 | Demonstrate an understanding of end of life care, hospice and palliative care.                                                                                |

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19.0  | Apply the principles of infection control specific to nursing assisting. The student will be able to:                                                                   |
| 19.01 | Discuss transmission-based precautions.                                                                                                                                 |
| 19.02 | Identify the chain of infection.                                                                                                                                        |
| 19.03 | Provide care for patients with infectious diseases applying the principles of "Standard Precautions" utilized with all patients as well as special procedures required. |
| 19.04 | Apply the proper use of personal protective equipment (PPE) for all types of isolation including donning and removing PPE appropriately.                                |
| 19.05 | Follow isolation procedure with food tray, PPE, and other supplies/equipment.                                                                                           |
| 19.06 | Collect specimen from patient in isolation.                                                                                                                             |
| 20.0  | Provide biological, psychological, and social support. The student will be able to:                                                                                     |
| 20.01 | Discuss family roles and their significance to health.                                                                                                                  |
| 20.02 | Respond to patient and family emotional needs.                                                                                                                          |
| 21.0  | Perform supervised organizational functions, following the patient care plan. The student will be able to:                                                              |
| 21.01 | Organize and prioritize patient-care assignments.                                                                                                                       |
| 21.02 | Complete assignments accurately and in a timely manner.                                                                                                                 |
| 22.0  | Assist with restorative (rehabilitative) activities. The student will be able to:                                                                                       |
| 22.01 | List the purposes of restorative (rehabilitation) program.                                                                                                              |
| 22.02 | Assist patient with specified restorative (rehabilitation) needs.                                                                                                       |
| 22.03 | Assist patients/residents to reach the optimum level of independence.                                                                                                   |

## Additional Information

### **Laboratory Activities**

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

The program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The length of this program is 165 hours. Completion of this program should enable the postsecondary student to be given advanced standing in the Patient Care Technician and Patient Care Assistant programs.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

~~HOSA: Future Health Professionals is the~~ [CTSOs are](#) co-curricular career and technical student ~~organization~~ [organizations](#) providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. [Other CTOS not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.](#)

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education  
Curriculum Framework

No new students may be enrolled in this program starting 2026-27. The last year to report any enrollment is 2027-28. This program was replaced by Patient Care Assistant H700500 (0351390207).

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

This program is designed to prepare students for employment as cross trained nursing assistants. All others, Patient Care Assistants, Nursing Aides and Orderlies, or Home Health Aides. This program offers a broad foundation of knowledge and skills, expanding the traditional role of the nursing assistant, for both acute and long term care settings.

The program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### **Program Structure**

This program is a planned sequence of instruction consisting of 4 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                         | Teacher Certification                                            | Length   |
|-----|---------------|--------------------------------------|------------------------------------------------------------------|----------|
| A   | HSC0003       | Basic Healthcare Worker              | REG NURSE 7 G<br>LPN 7 G*                                        | 90 hours |
| B   | HCP0121       | Nurse Aide and Orderly (Articulated) | PRAC NURSE @7 %7%G (Must be a Registered Nurse)                  | 75 hours |
| C   | HCP0332       | Advanced Home Health Aide            | REG NURSE 7 G<br>PRAC NURSE @7 %7%G (Must be a Registered Nurse) | 50 hours |
| D   | HCP0020       | Patient Care Assistant               |                                                                  | 75 hours |

**\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator which must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.**

### **Regulated Programs**

Successful completion of this program from an approved school prepares the student for certification for employment as a Nursing Assistant in a nursing home, in accordance with Chapter 464.203, Florida Statutes (F.S.). To be approved, this program must be supervised by a registered nurse and have follow the faculty qualifications set forth in 64B9-15.005(3)(a), F.A.C.

New programs must be approved by the Board of Nursing, Department of Health prior to enrolling students.

Those students who satisfactorily complete an approved course are eligible to apply to take the national nursing assistant examination being utilized in Florida, in accordance with Chapter 464.203, F.S. This program includes both Acute and Long Term Care.

In accordance with 64B9-15.005, F.A.C., students will perform nursing skills in the clinical and simulated laboratory settings under the supervision of a qualified instructor. The recommended teacher/student ratio in the clinical area is 1 to 12, but the maximum is 1 to 15.

In accordance with 64B9-15.006, F.A.C., Clinical and simulated laboratory learning experiences must correlate with 80 hours of didactic instruction. In addition, a minimum of 40 hours clinical experiences must be obtained. Simulated labs are not a substitute for clinical experience. The clinical instruction shall include at least 20 hours of long term care clinical instruction in a licensed nursing home or licensed long term care facility.

In addition, Students must have a minimum of 16 hours of training in communication and interpersonal skills, infection control, safety/emergency procedures, promoting residents' independence, and respecting residents' rights prior to any direct contact with a resident.

According to Section 400.211, F.S., persons who are enrolled in, or have completed, a state approved nursing assistant training program may be employed by a licensed nursing facility for a period of four months. However, the certification requirements must be met within four months of such initial employment.

Students must have a minimum of 16 hours of training in communication and interpersonal skills, infection control, safety/emergency procedures, promoting residents' independence, and respecting residents' rights prior to any direct contact with a resident.

**Please refer to [42CFR§484](#) for the clinical requirements for the Home Health Aide program.**

Common Florida's Career Technical Core—Career Ready Practices Readiness Skills for CTE Programs

~~Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.~~

- ~~1. Act as a responsible and contributing citizen and employee.~~
- ~~2. Apply appropriate academic and technical skills.~~
- ~~3. Attend to personal health and financial well-being.~~
- ~~4. Communicate clearly, effectively and with reason.~~
- ~~5. Consider the environmental, social and economic impacts of decisions.~~
- ~~6. Demonstrate creativity and innovation.~~
- ~~7. Employ valid and reliable research strategies.~~
- ~~8. Utilize critical thinking to make sense of problems and persevere in solving them.~~
- ~~9. Model integrity, ethical leadership and effective management.~~
- ~~10. Plan education and career path aligned to personal goals.~~
- ~~11. Use technology to enhance productivity.~~
- ~~12. Work productively in teams while using cultural/global competence.~~

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use verbal and written communications specific to the Nursing Assistant.
- 13.0 Demonstrate legal and ethical responsibilities specific to the Nursing Assistant.
- 14.0 Perform physical comfort and safety functions specific to the Nursing Assistant.
- 15.0 Provide personal patient care.
- 16.0 Perform patient care procedures.
- 17.0 Apply principles of nutrition.
- 18.0 Provide care for geriatric patients.
- 19.0 Apply the principles of infection control specific to the Nursing Assistant.
- 20.0 Provide biological, psychological, and social support.
- 21.0 Perform supervised organizational functions, following the patient care plan.
- 22.0 Assist with restorative (rehabilitative) activities.
- 23.0 Use verbal and written communications specific to Home Health Aide.
- 24.0 Demonstrate legal and ethical responsibilities specific to Home Health Aide.
- 25.0 Perform physical comfort and safety functions specific to Home Health Aide.
- 26.0 Apply principles of nutrition specific to Home Health Aide.
- 27.0 Apply the principles of infection control specific to Home Health Aide.
- 28.0 Perform home health-care services.
- 29.0 Perform nursing assistant skills related to the hospital setting.
- 30.0 Provide nursing assistant care for the adult patient.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Patient Care Assistant  
**Career Certificate Program Number:** H170692

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

<https://www.fldoe.org/core/fileparse.php/20706/urlt/health-sci-core-psav-cc-2425.rtf>

<https://www.fldoe.org/file/20894/health-sci-core-psav-cc-2627.rtf>

**Course Number: HCP0121**  
**Occupational Completion Point: B**  
**Nurse Aide and Orderly (Articulated) – 75 Hours**

The following intended outcomes 12-23 should be taught together as a module to achieve the occupational completion point of Articulated Nursing Assistant. The average achieving student should be able to complete the module in 75 clock hours. The standard length for the Nursing Assistant (Articulated) program including the core is 165 hours but **cannot** be less than 120 hours.

12.0 Use verbal and written communications specific to Nurse Assisting. The student will be able to:

12.01 Obtain specified data from patient and family.

12.02 Utilize verbal and written information to assist with the patient's plan of care.

12.03 Demonstrate use of the communication system.

13.0 Demonstrate legal and ethical responsibilities specific to Nurse Assisting. The student will be able to:

13.01 Discuss and demonstrate legal and ethical behavior within the nursing assistant scope of practice including role limitations in Florida.

13.02 Describe the purpose of the chain of communication to resolve conflict.

13.03 Follow policies and procedures affecting the health, safety, and well-being of patients.

|       |                                                                                                                                                                                                                                                   |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.04 | Demonstrate safe standards of patient care including prevention and quality of care                                                                                                                                                               |
| 13.05 | Exhibit behavior supporting and promoting patients' and/or residents' rights.                                                                                                                                                                     |
| 13.06 | Recognize potential for and prevention of medical errors.                                                                                                                                                                                         |
| 13.07 | Practice the proper procedures to follow regarding medical errors.                                                                                                                                                                                |
| 13.08 | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                                                                                                                          |
| 13.09 | Recognize and report signs of substance abuse.                                                                                                                                                                                                    |
| 13.10 | Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.                                                                                                                                                 |
| 13.11 | Define Omnibus Budget Reconciliation Act (OBRA).                                                                                                                                                                                                  |
| 13.12 | Define Minimum Data Set (MDS).                                                                                                                                                                                                                    |
| 14.0  | Perform physical comfort and safety functions specific to Nurse Assisting. The student will be able to:                                                                                                                                           |
| 14.01 | Implement appropriate regulatory and accrediting agency patient safety guidelines.                                                                                                                                                                |
| 14.02 | Maintain safe patient units, equipment, and a comfortable environment.                                                                                                                                                                            |
| 14.03 | Maintain service areas on the units including supplies and equipment.                                                                                                                                                                             |
| 14.04 | Observe, report, and record changes in the patient's behavior as needed, including mental awareness.                                                                                                                                              |
| 14.05 | Demonstrate adjustment of bed and side-rails according to facility policy.                                                                                                                                                                        |
| 14.06 | Demonstrate and assist patient to dangle.                                                                                                                                                                                                         |
| 14.07 | Demonstrate lifting, supporting and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures |
| 14.08 | Demonstrate the proper use of a gait/transfer belt in both transfer and ambulation.                                                                                                                                                               |
| 14.09 | Assist patient in ambulation, including the use of crutch, cane, or walker.                                                                                                                                                                       |
| 14.10 | Demonstrate the proper wheelchair safety techniques and assist patient as needed with use.                                                                                                                                                        |
| 14.11 | Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).                                                                                                                                           |
| 14.12 | Assist patient with care and use of prosthetic/orthotic devices.                                                                                                                                                                                  |
| 14.13 | Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.                                                                                                                         |

|       |                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------|
| 15.0  | Provide personal patient care. The student will be able to:                                                |
| 15.01 | Perform bed bath; observe and report changes in a patient including skin and level of consciousness.       |
| 15.02 | Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged bath. |
| 15.03 | Administer back rub with bath and as needed.                                                               |
| 15.04 | Assist patient with hair care utilizing sink, tub, shower, bed or shower cap.                              |
| 15.05 | Demonstrate the use of a safety and/or electric razor to shave the patient.                                |
| 15.06 | Demonstrate how to groom patient, including hair, skin, foot, hand and nail care.                          |
| 15.07 | Assist with and/or administer oral hygiene including denture care.                                         |
| 15.08 | Assist patient to dress.                                                                                   |
| 15.09 | Assist patient with toileting using various types of restorative and rehabilitative equipment.             |
| 15.10 | Assist patient with use of bedpan (standard and fracture)                                                  |
| 15.11 | Assist with bowel and bladder training.                                                                    |
| 15.12 | Assist and/ or provide perineal care.                                                                      |
| 15.13 | Empty, measure and record urinary output and/or drainage.                                                  |
| 15.14 | Demonstrate application and use of a leg bag, leg strap and dignity bag.                                   |
| 15.15 | Monitor and assist with the drainage of urostomy bags and colostomy bags.                                  |
| 15.16 | Assist patient with both donning and doffing prosthesis and brace.                                         |
| 15.17 | Assist patient with meals.                                                                                 |
| 15.18 | Describe the relationships of body systems when providing patient care.                                    |
| 15.19 | Recognize abnormal signs and symptoms of common diseases and conditions when providing patient care.       |
| 16.0  | Perform patient care procedures. The student will be able to:                                              |
| 16.01 | Demonstrate ability to accurately measure, record and report vital signs.                                  |
| 16.02 | Assist with the admission of a patient and/or resident.                                                    |

|       |                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------|
| 16.03 | Assist with the admission, transfer, and discharge of a patient and/or resident.                      |
| 16.04 | Maintain patient-belongings list.                                                                     |
| 16.05 | Make unoccupied/occupied bed.                                                                         |
| 16.06 | Provide passive range-of-motion exercises.                                                            |
| 16.07 | Apply anti-embolic hose and sequential compression devices.                                           |
| 16.08 | Understand and demonstrate proper collection of routine, timed urine and clean catch urine specimens. |
| 16.09 | Record fluid intake and output (I&O).                                                                 |
| 16.10 | Observe, record, and report patient's emesis.                                                         |
| 16.11 | Monitor and provide urinary catheter care and drainage systems.                                       |
| 16.12 | Assist with ostomy care including emptying or changing ostomy bags that do not adhere to the skin.    |
| 16.13 | Collect stool specimen.                                                                               |
| 16.14 | Assist with the collection of a sputum specimen.                                                      |
| 16.15 | Assist the nurse with care of the patient with complex medical needs.                                 |
| 16.16 | Assist patient to apply binders.                                                                      |
| 16.17 | Care for patient in skin and skeletal traction.                                                       |
| 16.18 | Assist with pre-operative and post-operative patient care.                                            |
| 16.19 | Reinforce dressings under the supervision of the RN/LPN.                                              |
| 16.20 | Obtain and record an apical pulse.                                                                    |
| 16.21 | Provide cast care and/or pin care.                                                                    |
| 16.22 | Provide care for eyeglasses, artificial eyes, and contact lens.                                       |
| 17.0  | Apply principles of nutrition. The student will be able to:                                           |
| 17.01 | Identify nutrients and food groups.                                                                   |
| 17.02 | Develop a basic food plan.                                                                            |

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.03 | Describe special diets.                                                                                                                                       |
| 17.04 | Check patient's diet tray for accuracy.                                                                                                                       |
| 17.05 | Monitor and document Nutritional Intake.                                                                                                                      |
| 17.06 | Identify and implement regional, cultural and religious food guidelines/preferences.                                                                          |
| 17.07 | Demonstrate knowledge of the need for thickened liquids and fluid consistency.                                                                                |
| 17.08 | Identify methods of maintaining fluid balance including encouraging and restricting fluids.                                                                   |
| 18.0  | Provide care for geriatric patients. The student will be able to:                                                                                             |
| 18.01 | Identify and assist with methods and procedures to prevent pressure ulcers.                                                                                   |
| 18.02 | Identify and assist with methods to prevent falls in the elderly.                                                                                             |
| 18.03 | Identify and assist with safety principles as related to the elderly.                                                                                         |
| 18.04 | Describe general characteristics, particular needs, and age related changes of the elderly.                                                                   |
| 18.05 | Identify attitudes and living habits that promote positive mental and physical health for the elderly.                                                        |
| 18.06 | Distinguish between fact and fallacy about the aging process.                                                                                                 |
| 18.07 | Apply reality orientation techniques and validation therapy unless it is contraindicated by the patient diagnosis.                                            |
| 18.08 | Recognize and respond appropriately to symptoms of common diseases, including dementia, depression/suicide and Alzheimers.                                    |
| 18.09 | Provide and involve patients in diversional activities.                                                                                                       |
| 18.10 | Identify common alterations in elderly patient behavior.                                                                                                      |
| 18.11 | Provide care for patients with special needs (e.g., impaired hearing, impaired vision, immobility, impaired body functions, cognitively impaired (dementia)). |
| 18.12 | Demonstrate awareness of common behaviors in drug use and abuse in the elderly.                                                                               |
| 18.13 | Report concerns to the nurse and appropriate authorities related to drug use and abuse in the elderly patient.                                                |
| 18.14 | Identify the need for community resources and services available to the elderly and their caregiver.                                                          |
| 18.15 | Identify components of the grief process.                                                                                                                     |
| 18.16 | Demonstrate an understanding of end of life care, hospice and palliative care.                                                                                |

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19.0  | Apply the principles of infection control specific to nursing assisting. The student will be able to:                                                                   |
| 19.01 | Discuss transmission-based precautions.                                                                                                                                 |
| 19.02 | Identify the chain of infection.                                                                                                                                        |
| 19.03 | Provide care for patients with infectious diseases applying the principles of "Standard Precautions" utilized with all patients as well as special procedures required. |
| 19.04 | Apply the proper use of personal protective equipment (PPE) for all types of isolation including donning and removing PPE appropriately.                                |
| 19.05 | Follow isolation procedure with food tray, PPE, and other supplies/equipment.                                                                                           |
| 19.06 | Collect specimen from patient in isolation.                                                                                                                             |
| 20.0  | Provide biological, psychological, and social support. The student will be able to:                                                                                     |
| 20.01 | Discuss family roles and their significance to health.                                                                                                                  |
| 20.02 | Respond to patient and family emotional needs.                                                                                                                          |
| 21.0  | Perform supervised organizational functions, following the patient care plan. The student will be able to:                                                              |
| 21.01 | Organize and prioritize patient-care assignments.                                                                                                                       |
| 21.02 | Complete assignments accurately and in a timely manner.                                                                                                                 |
| 22.0  | Assist with restorative (rehabilitative) activities. The student will be able to:                                                                                       |
| 22.01 | List the purposes of restorative (rehabilitation) program.                                                                                                              |
| 22.02 | Assist patient with specified restorative (rehabilitation) needs.                                                                                                       |
| 22.03 | Assist patients/residents to reach the optimum level of independence.                                                                                                   |

**Course Number: HCP0332****Occupational Completion Point: C****Advanced Home Health Aide – 50 hours**

Students in this module have already completed a Nursing Assistant program. After completing this module, the student will have achieved the occupational completion point of Advanced Home Health Aide (a home health aide who is also a nursing assistant). This program also meets the requirements of Home Health Aide as stated in Rules of the Department of Health and Rehabilitative services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

**Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.**

The recommended length of instruction for this module is 50 clock hours but no less than 20. Beginning 1995-96, secondary students who have completed the course 8417210 Nursing Assistant should take this module to become a Home Health Aide.

23.0 Use verbal and written communications specific to Home Health Aide. The student will be able to:

23.01 Obtain data from patient and family/significant others.

23.02 Utilize verbal and written information to contribute to the patient's plan of care.

23.03 Recognizes cultural differences in family.

24.0 Demonstrate legal and ethical responsibilities specific to Home Health Aide. The student will be able to:

24.01 Demonstrate legal and ethical behavior within the role and scope of home health aide responsibilities.

24.02 Follow policies and procedures affecting the health, safety, and well-being of patients in the home setting.

25.0 Perform physical comfort and safety functions specific to Home Health Aide. The student will be able to:

25.01 Maintain a clean and safe home environment for the patient.

25.02 Identify emergency evacuation procedures with adaptations to the home setting.

26.0 Apply principles of nutrition specific to Home Health Aide. The student will be able to:

26.01 List factors that must be considered when purchasing food.

26.02 List factors that must be considered when storing food.

26.03 Discuss preparation and serving of trays in the home.

27.0 Apply the principles of infection control specific to Home Health Aide. The student will be able to:

27.01 Provide care for patients with infectious diseases in the home.

27.02 Follow isolation procedures with food tray, garments, and other materials in the home.

27.03 Utilize standard and blood borne precautions in all home care.

28.0 Perform home health-care services. The student will be able to:

28.01 Follow an established work plan with the patient and family.

|       |                                                                                                                                                                                                        |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28.02 | Perform patient-related cleaning tasks and laundry.                                                                                                                                                    |
| 28.03 | Identify methods for medication storage.                                                                                                                                                               |
| 28.04 | Assist patient with taking self-administered prescribed medication in the home and identify possible side effects and emergency procedures for adverse reactions in accordance with 59A-8.0095, F.A.C. |
| 28.05 | Demonstrate how to utilize specified equipment and supplies in the home.                                                                                                                               |

**Course Number: HCP0020**  
**Occupational Completion Point: D**  
**Patient Care Assistant – 75 Hours**

Students enrolled in this module have previously completed a Nursing Assistant and Home Health Aide program and are adding these skills to work in a health care facility other than a nursing home. The average achieving student should complete this module in 75 clock hours. The occupational completion point Patient Care Assistant can only be achieved when this module is completed plus the modules/or credentials for Home Health Aide and Nursing Assistant are satisfied.

|       |                                                                                                |
|-------|------------------------------------------------------------------------------------------------|
| 29.0  | Perform nursing assistant skills related to the hospital setting. The student will be able to: |
| 29.01 | Care for hospital equipment and supplies.                                                      |
| 29.02 | Transfer patient to stretcher and wheelchair.                                                  |
| 29.03 | Prepare hot and cold applications for nurse to apply them.                                     |
| 29.04 | Assist patient to apply binders.                                                               |
| 29.05 | Care for patient in skin and skeletal traction.                                                |
| 29.06 | Assist with pre-operative and post-operative patient care.                                     |
| 29.07 | Reinforce dressings.                                                                           |
| 29.08 | Practice nursing assistant skills in the hospital setting.                                     |
| 30.0  | Provide nursing assistant care for the adult patient. The student will be able to:             |
| 30.01 | Assist with physical examination.                                                              |
| 30.02 | Care for patients receiving oxygen therapy.                                                    |
| 30.03 | Change an unsterile dressing.                                                                  |
| 30.04 | Take an apical pulse.                                                                          |

|       |                                                                                              |
|-------|----------------------------------------------------------------------------------------------|
| 30.05 | Take pedal pulse.                                                                            |
| 30.06 | Demonstrate an understanding of artificial eye/contact lens care.                            |
| 30.07 | Demonstrate an understanding and knowledge of needs of patients with common health problems. |
| 30.08 | Measure pulse oximetry and report decreasing levels of O <sub>2</sub> saturation.            |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program also meets the requirements of Home Health Aide as stated in rules of the department of health and rehabilitative services, division of health, chapter 10d-68 - minimum standards for home health agencies.

**Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.**

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Students who have completed the Health Science Core may articulate to this program. For teacher certification requirements for the remaining modules please check the certification diagram and/or the individual module.

Completion of this program should enable the postsecondary student to be given advanced standing in the Practical Nursing program H170607 as well as the ability to enter the Patient Care Technician program at OCP E.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### Career and Technical Student Organization (CTSO)

~~HOSA: Future Health Professionals is the~~ **CTSOs are** co-curricular career and technical student ~~organization~~ **organizations** providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOS not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education  
Curriculum Framework

No new students may be enrolled in this program starting 2026-27. The last year to report any enrollment is 2027-28. This program was replaced by Patient Care Technician H700600 (0351390208).

**Program Title:** Patient Care Technician  
**Program Type:** Career Preparatory  
**Career Cluster:** Health Science

**Career Certificate Program**

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

This program is designed to prepare students for employment as advanced cross trained nursing assistants (patient care technicians), (Health Technologists and Technicians), Health Care Technicians, Patient Care Assistants, Nursing Aides and Orderlies, Home Health Aides, or Allied Health Assistants. This program offers a broad foundation of knowledge and skills, expanding the traditional role of the nursing assistant, for both acute and long term care settings.

The program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

**Program Structure**

This program is a planned sequence of instruction consisting of 7 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                         | Teacher Certification                                                        | Length    |
|-----|---------------|--------------------------------------|------------------------------------------------------------------------------|-----------|
| A   | HSC0003       | Basic Healthcare Worker              | REG NURSE 7 G<br>LPN 7 G*<br>PRAC NURSE @7 %7%G (Must be a Registered Nurse) | 90 hours  |
| B   | HCP0121       | Nurse Aide and Orderly (Articulated) |                                                                              | 75 hours  |
| C   | HCP0332       | Advanced Home Health Aide            | REG NURSE 7 G<br>PRAC NURSE @7 %7%G (Must be a Registered Nurse)             | 50 hours  |
| D   | HCP0020       | Patient Care Assistant               |                                                                              | 75 hours  |
| E   | HSC0016       | Allied Health Assistant              |                                                                              | 150 hours |
| F   | MEA0580       | Advanced Allied Health Assistant     |                                                                              | 100 hours |
| G   | PRN0094       | Patient Care Technician              |                                                                              | 60 hours  |

*\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator which must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.*

## Common Florida's Career Technical Core—Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

01.01 Use reading skills.

01.02 Use writing skills.

01.03 Use mathematical strategies and procedures.

01.04 Use scientific principles and procedures.

#### 02.0 Design a solution to an industry problem.

|                                                                                                                       |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use verbal and written communications specific to the Nursing Assistant.
- 13.0 Demonstrate legal and ethical responsibilities specific to the Nursing Assistant.
- 14.0 Perform physical comfort and safety functions specific to the Nursing Assistant.
- 15.0 Provide personal patient care.
- 16.0 Perform patient care procedures.
- 17.0 Apply principles of nutrition.
- 18.0 Provide care for geriatric patients.
- 19.0 Apply the principles of infection control specific to the Nursing Assistant.
- 20.0 Provide biological, psychological, and social support.
- 21.0 Perform supervised organizational functions, following the patient care plan.
- 22.0 Assist with restorative (rehabilitative) activities.
- 23.0 Use verbal and written communications specific to Home Health Aide.
- 24.0 Demonstrate legal and ethical responsibilities specific to Home Health Aide.
- 25.0 Perform physical comfort and safety functions specific to Home Health Aide.
- 26.0 Apply principles of nutrition specific to Home Health Aide.
- 27.0 Apply the principles of infection control specific to Home Health Aide.
- 28.0 Perform home health-care services.
- 29.0 Perform nursing assistant skills related to the hospital setting.
- 30.0 Provide nursing assistant care for the adult patient.
- 31.0 Perform skills representative of 1-3 major allied health areas as determined by local labor market demand.
- 32.0 Successfully complete a clinical rotation in the selected major allied health areas.
- 33.0 Perform additional skills from the previous module which are in the aide level and do not go beyond the scope of practice of unlicensed assistive personnel.
- 34.0 Successfully complete a clinical rotation in the selected major allied health areas.
- 35.0 Demonstrate knowledge of organizational and effective team member skills.
- 36.0 Practice organizational and effective team member skills in a clinical setting.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Patient Care Technician  
**Career Certificate Program Number:** H170694

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

<https://www.fldoe.org/core/fileparse.php/20706/urlt/health-sci-core-psav-cc-2425.rtf>

<https://www.fldoe.org/file/20894/health-sci-core-psav-cc-2627.rtf>

**Course Number: HCP0121**  
**Occupational Completion Point: B**  
**Nurse Aide and Orderly (Articulated) – 75 Hours**

The following intended outcomes 12-23 should be taught together as a module to achieve the occupational completion point of Articulated Nursing Assistant.

|       |                                                                                                                                          |
|-------|------------------------------------------------------------------------------------------------------------------------------------------|
| 12.0  | Use verbal and written communications specific to Nurse Assisting. The student will be able to:                                          |
| 12.01 | Obtain specified data from patient and family.                                                                                           |
| 12.02 | Utilize verbal and written information to assist with the patient's plan of care.                                                        |
| 12.03 | Demonstrate use of the communication system.                                                                                             |
| 13.0  | Demonstrate legal and ethical responsibilities specific to Nurse Assisting. The student will be able to:                                 |
| 13.01 | Discuss and demonstrate legal and ethical behavior within the nursing assistant scope of practice including role limitations in Florida. |
| 13.02 | Describe the purpose of the chain of communication to resolve conflict.                                                                  |
| 13.03 | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                 |

|       |                                                                                                                                                                                                                                                   |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.04 | Demonstrate safe standards of patient care including prevention and quality of care                                                                                                                                                               |
| 13.05 | Exhibit behavior supporting and promoting patients' and/or residents' rights.                                                                                                                                                                     |
| 13.06 | Recognize potential for and prevention of medical errors.                                                                                                                                                                                         |
| 13.07 | Practice the proper procedures to follow regarding medical errors.                                                                                                                                                                                |
| 13.08 | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                                                                                                                          |
| 13.09 | Recognize and report signs of substance abuse.                                                                                                                                                                                                    |
| 13.10 | Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.                                                                                                                                                 |
| 13.11 | Define Omnibus Budget Reconciliation Act (OBRA).                                                                                                                                                                                                  |
| 13.12 | Define Minimum Data Set (MDS).                                                                                                                                                                                                                    |
| 14.0  | Perform physical comfort and safety functions specific to Nurse Assisting. The student will be able to:                                                                                                                                           |
| 14.01 | Implement appropriate regulatory and accrediting agency patient safety guidelines.                                                                                                                                                                |
| 14.02 | Maintain safe patient units, equipment, and a comfortable environment.                                                                                                                                                                            |
| 14.03 | Maintain service areas on the units including supplies and equipment.                                                                                                                                                                             |
| 14.04 | Observe, report, and record changes in the patient's behavior as needed, including mental awareness.                                                                                                                                              |
| 14.05 | Demonstrate adjustment of bed and side-rails according to facility policy.                                                                                                                                                                        |
| 14.06 | Demonstrate and assist patient to dangle.                                                                                                                                                                                                         |
| 14.07 | Demonstrate lifting, supporting and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures |
| 14.08 | Demonstrate the proper use of a gait/transfer belt in both transfer and ambulation.                                                                                                                                                               |
| 14.09 | Assist patient in ambulation, including the use of crutch, cane, or walker.                                                                                                                                                                       |
| 14.10 | Demonstrate the proper wheelchair safety techniques and assist patient as needed with use.                                                                                                                                                        |
| 14.11 | Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).                                                                                                                                           |
| 14.12 | Assist patient with care and use of prosthetic/orthotic devices.                                                                                                                                                                                  |
| 14.13 | Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.                                                                                                                         |

|       |                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------|
| 15.0  | Provide personal patient care. The student will be able to:                                                |
| 15.01 | Perform bed bath; observe and report changes in a patient including skin and level of consciousness.       |
| 15.02 | Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged bath. |
| 15.03 | Administer back rub with bath and as needed.                                                               |
| 15.04 | Assist patient with hair care utilizing sink, tub, shower, bed or shower cap.                              |
| 15.05 | Demonstrate the use of a safety and/or electric razor to shave the patient.                                |
| 15.06 | Demonstrate how to groom patient, including hair, skin, foot, hand and nail care.                          |
| 15.07 | Assist with and/or administer oral hygiene including denture care.                                         |
| 15.08 | Assist patient to dress.                                                                                   |
| 15.09 | Assist patient with toileting using various types of restorative and rehabilitative equipment.             |
| 15.10 | Assist patient with use of bedpan (standard and fracture)                                                  |
| 15.11 | Assist with bowel and bladder training.                                                                    |
| 15.12 | Assist and/ or provide perineal care.                                                                      |
| 15.13 | Empty, measure and record urinary output and/or drainage.                                                  |
| 15.14 | Demonstrate application and use of a leg bag, leg strap and dignity bag.                                   |
| 15.15 | Monitor and assist with the drainage of urostomy bags and colostomy bags.                                  |
| 15.16 | Assist patient with both donning and doffing prosthesis and brace.                                         |
| 15.17 | Assist patient with meals.                                                                                 |
| 15.18 | Describe the relationships of body systems when providing patient care.                                    |
| 15.19 | Recognize abnormal signs and symptoms of common diseases and conditions when providing patient care.       |
| 16.0  | Perform patient care procedures. The student will be able to:                                              |
| 16.01 | Demonstrate ability to accurately measure, record and report vital signs.                                  |
| 16.02 | Assist with the admission of a patient and/or resident.                                                    |

|       |                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------|
| 16.03 | Assist with the admission, transfer, and discharge of a patient and/or resident.                      |
| 16.04 | Maintain patient-belongings list.                                                                     |
| 16.05 | Make unoccupied/occupied bed.                                                                         |
| 16.06 | Provide passive range-of-motion exercises.                                                            |
| 16.07 | Apply anti-embolic hose and sequential compression devices.                                           |
| 16.08 | Understand and demonstrate proper collection of routine, timed urine and clean catch urine specimens. |
| 16.09 | Record fluid intake and output (I&O).                                                                 |
| 16.10 | Observe, record, and report patient's emesis.                                                         |
| 16.11 | Monitor and provide urinary catheter care and drainage systems.                                       |
| 16.12 | Assist with ostomy care including emptying or changing ostomy bags that do not adhere to the skin.    |
| 16.13 | Collect stool specimen.                                                                               |
| 16.14 | Assist with the collection of a sputum specimen.                                                      |
| 16.15 | Assist the nurse with care of the patient with complex medical needs.                                 |
| 16.16 | Assist patient to apply binders.                                                                      |
| 16.17 | Care for patient in skin and skeletal traction.                                                       |
| 16.18 | Assist with pre-operative and post-operative patient care.                                            |
| 16.19 | Reinforce dressings under the supervision of the RN/LPN.                                              |
| 16.20 | Obtain and record an apical pulse.                                                                    |
| 16.21 | Provide cast care and/or pin care.                                                                    |
| 16.22 | Provide care for eyeglasses, artificial eyes, and contact lens.                                       |
| 17.0  | Apply principles of nutrition. The student will be able to:                                           |
| 17.01 | Identify nutrients and food groups.                                                                   |
| 17.02 | Develop a basic food plan.                                                                            |

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.03 | Describe special diets.                                                                                                                                       |
| 17.04 | Check patient's diet tray for accuracy.                                                                                                                       |
| 17.05 | Monitor and document Nutritional Intake.                                                                                                                      |
| 17.06 | Identify and implement regional, cultural and religious food guidelines/preferences.                                                                          |
| 17.07 | Demonstrate knowledge of the need for thickened liquids and fluid consistency.                                                                                |
| 17.08 | Identify methods of maintaining fluid balance including encouraging and restricting fluids.                                                                   |
| 18.0  | Provide care for geriatric patients. The student will be able to:                                                                                             |
| 18.01 | Identify and assist with methods and procedures to prevent pressure ulcers.                                                                                   |
| 18.02 | Identify and assist with methods to prevent falls in the elderly.                                                                                             |
| 18.03 | Identify and assist with safety principles as related to the elderly.                                                                                         |
| 18.04 | Describe general characteristics, particular needs, and age related changes of the elderly.                                                                   |
| 18.05 | Identify attitudes and living habits that promote positive mental and physical health for the elderly.                                                        |
| 18.06 | Distinguish between fact and fallacy about the aging process.                                                                                                 |
| 18.07 | Apply reality orientation techniques and validation therapy unless it is contraindicated by the patient diagnosis.                                            |
| 18.08 | Recognize and respond appropriately to symptoms of common diseases, including dementia, depression/suicide and Alzheimers.                                    |
| 18.09 | Provide and involve patients in diversional activities.                                                                                                       |
| 18.10 | Identify common alterations in elderly patient behavior.                                                                                                      |
| 18.11 | Provide care for patients with special needs (e.g., impaired hearing, impaired vision, immobility, impaired body functions, cognitively impaired (dementia)). |
| 18.12 | Demonstrate awareness of common behaviors in drug use and abuse in the elderly.                                                                               |
| 18.13 | Report concerns to the nurse and appropriate authorities related to drug use and abuse in the elderly patient.                                                |
| 18.14 | Identify the need for community resources and services available to the elderly and their caregiver.                                                          |
| 18.15 | Identify components of the grief process.                                                                                                                     |
| 18.16 | Demonstrate an understanding of end of life care, hospice and palliative care.                                                                                |

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19.0  | Apply the principles of infection control specific to Nursing Assisting. The student will be able to:                                                                   |
| 19.01 | Discuss transmission-based precautions.                                                                                                                                 |
| 19.02 | Identify the chain of infection.                                                                                                                                        |
| 19.03 | Provide care for patients with infectious diseases applying the principles of "Standard Precautions" utilized with all patients as well as special procedures required. |
| 19.04 | Apply the proper use of personal protective equipment (PPE) for all types of isolation including donning and removing PPE appropriately.                                |
| 19.05 | Follow isolation procedure with food tray, PPE, and other supplies/equipment.                                                                                           |
| 19.06 | Collect specimen from patient in isolation.                                                                                                                             |
| 20.0  | Provide biological, psychological, and social support. The student will be able to:                                                                                     |
| 20.01 | Discuss family roles and their significance to health.                                                                                                                  |
| 20.02 | Respond to patient and family emotional needs.                                                                                                                          |
| 21.0  | Perform supervised organizational functions, following the patient care plan. The student will be able to:                                                              |
| 21.01 | Organize and prioritize patient-care assignments.                                                                                                                       |
| 21.02 | Complete assignments accurately and in a timely manner.                                                                                                                 |
| 22.0  | Assist with restorative (rehabilitative) activities. The student will be able to:                                                                                       |
| 22.01 | List the purposes of restorative (rehabilitation) program.                                                                                                              |
| 22.02 | Assist patient with specified restorative (rehabilitation) needs.                                                                                                       |
| 22.03 | Assist patients/residents to reach the optimum level of independence.                                                                                                   |

**Course Number: HCP0332**

**Occupational Completion Point: C**

**Advanced Home Health Aide – 50 Hours**

Students in this module have already completed a Nursing Assistant program. After completing this module, the student will have achieved the occupational completion point of Advanced Home Health Aide (a home health aide who is also a nursing assistant). This program also meets the requirements of Home Health Aide as stated in Rules of the Department of Health and Rehabilitative services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

**Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.**

The recommended length of instruction for this module is 50 clock hours but no less than 20. Beginning 1995-96, secondary students who have completed the course 8417210 Nursing Assistant should take this module to become a home health aide.

**23.0 Use verbal and written communications specific to Home Health Aide. The student will be able to:**

23.01 Obtain data from patient and family/significant others.

23.02 Utilize verbal and written information to contribute to the patient's plan of care.

23.03 Recognizes cultural differences in family.

**24.0 Demonstrate legal and ethical responsibilities specific to Home Health Aide. The student will be able to:**

24.01 Demonstrate legal and ethical behavior within the role and scope of home health aide responsibilities.

24.02 Follow policies and procedures affecting the health, safety, and well-being of patients in the home setting.

**25.0 Perform physical comfort and safety functions specific to Home Health Aide. The student will be able to:**

25.01 Maintain a clean and safe home environment for the patient.

25.02 Identify emergency evacuation procedures with adaptations to the home setting.

**26.0 Apply principles of nutrition specific to Home Health Aide. The student will be able to:**

26.01 List factors that must be considered when purchasing food.

26.02 List factors that must be considered when storing food.

26.03 Discuss preparation and serving of trays in the home.

**27.0 Apply the principles of infection control specific to Home Health Aide. The student will be able to:**

27.01 Provide care for patients with infectious diseases in the home.

27.02 Follow isolation procedures with food tray, garments, and other materials in the home.

27.03 Utilize standard and blood borne precautions in all home care.

**28.0 Perform home health-care services. The student will be able to:**

28.01 Follow an established work plan with the patient and family.

|       |                                                                                                                                                                                                        |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28.02 | Perform patient-related cleaning tasks and laundry.                                                                                                                                                    |
| 28.03 | Identify methods for medication storage.                                                                                                                                                               |
| 28.04 | Assist patient with taking self-administered prescribed medication in the home and identify possible side effects and emergency procedures for adverse reactions in accordance with 59A-8.0095, F.A.C. |
| 28.05 | Demonstrate how to utilize specified equipment and supplies in the home.                                                                                                                               |

**Course Number: HCP0020**  
**Occupational Completion Point: D**  
**Patient Care Assistant – 75 Hours**

Students enrolled in this module have previously completed a Nursing Assistant and Home Health Aide program and are adding these skills to work in a health care facility other than a nursing home. The average achieving student should complete this module in 75 clock hours. The occupational completion point Patient Care Assistant can only be achieved when this module is completed plus the modules/or credentials for Home Health Aide and Nursing Assistant are satisfied.

|       |                                                                                                |
|-------|------------------------------------------------------------------------------------------------|
| 29.0  | Perform nursing assistant skills related to the hospital setting. The student will be able to: |
| 29.01 | Care for hospital equipment and supplies.                                                      |
| 29.02 | Transfer patient to stretcher and wheelchair.                                                  |
| 29.03 | Prepare hot and cold applications for nurse to apply them.                                     |
| 29.04 | Assist patient to apply binders.                                                               |
| 29.05 | Care for patient in skin and skeletal traction.                                                |
| 29.06 | Assist with pre-operative and post-operative patient care.                                     |
| 29.07 | Reinforce dressings.                                                                           |
| 29.08 | Practice nursing assistant skills in the hospital setting.                                     |
| 30.0  | Provide nursing assistant care for the adult patient. The student will be able to:             |
| 30.01 | Assist with physical examination.                                                              |
| 30.02 | Care for patients receiving oxygen therapy.                                                    |
| 30.03 | Change an unsterile dressing.                                                                  |
| 30.04 | Take an apical pulse.                                                                          |

|       |                                                                                              |
|-------|----------------------------------------------------------------------------------------------|
| 30.05 | Take pedal pulse.                                                                            |
| 30.06 | Demonstrate an understanding of artificial eye/contact lens care.                            |
| 30.07 | Demonstrate an understanding and knowledge of needs of patients with common health problems. |
| 30.08 | Measure pulse oximetry and report decreasing levels of O <sub>2</sub> saturation.            |

**Course Number: HSC0016**  
**Occupational Completion Point: E**  
**Allied Health Assistant – 150 Hours**

Students enrolled in this module have completed the Patient Care Assistant competencies and/or are adding these skills to be a multi-skilled worker. Students will perform skills representative of one to three areas of allied health care in the laboratory and clinical settings. Major areas of allied health are defined as physical therapy, emergency, radiation, laboratory and respiratory medicine, and occupational therapy. Other areas of health, medicine, dentistry, or veterinary may be included with instructor provided competencies. **Such teacher made competencies must remain at the aide level and not go beyond the scope of practice of unlicensed assistive personnel. Invasive procedures that fall into the nursing scope of practice are not to be added.** Clinical experience is defined as activities performed in the clinical setting under the supervision of the appropriate health professional. School certificates for this module must be for “Allied Health Assistant”. Specific competencies should be listed on the back of the certificate.

31.0 Perform aide level skills representative of 1 to 3 major allied health areas in the school laboratory before beginning the clinical phase. The student will be able to:

31.01 Perform skills related to the body systems.

31.02 If unlicensed physical restorative type skills are to be taught, students will be able to:

- Describe the functions of bones and muscles as related to the practice of physical therapy.
- Define disability and identify types of disabilities.
- Describe equipment used in physical therapy.
- Teach crutch and walker use and care.
- Perform safe body mechanics and transfer techniques.
- Demonstrate an understanding of the use of modalities and practice of physical therapy (i.e., Ultrasound, heat and cold therapeutic massage, E-STEM, wound care, elastic stockings).
- Perform communication skills specifically related to physical therapy.
- Assist clients to eat using prompting techniques in the use of adaptive feeding devices.

|       |                                                                                                                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | <ul style="list-style-type: none"> <li>Identify augmented communication devices and describe the purpose of each.</li> </ul>                                                                               |
|       | <ul style="list-style-type: none"> <li>Demonstrate techniques used in active and passive range of motion exercises.</li> </ul>                                                                             |
|       | <ul style="list-style-type: none"> <li>Instruct patients in bed/wheelchair mobility activities.</li> </ul>                                                                                                 |
|       | <ul style="list-style-type: none"> <li>Describe the relationship between long-term and short-term goals.</li> </ul>                                                                                        |
| 31.03 | If unlicensed occupational restorative type skills are to be taught, students will be able to:                                                                                                             |
|       | <ul style="list-style-type: none"> <li>Describe, name, and discuss the avenues of occupational therapy practice and the equipment used.</li> </ul>                                                         |
|       | <ul style="list-style-type: none"> <li>Perform feeding and dressing skills using one hand and/or adaptive equipment.</li> </ul>                                                                            |
|       | <ul style="list-style-type: none"> <li>Perform communication skills specifically related to occupational therapy.</li> </ul>                                                                               |
|       | <ul style="list-style-type: none"> <li>Perform and instruct range of motion exercises.</li> </ul>                                                                                                          |
|       | <ul style="list-style-type: none"> <li>Train the client in clothing care skills.</li> </ul>                                                                                                                |
|       | <ul style="list-style-type: none"> <li>Train the client in food preparation skills.</li> </ul>                                                                                                             |

| 32.0  | Successfully complete a clinical rotation in 1-3 major allied health areas. The student will be able to:                                                                                                                                                |
| 32.01 | Demonstrate skills in the clinical setting as outlined in 32.0.                                                                                                                                                                                         |
| 32.02 | Complete clinical rotations under the supervision of a duly licensed/certified allied health care or nursing professional.                                                                                                                              |
| 32.03 | Exhibit behavior consistent with the professional ethics required of each of the allied health areas being studied.                                                                                                                                     |

**Course Number: MEA0580****Occupational Completion Point: F****Advanced Allied Health Assistant – 100 Hours**

Students enrolled in this module have completed the Patient Care Assistant and Allied Health Assistant competencies and/or are adding these skills to be a more multi-skilled worker. Students will perform skills representative of one to three areas of allied health care in the laboratory and clinical settings. Major areas of allied health are defined as physical therapy, emergency, radiation, laboratory and respiratory medicine, and occupational therapy. Other areas of health, medicine, dentistry, or veterinary may be included with instructor provided competencies. **Such teacher made competencies must remain at the aide level and not go beyond the scope of practice of unlicensed assistive personnel. Invasive procedures that fall into the nursing scope of practice are not to be added.** Clinical experience is defined as activities performed in the clinical setting under the supervision of the appropriate health professional. School certificates for this module must be for "Advanced Allied Health Assistant". Specific competencies should be listed on the back of the certificate.

|       |                                                                                                                                                              |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 33.0  | Perform additional skills from the previous module which are in the aide level and do not go beyond the scope of practice of unlicensed assistive personnel. |
| 34.0  | Successfully complete a clinical rotation in the selected major allied health area. The student will be able to:                                             |
| 34.01 | Demonstrate skills in the clinical setting as outlined in 32.0.                                                                                              |
| 34.02 | Complete clinical rotations under the supervision of a duly licensed/certified allied health care or nursing professional.                                   |
| 34.03 | Exhibit behavior consistent with the professional ethics required of each of the allied health areas being studied.                                          |

**Course Number: PRN0094**  
**Occupational Completion Point: G**  
**Patient Care Technician – 60 Hours**

Students enrolled in this module MUST have completed ALL modules in this program. Upon completion they will be prepared as the cross trained unlicensed worker known as the Patient Care Technician (Industry Title).

35.0 Demonstrate knowledge of organizational and effective team member skills. The student will be able to:

35.01 Define terms associated with organizational and time management skills.

35.02 Discuss the role of unlicensed assistive personnel (UAP's) in relation to the terms in 36.01.

35.03 Discuss various situations when a Patient Care Technician would utilize organizational skills.

35.04 List the characteristics of an effective team member.

35.05 Discuss the chain of command and characteristics of team member relationships.

35.06 Perform a self-evaluation.

36.0 Practice organizational and effective team member skills in a clinical setting. The student will be able to:

36.01 Demonstrate ways to deal with conflict.

36.02 Demonstrate employability skills specific to patient care technician.

36.03 Demonstrate communication skills that are supportive of team members.

36.04 Demonstrate effective time management skills.

36.05 Give and receive end-of-shift reports to team members.

## Additional Information

### **Laboratory Activities**

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program also meets the requirements of Home Health Aide as stated in Rules of the Department of Health and Rehabilitative services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

**Please refer to [42CFR§484](#) for the clinical and faculty requirements for the Home Health Aide course.**

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

A voluntary Certified Patient Care Technician (CPCT) national Examination is available through the:

National Healthcare Association <http://www.nhanow.com/>  
7500 West 160<sup>th</sup> Street, Stilwell, Kansas 66085  
Phone: 973-605-1881, Toll Free: (800) 499-9092, FAX: (913) 661-6291

Completion of this program should enable the postsecondary student to be given advanced standing in the Practical Nursing program H170607.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

~~HOSA: Future Health Professionals is the~~ [CTSOs are](#) co-curricular career and technical student ~~organization~~ [organizations](#) providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral

part of the instruction offered. [Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.](#)

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

The purpose of this program is to prepare students for employment as optometric assistants or Opticians, Dispensing.

The content includes but is not limited to basic instruction in anatomy and physiology, CPR, Heartsaver, office practices and dispensing of visual devices. Because optometrists now deal with certain drugs, students need knowledge of diagnostic and therapeutic drugs under supervision.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### Program Structure

This program is a planned sequence of instruction consisting of 2 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title               | Teacher Certification           | Length    |
|-----|---------------|----------------------------|---------------------------------|-----------|
| A   | OPT0720       | Foundations of Vision Care | TEC OPTICS 7G<br>OPTOM ASST 7 G | 102 hours |
| B   | OPT0721       | Optometric Assistant 1     |                                 | 336 hours |
|     | OPT0722       | Optometric Assistant 2     |                                 | 642 hours |

## CommonFlorida's Career Technical Core – Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

##### 01.01 Use reading skills.

##### 01.02 Use writing skills.

##### 01.03 Use mathematical strategies and procedures.

##### 01.04 Use scientific principles and procedures.

#### 02.0 Design a solution to an industry problem.

|                                                                                                                |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system.
- 02.0 Demonstrate legal and ethical responsibilities.
- 03.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 04.0 Demonstrate an understanding of health and vision concepts.
- 05.0 Demonstrate understanding of a prescription.
- 06.0 Recognize and practice workplace safety and security procedures.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Recognize and respond to emergency situations.
- 09.0 Demonstrate an understanding of information technology applications in the vision care office.
- 10.0 Demonstrate employability skills.
- 11.0 Demonstrate knowledge of business management techniques.
- 12.0 Perform delivery of optical devices.
- 13.0 Demonstrate knowledge of basic ocular anatomy and physiology.
- 14.0 Report and record patient information.
- 15.0 Perform and assist in procedures used in visual testing.
- 16.0 Perform special procedures.
- 17.0 Demonstrate knowledge of contact lenses.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Optometric Assisting  
**Career Certificate Program Number:** H170705

**Course Number: OPT0720**  
**Occupational Completion Point: A**  
**Foundations of Vision Care – 102 Hours**

01.0 Demonstrate knowledge of the healthcare delivery system. The student will be able to:

01.01 Describe how various social conditions that affect healthcare delivery.

01.02 Recognize victims of various types of abuse and neglect including domestic violence.

01.03 Identify resources to assist victims of abuse and neglect including domestic violence.

02.0 Demonstrate legal and ethical responsibilities. The student will be able to:

02.01 Differentiate between laws and a code of ethics.

02.02 Describe the composition and scope of practice of the vision care team including OD, MD, COA, LDO, and scribe.

02.03 Discuss the American Optometric Association (AOA) Paraoptometric Code of Ethics.

02.04 Demonstrate knowledge of both doctors' and patients' rights and responsibilities.

02.05 Identify qualities and procedures for accurate and legal documentation and record keeping.

02.06 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).

02.07 Describe the criteria and procedure for properly identifying patients.

02.08 Describe informed consent including implied, verbal, written and need for capacity.

02.09 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud.

03.0 Demonstrate the ability to communicate and use interpersonal skills effectively. The student will be able to:

03.01 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.

03.02 Demonstrate basic speaking, active listening skills, and non-verbal skills.

03.03 Compose written communication using correct spelling, grammar, and formatting.

|       |                                                                                                                                                                     |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.04 | Recognize the importance of courtesy and respect for patients and other healthcare workers including diverse age, cultural, economic, ethnic, and religious groups. |
|       | <a href="#">03.05 Use professional telephone etiquette to answer, transfer, and document calls.</a>                                                                 |
| 04.0  | Demonstrate an understanding of health and vision concepts. The student will be able to:                                                                            |
| 04.01 | Identify the major body systems.                                                                                                                                    |
| 04.02 | Identify the medical conditions that affect eye health.                                                                                                             |
| 04.03 | Discuss the adverse effects of alcohol, tobacco, and drug use (legal and illegal) as related to eye health                                                          |
| 04.04 | Discuss the adverse effects of poor nutrition and diet as related to eye health.                                                                                    |
| 04.05 | Identify the difference between a vision screening and a comprehensive eye exam.                                                                                    |
| 04.06 | Describe the importance of a comprehensive eye exam.                                                                                                                |
| 04.07 | Demonstrate introductory knowledge of the anatomy and physiology of the eye and the vision system.                                                                  |
| 04.08 | Recognize the difference between a chief complaint and a HPI (History of Present Illness).                                                                          |
| 04.09 | Identify signs and symptoms that may be sight-threatening to patients.                                                                                              |
| 04.10 | Identify psychological reactions to vision loss including defense mechanisms and grief.                                                                             |
| 04.11 | Demonstrate knowledge of prefixes, suffixes, and root words in medical and vision terminology.                                                                      |
| 05.0  | Demonstrate understanding of a prescription. The student will be able to:                                                                                           |
| 05.01 | Demonstrate knowledge of introduction to refractive error.                                                                                                          |
| 05.02 | Identify the reasons contact lenses and eyewear are prescribed and worn.                                                                                            |
| 05.03 | Identify legal requirements of a prescription.                                                                                                                      |
|       | <a href="#">05.04 Demonstrate understanding of electronic prescribing.</a>                                                                                          |
| 06.0  | Recognize and practice workplace safety and security procedures. The student will be able to:                                                                       |
| 06.01 | Utilize Occupational Safety and Health Administration (OSHA) safety procedures to identify safe and unsafe working conditions.                                      |
| 06.02 | Describe the importance of securing medical supplies and using user manuals to properly operate equipment.                                                          |
| 06.03 | Identify and describe methods in medical error reduction and prevention in the various healthcare settings.                                                         |

|       |                                                                                                                                                                           |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06.04 | Demonstrate proper body mechanics to prevent personal injury.                                                                                                             |
| 06.05 | Demonstrate fire, safety, disaster and evacuations procedures.                                                                                                            |
| 07.0  | Recognize and practice infection control procedures. The student will be able to:                                                                                         |
| 07.01 | Define principles of infection control including standard and transmission-based precautions.                                                                             |
| 07.02 | Demonstrate knowledge of medical asepsis and practice procedures such as handwashing and using PPE to break the chain of infection.                                       |
| 07.03 | Describe how to dispose correctly of biohazardous materials and sharps according to appropriate government guidelines such as OSHA.                                       |
| 07.04 | Demonstrate knowledge of blood borne diseases, including HIV/AIDS.                                                                                                        |
| 08.0  | Recognize and respond to emergency situations. The student will be able to:                                                                                               |
| 08.01 | Record vital signs.                                                                                                                                                       |
| 08.02 | Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), and foreign body airway obstruction (FBAO). |
| 09.0  | Demonstrate an understanding of information technology applications in the vision care office. The student will be able to:                                               |
| 09.01 | Describe electronic medical technology applications in vision care and how it can be used in vision care.                                                                 |
| 09.02 | Demonstrate basic computer skills.                                                                                                                                        |
| 09.03 | Type 25 words per minute.                                                                                                                                                 |
| 09.04 | Describe office procedures for faxing and copying options.                                                                                                                |
| 10.0  | Demonstrate employability skills. The student will be able to:                                                                                                            |
| 10.01 | Identify personal traits or attitudes desirable in a member of the healthcare team.                                                                                       |
| 10.02 | Identify appropriate professional standards of healthcare workers.                                                                                                        |
| 10.03 | Identify characteristics of effective teams and leaders                                                                                                                   |
| 10.04 | Recognize factors and situations that may lead to conflict <a href="#">with both patients and coworkers</a> , and methods for solutions                                   |
| 10.05 | Discuss laws governing harassment, labor, and employment                                                                                                                  |
| 10.06 | Identify documents that may be required when applying for a job.                                                                                                          |

|       |                                                                                                 |
|-------|-------------------------------------------------------------------------------------------------|
| 10.07 | Write an appropriate resume and cover letter.                                                   |
| 10.08 | Conduct a job search.                                                                           |
| 10.09 | Complete a job application form correctly.                                                      |
| 10.10 | Examine possible certifications or licensing in the vision career field for career advancement. |

**Course Number: OPT0721**  
**Occupational Completion Point: B**  
**Optometric Assistant 1 – 336 Hours**

|                                        |                                                                                                                                                                              |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.0                                   | Demonstrate knowledge of business management techniques. The student will be able to:                                                                                        |
| 11.01                                  | Classify patients for scheduling urgency based on triage concepts.                                                                                                           |
| <a href="#">11.02</a>                  | <a href="#">Schedule patient appointments and follow up with confirming or canceling them using standard office protocols.</a>                                               |
| <a href="#">11.03</a>                  | <a href="#">Demonstrate the ability to receive and process external patient referrals, ensuring all required documentations is complete and appropriately routed.</a>        |
| <del>11.02</del> <a href="#">11.04</a> | Describe laws, regulations, and procedures for maintaining patient files.                                                                                                    |
| <del>11.03</del> <a href="#">11.05</a> | Identify common methods of payment for vision and healthcare services.                                                                                                       |
| <del>11.04</del> <a href="#">11.06</a> | Demonstrate knowledge of criteria and appropriate use of vision vs health insurance.                                                                                         |
| <del>11.05</del> <a href="#">11.07</a> | Demonstrate knowledge of common insurance terminology.                                                                                                                       |
| <del>11.06</del> <a href="#">11.08</a> | Describe the various methods of authorizing insurance.                                                                                                                       |
| <del>11.07</del> <a href="#">11.09</a> | Describe the importance of making accurate and timely insurance claims.                                                                                                      |
| <del>11.08</del> <a href="#">11.10</a> | Demonstrate the knowledge of how CPT, ICD, and HCPCS codes are utilized.                                                                                                     |
| <del>11.09</del> <a href="#">11.11</a> | Demonstrate an understanding of billing and collection procedures for current and overdue accounts.                                                                          |
| <del>11.10</del> <a href="#">11.12</a> | Practice <a href="#">and maintain</a> office supply control: <a href="#">by tracking office, clinical, and pharmaceutical inventory levels on an inventory supply sheet.</a> |
| 12.0                                   | Perform delivery of optical devices. The student will be able to:                                                                                                            |
| 12.01                                  | Demonstrate knowledge of lens physics including: <ul style="list-style-type: none"> <li>• Optical center</li> <li>• Refraction</li> <li>• Reflection</li> </ul>              |

|       |                                                                                                                                                                                                                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | <ul style="list-style-type: none"> <li>• Dispersion</li> <li>• Index of refraction</li> <li>• Abbe value</li> <li>• Specific gravity</li> <li>• Prism</li> </ul>                                                                                                                                                                                   |
| 12.02 | Describe characteristics of convex, concave, and toric lenses and use that knowledge to identify these lenses.                                                                                                                                                                                                                                     |
| 12.03 | Describe various lens designs, materials, and options.                                                                                                                                                                                                                                                                                             |
| 12.04 | Demonstrate basic knowledge of how lenses are made.                                                                                                                                                                                                                                                                                                |
| 12.05 | Neutralize the different types of lenses.                                                                                                                                                                                                                                                                                                          |
| 12.06 | Perform optical math to interpret prescriptions including: <ul style="list-style-type: none"> <li>• Transposition</li> <li>• True reading power</li> <li>• Intermediate power</li> <li>• Spherical equivalent</li> <li>• Optical cross</li> <li>• Nominal lens formula</li> <li>• Focal length</li> <li>• Combining and splitting prism</li> </ul> |
| 12.07 | Demonstrate knowledge of frame material and style selections.                                                                                                                                                                                                                                                                                      |
| 12.08 | Interpret frame markings and take manual frame measurements using boxing system.                                                                                                                                                                                                                                                                   |
| 12.09 | Identify patient information needed to make needs-based frame and lens recommendations.                                                                                                                                                                                                                                                            |
| 12.10 | Assist patients with frame and lens selection.                                                                                                                                                                                                                                                                                                     |
| 12.11 | Take patient pupillary distance and vertical measurements for appropriate lens designs.                                                                                                                                                                                                                                                            |
| 12.12 | Identify the information needed on order form for ordering spectacle lenses and frames.                                                                                                                                                                                                                                                            |
| 12.13 | Adjust and repair spectacles.                                                                                                                                                                                                                                                                                                                      |
| 12.14 | Verify lenses according to ANSI standards, under proper supervision.                                                                                                                                                                                                                                                                               |
| 12.15 | Dispense spectacles under the proper supervision and within the optometric assistant scope of practice.                                                                                                                                                                                                                                            |

**Course Number: OPT0722**  
**Occupational Completion Point: B**  
**Optometric Assistant 2 – 642 Hours**

13.0 Demonstrate knowledge of basic ocular anatomy and physiology. The student will be able to:

13.01 Demonstrate knowledge of ocular anatomy.

13.02 Demonstrate knowledge of ocular physiology.

13.03 Demonstrate knowledge of pathological and functional disorders of the eye.

13.04 Demonstrate the knowledge of injuries of the eye and recognize sight-threatening emergencies.

13.05 Correlate general health as it relates to ocular health.

14.0 Report and record patient information. The student will be able to:

14.01 Properly identify patients, to avoid medical errors.

14.02 Identify data to be included in a patient history and additional forms that comprise a patient record.

14.03 Take and record [chief complaints and](#) patient histories from patient, parent, and/or caregiver.

14.04 Use appropriate medical and vision care terminology and abbreviations.

14.05 Communicate knowledge to patient, family and/or caregiver to assist with the plan of care, as directed by the doctor.

