Code of Federal Regulations

Title 42 - Public Health

Volume: 5

Date: 2014-10-01

Original Date: 2014-10-01

Title: Section 483.25 - Quality of care.

Context: Title 42 - Public Health. CHAPTER IV - CENTERS FOR MEDICARE & MEDICAID

SERVICES, DEPARTMENT OF HEALTH AND HUMAN SERVICES (CONTINUED).

SUBCHAPTER G - STANDARDS AND CERTIFICATION. PART 483 - REQUIREMENTS FOR STATES AND LONG TERM CARE FACILITIES. Subpart B - Requirements for Long Term Care

Facilities.

§ 483.25 Quality of care.

Each resident must receive and the facility must provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being, in accordance with the comprehensive assessment and plan of care.

- (a) Activities of daily living. Based on the comprehensive assessment of a resident, the facility must ensure that—
- (1) A resident's abilities in activities of daily living do not diminish unless circumstances of the individual's clinical condition demonstrate that diminution was unavoidable. This includes the resident's ability to—
- (i) Bathe, dress, and groom;
- (ii) Transfer and ambulate;
- (iii) Toilet;
- (iv) Eat; and
- (v) Use speech, language, or other functional communication systems.
- (2) A resident is given the appropriate treatment and services to maintain or improve his or her abilities specified in paragraph (a)(1) of this section; and
- (3) A resident who is unable to carry out activities of daily living receives the necessary services to maintain good nutrition, grooming, and personal and oral hygiene.
- (b) Vision and hearing. To ensure that residents receive proper treatment and assistive devices to maintain vision and hearing abilities, the facility must, if necessary, assist the resident—
- In making appointments, and
- (2) By arranging for transportation to and from the office of a practitioner specializing in the treatment of vision or hearing impairment or the office of a professional specializing in the provision of vision or hearing assistive devices.
- (c) Pressure sores. Based on the comprehensive assessment of a resident, the facility must ensure that—
- (1) A resident who enters the facility without pressure sores does not develop pressure sores unless the individual's clinical condition demonstrates that they were unavoidable; and
- (2) A resident having pressure sores receives necessary treatment and services to promote healing, prevent infection and prevent new sores from developing.

- (d) *Urinary Incontinence*. Based on the resident's comprehensive assessment, the facility must ensure that—
- (1) A resident who enters the facility without an indwelling catheter is not catheterized unless the resident's clinical condition demonstrates that catheterization was necessary; and
- (2) A resident who is incontinent of bladder receives appropriate treatment and services to prevent urinary tract infections and to restore as much normal bladder function as possible.
- (e) Range of motion. Based on the comprehensive assessment of a resident, the facility must ensure that—
- (1) A resident who enters the facility without a limited range of motion does not experience reduction in range of motion unless the resident's clinical condition demonstrates that a reduction in range of motion is unavoidable; and
- (2) A resident with a limited range of motion receives appropriate treatment and services to increase range of motion and/or to prevent further decrease in range of motion.
- (f) Mental and Psychosocial functioning. Based on the comprehensive assessment of a resident, the facility must ensure that—
- (1) A resident who displays mental or psychosocial adjustment difficulty, receives appropriate treatment and services to correct the assessed problem, and
- (2) A resident whose assessment did not reveal a mental or psychosocial adjustment difficulty does not display a pattern of decreased social interaction and/or increased withdrawn, angry, or depressive behaviors, unless the resident's clinical condition demonstrates that such a pattern was unavoidable.
- (g) Naso-gastric tubes. Based on the comprehensive assessment of a resident, the facility must ensure that—
- (1) A resident who has been able to eat enough alone or with assistance is not fed by naso-gastric tube unless the resident's clinical condition demonstrates that use of a naso-gastric tube was unavoidable; and
- (2) A resident who is fed by a naso-gastric or gastrostomy tube receives the appropriate treatment and services to prevent aspiration pneumonia, diarrhea, vomiting, dehydration, metabolic abnormalities, and nasal-pharyngeal ulcers and to restore, if possible, normal eating skills
- (h) Accidents. The facility must ensure that—
- (1) The resident environment remains as free of accident hazards as is possible; and
- (2) Each resident receives adequate supervision and assistance devices to prevent accidents.
- (i) Nutrition. Based on a resident's comprehensive assessment, the facility must ensure that a resident—
- (1) Maintains acceptable parameters of nutritional status, such as body weight and protein levels, unless the resident's clinical condition demonstrates that this is not possible; and
- (2) Receives a therapeutic diet when there is a nutritional problem.
- (j) Hydration. The facility must provide each resident with sufficient fluid intake to maintain proper hydration and health.
- (k) Special needs. The facility must ensure that residents receive proper treatment and care for the following special services:
- (1) Injections;
- (2) Parenteral and enteral fluids;
- (3) Colostomy, ureterostomy, or ileostomy care;