15.0 Perform and assist in procedures used in visual testing. The student will be able to:

15.01 ~~Measure~~[Explain measure](#) and record visual acuity.

15.02 Demonstrate knowledge of amplitude of accommodation.

15.03 ~~Measure~~[Explain measure](#) and record color vision.

15.04 ~~Measure~~[Explain measure](#) and record stereo acuity.

15.05 Measure and record pupil evaluation.

15.06 ~~Evaluate~~[Explain and evaluate](#) Ocular motility including:

- Extra Ocular Motility
- Convergence
- Cover testing
- Worth 4 dot

|                        |                                                                                                                                                                                                             |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15.07                  | Perform eye drop instillation.                                                                                                                                                                              |
| 15.08                  | Identify instruments and tools used in comprehensive eye exams.                                                                                                                                             |
| 15.09                  | Describe the importance of equipment maintenance and <a href="#">perform</a> proper disinfection.                                                                                                           |
| 16.0                   | Perform special procedures. The student will be able to:                                                                                                                                                    |
| 16.01                  | Measure and record keratometry.                                                                                                                                                                             |
| 16.02                  | Describe various methods of and the importance of retinal imaging.                                                                                                                                          |
| 16.03                  | Measure visual field with confrontation and Amsler testing; Identify Humphreys and Goldmann visual field testing procedures.                                                                                |
| 16.04                  | Demonstrate knowledge of slit lamp biomicroscope procedures.                                                                                                                                                |
| 16.05                  | Demonstrate knowledge of techniques to evaluate tear film.                                                                                                                                                  |
| 16.06                  | <a href="#">Demonstrate knowledge of methods of corneal evaluation, including topography and pachymetry.</a>                                                                                                |
| <del>16.06</del> 16.07 | Identify various methods for recording intraocular pressure; measure and record intraocular pressure.                                                                                                       |
| <del>16.07</del> 16.08 | Demonstrate knowledge of refraction techniques.                                                                                                                                                             |
| <del>16.08</del> 16.09 | Identify types of low vision aids and resources available for those that need it.                                                                                                                           |
| <del>16.09</del> 16.10 | Demonstrate knowledge of vision therapy.                                                                                                                                                                    |
| <del>16.10</del> 16.11 | Demonstrate knowledge of diagnostic and therapeutic drugs including knowledge of the color coding system for topical ocular medications.                                                                    |
| 17.0                   | Demonstrate knowledge of contact lenses. The student will be able to:                                                                                                                                       |
| 17.01                  | Assist patients with contact lens procedures including: <ul style="list-style-type: none"> <li>• Insertion and removal</li> <li>• Cleaning and care</li> <li>• Compliance of soft and RGP lenses</li> </ul> |
| 17.02                  | Demonstrate knowledge of the fitting process for both rigid and soft contact lenses.                                                                                                                        |
| 17.03                  | Demonstrate knowledge of the ordering process for contact lenses including the Fairness to Contact Lens Consumers Act- <a href="#">and trail lens inventory.</a>                                            |
| 17.04                  | Identify contact lens options; manufacturer, brand, design, power, bc, diam, wearing schedule, materials.                                                                                                   |
| 17.05                  | Demonstrate knowledge of the advantages and disadvantages of various contact lens materials and designs.                                                                                                    |

17.06 Identify instruments used to verify contact lenses.

## Additional Information

### **Laboratory Activities**

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Students are prepared to assist in performing tests to determine defects in vision, preparing and fitting eyeglasses and contact lenses, and administering corrective eye exercises and other treatments under the supervision of a person licensed under 458, 459, 463 or 484, F.S.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

### **Career and Technical Student Organization (CTSO)**

~~HOSA: Future Health Professionals is the~~ CTSOs are co-curricular career and technical student ~~organization~~ organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOSs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### Program Structure

This program is a planned sequence of instruction consisting of 2 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title              | Teacher Certification               | Length    |
|-----|---------------|---------------------------|-------------------------------------|-----------|
| A   | HSC0003       | Basic Healthcare Worker   | Ortho Tech 7 G<br>REG NUR Ortho 7 G | 90 hours  |
| B   | PHT0090       | Orthopedic Technologist 1 |                                     | 355 hours |
|     | PHT0091       | Orthopedic Technologist 2 |                                     | 355 hours |

## CommonFlorida's Career Technical Core – Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

##### 01.01 Use reading skills.

##### 01.02 Use writing skills.

##### 01.03 Use mathematical strategies and procedures.

##### 01.04 Use scientific principles and procedures.

#### 02.0 Design a solution to an industry problem.

|                                                                                                                |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Describe anatomical structure and function of the human body related to the practice of orthopedics.
- 13.0 Discuss diseases and injuries of the musculoskeletal system and related structures.
- 14.0 Demonstrate physical assessment of the orthopedic patient.
- 15.0 Perform routine maintenance of equipment.
- 16.0 Disinfect and sterilize materials and equipment.
- 17.0 Demonstrate knowledge of the use of radiology in orthopedic technology.
- 18.0 Demonstrate ability to apply, adjust, and remove all common orthopedic devices.
- 19.0 Assist the orthopedic physician with various treatments and procedures.
- 20.0 Assist the orthopedic surgeon in the operating room using aseptic technique.
- 21.0 Demonstrate use of exercise, assistive/supportive devices and specialized equipment.
- 22.0 Instruct other healthcare providers, patients and families to perform selected treatment procedures and functional activities.
- 23.0 Identify architectural barriers.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Orthopedic Technology  
**Career Certificate Program Number:** H170800

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

| <b>Course Number: PHT0090</b><br><b>Occupational Completion Point: B</b><br><b>Orthopedic Technologist 1 – 355 Hours</b> |                                                                                                                                   |
|--------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| 12.0                                                                                                                     | Describe anatomical structure and function of the human body related to the practice of orthopedics. The student will be able to: |
| 12.01                                                                                                                    | Describe the composition, properties and functions of connective tissue.                                                          |
| 12.02                                                                                                                    | Discuss the generalized functions of the skeletal system.                                                                         |
| 12.03                                                                                                                    | Identify the major anatomical structures found in a typical long bone.                                                            |
| 12.04                                                                                                                    | Discuss the microscopic structure of bones and cartilage.                                                                         |
| 12.05                                                                                                                    | Explain how bones are formed, grow and remodeled.                                                                                 |
| 12.06                                                                                                                    | Identify the two major subdivisions of the skeleton and list the bones found in each area.                                        |
| 12.07                                                                                                                    | List and compare the major types of joints in the body.                                                                           |
| 12.08                                                                                                                    | Identify and discuss the structure and function of the three major types of muscle tissue.                                        |
| 12.09                                                                                                                    | Discuss the microscopic structure of a skeletal muscle.                                                                           |

|       |                                                                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.10 | Explain muscle stimulation, movement and contraction.                                                                                                 |
| 12.11 | Identify the major muscles of the body and their primary function.                                                                                    |
| 12.12 | Discuss the most common types of movement produced by skeletal muscles.                                                                               |
| 12.13 | Describe the role of tendons and ligaments in the musculoskeletal system.                                                                             |
| 13.0  | Discuss diseases and injuries of the musculoskeletal system. The student will be able to:                                                             |
| 13.01 | Explain the body's general response to injury.                                                                                                        |
| 13.02 | Discuss the process of tissue healing.                                                                                                                |
| 13.03 | Describe the pathophysiology of connective tissue diseases and degenerative joint disorders.                                                          |
| 13.04 | Discuss the assessment and treatment of patients with connective tissue diseases and joint disorders.                                                 |
| 13.05 | Identify the various types of joint replacement.                                                                                                      |
| 13.06 | Discuss the role of the orthopedic technician in pre and post-operative care and therapy of joint replacement patients.                               |
| 13.07 | Discuss the common types of strains and sprains and treatment procedures.                                                                             |
| 13.08 | Classify the different types of bone fractures.                                                                                                       |
| 13.09 | Describe the physiological stages that occur in bone healing.                                                                                         |
| 13.10 | Discuss the major complications of fractures, their signs and symptoms and management.                                                                |
| 13.11 | Compare the types of medical treatment for fractures including reduction and fixation.                                                                |
| 13.12 | Describe common therapeutic measures for fractures including casts, splints, immobilizers, traction, crutches, walkers, and canes.                    |
| 13.13 | Describe specific types of fractures regarding their location in the body.                                                                            |
| 14.0  | Demonstrate physical assessment of the orthopedic patient. The student will be able to:                                                               |
| 14.01 | Interview patient and family in order to obtain a complete history of the patient's complaints/conditions by using effective interviewing techniques. |
| 14.02 | Conduct physical examination of the patient in order to provide pertinent information to the physician by using standard examination techniques.      |
| 14.03 | Identify critical elements to include with documentation of physical assessment of the patient.                                                       |

|       |                                                                                                                                                |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------|
| 14.04 | Use correct medical terminology and proper techniques to document orthopedic conditions or complications on the patient's chart.               |
| 15.0  | Perform routine maintenance of equipment. The student will be able to:                                                                         |
| 15.01 | Assemble, inspect, adjust and disassemble orthopedic equipment such as, frames, weights, cables, pulleys, and other support devices as needed. |
| 15.02 | Clean, organize, and maintain adequate levels of orthopedic equipment for use.                                                                 |
| 15.03 | Complete repair order forms for broken equipment.                                                                                              |
| 16.0  | Disinfect and sterilize materials and equipment. The student will be able to:                                                                  |
| 16.01 | Discuss the principles of infection control, aseptic technique, and sterilization.                                                             |
| 16.02 | Disinfect used equipment and materials using proper antiseptics and disinfectants.                                                             |
| 16.03 | Prepare materials and equipment for sterilization.                                                                                             |
| 17.0  | Demonstrate knowledge of the use of radiology in orthopedic technology. The student will be able to:                                           |
| 17.01 | Discuss the history of radiology and its application in orthopedics.                                                                           |
| 17.02 | Explain the basics of radiographic image production and the various types of permanent imaging relating to orthopedics.                        |
| 17.03 | Demonstrate the ability to interpret simple fractures and dislocations on radiographic film.                                                   |
| 17.04 | Discuss the role of the orthopedic technologist in obtaining and examining radiographs.                                                        |

**Course Number: PHT0091**

**Occupational Completion Point: B**

**Orthopedic Technologist 2 – 355 Hours**

|       |                                                                                                                                                         |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18.0  | Demonstrate ability to apply, adjust, and remove all common orthopedic devices in order to comply with physician's orders. The student will be able to: |
| 18.01 | Discuss the different types of materials and their properties used in constructing casts, splints and immobilizers.                                     |
| 18.02 | Identify the various types of upper and lower extremity casts/splints applicable to specific orthopedic conditions requiring treatment.                 |
| 18.03 | Apply upper extremity cast/splint to patient using accepted casting/splinting practices and techniques.                                                 |
| 18.04 | Apply lower extremity cast/splint to patient using accepted casting/splinting practices.                                                                |
| 18.05 | Discuss the specific orthopedic conditions associated with torso casts/splints and specialty casts/splints.                                             |

|       |                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 18.06 | Apply specialty cast/splint to patient using accepted casting/splinting practices and techniques.                                            |
| 18.07 | Describe the complications associated with casting/splinting.                                                                                |
| 18.08 | Utilize cast/splint removal equipment to remove casts/splints using accepted practices and techniques.                                       |
| 18.09 | Utilize cast/splint removal equipment to perform specific procedures, using wedging, windowing, and uni/bivalving techniques.                |
| 18.10 | Apply orthopedic devices to patient by ensuring proper fit and placement.                                                                    |
| 18.11 | Apply pre-fabricated orthotics and orthopedic appliances to patient by ensuring proper fit.                                                  |
| 19.0  | Assist the orthopedic physician with various treatments and procedures. The student will be able to:                                         |
| 19.01 | Obtain equipment in order to apply traction therapy to patient by selecting appropriate items for the traction apparatus.                    |
| 19.02 | Demonstrate ability to construct the specific type of traction ordered.                                                                      |
| 19.03 | Apply traction apparatus to bed in order to prepare for application of skin or skeletal traction by using accepted practices and techniques. |
| 19.04 | Drape, scrub, and assist in the application of skeletal traction therapy using accepted aseptic practices and techniques.                    |
| 19.05 | Apply skin traction therapy to patient using accepted aseptic practices and techniques.                                                      |
| 19.06 | Discuss the various types of traction applicable to specific orthopedic conditions requiring traction.                                       |
| 19.07 | Explain the basic biomechanics of traction therapy.                                                                                          |
| 19.08 | Describe the contraindications associated with traction therapy.                                                                             |
| 19.09 | Assist in discontinuing traction therapy using accepted practices and techniques.                                                            |
| 20.0  | Assist the orthopedic surgeon using aseptic technique. The student will be able to:                                                          |
| 20.01 | Assist the surgeon during reductions by supplying and applying the appropriate materials.                                                    |
| 20.02 | Apply and manage post-operative dressing on wounds following aseptic practices and techniques.                                               |
| 21.0  | Demonstrate use of exercise, assistive/supportive devices and specialized equipment. The student will be able to:                            |
| 21.01 | Describe the benefits of exercise, stretching, conditioning and strength training in rehabilitative therapy.                                 |
| 21.02 | Recognize and assist in exercising techniques used in orthopedic therapy.                                                                    |
| 21.03 | Discuss, demonstrate and teach the proper use of canes, crutches and walkers.                                                                |

|       |                                                                                                                                                             |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 21.04 | Describe and demonstrate the various types of wheelchairs and their use.                                                                                    |
| 21.05 | Perform safe body mechanics and patient transfer techniques.                                                                                                |
| 21.06 | Define orthotics and state the importance of proper fit.                                                                                                    |
| 21.07 | Discuss upper and lower extremity prosthetics in terms of types of amputations and prosthetics available.                                                   |
| 21.08 | Identify and find solutions for common problems associated with prosthetic management.                                                                      |
| 21.09 | Assist and instruct patients in the use of orthotic/prosthetic devices.                                                                                     |
| 22.0  | Instruct other healthcare providers, patients and families to perform selected treatment procedures and functional activities. The student will be able to: |
| 22.01 | Explain specific treatment plans for patients to all parties involved.                                                                                      |
| 22.02 | Describe desired outcomes of selected treatment procedures or functional activities.                                                                        |
| 22.03 | Detail the types and functions of equipment being used in treatment of patients and their application.                                                      |
| 22.04 | Discuss safety issues and proper procedural methods concerning use of orthopedic equipment and treatment protocol.                                          |
| 23.0  | Identify architectural barriers. The student will be able to:                                                                                               |
| 23.01 | Identify environmental factors that are potential architectural barriers.                                                                                   |
| 23.02 | Determine which aspects of the patient's functional level and their ambulatory/mobility equipment are subject to architectural problems.                    |
| 23.03 | Describe action required to remediate barriers.                                                                                                             |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

The graduate of this program is prepared to make application for certification by examination to the:  
National Board for Certification of Orthopaedic Technologists (NBCOT), Inc.  
4736 Onondaga Blvd., #166, Syracuse, NY 13219, (866) 466-2268  
TO EARN CERTIFICATION AS A ORTHOPEDIC TECHNOLOGIST CERTIFIED (OTC)

### **OR**

The American Society of Orthopedic Professionals (ASOP)  
700 Beach Drive NE, Suite 103, St. Petersburg, FL 33701, (727) 394-1700  
TO EARN CERTIFICATION AS A REGISTERED ORTHOPEDIC TECHNOLOGIST (ROT)

### Career and Technical Student Organization (CTSO)

~~HOSA: Future Health Professionals is the~~ CTSOs are co-curricular career and technical student ~~organization~~ organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOSs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### Basic Skills

In Career Certificate Programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

The content includes but is not limited to planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues. Clinical learning experiences are an integral part of this program.

This is an instructional program that prepares individuals to provide initial care to sick or injured persons or as ambulance drivers and attendants. An Emergency Medical Responder may use this training for employment. The Emergency Medical Responder is the first to arrive at the scene of an injury but does not have the primary responsibility for treating and transporting the injured person(s). Emergency Medical Responders may include law enforcement, lifeguard, fire services or basic life support non-licensed personnel who act as part of an organized emergency medical services team.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

**"All EMR/EMT/Paramedic students are required to complete the 4-hour Traffic Incident Management Safety (TIMS) course at least once. This requirement can be fulfilled either as a prerequisite or as part of the curriculum, at the discretion of the EMS education program."**

### **Program Structure**

This program is a planned sequence of instruction consisting of 2 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                | Teacher Certification                                      | Length    |
|-----|---------------|-----------------------------|------------------------------------------------------------|-----------|
| A   | HSC0003       | Basic Healthcare Worker     | REG NURSE 7 G<br>PARAMEDIC @7 7G<br>MED PROF 7 G<br>EMT 7G | 90 hours  |
| B   | EMS0050       | Emergency Medical Responder |                                                            | 100 hours |

## CommonFlorida's Career Technical Core – Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

01.01 Use reading skills.

01.02 Use writing skills.

01.03 Use mathematical strategies and procedures.

01.04 Use scientific principles and procedures.

#### 02.0 Design a solution to an industry problem.

|                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------|
| <a href="#"><u>02.01 Use critical thinking.</u></a>                                                                   |
| <a href="#"><u>02.02 Use creativity.</u></a>                                                                          |
| <a href="#"><u>02.03 Make sound decisions.</u></a>                                                                    |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate an understanding of the roles and responsibilities of the Emergency Medical Responder.
- 13.0 Demonstrate an understanding of EMS Operations
- 14.0 Demonstrate an ability to communicate effectively as part of the EMS team.
- 15.0 Demonstrate an understanding of medicolegal aspects
- 16.0 Determine and record vital signs of a sick or injured person.
- 17.0 Use medical identification devices.
- 18.0 Conduct a primary assessment of problems that are a threat to life if not corrected immediately.
- 19.0 Demonstrate BLS procedures.
- 20.0 Recognize and control bleeding.
- 21.0 Recognize and control shock.
- 22.0 Understand the importance of emergency medications.
- 23.0 Demonstrate understanding of airway management, respiration and artificial ventilation.
- 24.0 Provide secondary assessment.
- 25.0 Identify musculo-skeletal injuries.
- 26.0 Demonstrate proper spinal motion restriction of a Cervical/Spinal injury.
- 27.0 Demonstrate proper extremity immobilization as well as other immobilization for other injuries (pelvis, ribs).
- 28.0 Provide emergency evacuation and transfer of a sick and/or injured person.
- 29.0 Identify and provide initial care for a sick and/or injured patient.
- 30.0 Identify and care for patients who are in special situations.
- 31.0 Provide triage to victims of multiple casualty incidents.
- 32.0 Scene Assessment.
- 33.0 Recognize entrapment situations.
- 34.0 Assist with emergency childbirth.
- 35.0 Identify critical incident stressors.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Emergency Medical Responder  
**Career Certificate Program Number:** H171500

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

<https://www.fldoe.org/core/fileparse.php/20706/urlt/health-sci-core-psav-cc-2425.rtf>

<https://www.fldoe.org/file/20894/health-sci-core-psav-cc-2627.rtf>

**Course Number: EMS0050**  
**Occupational Completion Point: B**  
**Emergency Medical Responder – 100 Hours**

|                        |                                                                                                                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.0                   | Demonstrate an understanding of the roles and responsibilities of the Emergency Medical Responder. The student will be able to:                                                                      |
| 12.01                  | Describe the role of Emergency Medical Responder as a member of the EMS team in the community and public health.                                                                                     |
| 12.02                  | List and describe the responsibilities of the Emergency Medical Responder for the provision of pre-hospital emergency care within the local EMS system.                                              |
| 12.03                  | Describe principles of safely operating a ground ambulance.                                                                                                                                          |

| <a href="#">18.05 Perform a rapid full body scan.</a>                                                                                                                                |
| <del>17.04</del> <a href="#">18.06</a> Assess patient and determine if the patient has a life-threatening condition.                                                                 |
| <del>17.05</del> <a href="#">18.07</a> Use spinal precautions as appropriate                                                                                                         |
| <a href="#">18.08 Determine the patient's chief complaint.</a>                                                                                                                       |
| <a href="#">18.09 Determine the mechanism of injury or nature of illness.</a>                                                                                                        |
| <a href="#">18.10 Use appropriate interviewing techniques to determine the patient's associated signs and symptoms.</a>                                                              |
| <del>18.0</del> <a href="#">19.0</a> Demonstrate BLS procedures. The student will be able to:                                                                                        |
| <del>18.04</del> <a href="#">19.01</a> Establish and maintain an open airway using both manual and mechanical airway techniques.                                                     |
| <del>18.02</del> <a href="#">19.02</a> Restore breathing and circulation by means of cardiopulmonary resuscitation (CPR).                                                            |
| <del>18.03</del> <a href="#">19.03</a> Demonstrate proficiency in the use of an automated external defibrillator (AED).                                                              |
| <del>19.0</del> <a href="#">20.0</a> Recognize and control bleeding. The student will be able to:                                                                                    |
| <a href="#">20.01 Demonstrate knowledge of anatomy and physiology of the circulatory system (Including the heart, arteries, veins, and perfusion).</a>                               |
| <del>19.04</del> <a href="#">20.02</a> Identify items that can be used to control external bleeding and minimize the contamination of open wounds.                                   |
| <del>19.02</del> <a href="#">20.03</a> Apply pressure dressings, tourniquets, and wound packing that will control bleeding/hemorrhage and minimize the contamination of open wounds. |
| <del>19.03</del> <a href="#">20.04</a> Identify the likelihood of internal bleeding through observations of signs, symptoms and mechanisms of injury.                                |
| <a href="#">20.05 Differentiate between blunt and penetrating mechanisms of injury and their associated complications.</a>                                                           |
| <del>19.04</del> <a href="#">20.06</a> Care for a patient who exhibits the signs and symptoms of internal bleeding.                                                                  |
| <del>19.05</del> <a href="#">20.07</a> Apply current trauma treatment standards when applying a tourniquet, which may include Pre-Hospital Trauma Life Support (PHTLS) standards.    |

|                        |                                                                                                                                                                                            |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <del>20.0</del> 21.0   | Recognize and control shock. The student will be able to:                                                                                                                                  |
| <del>20.04</del> 21.01 | Recognize the likelihood that shock may occur or be present based on patient assessment and observation of a mechanism of injury.                                                          |
| <del>20.02</del> 21.02 | Understand the pathophysiology of shock.                                                                                                                                                   |
| <del>20.03</del> 21.03 | Provide anti-shock measures as a part of routine patient care.                                                                                                                             |
| <del>21.0</del> 22.0   | Understand the importance of emergency medications. The student will be able to:                                                                                                           |
|                        | <u>22.01 Demonstrate the proper safety procedures when handling and administering medications.</u>                                                                                         |
| <del>21.04</del> 22.02 | Understand the advantages, disadvantages, and techniques of self and peer administration of an intramuscular injection by auto injector.                                                   |
| <del>21.02</del> 22.03 | Describe the names, effects, indications, contraindications, side effects, routes of administration, and dosages for specific medications (i.e., chemical antidote auto injector devices). |
| <del>21.03</del> 22.04 | Demonstrate how to observe and respond to patient's need for narcotic antagonists.                                                                                                         |
| <del>21.04</del> 22.05 | Demonstrate accurate dosage calculation, including weight-based dosing procedures.                                                                                                         |
| <del>21.05</del> 22.06 | Demonstrate the six rights of medication administration.                                                                                                                                   |
| <del>21.06</del> 22.07 | Demonstrate how to administer narcotic antagonists, using a unit-dose, premeasured intranasal device.                                                                                      |
| <del>21.07</del> 22.08 | Document administration of narcotic antagonists and patient's response on medical record.                                                                                                  |
| <del>21.08</del> 22.09 | Observe and communicate effects of medications to the patient's assigned EMT/Paramedic.                                                                                                    |
| <del>22.0</del> 23.0   | Demonstrate understanding of airway management, respiration, and artificial ventilation. The student will be able to:                                                                      |
| <del>22.04</del> 23.01 | Apply knowledge of anatomy and physiology- <u>including upper and lower airway to airway management procedures (i.e., ventilation, oxygenation, respiration, and perfusion).</u>           |
| <del>22.02</del> 23.02 | Understand the pathophysiology of respiratory dysfunction- <u>(including but not limited to asthma, bronchiolitis, pneumonia, and chronic, obstructive pulmonary disease).</u>             |
|                        | <u>23.03 Understand the effect of ventilation on cardiac output.</u>                                                                                                                       |
| <del>22.03</del> 23.04 | Use available mechanical devices to assure the maintenance of an open airway and assist ventilation according to American Heart Association (AHA) standards.                               |
| <del>22.04</del> 23.05 | Demonstrate proficiency in supplemental oxygen therapy including portable oxygen cylinder and oxygen delivery devices.                                                                     |
| <del>22.05</del> 23.06 | Describe and demonstrate airway management utilizing of upper airway suctioning.                                                                                                           |
| <del>23.0</del> 24.0   | Provide secondary assessment. The student will be able to:                                                                                                                                 |

|                        |                                                                                                                                                                                          |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <del>23.01</del> 24.01 | Conduct a methodical head-to-toe physical examination to discover conditions not found during the primary assessment.                                                                    |
| 24.02                  | Assess the patient's vital signs (Including, but not limited to, heart rate, blood pressure, respiratory rate, and pain level)                                                           |
| <del>23.02</del> 24.03 | Interview the sick or injured person to obtain facts relevant to the person's condition.                                                                                                 |
| <del>23.03</del> 24.04 | Interview co-workers, witnesses, family members, or other individuals to obtain facts relevant to the person's condition.                                                                |
| 24.05                  | Apply knowledge of how and when to reassess patients based on patient condition.                                                                                                         |
| <del>24.0</del> 25.0   | Identify musculo-skeletal injuries. The student will be able to:                                                                                                                         |
| 25.01                  | Apply knowledge of anatomy and physiology of the muscles and bones.                                                                                                                      |
| <del>24.01</del> 25.02 | Identify the various types of musculo-skeletal injuries.                                                                                                                                 |
| <del>24.02</del> 25.03 | Immobilize and otherwise care for suspected fractures, dislocations, sprains and strains with available supplies and equipment, including commercially available and improvised devices. |
| <del>24.03</del> 25.04 | Demonstrate an understanding of the function and need for traction splints.                                                                                                              |
| <del>25.0</del> 26.0   | Demonstrate proper spinal motion restriction of a cervical/spinal injury. The student will be able to:                                                                                   |
| <del>25.01</del> 26.01 | Identify need for spinal motion restriction.                                                                                                                                             |
| <del>25.02</del> 26.02 | Maintain in-line spinal motion restriction of cervical spine.                                                                                                                            |
| <del>25.03</del> 26.03 | Place proper fitting rigid extrication-type cervical collar.                                                                                                                             |
| <del>25.04</del> 26.04 | Place patient in supine position on appropriate spine board based on patient condition.                                                                                                  |
| <del>25.05</del> 26.05 | Secure patient to spinal motion restriction device.                                                                                                                                      |
| <del>26.0</del> 27.0   | Demonstrate proper extremity immobilization as well as other immobilization for other injuries (pelvis, ribs). The student will be able to:                                              |
| <del>26.01</del> 27.01 | Identify need for extremity immobilization.                                                                                                                                              |
| <del>26.02</del> 27.02 | Assesses motor, sensory, and distal circulation in extremities.                                                                                                                          |
| <del>26.03</del> 27.03 | Place proper fitting splint on extremity.                                                                                                                                                |
| <del>26.04</del> 27.04 | Reassesses motor, sensory, and distal circulation in extremities.                                                                                                                        |
| <del>27.0</del> 28.0   | Provide emergency evacuation and transfer of a sick and/or injured person. The student will be able to:                                                                                  |

|                               |                                                                                                                                                                             |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <del>27.01</del> <u>28.01</u> | Describe situations when a person should be evacuated or transferred.                                                                                                       |
| <del>27.02</del> <u>28.02</u> | Use the most appropriate assist, drag or carry (alone or with a partner) to move a sick or injured person from a dangerous location to a safe place.                        |
| <del>27.03</del> <u>28.03</u> | Maintain safety precautions during evacuation and transfer.                                                                                                                 |
| <del>27.04</del> <u>28.04</u> | Demonstrate an understanding of the purpose and use of transfer methods for patients including stair chairs and stretchers.                                                 |
| <u>28.05</u>                  | <u>Understand and demonstrate proper body mechanics when lifting and moving patients.</u>                                                                                   |
| <del>28.0</del> <u>29.0</u>   | Identify and provide initial care for a sick and/or injured patient. The student will be able to:                                                                           |
| <del>28.01</del> <u>29.01</u> | Identify and care for patients with non-traumatic chest pain, utilizing patient assessment.                                                                                 |
| <del>28.02</del> <u>29.02</u> | Identify and care for patients experiencing respiratory distress/failure/arrest, utilizing patient assessment.                                                              |
| <del>28.03</del> <u>29.03</u> | Identify and care for patients experiencing a diabetic emergency, utilizing patient assessment.                                                                             |
| <del>28.04</del> <u>29.04</u> | Identify and care for a patient who is experiencing a seizure, utilizing patient assessment.                                                                                |
| <del>28.05</del> <u>29.04</u> | Identify and care for a patient who has ingested, inhaled, absorbed or been injected with a poisonous substance.                                                            |
| <del>28.06</del> <u>29.06</u> | Identify and care for a patient who is in an altered state of consciousness, utilizing patient assessment.                                                                  |
| <del>28.07</del> <u>29.07</u> | Identify and care for a patient who is experiencing a stroke, utilizing patient assessment.                                                                                 |
| <del>28.08</del> <u>29.08</u> | Identify and care for a patient who has a foreign body in the eye, utilizing patient assessment.                                                                            |
| <u>29.09</u>                  | <u>Identify and care for a patient who has shock associated with gastrointestinal bleeding.</u>                                                                             |
| <u>29.10</u>                  | <u>Identify and care for a patient who has epistaxis.</u>                                                                                                                   |
| <u>29.11</u>                  | <u>Identify and care for a patient experiencing an anaphylactic reaction.</u>                                                                                               |
| <u>29.12</u>                  | <u>Identify and care for a patient with non-traumatic fracture.</u>                                                                                                         |
| <u>29.13</u>                  | <u>Identify and care for a patient experiencing a behavioral emergency and demonstrate knowledge of suicide risk.</u>                                                       |
| <del>28.09</del> <u>29.14</u> | Identify and care for a patient with thermal, chemical, or electrical burns, determining the severity including degree, body surface area, type, and location.              |
| <del>28.10</del> <u>29.15</u> | Identify and care for a patient suffering from an environmental emergency including heat cramps, heat exhaustion, heat stroke, and frostbite, utilizing patient assessment. |
| <del>29.0</del> <u>30.0</u>   | Identify and care for patients who are in special situations. The student will be able to:                                                                                  |

|                        |                                                                                                                                                                                                                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <del>29.01</del> 30.01 | Identify patients who have special needs (including but not limited to abuse, domestic violence, and sex trafficking).                                                                                                                                                                                                           |
| <del>29.02</del> 30.02 | Care for injured/ill children.                                                                                                                                                                                                                                                                                                   |
| <del>29.03</del> 30.03 | Care for the injured/ill elderly.                                                                                                                                                                                                                                                                                                |
| <del>29.04</del> 30.04 | Care for the injured/ill physically disabled.                                                                                                                                                                                                                                                                                    |
| <del>29.05</del> 30.05 | Care for the injured/ill developmentally disabled.                                                                                                                                                                                                                                                                               |
| <del>30.0</del> 31.0   | Provide triage to victims of multiple casualty incidents. The student will be able to:                                                                                                                                                                                                                                           |
| <del>30.04</del> 31.01 | Categorize the victims of multiple casualty incidents according to the severity of injury or illness based on patient assessments.                                                                                                                                                                                               |
| <del>30.02</del> 31.02 | Use triage tags or other identification devices available locally to indicate priorities for pre-hospital emergency care and transportation to medical facilities.                                                                                                                                                               |
| <del>30.03</del> 31.03 | Work as a member of a team to perform triage at locations of multiple casualty incidents.                                                                                                                                                                                                                                        |
| <del>30.04</del> 31.04 | Work as a member of a team to perform patient assessments at locations of multiple casualty incidents.                                                                                                                                                                                                                           |
| <del>30.05</del> 31.05 | Work as a member of a team to carry out patient care procedures at the locations of multiple casualty incidents.                                                                                                                                                                                                                 |
| <del>30.06</del> 31.06 | Demonstrate knowledge of the operating procedures during a terrorist event or during a natural or man-made disaster.                                                                                                                                                                                                             |
| <del>30.07</del> 31.07 | Demonstrate a basic understanding of the Incident Command System (ICS) implemented by the Federal Emergency Management Agency (FEMA),                                                                                                                                                                                            |
| <del>30.08</del> 31.08 | Discuss and demonstrate Hazardous Waste Operations and Emergency Response (HAZWOPER) standard, 29 CFR 1910.120 – First Responder Awareness Level <a href="https://www.osha.gov/emergency-preparedness/hazardous-waste-operations/standards">https://www.osha.gov/emergency-preparedness/hazardous-waste-operations/standards</a> |
| <del>31.0</del> 32.0   | Scene Assessment. The student will be able to:                                                                                                                                                                                                                                                                                   |
| <del>31.04</del> 32.01 | Take steps to minimize the chance of injury or death to all involved when confronted with a potentially life-threatening situation based on Presence of hazards.                                                                                                                                                                 |
| <del>32.0</del> 33.0   | Recognize entrapment situations. The student will be able to:                                                                                                                                                                                                                                                                    |
| <del>32.04</del> 33.01 | Identify accident-related hazards and undertake hazard control measures consistent with the capabilities of the Emergency Medical Responder and available equipment.                                                                                                                                                             |
| <del>32.02</del> 33.02 | Recognize available equipment that is used to safely gain access to persons who are entrapped.                                                                                                                                                                                                                                   |
| <del>32.03</del> 33.03 | Recognize available equipment that is used to safely disentangle persons from mechanisms of entrapment.                                                                                                                                                                                                                          |
| <del>32.04</del> 33.04 | Identify which agencies to notify for assistance with entrapment situations.                                                                                                                                                                                                                                                     |

|                        |                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <del>33.0</del> 34.0   | Assist with emergency childbirth. The student will be able to:                                                                  |
| <del>33.01</del> 34.01 | Evaluate a mother to determine whether delivery is imminent.                                                                    |
| <del>33.02</del> 34.02 | Assist with a normal delivery.                                                                                                  |
| <del>33.03</del> 34.03 | Care for the mother and baby.                                                                                                   |
| <del>33.04</del> 34.04 | Identify abnormal childbirth situations and care for the mother and baby within the Emergency Medical Responder's capabilities. |
| <del>34.0</del> 35.0   | Identify critical incident stressors. The student will be able to:                                                              |
| <del>34.01</del> 35.01 | Identify stressors which may affect the performance of an Emergency Medical Responder.                                          |
| <del>34.02</del> 35.02 | Identify stressors which may affect the behavior of a sick or injured person.                                                   |
| <del>34.03</del> 35.03 | Carry out procedures to minimize critical incident stress.                                                                      |
| <del>34.04</del> 35.04 | Identify signs and symptoms of PTSD and the resources available for treatment.                                                  |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

In order for students to take the NREMT003 Emergency Medical Responder exam the program must be approved by the National Registry for Emergency Medical Technicians. To receive approval from NREMT each program must be “authorized” by the Bureau of Emergency Medical Services by completing the instructor qualifications form required by Bureau of EMS.

The Emergency Medical Responder instructor shall issue to each student documentation of successful course completion which shall include date of issuance, student's name, name of sponsoring agency (DOE), name of training agency, and instructor's printed name and signature, plus the wording "issued pursuant to section 401.435, F.S." The instructor must also maintain on file following course completion, a roster listing the names of students who successfully completed the course, the dates and location of the course, and the name of the instructor.

The student performance standards for Emergency Medical Responder were adapted and condensed from U. S. Department of Transportation Emergency Medical Services; Emergency Medical Responder Training Course, National Standard Curriculum Instructors Lesson Plan and American Society for Testing and Materials, Committee F-30. Administrators and instructors should refer to these materials for additional details.

This program meets the Department of Health’s education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### Career and Technical Student Organization (CTSO)

~~HOSA: Future Health Professionals is the~~ CTSOs are co-curricular career and technical student ~~organization~~ organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral

part of the instruction offered. [Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.](#)

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

The purpose of this program is to prepare students for employment as mental health technicians, psychiatric aides or psychiatric technicians, mental health technicians and nursing assistants. Additional certification and licensure opportunities (i.e., Certified Recovery Peer Specialist, Certified Community Health Worker and Certified Behavioral Health Technician) are noted at the end of the document under Special Notes.

The content includes but is not limited to nursing assistant skills, physical assessment, patient teaching and education, wellness and disease concepts, HIV/AIDS, growth and development, mental illness, anxiety, bipolar disorder, depression, schizophrenia, psychosis, personality disorders, emergency and crisis intervention, Alzheimer's Disease and dementia, intellectual developmental disabilities, substance abuse, group therapy,

stress management, employability skills, safety and security issues, legal and ethical, therapeutic communication, documentation, clinical skills including hygiene, vital signs and CPR.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### **Program Structure**

This program is a planned sequence of instruction consisting of 3 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

This program is a planned sequence of instruction consisting of 3 occupational completion points.

~~This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.~~

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                         | Teacher Certification                                       | Length    |
|-----|---------------|--------------------------------------|-------------------------------------------------------------|-----------|
| A   | HSC0003       | Basic Healthcare Worker              | REG NURSE 7 G                                               | 90 hours  |
| B   | HCP0121       | Nurse Aide and Orderly (articulated) | LPN 7 G*<br>PRAC NURSE @7 %7%G (Must be a Registered Nurse) | 75 hours  |
| C   | HCP0810       | Mental Health Technician             | REG NURSE 7 G                                               | 315 hours |

**\*The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator which must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.**

## Common Florida's Career Technical Core—Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

01.01 Use reading skills.

01.02 Use writing skills.

01.03 Use mathematical strategies and procedures.

01.04 Use scientific principles and procedures.

|              |                                                                                                  |
|--------------|--------------------------------------------------------------------------------------------------|
| <u>02.0</u>  | <u>Design a solution to an industry problem.</u>                                                 |
| <u>02.01</u> | <u>Use critical thinking.</u>                                                                    |
| <u>02.02</u> | <u>Use creativity.</u>                                                                           |
| <u>02.03</u> | <u>Make sound decisions.</u>                                                                     |
| <u>02.04</u> | <u>Solve problems.</u>                                                                           |
| <u>02.05</u> | <u>Reason.</u>                                                                                   |
| <u>02.06</u> | <u>Plan and organize.</u>                                                                        |
| <u>03.0</u>  | <u>Manage resources within an industry project</u>                                               |
| <u>03.01</u> | <u>Manage time.</u>                                                                              |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use verbal and written communications specific to Nurse Assisting.
- 13.0 Demonstrate legal and ethical responsibilities specific to Nurse Assisting.
- 14.0 Perform physical comfort and safety functions specific to Nurse Assisting.
- 15.0 Provide personal patient care.
- 16.0 Perform patient care procedures.
- 17.0 Apply principles of nutrition.
- 18.0 Provide care for geriatric patients.
- 19.0 Apply the principles of infection control specific to Nursing Assisting.
- 20.0 Provide biological, psychological, and social support.
- 21.0 Perform supervised organizational functions, following the patient care plan.
- 22.0 Assist with restorative (rehabilitative) activities.
- 23.0 Demonstrate and implement knowledge of mental health, mental illness, including substance use/abuse and addiction.
- 24.0 Identify the spectrum of interventions and treatment for mental health problems and the types of delivery of care in the stabilization and rehabilitation of the mental health patient.
- 25.0 Demonstrate an understanding of various mental health disorders, observable signs and symptoms and general interventions to be implemented by the mental health technician.
- 26.0 Provide therapeutic communication, knowledge of therapeutic relationship, and support for the mental health patient.
- 27.0 Perform skills and documentation related to caring for and supervising the mental health patient in various types of treatment settings.
- 28.0 Implement crisis intervention techniques and emergency services if necessary in the mental health setting.
- 29.0 Participate as a member of a multidisciplinary team in the planning and implementation of care and treatment for individual patients.
- 30.0 Provide patient education and information on the various resources and support groups available for the mentally ill, substance using or addictive client and family members.
- 31.0 Conduct individual, group and family presentations/discussions to facilitate patient recovery and wellness.

32.0 Perform pharmacological aspects of care as directed (residential and assisted living facility settings).

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Mental Health Technician  
**Career Certificate Program Number:** H180100

The **Basic Health Care Worker (HSC0003)** is referred to as the **Health Science Core** and is the first OCP in the majority of the Career Certificate Program health science programs. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science program in which it is a part. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training.

**Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours**

To ensure consistency whenever these courses are offered, the health science core standards (1-11) and benchmarks have been placed in a separate document. To access this document, visit this link:

| 12.03                                                                                                                   | Demonstrate use of the communication system.                                                                                             |
| 13.0                                                                                                                    | Demonstrate legal and ethical responsibilities specific to Nurse Assisting. The student will be able to:                                 |
| 13.01                                                                                                                   | Discuss and demonstrate legal and ethical behavior within the nursing assistant scope of practice including role limitations in Florida. |
| 13.02                                                                                                                   | Describe the purpose of the chain of communication to resolve conflict.                                                                  |
| 13.03                                                                                                                   | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                 |
| 13.04                                                                                                                   | Demonstrate safe standards of patient care including prevention and quality of care                                                      |

|       |                                                                                                                                                                                                                                                   |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.05 | Exhibit behavior supporting and promoting patients' and/or residents' rights.                                                                                                                                                                     |
| 13.06 | Recognize potential for and prevention of medical errors.                                                                                                                                                                                         |
| 13.07 | Practice the proper procedures to follow regarding medical errors.                                                                                                                                                                                |
| 13.08 | Follow policies and procedures affecting the health, safety, and well-being of patients.                                                                                                                                                          |
| 13.09 | Recognize and report signs of substance abuse.                                                                                                                                                                                                    |
| 13.10 | Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.                                                                                                                                                 |
| 13.11 | Define Omnibus Budget Reconciliation Act (OBRA).                                                                                                                                                                                                  |
| 13.12 | Define Minimum Data Set (MDS).                                                                                                                                                                                                                    |
| 14.0  | Perform physical comfort and safety functions specific to Nurse Assisting. The student will be able to:                                                                                                                                           |
| 14.01 | Implement appropriate regulatory and accrediting agency patient safety guidelines.                                                                                                                                                                |
| 14.02 | Maintain safe patient units, equipment, and a comfortable environment.                                                                                                                                                                            |
| 14.03 | Maintain service areas on the units including supplies and equipment.                                                                                                                                                                             |
| 14.04 | Observe, report, and record changes in the patient's behavior as needed, including mental awareness.                                                                                                                                              |
| 14.05 | Demonstrate adjustment of bed and side-rails according to facility policy.                                                                                                                                                                        |
| 14.06 | Demonstrate and assist patient to dangle.                                                                                                                                                                                                         |
| 14.07 | Demonstrate lifting, supporting and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures |
| 14.08 | Demonstrate the proper use of a gait/transfer belt in both transfer and ambulation.                                                                                                                                                               |
| 14.09 | Assist patient in ambulation, including the use of crutch, cane, or walker.                                                                                                                                                                       |
| 14.10 | Demonstrate the proper wheelchair safety techniques and assist patient as needed with use.                                                                                                                                                        |
| 14.11 | Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).                                                                                                                                           |
| 14.12 | Assist patient with care and use of prosthetic/orthotic devices.                                                                                                                                                                                  |
| 14.13 | Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.                                                                                                                         |

|       |                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------|
| 15.0  | Provide personal patient care. The student will be able to:                                                |
| 15.01 | Perform bed bath; observe and report changes in a patient including skin and level of consciousness.       |
| 15.02 | Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged bath. |
| 15.03 | Administer back rub with bath and as needed.                                                               |
| 15.04 | Assist patient with hair care utilizing sink, tub, shower, bed or shower cap.                              |
| 15.05 | Demonstrate the use of a safety and/or electric razor to shave the patient.                                |
| 15.06 | Demonstrate how to groom patient, including hair, skin, foot, hand and nail care.                          |
| 15.07 | Assist with and/or administer oral hygiene including denture care.                                         |
| 15.08 | Assist patient to dress.                                                                                   |
| 15.09 | Assist patient with toileting using various types of restorative and rehabilitative equipment.             |
| 15.10 | Assist patient with use of bedpan (standard and fracture)                                                  |
| 15.11 | Assist with bowel and bladder training.                                                                    |
| 15.12 | Assist and/ or provide perineal care.                                                                      |
| 15.13 | Empty, measure and record urinary output and/or drainage.                                                  |
| 15.14 | Demonstrate application and use of a leg bag, leg strap and dignity bag.                                   |
| 15.15 | Monitor and assist with the drainage of urostomy bags and colostomy bags.                                  |
| 15.16 | Assist patient with both donning and doffing prosthesis and brace.                                         |
| 15.17 | Assist patient with meals.                                                                                 |
| 15.18 | Describe the relationships of body systems when providing patient care.                                    |
| 15.19 | Recognize abnormal signs and symptoms of common diseases and conditions when providing patient care.       |
| 16.0  | Perform patient care procedures. The student will be able to:                                              |
| 16.01 | Demonstrate ability to accurately measure, record and report vital signs.                                  |

|       |                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------|
| 16.02 | Assist with the admission of a patient and/or resident.                                               |
| 16.03 | Assist with the admission, transfer, and discharge of a patient and/or resident.                      |
| 16.04 | Maintain patient-belongings list.                                                                     |
| 16.05 | Make unoccupied/occupied bed.                                                                         |
| 16.06 | Provide passive range-of-motion exercises.                                                            |
| 16.07 | Apply anti-embolic hose and sequential compression devices.                                           |
| 16.08 | Understand and demonstrate proper collection of routine, timed urine and clean catch urine specimens. |
| 16.09 | Record fluid intake and output (I&O).                                                                 |
| 16.10 | Observe, record, and report patient's emesis.                                                         |
| 16.11 | Monitor and provide urinary catheter care and drainage systems.                                       |
| 16.12 | Assist with ostomy care including emptying or changing ostomy bags that do not adhere to the skin.    |
| 16.13 | Collect stool specimen.                                                                               |
| 16.14 | Assist with the collection of a sputum specimen.                                                      |
| 16.15 | Assist the nurse with care of the patient with complex medical needs.                                 |
| 16.16 | Assist patient to apply binders.                                                                      |
| 16.17 | Care for patient in skin and skeletal traction.                                                       |
| 16.18 | Assist with pre-operative and post-operative patient care.                                            |
| 16.19 | Reinforce dressings under the supervision of the RN/LPN.                                              |
| 16.20 | Obtain and record an apical pulse.                                                                    |
| 16.21 | Provide cast care and/or pin care.                                                                    |
| 16.22 | Provide care for eyeglasses, artificial eyes, and contact lens.                                       |
| 17.0  | Apply principles of nutrition. The student will be able to:                                           |

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.01 | Identify nutrients and food groups.                                                                                                                           |
| 17.02 | Develop a basic food plan.                                                                                                                                    |
| 17.03 | Describe special diets.                                                                                                                                       |
| 17.04 | Check patient's diet tray for accuracy.                                                                                                                       |
| 17.05 | Monitor and document Nutritional Intake.                                                                                                                      |
| 17.06 | Identify and implement regional, cultural and religious food guidelines/preferences.                                                                          |
| 17.07 | Demonstrate knowledge of the need for thickened liquids and fluid consistency.                                                                                |
| 17.08 | Identify methods of maintaining fluid balance including encouraging and restricting fluids.                                                                   |
| 18.0  | Provide care for geriatric patients. The student will be able to:                                                                                             |
| 18.01 | Identify and assist with methods and procedures to prevent pressure ulcers.                                                                                   |
| 18.02 | Identify and assist with methods to prevent falls in the elderly.                                                                                             |
| 18.03 | Identify and assist with safety principles as related to the elderly.                                                                                         |
| 18.04 | Describe general characteristics, particular needs, and age related changes of the elderly.                                                                   |
| 18.05 | Identify attitudes and living habits that promote positive mental and physical health for the elderly.                                                        |
| 18.06 | Distinguish between fact and fallacy about the aging process.                                                                                                 |
| 18.07 | Apply reality orientation techniques and validation therapy unless it is contraindicated by the patient diagnosis.                                            |
| 18.08 | Recognize and respond appropriately to symptoms of common diseases, including dementia, depression/suicide and Alzheimers.                                    |
| 18.09 | Provide and involve patients in diversional activities.                                                                                                       |
| 18.10 | Identify common alterations in elderly patient behavior.                                                                                                      |
| 18.11 | Provide care for patients with special needs (e.g., impaired hearing, impaired vision, immobility, impaired body functions, cognitively impaired (dementia)). |
| 18.12 | Demonstrate awareness of common behaviors in drug use and abuse in the elderly.                                                                               |
| 18.13 | Report concerns to the nurse and appropriate authorities related to drug use and abuse in the elderly patient.                                                |

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 18.14 | Identify the need for community resources and services available to the elderly and their caregiver.                                                                    |
| 18.15 | Identify components of the grief process.                                                                                                                               |
| 18.16 | Demonstrate an understanding of end of life care, hospice and palliative care.                                                                                          |
| 19.0  | Apply the principles of infection control specific to nursing assisting. The student will be able to:                                                                   |
| 19.01 | Discuss transmission-based precautions.                                                                                                                                 |
| 19.02 | Identify the chain of infection.                                                                                                                                        |
| 19.03 | Provide care for patients with infectious diseases applying the principles of "Standard Precautions" utilized with all patients as well as special procedures required. |
| 19.04 | Apply the proper use of personal protective equipment (PPE) for all types of isolation including donning and removing PPE appropriately.                                |
| 19.05 | Follow isolation procedure with food tray, PPE, and other supplies/equipment.                                                                                           |
| 19.06 | Collect specimen from patient in isolation.                                                                                                                             |
| 20.0  | Provide biological, psychological, and social support. The student will be able to:                                                                                     |
| 20.01 | Discuss family roles and their significance to health.                                                                                                                  |
| 20.02 | Respond to patient and family emotional needs.                                                                                                                          |
| 21.0  | Perform supervised organizational functions, following the patient care plan. The student will be able to:                                                              |
| 21.01 | Organize and prioritize patient-care assignments.                                                                                                                       |
| 21.02 | Complete assignments accurately and in a timely manner.                                                                                                                 |
| 22.0  | Assist with restorative (rehabilitative) activities. The student will be able to:                                                                                       |
| 22.01 | List the purposes of restorative (rehabilitation) program.                                                                                                              |
| 22.02 | Assist patient with specified restorative (rehabilitation) needs.                                                                                                       |
| 22.03 | Assist patients/residents to reach the optimum level of independence.                                                                                                   |

**Course Number: HCP0810**  
**Occupational Completion Point: C**  
**Mental Health Technician – 315 Hours**

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 23.0  | Demonstrate and implement knowledge of mental health, mental illness, including substance use/abuse and addiction. The student will be able to:                                                                                                                                                                                                                                                                                                                                          |
| 23.01 | Define and discuss mental health.                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 23.02 | Define and discuss mental illness and contributing factors.                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 23.03 | Display understanding of The American Psychiatric Association, Diagnostic and Statistical Manual of Mental Disorders (DSM-5).                                                                                                                                                                                                                                                                                                                                                            |
| 23.04 | Display awareness of the current trends and issues in the field of mental health i.e., Healthy People 2020 Mental Health Objectives, Office of Disease Prevention and Health Promotion (ODPHP) <a href="http://www.healthypeople.gov">www.healthypeople.gov</a> .                                                                                                                                                                                                                        |
| 23.05 | Define and discuss substance use/abuse; addiction; co-occurring disorders and comorbidity.                                                                                                                                                                                                                                                                                                                                                                                               |
| 23.06 | Demonstrate knowledge of the 10 classes of drugs with Substance-Related and Addictive Disorders including prevalence, risks, consequences, intoxication, and withdrawal. <ul style="list-style-type: none"> <li>• Alcohol</li> <li>• Caffeine</li> <li>• Cannabis</li> <li>• Hallucinogens</li> <li>• Inhalants</li> <li>• Opioids</li> <li>• Sedatives, Hypnotics and Anxiolytics</li> <li>• Stimulants</li> <li>• Tobacco</li> <li>• Other - synthetic drugs and bath salts</li> </ul> |
| 23.07 | Implement knowledge of Maslow's hierarchy of needs, physical responses to stress, psychological responses to stress, ego defense mechanisms, stages of grief, and stages of growth and development while caring for the mental health patient.                                                                                                                                                                                                                                           |
| 23.08 | Implement knowledge of cultural and spiritual considerations while caring for the mental health patient.                                                                                                                                                                                                                                                                                                                                                                                 |
| 24.0  | Identify the spectrum of interventions and treatment for mental health problems and the types of delivery of care in the stabilization and rehabilitation of the mental health patient. The student will be able to:                                                                                                                                                                                                                                                                     |
| 24.01 | Display knowledge of prevention programs (i.e., health wellness, stress management, drug education programs, campaigns, parenting programs etc.).                                                                                                                                                                                                                                                                                                                                        |
| 24.02 | Display knowledge of early intervention programs.                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 24.03 | Display knowledge of different types of treatment and support including the following: <ul style="list-style-type: none"> <li>• inpatient hospitalization: crisis intervention, detoxification, stabilization and case management</li> <li>• partial hospitalization programs</li> <li>• long term care facilities</li> <li>• community mental health centers and developmental disability centers</li> <li>• clinics</li> <li>• residential facilities</li> <li>• mobile outreach units</li> </ul>                                                                                                                                         |
| 24.04 | Describe and identify the multidisciplinary treatment team members and their roles in the stabilization and rehabilitation of the mental health patient.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 24.05 | Display knowledge of the chain of command at various treatment settings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 24.06 | Describe the difference between an involuntary and voluntary admission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 24.07 | Display knowledge of Individual therapy, group therapy, cognitive behavioral therapy, family therapy, education groups, support groups, and self- help groups.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 24.08 | Display knowledge of the process of recovery and relapse prevention.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 24.09 | Demonstrate knowledge of the various types of complementary and integrative therapies.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 24.10 | Demonstrate knowledge of pharmacology treatment, side effects and be able to identify patient reactions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 24.11 | Demonstrate knowledge of electroconvulsive therapy (ECT).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 25.0  | Demonstrate an understanding of various mental health disorders, observable signs and symptoms and general interventions to be implemented by the mental health technician. The student will be able to:                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 25.01 | Discuss observable signs and symptoms and demonstrate general interventions to be implemented by the mental health technician for the following: <ul style="list-style-type: none"> <li>• Anxiety</li> <li>• Obsessive Compulsive Disorder (OCD)</li> <li>• Trauma and Stressor Related Disorders</li> <li>• Substance Use and Addictive Disorders</li> <li>• Schizophrenia and Psychosis</li> <li>• Depression and Suicide</li> <li>• Bipolar</li> <li>• Personality Disorders</li> <li>• Eating Disorders</li> <li>• Neurodevelopment Disorders (i.e., autism spectrum disorder) and Neurocognitive Disorders (i.e., dementia)</li> </ul> |

|       |                                                                                                                                                                                                                                                      |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 26.0  | Provide therapeutic communication, knowledge of therapeutic relationship, and support for the mental health patient. The student will be able to:                                                                                                    |
| 26.01 | Ensure quality patient care by developing good rapport and understanding of patient's needs.                                                                                                                                                         |
| 26.02 | Display empathy, respect and nonjudgmental attitude to foster trust.                                                                                                                                                                                 |
| 26.03 | Identify self-awareness issues that can enhance or hinder the mental health technician's role in establishing rapport with the mental health patient.                                                                                                |
| 26.04 | Display knowledge and understanding of effective communication by discussing the communication process: (sender, message, and receiver).                                                                                                             |
| 26.05 | Convey simple, clear and direct communication when speaking with the mental health or developmentally disabled patient.                                                                                                                              |
| 26.06 | Display good listening skills (show interest and concern, establish eye contact, eliminate distractions etc.) when patient is speaking.                                                                                                              |
| 26.07 | Apply knowledge of multicultural considerations while communicating.                                                                                                                                                                                 |
| 26.08 | Demonstrate awareness of the mental health patient's nonverbal cues and behaviors.                                                                                                                                                                   |
| 26.09 | Display knowledge of therapeutic communication techniques and nontherapeutic communication blocks.                                                                                                                                                   |
| 26.10 | Differentiate between direct and open-ended questioning.                                                                                                                                                                                             |
| 26.11 | Demonstrate communication techniques, which enable an effective exchange of information, ideas and feelings.                                                                                                                                         |
| 26.12 | Reinforce and acknowledge patient of strengths, resources and that others care.                                                                                                                                                                      |
| 26.13 | Provide positive feedback for acceptable behaviors.                                                                                                                                                                                                  |
| 26.14 | Obtain meaningful information that may require an appropriate nursing intervention.                                                                                                                                                                  |
| 26.15 | Demonstrate professional relationship and communication with appropriate boundaries.                                                                                                                                                                 |
| 27.0  | Perform skills and documentation related to caring for and supervising the mental health patient in various types of treatment settings. The student will be able to:                                                                                |
| 27.01 | Demonstrate HIPAA, confidentiality, legal, and ethical considerations while caring for the mental health patient.                                                                                                                                    |
| 27.02 | Provide safety and security measures for inpatient hospitalization including: <ul style="list-style-type: none"> <li>• room search</li> <li>• frequent monitoring</li> <li>• suicide and homicide precautions</li> <li>• contraband check</li> </ul> |

|       |                                                                                                                                                                                                                                                                 |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | <ul style="list-style-type: none"> <li>• elopement precautions</li> <li>• crisis intervention</li> <li>• documentation of the above</li> </ul>                                                                                                                  |
| 27.03 | Provide safety and security measures for outpatient and residential facilities and display knowledge of outpatient emergency procedures.                                                                                                                        |
| 27.04 | Apply knowledge of infection control and blood borne pathogens on the mental health unit and while caring for the mental health patient.                                                                                                                        |
| 27.05 | Assist, supervise, and document the mental health patient's: vital signs, ADL's (activities of daily living: hygiene, bathing, dressing, nutrition and elimination); group attendance, and interactions with staff, patients, and visitors.                     |
| 27.06 | Execute purposeful and productive interactions with patients and staff members.                                                                                                                                                                                 |
| 27.07 | Maintains and adheres to schedule on unit.                                                                                                                                                                                                                      |
| 27.08 | Maintain a professional atmosphere for a safe and therapeutic environment including respect for boundaries, use of touch, distance zones, set consistent limits especially with manipulative behavior, reports violations and exploitive behaviors immediately. |
| 27.09 | Demonstrate an understanding of subjective and objective observations.                                                                                                                                                                                          |
| 27.10 | Demonstrate observation and documentation skills of patient's verbal and nonverbal communication, changes in thought processes, mood, and behavior.                                                                                                             |
| 27.11 | Demonstrate the ability to observe and document physical signs and symptoms of patient responses to medications, drug use or change in condition and change in vital signs.                                                                                     |
| 27.12 | Record events accurately and be able to place event in time and sequence                                                                                                                                                                                        |
| 27.13 | Perform a verbal report and communicate to nurse or team leader completely, accurately and immediately re: changes in patient condition, vital signs, mood and behavior.                                                                                        |
| 27.14 | Demonstrate correct documentation procedures and guidelines in regards to format, proper grammar and spelling, appropriate use of medical abbreviations, medical terminology, and types of charting utilized at different facilities.                           |
| 28.0  | Implement crisis intervention techniques and emergency services if necessary in the mental health setting. The student will be able to:                                                                                                                         |
| 28.01 | Discuss the Five-Phase Aggression Cycle: triggering phase, escalation phase, crisis phase, recovery phase, and post crisis phase.                                                                                                                               |
| 28.02 | Demonstrate vigilance in identifying behaviors that will initiate in increase in agitation and notify team members if observed.                                                                                                                                 |
| 28.03 | Assess suicide or homicide potential plan.                                                                                                                                                                                                                      |
| 28.04 | Access emergency services if necessary.                                                                                                                                                                                                                         |
| 28.05 | Utilize reality- oriented approach, active listening and attend to immediate needs.                                                                                                                                                                             |

|       |                                                                                                                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28.06 | Remain with individual who is experiencing panic anxiety.                                                                                                                                                                                   |
| 28.07 | Demonstrate knowledge of de-escalation techniques: calm voice, reduce stimulation, verbal redirect, time out (quiet time-open seclusion) relaxation techniques, distract with positive activity, discuss alternative strategies etc.        |
| 28.08 | Enforce policies and procedures related to aggressive and destructive behaviors including establishing an understanding of acceptable behaviors with the patient and enforcing rules for unacceptable behaviors.                            |
| 28.09 | Demonstrate knowledge of facility's crisis intervention policy and crisis team to be notified if de-escalation techniques fail, and patient escalates to physical aggression.                                                               |
| 28.10 | Discuss crisis intervention measures for Inpatient setting including: <ul style="list-style-type: none"> <li>• “show of force”</li> <li>• locked seclusion</li> <li>• seclusion and restraints</li> <li>• use of prn medications</li> </ul> |
| 28.11 | Demonstrate knowledge of restraint policy.                                                                                                                                                                                                  |
| 28.12 | Assist with reintegration of patient to environment when stabilized and is able to participate.                                                                                                                                             |
| 28.13 | Demonstrate vigilance in identifying clues of a patient's suicidal intent – both direct and indirect and notify team member in charge.                                                                                                      |
| 28.14 | Demonstrate knowledge of risk factors for suicide and discuss suicide assessment.                                                                                                                                                           |
| 28.15 | Recognize self-harm behaviors.                                                                                                                                                                                                              |
| 28.16 | Discuss methods of suicide.                                                                                                                                                                                                                 |
| 28.17 | Discuss suicide ideation.                                                                                                                                                                                                                   |
| 28.18 | Demonstrate knowledge of notifying nurse/person in charge or emergency services if patient communicates suicide plan or describes means to carry out suicide plan.                                                                          |
| 28.19 | Follow facility procedure for suicidal patient and access emergency services if necessary.                                                                                                                                                  |
| 28.20 | Supervise the safety of a suicidal inpatient by removing all potentially harmful objects and monitoring them closely during mealtime, medication administration, bathroom use, and activities.                                              |
| 28.21 | Demonstrate knowledge of suicide precautions.                                                                                                                                                                                               |
| 28.22 | Demonstrate different levels of suicidal precautions as needed including 1:1 contact and constant visual observation, or every 15-minute checks and document.                                                                               |
| 28.23 | Demonstrate knowledge of no harm contract and limitations.                                                                                                                                                                                  |

|       |                                                                                                                                                                                                                           |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28.24 | Encourage client to express honest feelings, including anger.                                                                                                                                                             |
| 28.25 | Display and communicate that patient has value.                                                                                                                                                                           |
| 28.26 | Perform room searches as necessary.                                                                                                                                                                                       |
| 29.0  | Participate as a member of a multidisciplinary team in the planning and implementation of care and treatment for individual patients. The student will be able to:                                                        |
| 29.01 | Relate unit problems and needs to the team leader, or head nurse as appropriate.                                                                                                                                          |
| 29.02 | Report violations of patients on unit and assist with issuing consequences.                                                                                                                                               |
| 29.03 | Contribute to the formulation of unit goals for individual patient.                                                                                                                                                       |
| 29.04 | Participate in the planning, decision-making through staff meetings.                                                                                                                                                      |
| 29.05 | Support hospital and residential policies and procedures as well as the procedure manual for the unit.                                                                                                                    |
| 29.06 | Display understanding of the limitations of the role of the mental health technician.                                                                                                                                     |
| 29.07 | Display cooperation when asked to change assignments or tasks.                                                                                                                                                            |
| 29.08 | Demonstrate ability to function independently without constant supervision.                                                                                                                                               |
| 29.09 | Show respect for coworkers and be able to interpret the organizational chart.                                                                                                                                             |
| 29.10 | Maintain own proper physical, emotional, and mental health through application of proper body mechanics, use of healthy coping mechanisms, ability to have self-awareness skills and seek healthy support when necessary. |
| 29.11 | Promote a healthy interpersonal relationship with peers - show respect and recognition by positive communication.                                                                                                         |
| 29.12 | Collaborate with other team members in proper application of the nursing process: (assessment, planning, implementation and evaluation).                                                                                  |
| 29.13 | Accept direction and constructive criticism without becoming defensive.                                                                                                                                                   |
| 29.14 | Demonstrate ability to assist and function in various unit capacity: clerical and resident manager roles (i.e., display telephone etiquette, escort patient, order supplies, simple filing & fax, copy machine ability).  |
| 30.0  | Provide patient education and information on the various resources and support groups available for the mentally ill, substance using or addictive client, and family members. The student will be able to:               |
| 30.01 | Demonstrate and discuss knowledge of local support groups, community mental health centers and developmental disabled centers that provide support and assistance to patients and their families.                         |
| 30.02 | Demonstrate and discuss knowledge of 12- step program model for recovery.                                                                                                                                                 |

|       |                                                                                                                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 30.03 | Display knowledge of the various self- help groups and peer assistance programs that can help addicts with recovery and rehabilitation i.e., AA (Alcoholics Anonymous), NA (Narcotics Anonymous), MARA (Medication Assisted Recovery Anonymous), and OA (Overeaters Anonymous). |
| 30.04 | Demonstrate and discuss knowledge of 12 step self- help groups available for the family members and loved ones of drug addicts and alcoholics i.e., Al-Anon family groups and Nar-Anon family groups.                                                                           |
| 30.05 | Understand the principles of 12-step program, 12 steps and traditions, anonymity, key slogans, and use of sponsor.                                                                                                                                                              |
| 30.06 | Demonstrate and discuss knowledge regarding national and local organizations and services for mental health and substance use issues such as NAMI, SAMHSA, NIMH, Autism Speaks.org, WRAP (Wellness Recovery Action Plan) for patient and family information.                    |
| 31.0  | Conduct individual, group and family presentations / discussions to facilitate patient recovery and wellness. The student will be able to:                                                                                                                                      |
| 31.01 | Demonstrate thorough knowledge and preparation of content and information for subject matter of educational group discussion/presentation as well as be able to state the goal of the presentation/discussion.                                                                  |
| 31.02 | Display awareness of demographics of group participants (gender, culture, age, socioeconomic etc.); awareness of participant's cognitive and developmental stages, readiness for education on subject and comprehension ability.                                                |
| 31.03 | Demonstrate awareness of group dynamics and group process.                                                                                                                                                                                                                      |
| 31.04 | Communicate "ground rules" and expectations of the group.                                                                                                                                                                                                                       |
| 31.05 | Display ability to create and enforce ground rules and appropriate boundaries for group learning and education.                                                                                                                                                                 |
| 31.06 | Demonstrate effective communication techniques (verbal and nonverbal) and use of possible role play, skits, handouts and creative supplements of content to be discussed or presented. (Assure client safety and know possible "triggers").                                     |
| 31.07 | Display ability to effectively "close" the group or presentation.                                                                                                                                                                                                               |
| 31.08 | Demonstrate knowledge of: attendance record, points allocated for attendance and participation.                                                                                                                                                                                 |
| 31.09 | Communicate to counselor or nurse any behaviors or verbalizations of patient that warrant further exploration or immediate attention.                                                                                                                                           |
| 31.10 | Demonstrate ability to document patient attendance and observations in accordance to facility procedures and guidelines.                                                                                                                                                        |
| 31.11 | Complete a post group self- analysis of one's own strengths and weaknesses.                                                                                                                                                                                                     |
| 31.12 | Assess modifications one would make for future group presentations.                                                                                                                                                                                                             |
| 32.0  | Perform pharmacological aspects of care as directed (residential and assisted living facility settings). The student will be able to:                                                                                                                                           |
| 32.01 | Demonstrate knowledge of 6 Rights of Medication Administration (right medication, right dose, right patient, right time, right route, and right documentation) and policies.                                                                                                    |

|       |                                                                                                                                         |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 32.02 | Observe and report side effects of medication.                                                                                          |
| 32.03 | Supervise and document patient medication administration.                                                                               |
| 32.04 | Encourage client to take prescribed medication. Document refusal.                                                                       |
| 32.05 | Assemble information about properties of medications being administered, their potential side effects.                                  |
| 32.06 | Demonstrate knowledge of the client's rights relating to taking or refusing medication.                                                 |
| 32.07 | Determine client's medication history from records or family in relation to re-allergic reactions.                                      |
| 32.08 | Assure adequate supply and safeguard storage of medications to prevent overdose.                                                        |
| 32.09 | Assume responsibility for information transfer to/from oncoming shift and communicate concerns or changes to nurse or person in charge. |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

The program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students who are successful completers of the Mental Health Technician program can seek further certification through The Florida Certification Board (FCB) for Certified Recovery Peer Specialist: (CRPS-A Adult, CRPS-F Family, CRPS-V Veteran); or Certified Community Health Worker or Certified Behavioral Health Technician, please refer to the FCB for requirements, policies, and procedures at [www.flcertificationboard.org](http://www.flcertificationboard.org). Applicants and certified professionals are individually responsible for ensuring they are following current FCB policy and procedures.

If students in this program are seeking a licensure as a Certified Nursing Assistant (CNA), through The Department of Health, please refer to 456.0635, F.S. for more information on disqualification for the licensure through the Department of Health.

### Career and Technical Student Organization (CTSO)

~~HOSA: Future Health Professionals is the~~ CTSOs are co-curricular career and technical student ~~organization~~ organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOS not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and secondary programs cannot be modified.

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

The program is designed to prepare students for entry level employment as dental laboratory technicians, denture technicians, crown & bridge technicians, ceramic & technicians, or to provide supplemental training for persons previously or currently employed in this occupation.

The content of the program includes, but is not limited to, general studies, physical sciences, dental sciences, and dental laboratory techniques.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

## Program Structure

This program is a planned sequence of instruction consisting of 7 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u>OCP</u> | <u>Course Number</u> | <u>Course Title</u>                                            | <u>Teacher Certification</u> | <u>Length</u>    |
|------------|----------------------|----------------------------------------------------------------|------------------------------|------------------|
| <u>A</u>   | <u>DTE0401</u>       | <u>Orientation to Dental Laboratory Technology</u>             | <u>DEN LABTEC 7G</u>         | <u>109 hours</u> |
| <u>B</u>   | <u>DTE0433</u>       | <u>Denture Technician 1</u>                                    |                              | <u>315 hours</u> |
|            | <u>DTE0434</u>       | <u>Denture Technician 2</u>                                    |                              | <u>315 hours</u> |

| 09.0  | <u>Manage personal behavior to maximize productivity and professional growth.</u> |
| 09.01 | <u>Demonstrate responsibility and self-discipline.</u>                            |
| 09.02 | <u>Adapt and show flexibility.</u>                                                |
| 09.03 | <u>Work independently.</u>                                                        |
| 09.04 | <u>Demonstrate a willingness to learn.</u>                                        |
| 09.05 | <u>Demonstrate integrity.</u>                                                     |
| 09.06 | <u>Demonstrate professionalism.</u>                                               |
| 09.07 | <u>Take initiative.</u>                                                           |
| 09.08 | <u>Display positive attitude.</u>                                                 |
| 09.09 | <u>Take responsibility for professional growth.</u>                               |

| <b><u>Job Attainment</u></b> |                                                                                                                        |
|------------------------------|------------------------------------------------------------------------------------------------------------------------|
| 10.0                         | <u>Find, assess and apply to job opportunities.</u>                                                                    |
| 10.01                        | <u>Identify online job posts relevant to his or her career aspirations.</u>                                            |
| 10.02                        | <u>Compare and contrast the job posts' required qualifications, job duties, compensation, benefits and employers.</u>  |
| 10.03                        | <u>Define what information, documentation and writing prompts are required for the positions.</u>                      |
| 11.0                         | <u>Communicate personal competence, character and fit for a job opportunity.</u>                                       |
| 11.01                        | <u>Develop a resume.</u>                                                                                               |
| 11.02                        | <u>Write a cover letter.</u>                                                                                           |
| 11.03                        | <u>Curate a professional portfolio that includes work products.</u>                                                    |
| 11.04                        | <u>Prepare for and experience a mock job interview.</u>                                                                |
| 12.0                         | <u>Cultivate and leverage relationships to professionally advance.</u>                                                 |
| 12.01                        | <u>Request a signed reference letter, letter of recommendation and/or an online skill/professionalism endorsement.</u> |
| 12.02                        | <u>Develop a plan to cultivate a professional digital footprint.</u>                                                   |
| 12.03                        | <u>Develop a networking plan for a specific industry of interest.</u>                                                  |

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Identify the anatomic structure and function of body systems in relation to prosthetic services performed by the dental laboratory technician.
- 02.0 Practice quality assurance, safety, and infection control.
- 03.0 Adhere to legal and ethical principles related to the practice of dental laboratory technology.
- 04.0 Demonstrate knowledge of dental sciences.
- 05.0 Demonstrate knowledge of physical and mechanical properties of metals and alloys.
- 06.0 Manufacture various methods of complete denture construction.
- 07.0 Manufacture complete denture construction on practical work received from a dental clinic.
- 08.0 Manufacture and identify components of a removable partial denture.
- 09.0 Manufacture orthodontic and pedodontic appliances.
- 10.0 Demonstrate knowledge and skills required to manufacture single and multi-unit restorations
- 11.0 Perform basic occlusion, determinants of occlusal morphology, and physiology of mandibular movements.
- 12.0 Manufacture restorations in the student's specialty for patients who receive treatment at the dental research clinic.
- 13.0 Demonstrate knowledge of effective business management techniques.
- 14.0 Demonstrate knowledge of basic concepts of porcelain-fused-to-metal (PFM) techniques.
- 15.0 Demonstrate proper design and fabrication for individual and three-unit anterior bridges for pressable system restorations.
- 16.0 Demonstrate proper design and fabrication for all Ceramics Restorations using the Refractory System.
- 17.0 Demonstrated knowledge of the Standard Components for Implant Systems.
- 18.0 Demonstrate proper design and fabrication for the Implants System.
- 19.0 Describe the Standard Components and fabrication of semi-precision attachments.
- 20.0 Demonstrate proper design and fabrication of Hybrid Restoration.
- 21.0 Specialization Removable Appliances: Demonstrate skills in removable dentures on specific projects.
- 22.0 Perform select proficiency in fixed restorative techniques in chosen areas of specialization.

| 02.01                                                                                                                                      | <u>Practice safety in accordance with institutional policy.</u>                                                                                                                    |
| 02.02                                                                                                                                      | <u>Identify documentation procedures necessary to comply with state laws.</u>                                                                                                      |
| 02.03                                                                                                                                      | <u>Demonstrate knowledge of the dental laboratory technician's role in providing quality assurance in laboratory procedures, reporting, and use and maintenance of equipment.</u>  |
| 02.04                                                                                                                                      | <u>Use appropriate dental terminology and abbreviations.</u>                                                                                                                       |
| 02.05                                                                                                                                      | <u>Demonstrate knowledge, principles, and methods of disease transmission and prevention as related to dental prostheses.</u>                                                      |
| 02.06                                                                                                                                      | <u>Demonstrate knowledge of infection control in dental laboratories in accordance with the Centers for Disease Control (CDC)/OSHA guidelines.</u>                                 |
| 02.07                                                                                                                                      | <u>Establish an infection control procedures policy for the dental laboratory.</u>                                                                                                 |
| 03.0                                                                                                                                       | <u>Adhere to legal and ethical principles related to the practice of dental laboratory technology. The student will be able to:</u>                                                |
| 03.01                                                                                                                                      | <u>Demonstrate knowledge of the importance of observing the doctor/technician relationship.</u>                                                                                    |
| 03.02                                                                                                                                      | <u>Demonstrate knowledge of state law governing the practice of Dental Laboratory Technology.</u>                                                                                  |
|                                                                                                                                            |                                                                                                                                                                                    |

**Course Number: DTE0433**  
**Occupational Completion Point: B**  
**Denture Technician 1 – 315 hours**

04.0 Demonstrate knowledge of dental sciences. The student will be able to:

04.01 Demonstrate knowledge of physical properties, use, and manipulation of dental materials.

04.02 Demonstrate knowledge of the dynamics of occlusion.

04.03 Demonstrate problem-solving skills as related to dental materials.

05.0 Demonstrate knowledge of physical and mechanical properties of metals and alloys. The student will be able to:

05.01 Identify how dental materials are affected by changes in the physical and mechanical properties of the materials.

05.02 List characteristics of a metal.

05.03 Identify the mechanical properties of cast alloys and cold-worked metal, strain hardening, recrystallization, and grain growth.

05.04 Identify the metals and percentages in all types of dental casting gold alloys, and how different alloys of dental gold casting affect the dental restorations.

05.05 Identify heat treatment techniques for dental casting gold alloys.

05.06 List the types, composition, and uses of dental solders.

05.07 Identify the composition and uses of dental fluxes and pickling agents.

05.08 Identify composition, physical and mechanical properties, and heat treatment techniques for base metal alloys, chrome cobalt, and nickel chrome.

05.09 Identify types of burs used in dentistry and the mechanics of cutting.

05.10 Identify abrasion and polishing dentifrices used in the dental lab and how each affects the dental restoration.

**Course Number: DTE0434**  
**Occupational Completion Point: B**  
**Denture Technician 2 – 315 hours**

06.0 Manufacture various methods of complete denture construction. The student will be able to:

06.01 Make casts by pouring all types of impression material to include dentulous and edentulous impressions.

06.02 Construct base plates by either the light cure or thermoforming vacuum press.

|                                                                                                                            |                                                                                                                                                                   |

**Course Number: DTE0451****Occupational Completion Point: F****Implant, Attachment & Hybrid Restoration Technician – 285 Hours****16.0** Demonstrated knowledge of the Standard Components for Implant Systems. The student will be able to:16.01 List the standard components of an implant system, including:

- Implant/fixture
- Healing Abutment Cover Screw/ Screw
- Abutment
- Temporary Components
- Angulated Abutment
- Impression Coping
- Open tray/closed tray
- Abutment replicas
- Analogue/Implant Replica

**17.0** Demonstrate proper design and fabrication for the Implants System. The student will be able to:17.01 Demonstrate the fabrication of a Custom Tray for an Implant Case.17.02 Demonstrate the fabrication of a Surgical Guide Template.17.03 Demonstrate the pouring of an impression and fabricate a master cast with an abutment replica in place.17.04 Apply soft tissue silicone material around the abutment replica.17.05 Screw/Cement-Retained, castable substructure.17.06 Demonstrate proper substructure design: waxing, spruing, investing, burnout, casting, and metal finishing techniques for Implant Systems.17.07 Demonstrate proper design and fabrication of a porcelain-fused-to-metal crown over an implant abutment.17.08 Demonstrate approved techniques for opaque, body, and incisal porcelain application for Implant Systems.**18.0** Describe the Standard Components and fabrication of semi-precision attachments. The student will be able to:18.01 Explain the uses of attachments and stress breakers.18.02 Define and explain basic attachment groups and impression needed.18.03 Define Attachment Selection.18.04 Demonstrate proper design and fabrication of a Semi-Precision Attachment.

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools, and equipment, as well as experimental, quality, and safety procedures, are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate, and troubleshoot equipment/tools used to make observations. Students understand measurement error and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Laboratory activities are integrated with the didactic portion of this program. Students perform representative tasks in the manufacture of custom-made dental devices and become involved in the dental health team through first-hand observation in clinical procedures as they relate to laboratory techniques.

### Special Notes

Reinforcement of basic skills in English, mathematics, and science appropriate for the job preparatory programs occurs through vocational classroom instruction and applied laboratory procedures or practice.

The program should meet the requirements of the Commission on Dental Accreditation of the American Dental Association. Students should be prepared to take the recognized graduate examination offered by the National Board for Certification in Dental Laboratory Technology, Inc.

Dental Laboratory Technicians will complete the certificate program and be prepared to take the recognized graduate examination offered by the National Board of Certification for Dental Laboratory Technicians.

The standard length of the program is 2040 clock hours.

### Career and Technical Student Organization (CTSO)

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

**Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Language and Reading and Language Arts). These grade level numbers correspond to a grade-equivalent score obtained on a state-designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

**Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology, and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education  
Curriculum Framework

This program is a replacement for Surgical Technology H170211 (0351090905). The program length has changed from 1330 clock hours to 1440 clock hours.

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

The program is designed to prepare students for employment as surgical technologists. Selected portions of this program may be utilized to provide additional skills to enable nursing graduates to become employable in operating rooms as surgical technologists.

The content includes but is not limited to communication and interpersonal skills, legal and ethical responsibilities, anatomy, physiology, pathophysiology, microbiology, aseptic techniques, patient care procedures, surgical technology procedures, patient safety, use and care of equipment and supplies, CPR, Heartsaver, employability skills, and basic computer literacy.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### **Program Structure**

This program is a planned sequence of instruction consisting of 2 occupational completion points.

Upon completion of OCP: A, Sterile Processing Technician, students will be eligible to sit for the Healthcare Sterile Processing certification exam.

The Practicum, which begins in Surgical Technologist 2, is a requirement for the completion of the Surgical Technology program. It is a supervised, unpaid experience totaling 343 hours, with at least 300 in a healthcare facility and up to 40 in a simulated lab. Students apply administrative and clinical skills under the supervision of licensed professionals. Experiences align with classroom instruction, reinforcing theoretical knowledge through hands-on practice. The Practicum assesses critical thinking, work ethics, and professionalism in a real-world healthcare setting.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u><b>OCP</b></u> | <u><b>Course Number</b></u> | <u><b>Course Title</b></u>           | <u><b>Teacher Certification</b></u>                                                      | <u><b>Length</b></u> |

| 12.03                        | <u>Develop a networking plan for a specific industry of interest.</u>                                                  |

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 03.0 Recognize and respond to emergency situations.
- 04.0 Demonstrate sterile processing skills.
- 05.0 Use communication and interpersonal skills related to surgical technology.
- 06.0 Demonstrate an understanding of legal and ethical responsibilities specific to surgical technology.
- 07.0 Demonstrate an understanding of the basic sciences related to surgical technology.
- 08.0 Demonstrate knowledge of pharmacology and math calculation principles related to the surgical environment.
- 09.0 Describe and practice safety measures in the surgical environment.
- 10.0 Assist the RN circulator with patient care procedures related to the surgical environment and describe methods for meeting patients' needs.
- 11.0 Demonstrate knowledge of the skills necessary to function safely and effectively.
- 12.0 Demonstrate knowledge of and assist with surgical procedures.
- 13.0 Demonstrate employability skills.

| 08.08 | <a href="#"><u>Analyze and assemble correctly all medication supplies, for each drug to be used on the sterile field.</u></a>                                                                                   |
| 08.09 | <a href="#"><u>Demonstrate the appropriate methods of transferring and accepting medications onto the sterile field.</u></a>                                                                                    |
| 08.10 | <a href="#"><u>Prepare, manage, and label sterile solutions and medications accurately within the sterile field.</u></a>                                                                                        |
| 08.11 | <a href="#"><u>Correctly calculate common medication conversions and dosages.</u></a>                                                                                                                           |
| 08.12 | <a href="#"><u>Demonstrate preparation and passing of medication mixtures using ratios and proportions correctly.</u></a>                                                                                       |
| 08.13 | <a href="#"><u>Maintains an accurate account of the amount of each medication and/or solution used and notifies the circulator as appropriate to the situation to ensure accurate documentation.</u></a>        |
| 09.0  | <a href="#"><u>Describe and practice safety measures in the surgical environment. The student will be able to:</u></a>                                                                                          |
| 09.01 | <a href="#"><u>Describe the role, job duties, and responsibilities of the surgical technologist in the healthcare setting.</u></a>                                                                              |
| 09.02 | <a href="#"><u>Inspect emergency equipment and supplies for condition and quantity.</u></a>                                                                                                                     |
| 09.03 | <a href="#"><u>Demonstrate appropriate safety measures to prevent operating room fires and electrical shock from equipment.</u></a>                                                                             |
| 09.04 | <a href="#"><u>Describe appropriate safety measures for laser and electrosurgical unit usage in surgery.</u></a>                                                                                                |
| 09.05 | <a href="#"><u>Describe appropriate regulatory and accreditation agency patient safety guidelines.</u></a>                                                                                                      |
| 09.06 | <a href="#"><u>Describe the role of the surgical technologist in a disaster situation.</u></a>                                                                                                                  |
| 09.07 | <a href="#"><u>Describe the role of the surgical technologist in an emergency patient situation.</u></a>                                                                                                        |
| 09.08 | <a href="#"><u>Demonstrate how to prepare the operative site.</u></a>                                                                                                                                           |
| 09.09 | <a href="#"><u>Demonstrate and describe how to perform steps for Foley catheter insertion and connecting to drainage correctly.</u></a>                                                                         |

**Course Number: STS0011**

**Occupational Completion Point: B**

**Surgical Technologist 2 – 343 Hours - PRACTICUM**

|       |                                                                                                                                                                                                                           |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.0  | <u>Assist the RN circulator with patient care procedures related to the surgical environment and describe methods for meeting patients' needs. The student will be able to:</u>                                           |
| 10.01 | <u>Perform patient transfer/transportation techniques used in the operating room.</u>                                                                                                                                     |
| 10.02 | <u>Assist with positioning and apply safety devices to the patient for surgery.</u>                                                                                                                                       |
| 10.03 | <u>Ground the patient and connect the electrosurgical cautery unit.</u>                                                                                                                                                   |
| 10.04 | <u>Describe the roles of an anesthetist and circulating nurse during induction.</u>                                                                                                                                       |
| 10.05 | <u>Prepare the operative site.</u>                                                                                                                                                                                        |
| 10.06 | <u>Perform steps for Foley catheter insertion and connecting to drainage.</u>                                                                                                                                             |
| 10.07 | <u>Apply sterile dressing and bandage.</u>                                                                                                                                                                                |
| 11.0  | <u>Demonstrate knowledge of the skills necessary to function safely and effectively. The student will be able to:</u>                                                                                                     |
| 11.01 | <u>Select and verify instruments, equipment, and supplies, including any implants needed for surgical procedures using surgeon preference/procedure cards, including those identified as "have available/hold items".</u> |
| 11.02 | <u>Measure and pour sterile solutions.</u>                                                                                                                                                                                |
| 11.03 | <u>Perform surgical scrub.</u>                                                                                                                                                                                            |
| 11.04 | <u>Put on sterile gown and gloves.</u>                                                                                                                                                                                    |
| 11.05 | <u>Drape tables and solution stands.</u>                                                                                                                                                                                  |
| 11.06 | <u>Set up sterile mayo stand and instrument table.</u>                                                                                                                                                                    |
| 11.07 | <u>Prepare sutures, ligatures, and ties.</u>                                                                                                                                                                              |
| 11.08 | <u>Prepare, pass, and monitor the amount given for medications used on the sterile field.</u>                                                                                                                             |
| 11.09 | <u>Assist surgeon in gowning and gloving.</u>                                                                                                                                                                             |
| 11.10 | <u>Assist in draping the patient, pass instruments, and monitor the field.</u>                                                                                                                                            |
| 11.11 | <u>Identify/correct and/or report breaks in aseptic technique.</u>                                                                                                                                                        |
| 11.12 | <u>Monitor body fluids, e.g., blood loss, and fluid retention.</u>                                                                                                                                                        |

|                                                                                                                                                   |                                                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.13                                                                                                                                             | <u>Perform complete counts with R.N.</u>                                                                                                                   |
| 11.14                                                                                                                                             | <u>Assist in maintaining retraction, cutting suture, and holding instruments as directed by the surgeon in the second assistant role.</u>                  |
| 11.15                                                                                                                                             | <u>Prepare specimen for laboratory analysis.</u>                                                                                                           |
| 11.16                                                                                                                                             | <u>Decontaminate instruments, equipment, and environment.</u>                                                                                              |
| 11.17                                                                                                                                             | <u>Replenish supplies and equipment.</u>                                                                                                                   |

The student will be able to:</u>                                                          |
| 12.01                                                                                                                                             | <u>Identify preoperative diagnosis, common complications, and operative pathology relating to specific surgical procedures.</u>                            |
| 12.02                                                                                                                                             | <u>Identify and describe types of incisions and wound closures.</u>                                                                                        |
| 12.03                                                                                                                                             | <u>Perform the usual sequence of a common surgical procedure (i.e., incision into the anatomy, dissection of the anatomy, and closing of the anatomy).</u> |
| 12.04                                                                                                                                             | <u>Demonstrates proper cost-effective methods.</u>                                                                                                         |
| 13.0                                                                                                                                              | <u>Demonstrate employability skills. The student will be able to:</u>                                                                                      |
| 13.01                                                                                                                                             | <u>Identify documents that may be required when applying for a job.</u>                                                                                    |
| 13.02                                                                                                                                             | <u>Write an appropriate resume.</u>                                                                                                                        |
| 13.03                                                                                                                                             | <u>Conduct a job search.</u>                                                                                                                               |
| 13.04                                                                                                                                             | <u>Complete a job application form correctly.</u>                                                                                                          |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools, and equipment, as well as experimental, quality, and safety procedures, are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate, and troubleshoot equipment/tools used to make observations. Students understand measurement error and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical learning experiences in an operating room and related areas are an integral part of this program. It is strongly recommended that a teacher to student ratio of 1:10 be held in the laboratory setting.

### Special Notes

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry: planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence, and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore, the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate, or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Although it is not required, it is strongly recommended that the program should meet the requirements of the Commission on Accreditation of Allied Health Education Programs (CAAHEP) or Accrediting Bureau of Health Education Schools (ABHES).

After successful completion of a Commission on Accreditation of Allied Health Education Programs (CAAHEP) or Accrediting Bureau of Health Education Schools (ABHES) accredited program, students are eligible to take the National Board of Surgical Technologist and Surgical Assisting (NBSTSA), Certified Surgical Technologist exam and the National Center of Competency Testing (NCCT) exam.

**Please contact NBSTSA for more information on this exam:** National Board of Surgical Technologists and Surgical Assisting (NBSTSA) <http://nbstsa.org/>, 6 West Dry Creek Circle, Suite 100, Littleton, Colorado 80120, Toll-free: (800) 707-0057.

Please contact **NCCT** for more information on this exam: National Center of Competency Testing (NCCT) <https://www.ncctinc.com/>, 11020 King Street, Suite 400, Overland Park, KS 66210, Toll-free: (800) 875-4404.

### **Career and Technical Student Organization (CTSO)**

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOSs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state-designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology, and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster. This program is designed to prepare students for employment as medical assistants.

The content includes but is not limited to communication, transcultural communication in healthcare, interpersonal skills, legal and ethical responsibilities, health-illness concepts, administrative and clinical duties, emergency procedures including CPR and first aid, emergency preparedness, safety and security procedures, medical terminology, anatomy and physiology, and employability skills.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

## Program Structure

This program is a planned sequence of instruction consisting of 6 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S.

To teach the course(s) listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u>OCP</u> | <u>Course Number</u> | <u>Course Title</u>                                       | <u>Teacher Certification</u>                                  | <u>Length</u>    |

| 11.02                        | <u>Write a cover letter.</u>                                                                                           |
| 11.03                        | <u>Curate a professional portfolio that includes work products.</u>                                                    |
| 11.04                        | <u>Prepare for and experience a mock job interview.</u>                                                                |
| 12.0                         | <u>Cultivate and leverage relationships to professionally advance.</u>                                                 |
| 12.01                        | <u>Request a signed reference letter, letter of recommendation and/or an online skill/professionalism endorsement.</u> |
| 12.02                        | <u>Develop a plan to cultivate a professional digital footprint.</u>                                                   |
| 12.03                        | <u>Develop a networking plan for a specific industry of interest.</u>                                                  |

## Standards

After successfully completing this program, the student will have demonstrated mastery the following student learning outcomes:

- 01.0 Demonstrate proper use of medical terminology and identify anatomy and physiology concepts in both illness and wellness states.
- 02.0 Demonstrate knowledge of pharmaceutical principles and administer medications.
- 03.0 Demonstrate basic clerical/medical office duties, including communication and interpersonal skills.
- 04.0 Demonstrate knowledge of legal and ethical responsibilities for medical assistants.
- 05.0 Perform administrative office duties and employability skills.
- 06.0 Demonstrate accepted professional, communication, and interpersonal skills as related to phlebotomy.
- 07.0 Discuss phlebotomy in relation to the health care setting.
- 08.0 Identify the anatomic structure and function of body systems in relation to services performed by a phlebotomist.
- 09.0 Recognize and identify collection reagents supplies, equipment, and interfering chemical substances.
- 10.0 Demonstrate skills and knowledge necessary to perform phlebotomy.
- 11.0 Practice infection control following standard precautions.
- 12.0 Practice accepted procedures of transporting, accessioning, and processing specimens.
- 13.0 Practice quality assurance and safety.
- 14.0 Describe the cardiovascular system.
- 15.0 Identify legal and ethical responsibilities of an EKG aide.
- 16.0 Demonstrate knowledge of, apply, and use medical instrumentation modalities.
- 17.0 Perform patient care techniques in the health care facility.
- 18.0 Demonstrate basic office examination procedures.
- 19.0 Demonstrate knowledge of the fundamentals of microbial control and use aseptic techniques.
- 20.0 Demonstrate minor treatments.
- 21.0 Demonstrate knowledge of basic diagnostic medical assisting procedures.
- 22.0 Perform CLIA-waived diagnostic clinical laboratory procedures.
- 23.0 Demonstrate knowledge of emergency preparedness and protective practices.
- 24.0 Perform administrative and general skills.
- 25.0 Dispose of bio-hazardous waste in appropriate containers.
- 26.0 Collaborate, communicate, and interact professionally with other health care professionals utilizing technology.

Student Performance Standards

Program Title:        Medical Assisting  
Career Certificate Program Number:    H700300

**Course Number: MEA0003**

**Occupational Completion Point: A (1 of 2)**

**Introduction to Medical Assisting and Pharmacology – 250 Hours**

|       |                                                                                                                                                                                                                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01.0  | <u>Demonstrate proper use of medical terminology and identify anatomy and physiology concepts in both illness and wellness states. The student will be able to:</u>                                                                                                                                        |
| 01.01 | <u>Demonstrate accurate use and identification of medical terminology, including word parts.</u>                                                                                                                                                                                                           |
| 01.02 | <u>Identify body organization, the 11 major organ systems of the body (1) Integumentary, (2) Skeletal, (3) Muscular, (4) Nervous, (5) Endocrine, (6) Circulatory (cardiovascular) (7) Lymphatic, (8) Respiratory, (9) Digestive, (10) Urinary, and (11) Reproductive Systems and related pathology.</u>    |
| 01.03 | <u>Compare the structure and function of the body across the lifespan.</u>                                                                                                                                                                                                                                 |
| 01.04 | <u>Identify psychological reactions to illness, including defense mechanisms.</u>                                                                                                                                                                                                                          |
| 02.0  | <u>Demonstrate knowledge of pharmaceutical principles and administer medications. The student will be able to</u>                                                                                                                                                                                          |
| 02.01 | <u>Identify commonly administered drugs, their uses, and effects, and the five schedules of controlled substances</u>                                                                                                                                                                                      |
| 02.02 | <u>Identify the major classifications of medication for each body system, including indications for use, side effects, and adverse reactions.</u>                                                                                                                                                          |
| 02.03 | <u>Use correct approved pharmaceutical abbreviations and terminology in accordance with the Joint Commission.</u>                                                                                                                                                                                          |
| 02.04 | <u>Identify various methods and routes of drug administration.</u>                                                                                                                                                                                                                                         |
| 02.05 | <u>Instruct patients regarding self-administration of medications.</u>                                                                                                                                                                                                                                     |
| 02.06 | <u>Calculate and confirm dosage and administer pharmaceuticals by applying the Rights of Drug Administration.</u>                                                                                                                                                                                          |
| 02.07 | <u>Demonstrate knowledge of emergency medications for first aid.</u>                                                                                                                                                                                                                                       |
| 02.08 | <u>Recognize and report medication errors.</u>                                                                                                                                                                                                                                                             |
| 02.09 | <u>Demonstrate appropriate techniques to:</u> <ul style="list-style-type: none"> <li>• <u>Prepare and administer non-parenteral medications (solid, liquids, and inhalers).</u></li> <li>• <u>Prepare and administer parenteral medications.</u></li> <li>• <u>Reconstitute powdered drugs.</u></li> </ul> |

- Prepare injections from ampules and vials.

02.10 Identify the risks and complications associated with drug administration.

**Course Number: MEA0502**

**Occupational Completion Point: A (2 of 2)**

**Introduction to Medical Office Procedures –100 Hour**

03.0 Demonstrate basic clerical/medical office duties, including communication and interpersonal skills. The student will be able to

03.01 Perform effective communication skills essential to the medical office, including courtesy and respect for patients and other healthcare workers.

03.02 Maintain good interpersonal relationships, including cultural orientation, diverse ages, and cultural, economic, and religious groups.

03.03 Prepare and maintain medical records electronically as it pertains to EMR/EHR

03.04 Schedule routine appointments, patient admissions, and/or procedures within the electronic health record (EMR/EHR).

03.05 Maintain office inventory.

03.06 Receive patients and visitors and inform patients of office policies both verbally and in writing.

03.07 Identify and maintain office policies and office security policies/procedures in accordance with HIPAA.

04.0 Demonstrate knowledge of legal and ethical responsibilities for medical assistants. The student will be able to:

04.01 Describe the role of the medical assistant, including legislated Scope of Practice as set forth in Florida Statutes.

04.02 Recognize the importance of certification of the medical assistant as it relates to entering orders in EMR/EH.

04.03 Explain the difference between the liability of the providers and staff members in the medical office.

04.04 Explain the principles for preventing medical liability to include malpractice, liabilities, negligence, abandonment, false imprisonment, and fraud.

04.05 Discuss legal and ethical issues as they relate to healthcare to include the code of ethics consistent with healthcare.

04.06 Summarize the Patient Care Partnership.

05.0 Perform administrative office duties and employability skills. The student will be able to:

05.01 Execute data management using Electronic Medical Record (EMR), including, but not limited to, patient registration, appointment scheduling, charting, billing and insurance processing, procedure and diagnostic coding, ordering, monitoring patient testing, medication and prescription orders, keyboarding, and correspondence

|                                                                                                                                 |                                                                                                                                                                                                       |

| 23.02                                                                                                                                                                                                                                                                                                                                                                                                                            | <u>Perform spirometry.</u>                                                                                                                                                                                               |
| <b>Course Number: MEA0943</b><br><b>Occupational Completion Point: E</b><br><b>Practicum Experience – 190 Hours</b><br><u>This "Practicum" experience is a supervised, unpaid activity of a total of 200 hours, of which 160 contact hours must be in an ambulatory health care setting and no more than 40 hours in a simulated laboratory setting performing administrative and clinical procedures, and must be completed</u> |                                                                                                                                                                                                                          |

prior to graduation. Students ready for the Practicum experience have completed all other program requirements and are eligible for this final phase in the program.

The program should ensure that the experience and instruction of students are meaningful and parallel in content and concept with the material presented in lecture and laboratory sessions. Sites should be selected so that each student is afforded a variety of experiences, while at the same time, all students are provided consistent learning opportunities. This experience provides an opportunity for students to utilize both administrative and clinical skills learned in the Medical Assistant classroom and clinical environment in a local clinic, provider's office, or other health care facility.

The students' practicum should be performed in a professional environment under conditions of strict supervision and guidance of a licensed provider and clinical coordinator. An individual who has knowledge of the medical assisting profession must provide on-site supervision of the student. When performed in the stimulated laboratory, all activities must be under the supervision of the medical assisting program/practicum coordinator or faculty. The content for any simulated laboratory activity will be at the discretion of each learning institution to best meet the needs of its students.

The actual hands-on experiences will tie in all the educational components based on theory and competency-based instruction that the student learned in the laboratory and classroom settings. This course is set to assess the student in their ability to utilize all critical thinking applications learned during the program and to apply these critical thinking skills during the Practicum experience. The healthcare facility and the learning college/institute will expect the student to utilize good work ethics, show excellent civic responsibilities, and further learn to both embrace and respect cultural diversity.

#### 24.0 Perform administrative and general skills. The student will be able to:

24.01 Recognize and respond to verbal communication.

24.02 Maintain confidentiality and adhere to HIPAA regulations.

24.03 Understand how to document manually and electronically appropriately.

24.04 Understand how to schedule appointments manually and electronically accurately.

24.05 Understand how to schedule inpatient and/or outpatient procedures accurately.

24.06 Greet patients courteously and professionally.

24.07 Demonstrate safety and quality assurance in the workplace.

24.08 Perform clinical and general skills.

24.09 Demonstrate aseptic hand washing technique.

#### 25.0 Dispose of biohazardous waste in appropriate containers. The student will be able to

|       |                                                                                                                                                     |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| 25.01 | <u>Adhere to sterilization techniques according to standards</u>                                                                                    |
| 25.02 | <u>Practice standard precautions.</u>                                                                                                               |
| 25.03 | <u>Stage patients and obtain vital signs</u>                                                                                                        |
| 25.04 | <u>Obtain patient histories.</u>                                                                                                                    |
| 25.05 | <u>Prepare and maintain examination and treatment area(s).</u>                                                                                      |
| 25.06 | <u>Prepare patient for examinations and/or minor office procedures</u>                                                                              |
| 25.07 | <u>Assist with examinations and/or minor office procedures.</u>                                                                                     |
| 25.08 | <u>Provide and document patient education</u>                                                                                                       |
| 25.09 | <u>Display professional work habits integral to medical assisting.</u>                                                                              |
| 25.10 | <u>Communicate appropriately in healthcare settings by listening, writing, speaking, and presenting with a professional demeanor.</u>               |
| 26.0  | <u>Collaborate, communicate, and interact professionally with other health care professionals utilizing technology. The student will be able to</u> |
| 26.01 | <u>Contribute to team efforts by fulfilling responsibilities and valuing diversity.</u>                                                             |
| 26.02 | <u>Exercise proper judgment and critical thinking skills in decision making</u>                                                                     |
| 26.03 | <u>Adapt to changing organizational environments with flexibility.</u>                                                                              |
| 26.04 | <u>Report as expected, on time, appropriately dressed and groomed, and ready to work.</u>                                                           |
| 26.05 | <u>Model acceptable work habits as defined by company policy</u>                                                                                    |
| 26.06 | <u>Complete and follow through on tasks using time management skills and take initiative as warranted</u>                                           |
| 26.07 | <u>Respond appropriately and quickly to patients' needs and concerns</u>                                                                            |
| 26.08 | <u>Practice etiquette and social sensitivity in face-to-face interaction, on the telephone, and online.</u>                                         |
| 26.09 | <u>Actively adhere to policies and procedures that protect the patient's confidentiality and privacy</u>                                            |
| 26.10 | <u>Understand resources related to patients' healthcare needs</u>                                                                                   |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

Although it is not required, it is strongly recommended that the programs meet the Standards and Guidelines of an Accredited Educational Program for the Medical Assistant adopted by the American Association of Medical Assistants and the Commission on Accreditation of Allied Health Education Programs (CAAHEP) or the American Medical Technologist and the Accrediting Bureau of Health Education Schools (ABHES). For further information, contact:

Commission on Accreditation of Allied Health Education Programs (CAAHEP) [www.caahep.org/](http://www.caahep.org/)  
1361 Park Street, Clearwater, FL 33756, Phone: 727-210-2350/ Fax: 727-210-2354

Accrediting Bureau of Health Education Schools (ABHES) [www.abhes.org/](http://www.abhes.org/)  
777 Leesburg Pike, Suite 312, North Falls, VA 22043, (703) 917-9503

This program will also be in accordance with Florida Statute, Medical Assistants, 458.3485, F.S.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence, and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore, the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate, or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Program completers of a CAAHEP or ABHES-accredited program are eligible to take the American Association of Medical Assistants' Certification Examination (CMA) or the American Medical Technologists' Certification Examination (RMA). For further information, contact:

American Association of Medical Assistants (AAMA) [www.aama-ntl.org/](http://www.aama-ntl.org/)  
20 North Wacker Drive, Suite 1575, Chicago, Illinois 60606 (312-899-1500)

Or

American Medical Technologist (AMT) <https://americanmedtech.org/>  
10700 West Higgins Road, Suite 150, Rosemont, Illinois 60018 (800-275-1268)

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the **National Health Care Foundation Skill Standards Assessment** with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in s. 1004.02, F.S., may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040, F.A.C.). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in s. 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster. This program is designed to prepare students for employment as nursing assistants.

The content includes but is not limited to interpersonal skills, medical terminology, legal and ethical responsibilities, safe and efficient work, gerontology, nutrition, pet-facilitated therapy, health and safety including Cardio-pulmonary Resuscitation (CPR) – heart saver level, and employability skills.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

## Program Structure

This program is a planned sequence of instruction consisting of 1 occupational completion point.

This program is comprised of a course that has been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u>OCP</u> | <u>Course Number</u> | <u>Course Title</u>      | <u>Teacher Certification</u>                                                                                | <u>Length</u>    |
|------------|----------------------|--------------------------|-------------------------------------------------------------------------------------------------------------|------------------|

*\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator, who must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.*

## Regulated Programs

Successful completion of this program from an approved school prepares the student for certification for employment as a Nursing Assistant, in accordance with Chapter 464.203, Florida Statutes (F.S.). To be approved, this program must be supervised by a registered nurse and follow the faculty qualifications set forth in 64B9-15.005(3)(a), F.A.C.

New programs must be approved by the Board of Nursing, Department of Health prior to enrolling students.

Those students who satisfactorily complete an approved course are eligible to apply to take the national nursing assistant examination being utilized in Florida, in accordance with Chapter 464.203, F.S. This program includes both Acute and Long Term Care.

In accordance with 64B9-15.005, F.A.C., students will perform nursing skills in the clinical and simulated laboratory settings under the supervision of a qualified instructor. The recommended teacher/student ratio in the clinical area is 1 to 12, but the maximum is 1 to 15.

In accordance with 64B9-15.006(2), F.A.C., The standardized curriculum shall require a minimum of 80 hours of classroom and 40 hours of clinical instruction. The clinical instruction shall include at least 20 hours of long-term care clinical instruction in a licensed nursing home.

In accordance with 64B9-15.006(3), F.A.C., Prior to any direct contact with a resident, a training program shall require that a student receive a minimum of 16 hours of classroom instruction in communication and interpersonal skills; infection control; safety/emergency procedures, including the Heimlich maneuver; promoting residents' independence; and respecting residents' rights.