- (4) Tracheostomy care;
- (5) Tracheal suctioning;
- (6) Respiratory care;
- (7) Foot care; and
- (8) Prostheses.
- (I) *Unnecessary drugs*—(1) *General.* Each resident's drug regimen must be free from unnecessary drugs. An unnecessary drug is any drug when used:
- (i) In excessive dose (including duplicate drug therapy); or
- (ii) For excessive duration; or
- (iii) Without adequate monitoring; or
- (iv) Without adequate indications for its use; or
- (v) In the presence of adverse consequences which indicate the dose should be reduced or discontinued; or
- (vi) Any combinations of the reasons above.
- (2) Antipsychotic Drugs. Based on a comprehensive assessment of a resident, the facility must ensure that—
- (i) Residents who have not used antipsychotic drugs are not given these drugs unless antipsychotic drug therapy is necessary to treat a specific condition as diagnosed and documented in the clinical record; and
- (ii) Residents who use antipsychotic drugs receive gradual dose reductions, and behavioral interventions, unless clinically contraindicated, in an effort to discontinue these drugs.
- (m) Medication Errors. The facility must ensure that—
- (1) It is free of medication error rates of five percent or greater; and
- (2) Residents are free of any significant medication errors.
- (n) Influenza and pneumococcal immunizations—(1) Influenza. The facility must develop policies and procedures that ensure that—
- (i) Before offering the influenza immunization, each resident or the resident's legal representative receives education regarding the benefits and potential side effects of the immunization;
- (ii) Each resident is offered an influenza immunization October 1 through March 31 annually, unless the immunization is medically contraindicated or the resident has already been immunized during this time period;
- (iii) The resident or the resident's legal representative has the opportunity to refuse immunization; and
- (iv) The resident's medical record includes documentation that indicates, at a minimum, the following:
- (A) That the resident or resident's legal representative was provided education regarding the benefits and potential side effects of influenza immunization; and
- (B) That the resident either received the influenza immunization or did not receive the influenza immunization due to medical contraindications or refusal.
- (2) Pneumococcal disease. The facility must develop policies and procedures that ensure that—

- (i) Before offering the pneumococcal immunization, each resident or the resident's legal representative receives education regarding the benefits and potential side effects of the immunization;
- (ii) Each resident is offered a pneumococcal immunization, unless the immunization is medically contraindicated or the resident has already been immunized;
- (iii) The resident or the resident's legal representative has the opportunity to refuse immunization; and
- (iv) The resident's medical record includes documentation that indicates, at a minimum, the following:
- (A) That the resident or resident's legal representative was provided education regarding the benefits and potential side effects of pneumococcal immunization; and
- (B) That the resident either received the pneumococcal immunization or did not receive the pneumococcal immunization due to medical contraindication or refusal.
- (v) Exception. As an alternative, based on an assessment and practitioner recommendation, a second pneumococcal immunization may be given after 5 years following the first pneumococcal immunization, unless medically contraindicated or the resident or the resident's legal representative refuses the second immunization.