According to Section 400.211, F.S., persons who are enrolled in, or have completed, a state-approved nursing assistant training program may be employed by a licensed nursing facility for a period of four months. However, the certification requirements must be met within four months of such initial employment.

| 01.03 | <u>Describe the composition and functions of a healthcare team.</u>                                                                                 |
| 01.04 | <u>Identify the general roles and responsibilities of the individual members of the healthcare team.</u>                                            |
| 01.05 | <u>Identify characteristics of effective teams.</u>                                                                                                 |
| 01.06 | <u>Recognize methods for building positive team relationships.</u>                                                                                  |
| 01.07 | <u>Discuss attributes and attitudes of an effective leader.</u>                                                                                     |
| 01.08 | <u>Recognize factors and situations that may lead to conflict.</u>                                                                                  |
| 01.09 | <u>Recognize effective techniques for managing team conflict.</u>                                                                                   |
| 02.0  | <u>Use verbal, written, and/or electronic communications specific to the nurse assistant. The student will be able to:</u>                          |
| 02.01 | <u>Develop basic speaking and active listening skills.</u>                                                                                          |
| 02.02 | <u>Identify successful and unsuccessful communication characteristics, including communication styles and barriers.</u>                             |
| 02.03 | <u>Identify characteristics of verbal and non-verbal cues.</u>                                                                                      |
| 02.04 | <u>Describe the purpose of the chain of communication to resolve conflict.</u>                                                                      |
| 02.05 | <u>Use appropriate medical terminology and abbreviations.</u>                                                                                       |
| 02.06 | <u>Obtain specified data from the patient and family.</u>                                                                                           |

|       |                                                                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02.07 | <u>Utilize verbal and written information to assist with the patient's plan of care.</u>                                                                                                    |
| 02.08 | <u>Distinguish between and report subjective and objective information.</u>                                                                                                                 |
| 02.09 | <u>Discuss the importance of patient/client education regarding healthcare.</u>                                                                                                             |
| 02.10 | <u>Adapt communication skills to varied levels of understanding and cultural orientation, including, but not limited to, diverse age, cultural, economic, ethnic, and religious groups.</u> |
| 02.11 | <u>Demonstrate the use of the communication systems, including electronic health record systems.</u>                                                                                        |
| 03.0  | <u>Demonstrate legal and ethical responsibilities specific to the nurse assistant. The student will be able to:</u>                                                                         |
| 03.01 | <u>Discuss and demonstrate legal and ethical behavior within the nursing assistant's scope of practice, including, but not limited to, role limitations in Florida.</u>                     |
| 03.02 | <u>Describe a code of ethics consistent with the nursing assistant occupation.</u>                                                                                                          |
| 03.03 | <u>Explain the laws governing harassment, labor, and employment.</u>                                                                                                                        |
| 03.04 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.05 | <u>Demonstrate safe standards of patient care, including prevention and quality of care.</u>                                                                                                |
| 03.06 | <u>Exhibit behavior supporting and promoting patients' and/or residents' rights.</u>                                                                                                        |
| 03.07 | <u>Describe advance directives.</u>                                                                                                                                                         |
| 03.08 | <u>Explain the procedures for accurate documentation and record keeping.</u>                                                                                                                |
| 03.09 | <u>Recognize the potential for and prevention of medical errors and practice the proper procedures to follow regarding medical errors.</u>                                                  |
| 03.10 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.11 | <u>Recognize and report signs of substance abuse.</u>                                                                                                                                       |
| 03.12 | <u>Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.</u>                                                                                    |
| 03.13 | <u>Recognize and report illegal and/or unethical practices of healthcare workers.</u>                                                                                                       |
| 03.14 | <u>Recognize and report abuse, including domestic violence, neglect, and suspected human trafficking.</u>                                                                                   |
| 03.15 | <u>Recognize that a CNA must self-report any crimes they've been involved in within 30 days of the offense in accordance with Florida Statutes.</u>                                         |
| 03.16 | <u>Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud.</u>                                                               |
| 03.17 | <u>Define Omnibus Budget Reconciliation Act (OBRA).</u>                                                                                                                                     |

|       |                                                                                                                                                                                                  |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.18 | <u>Define Minimum Data Set (MDS).</u>                                                                                                                                                            |
| 03.19 | <u>Identify and explain the standards of the Health Insurance Portability and Accountability Act (HIPAA).</u>                                                                                    |
| 04.0  | <u>Apply basic math and science skills specific to the nurse assistant. The student will be able to:</u>                                                                                         |
| 04.01 | <u>Demonstrate knowledge of Celsius and Fahrenheit temperature and the conversion of each.</u>                                                                                                   |
| 04.02 | <u>Calculate ratios.</u>                                                                                                                                                                         |
| 04.03 | <u>Make, use, and convert data using traditional and metric units.</u>                                                                                                                           |
| 04.04 | <u>Make estimations and approximations; then judge the reasonableness of the results and demonstrate the ability to evaluate and draw conclusions.</u>                                           |
| 04.05 | <u>Convert from regular time to 24-hour time.</u>                                                                                                                                                |
| 04.06 | <u>Organize and communicate results obtained by observation.</u>                                                                                                                                 |
| 05.0  | <u>Describe the anatomy and physiology of the human body. The student will be able to:</u>                                                                                                       |
| 05.01 | <u>Describe the basic structure and function of the human body.</u>                                                                                                                              |
| 05.02 | <u>Describe the relationships of body systems in providing patient care.</u>                                                                                                                     |
| 05.03 | <u>Recognize abnormal signs and symptoms of common diseases and conditions.</u>                                                                                                                  |
| 06.0  | <u>Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:</u>                                                                                     |
| 06.01 | <u>Describe strategies for the prevention of diseases, including health screenings and examinations.</u>                                                                                         |
| 06.02 | <u>Identify personal health practices and environmental factors that affect the optimal function of each of the major body systems.</u>                                                          |
| 06.03 | <u>Identify psychological reactions to illnesses, including defense mechanisms.</u>                                                                                                              |
| 06.04 | <u>Identify complementary and alternative health practices.</u>                                                                                                                                  |
| 06.05 | <u>Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high-risk behaviors.</u> |
| 06.06 | <u>Explain the basic concepts of positive self-image, wellness, and stress.</u>                                                                                                                  |
| 06.07 | <u>Develop a wellness and stress control plan that can be used in personal and professional life.</u>                                                                                            |
| 07.0  | <u>Perform physical comfort and safety functions specific to the nurse assistant. The student will be able to:</u>                                                                               |

|       |                                                                                                                                                                                                                                                                            |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.01 | <a href="#"><u>Implement appropriate regulatory and accrediting agency patient safety guidelines, including but not limited to the Joint Commission.</u></a>                                                                                                               |

| 08.06 | <u>Provide care for patients with infectious diseases while applying the principles of standard and transmission-based precautions.</u>                                                      |
| 08.07 | <u>Apply the proper use of personal protective equipment (PPE) for all types of isolation, including donning and removing PPE appropriately.</u>                                             |
| 08.08 | <u>Describe how to correctly dispose of biohazardous materials according to appropriate government guidelines, such as OSHA.</u>                                                             |
| 08.09 | <u>Follow isolation procedure with food trays, PPE, and other supplies/equipment.</u>                                                                                                        |
| 08.10 | <u>Collect a specimen from a patient in isolation.</u>                                                                                                                                       |
| 09.0  | <u>Demonstrate knowledge of blood-borne diseases. The student will be able to:</u>                                                                                                           |
| 09.01 | <u>Describe blood-borne diseases.</u>                                                                                                                                                        |
| 09.02 | <u>Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood-borne pathogens.</u>                                                                |
| 09.03 | <u>Identify community resources and services available to individuals with diseases caused by blood-borne pathogens.</u>                                                                     |
| 09.04 | <u>Identify “at-risk” behaviors which promote the spread of diseases caused by blood-borne pathogens and the public education necessary to combat the spread of these diseases.</u>          |
| 09.05 | <u>Explain the legal aspects of HIV/AIDS, including testing.</u>                                                                                                                             |
| 10.0  | <u>Recognize and respond to emergency situations. The student will be able:</u>                                                                                                              |
| 10.01 | <u>Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.</u>                                                             |
| 10.02 | <u>Recognize fire, safety, disaster, and evacuation procedures.</u>                                                                                                                          |
| 10.03 | <u>Obtain and maintain training for certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.</u> |
| 10.04 | <u>Recognize adverse drug-related emergencies and take appropriate first aid action.</u>                                                                                                     |
| 11.0  | <u>Perform supervised organizational functions following the patient care plan. The student will be able to:</u>                                                                             |
| 11.01 | <u>Organize and prioritize patient-care assignments.</u>                                                                                                                                     |
| 11.02 | <u>Complete assignments accurately and promptly.</u>                                                                                                                                         |
| 12.0  | <u>Provide biological, psychological, and social support. The student will be able to:</u>                                                                                                   |
| 12.01 | <u>Discuss family roles and their significance to health.</u>                                                                                                                                |
| 12.02 | <u>Respond to patient and family emotional needs.</u>                                                                                                                                        |

|       |                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------|
| 13.0  | <u>Provide personal patient care. The student will be able to:</u>                                                 |
| 13.01 | <u>Perform bed bath; observe and report changes in a patient, including skin and level of consciousness.</u>       |
| 13.02 | <u>Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged baths.</u> |
| 13.03 | <u>Administer back rub with bath and as needed.</u>                                                                |
| 13.04 | <u>Assist patient with hair care utilizing sink, tub, shower, bed, or shower cap.</u>                              |
| 13.05 | <u>Demonstrate the use of a safety and/or electric razor to shave the patient.</u>                                 |
| 13.06 | <u>Demonstrate how to groom the patient, including hair, skin, foot, hand, and nail care.</u>                      |
| 13.07 | <u>Assist with and/or administer oral hygiene, including denture care.</u>                                         |
| 13.08 | <u>Assist the patient to dress.</u>                                                                                |
| 13.09 | <u>Assist patient with toileting using various types of restorative and rehabilitative equipment.</u>              |
| 13.10 | <u>Assist patient with use of bedpan (standard and fracture).</u>                                                  |
| 13.11 | <u>Assist with bowel and bladder training.</u>                                                                     |
| 13.12 | <u>Assist and/or provide perineal care.</u>                                                                        |
| 13.13 | <u>Empty, measure, and record urinary output and/or drainage.</u>                                                  |
| 13.14 | <u>Demonstrate the application and use of a leg bag, leg strap, and dignity bag.</u>                               |
| 13.15 | <u>Monitor and assist with the drainage of urostomy bags and colostomy bags.</u>                                   |
| 13.16 | <u>Assist patient with both donning and doffing prostheses and braces.</u>                                         |
| 13.17 | <u>Assist patient with meals.</u>                                                                                  |
| 13.18 | <u>Describe the relationships of body systems when providing patient care.</u>                                     |
| 14.0  | <u>Perform patient care procedures. The student will be able to:</u>                                               |
| 14.01 | <u>Demonstrate ability to accurately measure, record, and report vital signs.</u>                                  |
| 14.02 | <u>Demonstrate ability to recognize and report vital signs outside of normal parameters.</u>                       |
| 14.03 | <u>Assist with the admission, transfer, and discharge of a patient and/or resident.</u>                            |

|       |                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------|
| 14.04 | <a href="#">Maintain patient belongings list</a>                                                                               |
| 14.05 | <a href="#">Make an unoccupied and occupied bed.</a>                                                                           |
| 14.06 | <a href="#">Provide range-of-motion exercises, including, but not limited to, passive, active, and active-assisted.</a>        |
| 14.07 | <a href="#">Apply anti-embolic hose and sequential compression devices.</a>                                                    |
| 14.08 | <a href="#">Understand and demonstrate proper collection of routine, timed urine, and clean-catch urine specimens.</a>         |
| 14.09 | <a href="#">Record fluid intake and output (I&amp;O).</a>                                                                      |
| 14.10 | <a href="#">Observe, record, and report the patient's emesis.</a>                                                              |
| 14.11 | <a href="#">Monitor and provide urinary catheter care and drainage systems.</a>                                                |
| 14.12 | <a href="#">Assist with ostomy care, including emptying or changing ostomy bags that do not adhere to the skin.</a>            |
| 14.13 | <a href="#">Collect stool specimen.</a>                                                                                        |
| 14.14 | <a href="#">Assist with the collection of a sputum specimen.</a>                                                               |
| 14.15 | <a href="#">Assist the patient in applying binders.</a>                                                                        |
| 14.16 | <a href="#">Care for the patient in skin and skeletal traction.</a>                                                            |
| 14.17 | <a href="#">Assist with pre-operative and post-operative patient care.</a>                                                     |
| 14.18 | <a href="#">Reinforce dressings under the supervision of the RN/LPN.</a>                                                       |
| 14.19 | <a href="#">Obtain and record an apical pulse.</a>                                                                             |
| 14.20 | <a href="#">Provide cast care and/or pin care.</a>                                                                             |
| 14.21 | <a href="#">Provide care for visual devices, including but not limited to eyeglasses, artificial eyes, and contact lenses.</a> |
| 14.22 | <a href="#">Provide care for hearing devices.</a>                                                                              |
| 15.0  | <a href="#">Apply principles of nutrition. The student will be able to:</a>                                                    |
| 15.01 | <a href="#">Identify nutrients and food groups.</a>                                                                            |
| 15.02 | <a href="#">Identify and develop basic food plans.</a>                                                                         |
| 15.03 | <a href="#">Check the patient's diet tray for accuracy.</a>                                                                    |

|       |                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 15.04 | <u>Monitor and document nutritional intake.</u>                                                                                              |
| 15.05 | <u>Identify and implement regional, cultural, and religious food guidelines and preferences.</u>                                             |
| 15.06 | <u>Demonstrate knowledge of the need for thickened liquids and fluid consistency.</u>                                                        |
| 15.07 | <u>Identify methods of maintaining fluid balance, including encouraging and restricting fluids.</u>                                          |
| 15.08 | <u>Explore and utilize the U.S. Department of Agriculture's nutrition resources.</u>                                                         |
| 16.0  | <u>Provide care for geriatric patients. The student will be able to:</u>                                                                     |
| 16.01 | <u>Identify and assist with methods and procedures to maintain skin integrity, including but not limited to, preventing pressure ulcers.</u> |
| 16.02 | <u>Identify and assist with methods to prevent falls in the elderly.</u>                                                                     |
| 16.03 | <u>Identify and assist with safety principles as related to the elderly.</u>                                                                 |
| 16.04 | <u>Describe general characteristics, particular needs, and age-related changes of the elderly.</u>                                           |
| 16.05 | <u>Identify attitudes and living habits that promote positive mental and physical health for the elderly.</u>                                |
| 16.06 | <u>Distinguish between fact and fallacy about the aging process.</u>                                                                         |
| 16.07 | <u>Apply reality orientation techniques and validation therapy unless it is contraindicated by the patient's diagnosis.</u>                  |
| 16.08 | <u>Recognize and respond appropriately to symptoms of common diseases, including dementia, depression, suicide, and Alzheimer's.</u>         |
| 16.09 | <u>Provide and involve patients in diversional activities.</u>                                                                               |
| 16.10 | <u>Identify common alterations in elderly patient behavior.</u>                                                                              |
| 16.11 | <u>Provide care for patients with special needs, including but not limited to physical and cognitive impairments.</u>                        |
| 16.12 | <u>Demonstrate awareness of common behaviors in drug use and abuse in the elderly.</u>                                                       |
| 16.13 | <u>Report concerns to the nurse and appropriate authorities related to drug use and abuse in the elderly patient.</u>                        |
| 16.14 | <u>Identify the need for community resources and services available to the elderly and their caregiver.</u>                                  |
| 16.15 | <u>Identify components of the grief process.</u>                                                                                             |
| 16.16 | <u>Demonstrate an understanding of end-of-life care, hospice, and palliative care.</u>                                                       |
| 17.0  | <u>Assist with restorative (rehabilitative) activities. The student will be able to:</u>                                                     |

|       |                                                                                                                                                                                                                       |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.01 | <u>List the purposes of a restorative (rehabilitation) program.</u>                                                                                                                                                   |
| 17.02 | <u>Assist patient with specified restorative (rehabilitation) needs.</u>                                                                                                                                              |
| 17.03 | <u>Assist patients to reach the optimum level of independence.</u>                                                                                                                                                    |
| 18.0  | <u>Demonstrate an understanding of information technology applications in healthcare. The student will be able to:</u>                                                                                                |
| 18.01 | <u>Define terms and demonstrate basic computer skills.</u>                                                                                                                                                            |
| 18.02 | <u>Recognize and/or describe technology applications in healthcare that are specific to the nursing assistant occupation.</u>                                                                                         |
| 18.03 | <u>Recognize new and emerging technology in healthcare.</u>                                                                                                                                                           |
| 19.0  | <u>Demonstrate employability skills. The student will be able to:</u>                                                                                                                                                 |
| 19.01 | <u>Identify personal traits or attitudes desirable in a nursing assistant.</u>                                                                                                                                        |
| 19.02 | <u>Exemplify basic professional standards of a nursing assistant as they apply to hygiene, dress, language, confidentiality, and behavior, including but not limited to-phone, email, and social media etiquette.</u> |
| 19.03 | <u>Identify documents that may be required when applying for a job.</u>                                                                                                                                               |
| 19.04 | <u>Write an appropriate resume.</u>                                                                                                                                                                                   |
| 19.05 | <u>Conduct a job search.</u>                                                                                                                                                                                          |
| 19.06 | <u>Complete a job application form correctly.</u>                                                                                                                                                                     |
| 19.07 | <u>Examine levels of education and credentialing requirements, including licensure and certification, employment opportunities, workplace environments, and career growth potential.</u>                              |
| 19.08 | <u>Identify acceptable work habits.</u>                                                                                                                                                                               |
| 19.09 | <u>Recognize appropriate, effective, and professional behavior.</u>                                                                                                                                                   |
| 19.10 | <u>Compare careers within the health science career pathways.</u>                                                                                                                                                     |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools, and equipment, as well as experimental, quality, and safety procedures, are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate, and troubleshoot equipment/tools used to make observations. Students understand measurement error and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

The program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry: planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate, or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The length of this program is 165 hours. Completion of this program should enable the postsecondary student to be given advanced standing in the Patient Care Technician and Patient Care Assistant programs.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### Career and Technical Student Organization (CTSO)

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

## Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology, and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education  
Curriculum Framework

This program is a replacement for Patient Care Assistant H170692 (0351390202). Starting with 2026-27, the program length has changed from 290 clock hours to 235 clock hours.

**Program Title:** Patient Care Assistant  
**Program Type:** Career Preparatory  
**Career Cluster:** Health Science

Career Certificate Program

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster.

This program is designed to prepare students for employment as cross-trained nursing assistants. All others, Patient Care Assistants, Nursing Assistants, or Home Health Aides. This program offers a broad foundation of knowledge and skills, expanding the traditional role of the nursing assistant, for both acute and long-term care settings.

The content includes but is not limited to broad, transferable skills and that stresses understanding and demonstration of the following elements of the health care industry: planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

Additional Information relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### Program Structure

This program is a planned sequence of instruction consisting of 3 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u>OCP</u> | <u>Course Number</u> | <u>Course Title</u>                 | <u>Teacher Certification</u>                                                             | <u>Length</u>    |
|------------|----------------------|-------------------------------------|------------------------------------------------------------------------------------------|------------------|
| <u>A</u>   | <u>HCP0124</u>       | <u>Nursing Assistant</u>            | <u>REG NURSE 7 G</u><br><u>LPN 7 G*</u>                                                  | <u>165 hours</u> |
| <u>B</u>   | <u>HCP0333</u>       | <u>Accelerated Home Health Aide</u> | <u>PRAC NURSE @7 %7%G (Must</u><br><u>be a Registered Nurse)</u>                         | <u>25 hours</u>  |
| <u>C</u>   | <u>HCP0021</u>       | <u>Patient Care Assistant</u>       | <u>REG NURSE 7 G</u><br><u>PRAC NURSE @7 %7%G (Must</u><br><u>be a Registered Nurse)</u> | <u>45 hours</u>  |

\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator who must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.

### Regulated Programs

Successful completion of this program from an approved school prepares the student for certification for employment as a Nursing Assistant in a nursing home, in accordance with Chapter 464.203, Florida Statutes (F.S.). To be approved, this program must be supervised by a registered nurse and follow the faculty qualifications set forth in 64B9-15.005(3)(a), F.A.C.

New programs must be approved by the Board of Nursing, Department of Health prior to enrolling students.

Those students who satisfactorily complete an approved course are eligible to apply to take the national nursing assistant examination being utilized in Florida, in accordance with Chapter 464.203, F.S. This program includes both Acute and Long-Term Care.

In accordance with 64B9-15.005, F.A.C., students will perform nursing skills in the clinical and simulated laboratory settings under the supervision of a qualified instructor. The recommended teacher/student ratio in the clinical area is 1 to 12, but the maximum is 1 to 15.

In accordance with 64B9-15.006, F.A.C., Clinical and simulated laboratory learning experiences must correlate with 80 hours of didactic instruction. In addition, a minimum of 40 hours of clinical experiences must be obtained. Simulated labs are not a substitute for clinical experience. The clinical instruction shall include at least 20 hours of long-term care clinical instruction in a licensed nursing home or licensed long-term care facility.

In addition, Students must have a minimum of 16 hours of training in communication and interpersonal skills, infection control, safety/emergency procedures, promoting residents' independence, and respecting residents' rights prior to any direct contact with a resident.

According to Section 400.211, F.S., persons who are enrolled in, or have completed, a state-approved nursing assistant training program may be employed by a licensed nursing facility for a period of four months. However, the certification requirements must be met within four months of such initial employment.

Students must have a minimum of 16 hours of training in communication and interpersonal skills, infection control, safety/emergency procedures, promoting residents' independence, and respecting residents' rights prior to any direct contact with a resident.

**Please refer to 42CFR§484 for the clinical requirements for the Home Health Aide program.**

| <b><u>Job Attainment</u></b> |                                                                                                                        |
|------------------------------|------------------------------------------------------------------------------------------------------------------------|
| 10.0                         | <u>Find, assess and apply to job opportunities.</u>                                                                    |
| 10.01                        | <u>Identify online job posts relevant to his or her career aspirations.</u>                                            |
| 10.02                        | <u>Compare and contrast the job posts' required qualifications, job duties, compensation, benefits and employers.</u>  |
| 10.03                        | <u>Define what information, documentation and writing prompts are required for the positions.</u>                      |
| 11.0                         | <u>Communicate personal competence, character and fit for a job opportunity.</u>                                       |
| 11.01                        | <u>Develop a resume.</u>                                                                                               |
| 11.02                        | <u>Write a cover letter.</u>                                                                                           |
| 11.03                        | <u>Curate a professional portfolio that includes work products.</u>                                                    |
| 11.04                        | <u>Prepare for and experience a mock job interview.</u>                                                                |
| 12.0                         | <u>Cultivate and leverage relationships to professionally advance.</u>                                                 |
| 12.01                        | <u>Request a signed reference letter, letter of recommendation and/or an online skill/professionalism endorsement.</u> |
| 12.02                        | <u>Develop a plan to cultivate a professional digital footprint.</u>                                                   |
| 12.03                        | <u>Develop a networking plan for a specific industry of interest.</u>                                                  |

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Use verbal, written, and/or electronic communications specific to the nurse assistant.
- 03.0 Demonstrate legal and ethical responsibilities specific to the nurse assistant.
- 04.0 Apply basic math and science skills specific to the nurse assistant.
- 05.0 Describe the anatomy and physiology of the human body.
- 06.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 07.0 Perform physical comfort and safety functions specific to the nurse assistant.
- 08.0 Apply the principles of infection control specific to the nurse assistant.
- 09.0 Demonstrate knowledge of blood-borne diseases.
- 10.0 Recognize and respond to emergency situations.
- 11.0 Perform supervised organizational functions following the patient care plan.
- 12.0 Provide biological, psychological, and social support.
- 13.0 Provide personal patient care.
- 14.0 Perform patient care procedures.
- 15.0 Apply principles of nutrition.
- 16.0 Provide care for geriatric patients.
- 17.0 Assist with restorative (rehabilitative) activities.
- 18.0 Demonstrate an understanding of information technology applications in healthcare.
- 19.0 Demonstrate employability skills.
- 20.0 Use verbal and written communications specific to the Home Health Aide.
- 21.0 Demonstrate legal and ethical responsibilities specific to the Home Health Aide.
- 22.0 Perform physical comfort and safety functions specific to the Home Health Aide.
- 23.0 Apply principles of nutrition specific to the Home Health Aide.
- 24.0 Apply the principles of infection control specific to the Home Health Aide.
- 25.0 Perform home health-care services.
- 26.0 Perform nursing assistant skills related to the hospital setting.
- 27.0 Provide nursing assistant care for the adult patient.

Florida Department of Education  
Student Performance Standards

Program Title: Patient Care Assistant  
Career Cluster Program Number: H700500

Course Number: HCP0124  
Occupational Completion Point: A  
Nursing Assistant – 165 Hours

The following intended outcomes 1-19 should be taught together as a module to achieve the occupational completion point of Nursing Assistant.

01.0 Demonstrate knowledge of the healthcare delivery system and health occupations. The student will be able to:

01.01 Identify the basic components of the healthcare delivery system, including public, private, government, and non-profit.

01.02 Describe the various types of healthcare providers and the range of services available, including resources to victims of domestic violence.

01.03 Describe the composition and functions of a healthcare team.

01.04 Identify the general roles and responsibilities of the individual members of the healthcare team.

01.05 Identify characteristics of effective teams.

01.06 Recognize methods for building positive team relationships.

01.07 Discuss attributes and attitudes of an effective leader.

01.08 Recognize factors and situations that may lead to conflict.

01.09 Recognize effective techniques for managing team conflict.

02.0 Use verbal, written, and/or electronic communications specific to the nurse assistant. The student will be able to:

02.01 Develop basic speaking and active listening skills.

02.02 Identify successful and unsuccessful communication characteristics, including communication styles and barriers.

02.03 Identify characteristics of verbal and non-verbal cues.

02.04 Describe the purpose of the chain of communication to resolve conflict.

02.05 Use appropriate medical terminology and abbreviations.

|       |                                                                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02.06 | <u>Obtain specified data from the patient and family.</u>                                                                                                                                   |
| 02.07 | <u>Utilize verbal and written information to assist with the patient's plan of care.</u>                                                                                                    |
| 02.08 | <u>Distinguish between and report subjective and objective information.</u>                                                                                                                 |
| 02.09 | <u>Discuss the importance of patient/client education regarding healthcare.</u>                                                                                                             |
| 02.10 | <u>Adapt communication skills to varied levels of understanding and cultural orientation, including, but not limited to, diverse age, cultural, economic, ethnic, and religious groups.</u> |
| 02.11 | <u>Demonstrate the use of the communication systems, including electronic health record systems.</u>                                                                                        |
| 03.0  | <u>Demonstrate legal and ethical responsibilities specific to the nurse assistant. The student will be able to:</u>                                                                         |
| 03.01 | <u>Discuss and demonstrate legal and ethical behavior within the nursing assistant's scope of practice, including, but not limited to, role limitations in Florida.</u>                     |
| 03.02 | <u>Describe a code of ethics consistent with the nursing assistant occupation.</u>                                                                                                          |
| 03.03 | <u>Explain the laws governing harassment, labor, and employment.</u>                                                                                                                        |
| 03.04 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.05 | <u>Demonstrate safe standards of patient care, including prevention and quality of care.</u>                                                                                                |
| 03.06 | <u>Exhibit behavior supporting and promoting patients' and/or residents' rights.</u>                                                                                                        |
| 03.07 | <u>Describe advance directives.</u>                                                                                                                                                         |
| 03.08 | <u>Explain the procedures for accurate documentation and record keeping.</u>                                                                                                                |
| 03.09 | <u>Recognize the potential for and prevention of medical errors and practice the proper procedures to follow regarding medical errors.</u>                                                  |
| 03.10 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.11 | <u>Recognize and report signs of substance abuse.</u>                                                                                                                                       |
| 03.12 | <u>Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.</u>                                                                                    |
| 03.13 | <u>Recognize and report illegal and/or unethical practices of healthcare workers.</u>                                                                                                       |
| 03.14 | <u>Recognize and report abuse, including domestic violence, neglect, and suspected human trafficking.</u>                                                                                   |
| 03.15 | <u>Recognize that a CNA must self-report any crimes they've been involved in within 30 days of the offense in accordance with Florida Statutes.</u>                                         |
| 03.16 | <u>Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud.</u>                                                               |

|       |                                                                                                                                                                                                  |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.17 | <u>Define Omnibus Budget Reconciliation Act (OBRA).</u>                                                                                                                                          |
| 03.18 | <u>Define Minimum Data Set (MDS).</u>                                                                                                                                                            |
| 03.19 | <u>Identify and explain the standards of the Health Insurance Portability and Accountability Act (HIPAA).</u>                                                                                    |
| 04.0  | <u>Apply basic math and science skills specific to the nurse assistant. The student will be able to:</u>                                                                                         |
| 04.01 | <u>Demonstrate knowledge of Celsius and Fahrenheit temperature and the conversion of each.</u>                                                                                                   |
| 04.02 | <u>Calculate ratios.</u>                                                                                                                                                                         |
| 04.03 | <u>Make, use, and convert data using traditional and metric units.</u>                                                                                                                           |
| 04.04 | <u>Make estimations and approximations; then judge the reasonableness of the results and demonstrate the ability to evaluate and draw conclusions.</u>                                           |
| 04.05 | <u>Convert from regular time to 24-hour time.</u>                                                                                                                                                |
| 04.06 | <u>Organize and communicate results obtained by observation.</u>                                                                                                                                 |
| 05.0  | <u>Describe the anatomy and physiology of the human body. The student will be able to:</u>                                                                                                       |
| 05.01 | <u>Describe the basic structure and function of the human body.</u>                                                                                                                              |
| 05.02 | <u>Describe the relationships of body systems in providing patient care.</u>                                                                                                                     |
| 05.03 | <u>Recognize abnormal signs and symptoms of common diseases and conditions.</u>                                                                                                                  |
| 06.0  | <u>Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:</u>                                                                                     |
| 06.01 | <u>Describe strategies for the prevention of diseases, including health screenings and examinations.</u>                                                                                         |
| 06.02 | <u>Identify personal health practices and environmental factors that affect the optimal function of each of the major body systems.</u>                                                          |
| 06.03 | <u>Identify psychological reactions to illnesses, including defense mechanisms.</u>                                                                                                              |
| 06.04 | <u>Identify complementary and alternative health practices.</u>                                                                                                                                  |
| 06.05 | <u>Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high-risk behaviors.</u> |
| 06.06 | <u>Explain the basic concepts of positive self-image, wellness, and stress.</u>                                                                                                                  |
| 06.07 | <u>Develop a wellness and stress control plan that can be used in personal and professional life.</u>                                                                                            |

|       |                                                                                                                                                                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.0  | <u>Perform physical comfort and safety functions specific to the nurse assistant. The student will be able to:</u>                                                                                                                                         |
| 07.01 | <u>Implement appropriate regulatory and accrediting agency patient safety guidelines including Joint Commission.</u>                                                                                                                                       |
| 07.02 | <u>Explain personal safety procedures based on Occupational Safety and Health Administration (OSHA) and the Centers for Disease Control (CDC) regulations, including standard precautions.</u>                                                             |
| 07.03 | <u>Recognize Safety Data Sheets and comply with safety signs, symbols, and labels.</u>                                                                                                                                                                     |
| 07.04 | <u>Maintain safe patient units, equipment, and a comfortable environment.</u>                                                                                                                                                                              |
| 07.05 | <u>Maintain service areas on the units, including supplies and equipment.</u>                                                                                                                                                                              |
| 07.06 | <u>Explain the procedure for properly identifying patients.</u>                                                                                                                                                                                            |
| 07.07 | <u>Observe, report, and record changes in the patient's behavior as needed, including mental awareness.</u>                                                                                                                                                |
| 07.08 | <u>Demonstrate adjustment of bed and side rails according to facility policy.</u>                                                                                                                                                                          |
| 07.09 | <u>Demonstrate and assist the patient in dangling.</u>                                                                                                                                                                                                     |
| 07.10 | <u>Explain and demonstrate proper body mechanics and ergonomics, and use assistive devices to safely transfer and support patients.</u>                                                                                                                    |
| 07.11 | <u>Demonstrate lifting, supporting, and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures.</u> |
| 07.12 | <u>Demonstrate the proper use of a gait/transfer belt in transfer and ambulation.</u>                                                                                                                                                                      |
| 07.13 | <u>Assist patient in ambulation, including the use of a crutch, cane, or walker.</u>                                                                                                                                                                       |
| 07.14 | <u>Demonstrate the proper wheelchair safety techniques and assist the patient as needed with use.</u>                                                                                                                                                      |
| 07.15 | <u>Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).</u>                                                                                                                                             |
| 07.16 | <u>Assist patient with care and use of prosthetic/orthotic devices.</u>                                                                                                                                                                                    |
| 08.0  | <u>Apply the principles of infection control specific to the nurse assistant. The student will be able to:</u>                                                                                                                                             |
| 08.01 | <u>Identify and implement transmission-based precautions and standard infection control procedures.</u>                                                                                                                                                    |
| 08.02 | <u>Recognize emerging diseases and disorders.</u>                                                                                                                                                                                                          |
| 08.03 | <u>Explain medical and surgical asepsis.</u>                                                                                                                                                                                                               |
| 08.04 | <u>Explain and demonstrate proper hand hygiene.</u>                                                                                                                                                                                                        |

|       |                                                                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08.05 | <u>Identify the chain of infection.</u>                                                                                                                                                      |
| 08.06 | <u>Provide care for patients with infectious diseases while applying the principles of standard and transmission-based precautions.</u>                                                      |
| 08.07 | <u>Apply the proper use of personal protective equipment (PPE) for all types of isolation, including donning and removing PPE appropriately.</u>                                             |
| 08.08 | <u>Describe how to correctly dispose of biohazardous materials according to appropriate government guidelines, such as OSHA.</u>                                                             |
| 08.09 | <u>Follow isolation procedure with food trays, PPE, and other supplies/equipment.</u>                                                                                                        |
| 08.10 | <u>Collect a specimen from a patient in isolation.</u>                                                                                                                                       |
| 09.0  | <u>Demonstrate knowledge of blood-borne diseases. The student will be able to:</u>                                                                                                           |
| 09.01 | <u>Describe blood-borne diseases.</u>                                                                                                                                                        |
| 09.02 | <u>Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood-borne pathogens.</u>                                                                |
| 09.03 | <u>Identify community resources and services available to individuals with diseases caused by blood-borne pathogens.</u>                                                                     |
| 09.04 | <u>Identify “at-risk” behaviors which promote the spread of diseases caused by blood-borne pathogens and the public education necessary to combat the spread of these diseases.</u>          |
| 09.05 | <u>Explain the legal aspects of HIV/AIDS, including testing.</u>                                                                                                                             |
| 10.0  | <u>Recognize and respond to emergency situations. The student will be able to:</u>                                                                                                           |
| 10.01 | <u>Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.</u>                                                             |
| 10.02 | <u>Recognize fire, safety, disaster, and evacuation procedures.</u>                                                                                                                          |
| 10.03 | <u>Obtain and maintain training for certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.</u> |
| 10.04 | <u>Recognize adverse drug-related emergencies and take appropriate first aid action.</u>                                                                                                     |
| 11.0  | <u>Perform supervised organizational functions following the patient care plan. The student will be able to:</u>                                                                             |
| 11.01 | <u>Organize and prioritize patient-care assignments.</u>                                                                                                                                     |
| 11.02 | <u>Complete assignments accurately and promptly.</u>                                                                                                                                         |
| 12.0  | <u>Provide biological, psychological, and social support. The student will be able to:</u>                                                                                                   |
| 12.01 | <u>Discuss family roles and their significance to health.</u>                                                                                                                                |

|       |                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------|
| 12.02 | <u>Respond to patient and family emotional needs.</u>                                                              |
| 13.0  | <u>Provide personal patient care. The student will be able to:</u>                                                 |
| 13.01 | <u>Perform bed bath; observe and report changes in a patient, including skin and level of consciousness.</u>       |
| 13.02 | <u>Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged baths.</u> |
| 13.03 | <u>Administer back rub with bath and as needed.</u>                                                                |
| 13.04 | <u>Assist patient with hair care utilizing sink, tub, shower, bed, or shower cap.</u>                              |
| 13.05 | <u>Demonstrate the use of a safety and/or electric razor to shave the patient.</u>                                 |
| 13.06 | <u>Demonstrate how to groom the patient, including hair, skin, foot, hand, and nail care.</u>                      |
| 13.07 | <u>Assist with and/or administer oral hygiene, including denture care.</u>                                         |
| 13.08 | <u>Assist the patient to dress.</u>                                                                                |
| 13.09 | <u>Assist patient with toileting using various types of restorative and rehabilitative equipment.</u>              |
| 13.10 | <u>Assist patient with use of bedpan (standard and fracture).</u>                                                  |
| 13.11 | <u>Assist with bowel and bladder training.</u>                                                                     |
| 13.12 | <u>Assist and/or provide perineal care.</u>                                                                        |
| 13.13 | <u>Empty, measure, and record urinary output and/or drainage.</u>                                                  |
| 13.14 | <u>Demonstrate the application and use of a leg bag, leg strap, and dignity bag.</u>                               |
| 13.15 | <u>Monitor and assist with the drainage of urostomy bags and colostomy bags.</u>                                   |
| 13.16 | <u>Assist patient with both donning and doffing prostheses and braces.</u>                                         |
| 13.17 | <u>Assist patient with meals.</u>                                                                                  |
| 13.18 | <u>Describe the relationships of body systems when providing patient care.</u>                                     |
| 14.0  | <u>Perform patient care procedures. The student will be able to:</u>                                               |
| 14.01 | <u>Demonstrate ability to accurately measure, record, and report vital signs.</u>                                  |
| 14.02 | <u>Demonstrate ability to recognize and report vital signs outside of normal parameters.</u>                       |

|       |                                                                                                                       |
|-------|-----------------------------------------------------------------------------------------------------------------------|
| 14.03 | <u>Assist with the admission, transfer, and discharge of a patient and/or resident.</u>                               |
| 14.04 | <u>Maintain patient belongings list.</u>                                                                              |
| 14.05 | <u>Make an unoccupied and occupied bed.</u>                                                                           |
| 14.06 | <u>Provide range-of-motion exercises, including, but not limited to, passive, active, and active-assisted.</u>        |
| 14.07 | <u>Apply anti-embolic hose and sequential compression devices.</u>                                                    |
| 14.08 | <u>Understand and demonstrate proper collection of routine, timed urine, and clean-catch urine specimens.</u>         |
| 14.09 | <u>Record fluid intake and output (I&amp;O).</u>                                                                      |
| 14.10 | <u>Observe, record, and report the patient's emesis.</u>                                                              |
| 14.11 | <u>Monitor and provide urinary catheter care and drainage systems.</u>                                                |
| 14.12 | <u>Assist with ostomy care, including emptying or changing ostomy bags that do not adhere to the skin.</u>            |
| 14.13 | <u>Collect stool specimen.</u>                                                                                        |
| 14.14 | <u>Assist with the collection of a sputum specimen.</u>                                                               |
| 14.15 | <u>Assist the patient in applying binders.</u>                                                                        |
| 14.16 | <u>Care for the patient in skin and skeletal traction.</u>                                                            |
| 14.17 | <u>Assist with pre-operative and post-operative patient care.</u>                                                     |
| 14.18 | <u>Reinforce dressings under the supervision of the RN/LPN.</u>                                                       |
| 14.19 | <u>Obtain and record an apical pulse.</u>                                                                             |
| 14.20 | <u>Provide cast care and/or pin care.</u>                                                                             |
| 14.21 | <u>Provide care for visual devices, including but not limited to eyeglasses, artificial eyes, and contact lenses.</u> |
| 14.22 | <u>Provide care for hearing devices.</u>                                                                              |
| 15.0  | <u>Apply principles of nutrition. The student will be able to:</u>                                                    |
| 15.01 | <u>Identify nutrients and food groups.</u>                                                                            |
| 15.02 | <u>Identify and develop basic food plans.</u>                                                                         |

|       |                                                                                                                                                              |

| <u>Students in this module have already completed a Nursing Assistant program. After completing this module, the student will have achieved the occupational completion point of a Home Health Aide (a home health aide who is also a nursing assistant). This program also meets the</u> |                                                                                                                                                                                                                       |

requirements of a Home Health Aide as stated in Rules of the Department of Health and Rehabilitative Services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

**Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.**

The recommended length of instruction for this module is 25 clock hours. Students who have completed the Nursing Assistant program should take this module to become a Home Health Aide.

20.0 Use verbal and written communications specific to the Home Health Aide. The student will be able to:

20.01 Obtain data from the patient and family/significant others.

20.02 Utilize verbal and written information to contribute to the patient's plan of care.

20.03 Recognizes cultural differences in family.

21.0 Demonstrate legal and ethical responsibilities specific to a Home Health Aide. The student will be able to:

21.01 Demonstrate legal and ethical behavior within the role and scope of home health aide responsibilities.

21.02 Follow policies and procedures affecting the health, safety, and well-being of patients in the home setting.

22.0 Perform physical comfort and safety functions specific to the Home Health Aide. The student will be able to:

22.01 Maintain a clean and safe home environment for the patient.

22.02 Identify emergency evacuation procedures with adaptations to the home setting.

23.0 Apply principles of nutrition specific to the Home Health Aide. The student will be able to:

23.01 List factors that must be considered when purchasing food.

23.02 List factors that must be considered when storing food.

23.03 Discuss the preparation and serving of trays in the home.

24.0 Apply the principles of infection control specific to the Home Health Aide. The student will be able to:

24.01 Provide care for patients with infectious diseases in the home.

24.02 Follow isolation procedures with food tray, garments, and other materials in the home.

24.03 Utilize standard and blood-borne precautions in all home care.

25.0 Perform home health-care services. The student will be able to:

|       |                                                                                                                                                                                                                           |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25.01 | <a href="#">Follow an established work plan with the patient and family.</a>                                                                                                                                              |
| 25.02 | <a href="#">Perform patient-related cleaning tasks and laundry.</a>                                                                                                                                                       |

**Course Number: HCP0021**  
**Occupational Completion Point: C**  
**Patient Care Assistant – 45 Hours**

[Students enrolled in this module have previously completed a Nursing Assistant and Home Health Aide program and are adding these skills to work in a health care facility other than a nursing home. The average achieving student should complete this module in 45 clock hours. The occupational completion point Patient Care Assistant can only be achieved when this module is completed, plus the modules/or credentials for Nursing Assistant and Home Health Aide are satisfied.](#)

| 26.06 | <a href="#">Assist with pre-operative and post-operative patient care.</a>                                     |
| 26.07 | <a href="#">Practice nursing assistant skills in the hospital setting.</a>                                     |
| 27.0  | <a href="#">Provide nursing assistant care for the adult patient. The student will be able to:</a>             |
| 27.01 | <a href="#">Assist with physical examination.</a>                                                              |
| 27.02 | <a href="#">Care for patients receiving oxygen therapy.</a>                                                    |
| 27.03 | <a href="#">Change an unsterile dressing.</a>                                                                  |
| 27.04 | <a href="#">Take an apical and pedal pulse.</a>                                                                |

|       |                                                                                                         |
|-------|---------------------------------------------------------------------------------------------------------|
| 27.05 | <u>Demonstrate an understanding of artificial eye and/or eyewear care.</u>                              |
| 27.06 | <u>Demonstrate an understanding and knowledge of the needs of patients with common health problems.</u> |
| 27.07 | <u>Measure pulse oximetry and report decreasing levels of O<sub>2</sub> saturation.</u>                 |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as experimental, quality, and safety procedures, are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate, and troubleshoot equipment/tools used to make observations. Students understand measurement error and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program also meets the requirements of a Home Health Aide as stated in rules of the Department of health and rehabilitative services, division of health, chapter 10d-68 - minimum standards for home health agencies.

Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Students who have completed the Health Science Core may articulate to this program. For teacher certification requirements for the remaining modules please check the certification diagram and/or the individual module.

Completion of this program should enable the postsecondary student to be given advanced standing in the Practical Nursing program H170607 as well as the ability to enter the Patient Care Technician program at OCP E.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### Career and Technical Student Organization (CTSO)

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of Health Science career cluster. This program is designed to prepare students for employment as patient care technicians and advanced cross-trained nursing assistants. This program offers a broad foundation of knowledge and skills, expanding the traditional role of the nursing assistant for both acute and long-term care settings.

The content includes but is not limited to broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry: planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues, and health, safety, and environmental issues.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

## Program Structure

This program is a planned sequence of instruction consisting of 6 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| <u>OCP</u> | <u>Course Number</u> | <u>Course Title</u>                     | <u>Teacher Certification</u>                                                             | <u>Length</u>    |
|------------|----------------------|-----------------------------------------|------------------------------------------------------------------------------------------|------------------|
| <u>A</u>   | <u>HCP0124</u>       | <u>Nurse Assistant</u>                  | <u>REG NURSE 7 G</u><br><u>PRAC NURSE @7 %7%G (Must be a</u><br><u>Registered Nurse)</u> | <u>165 hours</u> |
| <u>B</u>   | <u>HCP0333</u>       | <u>Accelerated Home Health Aide</u>     | <u>REG NURSE 7 G</u><br><u>PRAC NURSE @7 %7%G (Must be a</u><br><u>Registered Nurse)</u> | <u>25 hours</u>  |
| <u>C</u>   | <u>HCP0021</u>       | <u>Patient Care Assistant</u>           |                                                                                          | <u>45 hours</u>  |
| <u>D</u>   | <u>HSC0012</u>       | <u>Allied Health Assistant</u>          |                                                                                          | <u>100 hours</u> |
| <u>E</u>   | <u>MEA0585</u>       | <u>Advanced Allied Health Assistant</u> |                                                                                          | <u>200 hours</u> |
| <u>F</u>   | <u>PRN0095</u>       | <u>Patient Care Technician</u>          |                                                                                          | <u>65 hours</u>  |

\* The LPN 7 G district issued certification is a practical nurse. A practical nurse can only be utilized as an instructor of the CNA training program when they are supervised by the program coordinator who must be a registered nurse. Please refer to 64B9-15.005, F.A.C., for requirements.

## Florida's Career Readiness Skills for CTE Programs

| <b><u>Employability Skills</u></b> |                                                                                                  |
|------------------------------------|--------------------------------------------------------------------------------------------------|
| 01.0                               | <u>Apply academic skills to workplace scenarios.</u>                                             |
| 01.01                              | <u>Use reading skills.</u>                                                                       |
| 01.02                              | <u>Use writing skills.</u>                                                                       |
| 01.03                              | <u>Use mathematical strategies and procedures.</u>                                               |
| 01.04                              | <u>Use scientific principles and procedures.</u>                                                 |
| 02.0                               | <u>Design a solution to an industry problem.</u>                                                 |
| 02.01                              | <u>Use critical thinking.</u>                                                                    |
| 02.02                              | <u>Use creativity.</u>                                                                           |
| 02.03                              | <u>Make sound decisions.</u>                                                                     |

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the healthcare delivery system and health occupations.
- 02.0 Use verbal, written, and/or electronic communications specific to the nurse assistant.
- 03.0 Demonstrate legal and ethical responsibilities specific to the nurse assistant.
- 04.0 Apply basic math and science skills specific to the nurse assistant.
- 05.0 Describe the anatomy and physiology of the human body.
- 06.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 07.0 Perform physical comfort and safety functions specific to the nurse assistant.
- 08.0 Apply the principles of infection control specific to the nurse assistant.
- 09.0 Demonstrate knowledge of blood-borne diseases.
- 10.0 Recognize and respond to emergency situations.
- 11.0 Perform supervised organizational functions following the patient care plan.
- 12.0 Provide biological, psychological, and social support.
- 13.0 Provide personal patient care.
- 14.0 Perform patient care procedures.
- 15.0 Apply principles of nutrition.
- 16.0 Provide care for geriatric patients.
- 17.0 Assist with restorative (rehabilitative) activities.
- 18.0 Demonstrate an understanding of information technology applications in healthcare.
- 19.0 Demonstrate employability skills.
- 20.0 Use verbal and written communications specific to the Home Health Aide.
- 21.0 Demonstrate legal and ethical responsibilities specific to the Home Health Aide.
- 22.0 Perform physical comfort and safety functions specific to the Home Health Aide.
- 23.0 Apply principles of nutrition specific to the Home Health Aide.
- 24.0 Apply the principles of infection control specific to the Home Health Aide.
- 25.0 Perform home health-care services.
- 26.0 Perform nursing assistant skills related to the hospital setting.
- 27.0 Provide nursing assistant care for the adult patient.
- 28.0 Perform skills representative of 1-3 major allied health areas as determined by local labor market demand.
- 29.0 Complete a clinical rotation in the selected major allied health areas.
- 30.0 Perform additional skills from the previous module at the aide level and do not go beyond the scope of practice of unlicensed assistive personnel.
- 31.0 Complete a clinical rotation in the selected major allied health areas.
- 32.0 Demonstrate knowledge of organizational and effective team member skills.
- 33.0 Practice organizational and effective team member skills in a clinical setting.

Florida Department of Education  
Student Performance Standards

Program Title:        Patient Care Technician  
Career Certificate Program Number:    H700600

**Course Number:** HCP0124  
**Occupational Completion Point:** A  
**Nursing Assistant – 165 Hours**

The following intended outcomes 1-19 should be taught together as a module to achieve the occupational completion point Nursing Assistant.

01.0    Demonstrate knowledge of the healthcare delivery system and health occupations. The student will be able to:

01.01    Identify the basic components of the healthcare delivery system, including public, private, government, and non-profit.

01.02    Describe the various types of healthcare providers and the range of services available, including resources to victims of domestic violence.

01.03    Describe the composition and functions of a healthcare team.

01.04    Identify the general roles and responsibilities of the individual members of the healthcare team.

01.05    Identify characteristics of effective teams.

01.06    Recognize methods for building positive team relationships.

01.07    Discuss attributes and attitudes of an effective leader.

01.08    Recognize factors and situations that may lead to conflict.

01.09    Recognize effective techniques for managing team conflict.

02.0    Use verbal, written, and/or electronic communications specific to the nurse assistant. The student will be able to:

02.01    Develop basic speaking and active listening skills.

02.02    Identify successful and unsuccessful communication characteristics, including communication styles and barriers.

02.03    Identify characteristics of verbal and non-verbal cues.

02.04    Describe the purpose of the chain of communication to resolve conflict.

02.05    Use appropriate medical terminology and abbreviations.

|       |                                                                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02.06 | <u>Obtain specified data from the patient and family.</u>                                                                                                                                   |
| 02.07 | <u>Utilize verbal and written information to assist with the patient's plan of care.</u>                                                                                                    |
| 02.08 | <u>Distinguish between and report subjective and objective information.</u>                                                                                                                 |
| 02.09 | <u>Discuss the importance of patient/client education regarding healthcare.</u>                                                                                                             |
| 02.10 | <u>Adapt communication skills to varied levels of understanding and cultural orientation, including, but not limited to, diverse age, cultural, economic, ethnic, and religious groups.</u> |
| 02.11 | <u>Demonstrate the use of the communication systems, including electronic health record systems.</u>                                                                                        |
| 03.0  | <u>Demonstrate legal and ethical responsibilities specific to the nurse assistant. The student will be able to:</u>                                                                         |
| 03.01 | <u>Discuss and demonstrate legal and ethical behavior within the nursing assistant's scope of practice, including, but not limited to, role limitations in Florida.</u>                     |
| 03.02 | <u>Describe a code of ethics consistent with the nursing assistant occupation.</u>                                                                                                          |
| 03.03 | <u>Explain the laws governing harassment, labor, and employment.</u>                                                                                                                        |
| 03.04 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.05 | <u>Demonstrate safe standards of patient care, including prevention and quality of care.</u>                                                                                                |
| 03.06 | <u>Exhibit behavior supporting and promoting patients' and/or residents' rights.</u>                                                                                                        |
| 03.07 | <u>Describe advance directives.</u>                                                                                                                                                         |
| 03.08 | <u>Explain the procedures for accurate documentation and record keeping.</u>                                                                                                                |
| 03.09 | <u>Recognize the potential for and prevention of medical errors and practice the proper procedures to follow regarding medical errors.</u>                                                  |
| 03.10 | <u>Follow policies and procedures affecting the health, safety, and well-being of patients.</u>                                                                                             |
| 03.11 | <u>Recognize and report signs of substance abuse.</u>                                                                                                                                       |
| 03.12 | <u>Demonstrate the understanding of vulnerable population abuse and reporting procedures per agency.</u>                                                                                    |
| 03.13 | <u>Recognize and report illegal and/or unethical practices of healthcare workers.</u>                                                                                                       |
| 03.14 | <u>Recognize and report abuse, including domestic violence, neglect, and suspected human trafficking.</u>                                                                                   |
| 03.15 | <u>Recognize that a CNA must self-report any crimes they've been involved in within 30 days of the offense in accordance with Florida Statutes.</u>                                         |
| 03.16 | <u>Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud.</u>                                                               |

|       |                                                                                                                                                                                                  |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.17 | <u>Define Omnibus Budget Reconciliation Act (OBRA).</u>                                                                                                                                          |
| 03.18 | <u>Define Minimum Data Set (MDS).</u>                                                                                                                                                            |
| 03.19 | <u>Identify and explain the standards of the Health Insurance Portability and Accountability Act (HIPAA).</u>                                                                                    |
| 04.0  | <u>Apply basic math and science skills specific to the nurse assistant. The student will be able to:</u>                                                                                         |
| 04.01 | <u>Demonstrate knowledge of Celsius and Fahrenheit temperature and the conversion of each.</u>                                                                                                   |
| 04.02 | <u>Calculate ratios.</u>                                                                                                                                                                         |
| 04.03 | <u>Make, use, and convert data using traditional and metric units.</u>                                                                                                                           |
| 04.04 | <u>Make estimations and approximations; then judge the reasonableness of the results and demonstrate the ability to evaluate and draw conclusions.</u>                                           |
| 04.05 | <u>Convert from regular time to 24-hour time.</u>                                                                                                                                                |
| 04.06 | <u>Organize and communicate results obtained by observation.</u>                                                                                                                                 |
| 05.0  | <u>Describe the anatomy and physiology of the human body. The student will be able to:</u>                                                                                                       |
| 05.01 | <u>Describe the basic structure and function of the human body.</u>                                                                                                                              |
| 05.02 | <u>Describe the relationships of body systems in providing patient care.</u>                                                                                                                     |
| 05.03 | <u>Recognize abnormal signs and symptoms of common diseases and conditions.</u>                                                                                                                  |
| 06.0  | <u>Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:</u>                                                                                     |
| 06.01 | <u>Describe strategies for the prevention of diseases, including health screenings and examinations.</u>                                                                                         |
| 06.02 | <u>Identify personal health practices and environmental factors that affect the optimal function of each of the major body systems.</u>                                                          |
| 06.03 | <u>Identify psychological reactions to illnesses, including defense mechanisms.</u>                                                                                                              |
| 06.04 | <u>Identify complementary and alternative health practices.</u>                                                                                                                                  |
| 06.05 | <u>Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high-risk behaviors.</u> |
| 06.06 | <u>Explain the basic concepts of positive self-image, wellness, and stress.</u>                                                                                                                  |
| 06.07 | <u>Develop a wellness and stress control plan that can be used in personal and professional life.</u>                                                                                            |

|       |                                                                                                                                                                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.0  | <u>Perform physical comfort and safety functions specific to the nurse assistant. The student will be able to:</u>                                                                                                                                         |
| 07.01 | <u>Implement appropriate regulatory and accrediting agency patient safety guidelines, including Joint Commission.</u>                                                                                                                                      |
| 07.02 | <u>Explain personal safety procedures based on Occupational Safety and Health Administration (OSHA) and the Centers for Disease Control (CDC) regulations, including standard precautions.</u>                                                             |
| 07.03 | <u>Recognize Safety Data Sheets and comply with safety signs, symbols, and labels.</u>                                                                                                                                                                     |
| 07.04 | <u>Maintain safe patient units, equipment, and a comfortable environment.</u>                                                                                                                                                                              |
| 07.05 | <u>Maintain service areas on the units, including supplies and equipment.</u>                                                                                                                                                                              |
| 07.06 | <u>Explain the procedure for properly identifying patients.</u>                                                                                                                                                                                            |
| 07.07 | <u>Observe, report, and record changes in the patient's behavior as needed, including mental awareness.</u>                                                                                                                                                |
| 07.08 | <u>Demonstrate adjustment of bed and side rails according to facility policy.</u>                                                                                                                                                                          |
| 07.09 | <u>Demonstrate and assist the patient in dangling.</u>                                                                                                                                                                                                     |
| 07.10 | <u>Explain and demonstrate proper body mechanics and ergonomics, and use assistive devices to safely transfer and support patients.</u>                                                                                                                    |
| 07.11 | <u>Demonstrate lifting, supporting, and transferring patients from bed to chair, bed to bed, and bed to stretcher, including the use of the various assistive devices and equipment while utilizing proper body mechanics and patient safety measures.</u> |
| 07.12 | <u>Demonstrate the proper use of a gait/transfer belt in transfer and ambulation.</u>                                                                                                                                                                      |
| 07.13 | <u>Assist patient in ambulation, including the use of a crutch, cane, or walker.</u>                                                                                                                                                                       |
| 07.14 | <u>Demonstrate the proper wheelchair safety techniques and assist the patient as needed with use.</u>                                                                                                                                                      |
| 07.15 | <u>Apply supportive devices as directed (e.g., footboard, over-bed cradle, alternating pressure mattress).</u>                                                                                                                                             |
| 07.16 | <u>Assist patient with care and use of prosthetic/orthotic devices.</u>                                                                                                                                                                                    |
| 08.0  | <u>Apply the principles of infection control specific to the nurse assistant. The student will be able to:</u>                                                                                                                                             |
| 08.01 | <u>Identify and implement transmission-based precautions and standard infection control procedures.</u>                                                                                                                                                    |
| 08.02 | <u>Recognize emerging diseases and disorders.</u>                                                                                                                                                                                                          |
| 08.03 | <u>Explain medical and surgical asepsis.</u>                                                                                                                                                                                                               |
| 08.04 | <u>Explain and demonstrate proper hand hygiene.</u>                                                                                                                                                                                                        |

|       |                                                                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08.05 | <u>Identify the chain of infection.</u>                                                                                                                                                      |
| 08.06 | <u>Provide care for patients with infectious diseases while applying the principles of standard and transmission-based precautions.</u>                                                      |
| 08.07 | <u>Apply the proper use of personal protective equipment (PPE) for all types of isolation, including donning and removing PPE appropriately.</u>                                             |
| 08.08 | <u>Describe how to correctly dispose of biohazardous materials according to appropriate government guidelines, such as OSHA.</u>                                                             |
| 08.09 | <u>Follow isolation procedure with food trays, PPE, and other supplies/equipment.</u>                                                                                                        |
| 08.10 | <u>Collect a specimen from a patient in isolation.</u>                                                                                                                                       |
| 09.0  | <u>Demonstrate knowledge of blood-borne diseases. The student will be able to:</u>                                                                                                           |
| 09.01 | <u>Describe blood-borne diseases.</u>                                                                                                                                                        |
| 09.02 | <u>Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood-borne pathogens.</u>                                                                |
| 09.03 | <u>Identify community resources and services available to individuals with diseases caused by blood-borne pathogens.</u>                                                                     |
| 09.04 | <u>Identify “at-risk” behaviors which promote the spread of diseases caused by blood-borne pathogens and the public education necessary to combat the spread of these diseases.</u>          |
| 09.05 | <u>Explain the legal aspects of HIV/AIDS, including testing.</u>                                                                                                                             |
| 10.0  | <u>Recognize and respond to emergency situations. The student will be able to:</u>                                                                                                           |
| 10.01 | <u>Describe emergency procedures utilized in the clinical area(s) and the role of the nursing assistant in these procedures.</u>                                                             |
| 10.02 | <u>Recognize fire, safety, disaster, and evacuation procedures.</u>                                                                                                                          |
| 10.03 | <u>Obtain and maintain training for certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.</u> |
| 10.04 | <u>Recognize adverse drug-related emergencies and take appropriate first aid action.</u>                                                                                                     |
| 11.0  | <u>Perform supervised organizational functions following the patient care plan. The student will be able to:</u>                                                                             |
| 11.01 | <u>Organize and prioritize patient-care assignments.</u>                                                                                                                                     |
| 11.02 | <u>Complete assignments accurately and promptly.</u>                                                                                                                                         |
| 12.0  | <u>Provide biological, psychological, and social support. The student will be able to:</u>                                                                                                   |
| 12.01 | <u>Discuss family roles and their significance to health.</u>                                                                                                                                |

|       |                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------|
| 12.02 | <u>Respond to patient and family emotional needs.</u>                                                              |
| 13.0  | <u>Provide personal patient care. The student will be able to:</u>                                                 |
| 13.01 | <u>Perform bed bath; observe and report changes in a patient, including skin and level of consciousness.</u>       |
| 13.02 | <u>Assist with shower or tub bath, including the use of specialty tubs or prepackaged disposable-bagged baths.</u> |
| 13.03 | <u>Administer back rub with bath and as needed.</u>                                                                |
| 13.04 | <u>Assist patient with hair care utilizing sink, tub, shower, bed, or shower cap.</u>                              |
| 13.05 | <u>Demonstrate the use of a safety and/or electric razor to shave the patient.</u>                                 |
| 13.06 | <u>Demonstrate how to groom the patient, including hair, skin, foot, hand, and nail care.</u>                      |
| 13.07 | <u>Assist with and/or administer oral hygiene, including denture care.</u>                                         |
| 13.08 | <u>Assist the patient to dress.</u>                                                                                |
| 13.09 | <u>Assist patient with toileting using various types of restorative and rehabilitative equipment.</u>              |
| 13.10 | <u>Assist patient with use of bedpan (standard and fracture).</u>                                                  |
| 13.11 | <u>Assist with bowel and bladder training.</u>                                                                     |
| 13.12 | <u>Assist and/or provide perineal care.</u>                                                                        |
| 13.13 | <u>Empty, measure, and record urinary output and/or drainage.</u>                                                  |
| 13.14 | <u>Demonstrate the application and use of a leg bag, leg strap, and dignity bag.</u>                               |
| 13.15 | <u>Monitor and assist with the drainage of urostomy bags and colostomy bags.</u>                                   |
| 13.16 | <u>Assist patient with both donning and doffing prostheses and braces.</u>                                         |
| 13.17 | <u>Assist patient with meals.</u>                                                                                  |
| 13.18 | <u>Describe the relationships of body systems when providing patient care.</u>                                     |
| 14.0  | <u>Perform patient care procedures. The student will be able to:</u>                                               |
| 14.01 | <u>Demonstrate ability to accurately measure, record, and report vital signs.</u>                                  |
| 14.02 | <u>Demonstrate ability to recognize and report vital signs outside of normal parameters.</u>                       |

|       |                                                                                                                       |
|-------|-----------------------------------------------------------------------------------------------------------------------|
| 14.03 | <u>Assist with the admission, transfer, and discharge of a patient and/or resident.</u>                               |
| 14.04 | <u>Maintain the patient belongings list</u>                                                                           |
| 14.05 | <u>Make an unoccupied and occupied bed.</u>                                                                           |
| 14.06 | <u>Provide range-of-motion exercises, including, but not limited to, passive, active, and active-assisted.</u>        |
| 14.07 | <u>Apply anti-embolic hose and sequential compression devices.</u>                                                    |
| 14.08 | <u>Understand and demonstrate proper collection of routine, timed urine, and clean-catch urine specimens.</u>         |
| 14.09 | <u>Record fluid intake and output (I&amp;O).</u>                                                                      |
| 14.10 | <u>Observe, record, and report the patient's emesis.</u>                                                              |
| 14.11 | <u>Monitor and provide urinary catheter care and drainage systems.</u>                                                |
| 14.12 | <u>Assist with ostomy care, including emptying or changing ostomy bags that do not adhere to the skin.</u>            |
| 14.13 | <u>Collect stool specimen.</u>                                                                                        |
| 14.14 | <u>Assist with the collection of a sputum specimen.</u>                                                               |
| 14.15 | <u>Assist the patient in applying binders.</u>                                                                        |
| 14.16 | <u>Care for the patient in skin and skeletal traction.</u>                                                            |
| 14.17 | <u>Assist with pre-operative and post-operative patient care.</u>                                                     |
| 14.18 | <u>Reinforce dressings under the supervision of the RN/LPN.</u>                                                       |
| 14.19 | <u>Obtain and record an apical pulse.</u>                                                                             |
| 14.20 | <u>Provide cast care and/or pin care.</u>                                                                             |
| 14.21 | <u>Provide care for visual devices, including but not limited to eyeglasses, artificial eyes, and contact lenses.</u> |
| 14.22 | <u>Provide care for hearing devices.</u>                                                                              |
| 15.0  | <u>Apply principles of nutrition. The student will be able to:</u>                                                    |
| 15.01 | <u>Identify nutrients and food groups.</u>                                                                            |
| 15.02 | <u>Identify and develop basic food plans.</u>                                                                         |

|       |                                                                                                                                                              |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15.03 | <a href="#"><u>Check the patient's diet tray for accuracy.</u></a>                                                                                           |

| 17.0  | <u>Assist with restorative (rehabilitative) activities. The student will be able to:</u>                                                                                                                              |
| 17.01 | <u>List the purposes of a restorative (rehabilitation) program.</u>                                                                                                                                                   |
| 17.02 | <u>Assist patient with specified restorative (rehabilitation) needs.</u>                                                                                                                                              |
| 17.03 | <u>Assist patients to reach the optimum level of independence.</u>                                                                                                                                                    |
| 18.0  | <u>Demonstrate an understanding of information technology applications in healthcare. The student will be able to:</u>                                                                                                |
| 18.01 | <u>Define terms and demonstrate basic computer skills.</u>                                                                                                                                                            |
| 18.02 | <u>Recognize and/or describe technology applications in healthcare that are specific to the nursing assistant occupation.</u>                                                                                         |
| 18.03 | <u>Recognize new and emerging technology in healthcare.</u>                                                                                                                                                           |
| 19.0  | <u>Demonstrate employability skills. The student will be able to:</u>                                                                                                                                                 |
| 19.01 | <u>Identify personal traits or attitudes desirable in a nursing assistant.</u>                                                                                                                                        |
| 19.02 | <u>Exemplify basic professional standards of a nursing assistant as they apply to hygiene, dress, language, confidentiality, and behavior, including but not limited to-phone, email, and social media etiquette.</u> |
| 19.03 | <u>Identify documents that may be required when applying for a job.</u>                                                                                                                                               |
| 19.04 | <u>Write an appropriate resume.</u>                                                                                                                                                                                   |
| 19.05 | <u>Conduct a job search.</u>                                                                                                                                                                                          |
| 19.06 | <u>Complete a job application form correctly.</u>                                                                                                                                                                     |
| 19.07 | <u>Examine levels of education and credentialing requirements, including licensure and certification, employment opportunities, workplace environments, and career growth potential.</u>                              |
| 19.08 | <u>Identify acceptable work habits.</u>                                                                                                                                                                               |
| 19.09 | <u>Recognize appropriate, effective, and professional behavior.</u>                                                                                                                                                   |
| 19.10 | <u>Compare careers within the health science career pathways.</u>                                                                                                                                                     |

**Course Number: HCP0333**

**Occupational Completion Point: B**

**Accelerated Home Health Aide – 25 hours**

Students in this module have already completed a Nursing Assistant program. After completing this module, the student will have achieved the occupational completion point of a Home Health Aide (a home health aide who is also a nursing assistant). This program also meets the

requirements of a Home Health Aide as stated in Rules of the Department of Health and Rehabilitative Services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

**Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.**

The recommended length of instruction for this module is 25 clock hours, but no less than 20 hours. Students who have completed the Nursing Assistant program should take this module to become a Home Health Aide.

20.0 Use verbal and written communications specific to the Home Health Aide. The student will be able to:

20.01 Obtain data from the patient and family/significant others.

20.02 Utilize verbal and written information to contribute to the patient's plan of care.

20.03 Recognizes cultural differences in family.

21.0 Demonstrate legal and ethical responsibilities specific to the Home Health Aide. The student will be able to:

21.01 Demonstrate legal and ethical behavior within the role and scope of home health aide responsibilities.

21.02 Follow policies and procedures affecting the health, safety, and well-being of patients in the home setting.

22.0 Perform physical comfort and safety functions specific to the Home Health Aide. The student will be able to:

22.01 Maintain a clean and safe home environment for the patient.

22.02 Identify emergency evacuation procedures with adaptations to the home setting.

23.0 Apply principles of nutrition specific to the Home Health Aide. The student will be able to:

23.01 List factors that must be considered when purchasing food.

23.02 List factors that must be considered when storing food.

23.03 Discuss the preparation and serving of trays in the home.

24.0 Apply the principles of infection control specific to the Home Health Aide. The student will be able to:

24.01 Provide care for patients with infectious diseases in the home.

24.02 Follow isolation procedures with food tray, garments, and other materials in the home.

24.03 Utilize standard and blood-borne precautions in all home care.

25.0 Perform home health-care services. The student will be able to:

|       |                                                                                                                                                                                                                  |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25.01 | <u>Follow an established work plan with the patient and family.</u>                                                                                                                                              |
| 25.02 | <u>Perform patient-related cleaning tasks and laundry.</u>                                                                                                                                                       |
| 25.03 | <u>Identify methods for medication storage.</u>                                                                                                                                                                  |
| 25.04 | <u>Assist patient with taking self-administered prescribed medication in the home and identify possible side effects and emergency procedures for adverse reactions in accordance with the Florida Statutes.</u> |
| 25.05 | <u>Demonstrate how to utilize specified equipment and supplies in the home.</u>                                                                                                                                  |

**Course Number: HCP0021**  
**Occupational Completion Point: C**  
**Patient Care Assistant – 45 Hours**

Students enrolled in this module have previously completed a Nursing Assistant and Home Health Aide program and are adding these skills to work in a health care facility other than a nursing home. The average achieving student should complete this module in 40 clock hours with a minimum of 20 clinical hours. The occupational completion point for Patient Care Assistant can only be achieved when this module is completed, plus the modules/or credentials for Home Health Aide and Nursing Assistant are satisfied.

|       |                                                                                                       |
|-------|-------------------------------------------------------------------------------------------------------|
| 26.0  | <u>Perform nursing assistant skills related to the hospital setting. The student will be able to:</u> |
| 26.01 | <u>Care for hospital equipment and supplies.</u>                                                      |
| 26.02 | <u>Transfer patient to a stretcher and wheelchair.</u>                                                |
| 26.03 | <u>Prepare hot and cold applications for a nurse to apply them.</u>                                   |
| 26.04 | <u>Assist the patient to apply binders.</u>                                                           |
| 26.05 | <u>Care for the patient in skin and skeletal traction.</u>                                            |
| 26.06 | <u>Assist with pre-operative and post-operative patient care.</u>                                     |
| 26.07 | <u>Practice nursing assistant skills in the hospital setting.</u>                                     |
| 27.0  | <u>Provide nursing assistant care for the adult patient. The student will be able to:</u>             |
| 27.01 | <u>Assist with a physical examination.</u>                                                            |
| 27.02 | <u>Care for patients receiving oxygen therapy.</u>                                                    |
| 27.03 | <u>Change an unsterile dressing.</u>                                                                  |
| 27.04 | <u>Take an apical and pedal pulse.</u>                                                                |

|       |                                                                                                         |
|-------|---------------------------------------------------------------------------------------------------------|
| 27.05 | <u>Demonstrate an understanding of artificial eye and/or eyewear care.</u>                              |
| 27.06 | <u>Demonstrate an understanding and knowledge of the needs of patients with common health problems.</u> |
| 27.07 | <u>Measure pulse oximetry and report decreasing levels of O<sub>2</sub> saturation.</u>                 |

**Course Number: HSC0012**  
**Occupational Completion Point: D**  
**Allied Health Assistant – 100 Hours**

Students enrolled in this module have completed the Patient Care Assistant competencies and/or are adding these skills to be multi-skilled workers. Students will perform skills representative of one to three areas of allied health care in the laboratory and clinical settings. Major areas of allied health are defined as physical therapy, emergency, radiation, laboratory and respiratory medicine, and occupational therapy. Other areas of health, medicine, dentistry, or veterinary may be included with instructor-provided competencies. **Such teacher-made competencies must remain at the aide level and not go beyond the scope of practice of unlicensed assistive personnel. Invasive procedures that fall into the nursing scope of practice are not to be added.** Clinical experience is defined as activities performed in the clinical setting under the supervision of the appropriate health professional. School certificates for this module must be for “Allied Health Assistant”. Specific competencies should be listed on the back of the certificate.

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 29.02 | <u>Complete clinical rotations under the supervision of a duly licensed/certified allied health care or nursing professional.</u>                                                                                                                                |
| 29.03 | <u>Exhibit behavior consistent with the professional ethics required of each of the allied health areas being studied.</u>                                                                                                                                       |

**Course Number: MEA0585****Occupational Completion Point: E****Advanced Allied Health Assistant – 200 Hours**

Students enrolled in this module have completed the Patient Care Assistant and Allied Health Assistant competencies, and/or are adding these skills to be more multi-skilled workers. Students will perform skills representative of one to three areas of allied health care in the laboratory and clinical settings. Major areas of allied health are defined as physical therapy, emergency, radiation, laboratory and respiratory medicine, and occupational therapy. Other areas of health, medicine, dentistry, or veterinary may be included with instructor-provided competencies. **Such teacher-made competencies must remain at the aide level and not go beyond the scope of practice of unlicensed assistive personnel. Invasive procedures that fall into the nursing scope of practice are not to be added.** Clinical experience is defined as activities performed in the clinical setting under the supervision of the appropriate health professional. School certificates for this module must be for "Advanced Allied Health Assistant". Specific competencies should be listed on the back of the certificate.

|       |                                                                                                                                                           |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 30.0  | <u>Perform additional skills from the previous module at the aide level and do not go beyond the scope of practice of unlicensed assistive personnel.</u> |
| 31.0  | <u>Complete a clinical rotation in the selected major allied health area. The student will be able to:</u>                                                |
| 31.01 | <u>Demonstrate skills in the selected major allied health areas in the clinical setting.</u>                                                              |
| 31.02 | <u>Complete clinical rotations under the supervision of a duly licensed/certified allied health care or nursing professional.</u>                         |
| 31.03 | <u>Exhibit behavior consistent with the professional ethics required of each of the allied health areas being studied.</u>                                |

**Course Number: PRN0095**  
**Occupational Completion Point: F**  
**Patient Care Technician – 65 Hours**

Students enrolled in this module MUST have completed ALL modules in this program. Upon completion, they will be prepared as the cross-trained unlicensed worker known as the Patient Care Technician (Industry Title).

32.0 Demonstrate knowledge of organizational and effective team member skills. The student will be able to:

32.01 Define terms associated with organizational and time management skills.

32.02 Discuss various situations when a Patient Care Technician would utilize organizational skills.

32.03 List the characteristics of an effective team member.

32.04 Discuss the chain of command and characteristics of team member relationships.

32.05 Perform a self-evaluation.

33.0 Practice organizational and effective team member skills in a clinical setting. The student will be able to:

33.01 Demonstrate ways to deal with conflict.

33.02 Demonstrate employability skills specific to a patient care technician.

33.03 Demonstrate communication skills that are supportive of team members.

33.04 Demonstrate effective time management skills.

33.05 Give and receive end-of-shift reports to team members.

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program also meets the requirements of Home Health Aide as stated in Rules of the Department of Health and Rehabilitative services, Division of Health, Chapter 10D-68 - Minimum Standards for Home Health Agencies.

Please refer to 42CFR§484 for the clinical and faculty requirements for the Home Health Aide course.

This program meets the Department of Health's education requirements for HIV/AIDS, Domestic Violence and Prevention of Medical Errors. Although not a requirement for initial licensure, it is a requirement for renewal, therefore the instructor **may** provide a certificate for renewal purposes to the student verifying these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

A voluntary Certified Patient Care Technician (CPCT) national Examination is available through the:

National Healthcare Association <http://www.nhanow.com/>  
7500 West 160<sup>th</sup> Street, Stilwell, Kansas 66085  
Phone: 973-605-1881, Toll Free: (800) 499-9092, FAX: (913) 661-6291

Completion of this program should enable the postsecondary student to be given advanced standing in the Practical Nursing program H170607.

The Core should be taken first in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### Career and Technical Student Organization (CTSO)

CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTOSs not listed in

this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

**Florida Department of Education  
Student Performance Standards**

**Health Science Core Standards and Benchmarks**

**Career Certificate Program and College Level**

The **Health Science Core** is required in the majority of Career Certificate Program and College Level health science programs. At the Career Certificate Program level, the health science core is offered through **Basic Health Care Worker (HSC0003) on page 2 of this document**. In college credit programs it is encompassed in **standards 1-11 listed on page 8 of this document**. Secondary and Postsecondary students completing the health science core will not have to repeat the core in any other health science programs in which it is a part of. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

Outcomes 01-11 are referred to as the Health Science Core and do not have to be completed if the student has previously completed the Core in another health occupations program at any level. The Core should be taken first in the program.

**When offered as a Career Certificate Program or ATD clock hour program, the following course (standards 1-11) encompasses the Health Science Core:**

**Course Number: HSC0003**

**Occupational Completion Point: A**

**Basic Healthcare Worker – 90 Hours**

|       |                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------|
| 01.0  | Demonstrate knowledge of the healthcare delivery system and health occupations. The student will be able to:                                |
| 01.01 | Identify the basic components of the healthcare delivery system including public, private, government and non-profit.                       |
| 01.02 | Identify common methods of payment for healthcare services.                                                                                 |
| 01.03 | Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence. |
| 01.04 | Describe the composition and functions of a healthcare team.                                                                                |
| 01.05 | Identify the general roles and responsibilities of the individual members of the healthcare team.                                           |
| 01.06 | Identify the roles and responsibilities of the consumer within the healthcare delivery system.                                              |
| 01.07 | Identify characteristics of effective teams.                                                                                                |
| 01.08 | Recognize methods for building positive team relationships.                                                                                 |

|       |                                                                                                                                                                |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01.09 | Discuss attributes and attitudes of an effective leader.                                                                                                       |
| 01.10 | Recognize factors and situations that may lead to conflict.                                                                                                    |
| 01.11 | Recognize effective techniques for managing team conflict.                                                                                                     |
| 01.12 | Describe factors that influence the current delivery system of healthcare.                                                                                     |
| 01.13 | Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.                         |
| 02.0  | Demonstrate the ability to communicate and use interpersonal skills effectively. The student will be able to:                                                  |
| 02.01 | Develop basic speaking and active listening skills.                                                                                                            |
| 02.02 | Develop basic observational skills and related documentation strategies in written and oral form.                                                              |
| 02.03 | Identify characteristics of successful and unsuccessful communication including communication styles and barriers.                                             |
| 02.04 | Identify characteristics of verbal and non-verbal cues.                                                                                                        |
| 02.05 | Use appropriate medical terminology and abbreviations.                                                                                                         |
| 02.06 | Discuss the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.                        |
| 02.07 | Explain the importance of patient/client educations regarding healthcare.                                                                                      |
| 02.08 | Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic, and religious groups. |
| 02.09 | Discuss elements of communication using a sender-receiver model.                                                                                               |
| 02.10 | Distinguish between and report subjective and objective information.                                                                                           |
| 02.11 | Report relevant information in order of occurrence.                                                                                                            |
| 03.0  | Demonstrate legal and ethical responsibilities. The student will be able to:                                                                                   |
| 03.01 | Explain the legal framework of the healthcare occupations including scope of practice legislation.                                                             |
| 03.02 | Understand the concept of medical direction in pre-hospital care.                                                                                              |
| 03.03 | Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.                                          |
| 03.04 | Explain procedures for accurate documentation and record keeping.                                                                                              |

|       |                                                                                                                                                                                           |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.05 | Explain the importance of healthcare facility policy and procedures for employees.                                                                                                        |
| 03.06 | Explain the “Patient’s Bill of Rights”.                                                                                                                                                   |
| 03.07 | Identify and explain standards of the Health Insurance Portability and Accountability Act (HIPAA).                                                                                        |
| 03.08 | Describe advance directives.                                                                                                                                                              |
| 03.09 | Describe informed consent.                                                                                                                                                                |
| 03.10 | Explain the laws governing harassment, labor and employment.                                                                                                                              |
| 03.11 | Differentiate between legal and ethical issues in healthcare.                                                                                                                             |
| 03.12 | Describe a code of ethics consistent with the healthcare occupation.                                                                                                                      |
| 03.13 | Identify and compare personal, professional, and organizational ethics.                                                                                                                   |
| 03.14 | Discuss the limits of authority and responsibility of health care workers including legislated scope of practice.                                                                         |
| 03.15 | Recognize and report illegal and/or unethical practices of healthcare workers.                                                                                                            |
| 03.16 | Recognize and report abuse including domestic violence, neglect and suspected human trafficking.                                                                                          |
| 03.17 | Distinguish between the five schedules of controlled substances.                                                                                                                          |
| 04.0  | Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:                                                                                     |
| 04.01 | Describe strategies for prevention of diseases including health screenings and examinations.                                                                                              |
| 04.02 | Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.                                                             |
| 04.03 | Identify psychological reactions to illness including defense mechanisms.                                                                                                                 |
| 04.04 | Identify complementary and alternative health practices.                                                                                                                                  |
| 04.05 | Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors. |
| 04.06 | Explain the basic concepts of positive self-image, wellness and stress.                                                                                                                   |
| 04.07 | Develop a wellness and stress control plan that can be used in personal and professional life.                                                                                            |
| 04.08 | Identify and develop resilience building methods in response to mental health stressors.                                                                                                  |
| 04.09 | Explore and utilize the U.S. Department of Agriculture’s nutrition resources.                                                                                                             |

|       |                                                                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 04.10 | Discuss the steps in the grief process.                                                                                                                                                       |
| 05.0  | Recognize and practice safety and security procedures. The student will be able to:                                                                                                           |
| 05.01 | Recognize safe and unsafe working conditions and report safety hazards.                                                                                                                       |
| 05.02 | Explain why understanding how to safely use medical equipment is important.                                                                                                                   |
| 05.03 | Explain and apply the theory of root- cause analysis.                                                                                                                                         |
| 05.04 | Identify and describe methods in medical error reduction and prevention in the various healthcare settings.                                                                                   |
| 05.05 | Identify and practice security procedures for medical supplies and equipment.                                                                                                                 |
| 05.06 | Explain personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations including standard precautions.             |
| 05.07 | Recognize Safety Data Sheets and comply with safety signs, symbols, and labels.                                                                                                               |
| 05.08 | Explain proper body mechanics and ergonomics.                                                                                                                                                 |
| 05.09 | Explain the procedure for properly identifying patients.                                                                                                                                      |
| 05.10 | Explain procedures for the safe transport and transfer of patients.                                                                                                                           |
| 05.11 | Recognize fire, safety, disaster and evacuations procedures.                                                                                                                                  |
| 05.12 | Discuss the Joint Commission patient safety goals ( <a href="http://www.jointcommission.org">www.jointcommission.org</a> ) and any other applicable accrediting/regulatory agency guidelines. |
| 06.0  | Recognize and respond to emergency situations. The student will be able to:                                                                                                                   |
| 06.01 | Record and monitor vital signs accurately.                                                                                                                                                    |
| 06.02 | Describe legal parameters relating to the administration of emergency care.                                                                                                                   |
| 06.03 | Obtain and maintain training for certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.         |
| 06.04 | Recognize adverse drug related emergencies and take appropriate first aid action.                                                                                                             |
| 07.0  | Recognize and practice infection control procedures. The student will be able to:                                                                                                             |
| 07.01 | Define principles of infection control including standard and transmission-based precautions.                                                                                                 |
| 07.02 | Explain medical asepsis and practice procedures such as handwashing and isolation.                                                                                                            |

|       |                                                                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.03 | Demonstrate the procedures to disinfect and decontaminate equipment after treating a patient with infectious disease.                                                                              |
| 07.04 | Explain surgical asepsis.                                                                                                                                                                          |
| 07.05 | Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.                                                                           |
| 08.0  | Demonstrate an understanding of information technology applications in healthcare. The student will be able to:                                                                                    |
| 08.01 | Describe technology applications in healthcare.                                                                                                                                                    |
| 08.02 | Define terms and demonstrate basic computer skills.                                                                                                                                                |
| 08.03 | Recognize technology applications in healthcare.                                                                                                                                                   |
| 08.04 | Interpret information from electronic medical documents.                                                                                                                                           |
| 08.05 | Identify methods of communication to access and distribute data such as fax, e-mail, and internet.                                                                                                 |
| 09.0  | Demonstrate employability skills. The student will be able to:                                                                                                                                     |
| 09.01 | Identify personal traits or attitudes desirable in a member of the healthcare team.                                                                                                                |
| 09.02 | Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality, and behavior (i.e. telephone etiquette, courtesy and self-introductions). |
| 09.03 | Identify documents that may be required when applying for a job.                                                                                                                                   |
| 09.04 | Write an appropriate resume.                                                                                                                                                                       |
| 09.05 | Conduct a job search.                                                                                                                                                                              |
| 09.06 | Complete a job application form correctly.                                                                                                                                                         |
| 09.07 | Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments, and career growth potential.                      |
| 09.08 | Identify acceptable work habits.                                                                                                                                                                   |
| 09.09 | Recognize appropriate affective/professional behavior.                                                                                                                                             |
| 09.10 | Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services and biotechnology research and development).            |
| 10.0  | Demonstrate knowledge of blood borne diseases. The student will be able to:                                                                                                                        |
| 10.01 | Recognize emerging diseases and disorders.                                                                                                                                                         |

|       |                                                                                                                                                                                                     |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.02 | Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens.                                                                              |
| 10.03 | Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.                                                                               |
| 10.04 | Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.                        |
| 10.05 | Explain infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines. |
| 10.06 | Explain the legal aspects of HIV/AIDS, including testing.                                                                                                                                           |
| 11.0  | Apply basic math and science skills. The student will be able to:                                                                                                                                   |
| 11.01 | Draw, read, and report on graphs, charts, and tables.                                                                                                                                               |
| 11.02 | Measure time, temperature, distance, capacity, and mass/weight.                                                                                                                                     |
| 11.03 | Make, use and convert using both traditional and metric units.                                                                                                                                      |
| 11.04 | Make estimations and approximations and judge the reasonableness of the result.                                                                                                                     |
| 11.05 | Convert from regular to 24-hour time.                                                                                                                                                               |
| 11.06 | Demonstrate ability to evaluate and draw conclusions.                                                                                                                                               |
| 11.07 | Organize and communicate the results obtained by observation and experimentation.                                                                                                                   |
| 11.08 | Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.                                                                   |
| 11.09 | Calculate ratios.                                                                                                                                                                                   |

**Florida Department of Education  
Student Performance Standards**

**When offered as a college credit program, AS/CCC/ATD, the following course (standards 1-11) encompasses the Health Science Core:**

|       |                                                                                                                                             |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------|
| 01.0  | Demonstrate knowledge of the healthcare delivery system and health occupations. The student will be able to:                                |
| 01.01 | Identify the basic components of the healthcare delivery system including public, private, government and non-profit.                       |
| 01.02 | Identify common methods of payment for healthcare services.                                                                                 |
| 01.03 | Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence. |
| 01.04 | Describe the composition and functions of a healthcare team.                                                                                |
| 01.05 | Identify the general roles and responsibilities of the individual members of the healthcare team.                                           |
| 01.06 | Identify the roles and responsibilities of the consumer within the healthcare delivery system.                                              |
| 01.07 | Identify characteristics of effective teams.                                                                                                |
| 01.08 | Recognize methods for building positive team relationships.                                                                                 |
| 01.09 | Analyze attributes and attitudes of an effective leader.                                                                                    |
| 01.10 | Recognize factors and situations that may lead to conflict.                                                                                 |
| 01.11 | Demonstrate effective techniques for managing team conflict.                                                                                |
| 01.12 | Describe factors that influence the current delivery system of healthcare.                                                                  |
| 01.13 | Explain the impact of emerging issues including technology, epidemiology, bioethics, and socioeconomics on healthcare delivery systems.     |
| 02.0  | Demonstrate the ability to communicate and use interpersonal skills effectively. The student will be able to:                               |
| 02.01 | Develop basic speaking and active listening skills.                                                                                         |
| 02.02 | Develop basic observational skills and related documentation strategies in written and oral form.                                           |
| 02.03 | Identify characteristics of successful and unsuccessful communication including communication styles and barriers.                          |
| 02.04 | Respond to verbal and non-verbal cues.                                                                                                      |

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02.05 | Compose written communication using correct spelling, grammar, formatting and confidentiality and specific formats of letter writing.                         |
| 02.06 | Use appropriate medical terminology and abbreviations.                                                                                                        |
| 02.07 | Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.                     |
| 02.08 | Recognize the importance of patient/client educations regarding healthcare.                                                                                   |
| 02.09 | Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups. |
| 02.10 | Analyze elements of communication using a sender-receiver model.                                                                                              |
| 02.11 | Distinguish between and report subjective and objective information.                                                                                          |
| 02.12 | Report relevant information in order of occurrence.                                                                                                           |
| 03.0  | Demonstrate legal and ethical responsibilities. The student will be able to:                                                                                  |
| 03.01 | Discuss the legal framework of the healthcare occupations including scope of practice legislation.                                                            |
| 03.02 | Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.                                         |
| 03.03 | Demonstrate procedures for accurate documentation and record keeping.                                                                                         |
| 03.04 | Interpret healthcare facility policy and procedures.                                                                                                          |
| 03.05 | Explain the “Patient’s Bill of Rights”.                                                                                                                       |
| 03.06 | Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).                                                                        |
| 03.07 | Describe advance directives.                                                                                                                                  |
| 03.08 | Describe informed consent.                                                                                                                                    |
| 03.09 | Explain the laws governing harassment, labor, and employment.                                                                                                 |
| 03.10 | Differentiate between legal and ethical issues in healthcare.                                                                                                 |
| 03.11 | Describe a code of ethics consistent with the healthcare occupation.                                                                                          |
| 03.12 | Identify and compare personal, professional, and organizational ethics.                                                                                       |
| 03.13 | Recognize the limits of authority and responsibility of health care workers including legislated scope of practice.                                           |

|       |                                                                                                                                                                                           |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.14 | Recognize and report illegal and/or unethical practices of healthcare workers.                                                                                                            |
| 03.15 | Recognize and report abuse including domestic violence and neglect.                                                                                                                       |
| 03.16 | Distinguish among the five schedules of controlled substances.                                                                                                                            |
| 04.0  | Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:                                                                                     |
| 04.01 | Describe strategies for prevention of diseases including health screenings and examinations.                                                                                              |
| 04.02 | Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.                                                             |
| 04.03 | Identify psychological reactions to illness including defense mechanisms.                                                                                                                 |
| 04.04 | Identify complementary and alternative health practices.                                                                                                                                  |
| 04.05 | Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors. |
| 04.06 | Explain the basic concepts of positive self-image, wellness, and stress.                                                                                                                  |
| 04.07 | Develop a wellness and stress control plan that can be used in personal and professional life.                                                                                            |
| 04.08 | Explore and utilize the U.S. Department of Agriculture's nutrition resources.                                                                                                             |
| 04.09 | Recognize the steps in the grief process.                                                                                                                                                 |
| 05.0  | Recognize and practice safety and security procedures. The student will be able to:                                                                                                       |
| 05.01 | Recognize safe and unsafe working conditions and report safety hazards.                                                                                                                   |
| 05.02 | Demonstrate the safe use of medical equipment.                                                                                                                                            |
| 05.03 | Explain and apply the theory of root- cause analysis.                                                                                                                                     |
| 05.04 | Identify and describe methods in medical error reduction and prevention in the various healthcare settings.                                                                               |
| 05.05 | Identify and practice security procedures for medical supplies and equipment.                                                                                                             |
| 05.06 | Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations including standard precautions.     |
| 05.07 | Recognize Safety Data Sheets and comply with safety signs, symbols, and labels.                                                                                                           |
| 05.08 | Demonstrate proper body mechanics and ergonomics.                                                                                                                                         |

|       |                                                                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 05.09 | Demonstrate the procedure for properly identifying patients.                                                                                                                                  |
| 05.10 | Demonstrate procedures for the safe transport and transfer of patients.                                                                                                                       |
| 05.11 | Describe fire, safety, disaster, and evacuations procedures.                                                                                                                                  |
| 05.12 | Discuss The Joint Commission patient safety goals ( <a href="http://www.jointcommission.org">www.jointcommission.org</a> ) and any other applicable accrediting/regulatory agency guidelines. |
| 06.0  | Recognize and respond to emergency situations. The student will be able to:                                                                                                                   |
| 06.01 | Record and monitor vital signs.                                                                                                                                                               |
| 06.02 | Describe legal parameters relating to the administration of emergency care.                                                                                                                   |
| 06.03 | Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.          |
| 06.04 | Recognize adverse drug related emergencies and take appropriate first aid action.                                                                                                             |
| 07.0  | Recognize and practice infection control procedures. The student will be able to:                                                                                                             |
| 07.01 | Define principles of infection control including standard and transmission-based precautions.                                                                                                 |
| 07.02 | Demonstrate knowledge of medical asepsis and practice procedures such as handwashing and isolation.                                                                                           |
| 07.03 | Demonstrate knowledge of surgical asepsis.                                                                                                                                                    |
| 07.04 | Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.                                                                      |
| 08.0  | Demonstrate an understanding of information technology applications in healthcare. The student will be able to:                                                                               |
| 08.01 | Describe technology applications in healthcare.                                                                                                                                               |
| 08.02 | Define terms and demonstrate basic computer skills.                                                                                                                                           |
| 08.03 | Recognize technology applications in healthcare.                                                                                                                                              |
| 08.04 | Interpret information from electronic medical documents.                                                                                                                                      |
| 08.05 | Identify methods of communication to access and distribute data such as fax, e-mail and internet.                                                                                             |
| 09.0  | Demonstrate employability skills. The student will be able to:                                                                                                                                |
| 09.01 | Identify personal traits or attitudes desirable in a member of the healthcare team.                                                                                                           |

|       |                                                                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09.02 | Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality, and behavior (i.e. telephone etiquette, courtesy and self-introductions). |
| 09.03 | Identify documents that may be required when applying for a job.                                                                                                                                   |
| 09.04 | Write an appropriate resume.                                                                                                                                                                       |
| 09.05 | Conduct a job search.                                                                                                                                                                              |
| 09.06 | Complete a job application form correctly.                                                                                                                                                         |
| 09.07 | Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments, and career growth potential.                      |
| 09.08 | Recognize levels of education, credentialing requirements, employment opportunities, workplace environments, and career growth potential.                                                          |
| 09.09 | Identify acceptable work habits.                                                                                                                                                                   |
| 09.10 | Recognize appropriate affective/professional behavior.                                                                                                                                             |
| 09.11 | Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services and biotechnology research and development).            |
| 10.0  | Demonstrate knowledge of blood borne diseases, including HIV/AIDS. The student will be able to:                                                                                                    |
| 10.01 | Recognize emerging diseases and disorders.                                                                                                                                                         |
| 10.02 | Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.                                                       |
| 10.03 | Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.                                                                              |
| 10.04 | Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.                       |
| 10.05 | Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.  |
| 10.06 | Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.                                                                                                                         |
| 11.0  | Apply basic math and science skills. The student will be able to:                                                                                                                                  |
| 11.01 | Draw, read, and report on graphs, charts, and tables.                                                                                                                                              |
| 11.02 | Measure time, temperature, distance, capacity, and mass/weight.                                                                                                                                    |
| 11.03 | Make, use and convert using both traditional and metric units.                                                                                                                                     |
| 11.04 | Make estimations and approximations and judge the reasonableness of the result.                                                                                                                    |

|       |                                                                                                                                   |
|-------|-----------------------------------------------------------------------------------------------------------------------------------|
| 11.05 | Convert from regular to 24-hour time.                                                                                             |
| 11.06 | Demonstrate ability to evaluate and draw conclusions.                                                                             |
| 11.07 | Organize and communicate the results obtained by observation and experimentation.                                                 |
| 11.08 | Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions. |
| 11.09 | Calculate ratios.                                                                                                                 |

**Florida Department of Education  
Student Performance Standards**

**Health Science Core Standards and Benchmarks**

**Secondary Level**

The **Health Science Core** is a prerequisite of the majority of secondary health science programs. The two credit core is required as a prerequisite for all programs except for Practical Nursing and Pharmacy Technician and consists of the courses Health Science Anatomy & Physiology (8417100) and Health Science Foundations (8417110). These courses were previously titled Health Science 1 and Health Science 2. Secondary students completing the two required courses will not have to repeat the core in postsecondary. When the recommended sequence is followed, the structure allows students to complete at specified points for employment or remain for advanced training or cross-training. A student who completes the applicable competencies at any occupational completion point may either continue with the training program or exit as an occupational completer.

The course *Anatomy and Physiology (2000350)* or *Anatomy and Physiology Honors (2000360)* may be substituted for the course Health Science Anatomy & Physiology (8417100) and their standards can be found at [www.cpalms.org](http://www.cpalms.org).

The course Health Science Anatomy & Physiology (8417100) is designated as an equally rigorous (EQ) science credit.

**Course Structure**

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course. The following table illustrates the secondary health core course structure:

| Course Number            | Course Title                                                                | Teacher Certification                                                         | Length   | SOC Code | Level | Graduation Requirement |
|--------------------------|-----------------------------------------------------------------------------|-------------------------------------------------------------------------------|----------|----------|-------|------------------------|
| 8417100<br>OR            | Health Science Anatomy & Physiology<br>OR                                   | BIOLOGY 1<br>ANY HEALTH OCCUP G<br>*( <a href="#">See DOE approved list</a> ) | 1 credit | 31-9099  | 3     | EQ                     |

(Graduation Requirement Codes: CT= Career & Technical Education, EQ= Equally Rigorous Science, EC= Economics, MA= Mathematics, PL= Personal Financial Literacy)

**Florida Department of Education  
Student Performance Standards**

**Course Title:** ——— **Health Science Anatomy & Physiology**

**Course Number:** — **8417100**

**Course Credit:** — **1**

**Course Description:**

This course is part of the secondary Health Core consisting of a study of the human body, both structurally and functionally with emphasis on the pathophysiology and transmission of disease. Medical terminology is an integral part of the course.

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental quality, and safety procedures will be an integral part of this course. Students will interact with materials and primary sources of data or with secondary sources of data to observe and understand the natural world. Students will develop an understanding of measurement error, and develop the skills to aggregate, interpret, and present the data and resulting conclusions. Equipment and supplies will be provided to enhance these hands-on experiences for students. **A minimum of 20% of classroom time will be dedicated to laboratory experiences.**

| CTE Standards and Benchmarks |                                                                                                                                                                        |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01.0                         | Analyze and interpret an overview of the human body, including organization and chemical process. The student will be able to:                                         |
| 01.01                        | Evaluate interrelationships of the basic structural and functional organization of the human body including chemical, cellular, tissue and organ systems.              |
| 01.02                        | Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.                                               |
| 01.03                        | Examine medical implications of body planes, directional terms, cavities, abdominal regions, and quadrants.                                                            |
| 01.04                        | Discuss the chemical processes that maintain life, including homeostasis, cellular respiration, the role of enzymes as catalysts and the basic concepts of metabolism. |
| 02.0                         | Apply correct medical terminology relating to body structure and function within a real-world application. The student will be able to:                                |
| 02.01                        | Evaluate and apply anatomical terminology to describe location of parts or areas of the body and to describe the relation of one part to another.                      |
| 02.02                        | Interpret correct medical terminology including roots, prefixes and suffixes to indicate anatomical structures and function.                                           |
| 02.03                        | Extend medical terminology to real-world applications.                                                                                                                 |
| 03.0                         | Evaluate cells and tissues microscopically and macroscopically and relate their specialized functions. The student will be able to:                                    |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                   |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.01 | Discuss and describe cell structure and function in healthy tissue.                                                                                               |
| 03.02 | Discuss and describe cell structure and function in diseased tissue including how damage to one tissue may impact the function of another tissue.                 |
| 03.03 | Compare and contrast the four main types of tissue including the interrelationships of tissues.                                                                   |
| 03.04 | Discuss the location and function of tissues as it relates to homeostasis.                                                                                        |
| 04.0  | Analyze the integumentary system in relation to health and disease. The student will be able to:                                                                  |
| 04.01 | Apply medical terminology as related to the integumentary system.                                                                                                 |
| 04.02 | Discuss and describe the structure and function of the integumentary system across the lifespan.                                                                  |
| 04.03 | Demonstrate knowledge of cells and tissues in the integumentary system.                                                                                           |
| 04.04 | Identify and analyze common diseases and disorders of the integumentary system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation. |
| 04.05 | Discuss or research health careers related to the integumentary system.                                                                                           |
| 04.06 | Demonstrate knowledge of skills related to the integumentary system which may include infection control and hand washing skills.                                  |
| 05.0  | Analyze the skeletal system in relation to health and disease. The student will be able to:                                                                       |
| 05.01 | Apply medical terminology as related to the skeletal system.                                                                                                      |
| 05.02 | Discuss and describe the structure and function of the skeletal system across the lifespan.                                                                       |
| 05.03 | Identify and explain major bone markings and their implications.                                                                                                  |
| 05.04 | Identify and explain joints and their implications.                                                                                                               |
| 05.05 | Discuss the interrelationship between calcium, hormones, and the skeletal system.                                                                                 |
| 05.06 | Apply knowledge of cells and tissues in the skeletal system.                                                                                                      |
| 05.07 | Identify and analyze common diseases and disorders of the skeletal system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation.      |
| 05.08 | Discuss or research health careers related to the skeletal system.                                                                                                |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                              |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 05.09 | Demonstrate knowledge of skills related to the skeletal system which may include range of motion.                                                            |
| 06.0  | Analyze the muscular system in relation to health and disease. The student will be able to:                                                                  |
| 06.01 | Apply medical terminology as related to the muscular system.                                                                                                 |
| 06.02 | Discuss and describe the structure and function of the muscular system across the lifespan.                                                                  |
| 06.03 | Identify and explain the 3 main types of muscles and their implications.                                                                                     |
| 06.04 | Interpret muscle function by examining attachment to bone.                                                                                                   |
| 06.05 | Discuss the interrelationship between calcium, ions, and the muscular system.                                                                                |
| 06.06 | Apply knowledge of cells and tissues in the muscular system.                                                                                                 |
| 06.07 | List the steps involved in the sliding filament of muscle contraction.                                                                                       |
| 06.08 | Describe signal transmission across a myoneural/neuromuscular junction.                                                                                      |
| 06.09 | Identify and analyze common diseases and disorders of the muscular system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation. |
| 06.10 | Discuss or research health careers related to the muscular system.                                                                                           |
| 06.11 | Demonstrate knowledge of skills related to the muscular system which may include isometric and isotonic contractions.                                        |
| 07.0  | Analyze the nervous system in relation to health and disease. The student will be able to:                                                                   |
| 07.01 | Apply medical terminology as related to the nervous system.                                                                                                  |
| 07.02 | Discuss and describe the structure and function of the nervous system across the lifespan.                                                                   |
| 07.03 | Identify and explain the interrelatedness of the Central Nervous System (CNS) and Peripheral Nervous System (PNS).                                           |
| 07.04 | Compare and contrast the divisions of the Autonomic Nervous System (ANS).                                                                                    |
| 07.05 | Apply knowledge of cells and tissues in the nervous system.                                                                                                  |
| 07.06 | Explain how neurotransmitters help propagate electrical impulses.                                                                                            |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.07 | Describe reflex pathways and their importance.                                                                                                                |
| 07.08 | Identify and analyze common diseases and disorders of the nervous system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation.   |
| 07.09 | Discuss or research health careers related to the nervous system.                                                                                             |
| 07.10 | Demonstrate knowledge of skills related to the nervous system which may include recognizing signs and symptoms of a stroke.                                   |
| 08.0  | Analyze the endocrine system in relation to health and disease. The student will be able to:                                                                  |
| 08.01 | Apply medical terminology as related to the endocrine system.                                                                                                 |
| 08.02 | Discuss and describe the structure and function of the endocrine system across the lifespan.                                                                  |
| 08.03 | Compare and contrast endocrine and exocrine glands.                                                                                                           |
| 08.04 | Compare and contrast negative and positive feedback loops.                                                                                                    |
| 08.05 | Evaluate the relationship between the endocrine system and homeostasis in health and disease.                                                                 |
| 08.06 | Apply knowledge of cells and tissues in the endocrine system.                                                                                                 |
| 08.07 | Identify and analyze common diseases and disorders of the endocrine system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation. |
| 08.08 | Discuss or research health careers related to the endocrine system.                                                                                           |
| 08.09 | Demonstrate knowledge of skills related to the endocrine system which may include recognizing the signs and symptoms of low blood sugar.                      |
| 09.0  | Analyze the cardiovascular/circulatory system in relation to health and disease. The student will be able to:                                                 |
| 09.01 | Apply medical terminology as related to the cardiovascular system.                                                                                            |
| 09.02 | Discuss and describe the structure and function of the cardiovascular system across the lifespan.                                                             |
| 09.03 | Demonstrate knowledge of major blood vessels.                                                                                                                 |
| 09.04 | Compare and contrast the structure and function of arteries, veins, and capillaries.                                                                          |
| 09.05 | Analyze the interdependence between systemic and pulmonary circulation.                                                                                       |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                           |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09.06 | Design a map or flow chart depicting the normal pathway of blood flow through the heart.                                                                                  |
| 09.07 | Design a map or flow chart depicting the normal electrical pathway through the heart.                                                                                     |
| 09.08 | Apply knowledge of cells and tissues in the cardiovascular system.                                                                                                        |
| 09.09 | Demonstrate knowledge of the composition of blood to include formed elements and plasma.                                                                                  |
| 09.10 | Evaluate ABO blood types and Rh factor.                                                                                                                                   |
| 09.11 | Predict potential blood donors for a transfusion through the analysis of blood types with ABO and/or Rh compatibility.                                                    |
| 09.12 | Identify and analyze common diseases and disorders of the cardiovascular system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation.        |
| 09.13 | Discuss or research health careers related to the cardiovascular system.                                                                                                  |
| 09.14 | Demonstrate knowledge of skills related to the cardiovascular system which might include assessing pulse.                                                                 |
| 10.0  | Analyze the lymphatic and immune systems in relation to health and disease. The student will be able to:                                                                  |
| 10.01 | Apply medical terminology as related to the lymphatic and immune systems.                                                                                                 |
| 10.02 | Discuss and describe the structure and function of the lymphatic and immune systems across the lifespan.                                                                  |
| 10.03 | Explain the importance of the accessory organs (thymus, tonsils, spleen, appendix, Peyer's patch) promoting the effectiveness of the lymphatic and immune system.         |
| 10.04 | Compare and contrast passive and active immunity.                                                                                                                         |
| 10.05 | Discuss the impact of B cells and T cells on diseases of the immune system.                                                                                               |
| 10.06 | Evaluate and discuss the body's defense mechanisms in relation to common communicable diseases.                                                                           |
| 10.07 | Apply knowledge of cells and tissues in the lymphatic and immune systems.                                                                                                 |
| 10.08 | Identify and analyze common diseases and disorders of the lymphatic and immune system including etiology, prevention, pathology, diagnosis, and treatment/rehabilitation. |
| 10.09 | Discuss or research health careers related to the lymphatic and immune systems.                                                                                           |
| 11.0  | Analyze the respiratory system in relation to health and disease. The student will be able to:                                                                            |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                 |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.01 | Apply medical terminology as related to the respiratory system.                                                                                                 |
| 11.02 | Discuss and describe the structure and function of the respiratory system across the lifespan.                                                                  |
| 11.03 | Evaluate the interrelatedness of the cardiovascular and respiratory systems.                                                                                    |
| 11.04 | Apply knowledge of cells and tissues in the respiratory system.                                                                                                 |
| 11.05 | Identify and analyze common diseases and disorders of the respiratory system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation. |
| 11.06 | Discuss or research health careers related to the respiratory system.                                                                                           |
| 11.07 | Demonstrate knowledge of skills related to the respiratory system which might include monitoring respirations.                                                  |
| 12.0  | Analyze the digestive system in relation to health and disease. The student will be able to:                                                                    |
| 12.01 | Apply medical terminology as related to the digestive system.                                                                                                   |
| 12.02 | Discuss and describe the structure and function of the digestive system across the lifespan.                                                                    |
| 12.03 | Apply knowledge of cells and tissues in the digestive system.                                                                                                   |
| 12.04 | Identify and analyze common diseases and disorders of the digestive system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation.   |
| 12.05 | Discuss or research health careers related to the digestive system.                                                                                             |
| 12.06 | Demonstrate knowledge of skills related to the digestive system which might include a nutritional self-assessment.                                              |
| 13.0  | Analyze the urinary system in relation to health and disease. The student will be able to:                                                                      |
| 13.01 | Apply medical terminology as related to the urinary system.                                                                                                     |
| 13.02 | Discuss and describe the structure and function of the urinary system across the lifespan.                                                                      |
| 13.03 | Justify the interrelatedness of the urinary and cardiovascular system in promoting homeostasis.                                                                 |
| 13.04 | Apply knowledge of cells and tissues in the urinary system.                                                                                                     |
| 13.05 | Identify and analyze common diseases and disorders of the urinary system including etiology, prevention, pathology, diagnosis and treatment/rehabilitation.     |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                    |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.06 | Discuss or research health careers related to the urinary system.                                                                                                  |
| 13.07 | Demonstrate knowledge of skills related to the urinary system which may include how to use urine test strips.                                                      |
| 14.0  | Analyze the both the male and female reproductive systems in relation to health and disease. The student will be able to:                                          |
| 14.01 | Apply medical terminology as related to the each of the male and female reproductive systems.                                                                      |
| 14.02 | Discuss and describe the structure and function of both reproductive systems across the lifespan.                                                                  |
| 14.03 | Apply knowledge of cells and tissues of both reproductive systems.                                                                                                 |
| 14.04 | Identify and analyze common diseases and disorders of both reproductive systems including etiology, prevention, pathology, diagnosis and treatment/rehabilitation. |
| 14.05 | Discuss or research health careers related to both reproductive systems.                                                                                           |
| 14.06 | Explain fetal development with regard to trimesters and measuring according to the fetal growth chart.                                                             |
| 15.0  | Identify and explain factors relating to genetics and disease. The student will be able to:                                                                        |
| 15.01 | Discuss DNA and its role in human heredity.                                                                                                                        |
| 15.02 | Describe the role of human genetics in relation to genetic diseases.                                                                                               |
| 15.03 | Discuss or research current issues related to genetic research.                                                                                                    |
| 15.04 | Explore the relationship between mutation, cell cycle and uncontrolled cell growth that can result in cancer.                                                      |
| 15.05 | Explore how environmental factors contribute to an individual's overall wellness and quality of life.                                                              |
| 16.0  | Evaluate and apply the principles of disease transmission and control to real-world scenarios. The student will be able to:                                        |
| 16.01 | Discuss and explain the direct and indirect transmission of disease.                                                                                               |
| 16.02 | Discuss and apply the principles of the chain of infection to real-world scenarios.                                                                                |
| 16.03 | Categorize the common morphology of microorganisms affecting the human body.                                                                                       |
| 16.04 | Identify and analyze common diseases caused by microorganisms.                                                                                                     |

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Health Science Foundations  
**Course Number:** 8417110  
**Course Credit:** 1

**Course Description:**

This course is part of the Secondary Health Core designed to provide the student with an in depth knowledge of the health care system and associated occupations. Emphasis is placed on communication and interpersonal skills, use of technology, ethics and the development of critical thinking and problem solving skills. Students will also learn first aid skills and demonstrate the measurement of vital signs. Students may shadow professionals throughout the course.

| CTE Standards and Benchmarks |                                                                                                                                             |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| 17.0                         | Demonstrate knowledge of the health care delivery system and health occupations. The student will be able to:                               |
| 17.01                        | Identify the basic components of the health care delivery system including public, private, government and non-profit.                      |
| 17.02                        | Identify common methods of payment for healthcare services.                                                                                 |
| 17.03                        | Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence. |
| 17.04                        | Describe the composition and functions of a healthcare team.                                                                                |
| 17.05                        | Identify the general roles and responsibilities of the individual members of the healthcare team.                                           |
| 17.06                        | Identify the roles and responsibilities of the consumer within the healthcare delivery system.                                              |
| 17.07                        | Identify characteristics of effective teams.                                                                                                |
| 17.08                        | Recognize methods for building positive team relationships.                                                                                 |
| 17.09                        | Discuss attributes and attitudes of an effective leader.                                                                                    |
| 17.10                        | Recognize factors and situations that may lead to conflict.                                                                                 |
| 17.11                        | Recognize effective techniques for managing team conflict.                                                                                  |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                               |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.12 | Describe factors that influence the current delivery system of healthcare.                                                                                    |
| 17.13 | Explain the impact of emerging issues including technology, epidemiology, bioethics, and socioeconomics on healthcare delivery systems.                       |
| 18.0  | Demonstrate the ability to communicate and use interpersonal skills effectively. The student will be able to:                                                 |
| 18.01 | Develop basic speaking and active listening skills.                                                                                                           |
| 18.02 | Develop basic observational skills and related documentation strategies in written and oral form.                                                             |
| 18.03 | Identify characteristics of successful and unsuccessful communication including communication styles and barriers.                                            |
| 18.04 | Identify characteristics of verbal and non-verbal cues.                                                                                                       |
| 18.05 | Use appropriate medical terminology and abbreviations.                                                                                                        |
| 18.06 | Discuss the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.                       |
| 18.07 | Discuss the importance of patient/client education regarding healthcare.                                                                                      |
| 18.08 | Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups. |
| 18.09 | Discuss elements of communication using a sender-receiver model.                                                                                              |
| 18.10 | Distinguish between and report subjective and objective information.                                                                                          |
| 18.11 | Report relevant information in order of occurrence.                                                                                                           |
| 19.0  | Demonstrate legal and ethical responsibilities. The student will be able to:                                                                                  |
| 19.01 | Explain the legal framework of the healthcare occupations including scope of practice legislation.                                                            |
| 19.02 | Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud.                                        |
| 19.03 | Explain procedures for accurate documentation and record keeping.                                                                                             |
| 19.04 | Explain the importance of healthcare facility policy and procedures for employees.                                                                            |
| 19.05 | Explain the "Patient's Bill of Rights".                                                                                                                       |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                                           |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19.06 | Identify and explain standards of the Health Insurance Portability and Accountability Act (HIPAA).                                                                                        |
| 19.07 | Describe advance directives.                                                                                                                                                              |
| 19.08 | Describe informed consent.                                                                                                                                                                |
| 19.09 | Explain the laws governing harassment, labor and employment.                                                                                                                              |
| 19.10 | Differentiate between legal and ethical issues in healthcare.                                                                                                                             |
| 19.11 | Describe a code of ethics consistent with the healthcare occupation.                                                                                                                      |
| 19.12 | Identify and compare personal, professional, and organizational ethics.                                                                                                                   |
| 19.13 | Discuss the limits of authority and responsibility of health care workers including legislated scope of practice.                                                                         |
| 19.14 | Recognize and report illegal and/or unethical practices of healthcare workers.                                                                                                            |
| 19.15 | Recognize and report abuse including domestic violence, neglect and suspected human trafficking.                                                                                          |
| 19.16 | Distinguish between the five schedules of controlled substances.                                                                                                                          |
| 20.0  | Demonstrate an understanding of and apply wellness and disease concepts. The student will be able to:                                                                                     |
| 20.01 | Describe strategies for prevention of diseases including health screenings and examinations.                                                                                              |
| 20.02 | Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.                                                             |
| 20.03 | Identify psychological reactions to illness including defense mechanisms.                                                                                                                 |
| 20.04 | Identify complementary and alternative health practices.                                                                                                                                  |
| 20.05 | Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors. |
| 20.06 | Explain the basic concepts of positive self-image, wellness and stress.                                                                                                                   |
| 20.07 | Develop a wellness and stress control plan that can be used in personal and professional life.                                                                                            |
| 20.08 | Explore and utilize the U.S. Department of Agriculture's nutrition resources.                                                                                                             |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 20.09 | Discuss the steps in the grief process.                                                                                                                                                       |
| 21.0  | Recognize and practice safety and security procedures. The student will be able to:                                                                                                           |
| 21.01 | Recognize safe and unsafe working conditions and report safety hazards.                                                                                                                       |
| 21.02 | Explain why understanding how to safely use medical equipment is important.                                                                                                                   |
| 21.03 | Explain and apply the theory of root- cause analysis.                                                                                                                                         |
| 21.04 | Identify and describe methods in medical error reduction and prevention in the various healthcare settings.                                                                                   |
| 21.05 | Identify and practice security procedures for medical supplies and equipment.                                                                                                                 |
| 21.06 | Explain personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations including standard precautions.             |
| 21.07 | Recognize Safety Data Sheets and comply with safety signs, symbols, and labels.                                                                                                               |
| 21.08 | Explain proper body mechanics and ergonomics.                                                                                                                                                 |
| 21.09 | Explain the procedure for properly identifying patients.                                                                                                                                      |
| 21.10 | Explain procedures for the safe transport and transfer of patients.                                                                                                                           |
| 21.11 | Recognize fire, safety, disaster and evacuations procedures.                                                                                                                                  |
| 21.12 | Discuss the Joint Commission patient safety goals ( <a href="http://www.jointcommission.org">www.jointcommission.org</a> ) and any other applicable accrediting/regulatory agency guidelines. |
| 22.0  | Recognize and respond to emergency situations. The student will be able to:                                                                                                                   |
| 22.01 | Record and monitor vital signs accurately.                                                                                                                                                    |
| 22.02 | Describe legal parameters relating to the administration of emergency care.                                                                                                                   |
| 22.03 | Obtain and maintain training for certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO), and first aid.         |
| 22.04 | Recognize adverse drug related emergencies and take appropriate first aid action.                                                                                                             |
| 23.0  | Recognize and practice infection control procedures. The student will be able to:                                                                                                             |

**CTE Standards and Benchmarks**

|       |                                                                                                                                                                                                     |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 23.01 | Define principles of infection control including standard and transmission-based precautions.                                                                                                       |
| 23.02 | Explain medical asepsis and practice procedures such as handwashing and isolation.                                                                                                                  |
| 23.03 | Explain surgical asepsis.                                                                                                                                                                           |
| 23.04 | Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.                                                                            |
| 24.0  | Demonstrate an understanding of information technology applications in healthcare. The student will be able to:                                                                                     |
| 24.01 | Describe technology applications in healthcare.                                                                                                                                                     |
| 24.02 | Define terms and demonstrate basic computer skills.                                                                                                                                                 |
| 24.03 | Recognize technology applications in healthcare.                                                                                                                                                    |
| 24.04 | Interpret information from electronic medical documents.                                                                                                                                            |
| 24.05 | Identify methods of communication to access and distribute data such as fax, e-mail, and internet.                                                                                                  |
| 25.0  | Demonstrate employability skills. The student will be able to:                                                                                                                                      |
| 25.01 | Identify personal traits or attitudes desirable in a member of the healthcare team.                                                                                                                 |
| 25.02 | Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e., telephone etiquette, courtesy, and self-introductions). |
| 25.03 | Identify documents that may be required when applying for a job.                                                                                                                                    |
| 25.04 | Write an appropriate resume.                                                                                                                                                                        |
| 25.05 | Conduct a job search.                                                                                                                                                                               |
| 25.06 | Complete a job application form correctly.                                                                                                                                                          |
| 25.07 | Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments, and career growth potential.                       |
| 25.08 | Identify acceptable work habits.                                                                                                                                                                    |
| 25.09 | Recognize appropriate affective/professional behavior.                                                                                                                                              |

| CTE Standards and Benchmarks |                                                                                                                                                                                                     |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25.10                        | Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services and biotechnology research and development).             |
| 26.0                         | Demonstrate knowledge of blood borne diseases. The student will be able to:                                                                                                                         |
| 26.01                        | Recognize emerging diseases and disorders.                                                                                                                                                          |
| 26.02                        | Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens.                                                                              |
| 26.03                        | Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.                                                                               |
| 26.04                        | Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.                        |
| 26.05                        | Explain infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines. |
| 26.06                        | Explain the legal aspects of HIV/AIDS, including testing.                                                                                                                                           |
| 27.0                         | Apply basic math and science skills. The student will be able to:                                                                                                                                   |
| 27.01                        | Draw, read, and report on graphs, charts and tables.                                                                                                                                                |
| 27.02                        | Measure time, temperature, distance, capacity, and mass/weight.                                                                                                                                     |
| 27.03                        | Make, use and convert using both traditional and metric units.                                                                                                                                      |
| 27.04                        | Make estimations and approximations and judge the reasonableness of the result.                                                                                                                     |
| 27.05                        | Convert from regular to 24 hour time.                                                                                                                                                               |
| 27.06                        | Demonstrate ability to evaluate and draw conclusions.                                                                                                                                               |
| 27.07                        | Organize and communicate the results obtained by observation and experimentation.                                                                                                                   |
| 27.08                        | Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.                                                                   |
| 27.09                        | Calculate ratios.                                                                                                                                                                                   |

Florida Department of Education  
Curriculum Framework

**Program Title:** Firefighter/ Emergency Medical Technician - Combined  
**Program Type:** Career Preparatory  
**Career Cluster:** Law, Public Safety, & Security/ Health Science

**Career Certificate Program**

|                                      |                                                                                                                                                                                                                           |                                            |    |

# These certifications can only be used for adjunct faculty. Please refer to 64J-1.201, F.A.C. for the EMS instructor qualifications.

### Purpose

The purpose of this program is to provide the necessary training required for students to become certified firefighters as well as licensed Emergency Medical Technicians. It is not intended for those who are currently certified/licensed as either firefighters or EMTs. Students wishing to add an additional certification to an existing credential must enroll in either the Firefighter program or the Emergency Medical Technician program.

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Law, Public Safety and Security and Health Science career clusters; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills.

- "All EMR/EMT/Paramedic students are required to complete the 4-hour Traffic Incident Management Safety (TIMS) course at least once. This requirement can be fulfilled either as a prerequisite or as part of the curriculum, at the discretion of the EMS education program."

- "It is highly recommended, though not mandatory, that courses in medical terminology, anatomy, and pharmacology be completed before enrolling in EMT and Paramedic training."

### Program Structure

This program is a planned sequence of instruction consisting of 3 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3)(b), F.S. **(NOTE: -Bureau of Fire Standards and Training (BFST) course number system on their frameworks is not the same as SCNS. Ensure you to report the FDOE SCNS Course Number.)**

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                 | Teacher Certification                                                                                   | Length    |
|-----|---------------|------------------------------|---------------------------------------------------------------------------------------------------------|-----------|
| A   | FFP0030       | Firefighter I                | FIRE FIGHT 7G                                                                                           | 191 hours |
| B   | FFP0031       | Firefighter II               |                                                                                                         | 301 hours |
| C   | EMS0110       | Emergency Medical Technician | PARAMEDIC @7 7G<br># EMT 7G<br># REG NURSE 7 G<br># PRAC NURSE @7 %7%G<br>*(Must be a Registered Nurse) | 300 hours |

## **Regulated Programs**

### **Firefighter Regulation**

Pursuant to 633.128, Florida Statutes, the Department of Financial Service, Division of State Fire Marshal, has established training requirements for firefighters and volunteer firefighters. These requirements are implemented by Rule 69A-37.055, Florida Administrative Code. This program is a planned sequence of instruction consisting of two occupational completion points. **(NOTE:- The curriculum frameworks are subject to change by the Bureau of Fire Standards and Training (BFST) in accordance with statutory or Florida Administrative Code (F.A.C.) rule changes.)**

### **EMT Regulation**

The EMT component of this combined program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. The program must be approved by the Department of Health, Office of Emergency Medical Services, and the curriculum must adhere to the US Department of Transportation (DOT), National EMS Education Standards for EMT. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

The EMT component of this program meets the Department of Health trauma score card methodologies and Sudden Unexpected Infant Death Syndrome training education requirements. Upon completion of this component, the instructor will provide a certificate to the student verifying that these requirements have been met. Programs may also teach domestic violence and prevention of medical errors education and may choose to provide a certificate to the student verifying that this education has been completed.

Please refer to chapter 401, F.S. for more information on disqualification for the EMT license through the Office of Emergency Medical Services, Department of Health.

The EMT component of this program must be taught by an instructor meeting the qualifications as set forth in 64J-1.0201, FAC.

An American Heart Association or Red Cross certification or equivalent in "professional" Basic Life Support is required of all candidates for entrance into the EMT component of this program.

The Student Performance Standards for Emergency Medical Technician were adapted from the US Department of Transportation (DOT) National EMS Educational Standards for EMT.

401.2701, F.S. requires that the instructor-student ratio should not exceed 1:6. Hospital activity shall include a minimum of 20 hours of supervised clinical supervision, including 10 hours in a hospital emergency department. Clinical activity shall include appropriate patient assessment skills, intervention and documentation relevant to each clinical rotation.

Field internship shall include a competency based program to assure appropriate pre-hospital assessment and management of medical and trauma patients, as well as associated manual skills. The field internship activity shall include a minimum of 5 emergency runs resulting in patient care and transport appropriate for the EMT. In addition, the patient care component should include minimum competencies in patient assessment, airway management and ventilation, trauma and medical emergencies.

## Common Florida's Career Technical Core – Career Ready Practices Readiness Skills for CTE Programs

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

### Employability Skills

#### 01.0 Apply academic skills to workplace scenarios.

01.01 Use reading skills.

01.02 Use writing skills.

01.03 Use mathematical strategies and procedures.

01.04 Use scientific principles and procedures.

#### 02.0 Design a solution to an industry problem.

|                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------|

## Standards

### **Firefighter Component**

The BFST approved curricula **Firefighter I & II** is available at: <https://www.myfloridacfo.com/division/sfm/bfst/standards/fire-certifications/certification---florida-firefighter>.

### **Emergency Medical Technician Component**

- 01.0 Demonstrate a simple depth, foundational breadth of knowledge of EMS systems.
- 02.0 Demonstrate a simple depth, simple breadth of knowledge of research and evidence-based decision making.
- 03.0 Demonstrate a fundamental depth, foundational breadth of knowledge of workforce safety and wellness.
- 04.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the principles of medical documentation and report writing.
- 05.0 Demonstrate a simple depth, simple breadth of knowledge of the EMS communication system, communication with other health care professionals, and team communication.
- 06.0 Demonstrate a simple depth, simple breadth of knowledge of the principles of therapeutic communication.
- 07.0 Demonstrate a fundamental depth, foundational breadth of knowledge of medical legality and ethics.
- 08.0 Demonstrate a fundamental knowledge of the anatomy and function of all human systems to the practice of EMS.
- 09.0 Demonstrate a fundamental knowledge in the use of medical terminology.
- 10.0 Demonstrate a fundamental knowledge of the causes and pathophysiology of shock and the components of resuscitation.
- 11.0 Demonstrate a fundamental knowledge of life span development to patient assessment and management
- 12.0 Demonstrate a simple knowledge of the principles of illness and injury prevention in emergency care.
- 13.0 Demonstrate a simple depth, simple breadth of knowledge of pharmacology, medication safety, and medication types used during an emergency.
- 14.0 Demonstrate a fundamental depth, simple breadth of knowledge of emergency medications within the scope of practice of the EMT.
- 15.0 Demonstrate a fundamental depth, foundational breadth of knowledge of respiration.
- 16.0 Demonstrate a fundamental depth, foundational breadth of knowledge of airway management across the life span within the scope of practice of the EMT.
- 17.0 Demonstrate a fundamental depth, foundational breadth of knowledge of assessment and management utilizing ventilation patients of all ages.
- 18.0 Demonstrate a fundamental depth, foundational breadth of knowledge of scene management and multiple patient situations.
- 19.0 Demonstrate a fundamental depth, simple breadth of knowledge of the primary assessment for all patient situations.
- 20.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the components of history taking.
- 21.0 Demonstrate a fundamental depth, foundational breadth of knowledge of techniques used for a secondary assessment.
- 22.0 Demonstrate a simple depth, simple breath of knowledge of monitoring devices within the scope of practice of the EMT.
- 23.0 Demonstrate a fundamental depth, foundational breadth of knowledge of how and when to perform a reassessment for all patient situations.
- 24.0 Demonstrate a simple depth, foundation breadth of knowledge of pathophysiology, assessment and management of medical complaints.
- 25.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of neurologic disorders/emergencies patients of all ages.

- 26.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of abdominal and gastrointestinal disorders/emergencies patients of all ages.
- 27.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of immunology disorders/emergencies patients of all ages.
- 28.0 Demonstrate a simple depth, simple breadth of knowledge of the assessment and management of a patient who may have an infectious disease patients of all ages.
- 29.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of endocrine disorders/emergencies patients of all ages.
- 30.0 Demonstrate a fundamental depth, foundational breadth of knowledge regarding the assessment and management of psychiatric emergencies patients of all ages.
- 31.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of cardiovascular emergencies patients of all ages.
- 32.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of toxicological (poisoning and overdose) emergencies patients of all ages.
- 33.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of respiratory disorders/emergencies for patients of all ages.
- 34.0 Demonstrate a simple depth, simple breadth of knowledge of the assessment, and management of hematology disorders patients of all ages.
- 35.0 Demonstrate a simple in-depth, simple breath of knowledge of the assessment and management of genitourinary/ renal emergency patients of all ages.
- 36.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of gynecologic emergencies patients of all ages
- 37.0 Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of non-traumatic fractures patients of all ages.
- 38.0 Demonstrate a simple depth, simple breadth of knowledge of assessment and management of diseases of the eyes, ears, nose, and throat patients of all ages.
- 39.0 Demonstrate a fundamental knowledge of the causes, pathophysiology, and management of shock and respiratory failure patients of all ages.
- 40.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of the trauma patients of all ages.
- 41.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of bleeding patients of all ages.
- 42.0 Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of chest trauma patients of all ages.
- 43.0 Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of abdominal and genitourinary trauma patients of all ages.
- 44.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of orthopedic trauma patients of all ages.
- 45.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of soft tissue trauma patients of all ages.

- 46.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of head, facial, neck and spine trauma patients of all ages.
- 47.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of nervous system trauma patients of all ages.
- 48.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of trauma patients with special considerations for patients of all ages.
- 49.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of environmental emergencies patients of all ages.
- 50.0 Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of multi-system trauma and blast injuries patients of all ages.
- 51.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the obstetric patient within the scope of practice of the EMT.
- 52.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the newborn and neonatal patient within the scope of practice of the EMT.
- 53.0 Demonstrate a fundamental depth, fundamental breath of knowledge of management of the pediatric patient within the scope of practice of the EMT.
- 54.0 Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT.
- 55.0 Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges for patients of all ages.
- 56.0 Demonstrate a simple depth, foundational breadth of knowledge of risks and responsibilities of transport.
- 57.0 Demonstrate a fundamental depth, fundamental breadth of knowledge of establishing and working within the incident management system.
- 58.0 Demonstrate a simple depth, foundational breadth of knowledge of responding to an emergency during a multiple casualty incident.
- 59.0 Demonstrate a simple depth, simple breadth of knowledge of safe air medical operations and criteria for utilizing air medical response.
- 60.0 Demonstrate a simple depth, simple breadth of knowledge for safe vehicle extrication and use of simple hand tools.
- 61.0 Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating in a cold zone at a hazardous material or other special incident.
- 62.0 Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating on the scene of a natural or man-made disaster.

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Firefighter/ Emergency Medical Technician - Combined  
**Career Certificate Program Number:** P430217

**Course Number:** FFP0030  
**Occupational Completion Point:** A  
**Firefighter I – 191 Hours**

The **Bureau of Fire Standards and Training (BFST)** approved curricula is available at:

**Firefighter I:** [https://www.myfloridacfo.com/division/sfm/bfst/standards/fire-certifications/certification---florida-firefighter\\_](https://www.myfloridacfo.com/division/sfm/bfst/standards/fire-certifications/certification---florida-firefighter_)

**Course Number:** FFP0031  
**Occupational Completion Point:** B  
**Firefighter II – 301 Hours**

**Firefighter II:** [https://www.myfloridacfo.com/division/sfm/bfst/standards/fire-certifications/certification---florida-firefighter\\_](https://www.myfloridacfo.com/division/sfm/bfst/standards/fire-certifications/certification---florida-firefighter_)

**Course Number:** EMS0110  
**Occupational Completion Point:** C  
**Emergency Medical Technician – 300 Hours**

**01.0 EMS Systems:** Demonstrate a simple depth, foundational breadth of knowledge of EMS systems. The student will be able to:

- |       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01.01 | Define Emergency Medical Services (EMS) systems.                                                                                                                        |
| 01.02 | Discuss the historical background of the development of the EMS system.                                                                                                 |
| 01.03 | Identify the four levels of national EMS providers (EMR, EMT, AEMT and PM) as well as the three levels (EMR, EMT, and PM) in the State of Florida.                      |
| 01.04 | Discuss the specific statutes and regulations regarding the EMS system in Florida.                                                                                      |
| 01.05 | Discuss vehicle and equipment readiness.                                                                                                                                |
| 01.06 | Characterize the EMS system's role in prevention and public education.                                                                                                  |
| 01.07 | Systems of care, e.g., Stroke, STEM, Trama, Pediatrics (S, F).                                                                                                          |
| 01.08 | MIH/SCP and other EMS-related specialty roles (S, S).                                                                                                                   |
| 01.09 | Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and by standers.                                                      |
| 01.10 | Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care. |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 01.11 | Discuss the maintenance of and differences between certification and licensure for the EMS professional in the State of Florida and NREMT.                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 01.12 | Define quality improvement and discuss the EMT's role in the process.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 01.13 | Quality improvement vs. quality assurance (S, F).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 02.0  | <b>Research:</b> Demonstrate a simple depth, simple breadth of knowledge of research and evidence-based decision making. The student will be able to:                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 02.01 | Discuss EMS research and evidence-based decision making. <ul style="list-style-type: none"> <li>• Conduct scientific literature searches</li> <li>• Read, interpret, and extract information from journal articles relevant to a project</li> </ul>                                                                                                                                                                                                                                                                                                                                      |
| 02.02 | Explain the importance of assessing and treating patients based on evidence-based decision-making.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 02.03 | Interpret graphs, charts, and tables.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|       |                                                                                                                                                                         |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 02.04 | Measure time, temperature, distance, capacity, and mass/weight.                                                                                                         |
| 02.05 | Convert and use traditional and metric units.                                                                                                                           |
| 02.06 | Make estimations, approximations and judge the reasonableness of the result.                                                                                            |
| 02.07 | Convert time from a 12-hour format to a 24-hour format                                                                                                                  |
| 02.08 | Demonstrate ability to evaluate and draw conclusions.                                                                                                                   |
| 02.09 | Calculate ratios.                                                                                                                                                       |
| 02.10 | Explain the rationale for the EMS system gathering data.                                                                                                                |
| 02.11 | Impact of research on EMT care (S, S).                                                                                                                                  |
| 02.12 | Data collection (S, S).                                                                                                                                                 |
| 02.13 | Evidence- based decision making (S, S).                                                                                                                                 |
| 03.0  | <b>Workforce Safety and Wellness:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of workforce safety and wellness. The student will be able to: |
| 03.01 | Explain the need to determine scene safety.                                                                                                                             |
| 03.02 | Discuss the importance of body substance isolation (BSI).                                                                                                               |
| 03.03 | Describe the steps and equipment the EMT should take for personal protection from airborne and blood borne pathogens and communicable disease.                          |
| 03.04 | List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.  |
| 03.05 | Discuss the steps the EMT should take when approaching a family confronted with death and dying.                                                                        |
| 03.06 | Recognize the warning signs of personal stress and discuss the strategies and resources available for EMTs to utilize.                                                  |
| 03.07 | Demonstrate good body mechanics while using a stretcher and other patient moving devices.                                                                               |
| 03.08 | Discuss the guidelines and safety precautions to be followed when lifting and moving patients and equipment.                                                            |
| 03.09 | Discuss patient positioning in common emergency situations.                                                                                                             |
| 03.10 | Discuss situation that may require the use of medical restraints on the patient and explain guidelines and safety consideration for their use.                          |
| 03.11 | Define “infectious disease” and “communicable disease.”                                                                                                                 |
| 03.12 | Describe the routes of transmission and associated risks for infectious disease.                                                                                        |
| 03.13 | Disease transmission (F, F).                                                                                                                                            |
| 03.14 | Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis and HIV.                                         |
| 03.15 | Explain how immunity to infectious diseases is acquired.                                                                                                                |

|       |                                                                                                                                                                                      |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.16 | Explain post exposure management of exposure to patient blood or body fluids, including proper notification documentation.                                                           |
| 03.17 | Describe the components of physical fitness and mental wellbeing.                                                                                                                    |
| 03.18 | Identify personal health practices and environmental factors which affect physical, mental, and emotional wellbeing.                                                                 |
| 03.19 | Prevention of work-related injuries and illnesses (F, F).                                                                                                                            |
| 03.20 | Responder mental health, resilience and suicide prevention (F, F).                                                                                                                   |
| 03.21 | Wellness principles (F, F).                                                                                                                                                          |
| 03.22 | Discuss complementary and alternative health practices.                                                                                                                              |
| 03.23 | Explain the basic concepts of positive self-image, wellness and stress.                                                                                                              |
| 03.24 | Discuss the need for a wellness and stress control plan that can be used in personal and professional life.                                                                          |
| 03.25 | Explore the importance of adequate nutrition (i.e., U.S. Department of Agriculture's MyPlate food guide ( <a href="http://www.choosemyplate.gov">www.choosemyplate.gov</a> )).       |
| 03.26 | Demonstrate safe behaviors in the proper use of medical equipment.                                                                                                                   |
| 03.27 | Explain the theory of root- cause analysis.                                                                                                                                          |
| 03.28 | Identify and describe methods in medical error reduction and prevention in the various healthcare settings.                                                                          |
| 03.29 | Identify and practice security procedures for medical supplies and equipment in the various healthcare settings.                                                                     |
| 03.30 | Describe fire, safety, disaster and evacuation procedures in the various healthcare settings.                                                                                        |
| 03.31 | Discuss applicable accrediting and regulatory agency patient safety guidelines.                                                                                                      |
| 04.0  | <b>Documentation:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the principles of medical documentation and report writing. The student will be able to: |
| 04.01 | Discuss applications of technology in healthcare.                                                                                                                                    |
| 04.02 | Demonstrate basic computer skills.                                                                                                                                                   |
| 04.03 | Interpret and utilize information from electronic health records.                                                                                                                    |
| 04.04 | Identify methods of electronic communication to access and distribute data.                                                                                                          |
| 04.05 | Describe the use and importance of properly written communication and patient care documentation.                                                                                    |
| 04.06 | Explain the legal implication of the patient care report.                                                                                                                            |
| 04.07 | Supporting medical necessity (S, S).                                                                                                                                                 |
| 04.08 | Identify the minimum dataset reference patient information and administrative information on the patient care report.                                                                |
| 04.09 | Understand how to document refusal of care, including legal implications.                                                                                                            |
| 04.10 | Discuss the implications of the Health Insurance Portability and Accountability Act of 1996 on confidential documentation.                                                           |

|       |                                                                                                                                                                                                                                                                                                          |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 04.11 | Describe the special considerations concerning mass casualty incident documentation.                                                                                                                                                                                                                     |
| 04.12 | Demonstrate completion of a patient care report for a medical and trauma patient.                                                                                                                                                                                                                        |
| 05.0  | <b>EMS System Communication:</b> Demonstrate a simple depth, simple breadth of knowledge of the EMS communication system, communication with other health care professionals, and team communication. The student will be able to:                                                                       |
| 05.01 | Understand the basic principles of the various types of communications equipment used in EMS.                                                                                                                                                                                                            |
| 05.02 | Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission.                                                                                                                                            |
| 05.03 | Explain the rationale for providing efficient and effective radio communications and patient reports.                                                                                                                                                                                                    |
| 05.04 | Identify the essential components of the verbal report and legal aspects that need to be considered.                                                                                                                                                                                                     |
| 05.05 | Perform an organized and concise radio transmission.                                                                                                                                                                                                                                                     |
| 05.06 | Team communication and dynamics (S, S).                                                                                                                                                                                                                                                                  |
| 05.07 | Perform an organized, concise verbal patient report that would be given to the staff at a receiving facility.                                                                                                                                                                                            |
| 05.08 | Perform a brief, organized verbal report that would be given during transfer of care at an incident scene.                                                                                                                                                                                               |
| 06.0  | <b>Therapeutic Communication:</b> Demonstrate a simple depth, simple breadth of knowledge of the principles of therapeutic communication. The student will be able to:                                                                                                                                   |
| 06.01 | Describe principles of therapeutic and effective communication with patients.                                                                                                                                                                                                                            |
| 06.02 | Health care literacy (S, S).                                                                                                                                                                                                                                                                             |
| 06.03 | Non-discriminatory communication that addresses inherent or unconscious bias, is culturally aware and sensitive, and intended to improve patient outcome (S, S).                                                                                                                                         |
| 06.04 | Discuss basic speaking and active listening skills.                                                                                                                                                                                                                                                      |
| 06.05 | Recognize the importance of patient/client educations regarding healthcare.                                                                                                                                                                                                                              |
| 06.06 | Discuss the adjustment of communication strategies to effectively communicate with patients with: <ul style="list-style-type: none"> <li>• Differing age groups</li> <li>• Differing developmental stages</li> <li>• Special needs</li> <li>• Differing cultures, including language barriers</li> </ul> |
| 06.07 | Discuss the communication techniques that should be used to interact with the patient, patient family, bystanders, and individuals from other agencies including verbal diffusion and interview techniques.                                                                                              |
| 06.08 | Discuss the strategies for interviewing persons in special situations.                                                                                                                                                                                                                                   |
| 06.09 | Distinguish between and respond to verbal and non-verbal cues.                                                                                                                                                                                                                                           |
| 06.10 | Analyze elements of communication using a sender-receiver/close loop model.                                                                                                                                                                                                                              |
| 06.11 | Exhibit positive non-verbal behaviors.                                                                                                                                                                                                                                                                   |

|       |                                                                                                                                                                                                                                                                          |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06.12 | Establish proper patient rapport.                                                                                                                                                                                                                                        |
| 07.0  | <b>Medical/Legal and Ethics:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of medical legality and ethics. The student will be able to:                                                                                                         |
| 07.01 | Discuss the rational, importance, and limitations of patient autonomy.                                                                                                                                                                                                   |
| 07.02 | Differentiate between expressed, implied and involuntary consent.                                                                                                                                                                                                        |
| 07.03 | Discuss the methods of obtaining consent and procedures for minors.                                                                                                                                                                                                      |
| 07.04 | Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.                                                                                                                                                         |
| 07.05 | Discuss the implications for the EMT in patient refusal of care and/or transport.                                                                                                                                                                                        |
| 07.06 | Explain the importance, necessity and legality of patient confidentiality.                                                                                                                                                                                               |
| 07.07 | Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.                                                                                                                                       |
| 07.08 | Patient rights/advocacy (S, S).                                                                                                                                                                                                                                          |
| 07.09 | Discuss State of Florida and Federal special reporting situations including: <ul style="list-style-type: none"> <li>• Abuse</li> <li>• Sexual assault</li> <li>• Gunshot and knife wounds</li> <li>• Communicable disease</li> <li>• Animal Bites</li> </ul>             |
| 07.10 | Differentiate between civil tort and criminal actions.                                                                                                                                                                                                                   |
| 07.11 | Discuss the elements of negligence and defenses/protections from liability.                                                                                                                                                                                              |
| 07.12 | Discuss the role of the EMT at crime scenes and preservation of evidence.                                                                                                                                                                                                |
| 07.13 | Define ethics and morality and discuss their implication for the EMT.                                                                                                                                                                                                    |
| 07.14 | Discuss Florida legislation such as: <ul style="list-style-type: none"> <li>• Baker Act (394.451, F.S.)</li> <li>• Marchman Act (397.601, F.S. and 397.675, F.S.)</li> <li>• Emergency Examination and Treatment of Incapacitated Persons Act (401.445, F.S.)</li> </ul> |
| 07.15 | Differentiate between the scope of practice and the standard of care as applied to the EMT.                                                                                                                                                                              |
| 07.16 | Discuss the legal concepts and limitations of immunity, including Good Samaritan statutes and governmental immunity.                                                                                                                                                     |
| 07.17 | Describe the appropriate patient management and care techniques in a refusal of care situation.                                                                                                                                                                          |
| 07.18 | Analyze the relationship between the law, morals and ethics in EMS and the premise that should under lie the EMTs ethical decisions.                                                                                                                                     |
| 07.19 | Describe the criteria necessary to honor an advance directive.                                                                                                                                                                                                           |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.20 | Explain the rationale for the needs, benefits and varying degrees of advance directives.                                                                                                                                                                                                                                                                                                                                                                        |
| 08.0  | <b>Anatomy and Physiology:</b> Demonstrate a fundamental knowledge of the anatomy and function of all human systems to the practice of EMS. The student will be able to:                                                                                                                                                                                                                                                                                        |
| 08.01 | Identify the following topographic terms: <ul style="list-style-type: none"> <li>• Medial</li> <li>• Lateral</li> <li>• Proximal</li> <li>• Distal</li> <li>• Superior</li> <li>• Inferior</li> <li>• Anterior</li> <li>• Posterior</li> <li>• Midline</li> <li>• Right and left</li> <li>• Mid-clavicular</li> <li>• Bilateral</li> <li>• Mid-axillary</li> </ul>                                                                                              |
| 08.02 | Describe the life support chain, aerobic metabolism, and anaerobic metabolism.                                                                                                                                                                                                                                                                                                                                                                                  |
| 08.03 | Define anatomy, physiology, pathophysiology, and homeostasis.                                                                                                                                                                                                                                                                                                                                                                                                   |
| 08.04 | Identify and describe the anatomical structures and functions of the following: <ul style="list-style-type: none"> <li>• Skeletal system</li> <li>• Muscular system</li> <li>• Respiratory System</li> <li>• Circulatory/ Cardiovascular system</li> <li>• Nervous System</li> <li>• Integumentary system</li> <li>• Digestive system</li> <li>• Endocrine system</li> <li>• Renal system</li> <li>• Reproductive system</li> <li>• Lymphatic System</li> </ul> |
| 08.05 | Explain cellular anatomy and physiology.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 08.06 | Explain cellular respiration.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 08.07 | Discuss cell division.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 08.08 | Describe the different types of muscle tissues including skeletal, smooth and cardiac.                                                                                                                                                                                                                                                                                                                                                                          |

|       |                                                                                                                                                                                                                                                                                        |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08.09 | Name and identify the location of the bones of the axial and appendicular skeleton.                                                                                                                                                                                                    |
| 08.10 | Describe the classification and types of joints.                                                                                                                                                                                                                                       |
| 08.11 | Discuss the mechanisms of breathing including: <ul style="list-style-type: none"> <li>• Mechanical ventilation</li> <li>• Pulmonary volumes</li> <li>• Dead space</li> <li>• Lung compliance</li> </ul>                                                                                |
| 08.12 | Explain the diffusion of gases in external and internal respiration.                                                                                                                                                                                                                   |
| 08.13 | Describe oxygen and carbon dioxide transport in the blood.                                                                                                                                                                                                                             |
| 08.14 | Describe nervous and chemical mechanisms that regulate respirations.                                                                                                                                                                                                                   |
| 08.15 | Discuss respiration and acid-base balance.                                                                                                                                                                                                                                             |
| 08.16 | Discuss the hemodynamics of blood pressure.                                                                                                                                                                                                                                            |
| 08.17 | Discuss the role of nutrition, metabolism and body temperature on body function.                                                                                                                                                                                                       |
| 08.18 | Describe the causes, advantages and disadvantages of a fever.                                                                                                                                                                                                                          |
| 08.19 | Discuss the hypothalamus functions as the thermostat in the body.                                                                                                                                                                                                                      |
| 09.0  | <b>Medical Terminology:</b> Demonstrate a fundamental knowledge in the use of medical terminology. The student will be able to:                                                                                                                                                        |
| 09.01 | Identify medical terminology word parts such as: <ul style="list-style-type: none"> <li>• Root words</li> <li>• Prefixes</li> <li>• Suffixes</li> <li>• Combining forms</li> </ul>                                                                                                     |
| 09.02 | Correctly utilize medical terminology describing each of the following: <ul style="list-style-type: none"> <li>• Body structures</li> <li>• Functions</li> <li>• Conditions and disorders</li> <li>• Body regions</li> <li>• Cavities</li> <li>• Areas</li> <li>• Landmarks</li> </ul> |
| 09.03 | Correctly use medical abbreviations and symbols.                                                                                                                                                                                                                                       |
| 09.04 | Read and understand basic medical documentation in medical records and medical reports.                                                                                                                                                                                                |
| 09.05 | Communicate with healthcare professionals utilizing basic medical terminology.                                                                                                                                                                                                         |

|       |                                                                                                                                                                                                                                            |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09.06 | Explain the rationale for using accepted medical terminology correctly.                                                                                                                                                                    |
| 10.0  | <b>Pathophysiology:</b> Demonstrate a fundamental knowledge of the causes and pathophysiology of shock and the components of resuscitation. The student will be able to:                                                                   |
| 10.01 | Discuss signs of irreversible death.                                                                                                                                                                                                       |
| 10.02 | Review the anatomy and physiology of the respiratory and cardiovascular systems.                                                                                                                                                           |
| 10.03 | Discuss and identify the pathophysiology of respiratory failure and respiratory and cardiac arrest.                                                                                                                                        |
| 10.04 | Understand shock, including the pathophysiology, causes, and the signs and symptoms associated with the various types of shock.                                                                                                            |
| 10.05 | Discuss the variations in the pathophysiology of shock patients of all ages.                                                                                                                                                               |
| 11.0  | <b>Life Span Development:</b> Demonstrate a fundamental knowledge of life span development to patient assessment and management. The student will be able to:                                                                              |
| 11.01 | Describe the major physiologic and psychosocial characteristics patients of all ages.                                                                                                                                                      |
| 12.0  | <b>Public Health:</b> Demonstrate a simple knowledge of the principles of illness and injury prevention in emergency care. The student will be able to:                                                                                    |
| 12.01 | Define public health and explain the goal of the public health field.                                                                                                                                                                      |
| 12.02 | Identify the EMS role within the public health field.                                                                                                                                                                                      |
| 12.03 | Discuss basic concepts of epidemiology.                                                                                                                                                                                                    |
| 12.04 | Discuss ways of EMS involvement in injury prevention.                                                                                                                                                                                      |
| 12.05 | Identify areas of need for prevention programs in the community.                                                                                                                                                                           |
| 13.0  | <b>Principles of Pharmacology:</b> Demonstrate a simple depth, simple breadth of knowledge of pharmacology, medication safety, and medication types used during an emergency. The student will be able to:                                 |
| 13.01 | Explain the “rights” of medication administration and describe how each one related to EMS.                                                                                                                                                |
| 13.02 | Discuss and differentiate the various medication forms and the appropriate routes of administration                                                                                                                                        |
| 13.03 | Describe the difference between a generic medication name and trade name and provide an example of each.                                                                                                                                   |
| 13.04 | Specific medication classes to be determined locally <ul style="list-style-type: none"> <li>• Class names (S, S)</li> <li>• Class indications (S, S)</li> <li>• Class complications (S, S)</li> <li>• Class side effects (S, S)</li> </ul> |
| 13.05 | Polypharmacy (S, S)                                                                                                                                                                                                                        |
| 13.06 | Discuss the components and elements of a drug profile including: <ul style="list-style-type: none"> <li>• Class</li> <li>• Actions</li> </ul>                                                                                              |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | <ul style="list-style-type: none"> <li>• Contraindications</li> <li>• Side effects</li> <li>• Dose</li> <li>• Route</li> <li>• Adverse drug reactions (S, S)</li> <li>• Medication response relationships (F, F)</li> </ul>                                                                                                                                                                                                                                                                                  |
| 13.07 | Describe the role of medical direction in medication administration and explain the difference between direct orders (online) and standing orders (off-line).                                                                                                                                                                                                                                                                                                                                                |
| 14.0  | <b>Pharmacology Medications:</b> Demonstrate a fundamental depth, simple breadth of knowledge of emergency medications within the scope of practice of the EMT. The student will be able to:                                                                                                                                                                                                                                                                                                                 |

| 19.03                                                                                                                                                                             | Discuss and demonstrate methods of assessing level of responsiveness using AVPU.                                                                                                                                                      |
| 19.04                                                                                                                                                                             | Discuss and demonstrate methods of assessing the airway and providing airway care patients of all ages.                                                                                                                               |
| 19.05                                                                                                                                                                             | Describe and demonstrate methods used for assessing if a patient is breathing patients of all ages.                                                                                                                                   |

|                    |                                                                                                                                                                                                                                                                                                                                             |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 19.06              | Differentiate between a patient with adequate and inadequate breathing.                                                                                                                                                                                                                                                                     |
| 19.07              | Describe and demonstrate the methods used to obtain a pulse patient of all ages.                                                                                                                                                                                                                                                            |
| 19.08              | Discuss and demonstrate assessing the patient for external bleeding.                                                                                                                                                                                                                                                                        |
| 19.09              | Describe and demonstrate the assessment and interpretation of skin color, temperature, moisture and capillary refill patients of all ages.                                                                                                                                                                                                  |
| 19.10              | Explain the reasons prioritizing a patient for care and transport.                                                                                                                                                                                                                                                                          |
| 19.11              | Describe when it is appropriate to expose the patient completely.                                                                                                                                                                                                                                                                           |
| 19.12              | Differentiate between critical life-threatening, potentially life- threatening, and non-life-threatening patient presentations.                                                                                                                                                                                                             |
| <del>20</del> 20.0 | <b>History-Taking:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the components of history taking. The student will be able to:                                                                                                                                                                                 |
| 20.01              | Determine and investigate the chief complaint (MOI/NOI).                                                                                                                                                                                                                                                                                    |
| 20.02              | Describe components of the patient history.                                                                                                                                                                                                                                                                                                 |
| 20.03              | Explain the importance of obtaining a SAMPLE and OPQRST history.                                                                                                                                                                                                                                                                            |
| 20.04              | Acknowledge the feelings patients experience during assessment.                                                                                                                                                                                                                                                                             |
| 20.05              | Discuss the value of obtaining a family and social history.                                                                                                                                                                                                                                                                                 |
| <del>20.06</del>   | <del>20.06</del> Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.                                                                                                                                                                     |
| <del>21</del> 21.0 | <b>Secondary Assessment:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of techniques used for a secondary assessment. The student will be able to:                                                                                                                                                                 |
| 21.01              | Discuss the components and techniques of the physical exam and skills involved.                                                                                                                                                                                                                                                             |
| 21.02              | Discuss the indications for performing:<br><del>21.02.1</del> • Rapid assessment<br><del>21.02.2</del> • Focused exam<br><del>21.02.3</del> • Head to toe exam                                                                                                                                                                              |
| 21.03              | Demonstrate:<br><del>21.03.1</del> • Rapid exam<br><del>21.03.2</del> • Focused exam<br><del>21.03.3</del> • Head to toe exam                                                                                                                                                                                                               |
| 21.04              | Describe and demonstrate the techniques of inspection, palpation, percussion, and auscultation. <ul style="list-style-type: none"> <li>• Respiratory system including breath sound quality</li> <li>• Cardiovascular system</li> <li>• Neurological system</li> <li>• Musculoskeletal system</li> <li>• Major anatomical regions</li> </ul> |

|       |                                                                                                                                                                                                                                                                                                                                   |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 21.05 | Describe and demonstrate the importance of obtaining a baseline set of vital signs.<br>• E.g., Non-Invasive Blood Pressure, Blood Glucose, Temperature.                                                                                                                                                                           |
| 21.06 | Discuss blood pressure ranges across patients of all ages.                                                                                                                                                                                                                                                                        |
| 22.0  | <b>Monitoring Devices:</b> Demonstrate a simple depth, simple breadth of knowledge of monitoring devices within the scope of practice of the EMT. The student will be able to:                                                                                                                                                    |
| 22.01 | Describe and demonstrate the purpose, indications, procedure, normal findings, and limitations of the following patient monitoring technologies.<br>• Pulse oximetry<br>• Glucometry<br>• Capnography<br>• Noninvasive BP monitoring<br>• Thermometry<br>• Cardiac monitoring – 12 lead ECG acquisition and Transmission          |
| 23.0  | <b>Reassessment:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of how and when to perform a reassessment for all patient situations. The student will be able to:                                                                                                                                        |
| 23.01 | Describe the components of reassessment and demonstrate the skills involved.                                                                                                                                                                                                                                                      |
| 23.02 | Discuss the reasons for repeating the primary assessment as part of the reassessment.                                                                                                                                                                                                                                             |
| 23.03 | Explain trending assessment components and its value to other health professionals who assume care of the patient.                                                                                                                                                                                                                |
| 23.04 | Demonstrate the reassessment of patients of all ages.                                                                                                                                                                                                                                                                             |
| 24.0  | <b>Medical Overview:</b> Demonstrate a simple depth, foundation breadth of knowledge of pathophysiology, assessment and management of medical complaints. The student will be able to:                                                                                                                                            |
| 24.01 | Identify factors that complicate patient assessment:<br>• Identify factors that affect the patient Transport Decision and Medically Appropriate Destination<br>• E.g. Scene Safety, Environmental Factors, Chief Complaint, Preconceptions ...                                                                                    |
| 24.02 | Discuss forming a field impression and utilizing available information to determine a differential diagnosis.                                                                                                                                                                                                                     |
| 25.0  | <b>Neurology:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of neurologic disorders/emergencies patients of all ages. The student will be able to:                                                                                                                      |
| 25.01 | Review the anatomy and physiology of the nervous system.                                                                                                                                                                                                                                                                          |
| 25.02 | Describe the pathophysiology of the following neurologic disorders:<br>• Altered Mental Status / Decreased Level of Responsiveness (Possible Differential Diagnosis)<br>• Stroke (Hemorrhagic, Occlusive, Transient Ischemic Attack)<br>• Headache<br>• Seizures<br>• Syncope<br>• Dementia vs. delirium<br>• Alzheimer's disease |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        | <ul style="list-style-type: none"> <li>• Headache</li> <li>• Brief Resolved Unexplained Event (BRUE)</li> <li>• Other neurological disorders to be determined locally</li> </ul>                                                                                                                                                                                                                                                                                                                        |
| <del>25.02</del> 25.03 | Discuss and identify the causes, signs and symptoms of ischemic strokes, hemorrhagic strokes, and transient ischemic attacks and their similarities and differences.                                                                                                                                                                                                                                                                                                                                    |
| <del>25.03</del> 25.04 | Discuss and demonstrate how to use a stroke scoring system in the assessment of patients with suspected stroke.                                                                                                                                                                                                                                                                                                                                                                                         |
| <del>25.04</del> 25.05 | Define and differentiate generalized seizure, partial seizure and status epilepticus and list their possible causes.                                                                                                                                                                                                                                                                                                                                                                                    |
| <del>25.05</del> 25.06 | Define and differentiate migraine headache, sinus headache, tension headache and discuss how to distinguish harmless headaches from something more serious.                                                                                                                                                                                                                                                                                                                                             |
| <del>25.06</del> 25.07 | Define “altered mental status” and identify the possible causes.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <del>25.07</del> 25.08 | Describe and demonstrate the assessment and management of the patient with various neurological emergencies in patients of all ages to include: <ul style="list-style-type: none"> <li>• Strokes</li> <li>• Headaches</li> <li>• Seizures</li> <li>• Altered mental status</li> </ul>                                                                                                                                                                                                                   |
| <del>25.08</del> 25.09 | Discuss the transport of the stroke patient to the appropriate treatment center.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 26.0                   | <b>Abdominal and Gastrointestinal Disorder:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of abdominal and gastrointestinal disorders/emergencies patients of all ages. The student will be able to:                                                                                                                                                                                                                                          |
| 26.01                  | Review the basic anatomy and physiology the gastrointestinal, genital and urinary systems.                                                                                                                                                                                                                                                                                                                                                                                                              |
| 26.02                  | Define and describe the pathophysiology of the following abdominal and gastrointestinal disorders: <ul style="list-style-type: none"> <li>• Abdominal pain</li> <li>• Acute abdomen</li> <li>• Peritonitis</li> <li>• Appendicitis</li> <li>• Pancreatitis</li> <li>• Cholecystitis</li> <li>• Gastrointestinal bleeding</li> <li>• Esophageal varices</li> <li>• Gastroenteritis</li> <li>• Ulcers</li> <li>• Intestinal obstruction</li> <li>• Hernia</li> <li>• Abdominal aortic aneurysm</li> </ul> |
| 26.03                  | Identify the signs and symptoms of common GI disorders.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 26.04                  | Describe and demonstrate the assessment and management of the patient with various gastrointestinal emergencies.                                                                                                                                                                                                                                                                                                                                                                                        |

|       |                                                                                                                                                                                                                                                          |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 26.05 | Differentiate between hemorrhagic and non-hemorrhagic abdominal pain.                                                                                                                                                                                    |
| 27.0  | <b>Immunology:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of immunology disorders/emergencies, patients of all ages-. The student will be able to:                                          |
| 27.01 | Define and differentiate allergic reaction and anaphylaxis.                                                                                                                                                                                              |
| 27.02 | Describe the pathophysiology of the following immunology disorders: <ul style="list-style-type: none"> <li>• Allergic reaction</li> <li>• Anaphylaxis</li> <li>• Anaphylactic shock</li> </ul>                                                           |
| 27.03 | Describe and demonstrate the assessment and management of the patients of all ages experiencing an allergic or anaphylactic reaction.                                                                                                                    |
| 27.04 | Review the following for the epinephrine auto-injector: <ul style="list-style-type: none"> <li>• Generic and trade names</li> <li>• Medication forms</li> <li>• Dose</li> <li>• Administration</li> <li>• Action</li> <li>• Contraindications</li> </ul> |
| 27.05 | Demonstrate the use of epinephrine auto-injector.                                                                                                                                                                                                        |
| 27.06 | Review the anatomy and physiology of the organs and structures related to anaphylaxis.                                                                                                                                                                   |
| 27.07 | Describe the incidence, morbidity and mortality of anaphylaxis.                                                                                                                                                                                          |
| 27.08 | Recognize the signs and symptoms related to anaphylaxis.                                                                                                                                                                                                 |
| 27.09 | Describe the risk factors for and prevention of anaphylaxis and appropriate patient education.                                                                                                                                                           |
| 27.10 | Discuss common antigens most frequently associated with anaphylaxis.                                                                                                                                                                                     |
| 27.11 | Explain the importance of separating the patient from the allergen when possible.                                                                                                                                                                        |
| 28.0  | <b>Infectious Disease:</b> Demonstrate a simple depth, simple breadth of knowledge of the assessment and management of a patient who may have an infectious disease patients of all ages. The student will be able to:                                   |
| 28.01 | Discuss the causes of infectious diseases                                                                                                                                                                                                                |
| 28.02 | Describe the pathophysiology of infectious diseases of significant public health concern.                                                                                                                                                                |
| 28.03 | Describe and demonstrate the assessment and management of the patient in all age groups experiencing an infectious disease.                                                                                                                              |
| 28.04 | Discuss mandatory notification to State or Federal agencies of various diseases.                                                                                                                                                                         |
| 28.05 | Identify patients with risk factors for infectious disease.                                                                                                                                                                                              |
| 28.06 | Explain the principles and practices of infection control in prehospital care.                                                                                                                                                                           |

|             |                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 28.07       | Describe and discuss the rationale for the various types of PPE.                                                                                                                                                                                                                                                                                                                                |
| 28.08       | Discuss the proper disposal of contaminated supplies (sharps, gauze sponges, tourniquets, etc.).                                                                                                                                                                                                                                                                                                |
| 28.09       | Discuss decontamination of the ambulance and disinfection of patient care equipment, and areas in which care of the patient occurred.                                                                                                                                                                                                                                                           |
| 28.10       | Describe the actions to take if the EMS provider is exposed to an infectious disease.                                                                                                                                                                                                                                                                                                           |
| 28.11       | Demonstrate the ability to comply with body substance isolation guidelines.                                                                                                                                                                                                                                                                                                                     |
| 28.12       | Discuss the pathophysiology, risk factors, assessment, and prehospital management of sepsis/systemic inflammatory response syndrome (SIRS)                                                                                                                                                                                                                                                      |
| 28.13       | Identify the signs and symptoms and discuss the assessment and prehospital management of a patient in septic shock.                                                                                                                                                                                                                                                                             |
| 28.14       | Describe the risk factors and prevention of infectious disease and appropriate patient education (Including but not limited to handwashing, PPE use, and disposal on contaminated supplies).                                                                                                                                                                                                    |
| <b>29.0</b> | <b>Endocrine Disorders:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of endocrine disorders/emergencies, patients of all ages. The student will be able to:                                                                                                                                                                          |
| 29.01       | Review the anatomy and physiology of the endocrine system and its main function in the body.                                                                                                                                                                                                                                                                                                    |
| 29.02       | Describe the pathophysiology and signs and symptoms of the following endocrine disorders:<br><b>29.02.1</b> Insulin Dependent Diabetes Mellitus<br><b>29.02.2</b> Non-Insulin Dependent Diabetes Mellitus<br><b>29.02.3</b> Hypoglycemia<br><b>29.02.4</b> Hyperglycemia<br><b>29.02.5</b> Diabetic Ketoacidosis (DKA)<br><b>29.02.6</b> Hyperglycemic Hyperosmolar Non-ketotic Syndrome (HHNS) |
| 29.03       | Define and differentiate between Type I and Type II Diabetes.                                                                                                                                                                                                                                                                                                                                   |
| 29.04       | Identify and demonstrate the steps in the management of the patient taking diabetic medicine with an altered mental status and a history of diabetes. Patients of all ages..                                                                                                                                                                                                                    |

|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                   | <ul style="list-style-type: none"> <li>• Cardiogenic shock</li> <li>• Cardiac arrest</li> </ul>                                                                                                                                                                                                                                                                                                                                                               |
| 31.03             | Describe and demonstrate the assessment and management of the patient experiencing a cardiac emergency. Across patients of all ages.                                                                                                                                                                                                                                                                                                                          |
| 31.04             | Discuss the indications and contraindications for automated external defibrillation (AED). 9including automatic, manual and vest type).                                                                                                                                                                                                                                                                                                                       |
| 31.05             | Explain the impact of age and weight on defibrillation.                                                                                                                                                                                                                                                                                                                                                                                                       |
| 31.06             | Discuss the position of comfort for patients with various cardiac emergencies.                                                                                                                                                                                                                                                                                                                                                                                |
| 31.07             | Explain the rationale for early defibrillation.                                                                                                                                                                                                                                                                                                                                                                                                               |
| 31.08             | Discuss and differentiate among various types of external defibrillators.                                                                                                                                                                                                                                                                                                                                                                                     |
| 31.09             | Discuss and differentiate among the various types of implanted cardiac devices.                                                                                                                                                                                                                                                                                                                                                                               |
| 31.10             | Understand the importance of maintenance and operators check list for AED's.                                                                                                                                                                                                                                                                                                                                                                                  |
| 31.11             | Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.                                                                                                                                                                                                                                                                                                                                                    |
| 31.12             | Explain the role medical direction plays in the use of automated external defibrillation.                                                                                                                                                                                                                                                                                                                                                                     |
| 31.13             | Explain the rationale for administering nitroglycerin oxygen and ASA to a patient with chest pain or discomfort.                                                                                                                                                                                                                                                                                                                                              |
| 31.14             | Demonstrate the assessment and documentation of patient response to the automated external defibrillator.                                                                                                                                                                                                                                                                                                                                                     |
| 31.15             | Demonstrate the assessment and documentation of patient response to nitroglycerin.                                                                                                                                                                                                                                                                                                                                                                            |
| 31.16             | Discuss the purpose and use of CPR assist devices.                                                                                                                                                                                                                                                                                                                                                                                                            |
| <del>31.17</del>  | <del>31.17</del> Describe the risk factors for and prevention of cardiac related diseases and provide appropriate patient education.                                                                                                                                                                                                                                                                                                                          |
| <del>31.18</del>  | <del>31.18</del> Discuss the signs and symptoms of acute coronary syndrome and provide appropriate patient education to include self-administration of prescribed medications.                                                                                                                                                                                                                                                                                |
| <del>3232.0</del> | <b>Toxicology:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of toxicological (poisoning and overdose) emergencies patients of all ages. The student will be able to:                                                                                                                                                                                                                               |
| 32.01             | Define and differentiate among toxicology, poisoning, and overdose.                                                                                                                                                                                                                                                                                                                                                                                           |
| 32.02             | Describe the pathophysiology and signs and symptoms of the following toxicological emergencies, including but not limited to: <ul style="list-style-type: none"> <li>• Food poisoning</li> <li>• Carbon monoxide poisoning</li> <li>• Cyanide poisoning</li> <li>• Exposure to acid or alkaline substances</li> <li>• Exposure to hydrocarbons</li> <li>• Methanol ingestion</li> <li>• Isopropanol ingestion</li> <li>• Ethylene glycol ingestion</li> </ul> |

|                                    |                                                                                                                                                                                                                                                                                                                                                                                               |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                    | <ul style="list-style-type: none"> <li>• Exposure to poisonous plants</li> <li>• Drug withdrawal</li> <li>• Alcoholic syndrome</li> <li>• Withdrawal syndrome (including delirium tremens)</li> <li>• Illicit drug use</li> <li>• Medication overdose</li> <li>• Opioid overdose</li> <li>• Organophosphate overdose</li> <li>• Nerve agents</li> </ul>                                       |
| 32.03                              | Discuss various ways that toxins enter the body, (including inhalation, ingestion, injection, and absorption).                                                                                                                                                                                                                                                                                |
| 32.04                              | Discuss and demonstrate the assessment and management for the patient with a toxicological emergency.                                                                                                                                                                                                                                                                                         |
| 32.05                              | Discuss the role of the Poison Control Center with the nationwide contact number 800-222-1222 in the United States.                                                                                                                                                                                                                                                                           |
| 32.06                              | Explain the rationale for contacting medical direction early in the prehospital management of a patient with a toxicological emergency.                                                                                                                                                                                                                                                       |
| 32.07                              | Review the following for Narcan (naloxone): <ul style="list-style-type: none"> <li>• Generic and trade names</li> <li>• Medication forms</li> <li>• Dose</li> <li>• Administration</li> <li>• Action</li> <li>• Contraindications</li> </ul>                                                                                                                                                  |
| 32.08                              | Discuss the use of medication assisted treatments for substance misuse disorders including suboxone, methadone, and naltrexone and potential complications.                                                                                                                                                                                                                                   |
| <a href="#">32.09</a>              | <del>32.09</del> Discuss safe uses and practices with potentially toxic substances while providing appropriate patient education.                                                                                                                                                                                                                                                             |
| <del>33</del> <a href="#">33.0</a> | <b>Respiratory:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of respiratory disorders/emergencies for patients of all ages. The student will be able to:                                                                                                                                                                           |
| 33.01                              | Review the basic anatomy and physiology of the respiratory system.                                                                                                                                                                                                                                                                                                                            |
| 33.02                              | Describe the pathophysiology and signs and symptoms of the following respiratory disorders: <ul style="list-style-type: none"> <li>• Chronic Obstructive Pulmonary Disease</li> <li>• Asthma</li> <li>• Bronchiolitis</li> <li>• Pulmonary Edema</li> <li>• Spontaneous Pneumothorax</li> <li>• Hyperventilation Syndrome</li> <li>• Cystic Fibrosis</li> <li>• Pulmonary Embolism</li> </ul> |

| 35.02              | Describe the pathophysiology and signs and symptoms of the following genitourinary/ renal disorders: <ul style="list-style-type: none"> <li>• Urinary tract infection</li> <li>• Kidney stones</li> <li>• Kidney failure</li> </ul>                                                                                                                                                                                                                                                                                                                                                      |
| 35.03              | Discuss the basic principles and complications of kidney dialysis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 35.04              | Discuss the recognition and complications of urinary catheters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 35.05              | Describe and demonstrate the assessment and management of the patient with a dialysis emergency. Across patients of all ages.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 35.06              | Discuss traumatic injuries to the genitourinary system, including, but not limited to: sexual assault (female and male).                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <del>36</del> 36.0 | <b>Gynecology:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of gynecologic emergencies, patients of all ages. The student will be able to:                                                                                                                                                                                                                                                                                                                                                                                    |
| 36.01              | Review the basic anatomy and physiology of the female reproductive system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 36.02              | Describe the pathophysiology and signs and symptoms of the following gynecologic disorders and emergencies, including but not limited to: <ul style="list-style-type: none"> <li><del>36.02.1</del>• Sexual assault</li> <li><del>36.02.2</del>• Non-traumatic vaginal bleeding</li> <li><del>36.02.3</del>• Menstrual pain</li> <li><del>36.02.4</del>• Ovarian cyst</li> <li><del>36.02.5</del>• Endometritis</li> <li><del>36.02.6</del>• Endometriosis</li> <li><del>36.02.7</del>• Pelvic inflammatory disease</li> <li><del>36.02.8</del>• Sexually Transmitted Disease</li> </ul> |
| 36.03              | Describe and demonstrate the assessment and management of the patient experiencing a gynecologic emergency. Across patients of all ages.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 36.04              | Describe the assessment and management of a patient who has experienced a sexual assault including the psychosocial impact and assessment findings/presentations.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 36.05              | Discuss the professional and psychological importance of maintaining a patient's modesty and privacy while still being able to obtain necessary information.                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 36.06              | Discuss the need to provide care for a patient of sexual assault, while still preventing destruction of crime scene information.                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <del>37</del> 37.0 | <b>Non-Traumatic Musculoskeletal Disorders:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of the assessment and management of non-traumatic fractures, patients of all ages. The student will be able to:                                                                                                                                                                                                                                                                                                                                                       |
| 37.01              | Review the basic anatomy and physiology of the musculoskeletal system.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 37.02              | Describe and demonstrate the assessment and management of the patient in patients of all ages with a non-traumatic musculoskeletal emergency.                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <del>38</del> 38.0 | <b>Diseases of the Eyes, Ears, Nose, and Throat:</b> Demonstrate a simple depth, simple breadth of knowledge of assessment and management of diseases of the eyes, ears, nose, and throat, patients of all ages. The student will be able to:                                                                                                                                                                                                                                                                                                                                            |

|                    |                                                                                                                                                                                                            |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 38.01              | Describe and demonstrate the assessment and management of the patients in all ages with abnormal conditions affecting the eyes, ears, nose and throat, including epistaxis.                                |
| <del>39</del> 39.0 | <b>Shock and Resuscitation:</b> Demonstrate a fundamental knowledge of the causes, pathophysiology, and management of shock and respiratory failure, patients of all ages. The student will be able to:    |
| 39.01              | Discuss and identify causes and pathophysiology of the categories of hemorrhage and shock.                                                                                                                 |
| 39.02              | Review causes and pathophysiology of respiratory failure and arrest.                                                                                                                                       |
| 39.03              | Review causes and pathophysiology of cardiac failure or arrest.                                                                                                                                            |
| 39.04              | Discuss the various types and degrees of shock.                                                                                                                                                            |
| 39.05              | Discuss post resuscitation management.                                                                                                                                                                     |
| 39.06              | Explain the system components of CPR, the links in the AHA chain of survival and how each relates to patient survival.                                                                                     |
| 39.07              | Define and differentiate between compensated and decompensated shock.                                                                                                                                      |
| 39.08              | Discuss the importance of teamwork in the successful management of the critical patient.                                                                                                                   |
| 39.09              | Demonstrate how to perform one and two rescuer CPR, adult, child, and infant.                                                                                                                              |
| 39.10              | Demonstrate how to perform rescuer level appropriate defibrillation in an adult, child, and infant patient.                                                                                                |
| 39.11              | Demonstrate rapid decision making based on differential field diagnosis of the critical patient with a special arrest peri-arrest condition.                                                               |
| 39.12              | Describe and demonstrate the assessment and management of the patient with hemorrhage and shock.                                                                                                           |
| 39.13              | Discuss ethical issues in resuscitation.                                                                                                                                                                   |
| <del>39.14</del>   | <del>39.14</del> —Discuss options for termination resuscitation.                                                                                                                                           |
| <del>40</del> 40.0 | <b>Trauma Overview:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of the trauma, patients of all ages. The student will be able to: |
| 40.01              | Discuss pathophysiology of the trauma patient.                                                                                                                                                             |
| 40.02              | Discuss the components of a comprehensive trauma systems and levels of trauma centers.                                                                                                                     |
| 40.03              | Describe the considerations for different transportation modes, transport and destination issues to a trauma center.                                                                                       |
| 40.04              | Discuss the kinematics of blunt and penetrating trauma.                                                                                                                                                    |
| 40.05              | Discuss and describe significant and non-significant Mechanism of Injury (MOI) and provide examples of each.                                                                                               |
| 40.06              | Demonstrate the application of the State of Florida's trauma scorecard methodologies as required in Florida Statute and Florida Administrative Code (F.A.C.).                                              |
| 40.07              | Discuss the National Trauma Triage Protocol of injured Patients.                                                                                                                                           |
| 40.08              | Discuss forming a field impression and utilizing available information to determine a differential diagnosis.                                                                                              |

|             |                                                                                                                                                                                                                                                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 40.09       | Identify the need for rapid intervention transport of the trauma patient.                                                                                                                                                                                                                              |
| <b>41.0</b> | <b>Bleeding:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of bleeding, patients of all ages. The student will be able to:                                                                                                     |
| 41.01       | Review the anatomy and physiology of the circulatory system.                                                                                                                                                                                                                                           |
| 41.02       | Discuss the different types of bleeding and classes of hemorrhage.                                                                                                                                                                                                                                     |
| 41.03       | Review signs and symptoms of shock (hypo-perfusion).                                                                                                                                                                                                                                                   |
| 41.04       | Demonstrate effective hemorrhage control to include application of a tourniquet.                                                                                                                                                                                                                       |
| 41.05       | Review the pathophysiology of hemorrhagic shock.                                                                                                                                                                                                                                                       |
| 41.06       | Recognize the need for rapid transport for patients that are bleeding and showing signs of shock (hypo-perfusion).                                                                                                                                                                                     |
| 41.07       | Describe and demonstrate the assessment and management of a patient with hemorrhagic shock.                                                                                                                                                                                                            |
| 41.08       | Discuss the possible complications of an improperly applied dressing, bandage, tourniquet, and hemostatic agents.                                                                                                                                                                                      |
| <b>42.0</b> | <b>Chest Trauma:</b> Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of chest trauma, patients of all ages. The student will be able to:                                                                                                    |
| 42.01       | Review the anatomy and physiology of the thoracic/chest cavity and respiratory system.                                                                                                                                                                                                                 |
| 42.02       | Differentiate between a pneumothorax (open, simple and tension) and hemothorax.                                                                                                                                                                                                                        |
| 42.03       | Discuss the pathophysiology, signs and symptoms, and MOI of myocardial injuries, including the following: <ul style="list-style-type: none"> <li>• Pericardial tamponade</li> <li>• Myocardial contusion</li> <li>• Myocardial rupture</li> <li>• Commotio cordis</li> <li>• Aortic shearer</li> </ul> |
| 42.04       | Discuss the pathophysiology, signs and symptoms, and MOI of specific chest wall injuries, including the following: <ul style="list-style-type: none"> <li>• Rib fracture</li> <li>• Flail segment</li> <li>• Sternal fracture</li> <li>• Open chest wound</li> <li>• Impaled object</li> </ul>         |
| 42.05       | Describe and demonstrate the assessment and management of chest trauma, to include blunt versus penetrating trauma.                                                                                                                                                                                    |
| <b>43.0</b> | <b>Abdominal and Genitourinary Trauma:</b> Demonstrate a fundamental depth, simple breadth of knowledge of pathophysiology, assessment and management of abdominal and genitourinary trauma, patients of all ages. The student will be able to:                                                        |
| 43.01       | Review the anatomy and physiology of the abdominal cavity and genitourinary system.                                                                                                                                                                                                                    |
| 43.02       | Discuss the pathophysiology, signs and symptoms, and MOI for abdominal trauma including evisceration, impaled objects, blunt versus penetrating mechanisms, hollow and solid organ injuries.                                                                                                           |

|                    |                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 43.03              | Describe and demonstrate the assessment and management of a patient with a suspected abdominal or genitourinary injury/trauma, to include internal/external genitalia.                                                                                                                                                                                                                                 |
| <del>44</del> 44.0 | <b>Orthopedic Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of orthopedic trauma, patients of all ages-. The student will be able to:                                                                                                                                                                                  |
| 44.01              | Review the anatomy and physiology of the musculo-skeletal system.                                                                                                                                                                                                                                                                                                                                      |
| 44.02              | Discuss pathophysiology, signs and symptoms, and MOI for orthopedic trauma.                                                                                                                                                                                                                                                                                                                            |
| 44.03              | Discuss the different types of orthopedic trauma including fracture classifications to include: <ul style="list-style-type: none"> <li>• <del>Open</del> fracture</li> <li>• <del>Closed</del> fracture</li> <li>• <del>Dislocation</del></li> <li>• <del>Upper and Lower extremity</del> orthopedic trauma</li> <li>• <del>Sprains and Strains</del></li> <li>• <del>Pelvic</del> Fracture</li> </ul> |
| 44.04              | Explain the rationale for stabilization of an injured extremity.                                                                                                                                                                                                                                                                                                                                       |
| 44.05              | Describe and demonstrate the assessment and management of a patient with a suspected orthopedic trauma.                                                                                                                                                                                                                                                                                                |
| 44.06              | Discuss the following management techniques: <ul style="list-style-type: none"> <li><del>44.06.1</del>• Heat therapy</li> <li><del>44.06.2</del>• Cold therapy</li> <li><del>44.06.3</del>• Splinting</li> </ul>                                                                                                                                                                                       |
| 44.07              | List the six “P’s” of orthopedic injury assessment.                                                                                                                                                                                                                                                                                                                                                    |
| 44.08              | Discuss the need for assessment of distal pulses, motor, and sensation before and after splinting.                                                                                                                                                                                                                                                                                                     |
| 44.09              | Review age-associated changes in the bones.                                                                                                                                                                                                                                                                                                                                                            |
| 44.10              | Discuss the proper procedures to package an amputated body part for replantation.                                                                                                                                                                                                                                                                                                                      |
| 44.11              | Explain the rationale for splinting at the scene versus load and go.                                                                                                                                                                                                                                                                                                                                   |
| 44.12              | Demonstrate the proper use of various splinting materials and devices to include improvised and traction splints.                                                                                                                                                                                                                                                                                      |
| <del>45</del> 45.0 | <b>Soft Tissue Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of soft tissue trauma, patients of all ages. The student will be able to:                                                                                                                                                                                 |
| 45.01              | Review anatomy and physiology of the integumentary system to include the layers of the skin.                                                                                                                                                                                                                                                                                                           |
| 45.02              | Describe the pathophysiology, signs and symptoms, and MOI of soft tissue trauma.                                                                                                                                                                                                                                                                                                                       |
| 45.03              | Describe and demonstrate the assessment and management of various soft tissue injuries. <ul style="list-style-type: none"> <li>• <del>Wounds</del> (e.g., avulsion, bite, laceration, puncture, and incisions)</li> <li>• <del>Crush and compartment syndrome</del></li> <li>• <del>High pressure injection injury</del></li> </ul>                                                                    |

|       |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 45.04 | Identify types of burn injuries, including: <ul style="list-style-type: none"> <li>• Thermal burn</li> <li>• Chemical burn</li> <li>• Electrical burn</li> <li>• Radiation exposure</li> </ul>                                                                                                                                                                                                                                                       |
| 45.05 | Describe the depth classifications of burn injuries, including: <ul style="list-style-type: none"> <li>45.05.1 • Superficial burn</li> <li>45.05.2 • Partial-thickness burn</li> <li>45.05.3 • Full-thickness burn</li> <li>45.05.4 • Other depth classifications</li> </ul>                                                                                                                                                                         |
| 45.06 | Describe and demonstrate methods for determining body surface area percentage of a burn injury including the “rule of nines,” the “rule of palms,” and other methods.                                                                                                                                                                                                                                                                                |
| 45.07 | Explain how the seriousness of a burn is related to its depth and percent of body surface area (BSA) involved.                                                                                                                                                                                                                                                                                                                                       |
| 45.08 | Review the various management techniques for hemorrhage control.                                                                                                                                                                                                                                                                                                                                                                                     |
| 45.09 | Differentiate among the types of injuries requiring the use of an occlusive versus non- occlusive dressing.                                                                                                                                                                                                                                                                                                                                          |
| 45.10 | Demonstrate the assessment and management of specific burn injuries including: <ul style="list-style-type: none"> <li>• Thermal</li> <li>• Inhalation</li> <li>• Chemical (in the eye and on the skin)</li> <li>• Electrical</li> <li>• Radiation</li> </ul>                                                                                                                                                                                         |
| 46.0  | <b>Head, Facial, Neck, and Spine Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of head, facial, neck and spine trauma, patients of all ages. The student will be able to:                                                                                                                                                                                            |
| 46.01 | Review the anatomy and physiology of the head, face, neck and spine.                                                                                                                                                                                                                                                                                                                                                                                 |
| 46.02 | Describe the pathophysiology, signs and symptoms, and MOI for head, face, neck, and spine trauma.                                                                                                                                                                                                                                                                                                                                                    |
| 46.03 | Describe and demonstrate the assessment and management of a patient with the following traumas to the head, face, neck, and spine: <ul style="list-style-type: none"> <li>• Penetrating neck trauma</li> <li>• Laryngotracheal injury</li> <li>• Skull fracture</li> <li>• Facial fracture</li> <li>• Eye injury (foreign body) eyes, globe rupture.</li> <li>• Dental trauma</li> <li>• Shaken Baby Syndrome</li> <li>• Severe epistaxis</li> </ul> |
| 46.04 | Recognize and manage life threats due to face, head, neck, and spine trauma.                                                                                                                                                                                                                                                                                                                                                                         |

|             |                                                                                                                                                                                                                                                                                                                             |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 46.05       | Discuss and demonstrate the utilization of the Glasgow Coma Scale.                                                                                                                                                                                                                                                          |
| <b>47.0</b> | <b>Nervous System Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of nervous system trauma, patients of all ages. The student will be able to:                                                                                                |
| 47.01       | Review the anatomy and physiology of the nervous system.                                                                                                                                                                                                                                                                    |
| 47.02       | Discuss the pathophysiology, signs and symptoms, and MOI for <b>traumatic</b> brain and <b>injury (TBI)</b> spinal cord trauma.                                                                                                                                                                                             |
| 47.03       | Describe and demonstrate the assessment and management of a patient with a <b>traumatic</b> brain <b>injury (TBI)</b> and/or spinal cord trauma.                                                                                                                                                                            |
| 47.04       | Discuss the rationale and potential complications of spinal motion restriction of the entire spine when a cervical spine injury is suspected.                                                                                                                                                                               |
| 47.05       | Given a scenario, discuss whether or not to remove a helmet prior to transport of a patient.                                                                                                                                                                                                                                |
| 47.06       | Demonstrate various methods for stabilization and removal of a helmet.                                                                                                                                                                                                                                                      |
| 47.07       | Discuss documentation of assessment before, during, and after spinal motion restriction.                                                                                                                                                                                                                                    |
| <b>48.0</b> | <b>Special Considerations in Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of trauma patients with special considerations for patients of all ages. The student will be able to:                                                             |
| 48.01       | Review the anatomy and physiology for the following trauma patients: <ul style="list-style-type: none"> <li>• Pregnant</li> <li>• Pediatric</li> <li>• Geriatric</li> </ul>                                                                                                                                                 |
| 48.02       | Discuss the pathophysiology, signs and symptoms, and MOI of trauma in the following patients: <ul style="list-style-type: none"> <li>• Pregnant</li> <li>• Pediatric</li> <li>• Geriatric</li> </ul>                                                                                                                        |
| 48.03       | Discuss and demonstrate unique assessment and management considerations for the following trauma patients: <ul style="list-style-type: none"> <li>• Pregnant</li> <li>• Pediatric</li> <li>• Geriatric</li> <li>• Cognitively impaired</li> </ul>                                                                           |
| <b>49.0</b> | <b>Environmental Emergencies:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment and management of environmental emergencies, patients of all ages. The student will be able to:                                                                                         |
| 49.01       | Define drowning and discuss its incidence, risk factors and prevention.                                                                                                                                                                                                                                                     |
| 49.02       | Discuss the pathophysiology, signs and symptoms, and MOI of the following: <ul style="list-style-type: none"> <li>• Drowning and water related incidents</li> <li>• Temperature-related illness</li> <li>• Bites and envenomation</li> <li>• Dysbarism such as high-altitude injuries</li> <li>• Diving injuries</li> </ul> |

|        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|        | <ul style="list-style-type: none"> <li>• Lightning (electrical) injury</li> <li>• High altitude illness</li> <li>• Radiation exposure</li> <li>• Other environmental emergencies</li> </ul>                                                                                                                                                                                                                                                                                                          |
| 49.03  | <p>Describes and demonstrate the assessment and management for a patient with the following:</p> <ul style="list-style-type: none"> <li>• drowning and water related incidents</li> <li>• Temperature-related illness</li> <li>• Bites and envenomation</li> <li>• Dysbarism such as high-altitude injuries</li> <li>• Diving injuries</li> <li>• Lightning (electrical) injury</li> <li>• High altitude illness</li> <li>• Radiation exposure</li> <li>• Other environmental emergencies</li> </ul> |
| 49.04  | Discuss the fundamental principles of the gas laws including Boyle's, Dalton, Henry and Charles.                                                                                                                                                                                                                                                                                                                                                                                                     |
| 49.05  | Discuss scene management and provider safety considerations for a variety of environmental emergencies.                                                                                                                                                                                                                                                                                                                                                                                              |
| 49.06  | Explain the five ways a body can lose heat.                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 49.07  | Discuss potentially life-threatening venomous species of insects, spiders and snakes in the U.S.                                                                                                                                                                                                                                                                                                                                                                                                     |
| 5050.0 | <b>Multi-Systems Trauma:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of pathophysiology, assessment, and management of multi-system trauma and blast injuries, patients of all ages. The student will be able to:                                                                                                                                                                                                                                                         |
| 50.01  | Discuss the pathophysiology, signs and symptoms, and MOI of multi-system trauma and blast injuries.                                                                                                                                                                                                                                                                                                                                                                                                  |
| 50.02  | Describe and demonstrate assessment and management considerations for a patient of multi system trauma and blast injuries.                                                                                                                                                                                                                                                                                                                                                                           |
| 5151.0 | <b>Obstetrics:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of management of the obstetric patient within the scope of practice of the EMT. The student will be able to:                                                                                                                                                                                                                                                                                                   |
| 51.01  | Identify and describe the anatomical and the physiological changes during pregnancy.                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 51.02  | Define the stages of labor and discuss how to assess them.                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 51.03  | Differentiate between cephalic and abnormal delivery.                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 51.04  | Describe the management of a patient with pre-delivery emergencies.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 51.05  | Discuss and demonstrate the patient care measures for all stages of labor in a cephalic delivery for the mother and the newborn.                                                                                                                                                                                                                                                                                                                                                                     |
| 51.06  | Describe the management of the mother post-delivery.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 51.07  | Discuss and demonstrate the patient care measures for all stages of labor in abnormal deliveries for the mother and the newborn.                                                                                                                                                                                                                                                                                                                                                                     |
| 51.08  | Describe the procedures for handling complications of delivery.                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|             |                                                                                                                                                                                                                  |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 51.09       | Describe special considerations when meconium is present in amniotic fluid or during delivery.                                                                                                                   |
| 51.10       | Identify the factors that lead to premature birth and low birth weight newborns.                                                                                                                                 |
| 51.11       | Demonstrate the procedures for handling complications of pregnancy including pre-eclampsia, eclampsia, and high risk.                                                                                            |
| <b>52.0</b> | <b>Neonatal Care:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of management of the newborn and neonatal patient within the scope of practice of the EMT. The student will be able to: |
| 52.01       | Discuss and demonstrate assessment and management considerations of a neonate.                                                                                                                                   |
| 52.02       | Define the term neonate.                                                                                                                                                                                         |
| 52.03       | Describe special patient care considerations of a premature baby.                                                                                                                                                |
| 52.04       | Calculate the Apgar score given various newborn situations.                                                                                                                                                      |
| 52.05       | Discuss the common signs when ventilator assistance is appropriate for a neonate.                                                                                                                                |
| 52.06       | Discuss and demonstrate the steps in resuscitation of a neonate.                                                                                                                                                 |
| 52.07       | Review the signs of hypovolemia in a newborn.                                                                                                                                                                    |
| 52.08       | Discuss the effects maternal narcotic usage has on the newborn.                                                                                                                                                  |
| 52.09       | Discuss the management/treatment plan for vomiting in the neonate.                                                                                                                                               |
| 52.10       | Discuss the assessment findings associated with common birth injuries in the neonate.                                                                                                                            |
| <b>53.0</b> | <b>Pediatrics:</b> Demonstrate a fundamental depth, fundamental breath of knowledge of management of the pediatric patient within the scope of practice of the EMT. The student will be able to:                 |
| 53.01       | Review the anatomy, physiology and pathophysiology differences of patients.                                                                                                                                      |
| 53.02       | Discuss the differences in approaching and assessing patients.                                                                                                                                                   |
| 53.03       | Discuss and demonstrate assessment and management considerations for Sudden Unexplained Infant Death Syndrome (SUIDS).                                                                                           |
| 53.04       | Describe the selection of appropriate airway adjuncts and ventilation devices.                                                                                                                                   |
| 53.05       | Discuss complications of improper utilization of airway adjuncts and ventilation devices.                                                                                                                        |
| 53.06       | Describe the common causes, assessment and management of respiratory distress, failure, or arrest.                                                                                                               |
| 53.07       | Discuss the common causes, assessment and management of hypo-perfusion.                                                                                                                                          |
| 53.08       | Discuss the common causes, assessment and management of cardiopulmonary arrest.                                                                                                                                  |
| 53.09       | Describe the common causes, assessment and management of altered level of consciousness.                                                                                                                         |
| 53.10       | Describe the common causes, assessment and management of trauma.                                                                                                                                                 |
| 53.11       | Describe the common causes, assessment and management of neurological emergencies.                                                                                                                               |
| 53.12       | Demonstrate proper technique for administering blow-by oxygen.                                                                                                                                                   |

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 53.13       | Review proper technique for suctioning.                                                                                                                                                                                                                                                                                                                                                                                               |
| 53.14       | Review appropriate use of airway adjuncts and ventilation devices.                                                                                                                                                                                                                                                                                                                                                                    |
| 53.15       | Review age-appropriate basic airway clearing maneuvers for a completely obstructed airway.                                                                                                                                                                                                                                                                                                                                            |
| <b>54.0</b> | <b>Geriatrics:</b> Demonstrate a fundamental depth, foundational breadth of knowledge of management of the geriatric patient within the scope of practice of the EMT. The student will be able to:                                                                                                                                                                                                                                    |
| 54.01       | Define and discuss the term geriatrics.                                                                                                                                                                                                                                                                                                                                                                                               |
| 54.02       | Review the anatomy, physiology and pathophysiology of the geriatric patient.                                                                                                                                                                                                                                                                                                                                                          |
| 54.03       | Discuss common emotional and psychological concerns and conditions of the geriatric patient.                                                                                                                                                                                                                                                                                                                                          |
| 54.04       | Discuss the importance of fall prevention with the geriatric patient.                                                                                                                                                                                                                                                                                                                                                                 |
| 54.05       | Describe principles that should be employed when assessing and communicating with the geriatric patient.                                                                                                                                                                                                                                                                                                                              |
| 54.06       | Describe the common causes, assessment, and management of the geriatric patient with a medical, trauma, or psychosocial complaint.                                                                                                                                                                                                                                                                                                    |
| <b>55.0</b> | <b>Patients with Special Challenges:</b> Demonstrate a simple depth, simple breadth of knowledge of the management of the patient with special challenges for patients of all ages. The student will be able to:                                                                                                                                                                                                                      |
| 55.01       | Discuss the special considerations required when providing emergency care to patients with: <ul style="list-style-type: none"> <li>• Abuse/neglect of vulnerable populations</li> <li>• Homelessness</li> <li>• Poverty</li> <li>• Bariatrics</li> <li>• Tech dependent</li> <li>• Hospice/terminally ill</li> <li>• Tracheostomy</li> <li>• Home care</li> <li>• Sensory deficit/loss</li> <li>• Developmental disability</li> </ul> |
| 55.02       | Discuss special considerations regarding common medical devices used in the home care of patients with special challenges including: <ul style="list-style-type: none"> <li>• Respiratory devices</li> <li>• Cardiac devices</li> <li>• Gastro-urinary devices</li> <li>• Central &amp; peripheral IV catheters</li> </ul>                                                                                                            |
| 55.03       | Describe home care and the types of patients it serves and the services it encompasses.                                                                                                                                                                                                                                                                                                                                               |
| 55.04       | Differentiate between hospice/palliative care and curative care.                                                                                                                                                                                                                                                                                                                                                                      |
| 55.05       | Discuss the role of the EMT as a patient advocate for vulnerable populations.                                                                                                                                                                                                                                                                                                                                                         |

|                    |                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <del>56</del> 56.0 | <b>Principles of Safely Operating a Ground Ambulance:</b> Demonstrate a simple depth, foundational breadth of knowledge of risks and responsibilities of transport. The student will be able to:                                                                                                                                                                                     |
| 56.01              | Discuss the importance of performing regular vehicle and equipment inspection.                                                                                                                                                                                                                                                                                                       |
| 56.02              | Demonstrate how to perform a daily inspection of an ambulance.                                                                                                                                                                                                                                                                                                                       |
| 56.03              | Review the general provisions of Florida laws relating to the operation of the ambulance.                                                                                                                                                                                                                                                                                            |
| 56.04              | Discuss the guidelines for operating an ambulance safely during emergency and non-emergency situation/incident.                                                                                                                                                                                                                                                                      |
| 56.05              | Review considerations that are required for ensuring scene safety, including personal safety, patient safety, and traffic control.                                                                                                                                                                                                                                                   |
| 56.06              | Review how to clean and disinfect the ambulance and equipment.                                                                                                                                                                                                                                                                                                                       |
| <del>57</del> 57.0 | <b>Incident Management:</b> Demonstrate a fundamental depth, fundamental breadth of knowledge of establishing and working within the incident management system. The student will be able to:                                                                                                                                                                                        |
| 57.01              | Discuss the importance of NIMS (National Incident Management System) and its functional components.                                                                                                                                                                                                                                                                                  |
| 57.02              | Discuss unified command and when it is applicable.                                                                                                                                                                                                                                                                                                                                   |
| 57.03              | Describe the role of command and the procedures for transfer of command.                                                                                                                                                                                                                                                                                                             |
| 57.04              | List and describe the functions of the following groups and leaders in ICS as it pertains to EMS incidents: <ul style="list-style-type: none"> <li>• Safety</li> <li>• Logistics</li> <li>• Rehabilitation</li> <li>• Staging,</li> <li>• Treatment</li> <li>• Triage</li> <li>• Transportation</li> <li>• Extrication/rescue</li> <li>• Morgue</li> <li>• Communications</li> </ul> |
| 57.05              | Discuss the physical and psychological signs of critical incident stress.                                                                                                                                                                                                                                                                                                            |
| <del>58</del> 58.0 | <b>Multiple Casualty Incidents:</b> Demonstrate a simple depth, foundational breadth of knowledge of responding to an emergency during a multiple casualty incident. The student will be able to:                                                                                                                                                                                    |
| 58.01              | Review essential elements of scene size-up when arriving at a potential MCI.                                                                                                                                                                                                                                                                                                         |
| 58.02              | Describe the role of the rescuers and EMS systems in planning for MCIs and disasters.                                                                                                                                                                                                                                                                                                |
| 58.03              | Describe the role of the physician at multiple casualty incidents.                                                                                                                                                                                                                                                                                                                   |
| 58.04              | Define triage and describe the principles of triage.                                                                                                                                                                                                                                                                                                                                 |
| 58.05              | Describe the START (simple triage and rapid treatment) and JUMP START method of initial triage.                                                                                                                                                                                                                                                                                      |

|                    |                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 58.06              | Describe techniques used to allocate patients to hospitals and track them.                                                                                                                                                                                                                                                                                      |
| 58.07              | Discuss and describe the essential equipment to provide logistical support to MCI operations.                                                                                                                                                                                                                                                                   |
| 58.08              | Describe the role of critical incident stress management during and after MCIs.                                                                                                                                                                                                                                                                                 |
| 58.09              | Demonstrate the use of local/regional triage tagging system.                                                                                                                                                                                                                                                                                                    |
| <del>59</del> 59.0 | <b>Air Medical:</b> Demonstrate a simple depth, simple breadth of knowledge of safe air medical operations and criteria for utilizing air medical response. The student will be able to:                                                                                                                                                                        |
| 59.01              | Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.                                                                                                                                                                                                           |
| 59.02              | Describe the capabilities, protocols, and methods for accessing air medical transport.                                                                                                                                                                                                                                                                          |
| 59.03              | Review the advantages and disadvantages of air medical transport.                                                                                                                                                                                                                                                                                               |
| 59.04              | Review the conditions/situations in which air medical transport should be considered.                                                                                                                                                                                                                                                                           |
| <del>60</del> 60.0 | <b>Vehicle Extrication:</b> Demonstrate a simple depth, simple breadth of knowledge for safe vehicle extrication and use of simple hand tools. The student will be able to:                                                                                                                                                                                     |
| 60.01              | Describe the role of the EMT in patient rescue and vehicle extrication                                                                                                                                                                                                                                                                                          |
| 60.02              | Describe personal and patient safety during vehicle extrication.                                                                                                                                                                                                                                                                                                |
| 60.03              | Explain the difference between simple access and complex access in vehicle extrication.                                                                                                                                                                                                                                                                         |
| 60.04              | Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patient and removing and transferring a patient.                                                                                                                                                                                        |
| 60.05              | Discuss the use of simple hand tools used for vehicle extrication.                                                                                                                                                                                                                                                                                              |
| 60.06              | Discuss and describe the hazards and safe practices associated with the following vehicle components: <ul style="list-style-type: none"> <li>• Energy absorbing bumpers</li> <li>• Air bag/supplemental restraint systems</li> <li>• Catalytic converters and conventional fuel systems</li> <li>• Stored energy</li> <li>• Hybrid-electric vehicles</li> </ul> |
| 60.07              | Describe methods for emergency stabilization using rope, cribbing, jacks, spare tire, and come-a-longs for vehicles.                                                                                                                                                                                                                                            |
| 60.08              | Describe the electrical hazards commonly found at highway incidents (above and below ground).                                                                                                                                                                                                                                                                   |
| 60.09              | Explain the difference between tempered and safety glass, identify its locations on a vehicle and how to break it safely.                                                                                                                                                                                                                                       |
| 60.10              | Explain typical door anatomy and methods to gain access to the patient.                                                                                                                                                                                                                                                                                         |
| <del>61</del> 61.0 | <b>Hazardous Materials Awareness:</b> Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating in a cold zone at a hazardous material or other special incident. The student will be able to:                                                                                                                         |
| 61.01              | Identify and describe resources for substance identification, decontamination, and treatment information, including but not limited to the following:                                                                                                                                                                                                           |

|             |                                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             | <ul style="list-style-type: none"> <li>• Poison control center</li> <li>• Medical control</li> <li>• Material safety data sheets (MSDS),</li> <li>• Reference textbooks</li> <li>• Computer databases</li> <li>• Computer-Aided Management of Emergency Operations (CAMEO)</li> <li>• CHEMTREC</li> <li>• Technical specialists</li> <li>• Agency for toxic substances and disease registry</li> </ul> |
| 61.02       | Explain primary and secondary contamination risk.                                                                                                                                                                                                                                                                                                                                                      |
| 61.03       | Review routes of exposure.                                                                                                                                                                                                                                                                                                                                                                             |
| 61.04       | Discuss how the substance and route of contamination alters triage and decontamination methods.                                                                                                                                                                                                                                                                                                        |
| 61.05       | Explain the common signs, symptoms, and treatment for the following substances: <ul style="list-style-type: none"> <li>• Corrosives</li> <li>• Pesticides</li> <li>• Chemical asphyxiants</li> <li>• Hydrocarbon solvents</li> </ul>                                                                                                                                                                   |
| 61.06       | Identify local facilities and resources capable of treating patients exposed to hazardous materials.                                                                                                                                                                                                                                                                                                   |
| 61.07       | Determine the appropriate level of PPE by considering the following: <ul style="list-style-type: none"> <li>• Types</li> <li>• Application</li> <li>• Use and limitations</li> <li>• Use of chemical compatibility chart</li> </ul>                                                                                                                                                                    |
| 61.08       | Explain specific decontamination procedures.                                                                                                                                                                                                                                                                                                                                                           |
| 61.09       | Discuss the designated HAZMAT control zones (HOT, WARM, and COLD).                                                                                                                                                                                                                                                                                                                                     |
| 61.10       | Discuss an emergency two-step decontamination process.                                                                                                                                                                                                                                                                                                                                                 |
| 61.11       | Identify DOT Labels, placards and markings that are used to designate HAZMAT materials.                                                                                                                                                                                                                                                                                                                |
| 61.12       | Demonstrate the ability to use a variety of reference materials to identify a HAZMAT material.                                                                                                                                                                                                                                                                                                         |
| <b>62.0</b> | <b>Mass Casualty Incidents Due to Terrorism and Disaster:</b> Demonstrate a simple depth, simple breadth of knowledge of risks and responsibilities of operating on the scene of a natural or man-made disaster. The student will be able to:                                                                                                                                                          |
| 62.01       | Describe the role of the EMT on the scene of a natural or man-made disaster.                                                                                                                                                                                                                                                                                                                           |
| 62.02       | Define the different types of terrorism and provide examples of incidents of each.                                                                                                                                                                                                                                                                                                                     |
| 62.03       | Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.                                                                                                                                                                                                                                                                                     |

|       |                                                                                                                                                                                                                                                                                       |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 62.04 | Discuss the National Terrorism Advisory System.                                                                                                                                                                                                                                       |
| 62.05 | Discuss factors to consider when responding to a terrorist situation.                                                                                                                                                                                                                 |
| 62.06 | Review important actions to take at the scene of a terrorist event such as: <ul style="list-style-type: none"><li>• Scene safety</li><li>• Personal protection</li><li>• Notification procedures</li><li>• Available resources</li><li>• Working with in the command system</li></ul> |
| 62.07 | List and describe the main categories of weapons of mass destruction.                                                                                                                                                                                                                 |
| 62.08 | Discuss the different types of chemical agents and their signs and symptoms.                                                                                                                                                                                                          |
| 62.09 | Review the treatment and management of patients exposed to various types of chemical agents and radiation.                                                                                                                                                                            |
| 62.10 | Review the different types of radiations and their effect on the human body.                                                                                                                                                                                                          |
| 62.11 | Discuss the use of a nerve agent antidote kit.                                                                                                                                                                                                                                        |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

**The Bureau of Fire Standards and Training (BFST)** is responsible for establishing uniform minimum standards for the employment and training of firefighters and volunteer firefighters and for establishing and maintaining firefighting training programs, curricula requirements, and certification of training schools and training school instructors.

The Curriculum Development staff is responsible for the design, implementation, maintenance, evaluation, and revision of job-related curricula for the Bureau of Fire Standards and Training (BFST) approved firefighters and volunteer firefighters, advanced, specialized, and specialized instructor training programs for firefighters. See the following website for additional information:

<http://www.myfloridacfo.com/Division/SFM/BFST/Standards/default.htm>

### Career and Technical Student Organization (CTSO)

~~HOSA: Future Health Professionals and Florida Public Service Association (FPSA) are the~~ CTSOs are co-curricular career and technical student organizations providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### Cooperative Training – OJT

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### Basic Skills

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040, F.A.C.). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.

Florida Department of Education  
Curriculum Framework

Program Title: Radiologic Technology  
Program Type: Career Preparatory  
Career Cluster: Health Science

**This program is only authorized to be offered by Marion Technical College in accordance with a multi-decade grandfathering agreement with the Florida Department of Health. In the mid-2000s the license to practice as a radiologic technologist was leveled at the associate degree level or higher. Marion Technical College was permitted to continue to offer training at the career certificate level. This training is limited to students who have already been awarded an associate degree or higher from an accredited institution of higher education.**

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Radiographers, Radiologic Technologists/Technicians or to provide supplemental training for persons previously or presently employed in these occupations.

The content includes but is not limited to introduction to radiography, medical ethics and law, medical terminology, methods of patient care, human structure and function, radiographic procedures, principles of radiographic exposure, imaging equipment, image processing, radiation physics, principles of radiation protection, principles of radiation biology, radiographic pathology, introduction to quality assurance, introduction to computer literacy, and clinical education. The curriculum includes a plan for well-structured competency based clinical education.

**Additional Information** relevant to this Career and Technical Education (CTE) program is provided at the end of this document.

### Program Structure

This program is a planned sequence of instruction consisting of 3 occupational completion points.

This program is comprised of courses which have been assigned course numbers in the SCNS (Statewide Course Numbering System) in accordance with Section 1007.24 (1), F.S. Career and Technical credit shall be awarded to the student on a transcript in accordance with Section 1001.44(3) (b), F.S.

To teach the courses listed below, instructors must hold at least one of the teacher certifications indicated for that course.

The following table illustrates the postsecondary program structure:

| OCP | Course Number | Course Title                               | Teacher Certification | Length    |
|-----|---------------|--------------------------------------------|-----------------------|-----------|
| A   | RTE0004       | Fundamentals of Radiologic Technology      | TEC X Ray @7 7G       | 96 hours  |
|     | RTE0410       | Radiographic Imaging & Exposure I          |                       | 96 hours  |
|     | RTE0505       | Radiographic Procedures I                  |                       | 96 hours  |
|     | RTE0809       | Clinical Education I                       |                       | 312 hours |
| B   | RTE0450       | Radiographic Imaging & Exposure II         |                       | 90 hours  |
|     | RTE0506       | Radiographic Procedures II                 |                       | 90 hours  |
|     | RTE0507       | Radiographic Procedures III                |                       | 66 hours  |
|     | RTE0819       | Clinical Education II                      |                       | 504 hours |
| C   | RTE0015       | Advanced Modality Imaging                  |                       | 54 hours  |
|     | RTE0780       | Radiographic Pathology & Directed Research |                       | 86 hours  |
|     | RTE0610       | Radiation Physics                          |                       | 86 hours  |
|     | RTE0829       | Clinical Education III                     |                       | 220 hours |
|     | RTE0839       | Advanced Clinical Education IV             |                       | 340 hours |
|     | RTE0380       | Radiation Biology & Radiation Protection   |                       | 51 hours  |
|     | RTE0849       | Advanced Clinical Education V              |                       | 360 hours |

| OCP | Course Number | Course Title        | Teacher Certification | Length    |
|-----|---------------|---------------------|-----------------------|-----------|
|     | RTE0939       | Radiography Seminar |                       | 153 hours |

### **Regulated Programs**

**The program must be approved by the Department of Health, Bureau of Radiation Control so that the graduate is eligible for licensure in Florida as a Certified Radiologic Technologist. As specified in Chapter 468 Part IV, F.S. and Chapter 64E-3, F.A.C.**

The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, Illinois 60606-2901, (312) 704-5300, or any other appropriate accrediting agency acceptable to the American Registry of Radiologic Technologists (ARRT).

### **National Standards (NS)**

Programs identified as having Industry or National Standards have been cross walked with the corresponding standards and/or benchmarks. Industry or National Standards for the Radiologic Technology program can be found at American Society of Radiologic Technologists using the following link: [www.ASRT.org](http://www.ASRT.org)

**CommonFlorida's Career Technical Core – Career Ready Practices** **Readiness Skills for CTE Programs**

Career Ready Practices describe the career-ready skills that educators should seek to develop in their students. These practices are not exclusive to a Career Pathway, program of study, discipline or level of education. Career Ready Practices should be taught and reinforced in all career exploration and preparation programs with increasingly higher levels of complexity and expectation as a student advances through a program of study.

1. Act as a responsible and contributing citizen and employee.
2. Apply appropriate academic and technical skills.
3. Attend to personal health and financial well-being.
4. Communicate clearly, effectively and with reason.
5. Consider the environmental, social and economic impacts of decisions.
6. Demonstrate creativity and innovation.
7. Employ valid and reliable research strategies.
8. Utilize critical thinking to make sense of problems and persevere in solving them.
9. Model integrity, ethical leadership and effective management.
10. Plan education and career path aligned to personal goals.
11. Use technology to enhance productivity.
12. Work productively in teams while using cultural/global competence.

| <b>Employability Skills</b> |                                               |
|-----------------------------|-----------------------------------------------|
| 01.0                        | Apply academic skills to workplace scenarios. |
| 01.01                       | Use reading skills.                           |
| 01.02                       | Use writing skills.                           |
| 01.03                       | Use mathematical strategies and procedures.   |
| 01.04                       | Use scientific principles and procedures.     |
| 02.0                        | Design a solution to an industry problem.     |

|                                                                                                                       |

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate a functional knowledge of medical terminology required in radiologic science.
- 02.0 Convey an understanding of the ethics and laws that impact radiologic sciences at both the state and federal levels.
- 03.0 Demonstrate introductory knowledge of radiologic science and the health care system.
- 04.0 Demonstrate knowledge of and perform patient care procedures required in radiologic sciences.
- 05.0 Demonstrate an understanding of pharmacology and venipuncture procedures as it relates to radiologic science.
- 06.0 Demonstrate proficiency in the skills, techniques and knowledge required for image analysis.
- 07.0 Demonstrate proficiency in the skills, techniques and knowledge required to operate imaging equipment.
- 08.0 Convey an understanding of the principles of imaging and the various factors that contribute to accuracy including x-ray production, image formation, and factors related to radiographic quality.
- 09.0 Demonstrate an understanding of the structure and function of the human body with a focus on the muscular, endocrine, respiratory, urinary and appendicular skeletal systems.
- 10.0 Demonstrate proficiency in the skills, techniques and knowledge required to perform accurate radiographic procedures.
- 11.0 Demonstrate the proficiency in the skills and knowledge required of clinical practice.
- 12.0 Convey an understanding of the principles of imaging and the various factors that contribute to accuracy including image acquisition and processing, scatter radiation control, and image evaluation.
- 13.0 Demonstrate an understanding of the concepts and equipment required of digital image acquisition and display.
- 14.0 Demonstrate an understanding of the structure and function of the human body with a focus on the axial skeletal system.
- 15.0 Demonstrate an understanding of the structure and function of the human body with a focus on the circulatory/cardiovascular, digestive and reproductive systems.
- 16.0 Demonstrate proficiency in the skills, techniques and knowledge required to perform accurate fluoroscopic procedures.
- 17.0 Demonstrate an understanding of the structure and function of the human body with a focus on the nervous system.
- 18.0 Demonstrate introductory knowledge of computed tomography.
- 19.0 Demonstrate appropriate venipuncture technique.
- 20.0 Demonstrate an understanding of radiographic pathology.
- 21.0 Demonstrate an understanding of how radiation is produced and the characteristics of different classifications of radiation.
- 22.0 Demonstrate an understanding of the structure and function of the human body including the immune system and chemical composition of the body.
- 23.0 Demonstrate an understanding of the integral aspects of radiation biology required of a radiographer.
- 24.0 Convey the importance for proper radiation protection and the precautions radiographers should take to prevent unnecessary exposure to themselves and patients.
- 25.0 Demonstrate proficiency in knowledge and skills required of a licensed radiologic technologist.

Florida Department of Education  
Student Performance Standards

Program Title: **Radiologic Technology**  
Career Certificate Program Number: **W170210**

| 01.04                                                                                                                               | Define medical imaging and radiation.                                                                                                                            |
| 01.05                                                                                                                               | Translate medical terms, abbreviations and symbols into layman's terms.                                                                                          |
| 02.0                                                                                                                                | Convey an understanding of the ethics and laws that impact radiologic sciences at both the state and federal levels. The student will be able to:                |
| 02.01                                                                                                                               | Discuss the origins of medical ethics.                                                                                                                           |
| 02.02                                                                                                                               | Apply medical/professional ethics in the context of a broader societal ethic.                                                                                    |
| 02.03                                                                                                                               | Explain the role of ethical behavior in health care delivery.                                                                                                    |
| 02.04                                                                                                                               | Explain concepts of personal honesty, integrity, accountability, competence and compassion as ethical imperatives in health care.                                |
| 02.05                                                                                                                               | Identify legal and professional standards and relate each to practice in health professions.                                                                     |
| 02.06                                                                                                                               | Identify specific situations and conditions that give rise to ethical dilemmas in health care.                                                                   |
| 02.07                                                                                                                               | Explain select concepts embodied in the principles of patients' rights, the doctrine of informed (patient) consent and other issues related to patients' rights. |
| 02.08                                                                                                                               | Explain the legal implications of professional liability, malpractice, professional negligence and other legal doctrines applicable to professional practice.    |
| 02.09                                                                                                                               | Describe the importance of timely, accurate, and comprehensive methods of documentation as a legal and ethical imperative.                                       |

|       |                                                                                                                   |
|-------|-------------------------------------------------------------------------------------------------------------------|
| 02.10 | Explore theoretical situations and questions relating to the ethics of health care delivery.                      |
| 02.11 | Explain legal terms, principles, doctrines and laws specific to the radiologic sciences.                          |
| 02.12 | Outline the conditions necessary for a valid malpractice claim in medical imaging.                                |
| 02.13 | Describe institutional and professional liability protection typically available to the radiographer.             |
| 02.14 | Describe the components and implications of informed consent.                                                     |
| 02.15 | Identify standards for informed consent and disclosure of protected health information (PHI).                     |
| 02.16 | Describe how consent forms are used relative to specific radiographic procedures.                                 |
| 02.17 | Differentiate between civil and criminal liability.                                                               |
| 02.18 | Define tort and explain the differences between intentional and unintentional torts.                              |
| 03.0  | Demonstrate introductory knowledge of radiologic science and the health care system. The student will be able to: |
| 03.01 | Identify health science professions that participate in the total health care of the patient.                     |
| 03.02 | Identify various settings involved in the delivery of health care.                                                |
| 03.03 | Discuss the reimbursement/payment options for health care services.                                               |
| 03.04 | Discuss the role and value of a mission statement to the operation of a healthcare institution.                   |
| 03.05 | Describe relationships and interdependencies of departments within a health care institution.                     |
| 03.06 | Discuss the responsibilities and relationships of all personnel in the radiology department.                      |
| 03.07 | Differentiate between quality assurance (QA) and continuous quality improvement (CQI).                            |
| 03.08 | Differentiate between accreditation types.                                                                        |
| 03.09 | Define credentialing, national certification, registration, and state licensure.                                  |
| 03.10 | Discuss career opportunities and advancement for the radiographer.                                                |
| 03.11 | Identify the benefits of continuing education as related to improved patient care and professional development.   |
| 03.12 | Describe the types, purpose, and functions of professional organizations (ASRT).                                  |
| 03.13 | Identify educational and certifications requirements.                                                             |

|       |                                                                                                                                                                                      |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 03.14 | Identify state and federal regulatory agencies.                                                                                                                                      |
| 04.0  | Demonstrate knowledge of and perform patient care procedures required in radiologic sciences. The student will be able to:                                                           |
| 04.01 | Identify the responsibilities of the health care facility and members of the health care team.                                                                                       |
| 04.02 | List the general responsibilities of the radiographer.                                                                                                                               |
| 04.03 | Describe the practice standards for the radiographer as defined by the ASRT and state licensure.                                                                                     |
| 04.04 | Differentiate between culture and ethnicity.                                                                                                                                         |
| 04.05 | Explain perceptions of dying and death from the viewpoint of both patient and radiographer.                                                                                          |
| 04.06 | Identify methods for determining the correct patient for a given procedure.                                                                                                          |
| 04.07 | Explain the use of various communication models.                                                                                                                                     |
| 04.08 | Explain specific aspects of a radiographic procedure to the patient.                                                                                                                 |
| 04.09 | Demonstrate correct principles of body mechanics applicable to patient care.                                                                                                         |
| 04.10 | Demonstrate techniques for specific types of patient transfer.                                                                                                                       |
| 04.11 | Demonstrate select procedures to turn patients who have various health conditions.                                                                                                   |
| 04.12 | Describe immobilization techniques for various types of procedures and patient conditions.                                                                                           |
| 04.13 | Describe specific patient safety measures and concerns.                                                                                                                              |
| 04.14 | Explain the purpose, legal considerations and procedures for incident reporting.                                                                                                     |
| 04.15 | Describe methods to evaluate patient physical status.                                                                                                                                |
| 04.16 | List the information to be collected prior to a patient examination.                                                                                                                 |
| 04.17 | Describe vital signs and lab values used to assess the condition of the patient, including sites for assessment and normal values.                                                   |
| 04.18 | Define terms related to infection control.                                                                                                                                           |
| 04.19 | Describe the importance of standard precautions and isolation procedures, including sources and modes of transmission of infection and disease and institutional control procedures. |
| 04.20 | Identify symptoms related to specific emergency situations.                                                                                                                          |
| 04.21 | Describe the institution's emergency medical code system and the role of the student during a medical emergency.                                                                     |

|       |                                                                                                                                            |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 04.22 | Explain the age-specific considerations necessary when performing radiographic procedures.                                                 |
| 04.23 | Describe appropriate procedures for management of various types of trauma situations.                                                      |
| 04.24 | Describe the symptoms and medical interventions for a patient with a contrast agent reaction.                                              |
| 04.25 | Explain the role of the radiographer in patient education.                                                                                 |
| 04.26 | Describe the patient preparation for contrast studies.                                                                                     |
| 04.27 | Identify specific types of tubes, lines, catheters and collection devices.                                                                 |
| 04.28 | Outline the steps in the operation and maintenance of suction equipment.                                                                   |
| 04.29 | Outline the steps in the operation and maintenance of oxygen equipment and demonstrate proper use.                                         |
| 04.30 | Demonstrate competency in basic life support (BLS).                                                                                        |
| 04.31 | Describe the steps in performing various mobile procedures.                                                                                |
| 04.32 | Describe the special problems faced in performing procedures on a patient with a tracheotomy and specific tubes, drains and catheters.     |
| 04.33 | Describe the procedure for producing diagnostic images in the surgical suite.                                                              |
| 04.34 | Explain the appropriate radiation protection required when performing mobile/surgical radiography.                                         |
| 05.0  | Demonstrate an understanding of pharmacology and venipuncture procedures as it relates to radiologic science. The student will be able to: |
| 05.01 | Distinguish between the chemical, generic and trade names of various drugs.                                                                |
| 05.02 | Describe the pharmacokinetic, pharmacodynamics and pharmacogenetic principles of drugs.                                                    |
| 05.03 | Explain the uses and impact on the patient of different categories of drugs.                                                               |
| 05.04 | Define the categories of contrast agents and give specific examples for each category.                                                     |
| 05.05 | Explain the pharmacology of contrast agents.                                                                                               |
| 05.06 | Describe methods and techniques for administering various types of contrast agents.                                                        |
| 05.07 | Identify and describe the routes of drug administration.                                                                                   |

**Course Number: RTE0410**  
**Occupational Completion Point: A**  
**Radiographic Imaging & Exposure I – 96 Hours**

|       |                                                                                                                                                                                                           |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06.0  | Demonstrate proficiency in the skills, techniques and knowledge required for image analysis. The student will be able to:                                                                                 |
| 06.01 | Discuss the elements of a radiographic image.                                                                                                                                                             |
| 06.02 | Identify anatomy on radiographic images.                                                                                                                                                                  |
| 06.03 | Apply a problem-solving process used for image analysis.                                                                                                                                                  |
| 06.04 | Describe an effective image analysis method.                                                                                                                                                              |
| 06.05 | Describe the role of the radiographer in image analysis.                                                                                                                                                  |
| 06.06 | Apply the process for evaluating images for adequate image receptor exposure, exposure indicator, contrast/greyscale/spatial resolution, identification markers, and appropriate use of beam restriction. |
| 06.07 | Summarize the importance of proper positioning.                                                                                                                                                           |
| 06.08 | Discuss the impact of patient preparation on the resulting radiographic image.                                                                                                                            |
| 06.09 | Identify common equipment malfunctions that affect image quality, and corrective action.                                                                                                                  |
| 06.10 | Differentiate between technical factor problems, procedural factor problems and equipment malfunctions.                                                                                                   |
| 06.11 | Critique images for appropriate technical, procedural and pathologic factors, and employ corrective actions if necessary.                                                                                 |
| 06.12 | Differentiate images produced by various modalities.                                                                                                                                                      |
| 06.13 | Apply a process for evaluating images for acceptable limits of distortion, image artifacts, radiation fog, noise, and gross exposure.                                                                     |
| 07.0  | Demonstrate proficiency in the skills, techniques and knowledge required to operate imaging equipment. The student will be able to:                                                                       |
| 07.01 | Describe potential difference, current and resistance.                                                                                                                                                    |
| 07.02 | Describe the general components and functions of the tube and filament circuits.                                                                                                                          |
| 07.03 | Compare generators in terms of radiation produced and efficiency.                                                                                                                                         |
| 07.04 | Discuss mobile and fixed radiographic equipment in terms of purpose, components, types and applications.                                                                                                  |
| 07.05 | Demonstrate operation of various types of fixed and mobile radiographic equipment.                                                                                                                        |
| 07.06 | Discuss fixed, fluoroscopy and mobile equipment in terms of purpose, components, types and applications.                                                                                                  |

|       |                                                                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 07.07 | Describe the components and function of automatic exposure control (AEC) devices.                                                                                                                                              |
| 07.08 | Demonstrate proper use of AEC devices.                                                                                                                                                                                         |
| 07.09 | Describe the components of diagnostic x-ray tubes.                                                                                                                                                                             |
| 07.10 | Explain methods used to extend x-ray tube life.                                                                                                                                                                                |
| 07.11 | Explain image-intensified, flat panel, and pulsed fluoroscopy.                                                                                                                                                                 |
| 07.12 | Indicate the purpose, construction and application of fluoroscopic monitor.                                                                                                                                                    |
| 07.13 | Differentiate between quality assurance (QA) and quality control (QC).                                                                                                                                                         |
| 07.14 | List the benefits of a quality control management to the patient and to the department.                                                                                                                                        |
| 07.15 | Evaluate the results of standard QC tests.                                                                                                                                                                                     |
| 07.16 | Discuss the image appearance and basic principles of operation for equipment used in various imaging modalities.                                                                                                               |
| 07.17 | Describe continuous quality improvement (CQI).                                                                                                                                                                                 |
| 07.18 | Describe the components of the various types of display monitors.                                                                                                                                                              |
| 07.19 | Compare monitor types (e.g., acquisition, display).                                                                                                                                                                            |
| 07.20 | Discuss quality control (QC) for imaging equipment and accessories.                                                                                                                                                            |
| 07.21 | Discuss the appropriate use of electronic masking.                                                                                                                                                                             |
| 07.22 | Recognize and compare basic equipment used in various imaging modalities.                                                                                                                                                      |
| 08.0  | Convey an understanding of the principles of imaging and the various factors that contribute to accuracy including x-ray production, image formation and factors related to radiographic quality. The student will be able to: |
| 08.01 | Discuss practical considerations in setting standards for acceptable image quality.                                                                                                                                            |
| 08.02 | Assess radiographic exposure on radiographic images.                                                                                                                                                                           |
| 08.03 | Analyze the relationships of factors that control and affect image exposure.                                                                                                                                                   |
| 08.04 | Critique the radiographic contrast within various radiographic images.                                                                                                                                                         |
| 08.05 | Analyze the relationship of factors that control and affect radiographic contrast.                                                                                                                                             |
| 08.06 | Critique spatial resolution on various radiographic images.                                                                                                                                                                    |

|       |                                                                                              |
|-------|----------------------------------------------------------------------------------------------|
| 08.07 | Analyze the relationships of factors that control and affect spatial resolution.             |
| 08.08 | Differentiate between size and shape distortion.                                             |
| 08.09 | Perform calculations to determine image magnification and percent magnification.             |
| 08.10 | Summarize the relationship of factors that control and affect distortion.                    |
| 08.11 | Explain the rationale for using beam restriction devices.                                    |
| 08.12 | Describe the operation and applications for different types of beam restriction.             |
| 08.13 | Explain how beam filtration affects x-ray beam intensity, beam quality and patient exposure. |
| 08.14 | Describe the change in the half-value layer (HVL) when filtration is added or removed.       |
| 08.15 | Describe the impact of sampling frequency on spatial resolution.                             |
| 08.16 | Define sampling frequency.                                                                   |
| 08.17 | Describe the impact of detector element size on spatial resolution.                          |
| 08.18 | Describe the Nyquist-Shannon theorem as it relates to sampling frequency.                    |
| 08.19 | Describe the process of image stitching.                                                     |

**Course Number: RTE0505**  
**Occupational Completion Point: A**  
**Radiographic Procedures I – 96 Hours**

|       |                                                                                                                                                                                                            |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 09.0  | Demonstrate an understanding of the structure and function of the human body with a focus on the muscular, endocrine, respiratory, urinary and appendicular skeletal systems. The student will be able to: |
| 09.01 | Discuss the basics of anatomical nomenclature.                                                                                                                                                             |
| 09.02 | Classify tissue types, describe the functional characteristics of each and give examples of their location within the human body.                                                                          |
| 09.03 | Describe the composition and characteristics of bone.                                                                                                                                                      |
| 09.04 | Identify and locate the bones of the human skeleton.                                                                                                                                                       |
| 09.05 | Identify bony processes and depressions found on the human skeleton.                                                                                                                                       |
| 09.06 | Summarize the functions of the skeletal system.                                                                                                                                                            |

|       |                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 09.07 | Label different types of articulations.                                                                                                            |
| 09.08 | Compare the types, locations and movements permitted by the different types of articulations.                                                      |
| 09.09 | Examine how muscle is organized at the gross and microscopic levels.                                                                               |
| 09.10 | Differentiate between the structures of each type of muscle tissue.                                                                                |
| 09.11 | State the function of each type of muscle tissue.                                                                                                  |
| 09.12 | Name and locate the major muscles of the skeleton.                                                                                                 |
| 09.13 | Define endocrine.                                                                                                                                  |
| 09.14 | Describe the characteristics and functions of the components that comprise the endocrine system.                                                   |
| 09.15 | Differentiate between peritoneum, omentum and mesentery.                                                                                           |
| 09.16 | Label the components of the respiratory system.                                                                                                    |
| 09.17 | Describe the physiology and regulation of respiration.                                                                                             |
| 09.18 | Label the parts of the kidneys, ureters, bladder and urethra.                                                                                      |
| 09.19 | Describe the function of each organ of the urinary system.                                                                                         |
| 09.20 | Describe the composition and formation of urine.                                                                                                   |
| 09.21 | Explain micturition.                                                                                                                               |
| 09.22 | Identify major sectional anatomical structures found within the head and neck, thorax and abdomen.                                                 |
| 10.0  | Demonstrate proficiency in the skills, techniques and knowledge required to perform accurate radiographic procedures. The student will be able to: |
| 10.01 | Describe standard positioning terms.                                                                                                               |
| 10.02 | Demonstrate proper use of positioning aids.                                                                                                        |
| 10.03 | Discuss general procedural considerations for radiographic exams.                                                                                  |
| 10.04 | Identify methods and barriers of communication and describe how each may be used or overcome effectively during patient education.                 |
| 10.05 | Explain radiographic procedures to patients/family members.                                                                                        |

|       |                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------|
| 10.06 | Modify directions to patients with various communication problems.                                 |
| 10.07 | Develop an awareness of cultural factors that necessitate adapting standard exam protocols.        |
| 10.08 | Adapt general procedural considerations to specific clinical settings.                             |
| 10.09 | Identify the structures demonstrated on routine radiographic images.                               |
| 10.10 | Adapt radiographic procedures for special considerations.                                          |
| 10.11 | Simulate radiographic procedures on a person or phantom in a laboratory or clinical setting.       |
| 10.12 | Evaluate images for positioning, centering, appropriate anatomy and overall image quality.         |
| 10.13 | Discuss equipment and supplies necessary to complete basic radiographic procedures.                |
| 10.14 | Explain the routine and special positions and projections for all radiographic procedures.         |
| 10.15 | Describe the general purpose of radiographic studies.                                              |
| 10.16 | Apply general radiation safety and protection practices associated with radiographic examinations. |
| 10.17 | Define region of interest (ROI).                                                                   |
| 10.18 | Define basic terms related to indications and contraindications related to imaging studies.        |

**Course Number: RTE0809**  
**Occupational Completion Point: A**  
**Clinical Education I – 312 Hours**

*Clinical Education I* provides a foundational practicum in which students are expected to apply skills learned in *Fundamentals of Radiologic Technology* and *Radiographic Procedures I*. The course objectives in *Clinical Education I* repeat in subsequent practicums of clinical education due to the progressive approach to student competency and proficiency. This course is a necessary prerequisite for advancing to *Clinical Education II*.

The content and clinical practice experiences within the course of *Clinical Education I* are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential and competency-based clinical assignments, students will adopt and apply concepts of team practice, radiation protection, and become skillful in patient-centered clinical practice while developing professional expertise and conduct that are discussed, examined and evaluated.

*Clinical Education I* provides students with practical experiences in patient care and assessment, fosters competent performance of radiologic imaging and impacts total quality management standards. Levels of competency and performance outcomes are measured at six-week intervals.

|                                                                                                                                                                                                                                           |                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| This is designed to ensure the well-being of patients before, during and after performance of radiologic procedures. The evaluative measurement tools provide a mechanism that ensures progression of student competency and proficiency. |                                                                                                                                                                                 |
| 11.0                                                                                                                                                                                                                                      | Demonstrate the proficiency in the skills and knowledge required of clinical practice. The student will be able to:                                                             |
| 11.01                                                                                                                                                                                                                                     | Exercise the priorities required in daily clinical practice.                                                                                                                    |
| 11.02                                                                                                                                                                                                                                     | Execute medical imaging procedures under the appropriate level of supervision.                                                                                                  |
| 11.03                                                                                                                                                                                                                                     | Adhere to team practice concepts that focus on organizational theories, roles of team members and conflict resolution.                                                          |
| 11.04                                                                                                                                                                                                                                     | Adapt to changes and varying clinical situations.                                                                                                                               |
| 11.05                                                                                                                                                                                                                                     | Describe the role of health care team members in responding/reacting to a local or national emergency.                                                                          |
| 11.06                                                                                                                                                                                                                                     | Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.                                |
| 11.07                                                                                                                                                                                                                                     | Integrate the use of appropriate and effective written, oral and nonverbal communication with patients, the public and members of the health care team in the clinical setting. |
| 11.08                                                                                                                                                                                                                                     | Integrate appropriate personal and professional values into clinical practice.                                                                                                  |
| 11.09                                                                                                                                                                                                                                     | Recognize the influence of professional values on patient care.                                                                                                                 |
| 11.10                                                                                                                                                                                                                                     | Explain how a person's cultural beliefs toward illness and health affect his or her health status.                                                                              |
| 11.11                                                                                                                                                                                                                                     | Use patient and family education strategies appropriate to the comprehension level of the patient/family.                                                                       |
| 11.12                                                                                                                                                                                                                                     | Provide desired psychosocial support to the patient and family.                                                                                                                 |
| 11.13                                                                                                                                                                                                                                     | Demonstrate competent assessment skills through effective management of the patient's physical and mental status.                                                               |
| 11.14                                                                                                                                                                                                                                     | Respond appropriately to medical emergencies.                                                                                                                                   |
| 11.15                                                                                                                                                                                                                                     | Examine demographic factors that influence patient compliance with medical care.                                                                                                |
| 11.16                                                                                                                                                                                                                                     | Adapt procedures to meet age-specific, disease-specific and cultural needs of patients.                                                                                         |
| 11.17                                                                                                                                                                                                                                     | Assess the patient and record clinical history.                                                                                                                                 |
| 11.18                                                                                                                                                                                                                                     | Demonstrate basic life support procedures.                                                                                                                                      |
| 11.19                                                                                                                                                                                                                                     | Use appropriate charting/electronic documentation methods.                                                                                                                      |
| 11.20                                                                                                                                                                                                                                     | Recognize life-threatening electrocardiogram (ECG) tracing.                                                                                                                     |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.21 | Apply standard and transmission-based precautions.                                                                                                                             |
| 11.22 | Apply the appropriate medical asepsis and sterile technique.                                                                                                                   |
| 11.23 | Demonstrate competency in the principles of radiation protection standards.                                                                                                    |
| 11.24 | Apply the principles of total quality management.                                                                                                                              |
| 11.25 | Report equipment malfunctions.                                                                                                                                                 |
| 11.26 | Examine procedure orders for accuracy and make corrective actions when applicable.                                                                                             |
| 11.27 | Demonstrate safe, ethical and legal practices.                                                                                                                                 |
| 11.28 | Integrate the radiographer's practice standards into clinical practice setting.                                                                                                |
| 11.29 | Maintain patient confidentiality standards and meet HIPAA requirements.                                                                                                        |
| 11.30 | Demonstrate the principles of transferring, positioning and immobilizing patients.                                                                                             |
| 11.31 | Comply with departmental and institutional response to emergencies, disasters and accidents.                                                                                   |
| 11.32 | Differentiate between emergency and non-emergency procedures.                                                                                                                  |
| 11.33 | Adhere to national, institutional and departmental standards, policies and procedures regarding care of patients, providing radiologic procedures and reducing medical errors. |
| 11.34 | Select technical factors to produce quality diagnostic images with the lowest radiation exposure possible.                                                                     |
| 11.35 | Critique images for appropriate anatomy, image quality and patient identification.                                                                                             |
| 11.36 | Determine corrective measures to improve inadequate images.                                                                                                                    |

**Course Number: RTE0450**

**Occupational Completion Point: B**

**Radiographic Imaging & Exposure II – 90 Hours**

|       |                                                                                                                                                                                                                                    |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12.0  | Convey an understanding of the principles of imaging and the various factors that contribute to accuracy including image acquisition and processing, scatter radiation control, and image evaluation. The student will be able to: |
| 12.01 | Summarize the relationship of factors affecting scattered radiation.                                                                                                                                                               |
| 12.02 | Evaluate the effects of scattered radiation on the image.                                                                                                                                                                          |
| 12.03 | Compare grid types.                                                                                                                                                                                                                |

|       |                                                                                                                                            |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 12.04 | Select the most appropriate grid for a given clinical situation.                                                                           |
| 12.05 | Interpret grid efficiency in terms of grid ratio and frequency.                                                                            |
| 12.06 | Summarize the factors that influence grid cutoff.                                                                                          |
| 12.07 | Evaluate grid artifacts.                                                                                                                   |
| 12.08 | Explain the use of radiographic technique charts.                                                                                          |
| 12.09 | Explain exposure factor considerations involved in selecting techniques.                                                                   |
| 12.10 | Compare fixed kilovoltage peak (kVp) and variable kVp systems.                                                                             |
| 12.11 | Apply the reciprocity law to clinical situations.                                                                                          |
| 12.12 | Apply conversion factors for changes in the following areas: distance, grid, image receptors, reciprocity law and 15 percent rule.         |
| 13.0  | Demonstrate an understanding of the concepts and equipment required of digital image acquisition and display. The student will be able to: |
| 13.01 | Define terminology associated with digital imaging systems.                                                                                |
| 13.02 | Describe the various types of digital receptors.                                                                                           |
| 13.03 | Describe the response of digital detectors to exposure variations.                                                                         |
| 13.04 | Compare the advantages and limits of each receptor type.                                                                                   |
| 13.05 | Evaluate the spatial resolution of a digital imaging system.                                                                               |
| 13.06 | Describe the histogram and the process or histogram analysis as it relates to automatic rescaling and determining an exposure indicator.   |
| 13.07 | Relate the receptor exposure indicator values to technical factors, system calibration, part/beam/plate alignment and patient exposure.    |
| 13.08 | Describe the response of PSP systems to background and scatter radiation.                                                                  |
| 13.09 | Use appropriate means of scatter control.                                                                                                  |
| 13.10 | Avoid grid use errors associated with grid cutoff and Moiré effect.                                                                        |
| 13.11 | Identify common limitations and technical problems encountered when using PSP systems.                                                     |
| 13.12 | Employ appropriate beam/part/receptor alignment to avoid histogram analysis errors.                                                        |

|       |                                                                                                                                                                                      |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13.13 | Associate impact of image processing parameters to the image appearance.                                                                                                             |
| 13.14 | Apply the fundamental principles of radiographic exposure to digital detectors.                                                                                                      |
| 13.15 | Evaluate the effect of a given exposure change on histogram shape, data width and image appearance.                                                                                  |
| 13.16 | Describe the conditions that cause quantum mottle in a digital image.                                                                                                                |
| 13.17 | Formulate a procedure or process to minimize histogram analysis and rescaling errors.                                                                                                |
| 13.18 | Examine the potential impact of digital radiographic systems on patient exposure and methods of practicing the as low as reasonably achievable (ALARA) concept with digital systems. |
| 13.19 | Describe picture archival and communications system (PACS) and its function.                                                                                                         |
| 13.20 | Identify components of a PACS.                                                                                                                                                       |
| 13.21 | Define digital imaging and communications in medicine (DICOM).                                                                                                                       |
| 13.22 | Describe HIPAA concerns with electronic information.                                                                                                                                 |
| 13.23 | Identify common problems associated with retrieving/viewing images within a PACS.                                                                                                    |
| 13.24 | Describe the calculation of the exposure indicator (AAPM Task Group 116).                                                                                                            |
| 13.25 | Relate how the values of interest (VOI) impact image appearance.                                                                                                                     |
| 13.26 | Describe signal to noise (SNR) as it relates to digital radiography detectors.                                                                                                       |
| 13.27 | Describe modulation transfer function (MTF) as it relates to digital radiography detectors.                                                                                          |
| 13.28 | Describe contrast to noise (CNR) as it relates to digital radiography detectors.                                                                                                     |
| 13.29 | Describe detective quantum efficiency (DQE) for digital radiography detectors.                                                                                                       |
| 13.30 | Describe display monitor aspect ratio and its impact on image display                                                                                                                |
| 13.31 | Identify critical components of the DICOM header.                                                                                                                                    |
| 13.32 | Relate the location and size of the ROI to the appearance of the image and exposure indicator                                                                                        |
| 13.33 | Discuss the impact of viewing angle, luminance, ambient lighting and pixel size on image display.                                                                                    |

**Course Number: RTE0506**  
**Occupational Completion Point: B**  
**Radiographic Procedures II – 90 Hours**

Radiologic Procedures II is a continuation of Radiologic Procedures I and builds on the skills and knowledge obtained in that course. In addition to the course objectives included below in Radiologic Procedures II, standards are also repeated from Radiologic Procedures I due to the progressive approach to student competency and proficiency.

|       |                                                                                                                                                      |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14.0  | Demonstrate an understanding of the structure and function of the human body with a focus on the axial skeletal system. The student will be able to: |
| 14.01 | Describe articulations of the axial skeleton.                                                                                                        |
| 14.02 | Differentiate the primary and secondary curves of the spine.                                                                                         |
| 14.03 | Identify and locate the bones of the human axial skeleton.                                                                                           |
| 14.04 | Identify bony processes and depressions found on the human axial skeleton.                                                                           |
| 14.05 | Summarize the functions of the axial skeletal system.                                                                                                |
| 14.06 | Label different types of articulations specific to the axial skeletal system.                                                                        |

**Course Number: RTE0507**  
**Occupational Completion Point: B**  
**Radiographic Procedures III – 66 Hours**

Radiologic Procedures III is a continuation of Radiologic Procedures I and Radiologic Procedures II and builds on the skills and knowledge obtained in that course. In addition to the course objectives included below in Radiologic Procedures III, standards are also repeated from Radiologic Procedures I and Radiologic Procedures II due to the progressive approach to student competency and proficiency.

|       |                                                                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15.0  | Demonstrate an understanding of the structure and function of the human body with a focus on the circulatory/cardiovascular, digestive and reproductive systems. The student will be able to: |
| 15.01 | Describe the composition and characteristics of blood.                                                                                                                                        |
| 15.02 | List the types of blood cells and state their functions.                                                                                                                                      |
| 15.03 | Differentiate between blood plasma and serum.                                                                                                                                                 |
| 15.04 | Outline the clotting mechanism.                                                                                                                                                               |
| 15.05 | List the blood types.                                                                                                                                                                         |

|       |                                                                                                                               |
|-------|-------------------------------------------------------------------------------------------------------------------------------|
| 15.06 | Explain the term Rh factor.                                                                                                   |
| 15.07 | Explain the antigen/antibody relationship and its use in blood typing.                                                        |
| 15.08 | Label the parts of the human heart.                                                                                           |
| 15.09 | Describe the flow of blood through the body and identify the main vessels.                                                    |
| 15.10 | Describe the structure and function of arteries, veins and capillaries.                                                       |
| 15.11 | Differentiate between arterial blood in systemic circulation and arterial blood in pulmonary circulation.                     |
| 15.12 | Outline the major pathways of lymphatic circulation.                                                                          |
| 15.13 | Correlate cardiac electrophysiology to a normal ECG tracing.                                                                  |
| 15.14 | Label the anatomy of the male and female reproductive organs.                                                                 |
| 15.15 | Analyze the function of each of the male and female reproductive organs.                                                      |
| 15.16 | Describe the structures and functions of the components that comprise the human eye and ear.                                  |
| 15.17 | List the component body parts involved in the senses of smell and taste.                                                      |
| 15.18 | List the somatic senses.                                                                                                      |
| 15.19 | Describe the hard and soft palates.                                                                                           |
| 15.20 | Describe the structure and function of the tongue.                                                                            |
| 15.21 | Identify the structure, function and locations of the salivary glands.                                                        |
| 15.22 | List and label the accessory organs of the digestive system and describe their function.                                      |
| 15.23 | Describe the composition and characteristics of the primary organs of the digestive system.                                   |
| 15.24 | Describe the function(s) of each primary organ of the digestive system.                                                       |
| 15.25 | Differentiate between the layers of tissue that comprise the esophagus, stomach, small intestine, large intestine and rectum. |
| 15.26 | Identify the secretions and function of each accessory organ of the digestive system.                                         |
| 15.27 | Explain the purpose of digestion.                                                                                             |
| 15.28 | List the digestive processes that occur in the body.                                                                          |

|       |                                                                                                                                                    |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 16.0  | Demonstrate proficiency in the skills, techniques and knowledge required to perform accurate fluoroscopic procedures. The student will be able to: |
| 16.01 | Identify the structures demonstrated on routine fluoroscopic images.                                                                               |
| 16.02 | Adapt fluoroscopic procedures for special considerations.                                                                                          |
| 16.03 | Simulate fluoroscopic procedures on a person or phantom in a laboratory setting.                                                                   |
| 16.04 | Evaluate images for positioning, centering, appropriate anatomy and overall image quality.                                                         |
| 16.05 | Discuss equipment and supplies necessary to complete basic fluoroscopic procedures.                                                                |
| 16.06 | Explain the patient preparation necessary for various contrast and special studies.                                                                |
| 16.07 | Explain the routine and special positions/projections for all fluoroscopic procedures.                                                             |
| 16.08 | Explain the purpose for using contrast media.                                                                                                      |
| 16.09 | Name the type, dosage and route of administration of contrast media commonly used to perform radiographic contrast and special studies.            |
| 16.10 | Describe the general purpose of fluoroscopic studies.                                                                                              |
| 16.11 | Apply general radiation safety and protection practices associated with fluoroscopic examinations.                                                 |

**Course Number: RTE0819**  
**Occupational Completion Point: B**  
**Clinical Education II – 504 Hours**

*Clinical Education II* provides a foundational practicum in which students are expected to apply skills learned in *Fundamentals of Radiologic Technology and Radiographic Procedures I*. The course objectives in *Clinical Education II* repeat from *Clinical Education I* and in subsequent practicums of Clinical Education due to the progressive approach to student competency and proficiency. This course is a necessary prerequisite for advancing to *Clinical Education III*.

The content and clinical practice experiences within the course of *Clinical Education II* are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential and competency-based clinical assignments, students will adopt and apply concepts of team practice, radiation protection, and become skillful in patient-centered clinical practice while developing professional expertise and conduct that are discussed, examined and evaluated.

*Clinical Education II* provides students with practical experiences in patient care and assessment, fosters competent performance of radiologic imaging and impacts total quality management standards. Levels of competency and performance outcomes are measured at six-week intervals. This is designed to ensure the well-being of patients before, during and after performance of radiologic procedures. The evaluative measurement tools provide a mechanism that ensures progression of student competency and proficiency.

|       |                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       |                                                                                                                                                                                 |
| 11.0  | Demonstrate the proficiency in the skills and knowledge required of clinical practice. The student will be able to:                                                             |
| 11.01 | Exercise the priorities required in daily clinical practice.                                                                                                                    |
| 11.02 | Execute medical imaging procedures under the appropriate level of supervision.                                                                                                  |
| 11.03 | Adhere to team practice concepts that focus on organizational theories, roles of team members and conflict resolution.                                                          |
| 11.04 | Adapt to changes and varying clinical situations.                                                                                                                               |
| 11.05 | Describe the role of health care team members in responding/reacting to a local or national emergency.                                                                          |
| 11.06 | Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.                                |
| 11.07 | Integrate the use of appropriate and effective written, oral and nonverbal communication with patients, the public and members of the health care team in the clinical setting. |
| 11.08 | Integrate appropriate personal and professional values into clinical practice.                                                                                                  |
| 11.09 | Recognize the influence of professional values on patient care.                                                                                                                 |
| 11.10 | Explain how a person's cultural beliefs toward illness and health affect his or her health status.                                                                              |
| 11.11 | Use patient and family education strategies appropriate to the comprehension level of the patient/family.                                                                       |
| 11.12 | Provide desired psychosocial support to the patient and family.                                                                                                                 |
| 11.13 | Demonstrate competent assessment skills through effective management of the patient's physical and mental status.                                                               |
| 11.14 | Respond appropriately to medical emergencies.                                                                                                                                   |
| 11.15 | Examine demographic factors that influence patient compliance with medical care.                                                                                                |
| 11.16 | Adapt procedures to meet age-specific, disease-specific and cultural needs of patients.                                                                                         |
| 11.17 | Assess the patient and record clinical history.                                                                                                                                 |
| 11.18 | Demonstrate basic life support procedures.                                                                                                                                      |
| 11.19 | Use appropriate charting/electronic documentation methods.                                                                                                                      |
| 11.20 | Recognize life-threatening electrocardiogram (ECG) tracing.                                                                                                                     |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.21 | Apply standard and transmission-based precautions.                                                                                                                             |
| 11.22 | Apply the appropriate medical asepsis and sterile technique.                                                                                                                   |
| 11.23 | Demonstrate competency in the principles of radiation protection standards.                                                                                                    |
| 11.24 | Apply the principles of total quality management.                                                                                                                              |
| 11.25 | Report equipment malfunctions.                                                                                                                                                 |
| 11.26 | Examine procedure orders for accuracy and make corrective actions when applicable.                                                                                             |
| 11.27 | Demonstrate safe, ethical and legal practices.                                                                                                                                 |
| 11.28 | Integrate the radiographer's practice standards into clinical practice setting.                                                                                                |
| 11.29 | Maintain patient confidentiality standards and meet HIPAA requirements.                                                                                                        |
| 11.30 | Demonstrate the principles of transferring, positioning and immobilizing patients.                                                                                             |
| 11.31 | Comply with departmental and institutional response to emergencies, disasters and accidents.                                                                                   |
| 11.32 | Differentiate between emergency and non-emergency procedures.                                                                                                                  |
| 11.33 | Adhere to national, institutional and departmental standards, policies and procedures regarding care of patients, providing radiologic procedures and reducing medical errors. |
| 11.34 | Select technical factors to produce quality diagnostic images with the lowest radiation exposure possible.                                                                     |
| 11.35 | Critique images for appropriate anatomy, image quality and patient identification.                                                                                             |
| 11.36 | Determine corrective measures to improve inadequate images.                                                                                                                    |

**Course Number: RTE0015**  
**Occupational Completion Point: C**  
**Advanced Modality Imaging – 54 Hours**

|       |                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 17.0  | Demonstrate an understanding of the structure and function of the human body with a focus on the nervous system. The student will be able to: |
| 17.01 | Differentiate between the structure and function of different types of nerve cells.                                                           |
| 17.02 | State the structure of the brain and the relationship of its component parts.                                                                 |
| 17.03 | Describe brain functions.                                                                                                                     |

|       |                                                                                                                                                                                                                                                                                               |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 17.04 | List the meninges and describe the function of each.                                                                                                                                                                                                                                          |
| 17.05 | Outline how cerebrospinal fluid forms, circulates and functions.                                                                                                                                                                                                                              |
| 17.06 | Describe the structure and function of the spinal cord.                                                                                                                                                                                                                                       |
| 17.07 | Determine the distribution and function of cranial and spinal nerves.                                                                                                                                                                                                                         |
| 17.08 | Summarize the structure and function of components that comprise the autonomic nervous system.                                                                                                                                                                                                |
| 18.0  | Demonstrate introductory knowledge of computed tomography. The student will be able to:                                                                                                                                                                                                       |
| 18.01 | Explain the difference between reconstructing and reformatting an image.                                                                                                                                                                                                                      |
| 18.02 | Cite the structures demonstrated on commonly performed CT images.                                                                                                                                                                                                                             |
| 18.03 | Describe commonly performed CT procedures.                                                                                                                                                                                                                                                    |
| 18.04 | Evaluate images for positioning, centering, appropriate anatomy and overall image quality                                                                                                                                                                                                     |
| 18.05 | Discuss equipment and supplies necessary to complete commonly performed CT procedures.                                                                                                                                                                                                        |
| 18.06 | Explain the CT acquisition protocol for commonly performed head/neck, thorax, and abdomen procedures.                                                                                                                                                                                         |
| 18.07 | Explain the patient preparation necessary for commonly performed CT contrast studies.                                                                                                                                                                                                         |
| 18.08 | Name the type, dosage purpose, and route of contrast administration for common CT procedures.                                                                                                                                                                                                 |
| 18.09 | Describe the components of the CT imaging system.                                                                                                                                                                                                                                             |
| 18.10 | Explain the functions of collimators in CT.                                                                                                                                                                                                                                                   |
| 18.11 | List the CT computer data processing steps.                                                                                                                                                                                                                                                   |
| 18.12 | Define algorithm and explain its impact on image scan factors and reconstruction.                                                                                                                                                                                                             |
| 18.13 | Define raw data and image data.                                                                                                                                                                                                                                                               |
| 18.14 | Describe the following terms in relation to the CT data acquisition process: <ul style="list-style-type: none"> <li>• Pixel.</li> <li>• Matrix.</li> <li>• Voxel.</li> <li>• Linear attenuation coefficient.</li> <li>• CT/Hounsfield number.</li> <li>• Partial volume averaging.</li> </ul> |

|       |                                                                                                                                                                                                                                           |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | <ul style="list-style-type: none"> <li>• Window width (ww) and window level (wl).</li> <li>• Spatial resolution.</li> <li>• Contrast resolution.</li> <li>• Noise.</li> <li>• Annotation.</li> <li>• Region of interest (ROI).</li> </ul> |
| 18.15 | Name the common controls found on CT operator consoles and describe how and why each is used.                                                                                                                                             |
| 18.16 | Identify the types and appearance of artifacts most commonly affecting CT images.                                                                                                                                                         |
| 18.17 | Name the radiation protection devices that can be used to reduce patient dose in CT and describe the correct application of each.                                                                                                         |
| 18.18 | Describe the general purpose of commonly performed CT studies.                                                                                                                                                                            |
| 18.19 | Discuss general radiation safety and protection practices associated with examinations in CT.                                                                                                                                             |
| 19.0  | Demonstrate appropriate venipuncture technique. The student will be able to:                                                                                                                                                              |
| 19.01 | Differentiate between the two major sites of intravenous drug administration.                                                                                                                                                             |
| 19.02 | Identify, describe and document complications associated with venipuncture and appropriate actions to resolve these complications.                                                                                                        |
| 19.03 | Discuss the various elements of initiating and discontinuing intravenous access.                                                                                                                                                          |
| 19.04 | Differentiate and document dose calculations for adult and pediatric patients.                                                                                                                                                            |
| 19.05 | Prepare for injection of contrast agents/intravenous medications using aseptic technique.                                                                                                                                                 |
| 19.06 | Explain the current legal status and professional liability issues of the radiographer's role in contrast and/or drug administration.                                                                                                     |
| 19.07 | Simulate appropriate venipuncture technique.                                                                                                                                                                                              |

| <b>Course Number RTE0780</b><br><b>Occupational Completion Point: C</b><br><b>Radiographic Pathology &amp; Directed Research – 86 Hours</b> |                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| 20.0                                                                                                                                        | Demonstrate an understanding of radiographic pathology. The student will be able to:                       |
| 20.01                                                                                                                                       | Define basic terms related to pathology.                                                                   |
| 20.02                                                                                                                                       | Describe the basic manifestations of pathological conditions and their relevance to radiologic procedures. |

|       |                                                                                                                                  |
|-------|----------------------------------------------------------------------------------------------------------------------------------|
| 20.03 | Discuss the classifications of trauma.                                                                                           |
| 20.04 | Describe imaging procedures used in diagnosing disease.                                                                          |
| 20.05 | List the causes of tissue disruption.                                                                                            |
| 20.06 | Describe the healing process.                                                                                                    |
| 20.07 | Identify complications connected with the repair and replacement of tissue.                                                      |
| 20.08 | Describe the various systemic classifications of disease in terms of etiology, types, common sites, complications and prognosis. |
| 20.09 | Describe the radiographic appearance of diseases.                                                                                |
| 20.10 | Identify imaging procedures and interventional techniques appropriate for diseases common to each body system.                   |
| 20.11 | Identify diseases caused by or connected to genetic factors.                                                                     |

**Course Number: RTE0610**  
**Occupational Completion Point: C**  
**Radiation Physics – 86 Hours**

|       |                                                                                                                                                           |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 21.0  | Demonstrate an understanding of how radiation is produced and the characteristics of different classifications of radiation. The student will be able to: |
| 21.01 | Describe fundamental atomic structure.                                                                                                                    |
| 21.02 | Describe the electromagnetic spectrum.                                                                                                                    |
| 21.03 | Describe wavelength and frequency and how they are related to velocity.                                                                                   |
| 21.04 | Explain the relationship of energy, wavelength and frequency.                                                                                             |
| 21.05 | Explain the wave-particle duality phenomena.                                                                                                              |
| 21.06 | Identify the properties of x-rays.                                                                                                                        |
| 21.07 | Describe the processes of ionization and excitation.                                                                                                      |
| 21.08 | Describe particulate radiation.                                                                                                                           |
| 21.09 | Differentiate between ionizing and nonionizing radiation.                                                                                                 |
| 21.10 | Describe radioactivity and radioactive decay in terms of alpha, beta and gamma emission.                                                                  |

|       |                                                                                                                              |
|-------|------------------------------------------------------------------------------------------------------------------------------|
| 21.11 | Compare the production of bremsstrahlung and characteristic radiations.                                                      |
| 21.12 | Describe the conditions necessary to produce x-radiation.                                                                    |
| 21.13 | Describe the x-ray emission spectrum.                                                                                        |
| 21.14 | Explain the factors that affect the x-ray emission spectrum.                                                                 |
| 21.15 | Discuss various photon interactions with matter.                                                                             |
| 21.16 | Discuss relationships of wavelength and frequency to beam characteristics.                                                   |
| 21.17 | Discuss the clinical significance of the photoelectric and modified scattering (Compton) interactions in diagnostic imaging. |
| 21.18 | Compare and contrast different types of radiation.                                                                           |

**Course Number: RTE0829**  
**Occupational Completion Point: C**  
**Clinical Education III – 220 Hours**

*Clinical Education III* provides a progressive practicum in sequence to *Clinical Education II* in which students are expected to apply skills learned in *Fundamentals of Radiologic Technology, Radiographic Procedures I, Radiographic Procedures II, Radiographic Procedures III* and all previously sequenced Clinical Education courses. The course objectives in *Clinical Education III* are repeated from *Clinical Education II* due to the progressive approach to student competency and proficiency. This course is a necessary prerequisite for advancing to *Clinical Education IV*.

The content and clinical practice experiences within the course of *Clinical Education III* are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential and competency-based clinical assignments, students will adopt and apply concepts of team practice, radiation protection, and become skillful in patient-centered clinical practice while developing professional expertise and conduct that are discussed, examined and evaluated.

*Clinical Education III* provides students with practical experiences in patient care and assessment, fosters competent performance of radiologic imaging and impacts total quality management standards. Levels of competency and performance outcomes are measured at six-week intervals. This is designed to ensure the well-being of patients before, during and after performance of radiologic procedures. The evaluative measurement tools provide a mechanism that ensures progression of student competency and proficiency.

|       |                                                                                                                     |
|-------|---------------------------------------------------------------------------------------------------------------------|
| 11.0  | Demonstrate the proficiency in the skills and knowledge required of clinical practice. The student will be able to: |
| 11.01 | Exercise the priorities required in daily clinical practice.                                                        |
| 11.02 | Execute medical imaging procedures under the appropriate level of supervision.                                      |

|       |                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.03 | Adhere to team practice concepts that focus on organizational theories, roles of team members and conflict resolution.                                                          |
| 11.04 | Adapt to changes and varying clinical situations.                                                                                                                               |
| 11.05 | Describe the role of health care team members in responding/reacting to a local or national emergency.                                                                          |
| 11.06 | Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.                                |
| 11.07 | Integrate the use of appropriate and effective written, oral and nonverbal communication with patients, the public and members of the health care team in the clinical setting. |
| 11.08 | Integrate appropriate personal and professional values into clinical practice.                                                                                                  |
| 11.09 | Recognize the influence of professional values on patient care.                                                                                                                 |
| 11.10 | Explain how a person's cultural beliefs toward illness and health affect his or her health status.                                                                              |
| 11.11 | Use patient and family education strategies appropriate to the comprehension level of the patient/family.                                                                       |
| 11.12 | Provide desired psychosocial support to the patient and family.                                                                                                                 |
| 11.13 | Demonstrate competent assessment skills through effective management of the patient's physical and mental status.                                                               |
| 11.14 | Respond appropriately to medical emergencies.                                                                                                                                   |
| 11.15 | Examine demographic factors that influence patient compliance with medical care.                                                                                                |
| 11.16 | Adapt procedures to meet age-specific, disease-specific and cultural needs of patients.                                                                                         |
| 11.17 | Assess the patient and record clinical history.                                                                                                                                 |
| 11.18 | Demonstrate basic life support procedures.                                                                                                                                      |
| 11.19 | Use appropriate charting/electronic documentation methods.                                                                                                                      |
| 11.20 | Recognize life-threatening electrocardiogram (ECG) tracing.                                                                                                                     |
| 11.21 | Apply standard and transmission-based precautions.                                                                                                                              |
| 11.22 | Apply the appropriate medical asepsis and sterile technique.                                                                                                                    |
| 11.23 | Demonstrate competency in the principles of radiation protection standards.                                                                                                     |
| 11.24 | Apply the principles of total quality management.                                                                                                                               |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.25 | Report equipment malfunctions.                                                                                                                                                 |
| 11.26 | Examine procedure orders for accuracy and make corrective actions when applicable.                                                                                             |
| 11.27 | Demonstrate safe, ethical and legal practices.                                                                                                                                 |
| 11.28 | Integrate the radiographer's practice standards into clinical practice setting.                                                                                                |
| 11.29 | Maintain patient confidentiality standards and meet HIPAA requirements.                                                                                                        |
| 11.30 | Demonstrate the principles of transferring, positioning and immobilizing patients.                                                                                             |
| 11.31 | Comply with departmental and institutional response to emergencies, disasters and accidents.                                                                                   |
| 11.32 | Differentiate between emergency and non-emergency procedures.                                                                                                                  |
| 11.33 | Adhere to national, institutional and departmental standards, policies and procedures regarding care of patients, providing radiologic procedures and reducing medical errors. |
| 11.34 | Select technical factors to produce quality diagnostic images with the lowest radiation exposure possible.                                                                     |
| 11.35 | Critique images for appropriate anatomy, image quality and patient identification.                                                                                             |
| 11.36 | Determine corrective measures to improve inadequate images.                                                                                                                    |

**Course Number RTE0839**

**Occupational Completion Point: C**

**Advanced Clinical Education IV – 340 Hours**

*Advanced Clinical Education IV* provides an advanced progressive practicum in sequence to *Clinical Education III* in which students are expected to apply skills learned in *Fundamentals of Radiologic Technology*, *Radiographic Procedures I, II and III*, *Radiographic Imaging I and II*, and all previously sequenced Clinical Education courses. The course objectives in *Clinical Education IV* are repeated from *Clinical Education III* due to the progressive approach to student competency and proficiency. This course is a necessary prerequisite for advancing to *Clinical Education V*.

The content and clinical practice experiences within the course of *Advanced Clinical Education IV* are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential and advanced competency-based clinical assignments, students will consistently demonstrate concepts of team practice; proficiency of skills in patient-centered clinical practice and radiation protection; and professional expertise and conduct that are discussed, examined and evaluated.

*Advanced Clinical Education IV* provides students with advanced practical experiences in patient care and assessment, fosters competent performance of radiologic imaging and impacts total quality management standards. *Advanced Clinical IV* includes practice in venipuncture skills and shadowing in advanced modality imaging. Levels of competency and performance outcomes are measured at six-week intervals. This is

|                                                                                                                                                                                                                                   |                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| designed to ensure the well-being of patients before, during and after performance of radiologic procedures. The evaluative measurement tools provide a mechanism that ensures progression of student competency and proficiency. |                                                                                                                                                                                 |
| 11.0                                                                                                                                                                                                                              | Demonstrate the proficiency in the skills and knowledge required of clinical practice. The student will be able to:                                                             |
| 11.01                                                                                                                                                                                                                             | Exercise the priorities required in daily clinical practice.                                                                                                                    |
| 11.02                                                                                                                                                                                                                             | Execute medical imaging procedures under the appropriate level of supervision.                                                                                                  |
| 11.03                                                                                                                                                                                                                             | Adhere to team practice concepts that focus on organizational theories, roles of team members and conflict resolution.                                                          |
| 11.04                                                                                                                                                                                                                             | Adapt to changes and varying clinical situations.                                                                                                                               |
| 11.05                                                                                                                                                                                                                             | Describe the role of health care team members in responding/reacting to a local or national emergency.                                                                          |
| 11.06                                                                                                                                                                                                                             | Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.                                |
| 11.07                                                                                                                                                                                                                             | Integrate the use of appropriate and effective written, oral and nonverbal communication with patients, the public and members of the health care team in the clinical setting. |
| 11.08                                                                                                                                                                                                                             | Integrate appropriate personal and professional values into clinical practice.                                                                                                  |
| 11.09                                                                                                                                                                                                                             | Recognize the influence of professional values on patient care.                                                                                                                 |
| 11.10                                                                                                                                                                                                                             | Explain how a person's cultural beliefs toward illness and health affect his or her health status.                                                                              |
| 11.11                                                                                                                                                                                                                             | Use patient and family education strategies appropriate to the comprehension level of the patient/family.                                                                       |
| 11.12                                                                                                                                                                                                                             | Provide desired psychosocial support to the patient and family.                                                                                                                 |
| 11.13                                                                                                                                                                                                                             | Demonstrate competent assessment skills through effective management of the patient's physical and mental status.                                                               |
| 11.14                                                                                                                                                                                                                             | Respond appropriately to medical emergencies.                                                                                                                                   |
| 11.15                                                                                                                                                                                                                             | Examine demographic factors that influence patient compliance with medical care.                                                                                                |
| 11.16                                                                                                                                                                                                                             | Adapt procedures to meet age-specific, disease-specific and cultural needs of patients.                                                                                         |
| 11.17                                                                                                                                                                                                                             | Assess the patient and record clinical history.                                                                                                                                 |
| 11.18                                                                                                                                                                                                                             | Demonstrate basic life support procedures.                                                                                                                                      |
| 11.19                                                                                                                                                                                                                             | Use appropriate charting/electronic documentation methods.                                                                                                                      |
| 11.20                                                                                                                                                                                                                             | Recognize life-threatening electrocardiogram (ECG) tracing.                                                                                                                     |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.21 | Apply standard and transmission-based precautions.                                                                                                                             |
| 11.22 | Apply the appropriate medical asepsis and sterile technique.                                                                                                                   |
| 11.23 | Demonstrate competency in the principles of radiation protection standards.                                                                                                    |
| 11.24 | Apply the principles of total quality management.                                                                                                                              |
| 11.25 | Report equipment malfunctions.                                                                                                                                                 |
| 11.26 | Examine procedure orders for accuracy and make corrective actions when applicable.                                                                                             |
| 11.27 | Demonstrate safe, ethical and legal practices.                                                                                                                                 |
| 11.28 | Integrate the radiographer's practice standards into clinical practice setting.                                                                                                |
| 11.29 | Maintain patient confidentiality standards and meet HIPAA requirements.                                                                                                        |
| 11.30 | Demonstrate the principles of transferring, positioning and immobilizing patients.                                                                                             |
| 11.31 | Comply with departmental and institutional response to emergencies, disasters and accidents.                                                                                   |
| 11.32 | Differentiate between emergency and non-emergency procedures.                                                                                                                  |
| 11.33 | Adhere to national, institutional and departmental standards, policies and procedures regarding care of patients, providing radiologic procedures and reducing medical errors. |
| 11.34 | Select technical factors to produce quality diagnostic images with the lowest radiation exposure possible.                                                                     |
| 11.35 | Critique images for appropriate anatomy, image quality and patient identification.                                                                                             |
| 11.36 | Determine corrective measures to improve inadequate images.                                                                                                                    |

**Course Number: RTE0380**

**Occupational Completion Point: C**

**Radiation Biology & Radiation Protection – 51 Hours**

|       |                                                                                                                                                                             |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 22.0  | Demonstrate an understanding of the structure and function of the human body including the immune system and chemical composition of the body. The student will be able to: |
| 22.01 | Describe the chemical composition of the human body.                                                                                                                        |
| 22.02 | Identify cell structure and elements of genetic control.                                                                                                                    |
| 22.03 | Explain the essentials of human metabolism.                                                                                                                                 |

|       |                                                                                                                                    |
|-------|------------------------------------------------------------------------------------------------------------------------------------|
| 22.04 | Differentiate between nonspecific defenses and specific immunity.                                                                  |
| 22.05 | Explain antibody production and function.                                                                                          |
| 22.06 | List the different types and functions of T- and B-cells and explain their functions.                                              |
| 23.0  | Demonstrate an understanding of the integral aspects of radiation biology required of a radiographer. The student will be able to: |
| 23.01 | Differentiate between ionic and covalent molecular bonds.                                                                          |
| 23.02 | Describe principles of cellular biology.                                                                                           |
| 23.03 | Identify sources of electromagnetic and particulate ionizing radiations.                                                           |
| 23.04 | Discriminate between the direct and indirect effects of radiation.                                                                 |
| 23.05 | Identify sources of radiation exposure.                                                                                            |
| 23.06 | Describe radiation-induced chemical reactions and potential biologic damage.                                                       |
| 23.07 | Evaluate factors influencing radiobiologic/biophysical events at the cellular and subcellular level.                               |
| 23.08 | Identify methods to measure radiation response.                                                                                    |
| 23.09 | Describe physical, chemical and biologic factors influencing radiation response of cells and tissues.                              |
| 23.10 | Explain factors influencing radiosensitivity.                                                                                      |
| 23.11 | Recognize the clinical significance of lethal dose (LD).                                                                           |
| 23.12 | Identify the radiosensitivity and radioresistency of specific cells.                                                               |
| 23.13 | Employ dose response curves to study the relationship between radiation dose levels and the degree of biologic response.           |
| 23.14 | Examine effects of limited vs. total body exposure.                                                                                |
| 23.15 | Relate short-term and long-term effects as a consequence of high and low radiation doses.                                          |
| 23.16 | Differentiate between somatic and genetic radiation effects and discuss specific diseases or syndromes associated with them.       |
| 23.17 | Discuss stochastic and deterministic effects.                                                                                      |
| 23.18 | Discuss embryonic and fetal effects of radiation exposure.                                                                         |
| 23.19 | Discuss risk estimates for radiation-induced malignancies.                                                                         |

|       |                                                                                                                                                                                              |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 23.20 | Discuss acute radiation syndromes.                                                                                                                                                           |
| 23.21 | Define basic terms related to dose differences.                                                                                                                                              |
| 24.0  | Convey the importance for proper radiation protection and the precautions radiographers should take to prevent unnecessary exposure to themselves and patients. The student will be able to: |
| 24.01 | Identify and justify the need to minimize unnecessary radiation exposure of humans.                                                                                                          |
| 24.02 | Explain the objectives of a radiation protection program.                                                                                                                                    |
| 24.03 | Define radiation and radioactivity units of measurement.                                                                                                                                     |
| 24.04 | Identify effective dose limits (EDL) for occupational and nonoccupational radiation exposure.                                                                                                |
| 24.05 | Describe the ALARA concept.                                                                                                                                                                  |
| 24.06 | Identify the basis for occupational exposure limits.                                                                                                                                         |
| 24.07 | Distinguish between perceived risk and comparable risk.                                                                                                                                      |
| 24.08 | Describe the concept of the negligible individual dose (NID).                                                                                                                                |
| 24.09 | Identify ionizing radiation sources from natural and man-made sources.                                                                                                                       |
| 24.10 | Comply with legal and ethical radiation protection responsibilities of radiation workers.                                                                                                    |
| 24.11 | Describe the relationship between irradiated area and effective dose.                                                                                                                        |
| 24.12 | Describe the theory and operation of radiation detection devices.                                                                                                                            |
| 24.13 | Identify appropriate applications and limitations for each radiation detection device.                                                                                                       |
| 24.14 | Describe how isoexposure curves are used for radiation protection.                                                                                                                           |
| 24.15 | Identify performance standards for beam-limiting devices.                                                                                                                                    |
| 24.16 | Describe procedures used to verify performance standards for equipment.                                                                                                                      |
| 24.17 | Describe the operation of various interlocking systems for equipment.                                                                                                                        |
| 24.18 | Identify conditions and locations evaluated in an area survey for radiation protection.                                                                                                      |
| 24.19 | Distinguish between controlled and non-controlled areas and list acceptable exposure levels.                                                                                                 |
| 24.20 | Describe “Radiation Area” signs and identify appropriate placement sites.                                                                                                                    |

|       |                                                                                                                                                                  |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 24.21 | Describe the function of federal, state and local regulations governing radiation protection practices.                                                          |
| 24.22 | Describe the qualifications and responsibilities of a radiation safety officer.                                                                                  |
| 24.23 | Express the need and importance of personnel monitoring for radiation workers.                                                                                   |
| 24.24 | Describe personnel monitoring devices, including applications, advantages and limitations for each device.                                                       |
| 24.25 | Interpret personnel monitoring reports.                                                                                                                          |
| 24.26 | Compare values for individual effective dose limits for occupational radiation exposures (annual and lifetime).                                                  |
| 24.27 | Identify effective dose limits for the embryo and fetus in occupationally exposed women.                                                                         |
| 24.28 | Distinguish between primary and secondary radiation barriers.                                                                                                    |
| 24.29 | Demonstrate how the operation of various x-ray and ancillary equipment influences radiation safety and describe the potential consequences of equipment failure. |
| 24.30 | Perform calculations of exposure with varying time, distance and shielding.                                                                                      |
| 24.31 | Discuss the relationship between workload, energy, half-value layer (HVL), tenth-value layer (TVL), use factor and shielding design.                             |
| 24.32 | Identify emergency procedures to be followed during failures of x-ray equipment.                                                                                 |
| 24.33 | Demonstrate how time, distance and shielding can be manipulated to keep radiation exposures to a minimum.                                                        |
| 24.34 | Explain the relationship of beam-limiting devices to patient radiation protection.                                                                               |
| 24.35 | Discuss added and inherent filtration in terms of the effect on patient dosage.                                                                                  |
| 24.36 | Explain the purpose and importance of patient shielding.                                                                                                         |
| 24.37 | Identify various types of patient shielding and state the advantages and disadvantages of each type.                                                             |
| 24.38 | Use the appropriate method of shielding for a given radiographic or fluoroscopic procedure.                                                                      |
| 24.39 | Explain the relationship of exposure factors to patient dosage.                                                                                                  |
| 24.40 | Explain how patient position affects dose to radiosensitive organs.                                                                                              |
| 24.41 | Identify the appropriate image receptor that will result in an optimum diagnostic image with the minimum radiation exposure to the patient.                      |
| 24.42 | Select the immobilization techniques used to eliminate voluntary motion.                                                                                         |

|       |                                                                                                                                         |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 24.43 | Describe the minimum source-to-tabletop distances for fixed and mobile fluoroscopic devices.                                            |
| 24.44 | Apply safety factors for the patient, health care personnel and family members in the room during radiographic/fluoroscopic procedures. |

**Course Number: RTE0849**  
**Occupational Completion Point: C**  
**Advanced Clinical Education V – 360 Hours**

*Advanced Clinical Education V* provides an advanced progressive practicum in sequence to *Advanced Clinical Education IV* in which students are expected to apply skills learned in *Fundamentals of Radiologic Technology*, *Radiographic Procedures I, II and III*, *Radiographic Imaging I and II*, and all previously sequenced Clinical Education courses. The course objectives in *Advanced Clinical Education V* are repeated from *Clinical Education IV* due to the progressive approach to student competency and proficiency.

The content and clinical practice experiences within the course of *Advanced Clinical Education V* are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential and advanced competency-based clinical assignments, students will consistently demonstrate concepts of team practice; proficiency of skills in patient-centered clinical practice and radiation protection; and professional expertise and conduct that are discussed, examined and evaluated.

*Advanced Clinical Education V* provides students with advanced practical experiences in patient care and assessment, fosters competent performance of radiologic imaging and impacts total quality management standards. *Advanced Clinical V* includes practice in venipuncture skills and shadowing in advanced modality imaging. Levels of competency and performance outcomes are measured at six-week intervals. This is designed to ensure the well-being of patients before, during and after performance of radiologic procedures. The evaluative measurement tools provide a mechanism that ensures that program standards of student competency and proficiency have been met.

|       |                                                                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.0  | Demonstrate the proficiency in the skills and knowledge required of clinical practice. The student will be able to:                                                             |
| 11.01 | Exercise the priorities required in daily clinical practice.                                                                                                                    |
| 11.02 | Execute medical imaging procedures under the appropriate level of supervision.                                                                                                  |
| 11.03 | Adhere to team practice concepts that focus on organizational theories, roles of team members and conflict resolution.                                                          |
| 11.04 | Adapt to changes and varying clinical situations.                                                                                                                               |
| 11.05 | Describe the role of health care team members in responding/reacting to a local or national emergency.                                                                          |
| 11.06 | Provide patient-centered, clinically effective care for all patients regardless of age, gender, disability, special needs, ethnicity or culture.                                |
| 11.07 | Integrate the use of appropriate and effective written, oral and nonverbal communication with patients, the public and members of the health care team in the clinical setting. |

|       |                                                                                                                   |
|-------|-------------------------------------------------------------------------------------------------------------------|
| 11.08 | Integrate appropriate personal and professional values into clinical practice.                                    |
| 11.09 | Recognize the influence of professional values on patient care.                                                   |
| 11.10 | Explain how a person's cultural beliefs toward illness and health affect his or her health status.                |
| 11.11 | Use patient and family education strategies appropriate to the comprehension level of the patient/family.         |
| 11.12 | Provide desired psychosocial support to the patient and family.                                                   |
| 11.13 | Demonstrate competent assessment skills through effective management of the patient's physical and mental status. |
| 11.14 | Respond appropriately to medical emergencies.                                                                     |
| 11.15 | Examine demographic factors that influence patient compliance with medical care.                                  |
| 11.16 | Adapt procedures to meet age-specific, disease-specific and cultural needs of patients.                           |
| 11.17 | Assess the patient and record clinical history.                                                                   |
| 11.18 | Demonstrate basic life support procedures.                                                                        |
| 11.19 | Use appropriate charting/electronic documentation methods.                                                        |
| 11.20 | Recognize life-threatening electrocardiogram (ECG) tracing.                                                       |
| 11.21 | Apply standard and transmission-based precautions.                                                                |
| 11.22 | Apply the appropriate medical asepsis and sterile technique.                                                      |
| 11.23 | Demonstrate competency in the principles of radiation protection standards.                                       |
| 11.24 | Apply the principles of total quality management.                                                                 |
| 11.25 | Report equipment malfunctions.                                                                                    |
| 11.26 | Examine procedure orders for accuracy and make corrective actions when applicable.                                |
| 11.27 | Demonstrate safe, ethical and legal practices.                                                                    |
| 11.28 | Integrate the radiographer's practice standards into clinical practice setting.                                   |
| 11.29 | Maintain patient confidentiality standards and meet HIPAA requirements.                                           |
| 11.30 | Demonstrate the principles of transferring, positioning and immobilizing patients.                                |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11.31 | Comply with departmental and institutional response to emergencies, disasters and accidents.                                                                                   |
| 11.32 | Differentiate between emergency and non-emergency procedures.                                                                                                                  |
| 11.33 | Adhere to national, institutional and departmental standards, policies and procedures regarding care of patients, providing radiologic procedures and reducing medical errors. |
| 11.34 | Select technical factors to produce quality diagnostic images with the lowest radiation exposure possible.                                                                     |
| 11.35 | Critique images for appropriate anatomy, image quality and patient identification.                                                                                             |
| 11.36 | Determine corrective measures to improve inadequate images.                                                                                                                    |

**Course Number: RTE0939**  
**Occupational Completion Point: C**  
**Radiography Seminar – 153 Hours**

*Radiography Seminar* provides the student a systematic approach to integrating, synthesizing, and evaluating program content knowledge to ensure adequate preparation for meeting the requirements for licensure in radiologic technology. This course provides evaluative assessment tools that aide the student in conveying and demonstrating mastery of the course objectives from all program content:

|       |                                                                                                                                 |
|-------|---------------------------------------------------------------------------------------------------------------------------------|
| 25.0  | Demonstrate proficiency in knowledge and skills required of a licensed radiologic technologist. The student will be able to:    |
| 25.01 | Summarize the ethics and laws that impact radiologic sciences at both the state and federal levels.                             |
| 25.02 | Describe the relevance of radiologic science as it pertains to the healthcare system.                                           |
| 25.03 | Apply a functional knowledge of medical terminology required in radiologic sciences.                                            |
| 25.04 | Integrate an understanding of pharmacology and demonstrate venipuncture procedures as it relates to the role of a radiographer. |
| 25.05 | Exhibit proficiency in the skills, techniques and knowledge required for image analysis.                                        |
| 25.06 | Exhibit proficiency in the skills, techniques and knowledge required to operate imaging equipment.                              |
| 25.07 | Define the principles of imaging and the various factors that contribute to accuracy.                                           |
| 25.08 | Apply knowledge and understanding of the structure and function of the human body.                                              |
| 25.09 | Demonstrate proficiency in the skills, techniques and knowledge required to perform accurate radiographic procedures.           |
| 25.10 | Relate an understanding of the concepts and equipment required of digital image acquisition and display.                        |
| 25.11 | Summarize how radiation is produced and the characteristics of different classifications of radiation.                          |

|       |                                                                                                                                                                   |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 25.12 | Identify radiographic pathology.                                                                                                                                  |
| 25.13 | Correlate the integral aspects of radiation biology with the role of a radiographer.                                                                              |
| 25.14 | Describe the importance for proper radiation protection and the precautions radiographers should take to prevent unnecessary exposure to themselves and patients. |

## Additional Information

### Laboratory Activities

Laboratory investigations that include scientific inquiry, research, measurement, problem solving, emerging technologies, tools and equipment, as well as, experimental, quality, and safety procedures are an integral part of this career and technical program/course. Laboratory investigations benefit all students by developing an understanding of the complexity and ambiguity of empirical work, as well as the skills required to manage, operate, calibrate and troubleshoot equipment/tools used to make observations. Students understand measurement error; and have the skills to aggregate, interpret, and present the resulting data. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635, F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, Illinois 60606-2901, (312) 704-5300, or any other appropriate accrediting agency acceptable to the American Registry of Radiologic Technologists (ARRT).

The program must also be approved by the Department of Health, Bureau of Radiation Control so that the graduate is eligible for licensure in Florida as a Certified Radiologic Technologist. As specified in Chapter 468 Part IV, F.S. and Chapter 64E-3, F.A.C.

Radiographers provide patient services using imaging modalities, as directed by physicians qualified to order and/or perform radiologic procedures. Radiographers usually provide patient care essential to radiologic procedures, including exercising judgment when performing medical imaging procedures. When providing patient services, the radiographer adheres to the principles of radiation protection for the patient, self, and others.

Radiographers accurately demonstrate anatomical structures on various imaging receptors by knowledge of anatomy, positioning, radiographic technique, and radiation protection. Radiographers must also be able to recognize emergency patient conditions and initiate lifesaving first aid. Additional duties may include performing quality assurance, processing film, and keeping patient records. Radiographers may be required to perform some of these duties at the patient's bedside or in the operating room.

The policies and process by which students receive clinical education shall be published and made known to all concerned in order to avoid practices in which students are substituted for paid staff. Students shall not take the responsibility or the place of qualified staff. After demonstrating competency, students may be permitted to perform procedures with indirect supervision. Unsatisfactory radiographs shall be repeated only in the presence of a qualified radiographer.

Program completers will be eligible to make an application to take the National Registry examination. For further information contact: American Registry of Radiologic Technologists (ARRT), 1255 Northland Drive, St. Paul, MN 55120-1155, (651) 687-0048.

Students are encouraged to become members of their appropriate professional organizations such as the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

### **Career and Technical Student Organization (CTSO)**

~~HOSA: Future Health Professionals is the~~ CTSOs are co-curricular career and technical student ~~organization~~ organizations providing leadership training and reinforcing specific career and technical skills. - Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. -Other CTSOs not listed in this curriculum framework or recognized by the Florida Department of Education are permissible provided they support student mastery over the standards and benchmarks of this curriculum framework.

### **Cooperative Training – OJT**

On-the-job training is appropriate but not required for this program. Whenever offered, the rules, guidelines, and requirements specified in the OJT framework apply.

### **Basic Skills**

In Career Certificate programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C., the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Computation (Mathematics) and Communications (Reading and Language Arts). These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination.

Adult students with disabilities, as defined in Section 1004.02, Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01, F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College System Institution must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91, F.S.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their counselor and/or instructors. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Note: postsecondary curriculum and regulated secondary programs cannot be modified.
